5 Supplements That Will Boost Your Focus And Mental Energy

April 24, 2018 | by Sponsored Article | Link | Original Link

The following article is sponsored by Synapse Supplements.

As a man, you need to stay energized throughout the day in order to perform your best. Whether you're in the office, in the gym, or on a date, maintaining your energy levels is vital for both your brain and your body. Fatigue can easily keep you from doing the things you need or want to do.

At the same time, you don't want to rely on sugar-filled energy drinks and other high-calorie, junk food to yourself awake. Here are five ways you can easily keep your energy levels constant throughout the day…

1. Coffee

While many people know coffee as a reliable way to boost energy levels, they don't know that it has cognitive benefits beyond giving you a kick in the pants. Caffeine causes the creation of dopamine in the brain, which is how it provides energy, but coffee in particular can help burn fat, improve physical performance, and provide vital nutrients such as potassium and magnesium.

If that's not enough, coffee has also been shown to aid in the prevention of Alzheimer's disease, dementia, type 2 diabetes, and a number of other cognition-related disorders. In short, coffee is one of the best cognitive enhancers a man can use, and it's also one of the easiest to get a hold of. Far from a bad habit, a morning cup of coffee will help keep your brain sharp and your energy levels high for years to come.

2. B Vitamins

[image]

B vitamins provide the body with physical energy, enabling you to stay alert and perform strenuous activities for longer periods. B vitamin deficiencies have been linked to various physical and mental ailments; for example, a lack of folate can lead to birth defects such as spina bifida. Because of this, B vitamins are a vital part of any man's diet.

While B vitamins can be obtained through supplements, many common foods and drinks also naturally contain them. For example, riboflavin (vitamin B2) and pantothenic acid (Vitamin B5) can be found in coffee, which is part of what makes it a useful drink. Vitamin B6 is plentiful in poultry, fish, and beans, while folate can be found in most fruits and vegetables.

3. Omega-3 and DHA

Omega-3 and DHA (docosahexaenoic acid) are fatty acids that have been scientifically proven to be vital for brain health. Regular doses of these substances, either in supplement form or found in fish, help shore up cognitive function and reduce the likelihood of developing dementia and other degenerative disorders. However, omega-3 and DHA also have benefits to your energy levels.

Loading...

When combined with uridine, omega-3 and DHA aid the brain in repairing dopamine receptors, providing more energy in your day-to-day life and enhancing the effect of dopamine-creating substances such as caffeine. Omega-3 and DHA also increase dopamine production when used in combination with uridine, providing even more of an energy boost. This is why Synapse gBoost includes uridine as part of its formula for enhanced cognition and energy.

4. Vitamin D3

Vitamin D3 is one of the most neglected vitamins when it comes to providing energy. Indeed, many people today don’t receive nearly enough of it due to the quirks of modern living. Scientific studies show that vitamin D3 deficiencies are linked with fatigue in humans, making it doubly important that you get more of this vital nutrient. Vitamin D3 is also necessary to maintain strong bones, important if you wish to lift or engage in physical activity.

While Vitamin D3 can be taken in supplement form as well as found in some foods, such as tuna, sardines, and fatty fish, the easiest way to get it is from sun exposure. The vast majority of humans take in vitamin D3 through exposure to the sun’s rays, and modern deficiencies in humans are linked to the greater amounts of time we spend indoors. If you want to improve your intake of Vitamin D3, the easiest way is to just take a walk every day if the sun is shining.

5. Cognitive Stack

While these various supplements and nutrients will aid you when it comes to improving your cognitive health, you need to go the extra mile if you want to keep your energy levels up. Because of this, a cognitive stack consisting of quality nootropics and other supplements is mandatory if you want to stay at peak performance.

Synapse gBoost is one of the finest cognitive stacks available on the market today. Combining seven different natural ingredients into one handy product, gBoost is shown to enhance focus, memory, and mental energy in men. Among these ingredients are uridine (mentioned above) and CDP choline, which boost focus and motivation. gBoost also includes bacopa monnieri and gingko biloba, two ingredients that work to increase memory and learning.

In particular, Synapse gBoost users have reported up to twelve hours of intense focus per day when using the product, and they also experience massively improved memory and verbal fluency. gBoost has also been shown to improve users' motivation, drive, and productivity, making it a fantastic addition to any man's diet.

Keeping your energy levels up is a crucial part of living in our modern, fast-paced world. If you want to succeed at work, with women, or at whatever else you put your mind to, you need to be able to perform your best. A combination of dietary changes and a quality cognitive stack will enable you to dominate throughout the day and stay healthy. **Click here to learn more about Synapse gBoost**.

How Cosmopolitan Magazine Profited From Women's Sexual Fantasies

April 25, 2018 | by Jared Trueheart | Link | Original Link

The manosphere has been writing about women's unrestrained sexual nature for years. If you include PUA material there's more than a decade's worth of writing. But that's nothing compared to Cosmopolitan magazine.

Men have written about this subject for several reasons: to be better at seducing women, to avoid relationships with loose women, and to acknowledge women's role in the cultural decline. But Cosmo writes about women's sexual nature as both fantasy and prescription. Unfortunately for all, that fantasy has become a reality.

Cosmo And Women’s Lib

During WWII, while men were at war, women took on their roles in the workplace. This was to ensure that America was manufacturing all the equipment it would need to win at war as well as keep society operating. When men came home from war and went back to work most women reclaimed their roles as wives, mothers, and matrons. But not all women. Some women stayed in the workforce and more women joined them each year. As they worked with men in a man’s world they wanted to be treated like men and “succeed” on men’s terms.

In the 1960’s, Helen Gurley Brown became the editor of Cosmo. She saw the writing on the wall and transformed the magazine so that it could take advantage of the changing times. She presented the magazine in a way that acknowledged women’s work fantasies (climbing the corporate ladder, sitting at the board with the men) and their personal fantasies (guilt-free promiscuity).

By associating sex with work Brown eliminated women’s guilty feelings about sex. In doing so she further equated women in the workforce to men in the workforce by shifting reader’s perspectives on feminine roles in society. If a woman works like a man, she should be guilt free about her promiscuity like a man. What working girl wouldn’t want to read that?

“Cosmo Girls”

Cosmopolitan began writing about fictional and abstract Cosmo girls. A Cosmo girl is both a fantasy to the reader (because such a woman only exists happily in fiction) and a prescription (Cosmo advises women how to be Cosmo girls). They are best represented in pop culture in two places.

The first is the movie Pretty Woman. It’s a romantic story about a street hooker, very new to hooking, who takes a rich, handsome millionaire as her John. She works him so well that he hires her to give him the girlfriend treatment for a while. In that while, he falls in love with her and she with him. It’s a story of a working girl using sex to get ahead. She doesn’t feel bad about being a hooker. In a strange way, it makes her stronger or sexier or more empowered. In the end, she gets everything she wants.

Loading…

The second example is Sex and the City. This show was about four working girls being promiscuous and discovering their own sexuality in the process. They learn something about themselves by boning various dudes. That self-discovery is empowering. In the meantime, they work, spend lavishly on clothes and eating out, take vacations, and have some of those various men fall in love with them.

The Readers

Initially, Cosmo's readers differed from its content. Whereas articles might be about upper-middle-class single-and-loving-it types, the readers were quite different. Most of Cosmo's audience was married women with jobs, not careers. They were clerical or service workers.

Cosmo first and foremost validated these women's fantasies. Nowadays in the manosphere, we learn that women's sexuality, without societal constraints, is hypergamous. Cosmo figured this out in the 60's and sold women their own fantasies while encouraging them to pursue those fantasies.

What are these poor girls learning?

Women’s Sexual Fantasies

Helen Gurley Brown figured out how to sell sex to women while they waited in the checkout line at the grocery store. She did this by identifying what women want to be sexually; a “free-spirited sexual adventuress wheeling and dealing in a laissez-faire world of sexual market relations.” The female fantasy is to be able to use her sexuality in market transactions for gain. This is why some articles advise women on how to be a better sexual object and some a better sexual subject.

It teaches them how to be better sexual objects by advising them on ways to be hotter (workouts advise, make-up advise, clothing advise, how to pleasure a man advise, etc…). This also helps them sell ads for related products. The goal just below the surface of the text is for a woman to be able to make men lust for her so badly that she can take what she wants from them.

As a sexual subject, Cosmo tells women that they have freedom of sexual agency. They choose how many guys they want to bone, when they want to bone, how the boning will proceed, and what they expect in return for sex.

Keep in mind, the primary audience of Cosmo until recently was primarily working, married women.

What Cosmo Offered

More than anything, Cosmo sent the message to working women that to get ahead at work the ends justify the means. And that the best tool women have to achieve that end is their sexuality. Cosmo offered women the fantasy that they were justified in their promiscuity whether for business or for pleasure. It’s no wonder Cosmo became so

popular and prophetic.

Women Use Social Networking To Feel Loved

April 25, 2018 | by Roosh Valizadeh | Link | Original Link

When the iPhone started gaining popularity, I wrote about how it makes women less capable of love. It puts them on such a thrilling roller coaster ride of attention and fleeting validation that the love of one man becomes just too boring. And now women are attempting to get that love back on social networking, through the very means that caused them to lose the ability to love in the first place.

A girl who shares a photo on Instagram, a status update on Facebook, or a tweet about her day is simply trying to receive love from people on the internet. There is no reason to share a photo with strangers unless in that moment you are feeling a lack of love, which is why it's most commonly done when a woman is alone. When she's experiencing a momentary feeling of emptiness or lack of attention, she shares a selfie and then relaxes from the soothing effects of dopamine as the likes and comments come in, all without having to understand or cater to the needs of others.

Unfortunately for the girl, this will not work in finding real love. She already damaged her love mechanism by swallowing whole all the depression-causing feedback loops that autistic Silicon Valley technologists threw at her, and now she's trying to get it back through piecemeal bytes from people she ultimately doesn't care about. It's the same as crushing your leg with a sledgehammer and then using the same sledgehammer to bang it back into place. To save your life, a doctor will end up having to amputate the leg.

The only possible treatment for a woman is to completely withdraw participation from social networking. She must never share anything personal online. She must only follow other people without commenting. She must never anticipate or hope for a potential response that could spike her dopamine. Combined with a healthy search for a male partner, she may be able to love again, but we all know that this asks too much of the modern female. Your average woman will not be able to quit all her social networking accounts and observe so many other women getting a million likes from strangers while she receives none, but unless she does this, the odds of her being content with the love from one man are zero. She will become a love amputee.

Loading…

It turns out that many men use social networking to feel love as well. If the intent of what you're sharing is to receive attention, compliments, and validation, you're starved of real-life love. When the only response to what you're sharing is discussion about *you*, the internet has become your lover. This is one of the reasons I've been so incompetent with managing my Instagram account. Sharing a photo of myself, where the only response can be likes on my image or comments about me, is love-thirst behavior, but I am still a human being and sometimes experience moments where I feel a lack of love. I'm still capable of love in real life, but I know that using the internet to receive it will just damage that ability. It turns out that sleeping with so many sluts did less harm to me than if I had

the habit of uploading a selfie every day.

If you want to predict whether the a woman you meet in the future will be satisfied by your love, ask yourself what trends you see with smartphone usage. Are women becoming more dependent on it or less? You already know the answer: women have showed absolutely no indication that they want to lessen their social networking usage, and if anything, they are doubling down to such an extent that they may even prefer it to normal friendships.

An entire generation of men have to suffer worsening relationships with women because a few hundred technologists wanted to create a utopia. Instead, they created a hell where the only time you'll be able to feel a little bit human is while staring at a tiny computer in your hand.

Masturbating Comes With More Downsides Than Upsides

April 26, 2018 | by Mo Saleem | Link | Original Link

I was 15 years old when an older blue pill cousin told me never to masturbate. He cited a verse from the Quran:

> The believers are those who protect their sexual organs except from their spouses… Therefore, whosoever seeks more beyond that (in sexual gratification), then they are the transgressors.

Having already dropped organized religion at that point, being a 'transgressor' wasn't really a cause of concern, and so, I continued with my daily wanks and dug deeper into the rabbit hole that is internet porn.

Fast forward to today and I'm the one preaching that you should quit masturbating, not because you'll go to hell if you do but because you'll live in hell if you don't stop.

Porn wires your brain to become a "voyeur"

> Porn trains your brain to become a “voyeur” who watches “others” have sex instead of seeking it. It programs the brain to be a spectator instead of an active participant in one’s sexual life. This “voyeurism” extends (subconsciously) to other areas of one’s life as he “watches” others succeed, achieve goals, and get the girls of his dreams.
>
> – From a thread on reddit.com/r/NoFap

Mainstream consciousness is programmed with a mentality of hero worship. Just look at the amount of rabid sports fans out there hoping for their favorite player to take the glory while they watch from the sidelines.

It’s okay to watch sports, but don’t let it get to the point where you become more emotionally invested in the success of other men than you are in your own success. Life is not a spectator sport, yet the majority of men are succeeding, fucking, and achieving vicariously through the lives of others.

I know a guy who says he doesn’t have time to lift weights, but has somehow managed to watch every single episode of House of Cards and every other popular show on Netflix. I know another guy who says he doesn’t have to time to read books, but knows exactly how many goals Cristiano Ronaldo has scored this season.

I’m sure you know men like these. Men that exemplify the spectator mentality. Men that spend their time watching other men penetrate life (and women) while completely neglecting their own growth and development. Billions of men are plagued by the spectator epidemic and step one to overcoming it is to stop watching porn.

What Sigmund Freud, Nikola Tesla, Isaac Newton, and Steve Jobs had in common

Other than producing work that changed the world for centuries, all of these men had mastered the art of sexual transmutation. In the words of Napoleon Hill:

> The desire for sexual expression is by far the strongest and most impelling of all the human emotions, and for this very reason this desire, when harnessed and transmuted into action, other than that of physical expression, may raise one to the status of a genius.

Add in Shakespeare, Hemingway, and Thoreau to that list and you've got the original NoFap pioneers. Victor Pride writes that semen is life-energy:

> When you waste your semen you are literally wasting your life-force.
>
> Loading...

Now, you might be wondering: *Is there any science to back this up?* Turns out, there is. When 28 healthy male volunteers abstained for 7-days, their testosterone levels shot up to 145.7% above baseline on day 7.

In another study, 10 healthy men were assessed for their testosterone levels before and after a 3-week period of abstinence. Across the board, the men had significantly higher testosterone levels after their period of abstinence.

Testosterone fuels your drive to succeed and abstinence is a proven way to build it up for more energy, focus, and motivation.

Does ejaculation affect testosterone?

I recently published a massive article to answer this question through the lens of 20+ scientific studies (which you can check out here), but the short answer is no: masturbation-induced ejaculation does not impact testosterone levels in the short-term.

That being said, studies done on rats found that excessive ejaculation significantly reduced androgen receptor density in their brains. Not only that, but it also significantly increased estrogen receptor density.

In other words: wank off too much and you run the risk of feminizing your brain. The effects of excessive ejaculation have not been looked at in humans, but researchers study rats because their primitive brain structures are surprisingly similar to ours.

In the words of molecular biologist J. Medina:

> Animal research acts as a guiding flashlight for human research, illuminating biological processes.

What about sex?

Physiologically, there is no difference between ejaculating from sex versus ejaculating from porn. Psychologically, however, there's a huge difference – pheromones, feelings of dominance, touch, etc. are all factors involved in sex that aren't involved in masturbation. These psychological differences go on to have a tremendous hormonal effect as well.

Forty-four men were assessed for their salivary testosterone levels during their time at a sex club. The men who had sex experienced a 72% increase in T. Even the men who merely watched others experienced an 11% increase.

In a study on heterosexual couples, both the men and women had higher testosterone on the nights they had sex versus the nights that they didn't. And in a cross-sectional study of elderly men, those with higher levels of sexual activity also had significantly higher levels of testosterone.

Conclusion

Stop watching porn because it enforces the spectator mentality. Practice strategic abstinence to build up your testosterone and enhance your creativity, discipline, and focus.

Although masturbation does not affect testosterone levels in the short term, excessive masturbation can have feminizing effects on your brain, and having sex with another person, rather than with your hand, involves factors other than ejaculation that play a role in spiking testosterone.

Masturbation is definitely something that I continue to struggle with. I relapsed just two days ago after 15 days of NoFap. But today, I've leveraged $100 on Stickk to go to the National Organization of Gay Marriage if I don't follow through on my NoFap commitment for 30 days. Who's with me?

3 Lessons In Duality And Paradox

April 26, 2018 | by Regan Jacklin | Link | Original Link

The Law of Paradoxical Unity is a major theme in the popular ancient Chinese text known as the Tao Te Ching. It states that the universe, and life, exist in a constantly fluctuating state of duality. In simpler terms: everything has an opposite, and neither opposite stays dominate forever.

After night, the sun always rises. After winter, summer will certainly come to pass. Where you find darkness, you find a place capable of illumination. And, where you find stress, you find an absence of peace. However, peace is still there somewhere or stress couldn't exist.

Paradoxical Unity has become a major foundation of my philosophy. The more I study and apply it, the more I realize its profound practical applications.

This post is a brief collection of dualities I've noticed in my own daily life. I hope they benefit you and inspire you to look for dualities in your life.

1. You Can Only Go As High As You've Been Low

My life has been one of high highs and low lows. I grew up without a father, battled cancer (and beat the bastard), and spent over a decade dealing with mental health issues like depression and anxiety. Beyond all that, and likely due to all that, I've had to deal with extremely low energy levels for significant periods of my life.

I've been to some seriously dark places—places I didn't think I'd make it out of. However, in hindsight, I wouldn't have wanted it any other way. These issues have carved my path. My issues kept me confined but, the harder I looked, it was as if life wanted me where I was.

Depression and anxiety brought me to spirituality out of desperation. Spirituality then brought me to writing which has turned out to be the love of my life as I get to explore and learn with you.

Beyond that, my low energy afforded me almost no leisure to do anything but read for well over an entire year. During this time, I learned so much about myself and the world that I can write for the rest of my life.

Destiny shows tough love. Temporarily.

Due to my previous lows, I am now capable of experiencing profound joy. I have an unparalleled appreciation for the basics of life which anyone who hasn't been in similar lows would take for granted. If you are in a rough place in your life, hold on. Know that it gets better. *Much better.*

The harder life is breaking you down, the higher it will lift you up. Hell and heaven cannot exist without each other—it is the law of paradoxical unity.

Just make sure to constantly look for ways that your problems might be of benefit to you. They might be trying to show you something or steer you in a particular direction—likely

the direction of perfection.

2. To Truly Please Yourself, You Must Abstain From Pleasure

Anything external that brings you pleasure will leave pain as it passes. This is one of the fundamental teachings of the Buddha.

Vices like alcohol and fast food will leave carnage in their wake, putting you in a state of lesser health. Coffee will provide you energy and then cause you to crash. Porn will skyrocket your pleasure centers, then leave you feeling weak and shameful.

Loading...
Whatever the source, you can be sure that if something provides you pleasure without effort, in time, it will cause you harm just as sure.

Always remember this… duality is law.

Ironically, the more you abstain from pleasure and master yourself, the more you will find happiness welling up from within. Self-mastery is the source of true confidence and personal power, both of which give rise to happiness—beyond the painful cycle of duality.

However, not all pleasures cause pain through health effects. If you rely on anything particular for your happiness, its very absence will cause you to suffer.

For example: I *love* to travel. In fact, I love to travel so much that I used to be depressed any time I wasn't travelling. Unfortunately, it isn't realistic to travel for the rest of my life or even 50% of it. Therefore, I was relying on fantasies to bring me happiness. By investing too heavily in what brought me pleasure, its absence brought me pain.

Another common example would be relationships. I don't think I need to explain the damaging effects caused by being overinvested in a relationship, only to have it fall apart.

Of course, you don't have to abstain from all pleasure. I still travel when I can. I'm also invested in a relationship. We just can't expect to find lasting satisfaction from anywhere

but within. So make sure you are happy at home. Metaphorically speaking.

3. Life Will Never Be Perfect – Unless It Is Already Perfect

Life is full of problems. One of the keys to happiness is recognizing that you will never be problem free. And then being okay with that.

What you resist will always persist. It is paradoxical unity. Therefore, stop fighting your problems mentally, change what you can, and then accept what you cannot change.

Refuse to believe that anything is important enough in life to ruin your happiness. Additionally, refuse to believe that acquiring anything would make you happier than you are currently.

Those problems you have? I know they are real. You already know I've been through my own gauntlet. However, the wise rejoice knowing that their greatest problems act as their greatest opportunities for growth.

If you view every problem as a challenge to remain happy through adversity, in time, you will be emotionally unstoppable. And you have already seen that your lows will return you with highs, so give yourself permission to be happy, *right now*. Let happiness become your compass and you will soon have lots to be happy about. And if you don't, you won't.

"There is no way to happiness, happiness is the way" – Thich Nhat Hanh

In Conclusion

As a law of nature, duality exists all around you. If you pay attention, you can begin to view your problems as opportunities, your setbacks as means of growth, and petty pleasures as pitfalls. If you go beyond duality, the whole world belongs to you.

3 Things You Need To Do To Avoid Aging Into An Old Prune

April 26, 2018 | by Sponsored Article | Link | Original Link

The following article is sponsored by Wadi Men's Care.

You may not know this, but your skin is the largest organ in your body. Your skin protects your other organs from exposure and is also responsible for contributing to your overall health. As a result, you need to keep it in shape, just like you need to lift weights, do cardio, and eat right in order to keep the other parts of your body in top shape.

Many people these days are aging poorly due to the fact that they don't take care of their skin. Keeping your skin in shape will make it easier for you to attract women and stay in peak physical condition. Here are three ways you can protect your skin so you age like a fine wine…

1. Spend less time in the sun

The biggest way that people damage their skin is by spending too much time in the sun. According to the World Health Organization, sun damage is responsible for up to 90 percent of visible signs of aging in humans. Effectively, this means that most of what people think is “natural” aging is merely damage caused by sun exposure. While it is important for people to get *some* sun on a regular basis, doing so without protection is a bad idea and leads to sunburns, wrinkles, and other artifacts of aging.

In general, human beings need at least thirty to sixty minutes of sun exposure per day in order to remain healthy. To strike a balance between sun exposure and aging protection, whenever you leave the house, you should use protection for your skin.

When you leave the house, you should wear a hat and clothing that covers up your body, and if you’re outdoors for an extended period of time, wear sunblock with an SPF rating of at least 50. This will allow you to garner the benefits of sun exposure while minimizing the negative aspects of it.

2. Reduce your smoking and alcohol consumption

Tobacco, alcohol, and drugs may be fun to use, but excessive consumption causes skin damage and accelerated aging. According to a study, heavy drinkers were 33 to 35 percent more likely to show visible signs of aging compared to moderate drinkers of teetotalers. Similarly, another study showed that smoking one pack of cigarettes per day increases your risk of accelerated aging by 41 percent. Individuals who moderated their alcohol/tobacco intake or avoided it entirely aged much more slowly.

Loading...

While there's nothing wrong with enjoying a cigar every so often or a few drinks when you're out with friends, binge drinking and heavy smoking are destroying your skin. In order to protect yourself, cut back on your alcohol and tobacco consumption, and consider quitting entirely. Your skin will thank you.

3. Wash your face daily and use moisturizer

Facial cleansers and moisturizers are generally ignored by men because they are viewed as “girly” or feminine. However, a good quality moisturizer is nothing to be ashamed of, because it can clean your face and preserve your skin at the same time, making you look considerably younger than your age. If you start using a moisturizer today, you’ll be glad ten years down the line when you’ve slowed or halted some of the effects of aging.

Using regular soap on your face is a bad idea because its ingredients are harsh on your skin and cause damage over time. This isn’t a problem when it comes to other parts of your body, but bar soap will cause long-term damage to your face. Consider this: do you *really* think it’s a good idea to use the same bar of soap you use to wash your butt to wash your face?

Facial cleansers and moisturizers have other benefits as well. Beyond removing dirt on your skin and keeping it clean, facial cleansers can also soften up your facial hair, making shaving much easier and reducing the likelihood of developing ingrown hairs. Moisturizers will also re-hydrate your skin, keeping it from becoming dry while preventing inflammation. This is especially important during the winter due to the risk of developing eczema and other issues due to dry, cold air.

Daily Face Wash By Wadi Men’s Care is an all-in-one facial cleanser and pre-shave wash that is specifically designed for men. It is all-natural and organic, a sharp contrast with other facial cleansers that use chemicals that damage the skin. It goes great with the All Purpose Natural & Organic Moisturizer By Wadi Men’s Care, which has a unique formula to keep your skin looking fresh while preventing premature aging.

For ROK readers, we are currently offering a 25% off coupon off both products. The coupon is automatically applied when you use this link. Also, if you sign up to join their Men’s Care Cave, they will give you 50% off coupon (only 100 coupons available)!

Ultimately, much of what people believe is “natural” aging is entirely preventable. Limiting sun exposure, curtailing alcohol and tobacco use, and using quality face washes and moisturizers will do wonders when it comes to preserving your skin. You only get one life, so you owe to yourself to combat aging and stay the best man you can be, for as long as you can. **Click here to learn more about Wadi Men’s Care grooming products while saving an automatic 25%** or **click here sign up to join their Men’s Care Cave for a 50% Off coupon (limited coupons available)!**

6 Types Of Filipina Girls You Can Meet In Manila

April 27, 2018 | by Chris George | Link | Original Link

I have spent more than five years of living, working, traveling and interacting with locals predominantly in Manila. It's almost self-evident that the types of women (and people in general) we tend to meet in our lives are a solid reflection of our own life choices, so the subject of this article might just as well have been "6 Types Of Men Who Date Local Girls In The Philippines." Let's get down to business…

1. The Freelance Model / Borderline Hooker

Arguably the type that most short-term tourists experience in the country. It is difficult to be any different than that if your usual choices of hangout areas are around Burgos str., Cafe Havana in Greenbelt, clubs like Royal & Time or areas like Malate. Basically the so called “tourist traps” and the areas where you can only find pay for play entertainment.

In the last few years, Tinder has also become massively infested with “freelance models” who would basically offer escort services, possibly not being entirely upfront about it. These girls are in the areas most frequented by short-term staying tourists. Confirmation bias is very strong among people frequenting these areas, who instantly gain the impression that all Filipinas are borderline hookers.

There are also the more “upscale” equivalents full of GRO’s (guest relations officers, promoters or simply places where you directly pay drinks to interact with women). I don’t see much difference in the mentality—regardless how you sugarcoat it, if you start your interaction with a woman by paying for her company, this choice certainly sets you in for similar subsequent experiences.

I don’t condone the patrons or employees of any of the venues and have visited most of them myself numerous times, but it’s important to understand what kind of experience you are likely to get there and not wonder when the woman you met in Royal asks you for cab money, allowance or whatever.

2. The Girl From The Province

There is a fair amount of girls who left their hometowns and came to Manila to look for better employment opportunities, something fairly usual for all regions where economic segregation between the urban areas and provinces is huge. Needless to say, these girls usually have likely had limited opportunities to gain income and education. They likely live in the outskirts of Manila or the provinces nearby—a good hint would be that if you ask them what their travel time to Makati is, they respond with anything more than an hour.

Most of these girls have normal day jobs, mainly in the service industry, be it bars, restaurants, hospitality, BPO or anything else. Nevertheless, dating one of them will always have several different constraints to be aware of: they are likely socially awkward (or just shy) around foreigners, completely lose any sense of confidence among white guys, and have a fairly narrow mental horizon.

It’s not impossible for them to have had a kid or two plus some extended family to feed. It is unlikely that any of them will ask you for money directly, but the difference of standard of living will still mean you’ll have to pay for everything unless you want to meet in a very local area and have Ministop meals together.

3. The Horny School Girl

I have to agree that this type does not sound bad at all on the surface, especially if you are mentally picturing petite Asian women in schoolgirl uniforms. The dating experience with them would largely depend on your own age—if you're in your late teens or early 20's, you might find them cute. If you are anywhere close to mid-twenties or above, you would fairly soon have the impression you went on a date with a 9-year old girl, both due to physical appearance and overall demeanor.

These girls usually attend all-girl high-schools or colleges and are kept under strict home routine by their parents, so they see online dating as an amazing rebellion adventure against the status quo and boredom. You also need to be 100% sure that they are of legal age and that their father is not going to come looking for you if they break their curfew because due to financial reasons, lots of the girls (and Filipinos in general) stay living with their families well into their 20's (or until they get married).

4. The Middle-Class Filipina

Loading…

We are now slowly treading into the territory that short-term staying tourists don't experience frequently. These girls are usually a good mix between traditional and modernized women. They come from good middle-class families (a class of society that is not very common in the country), have some form of financial independence, have traveled outside of the country, can afford to pay for their own transportation or own cars and live in or close to CBD's (central business districts such as Salcedo, Legazpi, BGC, Ortigas or Eastwood).

They usually have relatives living abroad and their English is at an above-average level. I find this group of girls the most dateable out of all in the country and the one where most of my expat friends who live in the Philippines have found girlfriends among.

The reason why they are not easily accessible during a short stay is that they usually have a somewhat similar social life to their Western counterparts—they work, attend social events, have friends, etc. Some of them may work unsociable hours and it's difficult to find an agreeable time to date.

They are also considerably more picky in their choices and generally go for younger and/or good-looking guys, foreigners or not, as they possess a rare combination of choice and a relative freedom, even if still living with their parents. They'd also much less frequently agree on insta-hookups or other PnD offers that the former three categories would eagerly sign up for, which in turn means you'd have to spend some time building up comfort with them before the date—time I recognize not everyone on a few days/weeks trip has.

If you are well calibrated socially, have at least average looks and good logistics, you will likely be able to meet these type of girls, regardless of the duration of your stay. They are

mainly frequenting areas such as Poblacion if they go out, but the best place to meet these girls would be through social circle and activities—gym classes, meetups, expat events, work hangouts etc.

5. The Rich-Daddy Girl

I think of those as a combination of the middle-class Filipina and the borderline hooker. They quickly serve as an example of how money corrupts the nature of women, as the majority of such (good-looking) girls are also often among the most active in the upscale night scene.

You can usually meet them around the bars and clubs around Burgos Circle and The Palace in BGC. They flock in groups with other rich locals, both men and women, and are mainly interested in entertainment, due to the absence of social imperative to work for their living.

I suppose the rich-daddy Filipinas aren't much different than the kids of rich people anywhere else in the world, except that the level of attitude and entitlement you can develop in a country where most people are poor is arguably much higher. In order to lay rich-daddy girl Filipinas you need social circle, (at least some) fame and/or above average game skills. And even so, your result rate will not be particularly high.

As far as long-term dating opportunities go, many of these girls' parents will not approve of marriage with a foreigner and would always prefer a rich local guy for a son-in-law, which adds an additional layer of pressure. All in all, I imagine that gaming these chicks is comparable to running game in upscale venues in the West. You need to be among the top 10% or your results will suffer, foreigner or not.

6. The Business Lady / Career Woman Filipina

Another thing worth mentioning about the Philippines is that on average, women are miles more dependable, organized, street-smart and even entrepreneurial than men. Therefore the phenomenon of a hard-working career lady or businesswoman is probably more widespread compared to other countries in the region. Some of them may have inherited their business or riches (from their family or husband), but there are quite a lot self-made as well.

This is another hybrid group that you are likely to experience dating only if you stay longer in the country. They rarely have time for dating website, because they are married to their jobs or business. So you either need to meet them through social circle, activities or in the rare occasion they allow themselves a night out in a club. Usually on the older side (30+, more often 35+), they are among the very few groups of real “grown-ups” you can meet in the country, being smart, sophisticated, well-traveled and socially calibrated.

On the other side, maintaining any sort of long-term relationship with a career woman can be quite a challenge anywhere in the world, in addition to all the downsides of dating, committing or impregnating older women that have been vastly discussed in the manosphere.

In summary, don’t be tricked into thinking that all Filipinia’s are hookers. Some are, but you’ll find much better quality if you stay longer than a couple of weeks.

Bill Cosby Found Guilty Of 3 Counts Of Sexual Assault

April 27, 2018 | by News Syndicator | Link | Original Link

Via Hollywood Reporter:

Bill Cosby has been found guilty of aggravated indecent assault against Andrea Constand in 2004. On Thursday, a Pennsylvania jury returned a verdict after 14 hours of deliberation and held him responsible for rape on all three counts brought by prosecutors.

The development comes in the retrial of Cosby, once the nation's most popular entertainer with the highest-rated series on television before a downfall triggered when several dozen women came forward to accuse him of being a serial rapist.

Bill Cosby and his primary accuser

After the gulty verdict was read and jurors left the courtroom, Cosby launched an expletive-ridden tirade and called the District Attorney Kevin Steele an “asshole.” As Steele argued to revoke bail, Cosby stood up and shouted, “I’m sick of him!”

Last summer, in the first case, a different jury deadlocked and the court ultimately ruled the matter a mistrial. The underlying facts of the case remain the same. Costand, then 31, who worked in the Temple University athletic department, says Cosby became her mentor, and then one night while she was struggling to make a decision over the direction of her career, she went to Cosby’s residence and was given a glass of wine and pills. Costand recalled her vision becoming blurred, having difficulty speaking and having her legs become rubbery. She was led to lie down on a couch and says that Cosby’s hands were all over her and that he penetrated her.

Constand would later report the incident to law enforcement, who decided not to move forward with a prosecution. Afterwards, she would file a lawsuit, which would settle.

For about a decade afterwards, the allegations against Cosby receded into the background and he enjoyed his position as one of the nation’s most influential African-American ever.

Loading...

But after another comedian named Hannibal Buress spoke of Cosby as a rapist at a show, it ignited a furor and then about 60 women came forward to share similar stories of being drugged and raped.

The second trial was different from the first in that this jury got a taste of the wide-ranging allegations circling Cosby.

Five women who accuse Cosby of drugging and assaulting them were allowed to testify

as “prior bad acts” witnesses in an effort for prosecutors to prove the behavior was a pattern. Last time, only one of the women was allowed to take the stand.

> Gloria Allred, who represents dozens of Cosby accusers: "Bill Cosby, three words for you: Guilty, guilty, guilty!" https://t.co/1jpjjrppzq pic.twitter.com/5YfpsnKPzu
>
> — Good Morning America (@GMA) April 26, 2018

Also new was testimony from Constand’s former Temple University colleague who claims the accuser privately admitted to framing Cosby in order to cash in — and a revelation that Cosby paid Constand nearly $3.4 million in 2006 to settle her civil claims.

The comedian did not take the stand during the trial, which saw testimony from more than two dozen witnesses. Cosby attempted to convince the jury he was out of town on the night of the incident, but the jury didn’t buy the story.

Each of the three counts carries a prison term of up to 10 years, although the judge could impose the sentencing time concurrently.

There will likely be an appeal that is grounded upon Cosby’s repeated assertions that his due process rights were violated.

Is Leftism The Carthage Of The Twenty-First Century?

April 27, 2018 | by André du Pôle | Link | Original Link

For decades, every time he spoke in public, Roman statesman Cato the Elder would say at least once *Carthago delenda est*. Carthage must be destroyed!

What had started as a tepid strife between two antique powers, unable to share the Mediterranean Sea without constant bickering, had become a full-fledged war. Over tough years, Romans realized they would never have peace save for the total destruction of Carthage. It was long and difficult, but it was done—and the child-sacrificing, Baal-worshipping Carthaginians virtually disappeared from history.

Sometimes I wonder if leftism is not the Carthage of our times. Leftism feeds on sacrifice: it always needs to cast someone into the dreaded role of the “oppressor” or adversary of “progress” to exist. In the nineteenth and twentieth centuries, as orthodox Marxism, it turned the plant workers against everyone else and created the gulags. When that clearly failed, leftism was re-created as the minorities’ position.

Liberal humanism

As a Frenchman, I got both. I saw the mandatory worship of “social achievements”, mediocrity and the hatred of the bosses erected as social identity, the parasitical State-enforced privileges trumpeted as something everyone should be proud of, demonstrations with ill-painted banners and perpetual complaining dutifully attended.

But, as this kind of Marxism was declining and as my parents would favour trendier stuff, I also had a taste of neo-Marxist sneering and “culture.” At the time, I already felt more attraction towards classical culture, yet still considered the usual universe around me as rather normal.

Then I saw it. I saw how obnoxious and predatory Arabs and Africans were and how we could never speak of that. I saw untold crime on one side, and cowardice on the other. I got berated by the (female, of course) teacher in class in 2005, when dozens of thousands of Arabs and Blacks were burning cars, beating and sometimes killing people, for having said that perhaps there was a bit of anti-whiteness in what they did. I saw the creator of a fun, GTA-like online pimping game, getting doxxed by the MSM, personally threatened by SJWs, and losing his job—while leftists would act as if the feminist assault on him was obviously normal.

I met with many authoritarian female figures, some outwardly cheesy or soft, some patently stern or venomous, but all prone to arbitrariness and blackmailing. I saw cowardly male figures, and many young men growing with the secret fear of being headed to nowhere.

I saw the absolute obligation to worship or at least keep one’s head down to feminism, “antiracism”, an obsession with attacking “prejudice” while incessantly promoting the Holocaust and muh poor starving African, oppressed Afghan woman or anything else. I

saw both of chaos, a mess, a milieu with no obviously good references but a lot of implicit obligations and prohibitions. In a word, anarcho-tyranny.

I saw a definition of "progress" where it meant promoting anyone but me or someone alike. A big bundle of loosely related stuff with no bridge towards us but a spiked fence. An apparently bright history of justice, fairness, success, empowerment or anything you wish with no place for us. "You're a white male, so you don't need that people care about you", said once a (white) girl to whom I tried to explain what type of life so many millennial men were living.

"We liberals have more empathy"

All of this could be identified as leftism. There's a problem, though: the notion of leftism is too wide and imprecise. Some tried to understand it as, say, opposition to spirituality, collectivism, envy, emotionalism, pathological altruism, hypersociability, or unrestrained female hypergamy, but though all these are true to some extent, none of these do cover it all. Some leftists are autistic, some are antisocial, and some scrambled to recast their caprices into parts of a divine plan.

Leftism is too multifaceted a phenomena to "find it." It works more like a poisonous gas that never shows its true colours, you never perceive it as clearly as you would like to, but its presence is all too clear and deadening.

The problem with leftism lies in both how much it changes and how enduring it is. It is exactly as if planetarian cultists kept using it as a proxy to pull far-fetched strings, with seemingly unrelated or contradictory effects that unexplainably push us to a road where no sane mind would like to go. If you try to pinpoint leftism as "really this" or "really that", you will tend to fall into a particular right narrative to the exclusion of others.

For example, if you're a libertarian, you may see leftism as synonymous with collectivism, but then it will be difficult to explain the special snowflake phenomenon. Why do we have both an enormous need to follow fashions while also pretending, and genuinely trying, to be as snowflakeish as possible? Likewise, if you're an Evangelic, you may be tempted to

equate leftism with Satan, but can you then say that charities are satanic?

Loading...

"We fact-check others, truth is on our side, and Trump is crazy"

Leftism has also successfully developed or picked up, at least in the past, various tools that we may put to good use. Their taking over of culture does not mean that refinement is bad per se; managerialism, so adverse to libertarians, can be used to develop and not only enslave a population; and the left's abuse of "progress" does not mean we should reject our own accomplishments in Heideggerian fashion.

Here on ROK, I published several pieces on liberal falsehoods, psychological conditioning and unfair leftist double standards but some inner voice keeps telling me I didn't find the heart of the monster.

For now, it may be said that leftism is a mix of neo-Marxism, where people can only have an identity as "oppressed" and where no other identity is really worthy or relevant, and of whitemaleophobia or Westernophobia. The one-world dream is dead. (Good riddance!) In its place, a weird conglomerate of semigendered Hillarykin trans-Black disabled LGBTBBQ supported by retarded boomers.

Whatever, or whoever the bottom, we know the extent of damage it did to our civilization. And we know how much it still controls pretty much everything official.

Leftism skewed the sciences. The heredity debate keeps coming back because human differences and heredity are true. Racial identities can be "deconstructed" intellectually through a tainting, accusatory narrative but they keep existing in the real world.

Leftism skewed the races: races do not exist, we hear, yet those behind the black-on-blondes porn really want to get them genetically erased, not just socially. If races do not exist, why do the globalists need to destroy them?

Leftism skewed the relationship with the hierarchy. Social classes have always existed. Even in a perfectly meritocratic society, which by the way would be unfair to inheritance, differences in natural abilities, talents, inclinations and so on would create hierarchies. Instead of accepting it as part of life, leftism problematized this normal feature of social life to promote seditious class identities and internal warfare.

Leftism skewed history. When communists eliminated the *kulaks* and trumpeted how they would conquer the whole world—it must happen! It's progress. Marx said it would be unavoidable! Liberals stigmatized the legitimate reaction as "red scare." Liberals lied by saying that for decades, no one in the West knew about the gulags, whereas these were mentioned in the 1920s.

They created atrocious double standards excusing any non-white murdering a white person, or any left-chosen thug murdering anyone else, or any totalitarian leftist slaughtering wholesale "social classes", whereas an evil Nazi defending himself would be, well, an evil Nazi.

Evil Nazis

Leftists skewed personal relationships. They destroyed equality before the law by decreeing that some would not be held responsible for their actions and behaviors, whereas others would be much more blamed for said behaviors. They turned men into hapless, cowardly, emasculated beings, whereas women turned ugly, slutty, narcissistic and domineering.

Leftists skewed our notions of personal identity and life. In liberal make-believe utopia, everyone can do everything, but then no one is really satisfied.

Leftists turned a once prosperous, homogeneous civilization into a war zone. They turned art into a ridiculous scam. They pretended to have ideals about the world, but none of these ideals is desirable once you get out of the blue pill conditioning, and most of them can only be implemented by destroying what is.

Leftism is reckless. Whatever its current shape, it never stops. Leftists are never happy and cannot be. A leftist only exists by pinpointing, denouncing, complaining, stigmatizing. Highbrow academic problematizing is just a sophisticated way to do it. Most importantly, every wave of leftism pushes more, so it is silly to accept concessions and having everything fundamental—our identity, relationship with women, social standing, idea of ourselves, idea of history and everything else—altered by the whims of these bullies.

There is no good feminism: transgender madness only exists because our forefathers accepted all the less shitty steps that came before. If the gender pay gap lie had been rejected at its inception, the left couldn't have used it as a bludgeon for the years to come.

In a distant future, the left may still exist in name. Leftism may still exist somewhere in the fringes. But as part of the System, of the "Cathedral", as an imperialist point of view

that pretends to be the only truth and set of references, it must be thoroughly destroyed.

This Diet Coke Commercial Shows Everything That Is Wrong With Society And Women

April 29, 2018 | by Jared Trueheart | Link | Original Link

Take a look at this Diet Coke commercial:

I saw it before the previews of a movie last time I took my wife out on a date. The message in it was so blatantly harmful to people, and yet so representative of our consumer culture, that I was astounded. In the 90 seconds the commercial lasted I recognized just about everything wrong with American culture.

Giving in to Your Temptations

The tagline of this commercial is; Diet Coke tastes good, so if you want one, just have one. The words are about diet coke, but the message is about giving in to your temptations. This is the first time I've seen an ad be so blatant about what it wants you to do.

Americans are overweight, to put it nicely. Even those that are not overweight are probably out of shape. Some of the most common pieces of advice for losing weight and getting in shape are to stop drinking sugary drinks (which includes drinks with fake sugar, like diet coke) and to cut out sugar generally. This is obviously bad for Coca-Cola's

business.

Their solution is to validate the unhealthy part of your conscious that wants to give in to temptation. When your gut tells your brain you want a sweet drink, and your brain tells your conscious to rationalize why you should get a sweet drink, and the commercial validates what your conscious tells you, it’s going to take a lot of willpower to resist that.

Once you give in to that, why stop there? You want to eat an entire pizza, just eat it. You want to sleep 14 hours, just sleep in. You want to cheat on your spouse, just do it. Nobody ever tries to stop you from eating something healthy, like a banana. You want a banana, just eat a banana. We already do that. It’s not necessary to say that. A statement of “you want… just have….” is a statement intended for things that are bad for you. This is what Coca-Cola wants you to do; give-in to those things that are bad for you, like Diet Coke.

If you give in to that temptation you’ll have every reason to give in to the opposite type of temptation. If you don’t want to do something, don’t do it. Exercising hurts, so don’t do it. Going out on a date means risking rejection. You don’t want that, so don’t do it. Starting your own business will increase your stress level, don’t do it.

This is where a lack of willpower leads

Nearly every way men better themselves today involves fighting those temptations with pure power of will. It gets easier over time, but when you start it's quite a challenge. Diet Coke knows that and wants to make it harder for Americans to fight those base urges.

Loading…

The Diet Coke Girl

Whoever cast this commercial did a great job at finding the perfect representation of everything wrong with relatively attractive girls. She's pretty, but her resting bitch face and know-it-all expressions make her very unattractive. Her speech is smarmy. She's the sort of girl who looks down on you for not already doing what she is advising yet also looks down on you for taking her advice. She's the type that really wants to work yurts into her statements so that she can feel smart.

She did her hair as if she wants to be attractive but walks around with an expression of "I'm so over this." Her clothes look like a New York fashion designer tried to put an attractive outfit on a girl, yet no man finds her appealing in those clothes. Put the whole package together and she reeks of a women's studies college girl who thinks she knows more than you and hates you for it.

There’s a thing that young people do that I’ve noticed more and more. Before any statement, they say “I mean.” So in the commercial, she says something like, “I mean if you want to run a marathon, run a marathon. I mean, if you want to drink a Coke, drink a Coke.” (As if those two actions are even remotely similar). “I mean” hasn’t replaced “like,” which is still used to the point of annoyance, it has been added to it, making college types worse than ever.

She is feminism in a nutshell. If she changed her attitude and wore feminine clothing she’d be a solid eight. But because of everything I just stated she’s so low on the scale, I wouldn’t give her the time of day (and I’ve had some low points in my early days, believe me).

Men have a share of the blame for women like her. It’s because men today are so weak that women like her are allowed to tempt society with vices and walk around with snarky, high-and-mighty attitudes.

The Next Battle

In a sense, our collective efforts to better ourselves must be working. Why would they so blatantly appeal to your animal urges? They used to hide these sorts of messages in their ads. That’s not strong enough now. People have exercised their will-power muscles to the point where businesses feel it. Now they don’t sell you a product, they combat your power of will. It’s the next battle we fight against consumerism but strengthening your willpower is it’s own industry too, so at least there’s some economic incentive for people resisting their temptations.

5 Variations Of The Classic Deadlift

April 29, 2018 | by Larsen Halleck | Link | Original Link

We all love the deadlift, don't we? Of course we do, the venerable "king of exercises" and all that. I have always said that you can tell something is worthwhile by looking at how many variations on the basic formula there are. The more the better.

This goes for exercises too! The fundamental exercises have a julienne of ariations while specialized isolation exercises are typically "stand alone"—and naturally the more isolated the muscle is, the fewer exercises target it.

And why shouldn't there be a julienne of variations for this exercise?

The deadlift essentially works all of the muscles of the lower body, and many of the upper body muscles as well. I've said it before and I will say it again; if you're not deadlifting, *get on it*. But we've already discussed that.

Yours truly doing the standard

And once you've mastered the basic deadlift, try a few of these variations:

1. Romanian Deadlift

This is a deadlift variation that hits the hamstrings to a greater extent than the standard deadlift, because it involves the legs being mostly, if not entirely, straight and extended.

To do this, hold a bar at hip level with the palms facing down. Your shoulders should be back, your back properly locked and hollowed, and your knees slightly bent. This will be your starting position.

Lower the bar by moving your butt back as far as you can. Keep the bar close to your body, your head looking forward, and your shoulders back. Lower the bar down to your knees or slightly below it. You should feel it in your hamstrings. Any further movement will put stress upon the spine and thus should be avoided for this exercise.

Once you have lowered the bar, the actual lift is done by returning to the starting position

by driving the hips forward to stand up tall.

2. Sumo Deadlift

As its name might imply, this deadlift variation gets its name from the wide legged stance you take which, combined with the arms being held in front of the widely placed legs makes you resemble the starting position of the *rikishis*.

This variation works the inner thighs to a greater extent than a traditional deadlift, and hits the hamstrings similarly to the Romanian deadlift as well. In addition, those with mobility issues might find this easier to do.

Loading…

Begin with a bar loaded on the ground. Approach the bar so that the bar intersects the middle of the feet. The feet should be set very wide, near the collars. Bend at the hips to grip the bar. The arms should be directly below the shoulders, inside the legs, and you can use a pronated grip, a mixed grip, or hook grip. Relax the shoulders, which in effect lengthens your arms.

The relaxation makes it a little trickier to do then a standard deadlift, as keeping overall torso tightness makes it easier to keep the back in its proper position. Essentially you are going to have to keep the back tight but relax the arms—start with low weight to get the form down.

Anyway, take a breath, and then lower your hips, looking forward with your head with your chest up. Drive through the floor, spreading your feet apart, with your weight on the back half of your feet. Extend through the hips and knees.

As the bar passes through the knees, lean back and drive the hips into the bar.

Return the weight to the ground by bending at the hips and controlling the weight on the

way down.

3. One-Handed

The one-handed deadlift is a variant of the deadlift that unilaterally trains one arm, really blasting the forearms and obliques. I have already written about this in an article, so you can read that—make sure to switch hands!

4. Reeves

Also known as the plate pinch deadlift, this deadlift variation is another one that really hits the hands and forearms, and was indeed invented by Hercules himself, Steve

Reeves.

To do this, take a standard deadlift position, but instead of grabbing the bar, pinch the plates instead. Then lift as normal.

If you are using multiple 45 pound plates, put a 2.5 pound plate or 1.25 pound plate in between them to create a space to put your fingers between. Also, if you're doing more than one plate on this deadlift, you're probably pretty goddamn strong.

5. Health Lift

And finally, all the way back from the era of the American Civil War—the health lift. Perhaps not the most efficient exercise, but an interesting curiosity.

A more modern name for this exercise would be a partial deadlift or a rack pull.

In the health lift, you keep the back as upright as possible (not just locked out, but upright), and lift purely by lifting with the legs and pushing the knees forward. The bar should be racked and at roughly your knee level.

Use these deadlift variations as you will to build strength for the traditional lift.

7 Ways I've Maintained My Testosterone Levels At The Upper 98th Percentile

April 30, 2018 | by Zach Smith | Link | Original Link

The last time I went into the doctor for a full physical, they did a hormone test as a matter of routine. 98% of men my age has lower testosterone levels than I do. Although I have had high testosterone since I was a teenager, I have been able to maintain these levels, where many men have not. There are several things that I do that are different than mainstream Americans and I will share them with you and why I believe this has an effect on my testosterone.

None of our food is real anymore, it's almost like they are intentionally trying to poison you. Many of it contains endocrine disruptors which are either naturally occurring xenoestrogens, a pesticide added to the crop, or even contamination from the packaging. These can damage hormones causing mental problems, obesity, cancer, feminizing of males or masculinizing of females.

Many of the studies done on these are inconclusive because there are so many different chemicals it is difficult to find somebody not exposed to multiple ones to do a valid study on. Even the Roman Empire was thought to have declined due to phytoestrogens in silphium, a relative of the fennel plant.

1. Avoid Soy

Soyim, I don't even.

The soy boy meme is a real phenomena. Decades ago, unfermented soy used to be considered unfit for human consumption, and there were limits on how much it could be fed to livestock. The supply quickly overshadowed the demand, because it was so cheap and easy to farm. Eventually this leads to it getting rushed through FDA approval so it could be used in human food.

Since producing massive quantities of bland, tasteless soy is cheaper and easier than a variety of real foods, most food companies turn to making foods loaded with soy as filler and excessive sugar and salt to enhance the taste. At this point the only way to fix it is to cut all subsidies to soy, but that would mostly just mean more corn.

It used to not be allowed for use in food because we knew the negative health effects, but agribusiness funded scientific studies to say it's good for you. If you look at the scientific studies of the health benefits of soy, you'll see they're just the opposites of the negative health effects of excessive testosterone. Cut all soy from your diet and replace it with nothing.

2. Avoid Coffee

Coffee beans has the phytoestrogen trigonelline, which accounts for around 1% of it's weight. This is a chemical in the seed oils of coffee and doesn't have anything to do with caffeine itself. Also, because coffee is so bitter, people generally add sugar and soy milk to cut its flavor down. Cut coffee from your diet and replace it with tea. I drink unsweetened cold tea. Don't load up your tea with a bunch of sugar.

3. Avoid Corn

Whenever you think of corn, think of these hermaphroditic frogs having sex.

Corn is another food with limited nutritional benefit and is commonly used as animal feed. Corn is a grass and is sprayed with atrazine. Atrazine is infamous for turning frogs hermaphroditic, according to researchers at the University of California.

> Before, we knew we got fewer males than we should have, and we got hermaphrodites. Now, we have clearly shown that many of these animals are sex-reversed males," Hayes said. "We have animals that are females, in the sense that they behave like females: They have estrogen, lay eggs, they mate

> with other males. Atrazine has caused a hormonal imbalance that has made them develop into the wrong sex, in terms of their genetic constitution.
>
> Loading...

Of course these studies haven't been limited to frogs, they have also been done on fish, reptiles, birds and even mammals. Corn is another product heavily subsidized by the government so it is added in almost all processed foods.

4. Avoid Sugar

Obviously everyone knows that sugar is just empty calories, but sugarcane is also heavily sprayed with atrazine so should be avoided for the same reasons. Instead of sugar as a sweetener, use honey, maple syrup, maple sugar or agave nectar. If you just have to have sugar, try to find an organic sugar so at least it hasn't been sprayed with toxins.

5. Avoid Pork, Chicken And Farmed Fish

Pork is fed a diet of corn and soybeans. Pigs do not have sweat glands like humans, so they are not able to sweat out toxins like we are, meaning that pigs concentrate toxins in their fat. If you are going to all the trouble to avoid soy and corn, don’t sit here and eat pork. For the same reason that you avoid pork, also avoid chicken. Chicken are fed nothing but corn of the lowest grade. Instead of pork or chicken, eat beef, preferably grass fed.

Farmed fish are fed pelleted soy and absolute trash. Their meat has to be dyed for it to even look appetizing. Instead eat wild caught fish. Salmon, cod, crab, clams, oysters, mussels, shrimp, scallops or lobster are all good choices.

6. Avoid Storing Or Cooking Your Food With Plastics

Many of the chemicals in plastics are endocrine disruptors, although they are trying to use less and less of them. I do not store my food in plastic, only glass, which is chemically inert. Many non-stick and modern cooking pans contain endocrine disruptors as well. Instead use cast iron cookware, which has been used for hundreds of years with no issues.

7. Avoid Mass Market Soaps, Shampoos, And Laundry Detergents

If soap is the yardstick of civilization, how does our society measure up?

Many ingredients in soaps, shampoos and detergents are also xenoestrogens. This is not something that is required to be in soap, however it is generally added to all mass market

soaps. Either buy basic soaps such as Castille Soap, or go full Tyler Durden and make your own. You can easily make your own soaps in bulk once every few years.

I make laundry detergent in 5-gallon buckets. Don't eat Tide pods, don't even wash your clothes with them. You won't have that chemical stink I can smell from a block away and your testosterone levels will thank you.

Conclusion

Think about what it would've been like if you weren't slowly poisoned your entire life. Good news is you can eat and live properly now and still make a difference, have normal testosterone, and behave like a man. If your food has a label, it probably isn't healthy, unless is is a very short list of ingredients you recognize. I don't read many labels because I buy whole, unprocessed foods that don't have complex nutrition labels.

Eat mostly fresh, unprocessed foods, buy vegetables that were farmed without pesticides, don't package foods in plastic, cook over cast iron, and use basic ingredient soaps. Then you too can maintain your testosterone levels like I did.

Twitter Is Suspending People Who Talk About Game Of Thrones Actress's False Rape Accusation

April 30, 2018 | by David G. Brown | Link | Original Link

Twitter has suspended dozens, if not hundreds of its users' accounts for mentioning a notorious false rape accuser. Most of these tweets were around two years old. Unlike her victim, Souad Faress has never been prosecuted and will never serve a single day in jail for her false accusation. Roosh and I are just some of the individuals to have been sent to the Twitter doghouse for talking about her. In early 2016, I also wrote about Faress and the Kafkaesque situation she spawned for an innocent and exonerated man.

Some called it the most ridiculous and malicious false rape accusation of all time. Mark Pearson, walking in one of London's busiest Tube (subway) stations, found himself accused of digitally raping a senior citizen, Faress. The now 70-year-old professional actress had appeared in a season of *Game of Thrones*. Nevertheless, her best performance was to British police and in a British court, which unfortunately had to grant her lifetime anonymity.

Souad Faress' victim, Mark Pearson.

A jury obviously found Mark Pearson not guilty of sexual assault, but not before he was humiliated by being arrested, charged, and prosecuted for something that never happened. His financial losses (loss of time, work, and money spent on lawyers and psychologists) were considerable as well and remain so. It is Pearson who has faced all the negative consequences of Souad Faress' attention-seeking, not Faress herself.

As was published a couple of years ago, the Crown Prosecution Service (CPS) deliberately, unprofessionally, unconscionably, and arguably corruptly slowed down the recording of Mark Pearson as he passed Souad Faress, to make it look like he could have sexually assaulted her. But should we be surprised? No.

In recent times, other victims of the British judicial system have included Liam Allan, whose innocence in a "rape" case was suppressed by an incompetent and/or vindictive police detective. With quotas for rape "convictions" being the norm in Western societies, Pearson and Allan will certainly not be the last men sacrificed to appease rabid feminists.

Loading...

Is Souad Faress trying to scrub her online presence?

Scrub away, Souad Faress!

The crackdown on mentioning Souad Faress on Twitter reeks of a meticulous and long-term effort to salvage her public reputation. Ironically, barely a fraction of Britain knows she defamed Mark Pearson with proven lies, but even that fraction is enough to terrify her.

It is highly likely that Faress' "agent" or even lawyers have approached Twitter and possibly Google (information about her false rape accusation is appearing lower and lower in search results). After some sort of "process," if we can call it that, tech employees have sided with her and begun to purge references to the false rape accusation.

Many users, like Richard Jackson, wrote nothing out of the ordinary about Souad Faress and were actually being highly favorable to her, given her unforgivable actions. Regardless, they found themselves suspended:

Tweets like mine were actually the “vicious” ones (more like, “viciously accurate”):

> Hey @Cruella1 Does me naming malicious false rape accuser @SouadFaress tingle your feminist sensitivities? https://t.co/3siAlknREx

The dangers of tech companies and information suppression are real

We are in serious danger of losing access to information vital to the proper functioning of our societies and legal systems, such as news pertaining to those who lie about rape (with CCTV evidence to prove they are lying). Because some 85% of digital advertising revenue goes to Facebook and Google alone (and much of the rest to companies like

Twitter), only a few levers need to be pulled to hide potentially viral news that upsets the highly sensitive. The financial power of only a handful of business concerns should alarm all of us greatly.

Sadly, miscreants like Souad Faress will always be able to rely on sympathetic ears and very helping hands at places like Twitter and Google. Her hamstering, believing she is a victim of online “bullying” after trying to get a man jailed on a lie, evidently knows no bounds. But what else can we expect from an attention-starved and presumably feminist old woman? I don’t feel sorry for her at all–I feel sorry for the real victim in the saga she created, Mark Pearson.

Is Kanye West Saving American Conservatism?

April 30, 2018 | by News Syndicator | Link | Original Link

Via Breitbart:

Rap megastar Kanye West released a new song on Saturday sending what could be considered one of the boldest political statement's in rap history — questioning black Americans' near-monolithic support of the Democratic Party.

The fiery track, "Ye vs the People," sees the Chicago crooner in a back-in-forth lyrical debate about the merits of thinking freely and the political and economic state of black Americans, as well as addressing the fallout from West's seeming embrace of President Donald Trump, with actor-rapper T.I.

"Bruh, I never ever stopped fightin' for the people. Actually wearin' the hat'll show people that we equal," West says of posting a picture online this week of him wearing a "Make America Great Again" hat — a hat which the rapper says "stayed in my closet like 'bout a year and a half."

"Then one day I was like, 'Fuck it, I'ma do me, I was in the sunken place and then I found the new me," West says to a defensive T.I. "Not worried about some image that I gotta keep up. Lot of people agree with me, but they too scared to speak up."

"See that's the problem with this damn nation. All blacks gotta be Democrats, man, we ain't made it off the plantation," West argues.

> Obama was in office for eight years and nothing in Chicago changed.
>
> — KANYE WEST (@kanyewest) April 25, 2018

T.I.’s verses confront West’s willingness to align himself with President Trump, questioning is West’s “selfish agenda” will “stop police from murderin’ niggas.”

Loading…

“This shit is stubborn, selfish, bullheaded, even for you. You wore a dusty ass hat to represent the same views as white supremacy, man, we expect better from you,” says T.I., who last year called President Trump a “poster child for white supremacy.”

“Have you considered all the damage and the people you hurt?” T.I.’s rhyme continues. “You had a bad idea, and you’re makin’ it worse. This shit’s just as bad as Catholic preachers rapin’ in church.”

> I haven't done enough research on conservatives to call myself or be called one.
> I'm just refusing to be enslaved by monolithic thought.
>
> — KANYE WEST (@kanyewest) April 27, 2018

Sex Has Become An Obsession

May 1, 2018 | by Roosh Valizadeh | Link | Original Link

Have men always been as obsessed with sex as they are today? Was it thrust into their faces practically every single moment? I doubt it. Men of the past had to put so much more energy into survival that sex was seen more as the dessert instead of the main dish like it is now. Otherwise, the sex-obsessed ancient man would surely die of starvation or predation. What you think of as a normal level of horniness and healthy sex attitude would be vulgar and downright ill to men of the past.

I go online and there is sex in places it shouldn't be. My Twitter timeline is filled with attention-whoring women who showcase their cleavage and beauty, retweeted by thirsty men. The trending list on YouTube is filled with women using their sexuality to get views, and even children's videos have sexual themes. Instagram, an app I barely use, insists on recommending busty women who showcase and jiggle their breasts. The only way you can turn off receiving endless sex messages from the internet is if you don't go on the internet.

My Instagram Recommendations

Even when I succeed in not thinking about sex, I'm immediately corrupted as soon as I walk out my door. Women are too eager to show me the curvature of their bodies, their breasts, their ass, and with yoga pants, even the outline of their chubby labia. Women have become so deranged with showing us their sex that many are petitioning the government to go topless on public streets. It doesn't matter how much willpower you have as a man, they will attempt to suck you in and put your mind into thinking about fucking them so they feel a sense of validation.

Loading…

Sex is our generation's daily obsession. If men don't spent hours on porn sites or social networking trying to "like" or swipe their way into a woman's pants, they hop on an airplane and travel thousands of miles away to bang until they're sick of it. While most of the third world is looking for economic opportunity, the comfortable men of the first world look for sex opportunity, because it's one of the top things that gives them meaning in life. It's so easy to survive that so we can safely dedicate ourselves to rock star sex goals at the same time we experiment with a diet or supplement stack that maximizes our testosterone level to ensure superhuman fornication.

Frankly, I'm tired of it. I've dedicated more time than 99% of men into getting sex. It has given me a community of men online I can talk to, which is great, but my soul has nothing to show for it. I don't want to care about sleeping with a girl I don't have feelings for. I don't want to go on another bang mission, or travel to more countries to find a perfect woman who exists only in my mind. Enough! I can't bear to look at another vagina for the sole purpose of using it as a tool to get a ten-second orgasm that gives me no pleasure as soon as it's done, even though I know deep down that the next girl I sleep

with will certainly be someone I do not love.

If some facet of the culture has been normalized by the time you reach puberty, you will think it's an integral part of humanity. This means that any man born since the sexual revolution of the 1970's will grow up thinking about sex and pursuing it far more than his ancestors. The situation is worse for men born in the era of internet porn, who don't know what it's like not to have hardcore ass-to-mouth videos on demand.

Even if you decide to shake this sex obsession, those around you have not. Girls will insist on displaying vaginas close up to your face, asking if you would kindly take a sniff. Men will insist that you need to "just get laid," as if that will solve all of your problems. There's no way to stop it unless you remove yourself totally from society, an unreasonable task. It looks like we're cursed to have sex a daily part of our existence, whether we like or not.

Are You Too Young For A Mail Order Bride?

May 1, 2018 | by Charlie Morton | Link | Original Link

The following article is sponsored by International Love Scout.

A lot of guys under thirty-five or so look at the girls on international dating sites and say, "Dear God! These girls are hot, but they are just gold diggers looking for some rich old guy." That type of thinking causes men under forty to miss out incredible opportunities to date some of the hottest women in the world.

So, let's get two basic things straight

First, besides the legal necessity of needing to be over eighteen years old there is not an absolute rule about how young is too young for international dating.

Second, the concept that mail order brides are gold diggers is one of the most persistent misconceptions about international dating.

Mail order brides are no more likely to be scammers than women anywhere. The women on international dating site are ordinary women who have the same hopes as ordinary women everywhere – finding a great man.

Heaven For Geeks!

Even this geek would could married in the Philippines.

No matter how attractive you are to the opposite sex, you are sexier overseas, but not every guy needs to try international dating. If you are in your twenties or early thirties and reasonably successful with the opposite sex, there really is probably not a reason to consider a foreign bride.

International dating takes time and effort. Mail order brides really expect that you are interested in meeting them. Many of them have friends who married an older foreign guy because he was kinder and more passionate than local men. So, don't bother if you are not passionate about meeting extremely hot women.

The reason that serious Western men have such a great reputation is that they tend to be earnest, shy men looking for true love, and, yes, they do tend to have the financial resources to take care of the woman and any children in a more secure manner than a local guy. So, money matters but not like most guys think.

Younger guys who do well in international dating are usually geeks with good jobs. They often work in tech – sometimes at Google, Facebook, and some of the other companies that will ironically not allow mail order bride agencies to advertise.

Sometimes they work as accountants or analysts where they spend their days in the background. Sometimes they work in family business where they are overshadowed by their parents or siblings.

Young farmers are another group that international dating works well for because there are not many single women in vast areas of the United States, Canada, and Australia.

In recent years, a lot of young guys are veterans of Iraq, Afghanistan, or wherever else the U.S. military has decided to send them. Often, mail order brides like veterans because they know that this is man who can protect them from physical harm if it comes to that.

International dating is an incredible opportunity for shy, sincere young guys who have the

financial wherewithal to support a woman. Amazingly, it is just that simple, but there are a few pitfalls for young men.

Dating Tips Younger Guys

Young men have a lot of advantages with mail order brides.

The core challenge for young men is that most mail order brides have had bad experiences with men their own age and signed up with an international dating agency because they decided they want the perceived benefits of dating an older man: stability, loyalty, honesty, and a sort of gentle seriousness.

Loading...
So, the first thing a younger guy needs to do is to communicate that he is not a player, because a lot of women assume you are JUST a player.

John Adams, the CEO of A Foreign Affair, has organized over 500 tours to Europe, Asia, and Latin America said that perhaps ten percent of the men are under thirty-five and that they do great.

He explained that the, *" So when there is a younger guy on the tour that carry's himself well… they get a lot of attention from the women, even to the point of overwhelming attention, and they do fine."*

But there are challenges for younger men. John explained that, "*Most of the women in the places we go view men their own age and not mature enough, loyal enough, or stable enough to really be serious. This comes from their frame of reference and the men they know and deal with."*

So, here is a checklist for younger men to help them address those challenges…

1. Are you really serious about a long term committed relationship?

It is not hard to meet girls who are looking to have a good time in Kiev, Bangkok, or Bogota, but the majority of women on international dating sites are serious – very serious about finding a husband.

If that's not your goal, let all of the women you meet know what you are looking for quickly. It will save you a lot of drama.

2. Are you financially stable?

Foreign women are particularly concerned about this and all of the international dating spots – Ukraine, Thailand, Colombia and so – attract a lot of wealthy men.

You do not have to be wealthy, but it is not fair to drag someone else into a life of poverty. So, be honest with yourself and the women you meet.

3. Are you ready for the cultural challenges?

Again, this is an issue for every man in interesting in foreign women, but younger guys may not be quite as patient about some of these issues. The best approach is that when you argue with a woman assume that their might be a cultural issue you do not understand or perhaps miscommunication.

4. How patient are you?

This is huge. A lot of young guys are in a hurry, but the one overwhelming character trait that a man needs to succeed in any relationship is a bit of patience. This is doubly true when dating a beautiful foreign woman who speaks a language you do not understand.

Western men often have a great reputation for being extraordinarily patient, so if you are easily angered or seem unstable it will often really set off alarm bells for the women.

5. Will you be able to deal with her family?

This is another issue where older men have a built in advantage. In most of these

countries her family will have a built-in set of assumptions about the foreign man. You need to recognize it and rise to the occasion.

Particularly in Asia, this might lead to a point-blank discussion about how much money you can spare to support her family, because the tradition of paying a dowry is still strong in some areas. But most of the time you need to be able to show some confidence and leadership. They want to know you are a real man.

A little swagger and a nice gift will usually get the point across. Don't go too far and talk down to her family. It is not an easy balancing act to be macho, outgoing, and respectful.

You would probably need to put on a similar show in any Western country, but you would understand the language and the cultural context better.

Conclusion

If you are a shy, young guy with decent income international dating is an amazing opportunity. If you still don't believe that, **click here to visit International Love Scout and discover the truth about international dating**. It might just change your life!

5 More Underappreciated Masculine Activities Every Man Should Engage In

May 1, 2018 | by Johan Roux | Link | Original Link

In a previous article, I discussed five activities that are often overlooked by men claiming to be "masculine". There are many more. In this article I will be providing five more activities that every aspiring or self-proclaimed masculine man should should engage in.

1. Public speaking

For some of you, this one is a given. Too many guys are afraid to talk in public or in front of large groups of people, myself included. However this is such an important skill to have, and if you are no longer in school and required to do regular orals, it can be difficult to practice this skill.

Public speaking is one of the requirements of all great leaders in history—politicians,

commanders, visionaries… the list goes on. Neglecting this fundamental skill would be suicide for all aspiring alphas, as it is the only way to effectively demonstrate your power by a show of confidence, body language, calmness under pressure, and of course, intelligence and wit.

People like to see that even famous “non-vocal” celebrities like writers, athletes, etc. are able to actually talk to a crowd in an engaging manner, as it can enhance their respect for them. I chose “non-vocal” celebrities specifically because unlike actors, singers, or TV show hosts, they are not required to constantly be speaking or using their voice in front of crowds.

2. Outdoor Survival

In today’s increasingly urbanized society, what need does the modern man have for survival skills? Many ROK writers have already covered this topic, so I’ll just rehash the most important reasons to have this skill. If the shit hits the fan, you want to know you are capable of reacting efficiently. You want to have a plan of action, but be able to improvise where necessary.

Therefore you need to know at least the basics of survival, such as starting a fire with minimal materials, how to filter and disinfect water, where and how to obtain food, how to build a shelter, etc. Most of these skills are taught in the Boy Scouts, however if you are too old to join (18+) then there are alternatives.

The military is an option, but not the only one. There are many survival “schools” that actually offer various survival training courses to both the military and public, in bushcraft, self-defense, firearms training, hunting, CPR, and much more.

3. Tutoring/Coaching

Another important skill for masculine men is to be able to impart their knowledge on to others who they feel deserve to know. Tutoring is also a great way to earn some part time cash on the side if you are well-versed in academic subjects such as mathematics, but also artistic subjects such as music.

Loading...

If you are especially good at a sport, you could become a coach or personal trainer if you get the qualifications for it, which would be well worth the money considering you're essentially killing two (or three?) birds with one stone: remaining fit and healthy, earning money, and gaining respect and followers by imparting knowledge to help others.

4. Music

Sure, many people mess have messed around with instruments when they were younger and you probably know people who can play some piano, guitar or any other popular instrument. But how many guys do you know that are REALLY GOOD at playing those musical instruments? I'm guessing not many.

Not just listening to music, but actually being able to play a musical instrument(s) is an important skill for a masculine man to have. If you already have game, this can benefit you immensely. You essentially have the ability to influence people's emotions, at your fingertips, as that is what music does. Now think of how you can use that to: attract women into your circle, impress or intimidate fellow males; and even just have fun by yourself, exercising your creativity muscles. It's a no-brainer.

If you don't know how to play an instrument yet, start taking lessons as soon as possible and stick with it. Learn basic music theory and how to read music, and try to develop your listening skills as well.

5. Singing

I know what you're thinking. Singing? A ***masculine*** activity? You can't be serious, Johan. Well, actually I am. And before you think I'm just another leftist spy, hear me out. Think of all the famous male singers you can think of. Okay, now ask yourself, who are their biggest fans the majority of the time? That's right, in most cases, it's women.

Women love men who can sing, sometimes even if they are homosexual or feminine (think Queen or Prince or, more recently, Justin Bieber). More masculine singers include Frank Sinatra, Kris Kristofferson, Elvis Presley, Johnny Cash and Bruce Springsteen, to name a few. Singing could be seen as a combination of public speaking and musical talent. Although not the exact same as public speaking, it still involves similar usage of the voice and vocal cords, and the voice is a very powerful medium of communication. Combine this with a musical instrument as stated in point #4, or even dancing skill as I mentioned in the previous article.

Conclusion

Regardless of whether you choose to pursue all of the above activities or just a select few, they will surely help to improve your life in one way or another, and make you a more attractive and capable man. So I urge you: go forth and conquer, my fellow lads and gentlemen. The more skill-sets under your belt, the more the world opens up to you. Fear is an obstacle in your progress and if you fear improving yourself then you will never reach your desired destination.

3 Reasons Why Men Are Happier Than Women

May 2, 2018 | by Donovan Sharpe | Link | Original Link

Men are happier than women—period. Yes, there are plenty of miserable, depressed men and there are plenty of women who are truly happy, but we're not talking about the outliers here. The exception never makes the rule. We're talking across the board, person for person, that the average man is happier than the average woman. If you were to assign a number correlated with the contentment and happiness of every person, the average male score would be higher than the average female.

Let's go even further and say that red pill aware men are far happier and content than feminists. There's no need to qualify or quantify anything there. Feminists are fucking miserable and red pill aware men are not.

Anyone who doubts this only needs to look at the number of females who are on anti-depressants compared to males. There are studies out there that say 1 in 4 women are on anti-depressants compared to only 1 in 10 for men, then some statistics out there say it's 1 in 3 to 1 in 8 and so forth. But regardless of which study you give credence to, the results are universal across the board. More women are on anti-depressants and anti-anxiety medications than men and the simple reason for this is that men are happier than women. Here are three reasons why:

1. Our sexual primes are much longer

Short and balding, still smashing young hot ass. Okay he’s a movie star but you get the point….

Women are the most sexually attractive between 18 and 28 years of age, give or take a few years in either direction. During that decade a woman can sleep with and/or get commitment from pretty much any man she wants. She can get attention, dick, money, provisions from just about any man she chooses to.

All she has to do is show up, put herself on a platter in some way shape or form, whether it be just her company, her body, or sexual favors, and most men are going give her that attention. Most men are gonna give her the dick. Most men are gonna give her that commitment.

As men, we’re the most sexually attractive between 30 and 45 give or take a few years. Our sexual shelf lives last at least a decade and a half longer than a woman’s. But that’s just our sexual prime. Don’t forget that we’re also sexually attractive in our 20s. Granted, it’s not quite as attractive as when he hit 30 but men in their 20s are still sleeping with beautiful women out there.

Now, don’t mistake me here. I’m not saying that a man’s sexual prime is *better* than a woman’s. Females may only have 10 years of prime beauty and fertility but their beauty is far more effective than that of a man. Men will move heaven and earth to secure an exquisite female in terms of youth and beauty. Women, not so much (though some may cutely try if they’re close enough to The Wall).

Young hot girls sleep with older men on the regular. The inverse rarely happens.

A given woman's sexual prime may not last as long as a given man's but hers will burn much, much brighter and much hotter. The hottest female will always attract more far more men than the hottest male will attract women by a long shot. It's not even close.

But the fact remains that as men, our prime attractiveness lasts 50% longer, and even before that, in our 20s we're still able to fuck pretty girls. So even if a man doesn't get laid until he's 20, he still has at least a quarter century of peak sexual activity as opposed to 10, maybe 12, for women.

A woman's sexual prime ends very quickly and very abruptly. One day she's able to fuck any guys she wants, and the next, those same guys aren't paying her any attention unless she's dressed like a slut and throwing herself at them and even then, they get rejected in favor of younger tighter girls.

Yes, there are some 35 year old women out there who are still hot, but that woman will never be as hot as she was at 24 and she knows it.

2. The more they accomplish, the less attractive they are

“I have everything I want…but a man. I’m dying inside”

Women are making more money than they’ve ever made in history. They’re more influential, and have more power than they’ve ever had.

Now this is exactly what feminists wanted. But what they didn’t take into account was the effect that all of this money and power and influence would have on a woman’s value in the sexual marketplace. And when I say sexual marketplace I’m talking about a woman’s overall attractiveness with regards to her beauty, her femininity, her personality, etc.

Here’s the raw truth: The more a woman accomplishes, the more money she makes, the more power and influence she gets, **the further she shrinks her pool of potential suitors.** In other words, the more status a woman has, the fewer men she’ll have to choose from.

Women don’t want to downgrade, *they want to upgrade.* They want fuck UP…date UP…marry UP. They’re not programmed to give the time of day to men who have less money, power, and status than they do. It’s simply not in their DNA, nor should it be. (Conditional love is for the weak. Embrace the burden of performance).

Donna, the executive at XYZ Fortune 500 company isn’t fucking the Junior partner at the big law firm. She wants to fuck the guy with his name on the door of that firm. She’s not going to date Steve the warehouse supervisor. She wants to date the guy who owns the company Steve works for. She doesn’t want to marry the company accountant. She wants to marry the CEO of that company.

Let’s take it to a lower level. A female junior partner at a law firm isn’t gonna date, fuck or marry a law clerk or a first year employee. Worst case scenario, she’ll date laterally and get with another junior partner but that’s the WORST case scenario. What she really wants is the *Senior Partner.*

Now women might say, *"Well there's nothing wrong with that. She has to have standards!"* And they would be absolutely right. But here's the problem:

THE MATH DOESN'T WORK.

You see ladies, there are more far more Steve's, Junior partners, and CPAs out there than there are company owners, CEOs, and senior partners at big law firms.

"Well…well…there are far more male executives and CEOs than female executives and CEOs so there are plenty to go around for all of the powerful women! In fact they'd have their pick of the all the most rich and powerful men!"

Wrong. Dead fucking wrong. Yes, there are far more male CEOs and executives than females. But high value men like this don't wanna date female Vice Presidents. They don't wanna marry these powerful and influential women. They don't wanna fuck female CEOs. Why, you ask? **Because they don't want relationships with women who have masculine qualities or personalities.**

"Well how do you know they're masculine?!? They could be very feminine and lady-like!"

Loading…

Simple. Because you don't become a senior partner at a law firm by being a feminine, kind woman. You gotta be a fuckin' killer. You gotta be cutthroat. You don't rise through the ranks to become an executive at a Fortune 500 company without being driven, and ultra competitive. And any woman who accomplishes these things has to exhibit masculine characteristics. Then they have to maintain these characteristics over an extended period of time.

It's all fun and games until you're acting like a man

And when she finally gets to where she wants, as soon as she reaches the pinnacle, *she has quite literally forgotten how to be a lady*. Yes, she's still a female, biologically

anyway. But all of her femininity has been stripped from her.

High value men are not looking to be with a woman who acts like a man. They don't wanna be with a woman with a scorned disposition. They're not looking to get with women who can't turn off the bitch switch and compete with them. They're not trying to get with a woman who's stubborn because she feels like she has something to prove to him.

Think about the cliche of the CEO fucking his secretary. His value is higher than hers, he makes more money, he tells her what to do, he has power, and he gives her instructions. The secretary is in a subservient position, she does what she's told, she asks his permission, she doesn't get outta pocket, and she defers to him. The CEO/secretary dynamic alone is conducive to attraction on both ends.

Women have been completely duped. They were told to get all this money and status and influence and they'd be able to attract any man they want. But the more they get, the harder it is to find a man because the feminine operating system simply will not permit her love and respect a man who is not superior to her in every way.

But it would appear that women are beginning to figure it out. The high powered female attorney's pissed off because big time male lawyers want nothing to do with her. The female executive's miserable because she now realizes why she's no longer attracted to the men who used to make her pussy wet on her way up the corporate ladder.

Sure, they've got cars and money and friends and can travel and buy pretty anything they want. **But what women really want is a man.** And at the end of the night when she lays in her $8000 bed with her 8000 thread count sheets she cries herself to sleep, because she's just now figuring out that the more wealth, status, power, and influence she gets, the less the men that she wants will want her. Her taste is too expensive for her sexual market value and it will be until the day she dies.

So she calls up her doctor and gets him to call in, yet, another prescription for ambien to help her to knock her out at night, lexapro to keep her from committing suicide during the day, and valium to keep her anxiety about being alone at 47 years old under control.

Think a 47 year old man is that miserable?

3. Men have accepted reality, women have not

Age ain’t nothin’ but a number honey! #StillGotIt

This is especially true when it comes to red pill men versus feminists. Any man that takes and accepts the red pill goes through a series of stages before he finally comes to acceptance.

There’s the shock phase when we first come across something red pill related—we can’t believe there’s something out there that goes against everything we’ve been taught. Then there’s the anger phase when we realize we’ve been lied to our whole lives and for a good long while we’re pissed off at women. The gluttony phase comes next where you’re consuming any and all red pill content you can find.

There are a few other phases in between but eventually we come to the acceptance phase. We accept that women aren’t what we thought they were. We accept that we as men have every bit as much to blame for the sad state of women as women are. We accept that we as men have to have our shit together before we can start making demands of women. We accept that the sexual marketplace isn’t fair and that hypergamy doesn’t care if a man’s only 5’9” because he didn’t hit the genetic lottery.

Red pill aware men accept hard and fast truths no matter how uncomfortable or inconvenient they may be. We’ve accepted that in order to get what we want, we’ve gotta go get it. We accept that nothing’s gonna be handed to us. We accept that attractive women aren’t gonna be attracted to us if we’re outta shape and undisciplined.

Women on the other hand have nowhere near the same mentality—especially feminists. They think the world should be handed to them on a silver platter for no other reason but that they exist and that they have vaginas. Women believe that no matter what they do or who they are, that they deserve the very best men out there and what they have to offer despite not offering a damn thing themselves.

They don't feel like they should have to bring anything to the table but their company. The world tells them that no matter how grossly overweight they are, how unattractive they are, and that no matter how slutty they are that they have **a right** to the highest value men on the market and that anyone who disagrees is a misogynist.

Someone get this girl a xanax

So yes, females are delusional to a fault but here's why they're really miserable: Even though the world fills their head with this bullshit day in and day out, **they're starting to see it doesn't work that way.** They're starting to see that they actually have to work hard to get ahead in life. They're seeing the highest value and most attractive men marrying young, fit feminine women who want to start families, who don't care about careers or sleeping around. They're realizing that as they get older, fewer and fewer people will tolerate their crappy attitudes and behavior.

They were told that if they go to college, fuck a bunch-o-dudes to "get it outta their system", graduate with a useless degree, then go work in a cubicle for 30 years that they'd be truly happy and fulfilled as women. Then at 37 they finally have that ah-ha moment where they think:

"Uh oh! I'm at a dead end job I hate, I can't keep a boyfriend, I may have a drinking problem, and can't stop crying at random for no reason. I thought I'd be happy. But here I am at nearly 40 years old and I can't figure out why I'm depressed. I'd better go see a doctor because there has to be something wrong with me if haven't found true happiness like everybody said i would."

All the while, a 37-year-old man's ah-ha moment is when he realizes that scheduling two dates on the same night isn't necessarily a bad thing.

4 Reasons You Need To Master The Art Of Sales

May 2, 2018 | by Regan Jacklin | Link | Original Link

Selling is undoubtedly the most important skill for a person to develop within their lifetime. The ability to sell will inflate your bank account and ensure you live a prosperous life. Beyond that, a good salesman becomes a master at the art of persuasion and understands basic principles of psychology to ensure he gets his way in life.

In every interaction you have with others, sales are being made in the form of presented ideas, requests, and beliefs. If you aren't the stronger salesman, you will be constantly persuaded and influenced by other people's opinions and ideas. However, with sales and persuasion skills, you can influence others to agree with your opinion, see value in your character, or just buy your product.

A good salesman will also need to sell himself on his ideas, beliefs, and personal value. When he is sold on himself, the persuasion of others will fall on deaf ears and he can move through life with an unerring confidence known only to few.

Let's dive in-detail to a few reasons why we need to master our ability to sell. Hopefully I can sell you on the idea…

1. Commission – The Reward You Get For Making A Sale

"Everything in life is a sale and everything you want is a commission."—Grant Cardone

Commission isn't just something the guy at Best Buy gets when he sells you a flat-screen TV. Commission is the reward you get for effectively selling yourself or someone else on something and then continuing to sell it until completion.

Sell yourself on eating healthy and you get the paid the commission of higher energy, better libido, improved complexion and so on. Sell yourself on exercise and you get paid the commission of a good physique, improved confidence, and lady magnetization.

When I reached out to Roosh to guest post on Return Of Kings, I had to sell him an idea—this post and your attention is my commission. However, if you can't identify a commission, *you will never pay the price to get it.*

2. Persuasion – Getting Your Way

In every exchange, positive or negative, one person is more persuasive than the other person. Whoever is most persuasive will get his way.

A parent trying to persuade their kid to eat their vegetables is going to have to sell them on the benefits of vegetables. Of course, the child is going to return with its own persuasion techniques and whoever is more persuasive wins.

If you and your girlfriend had different ideas about what would be the perfect way to spend next Friday night, whoever is more persuasive will see their plans come to pass. By simply understanding that in every encounter someone is persuading, you already have a leg up.

Of course, the power of persuasion can be abused. So, to use persuasion ethically, simply believe in what you are selling. You believe in the value of vegetables and you know that your plans would be more fun than your girlfriends. If you are truly sold on your position and ethical, getting your way would actually be beneficial to the others and *giving up is unethical.*

For example, I sell an eBook helping men overcome depression. I believe the information within is unparalleled. Therefore, I can ethically be pushy in my sales because I know that my ideal customer will actually suffer if I don’t make my sale. It is unethical to let them walk away.

Loading…

3. Personal Confidence

Personal confidence only comes as a result of being sold on your character and value. Failure to present your value to yourself cannot possibly yield the commission of confidence.

Selling yourself on your value is undoubtedly the most important sale you will ever make. It is from here that all other sales originate. A timid little boy cannot outsell a confident man.

Unfortunately, true confidence can't be faked. You can bullshit others about a product. You might even be able to make others think you are confident. But you can't bullshit yourself about your confidence. Confidence only manifests commissions when it is real and genuine.

If you can't truly make the sale of confidence, here are a two tips to help persuade yourself:

Improve Your Value

If you aren't confident, it is likely because you lack value in a particular area. Just like a product is sold off of its value, so is your confidence. Start improving whatever area of your life lacks value.

If you aren't physically fit, your value to the opposite sex is lacking. Improving your physique will improve your value and, consequently, your confidence.

If you aren't overly intelligent, pick up some books and unlock the potential of your brain. As your wisdom grows, your value to the marketplace will grow and, consequently, so will your confidence.

Use Affirmations Ceaselessly

Another extremely effective method to convince yourself of your value is through the usage of affirmations. If you have even a moment of mental leisure throughout your day, begin speaking positive words to yourself… sell yourself to yourself. This might look as so:

- I am charismatic and extroverted
- I am calm and confident
- I am a master of sales. I can sell anything to anyone

Through regular repetition of positive affirmations, your subconscious mind will make small psychological shifts and start thinking these thoughts naturally over time. As these thoughts become natural and frequent, so will their corresponding actions and rewards.

4. Become Your Own Boss

"We learn to read by the time we're seven. We learn to make a living by the time we're 30. Often by that time we're not only making a living, we're supporting a family. And yet by the time we're 65, we haven't learned how to become financially independent in the richest land that has ever been known." – Earl Nightingale

Finally, we arrive to the part of selling that most people associate sales with—the big bucks. There is no ceiling for a good salesman who is sold on his product. Since a salesman is paid by commission, his income is only capped by the amount of product he can sell.

And, of course, the amount of product he can sell and commission he will receive is only

capped by his persuasion skills and confidence.

In Conclusion

To the professional salesman, the world is a playground. With the ability to sell and persuade both others and himself, the professional salesman lives the life he wants.

Whether you want to get the girl, improve your health, travel the world, make your own schedule, or even overcome your low self-esteem, it is imperative you learn how to sell.

The Boy Scouts Is Removing “Boy” From Its Name To Accommodate More Female Members

May 2, 2018 | by News Syndicator | Link | Original Link

Via NY Post:

For 108 years, the Boy Scouts of America’s flagship program has been known simply as the Boy Scouts. With girls soon entering the ranks, the group says that iconic name will change.

The organization on Wednesday announced a new name for its Boy Scouts program: Scouts BSA. The change will take effect next February.

Chief Scout Executive Mike Surbaugh said many possibilities were considered during lengthy and “incredibly fun” deliberations before the new name was chosen.

Mike Surbaugh, the man who killed the Boy Scouts

“We wanted to land on something that evokes the past but also conveys the inclusive nature of the program going forward,” he said. “We’re trying to find the right way to say we’re here for both young men and young women.”

The parent organization will remain the Boy Scouts of America, and the Cub Scouts — its program for 7- to 10-year-olds — will keep its title as well.

But the Boy Scouts — the program for 11- to 17-year-olds — will now be Scouts BSA.

The organization has already started admitting girls into the Cub Scouts, and Scouts BSA begins accepting girls next year.

Surbaugh predicted that both boys and girls in Scouts BSA would refer to themselves simply as scouts, rather than adding “boy” or “girl” as a modifier.

> The war against males is getting out of hand https://t.co/0HVQo7kuyJ
>
> — Roosh (@rooshv) May 2, 2018

The program for the older boys and girls will largely be divided along gender lines, with single-sex units pursuing the same types of activities, earning the same array of merit badges and potentially having the same pathway to the coveted Eagle Scout award.

Surbaugh said that having separate units for boys and girls should alleviate concerns that girls joining the BSA for the first time might be at a disadvantage in seeking leadership opportunities.

Loading...

So far, more than 3,000 girls have joined roughly 170 Cub Scout packs participating in the first phase of the new policy, and the pace will intensify this summer under a nationwide multimedia recruitment campaign titled “Scout Me In.”

The name change comes amid strained relations between the Girl Scouts and Boy Scouts of America.

Girl Scout leaders said they were blindsided by the move, and they are gearing up an aggressive campaign to recruit and retain girls as members.

The new boy scouts

Among the initiatives is creation of numerous new badges that girls can earn, focusing on outdoor activities and on science, engineering, technology and math. The organization is expanding corporate partnerships in both those areas, and developing a Girl Scout Network Page on LinkedIn to support career advancement for former Girl Scouts.

“Girl Scouts is the premier leadership development organization for girls,” said Sylvia Acevedo, the Girl Scouts’ CEO. “We are, and will remain, the first choice for girls and parents who want to provide their girls opportunities to build new skills … and grow into happy, successful, civically engaged adults.”

The Girl Scouts and the BSA are among several major youth organizations in the US experiencing sharp drops in membership in recent years. Reasons include competition from sports leagues, a perception by some families that they are old-fashioned and busy family schedules.

The Boy Scouts say current youth participation is about 2.3 million, down from 2.6 million in 2013 and more than 4 million in peak years of the past.

The Girl Scouts say they have about 1.76 million girls and more than 780,000 adult members, down from just over 2 million youth members and about 800,000 adult members in 2014.

How I Successfully De-Toxified My Toxic Masculinity

May 3, 2018 | by Hugo Rowley | Link | Original Link

The three most destructive words a boy can hear growing up are ‘be a man’. Sometimes, we merely hear the exortation ‘man up!’, as some sort of challenge to prepare to fight, or complete some arduous task.

But, what does it really mean to ‘be a man’? For centuries, it was believed that a man should *inter alia* be the provider (or ‘breadwinner’) in a traditional nuclear family, not let his emotions get the better of him (or be on public show), take personal responsibility for his actions, be the decision-maker, demonstrate courage, bravery and integrity, and so on.

We now know that our ancestors were, at best, well-meaning, but are ultimately responsible for a society that is utterly broken by toxic masculinity. Our fore-*fathers* are responsible for the rape-culture than pollutes the modern world and makes it impossible for modern womyn to enjoy a quiet evening out, getting drunk, while wearing skimpy outfits, without the risk of being sexually assaulted.

The Harvey Weinstein scandal and other #metoo revelations of 2017/2018 have demonstrated, above all, that most men simply cannot be trusted to behave when in the presence of womyn. By their actions, men have proven the wisdom of feminists like Sarah Silverman, whose famous quote still reverberates: “all men are potential rapists”.

The first step to de-toxifying is to recognize that you are the problem

I, too, grew up in a traditional nuclear family and am therefore no stranger to the cult of toxic masculinity. As I grew up, however, and left the support of my patriarchal family-structure behind, I began to realise there was something deeply wrong with the world. Worse, I realised that *I* was the problem, and that my toxic masculinity was harming all that was good and noble in the world.

I suppose I can trace back the beginning of my 'awakening' to watching TV programmes, films, and adverts. None of the pathetic male characters I saw projected on my screen had the slightest idea how to cook, clean, or perform the simplest domestic task. They were forgetful, absent-minded, lazy, were chided by the smart womyn characters for messing everything up. For sure, they were physically (and emotionally) weaker as well.

The only thing they seemed to be good at was drinking beer, being aggressive and making crude jokes. Womyn, on the other hand, were smart, caring, assertive, strong, emotionally-intelligent, and always thrived in leadership positions where swift decisions had to be made.

As I watched film after film, advert after advert, I began to recognise my own weaknesses and failings in the male characters who were the butt of all the jokes. It was as though the film/ advert producers knew me better than I knew myself! About this time, I entered into a deep depression, wondering if there could ever be a way out of toxic masculinity. I rarely left the home – worried that, if I did, I wouldn't be able to control my urges and would rape the first womyn I met, just like most non-reconstucted men do these days. I wondered if I would become a statistic: despite white privilege and toxic masculinity, paradoxically the group most at risk of suicide is white males.

I'm looking at the (toxic) man in the Mirror, I'm asking him to change his (toxic) ways

The law of attraction… when in desperate need of a solution, the Universe will provide one!

A few years ago, life changed for the better. I was in a dentist's waiting room when I happened to pick up an old copy of 'The Lady'. As I opened the magazine, I came across details for an exciting-looking course: "Rethinking Masculinity." which was "*a partnership between the Washington, D.C., Rape Crisis Center, Collective Action for Safe Spaces, and ReThink, an organization that works to prevent sexual assault."* I signed up straight away and, as they say, the rest is history.

Loading…

On day one, we were given a document showing ten rape prevention tips, produced by Sarah Silverman. I still have the sheet, which I show below. Some of these tips seemed fairly common-sensical to me; others, however, I had simply never thought of, such as NOT putting drugs in womyns' drinks. Other tips have stood the test of time and saved me from almost certainly raping someone; tip 9, for example, requires that I always carry a rape whistle in case I see an attractive womyn in public and feel my submarine's 'periscope rising to the surface.'

TEN RAPE PREVENTION TIPS

1. Don't put drugs in woman's drinks.

2. When you see a woman walking by herself, leave her alone.

3. If you pull over to help a woman whose car has broken down, remember not to rape her.

4. If you are in an elevator and a woman gets in, don't rape her.

5. When you encounter a woman who is asleep, the safest course of action is to not rape her.

6. Never creep into a woman's home through an unlocked door or window, or spring out at her from between parked cars, or rape her.

7. Remember, people go to the laundry room to do their laundry. Do not attempt to molest someone who is alone in a laundry room.

8. Use the Buddy System! If it is inconvenient for you to stop yourself from raping women, ask a trusted friend to accompany you at all times.

9. Carry a rape whistle. If you find that you are about to rape someone, blow the whistle until someone comes to stop you.

10. Don't forget: Honesty is the best policy. When asking a woman out on a date, don't pretend that you are interested in her as a person; tell her straight up that you expect to be raping her later. If you don't communicate your intentions, the woman may take it as a sign that you do not plan to rape her.

How to de-toxify your toxic masculinity in just a few easy steps

The course was helpful in so many other ways. I began to understand that historic toxic masculinity was caused by a vicious circle of upbringing in which generation after generation promoted the falsehood that there are differences between men and womyn. I now know that this is simply untrue, that men and womyn are exactly equal in all respects, except that womyn do things better than men, including building bridges.

Other course participants have described the content and benefits they believe the course has given them:

> *"We spoke of emotional labor, consent, violence, communication, empathy, and vulnerability," [one participant said], noting that the last subject, in particular, was a struggle for him: "[I was] trained and conditioned to* ***be tough growing up****."* [emphasis added]
>
> *The Rethink program is the latest in a growing number of courses targeted toward people who identify as men, including the Men's Project at the University of Wisconsin, Masculinity 101 at Brown, and the Duke Men's Project at Duke. The goal, proponents say, is to help men examine their own biases and behaviors in order to cut down on misogyny and gender-based violence."*

Conclusion

As a graduate of the Rethinking Masculinity course, I would honestly recommend it to anyone who identifies as a male. Despite recent slippages, I would now never eat red meat or potatoes, for example, knowing that these poisons can elevate testosterone counts to dangerous levels.

Gender-Altering Chemical Bisphenol A (BPA) Is Turning More Than Just Frogs Gay

May 3, 2018 | by G.S. Luthra | Link | Original Link

BPA (Bisphenol A) is a cancer-causing chemical in plastics commonly found in water bottles, containers, and in receipts. The University of Exeter tested the urine of 94 teenagers and 86% had the BPA in their bodies. This chemical has been linked to prostate and breast cancer as it mimics the female hormone estrogen. It has also been found to lower the sperm count in men.

Professor Lorna Harries said that in a perfect world, consumers would be able to choose their exposure limits, but with the chemical being used in virtually all plastic products, that option is not feasible at the present time-

> Most people are exposed to BPA on a daily basis. In this study, our student researchers have discovered that at the present time, given current labeling laws, it is difficult to avoid exposure by altering our diet. In an ideal world, we would have a choice over what we put into our bodies. At the present time, since it is difficult to identify which foods and packaging contain BPA, it is not possible to make that choice.

The European Chemicals Agency have already declared BPA as hazardous for human health, yet the substance is found almost everywhere. BPA has also been found to lead to type-2 diabetes and heart related diseases.

Although one could try to avoid them, Professor Tamara Galloway, lead author of the research, has a different view:

> We found that a diet designed to reduce exposure to BPA, including avoiding fruit and vegetables packaged in plastic containers, tinned food, and meals designed to be reheated in a microwave in packaging containing BPA, had little impact on BPA levels in the body.

The Effects

The Dutch and French have been publishing studies reporting the massive decline of male sperm levels since the end of World War 2, but their warnings have been ignored. Children and pregnant women are most susceptible, because they have growth hormones that the BPA chemical can mix in and pass through the gut directly enter the growing fetus. Kids can suffer impaired development due to this. In China, such toxins have been found to speed up puberty which has dangerous effects on the mind and body. Although not a crisis now, male baby birth rates have declined over the years.

Loading…

Drive and ambition is also plummeting and the sex frequency of young milennials is a joke compared to their predecessors, again another side effect of lower testosterone and estrogen dominance. Even the fish that are being exposed to the onslaught of pesticides and chemicals are having sex alterations.

The War on Testosterone

The reason the globalists want this hormone wiped out from the human population is because healthy t-levels enables a man to harness his mind for protection and to fight against injustice. Hollywood immaturely portrays the testosterone laden young man as a rowdy bully who just wants to fight like a wild animal, but the real reason is because they don't want anyone to stand up to the establishment. They want a nation of compliant complacent soy boys.

A Synthetic War

EDC's and other synthetics can change a young healthy growing male into a female by altering the natural production of testosterone. Dioxin and PCB's are also testosterone hormones. Male genitalia development can be disrupted by these chemicals. The number of those declaring themselves as gay, LGBT, or transgender have skyrocketed over the years.

The feminization of man continues to plague society as more and more of these dangerous chemicals are coming into contact with children which is leading them astray to question their sexuality and submit to government indoctrination. Residues are being left in commonly used plastics kids frequently touch and very little if any is being done to counteract these testosterone killing substances from our environment.

Soy in general should be avoided even if it's "organic", because too much estrogen is too much estrogen. Once in a while is okay assuming it is GMO free, but this and items which can contain BPAs should be avoided if possible. However, as previously described, it is impractical to do so, especially in America. So do the best you can, but the better thing would be to naturally increase your T-levels to resistant the detrimental effects of a soy infused society.

You could say that millennials are the 'gayest generation', as this wimpy spineless population is on the rise with the prevalence of more soy based "men" who cater to female authority and the politically correct hierarchy. No one thinks anymore, nobody dares challenge the authority, and such complacency is dangerous for personal freedom. Everybody seems to accept anything served in a happy meal, and being a man who seeks strength, power, and fulfillment, is shunned for being "toxic" and in immediate need of psychiatric therapy to end their macho ways of assertion as it will only lead to suffering according to engineered science.

Self-Driving Cars Will Destroy Human Freedom

May 4, 2018 | by Howard C. Roark | Link | Original Link

The newest tech trend in Silicon Valley is automated cars. All the big sharks from Silicon Valley are competing between each other in a race where the winner will pioneer this technology.

When the average Joe hears about vehicles piloted by an AI, all he can think of is how great this is going to be. After all, having an AI piloting for you means, that you will be able to use your time time on the road wisely while stuck in a traffic jam, for example. Activities such as reading a book, playing a game on your smartphone, relaxing or just watching the view of the city will all be possible, thanks to the AI, who will be taking care of reaching your intended destination without crashing or losing the route.

All of this sounds really great, doesn't it? However, the masses adopting every technological revolution is plain wrong. Every technological advancement should be taken with a grain of salt. They don't always translate as an improvement to our conditions of living. Nonetheless, let's look deeper at this issue.

Your car is now a RC car waiting to be controlled by the government, corporations and hackers

Remember, when you were a child and experienced the joy of playing with your RC car until an old brother of yours took the remote control from your hands? Well the same will occur with your automated automobile, but this time it will be Big Brother in the literal meaning of the word!

If you are born in a corrupt country with a facade democracy and ruled by an iron first, you realize how bad this idea sounds. Imagine this technology at the hands of corrupt politicians and crooked entrepreneurs, they will use it to achieve personal gains such as trying to silence anyone that opposes them or forcing the car's AI to bring political activists to the police or getting the location of a suspect through the vehicle's GPS system.

If this technology ever becomes a trend in least developed countries such as Brazil, India, China and Russia, I'm sure it's most likely to be used to enforce the elites's wicked goals rather than to give more comfort to the local population.

An AI is still a software program, which means glitches that can threaten lives

Not so long ago, Uber was testing a autonomous vehicle in Arizona that failed to slow down and stop when a woman was crossing the highway. As a consequence the car ran over her and ended her life.

This is further proof that no matter how much bug fixes they do, an AI is still a computer program written in a programming language. Which means bugs will always exist. Even after the engineers fix most bugs and thus the software gets closer to perfection, every now and then a glitch will cause an accident or cost an innocent life.

Loading…

The real reason behind why they still want to keep pushing self-driving cars

Robots will be taking most basic jobs in a not so far future

Even after the death of a pedestrian Uber, Tesla, Google and other tech giants stated that they are still committed in their quest for pushing automated vehicles, until there won't be human drivers any more. No one will ever need to worry about knowing how to drive cars. After all, it's all about giving the masses more comfort, right?

You might have heard of Uber CEO, Khosrowshahi, make these statements: "Ultimately, self-driving cars will be safer than humans, but right now self-driving cars are learning," and "They're student drivers. You need a safety driver with a student driver. When that student driver graduates, it will be safer than humans.".

Unless you are a captain of industry or a software programmer chances are that they will be taking your jobs.

The real reason behind all those corporations investing in self-driving automobiles isn't because they care about your well-being nor your family's and want to give you more comfort in the future. The reality is that it's all a plan for them to cut more jobs, increase their profits, and make people more dependent on the elites, since no one might be able to drive vehicles on their own in a not so far future.

After all, a robot won't ask their boss for a raise, get sick, or file a lawsuit against their employer. They don't care if self-driving automobiles are more likely to cause crashes than human-driven vehicles nor that this technology might be used by corrupt governments and crooked entrepreneurs to spy on you or quietly kill anyone. After all later on they can claim it was a glitch in the AI to get away with it.

What all these tech corporations care about is to push their agenda, increase their power over the masses, cut costs, and increase their profits. In a not so far future, multinational corporations will probably bribe politicians to accelerate their agenda of standardizing self-driving cars and make human-driven automobiles obsolete, until it's possible to completely cease the production of human-driven cars.

How To Optimize Your Time

May 4, 2018 | by William Adams | Link | Original Link

For a couple of years ago I came across Rory Waden's time management analysis and corresponding lecture. I agreed with some parts, while being critical to other things. Mostly I realized that this lecture is somewhat incomplete and requires modifications and complementary pieces of advice.

Although the obsession of optimization may sometimes be misguided, occasionally it might be truly important to save time and efforts that you do not really need to spend and carry through.

Waden's point is that we cannot really manage our time, only ourselves. Thus market rhetoric like to "multiply your time" is merely sales tactics and talking points. We have our 24 hours and there's nothing you can do to change that.

However, we can indeed make adjustments in regard to our behavior and decision-making, hacks and principles that can be quite crucial whenever we have happen to have a big workload, family matters or other priorities that need to be taken care of. Perhaps it's also particularly important to find ways to focus on our relationships, passions and hobbies to a larger extent, such as to write a novel and meet good friends.

1. Do things today that create more time tomorrow

This aspect may seem a bit paradoxical but on one hand you can take care of things today so that you don't have to deal with them tomorrow. On the other hand you can give yourself "emotional permission" to procrastinate and don't deal with them at all. Some

things on your priority list may in fact not be that significant and you don't have to deal with them at all. Their significance is low, hence of little value for your own life in the longer run.

This approach may be called selective procrastination. Waden underscores that procrastination in the true sense is negative, but not to selectively neglect things of little significance.

2. Automation

One of the major stress factors today is to deal with multiple trivial yet annoying and time-consuming micro tasks such as paying the bills, transfer money between accounts, and go out to consume things like food, clothes and furniture. But if you have your automatic payment services and subscriptions in check then you don't have to deal with such matters to nearly the same extent.

Loading...
Moreover, it might be wise to pay all of your major loans once or twice a year so you don't have to deal with partial payments every month. For example I cannot escape my student loan, and therefore I pay the entire annual amount in January so I don't have to deal with it for another 12 months.

Additionally you can make orders online and have them delivered to your home, like a new kitchen table from IKEA or a cool jacket.

3. Selective multitasking

I am a largely efficient and industrious person but not against the idea of reading articles and fixing private things at work whenever it may be appropriate. When you're

participating in another boring and likely unuseful meeting for one hour you can respond to important e-mails, browse the web for a trip, and make payments.

Furthermore, public transportation is an excellent place to read a bit and spend minimal time on social media and listen to catchy music, instead of making these trivial pastimes top priorities at home.

While multitasking may often be inefficient and create more stress, it exists situations where you can and perhaps should do it.

4. Let someone else do things for you

Friendly maids

I guess that many of you like to take care of miscellaneous tasks yourself and don't need other people's help. But there are things, both at work and in private, which you can delegate, even if you're not your own boss. By showcasing agreeableness, benevolent manipulation, and some degree of social shrewdness it's very much possible to make other people take care of things for you. Just be polite and do something in return from time to time.

At home, if you're single, you should consider the idea of occasionally paying someone a reasonable sum to for example clean the entire place. At ROK guys tend to talk about going to the Philippines to have an easy lay, but what about the opposite: to let a poor Pina come to your house and fix things for you? After all, that would be more morally responsible than to impose work on your old mom who lives far away.

In summary

To be efficient and industrious is still important. Procrastination, if that implies to neglect

significant tasks and responsibilities, is likewise negative. But there are approaches to manage yourself and consequently save time. If you make minor adjustments and have a proper approach to your own priority list, then you can end up being more relaxed, as well as less stressful and borderline neurotic.

Land Is A Source Of Liberty And Masculinity

May 6, 2018 | by James Absalon | Link | Original Link

America clearly suffers from a general cultural and moral decay, as Return of Kings has documented so thoroughly. One source of this decay could be the growing landlessness of many Americans, coupled with sedentary lifestyles that are subsidized by an overly-generous welfare state. The solution, perhaps, is to offer an alternative to welfare: the Jeffersonian ideal of a nation of freehold agriculture.

I teach at a small private school in rural South Carolina, and every day I drive past fields of cotton and corn. Besides making for a scenic drive, these fields call to mind Thomas Jefferson's vision of America as an "empire of liberty," a nation of small yeoman farmers.

Jefferson's contention was that a virtuous republic could be maintained only if a substantial portion of the people were involved in the strenuous work of agriculture. Such a life would instill within the farmer virtues like thrift, honesty, and hard work. Further, it would ensure that those men who voted would own a piece of their State and nation, and would make wiser policy decisions because they had a direct, visceral investment in the nation's governance.

A final, crucial part of Jefferson's theory was that the alternative—a nation of wage slaves crammed into urban centers—would breed corruption and dependence, as a small and wealthy cadre of political and economic elites could enjoy power through the bribery and exploitation of urban proles. The specter of the Roman Empire's "bread and circuses"—the bought acquiescence of a non-productive urban population with entertainment and food—haunted Jefferson. Such a world would bring death to liberty and reduce men to feeble wards of the state. The farmer would always have his land to provide; the urban worker may not always have his wages, and had no land on which he could depend to provide sustenance in lean times.

While I don't believe America as a whole should begin a massive "back to the land" movement, Jefferson was certainly onto something, and his nightmares are at least partially fulfilled in the modern welfare state, which "enslaves" generations of Americans, transforming otherwise productive members of society into politically-useful leeches, living materially-secure but unfulfilling lives in depressing Section 8 housing. While we certainly have an obligation to provide for those who are incapable of doing so for themselves, our social safety net was never intended to be a hammock.

Loading…

Could we not break the indolence and moral turpitude of the modern welfare state by restoring, in modern form, the Homestead Act of 1862? The Homestead Act opened millions of federal lands in the Old West to settlement, providing a Jeffersonian foundation and boundless opportunities for tens of thousands of Americans.

Rather than cramming unproductive welfare-recipients into poorly-maintained housing projects in congested inner cities—or relegating them to dilapidated trailers on rented land in the middle of nowhere—we could open up millions of acres of federal lands in the West—or elsewhere—for homesteads. With some training in agricultural techniques and some seeds and equipment, poor Americans could earn a new lease on life—and break out of a cycle of dependence and meaninglessness.

Welfare can create a moral void, and while a New Homestead Act would require a great deal of hard work on the part of the participants, those same participants would benefit from the virtue-building nature of that work. In time, they would enjoy a sense of pride and accomplishment from taming the land and providing for themselves and their families.

Further, encouraging young men and women to take up the strenuous life would do much to restore a more traditional culture. Women won’t have the time to march against “patriarchy” while churning butter, harvesting crops, and teaching healthy farm children in the ways of civic virtue. Men could enjoy a hard-won but rewarding sense of freedom.

This is just a preliminary sketch—an idea that's been percolating in my mind for a few years, inspired both by a conversation with a friend who has done police work in dangerous housing projects, and by the golden fields I drive past every day—and I know there are many complications and facets to consider.

There are, too, other alternatives. The growing Internet economy, for example, has enabled many young men to escape the corporate hamster wheel and the HR overlords of the modern workplace.

That said, America is blessed with abundant lands even now, and a chance at the strenuous life could give tough hope to millions of Americans trapped in dependency. Imagine young men, formerly destined for gang membership or indolence, owning and operating their own farms. Imagine the opioid addict sweating the poison of his habit from his brow.

That's an America that can begin to re-install the time-honored values that made our nation great, while recreating the powerful "safety valve" that Western expansion provided 150 years ago.

In a world of cultural madness and decay, good men and women must reassert traditional values. Christianity, liberty, and nationalism must--and can--be restored.

I Lost My Wife Of 35 Years

May 6, 2018 | by Pete Fletcher | Link | Original Link

My wife of 35 years died six days ago after a long illness. I didn't start out to write this but, when I started writing her eulogy, I found that what I really wanted to say didn't belong in a eulogy and couldn't be read in church. What I wanted to say speaks to the core of manhood and is better suited for ROK.

These thoughts have been on my mind the last few months, but readers will need background. Writers for ROK fall into two groups. Those in the larger group evolved over eons of time by random mutations and natural selection. They exist to propagate their genes. Their social agenda focuses on this, getting better with learning and experience.

I'm in the smaller group, created in the image of God with a body, a soul and a spirit.

The parts of a man

My body is standard issue male. Pretty simple stuff, until puberty began and my body responded according to the timing of various chemicals and demanded sexual activity with females. It poked out toward the young ladies, all on its own and without warning. I learned to control these imperative urges and tell myself “no, not yet,” as all men must, if they are to be men and not beasts.

My body does not have a soul, rather my soul is me and I have a body. My soul is that spark of self-awareness that knows itself as “I”. It distinguishes men from the animals.

I also have a spirit which holds the sum total of my memories, life experiences, learned behavior, fears, desires and so on. It determines who I am and how I behave. I believe manhood is embedded in my spirit, my body is merely masculine.

So as a man, I am a soul, currently residing in a piece of meat, and guided by a spirit. As a man I am responsible for my own behavior. I have responsibility to my community and to those around me. The meat doesn’t care a whit about these things, but the soul controls the meat and the meat does my bidding, because I am a man.

To paraphrase SFC Gregory Stube (ret.): A man defines himself, not by what he does with his body, but by what he does with his soul.

Loss

I used to love, lead, protect and provide for my wife, but no more. The link between my wife and I was existential, and when it was broken, my existence was diminished. I am incomplete; my universe has holes in it, my bed doesn’t feel right, the air sounds different. I am a widower and I understand what I had, by the shape of the hole. But I find that what I lost is much more than what I gained when we married. Where did it come from?

I remember the first time I saw her. She was young, lithe, beautiful, and full of life. And she was not mine. She was not available. But two years later she moved to my town and we began dating. The meat rose up and the spirit wavered but the soul beat it down and we waited and obeyed “Thou shalt not” until…

Loading...

In due time, “until” arrived and, in an ancient ceremony, her father, her family, our Church and my family, agreed that We Shall. The old, dour, sour church ladies gave her enticing undergarments in gaily wrapped boxes, along with much encouragement. That night, for the first time for each of us, We Did. Without guilt, fear, or shame. And it was awkward and it was wonderful and we were one flesh for over 35 years.

That first year we shared our bodies on an old lumpy bed and on the beach and wherever was convenient and private. We got pretty good at it but, in time, as our souls grew together, the two meats became sated and passions cooled. I began to wonder if this was all there was.

Then we got pregnant. She grew great with child, her belly stretched, her breasts grew and her face puffed. He was born and our lives were never the same. The young lithe body I had married was now a loosely packaged, jiggly, wiggly mother and, contrary to my expectations, my desire for her grew. We learned to Do quietly so as not to wake the baby. And It was better than ever.

We added more children and experienced PTA and sports and learner's permits and graduations and first jobs and lost jobs and there was that call in the night for bail. Our souls grew together and we trained the meats and experienced the best sex ever. The older we got and the more wrinkles we grew, the closer our souls became.

A pure love

Our brood began moving out on their own and we grew older together. The sex became less frequent but more satisfying. Then the cancer struck and the slow end began. Her body deteriorated but my love for her increased even more.

At the end there was nothing that would interest a younger man, even if drunk, but to me, she was a goddess. The mother of my children, my darling, my soulmate, my wife.

So, only after she is gone do I realize that my desire for her, which had once been the craving for her young body, had become the desire for the soul that had become intertwined with mine.

Our love had passed the physical, becoming spiritual, and the joining of our aging bodies amplified the joining of our spirits and our souls were satisfied.

I think I now understand why God created us body, soul, and spirit, and also male and female.

If a man never gets beyond his body's desire for young flesh and settles down with his life mate, he will never be satisfied. He will be like an athlete who eats the frosting off the top of the cake and is not hungry when the steak is served. He doesn't grow strong, he gets sickly.

Celebrate and support your body's masculinity, but make your soul control your body and rule your spirit. That's manhood.

20 Memes That Capture The True Nature Of Women

May 7, 2018 | by Jean-Batave Poqueliche | Link | Original Link

Despite their simplicity, memes have a true power. They are essential tools to spread an opinion and convince a vast audience.

They are effective because they are relatable, easily shared and above all, viral if successful. A meme is the digital response to paper propaganda.

And memes have done a lot to explain vital principles of game to beginners. Here are a few nuggets:

1. Alpha fucks, beta bucks

2. Red Pill comics

A personnal favourite. Cold, sober and realistic

3. “I am ready”

4. “I like you the way you are”

5.The ever busy rationalising hamster

6. Regret = rape!

Girl sees false rape accusation withdrawn when pictures of her getting her pussy licked while laughing surface.

7. “I am one of the guys”

8. Where is my catcall?

Be careful what you wish for

9. “You are perfect”

Loading...

10. Double standards

11. Gentlesir mag

12.How to speak Cuntonese: Lesson 1

13. Date up or die tryin’

14. Tinder “Black pill”

That might be the deadliest one.

15. Any takers?

16. "Not all women are like that!"

AMERICAN GIRLS BE LIKE
WE CAME TO A NOISY BAR TO HAVE A CONVERSATION. LEAVE US ALONE.
imgflip.com

AMERICAN GIRLS BE LIKE
Patriarchy
STOP OPPRESSING ME

Definitely would extend it to Western girl

17. Women and damaged men

Referring to Florida school shooter Nicholas Cruz and beta anti-gun activist David Hogg

18. There will always be bin divers

19. “I am tired of these nights”

20. On marriage

If all those could be condensed in a few words it would be: “Do not listen to what women say. Observe what they do”.

Memeologists in the audience might criticise the fact that all those images are not “memes” per se. I would argue that cold, brutal reality makes the best memes.

I had to narrow it down to twenty, but feel more than welcome to add classics that I might

have forgotten.

How To Work Out While Traveling

May 7, 2018 | by Joseph Murci | Link | Original Link

Traveling is a blast. Seeing faraway lands, making memories, going on adventures and experiencing brand new things. It's something we could all use some more of. But a common question that comes up when we talk about traveling is this:

> *How do I workout while traveling?*

After all, you worked your ass off to make those gains, and the last thing you want to do is see them melt away under the vacation sun on the white sandy beaches of Aruba.

So whether you're living it up on vacation and experiencing all that life has to offer or traveling for business reasons, in this article, I'll show you all my tips on how to workout while traveling so you don't lose your gains (*and even keep making them!*).

1. Find a Gym in Advance

The first tip is to do your homework and find a gym in advance before you decide to travel. We're not stuck in the Stone Ages. The world wide web is right there waiting for you, and unless you're backpacking in the African jungle, most civilized places will have a gym in decent distance with standard workable equipment to get your gains on.

Determine where you'll be staying and then research gyms nearby. If you're traveling domestically and are member of a large commercial branched gym, check to see if there's one in your area and if they'll still take you in for being a member.

If not, then call up other local gyms. Let them know you're just in town for a brief period and see if they'll offer you a free guest pass or a reduced rate while you stay.

No matter what you do, ensure they have the equipment you need so you don't show up surprised. Don't be a diva, but a power rack and some dumbbells are a staple that'll enable you to get your work done.

2. Get a Hotel with a Decent Workout Room

If tip #1 isn’t a viable option, then book your stay with a place that has a good gym of its own. Hotel gyms are notoriously bad and typically just contain a piece or two of dusty cardio equipment and a couple of rusty dumbbells, but you’d be surprised. There are lots of hotels who have stepped their game up and have several machines and a full rack of dumbbells without gashing you on the price points. After all, plenty of people who travel aren’t just vacationing and need access to a good gym to stay in shape.

In fact, if you do your due diligence, this may even be your best option. Sleep in, grab some coffee and continental breakfast, and head to the gym room to make some gains. Simple.

Research beforehand and scan the pictures of the hotel on their website. If it’s a nice setup, they’ll have photographs of their gym (from a business point of view, it’s a great selling point).

3. Lift Light

If your hotel does have a gym but the weights are too skimpy for your current level of training, then have no fear. Just train light. Research has demonstrated that light loads with sets even up to 25-35 reps are just as effective at building muscle as heavier loads with lower reps (1).

Granted, they're also much more pump and burn inducing from the buildup of metabolites, but they do still work and if anything can give your joints a breather from your regular heavier lifts and potentially enhance growth of your Type I fibers.

4. Blood Flow Restriction

Packing your blood flow restriction (occlusion) wraps in your carry-on is a helluva lot easier to get through security than a duffel bag full of iron weight plates. Blood flow restriction training is a style of training whereby your occlude a muscle group by applying a cuff to the top of a limb and lift at only about 30% of your 1RM (!).

While it sounds fantastical, it has shown to be just as effective as heavier loading for muscle growth*. The wraps slow the veinous return of blood from the muscle, so metabolites accumulate that drive greater muscle activation despite the light load, leading to greater tension on the fibers. Increased cell swelling and other effects of metabolic stress are also proposed to drive the growth response we see from blood flow restriction training.

Loading...

okay, enough of the science. Take a breather, champ

Simply apply the wraps to your limb and crank out your sets. The protocol most employed in research is as follows:

Set 1: 30 reps (to build up metabolites)
Set 2: 15 reps
Set 3: 15 reps
Set 4: 15 reps

Rest only 30-45 seconds between each set.

If nothing else, blood flow restriction is a great way to maintain size over short stints, and as an added bonus, it's extremely time effective and perceptually requires less effort than traditional intensive loading, so you can knock your workout out fast and go about your day – with a skin-splitting pump, to boot. (*For more on blood flow restriction training and how to implement it properly, check out my ultimate guide here*.)

*Although I wouldn't say it's equal per se for making maximal gains, all things considered.

5. Chill and Let Chill

Lastly, the advice the dedicated gym-goer never wants to hear: *Just chill out.* If you're going on a trip for just a few days, your muscle mass gains are not going to be compromised.

You may *feel smaller* from the lack of post-workout muscle swelling and less muscle glycogen, but gains in muscle size don't up and vanish like that. Research has shown that losing appreciable size can take up to 3 weeks (2). And results are similar in the long term between untrained lifters who train continuously and those who take weeks off in between training (3,4).

Other research shows that muscle mass gains can be maintained even at 1/3rd of the volume it took to build it in the first place (5). So reduce your training or time your trip in conjunction with a deload or week off, and use your trip to focus on what really matters: *Having a great time or taking care of business.*

Conclusion

So there you have it: how to workout while traveling. As you can see, it just takes a little forethought and some smart training. Now go live it up.

8 Things You Should Know About Having Relationships With Chinese Women In China

May 8, 2018 | by Don Steven | Link | Original Link

Last year I went to China to work. Naturally one of the my biggest concerns before going was whether I would be able to get laid. Would Chinese women, I wondered, be boringly conservative? Would they be labouring under not just seven decades of communist repression but five millennia of tradition constituting what the Chinese call "the oldest civilisation in the world"™?. Perhaps it would be a good thing and, insulated from the degeneracy of the modern West, Chinese women would make for great marriage material?

Since there was a real dearth of information on China in the manosphere to answer my questions, there was only one way of finding out. And find out I did. Here is a list of some things you should know about dating Chinese women in China.

1. The average Chinese woman is attractive

Straight off the plane I was surprised by how attractive Chinese women were. I'd lived a few years in South America where Latinas provided a satisfying alternative to the average Western European land whale. Chinese girls, however, are on a whole other level. Slim, petite, cute, even, dare I say it, elegant. I can sling around even more epithets, but I'll just give you some photos of normal girls from around my city (yes I took all of them):

I stress again these are just normal, not exceptional, girls. A dime a dozen. And there is a biological reason for that.

While I can't endorse the "they all look the same!" stereotype, there is definitely less phenotypic variation amongst the Chinese than you see amongst Caucasians. Basically, there are a few moulds that the vast majority of Chinese women will be a variation of and this puts the majority of 18 to 30 y/o women in the 6 to 9 range.

So while say there are very few 10's (the breathtaking beauties that you might consider fucking even if they had AIDS), there are very few few 5's (in my book someone who you wouldn't fuck even if drunk) and below. Very rarely will you see anything like the bovine monstrosities that lug themselves around western city centres. Relentless social pressure assures that most Chinese women stay in shape even as they get older.

2. Chinese women are very easy to pick up

Let's get straight to the point. In China, just like in South America and South East Asia, there is 100% a foreigner pass that no matter how you look (as long as you are white) gets you a front row seat on the fish taco express (however this is a VERY qualified pass – see no. 6).

The mechanics of dating in China are also easy. China is a far more technologically integrated society than the western world (mobile phones are used for absolutely everything) and there are a huge variety of apps through which you can easily procure a "one night stand" which has become a popular term in the Chinese culture.

There is also, surprisingly, far less BS involved with asking a girl out. You can just send a message along the lines of "want to go out sometime" or even just walk up to someone somewhere in the supermarket or on the subway and you will be given a very matter of

fact yes or no (this goes for Chinese guys too – and the answer is usually yes). Girls will definitely not treat you like a sex pest.

3. Chinese men are hopeless

Milk tea and cat videos. The Chinese manosphere.

Your foreigner pass will be gilt-edged by the poor quality of the domestic competition. Chinese men are the least manly group of people I have ever come across. Physically they are slightly built and on the short side but more damning is their social behaviour.

When I first got to China I was amazed by the open displays of homosexuality. I soon found out that the young men I saw walking around arm in arm were actually most likely friends and it's normal to embrace like a bunch of gay lovers. It is also a very common sight to see groups of young men hanging out in "bars" where they will sit for hours playing video games drinking overpriced bubble tea or green tea topped with powdered milk.

There may be concerns in the West about fielding future battalions of limp wristed snowflakes and transgenders, but from what I see, if they do battle with the Chinese, they might well have the edge against man-boys whose endocrine and nervous systems have been devastated by a daily barrage of soy protein and funny cat videos.

4. Chinese girls are not sexually experienced

Having a limpid male population coupled with pornography ostensibly being banned in China has resulted in very undeveloped sexual skills. I don't mean that girls will be virgins, but, whereas one of the few silver linings of western decline is that at least your average Tinder date is near guaranteed to give a pornstar blowjob, your average Chinese

girl will barely get her mouth around the tip before before she becomes a tremulous jumble of adrenaline and uncertainty.

This may be seen as a negative but the chance to school them on how to fuck properly is a definite positive. It will earn you an eternal place in their heart.

5. Chinese girls have a different smell

Let’s get into some negatives. Perhaps not a major one, but with Chinese girls you definitely come across some funky smells. If I could give it a general description, I would say they smell of Chinese food. Probably won’t be up to everyone’s tastes, but for someone like me who grew up in the UK, it’s a welcome change from dick and alcopop breath.

Loading…

“Gizz uz a kiss!”

6. The foreigner pass is only valid for one night stands and very casual relationships

“I can still feel it right here! Too bad he came from a loser civilisation”

The most important point in this article. If you have lived in somewhere like South America or SE Asia you will probably be used to the girls itching to turn that foreigner pass into a long term relationship/ marriage and their own passport to the West. Not so in China.

Chinese women will be quite happy to bang you but they are NOT desperate. Maybe it was different in the past but nowadays the Chinese are quite aware of their position in the world. “China No.1!” is a common refrain you hear in not so jokey conversation and if they see a foreigner in their midst they are more likely assume you as a loser who couldn’t succeed in your own decrepit civilisation rather than the bearer of great cultural and economic riches. A common phrase in China for a foreigner is ‘LBH’: loser back home.

Have you noticed even amongst Chinese emigres in the U.S and Europe there is a strong tendency to marry within their own community? Fact is, despite being unmasculine, Chinese men are professional, hard working, and wealthy. Chinese women being a few IQ points above Western women will not put having great sex above the ultimate goal of having a family and economic stability which they are more likely to do with Chinese men.

7. You will have to deal with ‘face’

All of Chinese social life turns on the concept of ‘face’ or Miàn zi (面子) which basically means keeping up appearances and avoiding humiliation. If you are just having flings this probably won’t be an issue (because she is unlikely to tell anyone about your relationship). However, if you are long term, then you will have to adhere to the social code, meaning you must spend big to impress her family and peers.

You must also get ready to seriously up the spending in a year or so because if you have made it to long term status that means that marriage is on the cards. A Chinese girl cannot be seen to have had various unsuccessful relationships and she must have a house and family by around 28 otherwise she will be considered a ‘leftover woman’ that no self respecting Chinese man would marry. She will then be forced to try her luck with a foreigner on an online dating site (the humiliation!).

8. Don’t marry a Chinese woman unless you are a millionaire or she is prepared to leave China

The second house you buy could be yours!

Because of ‘face,’ in order to marry their daughter you will be expected to pay the parents of your girlfriend a dowry. When I say dowry, don’t think jewelry or some gold bullion coins. Think a house or sports car.

After that you will be expected to lay on a lavish ceremony followed by an expensive holiday accompanied by ridiculous wedding photos. So make sure you are loaded especially in the South of China.

If you do however manage to clear these hurdles then congratulations. You are likely to have married a smart family-orientated woman. However there is still the issue of having to live in China.

As a foreigner your business won’t truly be yours and any assets like a house and land you ‘own’ will only be enjoyed on a leasehold basis. Also, If you have a child in China you’re going to have to accept that it’s a subject of the Chinese state. Chinese nationality law is one of the most draconian in the world, so make sure never to piss off your wife or face never seeing your kids again.

Ideally you should convince your wife to move. If you stay, be prepared to keep a low profile and live in a cage, albeit a very gilded one where you can certainly enjoy the trappings of luxury. You can also access ROK without any problem, which is more than can be said for my mobile provider in the UK.

Conclusion

Chinese women are surprisingly attractive. If you enjoy banging exotic chicks then it is absolutely possible in China. Having long term relationships with a Chinese woman is a whole different ball game. You will face unrelenting pressure to keep up appearances and spend big money. If you are able to do so then it may be worth it. Chinese women are intelligent, family orientated and feminine.

My advice however is to go there, soak up the culture, and treat any relationship like a Sino-American joint venture; pump, dump and get the hell out the dodge.

Leftist Scholars Are Trying To Claim That The Vikings Were Muslim

May 8, 2018 | by Hugo Rowley | Link | Original Link

The colorful history of Britain is one that is greatly enriched by the exploits of the various tribes who have made this island their home over the ages. We think, for example, of the Romans, the ancient Celts, the Saxons, the Normans. Arguably, however, all of their achievements pale into insignificance when compared with the Vikings who came by longboat from Scandinavia.

In late 2017, Swedish researcher Annika Larsson of Upssala University announced that she had discovered a thousand year-old Viking textile with 'Allah' inscribed on its hem. Media outlets such as The BBC, Guardian, and The New York Times all rushed to speculate that the Viking culture was clearly deeply influenced by Islam. Some in the alternative media were openly critical of the BBC et al., accusing them of 'abuses of history', and 'falling over themselves' to use a non-story, based on flawed science, to promote their progressive agenda.

The seamless integration of recent immigrants in Sweden only adds evidence to support the BBC's narrative. The more interesting questions then are these: what were Muslim Vikings like? What motivated them to invade Britain? Using a multitude of accredited historical sources, below is a touch of leftist-approved fiction to portray with a high degree of accuracy how much of modern Britain was first civilized by the Vikings.

Stavanger, 793 AD, Late Spring

The long dark nights of winter are now but a distant memory for the occupants of Stavanger, a bustling coastal town off the West coast of what centuries later would be known as Norway. For sure, there is still a stubborn chill in the fresh morning air, but it is rare to find anyone here who actually feels it; most people – men and women alike – are

laboring hard to finish building the finest fleet of ships ever to set sail.

At high tide the next day, the first of these mighty warships (termed longboats) will leave these shores, heading westwards, together with many of the men who built them. None of those leaving behind their loved ones will imagine that they are about to make history. They have no inkling that, in the classrooms of their descendants for generations to come, the achievements of the Vikings will be spoken about in hushed and reverent tones.

On this morning, we find the chief foreman and father of eight, Mohammed Hussein, making a final inspection around the harbor. Along with several hundred fellow Vikings, he will leave for Britain the next day. He personally will have the honor of sailing on the largest of all these vessels – *the Holy Jihad* – its sky-craping mast taller than any of Stavanger's many minarets.

Stifling a yawn (the first call to Morning Prayer is especially early at this time of year), Mohammed looks up to see his youngest son, Ahmed, running towards him on the quay. Father and son embrace warmly.

"Are you really leaving us tomorrow, Father?" Ahmed asked plaintively.

"If it is Allah's will", Mohammed replied, with a reassuring smile. "By his mercy and grace, we leave at first light. He will surely send us a mighty wind and speed us across the waters."

Ahmed seemed satisfied by this answer, and it emboldened him to ask another question. It proved to be an error he would regret. All he wanted to do was to please his father and show he was making progress with his studies. Ahmed sensed he wasn't the best scholar in his class, but he *had* memorized most of the Koran and much of the Hadiths. Was it reasonable to expect more of a five year old boy?

"Father", he started, "When Allah guides you safely to the land of the infidel, do you really intend to strike at the neck of all those you find? Will the stones and the trees cry out to you if Jews try to hide behind them?"

Loading...

In a flash, Mohammed struck the back of his hand across his son's cheek. Tears welled up in Ahmed's eyes, not only due to the sudden physical pain he felt, but because he knew he had upset his father. It was never a good idea to make his father angry; his sister had made that mistake once by being seen alone in the company of a male infidel. She had deservedly paid the mortal price.

"Who has spoken to you of such things?" demanded Mohammed, shaking his son with near fury. "Remember this always: Islam is a religion of peace and the Vikings are peaceful Muslims. Why, did you not read in the Koran that to take one innocent life is like killing all of humanity?"

Ahmed was confused. “Yes, father, but Imam Erikson taught me of the principle of abrogation and how the Prophet explained that a later, greater truth can replace an earlier teaching. Imam Erikson said we should be guided by the Prophet’s actions in Medina. Should we therefore spare the infidel?”

Now it was Mohammed’s turn to feel discomfort. He himself was no scholar, having devoted his life instead – like many of his colleagues – to the study and development of mechanical engineering, modern sanitation, new technologies, the seamless fusion of meat and stick, and algebra. He felt sorry for the child before him.

“If that is what the Imam told you, who am I to judge? Only Allah can judge us. Remember this.”

He rubbed his beard in silence for what seemed a long time, thinking. At last, he remembered the point he was trying to summons up from the deep recesses of his skull. He recalled with pleasure the Viking Islamic studies course he had attended years before, when he had met Ahmed’s mother, Hafida.

“Listen, my dear son. We will not kill the infidel. Not this time. We will instead make him pay the *Jizrah* in return for sparing his life. Remember that the infidel is living in the darkness and we will be giving his all of our algebra, modern technology, and cuisine he will lust after. We will share what we have with him and he will share his money with us. This is being social, no? Let’s call it… socialism.”

Morning Prayer the following day was a far more somber experience than normal. Although his prayers were as devout as always, Mohammed couldn’t help but think of his cherished family he was leaving behind. Who knew when or even *if* he would return to Norway? Allah knew, of course. Perhaps Imam Eriksen knew as well, for all Mohammed could tell.

He had made a solemn promise to Hafeda that, no, he wouldn’t take any *permanent* sex slaves. Nor would he rape *too many* captives, and he would be sure to use protection by praying to Allah first.

His sons delighted them with the ambition inherent in their requests. He embraced all of his sons in turn. He first hugged Leicester, then Birmingham, followed by Luton, Bradford, Blackburn, Rotherham, Southall, and finally Ahmed. To all (except Ahmed – no-one knows for sure why), he promised that his fellow Vikings would populate Britain and establish dwelling places across the land. These places would be named after his sons. In this way, the Vikings' legacy would be forever remembered.

History does not record whether Mohammed made it safely back to his family in Norway. What we do know, however, is the following: due to the thriving population of Mohammed's ancestors in the towns and cities bearing his sons' names, Mohammed and his fellow Vikings reached Britain's shores by Allah's grace.

The Divorces Of A Fat Dad Aged 44 1/4 Is A Poignant Look At Modern Marriage

May 8, 2018 | by Matt Forney | Link | Original Link

The following review is sponsored by The Divorces Of A Fat Dad Aged 44 1/4.

One of the most bizarre things about dating, relationships, and marriage is that not only is there very little (mainstream) advice on how to succeed at them, the very idea of giving or getting advice is scoffed at. Doctors, lawyers, electricians, and other professions require years of study and training before they can be turned loose on the world, yet when it comes to marriage and children—one of the most important aspects of any man's life—we're thrown in the driver's seat and given no instructions on how the car operates.

To give an example, just before I sat down to write this review, a friend of mine broke the news that his brother's wife was cheating on him with a black man. The guy and his wife are feminists and hardcore social justice warriors, and he's soy to the extreme: my friend once suggested he try testosterone replacement therapy, but he refused because he was afraid the hormones might harm his wife somehow. My friend's brother has resisted any and all advice he got on how to keep his marriage intact, and now he's paying the price.

The Divorces Of A Fat Dad Aged 44 1/4 by Palma Sailor is an attempt to rectify the lack of actionable advice for married men. While most ROK readers are likely familiar with the gauntlet that is modern marriage, how many of us know someone who has ran it and survived? Sailor's book is part-memoir and part-self-help guide, aimed at helping men avoid the mistakes he's made and live their lives to the fullest.

While Sailor's style won't be for everyone, his wealth of knowledge and personal experience dealing with a failed marriage make *The Divorces Of A Fat Dad Aged 44 1/4* more than worth reading.

It's Not All Your Fault (Or Hers)

When a marriage or relationship goes wrong, it's often tempting to blame its failure entirely on the other person. Women are exceptionally prone to doing this—just take a look at any chick magazine or listen to any middle-aged divorcee—but men aren't immune either. How many men in this corner of the Internet have a sob story about how some heartless slag took their money and children and ran off?

The reality is that relationships are a two-way street. Spengler's Universal Law of Gender Parity states that "in every corner of the world and in every epoch of history, the men and women of every culture deserve each other." Flaws and vices in one sex are reflected in the other, because men and women are inseparable and dependent on each other for survival. The reason why modern women are entitled, ball-busting, and slutty is because modern men are weak-willed, wishy-washy, and lack backbone.

Spengler's Universal Law of Gender Party also applies on the micro level: for example, if you consistently end up with crazy women, the problem might be with you. Palma Sailor takes this idea and runs with it in his book. *The Divorces of a Fat Dad Aged 44 1/4* is a collection of journal entries he wrote over the course of six years, when he began the process of separating from his wife and putting his life back together. His journal entries are inter-spaced with commentary on what he was going through at the time:

Loading...

> Looking back on this diary writing it at 50, alcohol has been a constant theme. It's prompting memories of exactly how much I used to drink in the marriage and early separation. I still regularly drink, but it's at a much lower level now, and I often leave drinks unfinished because my agenda is the social interaction of the environment. If you are reading this and drinking a lot in your marriage then look in the mirror and ask yourself why?

Unlike most men who might end up in his position, Sailor doesn't whine, complain, or make excuses. Instead, he critically reflects on his actions and thoughts, castigating himself for making foolish decisions that worsened his problems. For example, he begins the book by criticizing himself for bending to his wife's whims and going to a party that he didn't want to attend:

> If I had had any frame at all in the marriage I should have just said no to going to the party. Now some 6 years on I have a much easier time with women as I ruthlessly enforce my own boundaries and frame.

Sailor's writing style won't be everyone's cup of tea. His prose is very matter-of-fact, reminiscent of Ernest Hemingway or Charles Bukowski, as he uses understatement and subtlety to draw you into his world. However, most of the book is unedited, which he says was a deliberate editorial decision to preserve the integrity of his writing. Fortunately, his writing is smooth and slick enough that it shouldn't cause any problems for most readers.

Dusting Yourself Off

The Divorces Of A Fat Dad Aged 44 1/4 has other things to recommend it. Despite the depths to which he falls over the course of the book, Sailor never resorts to bathos or cheap sentiment in an attempt to make you feel sorry for him. Additionally, despite the self-help mission of the book—and Sailor's constant critical interjections—it never feels like he's trying to give the reader a lecture. Sailor lets his story breathe and avoids pointless didactism, which reinforces his points and helps the reader learn from his mistakes.

Sailor's book, while not short, isn't too long either, and despite the fact that much of it is diary entries, it doesn't feel like he's padding the length out or wasting the reader's time. Every vignette and word—whether its Sailor commenting on his wife's shit tests or recalling a story about taking his son to the barber—is meaningful and helps propel the story along. Indeed, by the end of the book, I almost wanted to stand up and cheer.

Ultimately, *The Divorces Of A Fat Dad Aged 44 1/4* is a book that is both entertaining and useful. As a first-hand account of a man's descent into divorce hell and his subsequent escape, it's an enthralling and poignant read. As a practical advice manual, it's worth reading for any married—or soon-to-be-married—man who wants to avoid his life going up in flames. As an account of what marriage is like in the modern day, *The Divorces Of A Fat Dad 44 1/4* is a must-read. **Click here to view the book on Amazon**.

What It’s Like To Be A Freemason

May 9, 2018 | by Albert Pike | Link | Original Link

I wear a ring. It belonged to a Mason who probably lived many generations ago and, as I purchased it from a vintage jewelry store, I do not know his identity. It is a simple ring, constructed of steel, bearing just the Square and Compass an emblem that is commonly associated with our Fraternity, and would cost around $40 to buy an almost identical copy, online today. At least once a week a man will notice this ring and ask me questions about my Masonic affiliation. The purpose of this article is to answer some of those unasked questions men might have about Freemasonry.

What Does It Mean To Be A Mason

A few months ago, I was sitting at a diner counter eating breakfast. The waiter was lingering around my location and I caught him casting a few glimpses at my ring. Finally he got the courage to blurt out his question. The man sheepishly said, “My Dad is a Mason but he will never tell me what it means to be one. I want to join the Lodge but want to have some side idea of what that means. What does it mean to you?”

My response was, “That is a complex question, but the basic operational answer is that I am a member of an International Fraternity that is primarily a social club but also engages in community and charitable outreach. There are also many opportunities to engage in self-improvement which is the heart of Freemasonry. Your Dad is largely correct though when he says you have to join to find out the meaning of Masonry because the ultimate meaning is personal and varies Mason to Mason.”

Does that sound purposefully mysterious for the sole purpose to incite intrigue? Given the

nature of Masonry, sure, that is to be suspected. But it is the truth.

Qualifications To Join The Club

The most frequently asked question I get from my fellow man are about the qualifications to join the Lodge. There is a lot of “disinformation” out there on this subject. Some men think they must treat even inquiring into my membership status as if we are talking about the battle plans to invade a foreign country.

Once I had a stranger request to speak with me in the alley behind a bar because he was uncomfortable about bring up the subject as “someone might overhear” if we talked about it in an open room as if that could be a matter of life or death. (The man was sincere in this belief as someone previously had told him if two or more Masons heard anyone bring up the subject of membership in the same room then that man’s name was placed on a blacklist).

To clear the air, here are the real qualifications. These regulations vary by Grand Lodge, which in America is on a state by state basis (rules that apply in California may not be applicable in Florida, for instance). But, in general, you must:

1. Be a man
2. Be of the age of majority (18 in most jurisdiction these days, some are still 21 though)
3. Believe in a divine entity (does not have to be the God of a mainstream religion)
4. Be of good character (not a felon, town drunk, etc.)
5. Have your petition sponsored by at least two Masons in good standing
6. Pay an initiation fee if your petition is approved

That is it. If you do petition a Lodge for membership they will let you know any if there are more specific minor requirements. Also, once you become a Mason there are nominal annual dues which vary greatly across the country, as they are set by local Lodges, but the norm is between $100 and $200 a year.

The whole nonsense of having to be directly related to a Mason or one must save the life of a Mason may have used to be a membership requirement centuries ago. If they were ever true, those requirements have been long dead. The way I started my membership process was by simply asking a man who I knew was a Mason about the organization.

If you don't know a Mason look up the Grand Lodge in your state and contact it. The Grand Secretary will put you in touch with a local Lodge that will assist you starting the membership process.

No Women Allowed

Yes you read that correctly. A woman cannot become a Mason. It is a male-only Fraternity and has been since its origination.

If there is a woman in your life who is interested in the concepts generally taught by Freemasonry she will have to petition a Masonic body such as the Order of the Eastern Stars that accepts women as members.

Freemasonry In The US Is Much Different Than In The Rest Of The World

There are active Masonic Lodges throughout the world, in just about every country and continent. But, Masonry in the United States is distinctly different then that found in other countries, especially Europe. Here in the States, it is mainly a social club promoting self-improvement of men and conducting charitable outreach. There is no political agenda. In fact discussion of politics is actively discouraged. However, in Europe and other parts of the world Masons do have real political agendas and act just like a political party. This is simply not true in America though. The local Lodge on Main Street is spending most of its energy planning the next pancake breakfast and not running the town council.

Loading...

For a real word recent example, there has been a Masonic backlash in France as it is rumored that Emmanuel Marcon, the new Prime Minister, is a puppet of one of the French Grand Lodges which is using him to push their agenda. I have even read of reports of violence against Freemasons motivated because of their political activities.

I do not know how deep this animosity actually runs outside of the United States, but a Brother of mine, who engages in frequent international business travel, has a personal policy against bringing any Masonic regalia with him on trips to certain countries because it might make him a target. Bluster? Who knows. The point is that if you join a Lodge in the United States your experience is going to be much different than that of a foreign country and it is not going to involve political conspiracy.

There is Still Fraternity Among Masons, Domestic and International

I have traveled extensively throughout the World and encountered Masons in just about every country and those interactions have been extremely positive. In some countries, especially those of former communist origins, Freemasonry is a considered to be a rouge

organization, usually not actively suppressed by the government these days, but certainly not encouraged. Even given this though members their will reveal themselves to me and engage on a Brotherly level.

Once, I was in Russia and noticed one of the business contacts at our meeting was a Mason. At dinner that night most of our one-on-one conversation was about him giving me warnings on how the government will blacklist Masons, break up Lodge meetings, and seek them out for political arrests. His Lodge would not meet in the same location twice and I was warned to not disclose my affiliation. He still paid the check though and insisted I put one more vodka on top of what was otherwise a fine meal before we parted ways.

On the flip side, in many other countries, the practice of Freemasonry is openly endorsed. In England, I had a fellow Mason, on recommendation of the Master of a local Lodge, put me up for a few days when I had an emergency. Similarly, a local Lodge in Germany provided me with some cash assistance when my wallet was stolen.

Joining the Fraternity outside of the United States, might have different meanings that will vary country-by-country, but in most ways you are still part of an International Brotherhood and your membership will be positively recognized wherever your travels take you by most Brothers.

Investment Of Time And Opportunity

When I get this question, all I can say is you have to join to understand why it is worth your time. Personally, I am a busy man with limited time but I find the experience fulfilling enough to maintain active membership. It is a net benefit in my life. Largely, what you get out of being a Mason is what you put into it though and, considering the dwindling ranks of the Fraternity, those opportunities are just become more plentiful with less competition as the years pass by.

Many of these Grand Lodges and local Lodges sit on large endowments and bank accounts which will be used to subsidize self-improvement opportunities for members. I have taken advantage of some of these at little to no cost. Had I paid for it out of pocket, attending some of the courses or conferences would have cost me thousands of dollars.

The Secrets Of Freemasonry

The greatest secret about Masonry is that there are not that many secrets. There are certain signs, grips, and ritual work which Brothers swear to keep confidential, but all of these can be found on the internet today. In fact, you can find this information open to the public in Masonic collections at local, regional, and college libraries.

The way I learned most of what I know about Freemasonry before joining was by reading an excellent book entitled Freemasons for Dummies. I would highly recommend the read if you are interested in joining or in the process of doing so.

Conspiracies

I highly doubt Masonry in America is involved in anything corrupt. Perhaps in Europe or in other International Masonic bodies there is more to the whole “conspiracy theory” aspect of it, but here in America that is not the case. As one Brother of my Lodge likes to say, “I doubt we could put together a wood shed in an afternoon let alone run the world.” He is right. Getting everyone to the same location for dinner requires as much logistical work as it did to invade France in WWII on D-Day. Simply put, Freemasons in the United States are not running a secret shadow government.

Final Takeaway

If you would like to join a community based organization that is exclusively male, performs charitable acts, and meets in a dimly lit building which are only occupied a few times a month, then think about joining the Lodge. Doing so will give you many opportunities for self-improvement and in this modern age is one of the last places where

a man can engage in fraternity exclusively with his fellow man.

If you have any further questions about Masonry please feel free to place them in the comment section. I will attempt to answer to the best of my knowledge (without giving away any of our “secrets” of course).

6 Reasons Why Women Are Obsessed With Vampire Stories

May 9, 2018 | by Jared Trueheart | Link | Original Link

Vampires were once great monsters of folklore. They were parasitic predators who fed on blood, the human life force. They were evil beings sent from the underworld to fulfill their carnal desires. Somewhere in the 20th-century vampires went from being demons to tragically cursed lovers.

It wasn't men who recognized everything that makes certain types of women lust after vampires. It was women. Anne Rice, who wrote Interview with a Vampire, is one of the most popular. As is Stephanie Meyer, who wrote the Twilight series, and Joss Whedon who created Buffy the Vampire Slayer (although he isn't a woman he's pretty darn close). There are more.

What they recognized is that if you take away the vampiric drive to kill there remains a figure that excites women sexually. Not necessarily all women. But at least many women, perhaps a majority. What qualities do vampires have that excite women?

1. Objectification

For immortal vampires, who drink human blood, people are objects. Men don’t typically enjoy being objectified. Women on some level, however, enjoy being objectified, often sexually. Maybe they present themselves as sexual objects publicly but do not want to be treated that way during interactions. Pornstars and strippers are examples of this. Or maybe women don’t want to be objectified publicly but enjoy it privately on their own terms, which is far more common.

For either type of woman, the vampire represents the being that will most genuinely treat them as objects of pleasure. Whether they are treated that way publicly or privately matters not. Vampires are the fantasy after all and the women who write them know how to best portray them in ways that turn women on.

2. Dark Triad Traits

Here's a great article about men with dark triad traits that women love. Vampires aren't human anymore, but by human standards, vampires are psychopathic and Machiavellian. They take what they want without regard to human life. Nothing stands in their way. It's a very romantic notion for women that they should be the objects of desire so great that superhuman beings will kill just to have them. Just to taste their blood.

Of course, they love everything else about dark triad men. They love being tossed aside by men with better stuff to do. No woman wants to date down. Vampires will always treat a woman as beneath them, because to a vampire she is. Being treated so poorly only serves to make her want the vampire more.

3. Abnormal Strength

Think she wants him?

Vampires are always displayed as being incredibly strong, and usually ripped. Almost universally, women are more attracted to muscular men than weak men. There’s no need to belabor the point except to note how much it aides in the next reason women want sex with vampires.

4. Rough Vampire Sex

Loading…

The last three reasons women want sex with vampires culminates in this one. As a general rule, women enjoy rough sex. Vampires guarantee that. Women are objects to vampires. The vampires have no care or compassion for them. Thus, there's nothing holding them back from being as rough with women as they want to be. And their abnormal strength only ensures that they can more easily treat women as objects of gratification.

Add in some biting, the vampire's trademark, and you've got something to tantalize the women who enjoy S&M. But that's not necessary to the rough sex women enjoy. The climax (pun intended) of one of the Twilight movies involves the vampire having sex and impregnating the protagonist. He gives her the business with such force that he breaks the bed.

5. Eternal Youth

Whether it's a conscious concern or just a subconscious one, women know the wall is coming. They might be young and hot now, but ten years from is a toss-up. They could go on the wrong birth control, gain 50 lbs, and never lose it. Maybe their skin gets sun-dried and wrinkled. Maybe they even develop a thousand cock stare (one hopes they don't develop that so young). Women know these are possibilities and they don't like it.

Vampires offer women eternal youth and eternal beauty. It's rare in vampire stories for a woman to want to remain human with her vampire lover. For one thing, she would age but he wouldn't. But more importantly, the female sexual fantasy focuses on being an object of such great desire that a powerful man will do anything to have her. In the case of a vampire, he will even give her eternal youth and beauty just so he can have her for all eternity.

6. They Want To Be The Special Girl

The culminating event for women in their sexual fantasies with vampires is that they

become the special girl, unlike all the other objectified women. The women in these fantasies become more than objects to the vampires. So incredible is the woman of this fantasy that the vampire falls in love with her, changing his dark triad ways. No longer is the woman just a warm body for him to ravage in bed, though he will surely continue to do that. Now the woman is the object of his romantic desire, whom he will woo for all eternity after he makes her a vampire too.

Stories of romance used to feature the Prince Charming archetype as the man women wanted. That was when women were sexually attracted to a man as the provider and protector. Prince Charming was the ultimate provider and protector.

Now that women provide for and protect themselves they've abandoned Prince Charming. Now women are attracted to men of higher stations than them. They want the men who don't want them, especially damaged men. They don't want the prince that gets on his knee to propose marriage. They want the prince that uses them all night long and kicks them out of the castle the next morning. Because the next step in that fantasy is that the prince realizes he's never had a sexual object as good as her and he must have her again. Replace kicking her out of the castle with drinking her blood and vampires are exactly what women want.

5 Exercises You Can Do With Medicine Balls

May 9, 2018 | by Larsen Halleck | Link | Original Link

“Medicine balls?! Haw Haw!” you’re probably cackling to yourself. “Why not do an article on Indian Clubs or those electro-shock penis stimulators from the Victorian era, Grandpa?!”

First of all, Indian Clubs—or Persian clubs, whatever you want to call them—are a fantastic workout device by themselves, and will perhaps get an article in the future (the penis stimulators, not so much). But to get to the point: old fashioned though the use of medicine balls may be—-so old fashioned that Hippocrates himself advocated their use—medicine balls are rapidly becoming fashionable in fitness circles again. As well they should, because these pliant and uniquely shaped weights can provide a wide variety of fitness benefits.

Some History

Before we begin, let us make something quite clear: medicine balls are not exercise balls. The former has 3000 years of history and tradition behind it, and was used in countries around the world, while the latter was invented for rehab purposes but has since been co-opted by middle aged housewives for feeble, non-commitant exercises.

No, Google Image Search, this is not a medicine ball. Shut up.

No, the medicine ball, is smaller (about the size of a basketball), and weighs anywhere from 5-100 pounds. What sort of exercises can you do with the ball?

1. An unstable platform

The simplest use of the medicine ball is to use the ball as an unstable platform or handhold, making various exercises more difficult due to being off balance. If you'll recall**,** the one-handed pushup uses a basketball in one of the later steps of the progression to make the flat arm work harder.

Similarly, you can use medicine balls to do planks, pistol squats, other types of push-up including the handstand pushup, or any other exercise where being off balance would

make it more difficult.

Seen here: a medicine ball plank

2. Medicine Ball Twists

With a partner, stand back to back, take a medicine ball, and twist your torso to pass it to him, and he reciprocates. Be sure to rotate your torso and not your arms—I tell my clients to lock their arms in front of them and keep them centrally located in front of the chest during the duration of the exercise.

Loading…

Do this for time, and be sure to switch rotation pattern—ie: if you start clockwise, switch to counter-clockwise at some point. This will hit the obliques and spinal rotators/extenders in a way that most people's exercises don't. If you don't have a partner, just do trunk twist sit-ups to get a similar effect—an exercise that is occasionally referred to as the Russian Twist.

3. Medicine Ball Toss and Catch

One advantage that the medicine ball has over traditional weights is the inherent softness and pliantness of the medicine ball. In practical terms this means it can be thrown and dropped without cracking the floors and walls—or somebody's head for that matter. It's simple to do: just do chest passes like you were playing basketball, either off the wall or to a partner. Throw, catch, and repeat.

This is an explosive and dynamic exercise for the chest, arms, and shoulders, and it is a great abdominal exercise as well. Catching the ball forces the abs to forcefully contract to "brace" for impact in a similar manner to taking a punch to the stomach. Keeping that in mind, is it any wonder that so many boxers, mixed martial artists, and other fighters have done this for centuries to develop their defense capabilities?

You can also have somebody throw the medicine ball at your stomach if you have sadistic friends or just want to reenact the movie *Kickboxer* for the hell of it. Frankly, I'd just be happy you're reenacting the training scene and not this scene…

4. Overhead Throws/Sumo Deadlift

Vaguely related to the previous entry, doing deadlifts with a heavy medicine ball, lifting the ball overhead, and slamming the ball down is a great total body workout—just use the tips on deadlifting I've already given you to prevent injury.

5. A weight

And of course the old reliable. Just pick it up and use it as an unconventionally shaped weight for whatever exercise you want.

So laugh at the archaicness of medicine balls if you must—-there’s a very good reason why they’ve been used for millennia, and are starting to come back now, because they are very effective devices.

2 Reasons Why You Should Always Try To Sleep With A Girl On The First Date

May 10, 2018 | by Donovan Sharpe | Link | Original Link

A common mistake in the blue pill dating advice manual is that a man should never try to sleep with a woman on the first date. In fact, he should be a “gentlemen” and wait until date number three. And if she deems him sexually worthy she will give up the ass on the third meet up.

Interestingly enough the men who follow this tactic later end up asking themselves and/or others questions like “Why didn’t she agree to a second meet up?” or “Why haven’t I fucked her yet?? It’s been a month!”

The simple answer is because they didn’t try to fuck her on the first date which as a man you should absolutely ALWAYS do and here are two very good reasons why:

1. It exhibits your true masculinity

Girls not only want masculinity, they *need* it. Regardless of what they say on social media about “toxic masculinity” or “douchebag fuck boys” they want men who aren’t afraid to show their masculinity.

Laci Green can bitch all she wants to about “toxic masculinity” but the men bruising her cervix are oozing testosterone

Sure, there are markers of alleged masculinity and high testosterone levels. Things like muscle tone, facial hair, a zero fucks given attitude and other traits signal to females that you might be that high T dude she’s looking to let between her legs.

But I used the word “alleged” because all the things I just listed are things that can be developed. Hit the gym and you’ll get bigger and stronger. Don’t shave for a while and you’ve got a beard. Having a devil-may-care attitude doesn’t always come naturally.

Women have a sixth sense for sniffing out inconsistencies in a man’s presentation. They meet a lot of wannabes who look and sound the part but when push comes to shove and these “alpha males” don’t try to close the deal at the end of the night—she discounts him as a paper tiger.

You could certainly look and act masculine but that doesn’t mean you are actually masculine. *Your actions at the end of the night have to mirror your actions at the beginning and middle of the date.* Yeah it’s great to tease her, neg her, escalate sexually, and do all these masculine things but if you don’t try to engage in the **ultimate act of masculinity which is trying to have sex with her**, you’re no different than any of the other losers who tell her how beautiful she is and about how he can’t wait to show her a good time on his dime.

Just because he looks like this on the outside, doesn’t mean he isn’t as soft as baby shit on the inside

Furthermore, trying to sleep with her on the first date doesn’t mean you’re not a gentlemen. You can be the world’s most distinguished gentlemen all you want, but if you don’t try to fuck her, she’s not gonna remember you being a gentlemen. *She’ll remember that you didn’t try to fuck her.*

Even if she has no intention of sleeping with you, *she wants you to try.* She wants to know if you are who you presented yourself to be. Sexual escalation means nothing to a woman if you don’t try to see it through to the end. This is a built in shit test you can fail without her having to deploy it.

2. It shows you are fearless, persistent, and can handle rejection

Of the many traits girls admire, fearless is at or near the top of that list. Females don't want to be with men who are afraid or appear to be afraid… of anything. His boss, his mom, her cat, anything. Girls want to feel safe with you and a man who exhibits fear will not engender feelings of protection.

If you don't try to fuck her on the first date, she might think you're afraid to try. And if she thinks you're afraid to try she'll start to question whether or not you're as experienced with women as you appear to be.

Women do not respect fear in men. The world tells us that we should show vulnerability and open up to women but this is always a huge mistake. Your girl wants you to be her rock. Her immovable object who fears nothing. If you break down emotionally and start talking about your fear of water because your step dad made you run wind sprints in the rain as a kid, she'll lose attraction for you because she's now aware of your fears. It won't be evident at first but over time, that story will erode her respect and attraction for you.

One girl I was fucking for a few weeks asked me why I didn't try to fuck her the first time we went to the movies. I gave her a bunch of lame excuses like "I was trying to respect you" or "I wasn't ready yet" but she knew why I didn't try to get the ass that night: *I was afraid of her rejecting me.*

But what most men don't understand is that girls resisting sex doesn't necessarily mean she doesn't want to have sex with you. If she wasn't thinking about having sex with you she wouldn't have come back to your place to "check out your coin collection" in the first place.

Example Scenario

So you're on your couch making out (you never even looked at your coin collection), your hands are all over her tits, grabbing her ass etc. The usual activities that precede sex. Then you make the one move that tells the girl that you are 100% going to try to fuck her: **taking her panties off.**

Loading...
If a girl lets you take her panties off it is far more likely than not that you are going to have sex with her. I have seldom slid a woman's panties off and not fucked her. So if you try and she lets you, sex is usually imminent.

If these come of it's a wrap…and she knows it

"But what does it mean if she doesn't let you take them off, Donovan?!"

Well that depends upon how you react and what you do in the aftermath. If she stymies your efforts to penetrate that poon, simply smirk at her shrug your shoulders and say "I'm gonna make another drink. Want one?" I've done this just about every time I'm rejected for sex for the first time.

What this does is that it shows her that you are impervious to her thwarting your efforts to add her to your trophy mantle. And guess what: *Girls love this*. A man who smiles in the face of rejection and lets it slide off his back as if nothing happened is a man women can respect and love.

If you react with butt hurt and say, "Hey! You sucked my dick! I thought you wanted to fuck! You're such a cock tease!" or something to that effect, she's going to lose all attraction for you and leave. At that point she'll either never talk to you again or put you in the friend zone (which is worse than being ghosted on).

"Okay so she rejected you and you handled it correctly. What now?"

This is simple. If you try to fuck her and she rejects you, one of two things will happen: she will either stay or she will leave.

If she leaves, it's obvious she didn't want to sleep with you. But **if she stays she wants you to try again**. A woman who rejects you sexually, but sticks around is shit testing you. Her subconscious is telling her "Let's see how he handles rejection. Let's see how

persistent he is."

"But Donovan, what's the purpose of that? Why does she want to know how you handle rejection or how persistent you are?"

Because appearing bullet proof to rejection then showing sticktoitiveness in the face of said rejection is what separates the Betas from the Alphas. Beta males give up after initial rejection. They feel the sting of rejection and they don't want to feel it again. Sure, he did what a lot of men don't by trying to fuck her on the first date but a lot of guys try to get the pussy on date number one. 99.9% of guys who get stopped trying to slide those panties off give up and never try again. They often never get a second chance… that night or ever.

Women respect and admire attractive men who don't give up

But a man who gets refused, shrugs it off, makes a drink, takes his place next to her on the couch, and continues to escalate sexually with the intent of trying to fuck her again on the correct assumption that her very presence after the first failed attempt means she wants him to try again, is a man who has separated himself from most men she's been with.

Now don't mistake me. Just because she's still there and wants him to try again doesn't necessarily mean she is going to sleep with him. She may have zero intention of sleeping with him that night because it makes her look like a slut (which only concerns them if they actually like the guy and is thinking about a relationship with him). But that doesn't mean she wants him to give up either.

Women love being desired and pursued. They love the flirting and the kino and the sexual innuendos that lead to sex almost as much as the sex itself (sometimes more as some women have told me). But that doesn't mean they're going to let you fuck them.

"So she wants you to try to fuck her… even though she knows she isn't going to… but wants you to try even after she rejects you and if you give up she loses attraction? This sounds confusing and not worth it!"

Well that’s the game, gentlemen, at least if you want to sleep with attractive women. These are the things you’re going to have to deal with if you want to have success with high value (read: hot) girls.

Plus, if you don’t react well to rejection and show no persistency, she’ll assume you’re like this in all parts of your life. She’ll think you’re a pushover at work, with your friends, and your family. Women don’t want a man who gives up in the face of adversity or getting turned down. They want a man who pushes forward and doesn’t take no for an answer. These are the men who live better lives than the men who do not.

To reiterate, if she sticks around after your first attempt, she wants you to try again. She wants to know you have thick skin and can handle adversity and push through it to get what you want which is her. Maybe she sleeps with you, maybe she doesn’t. Either way, she knows you are fearless and that you will stop at nothing to get what you want and that is an attractive trait that women want and need in their lives.

Wanna hear the extended version which includes two more reasons you should always try to sleep with her on the first date? Watch here! You can still watch Donovan Sharpe drop Red Pill truth on TSR: Live weekday afternoons at 4:30E/1:30P

How To Identify Flaky People And Block Them From Bringing Drama Into Your Life

May 10, 2018 | by Beau Albrecht | Link | Original Link

Flakiness is becoming a social epidemic. There are still people who are reliable, honest, and industrious, but they're less common to find than in times past. Protecting oneself from people lacking those qualities is increasingly important as the Kali Yuga continues.

Unfortunately, anyone can be a flake: neighbors, family members, co-workers, romantic interests, or sometimes even "friends". However, there are ways to identify them and to mitigate their influence in your life.

Misplaced priorities

Not knowing what's important in life is a sign of immaturity. Further, that obviously causes personal instability. Some real examples:

- Someone already nearly $100K in credit card debt buys a hot tub and replaces the McMansion's perfectly good carpet with wood planking.
- A high school student drops out a few months away from graduation, because smoking weed all day is more important than earning a diploma.
- A convict gets out of jail and immediately starts committing the very same crime; apparently a slow learner.
- A roommate contributing nothing forces a paying roommate out, while a third must then pay all the bills and housing expenses.

The first was a yuppie housewife whose husband was working his ass off, but still they sank into debt. I also know multiple examples of the next items. Yes, I was the paying roommate who got kicked out twice because freeloaders wanted my room to store their crap. Unfortunately, people like that often drag others down with them.

Entitlement mentality

These “special snowflakes” often consider themselves more talented than they actually are, more virtuous, more intelligent, etc. Naturally, they’re bad at recognizing their limitations. This adds up to feeling more deserving. Faced with reality, they might retreat to an escapist Walter Mitty fantasyland. Some will believe ordinary jobs are beneath them, the world owes them a living, or the rules don’t apply to them. At worst, they’ll act as if they’ve been divinely selected, and everyone else’s rightful role is to serve them.

The harsh truth is that life isn’t a Disney fairy tale, and you have to take the bad with the good. It’s hard to get enthusiastic about the fact that most people—oneself included—will become fairly ordinary working stiffs. (The grass isn’t always greener on the other side; billionaires and celebrities have their problems too.) Really, the disappointment should wear off about the time one stops wearing a cape to school.

There’s another side to the self-deception. If Joe Blow is so wonderful, then why isn’t he rich, famous, or at least recognized for his wonderfulness? Flakes might consider themselves chronically unlucky—nothing to do with their own choices, of course. Others get consumed by envy, hating success or happiness in others. Some might become rather paranoid. That could result in lashing out against society rather than constructively participating in it and pursuing upward mobility. Another avenue is pretending to fit in and play along while passive-aggressively taking advantage of everyone else, including their friends and benefactors.

Of course, all the above is messed up nine ways from Sunday. Still, a flake’s delusions of grandeur and persecution, leading to self-defeating behaviors, are understandable in that context. Note well, there’s nothing wrong with wanting to improve one’s station in life. However, careers aren’t built overnight, and expecting instant results isn’t realistic.

Other signs of flakiness

It’s prudent to consider anyone a flake until proven otherwise. Sure, that’s cynical, but

experience has taught me to be a judgmental bastard that way. The signs aren't always obvious. Flakes can have much superficial charm, and seem at first like they have their lives together. Be on the lookout if you notice any of the following signs:

Loading...

- Chaotic relationships and work history
- Constant excuses; everything's someone else's fault
- Rejects constructive advice
- Defeatist mentality
- Believes self-improvement is unnecessary
- Has a problem with every solution (resourceful people have a solution for every problem)
- Flagrant dishonesty
- Incessant negativity (beyond actual problems or simply having a bad day)
- Lack of humility
- Constant drama
- Habitual gossip and backbiting
- Two-faced behavior and blatant hypocrisy
- Laser-guided selective memory

These traits (and the foregoing) have much in common with Cluster B cases. However, they aren't always bad enough to meet clinical diagnostic criteria.

Flake mitigation strategies

Always set proper precedents and boundaries. *Doing so actually might keep things pretty tolerable.* Helping friends out is okay if it's *occasional and reciprocated*. However, beware of attempts to push the limits; consider that a Shit Test. Don't become an unpaid errand boy. It's not your job to make extraordinary efforts for other people that they can do themselves.

More importantly, you are not anyone's bank or credit card. Flakes are often desperate to

“borrow” cash, because of their chaotic lives and misplaced priorities. However, freeloaders certainly won’t be as desperate to honor their commitment to repay you, even if they swear upon a stack of Bibles. Paying you back will be a lower priority than paying their weed dealer.

Never commingle finances. Sure, that cell phone plan might be cheaper going in with someone, but not if you get stuck paying the entire bill every damn month. No cosigning loans either, not even for your brother. If anyone pouts about your lack of generosity, don’t accept the guilt trip.

If circumstances force you to deal with them, start documenting everything. Get a call recording phone app, or a wearable voice recorder (where legal, of course). Save those emails and texts, and keep a journal. If it’s impossible to keep flakes at arm’s length, have a calm but firm talk about their antics. If you get the “you’re persecuting me” shtick, there’s your answer.

If that doesn’t sink in, then ghost the flake. I’ll even do that to relatives as needed; I’m just a dick that way. If it’s someone at work, that’s more difficult, since you might have to change departments or possibly find another job.

Prognosis

Fixing a flake would be a service to humanity. However, unless you’re a psychiatrist or a surgeon specializing in cranio-rectal extraction, that’s not your job. Unfortunately, nothing short of a personal epiphany is likely to pop a flake’s ego bubble.

Perhaps one reason we’re seeing more flakiness lately is because too much self-esteem stuff was pushed onto kids during the 1990s. A legitimate and healthy form of pride only can result from a sense of achievement. That in turn comes from getting good at something or accomplishing cool stuff. Anything else puts the cart before the horse.

Still, the problem’s roots go deeper than that. The counterculture zeitgeist of the 1960s got the ball rolling: scoffing at traditional values, questioning everything to death, “situational ethics” (useful for coming up with justifications to do whatever you want),

and all the rest of it. That made “anything goes” stuff not just seemingly acceptable, but fashionable.

Hopefully things won’t get worse. Industrious, high-trust societies are better than the alternatives; those tend to be hellhole countries. Hopefully future generations will start getting things right. This means that positive character traits like honesty, dependability, and a good work ethic should be given the emphasis they deserve. Refusing to tolerate the intolerable is a positive step, personally and societally.

Finally, always keep your bullshit detectors well-tuned.

Men Who Have A Secret Second Family Can Come Clean In A Very Modern Way

May 10, 2018 | by Sponsored Article | Link | Original Link

The following article is sponsored by Principle Casting.

If there's anything the modern age has taught us, it's that there isn't a problem that can't be tackled by reality television. According a new casting notice, there is a TV show aiming to provide expert help to men who are leading a double life with two families.

The phenomenon of men living a life with a secret, "second family" is nothing new. From King Edward IV and Charles Lindbergh to Charles Kuralt, some of history's most prominent men allegedly managed to keep a significant other AND kids secret from their wives. Charles Kuralt supposedly did it for nearly 30 years!

Yes, it's still a thing

“But that was 50 or even hundreds of years ago,” you’re saying. People could actually get away with that sort of thing before cell phones, video cameras, and the internet, right? Well, just because our lives are more public now, it doesn’t mean that it doesn’t happen.

According to the Daily Mail, a woman in South Carolina recently discovered her husband was married to three other women. And there have been several other documented cases in both the US and the UK over the past 10 years.

It can be more complicated than you think

Loading...

In her book “Anatomy of a Secret Life: The Psychology of Living a Lie,” Gail Saltz writes,

“When our secrets start to control us — and far too often they do — then a normal life clicks over into something else: a secret life.”

And those secret lives — whether it’s cheating on a spouse, stealing, or assuming another identity — are fueled by self-deception, which, she says, can be “destructive to ourselves and to others.” In extreme cases, they can have devastating consequences – emotional and otherwise — for everyone involved.

Between a rock and a hard place

So, what is the right thing to do? Coming clean to both families would feel like an impossible position. How would you approach it? How would you tell them? How are they going to react? It couldn’t be easy for anybody involved.

Chances are the man doesn’t even have someone to confide in. He’s probably alone with his secrets — secrets that will certainly be discovered. He will miss a flight, confuse a text or forget to delete an email. At some point, his carefully maintained house of cards will collapse.

To avoid a potentially chaotic and destructive process, maybe seeking expert help does make sense. With the right guidance for everyone involved, someone – yes, even on a TV show — MIGHT have a chance of acknowledging the truth in a reasonably healthy way.

Will the truth set you free?

Honestly, we don’t know the right answer, but the experts on TV always seem to. If you want to check out the casting call, you can do it through Facebook or in the flyer below.

Use the contact information in the flyer above or click here to contact the producers through Facebook.

It Has Been 50 Years Since Enoch Powell's Prophetic "Rivers Of Blood" Speech

May 11, 2018 | by Dawn Pine | Link | Original Link

On April 20, 1968 The British politician Enoch Powell delivered maybe the most important speech ever on the topic of Migration. It was called "Rivers Of Blood" speech, not because he actually said that phrase, but because of a reference to Virgil's Aeneid:

> As I look ahead, I am filled with foreboding; like the Roman, I seem to see the **River Tiber foaming with much blood**

What was it about the speech, that even fifty years afterwards when the BBC decided to air a reading of it, all hell broke loose (e.g. 1, 2 and 3)?

Background

Powell was a man of many skills. Apart from politics (his highest achievement was Minister of Health), he was an author, poet, linguistic, and philologist scholar. On top of that, he made his way in the army ranks during WW2 to Brigadier. He was so fluent in languages that he learned his 14th and last language at the age of 70 (it was Hebrew by the way, a tough language to master).

Politician, Professor, Brigadier, poet – that's one impressive man

The migration issue started twenty years before the speech. In 1948, a former German cruise boat, the *Empire Windrush*, disembarked some 500 hopeful settlers from Kingston, Jamaica. The new arrivals were the first wave in Britain's post-war drive to recruit labor from the Commonwealth to cover employment shortages in state-run services like the NHS and London Transport. Sounds like a good idea so far.

Looks so naive. The start of Britain migration problem

Until the beginning on the 1970s, an additional 500,000 joined them. Powell himself was one of the persons inviting skilled labor in (18,000 Indian, Pakistani and Bangladeshi employees for NHS). However, crime rates were up during the 1960s, the economy

started to crumble, and it became obvious that those migrants were not going to go back.

The speech

On April 20, 1968, Powell gave a speech at the Conservative Party meeting in **Birmingham.** One can hear the speech here:

Here are some quotes:

> The supreme function of statesmanship is to provide against preventable evils. In seeking to do so, it encounters obstacles which are deeply rooted in human nature.
>
> […]

> Above all, people are disposed to mistake predicting troubles for causing troubles and even for desiring troubles: "If only," they love to think, "if only people wouldn't talk about it, it probably wouldn't happen."
>
> […]

> [talking to one of his constituent]..he took no notice, and continued: "I have three children, all of them been through grammar school and two of them married now, with family. I shan't be satisfied till I have seen them all settled overseas. In this country in 15 or 20 years' time the black man will have the whip hand over the white man."
>
> […]

> …the significance and consequences of an alien element introduced into a country or population are profoundly different according to whether that element is 1 per cent or 10 per cent.
>
> […]
>
> Loading…
> If all immigration ended tomorrow, the rate of growth of the immigrant and immigrant-descended population would be substantially reduced, but the prospective size of this element in the population would still leave the basic character of the national danger unaffected.
>
> […]

> …we will have no "first-class citizens" and "second-class citizens." This does not mean that the immigrant and his descendant should be elevated into a privileged or special class or that the citizen should be denied his right to discriminate in the management of his own affairs …
>
> […]

> Whatever drawbacks attended the immigrants arose not from the law or from public policy or from administration, but from those personal circumstances and

> accidents which cause, and always will cause, the fortunes and experience of one man to be different from another's.
>
> […]

> There are among the Commonwealth immigrants who have come to live here in the last fifteen years or so, many thousands whose wish and purpose is to be integrated and whose every thought and endeavor is bent in that direction.
>
> But to imagine that such a thing enters the heads of a great and growing majority of immigrants and their descendants is a ludicrous misconception, and a dangerous one.
>
> […]

> Only resolute and urgent action will avert it even now. Whether there will be the public will to demand and obtain that action, I do not know. All I know is that to see, and not to speak, would be the great betrayal.

Powell was never to be in office again, and would only serve as member of the parliament. He was considered the most popular politician of his time after the speech. Fan mail kept flowing to the newspapers with 98% of them supporting him.

74% support for your idea! Yes, he was that popular.

Is his speech still relevant?

Fifty years is a very long time in politics. The reason his speech is important is because it focuses on the primary issues of migration. Britain made changes to its migration policy afterwards, including a bill in 1971 which actually prevented further migration from its ex-

colonies.

The main problem was his use of “racist” language. Powell used the N-word “colorfully”, which led many left-wingers to use the race card and “silence” the opposition. This was the first time (publicly) that being anti migration was equaled with racism.

Powell was right in his predictions—today 1 of 7 Britons is a migrant or decedent of one. Some of them actually integrated enough to accept the local culture to the extent that they supported Brexit. Powell knew in advance that joining the European Economic Community (pre-EU) would damage Britain’s independence, and history proved him right.

Source: www.snouts-in-the-trough.com

The main question being asked is: when society changes, who benefits and who loses? Using the law to force values is also part of the argument, not to mention the “race daemon” hovering above the Rotherham case.

A good lesson as well that we may learn here is that the way ideas are presented, is sometimes as powerful as the idea itself.

Liberals Do Not Know Themselves

May 11, 2018 | by André du Pôle | Link | Original Link

The question sounds abstract and cliché at first: do we have free will? If you look at the academic side of the question, what you will see is a long bibliography that seems only relevant to nerdy interests. However, the question has permeated public debates and leftist campaigns.

Feminists sometimes speak as if women have no agency. Women are all victims because muh patriarchy is choosing for them. Porn actresses, according to at least a bunch of harpies, do not choose: even though they sign their contracts and do everything by themselves, they are "used" by the porn industry.

Likewise, muh minorities would perform badly because they would have internalized some floating racism that stifles their abilities—doesn't matter that this far-fetched theory was never proven or that blacks have been constantly found to be *more* self-confident than whites, not less.

Outside of leftist abuse and whitemaleophobic baiting, the question of whether we have a free will faculty or if we are the end result of smaller, impersonal mind processes where our personality dissolves has tremendous implications on what we do. Studies found that not believing in free will tended to stimulate cheating and numb patience.

The ancient Greeks believed we had an "internal sovereign" called *egemonikon*. To free it, we would have to meditate on our passions, beliefs, desires and so on as to free the "internal sovereign" from them: knowing what determines us and of options allows to be less determined.

No stupid fears like the fear of being rejected, no delusions like equality, no laziness considered too natural for us to work well. Instead, an enhanced and cleansed self, able to become what he is. This is the Greeks' *gnothi seauthon* (know thyself) in a nutshell.

How liberals see themselves

Conservative intellectual Thomas Sowell famously argued that liberals were unconstrained minds, with less predetermined beliefs, than conservatives. Liberals would believe more in change, conservatives more in immutability. This has been true to a certain extent, and liberals rushed to use it: "change" or "hope" means that leftism wins, both in fashion and reality, over a timid, hesitating, fearful and most importantly uncool conservatism.

However, since Sowell's time of glory, things have considerably evolved. Today liberals and their RINO cuck allies are the most constrained and constraining camp ever. They are the ones who want to lock everyone up into their mad world of "gender", white genocide, balkanized West, mandatory worship of a hallucinated "progress", trigger warning, land whale supremacy and every monstrous stuff that makes up the liberal pantheon.

Liberal qualities have turned on their heads, and what liberals believe about themselves is either false or liable to so many exceptions it becomes window dressing.

The same libs who proudly claim they believe in equality love to think how their mean IQ is higher than the conservative voters'. They believe they are more creative and more intellectual, that is, more prone to bookishness and theorization. They will routinely talk of "love", "justice", universality, "we", "humanity." They claim to be open-minded, progressive, tolerant, and fancy themselves as fairer and less authorian. Is that true?

Peeling the wire

Not one bit.

“Liberals are loving, conservatives are hating”

This may be the most dishonest statement the leftists ever made up. Every individual of normal constitution is capable of both love and hatred. Couples of passions are a standard part of human nature. But somehow liberals managed to confuse the apparently positive aspect of love with being right, then managed to present themselves as the side of universal love. But by doing so they didn’t even care about stigmatizing the other political side as representing universal hatred.

Liberals do not love more than others. White liberals who feel guilt because they’re white and male, and virtue-signal as to compensate, suffer from a psychological issue. White guilt is a pathology, a mental virus that corrupts self-esteem and destroys the memories of all the good things the West gave to the world. Liberals do not love minorities—they need them to clean their shit for a smaller wage than white proles. Liberals are not free of hatred—they hate “the patriarchy”, they despise conservatives, they hate *us*.

The only thing a liberal truly loves is his (or her) ego, comfort, and own pleasures. Which is why liberals tend to be hedonistic and coward. The “love” they claim is just a mask for self-complacency.

“The Left wants a world without losers, a win-win progress”

Obey me. For love. Or you're a Nazi!

This is what many of them said when they ushered Obama in power. They said so even when they despised the browbeaten, blue pills fed, "loser" men. Boomers who voted Obama said so while chastising millennials as "losers." As we learned the hard way, when they win, we lose.

Loading…

And many of those on the liberal train end up losing as well, for example when you're black and you're forced into an identity of perpetual aggrieved victim dependent on the State instead of being taught to manage your own goddamn life, or when you're an upper middle class feminist and you end up raped and killed by the dark-skinned masses you always supported.

The "we want a world without losers" crowd always vote themselves in power, vote their own advantages, and do so at the expense of untold people. Just like using an ECA stack while lobbying for the prohibition of smart drugs. Doublethink at its finest.

"The Left is humanitarian and universal"

Leftism has always been a particular group identity. From the eighteenth century philosophers to the younger upper middle class feminist of now, leftism has its codes, references, events and even saints. In truth, humanity only exists in a biological sense: one is human because one is a *homo sapiens*. Beyond that, the Earth has always been covered with different identities. The Left pretends to be different, but leftists have always been parts of societies or of the world. Which makes them as non-universal as any other identity.

Bourgeois bohemians love to talk about "culture" as their particular thing. They love to gloat about "openness" from the comfort of their flats or houses in a so-called glamour neighbourhood. Even when leftism was more akin to communism, said movement worked because it gave a purpose and a sense to the life of its members. That is, a *particular*

purpose. No purpose is interesting or worthy when it ceases to be particular, identitarian, and thus different from the rest of humanity.

Leftism *is* an identitarianism. A cancer that developed from the West while chastising it. No wonder why the feminists' fish and bicycle motto is intrinsically antisocial: leftism's universality is a joke. And it is intolerant at *our* identitarianism.

"The Left has no prejudices"

Any group has common beliefs. Any group has prejudices. This is normal—and this is what leftists love to say they "went beyond" erroneously. I've often seen pompous students going at great lengths on their 50 shades of leftism or gender whereas talking of "the far right" as if people outside of the left were an homogeneous block. Those who speak like this know nothing of our side: even the Alt-Right is rather a big tent than an edifice.

Likewise, when the "libs r smarter" rule, which may be true if and only if certain conditions apply, becomes heralded as obvious, it *is* a prejudice—an excessive generalization that denies exceptions.

"The Left is smarter"

If you compare the mean IQ of a group of academics and the mean IQ of a group of plant workers, chances are, the former have a higher mean IQ. But does that mean that the academics are better human beings? That they are necessarily right? Does that mean that other high IQs who agree with plant workers should be ruled out as irrelevant?

The "smarter Left" myth is only true to the extent that the Left has taken over the institutions, only allowed its own inside, then used the institutions' authority to claim smartness. Yes, that's the very same people who pretend that race IQ measurements, which do not differ from class IQ measurements, are "racists" and invalid.

Leftists who have a high IQ use it to craft theories, narratives, and other misleading impressions to force and manipulate. Their pseudo-creativity is a smokescreen to mask the giant prison where they want to force society—and their own inability to get out of the matrix.

“The Left is tolerant”

As everyone who ventured outside of cultural Marxism knows, no one on Earth is as bossy and domineering as the “tolerant” Left. Forced equality and communism were not “tolerant” projects. Forcing anal marriage, gender madness, mass immigration, white guilt, land whale/HR supremacy, banning words and reshaping whole identities through mass indoctrination is definitely not “tolerant.” No one else pretends to love the Other while being so intolerant at the political Other. At bottom, a leftist is a political xenophobic.

However, the Left has been crafty (or dishonest) enough to say that its intolerance would end intolerance, just like the communist genocidal mania would end all genocides, the freemason-propelled WW1 would end all wars, etc. Now it can safely be said that all these hopes were illusions, as Leftism always needs new targets to protest and harass. The only true hope for anything better lies in the death of cultural Marxism.

Erring is human, persevering is evil

Antiracist fraudster Franz Boas was wrong. Sigmund Freud’s theory of Oedipus was wrong and likely build to hide a Jewish propensity for incest by blaming it on the children. “Minority” identities did not even exist before they were wholly constructed (“organized”) by Alinskyite figures who took all their inspiration in Marxism. Now these groups are like

cancerous tumors, having no function yet stealing from a society they did not built. Margaret Mead was a fraud. Feminist “founders” had deep issues. And so on.

Leftism is all about manipulating the human psyche while making you indignant (or ashamed, depending on which role the narrative-crafters attribute to you) about being “oppressed.” Many of us were fed blue pills since our youngest infancy.

More often than not, we were taught everything would be possible, to be thrown into a world where everything is blocked, taught to be respectful when this made us cowards, taught to be cultivated when this is just made us more conditioned, taught to believe in equality because this is what the cultivated, successful individual do, and so on.

Cultural Marxism is not based on knowledge. It is based on sophisticated make-believe. Know the difference.

Counterpart Suggests That It’s Never Too Late For An Old Man To Transform From Beta To Alpha

May 11, 2018 | by Dawn Pine | Link | Original Link

In my recent article on the movie “The Bachelors”, one of the comments (@Skeptic) suggested to provide an article for the TV series Counterpart. After watching the first season, I can attest that it does deserve its own article.

The main idea

Howard Silk, brilliantly played by JK Simmons, is a low level employee of an obscure UN agency in Berlin. His job has no meaning, as he sits in a “prison like” room which is divided by glass wall, and exchanges codes with the other side of the glass (“Interface Section”). If that sounds dull, you are right.

Howard has no friends, apart from one person he plays GO with (and always looses). His wife is in a coma after being hit by a car, and we learn that he still has a deep attachment for her.

“Our” Silk. Face down, shoulders down, no strength or confidence. Beta

The plot starts when the director of “Strategy Division,” Peter Quayle, denies him a promotion to his division (Howard has been working the same position for almost 30 years), but the following day he is brought in to meet his counterpart, another Howard Silk from a parallel universe. His “counterpart” requires him to join in a man-hunt, which later becomes a conspiracy to hurt “our” world.

“Other” Silk. Note the smirk and confidence. Alpha

“Alpha” and “Beta” by JK Simmons

If Simmons is played well by the grieving father, which was more beta, this time he gets a chance to play both. Imagine an old beta male – weak character, no promotion, virtually no friends (Silk states that “I had my wife and did not need anyone else”). We later learn

(spoiler) that his wife was cheating on him, regularly, but he still loved her. I know, I was sick too watching those bits.

To contrast that, the “other” Silk, is a field agent, high ranking and with the highest classification. He has a network of people who rely on him and will do dangerous deeds for him. It is implied that he has slept around, also has a daughter, and gets his way time and time again. The only thing you don’t see in this series is Simmons gaming a girl and bedding her.

Being “alpha” has a price. The other Silk has no attachments, his daughter is estranged and one can actually see that he does miss human ties (to some extent). But that is nothing compared to our Silk’s miserable existence of no sex and having no life.

Loading...
[image]
JK Simmons with 2 of the hotter actresses. Nice smirk, and no hover hand

How does a “beta” becomes an “alpha”?

Imagine you are a “beta” and now you have to play the role of an “alpha”. What would happen? The answer is “You need to grow a pair”.

Our Silk needs to replace the other Silk in the parallel universe. He is at first awkward, and some of the people spot him. The thing is, as the series progresses, he becomes more confident. One of the other agents tells him near the end of Season 1: “I don’t see the difference between you two”. Our Silk even kills a powerful man, and this after he clearly detest using force.

Our Silk doesn’t like becoming an alpha. He resents becoming like his counterpart, and tries his best to show the other Silk how he is much better than him. He’s a classic beta

trying to occupy the moral high-ground and downplay the alpha.

Conclusion

I know that recommending watching TV is against the general trend of ROK articles (examples 1,2 and 3) . However, I want to make an exception in this case. Counterpart is a good show, even if it has its own blue pill moments (a girl kicking boys's ass). The idea that you may become alpha by mere coincidence rings a bell on us who have taken the red pill.

You are never too old for self improvement

Simmons's character gracefully portrays the two types of mid 50s beta and alpha. There are prices to pay if you want to become one. The show also highlight our own take—you are never to old for the red pill or self-improvement. Even if it is a case of "I had to".

3 Ways To Forever Stay Out Of The Friend Zone

May 13, 2018 | by Fernando DeVasques | Link | Original Link

When I go to the gym, I see men working out with good-looking women on a friends-only basis. I go to bars and run into a group of girls with a man friend in their midst. These situations are both toxic and unnecessary. The man on a friend-date wastes his time with someone he wants to sleep but is unable to. These actions must stop if American men are to come back to being as the men of old.

We've softened up due to less need for conflict. The USA is a miracle of God and because of unappreciated luxuries, we have lost ourselves in comfort. Men are so comfortable that even critical thinking is a chore, hence they can't cope with the shame of rejection. Rejection is a sometimes heavy, lingering, imprisoning sensation that overtakes you, but it is necessary. How will you go enter death peacefully if you lived a life scared of pretty women?

Focusing on yourself rather than women takes effort but it's the only way to become the type of man most women want. There isn't a lot of emphasis on the fact that women notice when men are too focused on them. If you find yourself with high anxiety when you only think about cold-approaching fine women, then you need help reaching real confidence.

Real confidence is letting go of that which you can't control and focusing on that which you can—yourself. Start these three behaviors immediately to begin a more fulfilled life.

1. Stop having female friends

I do not care how long you have been friends with a girl—if it's not platonic then you must cut-off communication. That's to say if you secretly like a girl you call a 'friend', give yourself ten lashes and delete her number. You could admit your feelings but the chances of her liking your tepidness are low.

In the chance that you are not sure if you like a female friend, refrain from masturbating for ten days and then think about her sexually. This will answer a lot of questions. From now on, you're only allowed one platonic female friend in your entire life. Choose wisely. If you can't handle going cold turkey, then you must slowly start backing away by finding a beneficial hobby.

2. Stop trying to script a pickup

Loading…

Hollywood convinces men that even the way they meet their partners is important. You won't get that prom date unless you ask her in front of the whole school. If you fail to propose to her in front of the Eiffel Tower, or other romantic landmark, your marriage is already doomed.

This extreme expectation of relationships freezes men when it's time for them to approach. Even when guys do find the courage to talk to a random cute female, they behave automatic and boring. You can never convince a woman to sleep with you, much less be seen in public with you. It's far time to stop believing in fables.

3. Accept that it's okay if you don't have sex with a girl you like

In order to stop acting like a robot, you need to find comfort in yourself. The most beautiful women fall for the more focused man. Yes, pickup game does work in certain situations but you're still going out with the intent to fornicate. You waste precious amounts of life when you put your focus on relationships or sex. Instead, lose yourself in what interests you and you will see the women fawn over you without any of your efforts.

Men who perform elaborate gestures to impress a woman is likened to the guy who messages her on OkCupid. She just enjoys the attention, but she won't actually go anywhere with you. Ponder the amount of time and effort you've put into a woman who didn't like you back—you'll never get that time back. One way to end the madness emboldened by Hollywood is to ignore it. If you do happen to run into a girl that can't be ignored, then approach her as you. Don't try to be a Casanova, it won't work mostly.

Conclusion

One truth you should ingrain is that you can't convince a woman to like you or friend your way into her pants. The three steps that I have presented you are just a few techniques that you can do to get yourself out of the friend zone and remain out of it for the rest of your life.

How To Fix The Storylines Of Film And Television

May 13, 2018 | by Justin King | Link | Original Link

In a world with little real-life drama and much free time, most people are more influenced by TV and Netflix than they are by their friends. Unfortunately, the world they see in these shows is a perverse and corrupt one. Men and women are shown as competitors, not as collaborators. The female's impulsive, emotional reaction is justified rather than denigrated. The empowered feminist slut is lauded for her unnatural behaviour, while the protective husband is criticised for following his instinctive response.

The addictive fast-paced action of these shows is a compelling alternative to real social interaction. When they first came about, this is all they were. Nowadays, people spend so much time with these shows that they are the main source of information and role models for most of the population. One or two generations is all it takes for a culture to forget what real life is like.

In order to attract viewers, drama producers make their shows an extreme version of what happens in real life. It is no secret that the murder rate in TV soaps is approximately 1000X greater than real life. While some of our society's members do meet their end through violent means, such as car crashes, gang violence, homicide, suicide, and horrific accidents, the leading causes of death are rather mundane: cancer, heart disease and stroke.

Violence on the screen has been going on for a long time. It has probably not altered the rate of violent crime. Statistics show a temporal fluctuation in this, but a general downward trend. This is because there remain strong disincentives to violence: notably

prison, loss of employment, and social ostracism.

Suitable for kids of all ages

Having exhausted the possibilities of violence for creating engaging storylines, TV producers have started using sexually deviant behaviours to create interest. The problem with this, as with any drug, is one of tolerance and escalation. Something which, when first shown on the air is inconceivably miscreant – a housewife having sex with the plumber, a gay kiss, a flamboyant homosexual parading his G-stringed behind in front of children at a gay pride parade – gets repeated and copied in other dramas or series.

It is less shocking each time, but still gets viewers interest peaked for a while. Incidentally, the same effect occurs in guys who watch porn. The interest induced by such scenes declines, but producers continue to include such acts to prevent withdrawal symptoms in their audience (boredom) which would cause a reduction in viewership. In a few short years, it is normalised and has become acceptable public practice.

The film industry might be full of gay feminists with an agenda to push, but they would show the kind of garbage they do even if they were politically neutral, *because they have an incentive to push the bounds of public acceptance as a cheap way of being more exciting.*

Loading...

Potentially unsuitable for kids.

To counter this trend, I suggest a set of guidelines that film and TV producers should abide by.

- Character identities and plotlines should be an honest representation of their gender, age and racial demographic. Visual entertainment should not be used to socially engineer false paradigms.
- The majority of female characters should have feminine traits and lead a life commensurate with their natural talents of caring, home-making, and child-rearing. The happiness and life-satisfaction of women who choose this path should be apparent to the viewer.
- Female characters who diverge from conventionally feminine traits should be shown to lead miserable lives as a result.
- Extra- and pre-marital sexual relations should occur infrequently, and only clearly degenerate females should be involved.
- The ratio of confirmed heterosexual characters to non-heterosexual characters should be at least 20 to 1.
- The non-heterosexual population portrayed should have a higher-than-average incidence of paedophilia, degenerate behaviour, and venereal disease. Flagrant homosexuals should show these traits more than those who keep their homosexuality private.
- Nearly all characters who are powerful, inventive, or creative should be white heterosexual males.
- Crime should have a similar demographic profile to real life: black men more involved in gang crime; terrorists mostly Muslim; corruption most prevalent among

those from the Indian sub-continent, etc.
- Most police officers should be white men. They should usually prevail over the bad guys.
- The dignity of femininity should be emphasised. “Strong and empowered” women should be mocked for their attempted subversion of nature.
- Jokes should be at the expense of homosexuals, feminists and Islamic extremists; not at the expense of white men, feminine women, or church-going grandmas.

Those who complain that this will lead to boring TV are both wrong and misguided. With a little thought, there are plenty of ways to create deep storylines that achieve appeal through nuance rather than sensation. Moreover, is it really a bad thing if TV is a little less exciting? Maybe a less addictive digital screen will lead to a more social and healthy society.

If culture is the backbone of a civilised society (which it is) and a people become the image of what they see (which they do), then it is essential to get this right. Showing the population what we wish them to be is the best way for them to change.

7 Things I Would Tell My Younger Self If I Could Travel Back In Time

May 14, 2018 | by Howard C. Roark | Link | Original Link

Young and dumb, that's how people describe their early selves as a reckless man lacking any wisdom or experience. As we get older we start having flashbacks of our young days. Then we scratch our heads thinking what decisions could've been done better or simply avoided.

Some of them you might have heard before or consider it common sense. Nevertheless I still think they are worth mentioning.

1. "Go for the girl who loves you for who you are"

I used to think that gaming the popular hot girl, that everyone wanted to be around or date was the right thing to do. How deeply wrong was I. Under those attractive physical features lies a insecure, shallow attention whore, who will ditch you if you ever go through a difficult period in your life. These chicks are never worth the trouble. Most of them will only love you, while you are useful in their narcissistic quest for popularity.

You are better off finding a girl, who loves you for who you really are not for your belongings or reputation, even if she is not as smoking hot as the “Trixie”.

2. “Prepare to be disappointed by the people closest to you”

Your parents, that special uncle, your best friend or a girlfriend that you thought you could count on—all of them sooner or later are going to end up disappointing you. They might not approve of what you are becoming or goals but that doesn't mean they don't love you. Nobody is perfect including me and you, fellow reader. Learn to love them for their best qualities and forgive them for their flaws.

3. "Friends will stick around only if you are useful"

I can count on my fingers the friendships that lasted for my entire life, even when I was no longer valuable to them or distance made it difficult for us to keep in touch. Who you consider your "friends" today might be nothing but a distant memory of your past in a few decades from now.

Most people that you will encounter in your local community, school, college, or work will only be your friends while your guys have something in common or circumstances make your guys cross-paths frequently.

4. “No one gives a shit about your problems”

“How are you doing?” This is a common phrase we are tired of hearing when someone greet us. The irony lies in the fact that when people use it, they don’t really want to hear about your problems or background. It’s just a way to not come off as a total rude jerk and appear hospitable. Learn to deal with your problems on your own don’t expect anyone to feel sorry for you nor to help you out.

Loading…

5. “Everyone is playing a game of self-interest”

“Game” is not only for girls but for everything in life. Everyone is gaming, deep down we all know, that if you show your true intentions to others early on, you are not going to get

very far in life. Life itself is a game in order for you to win you can't give away your final goal. Life is a game itself.

6. "Don't be afraid of rejection"

A lot of men are insecure about showing their true intentions to girls they have the hots for. I was no exception to this. This kind of behavior is very harmful, not only it will kill attraction, but you will also be labeled as a beta. The best way to cure it is by going for as many "No!" as you can, until you don't care anymore. It will give you more experience and help you overcome the soulmate myth.

7. "Be careful about revealing your true power level"

It's quite clear that if you succeed at something " too much," you might end up drawing too much attention. In case you become a big shot, get ready for the big sharks trying to crush you. It's a sad reality, but the truth is most people are insecure and will hate on you just for seeing you realizing your dreams while they stay idle. You are better off to hiding your "smartness" until you are certain enough that you can show them to someone you can trust. Otherwise, crabs will try to pull you back inside the bucket.

Unfortunately I had to learn this the hard way. It was only after I got negative attention with people trying to take me down or destroy my frame that I finally realized I had to hide my opinions and talents to most people. You can only show who you really are to those you can trust your life upon.

Conclusion

Life throws a lot of unpleasant experiences our way and most of the time we don't know the best way to react, especially when we are young and naive about the world and those around us. I hope this article will help you to reflect about your past and take some of my advice to help you not to make the same mistakes I did in my youth.

British Army Instructor Faces Court Martial For Making A Female Recruit Cry

May 14, 2018 | by Jean-Batave Poqueliche | Link | Original Link

An instructor of the British army may be court martialed after he was filmed yelling at a female recruit during a bayonet course and the video was uploaded on the Forces Bible Facebook page.

The Queen's Finest are going full circle into cuckery and might sack the instructor for doing his job: put on an act to shout at recruits and prepare them mentally for war.

Women can't handle basic military training

The instructor's insults are nothing out of the ordinary. The problem seems to be that the recruit is too fragile to handle words, when the position she trains for might include killing her enemy in the future. She is crying when her comrades did not, therefore the instructor simply states a fact with his "You are fucking weak".

He also refers to her tongue piercing. I believe the corporal wanted to shout "YOU ARE A SLAG!" but managed to hold back and just yelled that she was "not a killer" instead.

How I noticed that problem with my army experience

My only army experience was limited to a “preparation” lasting a bit less than a month. French students can volunteer for a few weeks in certain units, to see if military life suits them. It is designed to sort the wheat from the chaff. Instructors are specifically told not go easy on the new recruits.

Even in that very short period, I noticed how girls were always lagging behind. A dead weight for the whole unit, they were particularly mediocre in the activities that needed upper body strength, orientation, or hand to hand combat.

One episode that stayed with me was the tunnel. On the obstacle course, a concrete pipe was buried about two yards underground, with a length of fifteen yards and the width of a human body, just like those Viet Cong war tunnels. We had to crawl in it and follow the light to the other end of the tunnel. Even if my reptilian brain told me for a second not to do it, my logical brain analysed that there was virtually no risk of death, to take a deep breath and start crawling.

Out of the seven girls in our group of fifty recruits, three refused to get in the pipe and were sobbing, saying that they could not do it. Out of the four others that succeeded, two needed mental coaching for about five minutes to reassure them before getting in that pipe at a snail's pace while choking back tears.

Instructors regularly called our mothers whores and us shit-for-brains, faggots or sacks of shit. It was all part of the game and that is what the PC pawns do understand but refuse to accept, because a girl was at the receiving end.

This procedure is needed to harden the spirit and add additional stress to learn to think in a tense situation. But this is what happens daily in armies that are soft enough to recruit women…

Loading…

What did the soyboys at the Daily Mail expect?

"That army guy was like, so mean! How can you shout at a girl?"

The softies who wrote the news article do not understand that even the instructor knows he is playing a role and uses caricatural lines form Full Metal Jacket ("Show me your war face!"). They only want to punish him for putting in words her inability to be a soldier and that thousands of viewers, especially hardened veterans, probably had a laugh at the

expense of the liberals that are forcing women quotas in the military.

These recruits will be sent to war. The role of this instructor, however foul, not politically correct or offensive is necessary. Recruits need rage for bayonet charge and combat. They need to be angry and aggressive to channel adrenaline and kill a potential enemy.

I would be more than pissed if I was a NCO, with years of experience and probably a few deployments under my belt, getting court martialed because daddy's little treasure with her tongue piercing can't handle someone screaming at her.

The white knights at the Daily Mail obviously deactivated the comments on their page to prevent any pesky dissenting opinions.

Pas de "grosses" dans les rangs

The deeper the country is into cultural decline, the more cucked and ridiculous its military policies become. Women, by their very nature, have absolutely no place in combat units. And I think 95% of our readers that have served in any army will agree with me.

I won't detail again why women in the armed forces is a terrible idea, we have written enough about it in the past:

- The Real Consequences Of Women In The Military
- Why We Must Stop Giving Special Treatment To Women In The United States Military
- The Australian Military Is Enforcing A 70% Female Quota For New Recruits
- 5 Reasons Why Women In Army Ranger School Is Worse Than You Think

The only solution to meet half way across the bridge, if there was no other alternative, would be to create all-female units limited to administration or first aid.

But after all, British top brass choosing to fire a competent instructor to satisfy a few low-

T pen pushers only mildly surprises me. We are talking about the same army that commissioned these adds for recruitment, becoming even more of a global laughing stock:

3 Awesome Bodyweight Exercises For Men Who Do Martial Arts

May 14, 2018 | by Johan Roux | Link | Original Link

Many martial artists, whether currently practising or former practitioners, seek effective exercises that they can do to improve explosiveness, kinetic chain recruitment, mind-muscle connection, or dynamic flexibility and mobility.

After stopping karate in 2013 after having reached the level of Brown belt 2nd Kyu, I too sought ways to maintain or improve my martial skill even while not actively practising a martial art anymore. In the 5 years since I stopped, I have participated in a few different sports (namely gymnastics, track and field, swimming, basic) and based on my experience in these I have compiled a list of exercises that I believe are important for a martial artist to have in his repertoire:

1. One-arm pushups (Punching)

This exercise will add both size and functional strength to your guns to ensure they not only look the part but can fire too! Granted, not everyone will have the necessary skill or strength to perform these, and to those people I recommend first getting to the level where you can do either about: 20 explosive pushups in one set (that’s about how many I do); 12 elevated pushups (close or wide-grip) per set; or 10 handstand pushups against a wall.

Regardless of the intermediate difficulty level of this exercise, once you are able to perform it with proper form, you will reap many benefits.

How to do it

Start in a normal pushup position with your feet slightly wider than shoulder width. Now grab the back of your corresponding leg with one arm (i.e. left arm grabs left leg or right arm grabs right leg) so that you are supporting your bodyweight with just one arm.

In order to remain balanced when doing the pushups you will need to bring the foot of the opposing leg forward a bit. You will also need to rotate your pushing hand anticlockwise to a 10-to-9 position. Now lower your body to the floor slowly, keeping your pushing arm slightly to the side of your torso and in line with your middle chest.

Once you get to the bottom position, push back up keeping your body parallel to the floor until you reach full extension of the arm after which you can rotate outward with your body.

Check out my proper form, bitches…

Once you can do the above variation, try putting your non-pushing hand behind your back. This is the “proper” form for the handstand pushup and will be more challenging

than the first variation. Once you've mastered the "proper form", you could raise the difficulty level by elevating your feet, trying explosive one-arm pushups.

2. Clinch pullups (Pulling/Clinching/Wrestling)

Just as the name implies, these are pullups performed with the hands and arms in the same position as they would be in a Muay Thai clinch. This is typically achieved through the use of a kettlebell, as it provides a very similar round (though not identical) surface to a human neck.

However if you're like me and you do not have access to a kettlebell and rope/cable but you have a pullup bar (preferably with a neutral grip) you could simply do normal neutral-grip pullups or even better, do neutral-grip pullups with both hands on one grip handle if possible.

How to do it

Something like this…

Start with your hands in either the normal neutral or normal single-handle grip. Bring legs off the floor and go into either dead-hang position or bent-arm (depending on your ability)

Loading…

Now do your pullups (bring chest to the bar and if doing the single-handle grip version then you'll need to bring your head to either side on your way up). You could also get into the top position and hold for as long as possible (as in a clinch)

Once you are able to do about 10 of these you should have enough strength to be a decent clincher and a more formidable adversary for your opponents or sparring partners.

3. Pistol Squats (Kicking/Stability/Dynamic flexibility)

Perhaps many of you know of this one, but do you know why it is called a pistol squat, and the correct form for it? The pistol squat is a genuinely challenging exercise, even for

seasoned lifters. This is due to the fact that it is a unilateral exercise (like the one-arm pushup) and thus works differently than your normal two-legged squats. It forces you to balance while engaging your calves, quads, hamstrings and core muscles.

How to do it

Start by finding your balance on one leg, keeping the other leg off the floor but against your standing leg. Your non-standing leg should be bent. Now slowly raise your non-standing leg while keeping it bent. Try to get your femur (thigh-bone) and tibia (shin bone) above parallel to the ground by squeezing your quads to straighten your leg.

Lift and straighten either both arms or just the arm on your non-standing-leg side, so that your fingers point straight forward. If you want you can bend your other arm (standing-leg side) inwards to your chest, grabbing your opposite shoulder (this will provide more stability).

Now lower yourself on your standing leg, aiming to keep your other leg parallel to the floor throughout the movement. Try and get your butt to the floor (this is harder than it sounds and can be taxing on the knees, so go slowly!). Once you get to the bottom, straighten your pushing leg to raise yourself back to the starting position.

Once you can do this beginner variation, you are ready to do the “proper” pistol squat: keeping both arms straight out with hands together as if you’re holding a pistol (hence the name “pistol” squats) and pretending to shoot someone.

The indescribable joy of finally nailing this exercise…

Once you have reached this point you might actually find it easier to lower your butt to the floor when squatting, but for safety reasons I recommend trying the first two variations before the "proper" one, to build up the mind-muscle connection and muscle memory for proper execution.

Conclusion

The above mentioned exercises are ones that I've found to be the most effective for developing functional martial arts strength apart from the more traditional exercises that everyone knows and does (normal pushups, squats, horse stance, skipping, etc.). With these exercises I've been able to satisfy my "craving" for martial arts training while still getting in one hell of a workout, all without having to travel to and from a gym.

I hope you guys enjoyed this article, and most importantly that you learned something from it. Also, don't forget to check out my website Mansculinity.com for more articles like this in future.

5 Ways Women Make Themselves Masculine

May 15, 2018 | by Jared Trueheart | Link | Original Link

The perversion of sex roles in the Western world has led us down the route of androgyny. Men are behaving more like traditional women and women are behaving more like traditional men. Women often wonder why they can't find a good man. Perhaps it's because they are choosing to be more masculine. It's not attractive. In what ways are women making themselves more masculine and less attractive?

1. Language

Women talk to men as if they're just one of the guys. They'll begin a statement to a man

with something like, “Bruh,” “Hey man,” or “Look dude,” etc… The next part of the statement is too often something that only men should be saying to other men. For example, “Look dude, you need to man up,” or “Bruh, you smash?”

Not only should women not be speaking to men like men because it is unbecoming of a lady, they are also just plain bad at it. When men tell each other something like, “Get out of here with that bullshit,” or “Don’t be gay,” it is understood that we are respectfully holding each other accountable. When women do it to men it is understood that they sound bitchy.

2. Doing Stupid Stuff

When men, especially young men, do stupid stuff it is to demonstrate to other guys that they are willing to take risks and endure pain. Masculine men take risks and endure pain. We don’t have any rights of passage to demonstrate these so we do stupid stuff to demonstrate them instead. It’s probably not the best method but it’s what we’ve got.

Why do women do it? What exactly are they demonstrating to people, other than penis envy, when they punch each other in the face?

3. Promiscuity

Among men, being a player wasn’t always celebrated or even tolerated. Before World War I bachelors were largely social outcasts. When men sewed their wild oats they did so with loose women. No man worth anything spent much time with them. Men quickly figured out that although some women are better in bed than others, variety is overrated. It was preferable to have a good woman by your side so you could hold your head high when seen with her in public.

Sometime after the birth control pill became readily accessible (and hailed as a breakthrough in *women's* health) promiscuity became increasingly normal for everyone. As more women became promiscuous there were fewer and fewer women worthy of marriage. Now we are at a point where even those men who value good women can't find any. As one of my best friends learned the hard way, even the "good" women choose promiscuity. What was once the seen as debauchery for men and women alike is now seen as empowering.

Loading...

4. The Corporate Ladder

These women have empty souls

Why oh why do women choose to climb the corporate ladder? Did they see some wall street movie like Greed or Glengary Glen Ross and decide that lifestyle was for them? Those films were cautionary tales.

Most women would probably say they choose to work to be independent. It is completely understandable that a woman would not want to be dependent upon a genuinely bad man. But instead of finding better ways to discern the bad men from the good, women decided to become more like men. The folly of this is simple; men and women are dependent upon each other in different ways.

Traditionally, women were dependent upon the basics like food, shelter, money, etc… Men were dependent upon women for keeping the home and raising the children well. For some reason women decided that what men did was more important, but before there was such a thing as a blue pill, men thought women's roles were just as important. Men provided the basics but women shaped the next generation. In our present society that encourages women's penis envy women provide for themselves when single and for their shopping sprees when married, day care raises the kids if there are any, and a maid

keeps the house respectable.

5. Life Trajectory

Traditionally, a man's life went something like this; as a young adult he'd finish high school and get a job. Then he would either finish college or just stick with his job and get promoted. Either way, by this point he would have boned a few hoes, figured out that promiscuity is overrated, and he'd have a wife or fiancee. He'd spend some more time working on his career and then they'd have a baby. More promotions and babies followed, then retirement and death.

For women with penis envy their lives are similar (though with more promiscuity); they'd finish high school and get a job as a barista. Then they'd finish college and get a corporate human resources job. Promiscuity, experimenting, and "finding themselves" would have started years ago and continued until they are in their late 30's. Then a test tube baby comes or barring that, a puppy baby. Following that is retirement and death.

That's not a good life. Why did we ever get away from traditional sex roles? Weren't we, men and women, much happier when we had them?

Israeli Social Justice Monster Wins This Year's Eurovision Contest

May 15, 2018 | by William Adams | Link | Original Link

After a numbing three-course meal, in tandem with family members and relatives, I felt lethargic enough to lay down on a big couch and watch the current year's version of Eurovision Song Contest, for the first time in many years. Here are my thoughts on this hideous debacle.

Although this international pop song competition is a full display of plebeian mediocrity, I was actually a bit surprised by the fairly high quality of several finalists (26 in total, of which some are not European in the strict sense, with Australia as the most conspicuous geographic outlier). Denmark's touch of Viking march was not so bad, and neither were Lithuania's ballad and Czech Republic's catchy tune. Sweden, not surprisingly, offered a metrosexual Justin Bieber wannabe.

Estonia's contribution – with clear margin the best of them all – is a great manifestation of traditional elements in a contemporary context: Elina Nechayeva's high-pitched, impeccable voice, slim figure, feminine and gracious appearance are all but stunning features. My girlfriend stressed that Jennifer Lopez had used the same type of digitized bio-luminescent dress some years ago, but the latter is practically grandma these days so who cares anyway? I was sold in any case.

However, there was indeed a little problem with how it all ended, after hours of performances, multiple quick reviews, and opportunity to vote. When national jury members and the corresponding TV audiences have had their say, there was no Estonian songbird standing on stage in order to deliver the winning melody one more time.

Instead, a clucking roly-poly from Israel called Netta had won the hearts of the globohomo community. With a clear margin she won before the more conventional Cyprus contribution, whose female vocalist at least was rather hot.

Loading...

The fact that this Talmudic beluga whale managed to win is yet another sign of how far the West has sunken in a cultural sense. Sure, there are still people with a semi-traditional preference who vote for Estonia (who finished in eighth place), and Cyprus was not so far after, but the aversion against hierarchization of aesthetic qualities is still equally blatant and troublesome. The empress is naked and it's not a beautiful sight to behold.

Here are some of the lyrical lines from the winning song "Toy":

> Look at me, I'm a beautiful creature
> I don't care about your modern-time preachers
> Welcome boys, too much noise, I will teach ya
> Pam pam pa hoo, prram pam pa hoo
> Hey, I think you forgot how to play
> My teddy bear's running away
> The Barbie got somethin' to say, hey, hey, hey
> Hey! My "Simon says" leave me alone
> I'm taking my Pikachu home

> You’re stupid just like your smartphone

Well, beauty is in fact not so subjective, but one can always use imagination when being resentful against Israeli jocks. I am not so sure of Pokemon wanting to be abducted by an amorphous version of Björk, either.

There is always a symbolic struggle going on between the common sense right and the regressive left. This year’s winner of the Eurovision Song Contest indicates that even the mainstream has been severely penetrated by social justice concepts and aesthetics, fat acceptance to be specific. Perhaps even mega pop stars like Ariana Grande will go back to the former fluffy version of her teenage self during the Victorious days, since obesity will be the new black. To the extent that mainstream music matters, masculine men should continue to support traditional talents like Elina Nechayeva.

Why The Elite Love Raising Taxes

May 15, 2018 | by L.T. Smash | Link | Original Link

> "The way to crush the bourgeoisie [middle class] is to grind them between the millstones of taxation and inflation." – Vladimir Ilyich Lenin

Most people forget one of the reasons for the original thirteen colonies revolt against Britain and the king was because of high taxation and taxation without representation. Progressives and SJWs typically view taxation as a tool to help those in progressive "protected classes" which they call "the poor". We hear the narrative "the rich don't pay their fair share." If the rich do not pay their fair share why are so many wealthy people for socialism? Why are some for higher taxes? Who are "the rich" progressives are referring to and why do wealthy progressives always advocate government involvement to address poverty, i.e. socialism.

Paying of taxes are an integral part of life. All of us use services provided by the government. Taxation is necessary for the functioning of any nation. High taxation can be used as a means to hinder, suppress and even discourage certain types of economic activity or economic activity in general. The power to tax contains the power to take 100 percent of the earnings from any economic or productive activity. Eventually economic activity will cease if 100 percent or the majority of the fruits of labor are taken and drained away through taxation. Any and all economic activity can be destroyed by taxation.

> If any human undertaking can be wiped out by taxation, it follows that taxation may "defeat and render useless the power to create." There would be no purpose

> in beginning undertakings if they were certain to be destroyed by taxation. The chances are good that man's ingenuity would not be completely stifled by such government action, but it would surely be rendered largely useless. – Clarence Carson

Contrary to what we have been told, the elite like high taxes. Why would a wealthy person like high taxes? Because high taxes open the door to a complex tax code and cronyism. The more complex the tax code the easier it is to hide who is really paying and how much is being paid. Complication is a way of hiding true tax rates.

Understand that the elite rich separate themselves from the rest of "the rich". They look out for themselves and advocate taxing others. The elite's wealth is in various tax shelters, tax structures, or taxed differently (capital gains tax is one example) and have significantly lower tax rate percentages, if any taxes at all. These shelters are created in the tax code through cronyism. Taxation is a way for the elite to wage war on other people that do not go along with their progressive plans, world agenda, or are not part of their secret groups.

Socialism is presented as a "share the wealth" scheme to the masses. The wealth to be shared is YOUR wealth, YOUR money, YOUR resources, not the wealth and resources of the elite. This type of "equality" places the masses on the same rung of the social and economic ladder, the bottom, while an elite group of individuals directs and rules the masses. Thus, the environment is created as shown in George Orwell's book Animal Farm where some of the proletariat (the common people) are more equal than others.

High taxation does not create a "Golden Age"

Progressives are looking to create a "golden age" economically, socially, etc. a socialist

utopia through taxation. This golden age myth, this Blisstonia—akin to the fictitious world from The Simpsons episode, The Joy of the Sect, is among the delusions pushed by wealthy progressives. Progressives point to the "golden age" of the 1950s to show how "good" things were for everyone. Many people believe that the 1950s was a "golden age". This is a myth. This myth is perpetuated because it feeds the false progressive narrative of high taxation equals high prosperity for everyone.

The United States experienced four recessions from 1948 to 1961. During the 1950s, the highest tax bracket was above 90 percent, typically 91 or 92 percent. The only time the rate was higher was during the last two years of World War II; the tax rate was 94 percent. Historian Brian Domitrovic has brief video to discussing the high tax rates of the 1950s.

People such as Nancy Pelosi, Meryl Streep, Oprah Winfrey, Seth MacFarlane, Michael Moore, Jeff Bezos, George Soros, Bill Gates, and Jamie Dimon are not okay with paying an income tax rate over 90 percent. Instead, these people want their constituents, fans, and followers to believe they are okay with paying high taxes; taxes percentages they do not really pay.

Loading...

California has the highest poverty rate in the United States. Higher taxation and excessive regulation has not created create a new golden age in California. California's high taxes are hurting the state and the people of California. The state attracts those that want to be on the government dole. California's financial troubles are not by chance and is the outgrowth of identity politics and an elite attitude amongst California's politicians at all levels of government.

Harvard professors, as an example, were ardent supporters of the Affordable Care Act, aka Obamacare. These same professors complained about the rising costs of their own individual health care because of the law. Progressives are fine with taxing as long as they are not the ones paying the taxes. A lot of progressives complained about the cap on the SALT deduction. Many progressives, for example in California and New York, liked the federal SALT deduction because it was a way of passing off California and New York state expenses onto the rest of the nation.

The Socialists/Progressives Are Coming for You

Telling other people they need to be more generous and then using taxation to confiscate money and property is covetous behavior. While those that have more abundantly should be generous, that generosity does not mean they should be unwise and foolish. I have encountered many people that are capable of working but refuse and expect handouts, government and otherwise. Hoarding wealth or using the arm of government to "redistribute" wealth is covetousness.

Progressives will quote surveys of the wealthy advocating for higher taxes, a higher minimum wage, and other government actions to combat poverty, but the progressives quoting such things are ignorant of who is actually paying the taxes. Beware of anyone that does not want to pay any taxes and those that call for high taxes for "the rich". Politicians treat "high taxes" as a relative term and consider anyone making over $200,000 a year as "rich". The taxes would be levied against people that earn a majority of their income by working for someone else or have small businesses such as sole-proprietorships or LLCs.

Progressives will not be happy until "everyone" is on the same level socially and economically. I place everyone in quotes because most are too ignorant to realize that the George Soroses, Nancy Pelosis, and Oprah Winfreys of the world while advocating for "equality" will live in closed off estates from the rest of us. Just like the pigs lived in the farm house after ousting the farmer in George Orwell's Animal Farm.

The elite advocate for government involvement and high taxation because more of your money will end up in their pockets through subsidies and other government programs designed to help "the poor". Taxes will eventually have to be increased to keep the government functioning because more and more government revenue is in the pockets of the elite and their cronies.

Billionaire Jeff Bezos hates paying taxes but is okay with paying workers low wages so they require welfare to survive; of course, other people other than Jeff Bezos are paying the taxes for government welfare his employees receive. Bill Gates says rich people need to pay more in taxes. No one prevents the Bill Gates, Oprah Winfreys, Nancy Pelosis, Jeff Bezoses, and George Soroses of the world from paying their employees higher wages and taking less for themselves without government involvement. The mere fact these people advocate for more government involvement should immediately raise some serious questions.

The high taxation is part of the march toward socialism. Progressives want to use the government to loot you and tell you it is for your own good or the good of others. For the elite, high taxes is less about money and more about control of your every act, word, and thought, i.e. socialism. Socialism and high taxation helps only the elite.

Men Who Constantly Hate On American Women Are Sore Losers

May 16, 2018 | by Larsen Halleck | Link | Original Link

As somebody who has gotten a few “flags”—mostly from emigres, tourists, and exchange students—I’m not going to tell you that you shouldn’t “think locally and fuck globally” in the immortal words of Gogol Bordello. But what I am going to say is something you can learn by reading the books found in this very website’s store—there really isn’t a “pussy paradise” out there, and further more, going by my own analysis of things: if you can’t get laid in America, you’re probably not going to get any in some random country either.

I'm certainly not going to say that there are no problems with American women—god no! Undoubtedly, there are many problems—the unrealistic expectations and entitlements many of them have in the dating market, the way that American culture goes out of its way to encourage women to make themselves look as ugly as possible, etc.

But as I have previously said, I feel that some of the dissident right's concerns with this benighted set of womanhood are somewhat exaggerated. Most of the women I have dated were either born in the US or lived here for many years, and I have never once had an American girl in my life that was the stereotypical "the kitchen is a prison!11" feminist hag. Quite the contrary, the majority of women I have had in my life have *explicitly told me* that they enjoy cooking for and satisfying the man in their life both sexually and otherwise.

In fact, I'll go a step further—if the woman you're currently seeing has such a hysterical reaction and adamantly refuses to bake you cookies or whatever, maybe *you're* the problem.

“But the women in Russia/Brazil/Thailand/wherever are more likely to cook for me! Their culture hasn’t been corrupted by feminism!!” you’re probably saying to yourself. And I’m sure to some extent that’s true, but again, if you’re the sort of person that goes around saying “all women are like ‘that’, all women are like ‘that” with regards to female “hypergamy” and “lusting after Chad” and all the other incomprehensible dorky codewords that keyboard alpha males do then shouldn’t it also follow, logically, that most women are also “like that” when it comes to wanting to submit to a strong yet gentle patriarchy—if you can provide it?

In other words, why are women “purely emotional hamsters” when it comes to lusting after Chad—and I am going to ignore how the angry beta males are probably themselves lusting after Chad—but suddenly they become shrewd and business-like when it comes to not choosing your stupid ass to fall in love with?

Loading…

Personally, I do indeed think that women and men both have biological imperatives that the overwhelming majority would follow if given the choice, and I will always maintain that if a woman sees you as a strong and masculine “alpha male”, she will want to be “barefoot and pregnant in the kitchen” strictly for you, not anybody else, just the man she has eyes for.

A real man doesn’t need to force the woman to be in the kitchen with violence, or put her in a burqa or something like that: through sheer force of strong-yet-benevolent patriarchy, she’ll do it willingly and with a genuine smile on her face.

The point I'm trying to get at here is: if you can't induce those feelings in American women, or at least convince an "Ameriskank" to give you a casual roll in the hay, then why the hell would you assume you'd be a stud somewhere else?

The girls in the Philippines/Ukraine/Colombia aren't going to sploosh over your "mumbling boring beta simp" routine just because you're white/rich/whatever. Sure, you might get a few curiosity bangs but you won't get the submissive housewife you think you'll get.

And here's something I thought of but I rarely, if ever, see addressed by others: considering that your average beta male has spent most of his life in America or Western Europe getting clowned and getting metaphorically or literally kicked in the dick by everybody around him—and yes, I have never been afraid to admit that I am an ex-beta male and thus my childhood and teenage years largely consisted of such—what do you think will happen to said beta male when the men of his sex tourist destination decide to have a few words with him about trying to turn their country into his open air brothel? From what I know of anthropology, it won't be pretty.

This article was not intended to say "you can only stay in your country and have sex with your countrywomen," so much as it was to say "get some practice in your homeland before you try sex tourism, to truly get the best out of your sex trip and maybe find that something resembling 'pussy paradise'."

Because if you can get American women to "fulfill their womanly duties", then the comparatively less feminist "muh foreign women" should *obviously* thus be willing to go to the moon and back to serve you, right? Or in terms that are less, y'know, retarded, practicing in your country will make your sex trip easier and more fulfilling.

The Lost Art Of Helping Your Friends Get Laid

May 16, 2018 | by Robert Languedoc | Link | Original Link

A lot of articles at ROK chronicle the tactics employed by men to convince women to play hide the salami with them, often internationally. Back in the 80s, many of us guys employed a game enhancer that is all but disappearing from the scene. We didn't have a name for it because without the internet or social media, there weren't a lot of ways to spread hashtags. Today, I call it "proxy sex," or more accurately "proxy game," which is when a guy aids another dude in getting laid.

I don't mean physically helping as in holding a woman down, or coaching a dude to raise his butt higher. Proxy sex is when a guy puts in a good word or two for another dude which closes or enhances the deal. I did this for a colleague's husband once.

Lisa was a trim, athletic attractive brunette. One day, she was bitching about her husband, Jeff. She was going on how distant he was. I explained, "Look, Lisa. Men are easy. Just give him some real gymnastic sex and make sure he medals."

So Lisa did just that. She gave Jeff Olympic level sex. When I saw her again, she was real pissed.

"I did what you said, and a lot of good it did!"

Always going for gold, I added, "Sometimes, it takes more than just once."

I suspected it wouldn't matter how many times or the manner in which Lisa boffed Jeff, but that didn't stop me from hooking up a fellow dude bro. Lisa and Jeff eventually divorced, but not before a guy I barely knew got screwed on the uneven bars, and as such, I got laid by proxy.

When a guy helps another guy get ass, it's as if he's getting ass too. I've done this when I was younger even when I was experiencing a dry spell myself. If I wasn't getting any, I would default to helping some other guy get some since it's better to have someone, somewhere getting laid then none of us at all.

I once ran into a girl my roommate, Doug, had a thing for. I knew she wasn't interested in me. She liked beach volleyball types so I played up my roomies stats then tipped her off that he was in a tournament over the weekend at the local beach. I told Doug she would be there so he brought his A-game. He played so well that he and his doubles partner took first place. Later that night he spirited his dream girl back to our place and took that trophy too. They eventually married. He never knew that I hooked him up through proxy

game.

Once my sister's friend thought she would tap me for some brotherly advice. Her boyfriend stopped communicating and stayed out late with his friends. She wanted to know what I thought was going on. I explained, "Guys get very introspective just before they ask a woman to marry them. He's probably looking at diamond rings right now."

Safe to say that dude got his testicles drained that night as his girlfriend attempted to seal the deal. Truth is I thought he was likely getting ready to dump her.

One time, I went for the grand slam. A married friend and his wife were having trouble conceiving. They were considering expensive medical fertility procedures. Now, this is a serious matter and my *man*-ipulation of the situation was more based on sound medical advice rather than proxy game. I told him about the "Three and Thirty Rule": to have sex three times every day for thirty days. It's the advice I give all couples struggling to conceive.

Impregnation is a numbers game. Fact is many married couples do it far less frequently than they might think. The Three And Thirty Rule worked for me. Doctor's painted a bleak picture for us due to medical concerns. After the best month of my life, my wife was pregnant. I passed this advice to my friend who tried it, and it worked for them too.

My generation was always into ball busting. There was no anti-bullying agenda. You developed a sharp tongue or a hard punch. The unwritten rule about ridiculing a friend was "never in front of the girl you liked." It was a curtsey kind of thing like the British infantry never shooting at officers. Unfortunately not everyone back then subscribed to this gentlemen's agreement. One night, a friend brought along his cousin on a night out.

Loading...

Jerry was not a welcomed addition. He had the annoying habit of interrupting me just as I was reeling in a punch line. He would interject a lame comment which made us all look

like douchebags for hanging with him such as, “So what do think about Oliver North?”

Secretly, I wished Jerry would choke on that little umbrella in his drink. Jerry had to get drunk to grow balls big enough to talk to women which meant he wasn’t getting anything tonight or any time soon for that matter. I never drank when I was out because that deliberately dulled the senses including the ability to detect fat.

I had managed to get two girls to show interest in our little group of three, but Jerry was fucking it up with his numbnuts banter. I slipped away when Jerry inserted two straws up his nose then exclaimed, “I am the walrus.”

The two women pity laughed. I made my exit when Jerry continued, “Goo goo g’joob.”

I started talking to a fat chick to get closer to her good looking friend. Back in the 80s, there was plenty of fat shaming and fat chicks knew their place. They were there to clean up the guys who were left on the shores of Dunkirk as the tide receded and the lights came on.

It took awhile, but eventually the fatty sensed I wasn’t drunk and left me with her attractive friend. Things were moving along nicely when I noticed a dude standing to the side of my target. Initially, I thought it was her boyfriend, stalking his girl on a Friday night. Back then, Friday nights were for friends and Saturday nights were for significant others. Friday night was everyone’s “upgrade night.” Sometimes boyfriends got all macho and would challenged a lone male, sniffing up his girlfriend’s skirt. That’s why we always took a wingman.

I was both pissed and horrified to see the dude was Jerry. Best I could tell his cousin got tired of Jerry’s “walrus gumboot” and retreated to more fertile hunting grounds.

“There you are,” Jerry exclaimed.

“Yeah,” I said unenthusiastically trying to convey to my pretty woman that I didn’t care for this clown. Garbage began emanating from Jerry’s mouth, “Is your mom doing your laundry tonight?”

I looked at Jerry then to the attractive woman circling her mixed drink with her finger. On the way over, we were discussing where to find a good tailor, and I mentioned that my mother was an excellent seamstress who would do alterations for a small and reasonable fee. Now, Jerry in his drunken state was using this information to cock block me.

“Does she fold your undies for you too?”

Jerry asked as he guffawed uncontrollably. I looked to my girl who was picking up her belongings, ready to leave. I don’t know if Jerry’s comments or Jerry himself made that woman depart, but depart she did. Jerry just stood there with a dumb look on his face as a black hole of dearth spun just above his head. I thought that no amount of proxy game could ever get this guy laid. Even the fat chicks passed on a ride on the Jerry-mobile which I’m sure would be a let down on par with the first time Priscilla Presley fucked Michael Jackson. The visual made me dry heave.

Unbeknownst to me, Jerry’s cousin was in earshot of the whole exchange. Later, he spoke to my attractive girl to repair the damage, by employing “The Sensitive Guy.” He told her that Jerry was “slow,” but I always treated him like one of the guys, insisting on bringing him out with us. He laid it on thick, telling her that I had a cat named “Tuborg” (his favorite beer) and that I volunteered at a suicide prevention call center. It was all bullshit, but it worked.

This narcissistic world is letting proxy game die an untimely death. You should help out your buddy get circus sex even when your game is off, and if you think you’re a stud that doesn’t need assistance to get on the trapeze with a 9 or 10, then go ahead and sign the waiver. We’ll stop helping you. Just be warned that some of your game might be the result of unseen heroes, tossing you a bone now and again, because I for one got by with more than a little help from my friends.

The Search For Meaning In South Africa’s Kruger Park

May 16, 2018 | by Liam O'Sullivan | Link | Original Link

Seeing a piece of land preserved from human intervention and exploitation is a gift. Growing up, living in a city and being grinded on daily makes us disconnected from our primal roots. I was one of a billion other professionals. My pretty nice perks were my golden cage. It was time to press pause.

City life leaves us with many unanswered questions and there is a sense of uneasiness when trying to grasp the quasi infinite complexity of the world we leave in. This article is about sharing with ROK readers the intellectual journey of a corporate professional seeking a meaning. It’s not a mid-life crisis, it’s a clarity one.

The urban grind, Joberg (Johannesburg, Gauteng, SA)

1. Virtue signaling is a mask

I believe it takes relentless commitment, intellect, and energy to understand and discover beneath all that camouflage the real intent of people and the cynical nature of our society. Because our brain is lazy and we will seek the most convincing pitch.

People who claim high morals, publicly show gratitude and generosity are lauded. In fact all they do is to exploit a behavioral hack to gain social status. This is also the case for deceptive altruists. On the other hand, in nature, there is none of that, at least not in the way it exists in an urban environment. In nature, we see camouflage for what it is, deceit.

2. African wildlife

Kruger Park is a South African natural park located north east of Johannesburg. In shape and area it is similar to Portugal. The land is relatively flat, the soil is rock hard but when scuffed by vehicle wheels it becomes a choking red dust. There are no fences between the park and the surrounding cultivated land other than natural frontiers like rivers or mountains.

The grassy landscapes and the mixed communities of trees, shrubs, and grasses can be subject to occasional wildfire. Several camps comprising of tents and bungalows are scattered across the park and there are gas stations within one hour drive from one another.

The cars are part of the landscape

Surprisingly, the game isn't scared of cars and probably sees it as moving rocks. It is almost as it we were invisible. Getting out of the vehicle is prohibited and driving on the road is limited to 50 km/h. The game grew accustomed to cars and we are not perceived as a danger.

Impalas chilling by a pond while the elephant is taking a mud bath

The most frequent game that can be seen is the impala, a slender antelope similar to a gazelle in build. The male grows lyre-shaped horns while the female is hornless and

smaller than the male. The enthusiastic guide explained the impalas are gregarious but the male can be territorial when it wants to hold territories where it may form harems of females.

Loading…
The territories are demarcated with urine and faeces and defended against male intruders. When I wrote this, I paused for a minute only to let my mind suggest that this was akin to cockblocking.

Not much going on

It is fascinating to see zebras, impalas, wildebeests chewing grass and chilling next to one another. The impalas walk elegantly and slowly just the way a ballerina moves in a ballet. It eats the grass calmly. The impala cervical system will release adrenaline in the event of an immediate threat to temporally boost its response.

Stress in life should only be limited in time and adrenaline be released when faced with a life endangering situation as lasting stress can be devastating on someone's psyche. It is my intuition that modern stress is a prime example of a maladaptive behavior that we inherited from our ancestors shaped by thousands years of evolution.

3. The disconnect meets the overarching truth

It is only natural that witnessing nature makes anyone question and draw parallels between our urban lifestyle and Kruger Park. After all, the urban lifestyle is just a more sophisticated version of the park where the intellect can be used to con and deceive people in order to gain a mating advantage.

Advertising, virtue signaling and marketing are just a smoke screen created to lure a lazy mind and are the ramifications and extensions of an urban environment where being a

courtier offers more advantages than being a hunter.

The lion fears none

While the impalas, the wildebeests and the zebras are eating grass, something lurking in the dark throws gloom over the scene. The lion is the anti-social party pooper that preys upon the grass eaters. He is the one hiding in the Savannah ready to attack, he is the one who deceives.

Nature has a way of teaching animals and mankind in the most humble way, without being condescending or judgmental as most of us are. Its judgement is cold and heartless. Ego doesn't exist in nature, only among humans.

I am currently reading a book by Avi Tuschman titled Our Political Nature — The Evolutionary Origins Of What Divides Us. The book explains the hidden roots of our most deeply held values and is a catalyst to understanding human nature and how passing on our genes that we share with our family and to a lesser extent with our tribe/community are ultimately at the core of our decisions.

It is understood that we live in a society that is goal oriented, multiple goals co-exist, for some it is to lead a hedonistic life or to live in accordance to the scripture and for others life is a quest to pursue riches, fame and power. But in nature there is only one ultimate reason to exist and that is to create a healthy legacy. In nature's eye the rest is futile. So for that you can go to a sperm bank. Now that the matter has been taken care of, in our lives, it's all about chasing fun, enjoying small pleasures, being independent, and cracking open a cold one with the boys.

Average-Looking British Woman Made $7,000 Per Month As A Prostitute While Working For Senior Politician

May 17, 2018 | by David G. Brown | Link | Original Link

The secretary of senior British politician Dominic Raab has been caught selling sex through a sugar daddy website. Although Raab serves as Housing Minister in Theresa May's cabinet, he is privy to a range of national secrets, including those related to anti-terrorism, defense, and even Britain's nuclear program. Rebecca Tott's double life should serve as a stark warning to Western governments, all of which are probably employing hundreds, if not thousands of these wannabe prostitutes without knowing.

With counter-espionage efforts typically focused on stopping horny middle-aged men from being extorted by foreign women or female double agents, no attention appears to have been paid to money- and attention-hungry "professional" girls working for government. Once blackmailed (or simply recruited via a few wads of cash), these women pose an enormous security risk. As sugar babies, they are not only whores, but national liabilities as well.

The undercover newspaper reporter and Rebecca Tott.

Sugar babies are a recurring theme here at ROK. I've written on the topic before, whilst Kyle Trouble taught you to make the most of our decadent society and game them. What I penned in 2015 is equally, if not more accurate today: "Sugar babies are not only sluts, they're prostitutes who cannot admit it." Similarly, Matt Forney used to cover their cousins, "Dubai porta potties," women who literally get shat on for cash in the Middle East. Sadly, it looks like these kinds of girls are here to stay.

The worst part of the situation involving Rebecca Tott is that *The Sun* newspaper, not the British police, civil service, or security agencies, uncovered her sexual escapades by using an undercover reporter. In her encounter with the fake sugar daddy, she bragged that she was earning up to £5,000 a month (ca. $7,000) giving sex to rich men. One of her clients, she further boasted, worked for Middle Eastern royalty (paging Matt Forney for a sequel to his "Tag the Sponsor" exposé).

Why didn't the British civil service know its "poster girl" was a whore?

Comically, Rebecca Tott had served as a “poster girl” for Britain’s bureaucracy, despite being a high school dropout. The contemporary rush to employ women obviously affected the retrospectively poor decision to promote her in government campaigns and hail her as a “success story.” Her entry into the civil service’s apprenticeship program began at the age of 16 and by 20 she was already managing the appointment book of a senior government minister.

Though a diary secretary seems like an unimpressive position, Tott’s job enabled her to know and sometimes influence what her boss was doing. This information would evidently be invaluable to any foreign or corporate interests. As a member of the national cabinet, Dominic Raab regularly discusses and handles highly sensitive government material with his colleagues, not just housing-oriented business but also matters of national security.

Loading…

Given the inability of authorities to know what their poster girl was doing, there are undoubtedly many other women replicating the lifestyle of Rebecca Tott. She is merely the tip of the iceberg, in both Britain and elsewhere.

Welcome to 2018, where a made-up 6 can get $7,000 a month having sex with thirsty and rich older men

Rebecca Tott and her older sister, who appears on a dating show and is a social media "star." (Is this where the redhead got her craving for money and attention?)

When Instagram filters and flattering angles are taken away, even a made-up Rebecca Tott barely meets the threshold for a 6. Nevertheless, she makes more money in a year from sex work than probably 20 million Britons do from honorable professions. The thirst truly is real. Basically half a night with Tott costs £750 (ca. $1,000), or the average weekly salary of an Englishman, American, Canadian, or Australian. Moreover, when Tott bragged she was earning up to $7,000 a month, I interpreted that as being from *one man*, not her cumulative haul. These kinds of sums are staggering.

In my opinion, it's actually somewhat harsh to mostly blame Rebecca Tott for how she ended up. She is just an extension of the highly regressive culture that surrounds her. We can have debates about whether the chicken or the egg came first. Still, Rebecca Tott entered adulthood at a time when female promiscuity and rampant male thirst had been in full swing for *years*.

There are virtually no serious consequences for women like Rebecca Tott

Tott won’t feel any shame or guilt because society will refuse to make her feel it.

Yes, she was suspended from her job. Yes, she will face immense barriers in gaining the same sort of employment she had before. But this hasn’t stopped Rebecca Tott’s life from largely moving along. Due to having fairly wealthy parents, she is additionally insulated from any proper responsibility for her actions. Of course, she has not committed something like murder, yet a sense of contrition or delayed modesty about her slutty antics is nowhere to be seen. Such are the relatively carefree post-“scandal” lives of young women in the modern world.

With seemingly no shame (and who can blame her in this massively permissive “culture” of ours), she unhid her Instagram account, posting about the need for “resilience” and “feminism.” I am not going to be surprised at all if a wealthy white knight offers her a new career in the private sector, unconcerned about whether or not she is continuing her “work” as a sugar baby. Who knows, maybe this new rich benefactor will offer her an all expenses paid trip to a place called Dubai for some, you know, action.

David G. Brown

David is a lifelong dissident and intellectual rebel. He despises political correctness, which replaces real, needy victims with narcissistic leftists out for a free meal. Though still a young man, he has watched society descend into its present morass with great sadness, combined with a determination to help make things better. He tweets when there's something worth tweeting here.

3 Quick Body Language Fixes That Will Make You Appear More Alpha

May 17, 2018 | by Joseph Murci | Link | Original Link

When it comes to being alpha, everyone loves to focus on the verbals—what to say, how to say it, and the perfect responses to common quips and tests. But often underappreciated and ignored is the value of body language in being alpha and demonstrating your masculinity.

Your body language is highly indicative of your inner state and says a lot about you. In fact, it says much more than words ever will. As such, you can optimize your body language and over time reprogram your thought patterns and who you are as well as using it to communicate a great deal to the outside world without a single word.

With that in mind, here are three quick and easy alpha body language fixes that you can – and *should* – begin implementing right away.

1. Slow Things Down

Have you ever seen those squirrely guys who fidget and sway all over the place in a constant state of pressure and paranoia? Sloooooow thiiiiiiingsssss downnnnnnnn. Rushing and fumbling about communicates a lack of control and increases that same sensation in your own mind, leading to that anxious, hectic feeling within you that sets off a domino effect of weakness. Make your movements more deliberate and graceful.

When you speak, don't be in a hurry to get it all out on one breath. Whatever you do, take your time. **You are in control of time and space; not the other way around.**

Take that nugget of alpha wisdom to heart because it speaks volumes. You are not reactive. You demonstrate poise, control, and confidence in everything you do.

To practice, take the conscious effort to slow things down in your day to day tasks. Even dip your toes in the waters of slowed down absurdity just so that you can experience what it feels like. It'll put you in the present moment and give you more enjoyment of everything you do. You'll notice how moving slower will give you that little oomph of confidence and surefootedness that cranks up your masculine aura. Alpha sloth is alpha.

meet your new overlord

Walking from point A to point B is about the only thing you should be doing quickly. But with momentum, drive, and purpose. None of that mall walker jumpsuit disco man business. This demonstrates power and confidence. The rest? Slow it down.

2. Lock Your Eyes

The eyes can give away everything about your inner state. Are you googly eyed quickly looking here, there, and everywhere? A shifty gaze indicates anxiety, insecurity, and weakness. Why are you looking around all over the place like the boogeyman is about to jump out from behind the corner at any moment?

Loading...

Remember: *You are in control.* Act as if you knew everything about everything and everyone in your vicinity and put them there on purpose. Why would you be nervous or paranoid?

When you walk or talk, keep a fixed gaze. When someone is in front of you, look them right in their eyes. Connect with them on a deep level. Don’t let your eyes shift around

like they're in a pinball machine. As I said in point #1, when you decisively change where you look, don't be in any rush to do so.

3. Keep your eyes and head at neutral or above, never below

When you look down – either with your eyes or your head – it shows sadness, lack of self-esteem, weakness, and other undesirable things. Stand up, walk down the hall, and try it for yourself.

In one instance, walk with your head held high, and in the other, walk with your head dipped downwards. In which one do you feel more confident, happy, and powerful?

To train yourself to do this, there's a very simple trick: Pretend like there's a block of wood attached to your neck right under your chin that physically prevents your head from dipping below neutral level.

Use this same idea with your eyes like you had some freaky surgery or whatever floats your boat. Or that there were laser beams shooting out of your eyes and underneath neutral level there is an innocent child who will be blasted with flaming photons if you look down. Neutral or above. Never below.

question for the audience. Alpha or beta?

Even when you text, hold your phone more out in front of you rather than down by your lap. Instant de-betafication tactic. Or better yet, just stop texting so damn much altogether.

Conclusion

Body language is a monster of its own, but these are three simple tweaks that you can put in play today. What are some simple tips and tricks of your own to tune up your body language?

I’m Hiring Someone To Copyedit My New Game Book

May 17, 2018 | by Roosh Valizadeh | Link | Original Link

I’m looking to hire an experienced writer or editor to copyedit my new 149,355-word game book. I would like him to catch the following problems:

- Typos
- Grammar and punctuation errors
- Awkward constructions or confusing phrases
- Verb/noun agreement errors

I don’t want to perform massive changes to the organization or writing style. My goal is to eliminate the most obvious errors and problems to allow for a pleasant reading experience.

If you are interested in this job, I have prepared a 722-word sample that I would like you to edit using Microsoft Word’s track changes feature so that I can see your modifications in red. Click here to download the sample. Note: I’m not looking for someone who can tear up this sample the most, but one who follows the guidelines above.

Loading...

After editing the sample, email it to by Tuesday, May 22 with a bid in US dollars and details of any previous editing experience (it’s fine to attach a resume). To help you come up with a bid, time how long it takes you to edit the sample and multiply it by 210 to get a rough idea of what the entire job may take you.

Lead time is four weeks from when I hand over the book to you, and I would like to keep

my cost below $2,000. Once 50% of the job is complete, I will pay you half the money. I will send you the rest when the entire book is finished. You can invoice me through any online service (Paypal, Zoho, etc.) that allows me to pay with a credit card. If you're in the United States, I can also mail you a check.

If you have any questions, leave a comment below or drop me an email.

Marijuana Makes Men Stupid And Lazy

May 18, 2018 | by Beau Albrecht | Link | Original Link

Legalization of marijuana is a thorny topic. Acceptance has gone further than it did even during the 1970s. Statewide legalization (Colorado and some others) will prove to be interesting experiments. For some, it’s a cause for celebration. Still, there’s reason for caution.

Confession time

Forgive me, Father, for I have sinned.

I'll admit it. I smoked weed in my younger days. *I even inhaled.* However, I did so very seldom, and there's a reason. I quickly observed that after I toked up, for the next few days I'd lose motivation. That meant doing less homework and studying. The grades I got would dip for that week—not enough that anyone else noticed, but I realized I had to keep my priorities in order. The last time, I concluded that it works by dulling the senses. It takes the edge off, but I don't want to lose my edge.

So that's what very occasional use does. Later, I began to observe that my friends and acquaintances who toked up regularly were barely skating by. Those who did so daily were burning out and turning into losers. Living one's life in a cloud of smoke doesn't work!

The active ingredients in marijuana (particularly THC) are oil-soluble. Therefore, it takes a long time to get out of one's system. This is the major problem. If a hardcore pothead goes cold turkey, recovery happens eventually, but it can take six to nine months before the THC levels become undetectable.

Marijuana advocates do admit that it causes amotivational syndrome in adolescents. However, the truth is that weed-induced laziness doesn't disappear the moment one turns eighteen. When I went to college, I witnessed living proof.

A mind is a terrible thing

Engineering major with a formerly stratospheric IQ

My section (housing 41 students) of our dorm had two dope dealers—one on the top floor, one on the bottom. That's right—one pusher per twenty students, not including the RA on the middle floor. Apparently they had enough business that competition wasn't a serious issue; no shootouts occurred. I suspect that our college had a higher density of amateur pharmacists than Manhattan has of fast food joints. One of them, of my unfortunate acquaintance, became known for breaking the cafeteria's very durable ceramic plates over his head. He kept his merchandise inside a plumbing panel, and the only item his mini-fridge contained was a bong.

I saw Plate Breaker's SAT results once. The first time he took the test, it was stellar. My own score would almost get me into the Triple Nine Society, but *this guy's first result was considerably higher*. He was an engineering major, and probably got a full scholarship from that first score. I'm not sure why, but he took the SAT three more times. Each subsequent try was two or three hundred points below the previous. Admissions lets you use the best result, but the last one probably wouldn't have allowed him into college, if the final one had been his only attempt.

So something happened between when he took the SAT the first time (well above the genius threshold) and the last (below the national average). Worse, he got dumber by the time he actually entered college. This effectively amounted to the loss of at least 50 IQ points. So what happened to this promising student after his self-induced chemical lobotomy?

According to the scholastic probation policy, a freshman who flunks out gets another year to pull it up. If grades are still not passing at next year's end, the student is expelled. Plate Breaker proceeded to do exactly that. In two years, he made an 'F' in every single class, with the sole exception of one 'D' (probably sociology). So he started out in the same league as Albert Einstein, Stephen Hawking, and William Shockley, but became a reverse *magna cum laude*.

Loading...

How did he spend his college years, besides selling dope and not learning? He became the pre-Internet version of a Social Justice Warrior. He spray-painted "Fuck Apartheid" on an exterior wall, likely so he could look out the window every morning and contemplate

the complexities of the South African situation. He considered creating a diversion so his comrades could do a 1960s-style sit-in at the administration office, but missed his chance to get arrested like the rest of the chumps. Other than that, he dropped four hits of LSD once and saw the devil. Note well, those who use psychedelics should do so in moderation.

Toward the end of his second year, he was about to flunk out. He began disassembling his motorcycle, taking it up to the room piece by piece. His plan was to put it back together on the very last day, and ride it down the stairs. I didn't hear if the motorcycle actually worked when he reassembled it, but as the story goes, his roommate was left to clean up the engine grease on the floor. After that, he moved to another city and continued selling dope.

So much for that engineering career. *This guy could've gone places.* That's how a promising student wasted two years of his life, the scholarship funds, and any contributions his father (who he hated) might've sent. Not everyone who smokes dope burns out quite like that, but it happens.

Why being a pothead is bad

What's The Lightworker lighting up there?

Some will say that alcohol also causes problems, though it's not quite the best argument that we need to embrace another substance like that. Granted, there are far worse drugs out there than marijuana. For example, it's kid stuff compared to crack cocaine, which is basically Satan's boogers. However, although weed is a relatively "soft drug", it does have long-term effects, especially in habitual users. It causes loss of motivation, is known for memory problems, dulls the wits, and exacerbates mental problems in people at risk

for them.

Furthermore, those who aren’t smoking home-grown weed or using some legal source are supporting organized crime. Hopefully it’s not unfair of me to state that drug traffickers generally aren’t nice people. They’ve made life a living hell for decades in parts of Colombia, Mexico, and elsewhere. Some people have a marked hatred for GMO foods and refuse to shop at certain big box stores, considering the effects on domestic agriculture and manufacturing. (Hey, I get it too.) Ironically, many of them haven’t given the first thought to where their pot comes from and how it gets to them.

We at ROK strongly emphasize self-improvement, as well as the betterment of society. People who are serious about making the most of themselves shouldn’t partake of bad habits that’ll make them lazy and stupid. Furthermore, a bunch of lotus-eaters aren’t the best candidates for bringing about constructive changes in the world. Those who argue that people should be free to do whatever they want with their bodies are missing the point about how this affects society too.

For all these reasons, those who really must toke up are cautioned to make this a very occasional indulgence.

Beau Albrecht
My father was a high-ranking student radical poobah and still thinks Castro was the bees' knees. Although I'm technically a red diaper baby, I've rejected all that baloney. I write **off-the-wall fiction**, and ***Righteous Seduction*** concerns next-generation game. My **blog** concerns "deplorable" politics, game, and my writing projects.

Become The Self-Sufficient And Self-Assured Man Who Feminists Love To Hate

May 18, 2018 | by Ernest Wiseman | Link | Original Link

The latest wave of modern feminism and identity politics has ushered in a new level of intolerance towards men. Mainstream media and our increasingly effeminate culture continue to declare the masculine man an anachronism—an identity belonging to the men of a bygone era. Well, I say fuck that.

It's high time we reclaim our collective identity as masculine men, and one way to do that is by developing skills that require working with our hands. Doing so will make us more self-sufficient, and it will boost our self-assuredness during a time when our identities as men are under constant siege of the post-modern feminist machine.

The Pencil-Pushing Desk Jockey

Today’s men are not as strong nor as manually skilled as the generations that came before ours. There’s no denying that. And as the information age continues to usher in more desk jobs and usher out more manual labor jobs than ever before, it’s easy for us—an Army of pencil-pushing desk jockeys—to become complacent and let ourselves get swept up in the female-dominated culture that’s typical of today’s office workplace. Shit has to change.

The Flashback

A few years back, I sat at my work desk, and for a few brief seconds, I had a flashback to my former life as a soldier. I was sitting out in the field, leaning on my ruck, holding my rifle, and it felt good. It felt right.

Once the moment passed and I came back to reality, I felt strange sitting at that desk. I almost felt sad, like I was mourning the loss of the man as I used to be. I was having an identity crisis, and I knew shit had to change. I eventually decided to buy a project muscle car with the hopes that that would help me shake the cobwebs from my masculine identity.

Loading…

The Fox Body

I got a great deal on a Fox Body 5.0 Mustang and was stoked thinking about how badass it would be to drive to work in that thing. It made me smile imagining the uptight women in my office grimacing at the sound of a muscle car pulling up to our building.

I soon realized, however, that pissing-off those stupid bitches would have to wait. There was a major issue with the car, which the dickhole who sold it to me—a self-proclaimed Mustang expert—"forgot" to mention. The car would intermittently crap out during city driving, and instead of rising to the challenge and figuring out the problem—something I'd expect any self-proclaimed Mustang expert to do—the guy made it my problem.

At the time, I knew next to nothing about cars, but I had bought it as a project and was committed to it, so I had no other option than to figure shit out and learn as I went.

Fast-forward nine months and hundreds of hours worth of trial and error into the future, and I had that sumbitch ripping up down the street like a raped ape, as it still does to this day. Was it frustrating as fuck having to dick with the thing for that long? Shit yes, it was. Was it a gigantic pain in the ass having to constantly google shit to know what the fuck I was doing? Absolutely. Was it a huge waste of time fixing it myself? Not in the least.

I went into it knowing I knew jack shit about fixing cars, but I walked away from it with more than technical knowledge acquired; I walked away as a more self-sufficient, more self-assured man. And while I certainly felt like a better man for having accomplished something cool and manly, the fixing part wasn't the pivotal moment in the experience. Nope. The pivotal moment was the moment I bought the car because that's when I committed myself to becoming that more self-sufficient, more self-assured man I knew I could be. I just didn't realize at that time that I'd be taken on a nine-month journey through 5.0 Mustang hell and back to get where I was trying to go.

The First Step: Do Something

I fear that thanks to feminist efforts to turn us into the submissive self-hating lapdogs they desperately want us to be, we are losing sight of the importance of retaining our self-sufficiency and self-assuredness as men. There's never been a more important time to buck the feminist movement than now, so take the first step and do something that will commit you to becoming the type of men feminists love to hate. And once you start acquiring those skills and feeling invigorated with renewed manly self-assuredness, go rub that shit in their stupid grimacing feminist faces.

9 Methods To Heal A Damaged Back And Keep It Strong

May 20, 2018 | by Jean-Batave Poqueliche | Link | Original Link

Believe it or not, it is due to a back injury that I discovered Return Of Kings. Being bedridden and with some time on my hands, I was looking up articles on baking soda when I came across it and the rest is history. Always look on the bright side, as they say.

I will now share my experience so you avoid ending up like me.

What not to do

My first back injury came in the form of a herniated disc in my teens. I got infiltrations and the surgeon recommended total rest and minimal effort. My muscles shrank and it did not help.

Only when I came back to grappling, despite the surgeon's advice, did the pain go away. Doctors have since then changed their mind and exhort people to be active now.

The second episode was severe enough to threaten my ability to walk again. I took my chances and chose surgery. I fully recovered but only by taking it day by day and pacing my effort.

The injuries occurred when:

- I moved a weight that was too heavy, even if I knew I was exhausted
- I only swung the weight using my back, in rotation and above my shoulder
- I did not brace my back
- The second time, I did a violent effort after a month of inactivity

I was given a second chance by something above and swore that I would do everything it takes to prevent it from happening again. Here are some exercises I do to maintain the health of my back…

1. Simple pull-ups/rope climbing/GI pull ups

They are excellent exercises for the lats as the back is kept straight and the muscles contracted. I strongly recommend them. You can do them almost everywhere. As soon as they get easier, you can try performing weighted pull-ups.

GI pull up

Rope climbing and GI pull-ups develop your wrists and grip in addition to the other muscles recruited.

2. Deadlift

I avoided this exercise for a while. It sounded counter-productive after a serious back injury but it actually helped me. My posture also improved.

I studied a lot of videos and diagrams to break down the motion. Slowly, I understood how it worked and I improved my technique, pacing myself and starting with light weight.

I cannot stress enough the importance of proper form. Memorise the infographics, watch videos about the exercise, start light and be patient.

I worked my way up to pounds lbs for reps. I never did deadlifts until two months ago. I am still learning but it is something I would have never imagined being able to do one day.

3. Hyper extension

They are perhaps the best exercise for the erector spinae. I was only doing them once in a while but they became a staple in my workouts. The champion Sarychev did an excellent video about it:

I work out every other day using a Roman chair and do three or fours series of hyper extension after **every** workout, no matter how light.

If they get too easy, you can perform them with a plate or holding the extensions for three seconds at the top of each rep. There are a lot of variations out there.

Remember his words

4.Rows (Pendlay or T-bar)

The spine remains static during both exercises while the back muscles are recruited, the

vertebraes are guarded and the hamstrings locked. The Pendlay row has my vote as you put down the bar between each rep, relieving the tension on the spine.

T bar row

The problem of the bent row is that the fatigue accumulated with reps and the continuous weight pressure might make you complete the last reps with the momentum and the lower back instead of the arms, a risky manoeuvre.

Loading…

Bent row

I dropped that exercise from my routine all together.

5. Back bridges (moderate use)

The back bridge (using your hands) should be used rather than a wrestler's bridge. I use neck bridges with caution and always while remaining static. Rolling back and forth tends to put unnecessary pressure on the cervical discs.

It is important to bridge but grapplers know that the movement to get rid of an opponent in mounted position or scarf hold is to roll him towards your shoulder in a diagonal movement. Leg, back, and shoulder muscles are the main ones recruited. The trapezius only accounts for about 10% of the muscular strength in the whole movement.

6. Post workout: isolated back stretching

Stretching might be as important as exercise for one's back. Some of the best ones are the back roll, taking your time and rolling back vertebrae after vertebrae and the one I call the "Jesus stretch", where you lie down with extended arms before bending you knee and changing sides while keeping both shoulders on the floor. I use them after every training sessions.

I have never focused too much on the topic of the foam roller, but considering the improvement and the sensation I felt using it on my lower back and hamstrings, I would recommend it.

7. Swiss ball

I now use a Swiss ball instead of a chair. After long hours on an office chair at a desk (like me), people will tend to slouch forward and get used to a terrible posture.

The gym ball rolls constantly, which unconsciously forces you to keep a straight spine and flexible hips.

8. Chopping wood

Manual labour, when it allows rest periods and using proper form, helps develop a muscular back. The winter was cold for us and between the outdoor camps and open fire cooking, I was splitting wood quite often.

I always do it with my legs slightly bent and spread. The exercise tends to be short-lived if

you are not focused and let the axe slip and hit your shin with it.

I also discovered a new way to save energy while doing it.

9. Grappling sports (Wrestling/BJJ/Judo/Sambo)

For numerous reasons, I recommend everyone to train martial arts. An additional one is that those involving grappling will help you develop a stronger back quickly.

When you push and pull the opponent while standing, by the gi or his neck and arms like in wrestling, the effort is intense while the risk of injury is minimal as the motion range is fairly small. Wrestling on the beach with friends instead of lying there all day is also a great hobby during summer days.

You can't beat resistance training against another living machine. A never-ending, progressive training that can even be enjoyed at an advanced age.

Quelques conseils pour finir

Remember this…

- A saying in sports goes: "Take care of your back, you only get one of these".
- Always warm up, even before minor effort where the back is involved and always stretch afterwards.
- Avoid movements that involve a swift motion with heavy weights in rotation.
- Keep an eye out for bad form due to exhaustion.
- Do not use momentum instead of muscular strength.
- Brace your core and back before every rep.
- Pace yourself after a period of inactivity.
- The key to relieve back pain is not total rest but progressive motion and stretching.
- Pain caused by the early signs of sciatica or an articulation issue is radically different from "positive" muscle soreness from an intense workout. Learn to tell them apart.
- Your body will send you warning signs. If you notice them, stop and save yourself for the next workout.
- Always start with lighter weight than what you think you can lift.

I focus now on very slow but constant progress. I learned the hard way. Don't be like me.

The Argument Against Absolute Free Trade

May 20, 2018 | by James Absalon | Link | Original Link

Free trade has undeniably improved the material condition of humans. Lower barriers to trade, along with improved technological efficiency and global supply chains, fuel a robust international economy, and have accounted for untold economic growth since the end of the Second World War.

Coupled with widespread globalization and a frosty cosmopolitanism, however, free trade has reduced those humans to faceless economic inputs, cogs in a massive, borderless machine. In such a system, are increased efficiency and cheaper knick-knacks worth the toll on national unity and spiritual growth?

The 21st century will be one in which nations will struggle increasingly with this question. If the concept of the "nation-state" is to endure, societies that wish to maintain their traditional identities will have to pursue a measure of economic nationalism to preserve their borders, languages, and cultures.

Free trade—or at least trade with very low-level tariffs—offers the fastest route to growth for many nations, but for those that wish to maintain their industrial—and moral—cores, a degree of protectionism is prudent and necessary. High protective tariffs, focused on key industries like steel, and targeted skillfully toward unfair trading partners, protect a nation's working men, ensuring a stable social order, and safeguarding a country's vital national security interests.

Targeted Protectionism Benefits American Workers

Since the disastrous Smooth-Hawley Tariff of 1930 (and the resulting retaliatory tariffs that contracted the global economy further in the dark days of the Depression), both major political parties in the United States have eschewed protective tariffs. A cornerstone of Republican economic policy dating back to Lincoln (and to Henry Clay of the Whigs before him), tariffs lost political and economic cache to the free-trade advocates of Bretton Woods. That order fueled a major post-war economic expansion in the United States and the world, but also left many Americans in the dust.

President Trump has brought the old argument over tariffs back to the forefront. While running for the presidency, then-candidate Donald Trump often spoke of the "hollowing out" of America's industrial heartland, as good wages fled abroad. While it is only natural for large companies to maximize their profitability, the moral toll of shipping jobs overseas has been devastating.

Men who once could support themselves and their families on factory wages found themselves struggling to adapt to a rapidly changing economy. Entire communities sank into economic and moral privation, or disappeared. Coupled with the influx of low-paid illegal immigrants, American workers lost jobs or wages, and national wealth fled abroad.

To an extent, such disruption is the price to pay for new technology and better efficiency. Surely, many Americans have benefitted from cheaper consumer goods. But efficiency is a soulless god. Could we not pay a few more dollars or cents for a washing machine, if it means keeping Americans employed and their families fed?

Some will argue that economics operates independently of national borders. True, comparative advantage of the David Ricardo and Adam Smith school of economic philosophy does benefit trading nations, but only if such trade is *fair*. American trade with Britain, for example, is trade between two nations with relatively similar legal and economic frameworks that ensure and enforce certain quality and labor standards. As such, grommets traded for widgets between those countries should be both free and fair.

Loading...

American trade with China and the Third World, on the other hand, is a far more uneven prospect. How can American workers compete with near-slave labor in China or other Third World nations? Perhaps American workers enjoy overly indulgent labor protections, but a nation of free workingmen that must compete with poorly paid child labor will never enjoy a fair, even footing.

A man who understood that a good wage is key to a good life.

Historical Parallel – Lincoln and Slavery

This situation was the root of Abraham Lincoln's objection to slavery: while Lincoln came to abhor the institution for its own social ills, he and other members of the young Republican Party primarily opposed slavery because of its deleterious effect on the wages of free workingmen. Why pay a man a living wage when one could force a slave to work for nothing?

Further, the "wage-slave" of Northern factories—factories that were quite brutal compared to the free-labor of preindustrial America—had the prospect of earning his way to economic freedom, just as a young Lincoln had liberated himself from drudgery through work and education.

With slavery, at least, the United States could address the situation domestically, albeit violently. How do we force Third World nations to give up slave or child labor?

The only plausible answer, at least in the short-term, is through trade protectionism. The United States remains the largest economy in the world—and, thanks to Trump, one that is growing rapidly once again. The sheer economic hegemony of the United States allows it to gain immensely from the judicious use of targeted protectionism.

The proposition is simple—if you want to do business with the United States on equal footing, stop putting the screws to our workers and to your own.

The Paradox of Free Trade

Aside from America's ability to throw its weight in the global economy, there exists a moral hazard to the full-scale worship of efficiency for its own sake.

A key paradox of overly-rapid economic expansion is that material excess breeds social and cultural decadence. As the fight for survival morphs gradually into the fight for the next iPhone, the inherent virtue instilled in men through a struggle against Nature is, at least partially, lost. This faded virtue—a turning toward the excessive indulgence of men's vices—is at the crux of my argument that a "New Homestead Act" would prompt the rise of a more virtuous, masculine civil society. Striving against Nature and toward something greater than themselves and their material realm is crucial for men.

Similarly, focused protectionism could provide the economic framework in which men could sustain themselves and their families productively, while also preserving those communities ravaged by globalization's insatiable appetite for efficiency. A nation is more than an economy; it is a collection of people bound together by shared history, common values, and stable institutions.

Conclusion

In driving through my beloved rural South, I frequently come across small towns that cling uncertainly to life since the mills left for Mexico or Vietnam. Perhaps these towns could innovate to attract new industry or tourism dollars, but their worn facades and decrepit main streets speak to the devastation of putting sheer efficiency ahead of human life.

While I am, ultimately, an advocate for freer trade (non-scientifically, I would say I am 85% a free trader, 15% a protectionist), Trump's ascension has caused many Americans

to reexamine the long-held orthodoxy that free trade is an unalloyed good. The globalists' worship of efficiency-at-all-costs has gutted American communities and deprived workingmen of, to quote Gavin McInness, their "economic libido."

We need not abandon free trade entirely—nor would we want to do so—but targeted protective tariffs, designed to protect key industries related to national security, are a prudent step toward ensuring a fairer, freer world, and a more prosperous United States.

James Absalon
James "Bishop" Absalon is here to make his humble contribution to the ongoing battle for the soul of Western Civilization as the Culture Wars rage on. In a world of cultural madness and decay, good men and women must reassert traditional values. Christianity, liberty, and nationalism must--and can--be restored.

15 Photos Of Women Who Made Themselves Ugly By Working Out Too Much

May 21, 2018 | by Jared Trueheart | Link | Original Link

A couple weeks ago I wrote an article about ways women make themselves more masculine. It occurred to me after I wrote that article that I missed one of the worst ways women make themselves more manly: ridiculous physical strength.

I'm not talking about healthy women. Women should have some strength. It is necessary for traditionally feminine roles (you'd be surprised how much strength you need to care for children). But so many women today are going well beyond the strength they need to be good at what they should do. When you consider also that being too strong makes women unattractive, it becomes obvious that all their strength-building is done for a sick sense of vanity. Or perhaps penis envy. You decide.

That's not to say fit women aren't attractive. On the contrary, fit women are the most attractive. The women I'm referring to take their workouts/athleticism/muscle-building/fat-burning to extreme levels. These images will demonstrate just how ugly women's pursuits to be physically manly makes them.

1. There's a lot to not like here, but the neck is what really gets me.

2. I'd be genuinely frightened if she offered me a good ol' fashioned

3. Is there anything more selfish, vain, or disgusting than a woman risking the health of her unborn child just to keep her clean-and-jerk up?

4. At least she has nice hair

5. What machine works the neck like that?

6. So this is what happened to Chong Li after Bloodsport

Loading...

7. It’s not just strength training that makes women unattractive. This woman is clearly damaging for no legitimate reason.

8. Is the “virgin” on her shirt a sponsor or a label because I can’t see many men being physically attracted to her?

9. I see nothing feminine here

10. From pretty to untouchable in what, three rounds?

11. I really do not want to see the front

12. She should’ve stopped in 2013

13. If you couldn’t see any of their faces you’d think this Seal Team 6

14. I’d bet all three have chest hair

15. I’m only assuming they’re women because of their outfits

Again, fit women are the most beautiful. You don’t get a body like this without being fit:

But the women featured above took their fitness to obsessive, self-destructive levels. They wanted to be more like men, and unfortunately, they got what they asked for.

For more from Jared Trueheart on the roles of men and women in literature and film check out his writing at Legends of Men.

What Is The Tao?

May 21, 2018 | by Roosh Valizadeh | Link | Original Link

I've previously reviewed Osho's When The Shoe Fits, but this book may actually serve as a better reading for complete beginners to Tao since it's more introductory in nature. However, it does lack the parables that make it as interesting as When The Shoe Fits.

> Buddha has walked, Lao Tzu has walked, Jesus has walked, but those ways are not going to help you because you are not Jesus, and you are not Lao Tzu, and you are not Lieh Tzu. You are you, a unique individual. Only by walking, only by living your life, will you find the way.

When you study another man, you are studying his path, and what is unique to him. When you read my game work, and all the pickup lines I've used, you feel empowered with the knowledge, but until you use those lines yourself, you won't have experienced game. A baby can watch his parents walk for months, but the first step he takes will still cause him to fall over.

> Christianity, Hinduism, Mohammedanism, are superhighways; you need not risk anything, you simply follow the crowd, you go with the mob. With Tao you have to go alone, you have to be alone.

Religions are useful in that they hand you an already cooked meal of morality and rules that will likely be enough for you to lead a productive life, but their one-size-fits-all approach does clash with the modern notions of individualism that encourage us to be

our own Gods, which is why so few today are truly religious.

> …ignorance is not the barrier against truth—knowledge is the barrier.

All the knowledge you have jammed in your brain causes your ego to exclude experience that conflicts with what you think you know. The more knowledge you have, the more you live a filtered experience of neverending cycles of confirmation bias, all because your ego doesn't want to ever have to admit it's wrong or that the time and energy spent educating yourself was a waste. This is why taking the red pill is impossible for some people, because it would force the person to admit that they have believed in the wrong ideas for the bulk of their lives, and that much of their college education was useless.

> Thinking cannot deliver truth. Truth is an experience, and the experience happens only when thinking is no longer there.

All the truth I've realized in my life has come from direct experience. I can read a book where a man explains the truth to me, but unless I have experience that led me to believing that truth, I will not believe it with conviction.

> Thinking is dreaming with words, dreaming is thinking with pictures—that's the only difference. Dreaming is a primitive way of thinking, and thinking is a more evolved way of dreaming—more civilized, more cultured, more intellectual, but it is the same—only the pictures have been replaced by words. And, in a way, because pictures have been replaced by words, it has gone even farther away from reality, because reality is closer to pictures than to words.

Thinking is seen as a negative process in Tao because it's shaped and controlled by the ego, which is a self-protection mechanism that doesn't want to see reality as it is. The more you think, the more your ego is guiding you into a pre-determined safe space that will not conflict with your existing knowledge and past experience.

> The more you have of this world, the less you have of happiness, because the more you have of this world, the stronger becomes your ego, the more strengthened is your ego, more crystallized—hence unhappiness.

Material possessions drain your happiness because you now have to expend energy, time, and work into keeping and maintaining them, on top of new fears of losing them. I thought that as I saved more money over the years, I would be less fearful of entering poverty, but that didn't happen because I became anxious of vague economic forces and black swan events that may take my money away. The anxiety was of a different nature, but the absolute amount of the anxiety remained the same. The only person who is not anxious at all of poverty is the man already deep in it, and who has no possessions of his own.

> Drop your intellect, and you will not lose anything. Carry your intellect with yourself, and you will lose all. Drop your intellect, and you will lose only your imprisonment, your falsity. Drop your intellect, and suddenly your consciousness

> will soar high, will be on its wings… and you can go to the very south, to the open seas where you belong. Intellect is the burden on man.
>
> […]
>
> Begin with ignorance, and some day you may be fortunate enough to know. Begin with knowledge, and this is certain: that you will never be able to know.

But if I drop my intellect, how will I contribute to mankind? How will I help man fly to Mars? How will I solve the intricate problems of modern society? How will I make more money to accumulate greater material possessions? These are all questions demanded by the ego. Observe low IQ people and you will see that lacking intelligence is not a hindrance to their life, and in some cases, they are able to experience reality more fully because they lack rules, principles, and expectations that constrain their more intelligent counterparts.

> Only an inferior person thinks in terms of superiority. A real person, an authentic person, is neither superior nor inferior. He simply is— unique; nobody is lower than him and nobody is higher than him.

Most of your social behavior has an aim of showing yourself as superior, in the most subtle of ways. For example, helping other people is a way for you to show your superiority, especially when it is done publicly. You want others to see how generous and kind you are, and for them to commend you. This gets out of control in the case of virtue signalling, where people show how "kind" they are to third-world foreigners in a way that actively harms their neighbor's safety or economic well-being.

> A comparative happiness is a pseudohappiness. "I have a big car and you don't have. Because you don't have, I am happy." This is something foolish. How can I be happy because you don't have a car? What has it to do with my happiness that you don't have a car? "I have a big house and you don't have a big house, so I am happy." This happiness seems more interested in making others unhappy rather than in being happy oneself. "You don't have a car, you don't have a good house— I am happy because you are miserable." Look at the logic of it, the mathematics is simple: "I am happy when people are miserable, so if people are more miserable, I will be more happy; if the whole world is turned into hell, I will be supremely happy." This is the logic, and this is what man has been doing.
>
> […]
>
> Comparison is the root cause of misery. To be noncomparative—to be neither higher nor lower, just to be yourself, not to think in relation to others, just to think in terms of your tremendous aloneness—then you are happy.

Many times we compare ourselves to those more fortunate, and it leads to insecurity. Then we see a crippled man on the street and we feel better, because we realize we are not as bad off as others. And then we see a rich man in a Ferrari, and again we feel insecure. We derive our entire self-worth through external comparison that has an end

result of wanting everyone else to be less fortunate than ourselves. This method of comparison has actually been institutionalized in many countries, such as the Scandinavian Jante Law, which aims to push down others who are succeeding in life.

> Contentment comes only when you are not comparing, when you are simply within yourself, totally in yourself—centered, rooted. And by being in your being, you suddenly realize that the whole is yours, and you are of the whole; you are not separate. The ego has disappeared, you have become universal. In that moment, there is great contentment, great benediction. But that benediction, that contentment, does not come through rationalization; it comes through realization—that is the difference. Consolation is a rationalization, contentment is a realization.

How does contentment come about? Through accepting reality as it is, without filters put in place by your ego and society, and that existence alone, of simply being alive, is the point of life. You are breathing right now, and you are conscious; congratulations, you have achieved an incredible feat in this vast universe. Nothing more is needed besides satisfying your needs of survival, which if you're able to read this, I guarantee is being satisfied at a high level of material comfort.

> A man who is trying to "figure it out" is bound to fall into a tremendous trap and will not be able to come out of it easily. Once you start intellectualizing about life, you start going astray. Life has to be lived. Life has to be lived existentially and not intellectually. Intellect is not a bridge but a barrier.

The reason we develop theories to figure out life is because we want to minimize pain and suffering. Intellectual theories that explain what is happening right now can then be extended to predict what *will* happen, and if I know what will happen, I can steer around the difficulty and protect myself.

Thousands of men in Silicon Valley are developing artificial intelligence to take away any potential downside of life, but at the same time, they are removing any upside as well. The joyful surprises of love and friendship will be reduced to mathematical formulas and algorithms. You will know everything about a new lover before you meet her, you will know what diseases you'll get and when you'll get them, and you will be told what type of jobs or hobbies to perform without finding out on your own. You will even be told on which day you will die.

> That which is caused is never eternal, that which is caused is temporal. When the cause disappears, it will disappear; it is a by-product. That which is uncaused is going to be forever and forever, because there is nothing that can destroy it.

Uncaused is when you're "happy for no reason." You feel an energy coming from your spirit that is not based on a direct cause from your environment.

I commonly see uncaused happiness in people who are highly religious. They believe God is guiding them and their experiences. Even in the face of evil, they are calm and content.

Those who use stocism alone are not able to accept negative events as easily as the religious, since they apply a material logic to the nature of the world that can still lead them to the question of “Why me and not him?”

If your happiness is caused, keeping it simple is the best strategy, as I mentioned in my podcast on hedonic adaptation. If you climb the biggest mountain in the world, how can you be happy when visiting a little park? If you make love to the most beautiful girl in the world, how can you be happy with a girlfriend or wife who has flaws? The more experience and excitement you seek, the more you desensitize you to the little causes of happiness.

> An ambitious man will always regret. Alexander died sad, in great frustration, because ambition by its very nature is unfulfillable.
>
> […]
>
> Only a nonambitious person can be happy. An ambitious person is bound to be always frustrated.

The sum of pleasure you achieve through any gain must be equal to the sum of pain that is experienced through its loss. There is no other possibility in a universe where matter can neither be created nor destroyed. If you date a girl for one year, all the pleasure you received from her will be given back in pain when you break up. (Breaking up is so acute since the pain is experienced in a shorter time period than the pleasure gained.) Anything you buy right now will give you a pleasurable rush, which is given back in the debt or labor you have to pay for that object along with the pain experienced when it no longer gives you pleasure.

A question may arise: so why bother? Why even try anything? Why not go live in a cave and meditate for hours a day? Well, many people do! Taoists don’t recommend this approach because it’s the forced opposite of hedonistic ambition. They advocate for living according to your nature, without ego, though the interpretation of that can be subjective.

> But even if in the Old Testament you have two pages [of recognition], or twenty, or two hundred, what is the meaning of it? And as history grows bigger, those two pages will become smaller and smaller and smaller, and one day [you will become] just a footnote. And then when history will become even longer—and it is becoming longer every day— the footnotes will also disappear somewhere in the appendix, and by and by you are gone.
>
> Loading…

Tomorrow you may be remembered as a great man. Books will be written about you. Then you will be remembered in compilations with other men, and as history goes on, the words that describe you get smaller until you exist in name only. If you’re lucky, you will turn into a meme, like Hitler, or by pscyhoanalyzed for your faults in the future or suspected of being secretely gay, like Alexander, but none of that recognition can

compete to living in the present.

> …philosophy creates a screen of words and you cannot see the reality as it is. It distorts reality, it interprets reality, it gives a garb to reality, it hides reality, it covers reality.

Has philosophy ever been helpful? Outside of stoicism, I can't think of any philosophical work that has made much of a difference to the individual. Either that philosophy has been long dead, its realizations made impotent by the hands of time, or it was dropped into a vast sea of other ideas and philosophies, its effect neutered by new avalanches of work. Philosophy is great for the men who invent the philosophies, who are able to leave their mark and feel like they contributed something that can allow them to control the world from beyond the grave.

> …the moment you start asking, "What is truth?" your mind starts supplying words; it knows the answers. Those answers are all false, those answers are all borrowed, but it gives you beautiful answers. They satisfy you for a while, and if your inquiry is not great, they may satisfy you forever. Only a great inquirer sees the point that words are meaningless.

Analyzing an experience can only offer rationalizations that soothe your ego into maintaining its image of superiority.

> The rebellious person is one who does not bother about the society at all. He simply lives through his innermost core; he is one who follows his Tao. If society fits with that inner Tao, good, he goes with the society; he is not reactionary. If the society does not fit with his inner Tao, he goes alone. He is not a traditional, conventional, straight person. His criterion is his inner soul.

A man who is purely reactionary, who is attempting to fight the mainstream culture, is actually swimming with the culture, because his behavior is wholly determined by it, just as much—if not more—as someone who is for the culture. Counter-culture is yang to the culture's yin—they are inseparable. The clash between the culture and counter-culture breeds the synthesis that creates the culture of tomorrow.

> An untrue life is worse than a true death: a true death is better. An untrue happiness is worse than a true unhappiness— let this be remembered always. True tears are better than false smiles, because growth comes through being true. Growth never comes through falsity, and the ideal of gentleman is the ideal of the false man.

For many years I have put on the clown mask to engage in fornication with women. I've concealed, danced, and acted. The end result of those orgasms were only satisfying for a brief moment, because I had to put the mask back on as soon as the ejaculation was completed. When the pain of acting or fulfilling other people's expectations of you become greater than the pleasure received from keeping up with appearances, you are

beginning to listen to your true nature.

> …let there be a harmony in the contradictions within you, then you will reach to the highest point and the highest peak. Don't choose one, choose both together. Be courageous. Don't be miserly in choosing. When life gives you a paradox, choose the whole paradox; swallow it all and whole, and digest it completely and you will become a flying dragon.

For every personal conviction you have, there is the opposite lurking within. For many behaviors you have ever criticized, you have done it or are doing it, and within every person you despise, there is a part of you within them. Your ego wants to imagine itself as perfect, as flawless, but we are not perfect, both the good and bad exist within us, and that which we eagerly attack may be what we are composed of the most, because it's our ego's way of dealing with the inner contradiction.

> Lao Tzu is passing through a forest, and the forest is being cut. Thousands of carpenters are cutting the trees. Then he comes near a big tree—a very big tree, one thousand bullock carts can rest underneath it—and it is so green and beautiful. He sends his disciples to inquire of the carpenters why this tree has not been cut yet. And they say, "It is useless. You cannot make anything out of it. Furniture cannot be made, it cannot be used as fuel—it gives too much smoke. It is of no use; that's why we have not cut it." And Lao Tzu says to his disciples, "Learn from this tree. Become as useless as this tree, then nobody will cut you."
>
> […]
>
> Don't become a human commodity and nobody will be able to use you. And if nobody is able to use you, you will have a beautiful life of your own—independent, free, joyful. If nobody can use you, nobody can reduce you to a means. You will never be insulted, because in this life there is no greater insult than to become a means: somebody or other is going to use you—your body, your mind, your being.
>
> […]
>
> You feel very happy if people come and say, "When you are gone we will never be able to replace you." You feel tremendously happy, but what are they saying? They are saying, "You are a thing we are using."

Because I am useful to men, they will always make demands of me. "You are a good writer, Roosh, so why don't you write more articles?" "Make more Youtube videos and podcasts for me." "Your game advice needs updating." "I don't like how your beard is getting so long." "When are you going to do a happy hour?" And on and on. The second you become useful to someone, you enter a subservient role where the relationship can only be kept intact by continuing to provide usefulness.

> Life cannot have any purpose, because if life has any purpose then something will become more valuable than life, and again the question will arise: What is

> the purpose of that? If we say, “Life is to attain truth,” then truth becomes the real purpose. But then what is the purpose of truth? If we say, “Life is to seek God,” then the question arises: “What is the purpose of God, or of achieving God, or of realizing God?” In the end you have to drop the word purpose…

Until you can arrive at the conclusion of “This existence is the purpose, and the sole purpose,” you will enter a un-answerable chain of never-ending causality. The essence of being *is* the purpose.

> Hope is dressed-up desire. Be hopeless. Nothing is going to happen. Nothing ever happens. There is no future, so drop all ambition. Only this moment exists, so don’t rush hither and thither; it is pointless, it is neurotic, it is mad. Just relax in this moment, just be.

Some may interpret statements like this as nihilism, but there is a subtle difference. Nihilists believe existence has no purpose, nothing has value, and there is no objective truth. Taoists believe that existence is the purpose, and everything within that existence contains its own unique consciousness, energy, and place within the universe, because if something exists, it must be an important part of the universal whole, no matter how insignificant. Taoists also believe objective truth can be derived from nature itself.

> When the intellect claims, “I am the whole,” then there is trouble. When the intellect says, “I am just a part of a vast entity, of a huge entity, and I do my work— beyond that I don’t know what is going on,” then there is no problem.

The universe is the whole, and we are a small part within that universe, but are not separate from it, and this is proven through studies in quantum mechanics, like the double slit and the delayed choice experiments, which show that the conscious observer is a necessary part of determining how the universe is composed of in the present, and how it was composed of in the past. If you think of yourself as distinct from the universe, you will continually suffer when having its effects thrust upon you for seemingly no reason.

> Once logic claims, “I am the whole,” life becomes meaningless. Once somebody says, “Life is nothing but science,” then it is a reduction and everything is reduced to the lowest denominator. Then love is nothing but chemistry—a hormonal thing. Then everything can be reduced to the lowest, then the lotus is nothing but mud.

By reducing everything to a scientific theory, to a product of “evolution,” to explanations of “love is like eating chocolate,” we remove the joy from our existence. Then there is no soul, spirit, or truth, just a collection of atoms that are randomly hurtling through space and colliding with other atoms. Take it far enough and you may even conclude that suicide is rational.

> …if you are trying to improve yourself, you will try to improve others. Your own disease goes on overflowing onto others. Once you stop improving upon yourself, once you accept yourself as you are, unconditionally, with no grudge, with no complaint, once you start loving yourself as you are, all interference disappears.

Those who are most sick will attempt to make others as sick as them to normalize their sickness, to feel that they are not alone. A woman who is morbidly obese will teach others that beauty exists "at every size" so that she feels better about herself. A man who struggles in loving one woman will teach others to bang hundreds of girls around the world.

What a man tries to prove to you that he is, he is not, because what is does not require proof. What a man does not try to prove, he is, because he is so filled with the quality that he doesn't even notice, just like you have forgotten that you are breathing in this instance until I mentioned it.

> This is none of your business what others are doing. This should be one of the basic attitudes—not to think about what the other is doing. That is his life. If he decides to live it that way, that is his business. Who are you even to have an opinion about it? Even to have an opinion means that you are ready to interfere, you have already interfered.
>
> […]
>
> To have an opinion about you means that deep down somewhere I want to manipulate you. To have some opinion about you, this way or that, means that I have a deep desire to be powerful over people.

How about if a man is trying to kill others? How about if he wants to molest children? How about if he wants to promote homosexual families over heterosexual families? At what point do we actively try to control and impose our will for the health of society?

The problem with believing that there are standards to uphold is that you will inevitably enter a logic where you can justify killing 100 people if you believe that it will save 1 million, or you will kill one man if you know it will prevent the rape of 100 children. This logic will then find it justifiable to start wars and torture others with ideas that are different from yours, all to stop an evil that may very well be objectively based. Imposing standards or morals upon someone is the beginning of a path to killing, so the hard question is asking which standards are worth imposing upon others, because any imposition—at its core—is a concealed form of violence.

Ultimately, Osho and other Taoists believe you should live passively in the "feminine" to allow life to merely happen to you. Taoists stand against living life as the masculine, as an aggressive ego that is trying to impose your will and standards upon others to receive fleeting worldly benefits, but don't confuse the Taoist use of feminine and masculine with the modern definitions concerning individual behavior. There is no Taoist that advises a man to act like a woman or change his sex and become one, because that would be going against his nature.

Ironically, the modern woman acts in a more masculine manner than men according to the Tao, because they are aggressive in seeking status and fame while pursuing material excess. Even the ego of a woman is higher than that of a man, because a woman is unable to ever admit she is wrong or to accept rejection, things that men are far more capable of doing.

Gender revelations aside, I highly recommend this book by Osho. Him and Alan Watts have done a lot to relieve the angst of my existence, and I have found more value in the Tao than other philosophies I have studied.

Al Sharpton: Prince Harry Marrying Divorcee Megan Markle Proves White Male Supremacy Is Dying

May 21, 2018 | by News Syndicator | Link | Original Link

Via Breitbart:

The Reverend Al Sharpton has claimed that the Royal Wedding of Prince Harry, Duke of Sussex and the mixed-race actress Meghan Markle is evidence that white supremacy is "on its last breath."

Sharpton made the remarks while speaking at his weekly National Action Network rally Saturday in Harlem as the Royal Wedding took place.

"When you got little white girls in Wales saying, 'I want to be like Meghan,' there's a shift worldwide that white male supremacy is on its last breath," Sharpton said.

He went on to suggest that now many young girls look up to successful black women, a fact he says is concerning to many white parents, and a fear that he says was exploited by President Donald J. Trump.

“When you have little white girls in Arkansas look up and say, ‘I want to be beautiful and smart like Michelle Obama,” he continued. “I want to dress like the Obama girls (Sasha and Malia),’ that’s where that white supremacy is questioned. White parents in their living room say, ‘We’ve got to do something.’ That’s what Trump played on.”

The 63-year-old civil rights activist added that many white supremacists are “losing their minds” as black people continue to improve their lives in modern America.

Loading…

“They’re losing their minds because the world is passing away where they are the standard,” he added. “Where they decide what is beauty, where they decide what is of intellectual depth.”

Markle, however, has previously described scrutiny of her background and ethnicity as “disheartening,” adding that she would prefer people to see her for who she is.

“You know it’s it’s a shame that that is the climate in this world to focus that much on that or that that would be discriminatory in that sense but I think you know at the end of the day I’m really just proud of who I am and where I come from, and we have never put any focus on that,” she said in an interview with the BBC last year.

5 Ways Men Make Themselves Feminine

May 22, 2018 | by Jared Trueheart | Link | Original Link

It seems pretty obvious to red pill men that women are increasingly taking on more traditionally masculine sex roles. They delay having children to climb the corporate ladder. They delay marriage to be promiscuous. But while women are behaving more like traditional men, men are behaving more like traditional women. Here are five ways they do that.

1. Spending Too Much Time On Their Appearance

It is masculine, and therefore good, to be strong. That's undeniable. But how many guys are working out to be stronger and how many are working out to have six-pack abs? There comes a point where a man is not dieting and exercising to be more fit or more able to do physical activities.

At a certain point, usually around the time they start measuring their chicken breasts to help define their abs, they are only feeding their own vanity. Six-pack abs are not functional. In fact, most athletes do not even attempt to define their abs because it would inhibit their performance.

Similarly, men spend way too much time doing their hair before they go out or shopping for trendy clothes. Men used to spend some time on their appearance, but nothing like they do today. Men used to wait for their date downstairs while she would shout from the bathroom, "I'll be down in a minute." Twenty minutes later she'd come downstairs looking great. Now men are the ones spending so much time on their appearance hoping to attract a date.

And while you might try to justify that by saying it gets you laid, I refer to the next way men feminize themselves;

2. Obsessing About the Opposite Sex

Men today spend way too much time trying to attract the opposite sex. For some, sex has

become an obsession. Those guys who get ripped *do* get more fast sex with sluts. Check out this meme recently featured in a very entertaining article.

Yeah, men with six packs will bang the sluts, but look at how much time, effort, and willpower went into getting those abs. All those reps and all that dieting, for what? To bone some hoes and get a fleeting ego boost. Think of the opportunity cost of all those hours at the gym and all that effort on the diet.

Men used to just focus on being great men. Great women were attracted to great men. Those women would work on their appearance just to get a date with the great men, then they'd lay on the charm. A woman would laugh at a man's bad jokes and pretend to care about football or work just to have a good date. Now it's the men who spend hours looking pretty and have to pretend to like women's jokes and pretend to care what girls think about politics just so they won't pull out their phones on dates.

Great men used to be chased. Now potentially great men spend too much energy chasing women.

3. Soy Lifestyle

Men are becoming more feminine even on the biological level. Yes, I'm talking about testosterone. I won't rehash good articles (like this one). Instead, I'll just say that the fact of men's lowering testosterone levels is probably a major contributor to any and all ways men take on more traditionally feminine roles.

Loading...

4. Beta Orbiting

Beta orbiting is downright girly. Have you ever seen a movie in which the popular girl walks around high school with all her uglier friends trailing behind? Beta orbiters are like those uglier girls. They want something from the pretty, popular girl but don’t have the balls to go for it directly. Nor do they have the confidence to pursue what they want without a handout. So they hang around the pretty, popular girl hoping that she will offer

what the others want.

Men do this hoping the girl will offer up sex. Of course, that doesn't happen. Men aren't supposed to have enough free time to orbit a girl who's just a friend. They're supposed to be producing or bettering themselves. All that time spent orbiting a girl who wants to be just friends could be spent facing fears, getting rejected by women and realizing it's not the end of the world. Then after going back to the drawing board and bettering themselves they could hold their heads high like men.

Instead, beta orbiters keep their faces down like they're shy adolescent girls.

5. Embracing Consumer Culture

Men always have been and always will be producers. The key difference in sex roles is that men have the role of protectors and producers while women, children, and the elderly are consumers. Men still hold the protector roles but the producer role is up in the air. This is partly because women have decided to climb the corporate ladder but also because men have embraced consumer culture.

Look at how proud he is about his purchase

The men of today take way too much pride in having the latest gadget or a home theater system or getting a seat at some trendy tapas restaurant. Sixty years ago a woman would come back from the store and tell her husband, "Look what I got." He'd look at it and say, "Why do you need that?" And she'd reply something like, "Because it goes this my earrings." He'd roll his eyes and she'd walk away.

Now women show what they bought to their girlfriends who shout, "Ahhh I love it! You're going to look so cute." Conversely, men show some shirt they bought to their friends who say something like, "Bruh, you're going to smash in that."

Whereas traditional men bought something to signal their status to other men, today's men buy stuff to help them get laid. Not only is that more traditionally feminine for the reasons stated above, it also makes them take way too much pride in being good shoppers when it works. Men aren't supposed to be proud of how they consume, they're supposed to take pride in how much they produce.

The larger trend is that men are defining themselves by how they perform with the opposite sex. That is precisely how traditional women defined themselves.

What Is Your True Identity?

May 22, 2018 | by Ernest Wiseman | Link | Original Link

One thing men commonly have trouble with is self-doubt, particularly as it pertains to game. They struggle to work up the nerve to talk with women and wonder if it’s possible to ditch that noise and develop greater self-confidence in its place. The answer is yes, with mindfulness and conscious effort, it’s certainly possible.

The first thing to be mindful of is that anything having to do with self also has to do with identity, and that’s what this article is about. The extent to which you can increase your self-confidence depends on how much you allow your true identity—the foundation of self-confidence—be influenced by your false identity, which is the basis for self-consciousness.

What is true identity?

True identity refers to how you see yourself independent of how you believe others see you. It’s how you would see yourself if you lived in the forest in complete solitude apart from the rest of civilization. It’s extremely important to develop and maintain a strong true identity because it’s the foundation upon which you develop the aspects of “self” that make you resilient to others’ negative feedback, e.g., self-confidence, self-assuredness, self-esteem, self-efficacy, etc.

What is false identity?

False identity, on the other hand, refers to how you see yourself based on the vibes you pick up from others. It represents a constant threat to your true identity because it puts your self-worth at the mercy of others. Left unchecked, other people's negative feedback can make you feel self-conscious. You begin to question what you think of yourself, and this fucks with your self-confidence.

Identities interact

The level of confidence you carry into a given interaction with a woman depends heavily on the extent to which you allowed past setbacks of your false identity erode your true identity in the present. Some men seem like they are naturally more sensitive to these past setbacks, compared to others.

Take my old Army buddy, “Malone,” for example. Malone was a 6’6” self-assured badass “nerves of steel”-type motherfucker as an Airborne Ranger, but when it came to spittin’ game at a chick—even just a 5 or 6—he was about as smooth as a one-legged cat trying to bury a turd in a frozen pond. It was embarrassing for him, for the girl, for me, and for any other bystanders forced to bear witness to that shitshow.

Loading…

Despite what those witnesses probably thought, Malone was not a retarded person suffering from cerebral palsy and a speech impediment. Nope. Malone’s problem was that he had faced a few rejections in the past, and he let that shit get in his head. He internalized those girls’ negative feedback and became self-conscious. This, in turn, compromised his self-worth in terms of mate value and fucked his confidence with women well into the future.

How a man sees himself—his true identity—will always be affected by the feedback he picks up from others to some degree, but the key to preserving self-confidence is to mentally quarantine the negative shit before it makes you feel self-conscious. If Malone had been aware that those girls’ feedback was not a direct indication of his mate value, he wouldn’t have automatically owned it as part of his true identity. As such, his self-confidence wouldn’t have been compromised, and he would have had much better game with women in the future.

Conclusion

A man who has a weak true identity lives in a state of uncertainty. He's not sure who he is, and he bases his self-worth on a false identity cobbled together from information he gleans from everyone else. That's a vulnerable head space to live in, and instead of taking risks, his mindset is to avoid risks at all costs. The last thing he wants is for a woman to crush his self-worth by rejecting him.

A man who has a strong true identity determines his own self-worth for the most part. He's not immune to negative feedback from others—nobody ever is—he just doesn't let it overwhelm him to the point of feeling self-conscious. That's what preserves his self-confidence into the future. Unlike Malone, "having something to lose," isn't even on his radar. He focuses on what he has to gain and deals with rejection in stride.

Now that you know what to be mindful of, it's time to take on step two: Do something. You can sit here being mindful of shit all the live-long day, but until you get your ass out there and do something, your game will not improve. Keep in mind that if you're actually out there doing something, you will most definitely be on the receiving end of negative feedback, i.e., rejection. That's just how the world works. Just don't be like Malone. Remember that those skanks' incorrect opinions of your worthiness mean nothing about who you are as a man… that is, not unless you decide they do.

Homosexual “Bugchasers” Actively Seek HIV Infection

May 22, 2018 | by Beau Albrecht | Link | Original Link

Since the 1990s, the mass media and liberal opinion have refused to portray the GLBT community as anything but wonderful. Unfortunately, writing a moral blank check has consequences. Overwrought compassion can be deadly.

This limitless tolerance passively enables negative behaviors. One is bugchasing—deliberately seeking HIV infection, sometimes by enthusiastic “gift givers”. It’s a fringe gay practice, but why it’s a practice at all is bewildering. They of all people should know to avoid it like the plague.

How prevalent is this?

This one actually is pretty tame.

Some might consider it exceedingly rare, or even disbelieve that this happens. Unfortunately, it's real. Like all things bizarre, there's a Tumblr account for that. One Twitter user calls himself "Bug Chasing Teen", apparently also a fan of hard drugs. *(Warning: both have disturbing images.)* Bugchasing dating sites exist too. A much more sensible gay guy related the following:

> I have recently come into contact with a number of people on Grindr and Scruff who have been asking me to *"poz"* them. My reactions have ranged from disgust, anger, hurt, and confusion and I've either hastily blocked the person, or sent a harshly worded reply. But recently I took myself out of my own head and decided to question the motives of a pretty persistent guy who had initially asked me to…

I won't traumatize you with the rest of that.

A *San Francisco Weekly* writer listed some personals relating–in language too graphic to repeat—the desire to get HIV or infect others. Researching this, he created a fake bugchasing profile on Grindr and struck out. However, he got over 100 messages on Bareback Real Time, including invitations to "conversion parties". Damn! How many straight guys looking for normal stuff get *even half* that much attention on dating apps?

Bugchasing seems another of countless nonsensical fetishes, once hardly imaginable until the Internet both proved they existed and became a breeding ground. However, the consequences obviously are worse than other bizarre kinks such as (for instance) tentacle porn. Nobody *really* knows how many people caught HIV deliberately, or are currently seeking to get infected, or to infect others.

Motivations

What's more incomprehensible is why anyone would want HIV. Reasons may include:

- A rite of passage into the gay community
- No longer needing to practice safe sex, because they're already infected
- The thrill of risky behavior, like playing Russian Roulette for funsies
- Attention-seeking, similar to Munchhausen Syndrome
- Sex addiction
- Self-destructive tendencies
- Rejection of society's norms, basically rebellion for its own sake

Ultimately, those who delight in breaking the rules will find that the rules break them.

Some might create a genealogy for the illness—who pozzed him, who infected the last guy, etc.—rather like a family tree. Terminology such as "impregnation" and "breeding" is also telling. If they're seeking family life, isn't that what gay marriage and gay adoption were for? It's rather strange—homosexual advocacy has been promoted since 1950, but now that they have widespread acceptance, things have become more neurotic than ever.

A closer look reveals varying levels of commitment. Some actively desire to catch/spread HIV. Others are oblivious if they do so. Some consider it fun to think about, but sensibly don't actually participate. The rest have an unknown range of behavior. The worst are "gift givers" falsely claiming to be negative

Loading...
Such recklessness isn't unprecedented. Randy Shilts documented the AIDS epidemic's early days. Gaetan Dugas—once considered "Patient Zero"—stubbornly kept pozzing neg-holes (as they'd put it these days) even after being confronted with the facts. Otherwise, Shilts found much indifference and denial even in the gay community while the plague spread.

Furthermore, San Francisco bathhouse owners resisted mandates to post safe sex information. (It's strange that they didn't care if all their customers died.) When this was ineffective, they fought closure by the Health Department tooth and nail. The decision greatly was delayed by politicians not wanting to offend the "anything goes" crowd.

Nonsense upon stilts

New antiviral therapies (developed at great expense) have given some in the gay community a feeling that HIV is just a manageable disease. However, it's still incurable. Although some of the drugs are now generic, treatment costs are ruinous.

There are those who say people should be free to do whatever they want with their bodies. *Why not let idiots be idiots?* Like many libertarian arguments, it sounds great in the realm of pure theory, but the devil's in the details. The greatest challenge is actually *holding people to the consequences of their own choices*. In practice, when people do inherently risky things, society usually has to bail them out.

For example, a woman who gets herself pregnant from a hookup will be supported by welfare. Also, injured drunk drivers aren't denied medical care. Likewise, those who catch HIV will be able to get it treated, no matter how they got it. They might be insured, which increases everyone else's costs. If not, the fallback option is government healthcare. Otherwise, they'll simply show up in the ER whenever they get sick. One way or another, their mistakes are paid for by other people.

Many would regard it as inhumane not to help people even if they've made some mistakes. Actually, *all that worked surprisingly well*, back when society had better moral standards, and people exercised basic due diligence in running their own lives. However, deliberately getting infected with an incurable illness that's often fatal but completely preventable is one step too far. Trying to get sick goes far beyond membership in a high-risk group.

Silence is death

The truth isn't always politically correct.

Bugchasing and "gift giving" have been an observable trend since the 1990s. It's about time society stops passively condoning this. Although what they're doing is objectively degenerate, I'm not coldly indifferent. I really hate to see young guys making irreversible mistakes like this, catching an illness that sucks the life out of its victims slowly. They'll regret it profoundly as soon as they come to their senses, but by then it's too late.

This deadly practice must stop being one more dirty little secret of the gay community. Willful obliviousness by liberal opinion is a lousy form of compassion. Society should start taking a tougher line. In some jurisdictions, knowingly exposing someone to HIV already is a crime. This should be applied everywhere, and treated as an attempted murder. *That's what it is.*

Likewise, there should be laws addressing the other side of the equation too. Specifically, those self-identifying as bugchasers—or are demonstrated to have deliberately exposed themselves to the virus—should lose insurance benefits and public health services related to HIV treatment. They can go pay full price for their drug cocktails and other medical care, and eventually earn a Darwin award on their own dime.

Likely this won't catch too many people, since many of them go by online screen names. ("Bug Chasing Teen" didn't provide his real name, for instance.) Still, it would give them something to think about at least. Granted, there would be endless shrieking about society trampling on their "rights". However, when they try to argue that, their recklessness and faulty reasoning will be obvious to everyone.

4 Country Songs That Are Incredibly Beta

May 23, 2018 | by Fernando DeVasques | Link | Original Link

I was a country music fan in the 90's. I would sit in my dad's truck and listen to the local country station non-stop. There was an occasion that the truck battery died because I had spent all day listening to the radio. My parents had always been of the mind that secular music was of the devil, so I couldn't listen to country tunes inside the house. While they were wrong at the time, the music I hear now is of the devil.

When I actually pay attention to the lyrics of the music I listen to, I am appalled at their acute beta anthems. Music to me is a commodity. I don't take any artist or song seriously; if my ear likes a certain song then I will leave it on for the duration of the ride. If the song is extra catchy, I will sing along to it. Unfortunately, things are no longer that simple.

Some of the country songs that are coming out are full of absolute beta-male doctrine. I couldn't bring myself to listen to them, much less sing along to them. What I have rather done is to hate-listen to these songs while I wonder if there is anyone on earth that actually agrees with the themes in the music.

Therefore, I bring you 5 current country songs that reek of disgusting lyrics. All of these songs are beta-anthems.

1. Jordan Davis – Singles You Up

This song by Jordan Davis is likely the weakest song I've heard in a very long time. The melody is fun and energetic, but the lyrics are beyond reprehensible. Let us examine just the chorus:

> If he ever singles you up, if he's ever stupid enough

> I'ma be the first one calling you baby (baby)
> If he ain't holding you tight, if he ain't treating you right
> I'ma be the first one calling him crazy (crazy)
> 'Cause girl, it's just a matter of time until you find
> That the right guy's staring you back into your eyes, right now
> No rush, but if he ever singles you up

Excuse me while I wretch. Not only is the guy in the song freefalling in a self-made abyss, he's willing to wait for another man to get tired of poking a girl so that he can swoop in and "save" her. Little does he know, that this hypothetical woman would still reject him while laying with the next alpha.

2. Keith Urban – Female

I am certain that Keith Urban has no real friends, because a true friend would not allow his brother to write such a song and would scold him harshly for actually performing it.

> When somebody laughs and implies that she asked for it Just 'cause she was wearin' a skirt
> Oh, is that how that works?
> When somebody talks about how it was Adam first. Does that make Eve second best
> Or did He save the best for last?
>
> Loading...

Keith then goes on to list a slew of words including technicolor and I'm not sure how it fits. The song was obviously written for Keith to remain relevant and radio stations ignore how stupid it is.

3. Thomas Rhett – Marry Me

Here we have yet another beta pining after a woman who doesn't feel the same way. The difference here is that the girl is planning to get married to someone else—he's invited. In the song, Thomas states how they been friends for a long time and he almost got to kiss her once, but he wussed out.

> I'll wear my black suit, black tie, hide out in the back
> I'll do a strong shot of whiskey straight out the flask
> I'll try to make it through without crying so nobody sees
> Yes, she wanna get married
> But she don't wanna marry me

This is absolute filth. Could you ever put yourself in the situation where you're attending the wedding of a girl you secretly love? He could just stay home but a beta loves to suffer for the girls he can't have. Horrible message.

4. Luke Bryan – Most People Are Good

The greatest lie of the left is that people are naturally good and if we were to just give each other, we alone could make the world a better place. That is why they put great emphasis on bigger government—it is the only way they can control those deemed 'out of control'. Enter Luke Bryan with a soft-toned song about the greatness of people. He panders to some leftist ideas in his song:

> I believe most people are good
> And most Mama's oughta qualify for sainthood
> I believe most Friday nights look better under neon or stadium lights
> I believe you love who you love
> Ain't nothing you should ever be ashamed of
> I believe this world ain't half as bad as it looks
> I believe most people are good

Most mothers should not qualify for any type of sainthood because they are the reason why we are plagued with weak men in the USA. Good people have a set moral compass, typically found in their religion. Without it, their morals are malleable to their interests. Morality is not fluid. Not only is this song a beta-anthem, it's an Open Borders anthem, too. Culture matters, Luke.

Conclusion

Country music used to be the songs of hardworking men who enjoyed the occasional binge drinking. Now it has been invaded by beta anthems that perpetuate oneitis and a Disneyesque view of the world. These songs are good for a laugh. Unfortunately, some take music as gospel and adhere to the messages found in them. Brainwashing can come with a melody.

To Avoid Being Called Racist, Starbucks Now Welcomes Homeless People And Other Non-Customers

May 23, 2018 | by News Syndicator | Link | Original Link

Previously: *Starbucks Is Imploding Because Two Black Men Didn't Want To Leave A Store*

Via USA Today:

You don't have to be a Starbucks customer to use the bathroom.

Starbucks informed employees of the official policy in a letter sent to them on Saturday, spelling out that "any person who enters our spaces, including patios, cafes and restrooms, regardless of whether they make a purchase, is considered a customer."

Portions of the letter were first published in *The Wall Street Journal*.

Starbucks employees are told to follow company procedure in dealing with customers who might behave in a "disruptive manner." If there is a perception of imminent danger or safety concerns, employees are still urged to call 911.

And in a policy statement shared with *USA TODAY*, the company indicated that "When using a Starbucks space, we respectfully request that customers behave in a manner that maintains a warm and welcoming environment by:

Loading…

- Using spaces as intended
- Being considerate of others
- Communicating with respect
- Acting responsibly."

Starbucks executive chairman Howard Schultz had already signaled the policy change at an event hosted by a Washington D.C. think tank on May 10. Schultz said at the time that, "We don't want to become a public bathroom, but we're going to make the right decision 100% of the time and give people the key, because we don't want anyone at Starbucks to feel as if we are not giving access to you the bathroom."

In April, two African American males were arrested in a Philadelphia Starbucks after one asked to use the restroom but was told only paying customers could use them. After he sat down with his friend while waiting to be joined by a business associate for a meeting, the police came and arrested both, sparking national outrage.

Starbucks CEO Kevin Johnson subsequently apologized to the victims and reached an undisclosed financial settlement.

The company has also just apologized to a Latino customer for a racial slur that was allegedly written on his drink cup in a suburban Los Angeles Starbucks.

Starbucks is going ahead with plans to close its more than 8000 company owned U.S. stores and corporate offices on the afternoon of May 29, so employees could receive anti-bias training.

Hollywood Movie “Show Dogs” Has A Disturbing Scene That Grooms Little Children To Accept Sexual Abuse

May 23, 2018 | by News Syndicator | Link | Original Link

Via Macaroni Kid:

We took the family to see the new movie, Show Dogs, last week at an advance screening. The premise is great for a kids movie. Max is a talking police dog (voiced by Ludacris) who is paired up with a human partner, Frank (Will Arnett) to infiltrate a prestigious dog show and rescue a kidnapped baby panda.

Being a tough dog from New York, Max has no business competing in a dog show but uses his street smarts to outperform the competition to get closer to the inner circle of kidnappers. Along the way, Max learns lessons about trust and the need to accept help from others. The usual hilarity ensues with dog farts, bites on the rear-end, and slap-stick bonks to the head which elicit giggles from the audience.

There are also the obligatory jokes that go over the kids head to entertain the parents with plenty of meta jokes that reference the actors work outside of this movie. The keen ear will pick up on the multiple cameos voice performances from the likes of Shaquille O’Neal, Gabriel Iglesias, and RuPaul.

What could have been solely a fun movie for kids that would get my highest recommendation is damaged by a dark and disturbing message hidden, not so subtly between the fluffy dogs and glamorous parties of the show dog lifestyle. As part of any dog show, contestants are judged on their abilities and physical attributes. One part, in particular, is the inspection of the dog's private parts.

Being that Max is new to competing, he needs to learn the process so his partner, Frank, along with a former show champion work to get him ready for the final round of the competition. Since the inspection of the private parts will happen in the finals, Frank touches Max's private parts to get him use to it. Of course, Max doesn't like it and snaps at Frank for him to stop. **Max is then told by the former champion, who has been through the process before, that he needs to go to his "zen place" while it happens so he can get through it.** More attempts are made by Frank to touch Max's private parts, but Max is still having trouble letting it happen and keeps snapping at him.

The day of the finals come and if Max doesn't let his private parts be touched, he may lose the competition and any hope of finding the kidnapped panda. It all rests on his ability to let someone touch his private parts. **The judge's hands slowly reach behind Max and he goes to his "zen place". He's flying through the sky, dancing with his partner, there are fireworks and flowers-everything is great-all while someone is touching his private parts.**

During the movie, I kept thinking, "This is wrong, it doesn't need to be in a kids movie. Everything else in the movie is good fun except for this." Afterward, my husband mentioned that he picked up on this message too, as did my mother who saw the movie with us.

Loading...

My daughter, on the other hand, said her favorite part of the movie was when Max got his privates touched and the funny reaction he had. I decided to use that moment to help reinforce what we have taught our children since they were little, private parts are just

that, private. We talked about how I didn't feel that part needed to be in the movie. We talked about how we never let anyone touch our private parts, what they should do if anyone tries.

We reinforced that if anyone tries to touch their private parts or asks them to touch their private parts they should talk to us about that. We talked about different ways children can feel pressured to participate in those types of behaviors. A child predator is usually known to the child, rarely are they a stranger. We talked about bribes or threats, we discussed the fact that that type of behavior is not a game, we reminded them the same rules apply to kids as well as adults.

Approximately one-third of offenders are themselves juveniles, with 23% of reported cases of child sexual abuse are perpetrated by individuals under the age of 18 and only 14% of children who suffered sexual abuse were violated by an unknown perpetrator. (Victimsofcrime.org) Although you cannot prepare a child for every situation the more knowledge you give them the stronger their defenses are!

As a survivor of child abuse, this is something I feel strongly about and am passionate about helping others protect their children. I also fiercely strive to give my children the knowledge and tools they need to protect themselves. Those little humans are the greatest things in the world! Children are our greatest resource, if they have already been a victim of abuse this movie has the potential to be very triggering for them.

With the #MeToo movement and all the talk of sexual predators in Hollywood, I couldn't help but think this message, that is blatantly in the open for adults to see, but over a child's understanding, is meant to groom children to be open to having people touch their privates, even though they don't want it. It gives them the idea of a "zen place" to go to mentally when they are touched. I'm a make lemonade out of lemons type of girl, so let's

take this movie and use it as a great teaching tool. I'm not going to encourage or discourage anyone from seeing this movie, I only want to help parents make an informed decision.

It’s A Myth That Crack Cocaine Punishments Were Created By Whites To Punish Blacks

May 24, 2018 | by Larsen Halleck | Link | Original Link

So if you haven’t noticed recently, mainstream black commentators are in a bit of a huff about body cameras being put on police—the thing that they had been previously requesting. If you’ll recall, only a year or two ago Black Lives Matter and other groups were demanding that all police officers wear body cameras as a proactive way to stop police brutality before it happens—the idea being that a cop would be less likely to brutalize a suspect if they knew they were being watched by some benevolent third party.

Curiously, now all of a sudden Organized Blackness is against this. Why, you might ask? Because, apparently, the cams will “reinforce the police narrative” rather than the narrative that they want to push.

In layman’s, body cams present an objective reality that may or may not debunk the next “hands up don’t shoot” narrative. If this sudden about face surprises you… it really shouldn’t.

This is hardly the first time that Black America has collectively demanded some sort of law enforcement sea change, only to renege a few years later, shortly after they realize that this demand is, ironically, making them look worse than if they had pushed it under the rug.

It’s time once again to debunk another modern day mythology. This time, it’s a myth about race, rather than gender. And it’s undoubtedly another one you’ve heard before.

The myth I'm referring to is the idea of disparate impact in 80s anti-drug enforcement: the disparity between punishment of powder cocaine versus crack cocaine.

As SJWs are fond of whining, crack use is indeed punished harder than powder cocaine, and that does indeed disproportionately affect blacks more than it does whites. That much, I will admit, is not part of "the narrative"—it is indeed objectively true.

However, the narrative is being applied here, and what it doesn't tell you is that this double standard in policing was demanded, and received.

What?

Allow me to introduce you to Charles Rangel, a Democratic senator from New York State. While he is perhaps best known today for being in favor of marijuana legalization, I can only assume that he made an about face after realizing how much damage his earlier policies caused.

Loading...

For back in the 80s, Senator Rangel was probably the hardest of the hardline drug warriors that fought the Reagan administration's culture war. He was a major backer of the Anti-Drug Abuse Act of 1986 that has more than anything else given the United States the embarrassingly high incarceration rate that it currently "enjoys" (and which flogging might alleviate as I argued here, and another writer has argued here)**.**

More specifically related to the thesis of this article, the 1986 act described above is *specifically the law that created the disparate sentencing for crack cocaine versus powder cocaine.*

Let me point out the high-larious irony of this: the laws that allegedly destroyed the black family and black America on the whole were sponsored… by a black man.

Also worth pointing out is that the 1986 anti-drug law can arguably be considered part of a larger trend within mid 20th century African-American politics. When perusing documentation from the time you can see a major complaint is that the police allegedly ignored black neighborhoods and communities, which naturally engendered an environment where criminals plied their criminal trade without fear of punishment. Indeed, you will find instances where African-Americans demanded that the police pay more attention to their community!

The train of thought from general police attention, to demanding harsher sentences for crack use, to demanding that the police use body cams… it all seems broadly similar, doesn't it? Always demanding more stringency from society's watchmen.

Unfortunately, these measures always seem to have roughly the same effect—namely that blacks started getting arrested at much higher rates than white people. And it seems that inevitably they wanted to put the metaphorical genie back into its bottle, and that brings us to today. Even with the "crack wars" long behind us, we still see this pattern of demanding that the police do something, and then retreading those demands once you realize that, like clockwork, it allegedly ends up making black America look bad.

What To Do?

So, apparently we're damned if we do and damned if we don't. And, of course, I have no desire of treading down this path for the rest of time—and several other Return of Kings writers have expressed similar sentiments. So either Black America has to take the metaphorical ball into its own court and admit that they have some problems that don't originate in police mistreatment and the evils of "wypipo," or we can continue rehauling society over and over and over again until the problem goes away, and black people can finally be on par with white people.

3 More Things American Girls Can Learn From Japanese Women

May 24, 2018 | by Makoto Fujiwara | Link | Original Link

Previously: *3 Things American Girls Can Learn From Japanese Women*

In 1922, Albert Einstein traveled to Japan, part of his overall journey throughout Asia. In his writings, he talked about the particularities of lands he visited, and how they had a significant impact on him as a human being. While his journeys through Ceylon, Singapore and other places were intriguing, none of them took hold like Japan.

He later talked about the intricacies of Japanese culture, the impressive traditions, and of course, the women. After spending some time in the country, he came to appreciate the "flower-like" demeanor of ladies here, leaving with a life-changing view that lasted with him for the rest of his life. Countless men who traversed over the Pacific Ocean have had the same impression of Japan and its women, shaking them to their very core. What is it about the local flair that makes men across the world want to come back?

One of the greatest minds in human history enjoying some sake

As a continuation from a previous post, women of the Japanese variant are head-and-shoulders above the Western stock. From looks and demeanor, to general philosophies on life and relationships, Japanese women have much to teach the Anglosphere on the power of feminine exuberance. Here are a few other qualities for your reading pleasure.

1. No Tattoos

I don’t know about you, but I never liked excessive tattoos on women. The general acceptance of looking like a Suicide Girl was something that made me scratch my head in bewilderment. Call me a hypocrite, but when I think of a mother, the first image that comes to mind isn’t a person with green hair and a half-sleeve.

Living in Japan, the idea of women turning themselves into human canvasses is rare. Even in major metros like Tokyo and Osaka, you can go quite a long time without seeing some hideous inkblot on an otherwise pleasant girl.

While changing, it isn't uncommon to see signs like these

A long time ago, the common consensus was that tattoos of any kind meant you were apart of the garbage bin of society (the outcasts, gangsters, thieves, etc), so a woman slathering on various pigments of dysfunction on her skin meant she was a mark. While the stigma behind tattoos is slowing fading away, the idea that a run-of-the-mill girl will go get inked up during *"ZOMG Spring Break!"* is virtually nonexistent. Leaving out the Shoko Tendo types and club rats, women here understand that beauty and tattoo-free skin are one in the same.

2. Social Graces

As mentioned before by Quintus Curtius, there comes a point where you tend to appreciate more than some curves and smile. Having the ability to conduct yourself with elegance and dignity is something that, to me, is just as important, if not more than other qualities.

At social functions, the mate you present to your friends and colleagues is a direct reflection of you. If you're bringing around an individual who is loud, proud, and full of snark, the image of who you are will pale in comparison to the man who seems to understand the importance of appearances.

Loading...

Pleasant evenings with pleasant company. Way it should be.

Due to cultural statutes, Japanese women have an innate understanding of how perception is reality. If you're a man who is looking to build something of value, then the significance of social graces is one that needs to be addressed. As far as Japanese women are concerned, one does not have to worry about her airing out dirty laundry in public, or trying to break your balls in polite company. The better you treat her and respect the cultural mores of the country you're in, the better off your experience will be.

3. Patience

As a man of this site, you have more red pill awareness than your average counterparts. Therefore, you have the innate understanding that if your game, finances, and mindset are together, you will have more access to the better things in life. In the case of Japan, the tendency to have more patience towards "beta" qualities is one that benefits the man who has an understanding of how the real world works.

As Roosh mentioned in the past, world game is quite effective and is the gold standard for countries not infected with a sense of societal suicide. In Japan, many women are receptive to it, provided you add in a few cultural adherences to authenticate the experience.

This is a staunch contrast to the Western variant, where being a sociopathic Genghis Khan seems to be the tried and true way to cover any ground. The high testosterone, brutish asshole archetype may get laid in Japan, but he won't get much traction outside of the girls who have been passed around like Agitprop leaflets. If it is in your nature to be this way, then do what works best.

Being in shape, having confidence, and running world game tends to be the winning

ticket to success in a country where perceived “blue pill” notions are the mainstream ethos.

She isn’t hellbent on destroying your life

The man who presents himself in the best light possible will not have to worry about the other party looking to find every way possible to destroy the relationship simply because things seems “too normal.” As an individual looking to establish roots and build a legacy, this is indispensible.

Conclusion

Overall, Japanese women have a wealth of qualities to offer men of all types who are looking for peaceful and enjoyable relationships. As a person with means, the world is your oyster, where you can choose to embark on a journey to find what works best for you. If Japan is a place that appeals to your sensibilities, then having an understanding on how the women interact compared to other parts of the world is a crucial step in uncovering what you’re truly looking for.

5 Ways To Massively Upgrade Your Shoe Game

May 24, 2018 | by Sponsored Article | Link | Original Link

The following article is sponsored by Paul Evans Shoes.

Shoes are an often-overlooked but significant part of any man's fashion game. Too many men will focus on their shirts, jackets, pants, and accessories, only to ruin their hard work by picking a pair of shoes that's either cheap or clashes with their outfit. It's very easy to undermine a quality look or outfit with a poorly-chosen accessory or an out-of-place color.

If clothes make the man, shoes are the foundation (both literal and metaphorical) of how you portray yourself to the world. Here are some easy tips on improving your shoe game…

1. Match Your Leather Belt With Leather Shoes

Fashion is all about the details. Accessorizing properly can take your outfit from average to stellar, and one of the easiest ways to accessorize is to use items that match. People who lay eyes on you will notice these details, making you look sharper and more on-the-ball. Mismatched colors are one of the fastest ways to wreck an otherwise good outfit.

Many men own leather belts for both their reliability and stylishness, so why not add a pair of leather shoes to the mix? Using a pair of shoes that matches the color and material of your belt is an easy way to enhance your look. The synchronicity between your belt and your shoes will turn heads and give your look the extra oomph that it needs.

2. Wear Shoes That Match Your Suit Or Outfit

One of the biggest ways that men screw up when it comes to fashion is by picking elements that clash. That suit or pair of shoes might look good in isolation, but when you combine them, it’s like putting a scoop of ice cream on top of a slice of pizza. In order to truly look good, you need to make sure all parts of your outfit form a cohesive, visually interesting whole. This means choosing colors that look good when you put them together.

One way you can pull this off is by picking a pair of shoes that matches your suit or outfit. Brown and oxblood shoes tend to pair very well with navy and grey suits and slacks. If you have a dark suit or set of slacks, you should pair it with a darker shade of brown shoe, while clothes that have a lighter color should use a mid to light shade of brown. If you have a black suit, wear black shoes. These tips may sound minor, but they can make all the difference in your overall presentation.

3. Use Oxford Shoes When You Wear A Suit And Tie

When you're wearing a suit and tie, you're cutting a conservative image, so you need a conservative type of shoe to match. Oxford shoes are the most conservative type of shoe out there, making them ideal whenever you need to dress up. According to Paul Evans, cap-toe, semi-brogue, and whole-cut Oxfords are the best types of shoes to use when you're in a suit and tie. Again, this seems like a small deal, but these little details add up when it comes to your image.

4. Casual Outfits Can Be Paired With Casual Shoes

When you’re dressing down a bit, you can afford to be more experimental when it comes to your shoe selection. Slacks, denim, and other casual styles can be paired with Chelsea or chukka boots, loafers, monk straps, and other types of shoes. Don’t go overboard—you still want to pick a shoe that matches your overall look—but don’t feel too constrained, either. Feel free to try out different styles so you can find one that matches your appearance and personality.

5. Buy Paul Evans Shoes

When it comes to shoes, you can't afford to be cheap. Paul Evans' line of shoes provide the perfect mix of comfort, style, and affordability. Their high-quality footwear is an ideal way to improve your personal fashion.

Manufactured in Italy and designed in New York, Paul Evans represents the pinnacle of men's footwear, enabling you to step your shoe game up easily. All Paul Evans shoes are made from the finest Italian calfskin leather and are painted by hand to look as beautiful and high-quality as possible. Paul Evans shoes are also blake-stitched, making them both comfortable to wear and easy to resole. They are designed to last for years due to their durable leather and expert Italian construction.

Not only that, Paul Evans shoes are affordable due to their direct-to-consumer business model. There's no retail markup: you buy direct from Paul Evans and your order is shipped to you. Shipping and returns are free, and the company also boasts a 365-day return policy. Paul Evans also offers 0% financing with payments as low as $36 per month. *Return of Kings* readers can use coupon code "ROK50" at checkout for $50 off *any* pair of shoes.

If you're looking for a shoe to get started with, the Martin wholecut is Paul Evans' most popular shoe and a great selection for grooms and groomsmen. The marrone (brown) colorway is best paired with midnight navy tuxedos and suits, while the nero (black) colorway is an ideal complement for black tuxes and suits. Whether you choose the Martin wholecut or another shoe, Paul Evans' line of shoes are a fantastic way to invest in yourself.

Shoes are an important part of any man's fashion arsenal, one he can't afford to neglect. By implementing some simple changes to your shoe choices, you can enhance your look and improve your fashion sense, whether you're at work, on a date, or simply going about

your day. Upping your shoe game is an easy process that pays dividends for the fashion-conscious man. **Click here to visit the Paul Evans web store**.

I Served My Country In Iraq To Return To A False Rape Accusation And Jail Time

May 25, 2018 | by Matthew Batista | Link | Original Link

Axioms that seem to have permeated our civilization for the better part of recorded history have been: (1) men are rational (e.g. Socrates, Plato, Aristotle), while (2) women are emotional (e.g. Nancy Pelosi). Of course there is overlap between the sexes, depending on the individual, but we have set up a society that reflects these biological and mental distinctions. It is no surprise that by changing that paradigm that problems will occur, as we have seen with the degradation and ultimate downfall of the West.

Currently, men no longer have societal pressures to be "manly." Quite the contrary. Men are promoted to be more like women, and vice versa. Nevertheless, a man will never be as good a woman as a woman (sorry Bruce Jenner), and the same is true for any woman who believes she will make a better warrior or leader than a man.

As a former Infantry Marine who served two combat tours in Iraq I can attest to this fact: women are not only ill-suited for fighting, they complicate the male-group's dynamics. For anyone who had driven by the barracks of deployed units only to see small formations of pregnant W.M.'s (women Marines), all non-deployable, you can see evidence of this. More still return from theatre pregnant, typically afforded a harem of young men during their "service."

News Courts

Woman made false rape allegation against man she was angry with - court

However, I digress. It is not my purpose to write about the incorrect fit of women in combat units, or other male-exclusive environments (e.g. the Boy Scouts), it is to explain a current phenomenon in light of the female-centric view of society we currently enjoy. As someone with an undergraduate background in sociology (yes, I spent nearly every minute of every class arguing with the professor) prior to going to business school, I've learned that in order to analyze any phenomenon, one has to take as an objective, non-biased view as possible. The phenomenon I speak of is non other than the #metoo epitomized false allegations women launch on men.

The reason this topic is difficult for me to take an objective view of is due to the fact that I was personally falsely accused of domestic violence, arrested, and put in jail for nearly a week before being released. A little bit of background: I met a girl while in graduate school (she was an undergrad), we "dated" for nearly two months, then we broke up (and I'm being frank here) because I wasn't interested in her despite her best attempts to rope me into a serious relationships.

We separated on what I thought were amicable terms near the end of summer 2017, and met once for coffee a few weeks later. Yet, a month after we had last seen each other she went to the police department, looking disheveled, and told them that I had assaulted her.

A girl that couldn't get me to take her out to save her life told a story of me tracking her down in the middle of a city, while I was supposedly drunk, on a Tuesday night (after working 10 hours), pushing her against a wall and claiming that she was my property. As incredulous as this sounded, she said just this. As a single guy, who lived alone a ten minute walk from the city center, I was vulnerable to these allegations. After all, this could have easily turned into a he-said-she-said affair, and we all know whose voice has more weight, a crying girl.

Loading…

Yet, as someone that was in the process of closing on a house, I was on my last month of the apartment lease, had already moved nearly everything I owned to my family's house in the interim, which was also where I had been staying all that week. Uh oh, that wasn't in her plan (i.e. me having an alibi).

Nevertheless, I spent a week in jail and nearly lost my job, only to have the charges dropped just before jury selection. Without any witnesses, with the city and private cameras in the area showing no assault, with eye-witness testimonies placing me at a different location, and full transparency of all credit card purchases made that month (which would be how I acquired any alcohol in order to stumbling around drunk) it still took six months and ten thousand dollars to clear the matter up.

Apart from the thousands in legal fees and lost wages, the false allegations, which trigger the courts and police to treat you like a monster, caused me intense emotional anguish. A side note, I am technically disabled due to combat related post-traumatic stress disorder. My accuser knew this, and because her feelings were hurt she disregarded this, possibly believing her claim could cause me to kill myself.

I did fall into a depression, drank myself into numbness on countless nights, and even fell so low to where I was calling the Veterans suicide hotline every other week. I went through this for six months: the time it took for the third prosecutor to finally review the evidence and say, "Well, we really don't have much here, and she's gone AWOL; so, we'll drop charges." While this was an immense relief, the damage has already been done. Men go through this each and every day.

This is the power women have—they can make a claim and society believes them because they're cute and can cry on command. Few men (young and old alike) truly understand that we are fully vulnerable to the whims of women. The problem is we want to protect women; it is a natural inclination for a man to stand guard over the women in his life, and even a stranger. This protection instinct can, and is manipulated by women to

get us to throw other men in prison, to kill other men, and to marry women when they have used up the best years of their life and fertility on casual affairs. Sadly, it has caused the system to throw out due process.

While the FBI estimates approximately 2-8% of rape allegations are false, the pure number of false allegations for any type of abuse is probably far higher. However, there is little estimation for such a quantity. The National Crime Victimization Survey (NCVS) does better on gathering information in regard to actual offense number, but objectively neither of these numbers can come to a true picture of the men who are victimized by women via a false allegation. Nor do these numbers, even if we could accurately gather them, illustrate the pain that an innocent man faces at the hands of society. It's truly a shame for half of the population.

Matthew Batista
Matthew is an entrepreneur in the American Midwest, with plans to begin his PHD in the fall. Upon graduating with his MBA this past summer he has started two local businesses, helping other small businesses to grow and prosper. He is a regular contestant (and winner) of local 5K races and mud-runs, and has been since his time in the Marines. Finally, it has been two years since he took the red-pill, and only regrets he did not do so sooner.

Social Justice Writer Angela Nagle Plagiarized Wikipedia To Attack The Manosphere

May 25, 2018 | by David G. Brown | Link | Original Link

"Author" and attention-seeking SJW Angela Nagle has been caught plagiarizing Wikipedia and Rational Wiki in her book *Kill All Normies*, including stealing parts of Roosh's Wikipedia page. Nagle's rambling tome, which basically attacks anyone who isn't a social Marxist as a white supremacist and/or misogynist, received effusive praise from the mainstream media.

In addition to its plagiarism, *Kill All Normies* is a textbook case of false sincerity. Nagle feigns self-consciousness, attributing the rise of people like Trump to a backlash against bizarre SJW ideologies, ideologies she herself largely endorses but pretends not to follow. Unable to contain her hatred for long, however, she then dives into the familiar and disingenuous spiel of "All our non-leftist opponents are white supremacists and Nazis."

While ROK hardly needs the support of left-wing media outlets to make a point, we note that *The Daily Beast*, an otherwise odious publication, is also drawing attention to Nagle's atrocious attribution of sources and outright plagiarism.

An elementary school student's idea of plagiarism

The initial complaints over the copy-and-paste effort of Angela Nagle came from Libcom, a sort of communist blog run by Mike Harman. In one example about Russian political theorist Aleksandr Dugin, Harman notes how she stole information from Wikipedia and presented it as her own. She writes (p. 121):

On Radix Journal they draw on the idea of the 'The Fourth Political Theory', with reference to the Russian theorist Aleksandr Dugin and the French New Right's Alain de Benoist, **an entirely new political ideology** that **integrates and supersedes liberal democracy, Marxism and fascism**.

The original Wikipedia entry read:

In the book, Dugin states that he is laying the foundations for **an entirely new political ideology**, the fourth political theory, which **integrates and supersedes** the three past "theories" of **liberal democracy, Marxism, and fascism**.

Even if some people think that plagiarism is actually a copy-and-paste job of sentences in full, this lifting by Nagle is still about as egregious and blatant as it gets. A high school senior or college freshman would have been failed for this kind of academic fraud in an essay.

Nagle plagiarized her references to Roosh as well

Loading...

Joining the throng of female journalists who have obsessively raged about Roosh, Nagle went one step further and copied Wikipedia to describe him in her book. As *The Daily Beast* confirms:

When Nagle writes that, "Roosh V doesn't identify with equality-based men's rights activism or the MGTOW movement, calling them 'sexual losers' and 'bitter virgins," that too is parroting his Wikipedia entry.

As a result, should any of us be surprised when typist after typist slanders Roosh as being "pro-rape"? If some among their number need Wikipedia to write for them, it's little wonder that they cannot (or refuse to) recognize his familiarity with the satirist Jonathan Swift.

Like I have said in the past, Roosh's biggest and, in fact, only "crime" is to have taught men how to get laid and to avoid broken leftist women in the mould of Angela Nagle. In return, he is ridiculously and falsely portrayed as a brown man's fascist. Considering her undeniable penchant for plagiarism, perhaps Nagle's rage got in the way when she was writing her book.

The hilarious Kony 2012 campaign is another topic in *Kill All Normies* that has been outsourced to Wikipedia, just as she outsourced her description of A Voice for Men founder Paul Elam to Rational Wiki. But hey, the only thing better than defaming or criticizing your opponents as misogynists or white supremacists is plagiarizing others to defame or criticize them for you!

When the media becomes fawning sycophants

All aboard the SJW circle jerk!

Though it is not possible for an individual reviewer to uncover every example of plagiarism in the books they write about, the left's obsession with ideology over facts and rationality explains its reluctance to publicize Angela Nagle's plagiarism. Its regular hit jobs on non-leftists aside, *The Daily Beast* at least had the integrity to call out the farce (or it was simply punishing Nagle for allegedly being "transphobic").

Vice's flattering review of *Kill All Normies*, for instance, will almost certainly not be accompanied by a subsequent and proper examination of the now confirmed plagiarism. That would clearly be asking for way too much. In the meantime, anyone who contravenes SJW orthodoxies can expect to be vilified and demonetized in order to silence them.

The Roman Empire Was Built And Maintained By Top Athletes

May 27, 2018 | by André du Pôle | Link | Original Link

If we want patriarchy and sanity back, or in other words if we want a *return of kings*, a great source of inspiration can be found in history.

The Roman Empire was created by two itinerant brothers, Romulus and Remus, and their pals. Courageous and united, these were able to get some land but lacked women. Rejected by men from neighboring tribes when they asked them for wives, they took them by force. They had a right to a future, upheld it, and secured it by beating the other tribes.

Eventually, a lot of wars followed. Rome expanded—again and again. Romans were sometimes defeated but always managed to get back on track. It took centuries, but ultimately, Rome became an enormous empire which included a quarter of the whole world population at its peak.

Those who fought on the ground for this expansion are today mostly known through movies, where they are sometimes confused with gladiators, and historical video games. How did they live to conquer like they did? According to two French physicians who reviewed evidence on their regimen, they lived like athletes.

The first thing a legionary had to know was not how to fight, but how to endure. Legionaries had to walk with an individual load called *sarcinae* that contained weapons, construction tools, cooking instruments, food rations for days, and clothes. All this weighted between 75 and 100 lbs. Once a week, legionaries had to undergo an 18 miles long testing walk across the country carrying all their equipment.

Only after centuries of a burgeoning empire would the supply networks become more secure. Julius Caesar (100-44 B.C.) then reduced the load to 45lbs per man, improving his legions' maneuverability, yet he maintained the test and training walks with the original load.

At a time when only a handful of rich men could go to war on horseback, legionaries were first and foremost incredible walkers. They acquired an intimate knowledge of their country by treading on it most of the time. Hiking 15 miles a day was not uncommon.

In times of war, forced march could come in as well: Crassus' (115-53 B.C.) legions once walked 23 miles without stopping, while Caesar's stepped 28 miles—and later carried out the prowess of treading 46 miles in 24 hours, without their usual load, but with just one 3-hour break.

When legionaries reached their goal, if they didn't have to fight anyone, they still had to build their camp with trenches and wood fences.

Only after they had proved their endurance would young legionaries be taught how to use their weapons. They would use a wicker shield and a wood spade first, then would throw weighted javelins and heavy stones before starting training with real weapons.

Intelligent legionaries were also trained to be engineers. These would build wood towers, catapults, ballistas. Physical fights were highly important, of course, but not that crucial: legionaries could walk incredible distances, build pretty advanced stuff, dig trenches around besieged cities as to make any counter-attack useless. They were enduring masters of their environment, both in their ability to tread it and change it up to their aims, before being fighters.

Loading…

When they didn't have to either fight or hike, legionaries were frequently tasked with building roads, bridges, channels and even cities. This was certainly good for Rome's economy, but it also provided strength training. As the saying went, "handling stone makes the body stronger." Pretty rustic, but more efficient than C4 pre workout and tons of hyped-up supplements. Once, waiting for the arrival of barbarian tribes for months, legionaries spent their time building the Canal de Fos near Arles (south of France).

As for their diet, legionaries ate in proportion to their strain. They had two meals a day, the first one (*prandium*) by the morning and the second (*cena*) by the evening. According to several estimations, the breakfast incorporated roundly 1.8lbs of wheat with a bit of cheese, a handful of lard and a generous portion of wine. This meant roundly 3500 calories on the morning plus the *cena*, amounting to more than 5000 calories a day save for scarcity times—a diet plan Michael Phelps, or any pro athlete, would be familiar with.

Mostly based on wheat, the standard legionary's diet was uneven: 78% carbohydrates. They strongly lacked protein. To reequilibrate their diet—and likely avoid consuming their rations too fast—they didn't use whey protein, but hunted and foraged as much as they could. Archaeological digs near camps in England and Germany have shown bones of pigs, beef, sheep, goats, wild boars, deer, venison, and even beavers, wolfs, bears and foxes. Just like baboon-eating Rhodesian Selous Scouts, legionaries knew what it was like to be hungry.

Overall, legionaries were all-around masculine men. They knew how to use their spades and shields for sure, and paintings still depict their square group formations. However, had they only mastered this, other peoples such as the Greeks would have nothing to envy. Legionaries won against all kinds of enemies, including the Greeks, because of how enduring, field-knowledgeable and environment-changing they were.

Brutes with no discipline may win for some time but always end up fighting each other or losing their shape. Organized, well-trained legionaries, topped with engineers? Not so much. Tall Gauls once laughed of "Marius' mules" because of how much weight the legionaries had on their backs—and likely because Mediterranean Romans were smaller—but still got their ass kicked and were forced into speaking Latin.

Again and again, the same qualities and behaviors ensure victory. It takes a good organization, not to mention morale and self-trust, to succeed as a group. Just ask the Chinese. Likewise, the group must be made of worthy and/or exerted individuals to succeed.

The Gauls were stalwart men, more used to continental winters than their southern neighbours, but they kept quarrelling, and whereas their genetics is still there their Celtic language was mostly wiped out. Roman culture, on the other hand, still echoes today. And plenty of Roman buildings still stand all over southern Europe.

There is no shortcut to hard *and* smart work. No matter if we consider ourselves as individuals or a group, or both when, say, we start building a company, this makes a difference in the long run.

Single Women Fly Home To Ireland To Vote On Successful Repeal Of Country's Abortion Ban

May 27, 2018 | by News Syndicator | Link | Original Link

Via NBC News:

The result comes three years after Ireland became the first country in the world to legalize same-sex marriage by popular vote, and a year after Varadkar, an openly-gay politician and son of an Indian immigrant, became Prime Minister.

Once a deeply religious country — Ireland only voted to legalize divorce by a razor-thin majority in 1995 — the authority of the Roman Catholic Church and its reputation has been damaged in a series of scandals over the past 20 years.

> Irish women are traveling thousands of miles back home so they can vote in a referendum to legalize abortion. We should have never let women vote. https://t.co/Jybtf9WL7X
>
> — Roosh (@rooshv) May 24, 2018

> Look at their eyes. Empty and lifeless. They hate life so they want to destroy it. pic.twitter.com/HS7DuAeRSl
>
> — Roosh (@rooshv) May 24, 2018

Siobhan Donohue, chairwoman for Termination for Medical Reasons (TFMR), an abortion rights campaign group, described the result as "a hugely significant and hugely historic step forward."

Donohue, who had to travel to neighboring Britain to have an abortion when her baby TJ was diagnosed with a fetal anomaly, said she felt relieved.

“It confirmed to us that we do live in a compassionate country, which we thought we did but we didn’t know how far it reached,” she said.

“There was a lot of worry and a lot of concern over if it didn’t pass, what would happen,” she told NBC News from Dublin. “Having shared our stories and shared our experiences, if people had voted ‘no’ what would that have meant for us?”

But Donohue warned that the fight was not over, and that people in Ireland will still have to travel to Britain in order to receive an abortion in coming weeks until the law is changed. “But it’s the first, big and important step,” she said.

“All medical pro-life groups are needed now more than ever,” she said, adding that Doctors for Life will be very busy ensuring that doctors were granted “genuine” conscientious objection.

> Look how they’re so joyful at the sight of killed babies. This world truly isn’t worth living in anymore.
>
> — 1885 (@NorthBarra) May 24, 2018
>
> Loading…

> Abortion and child support are concepts that are at odds with each other. Child support implies that ownership is shared, while abortion implies that the ownership is in the hands of the females.
>
> — AltRightYouth (@AltRightYouth_) May 25, 2018

Halpenny said she was concerned that doctors will not be given the right to refuse to refer patients on to termination services.

It now falls on Parliament to establish new laws governing abortions.

The government proposes that the law be changed to allow unrestricted access to abortions up to 12 weeks of pregnancy. Later abortions would also be allowed in special circumstances.

The referendum follows an emotive and often acrimonious campaign. More than 3.2 million people registered to vote in the referendum.

> They've likely all had abortions. Psychologically they've committed to the narrative that it was "a clump of cells." I pity them to an extent. They were tricked by years of pop culture programming. Yes, they should have known better, but the brainwashing is incessant.
>
> — LastKingofScotland (@KingofLast) May 25, 2018

> Also, look at the pancake makeup. These are bitter post wall hags who want all women to feel as they do, empty and barren.
>
> — northern_refugee (@northern_refuge) May 24, 2018

Ireland is one of the few E.U. countries that does not allow those abroad to vote by mail

or at embassies, so many expatriates traveled to cast their ballots and shared their journeys on social media under the hashtag #hometovote.

Amnesty International welcomed the referendum result as “a victory for equality, for dignity, for respect and compassion.” But said Northern Ireland’s abortion laws must now be relaxed.

Access to abortion is also highly restricted across the border in Northern Ireland, which is part of United Kingdom.

5 Reasons Why Sugar Daddy Websites Are The Future Of Online Dating

May 28, 2018 | by George Swanson | Link | Original Link

We are all witnesses to online dating evolution. At first, it was primarily for single mothers who had an easy way to find themselves a new beta to provide for her and her kids. In the 90's, the mail order bride was the most popular on the online dating scene, but web sites like Match.com and OkCupid got very large fairly quickly.

By 2010, online dating websites became the best place for women to get validation from betas and to choose top 20% of guys to have sex with.

Today, classic dating sites are slowly but surely dying while sugar baby sites are on the rise. Not only has their user base grown tremendously over the past few years but this kind of relationship has been more and more pushed as normal into the mainstream media. Even feminists found a way to support it. Owners of these sites are speaking freely on Oprah, CNN, and others, doing what they know best, marketing their websites.

Thanks to the unbalanced sexual marketplace and declining public morals, being a sugar baby is a new way to monetize your body as a woman.

But what are the consequences? Men have to ask ourselves what will happen when every hot girl realizes she can get $1000-5000 a month selling her body without any social repercussions (because she won't be seen as a prostitute, but as a "sugar baby"). If you are tempted to think that easy lays on Tinder are going to last forever, this is what you need to know.

1. Sugar daddy dating sites are growing at a fast pace

Going back to 2012, the main sugar daddy dating site (Seeking Arrangement) was still in the shadows. And to be honest, it was suspicious. I got a lot of messages from girls in other countries far from the US that I thought were fake. And I still do. But not in the sense that they were bot or men, but that those girls are paid to message you, especially when your membership is about to end.

Fast forward to today, the site looks way better with a new design, there are no fake messages and the best part is that now you have a lot of options. If you sign up, I guarantee that you will find at least one girl you know from Tinder or elsewhere. And I also guarantee that she is going to be ten times more receptive.

As far as the statistic goes, the site had only 2 million signed up globally in 2012. This year it has nearly ten million. Out of ten million, 8 million are sugar babies. 3.25 million users are in the United States only. Are we witnessing an all-out boom in casual mass prostitution encouraged by the media?

2. It’s Becoming Mainstream

The sugar baby concept is slowly but surely pouring into the mainstream entertainment media and pop culture. It started in 2014 when Brandon Wade (owner of Seeking Arrangement), with two sugar babies, talked on The View with Jenny McCarthy. They talked about being a prostitute on live TV and people applauded them.

When it comes to serial programming, the TV show Easy has an episode which basically promotes being a sugar baby. The main character is, of course, the positive feminist activist and writer (but also a prostitute) who lives in Manhattan and whose lifestyle is funded by her beta-box "side-hustles."

Loading...

There are many more examples, like the popular female rapper Cardi B who basically raps about being a sugar baby and "making money." One of her songs have around half a billion views now. Let that sink in.

3. Not every girl knows about it, but once they do…

If you are using Tinder, you probably stumbled into girls that put in account details of Venmo, a mobile paying service. They feel no shame in turning men into their personal ATMs.

But would these girls ask for $10 if they only knew how to google "sugar daddy dating"? What are they going to do when they find out they can find a sugar daddy that will give them $1000 a month just for their company?

Once good looking girls realize how much money they can make and how their lifestyle can be improved by monetizing their body, most will simply be unable to resist the temptation.

4. Most Guys Are Tired Of Regular Online Game

For those of you that aren't lazy and have been working out regularly, it's quite easy to get good pictures, become complacent, and then rely solely on online game since you

can technically approach girls until you score. But let's face it, in the regular online game, for the most part, you are just a guy that gives her temporary validation. As soon as she feels validated, you are no longer interesting.

It was determined that a man of average attractiveness would be liked by one out of 115 women on Tinder. It's similar with OK Cupid. So, what about men that don't get matches? Are they going to get tired of this? Are they going to think that they can have much more success being a sugar daddy on other dating websites? Or maybe they will go the salt daddy route (a fake sugar daddy who lies about his net worth and don't pay girls after sex).

5. Student Debt

There is no way to escape a simple fact that student debt loan is now around 1.5 trillion dollars, spread out among 44 million borrowers of which two-thirds are women.

When you register on SA, you will certainly notice that the number of female students using this app is massive. And they all want one thing, "a little financial help to finish my studies." Money that was supposed to go for paying the debt probably went on something useless, so when the devil comes for what's his, they are relentlessly trying to find out a way to keep up with the high lifestyle and still be able to solve their debt problem. Finding a sugar daddy or being an escort is a perfect way to do it.

Conclusion

Make no mistake, the sugar revolution is coming. I have already accepted that and if you also want to adapt to this massive shock to the sexual marketplace, instead of focusing on the past, make sure to check out my review of Seeking Arrangement.

7 Types Of Dangerous Women You Should Avoid

May 28, 2018 | by Donovan Sharpe | Link | Original Link

Though we often state that “All women are like that” (AWALT for short), men who are red pill aware know that not all sluts are created equal. They’re all different in their own way in terms of what motivates them.

There are, however, a subset of women who are radioactive to men within the context of a sexual relationship. This might seem as though I’m stating the obvious, what with the current state of the sexual marketplace in this day and age, but believe it or not there are women out there who will positively turn your life upside down if you allow her to get her hooks in you.

Here are seven of the most dangerous signs:

1. Claims to have been raped

"…and when I saw he was shorter than me the next morning, I realized I had been raped!"

We all know that there are false rape accusations made all the time by women but there are women out here who have truly been raped. In either case, if the words "I was raped" comes out of her mouth, she's radioactive.

You're either risking a false rape accusation or you're gonna be dealing with a woman who's so fucked up in the head she's ruined for life. Whether she's lying or telling the truth, a woman who claims to have been raped is dangerous to you as a man.

Don't even fuck her. If she claims to have been raped get the hell outta there and block her number.

2. Biological clock girl

Tick tock…

The biological clock girl is the woman who knows she's running out of time to have a baby. She can't lock down a man because the cock carousel has turned her into an entitled bitch who doesn't know how to act like a woman anymore with the kind of thousand cock stare that scares of the kind of men who she'd want to impregnate her. It takes her a few years to figure this out which gobbles up previous time and at some point she starts to realize her biological clock is ticking even faster. She then resorts to drastic measures to get pregnant.

Now I'm not talking about poking holes in condoms or fishing condoms outta the trash after he leaves and injecting herself with his sperm. That stuff is for young girls or amateurs who haven't figured out it takes more than that to trap a man with a kid. These chicks are normally in their mid to late 30s, a lot smarter and they take it to a whole different level

There's a website called fakeababy.com and it's exactly what you think it is. It's a site where women can buy things to *make a man think she's pregnant with* ***his baby***. Fake positive pregnancy tests, fake ultrasounds, fake sonograms, you name it, they've got it. It's described on the website as a "gag" gift but I'll bet my nest egg that most women don't buy their products as a joke or a gag…especially considering what they charge for their "gifts."

Yes…this is a real website…

These women are dangerous because if a man thinks a woman is carrying his child, he

feels obligated to share his resources (as he should because that would be the right thing to do if a woman is pregnant with his kid). But here's where the REAL con happens: if a man thinks a woman is pregnant with his kid, he'll start fucking her without protection thinking it doesn't matter if he shoots his loads in her and then when she ***does*** become pregnant, there's no news to break.

These women trick men into having unprotected sex with them to *get* pregnant by faking a pregnancy and they use this website and others to do it. There are women out here who aren't even pros at this who still fool men in this way.

In either case, if you're fucking an older woman who doesn't have kids, has never been married, and mentions the desire to be a mother even *once* to you, watch out. Females like this are more than likely looking for a mark to run this gambit on.

3. The Pathological liar

Your girl is different— she'd never lie

Women lie. We know this and that's one of the main reasons the manosphere exists in the first place. But every once in a while we meet women who lie about things they don't need to lie about. Things like what she ate for lunch yesterday or what color panties she's wearing—completely benign untruths she tells because she's a pathological liar.

Loading...

Women like this are dangerous because if you can't even believe what they tell you about things she doesn't have to lie about, then you know she's lying to you about anything and everything else that matters. Catching your girl in a lie every so often is one thing. It happens. It sucks but it's not necessarily a deal breaker depending on the what she lied about. But when you're catching her in lies weekly or sometimes even daily you've gotta drop her.

4. Raised by a single mom

“OMG I luv being a mom!!”

Women who were raised by single moms are guaranteed sluts. Yes, I’m making a generalization and I’ll say it again so there’s no mistaking what I’m saying here: **100% of women raised by single mothers end up as sluts.**

Listen guys, single mothers are single for a reason. They have no discipline, no impulse control, no respect for men, and huge entitlement complex. You put all that together and you’ve got a woman who’s had either an STD or an abortion (or both) before she’s 30. Guaranteed.

5. Drug addict/pill popper

Drugs like ecstasy, crystal meth, and cocaine really fuck up your system because they cause a dopamine and serotonin overload. Everything looks better and feels better including dick which is why there are so many girls out here can’t enjoy anything anymore because their receptors are fried because of all the crap they’ve snorted up their noses. At some point they ***have*** to use these drugs in order to feel any enjoyment or excitement having sex.

Obviously women like this are dangerous because if they have drugs on them and you get pulled over, she’s putting your freedom at risk. Also, if you’re with her when she buys her drugs she could also be putting your life at risk. Don’t get serious with girls who use drugs on the regular. Fuck ‘em and chuck ‘em and keep their numbers in case you hit a slump. That’s your only option.

6. On anti depressants/anxiety meds

Now if she’s a former drug addict it’s only a matter of time before they need these drugs to feel normal but here’s the thing: Women are emotionally volatile by nature. They’re women. They’re never chemically or hormonally identical from one day to the next. One day she loves you, the next day she wants to kill you, the day after that she wants to have your children, the next she wishes you got hit by a bus.

Then there’s her menstrual cycle: For a few days she wants cock in every hole, then for another few days it makes her hate herself and the world (PMS), then it bloats her, makes her body hurt, and causes her to be lethargic while her pussy bleeds and it all starts again on day one.

You factor all that in and ***then*** you wanna throw in anti depressants and anti anxiety meds which can cause suicidal and homicidal ideation on top of that??? Proceed with caution but DO NOT COMMIT.

7. Engaged more than once, but never been married

Women want nothing more than to belong to a man. They also want access to a man's resources. The easiest way to get both is to get married. Simple math.

But if you meet a woman and she tells you she was engaged to be married but the wedding never happened, that's a red flag for obvious reasons. But if she tells you she was engaged more than once but has never been married, you need to watch your back because she's hazardous to your mental health, your emotional health, and your financial

health.

Women like this are parasites and there are more of them out there than you think. These are females who never really intend on getting married but they go through the motions for no other reason but to inflict as much emotional and financial damage to men.

Something really bad happened to her and it’s warped her mind to the point where she’s dangerous to herself AND men. These women are called black widows for a reason and if you find out she’s been engaged more than once but has never tied the knot, you’re playing with fire if you stay with her.

Wanna hear the extended version which includes 6 more dangerous females that should scare you? Watch here! You can still watch Donovan Sharpe drop Red Pill truth on TSR: Live weekday afternoons at 4:30E/1:30P

UK Dissident Tommy Robinson Jailed For 13 Months For Reporting On Muslim Grooming Gangs

May 29, 2018 | by News Syndicator | Link | Original Link

Via Fox News:

U.K. right-wing activist and journalist Tommy Robinson was arrested and reportedly jailed Friday after he filmed members of an alleged child grooming gang entering a court for trial — but the details of his purported sentence remain murky after the judge ordered the press not to report on the case.

Robinson, the former head of the English Defense League and a longtime activist against Islam and Islamic migration, was arrested after he was filming men accused of being part of a gang that groomed children. Britain has been rocked by a series of child sex scandals perpetuated by gangs of predominantly Muslim men.

Video shows Robinson, whose real name is Stephen Lennon, being surrounded by as many as seven police officers as he livestreamed the incident on his phone. The police informed him he was being arrested for "breach of the peace."

> Tommy Robinson has been arrested in Leeds court for reporting on grooming gangs. More updates to follow pic.twitter.com/iEPDoNOKHM
>
> — Caolan Robertson (@CaolanRob) May 25, 2018

But shortly after his arrest, a source with knowledge of the case told Fox News that he had been jailed for 13 months on a contempt-of-court charge.

A court listing indicated the case was "closed" by Friday afternoon.

One source said he was jailed in Hull Prison. The prison declined to comment to Fox News on whether Robinson was there. Leeds Crown Court also did not return a request for

information.

According to The Independent, Robinson was already on a suspended sentence for contempt of court over a gang rape case in 2017.

The judge in the case on Friday slapped a reporting ban on the case. The order bans reporters from reporting on a case if there is reason to believe the reporting could prejudice a trial. The order prevents reporting until the conclusion of the trial Robinson was reporting on.

The gag order led to news outlets in the U.K. removing their reporting from their websites to comply with the order. Most remaining reporting in the U.K. comments on Robinson's arrest, but not on his purported sentencing.

Sources with knowledge of Robinson's case spoke on condition of anonymity in part because of fear they would be arrested for contempt. One told Fox that Robinson's lawyer warned that, considering the presence of Muslim gang members in prison, a 13-month sentence was tantamount to a death sentence.

"Tommy's lawyer said he will likely die in jail given his profile and previous credible threats, and the judge basically said he doesn't care," the source said. "He sentenced him to 13 months in prison."

Reaction to Robinson's sentencing from commentators and right-wing politicians was fierce, particularly as it is the latest in a series of commentators — particularly those who are critical of Islam and mass Islamic migration into the U.K. — being locked up by British authorities.

> I am hearing reports that Tommy Robinson has been arrested for 'a breach of the peace' while live-streaming a report on a grooming gang (sex slave) trial at Leeds Crown Court. Further reports say he has received a custodial sentence. What kind of Police state have we become?
>
> — Gerard Batten MEP (@GerardBattenMEP) May 25, 2018
>
> Loading…

"What kind of police state have we become?" tweeted U.K. Independence Party leader and European MP Gerard Batten.

"I am trying to recall a legal case where someone was convicted of a 'crime' which cannot be reported on," he added. "Where he can be cast into prison without it being possible to report his name, offence, or place of imprisonment for fear of contempt of court."

"Arrested for "breaching the peace" while reporting on a Islamic grooming gang trial?" Dutch MP Geert Wilders tweeted. "Is this Saudi-Arabia?" Wilders also submitted parliamentary questions to the Dutch minister of foreign affairs on the matter.

In the U.S., actress Roseanne Barr, star of the ABC revival of the sitcom "Roseanne," retweeted a number of supportive messages for Robinson, and tweeted out her own outrage.

> Unreal support for Tommy Robinson at such late notice! #FreeTommy pic.twitter.com/JhhbA0cvcY
>
> — Nick Scanlon (@NickScan92) May 26, 2018

Robinson has long been a polarizing figure in the U.K., with supporters saying that he speaks out against political correctness and the growing influence of Islamic extremism, while opponents claim he is a racist who stokes fear and division. A counter-terror police official said Robinson's material was partially responsible for the radicalization of a man who committed a terrorist attack on a mosque last year.

Robinson upset former CNN host Piers Morgan by brandishing a Koran and claiming it cites "murder and violence against us" in an appearance on "Good Morning Britain."

"Put that book down and show some damn respect for peoples' religious beliefs," Morgan said. On Saturday, supporters of Robinson protested outside the gates of 10 Downing Street.

Robinson is the latest right-wing figure to fall foul of the authorities. Canadian right-wing activist and journalist Lauren Southern was turned away from the U.K. in March shortly after she had made a video in Luton, an English town with a relatively high Muslim population, and put out a stall declaring: "Allah is gay" as an experiment to see what the reaction would be.

Also in March, "Generation Identity" activists Martin Sellner and Brittany Pettibone, were refused entry to the U.K. after being judged that their presence was also "not conducive to the public good."

U.S. radio talk show host Michael Savage and blogger Pamela Geller, both of whom have been outspoken in their criticisms of Islamic extremism, have also been banned from entering the U.K.

Even President Trump has faced calls from politicians to be banned from the U.K. — in particular over his views on immigration and his controversial travel ban. Trump will visit the U.K. in July, where he is expected to be met by protests.

How To Understand Your Needs When It's Time To Invest In The Market

May 29, 2018 | by Dawn Pine | Link | Original Link

Becoming part of the manosphere state of mind requires us to (in most cases) become an investor. Stocks, bonds, real estate (both in vitro and in-vivo), business, and any other investment options should become part of our financial life. The main reason for this, is what BLL noted:

> Since the Alphas main investment is in himself and his needs, he also secures that regardless of the outcome he has increased his principal.

BLL was talking about Gender Relations, but one can easily apply it to its own financial welfare. What I have noticed is that there is an hierarchy of needs, which actually translates into actions. This was based on reading an article (in Hebrew) about that specific subject and its applications. As an individual investor, each one of us has to consider a lot of things about one's investment:

1. When (to invest)?
2. How much (of our money to invest)?
3. Which (type of investment to choose)?
4. Where (which market, geography…)?
5. How long (time expected)?
6. When (under what circumstances should we withdraw, or exit strategy)?

Each ones of the above influences yield, risk and eventually our future financial situation. This does not mean that they are equally important. It is the same concept which states that "Strategy before tactics. Always!" Most people deal with tactics such as "Which stock

should I pick?" or "Should I switch brokers for an additional reduction of 0.15% in fees?" This is exactly like dealing with the question of "Which line should I use to diffuse last-minute resistance?" Getting your shit together is more important.

In order to help readers better understand what I mean, here is a diagram:

The Investor's Pyramid of Needs (Source http://www.hasolidit.com)

I'm referring to the stock market, as I believe most readers have some stake in it (either individually, or via 401k). Let's go over it and explain (top to bottom).

Stock

One can easily lose one's head in all the noise about stocks. Commentators, analysts, and every one around has his own idea on which stocks to pick and why. Just like girls on Instagram, the change in opinion is on a whim. That is just the equivalent of "Can't see the forest for the trees".

Picking the actual stock (or bond, or ETF or whatever) **is the last thing an investor should do**. This is your final act, so it has to be based on strategy.

Management Fees

If one is after a broker account or a trust fund, the best one can do is lower the fees as much as possible. That's a "No Brainer". The lower the fees the more money you keep in your pocket – in the long run.

Sure, some funds may have better return in a year or a couple of years. However, looking over a long time span, **those fees eat up the profit**. The longer your outlook the better. One thing though, reduction of 0.5% of fees will be evident in about 5 years, so do note that if your time-span is less.

Loading...

Tax

Tax shelters are the ability to pay the least amount of tax it is possible under the law. I'm not a tax expert, but it is important that even if you reduce management fees, the tax may eat up your revenues. That is why it is suggested that one should consult at least one tax expert on which type of investment one chooses. This has the potential of making the 0.5% fees difference discussed above **completely irrelevant**.

Asset Allocation

The decision of what part of your portfolio you allocate to each type of risk is the projection of your risk aversion personality. Asset allocation is the main issue behind the portfolio. You need to pick it in a way that will enable you to sleep at night (How much are you willing to stomach if your worth is down – 5%? 10%? 25%? 50%?). That one is entirely up to you and your character.

As a rule of thumb, the younger you are – the more riskier your portfolio should be (i.e. stocks).

Risk Spread

Asset allocation is how much you can stomach a loss. But investment in a specific market, niche or industry is what will make you fragile, rather then anti-fragile.

If you invest in 10 stocks you get some sort of a yield. Now make it 100 stocks, and the yield can stay the same, but the risk will be reduced. Spreading the risk on multiple assets (and not by allocation, which was discussed above) is an actual "Free Lunch". No one knows which stocks or industries or countries will shine, that's why you spread the risk to ensure you are not exposed to a "non systematic" risk.

And to the commentators who will state the observation of how 2008 showed us that everything can fall at the same time, I'll answer that it's the same as saying that one wants a bullet-proof approach to girls so one will not be rejected. That's not going to happen.

Discipline

The most important lesson of self improvement is discipline. This is the only way to achieve something. The same is true when we are talking about investments.

Fear, greed, euphoria, panic, and other emotions and reactions are some of our worst enemies. They make you buy high and sell low. Become Ulysses – bound yourself to your mast (strategy) and refuse to move when the market sirens sing their song. If you can do

that, your “Buy and Hold” strategy will work.

One note though – strategy means also to asses your situation and align it with the goal. This means you may change your behavior, but on your own terms.

Time On The Market

The earlier you start to invest, the sooner you become economically free. The longer you wait, the more savings you will need in order to compensate for the compound interest lost.

Savings/Minimalist habits

Leaving below your means and saving is the most important need of all. If you reject the hedonistic/consumerist mindset and focus on saving a nice portion of your income, you will be able to invest. If you don’t – all of the above is worthless.

Conclusion

I hope I was able to clear the subject a bit. My message is simple: focus on a minimalist lifestyle in order to be able to save money, play the long game, DISCIPLINE DISCIPLINE and more DISCIPLINE, spread the risk and allocate your assets, note the tax and fees and then and only then pick your investment.

Your Emails Are Being Spied On To Identify “Hate Speech” As Defined By The Anti Defamation League

May 29, 2018 | by Beau Albrecht | Link | Original Link

If you have several email accounts, you might suspect a bunch of corporations just sent their legalese munchkins to a writer’s workshop. *What’s going on here?*

Microsoft

Microsoft is the 800 pound gorilla of computer technology.

There are some new changes to the Microsoft user agreement. This affects users of Hotmail or their many other services (121 are listed). Could this have any implications for freedom of speech? The answer wasn't hard to find.

Item 5 describes "offensive language", specifying it "means violent, profane, or hateful language". It states that this merely "clarifies that inappropriate content includes offensive language, among other things." *That's remarkably open-ended.* Presumably, tirades count. However, technically even a swear word is a violation. They're not micromanaging that far yet, but they could.

The complete user agreement states the following under 2.a.vii:

> Don't engage in activity that is harmful to you, the Services, or others (e.g., transmitting viruses, stalking, posting terrorist content, communicating hate speech, or advocating violence against others).

This 15,000 word document clarifies the vague phrase "hate speech" no further. Legalese by some other companies actually does, though enforcement standards are selective.

Suppose you're caught emailing politically incorrect jokes, or maybe the treatise on guerrilla warfare by St. Che (presumably that's "terrorist content"). If you get locked out of your account, causing you to lose a major business deal, can you go to court? Item 11 under "Standard Application License Terms" says:

> …[Y]ou can recover from the application publisher only direct damages up to the amount you paid for the application or $1.00, whichever is greater. You will not, and waive any right to, seek to recover any other damages, including lost profits and consequential, special, direct, indirect, or incidental damages, from the

> application publisher.

Was that email account free? Okay, so you can sue them for a buck. Or, maybe not. The "Binding Arbitration and Class Action Waiver" section states that you can't go to court. Instead, some arbitrator decides.

Things might get more restrictive and intrusive yet. Behold the standard "we can do anything" clause:

> We may change these Terms at any time, and we'll tell you when we do. Using the Services after the changes become effective means you agree to the new terms.

Would you want to get a car loan if the finance company dictated where you could drive? What if they also permitted themselves to change the loan's terms whenever they wanted, and continuing to drive it constituted your acquiescence? You could find another company, but that's difficult if every major bankster specifies the same conditions.

Oath

At least they didn't call it "The Cabal".

Verizon teamed up with Yahoo and AOL to form a new company called Oath. That curious name sounds rather imposing. A *USA Today* article states:

> Armstrong on Tuesday stressed that the brands will stay the same. We are going to be "all in in terms building awesome products and services among the biggest brands we have," Armstrong told CNBC.

According to this upbeat article:

> Armstrong has described Oath as a B2B brand, overseeing the names that you are all familiar with. Beyond Yahoo and AOL, those names include Tumblr, Huffington Post, TechCrunch and Engadget. In all, about 1.3 billion consumers use the company's collection of brands making these among the most powerful digital brands on the Internet.

So about a sixth of the world's population is "under Oath".

A *MediaPost* item describes that they've allowed themselves to scan your email. If you don't like it, tough luck:

> Google stopped scanning Gmail messages last year. It has faced class-action lawsuits and criticism over the practice.
>
> CNET reports that Oath has extended its arbitration clause and class-action waiver to Yahoo Mail, and that this will make it harder for consumers to sue.
>
> Oath's revised policy covers "analyzing content and information when you use our services (including emails, instant messages, posts, photos, attachments, and other communications), linking your activity on other sites and apps with information we have about you, and providing anonymized and/or aggregated reports to other parties regarding user trends," according to media reports.

But wait! There's more!

> Gizmodo reports that Oath "even notes that it can collect Exchangeable Image File Format (EXIF) data from images uploaded by the user—information that can be used to identify everything from the date and time a photo was taken to the geolocation associated with an image."

It's splendid how corporations keep wriggling deeper into our personal lives. Again, it may get even worse yet; items 12.b-c comprise their "we can do anything" clause.

Loading…

Further, presumably if they can snoop in your email for targeted advertising, they also can search robotically for politically incorrect content you might be sending to your friends. Are there rules against that? Of course! Item 2.d.ii of their Terms of Service says you can't:

> …make available any content that is harmful to children, threatening, abusive, harassing, tortious, defamatory, vulgar, obscene, libelous, invasive of another's privacy, hateful, or racially, ethnically, or otherwise objectionable

"Otherwise objectionable" couldn't possibly be any more vague. Their guidelines page does clarify further, though:

> **Don't use hate speech.** Hate speech directly attacks a person or group on the basis of race, ethnicity, national origin, religion, disability, disease, age, sexual orientation, gender, or gender identity. As noted above, we're a diverse global community of many types of people, with different beliefs, opinions, sensitivities,

> and comfort levels. Please be respectful and keep hateful and incendiary comments off of Oath. Read these tips for confronting hate speech **from the Anti-Defamation League**.

This goes beyond ordinary PC standards. Freely debating religion, morality, or immigration policy becomes effectively impossible. Even calling spergs socially maladjusted is “hate speech” too. So is putting down baby boomers. The list goes on.

Promoting censorship damages their reputation more than images like this.

Further, they endorse the ADL’s standards, but that alphabet soup outfit certainly has an agenda. They’ve been pushing online censorship since the 1990s when cyberspace was new. However, the Internet was never designed to be a big hug-box.

What’s “hate speech” anyway?

When leftists express strong opinions, that’s free speech. Big difference!

Note well, “hate speech” isn’t a legal term, or even a precise concept (it’s less definable than “heresy”). Rather, it’s a new framing tactic to delegitimize politically incorrect viewpoints. This deliberately restricts debate. Controlled opposition opinions are tolerated, but standards change.

In practice, the mildest criticism of multiculturalism becomes “hate speech”. So does thoroughly researched discussion about biological group differences. Politically correct censorship always applies standards unevenly. People can argue incessantly for militant Islam, open borders, radical feminism, gender bending, having sex with anything that moves, or exterminating Western civilization. However, *arguing against these* might get accounts shut down.

That’s the problem with vague phrases like “hate speech”. (Censorship advocates consider this a feature, not a problem.) Cubicle munchkins you’ll never meet determine what you’re allowed to say. For example, your caustic remarks about Canadian chicks might be deemed “hateful” by a blue-haired feminist with a nose ring, working for some effete Silicon Valley technocrat.

Summary

Would you trust big business to safeguard your privacy and freedom of expression?

Huge corporations that can rewrite the rules any time are effectively omnipotent. They’ve drastically limited any recourse by their customers. They even get to decide what you’re allowed to say in private email. Actually, these changes—dressed up with perky public relations—are nothing companies haven’t already been doing. Still, the simultaneous timing seems rather odd.

Governments sometimes behave this way too; that’s considered despotic. Is it okay when corporations do that?

6 Reasons Mexico Is A Highly Underrated Latin American Country

May 30, 2018 | by Jake Nomadic | Link | Original Link

Mexico doesn't get much love from many a male digital nomad and perpetual traveler. It's just not a sexy spot. Too close to the US, violent, greener pastures, and all that good stuff. For guys going to Latin America, Colombia reigns supreme. Brazil still has the sex appeal. Hell, even Peru has gained some steam as of late.

But, Mexico? Building a wall comes to mind when the country rolls off the tongue. And let's not forget about the cartel violence. Many a gringo laments why on earth someone would head south of the border when talking about travel.

Mexico is a highly underrated Latin American country. While there's a reason or three to avoid Mexico, many a traveler will find the country to be damn near paradise under closer inspection. Here's why:

1. Best Food In Latin America

I love the Dominican Republic. Colombia is one hell of a good time. But let's not beat around the bush here, the cuisine in those countries sucks arse. Bandeja Paisa is decent, but that's about it. And while Peruvian food is good, Mexican food is excellent.

I'm not just talking about the carb-loaded stuff that sticks to the side of the ribs and adds extra weight. That stuff is good. Don't get me wrong. I'm certainly a fan of tacos,

enchiladas, and their ilk. But what I've been impressed with is the seafood.

In my beachside village by the sea, I eat plump shrimps, tuna steaks, and red snapper by the daily. It's fresh from the Pacific Ocean and costs pennies on the dollar.

2. First-World Amenities

Maybe not first-world. But you'll find more amenities that mimic the States here than you will in other Latin American countries. It's easier to buy things like Greek yogurt or a juicer that won't break down in three days while living in Mexico. There's Walmart. There's Sam's Club.

Sure, their stores are extra American, but it makes moving to a new country and grocery shopping a lot easier. And there's more than just Walmart.

Coworking spaces are all over Mexico. Hell, the WeWork on the outskirts of Roma Norte is undoubtedly scenic with that view of the Angel de la Independencia. Even the coworking space in my village by the sea features 50 Mbps of Internet. Same goes for my apartment – 50 Mbps Internet with an ocean view. Try finding that on the Caribbean coast of Colombia.

Yoga studios, CrossFit gyms, and pilates can be found in most Mexican cities. And stuff just works in Mexico, which isn't a guarantee in many a Latin American country.

3. Better Beach Towns

I've been unimpressed with beach towns throughout Latin America. Haven't found one I'd consider livable after nearly four years of traveling throughout the region. Punta Cana? Hell no. Cabarete? Nah. Las Terrenas? No way. Boca Chica? Lol. Cartagena? GTFO. Santa Marta? Nope. Mancora? No, sir. Montanita? Never. San Juan del Sur? Not possible. Bocas del Toro? Not happening.

There's not a single beach city in Central America, Colombia, Peru, or the Dominican Republic that I'd consider livable. Ecuador may have a few, but I haven't explored the country enough. Brazil probably has a handful, but I'm learning Spanish – Portuguese isn't on my radar.

That leaves us with Mexico. And luckily for beach lovers, it seems Mexico has some great, livable beach towns. Mexican beach towns offer more amenities, better nightlife, and more. I've checked out Mazatlan, Playa del Carmen, Cozumel, and Cancun. The first two are highly livable.

You also have spots like Puerto Vallarta, Veracruz, Ensenada, and Acapulco – which are all on my radar.

4. Low Cost Of Living

Mexico is pretty cheap these days. The exchange rate is favorable, and your money goes far here. For $1,500-2,500 USD a month, you can live a high quality of life in nearly every city throughout Mexico.

For example:

Loading...

- My beachfront condo with good Internet and ocean views costs me less than $30/night.
- Uber rides start at $1 USD and generally always cost less than $5 USD.
- Monthly membership at my yoga studio starts at $25 USD.
- Beers at local bars tend to cost $0.80-2.00 USD in my village by the sea.
- A kilo of tuna steaks runs me $7 USD at the local market.

Sure, certain things are just as expensive as the States. Coworking spaces are always $100+ here. Gyms tend to cost $30-50 USD a month. But overall, there’s good value.

5. The Girls

Mexican girls don't get a lot of love from many a male traveler. Well, in comparison to other Latinas. Often, that's due to the square-shaped bodies many perceive they have from too many tacos and enchiladas.

I won't lie to you, they're not as attractive as the women in Colombia. Nor are they as interested or friendly as the Peruanas. Plus, online dating isn't as popular in Mexico as it is in other Latin American countries.

Guys can go to South America and schedule dozens of dates online without much effort. Dating in Mexico seems to take a little more than a few swipes and a couple of copy and paste messages in Spanish – once you get outside Mexico City. But don't get it twisted. There are enough good looking girls in Mexico to feed the needy. And it's not that difficult to meet them.

Being a foreigner, especially if you're from somewhere that's not the States, still has value here. Aka if you're from Europe, you'll get a little extra love in Mexico compared to the gringos.

Here are a few other things I've noticed…

Mexico City might be the most liberal big city I've visited in Latin America

There's 23+ million people, complete anonymity, and the culture isn't that far off from the States. There's an endless supply of women on Tinder in CDMX and nightlife bumps every day of the week. The average looking girl here isn't too cute, but the population numbers work in your favor. You'll definitely find some stunners. There's a reason many dudes make Mexico City home for months on end. Hell, I met a few dudes that loved CDMX (Mexico City) so much that they lived there for years.

If you speak a little Spanish, you'll be more than happy with your options here

While it's not the greenest pasture in Latin America, there's nothing to complain about when dating in Mexico if you can have a conversation in Spanish. That being said, you'll

get hurt more here than in South America for not speaking Spanish. Most Mexican girls have met gringos before. So, speaking Spanish is an easy way to stand out.

Mexican culture is more conservative than other places in Latin America

You see families on the beach, there's not that many girls on Tinder and sex tourism isn't rampant like it is in other countries. If you want a girlfriend, many a smaller city in Mexico will offer solid options for foreigners. For living a savage life, I can't say you'll enjoy things as much here like you would in the Caribbean or in Colombia. Well, outside of Mexico City.

Mexico is a country of 120+ million people, so it's a little harder to put a finger on the looks of girls here

There's a lot of variance depending on where you are in the country. For ass men, this isn't like Colombia. I'd surmise it's nowhere near Brazil. The faces can be stunning here, though. Overall, there's quality to be found. But I haven't been here long enough and explored enough cities to give a full on judgment on that side of things.

6. Ideal Visa Situation

I got 180 days on a tourist visa upon arriving in Mexico. While I'm relatively new here, I believe one leaves the country for 24 hours and then can return to get another 180 days on their visa.

Some claim Mexico makes it pretty easy to stay year around on a tourist visa to ensure old gringos living in Mexico can stay as long as they please without issue. For digital expats looking to base up and live in a city long term, this is a significant benefit.

Don’t Discount Mexico

Sure, it’s violent – although that’s a little overblown. Knock on wood. And it’s close to the States, so some appeal isn’t there. But Mexico has a lot to offer digital expats. It’s not Colombia, but there’s no denying the quality of life in Mexico is high when compared to other Latin American locales.

ABC Cancels Roseanne Barr’s Show For Comparing Obama Adviser Valerie Jarrett To An Ape

May 30, 2018 | by News Syndicator | Link | Original Link

Via Hollywood Reporter:

ABC, in a stunning move, has decided to cancel its Roseanne revival following star Roseanne Barr’s racist tweet Tuesday.

“Roseanne’s Twitter statement is abhorrent, repugnant and inconsistent with our values, and we have decided to cancel her show,” ABC Entertainment president Channing Dungey said Tuesday.

Early Tuesday, star, head writer and executive producer Barr attacked Valerie Jarrett, a senior adviser to former President Barack Obama, in a since-deleted tweet in which she said **“Muslim brotherhood & planet of the apes had a baby=vj.”**

Barr subsequently apologized: “I apologize to Valerie Jarrett and to all Americans. I am truly sorry for making a bad joke about her politics and her looks. I should have known better. Forgive me — my joke was in bad taste.”

Walt Disney Co. CEO Bob Iger also weighed in on the decision to cancel Roseanne: “There was only one thing to do here, and that was the right thing,” he tweeted.

Added executive producer Tom Werner, whose company Carsey-Werner exec produced the original Roseanne and its revival: “I support ABC’s decision to cancel the show in the wake of Roseanne Barr’s most recent reprehensible tweets. Our goal was to promote constructive discussion about the issues that divide us. It represented the work of hundreds of talented people. I hope the good work done is not totally eclipsed by these abhorrent and offensive comments, and that Roseanne seeks the help she so clearly needs.”

Showrunner Bruce Helford added in a statement of his own: “On behalf of all the writers

and producers, we worked incredibly hard to create an amazing show. I was personally horrified and saddened by the comments and in no way do they reflect the values of the people who worked so hard to make this the iconic show that it is."

Barr's tweet prompted a massive outcry across social media, with thousands condemning the actress-comedian's comments and calling on ABC to cancel her series. The Disney-owned network's decision to cancel the comedy marked the first time the network has taken action in response to one of Barr's controversial tweets.

Loading...

Axing the Roseanne revival was no small decision for ABC. The rebooted comedy debuted its nine-episode run midseason and finished as the TV season's No. 1 scripted series on all of broadcast. Roseanne had been averaging a 5.5 rating among adults 18-49 and 19.3 million viewers with live-plus-3 lifts. With a full week of time-shifting, those numbers climbed to a 6.4 rating in the key demo and 22.1 million viewers. Either way, Roseanne was the highest-rated and most watched series of the broadcast season, eclipsing NBC's This Is Us and CBS' The Big Bang Theory — which had been in a heated battle for top status.

In response to Barr's tweet, co-star and exec producer Sara Gilbert — who was the driving force behind the revival — blasted her longtime friend and colleague. "Roseanne's recent comments about Valerie Jarrett, and so much more, are abhorrent and do not reflect the beliefs of our cast and crew or anyone associated with our show. I am disappointed in her actions to say the least," she wrote on Twitter. "This is incredibly sad and difficult for all of us, as we've created a show that we believe in, are proud of, and that audiences love — one that is separate and apart from the opinions and words of one cast member." Wanda Sykes, who served as a consultant on season one, also tweeted Tuesday that she would not be returning to the series following Barr's racist tweet.

Roseanne was slated to return in the fall for an expanded 11th season of 13 episodes as

ABC looked to build on the show's momentum. In a victory lap of sorts, Barr was the centerpiece of ABC's upfront presentation to Madison Avenue ad buyers earlier this month. The revival was part of a larger effort by Dungey — broadcast's lone African-American network topper — to cater to the underserved community who turned out in force to elect Donald Trump. The success of the Roseanne revival has prompted other broadcast networks to pick up a wave of multicamera comedies in a larger push to program for middle America. (To that end, Fox revived Tim Allen comedy Last Man Standing a year after ABC's cancellation.)

Roseanne has never shied away from taking on timely and controversial subjects. In the spirit of its original run, which had a history of addressing larger political and social issues, the revival famously opened its new season with an episode that explored the country's divisive response to President Trump, whom Barr has publicly supported. The storyline between Roseanne Conner and her sister, Jackie (Laurie Metcalf), was designed to reflect the debate among Trump's working-class base and spur a larger discussion. The May 22 season finale, likewise, set the stage to explore a larger debate about health care in America.

The reboot also found itself under the microscope earlier this season when a one-off joke taking aim at fellow ABC comedies Black-ish and Fresh Off the Boat was blasted as being "reductive" and "belittling."

Middle-Aged Women From Sweden Pay To Have Sex With Young Male Migrants

May 30, 2018 | by William Adams | Link | Original Link

The manosphere has, for some time, speculated in regard to females penchant for male migrants and what the causes for this kind of seemingly preposterous pattern of behavior are.

Roosh has emphasized the lack of offspring as a reason why some members of the opposite sex go crazy and use pets or migrants as substitutes for real babies. Cheateau Heartiste has looked upon the everlasting female urge for strong men as a reason why male migrants are so popular among feminists, despite the fact that the former tend to be more prone to assault and rape than native men.

Others point to pathological altruism (women tend to feel bad about those poor migrants, even if they are real or potential rapists or were economic migrants in the first place) and general irrational behavior (women tend to lack the ability to make substantial fact-based consequence analyses). Also, more males means less competition for females. That's maybe why they are less keen on letting their poor global sisters in. Everything that is bad for (white) western men are good news for leftists and feminists.

Whether or not the root cause is somehow linked to one or several of the above-mentioned explanations, another *consequence* is that a significant amount of women actively seek out young male migrants for sex. Last year, here in Sweden, a couple of women were reported or even charged in the aftermath of having sex with adolescent males (or at least young adults), between 13-20 years of age. While nationalist media outlets were not surprisingly inclined to interpret these cases as proof of a widespread phenomenon, even liberal media wrote about this indelicate matter.

Western European couple adopts an African “child”

I had a couple of online discussions after having read reports on these events and suggested that these women seem to yearn for younger males, which is morally and legally questionable, whereas politically correct social media (((friends))) stressed that these decent middle-aged women just wanted to take care of the poor migrants and that sexual benefits were only rare occasions.

Well, now even the massively left-leaning government radio outlet Sveriges Radio has reported on the very same topic, and the phenomenon appears to be far more common than the limited number of cases that earlier reports implied. Multiple young male migrants from North Africa, especially Morocco, who dwell at the infamous Sergels Torg in the center of Stockholm, are sought out by older women who offer them food and shelter in exchange for sexual favors. This typically occurs after the daily drug dealing has ended for the day, at late night.

Loading...

It seems to be a pretty good deal for ugly wrinkled women to be banged by weather-beaten yet fairly athletic youngsters with an exotic flavor. As thirsty as many native men may be, extremely few of them are still willing to sleep with your friend's mom or grandma. The aesthethic bottom of society is left for the, quite literally *and* metaphorically, allochthonous scavengers who are seldom reluctant to say no to such generous offers.

If one zooms out on this subject and looks at underlying causes, it is obvious that economic, political and sociocultural factors matter. Middle-aged western women, especially in feminist Sweden, feel entitled, and as being part of the global middle class they have the amount of disposable income needed to travel abroad in order to have sex with alluring foreign males or seek them out at locally. It's the equivalent of older men who go to Pattaya in Thailand, or the city's sex district for that matter.

[image]
In Sweden some call these women *batikhäxor*

Inequality of income, whether at the local or global level, will always exist to some degree and I don't see a problem with isolated instances of single women who want to get sexual satisfaction from younger guys.

However, this is a broader and deeper problem who among other things reflects the great surplus of men, a situation which was created completely "artificially" by the left hands of feminists and globalists. If these were truly concerned about poor and vulnerable people they could have just let more females in instead of physically able young men from Africa and Asia. This looks more and more like a politically correct scam that only red pill men dare to speak about.

Swedenstan, alongside cucked Canada, with prime menstruator Trudeau as the true proponent of crazy ideas, are leading the sexes astray with weird ideals and ideas that in the long run do no one no good. Not even the male migrants who come to the West in

large numbers.

Did Prince Harry Make The Right Choice By Marrying Meghan Markle?

May 31, 2018 | by Beau Albrecht | Link | Original Link

British royal weddings are deeply imbued with tradition. There are reasons. Choices of spouses have consequences, and the Tudor dynasty was an exemplary case study. But since absolutist monarchy became obsolete, and the royals no longer call the shots, does that mean tradition can be thrown out the window?

Earlier, that didn't fly. In brief, King Edward VIII had to abdicate the cushiest gig in the world to marry Wallis Simpson. There were three strikes against her: American, divorcee, and promiscuous. The royal wedding of Prince Harry—potentially a successor to the throne—demonstrates that attitudes have changed. Still, was that a good idea?

Should kings and princes marry virgins?

Not to put too fine a point on it…

Traditionally, premarital chastity is highly important for royal brides. Used merchandise isn't fit for kings and princes. Why? Catherine Howard's marriage to the aging Henry VIII ended disastrously. She was disappointed on her wedding night, because she thought all rulers have twelve inches.

More seriously, Queen Lolita was caught in two affairs: the king's "friend", and an undisclosed Chad Thundercock returning from her past. (Long before, Catherine's first experience was her music teacher feeling her up. That was consensual, but well into Pizzagate territory.) These days, such scandals keep tabloid reporters employed; back then, *heads rolled*. In the aftermath, concealing a future queen's sexual history became a crime.

Making a fool of a king is pretty serious business, especially by cucking him. Dirty laundry about the queen's—or potential queen's—past is also scandalous. There indeed have been royal bastards, sometimes very effective ones. Still, it's pretty important to know that the dynasty's heir isn't the milkman's kid. Although today's royals are basically just celebrities, they're still important national symbols.

The tradition ends

Res ipse loquitur.

Before the Baby Boomers, premarital sex was strongly discouraged. That's been a cultural norm since the ancients figured out how reproduction works. These days, virgin brides are pretty scarce outside of devout religious communities. It's likely little different for the upper classes. Will this bring turbulence to the Harry-Meghan relationship? We're about to see. Much depends on whether her Cock Carousel days are truly over.

So Meghan was an actress; that might mean trouble. Still, it gets worse. A *Daily Mail* article lists several of her former liaisons. The first described—Simon Rex—is a Hollywood actor, model, and rap musician. As "Sebastian", he also did three pornos marketed for gays, though "Hand Solo" would've been a better stage name. That's *merely the beginning*; the article is a gruesome read. Wallis Simpson now seems nearly virginal by comparison. Further, Catherine Howard's "alpha fucks, beta bucks" gold digging was small potatoes.

Could this mean trouble? Number of premarital partners strongly correlates to divorce risk. Bailing on her previous marriage after two years isn't encouraging either. So is having divorced parents, among other factors. Apparently Harry didn't sign a prenup. *Uh oh…* Royal breakups were a smidge messier when Henry VIII reigned, but orderly exit plans are prudent and discourage misbehavior.

Activism

Fortunately, she's not this bad. Hopefully that won't change.

I was a captive audience to the royal wedding's livestream. When the commentators started laying it on too thick, I tried to drown out the blather with Metallica and Estirpe Imperial. However, some of it leaked through. They highlighted Meghan's activism, and (of course) her commitment to feminism. They certainly weren't the first to bemoan how leaving all that behind is unfortunate. Accordingly, she has closed social media accounts relating to that.

Loading…

By tradition, the royal family avoids political statements. That's odd, since they once ruled with absolute power. Their influence might be very helpful, if they have something sensible to say. However, that's quite uncertain, given today's epidemic of rich people becoming limousine leftists. Be all that as it may, an SJW princess could generate much controversy and make the whole family look silly.

Perhaps the tradition of refraining from politics will go out the window too. When do leftists ever shut up for propriety's sake? She's none too classy, according to her own brother, so anything's possible. What happens if she starts ranting about "mansplaining"? Will they take away her limo and make her ride in a Yugo?

Further, if they split up, not even tradition stands in the way. After Princess Diana's divorce, she was involved in various causes that got her much liberal admiration. Still, to her credit, campaigning for AIDS awareness and against land mines was pretty inoffensive. If Meghan goes full SJW, she'll be a royal pain indeed.

The ethnic angle

There's been much discussion about Meghan's Black ancestry. Predictably, the media

spins it positively. Actually, she looks less African than the impostor Rachel Dolezal, but the ceremony played it to the hilt. It's highly doubtful that Harry was under orders to choose her specifically. (Likewise, his mother's later taste for Muslim boyfriends was her own idea.) Still, it couldn't have worked out better for the globalist shmucks trying to wreck Europe.

Historically, sometimes royals aren't related to the public they rule. King George I didn't even speak English, and neither did Junior. (The later House of Windsor dynasty is really part of the Saxe-Coburg und Gotha family, although their Anglo-Saxon subjects aren't much different.) Still, on the other side of the pond, the memory of foreign royals likely inspired the Constitutional provision specifying that an American President must be born in the USA. That was still taken seriously until Obama.

Although it's unremarkable for royals to seek matches in nearby countries, marrying outside of their race is another matter. That used to be very rare in the general public too, though massive propaganda efforts are having their effect. However, among the nobility, that was pretty much unheard of until Coudenhove-Kalergi. Surely the usual suspects are gloating about this latest development.

I'll assume Harry's choice is more than just celebrity virtue signaling. However, it will be played to the public that miscegenation is acceptable, even hip and fashionable. Al Sharpton was pretty ecstatic. So marrying Whites is the ultimate measure of success for Blacks? *Dude, really?* Muhammad Ali would've disagreed. On that note, a bloke named Rudyard Kipling wrote:

> Let the corn be all one sheaf—
> And the grapes be all one vine,
> Ere our children's teeth are set on edge
> By bitter bread and wine.

All that said, it wouldn't have been impossible for Harry to find someone who is classy, not a middling actress, younger than him, and ethnically British or at least descended from kindred peoples. That's not too burdensome of a job requirement, especially since being a prince is a pretty cushy gig.

Conclusion

This is royal gold-digging done correctly.

Weddings are supposed to be happy occasions, and I hate to rain on anyone's parade. (Still, her brother had far worse to say.) It's all about the loooove, as the gay marriage advocates constantly told us. Even John Lennon said love is all one needs, right?

Actually, the purpose of marriage is a stable environment to raise children, who are *essential* to further one's lineage and nation. All other considerations (love, sex, shared living arrangements, etc.) are secondary. This is especially so for dynasties. When royals like Henry VIII let their little heads to the thinking, trouble often followed.

All that said, perhaps Wallis Simpson wasn't so bad after all!

Should You Get Super Cut For The Summer?

May 31, 2018 | by Larsen Halleck | Link | Original Link

Summer is rapidly approaching, which means that we're going to all be wearing progressively lighter and more revealing clothing—which can of course be a blessing or a curse for your game, depending on your body composition. If you've read my regular workout articles, you should have at this point built up a fair degree of muscle, lost some weight, and developed a mighty fine degree of flexibility, all of which will certainly make you more attractive to the fair sex.

But some want to take it a step further—to not only make themselves strong and functional men, but to trim the body fat to such a degree that every single vein and muscle is defined, in the way that a rough diamond is cut and polished to a radiant luster.

Having, in fact, gotten down to a single digit body fat percentage for the first time in my life recently (9.1% to be precise), I have written this article to tell you how to do so, and whether or not, in fact, you even should do so.

That high pitched sound you're hearing is the REEEEEE-ing of fat women shrieking that "BMI means nothing!!1"

The Meat and Potatoes

Eating a "cutting diet" is in fact, one of the easiest things you can do, provide that you have imbibed the concept of ***eating to save money.***

I underlined it, italicized it, and bolded it—that's how important it is. If you understand this concept, combined with what foods are healthy and what foods are not healthy, I guarantee that you will not only lose weight, but you'll lose weight without even realizing you're losing weight. By far, this is the most important concept you have to understand for this diet to work,

I'll go out on a limb here and say that, for general purposes of health and well-being, you do not need to spend more than 200 dollars a month on groceries, and every cent of that 200 dollars can be put into good, healthy, nourishing food.

And please, before we get into how to do this, spare me any whiny fatbody diatribes about how "it's so hard to eat healthy food in America, muh food deserts", and so forth. By the time you finish this chapter, you'll never sling that excuse again. You can read more about why that excuse is bullshit right here.

A good rule of thumb for purchasing food is to ask yourself "Would a man from the year 1900 recognize this as food?" If not, it's probably not something you should be eating. Rates of obesity, heart disease, and other objective measures of bad health were much lower in the gilded age then they are now, to say nothing of a few centuries before that. Avoid junk food, or overly processed food, keep it simple, and you should be fine. And if you really need help on what food is healthy and what food is not healthy, go to a

dietician, they'll likely have free pamphlets that will give you all the information you could ever possibly need.

Loading...

You've gone to public school, you've seen the food pyramid—it's not bad, which is rare to say for a government program, but in fact the government has made some good efforts in reducing obesity—if only because the USG realizes that a nation of lardasses will not be productive laborers. Just eat this, and you'll more or less get all the nutrients you need.

And if you're eating to save money, you will by definition be eating less food. A good way of rationing food that I have discovered is to eat "from the palm of your hand". What this means is that all your units of food should fit in the palm of your hand. IE: Your vegetables should fit in the palm of your hand, your meat, and your carbs. That's a meal, low in calories and low in price, while still giving you all of the necessary nutrients to function.

Does that sound a little bland? It can be, but you can throw various condiments and spices on it to liven things up a bit. Since you're trying to lose weight, you're going to have to prioritize nutrition and cutting calories over being a gourmand. You can't have everything in life, deal with it.

That will all suffice for purposes of simply losing weight and retaining a good amount of muscle mass (of course, if you want to ADD more muscle mass, you will of course have to increase your caloric and nutritional consumption).

Yours truly doing the “shirtless douchebag mirror selfie” thing—for my adoring fans, of course.

Should You?

Now that you know how to do it, you must ask—should you? From what I have seen, cutting down to a body fat percentage lower than 12% or so doesn’t really have too much of an effect on your athletic performance, either positive or negative. While I have found that my calisthenic training has been made slightly easier with getting super lean, I have seen it argued that, depending on what sport/athletic discipline you’re engaging in, trimming down to such a high degree may make you *less* physically capable (in particular pure strength sports like Olympic weightlifting, certain types of grappling, etc.), as well as taking away your body’s natural “shock absorber”—there’s a reason why Roman gladiators cultivated a layer of flab, and it was specifically to minimize the likelihood of a deep cut causing them to bleed out.

Similarly, bare knuckled boxers seem a bit more “burly” than their modern counterparts, probably to reduce the sharp pain of bare knuckles, but on the other hand, having that clearly defined V-Taper and abdominal muscle chain does sit well with the ladies—and when you get down to it, why else are we all here? So it really comes down to a debate of aesthetics versus performance. And as for what you specifically want, that’s entirely up to you.

American Female Dies After Falling Out Of A Party Bus While Drunk

May 31, 2018 | by News Syndicator | Link | Original Link

Via Fox News:

The blood alcohol level of a 20-year-old student from the University of North Carolina at Charlotte was more than double the legal limit when she was killed earlier this month after falling out of a party bus, toxicology results revealed Tuesday.

Polly Rogers had alcohol in her system that amounted to 0.19, more than double the legal limit for driving in North Carolina, WSOC-TV reported, citing toxicology results by the North Carolina's medical examiner office. She was not driving the party bus at the time.

> A post shared by POLLY (@pollyrogers) on Apr 10, 2018 at 4:40pm PDT

Rogers was on the party bus, rented out by UNCC fraternity Kappa Sigma, on May 1 heading to a bar when she fell out of the emergency exit window on North Tryon Street in northeast Charlotte. She was hit by multiple cars, ultimately killing her, police said.

Juan Vasquez, who witnessed the incident, told WSOC-TV there was chaos moments after Rogers fell onto the road.

Loading...

> A post shared by POLLY (@pollyrogers) on Feb 5, 2018 at 6:34pm PST

"Out of nowhere I just come out of nowhere and started yelling, 'Yo, stop, stop, stop, slow down, slow down, call 911, call 911. Call an ambulance! Everybody kept driving and

driving and driving," Vasquez recalled.

It's still unclear how Rogers managed to fall off the vehicle. The police report stated several people on the bus were consuming alcohol at the time.

Victor Rabb, owner of Charlotte Party Charters, was cited in the incident. The Charlotte-Mecklenburg Police Department said the party bus was uninsured and had a fake license plate, FOX 46 reported.

3 Hypocrisies The Porn Industry Uses To Pretend They Are Moral

June 1, 2018 | by Jared Trueheart | Link | Original Link

Porn is now an accepted feature of life in the digital age. It's nearly impossible that it wouldn't be. Everyone has cell phones and every cell phone acts like a mini-TV connected to the internet. When you combine that with Youtube-style free websites like Pornhub and Youporn, everyone is essentially walking around with porn in their pockets. The anything-goes debauchery of 21st-century life only further makes porn a given rather than exception.

The porn industry is not immune to the value society places victimhood. While it may sound oxymoronic to hear that the porn industry is trying to virtue signal, the acceptance of porn as the norm allows them the possibility to do so, but the nature of what the porn industry does prevents them from being taken seriously no matter hard they try. Here are three examples of that.

1. Mental Illness

From November of 2017 to January of 2018, five prominent porn stars died due to either suicide or drug abuse. The most prominent of these five was August Ames. After she called out a male porn star for also doing gay porn (which puts anyone he works with at increased risk of contracting HIV), she was attacked by SJWs for being homophobic. This, combined with depression and perhaps other mental illnesses, drove her to commit suicide. She was found in a California park hanging dead.

After the deaths of Ames and the four other girls, the virtue signaling started. The Adult Performer Advocacy Committee states, "We ask that our community practice compassion, sympathy, and empathy with one another because there is so much outside of our industry working against us." August Ames husband (yes, they get married for some reason) started The August Project after her death.

The porn industry's hypocrisy comes from the claim that the outside world is working against them. Actually, porn is more accepted than ever. Nobody is preventing them from getting mental health services. Their mental illnesses come from two places. The first is the self-selecting nature of the porn industry. Only people with some emotional issues choose to present themselves as sex objects. Only women with self-esteem issues let groups of men pulverize their anuses and present the evidence to the world for a few thousand dollars.

The second source of their mental illness, as if the first wasn't enough, is what happens to their psyche after they start making films. In just four years, from ages 19-23, August Ames shot 270 scenes. That's more than one scene a week in which she presented herself as a sex object to the world. How could anyone who wasn't deluding themselves see her as anything but? The same could be said for any of the other four that died.

The world isn't working against the porn industry's paltry attempts to solve their mental health problems. The porn industry is causing its own mental health problems.

2. #MeToo

In 2016 Nikki Benz, Canadian porn star and 2010 Penthouse Pet, claimed to be sexually assaulted on set. She accused the director and male co-star of the film of the assault, which was filmed. After meeting with the DA, the DA declined to take her case. Benz then decided to sue the production company for failing to put procedures in place that would have protected her.

Loading...

Benz had agreed to perform an anal scene during this shoot. The crew was dismissed leaving only her, the director, and the male co-star on set. She claims that she was brutalized (presumably, something along the lines of forced sodomy) to the point of bleeding and that she was choked by the director while taking it from the co-star. She claims she had not agreed to any third party participating beforehand.

Part of the reason this case was declined by the DA is that jurors would have a hard time distinguishing between acting (the industry refers to porn stars as actresses or models more than prostitutes) and reality. Given some of the most degrading things these "actresses" do this is reasonable. So while porn stars can certainly be assaulted, and while they should not be assaulted, is it anyone's fault but their own when nobody takes their assault claims seriously?

When you present yourself a certain way to the world, the world will see you that way, for better or worse.

3. Female Empowerment

There is a Netflix documentary about the shady underbelly of amateur porn called Hot Girls Wanted. Roosh has an excellent review of it. But there is also a Hot Girls Wanted Netflix documentary series. The first episode of that is about female porn directors and how empowered they are. If you watched that episode you'd think porn is actually good for women. Porn lets women take sexuality into their own hands or some other nonsense.

Mother and daughter pornographers

But five dead women tell a different tale. Matt Forney on Return of Kings asked three years ago when the UVA rape scandal and mattress girl were in the news why the rape of porn star Cytherea went ignored by feminists. Were those five dead women, Cytherea, and Nikki Benz empowered by their choices?

I once worked with a girl who was later revealed to have been in a backroom casting couch scene. Nobody thought much about her before we knew. Afterward, it's all we saw in her. I'm no doctor, but there's no doubt in my mind this girl had emotional problems that required the aid of mental health professionals. Instead, she tried to get into porn and just got one more giant problem to stack onto all her other problems.

As much as the porn industry would like to virtue signal and play the victim, their recorded actions betray them. They lack virtue. They are victims of their own decadence.

Study: People Of The World Are Getting Incredibly Fat

June 1, 2018 | by News Syndicator | Link | Original Link

Via AFP:

In 27 years from now, almost a quarter of the global population will be obese, researchers said Wednesday, warning of the mounting medical bill.

If current trends continue, 22 percent of people in the world will be obese by 2045, up from 14 percent last year, according to research presented at the European Congress on Obesity in Vienna.

One in eight people, up from one in 11, will have type 2 diabetes — a form of the disease that generally hits in adulthood as a result of being overweight.

“These numbers underline the staggering challenge the world will face in the future in terms of numbers of people who are obese, or have type 2 diabetes, or both,” said researcher Alan Moses of Danish healthcare company Novo Nordisk’s research and development department.

“As well as the medical challenges these people will face, the costs to countries’ health systems will be enormous,” he added.

In the United States, the researchers found obesity will increase from 39 percent of the population in 2017 to 55 percent in 2045, and diabetes from 14 percent to 18 percent.

Loading…

In Britain, the proportion will swell from 32 percent to 48 percent, with the incidence of diabetes rising from 10.2 percent to 12.6 percent.

Already, health systems are spending “huge sums just to treat diabetes,” the researchers said in a statement.

Moses and a team analysed population data for all countries in the world, obtained from a World Health Organization database.

They divided the population of each country into age groups, and further into body mass

index (BMI) categories, and looked at trends to make projections.

BMI is a ratio of height to weight used to divide people into low- to high-risk categories for developing heart disease, high blood pressure, type 2 diabetes and certain cancers.

A person with a BMI of 25 or more is considered overweight, and 30 or higher obese.

A healthy BMI ranges from 18.5 to 24.9.

The researchers said turning the tide on obesity would require “aggressive and coordinated action”.

“Each country is different based on unique genetic, social and environmental conditions which is why there is no ‘one size fits all’ approach that will work,” Moses said.

“Individual countries must work on the best strategy for them.”

The research results have not yet been published in a scientific journal but were peer reviewed for selection at the congress.

A global survey in 2016 said the ratio of obese adults had more than doubled in the 40 years since 1975.

Of about five billion adults alive in 2014, 641 million were obese, it found.

Swedish Clergy Has Stopped Referring To God As Male

June 3, 2018 | by Howard C. Roark | Link | Original Link

Sweden SJWs continues their never ending quest to destroy all the remains left of a once prosperous, nationalistic, traditionalist and virtuous society. This time Sweden's SJWs newest target is our beloved Lord Jesus Christ and his gender. Yes, you heard that right. The Church of Sweden dares to attempt a change in God's gender.They had the audacity to change the word of God and Jesus in an attempt to push their Marxist degenerate political agenda even further.

How did the Church of Sweden lose all of its integrity?

As you all know, the causes for the downfall of Swedish Society, a once exemplary and successful Nordic country, can be blamed for a series of events, bad political decisions and their infamous Feminist Party. But when talking about the current degeneracy contaminating Sweden Evangelical Lutheran Church we can trace this issue back into one single event. Which is the appointment of Antje Jackelén to assume the role of Archbishop. She is Sweden's first female to become an Archbishop.

Unfortunately, instead of Ms. Jackelen using her power and influence to bring back family values and traditionalism to a country that is quickly losing its national identity, she is being used as a puppet by Swedish political SJWs to bring their cultural Marxist madness into the house of God.

> "The Church of Sweden is urging its clergy to use gender-neutral language when referring to the supreme deity, refraining from using terms such as "Lord" and "he" in favour of the less specific "God."
>
> The move is one of several taken by the national Evangelical Lutheran church in updating a 31-year-old handbook setting out how services should be conducted in terms of language, liturgy, hymns and other aspects."

How is Jackelen and her crew bringing Swedish SJWs's political agenda to the church?

[image]
" Antje Jackelén has been well-received by Pope Francis, who is also a promoter of heretical doctrines."

Since her appointment as Archbishop, Jackelén and her crew have been slowly pushing Sweden's infamous gender neutral agenda to their national Evangelical Lutheran Church by urging its clergy to omit the fact that Jesus/God is a man during their sermons. When confronted by journalists about her decision to promote the omission of God's gender, she denies it by claiming "its all fake news". She claims that rather than "banning" masculine pronouns for Jesus they are just advising the clergy to "avoid" using them.

Not surprisingly, she is part of a group that in 2009 allowed the first openly gay female Bishop and pushed for banning the use of crosses. The latter was deemed "too offensive" for incoming Muslim refugees. Her band of "progressivists" also pushed for Lutheran Churches to set up Muslim prayer rooms for arriving immigrants.

I wonder if Ms. Jackelen can sleep at night knowing that she is twisting the holy message of the Bible. She is the false prophet whose main goal is to spread wickedness to the last refugee of good souls in Sweden. In other words, she is a wolf in sheep's clothing.

The false prophets are sabotaging God's word

Loading…

> "And the Lord appeared unto him in the plains of Mamre: and he sat in the tent door in the heat of the day; And he lift up his eyes and looked, and, lo, three men stood by him: and when he saw them, he ran to meet them from the tent door, and bowed himself toward the ground, And said, My Lord, if now I have found favour in thy sight, pass not away, I pray thee, from thy servant: Let a little water, I pray you, be fetched, and wash your feet, and rest yourselves under the tree:" – Genesis 18:1-4.

As explicitly proved by the Bible, Sweden's Evangelical Lutheran Church is committing a serious doctrinal error by submitting into this crazy gender neutral idea. The Holy Bible leaves no room for speculation about God's gender and makes it perfectly clear, as shown above, that the Lord is a man. Further irrefutable proof of God being a men can be found in John 4:16-17 , John 15:26 and John 16:7. In all those occurrences, The Holy Trinity is literally identified as male!

They are cursing themselves with Apostasy

> "I charge thee therefore before God, and the Lord Jesus Christ, who shall judge the quick and the dead at his appearing and his kingdom; Preach the word; be instant in season, out of season; reprove, rebuke, exhort with all long suffering and doctrine. For the time will come when they will not endure sound doctrine; but after their own lusts shall they heap to themselves teachers, having itching ears; And they shall turn away their ears from the truth, and shall be turned unto fables." – 2 Timothy 4:1-4.

We were warned about a time when the church would no longer strictly follow the word and wisdom of God. Their greediness for power, through a political Marxist agenda, corrupted their hearts and souls. No real Christian in Sweden shall follow their teachings, since their message is rigged with ulterior motives.

> **Revelation 22:18** For I testify unto every man that heareth the words of the prophecy of this book, If any man shall add unto these things, God shall add unto him the plagues that are written in this book:
>
> **Revelation 22:19** And if any man shall take away from the words of the book of this prophecy, God shall take away his part out of the book of life, and out of the

> holy city, and from the things which are written in this book.

God made it perfectly clear, that if anyone had the audacity of profaning his wisdom by adding, twisting, or removing his sayings, not only he would make sure to remove them from the book of life, but he would also make sure to curse them forever. Ms. Jackelen and her band of progressives are playing with fire here, risking themselves and their so called “Church” to be cursed forever. Real Christians wont fall for this wickedness disguised as Christianity.

Conclusion

Whether you are a Christian or not, trying to change ancient religious texts dating back to 2000 years ago just to fit into your authoritative political narrative is not only disrespectful, but also childish and the uttermost sign of sacrilege, especially when you are trying to modify them for the main purpose of making the almighty Jesus Christ “gender neutral” to appease SJWs. For an Archbishop, Ms. Jackelén has already proved her incompetence for the role. She lacks any respect or real understanding about Christianity.

The real reason she got hired was to be used as a human Trojan horse by the Swedish SJW-like government to spread their gender neutral cancer to the image of the Lord. No respectable archbishop would dare to twist the word of God for a stupid Marxist agenda. May the Lord guide the sane and faithful Christians and what remains of the clergy in Sweden to not allow this madness and sacrilege, against Christianity, to continue in their society.

2 Obstacles You Must Overcome To Rebuild Your Life

June 3, 2018 | by Pete Fletcher | Link | Original Link

Soon after my wife died I poured out my grief onto my hard drive, then later I posted it to ROK. You can find it here. Thanks to you guys who offered support.

Men commented on that article saying they wished they could have what my wife and I had, but it was too late for them. This is a common thread on ROK; youth following their passions, then having nothing left to attract a good woman. Or they were divorce-raped or cuckolded. Men wrote of cynicism and betrayal, society's collapse and the rise of feminism.

Men are expected to marry but marriage isn't easy. A man is expected to love, honor, and cherish a mate with emotional needs which no man can fully meet nor even understand. As for me, there were a few times I wanted to kill that woman and we had discussed drowning the children. But I didn't. And we didn't. Then we quit fantasizing and went back to the work of making it work. And it did work. And we fulfilled our vows, loving and staying faithful "til death do us part." Which happened last month. And now here I am with a lot of other late-middle-aged men wondering *what do I do now?*

I wanted to wait before writing again, but men asked for more. I mulled this over and recalled those writings on ROK and so… I'm going to be blunt about this. Hang on.

Two Obstacles We Face

There are two obstacles to starting over in life. The first is ourselves. Within our spirits we each hold the accumulation of a lifetime of… life. We have so much dreck in our spirits

that it spills out into our speech and all over our actions and settles deep into our hearts. We carry this on our backs while desperately trying to run away from it. We just can't do it.

Which leads to the second obstacle: We can't fix ourselves. This is common to all of mankind. (Some call it original sin, but it's not. Babies aren't born guilty, they're born incapable). The damage is deep in our spirits and we don't even know for sure what or where our spirits really are. Think your spirit as your "heart" but much more.

The First Start

Let your imagination wander back to when you were a newborn baby. Just born. Pure, innocent and helpless. Now think back even further, to your time in your mother's womb when your soul emerged, your body was still forming and your spirit was clear.

You heard your mother's heart, her voice. You should have heard your father's voice, deep and steady. Other sounds gently intruded as you tumbled in your darkened, water-filled world. Your young spirit took all of these in and you were at peace, pure and innocent. God knew you, and all you would later do, and he loved you, deeply.

Then: LIGHT! COLD! NOISE! SHOCK?

Slap on butt! PAIN! Nurse with needle! OUTRAGE!

"Oh, he's SO cute!"

Thank God Almighty that our memories weren't working very well back then. Nevertheless your spirit took it all in and you started becoming you.

Loading…

You should have gone home to a warm house and a loving family. A lot of men never got this. You don't remember, but your spirit took it all in.

There are no perfect parents nor perfect homes and you ran into problems well before the age of two, maybe three. You won't remember them, but those things were absorbed into your spirit and became a part of who you are now. But you couldn't know it at the time. By the time you were four, your spirit had absorbed it all, the good and the bad. Most of who you are was already formed by then.

You remember kindergarten. You may have had wonderful parents and good friends. Or a single mom, or way too many "parents", and gangbangers on the couch. If you didn't grow up in a home with your own father, your chances of growing up to be a strong, stable, competent man were greatly reduced. You had no say in that.

Too Late

You hit puberty and reacted to your mom and the girls in pretty much the same manner as your dad did, or whoever did (or didn't) fill that role. Your spirit continued to absorb your world into itself as you struggled to become the man you wanted to be.

You began making major decisions then and, as your body grew to adult size, you made some that would affect the rest of your life. Ready or not, you were on your own. Many boys grew up to be adults without achieving manhood at all. I wrote about this here.

So you barreled through your twenties, thirties and beyond, mostly on the momentum of decisions you made as a young man, and now you find yourself in the middle of your life, which may be completely off the tracks. You're not going anywhere. The best you can do is survive. *What do you do now*?

The Second Chance

We all made big decisions back then, but who we are was pretty much set in those pre-memory days when our spirits were absorbing everything. And we couldn't do anything about it. We were *born* incapable. But you are not incapable any more. You don't have to stay this way!

Remember that the first obstacle is you and the second is that you can't do anything about the first. Now remember that God knew you way back before then, and he knew what you would do and what you would become, and *he loved you then, and he still does now*. Because of this he made provision for you to receive his Spirit and begin again. Same body, same soul, rebuilt spirit. A new man, a new you.

Just go into any Church with a cross on top and ask how to do this. You *can* start over again. I did, and so have hundreds of millions of other men over the last two thousand years. And just as many women have had their righteousness restored. You can meet them in Church.

As for me, I'm hurting but I'm gonna be okay. Leave a comment. Let me know how you're doing.

Female Police Officers In Belgium Are Easily Disarmed And Murdered By Islamic Fanatic

June 4, 2018 | by David G. Brown | Link | Original Link

Two very physically unimposing female police officers have been murdered in the Belgian city of Liege, killed by an Islamic extremist on temporary release from prison. This same man, Benjamin Herman, also made quick work of another male, a 22-year-old bystander, who tried to intervene. The women were stabbed from behind, quickly disarmed, and had their own weapons turned on them by their attacker.

The price of pretending that women are as capable as men

Herman, apparently a career criminal, then took a female civilian hostage and was later neutralized by special forces, but not before he wounded another four officers. Even if the deceased assailant was not a timid, bespectacled accountant or pen-pusher, the consummate ease with which he terrorized Belgian police without assistance is extremely troubling.

A group of similarly inclined and well-organized men would probably be capable of routing most of the police stationed in Liege (or any other politically correct West European city) before tactical or special forces could respond.

This woman did not deserve to die, but why was she tasked with protecting the streets of

Belgium?

Official and unofficial gender quotas in police forces and militaries get people killed. We have said this before here at ROK and I am certain we will be forced to say it again. Soraya Belkacemi and Lucille Garcia were, very alarmingly, reported as being aged 53 and 45 respectively. Though police officers are not invincible and the pair were certainly ambushed, those tasked with protecting society should not be so readily disarmed. In the main, they are being opposed by fit and hardened young men, many of whom have used a gun in a real situation more times than law enforcement.

Belgium already has a severe problem with Islamic migrants (and converts like Herman). Nevertheless, the response of authorities is to populate the police force with women and other unimpressive candidates, people whom 99% of reasonable individuals would identify as soccer moms, not law enforcement "professionals." Entire societies are currently at risk as a result.

It's time for extreme honesty, but not schadenfreude

The Orly Airport terrorist who took a female soldier hostage.

I take no pleasure in the death of these women–nor should anyone else. Yet anyone who argues that their gender, age, and physical condition (or lack thereof) didn't play a role in their deaths is kidding themselves. We saw a comparable incident at Orly Airport just outside Paris last year. Which soldier did the attacker here decide to disarm? The female one. Again, she had her own weapon turned on her.

Loading...

If anything, political correctness in police forces and militaries is becoming more brazen. Whereas previously a dainty *young* woman would be paired with a much larger and more

intimidating male partner, police in Belgium are now pairing old women with each other. What could possibly go wrong with such inspired, rational decisions in the name of diversity?

I can concede that the issue isn't only a female one—plenty of unsuitable men benefit from the reduced standards that accompany female quotas, official or implicit. But the weakest link is always going to be groups of ill-equipped women of whom much less is expected.

Here are **some** "great" examples of how public safety is being deliberately sabotaged across the West to satisfy feminists:

- Female applicants for the Australian Army need to perform a pathetic four push-ups;
- 70% of the officers failing police fitness tests in Britain have been women, so these tests have been called "biased" and "sexist";
- New York-based female "firefighters" are allowed to fail their fitness tests at least six times and can graduate irrespective of these failures; and
- Women who want to be Marines need to do three times fewer pull-ups than men.

So what happens when things truly go wrong in the 21st century West?

In a real societal emergency, don't rely on emergency services, law enforcement, and the military

When the shit really hits the fan, all the chickens will come home to roost. Years of underperformance in recruitment and enforcing basic standards are going to render fire departments, police forces, and militaries highly ineffectual in dealing with nationwide or even just citywide emergencies.

Despite the professionalism of many able and dedicated first responders and soldiers, their efforts can only be diluted and severely undermined when many of their colleagues

have no place in helping to protect society.

Remember, feelings don’t defend society, competence and skill do.

3 Reasons Why You Should Join A Dancing Society

June 4, 2018 | by Leo Straken | Link | Original Link

When I started college, I was a nerdy physics major who did not have a lot of experience with women. I used my college's Ballroom and Latin dancing society to change that. Over the course of a few years, I went from near invisible to being one of the most popular guys in the society.

If you are a guy who was similar to me heading off to college or living in a city with some decent dance classes, you too can use the dance classes to get good with women. If you're already a stud, consider doing it to increase your options. No matter what level you start at, there are several benefits to attending these classes. Let's review three of them.

1. You Will Meet Many Women

The most obvious benefit is that women will outnumber men by two to one or even three

to one. You will get a chance to dance with most of them, in close proximity, holding each other. For a guy without much experience with women this can be a great help. Just don't be what some of the girls referred to as an "awkward sweaty palmed boy." That won't help matters.

In most beginner classes you will dance with one partner, then when the song is over you'll swap on to the next girl. This is a great way to meet a lot of girls in a short time. I'd suggest not starting off with spitting game and trying to pick up chicks. When you dance with a girl, talk with her at first and get to know her. When the song is over, move on to the next one.

You'll start finding ones that you like. Speak to them after the lesson or arrive to the next lesson ten minutes early and start chatting them up then. You're going to see most of these girls every week for the next year or more. So treat it as any other social scene you would be part of. Opportunities will come about if you keep putting yourself out there.

2. Learn To Lead Women Properly

The second major benefit is learning how to lead. Leading a woman in dancing is an encapsulation of the masculine/feminine dynamic, for in all dancing the man leads and the woman follows. Most men get this wrong and think it is about pushing and pulling their partner around the dance floor.

Instead, proper leading in dancing is an assertive act, not a forceful act. It is done through displaying power and strength in your body language and posture, by taking all of your steps with purpose and intent. It is a subtle thing that is communicated through your hands and balance. When done correctly, your partner moves with you as she will find it irresistible not to, and she will be happy to do it.

The best example of proper leading that I have come across is this:

The benefits of this cannot be overstated. You will find yourself leading women as you go about your daily life, when you are in conversation with a girl, when you are in bed with her. You will feel how she moves and responds to you and you will adjust accordingly.

Loading...

3. Attain Mastery, Get Attention

The last major benefit you will get is developing a sense of mastery and skill. Jack Donovan in *The Way of Men* states that mastery is one of the foundational pillars of masculinity. If you practice at dancing for a year or two with intent you will start to develop some serious skill at it. And once you start getting to a point where you are better than most of the other guys there, you will have attained a level of perceived mastery.

Yes, there will be dancers out there who will always be better than you, but are they at your club, to the girls that are available to you right then and there? You will be the master. And your options will be correspondingly great. All the girls will want to dance with you. Some of the girls will be interested in you.

I know this from my experience. When I started dancing none of the girls paid any attention to me. After one and a half years of diligent practice and getting a spot on the podium at the yearly Inter-Collegiate competition, suddenly my star went up.

At lessons, whenever one song ended and it was time to switch partners I would have several girls running at me in their high heels and skidding to a stop so that they could partner me for the next dance. This never failed to amuse me. At socials I was kept on my feet by all the women that wanted to dance with me. This was a sharp contrast to the times before winning the medal and displaying skill, where I only got a dance if I asked a girl.

Besides the women, there was the sheer joy of working hard at something over a period of time in order to get better at it. I'll be honest, I joined the dancing society because I wanted a way to meet lots of girls and get better with them. But I stayed for the dancing. All of these benefits that I had with women became secondary concerns. They happened after I put in the required effort.

But it paid off. I went from relative unknown to one of the more popular guys in the society, more popular than I had ever been in my life before. I could get girls worked up in some of the sexier dances. There is a saying that dancing is a perpendicular expression of a horizontal desire, and this was proved true to me time and time again.

After some steamy, sexy sessions in either Argentine Tango or Cha-Cha, my partners would be flushed, with heaving breaths, looking exactly as if we had just done a horizontal act instead of a vertical one. It's an intoxicating feeling, doing that to a girl in public.

If you give this a try and put in the effort for a year or two, you too will reap similar benefits. It’s a great feeling having a pretty girl compete with the others to dance with you, give you a wink as you start, and become increasingly turned on as you spin her around. Keep your head about you, and the chances of you expressing this act on a deeper level are a lot higher.

Legal Bare-Knuckle Fighting Makes Its First American Appearance Since 1889

June 4, 2018 | by News Syndicator | Link | Original Link

Via Breitbart:

Arnold Adams, a 32-year-old MMA heavyweight, pounded ex-UFC fighter D.J. Linderman's face into a bloody mess in front of 2,000 rowdy fans at a hockey rink that usually hosts birthday parties and skating lessons in Wyoming's capital. Tens of thousands more tuned in for the pay-per-view event, which featured 10 bouts, including four heavyweight fights in a tournament format.

Fans were lined up outside the Cheyenne Ice and Events Center more than an hour before the first major bare-knuckle event in the U.S. since 1889. Forrest Peters, from Cheyenne, was among those in attendance. He came to cheer Estevan Payan – who served in the same Army unit as Peters – and to witness history.

"With the bare-knuckle fighting and everything, having them bring it back for the first time in over 100 years, you knew it's pretty exciting to see," Peters said, "and especially having it here in Cheyenne, kinda out here where the West is still a little wild."

Payan, of Tempe, Arizona, didn't disappoint, flooring Omar Avelar at 1:57 of the opening round of a 145-pound match.

The quickest knockout occurred when Sam Shewmaker used one punch, an overhand right, to send Eric Prindle to the canvas 18 seconds into their heavyweight bout.

"It felt like hitting a home run," said Shewmaker, a fourth-generation stone mason from the tiny central Missouri town of Gravois Mills. "I didn't think I would be able to catch him

that early, but luckily I did."

Shewmaker has been an amateur boxer for years, and when he heard about the Wyoming event, he tried out and earned a chance to compete.

"I never dreamed that it would be legal to be able to do this," he said. "I've been in plenty of illegal bare-knuckle fights. I mean growing up where I did, in the area I did, it's kinda rough, but people are gentlemen about it, too. You can fight, you get up, you're done, you shake hands and you go get a beer."

Bec Rawlings, a 29-year-old from Brisbane, Australia, won the only bout of the night featuring women, stopping Alma Garcia with a TKO in the second round.

Rawlings noticed little difference from fighting with gloves.

"It felt the same to get punched as in an MMA fight, which is what my background is," she said. "The difference was my knuckles more – when I punched her, I felt it a little bit more. Other than that, it was really nice just to let go and showcase my boxing skill and not worry about a takedown or a kick.

Loading...
"It felt like the rawest form of combat sports to just go out there and throw your hands and let loose."

Tony Lopez lost the most entertaining fight of the night, a five-rounder against fellow Californian Joey Beltran. The crowd was on its feet and roaring as the two heavyweights traded punches and slugged it out to the end, with both men bruised, cut up and bloodied.

"The knuckles was nothing," the 44-year-old Lopez said. "… I've always wanted to fight with no gloves. Got a chance to do it here."

Beltran and Shewmaker joined Ricco Rodriguez and Maurice Jackson in the semifinals of the heavyweight division tournament, which will be held in September, also in Cheyenne.

Heralded underground bare-knuckle heavyweight Bobby Gunn also fought, knocking out Irineu Beato Costa Jr. in 41 seconds.

Cheyenne resident Bryan Pedersen, an MMA fighter and former state lawmaker, successfully sponsored a bill in 2012 to create a state board of mixed martial arts – the first state to do so. While MMA was thriving, bare-knuckle competition wasn't even considered when the law was passed. However, Wyoming jumped at the chance to host Bare Knuckle Fight Championships action after 28 other states passed.

The International Boxing Hall of Fame said the last significant bare-knuckle bout was July 8, 1889, when John L. Sullivan went 75 rounds to beat Jake Kilrain. Even that event was illegal and had to be staged under the cover of secrecy as most states had outlawed the non-gloved version of boxing.

Fighting was forced underground until 2011, when the Yavapai Nation sanctioned a match that Gunn won over Richard Stewart at the tribe's reservation in Arizona. The bout drew more than a million viewers, and the promoter of that event and the Wyoming one,

David Feldman, realized there was a hungry market for bare-knuckle fights within the combat sports fanbase. It took him another seven years to find a state willing to sanction the next event.

Wyoming became the first state to sanction and regulate the activity sport its commission reviewed research that indicated bare-knuckle boxing would be safer than other combat sports, especially when it comes to concussions, Pedersen said, adding that the commission, which he chairs, spent about a year developing the new rules governing the sport. He also viewed Saturday's competition, and future bouts, as a way to generate economic diversity and promote the Cowboy State and its strong sense of Western independence.

The Ultimate Morning Routine For Higher Testosterone Levels

June 5, 2018 | by Mo Saleem | Link | Original Link

What is the first thing you do when you wake up? Do you act with intention and purpose or do you immediately reach for your phone and scroll through email and social media? If you answered with the latter, you are literally giving up your sovereignty and power every single morning. You are training yourself to be reactive and beta.

How you start your morning sets the tone for your entire day. As the adage goes:

> Win the morning. Win the day.

In this article you'll get the ultimate 6-step testosterone-boosting morning routine that will set the foundation for a day of discipline, productivity, and focus.

Ready?

Let's do this.

Step 1 – Hydrate

The first thing you need to do upon waking is chug some H2O. The average male body is made up of 60% water and you have just spent a number of hours without it. Even slight dehydration can suppress your testosterone and growth hormone production. But getting hydrated is only half the battle. You also have to make sure that you're not drinking estrogenic water.

Water is one of nature's best solvents, i.e. the solids it comes into contact with eventually dissolve into it. This can be dangerous given the fact that a large portion of us drink water from plastic bottles. A lot has been said about plastics here at ROK, and for good reason – plastics are a silent killer of masculinity. They contain chemicals like BPA and phthalates, both of which exert potent estrogenic effects on the male body. Avoid drinking water from plastic bottles.

Ideally, you have access to spring water that is pure of chlorine, heavy metals, and contaminants. Findapsring can help you discover a spring near you. The next best option is to opt for a Pur filter to attach to your faucet or a Brita pitcher you can fill up and stick in the fridge. Either way, start your mornings with at least 12 ounces of pure, filtered water.

Step 2 – Make Your Bed

After getting hydrated and using the toilet, go ahead and make your bed.

Admiral McRaven, retired Navy Seal and author of *Make Your Bed: Little Things That Can Change Your Life*, said it best:

> Making your bed will reinforce the fact that the little things in life matter. If you can't do the little things right, you'll never be able to do the big things right. And, if by chance you have a miserable day, you will come home to a bed that is made – that you made. And a made bed gives you encouragement that tomorrow will be better.

Unfortunately, I was unable to find any evidence to support the fact that making your bed boosts testosterone, but do it anyway. It will continue to build on the positive momentum you have moving forward.

Step 3 – Get Lit

Next up, get outside and soak some sun. Your skin synthesizes vitamin D upon exposure to sunlight and vitamin D is crucial for testosterone production. If you're currently deficient in vitamin D – and chances are, you are – then topping up your levels is perhaps

the simplest way to boost your testosterone.

"But Mo, I live in Alaska and the sun barely comes out. Does this mean I'm doomed to a life of low testosterone?"

Worry not my friend. If you live in a part of the world that doesn't get much sun (or you're just too lazy to go outside), opt for a daily dose of 2000-5000IU of vitamin D3 to help optimize your levels.

Loading...

Step 4 – Breathe Deeply

Breathe motherfucker.

Whether it's work, family, or financial pressures all of us have something that we're stressed about. The problem, though, lies not in the stress itself but in our inability to deal with it effectively. This leads to the stress becoming chronic. Chronic stress is a testosterone killer, but deep diaphragmatic breathing is a proven way to conquer it.

Diaphragmatic breathing is a central tenet of the Wim Hof Method. Wim Hof is a modern day alpha superhuman known for setting a number of extreme sports world records and climbing Mount Everest during a blizzard in nothing but his shorts. What's more is that he has taught groups of men to achieve similar feats. I bought and completed Wim Hof's 10-week program a while back, but diaphragmatic breathing is a practice that I've carried on with till today.

Here's how to get started:

Inhale through your mouth and/or nose deep into your diaphragm and exhale without any effort. Maintain a consistent rhythm for about 30 breaths. You should begin to feel a slight lightheadedness and tingling sensations in your extremities. This is a sign that your blood

is becoming hyper-oxygenated. At this point, take one last deep breath, exhale, and hold for as long as you can. When you feel the urge to breathe again, take a deep breath in, hold for 20-30 seconds, and let go. That is one full cycle of what's come to be known as the Wim Hof Method.

I do three cycles of this every single morning. I also make it a point to track my breath retention progress. When I started, I could only hold my breath for 45 seconds. Today, I can hold it for over 3 minutes.

Step 5 – Hop Into a Cold Shower

The direct link between cold showers and higher testosterone levels is not conclusive, but there is some evidence to suggest that the testes perform better in cold temperatures. Also, cold showers are a proven way to combat inflammation.

But the biggest reason to start taking cold showers everyday is to exercise your willpower. I've been taking cold showers for about 3 years now and I still find myself resisting them. But after the shower is over, I always feel a sense of pride and accomplishment in overcoming that little voice in my head that didn't want to do it.

As Aubrey Marcus writes in *Own the Day, Own Your Life*:

> In the smithy of life, cold exposure is the anvil against which your character is shaped and your resolve is hardened, so that you might confront your chronic stress and conquer it more completely.

Step 6 – Skip Breakfast

If you believe that breakfast is the most important meal of the day, you're still plugged into the bluepill world of mainstream consciousness.

Skipping breakfast is a proven way to boost testosterone, skyrocket growth hormone, ward of oxidative stress, regulate insulin, and increase cellular repair. You can read about the science behind all these benefits here.

Simply push your first meal back 4-6 hours after waking. If you get hungry in between, drink some black coffee to suppress your appetite. The second option is to go for the 16/8 method of intermittent fasting whereby you choose an 8-hour window within which to fit all your meals, e.g between 12pm – 8pm, 10am-6pm, etc.

Conclusion

Starting your day with these six steps will not only boost your testosterone levels, but will also help transform you into a more grounded and powerful version of yourself.

4 Dishonest Rhetorical Tricks Liberals Use To Win Debates

June 5, 2018 | by Beau Albrecht | Link | Original Link

Logical fallacies have been documented since the Greeks and the Romans studied rhetoric. Bad reasoning isn't specific to any one ideology. Still, leftists must use it quite frequently, since they've had hardly any good ideas in decades. These are easily absorbed by their fuzzy heads, lacking proper Red Pilled bullshit detectors.

With practice, you'll notice their word games repeated like guitar riffs.

1. Straw man

Suppose you're in a forum and dare question the wisdom of shouting from the rooftops about "anything goes" bedroom arrangements. *The triggering begins.* Some SJW accuses you of being a prude who only approves of the missionary position. You argue your point, but the dogpiling worsens. Some stranger emails you, diagnosing you as feeling guilty about sex. Those two post a nauseating duet about "tolerance". *You never actually argued against immorality; merely for keeping private things private.* Disgusted, you unsubscribe; they can have their damn echo chamber to themselves.

That's exactly what happened to me once. By overstating an opponent's position—putting words into someone's mouth—they "win" the debate.

This is what extremists look like.

Example: The "right-wing extremism" narrative

Ridiculing and stereotyping illiberal viewpoints goes far back. Archie Bunker is a prime example, though there are much earlier ones. So is the tactic of associating anything they don't like with some figure they've put much effort into discrediting. For example, concern about Communist subversion is "McCarthyism". If you argue against multiculturalism, you might get compared to a former German chancellor with bad press.

Timothy McVeigh lashed out savagely following the Branch Davidian bungle. Quite cynically, the media spun his gruesome retaliation into a propaganda victory. This was used to discredit the militia movement, even though McVeigh *was never part of it*. Bill Clinton blamed talk radio rhetoric, although Rush Limbaugh never told anyone to blow up buildings. Those concerned about government overreach became objects of suspicion. Even if they only espoused peaceful change, they all got tarred by the same brush.

Countermeasures: It's tempting to react in kind. (Leftists have plenty of dirty laundry themselves.) However, it's better to be on guard for this tactic and call out anyone for overstating your position. If someone resorts to name-calling, or comparing you to a meanie from history, that's evidence your opponent can't argue against your ideas on their merits.

2. Begging the question

This means beginning an argument with the conclusion as a premise. Basically it involves treating the matter of debate as a settled fact, rather than arguing why it's true. Presuppositions like "Where are we going out to supper?" are fairly innocent. Other unstated assumptions are preposterous, like "The Patriarchy".

In a formal debate, both parties must agree on basic premises. Otherwise it's a sermon, not a discussion.

Holy Pennsylvania Avenue, Batman! It's the Virtue Signal!

Example: Gay marriage

Asserting that something is a right, even when it's not recognized by law or even tradition, is a common tactic. Many examples could be cited, but the gay marriage debate became the noisiest one in decades. Honest proponents argued that Adam and Steve should be *granted the right* to get married. Lazy debaters claimed that Adam and Steve *already had this right*, and its infringement is the worst atrocity since Tamerlane massacred Central Asia.

Interestingly, liberalism denies the existence of natural rights. However, they'll fudge on this principle when it suits their purpose. Ultimately, it was settled by the Supreme Court, once again legislating from the bench. Gay marriage is hidden somewhere in the 14th Amendment, but legal scholars somehow missed that part for over a century. *Who knew?*

Countermeasures: Watch for *unstated assumptions*. (Note that if you challenge fundamental leftist principles, the usual result is screaming.) If someone groundlessly asserts a right to something, ask "Why do you believe this is your right?" If someone says "The Patriarchy is doing *X*", ask who The Patriarchy's Chairman is and where its Board of Directors meets. They need to do the work to prove their point.

Loading...

3. Appeal to pity

Western civilization has strong traditions of charitability, hospitality to wayfarers, fairness, etc. Lately these virtues have been weaponized against us, leading to pathological altruism and other absurdities.

Manipulating the public to feel sorry for some group (often following a well-publicized example) is used to stifle opposition.

Scientists, doctors, and engineers coming to revitalize Europe's culture and make it vibrant

Example: The European refugee crisis

Alan Kurdi, drowned on the beach, became emblematic of Syrian refugees. The *Lügenpresse* spun the photo into a powerful propaganda piece. Per the narrative, anyone disagreeing with open borders is a monster who *wants children to die*.

There are some inconvenient facts. Kurdi's family had settled in Turkey, where he was safe with them. (In fact, Turkey remains one of the region's better-off nations following their national revival.) Later, they wanted to go to Greece and eventually arrive in Canada's greener pastures. However, the rubber dinghy was overcrowded to twice its rated capacity, and Alan wasn't in a lifejacket. The human traffickers they hired were responsible, not immigration policies.

Further, the recent migrants are overwhelmingly men who could defend their towns, not women, children, or the elderly. Actually, most aren't even Syrians or war refugees. These economic migrants want a free ride, know exactly where to apply for welfare, and meddlesome globalist types assist them. Despite European governments catering to them ludicrously, they don't want to assimilate or even work, and are an endless source of trouble. Portraying them as kids desperately fleeing for their lives is disingenuous. But let's not allow facts to get in the way, shall we?

Countermeasures: Recognize attempts to instill guilt trips or generate pity. Further, the propagandists usually only tell half-truths, or distort the facts. A little research fixes that.

4. Misdirection

Several sloppy debating tactics avoid addressing the topic's substance:

- Presenting an irrelevant conclusion;
- Skipping steps in logic;

- Talking in circles;
- Repeating oneself endlessly to wear down the opposition (this is how small children debate);
- Distracting the discussion down endless tangents;
- Focusing on a very narrow facet of an issue, addressing only strong points;

…And so forth.

We demand you pay the bill too!

Example: "My body, my choice"

This type of bumper sticker logic is actually pretty catchy. That's an example of micro-focusing. The slogan actually makes sense, so long as *one vital fact* is completely overlooked.

Namely, the abortion debate is about whether it's okay to kill babies, not about abstract "choices". It's not even about "controlling our bodies", unless one stubbornly refuses to acknowledge how mammalian biology works. (For one matter, there's another body involved too.) This also got spun by feminists into misleading "rights" rhetoric, and the Supreme Court exceeded its authority as usual. Anyone who disagrees is a monster who *doesn't want children to die*.

The object is getting the audience to disregard the *real* topic, like a stage magician creating a momentary distraction. Abortion fans aren't too concerned about the babies not having a choice in their own survival. Neither do they care that a small body is destroyed that only needed a few more months and then could've been adopted. Quite ironically, the very same liberals champion the sanctity of life when murderers face the death penalty.

Countermeasures: Be on guard for opponents skipping steps in an argument, trying to bog down the discussion, or boxing you in with framing tactics.

Miss America Will No Longer Have A Swimsuit Competition

June 5, 2018 | by News Syndicator | Link | Original Link

Via Breitbart:

The Miss America Organization has announced an end to the swimsuit portion of its competition and the practice of judging contestants specifically on their outward appearance.

Gretchen Carlson, who was crowned Miss America in 1989, made the announcement of the new direction on Tuesday's broadcast of Good Morning America, CNBC reported.

Branding the pageant "Miss America 2.0," Carlson said, "We're not going to judge you on your appearance because we are interested in what makes you you."

“Miss America 2.0”

Carlson, the latest head of the pageant’s board of directors, added that many contestants expressed criticism of the swimsuit and evening gown portion of the pageant in this day of a heightened awareness of sexual harassment.

Carlson, who filed a sexual harassment suit against Fox News Chairman Roger Ailes precipitating his departure from the network, added that some contestants told pageant officials, “We don’t want to be out there in high heels and swimsuits,” in this era of #MeToo awareness.

The changes will refocus the pageant on talents, Carlson said. “It’s what comes out of their mouths that we care about,” she added.

Loading…

Miss Helsinki (she's in the middle)

Like many institutions, the pageant has not been free of controversy. Last year outrage erupted when email communications were leaked showing some pageant officials disparaging contestants for their appearance and sexual choices. The resulting scandal caused the pageant to clean house among its upper leadership. The shake-up brought Carlson and three other former Miss Americas to lead the organization, including Laura Kaeppeler Fleiss (2012), Heather French Henry (2000) and Kate Shindle (1998).

The elimination of the swimsuit segment ends an over 100-year tradition. Indeed, the pageant was created in 1921 out of an annual Labor Day beauty contest started in Atlantic City, New Jersey, in the early 1900s. A main feature of the original beauty contest, the "Inter-City Beauties," was the public swimsuit contest held on the Garden Pier. The winners originally vied for the "Golden Mermaid" trophy.

Globohomo Rainbow Mafia Is Forcing The U.S. National Soccer Teams To Wear Gay Pride Jerseys

June 6, 2018 | by John Carver | Link | Original Link

In the late 2010's, the alphabet soup "LGBTQ" agenda in western countries has successfully made the decades long transition from tolerance (stage 1), to acceptance (stage 2), to support / pride (stage 3), to the next frontier of workplace coercion (stage 4).

Depending on your line of work, you may now have ***absolutely no choice*** as to whether or not you despise, tolerate, accept, or support the ever-expanding homosexual juggernaut.

In 2018, the United States national soccer teams are now the latest bigtime organizations to be 100% on the butthole surfing bandwagon, and are mandating that their players wear special sodomy supporting jerseys during their June matches for "pride" month.

This is nothing more than a growing element of queer fascism infecting western society with more cultural AIDS, and is akin to being made to wear an unwanted Star of David on your back while earning your bread playing kickabout.

Mother of God…

More Globohomo Workplace Bullying Of Christians, Conservatives, And Masculinity

Are you Christian and think that homosexuality is a sin? Do you think that two men having their merry way with each other is absolutely revolting? Or maybe your just plain sick of this degenerate agenda being shoved down our throats via relentless Twitter hashtags, Google doodles, and Youtube ads?

And finally, *'won't someone please think of the children!'* when the untrained eyes of our offspring are forced to bear witness to all these salacious and lewd gay pride events?

Well Globohomo Inc. doesn't care about you when it comes to professional soccer now. Support the sodomizers or be benched, booed, and roasted! Because "this is America" and like, "it's the current year" and stuff.

The Rainbow Mafia Already Made A Sacrifice

Jaelene Hinkle

Meet the devout Christian Jaelene Hinkle. She's currently a defender for the small market 'North Carolina Courage', and last year she turned down a call-up to the U.S. national women's team because of the jersey the team was going to wear for two friendlies to honor the LGBTQ community. Hinkle respectfully said she "felt so convicted in my spirit that it wasn't my job to wear this jersey."

Accordingly, Hinkle was axed from participation in those June matches, and has not been called up to the national team ever since. (Professing your love for the Bible and the 97% of people who are heterosexual has consequences didn't cha know?)

Let's sacrifice her to our gay God! – Portland fans

Now apparently this has only become news **this year**, as another set of June "pride month" matches are about to take place, and news travels fast.

Loading…

Hinkle recently received boos in SJW-magnet Portland (where else?) when her Carolina Courage beat the Portland Thorns. Some in the crowd waved rainbow flags at her, and one fan even brought a banner saying "Personal Reasons" in rainbow colors, a clear jab at the reason given for Hinkle's dissenting choice in 2017. She didn't give any interviews after the match, obviously bewildered and perhaps even somewhat fearful of her safety.

Conclusion – Say No To U.S. Soccer

Look how "down with the cause" and soy we are!

I was never a big fan of U.S. Soccer / Association Football to begin with. In fact, the biggest interest I ever took in the sport was when the men's team actually made it to the World Cups. My far-fetched dream was that success in the tournament would silence snooty Europeans and Australians who always bitch about the United States being too insular, and improve the common citizens (admittedly) rather pitiful understanding of global geography.

Well, that ain't happening this year.

Iceland, a tiny "white supremacist" island of little over 300,000 Nordics, qualified for the 2018 World Cup as the smallest participant in history. Meanwhile, "diversity is our strength" USA with over 300,000,000 people from every skin color and hair color imaginable from the Crayola crayon box, couldn't seal a win over tiny Trinidad & Tobago to (barely) make it to the tournament in Russia.

The diversity-free Icelandic soccer team is going to the World Cup, with less than 1/1000th the population of “diversity is our strength” USA which failed to qualify.

It really does tear into the American psyche how tiny and benign countries like Portugal, Iceland, the Netherlands, or Trinidad and Tobago can dominate the United States in the realm of well… anything, and accordingly interest in international soccer will remain only a niche market for quite some time to come.

That niche market is only going to get ***smaller still***, as the more right-leaning half of an increasingly polarised country is going to tune out international U.S. soccer in large numbers now. I highly recommend doing the same, and punish the U.S. soccer administration for their moronic pro-HIV and anti-fertility virtue signaling which is leading to kindhearted heterosexuals being bullied.

7 Reasons Why American Men No Longer Pursue Their Women

June 6, 2018 | by G.S. Luthra | Link | Original Link

Baby boomers like to bash them for not “being man enough” to get married and have kids, but common sense will reveal that the “perks” and “benefits” of marriage in America have become less and less lucrative to the average hardworking man. Due to this, many men have stopped pursuing American women altogether. Here’s why:

1. False Rape Charges

Men aren't stupid; they see what's going on and are scared of being put behind bars over a silly allegation without evidence. Although they may not talk about it, men do not want to take a chance that jeopardizes their reputation, family, and not to mention hard-earned finances.

2. Low Quality Of Women

Take a good look around the states and you'll soon go myopic as the hideous sight will

cut your testosterone down to soy boy levels. You may not have sexual desire for a while due to the ugliness as it only encourages you to live like a celibate hermit.

3. They Won't Ever Be Satisfied

It is impossible to satisfy an American woman, period. They are so spoiled and brainwashed by Disney and other media outlets that no man can please them. Even if you give them the world, they will seek the stars, so men have given up as it's too much of a burden financially, emotionally, and physically.

4. They're On Drugs

It amazes me how many girls in their early twenties are taking some over the counter medication for acne, depression, or what have you. In the past, previous girls I had slight interest in would reveal problems like Crohn's disease, mental instability, hives, and weird things like they can't eat kale and alike. I tried to get serious with one even after

admitting her serious problem, but that insecurity kept ruining everything and I had to stop seeing her.

And it is hardly ever just one problem. Usually, they have a physical ailment or two which leads them to have mental problems. American women are just a wreck.

Loading…

5. They're Too Career-Minded

Too many are focused on competing and achieving financial success, and while that is fine, they take it to the extreme. By the time they reach their career goals, they're no longer attractive. The stress takes a toll on their bodies, and it clearly shows early on, even as soon as twenty-three.

More college girls I see look much older, some looking in their thirties. I remember seeing one girl on the show Kitchen Nightmares who was twenty-five, but she looked like she was freaking fifty. The business career-oriented woman is just not attractive, and professional women are among the unhappiest.

6. Horrible Personalities

They play mind games, are control freaks, crave attention, have poor motherly qualities, and won't cook.

7. Just All-Around Bad Vibes

Ever go to a place and just get an off feeling? Well, try this, go outside of America and explore the women and you'll soon realize that dealing with foreign women is a more pleasant experience.

Once you come back and start dealing with American women again, something changes—you just don't care anymore. The slutty faces, the entitlement, the demanding nature; it's all just unattractive, and men instinctively are turned off because deep down their biological mechanisms are signaling that these women are not worthy of bearing their children.

Does this mean the end of fornication?

Far from it, instead men will become more selective of whom they spend their time and share intimacy with. As for American women, well, the common theme I've seen, whether it's Muslim, Asian, or Caucasian men, is to simply use them for fun, and throw them out when finished.

I've known men of various races express this perspective to me either directly or indirectly as a joke. One Muslim guy told me flat out that the whites (gora) are only good for one thing, and it isn't long-term commitment. He got a lot of girls, but later I found out that he married a young pretty Muslim girl, and the rest as they say is history.

For every action, there is a reaction. American women have become degenerates, and in response to that American men no longer want them anymore and instead have set their sights on better quality foreign women.

8 Ways You Can Greatly Lower Your Chances Of Being Doxxed By The Thought Police

June 6, 2018 | by Jack Hughes | Link | Original Link

We live in a day and age where left wing extremists and blue-haired cunts feel like they're doing a public service by making life hell for masculine men who make no apologies for refusing to date transgenders or standing against open borders. A good example of this is when Roosh was banned from the UK for speaking out against militant homosexuality, even though he hasn't called for violence, has no criminal record, and in general is not a threat.

If you're on Twitter, you've probably seen the phrase "Twitter do ya thing", where low IQ millennials attempt to get Trump supporters fired and blacklisted from their careers by calling their place of work or school. While there is no such thing 100% anonymity when a telecommunications device is involved, there are some basic, common sense steps you can take to avoid being a victim.

1. Use a reliable VPN

A VPN encrypts the traffic between your computer and network in addition to hiding your IP address. Using a VPN ensures trolls can't find your real IP address and then call your internet service provider to gain information about you through social engineering. The US recently passed a law allowing ISP's to sell your data to marketers for profit, so at this point using a paid VPN service that doesn't keep logs is just good internet hygiene.

2. Register your social media accounts under pseudonyms and burner email addresses

Just by operating your social media accounts or blog under an alias, you take away 90% of what the left-wing mob has to work with. While I'm not saying they deserved it, most of the people who are successfully doxed by gender fluid womyn's studies majors have far too much pointless personal information on their profiles. You posting under your legal name and having your exact city in your bio is pointless info that can only serve to harm you.

3. Do not click on suspicious links

It sounds painfully simple, but one of the most popular ways Anonymous-affiliated basement dwellers glean information such as your IP Address or remotely install a keylogger onto your device is by sending you a URL via direct message to click on.

Do not click on any weird looking URL's, in fact, don't click any URL's at all. Ask the

message sender what the URL is about, then Google it yourself. Frequent scans of your devices with programs like Malwarebytes can't hurt.

4. Max out your privacy settings across all of your devices and social media accounts

Loading...

Friends list? Private. Email address? Private. Workplace? Don't post it. Date of birth? Private. Limit advertising tracker? On. Location Services? ALWAYS off for photos. An experienced cybers-stalker's favorite way to find their victim's home address is by analyzing the metadata of a photo.

This isn't a cybersecurity blog so I won't get too technical but you can save yourself from a great headache by going into your device's location settings and making sure your camera never uses location info.

5. Use two-Factor authentication when possible

Even the most experienced cyber vandal will have a hard time getting into your iCloud account with that video of you throwing up in a back alley after getting shitfaced drunk if it requires a code to be sent to your phone in tandem with a password.

6. Use a password manager

Roboform password manager

There are several very cheap password managers out there that generate almost impenetrably strong, unique passwords for each individual site. In addition, most will

notify you when a website you have an account on has had a data breach and your password has been leaked.

This is critical because many people use the same weak password for each individual site, and legions of dorks like Anonymous have access to lists of leaked passwords and email addresses, which they keep a record of to 'try their luck' in case someone uses the same credentials elsewhere.

7. Audit yourself

A great website to find out how much information about you is out there is Pipl. Go to Pipl and search your name, email address, and any current or former usernames you've used on social media. See if they match each other. For example, if your name or true email address pops up when you search a username of yours, then you're liable to get doxed if you piss someone off.

8. Remove Yourself

If you live in the United States, chances are your name, home/email addresses, and phone number are being sold for profit among data brokers and people search websites. Some have more of their personal information out there than others but chances are if this is the first you've heard of this, you have more info about you that's readily available online than you would like. Use Expeal to make sure your information isn't displayed.

Thankfully if you're a US Resident these sites are required by law to comply with your opt-out request and if you're an EU Resident, it may be illegal for them to even collect the info in the first place.

Conclusion

Thankfully for us, our opponents aren't very smart or resourceful people. If you practice basic common sense, you most likely will never have to worry about this happening to you.

Are You A Soyified Game Denialist?

June 7, 2018 | by Troy Francis | Link | Original Link

Regrettably, low-T men and soy boys appear to be on the ascendance in Western culture. This has a great many ramifications for society at large too numerous to get into here, but when it comes to game, the results are plain to see: game denialists and sexless keyboard jockeys who sit in their bedrooms endlessly rehashing the same old refrain.

Game doesn't work. The only thing that works is money and looks. And so on.

Of course, such individuals would be merely laughable were it not for the fact that their naive and untested ideas infect the minds of others. Hopefully you are not so far gone. Perhaps you have read some negative comments along these lines, but you remain optimistic that the doomsayers are wrong.

Well, they are.

All you have to do is go out and investigate for yourself.

Here is my 4-point plan for avoiding the soy mindset and getting the results you want with women.

1.Think about the motivations of game denialists

First off, if you are reading an article or a Twitter thread or blog post about game, and you notice someone critiquing the techniques espoused in unusually negative terms, consider carefully why the author might feel compelled to voice such opinions.

Usually if I disagree with an article—which happens pretty often—I generally don't tend to bother commenting. This is because I have a life and I'm busy and I would consider it an inconvenience at best. So the people that do this kind of thing must have a pretty strong motivation.

Now, think about it. If these people were happy an enjoying full and productive lives, as well as sexual abundance, then would they be posting crap online? No, of course not.

As such, we can deduce that the people promulgating such views are in the main low-value individuals who most likely haven't seen success in their dating lives and whose 'advice' is therefore worthless. And it is *always* better only to take notice of those who have succeeded, rather than those who have failed.

2. Stop having conversations on social media with low-value individuals

Continuing on the above theme—and it should be pretty obvious to you by now—if you run into such people online you should certainly avoid conversing with them, or otherwise encouraging them.

The truth is that negativity is catching. Spend too much time with negative people and you will almost certainly pick up their negativity.

And that in turn will limit your personal growth.

There is a very pertinent saying—‘Don’t feed the trolls.’ The more attention you give to soy boys who seek to deny the efficacy of game as a cover for their own inadequacies, the more they will carry on. This is not doing you any good, and it’s not doing them any good either. If their audience dissipated then perhaps they would feel the need to go out and actually work on themselves rather than infecting others with their ‘flat earth’ theories.

Loading…

There is also another pertinent saying: ‘You are the sum of the five people closest to you.’ This goes for online as well as off. If you consistently surround yourself with losers then inevitably you will become a loser yourself over time.

Do yourself a favour and avoid this.

3. Work on improving yourself

The time and energy that you have saved feeding the trolls should be put into a strict regimen of self-improvement. As with everything, there is a grain of truth in what these soys say about game. Yes, looks help. Yes, having a good build helps. Yes, having money *can* help (although positioning yourself as a provider won't).

OK then—set about acquiring those things for yourself.

Game is not, and has never been (except for scam artists and idiots) a catch-all that does away with the need to improve one's value. A high-value male will *always* do better with women than a low-value one. It's just that game is the necessary glue that sticks it all together.

Believe me, I've known plenty of wealthy, good-looking men without game whose results in the field have sucked.

To ensure you have the best chances of success, you really must cover all of the bases. Make sure the product (you) is of the best quality possible; and attend to the marketing (your game skills) with equal diligence.

4. Go out and talk to girls

Regardless of where you are along the path of self-development, the next step is unavoidable: you *must* go out and talk to girls.

Just think about it. That hour you spent online reading PUA blogs and the negative comments beneath could have been spent doing a daygame session where you talked to ten girls. From these you could have got a few phone numbers, a couple of dates, and maybe even more.

Finally, remember that negativity is soul-sucking because in the short term it can actually feel good. But when you zoom out and look at the bigger picture of your life it is not doing you any good at all.

In fact, engaging with the soy game denialists will actively hurt your progress as a man since it will stop you going out there and taking social risks.

And a man who gives up on taking risks is scarcely a man at all.

Want to find out how jerks and bad boys get the hottest girls? Read Troy's book about how to win in the boardroom and the bedroom by using weapons-grade psychological tech: How To Be An Asshole

Let’s End The Obesity Epidemic By Requiring Fat People To Wear Burqas

June 7, 2018 | by Johnny Walters | Link | Original Link

Today I was wandering through a Marshall’s to kill some time, because I can usually get cheap socks or T shirts. What I like about Marshall’s is that even though it’s full of cheap stuff, the type of people you encounter have a decidedly less “People of Wal-Mart” vibe than Ross or Burlington. But today my retinas were subjected to the type of abuse usually associated with staring at solar eclipses for hours on end, and I’m still shaken.

When I went to leave the store, I had to slow down because directly in front of me, taking up the entire width of the double exit doors, was a Giantess outfitted in yoga pants and a crop top. The curious side of me wondered about the square footage of material and what it was re-purposed from to make her pants, and it remains a mystery whether or not the crop top was intended to be worn as such or if the fit was a happy accident when she discovered that a quad X men’s Tee could only cover so much of her torso.

What really attracted my morbid fascination, however, was her triceps; like a parody of one of those horrifying Brazilian “bodybuilders” (a parody of a parody, then) that show up on the internet as cautionary tales with cartoonishly enlarged and disproportionate muscles inflated with site injections of synthol, her upper arms took no heed of the limitations her shirt sleeves theoretically enforced, instead choosing to swing freely several inches below her elbow.

This needs to stop. No longer should I have to fear for my sanity any time I venture into a public space, when around any bend I might witness a scene like the one described above. And for God's sake, think of the children. Forget the fact that body types like this are becoming normalized and gaining mainstream acceptance; the real problem is the hypocrisy of a society that prevents kids under thirteen from seeing certain movies but turns a blind eye to grotesqueries once reserved for the circus. Becoming nauseated and losing one's appetite certainly can't be doing good things for the much maligned American diet, either.

In light of this epidemic, I have proposed a solution. First, stop calling it an epidemic, as though fatness is an airborne virus that strikes unsuspecting victims at random. Obesity is a choice, and while not everyone has the Adonis genetics your humble author was gifted with, neither are the DNA limitations so stacked against anyone that being in a healthy weight range is really all that difficult, let alone impossible.

The second part of my two stage solution is more difficult to implement but infinitely more gratifying: make fatties wear a Burqa. It's well documented that Islam is a backwards religion that curtails the rights of millions of women, and the Hijab/Burqa is perhaps most symbolic of this. I propose we appropriate this piece of "culture" and use it to our advantage by outlawing it, except for those over a certain BMI.

Loading…

This does two things; for one, it eliminates the damage inflicted on innocent bystanders when they see the obese in public, and secondly, it encourages them to lose weight. If you live in Texas and it's July, wearing a few billowing yards of polyester just might make a person reconsider their life choices, and if they're stubborn enough to carry on with their existing lifestyle they may still lose weight through sheer amount of perspiration.

I'm well aware that this proposal carries with it certain challenges, namely infringing upon a person's rights. (There's also the chance that Muslims will bulk up in order to blend in and smuggle IED's, but no solution is perfect.) To that I ask, is a fatty really still a person, and do they merit the same rights as the rest of us?

If you've turned on the news at all recently, you'll see plenty of people calling for gun control in a variety of forms and severity, and the argument they all make is the same: giving up freedoms is the price you pay for safety, or distilled to a basic aphorism, desperate times call for desperate measures. I for one cannot think of a more desperate situation than the obesity crisis.

It’s well documented that leftists have a much lower disgust threshold than those on the right, as well as usually being uglier. This isn’t propaganda (a quick Google search can supply you with the studies), and it makes sense. The left would have you believe that truth and beauty are social constructs, which is the type of philosophy that leads to retarded ideas like “fat acceptance”. Never mind the fact that obesity is demonstrably worse for your health than being in a healthy weight range, because facts don’t matter as much as feelings with these people.

The fact that I have to reiterate a self-evident fact that being fat isn’t good for you is hilarious to me, and a sign of how bad things have gotten. So to conclude, I’d like to stress that all these measures I’ve suggested come from a a place of empathy and kindness. The people that coddle the obese and rob them of their responsibility in the matter care not a whit for these people, and if they did they’d join me in shaming them. Perhaps with enough insults and enough time in a Burqa they’ll decide to make a change for the better. #Fatshame2k18 (it works).

UK Students Force University To Strip Title Of Professor For Speaking Truth On Reproduction

June 7, 2018 | by Ryan Jones | Link | Original Link

In April 2018, Ulster University withdrew the emeritus title from world famous scientist Robert Lynn because of pressure from the Student's Union. The union beseeched the university to end all association with Professor Lynn because his views were "racist and sexist in nature".

Professor Lynn, through empirical research and detailed studies has claimed that men are on average 5 IQ points higher and that East Asians, Chinese in particular, have the highest IQs. To any common person, these assertions are self-evident. Men overwhelmingly choose STEM subjects compared to women and even till now, most of the world's notable discoveries and inventions are made by men. The Chinese control the world's 2nd biggest economy and exist as a dominant minority across the globe. But for the hard leftist students union, hurt feeling and political correctness trumps cold hard logic. Proving the old adage…

It is troubling that an educational institute residing in a Western democracy has caved in to the self-indulgent polemics of these uninformed undergraduates. Plurality of views and the freedom of speech are among the cornerstone values that vaulted Western civilization to greatness. Universities nowadays are no stranger to regressive students attempting to ban elected politicians from speaking and this is a troubling development.

Anyone familiar with Professor Lynn's work will of course mention his work on the theory of dysgenics. In his prescient 1996 book *Dysgenics: Genetic Deterioration in Modern Population*, he correctly identified the worrying trend that lower IQ groups were having more offspring than those with a higher IQ. A theory most popularized in the crass 2006 film Idiocracy, which ironically regained prominence as an explanation for Trump's presidential election. Still nowadays people have begun to lament Idiocracy as an accurate dystopian prediction. A pity, since this theory has roots as far back as the 19th century.

Dysgenics again is utterly self-evident, yet glaringly not spoken about. There is a directly correlation between the educational attainment of women and the nation's birth rates. Women in developing nations are married off at a far younger age than in the West. The result is that women who are in their reproductive primes can give birth to multiple children, whereas developed nations like Japan are experiencing a population free fall.

Even with the advances in modern medicine, educated couples are struggling to conceive. Professor Lynn had noted that criminals were noted to have a higher number of offspring than the law-abiding citizens. This comes as a surprise to no one, considering the number of daytime TV shows dedicated to paternity tests of low socioeconomic individuals.

Loading...

But the science is there to state the phenomenon and to explain it. We know that woman are drawn towards bad boys because of their perceived dangerous, which they hope will produce more successful offspring. However in modern day society, siring children with

irresponsible individuals leads to offspring raised in single parent homes. Consequently, they are less mentally stable and more likely to end up committing crimes. It simply isn't conducive to society, and previously the Western world recognized this.

That is why criminals were forcibly sterilized, and the "outdated" social mores of asking for the parent's blessings existed. In an increasingly globalized and automated world, it will be quality (tool making/maintaining) over quantity (tool using/breaking). What the asinine Left has failed to realize is that their "progressive" ideas are leading to outright civilizational collapse.

If current trends continue with street thug Tyrone Jackson having eight kids with eight different baby mamas, and mild-mannered IT specialist Peter Swanson has zero. Eventually you are just left with a nation of feckless unskilled delinquent Tyrones and Tiannas.

China was perhaps the wisest to this. Whilst the one-child policy created a massive gender imbalance, it had one significant benefit. Richer parents could afford fines for having additional children, whilst the poorest were limited to one. Although farmers had exemptions, this general idea was still light years ahead of the thoughtless lack of family planning in the modern day West.

China, as always, is the country that is planning ahead. This is why it's global ascendancy is guaranteed. When confronted with the theory of dysgenics and Dr Lynn's laborious research, China will ignore any opposition, both internal and external, in order to enact a solution. Currently Chinese women are also marrying later due to work and education. Yet China will not think twice in forcing the women to marry younger and forgo these diversions for the good of the politic body.

In short, Leftist delusions on equality and progressiveness are a road map to decadence and ruin. Uncomfortable truths need to be spoken and unpopular decisions need to be made because that is what it means to be responsible. To take ownership of the situation, plan for the future and make tough decisions.

The truly depressing fact is that a professor who has committed his entire career towards meaningful research has been utterly dismissed by both the scientific community and the public because his findings were uncomfortable truth. He could have easily engaged in less controversial research and towed the line; instead he did what any real scientist would do and objectively analyse the facts. Had Japan or any other Western nation taken heed to Professor Lynn's work 20 years ago, we might have avoided this ignoble fate.

New Jersey Beach Beat Down Shows Why It’s Foolish To Resist Police

June 8, 2018 | by G.S. Luthra | Link | Original Link

Twenty year old Emily Weinman was recently arrested at Wildwood beach in New Jersey and now she is suing for excessive force used by the officers. In the body cam video, the officer is shown suspecting Weinman was consuming alcohol in public and being underage. The officer gave her a breathalyzer test, but it was hard to see what the reading said in the video. Weinman explained that she was not drinking and waiting for her aunt.

However, the officer continued to ask her more questions to which Weinman refused to answer leading the officer to say, “I’m done with you”, and “you’re about to get dropped” as he pursued Weinman who was calling for help. She is shown being tackled and screaming while the officer pulled her hair and punched her repeatedly.

The Jersey Shore beach babe arrest is another example of why you should not argue or engage in any dialogue with a cop since they are trained to get you to verbally admit to a crime. While legally in many states you aren’t required to play 21 questions if approached, most don’t know that and the cops know it, so they continue to push your buttons to get you to say something they can use to bust you.

Was Physical Force Really Necessary?

Being a cop is very difficult these days with all the political correctness and everybody having an entitlement mindset thinking they have rights, but still some cops take things

too far. As seen in the video, the cop punched the unarmed young girl who was not a physical threat to them or the public. Yes she should've kept her mouth shut and just complied as resisting only leads to more trouble, but there's a civil way to deal with college chicks, even if they're rude.

At another angle, you get a better picture of what happened. Pouring out the alcohol and issuing a fine would have been enough. Was it really necessary for two men to hold her down and slug her? No, but then again Weinman was repeatedly cursing them and refusing to answer questions they were asking so in a way she brought it onto herself. Kids need to learn to just shut up when dealing with cops, they just don't know when to quit.

It's not farfetched to conclude that some bystanders wanted to pummel the cops, but they would have been beaten severely and arrested, or even shot. According to New Jersey Law, a cop cannot demand your identification and pursue you without a warrant or proper reason, but the common mistake this girl made was having an attitude. Snappy replies like "I don't have to answer you" only increases your odds of being arrested.

Cops Of The Past Compared To Today

Loading...

Tony was a cop I used to work with at his second job at the warehouse. He had no tattoos, no six pack, no blazers, nothing—just an honest work ethic. He told me and the other guys that if he ever caught us speeding or not wearing a seat belt that he wouldn't care. Normal men wouldn't unless it gets out of hand in a crowd where safety is an issue.

You don't see guys like him anymore on the force, but rather diversity hires like the one who shot Justine Damond, or tattooed junkies like Philip Brailsford, the officer who killed

Daniel Shaver while he begged for his life. These beta males are quick to pull the trigger, because they themselves are weak and were never meant to be put into these positions wielding such enormous power.

Similar incidences in the recent past like the Salt Lake City nurse being arrested, and Michael Cohen's office being raided by the FBI shows that America is heading down a slippery slope.

Another thing is if cops don't make a certain number of arrests or tickets, their superiors question why are they not doing their job, so they go out looking to bust someone for the dumbest reasons just to meet their quota.

Writing tickets is the best way to get back at someone giving attitude, because it hurts them financially. I heard of an incident in Jersey where an Indian guy cursed out an officer to his face for giving him a ticket. This man probably had a high salary job and probably looked down on the officer, but instead of getting angry, the cop continued to write ticket after ticket, and do you know what the Indian man did then? He got on his hands and knees and begged for forgiveness while touching the officer's shoes. I'm sure that's a story he shared with his buddies.

That's a responsible cop who would not get riled up over petty things like a skinny college girl with a supposedly opened beer bottle.

What If A Cop Comes To You?

Just comply, it's not worth risking your life. I know emotions and tempers get high, but be sensible. Whenever I was stopped, I made it out unscathed. I've also met and befriended a lot of former cops, and they all warn not to anger one, because if they want, they can keep pressing you which will increase your odds of slipping up giving them reason to bust you.

Paying tickets or fines is better than potentially losing your life. If you disagree with the officer's decision, complain to the municipal office. "Knowing your rights" like they say on YouTube doesn't work in reality, especially in Jersey. If pressed about a serious

accusation like rape, you can politely reply that you can’t answer questions pertaining to such an allegation without legal representation and wish to remain silent.

This is what the American youth needs to understand, but hey if you want to play tough guy, go ahead right ahead, don’t say I didn’t warn you.

Jake Ultra

June 8, 2018 | by Roosh Valizadeh | Link | Original Link

Click here to download the PDF file of the following short story.

—

“Fascist scum! Eat shit!” A stream of liquid shot onto Jake’s face. His eyes immediately began burning. He shut them tight and collapsed on his knees. “Get back!” the police yelled, off in the distance. Jake felt a hand on his back. “I’m going to get this stuff out, look up.” Something cool poured over his eyes. “Now try to open your eyes so I can wash it out.” Jake opened as best he could, and within a minute the burning subsided enough that he could make out an image of the man standing before him.

“Are you wearing contacts?”

“No,” Jake replied. “But it still stings.”

“It’s going to hurt for a few hours. When you get home, wash your eyes out with some milk.”

“Who are you?”

“I’m Franco.” Jake stood up as Franco closed his backpack of medical supplies. He examined Jake’s eyes once more.

“They’re still pretty red. I think they’ve started using some kind of acid instead of regular pepper spray, but if you can see now you should be okay.”

“Man, I owe you.”

“You don’t owe me anything. I want to help people on our side.” There was a skirmish off

to Franco's right. A Molotov cocktail was thrown in the middle of a group, lighting a man's pants on fire.

"Shit, I have to go. Take care!"

"Wait, let me buy you a drink or something."

"DM me on Twitter. My handle is LenaDunhamRapedMe." Franco ran off while Jake stumbled to safety.

—

Jake washed his eyes out with milk when he got home. As his vision returned to normal, his anger rose. The speaker who came to Portland that day, Julius Callaghan, wasn't even that conservative. He supported gay marriage and didn't much care for the traditional ideas that Jake thought was necessary to end America's decline. If the left successfully shut down Callaghan, how could improvement ever take place?

He fired up his troll account on Twitter, ShlomoGoldsteinberg and sent a message to LenaDunhamRapedMe. After discovering that they only lived twenty minutes away from each other, they arranged to meet two days later at a local pizzeria.

Jake arrived first. He asked for a table in the back and sat facing the front door. Since being attacked, Jake was more paranoid, checking his rear often to see if anyone was following him. A few minutes later, a man with a slight beard and short black hair wearing an ironic t-shirt of an American bald eagle walked in and approached Jake's table. He was shorter than Jake remembered, with a darker complexion that looked vaguely Mediterranean.

"How are your eyes?" Franco asked.

"They're fine now, you really saved me. Pizza is on me tonight." They looked through the menu and decided on a pepperoni pizza with mushrooms and olives.

"What happened after I left?"

"One guy suffered second-degree burns to his leg. The police finally broke it up after that."

"Those motherfuckers!"

Franco glanced at the table behind him, as if telling Jake to calm down. "That's the pattern," Franco said. "The police lay off for a while hoping that someone on the right does something stupid or violent. When that doesn't happen, the police shut down Antifa's violence before it becomes too obvious that they're the ones causing all the mayhem."

"The police and mayor set us up. I don't believe they're on the side of these losers."

"Their sponsors demand it. It's the people with power who are the problem, not Antifa."

"What are you suggesting?" Jake wondered, sitting up. For the past two years, he had been stewing alone, reading one story after the next about censorship, political violence, and cultural degeneration. The past was not perfect, he knew, but what was happening in the United States was so depraved that he couldn't stomach it any longer. The trigger

that made him want to attend protests was seeing public libraries and schools allow transsexuals dressed in demonic costumes to read gay books to little children.

President Steel seemed to understand what was going on, but he was too much of a boomer to fix anything beyond economic problems. He cared more about meaningless sideshow victories that rallied his base for a successful re-election than solving the root of the malaise. Jake knew that something drastic had to be done to stop what was happening, but he wasn't sure what.

"I'm not suggesting anything," Franco replied, lowering his head, "but these speaker events and rallies help them more than it helps us. The left mobilizes too quickly and their institutional allies are too entrenched. They find a way to spin everything in their favor."

"So why did you go to the rally?"

"Honestly?" Franco paused. "For the action. My life is boring. It's too easy. I work as a data analyst. There's no real difficulty. For the past few years I was into PUA, but after a while I got annoyed at the amount of work it takes to be with someone I didn't really care about. Even money doesn't interest me. I have what I need."

"We have no meaning in our lives because we're connected to a civilization that's dying," Jake replied. "We feel all its side effects and tremors. It coughs and we cough along with it. When a civilization is healthy, we feel vigor, strength, pride, and purpose, but when the host body is dying, all of its cells are ready to give up. Philosophies like Stoicism and Taoism were made by men in dying civilizations. Marcus Aurelius wrote Meditations towards the end of the Roman Empire when it was attacked by both barbarians and plague. He tried to help men with no hope, no power."

"God can help," Franco said without conviction.

"Not on his own. It still has to happen through us."

The pizza came. Jake insisted Franco take the first slice. He sensed that Franco had accepted his fate but still held on to a bubbling energy that was begging to be put to use.

"Do you have a girlfriend?" Jake asked.

Franco sucked his teeth. "There's a girl I'm seeing. She's pretty good, but not the one."

"Why not?"

"She slept around in order to find herself. She told me she's been with six guys, so that means she's been with dozens, probably. All her self-worth is tied into her sexuality. If I fuck her good she's happy, but when I'm not around, I suspect she gets anxious and goes to social media to get validated by thirsty betas. She has many guy 'friends' as well."

"That's a bad sign," Jake chimed in, remembering his ex-girlfriend. He caught her cheating on him with one of her supposed friends. He hasn't been with a woman since.

"But she's fine for now. And you?"

"I got burned by a girl and then I kept seeing her in other girls I would meet. Maybe I should move to a smaller town."

“Then you have to deal with the obesity.”

“Actually, the reason I asked if you had a girlfriend is because I’m ready to act in a way that a man who is tied down would find difficult.” Jake paused. “Are you white, by the way?”

“My ancestors were Italian. Why?”

“Do you believe in white genocide?”

“It’s pretty obvious, isn’t it?”

“I think so, but I had to ask. You saw my Twitter handle so I take it you know where I stand.”

“I don’t identify too much with being white,” Franco said, “but if whites become a minority in the United States, it won’t be the United States any longer. I thought President Steel was going to put a stop to immigration, but it’s still going on, just at a lower level.”

“It’s because of the echoes.”

“The who?”

“The Jews,” Jake said plainly.

“I don’t know. I’m not sure they should get all the blame. A host would not allow a parasite to infect it when healthy. Even if we kick out all the Jews and the illegals today, the story would repeat itself a couple decades later with some other group.”

“But you have to agree that in 1965, when the immigration act was passed, whites didn’t know what the agenda of the echoes were. If we red pill whites now, and they refuse the pill and cuck themselves into oblivion, I would not be upset and agree that the sun is being set on them while shining bright on the black and brown races, but if we tell the white man he’s infected, I’m confident he will remove the parasite from his body.”

“Are you sure the host is not so weakened that he can still put up strong resistance?” Franco asked.

“Wouldn’t you like to find out?” Jake didn’t wait for Franco’s answer. “Look, this is not a good place to talk. Let’s settle the bill and go in my car.” He waved the waitress over. “Pizza is on me. Thanks again for dousing my eyes out.”

After the bill was paid, Jake led Franco to his car parked outside. “Put your phone in this bag,” he said. Franco did so and Jake added his phone. He put the bag underneath the car. They got in and closed the door.

“What you’re about to tell me is certainly illegal,” Franco said, nervously.

Jake laughed. “I have no specific plan in mind, but I want to develop one.” He turned on his satellite radio to an oldies station that was playing the end of Bohemian Rhapsody by Queen. “How can we fix the problems of this country?”

“That’s a hard question.” Franco crossed his hands on his lap. “There are a lot of moving parts and variables, all interfacing with each other.”

“But what is the biggest problem?”

“The government. They are either the origin of the most severe problems, like with immigration, or the enablers, like with culture. If you could magically transform government, things could be improved.”

“But we can’t just storm on Washington,” Jake said. “Any kind of armed revolt would fail.”

“A large rebel force would be needed to take Washington, but before it got strong enough, the FBI and DEA would infiltrate it thoroughly and clamp down before the decisive action. That sort of idea should be off the table since the government’s counter-intelligence apparatus is too strong. Instead of attacking the government directly, we could go after their source of power.”

“The Jews?”

“No, the people.”

> *Nothing really matters, anyone can see*
> *Nothing really matters*
> *Nothing really matters to me*
> *Any way the wind blows*

“This type of defeatism is bullshit,” Jake said, referring to the song. “It’s no accident they want everyone thinking that nothing matters and there’s no way to make a change. History is filled with men who made a difference and improved their countries.”

“Well, what’s improvement to us would be a catastrophe to a liberal, especially if those liberals are killed during our improvement.” The next song was American Pie by Don McLean.

“You get my point,” Jake conceded, not wanting Franco to get off track. “You were saying about the government’s source of power…”

“It’s from the people. If everyone in the United States said the Federal government was illegitimate, and they stopped paying taxes or following laws, the system would collapse overnight. It will never happen that *all* citizens remove their consent to be governed, but if 15% do, it’s the beginning of the end, especially if a small minority of that 15% are willing to use violence. The question is therefore not how to overthrow the government, but how to get at least 15% of the population to *want* to overthrow the government.”

“And you know how to get 15% of the population to want to overthrow the government?”

Franco smirked.

> *So bye, bye, Miss American Pie*
> *Drove my Chevy to the levee but the levee was dry*
> *And them good ole boys were drinking whiskey ‘n rye*
> *Singin’ this’ll be the day that I die*

“Well go on.”

“What do citizens want most of all from a government?”

“Safety, security, comfort,” Jake replied.

“Exactly. They give the government consent to rule over them in exchange for protection to live with a feeling of freedom. If that protection is removed, especially suddenly instead of gradually, I think you’ll hit the 15%.”

“So like if a foreign country invades America and starts killing everybody?”

“No, because that would rally people to side of the government to expel the foreign invaders. It would have to be something where the lack of protection comes from government incompetence or apathy. Citizens must start seeing the government as the enemy and then rally to expel it. Think of how terrorist attacks are *helpful* to the government. Presidential approval ratings always go up after them. Do you remember Hurricane Lateisha?”

“Yeah, it killed like over 1,000 black people.”

“And a lot of blacks around the country were pissed, but they’re only 13% of the population. Now how about if you piss off whites, who are 60% of the population?”

A white couple walked out of the pizzeria, holding hands. Jake asked aloud, “How could I make those two hate the government enough that they would want to overthrow them?”

“They don’t make songs like this anymore,” Franco said. “It’s like ten minutes long.”

“I only listen to oldies. New music is propaganda. They put a degenerate message in the song, make it catchy as hell, and next thing you know all you want to do is pop pills and fuck random people.”

“Funny, I used to listen to rap songs before going out to meet women. It would get me in the mood.”

> *And in the streets, the children screamed*
> *The lovers cried and the poets dreamed*
> *But not a word was spoken*
> *The church bells all were broken*

“I presume you know exactly how to get white people to revolt,” Jake said, hopefully.

“No, I haven’t gotten that far yet.”

Jake tapped his fingers on the steering wheel, humming to the end of the song. “The other week I was watching a video about the EMP bomb, which is just a nuclear bomb that is detonated high up in the atmosphere. It doesn’t kill anyone, but it knocks out all electronics, electricity, *everything*. It sends a huge region right back into the stone age, and it could take years to get things back up again, but the most interesting part was that after just a few days of no electricity, the population descends into a panic of looting, theft, and pure chaos. Cannibalism is possible within only a month. Can you imagine what people would do if they had no lighting, internet, or transportation for a couple of weeks, with no hope of it coming back? They would channel all their desperation and anger at the government for not keeping the lights on, a simple thing that even shithole third-world nations like Haiti can manage.” Jake stood up in his seat, his mind buzzing. “And how about if we can pin the loss of electricity on a group of people that whites already

know are a problem?”

“Black people,” Franco said.

“No, because then the narrative will revert back to solely being a race issue that the media knows how to expertly control.”

“Definitely not the Muslims,” Franco added. “If it looks like Islamic terrorism, that will just rally whites to the government.”

There was a long silence. “The Mexicans!” Jake said. Whites voted for Steel because they want stronger border control with Mexico. If those immigrants were shown to be the cause of a drastic and sudden decrease in their standard of living, they’d lose their shit.”

“Like in a false flag attack?” Franco asked.

“Yes. We take out the electricity in several white cities and make it seem like Mexican gangs are doing it. The whites will wake up, and then we count the days until the government is finished.” The next song was Dust In The Wind by Kansas.

“How do we take out electricity?”

“We fire on transformers. It can’t be that hard. It’s not like they’re heavily guarded.”

“And how do we frame the Mexicans?”

“That will be harder,” Jake replied, tightening his mouth. “We could pin it on the drug gang MS-13. They’re so mad at Steel’s deportations that they decided to retaliate against white cities.”

“The problem is that even if we leave empty tequila bottles everywhere, the government won’t share the evidence, and the media won’t report on it. You remember what they did in Reno with that mass shooting?”

“Dude, we don’t *need* the government or media to spread our narrative. We take the pictures ourselves and forward it to journalist e-celebs on Twitter. They’ll publish it in a second, and maybe Truth Report will feature it. We only need to plant the seed that Mexicans and MS-13 hate whites and that the government is allowing it to happen.”

“Technically, MS-13 are El Salvadoran,” Franco corrected.

“Sure, whatever. Fuck, I think this would actually work. Target four Midwestern cities, take out their electricity, feed a MS-13 revenge narrative to the internet, and watch the government respond with incompetence. A huge increase in whites will resent the government for not protecting them. They’ll start to resist.”

“It’s a nice fantasy.” Franco nodded his head.

Jake ducked his head under Franco’s field of vision. “What do you mean, fantasy? We can do it.” Franco’s eyes opened wide.

> *Same old song, just a drop of water*
> *In an endless sea*
> *All we do crumbles to the ground*
> *Though we refuse to see*
> *Dust in the wind*

> *All we are is dust in the wind*

Jake turned off the radio. “First of all,” he started, “I’m not a Fed. Shit, I can give you my social security number if you want, and I can show you what I do for work. Second, if not us, then who? How many times have you seen someone on Twitter posting ‘Make it stop’ to the newest travesty? If there is a God, He doesn’t make it stop directly but gives power to us to do what needs to be done.”

“We might get caught,” Franco countered.

“And what’s the alternative? Watching it get worse year after year, waiting like cowards for someone else to do what we should be doing right now? And so what if we get caught? In a few years, you won’t be free anyway. Already you can’t say what you think. If you ever have children, they won’t remain yours. Either your wife takes them away with authority of the state or you’ll be labeled a child abuser if you don’t let you son wear makeup and be molested by trannies. So you’ll lose your entertainment and your freedom to be a coward… big deal.”

“I don’t know.”

“We won’t get caught. We won’t be like the idiots who do rallies and put a target on our backs.”

“I have a family,” Franco protested.

“Okay, tell me about your family.”

“I have parents and a sister.”

“Let me guess, your parents are concerned about your far-right views, and would be the first to forsake you if you ever get written up in the media, and your sister is lost, riding the cock carousel because she thinks it make her feel empowered, no offense.” Franco looked down.

Jake continued, “I’m estranged from my father. He watches too much news on TV and now they have his mind. My mom thinks I’m some kind of misogynist because I dared to tell her that I won’t marry a whore, and my brother is married to a fat pig that controls his life. I love them because they’re blood, but… I feel like they were taken away from me.”

“How will cutting out the power in these cities help with that?”

“It’ll force their hand. Right now whites are coasting along from the past success of their ancestors, but when the conflict comes, they’ll be forced to see the liberal faggots on one hand, pozzed out to the max with whatever mystery meat they’re jamming into the blue states, and the so-called racist white man on the other, who shows that he actually cares about the future of this country. If our blood chooses poz and disowns us then so be it, but let’s push them towards a decision instead of just allowing them to ride the social justice meme because they think it makes them a good person.”

“This is crazy. My brain is trying to come up with objections, but other than the fear of going to jail, I don’t know what to say.”

“I could tell you wanted to take action. You went to Julius’ event as a medic to make a

difference for those who wanted to fight back. You made a difference for me, and probably saved my eyesight. Now together we can do what you did at that event, times ten-thousand. Deep down, you know it's worth trying. We'll structure the plan to lower the chances of getting caught, and won't go through with it unless you're absolutely sure the risk is at a minimum. And you have less to lose than you think. The wheel of history is turning." Jake made large circular motions with his right hand, almost hitting Franco in the face. "Either we get crushed by it or steer its direction ourselves. It's obvious that no one else will do it."

"And you're not a Fed?" Franco asked.

"Bro, if I was a Fed, I would organize a 'free speech' rally at a liberal university, tell our guys to bring 'self-defense' weapons, and make sure the media knows the exact time and place. Though Feds sometimes do snag lone-wolf terrorists. They give them the bomb-making materials and then stop the plot at the last…" Jake paused. "I probably shouldn't have said that last bit!" He laughed and playfully slapped Franco's arm.

"I want to see everything. Your birth certificate, your apartment, your resume…"

"Whatever you want. Shit, you can even call my previous employers. I'm just an IT guy, doing freelance work right now. I'll even show you my most recent credit reports."

"Do you have guns?"

"I have three rifles and a handgun. And you?"

"I have a rifle, but my aim isn't so great."

Jake took a deep breath, humming on the exhale. "We've gone over a lot for one night. Meeting you was important. You helped me connect some dots. Let's meet again in a few days."

"We can meet at your apartment next time so I can check your details. Even though I'm going forward with this, I have the right to withdraw at any time."

"Of course. Unless you're 100% sold on the plan, you don't have to do it. Oh and one more thing… don't tell *anyone* about this, especially your girlfriend. Plans like this can only get foiled if we start telling those close to us."

They shook hands. Jake then retrieved the bag under the car and handed off Franco's phone before saying goodbye.

Alone, neither man could conduct an operation of this scale, but together there was a synergy that made what they were about to do seem reasonable. It was clear why the elites were so hellbent on shutting down events that were hardly organized, especially the worldwide meetups of masculinity writer Burt Babak, who almost got killed when trying to set up happy hours for his followers.

Jake went to bed that night wondering if being helped by Franco was destined. Getting maced in the eyes is a small price to pay if it leads to meeting someone who can help you change the world.

—

Things progressed over the next few weeks. Franco was dutiful in checking Jake's information, confirming that he had no criminal background or affiliations with the government. They began researching electrical substations and discovered that it was trivial to take them offline. All they had to do was shoot through cheap wire fencing at the big transformer blocks and keep shooting until the power of that station went out. They learned that a group had successfully done this several years back, and promisingly, they weren't caught, because the station didn't even have surveillance cameras at the time.

While nibbling on the plan here and there, they improved their shooting by rotating among several gun ranges in the Portland exurbs. At a distance of 100 yards, Jake was a far better shot, but Franco improved enough to where he could hit the target at least half of the time. It was clear that Jake would be the primary shooter and Franco would handle the ammo, serve as the lookout, and assist if there was a gun malfunction.

"How much time do you think we'll have from when we start shooting to when first responders get so close that escape is impossible?" Jake asked one afternoon at the gun range.

"We have to assume the substation has basic surveillance, meaning cameras on the road leading up to the station and also a few around it. To be safe, let's also assume there are motion-activated alarms, or possibly gunshot sound sensors like they have in the ghettos. Then we have to ask how far the electrical station is from the nearest police station. Most of these electrical stations are quite isolated, so even if there are motion-activated cameras with sound sensors, we should still have plenty of time to shoot out the transformers and leave."

Jake grimaced. "Just give me a time in minutes."

"When we see our first camera, let's start a five-minute timer. When we shoot the first shot, start a three-minute timer. Whichever timer goes off first, we leave, no exceptions."

"In three minutes I can rain down 300 rounds, assuming the gun doesn't jam."

"And I can join in if needed."

"The bigger problem is transport. We'll need a car because these stations are in isolated areas. Whichever car we use will definitely get caught on camera. Maybe we can steal some car tags so at least they can't trace it back to us?"

Franco shook his head. "That's still too risky. A couple months ago I read a story about how you can find ATM skimmers on the Dark Net. You can buy a kit that includes everything to clone cards. I'm pretty sure they have something to steal cars, too, which are basically big computers. Another option is to buy fake identification on the Dark Net and use that to rent a car in cash, but the risk there is that the rental office will have cameras that record us when we pick up the car. We need a fresh car for every op, and then we burn the car when it's done."

Loading…

"Like in the movie Heat."

"And also in Point Break," Franco added. "We need to burn all our hairs or any other

evidence that get left behind. And we have to steal the car very soon before the op, preferably late at night when the owner is sleeping so he doesn't report it stolen. Even if we get pulled over, we have a chance at getting away if we tell the cops we're borrowing a friend's car."

"And we have to drive up to the substation in masks. We'll stop a mile out and put them on before we get in the range of cameras."

It took only three weeks for Franco to procure two "code grabber" devices that he bought with cryptocurrency. They could unlock and start most modern cars that used remote keyless entry. They tested it on their own cars first. One opened and started Franco's car while the other worked on Jake's. It was so incredibly easy that they figured they could rob cars if they were ever short of money. Neither of them have committed crimes in the past, but once the seal was broken and they became determined to commit a huge crime, there wasn't much resistance to committing the smaller ones.

As they started to accumulate gear and ammo, Franco asked Jake if he could store everything in his apartment to keep it away from his girlfriend. Jake agreed that it was a good idea.

Two more parts of the plan remained: which cities to hit and how to plant the fake evidence that frames MS-13. They decided to hit the whitest cities most reasonably near MS-13's primary base of Los Angeles so the narrative could be that the gangs drove over to commit their evil mayhem. The target cities would have to be large enough where some chaos or panic was possible, but not so large that there would be any deaths. After all, the plan was to wake up white people, not kill them.

Framing the gang would be easy. They planned to spray-paint "MS13" at the substations and then take a picture of a gloved hand doing their "four in the stink" gang sign. If the government or media tried to conceal the graffiti, and no journalist came by the scene to report on it independently, they would just send photos directly to the e-celebs. Jake considered leaving a note in badly written English, something like, "You make deportations of us so we make fuck with you," but decided against it. The spray painting should be enough.

They settled on four cities to attack. The first was West Jordan, Utah, a ten-hour drive from Los Angeles (and eleven hours from Portland). It had a population of 115,000 that was 90% white. Eight hours north of that was Billings, Montana, with a 90% white population of 104,000. Four hours southeast of Billings was Casper, Wyoming, with a 92% white population of 55,000. The last city, Boise, Idaho, was ten hours directly west of Casper. The biggest city on the list, Boise had a 92% white population of 185,000.

Their city order served two functions. First, investigators would connect the first three cities and expect them to go south to Colorado or east to Nebraska or South Dakota. Secondly, the sharp turn west to attack Boise would be the most plausible route for an MS-13 gang based out of Los Angeles that wanted to return home after their last hit (the distance to L.A. from Boise was thirteen hours, a difficult but conceivable drive).

Barely a week after deciding on their hit list, Franco gave Jake a series of stapled papers

that contained the names and locations of every single electrical substation near the four cities. “How the fuck did you get this?” Jake asked, flipping through the pages.

“You can get anything on the Dark Net now. There are actually 55,000 substations in the United States, but supposedly if you take out the top 30, you could cripple the entire country. The ones we’re targeting are tiny and should be easy to handle.”

“But aren’t most cities served by more than one station?” Jake asked.

“That’s right, but we only have to take out the two nearest stations of any city. That should cut power for its metro area and make it extremely difficult to turn everything back on. By the time police are responding to a shooting in the first station, we’d already be on our way to the second. We just have to be careful when we move to the second station, because police will be out.”

Like with the other gear, Jake took possession of the blueprints and stored it in his home. He had amassed quite the stockpile in his living room: thousands of rounds of ammo, burner phones, masks, gloves, gasoline containers, code jammers, matches, flashlights, caffeine pills, a crowbar, a bolt cutter (one of the substations was disguised as a residential house and needed to be broken into), and the electrical blueprints. After verifying directions to each substation using Rainbow Maps, the planning was complete.

“Well, three months of hard work has paid off,” Jake told Franco over a round of beers in a local bar. “I’m ready to rock n’ roll. God, I don’t believe we’re doing this.”

“Yeah about that…” Franco frowned. “I need a bit more time before we can leave.”

“What? But we’re ready to go.”

“I can’t get off work for another two weeks. We need a full week to complete the mission, but that’s a lot of time to ask off when you’re a corporate slave.”

Jake was not happy. “Are you sure you can leave then?”

“Yes I’m sure.”

“Alright, we’ll wait. I’m feeling the momentum, but if we have no choice but to wait then so be it.” Jake ordered another round.

“By the way, who’s your cell phone company?” Jake asked.

“It’s Q Mobile.”

“Are you having any problems with them lately?”

“No, why?”

“Because my service keeps going out, even during calls. It’s like my phone can’t stay connected to the tower.”

“I don’t know, maybe it’s your phone.”

“Maybe.”

—

Jake’s mother was on the couch, looking upset. *Is my mom crying?* His father was sitting at the dining room table, talking to a stocky man. Another man, tall and square-jawed,

was moving around in the living room, looking at Jake's baby pictures. Jake went close to his mother, but she didn't see him. He then walked into the living room and heard the stocky man ask his father, "Did your son give any signs that he was capable of doing this?"

Jake backed away into the living room. The tall agent grabbed his arm. "You can't get away from us." The front door opened. Jake turned his head. It was Franco. *Take 'em out Franco!* But Franco didn't move. He looked directly at Jake and wagged his finger back and forth, scolding him.

Jake woke up from the dream, his heart pounding. He covered his face with his hands and rocked his body back and forth while muttering "no, no, no…" under his breath. A few minutes later he put on his clothes and grabbed his handgun and the code jammers. He got in his car and drove to the apartment where he dropped Franco off many times before. His mind was racing now, analyzing every little interaction he had with Franco since they met.

Franco had his trust from the very first moment. The frame was always that Jake was the agent, not Franco, and even though Jake came up with the actual plan, it was Franco who began the entire process. It was Franco who supplied all the tools necessary. And it was Franco who insisted that Jake have the orgy of evidence in his possession. Jake had never even been inside his apartment, never seen pictures of his girlfriend. "He can't be," Jake whispered to himself as he opened Franco's car door, but he already knew the truth: Franco was an FBI agent.

There was no girlfriend. The apartment was a short-term rental. To build trust with potential right-wing extremists, Franco went to rallies as a medic. His job was to egg someone on into a devastating plot that could be used a pretext to clamp down on the entire right, to shut down the will of anyone to resist. Jake was going to be arrested for terrorism and locked up in a hole for the rest of his life. He sat in the car, frozen, staring at Franco's FBI identification card.

Human beings have an analog nervous system. When a threatening stimulus strikes one of their senses, a small, almond-sized command center in their brain issues a red alert, releasing a host of chemicals into the bloodstream that stimulates some organs, like the heart and eyes, while shutting down others, like the stomach and bladder. The brain, even if fatigued, is jolted awake. The most vital hands are called on deck to deal with a potential danger that could harm the organism, and the most incredible feature of this million-year old system is its lighting speed. In less than a second, the entire being can be braced for survival.

Modern humans don't face threats like their ancestors did. Their bodies are put into emergencies for banal problems that lack a clear enemy, like when a lover doesn't reply to a text message within a few hours or when a headache persists for more than a day, but the body and mind are capable of handling so much more. It's able to make advanced mathematical calculations when deciding on a course of action or become as spontaneously creative as one of the greatest artists in history. This only happens when

the need arises, when the organism is about to perish, a moment that has come for Jake.

For the first time in his life, he stared into the abyss, with only one advantage to his favor: his double crosser did not yet know that he knows. A little drop of asymmetry has given Jake just enough time to think of a solution. His eyes remained closed as a film reel of possibilities washed over the black screen of his eyelids. The organism didn't want to die, and all Jake had to do was listen to what it told him.

The sun began to rise. Jake put Franco's items back in their original place, locked the door, and slipped into the trunk through the folding backseat. He loaded a round into the chamber of his gun. Half an hour later, the door unlocked. Franco got in and closed the door. Jake slowly lowered the seat. "Good morning, Agent Franco Ferri. Put your hands on the wheel." Franco did as he was told. "Now don't you fucking move."

It was Franco's turn to process a stimulus that threatened his life, but he had far less time than Jake to find a solution. Skin cells on Franco's face immediately began producing sweat as his hands squeezed the steering wheel tight. His knuckles turned red.

Jake reached his hand into Franco's right pocket to remove his cell phone. He turned on the screen to find that it was fingerprint activated.

"Slowly put your finger on it and then put your hand back on the wheel."

Franco did what he was told. Jake then looked through his phone with his right hand while keeping the gun pointed at Franco with the left. He found Franco's email app, verified that it didn't need a separate password, and put the phone down. He switched the gun back into his right hand.

"The FBI identification is fake," Franco said. "I got it on the Dark Net. It's for the operation in case we're stopped along the way and need to get out of a jam."

"The FBI is the Dark Net," Jake replied, his nostrils flaring.

"Look, I was going to call you today and ask if you wanted one too."

"You fucking liar. And the key access card in a sleeve with the FBI logo?"

Franco hesitated. He wanted to speak, to give a plausible excuse, but no words came out. Jake pulled the trigger. The first shot ripped through the right side of Franco's back, puncturing his lung. "Wait!" Franco gasped for air. "I'll let you go. This is just my job."

"Fuck you!" Jake pulled the trigger three more times. One bullet burst through Franco's heart, and he took his last breath while Jake watched.

Jake pulled Franco's body into the backseat and covered it with his jacket. Then he turned off Franco's phone and got into the driver's seat. He felt the warmth of Franco's blood on his back.

Jake drove an hour to an isolated area near one of the gun ranges where they practiced. After checking that the coast was clear, he grabbed Franco's sunglasses and dragged his body to the middle of a grassy mound. He propped up Franco's body to face the sun and fitted it with the sunglasses. Then he slid the keyring holder of one of the code jammers onto Franco's right index finger.

Using Franco's phone, Jake made it seem like Franco was taking a selfie of himself in the middle of nowhere with the code jammer visible. Once Jake captured a realistic selfie, he cut off Franco's right index finger with a pocket knife and wrapped it in a napkin. He left the body in the grass and drove back to Franco's apartment, got back in his own car, and drove home.

At noon, Franco's supervisor was wondering why he didn't check in with his usual morning brief. His phone was off. It wasn't until late in the night that a car was sent to Franco's home to check on him. When Franco's colleague found his blood-soaked car, Jake was more than halfway to Boise at a rest stop diner. He turned on Franco's phone, unlocked it in a bathroom stall with Franco's severed finger, and spent an hour typing out an email. He proofread it no less than six times until he felt it was the best he could get it. He then sent it off to Truth Report and five other e-celebs before throwing the phone in the garbage.

Jake had to move fast. By the time he approached Boise, FBI agents were crawling through his Portland apartment. All FBI field offices were put on notice, but they did not contact local authorities, even in the cities that Jake and Franco planned to hit, because it could reveal that the FBI carried some responsibility for any attack. If the FBI said that "sources" told them about the plan, who were the sources? Where did the intelligence come from? The FBI created the mess and were determined to get themselves out of it, but they were too late. Jake made it to Boise. The recipients of the email were in shock, sure it was some kind of hoax, wondering if they should release it or not.

In Boise, Jake went to a Walmart parking lot to find a car to steal. He settled on a SUV and opened it with one of the code jammers. He drove it to his car parked at the end of the lot and transferred over his duffel bags of gear.

The operation was rehearsed so many times in his mind that carrying it out was effortless. He put on a mask at the boundary of the first substation, drove the SUV to within range of the central transformers, and then laid heavy fire for two minutes until the substation's lights went out. The electricity in Boise flickered for a moment but remained on.

The city was eerily calm on the drive to the second substation. He saw no police. He repeated the same procedure, and after nearly three minutes of firing, the entire Boise metro area went dark. It took fourteen minutes for the news to hit the wires, and when it did, the first e-celeb published the email that he received, along with the photo attachments. Jake drove the SUV eastward into the early morning until he arrived to Jackson, Wyoming. He parked the car and fell asleep.

—

By noon, his email became the most viral piece of content in the internet's history. The government did its best to hide the letter, forcing its social media partners to ban anyone who published it, but that made it spread even faster. Foreign governments hostile to the United States got into the act, reading the email on breaking news segments and rooting for patriots to defeat their "evil" government.

Jake woke up late in the afternoon. Too scared to turn on one of his burner phones, he proceeded as if his email didn't get published. He imagined how the media was broadcasting endless segments of him as a "far right lone wolf terrorist."

Keeping his head down, he went to an outdoorsman store and bought camping supplies and then to a supermarket to buy dried and canned food. There were hardly any customers. He got into the SUV and drove as deep as he could into the nearby Bridger-Teton National Forest. He found an isolated area and set up a campsite.

Calling upon childhood camping experiences with his father, Jake had an easy time in the forest. He filtered water from a nearby stream, went for long meandering walks, and experimented with traps to catch small game. He made small fires only at night. With no one to talk to, he started talking to himself, just to hear the sound of his voice.

"The big trees, the sound of the stream… How can there be anger when living here?… Maybe this was the solution all along, to unplug from the city and live with nature… How did I decide that attacking cities was the best course of action?… Maybe I really was MK ULTRA'ed… Did Franco drug me?… No, I knew what I was doing… I'm only thinking the forest is good because I have no other choice… I need to be around people!… A stupid man's last camping trip… Technically, in this moment, there is no problem… You'll be okay… FUCK!… Just enjoy the forest talking to you… You made the best decision at the time you made it, but it was the wrong decision…. No one cares about what happens to you… You live, you act, you die… Maybe I can go back to a normal life somehow?… God doesn't care about me… At least I tried something… I hope no one died in Boise… Maybe the email worked?… I don't believe I killed a man… Could he really have let me go?… He was just doing his job."

After five weeks, Jake ran out of food and ate what the forest provided—wild onions, morel mushrooms, and thimbleberries. He was running a significant calorie deficit, and considered using a rifle to shoot game at risk of exposing his location. When he started feeling dizzy seven weeks in, he felt that he had no choice but to go hunting. He dispatched a beaver and feasted heartily.

The next day was so windy that it tossed Jake around, almost toppling him over. Upon returning to his campsite after a midday search for food, he saw that a group of seven men with large backpacks and duffel bags were approaching him. Thinking they were the authorities, he resigned himself to his fate, but as they got closer, he noticed they were wearing blue jeans, fleece jackets, and plaid button-downs. One man was even wearing basketball shorts over a pair of tight-fitting bicycle pants. He slowly walked up to the men, not sure of what to expect.

"What are you doing out here?" one of the men asked.

"I'm just camping, sir."

"Looks like you've been here a while."

"I think it's been eight weeks, but I'm not sure."

A pair of the men whispered something between themselves. Then another shouted,

“Holy shit! I think that’s Jake Ultra!” The squad of men moved closer.

“What’s your name?” the leader asked.

“My name is Jake Walker.”

“It *is* Jake Ultra!”

“Why are you calling me Jake Ultra?” Jake asked.

“Because you’re that poor fucker the FBI programmed.”

Jake knew his email had been released. “I have been here since Boise. Who are you?”

“He doesn’t know anything.”

The squad leader walked up to Jake. “After Boise, cells of family and neighbor activated. We first kicked out the FBI in Salt Lake City and Denver. Then we cleared out the IRS, the DEA, ATF, Forest Service, Bureau Land Management, the TSA from airports, and then finally the US Marshalls. Most citizens in our area renounced the Federal government and joined our side.”

“My God….” Jake stared at the ground. “How has President Steel reacted?”

The squad leader clasped his hands. “President Steel is dead. They killed him two days after Boise when he moved to purge the leadership of the FBI. Vice President McDonnell is now in charge. He’s preparing a massive counterattack on us from the Northeast and California. Our intel says we have a month to prepare.”

“And how about the people of Boise? How many of them did I kill?”

“Kill? No one died in Boise.”

“But I took out the power to the whole city.”

“Boise is not New York City. If the power goes out there, dozens die within an hour. The people in Boise quickly came together to help each other. They probably have the most gasoline generators per capita out of anywhere in the world.”

Jake exhaled deeply. “But why aren’t you wearing uniforms?”

“No soldier, no target,” a solider said.

“And why don’t you have guns out?”

“Their drones have AI programmed to auto-kill someone holding a gun.”

“The Feds say you killed that FBI agent,” another soldier said.

Jake looked away, revealing his guilt. “Do people hate me?”

“A lot of people see you as a patsy, a poor fool…”

“The fool who woke us up,” said a soldier with red hair.

Jake’s legs felt wobbly.

The red-haired soldier walked up to Jake and removed a piece of paper from one of his pockets. “This is the email that started the war. Have you seen it?” Jake took the paper and read it to himself.

> My name is Franco Ferri and I’m a FBI Agent based in Portland, Oregon. Starting

last year, I was tasked to attend right-wing protests and build trust among its adherents by posing as a medic who would assist patriots and other far-right extremists with minor injuries. This is how I was able to befriend Jake Walker. He was maced in the face by a leftist agitator and I was the first to help him under the guise of being right-wing like him.

Over the course of several weeks, I channeled his anger at the current state of the United States into taking illegal action. Specifically, I convinced Jake that he could save America by attacking it. The plan was to take out the electrical power in predominately white cities and then frame the MS-13 gang as the party responsible. By doing this, Jake was convinced that whites in America would become aware of their marginalization and begin fighting against globalist agendas that predominately feature immigration as a way to dilute and destroy the fabric of the country along with white America's ability to resist.

My supervisors at the FBI told me that before the attacks were to begin, we would arrest Jake and use him as an example of the terroristic danger of the American right wing. I was fine with this plan, since no one would get hurt and we would remove a dangerous man from the streets, but at the last minute, the FBI instructed me to allow him to hit one of the four cities. Then they would arrest him and expose the plot without identifying their role in creating it. Their reasoning for allowing Jake to hit one city is that it would be easier for their political allies in Washington D.C. to pass further surveillance legislation that would treat all white men as terrorists, no different than Islamic terrorists. This plan would ensure that whites could never pose a threat to state power.

Every man has a limit, and at that point, my limit was reached. Anyone knows that removing electricity from a city will put those who require medical devices, especially the sick and elderly, at risk. People could die. When I questioned the plan to my supervisors, they insisted I follow orders and allow Jake to attack the first city: Boise, Idaho.

As I type this letter, Jake is on his way to Boise to launch an attack on its electrical power grid. I have no doubt that he will be successful because of the advanced training that I was able to provide him thanks to resources backed by the FBI. Within a day, you will be able to note the cleanliness of his operation, and how there will be no evidence left behind at the crime scene beyond shell casings. You will not find images of Jake's face on any surveillance camera. The FBI is planning to arrest him after the Boise operation and present to the public his car code jammers and electrical blueprints, all provided to Jake by myself. The FBI will then parade themselves as heroes who stopped even greater destruction from a lone wolf domestic terrorist, when they themselves are the terrorists.

Go to any gun range in Portland and they will have video footage of me, an FBI agent, shooting rifles with Jake. He would not have been able to carry out this

> operation without the agency's instigation, training, and equipment.
>
> While Jake is not an innocent man, the FBI has twisted his love of country through the use of MK ULTRA tactics that have been perfected over the past several decades, all to fulfill the objectives of the true owners of the United States of America. I signed up for this job to put criminals in jail, but I now realize that my job was to create false pretexts for disgruntled Americans to hurt other Americans. I'm a pawn, just like Jake is. Because of that, our lives are forfeit. The FBI will kill me today.
>
> To prove my identity, I have attached a photo of me holding the same FBI-produced code jammer that Jake is in possession of and also a photo of my FBI identification card.
>
> God bless America,
>
> Franco Ferri.

Jake handed the letter back, barely able to recognize the words of his own hand. The killing of Franco, the Boise operation, the escape into the forest—he felt that it was so beyond him that it couldn't have possibly been him.

"I know a guy who has the letter framed on his wall," the red-haired soldier said. "I read it every day myself." Jake examined the men one by one. Half of them stared at him warmly while the other half seemed puzzled, expecting an angry robotic killer instead of a lanky man going through the early stages of starvation. "God, I can't believe I'm meeting the man who started the Second American Civil War. Hey sarge, can I turn on my phone to get a quick selfie with him? I'll leave it on airplane mode."

Before the squad leader could answer, Jake collapsed onto his hands and knees and began crying. The red-haired soldier kneeled beside him and put a hand on Jake Ultra's shoulder.

Anthony Bourdain Commits Suicide Two Years After Getting Cucked By His Wife

June 8, 2018 | by News Syndicator | Link | Original Link

Via Breitbart:

Bourdain, who was in France filming a segment for his show, was discovered unresponsive in his hotel room Friday morning by Eric Ripert, a close friend of the chef.

"It is with extraordinary sadness we can confirm the death of our friend and colleague, Anthony Bourdain," CNN said in a statement Friday. Senior media correspondent Brian Stelter reports that Bourdain hung himself.

"His love of great adventure, new friends, fine food and drink and the remarkable stories of the world made him a unique storyteller. His talents never ceased to amaze us and we will miss him very much. Our thoughts and prayers are with his daughter and family at this incredibly difficult time."

The chef, married twice, leaves behind an 11-year-old daughter, Ariane.

His MMA-practicing wife with buff men

Previously: *Return Of Kings Correctly Predicted The Demise Of Anthony Bourdain's Marriage*

After dropping out of Vassar College two years into his degree, Bourdain worked in restaurants in Cape Cod, Massachusetts. The young chef would go on to graduate from the Culinary Institute of America.

Bourdain shot to fame after publishing his best-selling memoir *Kitchen Confidential* and became one of the world's most famous chefs after starring in the television show's *Cook's Tour* and *No Reservations.*

Loading…

The book detailed his life as a young chef in the gritty underbelly of the culinary world while battling drug addiction. "All I can tell you is this: I got off of heroin in the 1980s… There are a lot of guys that didn't get that far," he told *Eater* in 2016.

Did getting cucked contribute to his suicide?

Bourdain won a Peabody award in 2013 for his work on Parts Unknown. In his acceptance speech, Bourdain explained the genesis of the show.

“We ask very simple questions: What makes you happy? What do you eat? What do you like to cook? And everywhere in the world we go and ask these very simple questions.

“We tend to get some really astonishing answers.”

Bourdain was dating Italian actress Asia Argento, who accused movie producer Harvey Weinstein of sexual harassment. Bourdain addressed the controversy by accusing director Quentin Tarantino of giving away his soul to work with Weinstein, blasting him for “a life of complicity and shame and compromise.”

3 Reasons Why You Shouldn’t Marry A Japanese Woman

June 10, 2018 | by Makoto Fujiwara | Link | Original Link

Although I’ve previously spoken positively of Japanese women, as red pill men, we see the world as it is and not how it should be. Therefore, this article will discuss a few reasons why walking down the aisle with a Japanese woman in tow may not be the best course of action.

To understand why you shouldn’t, it’s first helpful to know that in Japan you have access to an assortment of martial arts. From weaponless combat of karate and judo, to other arts that practice with swords and spears, Japan has more than enough in terms of combat sports. While *budo*（武道) is not a main staple of contemporary culture, you can find what you’re looking for in terms of martial development.

One of the arts that I’ve always been interested in studying was *kyokushin*（極真*)* karate , which is a full contact style that allows almost everything except punches to the head. In the particular flavor of *kyokushin* I’m studying, they emphasize a concept called *tai sabaki*（体さばき) which roughly describes the ability to step away from the striking area to put yourself in a better position.

While sometimes it’s necessary to stand toe-to-toe with an opponent and keep striking until one gives out, seeing the trouble ahead of time and avoiding the onslaught teaches you to fight smarter, not harder. The same applies to getting married in Japan.

Martial arts are a gateway to understanding life

1. Language

Now before you click away from this article, rest assured that this will not be the usual diatribe regarding the lack of language ability (i.e. go to any Japanese language learning forum and read about how “hard” it is). The point being illustrated here is that while you can learn the language, it may take you some extra time to understand nuances.

Oftentimes you read online about how foreign men decide to wife up their sweet, wholesome girlfriends, only to find out she was mentally unstable much later. If the lady you’re with repels the local men, then you’re missing out on some social cues.

Locals see her and avoid like the plague. Foreigners wife her up.

Due to a substantial amount of stigma around mental health in the country, don't be surprised if you encounter a few ladies who need to spend more time at the counseling center than the nightclub. Don't make the mistake that many outsiders make by thinking you're the big swinging dick in the room that charms the ladies out of their kimonos.

Oftentimes, if you can't speak the language, you're missing out on a big chunk of red flags that may not come out until after you sign up for the "love" contract. If she isn't getting much attention from the domestic crowd, it's your job to find out why and jump ship if she has tendencies to boil bunnies alive.

2. Sex And Obligations

Don't think it won't happen to you. No matter how high your bench press is, how much money you have, or how big your third leg is compared to the local clientele, once she becomes pregnant and little Ichiro comes on the scene, the sex stops and the obligations begin. While it is characteristic for women of different countries and cultures to go from the "maiden to matron," it seems rather pronounced in Japan, where childcare and household duties become the main focus.

On top of that, be prepared to have conversations about her taking your salary and giving you pittance per month to spend. Known as *okozukai* (お小遣い), this was a system designed for women to pay for all expenses in the house (as well as a few handbags) while you receive monthly "pocket money" to do what you wish. Not to mention you have to watch out for *hesokuri* (へそくり), which is a hidden stash of your paycheck the lovely wife takes without you knowing.

Loading...

Congratulations! You got married! Now give me your money.

Now you may think that you can just alpha your way into living how you wish, but if you get married to her, you'll most likely be on a spousal visa (i.e. at her beck and call). There have been numerous cases where the foreigner didn't want to be the sexless workhorse anymore, demanded better treatment in his relationship, only to see it unravel before his eyes.

With the amount of familial, community, and societal duties that arise due to your marriage into the system, don't be surprised to see your wonderful girlfriend who showered you with attention, fizzle away with obligations while she "loves you in other ways" (read: no sex).

3. Laws

We have to be honest here. As an outsider, you're not considered to be on the same standard as the domestic product. While people are overwhelmingly nice and hospitable, the general edict is that you are treated as such since you are a guest that will return to your native country. The man who decides to plant his foreign flag in the country will have to be ready for some adjustments.

Recently, I had the pleasure to sit down with a family lawyer to discuss various aspects of Japanese law. For starters, the rules regarding common law marriage are really vague. Although there is no set amount in Japanese law that constitutes a couple being married, if it "appears" that you've been together for "a while" (according to this lawyer, its a ballpark between 3-5 years but ultimately it depends on the judge and what side of the futon he woke up on that morning) you'll be on the hook for divorce payments should you go that route.

While child support isn't strictly enforced and alimony isn't virtually nonexistent, you can run into a civil case where 50% of all assets accrued in the marriage will go to her should she decide to sue. That also goes for overseas accounts, should she find out about it (for more info, schedule a consultation).

Another key point to mention here is visitation rights. While you may get lucky as far as not having to paying a lump sum should the marriage end, it is a double-edged sword in the sense that the woman will be the one in charge of visitation rights. So as the foreigner, if the divorce was particularly nasty, you may have to come to grips with the fact that your precious son or daughter will disappear in the wind.

Even with Japan signing legislation with the Hague Convention to stop child abductions, it still happens and it is an unfortunate reality in the lives of many divorcees.

(NOTE: The video shows a woman being swindled (which does happen) but the same concept applies)

This should be a given, but do not sign anything you cannot read, don't put your livelihood in the hands of someone who may change their mind on how they feel about you, and get in touch with your inner zen and practice non-attachment, should you never see your progeny ever again.

Conclusion

This isn't a piece that is designed to invoke fear, but rather shine a light on the realities of living in different country with a set of codified methods of behavior and social ramifications. While the smiles are real and the lifestyle can be great, understanding what can happen should things go south is a surefire way to protect yourself from unexpected outcomes.

Like *tai sabaki (*体さばき), this article seeks to help you avoid the pitfalls many foreigners fall into time and again. With red pill awareness, language ability, and economic independence, you can develop strategies to get the best out of Japan and what it has to offer. Marching down the aisle without knowing the rules of the game undercuts your legs before you even begin to walk.

June 16: Stop Violence Against Women Happy Hour In Washington D.C.

June 10, 2018 | by Roosh Valizadeh | Link | Original Link

I'm throwing a happy hour on Saturday, June 16, 2018 for human beings of all gender identities to discuss ways that the patriarchy is hurting women. All attendees are expected to grovel before any random woman in the vicinity, no matter what her size or appearance, and satisfy her in any way she demands. During the event, I encourage you to bring women to my presence so that I can apologize to them on the behalf of you and all other men. We will also teach each other not to rape and how to stop making women feel uncomfortable in the presence of our toxic masculinities.

The meetup begins at 8pm at a Starbucks location that will be shared on my Twitter at 7:30pm on the day of the event. You do not have to buy anything thanks to the company's progressive policies for persons of color, which includes myself. Feel free to also use their restroom as if it were any public toilet.

Between 8-8:30, I will personally tell you the location of a bar that we will move to after 8:30. **You must arrive to the Starbucks by 8:30 to receive details of the bar venue since it will not be shared online.** If you arrive to the Starbucks at 8:31, and don't see me, you will miss the rest of the happy hour.

Both the Starbucks location and bar will be within walking distance of the Metro Center subway station. If there are unexpected happenings, I will share it on Twitter. If my Twitter is banned, check my Gab. I do not expect any protesters since I'm now "old news," but that may change if the event is publicized in the media or heavily discussed on Reddit and Twitter.

By attending the happy hour, you agree to the following code of conduct…

Happy Hour Code Of Conduct

1. You attend this happy hour at your own risk. There is a chance that you may be doxed, physically assaulted, maimed, or arrested. I will do everything in my power to act as a shield between you and potential leftist criminality, but I cannot personally guarantee your safety. Be aware of your surroundings at all times and only take risks you're comfortable with.

Loading…

2. Do not bring any legal or illegal weapons, items that could be used as a weapon, or riot gear. This includes (but is not limited to) guns, knives, brass knuckles,

shields, helmets, pepper sprays, batons, sharp pens, flashlights, and grenades. If you are assaulted by a protester, immediately withdraw to safety and contact the police. If you bring a weapon or use physical violence, you will be asked to leave. Your only “weapon” should be the camera on your phone.

3. This is not a “white nationalist” or “alt right” gathering. Those of all races and ethnic backgrounds are encouraged to attend. You will be asked to leave if you bring Nazi paraphernalia, perform Nazi salutes, or engage in any other “false flag” behavior that is meant to make the group look bad.

4. To identify another attendee, use the code phrase: “Do you know where I can find a pet shop?” If you are asked this question, answer exuberantly in the affirmative.

5. Do not take pictures or video of any other attendee without their consent.

6. If you are anxious about getting doxed, wear sunglasses and/or a hat. The more media coverage this happy hour receives, the more likely there will be doxing attempts.

7. Do not discuss illegal activities or other criminal acts as if you were a FBI informant. Illegality of any sort will not be tolerated. All attendees must comply with D.C. and Federal laws.

8. Take extra precautions when leaving any venue. If you encounter a violent mob of leftists, return back to the venue and ask for help.

9. Journalists are not allowed to attend, and will be asked to leave if identified.

If you cannot follow the above code of conduct, you are not allowed to attend the happy hour. This event is meant to be a peaceful affair for those who follow me and want to have a friendly conversation about my work or the state of the world. I look forward to seeing you on June 16.

4 Ways To Stop A Woman From Manipulating You

June 11, 2018 | by Donovan Sharpe | Link | Original Link

There are many reasons women manipulate men. The more prevalent reasons these days are money, gifts, financial favors, etc. For example, if your woman wants a to go on a weekend getaway so she'll let you fuck her brains out the entire week.

Another example would be if she wants a kitchen upgrade so she tells you that you can have a "man cave" and one night of anal sex with her so you'll agree to a 5-figure mortgage refinance loan so she can get her overpriced kitchen.

Many kitchens have been negotiated with "man caves" and anal

The best example would be being on her best behavior because she wants you to propose. She sucks your dick every night, let's you do it in the butt, cooks you meals every night, she's kind, agreeable, feminine, etc. (Note: A woman is never more well behaved when she hears the sounds of wedding bells in the not-too-distant future)

The bottom line here is that women rarely do anything for a man just to be nice. *There's always an ulterior motive and that's where the manipulation comes in.*

Manipulation vs. Good behavior

While it's important to know how to nip female manipulation in the bud, it's equally important to know the difference between a woman attempting to manipulate you and a woman exhibiting good behavior.

The difference between the two is that manipulation is good behavior occurs close to the time when a woman wants something. *Good behavior happens all the time.*

If a woman knows she's good to you and doing what she needs to do to hold it down with regular sex, cooking, looking good for you, representing you well in public, giving you access to her phone, staying off social media and so forth, she doesn't feel the need to manipulate you into doing something for her. She knows she's entitled to good treatment from you because she's a good woman to you.

Girls who do this on the regular don't need to manipulate their men

Women who manipulate men for gifts, trips, iPhones, etc. know they are ***not*** doing what's necessary to be a good woman. Women who use manipulation tactics know they haven't built up enough equity with you to simply ask you for what they want. So they dress like a slut, cook your favorite meal, or whatever it is they think they can do you manipulate you. Once they get what they want, the good behavior stops and that's how you know it's

manipulation.

Women who are good all the time know they have the right to ask you for things and they know that in order to keep that privilege they have to continue to do what's necessary to feel entitled to good treatment from you.

So now that we've laid down the basics, let's get to the first step on how to stop being manipulated by your woman.

Be proactive and set the tone. Setting the tone and letting your know you are not the kind of man who cannot be manipulated is absolutely paramount. Not only does this reduce the odds of her trying to pull any bullshit with you, when she actually does (and she will) she'll be far less confident because you let her know early on that you're not here for the games.

So how do you set the tone and let your woman know you're not who gets tripped up by mind games? Let's take a look at four examples and how to properly respond:

Call bullshit on her sob stories

Example:

Her: *"My ex boyfriend was horrible! He was an abusive alcoholic who gambled away our money while he fucked hookers and snorted cocaine while he simultaneously beat and raped me every night!"*

You: :::roll your eyes and chuckle::: *"Oh stop…if he was so bad why'd you stay with him for 3 years? We both know you weren't the perfect girlfriend either. And don't talk about your ex around me. Save that shit for your friends."*

Loading…

Cry me a river….

This accomplishes two things. First, it shows her you're not gonna buy the bullshit stories about her ex like all her other boyfriends did which means she won't try to bad mouth him again and second, it stops her from talking about her ex around you.

Don't take everything at face value

When she makes a statement you find questionable, quiz her on it. Ask her questions. Ask for details. That tells her in no uncertain terms that you won't believe just anything she says. She knows that if she tells you something it has to be true, and she has to be able to back it up lest you question her on the details.

If you don't ask questions about shit you have questions about, this WILL come back to bite you because if you start and you didn't do it in the beginning, she won't answer your questions when you try to. Be skeptical of everything she tells you that doesn't make sense or sounds strange or suspicious.

Tell her about your ex's unsuccessful manipulation attempts

It's inevitable that your girl is going to ask you "So why did you and your girlfriend break up?" Rather than going into some long diatribe about what really happened say this:

"We broke up because she wanted to manipulate me and she couldn't."

If she asks "How did she try?"

Dismissively say: "You know how women are."

This tells her that you know a woman's nature and that *you know that she knows what women do to manipulate men.*

This makes her far less likely to try any bullshit with you later on because she knows you're wise to how women really are and what they do.

Point out examples when you're out in public together

Example 1: If you see a woman being overly affectionate to her man in public, say *"She must want something."*

Example 2: If you see a man buying something expensive for a woman, say *"She must have let him go back door last night."*

Example 3: If you see a marriage proposal in public say *"Welp! I guess he's not having sex anymore!"*

Example 4: If you see a woman crying in public, roll your eyes and say *"Oh please…"*

Example 5: If you see a woman throwing a fit or bitching about something say *"That chick needs a stiff drink, a stiff dick, and a nap"*

At some point your woman will inevitably challenge your pithy Red Pill arrows with what she'll rationalize as "the voice of common sense."

Challenge to example 1: *"Well how do YOU know she wants something?! She might just be in love him!"*

You say: *"You don't believe that."*

Challenge to example 2: *"That's not what it looks like to me!"*

You say: *"Of course YOU don't"* (then laugh)

When she's heard enough of these she'll finally say, *"God you're so jaded!"*

You respond with: *"You call it jaded, I call it experience."*

Taking these steps *at the beginning of a relationship* will drastically reduce the odds of her attempting to manipulate you, but keep in mind that nothing will completely eliminate it because this is just how females operate. She's going to try at some point. Count on it.

However, taking the measures above lets her know that you're not the typical guy who gives into her emotional shenanigans or believes everything she says. And when you make that clear to her both directly and indirectly, she will have more respect for you than she's had for any man in quite a while.

Part Two will cover some of the ways women try to manipulate men and how to handle it directly so as to squash it like a bug…

…but if you don't want to wait for the article, ***click here to watch or listen****. And watch*

Did Anthony Bourdain Kill Himself Because Of His Blue Pill Views On Women?

June 11, 2018 | by Max Roscoe | Link | Original Link

Chef and CNN Travel correspondent Anthony Bordain hung himself in his Paris hotel on June 8, 2018. No suicide note was referenced in early reports.

My immediate reaction to hearing this news was recollecting a ROK article on Bourdain's last wife publicly cucking him. Four months later, they separated.

The Dangers of Not Taking The Red Pill

I have minimal exposure to pozzed media, and did not follow Bourdain. I know he was passionate about food and travel, two of my interests. He created a TV series for the Travel Channel and CNN exposing viewers to exotic foods from all over the world, shunning tourist traps and mainstream hotels in search of an authentic experience.

He was wildly successful, wealthy, and famous. And yet he was unhappy enough to take his own life. We may never know precisely the reasons, but I predict his suicide stems from unhappiness in his personal life.

First Marriage to a High School Girlfriend

Objectively the most feminine of his partners

Bordain married his high school girlfriend, Nancy Putkoski, and they stayed in a childless marriage for two decades before divorcing in 2005. If I had married so young, I shudder to think of the horrible decisions I would have made, without learning the reality of women the hard way. Some state they separated because Bourdain was not home often, working long hours first in the kitchen, and later producing his television programs around the world.

Second Marriage to Martial Arts Fighter

In 2007 Bourdain married MMA Fighter Ottavia Busia, having a daughter the same year. This relationship was covered in two ROK articles here and here. Busia was visibly uncommitted to her husband, as seen in numerous photographs and social media postings. Her body language, turning away from her man, bringing the attention to herself, and posing in provocative images with other men were all warning signs, and the couple divorced in 2016, four months after the initial ROK article.

Relationship With Radical Feminist Asia Argento

Just Lovely, I'm Sure

Bordain next became involved with the train wreck known as Asia Argento, an Italian actress and feminist. In late 2017, Argento claimed that Harvey Weinstein raped her in the 1990s, after which she had multiple sexual relations with him over many years.

Asia Argento Retweeted

Asia Argento @AsiaArgento · Jun 4

When are you going to publicly apologize to @MonicaLewinsky, @BillClinton?

Show this thread

Asia Argento @AsiaArgento · Jun 4

Did you ever apologize to @MonicaLewinsky? Your first answer was "not yet" — #TimesUp @BillClinton

Apologize for having oral sex with a sober adult woman who came on to you, now! You evil white male!

Argento's Twitter feed is full of anti-slut shaming, feminism, profanity, globohomo promotion, and aggressive masculine imagery. Last week she was spotted publicly humiliating her boyfriend Bourdain.

Toxic Feminism

The media loves to play with the invented idea of “toxic masculinity,” the idea that being masculine is so evil and destructive that it can cause toxic “death or serious debilitation.”

But how often do we see masculinity leading to death? On the other hand, radical feminism has caused countless prominent, powerful, and wealthy men, from Robin Williams, to Freddie Prinze to likely Bordain, to end their lives.

Asia with another man just days before Bourdain’s suicide

Bourdain believed in the blue pilled myth of the gentle, sweet, kind and loyal woman. After being publicly cucked and humiliated by his last 2 partners, did this drive him to suicide?

Loading...

Bordain’s Plan For His Daughter

> My sole duty as a parent and as a father, particularly raising a little girl who is going to grow up to be a young woman, is that she will **never look to men for affirmation**, or anyone else for affirmation
> or self-worth or be **physically intimidated by anyone**. My daughter spinning arm bars is a thing of envy — Ronda Rousey quality

Sadly, Bordain fell for the feminist line that we should encourage women to live free and wild lives without limits. His goal of raising his child to never by physically intimidated by anyone would be unrealistic if he were raising a son, but it’s downright absurd for a daughter.

And a woman who never looks to a man for affirmation is a woman who will be physically

and emotionally alone, cold, unloved, and unlikely to listen to her natural feminine nurturing instincts.

Was This What Bourdain Had In Mind?

Ronda Rousey is not the role model for what a woman should be — particularly not a father's goal for his daughter. While Ronda may be the one in a million who found success in an unlikely career, why would a father yearn for a violent, aggressive, and masculine daughter?

Lessons From The Tragedy

First, we should realize that Bourdain was acting out of love and true desire for the happiness of his daughter when he made his misguided decisions. In the modern world, we are bombarded with societal truths, such as…

- Democracy is great,
- Feminism makes women happy,
- Gay marriage is beautiful and good,
- We should invade the Middle East and install liberal democracies,
- They Hate Us For Our Freedoms,
- Men and women are paid different wages
- Israel is our greatest ally,
- Militias are dangerous and evil,
- Hate speech should be outlawed,
- Big is beautiful
- Women And Men Are Equal
- Changing one's sex is a choice all children must consider

- Lack of Affirmative Verbal Consent = Rape
- Sex with alcohol = Rape
- Syria used chemical weapons
- Men meeting up to socialize = Rape Clubs

It is difficult and time consuming to research and test these hypotheses to see if they are true. And besides, when seemingly all of one's friends and neighbors are repeating the above mantras, surely doubting them is as wrong as considering whether the earth is really flat, right? It's much easier to let the media reveal the truth to us. After all, that is their job!

A Misguided Loving Father

I don't fault Bourdain, a busy man who married young, spent little time at home, and never learned the red pill. Our society teaches many lies, and I believed most of them for a long time. His wishes for his daughter come from a desire that she is happy and fulfilled. But sadly, masculinity and unrestrained freedom do not bring women happiness.

Asia Argento tweet about university feminists mobilizing against "harassment and abuse"

We are seeing huge experiments with civilization, and so far they seem to be failing. While it is easy to be trapped in the bubble of feminism, and believe that the world has been wrong for the entirety of history, and we are just now setting it right, if one stops to think logically, that doesn't make any sense.

Men Can Always Start Over

I have never understood suicide. While I have experienced depression before, I have always thought if things really got so bad that I felt like ending my life, I would just

disappear overnight to a third world country and start over. Take $5,000, and head near the equator, and forget all the stresses and personal commitments of the modern world. I'm beginning to think it's something I should do before depression sets in. But regardless, men should know that suicide is never the answer.

I have seen successful, happy, alpha men fall apart, cry, and even break down in a seizure, over the intense stress and pain a woman caused them. Lack of a good relationship is far preferable to a miserable one. If you are experiencing severe depression, you can get out. The US National Suicide Prevention Phone # is 1-800-273-8255.

The French State Launched Its Great Stalinist Purge Against The Right

June 12, 2018 | by Jean-Batave Poqueliche | Link | Original Link

The summer has not yet started but the temperature already went up in the Soviet-like court rooms cracking down on “hate speech” throughout France. Right-wing figures keep being doxed, tried or jailed, thanks to the joint effort of zealous liberals and the eternal (((lobby that does not exist))).

The French establishment just shifted to next gear to reach full-blown 1984. Anyone flying off the handle shall be immediately unpersonned. Those were the targets in the last few weeks…

Génération Identitaire

They had a price on their head since they showed the gross incompetence of the French state (read “voluntary inaction”) to protect its own borders against **illegal migrants,** who are called “newly arrived” by the media now and soon to be “your friendly neighbours”.

G.I’s Facebook page was deleted after their spectacular action at Col de l’Échelle last April. So was their Twitter account after the “checked” brigade on Twitter vehemently whined until the institutions obeyed.

Some like the LICRA (a French SPLC, with the same Inuit gang at the rudder) did not fail to gloat and brag about their role in the action, while their pets at the LDNA (a violent team of rocket scientists from Wakanda) had their Twitter account verified. Romain Espino, G.I’s spokesman might lose his job after he was doxed and several liberal political personalities relayed his personal data and called for his employer to fire him.

Boris Le Lay

Another bête noire of the system, Boris had already brought the wrath of the international clique upon himself and chose exile to avoid prison. He was once more found guilty of "inciting racial hatred" a month ago and his Facebook page was blocked.

His website Démocratie Participative, a French twin of the Daily Stormer, is also in the crosshairs after it exposed many globalist figures of Eskimo persuasion and shed some light on their modus operandi and long-term goals. The Left wing parties of the country officially declared open season on Le Lay and his "intolerance".

Alexandre Gabriac

Gabriac was tried and condemned to six years probation this week, for recreating the group Jeunesses Nationalistes (Nationalist Youth) despite its dissolution by the government five years ago, following the death of Antifa member Clément Méric, who attacked a group of right-wing youth, got hit, and died seven seconds later.

It was a death the establishment did not care about (for Méric was White) until it became a tool during the witch hunt against the French right, just like Heather Heyer's death in

Charlottesville.

Gabriac recently described how he was intimidated, followed for months and arrested by the antiterrorist section of the public prosecutor's office.

Hervé Ryssen

[image]

The writer appeared in court two weeks ago and is likely to be sent to jail for "hate speech" after he tweeted that "the main culprits of the massacres that claimed the lives of thirty million Christians in the USSR between 1917 and 1947 were Jews".

It did not matter that the objective historical facts are on his side and that he produced several sources to back his claim while facing the court, the verdict was probably already decided.

Alain Soral

Soral was condemned twice last week to a suspended sentence and his platform on Youtube, ERTV, has just been deleted without any explanation, only a few months after his popular Facebook page was also deleted.

How unfortunate!

Soral was already evicted of several websites but I believe the censorship was enforced after his co-host Vincent Lapierre made himself particularly unpopular and “ideologically dangerous” when he showed that foreign-driven associations like the LICRA, CRIF (Council of Jewish Institutions) and LDJ (“Jewish Defence League”) were powerful enough to influence the French president, lean on magistrates, or give direct orders to the police.

Loading…

Nicolas Dupont Aignan

A former candidate during the 2017 presidential election, Nicolas was sent to court a few months ago for a tweet where he described the massive influx of migrants in Europe as a “migratory invasion”.

The LICRA (see above) filed the lawsuit and described its outcome in those terms : “It does not matter if he is right, what he says is illegal!”

Attention, Paris is broadcasting!

France’s PC junta has gone full clown world. We already knew that truth and proofs do not matter, but this political round-up is used as an example for the French population.

It coincides with a campaign lead by the State, where soon every public media will need to be approved before publishing any content. The rest will be wiped out.

Françoise Nyssen

As Françoise Nyssen, unfuckable cat lady and Minister of Culture puts it:

> "**This partisan media shall be** (…) **of all colours and origins**. With a political agenda without ambiguities**, it will change opinions on the ground. (…) The understanding ability of our citizens is not enough anymore."

The usual accusers

Right-wingers are vilified, doxed, harassed, jailed but actual terrorist enablers like Jawad Bendaoud walk away scot-free and jihadists are being released en masse.

A lot of these right-wing figures were "fichés S" (filed "S" for "under surveillance") by the government and the police, a title usually limited to radical Muslim clerics and potential Islamic terrorists.

Like usual, organisations like the LICRA and CRIF, heavily subsidised by the French State itself, foreign powers and well-known multicultural figures, set the tone on who shall be free and who shall not, rather than the legitimate French institution.

The system is gangrened by parasitic organisms that thrive in the chaos they create.

Un nouveau venu à suivre

What brings me a ray of hope is that the more censorship is enforced on the right, the larger the number of red-pilled men who unplug themselves from the system and seek brotherhood and support through traditional channels.

A new promising prospect is the Monte une Équipe ("Put together a team") concept, launched by dissident Youtuber Raptor Dissident and his co-host, Papacito, where they invite young French men to find like-minded men and create a local network of "support, friendship and social cohesion".

Raptor & Papacito, co-hosts of the "Dissident Meet-up"

In their show and videos that gather millions of viewers, they advocate a large array of principles that echo our doctrine of neomasculinity, exhorting young men to become stronger, seek income independence and so on.

Young French men want to respect themselves and stop being victims, after the system drilled their doctrine of submission in their heads for so long. Best of luck to them.

The Extinction Of White Male Authors

June 12, 2018 | by Beau Albrecht | Link | Original Link

The spark is dying out for literature, once a major facet of culture. Television, movies, and digital distractions compete heavily for the public's attention. Media monopolization doesn't help. (How often do they give us new writers as good as Orwell or Dostoyevsky?) Worse, their politically correct tyranny is putting the final nail into the coffin.

It's about how you look, not how you write

Notice anything missing here???

As we've covered earlier, straight White guys are unwelcome as new authors, especially

for serious highbrow novels. The New York literary establishment excludes much talent. Established writers can keep making money for the corporations. However, guys like Melville, Poe, Twain, Faulkner, Hemingway, Kerouac—to name a very few—today would face great difficulty getting the critical first sale. Some genres like science fiction aren't as bad, though that's been converged too.

"Inclusiveness" is the trendy justification. Some argue that women and minorities™ were underrepresented in the past. However, ethnic literature has been quite fashionable since the 1960s. Women and GLBTs have been writing since Sappho. Furthermore, shutting out everyone *except* them certainly isn't inclusive! Talent should stand on its own merits.

Can a one-legged genderqueer Scientologist lesbian from Timbuktu write well? If she's talented, then yes. However, ticking several diversity checkboxes doesn't make her a better author than anyone else.

The diversity dilemma

If only it were this simple.

For those who beat the odds, it's basically impossible to write anything without potentially catching flak. There are several style guides for politically correct writing, and some make the income tax code seem pretty straightforward by comparison. According to various opinions:

- If a story doesn't include enough women and minorities™, that's not inclusive.
- Including them to be inclusive is tokenism.
- Portraying them negatively is bad.
- Overdoing positive traits is patronizing.
- Any common characteristic that might be remotely stereotypical is *very* bad.
- It's impossible to write accurately about them without being one, so that's taboo.

What the hell do they want? Even Kafka couldn't have imagined anything screwier!

That's quite a tightrope to walk. Even stories where diversity is unrealistic—for instance, European musketeers defending a fort—run afoul of the first item, since women and minorities™ might not identify with the characters. Actually, *appealing to everyone is impossible*; that's why subgenres exist.

Even so, people can enjoy stories about glamorous professions or far-off lands, even if they have no experience in these things. This can help readers understand others unlike them, and even build bridges. Liberal writers once did much to publicize minority perspectives. Today, they might find themselves tiptoeing through a minefield, despite trying to be sympathetic.

If a story's cast resembles a New York subway crowd, all characters sensitively developed following painstaking research, with no negative traits and only modestly positive ones, it would be tedious. Even then, that doesn't avoid the "no characters from groups you're not part of" rule. If authors only write about talking animals, aliens, or fantasy creatures—which would be quite restrictive—they can't resemble human cultures even coincidentally, or sensitivity taboos still apply.

Other formats, such as film, have this problem too. George Lucas took a lot of heat for alluded stereotypes in *The Phantom Menace*. All that's arguable, but the criticism was worse for that than the lame script. (Did I just say "lame"—uh oh, that's ableism!) In his defense, though, JarJar Abrams didn't do much better.

Writing characters that will appeal to a genre's specific audience makes good business sense. Science fiction books often have intelligent, relatively young guys and sexy love interests. Presumably gay literature has more than 2-3% GLBT characters. Romance novels have female protagonists typically courted by handsome, rich bachelors. Why mess with what works?

Really, this PC literary fad is silly. Would *The Caine Mutiny* have been a better book if the protagonist were a genderfluid nonbinary? Actually, that would've been an annoying, unnecessary distraction.

Loading…

Avoiding ~~butthurt~~ stereotypes

At least you still can get away with this.

There's much hand-wringing over avoiding stereotypes, even positive ones. For starters, heavy dialect and accents are taboo. (There goes a lot of great literature since the 1850s: Dickens, Twain, etc.) Another example is that writers shouldn't feature Asian martial artists. It would be silly to make every Japanese character a karateka, unless the story was set in a dojo. Still, when did martial arts stop being part of Asian culture? The list goes on.

Real-life individuals don't always match their group stereotypes, of course. However, often there's at least a kernel of truth. Are Haitians reputed as being great at math and liking animation? Do Norwegians get a bad rap for tightly-knit organized crime syndicates? Are Pentecostals associated with goofy leftist causes and being tightwads? If anyone portrayed the foregoing that way (unlike groups usually associated with those things), it wouldn't be believable because of the lack of real examples.

Really, it works against realism to avoid any characteristic that might be considered stereotypical. That said, some groups are exempt from these fine scruples. To name a few:

- Dumb, hostile rednecks
- Crooked and/or brutal cops
- Sadistic German officers
- Fundamentalists motivated by hate or hiding moral flaws

Those are a bit overblown, but nobody's walking on eggshells for them! Perhaps political correctness isn't *really* about being kind and sensitive to everyone?

Distress about damsels

Fortunately for Big Red, the MRAs she cursed out and screamed at were decent, peaceful people. Otherwise, she would've had to find a policeman.

Another PC edict forbids portraying men rescuing women. *They're strong and independent; they don't need no man!* (Apparently much past literature deserves to go down the memory hole then…) This one certainly makes those empowered feminists clutch their pearls. However, this new taboo subtly conveys the message that seeking assistance is always wrong.

In the real world, occasionally people face danger, and women are no exception. (Our protective instincts are sometimes exploited, unfortunately.) If genuinely in trouble, she certainly should take any necessary action to help herself. If the situation is more than she can handle, though, a man's assistance is quite useful, and preferably not a hipster soy boy. (A word of gratitude would be appreciated, though that might be asking the impossible lately.) Seeking help when appropriate is sensible, feminist *hauteur* be damned.

Besides that, stories and movies portraying women able to defeat four opponents twice her size do a great disservice to anyone internalizing them. Some of today's women act overly aggressive and confrontational, far more commonly than ever before. However, overconfidence is bad for anyone. I can defend myself quite effectively if needed, but I prefer diplomacy, and I won't go out of my way to antagonize anyone.

The solution

The six megaconglomerates that comprise the MSM also own the major publishing houses.

Modern literature has pretty much gone to hell, thanks to politically correct munchkins being appointed gatekeepers in the mainstream publishing houses. What can be done about this? In successful insurgencies, often the winning dissidents will set up parallel institutions. Eventually they replace the establishment institutions.

Fortunately, modern technology is making those munchkins obsolete. Anyone with talent can create ebooks and even printed books. The gatekeepers are only good for promotion and sales; the remaining step is to create ways to generate our own publicity. The PC Cultural Revolution is about due for a counterrevolution. Some alternative institutions of our own already exist now. Spread the word; the adventure begins!

Top 7 Skin Care Tips That Help You Attract More Women

June 12, 2018 | by Sponsored Article | Link | Original Link

The following article is sponsored by Coui Skincare.

Most men tend to follow a very basic skincare routine of grabbing a bar of soap, taking a shower, and heading out the door. If you're one of them, then we've got some bad news for you: this careless routine is taking a serious toll on your skin.

Sure, you can't see it right now because you are young and ready to take on the world and all that jazz, but that doesn't mean that the negligence isn't building up! After years of doing this, suddenly you are 50 and those crow's feet around your eyes are looking seriously messed-up.

Don't worry, to save you from a nightmarish future like this, here are 7 easy skin care tips. Prepare to stand out from the crowd and grab every woman's attention!

1. Cleanse

Cleansing is the first step to achieving good skin. Using the same bar of soap or body scrub that you use in the shower won't cut the deal. The facial skin is different from the rest of the body.

Cleansing at least once daily is a must. If you have oily skin, you need to do it twice or even thrice. People with oily skin often wake up with grimy and oily face, so it's necessary to start off with a cleanser.

If you have dry or combination skin, you can skip the cleanser in the morning and only wash off with water instead. But adding a cleanser to your nightly routine is a must for all types of skin.

Our skin battles with grime and pollution all day long. The buildup of dirt clogs the pores, which then leads to other skin related problems such as acne, blackheads, whiteheads etc. All of these can be prevented by using a cleanser as soon as you retire for the day.

Sometimes, the skin might get dry due to not using the right cleanser. You'll know the cleanser isn't right when the face feels too dry or uncomfortable. To avoid this from happening, you can use a gentle cleanser such as the COUI Nourishing Facial Cleansing Oil.

The COUI Nourishing Facial Cleansing Oil is made of ingredients which will remove the dirt without stripping it off of its natural oils. It's also alcohol and harsh chemicals free, making it a perfect cleanser to keep the skin hydrated and moisturized.

2. Moisturize

This is an absolutely mandatory step and must be added to your daily routine, especially after shaving. Shaving can leave the skin itchy and dry, and putting on a moisturizer can help retain the skin's hydration.

Dry skin can lead to premature signs of aging. To prevent that, it's essential to use a moisturizer. A moisturizer can help the skin stay hydrated. Dehydration is one of the major causes of aging lines and wrinkles.

It becomes even more necessary if you have dry or combination skin. But oily skin also needs a moisturizer to keep the skin from producing excess sebum to compensate for the dryness. Everyone needs a moisturizer to keep the skin looking young and healthy.

One of the best moisturizers on the market is the COUI Phytemanteau Day Cream. It gives the proper hydration to keep the skin natural looking and healthy while providing the needed protection to keep the skin from aging. The cream contains powerful antioxidants to prevent the skin from UV rays and pollutants in the daytime.

You will feel your skin's suppleness once you start using a moisturizer. Skipping the moisturizer is a grave mistake for any men looking to stay younger looking for a long time. COUI skincare serves 100% lifetime satisfaction guarantee to make sure you get the best looking skin for years to come.

You can use a different cream for the night. For skin to look young and healthy, it's a good practice to add products with Retinol in your skincare regime. Such a good night cream is the COUI Retinol Night Cream.

The COUI Retinol Night Cream is suitable for all skin types. It adds years to your skin while you sleep, thanks to its active anti-aging ingredients. If you are in your late twenties or up, it's a great time to add this to your night routine.

3. Add a Serum

Serums are great skincare products for anyone looking to target specific skin issues they are dealing with. Men tend to go out without using sun protection, so they are more prone to getting skin conditions such as acne, scars from acne, blackheads, whiteheads, enlarged pores, hyperpigmentation, sun damage etc. And let's be real, nobody wants to look like a scrawny teenager in the height of puberty, especially women.

The answer to these problems can be serums targeted to the specific issues. Serums are made to easily penetrate the skin and solve the issues accordingly.

The COUI Super C Serum is such a serum that targets a lot of the skin issues mentioned here. It's called Super C because of its extraordinary line of ingredients. It's a breakthrough when it comes to anti-aging.

The main ingredient that makes the product stand out from other C serums is the Epidermal Growth Factor (EGF). EGF helps in stimulating the production of collagen, something that becomes necessary while your skin starts to age.

Adding the COUI Super C Serum on your skin care routine will make sure that you have healthy and glowing looking skin. It helps the skin look supple and radiant. It will definitely help you stand out and make women notice because most men are neglecting this step.

4. Shave Right

Translating to, “Don’t shave against the hair growth!” Most shave against the direction of the hair growth as this gives a smoother shave. But in reality, you are nicking the buried portion of the hair follicle, which can lead to inflammation.

Instead, always shave on the direction of your hair growth. Also, don’t go over and over the same area, as it can strip off the upper layer of the skin, leading to inflammation and overexposure. Just do one stroke on each section of the face to avoid this.

And while shaving, lather up with water. Shaving dry can increase the chances of getting cuts, acne, and ingrown hair. Make sure you use water to lather up completely before using the razor.

It also makes it easier to shave, as the hair and the skin get softer. Let the shaving gel or cream sit on your skin once you have lathered it up, and then shave. Your skin will thank you.

5. Read the Label

It’s important to take a good look at the ingredients list of the products you are using. Men, in general, tend to have oilier skin than women, due to testosterone. This hormone can stimulate excess sebum production in the hair follicles.

If you are getting breakouts, read the labels of your products, even the shaving ones. Only buy products which contain the words ‘Oil-free’ or ‘Non-comedogenic’. These terms mean that they will not clog your pores, which in turn will prevent blackheads, whiteheads, and acne.

6. Avoid Wrinkles around the Eyes

Other than using the anti-aging products, it’s also important to use products that can

provide overall wrinkle-free skin. An eye cream is thus important as crow's feet in the eye area can make one look old and exhausted.

The eye area is more delicate compared to the rest of the facial skin. Eye creams tend to mainly cover the dehydration issue. Dehydration equals to the early signs of aging, so an eye cream can come in handy to prevent that.

A good eye cream should address all eye concerns such as puffiness, dark circles, and wrinkles. The COUI Luscious Eye Cream does all of that. It's made from all the star ingredients to provide the best results.

For example, the caffeine reduces the puffiness, EGF stimulates collagen production and the Chrysin works on dark circles.

A good eye cream can make you look younger for a long time. It's essential for men to make women notice their youthfulness!

7. Apply Sunscreen

There is no point in doing any of the mentioned steps if you neglect to follow this one. It is absolutely essential that you use a sunscreen every single day. Sun damage can make you look older than your age. And not to mention, the harmful UV rays can cause skin cancer.

A good sunscreen is the COUI Moisturizing SPF 30 Facial Sunscreen Lotion. The lotion is made with natural ingredients to prevent sun damage. Don't forget to apply it on the neck area as well to prevent signs of aging to appear.

Final Words

A good skincare routine can make any man look younger and healthier, and will definitely boost your level of confidence. Follow these simple steps everyday and turn heads wherever you go! **Click here to visit Coui Skincare**.

35 Passages From Dante's Divine Comedy That Are Strikingly Relevant Today

June 13, 2018 | by John Carver | Link | Original Link

Nearly 700 years old and hailed as a masterpiece of world literature, Dante Alighieri's epic poem *'The Divine Comedy'* has been fascinating readers for centuries. It's an allegorical interpretation of a 35-year-old Dante's journey through the depths of hell, purgatory, and paradise from the medieval perspective of his time, and yet the poem has remained famous in the present day for its grand scope and illustrious prose.

The poem was originally written in the Tuscan language and presented in *'terza rima'*, a three lined rhyming scheme. Unfortunately, the integrity of the rhyming is lost in translation to most foreign languages (including English), and localized rhyming interpretations are often dismissed as inauthentic. Nonetheless, the work has never failed to impress those who give it a proper shot.

Upon reading 'The Divine Comedy' for the first time in recent months, it was inevitable I would be viewing and interpreting the work from an early 21st century lens. Soon enough, I found an abundance of material which could have either comical or frightening allegories to the so-called progressive or 'social justice' attitudes of our modern world, and realized that this work was ripe for a dissident right-wing parody.

Maintaining Dante's poetic spirit of *'terza rima'* or three lined stanzas, here is a collection of prose taken directly from Henry Wadsworth Longfellow's interpretation of the *'Inferno',* which are then juxtaposed with recent photographs and artwork. *'Inferno'* (hell) is without doubt the most famous section of the poem, so grab your red pill and get

ready…

1.

I entered on the deep and savage way. (Canto II)

2.

The infamous “Big Red” of Toronto

Behold the beast, for which I have turned back;

Do thou protect me from her, famous Sage,

For she doth make my veins and pulses tremble. (Canto I)

3.

“Thee it behoves to take another road,”
Responded he, when he beheld my weeping,
“If from this savage place thou wouldst escape; (Canto I)

4.

Through every city shall he hunt her down,
Until he shall have driven her back to Hell,

There from whence envy first did let her loose. (Canto I)

5.

“All hope abandon, ye who enter in!” (Canto III)

6.

Trump-hating homeless people in San Francisco

“No fame of them the world permits to be;

Misericord and Justice both disdain them.

Let us not speak of them, but look, and pass.” (Canto III)

7.

San Francisco LGBTQ Pride

“And after it there came so long a train

Of people, that I ne’er would have believed

That ever Death so many had undone.” (Canto III)

8.

Belle Knox

To sensual vices she was so abandoned,
That lustful she made licit in her law,
To remove the blame to which she had been led. (Canto V)

9.

If were the King of the Universe our friend,
We would pray unto him to give thee peace,
Since thou hast pity on our woe perverse. (Canto V)

10.

So we passed onward o’er the filthy mixture
Of shadows and of rain with footsteps slow,
Touching a little on the future life. (Canto VI)

11.

Mmmmmmm!! No-fault divorce tastes so good!!
Your knowledge has no counterstand against her;

She makes provision, judges, and pursues
Her governance, as theirs the other gods. (Canto VII)

12.

And I said to him: “With weeping and with wailing,
Thou spirit maledict, do thou remain;
For thee I know, though art all defiled.” (Canto VIII)

13.

All of their coverings uplifted were,

And from them issued forth such dire laments,

Sooth seemed they of the wretched and tormented. (Canto IX)

14.

South Africa… London Police recruits… The US Postal Service…

And as thou wouldst to the sweet world return,

Say why that people is so pitiless

Against my race in each one of its laws?” (Canto X)

15.

And there, by reason of the horrible
Excess of stench the deep abyss throws out,
We drew ourselves aside behind the cover (Canto XI)

16.

Violence can be done the Deity,

In heart denying and blaspheming Him,

And by disdaining Nature and her bounty. (Canto XI)

17.

Darth Soros

Hypocrisy, flattery, and who deals in magic,

Falsification, theft, and simony,

Loading...

Panders, and barrators, and the like filth. (Canto XI)

18.

Based Stickman smites the Antifa Devils

Clearly wilt thou perceive why from these felons

They separated are, and why less wroth

Justice divine doth smite them with its hammer." (Canto XI)

19.

There do the hideous Harpies make their nests,

Who chased the Trojans from the Strophades,

With sad announcement of impending doom; (Canto XIII)

20.

Old rumor in the world proclaims them blind;

A people avaricious, envious, proud;

Take heed that of their customs thou do cleanse thee. (Canto XV)

21.

Antifa terrorists

Towards us came they, and each one cried out:

“Stop, thou; for by thy garb to us thou seemest
To be someone of our depraved city.” (Canto XVI)

22.

Antifa terrorists set police officers on fire in Paris (2017)

Ah me! what wounds I saw upon their limbs,
Recent and ancient by the flames burnt in!
It pains me still but to remember it. (Canto XVI)

23.

The agent of Satan who wants to destroy your nations sovereignty and your 2nd amendment

“Behold the monster with the pointed tail,

Who cleaves the hills, and breaketh walls and weapons,
Behold him who infecteth all the world." (Canto XVII)

24.

Fatherless households have become a major problem since Dante's time…
There did he leave her pregnant and forlorn;
Such sin unto such punishment condemns him,
And also for Medea is vengeance done. (Canto XVIII)

25.

“Suck muh dick and maybe I’ll give you that acting job young Shiksa“

Art thou so early satiate with that wealth,

For which thou didst not fear to take by fraud

The beautiful Lady, and then work her woe?” (Canto XIX)

26.

I would make use of words more grievous still;

Because your avarice afflicts the world,

Trampling the good and lifting the depraved. (Canto XIX)

27.

Ye have made yourselves a god of gold and silver;
And from the idolater how differ ye,
Save that he one, and ye a hundred worship? (Canto XIX)

28.

Behold Tiresias, who his semblance changed,
When from a male to a female he became,
His members being all of them transformed; (Canto XX)

29.

Behold the wretched ones, who left the needle,
The spool and rock, and made them fortune-tellers;
They wrought their magic spells with herb and image. (Canto XX)

30.

If thou art as observant as thy wont is,
Dost thou not see that they do gnash their teeth,
And with their brows are threatening woe to us? (Canto XXI)

31.

Shaun King

And the Friar: "Many of the Devil's vices

Once heard I at Bologna, and among them,

That he's a liar and the father of lies." (Canto XXIII)

32.

Satan spawn comes to your child's school bearing rainbows and "love"

And notwithstanding that mine eyes might be

Somewhat bewildered, and my mind dismayed,

They could not flee away so secretly (Canto XXV)

33.

But said Virgilius: “What dost thou still gaze at?

Why is thy sight still riveted down there

Among the mournful, mutilated shades? (Canto XXIX)

34.

LAZAR KAGANOVICH: DEDICATED KILLER

As Stalin's brother-in-law and closest collaborator, Lazar Kaganovich was one of the most powerful and dangerous men in the world, an executioner with the blood of 20 million people on his hands. He also organized the gruesome persecution of his own ethnic group in Stalin's kingdom. Kaganovich was responsible for the death of an entire generation of intellectuals and the personal signer of execution orders for 38,000 people. Kaganovich also ordered the wholesale destruction of Christian monuments and churches, including the shocking demolition in downtown Moscow of the Cathedral of Christ the Savior in 1931. It was replaced by a giant public swimming pool, but was gloriously rebuilt at a cost of over $100 million by the Russian people and reconsecrated in August 2000. From being the son of a shoe store owner he rose by 1924 into the Central Committee of the USSR, by 1930 into the Politburo (where he remained in until 1957); by 1935 he became a minister in several ministries and ran the Central Commission for the Examination of Party Cadres, and thus the innumerable purges, with lethal outcome. Two of his own brothers—one the munitions minister—were victims. During World War II he belonged to the State Committee for Defense. In 1957 he was removed from all his positions after a failed coup attempt against Nikita Khrushchev.

LAZAR KAGANOVICH

(((Lazar Kaganovich))). Communist mastermind of the Ukraine Holodomor and a worthy substitute for Dante’s Satan.

Were he as fair once, as he now is foul,

And lifted up his brow against his Maker,

Well may proceed from him all tribulation. (Canto XXXIV)

35.

The nightmare is over!

Thence we came forth to rebehold the stars. (Canto XXXIV)

Final Statement

> Dante's *Divine Comedy* continues to resonate with readers, not just because it gives us front row seats to the freak show, but because, the scenes delineated are recognizable. Though couched in the stuff of nightmares, some of what Dante sees has an all too human reality about it. Our knowledge of hell may be belated, but Dante's vision remains, because it is a work of art which recognises humanity's darkest fears, and deepest dreams. It is the poem that has become the palimpsest in which all other latter-day works of art are scribed. – The Road To Xanadu

5 Reasons Why I Quit My Job As A Personal Fitness Trainer

June 13, 2018 | by Larsen Halleck | Link | Original Link

A few months ago I wrote an article analyzing the pros and cons of being a personal trainer. My life has gotten to a point where I am no longer a full-time personal trainer, because frankly the job is not nearly as cool and "dudebro-y" as every screenwriter seems to think it is—and those "smiling douchebag" depictions are probably due to the ignorance of "the man on the outside looking in."

I am a man capable of self-reflection, so here are a few thoughts on my full-time career as a personal trainer:

1. 90% Of Being A Personal Trainer Is Being A Glorified Handyman

The majority of time you're a personal trainer, you will not be training people. You're mostly going to be sweeping and mopping floors, moving stuff, and repairing drywall. One of the few things you'll be doing that is at all related to training people is making phone calls to other people. Many, *many* phone calls.

So essentially, after being paid crappily to be a glorified handyman/pack mule, I decided to cut the middle man and just be a handyman/pack mule, and get paid double what I was making as a personal trainer.

2. Your Pay Depends On Convincing Third World Peasants To Buy Your Services

When I would be making my 100 or so phone calls a day, I noticed that a substantial amount of my clientele didn't speak English particularly well, or not at all. A fact that was confirmed when I would have to do walkthroughs of the gym with clients that literally spoke no English—but hey, at least I got to test my Spanish, which I haven't spoken regularly since high school. And that was of course when they even bothered to show up at all.

I would estimate that of the 100 or so phone calls I'd be making a day, maybe 25-30 would agree to doing a walk-through, in which I would take them on a tour of the gym, give them a sample workout for 30 minutes, and try to talk them into buying a package of personal training sessions.

Of those 25-30 that I would schedule for a walkthrough, I would further estimate that probably 5-6 would actually show up for the damn thing. So just to clarify, of the clients that I could even talk into doing a gym tour, I would only actually do the tour with 20-25% of *those* clients. So 80% of my labor was completely pointless, and I'd be desperately trying to sell to that remaining 20%. And since my base pay was 9 dollars an hour—with the rest of your salary intended to be made up by personal training services, well, looks like I'm going home with 100 or so dollars a day at most.

(Oh, did I mention that I'd often be working 10-15 hour days?)

Of course, I'm not the sort of person who has a knee-jerk reaction to the thought of immigration (the white ethnostate isn't likely to happen, guys), but time preference is a real phenomenon, and when your salary depends on making appointments with a high

time preference person who doesn't really "get" the concept of making an appointment for a future date, is it any wonder that I really started to resent the customers?

On their way to a training session

3. The Industry Is Full Of Soft People

It's a commonly stated talking point that people who don't work out often refuse to do so because they're afraid of showing their ignorance of the field, afraid of going to the gym and getting mocked and bullied. This is in fact the niche that Planet Fitness caters to, as seen by their commercials.

Loading...

It's almost a default assumption of gym novices that every gym is some insane Cobra Kai dojo where you're trained by a psychotic Vietnam veteran and basically beaten to a pulp until you"git gud."

That is absolute horseshit.

Go look up a picture of the CEO of Planet Fitness—he's, to put it politely, a fatty. While that's the most extreme example, a fair amount of the people who work at gyms from what I've seen are not in particularly good shape. Furthermore, most gyms are full of theme days and company events and all the crap that cubicle drones hate about their jobs.

You all know that I've argued *for* the Cobra Kai dojo, and while a part of me wishes that the skyrocketing popularity of the new Cobra Kai show indicates that people want a mean, "tough" gym, I wouldn't hold my breath.

On that note…

4. Your Co-Workers Are Douchebags That Quote “The Secret”

While the “snarling madman” stereotype of trainers is largely false, the “popped collar dudebro” stereotype is largely true.

My first week on the job at the corporate gym chain which will remain nameless, I had to attend job training. This job training was administered by a gentleman named Corey, a name which should tell you all you need to know about this guy. An archetypical “smiling douchebag in a polo shirt”, Corey was a guy that unironically read *The Secret* and was more than happy to tell us about it.

Oh yeah, I wasn’t being facetious in the slightest with this section’s heading. And he wasn’t alone in this respect—while the book choices may have differed slightly, the majority of your co-workers will, in fact, be loud, Type-A, “FIST POUND BROHAM” clods. And needless to say, quoting Marcus Aurelius or Robert Howard—writers that have said more about fitness and motivation in a single sentence than an asshole like Tony Robbins has said in his life—would fall on deaf ears.

I do try to be friendly with people; indeed, I never got into any altercations with anybody at the job. With that said I don’t think it’s irrational to complain about annoying co-workers. Hell, don’t we in the manosphere complain about “human resources cat women” all the time? Same deal, in my opinion.

Half of my coworkers. No exaggeration

5. Rewards Are Few And Far Between

Despite all my complaints, I do generally love helping people and seeing the positive results. It’s why I continue working in the job part time, and why I continue producing content for the internet. And my clients do enjoy the instruction I give them. But doing

this full time for very little reward was just something I couldn’t do anymore.

So tl;dr if you’re going to be a personal trainer, only do it if you own the place or at the very least run your own classes. I run and administer my own martial arts classes and private clients, and I have a lot of fun with the job. But if you’re on the floor begging fat women and old geezers for training, your life is going to be real unpleasant.

American Politicians Are Becoming Fearful Of The Mob

June 13, 2018 | by News Syndicator | Link | Original Link

Via NY Post:

Rep. Barry Loudermilk of Georgia bought body armor. Rep. Gregg Harper hired armed security guards for events back home in Mississippi. And Rep. Dan Dovonan fortified his Brooklyn and Staten Island offices with security cameras and buzzer systems.

This is the new normal for members of Congress. One year after the horrific congressional baseball shooting that almost took the life of Rep. Steve Scalise and former Hill staffer Matt Mika, members are keenly aware that serving in public office has put a target on their backs.

“The true reality is if somebody wanted to do me harm, they could probably do that with relative ease and that is sad,” said Rep. Chuck Fleishmann (R-Tenn.), a New York City native.

The threats against them have skyrocketed.

In 2016, there were 902 threatening incidents and communications against members of Congress. By 2017, the reports had more than doubled to about 2,000, according to the House Sergeant at Arms office.

In response, the House Administration Committee allocated $25,000 to each member in 2017 and again in 2018 to beef up their personal and office security, prompting members to hire bodyguards for events and equip offices with panic buttons and shatter-resistant

glass.

The House Sergeant at Arms got an additional $5 million to improve office security for district offices. Congress also increased funding for Capitol Police by $29.2 million in 2017, and another $29.9 million in 2018.

In recognition of the danger level, the Federal Election Commission also ruled in July that lawmakers can also use campaign funds –typically spent on TV ads and mailers — to install security systems at their homes.

Harper, the chairman of the House Administration Committee that authorized security spending, said the shooting made clear that Congress needed to do more.

“What we would never want to have happen is for an incident to occur and anybody – a member, a visitor or staffer – to say you didn’t give us what we needed to protect ourselves,” Harper said.

Some members report feeling safer, but there are still barriers.

Unchanged is that only the select members of leadership — five people out of 435 House members — are assigned security, including Scalise, whose heroic police officers fended off the baseball shooter last year.

And members of Congress aren’t allowed to carry around their licensed concealed guns while in Washington, taking away one option to defend themselves.

“I’m trained at what I do and how I do it with a weapon,” said Rep. Mike Bishop (R-Mich.), who backs concealed carry reciprocity legislation. “If I had the ability to carry, I would feel safer.”

Bishop said the defenselessness became “crystal clear when I hit the ground that day on that baseball field and realized that I had absolutely nothing to defend myself with against someone who had a weapon that he was double tapping on.”

The 2011 shooting of Rep. Gabby Giffords in Arizona demonstrated the risks of public service, but the need for widespread security improvements were punctuated with the 2017 targeted attack on the Republican baseball team.

Loading…

On the morning of June 14, 2017, liberal activist James Hodgkinson opened fired at the Alexandria, Virginia, practice field. The bullets nearly cost Scalise and Mika their lives. Also injured were Zachary Barth, a congressional aide who was shot, Rep. Roger Williams, who injured his ankle and sustained shrapnel wounds, and two Capitol police officers, Crystal Griner and David Bailey.

One year later, the GOP team will make a triumphant return to the charity baseball game on June 14 at Nationals Park in Washington.

But unlike last year, they are practicing at a different – and heavily guarded – baseball field in Washington that The Post got to visit on the condition it was not identified.

“It was good to move from where we were,” said new team manager Williams (R-Texas), a former minor league baseball player and coach at Texas Christian University. “A lot of us, including myself, did not want to go back there.”

Williams said the return to baseball shows the strength of the country and determination of members to move past a terrible event, which “for those us who were wounded (feels) it’s like it was yesterday.”

“We’re aware. We’re not afraid,” Williams said.

Since the baseball shooting, Loudermilk has been reminded regularly how perilous life is.

Three months after the shooting in September, he got rear-ended off the road, flipping his vehicle several times. About a week after the car crash, a gunman shot at the car he was driving with his wife in the North Georgian mountains. Then he was on the Amtrak train Jan. 31 with other Republicans heading to a West Virginia retreat that hit a garbage truck, killing one person.

“Do I feel safer? No,” said Loudermilk, whose baseball practice clothes still have Mika’s blood. “Threats went up significantly. We have these – almost like wanted posters – in our district office of people who have made threats against me and my staff.”

Some baseball players are still healing from the physical and emotional injuries from the trauma. They look to the remarkable recovery of Scalise and Mika as examples of fortitude.

Mika, a former Adrian College baseball and football player, had volunteered to help out at GOP congressional team practice for about decade. The bullet wounds left him down and bleeding out on the practice field. A year later, his body is scarred, but he’s back to the baseball field in high spirits and throwing balls in practice.

“I’m not a victim,” Mika, a lobbyist for Tyson foods, said. “I’m a survivor.”

How To Overthrow The New Master Race: Western Women

June 14, 2018 | by B. Chadwick Galt | Link | Original Link

The Western man has achieved great wealth, intellectual attainment, technological advancement, medical breakthrough, and the highest status in the world at breakneck speed in the modern era. But as all good things must come to an end, the Western man is drifting quickly towards the edges of the whirlpool due largely to his own actions.

Historians will debate the reasons for this inevitable fall. I put it to you that chief among them was the willful abdication of the Western man's preeminent status in favor of the Western woman.

Little did these men understand that female nature, at its core, employs the strategy of obtaining "MORE" to the point where men have now become dispossessed of the pinnacle of social power. The Western woman sits atop this pinnacle and is now the most privileged, exalted, coddled, empowered, shielded, and defended demographic group in the world while the Western man is her minion. Some evidence of the problem is as follows.

Western Men Are Increasingly Trying to "Pass" as Female

The explosive popularity of Western men living their lives as “trans women” is indicative of their desire to live under the privileges, protections, and prestige of those in this master race. There is no wonder why Western women are the biggest advocates of “trans women” because imitation remains the sincerest form of flattery.

We need only look toward the pre-civil rights era when racially mixed blacks would often engage in “passing” as whites to avoid the unenviable position as second class citizens. The trans community is exercising the same strategy, albeit far less convincingly.

Homosexual and Effeminate Men Are Rewarded as Honorary Females

Lets’s face it. The most fashionable and celebrated men in the Western world are gay or seemingly gay men because their very existence validates Western women’s status as the master race which is to be emulated and respected at all costs.

Western women defend gay and seemingly gay men to the death because an attack on anything gay is an attack on Western women by proxy. This is way Western women attend “Pride” events with glee and promote the LGBT lifestyle as hip and progressive. Each new gay man represents a new loyal follower of women as the master race.

Western Female Supremacy In Public Policy

Western women exert the power of their governments to enhance their exalted status and to symbolically subjugate men in a variety of ways. One of the most egregious examples is the difference in treatment between male and female genital mutilation.

The United States government actively funds and supports male circumcision programs under the guise of reducing the spread of HIV in developing countries. The efficacy and clinical underpinnings of this practice are suspect at best but this program is vociferously defended by feminists to thumb their noses at men all while anti-female genital mutilation programs are similarly funded and supported. This baffling discrepancy is how women in governments actively flaunt their power to reinforce their supremacy over men.

Intentional Restriction of Male Prerogatives

Loading…

One of the most powerful ways the Western women has defeated men is by backing men into a behavioral corner by restricting male options. For example, if a man in the workplace restricts his interactions with women to purely professional matters, he stands to be liable to charges of disparate treatment discrimination at worst. But if this same man willingly interacts socially with women at work, he stands to be accused of sexual harassment when any woman finds it advantageous to do so.

In the area of public transport, if a man refrains from giving up his seat to a woman, a woman can have him arrested for manspreading in some jurisdictions lest he forget himself in her presence. But if the same man gives up his seat to a woman, he can be cited for being creepy if the woman so deems him.

If a man shows common courtesy and holds a door for a woman, he can be chastised as condescending for treating the woman as somehow less capable of getting the door for herself. But if this same man refuses to hold that door open for that woman, he can be deemed a rude miscreant for not showing deferential treatment to his better.

Western men therefore now live in a world of being potentially damned if you choose to do and likewise damned if you don't. This is the hallmark of female supremacy in a system where women are empowered with arbitrary power to control men in every sphere of life.

How To Re-Impose Male Supremacy

So how can men regain supremacy when the decks are so stacked against them. The below are tips men can incorporate into their day to day lives to topple women from their tenuous place of power.

Never help a woman for anything unless she is a family member or a sexual partner

Treat all other women as if they are on their own when they are in a pickle. Pass by the woman with a flat tire. Never intervene on behalf of a woman in your personal life. Treat them as if they are on their own.

Never employ women beyond clerical, customer service or support roles

Although this practice can be legally challenged, clever employers know that spending a little on legal defense early can prevent years of huge costs later.

End all platonic friendships with Western women

Women, unless they are sleeping with you, are to be treated as the enemy which wants to exploit you for whatever money, attention, and services you can provide. See women purely as providers of sex and children only. If you want to have platonic friendships with women, do so outside of Western society where women still respect men as leaders.

Vote in each and every federal, state, and local election but never again vote for a female under any circumstances

It has been said that “Elections are less about voting for someone and more about voting against someone else.”

File official grievances, complaints, and lawsuits against women whenever you can as a pure act of war

Women rule the roost in Western institutions, so these actions go a long way towards changing discriminatory attitudes towards men in favor of women.

Travel to and develop comfort in non-Western countries

And increasingly invest and spend your wealth there as an act of defiance. Starving the West of male consumption revenue will hasten the economic demise of female supremacy and leave it vulnerable to overthrow from within or from without.

When the Islamist or migrant uprising goes into full tilt in the West, refuse to fight it and just let it be.

Hostile outside forces are the means to re-masculinizing the West. Use these enemies of your enemy to do your dirty work for you because when it is all said and done, Western men will rise to the top in any male-dominated society.

Female supremacy will inevitably fall, but "red pilled" men must collectively do all we can to ensure it happens sooner rather than later.

The Fascinating Origins Of The Cyrillic Alphabet And Orthodox Christianity In Eastern Europe

June 14, 2018 | by Ryan Holmer | Link | Original Link

I've always been fascinated by how small events can lead to massive changes—how one decision can lead to a ripple effect that alters the course of history forever.

In their own ways, the Cyrillic alphabet and Orthodox Christianity have played important roles in the shaping of Eastern European culture. The Cyrillic alphabet is used by around 250 million people around the world as the alphabet for their national language, and Eastern Orthodox Christianity is the second largest Christian Church—with over 250 million members.

The spread of Orthodox Christianity throughout eastern Europe would have likely failed, however, had it not been for the birth of the Cyrillic alphabet. Interestingly enough, the Cyrillic alphabet was born partially by accident… or was it divine intervention?

Sviatsolav I of Kiev

The Death of Sviatsolav I of Kyiv

During the 10th century modern-day Russia, Ukraine and Belarus were joined together in what was then known as Kievan Rus—a federation of Slavs ruled by the Rurik dynasty. The Rurik dynasty was founded by the Varangian (Scandinavian Vikings).

Kyiv was, strategically, a very important settlement. It’s location along the Dnieper allowed the Varangian to form a crucial trade route stretching from the north, all the way to Constantinople, and the Byzantine Empire—a vast, rich empire and trading partner.

Varangian Trading Routes

In the year 927, Sviatsolav, ruler of Kievan Rus, died. He had three sons. Two of his sons, Volodymyr and Iarpolk, were embattled in a feud for control of the empire. While familial feuds were very common in 10th century Europe, they would play a particularly prominent role in the failures of Rus over the next 800 years.

After many years of feuding, Volodymyr overthrew his half-brother and become Prince of Kyiv.

Legitimizing His Claim

Overthrowing his half-brother was just the beginning. People were accustomed to familial feuds by this point and wanted stability throughout the empire. Volodymyr's people were in a state of discontent. He needed a way to legitimize his claim to the throne.

To accomplish this, he embarked on a campaign of religious persuasion. According to legend, he stood atop a hill in Kyiv overlooking the Dnieper, and announced that he would welcome all gods in his empire; Norse, Slavic, Finnish and even Iranian. His ploy worked.

In a sudden turn of events, however, he suddenly abandoned these Pagan gods, and adopted a new religion. Volodymyr was exceptionally violent in his abandonment of the Pagan gods—destroying statues, and symbolically dragging them through the streets.

Volodymyr went as far as to proclaim he who does not adopt this new religion will be his enemy. While some suggest Volodymyr was hasty in his decision to abandon the Pagan faiths, it's clear that he spent a lot of time pondering the decision to switch faiths and researched multiple religions before making his final decision.

Many point to this moment as emblematic of Slavic culture—prone to extremes, never able to choose the middle ground.

Choosing A Religion

Several years into his reign, Volodymyr, sent emissaries through Europe to inquire into the teachings of several different religions. These religions were Islam, Judaism, Catholicism and Orthodox Christianity.

Record is perhaps hyperbolized here, but according to legend, he had no interest in Judaism, was unimpressed by Catholicism, and couldn't fathom adopting Islam as it prohibited alcohol consumption. Alcohol was used as an effective tool to increase army morale and encourage male social bonding.

Loading…

Volodymyr was thoroughly impressed with Orthodox Christianity and subsequently adopted Orthodoxy as the federation's religion. While Rus' sources say he was impressed with its beauty, it's more likely he adopted Orthodox Christianity to strengthen his empires relationship with Byzantium—their largest trading partner at the time.

Secondary to strengthening his ties with Byzantium was that Orthodox Christianity legitimized his monarchial power, and demanded law and order throughout the empire… and for an empire in a state of near-chaos, Orthodoxy provided an optimistic respite.

The initial reaction to Volodymyr adopting Orthodox Christianity was initially negative, as for years the Slavs had been Pagans. What allowed Orthodox Christianity to succeed and flourish in eastern Europe, however, was something that happened, almost by accident, nearly a century earlier.

Divine Intervention

In 860 AD, Byzantium dispatched two Theologians, Cyril and Methodius, to convert Pagans in Europe, beginning in Moravia—modern day Czech Republic. To do this, Cyril and Methodius learned the Slavonic language spoken in Moravia and devised an alphabet for it. This alphabet was called the *Glagolitic Script*, and is the oldest known Slavic alphabet.

Saint Cyril and Methodius

The Glagolitic Script did not receive much support in Moravia. The Germanic clerics in the region convinced Moravians that the Latin language was the only way to properly read, and recite scripture.

Moravia ended up not adopting the Glagolitic script, eventually banishing Methodius and Cyril from their empire. Seeking refuge, the brothers traveled to Bulgaria. Khan Boris of Bulgaria wanted Methodius to help him create an alphabet for their language.

The Glagolitic Script

Khan Boris and his son eventually adopted and introduced Orthodox Christianity to his empire, with a brand new alphabet modelled on the Greek language—as opposed to the Glagolitic script, which was based on unknown sources—perhaps a loose mixture of Greek or other alphabets.

This new alphabet was known as the *Cyrillic script*, and helped spread Christianity throughout Bulgaria and Eastern Europe like the plague. Without this script, Orthodox Christianity would have not spread; Catholicism was already beginning to encroach on eastern European borders.

Orthodoxy Christianity Makes Its Mark On Rus

Eventually, Volodymyr married the sister of the Byzantine emperor, further strengthening the relationship between the two major empires at the time. After this marriage, and the adoption of Orthodox Christianity, Eastern Europe changed forever.

Greek craftsmen spread throughout Kievan Rus, building churches wherever they went. Bulgarian clerics appeared throughout the empire with their holy books and using the Cyrillic script in the Slavonic language—easily converted people. This led to a major shift in law, with a larger focus on ecclesiastical decree.

Blood feuds, at least for a time, were reduced. Marriage and social bonds were

strengthened, people were more optimistic, and the monarchial rule of Volodymyr was affirmed, as well as the legitimacy of his reign.

The rest is history. Orthodoxy spread like wildfire, despite facing some tough tests later in Moscow. In Moscow and western Russia (notably, Novgorod) there was a conflict between Christianity, and Catholicism (the Lithuanian-Polish empire was Catholic). Some Russian citizens despised how Orthodoxy was being interpreted to create an authoritative, monarchial power, and veered towards adopting Catholicism for the prospect of a better life.

Nevertheless, Orthodoxy and the Cyrillic alphabet have stood the test of time. Had Saint Methodius and Cyril not been sent to Moravia, had they not survived, had they not been banished by Moravia (or had they been killed instead), it's very likely that Catholicism would have prevailed, and would have eventually westernized Eastern Europe, destroying the traditional values that we admire today.

Shut It Down: Jerusalem Post Attacks This Saturday's Happy Hour

June 14, 2018 | by Roosh Valizadeh | Link | Original Link

The folks over at the Jerusalem Post have freaked out that I'm throwing a Stop Violence Against Women Happy Hour this Saturday, declaring me an "antisemitic pickup artist."

> Daryush Valizadeh is at it again.
>
> More commonly known as "Roosh V," the controversial pickup artist-turned alt-right figure gained media notoriety in 2016 when he attempted to host a series of worldwide meetups to promote "neomasculinity." Last week, Valizadeh announced he will be hosting a happy hour in Washington, DC, on Saturday.
>
> […]
>
> In recent years, Valizadeh has expanded his sphere of interest: Not only are feminism and "female entitlement" threats to western civilization, but so are leftists, Muslim immigrants to the United States, more traditional conservatives, and, of course, Jews.
>
> Valizadeh wrote an antisemitic blog post in June 2017 titled "You Become What You Fight," in which he blames the Jews for "creating feminism."
>
> "Who created feminism? Who pushes their ideas? The Jews," Valizadeh wrote. "They were crafty, intelligent, persistent, and masters of propaganda. Their negative influence on Western civilization must be countered."
>
> He has published other antisemitic material as well.

They can whine all they want because at 7:30pm this Saturday, I will share the location of the Starbucks we're meeting at on my Twitter (it's within walking distance of Metro Center). Find me inside between 8-8:30pm to get the location of the main event, which will not be publicized online. Click here for full details.

Loading…
On Tuesday night I ran into several readers and they had some questions/concerns about the happy hour…

"Is this a real event?"

Yes this is a real event. I will arrive to the Starbucks at 8pm. We will go to another bar at 8:30pm to eat, drink, and talk.

"I'm scared I will get doxed."

As a man who has taken many large risks in life, I want to meet like-minded men who also like to task risks, though currently the risk for you to attend this event is rather small. Understand that I have it worst—I will be a sitting duck for half an hour to everyone in the metropolitan DC area who hates me and knows how I look like.

My best advice for men with sensitive jobs is to wear sunglasses and approach the Starbucks as if you were inching into a cold pool. Observe the surroundings carefully as you get closer. If the water gets too cold, withdraw momentarily. You only need to have a 30-second interaction with me to get details of the private venue.

"Isn't your birthday on June 14, the same day as Donald Trump's?"

Yes, today is our birthday. I turn 39.

"I'm a girl… can I come?"

Hi Roosh! I'm [redacted] freelance journalist based in Atlanta, Georgia. First, let me clear: I have nothing against you or your movement and I'm solely curious about the rise of male resistance groups.

That being said, would you be okay with me attending your gathering in Washington DC?

9:37 AM

I will stand in the back, won't film anything, and will only speak if spoken to

9:47 AM

You accepted the request

"9. Journalists are not allowed to attend, and will be asked to leave if identified." No exceptions

2:21 PM

Three girls in the DC area have asked me about attending. As long as you don't attention whore, are not a journalist, refrain from debates, and stay in the back, you are allowed to come.

If my Twitter is banned for whatever reason, check my Gab. This event will not be livestreamed, though if there are protesters I will film them for laughs. See you on Saturday.

Lynyrd Skynyrd Concert Footage From 1977 Showed That Even California's Women Were Once Beautiful

June 15, 2018 | by Beau Albrecht | Link | Original Link

Lynyrd Skynyrd gave a concert at Oakland—July 2, 1977—part of their Street Survivors Tour. Three of their songs, including their iconic closing number 'Free Bird', are captured on video. They returned on Independence Day for another show.

They left here tomorrow, but we still remember

Tragedy would strike soon. On October 20, their plane crashed, killing three band members. The pilots died as well, also one of the managers. The other passengers were hospitalized. Although it's grim to contemplate what would happen less than four months later, the video is actually a touching testament to their lives. The band's enthusiasm is powerful, likewise the crowd in the packed stadium.

It's also a poignant memory of the America that once was. By today's standards, the audience was *unbelievably normal*. Musical genres often attract a specific demographic, and ticketholders are self-selected. Therefore, this wasn't a completely representative sample of the local population. Still, the contrast between then and now is stunning.

The fans were young Baby Boomers, a generation often considered flawed (though Millennial snowflakes are getting a worse rap). This was 1977, the embarrassingly inept Carter Presidency's first year. Hippies were still around, though falling out of fashion. That decade was somewhat tacky and weird (though charmingly innocent by today's standards). Still, you certainly couldn't tell from this footage!

A sea of unadorned beauty

These types were nowhere to be seen. (Yes, the lower left is what you think it is. Further "details" below not shown.)

Many young ladies gathered near the stage. (Perhaps they liked the looks of the musicians even more than their songs!) Typically hair was below shoulder length, and none chopped short like a diesel dyke. There certainly were no shaved heads or Skrillex cuts (both were punishments for adultery in ancient times). Not a single one had weird colored hair like a clown. I couldn't tell if any of them had dye jobs; any who did stuck to natural colors and touched it up well.

None were pierced up like pincushions. Facial ironmongery was completely absent; not even a single bull ring through the nose. The ladies certainly weren't inked up like sailors. I noticed only two tattoos—one of the band members, and the guy toward the end smooching his cutie as the show closed.

Concerning body types, nobody was even near the chub zone. None had a heroin chic appearance either, which gay fashion designers like to promote these days. (I'll give a potential girlfriend a break for some extra meat on her bones within reason, though beyond a certain point, she'd better have a stellar personality and be a freak in bed.) Still, I must say, those concertgoers really hit the sweet spot with graceful curves.

None of them were glued to smartphones—those didn't exist then, but it's a refreshing break. Makeup was tasteful—no Tammy Faye pancakes or clownish styles—and I suspect most were just that beautiful without needing it. They were well-dressed too. Many wore bikinis, but the effect was still wholesome. All told, they radiated maidenly charm and innocence, almost angelic.

So normal it seems unreal

There weren't any guys like this either. Actually, I'm not quite sure what some of these specimens are.

The guys in the audience tended to be modestly buff, no beach ball bods. Were they all into the recent jogging and health food fads? No, that's simply how most people were. The guys in the audience looked pretty straight-laced; except the two at the very end passing a joint. The band members were longhaired and a bit edgier. (Some occasionally had major substance abuse fuckups, unfortunately rather common for celebrities.) This could've been called the Ivory Soap concert, for one reason because it was 99.44% pure.

Loading…

Again, the audience wasn't an exact cross-section of the local population. Oakland *actually did* look like that prior to WWII, though demographics had changed much by 1977. Since then, the "gringo" population has fallen by about half, much like Philadelphia. Oakland is considered among the USA's most diverse cities. (Whether that was an improvement is certainly a matter of opinion.)

Reagan won California's numerous electoral votes three years later, but it's been a blue state ever since. Ted Kennedy's strategy of stuffing the ballot box through population replacement immigration really got results. Could a Dixie rock band fill Oakland's Coliseum like that now, with enough interested locals remaining for a repeat act two days later?

Most think of mid-1970s California as still being jam-packed with hippies. However, the "square" culture actually constituted the majority, although the counterculture is better remembered today. This was so even during the late 1960s. Male hippies did resemble cavemen with love beads, and were notoriously allergic to soap. However, the female

hippies usually had a pretty wholesome appearance, and at least slathered on the patchouli. Both sexes of today's imitators, the hipsters, look like Martians.

You might suspect the audience was from some pristine corner of Eastern Europe, as yet unspoiled by degeneracy. No, this was America, nearly 41 years ago. I couldn't help shedding a tear, much like the American Indian surrounded by litter in the public service announcement from those times. My country got trashed too.

The rebel flag

If Malcolm X regalia and the like is OK, then why not this?

The Confederate battle flag was prominently displayed at the back of the stage, about 25 feet across. It was nothing remarkable back then. However, during the 1990s, the climate of persnickety political correctness started making people mighty prickly about that. Lately, it's been removed as a design element in some Southern state flags. A rock band displaying a large Confederate battle flag today, near the buckle of the Granola Belt, would run great risk of setting off a tectonic level of triggering. In fact, that might touch off the Big One and cause California to sink underneath the ocean.

Why all the recent fuss? Today, General Lee's emblem often means no more than Southern heritage, with a streak of rugged independence. However, to some degree, it's become an unofficial symbol for White pride. Well, we can't have *that,* now can we?

Marcus Garvey's Pan-African flag—red, black, and green—explicitly symbolizes armed struggle by Blacks for the African homeland. (You'll see a lot of those at reggae concerts.) Several flags in Africa are similar to this design; including the militant meaning (Kenya's even features crossed spears and a shield). Some other flags have dissimilar designs, but likewise use the color black in an explicitly racial context.

This isn’t controversial, and I don’t mind either. I’m also fine with the Malcolm X clothing designs that once became quite popular. It’s not time to get rid of the rebel flag, but rather the rotten double standards.

The once and future Western civiliation

So California is the chief state of the Left Coast. Still, it was pretty normal once, and even had a conservative majority. Right across the bay from Oakland is San Francisco, which itself retains a certain charm although suffering from toxic granola levels, among *other peculiarities.* Back then, the nuttiness was mainly confined to neighborhoods like Haight-Ashbury. Other than those, San Francisco wasn’t yet all pozzed out, but soon would be, and also in a literal sense.

So the video shows what normal America looked like four decades ago, before cultural Marxism and degeneracy reached peak convergence. Unfortunately, the infection began spreading across the USA and far abroad too. Although it won’t be easy, it’s time to start getting back to normal, and the sooner the better.

4 Reasons Why Men Should Read Bronze Age Mindset

June 15, 2018 | by Sten Morten | Link | Original Link

The minds of Western men have become calcified through the years due to repeat exposure of the same lies, convenient half-truths, and disinformation campaigns. Our media, academia, and politics have become so full of these pestilent falsehoods that one is hard-pressed to name a significant, positive contribution to the Western canon from recent years.

While Return of Kings and associated online communities excel in providing men with actionable advice, a truly novel work of philosophy has yet to emerge. However, all of this changed recently upon the release of Bronze Age Mindset by Bronze Age Pervert: a work of stunning clarity that provides men with a distinct path forward to usher in a glorious new era of Western thought.

Who is Bronze Age Pervert? In truth, nobody knows for certain. Some say he worked as Steve Bannon's contact within the White House. Some say he rode with Achilles on the wind-swept plains of ancient Troy. Others still insist that he's part of all of us: the indomitable spirit of ancient man incarnate. Whoever or whatever Bronze Age Pervert is comes second to his vision and how you can apply it to your own lives.

1. Sun & Steel

Anyone who has taken the Red Pill knows how difficult it is to convince others to see the truth. These days, people are so ingrained in their own false beliefs that it seems impossible to help friends and loved ones along the right path. Bronze Age Mindset advocates that before revealing the truth about reality to someone, you must first prescribe them a course of “sun & steel.” Here, in this allusion to Japanese author and bodybuilder Yukio Mishima, Bronze Age Pervert refers directly to sunlight and weightlifting.

It’s no secret that men who hold far left wing views are weak, pale, and timid creatures. Take a look at the body politic of any major American urban center and you will observe that weakness of mind and body leads to a weakness of spirit. This causes such men to adopt a mindset of victimhood and makes them susceptible to the progressive ideologies that seek to exploit this.

Thankfully, this can be remedied by stepping out of the office, getting some sunlight, and hitting the gym. A man dedicated to improving his physical health will soon cast off such ideologies of weakness as he develops confidence and mastery over himself. In time, he will grow more willing to adopt proper ideas about masculinity.

2. Ancient Inspiration

The men of antiquity were exemplars of power, wisdom, and courage. When the Greeks defeated the Persians at the Battle of Marathon, they immediately ran twenty-six miles—clad in full armor—back to Athens to prevent the landing of additional Persian forces. These types of manly feats are discussed in detail in Bronze Age Mindset, and examples are provided on how you can use these historical events to become powerful in your own life.

While we may never be as great as the heroes of lore, there is no reason to despair. The world is large and full of opportunity. It is essential that a man find his calling from within and pursue it obsessively. What this means for you will vary: perhaps you wish to be a professional athlete, a renowned physicist, or master woodcrafter. Whatever your calling is, you can draw inspiration from the men of the past who accomplished great deeds.

Loading...

A man separated from his history is a man without roots. By reading about great men, we learn that anything is possible with the right discipline and application of effort. Bronze Age Mindset contains such stories and serves to guide you along your own path to greatness.

3. Dispelling Falsehoods

Though taking the Red Pill puts you on the path to truth, it is a mere entryway into dispelling the lies you have been told since infancy. Many men find the PUA community after having realized that the advice they were given concerning women results more often than not in abject failure. However, the truth about masculinity and femininity is just the beginning.

We are told in secular societies that science is to be our new religion. We are told we must believe in everything scientific experts claim and that those who don't are flat-earth fundamentalists who think Jesus walked with dinosaurs. But, science as it is practiced today is just another institution that has been corrupted by progressive thought, moneyed interests, and corporate lobbying.

Take, for example, the lies we were told about the purported healthfulness of soy and soy-based products. Much of this was disinformation by large agribusiness to reduce the quality of the food supply and cause permanent, testosterone-decreasing endocrine damage to men. This is but one of the many lies we were told. Bronze Age Mindset takes this concept further, exposes modern science for what it has become, and explains how men can retake control of technological innovation.

4. Heroic Friendships

Loneliness is an epidemic in the United States. Though this phenomenon has traditionally affected the elderly, it's become increasingly common in young men. Many young men do not have close friends, let alone girlfriends or wives. It's clear from the recent "incel" phenomena that this has potentially deadly results for civilization.

Bronze Age Mindset advocates for the return of the heroic friendship. Many such friendships were formed in battle: Achilles and Patroclus, Alexander and Hephaestion, and many others. Modern academics are quick to dismiss these relationships as "homosexual" because they are both incapable of comprehending male friendship and fear the return of what two devoted heroic friends can accomplish.

Here, Bronze Age Pervert stresses the importance of forming your own band of men to achieve great tasks. Many in the PUA community also share this sentiment, and responses to mere happy hour meetings of likeminded masculine men have been met with harsh criticism, violent protest, and even travel bans from certain countries. It is clear that what the powers that be fear the most is the heroic friendship; the unbreakable bond of great men set on achieving a common, noble cause.

In conclusion, Bronze Age Mindset marks the beginning of a new era of Western thought. Bronze Age Pervert guides us through the past to show us how we might learn from it and apply ancient wisdom to create a better future for ourselves. His ideas are novel, compelling, and show us that we are finally at the dawn of something greater than us all.

Women Have Taken Over Science Fiction

June 17, 2018 | by Jared Trueheart | Link | Original Link

Sci-fi used to be an action-packed, thought-provoking genre of storytelling. Sometimes sci-fi stories can even be prophetic. Here's a great article about an Isaac Asimov sci-fi/mystery and how our culture is slowly becoming like the sci-fi dystopia in the story. But the genre is not what it used to be.

Women are taking over sci-fi. Men are there but they are second fiddle. They're the muscle when the muscle is needed, but sci-fi stories are predicated on the need for intelligence more than physical strength. Women now fill that role as often or more often than men. That might be emasculating as it is, but the portrayal of men in sci-fi is where the contrast really becomes clear.

When men aren't weak beta cucks they're brainless muscle power. Women solve the complex solutions and give orders to the men. We see how feminism is taking over sci-fi in several ways.

The Brilliant Beautiful Scientist

There is a new archetype appearing in many sci-fi stories; the brilliant beautiful scientist. This is a woman with beyond-genius level intellect. She's usually either bitchy or brooding. When some moment of epiphany is needed to solve the equation or defeat the alien, she has that moment. The most unbelievable part is that she's also beautiful. Attractive women can be smart, but very few have the work ethic to be the best of the best in a field (if they even have a field).

Here are some examples of the Brilliant Beautiful Scientist:

These are the scientists who save human life in Interstellar

Just look at the size of that equation she solves

Sandra Bullock in Gravity

Amy Adams decodes an alien language in Arrival

Jennifer Connelly in the day the earth stood still

Rebecca Ferguson is the scientist that makes the hard calls in Life

Not long ago, leftist media tried to push the brilliant beautiful forensic scientist on us. The two best examples of that are the lead actress in that show Bones and that hippy gothic girl in NCIS. It didn't catch on, but Hollywood is tenacious.

Loading…

Men's Roles in Feminist Sci-Fi

Amazon Prime recently released a sci-fi show based on the stories of Phillip K. Dick called Electric Dreams. It had great production value and was very well-made. Of the ten episodes, five have female protagonists, one has children protagonists, the remaining four have male protagonists. These males explain how feminism is taking over sci-fi.

In one episode, Steve Buscemi stars as a beta male who falls in love with a hot red-headed robot. He does beta stuff for her and is manipulated by her, even though he already has a wife. By the end of the episode, the wife has left Buscemi to have a lesbian affair with the hot ladybot.

He gets cucked by the girl who manipulates him

In another episode, a morbidly obese man starts to rebel against the state and is hunted down because of it. The obese man is married to a fatty. The fat wife is shown in several scenes to be fantasizing over an attractive man in a coffee ad. A fat, beta man on the brink of being cucked by his fat wife.

Another episode shows a guy working a crappy job and saving his money so that he can be with his long-distance girlfriend. She doesn't want to be with him though—she wants to live in the big city because she loves her job more than him. Just when you think he might gain some self-respect he sacrifices himself to entertain an old lady. The fourth story with a male protagonist is about an old man and his relationship with his son.

Annihilation

The best example of how feminism is taking over sci-fi today is the critically acclaimed Annihilation. In Annihilation, brilliant beautiful scientist Natalie Portman misses her Army special forces husband who is believed KIA. He comes back one day in a weird state. Covert soldiers pick her and her husband up and take them to a secret facility.

It turns out his Army unit was in an alien-inhabited zone. All died except for him. Natalie Portman decides she has to go in, along with brilliant beautiful scientist Jennifer Jason Leigh and a couple more BBSs, and find out why her husband is the way he is. She owes it to him.

Once there, we learn the reason she owes it to him. While her husband was deployed Natalie Portman was cheating on him. Her guilt drives her to make it up to him by trying to cure him. By the end, she and the other lady scientists have figured everything out. Natalie Portman does what teams of green berets couldn't do for years.

This film has it all: not one but *four* brilliant beautiful scientists and a man easily cucked. The BBS solves the problem and renders the solution, thereby absolving her of her guilt

for cheating on her husband. She gets to have her cake and eat it too.

Female Russian Politician Tells Women Not To Sleep With Foreign Men During World Cup

June 17, 2018 | by News Syndicator | Link | Original Link

Via Breitbart:

The comments, made the day before the international soccer tournament is set to begin in Russia, come from Tamara Pletnyova; the Russian politician who oversees that country's Family, Women, and Children Affairs Committee in the lower house of parliament.

Tamara Pletnyova — savior of Russian race or wall victim cockblocker?

Speaking with a Moscow radio station, Pletnyova said that the World Cup presented a danger in that it could lead to a rise in the number of single mothers.

“These children suffer and have suffered, even since Soviet times,” she told Govorit Moskva.

The prospect of a child being fathered by a foreigner poses even greater dangers, according to Pletnyova.

“If it’s another race, then it’s even worse,” Pletnyova continued. “We should give birth to our own children. I’m not a nationalist, but nonetheless. I know that the children suffer as well, and then they are abandoned and stay here with the mother.”

Loading…

Pletnyova cautioned that even if a Russian woman married the foreign father of her child, problems could still arise if they become estranged.

“Then they come to me at the committee and cry that the child was taken away, removed, and so forth. I would like people to get married based on love in our country, regardless of which ethnicity, [to] Russian citizens who would build a good family, live in harmony, have children, and raise them.”

Pletnyova has made controversial statements regarding sex in the past. According to RadioFreeEurope/Radio Liberty:

> In March, [Pletnyova] expressed support for comments by Vyacheslav Volodin, the speaker of Russia’s lower house of parliament, in which he told female journalists who cover the legislature to change jobs if they face sexual harassment from lawmakers.

> ‘I would like to say that these girl journalists should look more decent, put clothes on themselves when entering a state building, instead of having their belly buttons naked,’ Pletnyova said in an interview with Ekho Moskvy radio. ‘Volodin is right and I fully support him. If they are scared and are offended, they should not come here.’
>
> Volodin’s remarks followed sexual harassment accusations made by female journalists against senior Russian lawmaker Leonid Slutsky.

World Cup play begins on Thursday, with Russia taking on Saudi Arabia.

Are You Subliminally Revealing A Beta Male Core Through Mate Guarding?

June 18, 2018 | by Troy Francis | Link | Original Link

Mate guarding is always a bad idea, no two ways about it. If you feel the need to 'mate guard' when you are in public with your girlfriend then resist it. It's beta in the extreme and it sends out a bad message both to her and to the people around you.

In case you're not familiar with the term, 'mate guarding' refers to the tendency of some guys to try to indicate 'ownership' of their partner in public. This can be subtle, say by linking arms at sensitive moments (for example when a group of guys enters the social space); or overt, by actively threatening other men with consequences if they don't stay away.

Of course, this is all wrong on many levels. For one thing, you don't 'own' her any more than she owns you. She is a human being who can make her own decisions. And if she is with you, then it is because she wants to be with you: no more no less.

Another thing is that any attempts at 'mate guarding' are counterproductive since they will make you look weak.

Protecting Her Ass

I recall many years ago standing in a bar with a ‘natural’ colleague of mine. We were observing a girl we worked with—quite an attractive, vivacious girl—and her boyfriend. The boyfriend, surrounded by people, had placed a protective hand on his girl’s ass.

My natural friend laughed and imitated this guy’s somewhat stiff, nervous posture, before commenting:

‘There’s no point in doing that. If she’s going to cheat she’s going to cheat. Nothing you can do about it.’

Now, this man was a tall, good-looking alpha, and it’s unlikely he got cheated on often. However, his attitude was instructive. And it is certain that he would never have stooped to mate-guardian measures himself.

Why? Because he didn’t have to.

Think about it like this. If you are truly alpha, a prize amongst men, then would you worry about your girl going off with another guy? No, of course not. For one thing it’s never going to happen, and even in the unlikely event that it does you will have little problem in replacing her.

Do you suppose that Justin Bieber or Leonardo DiCaprio or Ryan Gosling or A$AP Rocky bother with mate guarding? Of course they don’t! Why would they? They are confident in their superior status among men and in their magnetic attractiveness to women.

There’s no need for such men to even consider the possibility of a woman straying. It’s simply not going to happen.

Loading…

Now, perhaps you are ready to counter this line of logic by pointing out that you are neither Justin Bieber, nor Leo DiCaprio, nor any of the other celebrities I’ve mentioned.

You’re just a normal guy of average looks and means. Therefore, things are different. Therefore, you need to mate guard every once in a while just as ‘a precaution’.

That thinking is all wrong. By going down that mental avenue you are merely reinforcing any suspicion your girl might have that she is with a suboptimal guy. And as a result, your attempts to mate guard her will be counterproductive.

OK, on that particular evening she may well not talk to or flirt with any other guys. But what message have you sent her?

‘My boyfriend is so weak and unconfident in himself that he feels the need to attempt to broadcast the fact that we’re together to ward off other men when we’re out.’

I hope you can see how problematic and self-defeating this approach is. Once you’ve weakened her sense of you as a strong man who deserves her, then you have begun to chip away at the very foundations of her respect and attraction for you. And once respect and attraction are diminished then it’s only a short path to her dumping you or cheating on you.

High Value

Instead of mate guarding, when you go out with your girlfriend, or wife, or even with a random girl you’re taking on a date, simply act *as if* you haven’t got a care in the world.

Yes, your pulse might be racing, and inside you might be terrified that something’s going to go wrong. Disregard those feelings. They are the product of your imagination and they’re not going to do you any good. Instead, put on a front of being calm, comfortable, and in control of yourself.

Subconsciously your girl will be impressed that you are not fussing over her. She will be impressed because you are now exhibiting the characteristics of a high value male. And

doing that will put you in a far better position than mate guarding ever will.

5 Ways Your Body Reacts While On A Date With A Beautiful Woman

June 18, 2018 | by Alex Reddle | Link | Original Link

In order to fully appreciate what it is to feel completely comfortable and confident with our masculinity, it would do no harm to appreciate the biological factors underlying the emotions. Perhaps a worthy starting point for embarking on an exploration of male physicality would be to examine how your anatomy reacts on a date.

Why do we feel the way we do when we're strongly attracted to someone? Do these emotions ebb and flow? Are there ways to enhance sexual awareness? At what particular time during a date are they likely to peak? The answers to these questions and many more can be gleaned by focusing on five key ways your body will react when going on a date with a sexually attractive woman.

1. Brain

This is your body’s control center so it makes sense it this organ that first kicks into action. This can occur long before you actually meet up with your partner, as simply thinking about them, texting or chatting over the phone will start to get those hormones buzzing with anticipation. Of course, there is nothing more stimulating than actually hooking up in person, and the moment your date glides into the bar of your choice in a drop-dead gorgeous short skirt and low-cut top, your brain will emit powerful neurotransmitters.

Basically what happens is this: eye contact will immediately cause nerve impulses to jolt against microscopic nerve fibers. These may be a series of tiny impacts but they will have a massive effect on your mood, especially your libido. When the nerve fibers are stimulated, chemical substances are released into your brain, known as neurotransmitters. That these are often referred to as your anatomy’s chemical messengers is so apt, and the messages they send determines how you respond.

In certain situations these neurotransmitters will recommend inhibitory action; say if you’re cautious or scared about something. But in a dating situation, they’ll be like so many Olympic torchbearers, carrying beacons of light announcing to the rest of your body you are well and truly turned on. More than that, these chemical messages can induce feelings of euphoria, in some cases not a hundred miles away from the rush provoked by artificial stimulants such as caffeine or recreational drugs.

2. Heart

As these chemicals from your brain are busy sending messages throughout your anatomy, one major organ that will also be affected will be your heart. So when your date comes to sit close to you, you may well begin to feel your pulse racing. The jolts of stimulation emanating directly from your brain will also cause your blood pressure to rise.

Those cliched romance novels might describe dating situations in flowery terms such as ‘my heart was racing’ or ‘his touch made me feel giddy’ but the fact is the sudden surge in cardiovascular activity will lead to you feeling a little light-headed or dizzy. Unless you want your date to worry you might be having some kind of episode, a worthwhile suggestion would be for you to take a few deep breaths in order to calm a quickening pulse.

Loading…

3. Eyes

Apart from the obvious parts of her anatomy, the one aspect you will automatically be drawn to will be her eyes; the so-called windows into her soul. There are no real scientific reasons for this other than actually seeing the object of your desire will inspire those critical neurotransmitters to be scrambled into their furious activity.

What can be stated with certainty is the more she maintains eye contact with you during your date, the more intensely your hormones will be provoked into action.

4. Nose

Unlike the eyes, the nose is one feature of the human face that tends to be overlooked during any aesthetic appraisal and is only likely to get noticed if it happens to have

defining aspects, such as its shape or size. But where it plays an absolutely crucial role in terms of the anatomy of dating is in the sense of smell.

The animal kingdom is wholly reliant on a scent for a huge number of reasons but particularly during mating. Male mammals can detect when a female is at her most sexually potent by the scent she is emitting. Again, this is down to chemicals, in this case, pheromones.

Although there has been much debate on the subject in the scientific community, research has revealed humans can send and receive subconscious odor signals, released through sweat and urine. While the properties of the latter as a sexual stimulant seem unlikely, there can be no doubt that the more hot-blooded a sex act becomes, the scent of tangy sweat ceases to be off-putting and can instead become an integral part of carnal appreciation.

But at the start of the date, the intoxicating aroma of her perfume or the smell of her freshly shampooed locks will undoubtedly send shivers down any rampant male's spine.

5. Mouth

Going back to testosterone, because males can transmit this chemical directly through saliva, passionate kisses are something to be savored throughout your date. In fact, the more you enjoy uninhibited 'French' kisses, the more hormones will be released. Intimate mouth contact will flood her system with oxytocin, the reproductive chemical responsible for sexual arousal.

All these genetic factors will ensure the parts of your anatomy which may well come into play at the end of the night – your sexual organs if you hadn't worked that out – will have been receiving stimulation throughout your date.

San Francisco Tourists Are Shocked At Aggressive Vagrants, Discarded Needles And Dead Bodies

June 18, 2018 | by News Syndicator | Link | Original Link

Via Zero Hedge:

San Francisco – a Democratic stronghold known for cable cars, quaint architecture and its diverse culture, has become a bastion of squalor and crime as city dwellers and visitors alike dodge aggressive, drug-addled vagrants. And it's beginning to scare the tourists.

An Australian couple visiting the city were shocked by what they saw after deciding to walk back to their hotel:

"Is this normal or am I in a 'bad part of town?' Just walked past numerous homeless off their faces, screaming and running all over the sidewalk near Twitter HQ and then a murder scene. Wife is scared to leave hotel now," reads a Wednesday posting by Reddit user /u/nashtendo.

When another Redditor said “put on your big boy pants… scared to leave the hotel?”… The Aussie replied:

> It was my wife that was scared and it was partly the mass of concentrated, drug affected homeless mixed with a guy being rolled into an ambulance dead.
> –/u/nashtendo

“We did La and Nyc on this trip too. Both felt safer,” he said later in the thread, adding “Syringes were visible, people were staggering, others had wide aggressive eyes. ‘Off their faces’ might be an Australian thing (sorry) but I meant just visibly drug affected.”

Another Reddit user replied:

> It's pretty normal. I'm honestly hoping tourists will realize how shitty this city has become and stop coming. Maybe the loss of income will finally push the city to stop allowing the rampant drug dealing and homeless people treating the entire city like their toilet. You would think a city that deoends so heavily on tourism and conventions for the bulk of their income would put more effort into maintaining a certain standard, but there is rampant drug dealing out in the open in some of the most heavily tourist areas. The city know about it, they just don't care. –/u/SgtPeanutbutter

"You see things on the streets that are just not humane," Kevin Carroll, executive director of the Hotel Council of San Francisco told *The Chronicle*'s Heather Knight in April. "People come into hotels saying, 'What is going on out there?' They're just shocked. … People say, 'I love your city, I love your restaurants, but I'll never come back.'"

In a completely seperate thread, another Reddit user posted in the San Francisco subreddit "Why is this city so terrifying?"

> I've wanted to visit SF my entire life and I finally make it here and my goddddd it's terrifying. Anyone have any advice for a tourist aside from "don't be such a pussy." –u/xnmb1
>
> Loading…

"The streets are filthy. There's trash everywhere. It's disgusting," Joe D'Alessandro, president of S.F. Travel told the Chronicle's Heather Knight in April. "I've never seen any other city like this — the homelessness, dirty streets, drug use on the streets, smash-and-grabs."

The city, which hands out up to 4.8 million syringes each year, has struggled to figure out how to keep streets clean and safe for residents, while accommodating a growing homeless population and longstanding HIV and Hepatitis C epidemics. There are roughly 16,000 residents in San Francisco with HIV, and 13,000 with Hep C.

City Health Director Barbara Garcia estimated in 2016 that there were 22,000 intravenous drug users in San Francisco – around one for every 38.9 residents, while the city hands out roughly 400,000 needles per month.

Of the 400,000 needles distributed monthly, San Francisco receives around 246,000 back – meaning that there are roughly 150,000 discarded needles floating around each month – or nearly 2 million per year, according to *Curbed*.

> Mayor Mark Farrell has said, repeatedly, in recent weeks that the problem of discarded syringes on city streets has become a sticking point for him, and the city promised millions of dollars to curb the problem of hazardous waste on sidewalks and streets.
>
> Meanwhile, *San Francisco Chronicle's* Matier and Ross chimed in Wednesday with an uncomfortable observation: Most of the needles littering streets in downtown neighborhoods came by way of the city itself, as part of the Department of Public Health's 25-year-old needle exchange program. –*Curbed*

While certainly nowhere near the top of the list, crime is also a problem in San Francisco – which is higher than 92.7% of the United States according to city-data.com.

3 Most Common Manipulation Tactics Women Will Use On You

June 19, 2018 | by Donovan Sharpe | Link | Original Link

Last week, I talked about the reasons women manipulate men, how to distinguish manipulation tactics from good behavior, and how to set the tone in terms of reducing the odds of your woman attempting to play mind games with you.

Today I'm going to talk about the three most common ways girls manipulate men as well as their motivations for the particular methods they key in on. More importantly, I'm going to tell you exactly what you need to say and do to shut this shit down and thwart any thoughts of a repeat attempt any time soon.

Again, these are real world examples that I have used myself with multiple females. When I do, one of two things usually happens: 1) They fall in line and keep the mind fuckery to a minimum or 2) They disappear because they know I'm not a man who can be mind fucked. Either way there is little wasted time on mind games which is the intended result.

1. Compliments and praise

The most insulting thing a woman can say to a man is "You're such a great guy!" What she really means is that she doesn't want to fuck you, but because she wants you to stay in her orbit she uses this tactic to which leads me to the very reason why she does in the first place…

Why?

To reinforce the behavior she wants you to engage in. By telling you you're a "great guy" she is rewarding you with praise (which for most men is more than enough) so you will

continue to take care of all of her non-sexual needs while she gets pounded out by unemployed tattooed garage band guitarist who may or may not have a permanent address.

Sometimes a woman does pay you a genuine compliment. For example, your girl might tell you “You look great in red!” which means she wants to to wear red because it makes you more attractive to her.

But whether it’s a compliment or an attempt control you, the intent is the same: to positively reinforce the behavior so that you will repeat it. Let’s take a look at a few common examples and how to correctly respond.

Example 1

Her: “You’re such a good dishwasher!” or “You’re such a great cook!”

You: “Don’t get used to it…”

She’s attempting to make ***her*** chores, ***your*** chores. Maybe you are a good dishwasher and maybe you are a good cook. But these aren’t things you’re going to do on the regular and she needs to understand that very clearly.

“Oh my gawd you are soooo hot right now!”

Example 2

Her: “You have such a sexy mouth! I’ll bet you give great oral!”

You: “You’ll never find out.”

If eating pussy is your thing, more power to you, but most men hate it no matter what

they say out loud. At best it warms the girl up for sex, at worse you get pubes in your teeth and pussy juice in your beard. In either case, licking vagina does nothing for you as a man.

I have ***never*** lost a woman because I don't perform cunnilingus on her…. ***not once***. But they will cheat on men who "live for going down on a woman" in a heartbeat because it's another form of putting pussy on a pedestal. Women adore sexually selfish men and that's the bottom line.

Don't give in to her feeble attempts at painting oral sex as something that will keep her around. Fuck that noise.

Example 3

Her: "I love that you're not a cheap skate."

You: Look surprised and ask, "How do *you* know?"

When she tells you how she knows, chuckle, shake your head, *and don't respond.* In this example, she's trying to manipulate you into spending money on her. You're supposed to think "OMG, she loves that I'm not a cheap skate so I'd better prove it to her over and over again!"

Example 4: A real compliment

Her: "You look good in red."

The right response: "Thank you."

The wrong response: "Ohhh thank you soooo much! I really wanted to impress you with this outfit and I'm sooo glad you like it!"

(Next level game response: Smirk at her and say "Prove it…")

2. Crying and other emotional outbursts

This has been a go-to method for females for eons. They've been using their tears and emotions to get what they want since men began taking this nonsense seriously.

Why?

Women activate their tear ducts for a few many, many reasons but within the context of a sexual relationship (and sometimes non-sexual) it's usually for one of two reasons: 1) To lessen the blow of you reprimanding her for bad behavior, or 2) Manipulating you into doing something she knows you don't want to do.

Understand this immutable truth gentlemen: T**he only time a woman's tears are genuine are when they are alone.**

If a woman has an audience, she is crying crocodile tears every time. If anyone at all is in her presence when the tears start to flow, every one of those salty drops are lies. Maybe she's trying to sway public opinion, maybe she's trying to make you look bad, maybe

she's trying to convince a crowd that she's right and you're wrong, maybe she's trying to get something from you. Whatever the case may be, when a woman has an audience whether it's one person (likely you) or 21 people, there is always an ulterior motive. ***Always.***

Drama queens always wear massive amounts of mascara for added effect

So how do you handle a woman attempting to manipulate you with tears? Let's take a two examples:

Example 1 – Lessening the blow of verbal reprimand

When you tell her she was overly talkative to the waiter at the restaurant when she knows damn well she's not to talk to men in public unless she has explicit permission from you, she'll start to cry because she wants you to back off of your principles and loosen the boundaries you've set for her. She wants you to be okay with her having "innocent or innocuous" conversations with other men in your presence.

Proper response: When you see her eyes well up and her chin trembling simply stop talking, hand her a tissue and say "Let me know when you're finished," and do so with a stone face and statuesque stoicism. Show ZERO emotion and ZERO empathy.

Example 2 – She wants something

She asks you to do something (or for something), you tell her no, and then she starts crying because she wants you to believe it's so important to her she's willing to cry about it. Obviously she's also doing this to get you to give her what she wants.

Proper response: "You can cry all you want, the answer is still no." And deliver the shiv in the same stone faced stoic manner as in the first example.

Do not allow women to manipulate you with their tears. They do it to their parents, their

siblings, their friends, their bosses, their boyfriends, their husbands, and everyone else. You are going to be the one man who doesn't fall for this bullshit and when you show her that you aren't, she will respect and love you for it.

Women want men they cannot manipulate. But they have to try because it's what they do. When it happens, don't respond emotionally. Respond with frankness, stoicism, and borderline cold-bloodedness. Show her that her tears are invisible to you.

If you give in and take your foot off the gas with regards to reprimanding her bad behavior or give in and do whatever it is she asked you to do because she cried or threw a fit, she's going to be doing a lot of crying and tantrum throwing. Men like this always wonder why people describe their women as drama queens.

3. Sex

Sex is by far and away the number one tool women use to manipulate men. It doesn't even have to be sexual intercourse. It could be sexual allure, the false promise of sex, the false promise of a sexual relationship (read: the friend zone), the list is endless.

Girls use their sexuality for everything from free drinks at the club to promotions at work to avoiding responsibility in any and all situations. But the time they use it the most is with their men.

Here's another iron-clad truth: ***sex is transactional for women.***

Don't get me wrong, they fuck for pleasure just like we do. Sure, women use their vaginas to control men but that doesn't mean they don't like having sex too. But their pleasure is not the priority. There's always another purpose for them opening their legs for a man. Even if she's in heat and can't wait for you to you pound the life out of her, she still knows in the back of her mind what her end game is. It's like walking onto a car lot with $20,000, knowing exactly what car you want, but still negotiating for a better price.

As men, we fuck to fuck. We fuck for pleasure. We fuck because we wanna fuck and it feels great. Simple math. *But women never fuck only for pleasure.* Your girl may love having sex with you but that doesn't mean that's the only reason she lets you fuck her. In her mind she knows that if she lets you fuck her on the regular, you're much more likely to stick around. Guess what guys, this is transactional: I let him fuck me, he stays with me. Sequence, consequence. Cost, benefit.

But most of the time the transaction far outweighs the pleasure for women, and there are 4 main ways women use sex to manipulate and subsequently control you.

Loading…

Frequent sex in the beginning

In the beginning of a relationship, the sex is always great. You're fucking her 2 or 3 times a day, she's sucking your dick all the time, you're going back door, she does it all. Girls do this in the beginning because they actually want to. A shiny new cock is something girls love playing with. It's like a new toy. They wanna play with it all the time.

But eventually they attempt to parlay that great sex into what they think is equity. They subconsciously think “Well I sucked his cock 30 times when we first got together so he’ll treat me well even if I stop,” and most of the time they’re absolutely right, but not because of the “equity.” *It’s because dudes are thirsty.* The frequent sex stops and now he thinks he has to take her to dinner to get any pussy. He got used to fucking her all the time which is exactly what she wanted.

At this point, she knows she doesn’t really have to do anything to keep him around. *Not even fuck him.* She’ll flip the script and start withholding sex from him until he does things for her, buys things for her, etc. She’s no longer on her best behavior unless he does what she wants. Then if he’s lucky, he gets unenthusiastic starfish sex and he thanks his lucky stars when he gets even that.

Blow jobs and anal

Blow jobs and anal sex is where women really turn up the heat. She gave you a taste in the beginning but then she cuts it off almost instantly to give you that scarcity mentality meaning you’re willing to do whatever it takes to get it back.

She’ll give you porn star anal at first…

Head and butt sex used to come freely and easily to you. She used to get on her knees and pull down your pants as soon as you walk in the door but if you want that treatment now, you’ve got to take her to an expensive restaurant and drop $200.

Back in the day she used to beg you to butt fuck her but because you haven’t gone back door in months she knows she can use anal sex to get something out of you like the new iPhone or making a car payment for her.

To punish you

Now we're into the realm of withholding sex to "teach you a lesson." Girls do this shit all the time. Especially when she's trying to change your rules or your fundamentals. For example, if you catch her texting her ex, you tell that if she continues, you're out the door. (This is not an ultimatum, this is a choice. She can stop texting the ex and keep you, or she can continue to text the ex and lose you).

Anyway, she'll stop texting her ex (or give you the impression that she has), *but then she'll stop fucking you.* She'll act pissed off because she doesn't want to stop texting her ex and she thinks that by withholding sex, you'll cave and allow her to on the assumption she'll open her legs again.

Girls also withhold sex when their men make a decision she doesn't agree with and stops giving him pussy until he changes his mind. They withhold sex when you do something she doesn't like to teach you a lesson to not do it again. For example, if you work on a project for 2 hours longer than you told her you would, she'll stop having sex with you to teach you never to do that or anything else again.

To reward you

Girls also use sex to reward you. They do this subconsciously and here's how it works: she'll fuck you all day and all night in the beginning, then she'll throttle the frequency, and then she'll suddenly stop. Most men will never call their women out if she doesn't wanna fuck. If you walk up behind her grab her tits and bite her neck (my personal go-to move to let a woman know I wanna fuck), and she pulls away, **99.9% of men won't say anything about it**.

They'll shrug their collective shoulders and say something to this effect: "Okay babe, I understand you're not in the mood," rather than doing what they want to do by saying "What the fuck? You're pullin' this shit now? You're pullin' this 'I'm not in the mood' bullshit now?? You're one of *those*??"

If you do what most men do and not call her out on it, she'll keep withholding sex from you until you crack and buy her something or do something for her. *Then she's got you where she wants you.* You're a trained monkey she can extract things out of by taking away your bananas and only giving them back to you when you buy her shit. At this point, the man is trained to pay for the pussy with his money, his time, and his resources and it's all downhill from there.

"Okay Donovan we get it. But what do you do when a woman withholds sex from you?"

So you walk up behind her, grab her tits, and bite her neck to let her know you wanna fuck or however you let a woman know it's time to do the dirty deed. She pulls away, tells you she's "not in the mood", she's got a headache, or whatever excuse she comes up with not to drop the panties.

There is only one way to handle this effectively to ensure that it will never happen again:

You grab your shit leave without a word. If she's at your place, tell her to leave.

Don't argue, don't converse, don't do anything but remove yourself from the situation. This lets her know that if she doesn't uphold her end of the bargain (sex), then you won't uphold yours (attention, company, companionship, etc.)

Her: "Where are you going?!"

You: [silence]

Her: "So this is just about sex for you?!"

You: [silence]

Her: "OMG this is soooo over!"

You: [silence]

Her: "Okay, okay I get it. Let's have sex."

You: [silence]

No matter what she says, asks, or does, **do not utter a single word to her**. Even if she throws the pussy at you (because regardless of what she says, she knows why you're leaving) do not turn back. Leave.

If you're kicking her out of your place, use the same protocol. And make sure you're leaving your place too. Doesn't matter where you go, just leave. She'll have to leave too.

No cooch, no company

Not only have you shown her that sex is a requirement for your company, you've also activated dread. She has no idea where you're going and because she knows you're leaving because she didn't put out, her imagination will start to run wild and get the better of her.

The night you leave (or kick her out), do not answer her calls or texts. Trust me when I tell you that she will blow up your phone with calls, texts calling you an asshole, telling you she loves you, telling you she hates you, pictures of her tits, and so forth. She'll be all

over the map which is exactly where you want her. DO NOT RESPOND TO ANYTHING THAT NIGHT. Make her sweat it out.

After that, run standard dread game for the next couple of days or so. Not extreme dread game when you go radio silent for a week. You want to keep her in your orbit after all and if she thinks you've moved on, she ***will*** fuck another guy… guaranteed.

Instead, text her maybe four times the entire day with short, cold, responses like "Okay", "Sure", "Cool" etc., not answering the phone when she calls, and denying her the ability to physically see you or hear your voice for the next 48 hours.

During that time she'll offer up her pussy on a platter. If she texts "Hey can I come over tonight?" or "Do you wanna come over tonight?" Respond with "Nah, I'm busy" or something to that effect. *Do not fuck her during the 48 hour dick detention period.*

Then at the end of Day 2, send her a text that says "We need to talk." Then give her a time that SHE will come over which will send shock waves through her body and mind because she's assuming you want to end things. No matter what she says in response, DO NOT RESPOND.

When she does come over and she asks what this is about tell her, "Nevermind, it wasn't important" and continue on as though nothing happened. Gentlemen, ***she will never deny you sex again for any reason.***

Headache? Nope. "Not in the mood?" Nope. Long day at work? Nope. If you want to fuck, she's going to let you fuck her because she doesn't want to feel like she felt for the last few days. In addition she won't use sex to punish you, reward you, or control you. And you'll be surprised at how quickly she offers up her mouth and anus again.

NOTE: For good measure, you will not go to her place for at least two weeks. She needs to be on your territory.

I have used this technique many, many times. Half the time they fall in line, half the time they disappear. But guess what? None of them ever denied me sex again.

The bottom line here, gentlemen is that if she denies you sex, you deny her your company and attention. If she doesn't uphold her end of the bargain, then you will not uphold yours. This doesn't need to be said out loud to her. Your actions will do the talking and she will read you loud and clear.

Find out why Donovan thinks your girlfriend is a slut and why you should treat her like an alcoholic ***here.*** *Watch Donovan Sharpe drop Red Pill truth on TSR: Primetime Sunday through Thursday evenings at 7EST/4PST*

New Star Wars Film “Solo” Is A Big Improvement From The Previous Grrl Power Edition

June 19, 2018 | by Christopher Leonid | Link | Original Link

Lucasfilms seems to have learned a lesson from the power of Return of Kings’ $4 million boycott. Rising from the ashes of feminist self-immolation, *Solo* is a man’s film which takes no hostages in describing the reality of human frailty and the raw power dynamics of society.

Background

For years, Hollywood has been attempting to portray a romantic narrative which somehow combines women’s *go grrl* masculine competence with men’s gentlemanly *noblesse oblige*. This dilemma finally went critical during Tinseltown’s scramble to pay its Danegeld-dues to the impending #metoo-wave of casting-couch feminists.

The schoolmarm heroine and unintentional slapstick of *The Last Jedi* bore witness to the bankruptcy of the sexual revolution and the collapse of the Romantic epoch. Audiences had finally had enough of watching the drab suburban platitudes of political correctness – even if they were transposed to a galaxy far far away – and walked out.

Rey, telling someone to write lines after class.

And so it has arrived: the first post Sexual-Revolution Fairytale. I'll use the first act to illustrate my point, but you can skip to the next sub-heading if you don't want this spoiler.

The Inconvenient Truth in Act One

The plucky knave Han Solo (Alden Ehrenreich), is separated from from his passably feminine sweetheart, Qi'ra (Emilia Clarke) by powers of state beyond both of their control. For years he strives up through the military ranks of the emerging Empire, defecting, scamming, double-crossing, camping out with bandits, gambling on credit, running rackets for dangerous criminals, but his goal always the same: to rescue his fair lady from her enslavement on distant Corellia. Imagine the scene, then, when he finally gets his big break, only to discover his sweetheart is already a guest among the shimmering and svelte guests at his new boss' luxurious drinks party.

It speaks to man's reality rather than his aspirations that the mechanism of female mercenary ascent (at least for the hotties), leaves a man's (dis)honest day's work in the dust. There is little to no attempt to disguise, excuse or explain this in terms of morality on screen. After Han's years of risking life and limb Qi'ra was able to rise further than him simply by spreading her legs. In its portrayal of the bittersweet truth, *Solo* earns itself a gravitas which more than compensates for the sense of disappointment that its chief protagonist mush choke back.

Loading…

Of course – a lot happens after that and their relationship continues a haphazard development, but it is refreshing to see that hypergamy on screen is finally beginning to match hypergamy in real life.

A General Review of the Film

Solo is obviously meant to be taken as an aside to the main Star Wars franchise – which may be because or why they dared to push the boat out on the social narrative. There's no classic opening crawl and very little music from the original series. Perhaps I'm reading too deep into it, but there seems to be slight homage to the *Yuge* orchestral scores of late Imperial Russia. Certainly, the great-coats and mud trenches of Han's youth build an association with the battlefields of the First World War – whereas the original series seemed to take its aesthetic cues from Communist East Germany (Rebellion), WWII Japan (Empire), and the cockpit of Enola Gay (Millenium Falcon).

In its cinematography, *Solo* struck just the right balance between rugged simplicity, (Han and his merry company of toxic males camp like Balkan partisans in the mountains of Vandor-1), and extravagant space monsters (you get to see a mile-wide Octopus get sucked into a black-hole).

Continuing a theme of increasingly self-conscious droids, *Solo* makes a brilliant mockery of Social Justice Warriors with a very ugly female robot whose circuits are possessed with a familiar mantra about her 'oppressive organic overlords.' The droid also harbors a badly suppressed crush on the young Lando Calrissian. This is not the sort of joke Lucasfilms would have made a year ago and I'm giving RoK the full credit.

Conclusion

For the first time, we have the true explanation of how Han Solo became the roguish asshole who Princess Leia later fell for aboard the Millennium Falcon.

Look and learn:

The account of Han's maturation (red-pilling?), is ultimately realistic and unembellished with curmudgeonly finger-wagging and 'man up' spin. The lack of effort to rationalise female behaviour as always and everywhere good speaks of a deep shift that we can now expect to see in the substructure of movie narratives. The pendulum is swinging back, and Lucasfilms is heading the charge (just behind RoK, of course).

Solo is a man's film – go and see it.

How Feminism Is Causing The Destruction Of Western Society

June 19, 2018 | by Joseph King | Link | Original Link

The following article was sponsored by Awake: The Return Of Men.

Like many other impressionable young men, I cheered and supported the gender equality movement. That's what I was taught. But the more life experience I gained the more I began to suspect that there were meaningful differences between the sexes. I began to question the dogma of gender equality. My curiosity led me to read widely across topics in history, evolutionary psychology, biology, and political science. What I learned profoundly altered my worldview. *Awake: The Return of Men* is a compilation of my findings, and my contribution to our efforts to red-pill the public.

How has the world changed?

History has largely been a story of men traveling around the world looking to conquer other groups of men. The Romans conquered Europe, the Mongols conquered Central Asia, the British conquered India, and so forth. Men constantly fought each other in the most wretched conditions, with crude weapons and primitive medicine. The defeated men were either killed or forced to adopt the customs of their new rulers.

Today the world is radically different. We protest death penalties for convicted murderers, we hold festivals to celebrate foreign cultures, and we put trigger warnings on Shakespeare just in case someone might be offended.

How does history go from a story of bloody conquest to one of hurt feelings? The answer is that the actors have changed. Historically, men ruled the world. But they relinquished power once they granted women the right to vote. The world has changed because now women rule the world.

Why and how are the sexes different?

Women approach the world differently from men. This is because men and women have been subject to different evolutionary pressures over time. For example, a man's reproductive success is maximized if he is able to father as many children as possible. This means becoming an alpha male that out competes other men for access to women.

As a result, men have evolved to be significantly more competitive and status driven than women. This can be seen in how men are much more willing to endure grueling work hours just to climb the corporate ladder.

In contrast, a woman is limited in the number of children she can have so she would be more reproductively successful if she were able to keep the children she has alive. This is easy today, but very difficult for most of history where there was no running water and frequent famine. Anthropologists estimate that in primitive societies a little more than half of infants reached adulthood. Under these circumstances women who were better at childcare were more reproductively successful. Unsurprisingly, studies show women to be more empathetic and nurturing. Those are traits of good mothers.

Evolutionary psychologists have discovered a number of psychological differences between the sexes. My book contains an extensive list of these difference, but some of them are as follows: on average, men are more hierarchical, group oriented, violent, confident, and respectful of rules. These are characteristics that reflect men's traditional role of looking out for the community. Throughout history it has always been men who stand together on the battlefield for the sake their people.

Differences between men and women can be clearly seen in childhood when the effects of socialization are limited. At recess boys gravitate towards competitive team sports while girls are sitting with their best friend, sharing secrets and vulnerabilities. The bestselling toys for boys tend to be weapons or violent video games, both used by boys to fight each other. The bestselling toys for girls tend to be dolls, which girls have conversations with and nurture.

Differences in the sexes persist throughout adulthood, as seen clearly in the occupations each sex pursues. Men prefer fields dealing with things, women prefer fields dealing with people. In fact, research has found that this gender occupation gap is stronger in more egalitarian countries like the U.S. and Scandinavia, and weaker in developing countries like India. One reason for this may be that wealthier countries afford their citizens the opportunity to pursue their passions, while people of poorer countries do whatever pays the bills. Men and women have different passions.

Why do these differences matter?

These innate differences have huge social implications in a post universal suffrage world. Always and everywhere it has been men who built nations, and women who enjoyed the fruits of civilization. Nation building requires a set of skills that are part of a man's DNA. Women have literally never built any nation or institution. Yet women today claim equality with men and seek to hold roles traditionally held by men. Their track record in these roles is very poor. This rise of feminism coincides with a profound loss of national cohesion, weakening of the rule of law, and an explosion of public debt.

When men ruled the world they were proud of their culture. The Romans forced the conquered Europeans to speak Latin and adopt Roman customs. When the U.S. emerged victorious from World War II, the U.S. exported American style democracy and capitalism as the best path to national prosperity. But a feminized world instead preaches multiculturalism, where all foreign cultures are celebrated as equal so no one feels left out. This is a vision of the world that reflects feminine insecurity and feminine ideals of equality. Multiculturalism has transformed close knit communities into parcels of land shared by people who have nothing in common with each other.

Men have a fondness of rules that is not seen in women. The games boys play, like baseball or dungeons and dragons, tend to have significantly more rules than the games girls play. Rules are needed because it balances the interests of individuals and those of the group. Institutions built by men, such as the military and church, all have elaborate sets of rules. While men base morality on adherence to rules they agreed upon, women base it on empathy.

To a woman, an action is wrong if it hurts any one. For example, feminists are strong supporters of illegal immigration because they feel sorry for the plight of the third world poor. Feminine empathy makes it difficult to establish the rule of law because women

continually demand exceptions for those perceived as vulnerable.

Throughout history men relied on themselves, while women relied on men. It's in a man's nature to take responsibility for himself. Before universal suffrage, the U.S. government was run in accordance with this masculine view. In fact, there were no federal welfare programs until the 1930s. After universal suffrage the government began to offer more and more benefits, from public retirement income to health care. Instead of relying on themselves like men, women transformed government into their back-up husband. This has led to an unsustainable growth in public spending and an explosion of national debt that has put the U.S. on a course towards bankruptcy.

Our civilization is crumbling because it is being run by people who were born to manage families, not nations. The only way out of this is for men to awaken and retake the mantle of national leadership.

Awake: The Return of Men documents my journey in understanding the role feminism has played in the decay of Western civilization.

In the book I summarize current research on differences between the sexes, offer explanations as to why these differences evolved, and illustrate how these differences have led to the chaos we see around us. I carefully support my claims with over 100 citations. My journey changed my world; I believe it could do the same for you. **Click here to learn more about my book on Amazon**.

PUA Author Neil Strauss Finds That Sex Addiction Rehab Doesn't Work

June 20, 2018 | by Beau Albrecht | Link | Original Link

Neil Strauss is well known as the author of *The Game*, a book that brought pickup artistry into the public consciousness. It's a fun read, documenting his rise from AFC to seduction superstar. In fact, it inspired my own *magnum opus*, and I was curious to see where Neil's journey led afterward.

The Truth, describing the further tribulations of his love life, is a grim read. It's a very different book. *The Game* had lots of surreal moments, such as Mystery's near-fatal bouts with ONEitis, and their misadventures in Transnistria. In *The Truth*, the surrealism is far darker. The first part documents his misadventures in therapy.

Sex Rehab

The action begins after Neil got busted cheating on his girlfriend Ingrid. A friend

persuades him to check into a high-end addiction treatment center. (In several details, the unnamed facility seems very much like the place Harvey Weinstein briefly went following his meltdown.) For mere mortals, the price for high-end inpatient therapy is a king's ransom. Fortunately, Neil had plenty of income from book sales to try to get his head unscrewed. This includes royalties from *The Game*, an irony that didn't escape him.

Upon arrival, he's hastily diagnosed with an impressive (and debatable) laundry list of conditions, up to and including brain damage. As soon as he objects to an item stating that he'd taken Zoloft (which he'd never done), he gets another entry on his report for *being in denial*. When they discover that he's a major PUA author, he gets grilled about that, of course. So he goes in thinking he made a dumb mistake, and quickly is informed that he's dysfunctional nine ways from Sunday.

Neil is put on suicide watch—not that he's tempted; it's basic standard operating procedure there. Part of this includes signing a "no suicide" agreement:

> What are you going to do if I kill myself? Kick me out for lying?

The lady doing intake doesn't much appreciate that. Another required agreement is a three month contract, extending beyond the inpatient program: no sexual activity, no porn, no masturbation, basically no impure thoughts even. (A hard-mode reboot can be quite helpful, but he gives into temptation days later.) Despite all the rules and regimentation, it's actually a nice place, at least for what's essentially a psych ward.

Neil's roommate is in for cheating too. His marriage had deteriorated after his wife became lazy and emotionally distant. (Adam isn't exactly the only dude who committed adultery following a situation like that.) Other guys really do need serious help. Calvin blew $125-250K (depending on how you count it) on hookers. Another guy banged a horse, among other personal quirks.

I can understand getting lonely occasionally, but some of that just *seems a little much*. Sexuality is indeed a powerful force. It's generally a good thing, but one that should be channeled in the right direction.

Group therapy

After settling in, the discussions started—*lots* of them. Joan, one of the directors, seems like a cross between a hellfire-and-brimstone fundamentalist preacher and Andrea Dworkin. Much like second wave feminists, she spends a lot of time demonizing sexuality. (That goes a bit beyond the "channeled in the right direction" principle.) For one example:

> "Do you realize that you're harming these women when you use their bodies to masturbate with?" Joan admonishes Calvin. She senses he's on the verge of tears, then tries to bring him over the edge. "They don't care about you. These are hurt and abused women. And you're reenacting their childhood trauma. You are their father, their first boyfriend, the predator who raped away their innocence."
>
> Loading…

I disapprove of prostitution on moral grounds too; I've never done "pay for play" because it's a nasty business. I'm certainly not opposed to telling people to un-fuck themselves either. Still, reducing a patient into a sobbing wreck might be counterproductive. During a later Joan presentation:

> I look around and see Calvin drifting off again, no doubt fantasizing about Carrie.

He also privately tells Neil that at least he got something for his astronomical hooker tab.

Beyond discussing morality at an appropriate level, what else could be said? I'd tell Calvin that it's irrational to keep wasting a fortune by letting the little head do the thinking. Also, I'd recommend fixing his personal problems, developing his social skills, pursuing excellence, and finding a *real* girlfriend he doesn't have to rent. I'll go out on a limb and speculate that perhaps other game authors like Roosh, Troy Francis, Kyle Trouble, and

Neil himself might concur.

Revelations

They later work with a different counselor. Fortunately, Lorraine doesn't make Ayatollah Khomeini seem like a jolly old fellow. During the process, Neil confronts some demons from the past. In his youth, he'd discovered his father's porn videos. The subject matter is pretty weird—not as far out as some of today's stuff, but it made his parents' marriage dysfunctional.

His mother relied on Neil for emotional support, which became a smothering dynamic; the basic Freudian mess. Her overprotective and controlling nature caused him to miss out on a golden first hot date. (Unfortunately, I can relate to that one.) In a cathartic therapy session, he exorcizes the demons of the past. Although he's a lifetime atheist (though Jewish born), he surprises himself by saying Lorraine is doing the Lord's work.

Considering himself cured, he checks out early. Neil gets back together with Ingrid, but troubles follow. Immediately after, he gets busted watching porn. (That's not exactly a glorious event.) He also keeps in touch with some old girlfriends—he wasn't doing anything objectively wrong, but that ignites further drama. His conversations with Ingrid aren't the best examples of holding frame. Since reading his earlier work, I've suspected that Neil and his associates could use more Inner Game development.

Ingrid does seem like a real gem, though sometimes he finds her to be a pain in the ass. He immerses himself in outpatient recovery and psychobabble, but the relationship is beyond repair, eventually disintegrating. However, his misadventures that follow are an entirely different story.

Et enfin

Was Neil's brain full of Swiss cheese, or did he just make mistakes? Quite likely, this PUA guru had difficulty transitioning to a committed relationship. Sometimes it takes a while for former AFCs to get years of pent-up frustration out of their systems. Neil's foibles all throughout aren't encouraging. Still, maybe he's not a sex addict wracked with irresistible

compulsions, but *just another fallible human who fucked up*.

As Calvin later states:

> "If they turn being male and horny into some kind of brain cancer that's covered by health insurance, they'll be billionaires."
>
> "It would be one thing if the treatment worked," I gripe. "But it's taken over my entire life. Like half the time, I'm too busy going to meetings and reading books on intimacy to actually be intimate with Ingrid."

As Bill Clinton might say, give that man a cigar!

The recent trend of medicalizing bad behavior raises a number of questions that don't have easy answers. Still, sex addiction is real; millions of guys jerking off to porn incessantly provide gallons of evidence. Better answers are needed, especially since today's dysfunctional sexual marketplace is making society miserable.

I write **off-the-wall fiction**, and ***Righteous Seduction*** concerns next-generation game. My **blog** concerns "deplorable" politics, game, and my writing projects.

The Biggest Lie Most Men Believe About Testosterone

June 20, 2018 | by Mo Saleem | Link | Original Link

Are you wondering what it is? The lie that most men believe about testosterone that is being peddled by doctors, trainers, nutritionists, and the mainstream media alike? I'll give you a hint: it's what Big Pharma wants you to believe so that you become a customer for life. This lie was first brought to light seven years ago…

Declining Testosterone: Not Inevitable With Age?

In 2011, a team of Australian researchers set out to identify the relationship between aging and testosterone levels. They recruited 325 men between the ages of 40 and 97 years old who had self-reported excellent health and no symptoms to complain of. Nine blood samples were collected from each of these men over a period of three months. When they looked at the entire sample of data, researchers found that age failed to have an influence on testosterone levels.

Here's what lead researcher of the study, Dr. David Handelsman, had to say:

> By itself, age does not cause a lower testosterone in healthy men. It's more likely that lowering of testosterone is a consequence of illnesses men acquire as they get older, like cardiovascular disease and obesity.

Although older age is correlated with lower testosterone levels, Handelsman and his team made the case that older age is not the cause of declining testosterone.

As a skeptic of this research, you might say that the sample of 325 men represents only a tiny segment of the population and that the findings don't apply to you. You might click on the link to the study and realize that the findings haven't even been published in a peer-reviewed journal and were merely presented at a medical conference. In both instances, you're right. But keep reading…

Age Has No Effect On Testosterone Levels: Fact Or Fiction?

Browsing through the archives, I came across a 2014 study in which a group of researchers set out to derive and publish – for the first time in history – an age-related model for total testosterone levels in healthy men. They extracted the data from 13 previously published studies with a sample size spanning over 10,000 men between the ages of 0-101. This data was then used to plot out the average values for total testosterone according to age based on the 1st to 99th percentile in nmol/L.

Definitely check out the study in its entirety for a more detailed account of the results, but I went ahead and averaged out the results based on 10-year age increments, converted nmol/L to ng/dL, and broke it down based on 2.5th, 50th, 90th, and 97.5th percentiles:

Loading…

Normative Age-Related Total Testosterone Reference Values in ng/dL				
Age	2.5th %	50th %	90th %	97.5th %
25-34	202	395	634	756
35-44	190	377	609	731
45-54	181	375	617	747
55-64	173	375	636	774
65-74	167	377	657	806
75-84	163	379	679	837

What do you see?

Like Handelsman found in 2011, age fails to have a significant influence on testosterone. Could it really be possible that age and testosterone levels are completely unrelated? That aging men can maintain optimal levels of testosterone without relying on expensive (and potentially dangerous) medical treatments?

If you're still skeptical, check out the results from this 2017 study that gathered blood samples from more than 9,000 men living across both the US and Europe:

Model-Based Estimates of Population Centiles for Total Testosterone Concentrations (ng/dL)				
Age	2.5th %	50th %	90th %	97.5th %
19-39	229	507	755	902
40-49	208	461	729	902
50-59	192	446	720	902
60-69	190	446	720	902
70-79	190	446	720	902
80-99	119	446	720	902

Yet again, age fails to have an influence on testosterone.

As a man in my twenties, I actually found myself on the other side of the fence. Back in 2016 – when I was lazy, depressed, skinny-fat, beta, and blue-pill – I thought that sub-optimal testosterone was only something older guys had to worry about. But as the research reveals, age doesn't matter and any man, regardless of age, can have sub-optimal T. What it really comes down to is your mentality and your decisions regarding how you eat, train, sleep, and go about everyday life. Nothing more.

The Call To Action

Do you know your current total testosterone level? No? Then my call to action for you is to get your blood-work done so that you know where you stand relative to where you need to be moving forward. Every redpill man should strive for a total testosterone level above 700 ng/dL.

With testosterone prescriptions having more than tripled in the last decade, Big Pharma is cashing in hard on the so-called "low T" epidemic. But really, it is an epidemic of the blue pill – they are cashing in on our desire for instant gratification. Don't fall for the "quick-fix" and always remember that anything that comes easy will leave you the exact same way.

Is natural testosterone optimization a priority for you? Let's talk.

Starbucks Is Closing 150 Stores Two Months After Introducing “Racial Bias” Training

June 20, 2018 | by News Syndicator | Link | Original Link

Via Bloomberg:

Americans’ long-running joke about a Starbucks on every corner may be nearing its end.

The coffee behemoth is retrenching in its home market as it contends with sales growth that Chief Executive Officer Kevin Johnson acknowledges isn’t fast enough. The cafe chain said Tuesday it expects comparable sales to rise just 1 percent globally for the current quarter—the worst performance in about nine years. That’s well below the 2.9 percent analysts were expecting, according to Consensus Metrix.

Starbucks also plans to close about 150 company-operated stores in densely penetrated U.S. markets next fiscal year, three times the number it historically shuts down annually. Shares of Starbucks slid as much as 6.3 percent in late trading Tuesday to $53.82.

“Our growth has slowed a bit,” Johnson said in an interview. “I expect better, I think our shareholders deserve better, and we’re committed to address that.”

Although business abroad has been booming and the chain has been opening more and more cafes, U.S. sales growth has stalled for the company that brought espresso to the masses. With about 14,000 stores domestically, Starbucks is now pumping the brakes on licensed and company-operated locations, **with a renewed focus on rural and suburban areas**—not over-caffeinated urban neighborhoods where locals already joke that the next Starbucks will open inside an existing store.

The closing stores are often in “major metro areas where increases in wage and occupancy and other regulatory requirements” are making them unprofitable, Johnson said. “Now, in a lot of ways, it’s middle America and the South that presents an opportunity.”

For the ubiquitous chain, moving slower and shutting unprofitable stores may trigger some deja vu. In 2008, longtime leader Howard Schultz returned to the company that was struggling after expanding too quickly across the U.S., giving competitors like McDonald’s Corp. a chance to elbow back into breakfast. Investors cheered as Schultz retook the helm and closed some underperforming stores, and share prices at the chain have been up eight of the last 10 years. So far this year through Tuesday’s close, shares have been essentially flat.

4chan coupon makes fun of Starbucks' pandering to social justice

But now, with Schultz stepping back from his beloved company, the task of the righting the ship will fall to Johnson, who took over as a CEO just over a year ago. Schultz, who had already transitioned away from running the coffee chain's day-to-day operations, announced earlier this month he'd be leaving the company, fueling speculation he could be gearing up for a political career. Veteran retailing executive Myron Ullman is taking over as the new head of the board as Schultz departs.

Loading…

While Schultz had been trying to expand the Seattle company's premium business, dubbed Reserve, along with Italian bakery Princi, analysts have speculated that these may be put on the back burner under the new leadership. **The company is also facing a resurgent McDonald's, which has been advertising $2 cold-brew coffees, along with other steep discounts from fast-food rivals.**

"The competitive environment has really become a lot stronger in the U.S. and a lot of that is the fast-food chains really improving the quality and breadth of their offerings in terms of hot beverages and breakfast," said Bloomberg Intelligence analyst Jennifer Bartashus. Americans can "get that same flavor profile at a much lower price somewhere else. That becomes an area of concern for Starbucks."

Starbucks has also faced backlash this spring after two black men were arrested at one of its stores in Philadelphia while waiting for a meeting to begin. The company and Johnson apologized, calling the arrests "reprehensible." **Last month, Starbucks closed about 8,000 cafes so its employees could undergo racial-bias training**, which did hurt sales in the quarter, Johnson said. After stores reopened following the May 29 training, sales have started to rebound at U.S. locations, with the chain expecting domestic same-

store sales growth of around 3 percent in June, according to the company.

Women are equal… until it gets in the way of profits in the Middle East

“The competitive environment has really become a lot stronger in the U.S.”

Starbucks says it can attract more diners in the U.S. with new menu items and will focus on its expanding tea business, as well as capitalizing on health and wellness trends. Starbucks just added a new mango-dragon fruit iced drink to its permanent menu in the U.S. and Canada. And it’s focused on improving its food lineup with sous vide egg bites, plus a new line of lunch salads and sandwiches that it’s expanding across the nation.

“We’re putting more of our energy into that afternoon day part and the portfolio of beverages that are offsetting some of the declines we’re seeing in Frappuccino beverages,” Johnson said, citing a consumer shift away from sugary drinks. The company is also preparing to “lean into more plant-based beverages,” he said, noting that a new plant-based protein cold-brew drink will be introduced this summer.

The chain is also relying on its digital initiatives to contribute between 1 and 2 percent to comparable sales next fiscal year. There’s going to be a new way for non-rewards customers to earn stars and rewards starting next spring, allowing visitors to cash in on loyalty without fully signing up.

Donald Trump Fails To Appease Left With Executive Order Solving Manufactured “Family Separation” Crisis

June 20, 2018 | by News Syndicator | Link | Original Link

Via Breitbart:

President Donald Trump signed an executive order on Wednesday to halt the practice of separating illegal immigrant families apprehended at the border, despite questions about its constitutionality.

“We’re going to have strong, very strong borders, but we’re going to keep the families together,” Trump told reporters at the White House before signing the order. “I didn’t like the sight or the feeling of families being separated.”

> This Executive Order doesn’t fix the crisis. Indefinitely detaining children with their families in camps is inhumane and will not make us safe.
>
> — Kamala Harris (@SenKamalaHarris) June 20, 2018

The president said the order was important adding that he, the First Lady, and his daughter Ivanka felt strongly about the issue.

“I think anybody with a heart would feel very strongly about it, we don’t want families separated,” Trump said, and noted that it was an issue of “compassion.

He clarified that the issue of separating families was not a new one, but he would continue tackling the tough issues surrounding immigration.

“At the same time, we are keeping a very powerful border, and it continues to be a zero tolerance, we have zero tolerance for people who enter our country illegally,” Trump said.

> Let's be very clear here:
>
> NO FAMILIES WILL BE REUNITED BY TRUMP'S EXECUTIVE ORDER.
>
> That means there are still THOUSANDS of kids, sitting alone in cages, separated from their parents by Trump.
>
> Loading...
> — Mikel Jollett (@Mikel_Jollett) June 20, 2018

Vice President Mike Pence and Secretary of Homeland Security Kirstjen Nielsen joined the president in the Oval Office for the signing ceremony.

Nielsen thanked the president for his leadership on the issue and again demanded Congress to change the loopholes on immigration.

“We ask them to do their jobs, the laws need to be changed,” she said.

> Let’s be clear about what this Executive Order does: Instead of imprisoning children in separate internment camps away from their parents, this administration will now imprison children in the same internment camps as their parents.
>
> — Women's March (@womensmarch) June 20, 2018

Trump said it was tough to watch the children separated from their parents and the troubling images on television.

“You’re going to have a lot of happy people,” Trump said as he signed the executive order.

The order instructs his cabinet members and the Department of Homeland Security to maintain family unity by detaining illegal alien families together and provide or construct adequate facilities to do so.

4 Steps To Forgiving Yourself

June 21, 2018 | by Howard C. Roark | Link | Original Link

We have all met one person who had all the ingredients to lead a successful life: wealth, great background, stable family and quality education, but yet they ended up as bitter, unsuccessful persons. We have also heard of those that came from humble or bad backgrounds and yet rose to greatness even if they had all the variables working against them. How is it possible that the latter was able to lead successful lives and become wealthy or at least successful in their trade even if they had everything working against them?

There are several variables that influenced your current personality and life situation. Family, environment, emotions, and local community can all trigger different reactions to each person depending on their personality and genetic disposition.

It's a normal and healthy habit to regret past actions. Reviewing our past is alright as long as we do it to plan ahead. However, the problem lies when people stay stuck lamenting about a previous event in their lives; that they no longer yield the power to change it.

1. Living in the past robs you of the opportunity to enjoy the present

“Brethren, I count not myself to have apprehended: but this one thing I do, forgetting those things which are behind, and reaching forth unto those things which are before,” Philippians 3:13

I had to learn this the hard way. Every now and then I still snap back to my old negative ways of living in the past, regardless if those are fond or bad memories.

Decisions and paths we take are usually a consequence of our personalities, which are constantly maturing as time goes on. Mistakes made by us play a big role in our process of maturing. You can’t change the past, so get over it. Otherwise you will keep limping along in the present and future, thus missing out current opportunities.

Being stuck lamenting your past can cloud you from seeing good things happening right now. Make an effort to leave your past behind and forgive yourself for your mistakes. To live in the past is to lead a toxic way of life.

2. Wear your battle scars with pride

> ***3*** *And not only so, but we glory in tribulations also: knowing that tribulation worketh patience;*
>
> ***4*** *And patience, experience; and experience, hope:*
>
> ***5*** *And hope maketh not ashamed; because the love of God is shed abroad in our hearts by the Holy Ghost which is given unto us.* Romans 5:3-5

It sucks that we don't always get our way and bad things happen to us every now and then, but let's think about the positive outcomes of misfortunes occurring in our daily lives. Both of those things bring endurance and character to us. If those things didn't happen to any of us we wouldn't be as strong and experienced as we are today.

I'm not asking you to be grateful or enjoy misfortunes. What I'm asking you is to make an effort to see the positive side of it. Create the habit of thinking that every bad event is an opportunity to become stronger and wiser, which will help you to avoid making the same mistakes in your future. To have past experience is to have a strong ally for your decision making skills.

Loading...

3. It takes time and several attempts to succeed at something

"Nature works for centuries to perfect a rose or a fruit, but an American youth is ready to try a difficult case in court after a few months' desultory law reading, or to undertake a critical operation upon which a precious life depends after listening to two or three courses of medical lectures." -Orison Swett Marden

People nowadays have the naive idea that its possible to go viral in their first attempt at doing something even if they don't have years of practice in that skill. Life is hard to those naive enough to believe in fables of instant success. When they find out things don't work that way they end up upset like a spoiled brat who wants a new toy. To live with delusions of grandeur is to ask to be beaten by the school of hard knocks.

I'm not going to promise you that effort and time doing something equals success. But what I can promise you is that in some way or another you are going to get some experience out of it that might come in handy for your future challenges.

4. Write a diary daily

The human brain is flawed. It can easily forget and twist past memories according to its current state. Mr. Freud knew that and thus he kept paper-based records of his dreams and thoughts. That is how he developed the Oedipus-Complex concept in psychoanalysis. Unless you want to have a twisted version of what happened several years or decades ago you should start writing daily about your thoughts, dreams, life events and feelings.

Diaries are a great way to store and accurately relive our past memories for self analysis purposes. To trust in the memories of your human brain is to trust in deception. The human brain is a flawed piece of hardware especially when it comes to the memory department.

Nonetheless, I strongly recommend you to keep your writings in paper-based records to assure your privacy. Having a personal diary in a computer is never safe, even if stored inside a PC disconnected from the internet. The safest way to keep your “records” from being exposed is to write it in a notebook and stash it in a very safe place.

Conclusion

If we confess our sins, he is faithful and just to forgive us our sins, and to cleanse us from all unrighteousness. 1 John 1:9

To sum it up, we all have our sad stories to tell. But the key difference between individuals that end up as bitter, unsuccessful persons and those that are able to move on and still build successful lives is that the latter chooses to use his past mistakes as his strength and main motivator for winning in life. Remember, the clock is ticking and every minute you let it go to waste is not going to come back. Use the most of the time you have left in here.

The June 2018 Happy Hour In Washington D.C. Was A Huge Success

June 21, 2018 | by Roosh Valizadeh | Link | Original Link

On Saturday I drove to the nearest Metro station two hours before the 8pm scheduled start of my first happy hour in two years. While waiting for a train to the city, I was recognized by a young man wearing a cowboy hat. We sat in the same train car and he told me how he's doing well meeting women at dance events, though SJWs have infiltrated them. He has to be careful not to say anything politically incorrect.

I got off at the Gallery Place station and walked around until 7:30pm before posting the Starbucks meeting location on Twitter. For the next twenty minutes, I mentally rehearsed all the bad things that could happen, but I was feeling confident that the event would go off smoothly since only one media article was written about it. I learned that a substantial flurry of articles needs to be published for the elite to activate their SJW foot soldiers.

At 7:50pm, I stood across the street from the Starbucks. I saw a friend in front and waved him over. Then four more men recognized me. All five of us went inside at 7:55. Starting at 8, the stream of men flowing into the cafe was steady. If a man made lingering eye

contact with me, I knew that he knew. I handed out fortune cookie slips of paper that had the location of the main event at a bar two blocks down 7th street.

A Starbucks barista came up to the group and said, “Is there anyone here named Roosh? Someone is on the phone for him.” A prank caller. I did not imagine this in my mental rehearsals. I was hesitant to admit that there was a Roosh present in case it was a trap. “There is no one here named Roosh,” I said. The barista left with a skeptical look on his face.

We spread the bathroom code “2018” amongst ourselves to take advantage of the corporate toilet policy. At least five men used the toilet, perhaps as many as eight. Many real customers confused our group for the line to buy an extra burnt coffee beverage with high fructose corn syrup. The baristas started getting visibly agitated, especially since only one or two men bought something. They started taking away the stools we were using under the guise of preparing the store for closing.

A man arrived who I remember leaving nasty comments on my blog that parroted the leftist line that I abuse women. He approached me with a smile and his hand outstretched. I told him he was not welcome to the event because of the comments he left in the past. His smile evaporated and he walked out. The fact that he expected me to forget his previous behavior suggests that haters are confused fans. Someone who personally attacks or defames me even once will never be allowed into my circle of trust.

When the group grew to 25, employees finally asked us to stand away from the front counter. They stopped short of kicking us out. If they did, I’d seek *pro bono* legal counsel to sue for discrimination since I’m a person of brown color.

We eventually moved outside and waited five extra minutes to catch the late stragglers. During this time, one attendee, an Indian man, said, “Roosh, you look small. You need to hit the gym.” I raised one eyebrow and looked at his overweight physique that he tried to hide with dark clothing. I replied, “But you’re fat! Get fit and then you can make fun of me all you want.” We had a good laugh. Indians are the original trolls so I stay extra aware when I’m around them.

At 8:35, I led the group of 40 men down the sidewalk to the bar. It turns out that the fortune cookie slips weren’t necessary. I said to them, “I wish I had some kind of banner

or battle flag." If we were all ISIS terrorists with powerful weapons, and took elevated positions, we could easily conquer several city blocks. Even if the only weapon is our minds, there is no limit to what we could accomplish if we stuck together, planned, and organized. This is why they stopped us in 2016.

We arrived at the bar in Chinatown. The bearded bartender was visibly excited at the unexpected influx of customers. The men started to relax because we were now in a location that was not posted publicly. I did my best to have a conversation with each one. They varied greatly in upbringing, race, employment, and life goals.

I met men fresh out of high school who were just beginning their life's journey and others in their 50's with children and a divorce under their belt. Some men worked in the Federal government and talked predominately about political issues (this is DC, after all), others were businessmen trying to make a career without getting shut down for their beliefs, and also present were RVF poonhounds who picked my brain for foreign countries that had the best women. It was the kind of diversity I love.

Loading...

There was a brown mural of seabirds hanging in the hallway. Whenever a man asked me for a selfie, I suggested we use it as a backdrop. The hallway became a sort of gathering point to have deeper discussions. Several men gave me condolences for my sister's death, asking me how I was doing. "As good as I can," I would reply.

> A post shared by Roosh (@kingroosh) on Jun 17, 2018 at 10:45am PDT

A woman I didn't recognize approached me. Apparently one of the attendees told her who I was. She was lamentably overweight but had a friendly demeanor.

"So you're a pickup artist," she said.

"I am?"

"Well that's what it says on your Wikipedia."

One of the guys started filming her, thinking that she was attacking me, but I told him that it was okay and he put his phone down. It was clear that she loved getting the attention of several men at once and wanted to keep the conversation going as long as possible, but she would have to increase her beauty for me to give her more than three minutes of my time. After showing her my "straight pride" salute, which is really the same as a black power salute, I introduced her to a man I named Chad because he was a tall and white with a square jaw. I told everyone that if I have a son, I'm naming him Chad.

As the event winded down, I started to wonder where the resistance was. Two years ago, the death threats flowed in at a concerning clip, but now there was nothing. To go from 100 to 0 suggests that liberal protests are not organic. A switch must be flipped for them to be activated in a MK Ultra style. If you told me that someone at a high level gets to decide whether an attack takes place or not, I would believe it. I now have enough experience where I think I can predict if trouble will happen via a "Defcock" Warning

System that I plan on using for future gatherings.

> **Defcock Green:** Practically no media coverage or leftist discussion online. Protesters or disruptions are not expected.
>
> **Defcock Yellow:** Moderate media attention but no online organizing spotted. Stay alert at the beginning of the meetup.
>
> **Defcock Red:** Heavy media coverage. Protesters have been organizing online to shut down the event. Likely police presence. Wear sunglasses to guard against doxing attempts from women with Krusty The Clown hair.

This event was Defcock Green all the way through by the time I left the bar at 1am to catch the last Metro train home. Maybe I was being too paranoid by applying counter-terrorist tactics to plan a friendly happy hour, but I don't mind putting in the time so none of my readers are injured, doxed, or arrested.

The world is getting crazier by the year, and since we possess masculine beliefs, we have to take extra care to stay safe. I believe I have the experience to do that for the men who come out to meet me, and can't wait until my new book is released so I can hold more events around the country.

Leftist Actor Peter Fonda Wishes For Barron Trump To Be Caged With Pedophiles

June 21, 2018 | by News Syndicator | Link | Original Link

Via Daily Caller:

The Office of the First Lady has notified the Secret Service after actor Peter Fonda called for kidnapping Melania and Donald Trump's son, Barron, The Daily Caller has learned exclusively.

In a tweet sent Wednesday, the actor called for Barron to be "ripped" from Melania's arms and put in a cage "with pedophiles."

"WE SHOULD RIP BARRON TRUMP FROM HIS MOTHER'S ARMS AND PUT HIM IN A CAGE WITH PEDOPHILES AND SEE IF MOTHER WILL WILL STAND UP AGAINST THE GIANT ASSHOLE SHE IS MARRIED TO," Fonda tweeted early Wednesday morning.

Spokesperson for the first lady Stephanie Grisham told The Daily Caller that the Secret Service has been "notified" of the threat.

"The tweet is sick and irresponsible and USSS has been notified," Grisham said.

Fonda has been on a twitter tirade against White House officials, particularly females and children, over the past few days.

Loading...

He called for the public caging and rape of Department of Homeland Security Secretary Kristjen Nielsen in a tweet Tuesday. In the vulgar tweet, Fonda said "Kristjen

Nielsen is a lying gash that should be put in a cage and poked at by passersby." He continued, "The gash should be pilloried in Lafayette Square naked and whipped by passersby while being filmed for posterity."

Fonda also proposed that Press Secretary Sarah Sanders three children get kidnapped and locked in a basement while calling her a sexist slur. "SS (Sarah Sanders) is a lying gash, too," Fonda said, "And "gash" is much worse than cunt. Maybe we should take her children away and deport her to Arkansas, and giving her children to Stephen Goebbels Miller for safe keeping."

DHS and the office of Sarah Sanders has yet to respond to request for comment.

Sony Pictures is releasing a movie starring Fonda in a matter of days called 'Boundaries.'

Fat Does Not Make You Fat

June 22, 2018 | by Max Roscoe | Link | Original Link

The modern American diet continues to obsess about “low-fat” and “low-calorie” foods. The immediate connotation of fat and calories is obesity. But what these words really mean (fats = lipids and calories = energy) is far different from their perception.

Despite multiple studies disproving the myth that low fat foods cause weight loss, I continue to see “low fat,” “low calorie,” and “lite” food products in stores, on menus, and in my friends’ refrigerators. These foods are not only unhealthy, but may end up making you more fat when you consume them.

As Dr. Andrew Weil explains in this 7 minute video, dietary fat does not make you fat.

The key to nutrition, as true with most things in life, is BALANCE.

Basic Nutrition

We eat food for the energy it gives us, as well as the nutrients (vitamins and minerals). The components of food can be separated into two categories: macronutrients and micronutrients. Macronutrients are essential nutrients your body needs daily in large doses. Micronutrients are chemical compounds needed in small doses, and include vitamins and minerals that the body cannot synthesize, and must obtain from diet.

Macronutrients

There are only three macronutrients: Carbs, proteins, and fat. They are all 3 necessary and vital. The main problem with the low-fat diet is that it if you reduce any one of the above nutrients, you are increasing the others. While none of the 3 macronutrients is “bad” per se, eating an extremely high carb or high protein diet is just as unhealthy as a high fat diet.

Sour Cream (Daisy)
Per 2 tbsp - Calories: 60kcal | Fat: 5.00g | Carbs: 1.00g | Protein: 1.00g

Light Sour Cream (Daisy)
Per 2 tbsp - Calories: 40kcal | Fat: 2.50g | Carbs: 2.00g | Protein: 2.00g

Light sour cream halves the fat, but doubles the carbs and protein.

If you are eating fat free or "lite" foods, you are consuming a high carb or high protein diet. Does this sound like a good idea?

1. Carbohydrates

While carbs are one of the three macronutrients, and therefore essential, eating a high carb diet can lead to obesity. Examples of high carb foods include breads and grains, pasta, cereals, beer, beans, legumes, milk, and sugar. Do these sound like foods that will make you lose weight?

High carb foods (white bread, potatoes, pasta, candy bar) often have high glycemic (sugar) indexes. What do high sugar foods do in the body? Convert to body fat.

In fact, ***cutting*** carbs is one proven method of reducing weight, as the body first burns carbs, and then fat, for energy, and if carbs are in short supply, it will burn body fat for energy more rapidly.

If you are eating fat-free (think lipid-free) foods, you are very likely eating more carbs, which will make you more fat.

2. Protein

While protein, like fats and carbs, is essential, and increasing protein consumption is helpful in weight training, a high protein diet is linked to kidney and heart problems, can lead to weight gain, and foods high in proteins (dairy, eggs, meats and nuts) have insufficient fiber which can cause digestive and endocrine problems. Fats/lipids, carbs, and protein are ***all*** part of a healthy diet.

3. Fats / Lipids

Loading…

Dietary fat (lipids) is different from body fat. Lipids contain twice the energy content of proteins or carbs. We eat food primarily for its energy content, and lipids deliver. Lipids

are essential for cell membrane fluidity and immune system function, and are necessary for hormone receptors (think testosterone!)

Many scientists posit that inflammation is a major source of illness today, and lipids have strong anti-inflammatory and neuroprotective effects.

High Fat Can Be Healthy

Lipids from unprocessed foods like dairy, avocado, cheese, eggs, fatty fish, nuts, and coconut oil are healthy. Lipids from processed foods such as partially hydrogenated vegetable oils/margarine, fast food, deep fried food, desserts and candies are not healthy.

Ketogenic Diet

While I'm skeptical of most fad diets (they typically consist of artificially lowering one of the 3 macronutrients), the ketogenic diet is one that makes a lot of sense. WebMD lists benefits of a high fat, low carb ketogenic diet as weight loss, lower blood sugar, possible anti-cancer benefits, lower heart disease, less acne, less diabetes and epilepsy, and very mild side effects or risks.

Taste and Satiation

Beyond the nutritional reasons to avoid low-fat foods, there is the matter of taste and

satiation. If taste didn't matter, we could just consume multivitamins and protein powders and kale every day, but who wants to do that? Fat is one of the major components in taste. Why does T-bone taste much better than brisket? It has roughly double the fat.

But beyond merely tasting good, fat leads to satiety, or meeting the desire of hunger. When we are no longer hungry, we stop eating. Fat has been proven to increase satiation and thus reduce overall food consumption. When you are full off a steak or even an avocado sandwich, you won't feel the need to continue eating.

Fat Free Means High Sugar

If you take a food and remove its fat, you lose most of the flavor profile. In other words, the food now tastes like crap. So what do fat-free food manufacturers do? Improve the flavor with added carbs and sugars.

Not only is consuming excess sugar very bad for you, and will lead to weight gain, but it has the opposite effect on satiety, particularly in sugar-free fat-free foods, which are the worst. Artificial sweeteners are chemical compounds with no calories. When you eat something sweet, your body expects calories to follow (and sweets are high in calories). But when no calories come, your body is confused and will crave more and more food throughout the day.

	Fage Total Greek Yogurt	Kroger Fat Free Vanilla Yogurt
Calories	210	200
Fat	11g	0g
Carbs	7g	39g
Protein	20g	12g
Sugars	7g	37g

Fat free has over 5 TIMES the carbs and sugar

What To Do?

While science tends to support a well balanced diet, and has published guidelines for proper proportions of the three macronutrients, fads and recommendations come and go. The simple answer is what my grandmother told me: eat REAL food.

Eat a proper balance of natural, unprocessed whole foods, exercise, and you, like the generations of those living in the blue zones, will be healthy. Foods like milk and meats are naturally high in fats, and artificially removing those fats destroys the nutritional value of the food. Instead of consuming frankenfoods, limit the foods you eat in each group, and have diversity in your diet.

Do You Believe In A Politically Incorrect “Phobia”?

June 22, 2018 | by Beau Albrecht | Link | Original Link

Adding a “-phobia” suffix to a group’s name creates a new word shielding them from criticism. Those are anti-concepts, empty terminology useful only to delegitimize real concepts. Pointing out a group’s flaws supposedly becomes wrongthink after labeling criticism a phobia, case closed, QED.

The first such usage is “xenophobia”, from the 19th century. (It’s natural to be wary of the unfamiliar, which could be taken to extremes. Still, unconditional acceptance doesn’t make sense either.) New phobia rhetoric is popping up like mushrooms lately, an ongoing trend.

The definition is critical

Oxygen thief John Wayne Gacy as Pogo the Clown

A phobia is *an irrational fear of something*. That's a psychological condition. It's basically a neurotic or at least illogical reaction.

Thus, arachnophobia is an irrational fear of spiders. Avoiding creepy crawly critters is natural, but it's a phobia only if the reaction is excessive. Dreading clowns is coulrophobia. There are dozens of recognized phobias, but no central psychological authority approves new definitions. *Anyone can call something a phobia.* Gyrophobia is an irrational fear of Arab fajitas—I just made it up!

Note well that misusing "phobia" outside of its *real* meaning is a rhetorical trick. The psychobabble terminology is a framing tactic, *labeling traditional beliefs as irrational*. (Leftists once merely called their opponents mean and intolerant.) Criticism is not a phobia, nor is dislike, and having an opinion doesn't make someone neurotic. Phobia rhetoric isn't a real counterargument; it's for deflecting criticism and obstructing debate.

If a cross-dressing man demands to be considered a woman, but you don't buy into his peculiar beliefs, then you're "transphobic". If you think gay barebacking parties are health risks and immoral, you're "homophobic". If you say 400-pounders should exercise and control their eating lest they kill themselves, you're "fatphobic". This rhetoric implies that *you're the dysfunctional one*. Nice, huh?

Medicalization of contrary political views is really nothing new. (That's exactly what Theodor Adorno did when he wrote *The Authoritarian Personality*.) However, none of the new politicized terminology matches the *real* definition of phobia.

Homophobia

Ah, liberal parenting! Their little girl is the only one who realizes something ain't right.

Gay activist George Weinberg made up this terminology in 1972, the oldest such word since xenophobia. He meant:

> [T]he dread of being in close quarters with homosexuals—and in the case of homosexuals themselves, self-loathing.

Lately, the concept has been stretched considerably from that original definition. In particular, merely disagreeing with the gay agenda makes you a "homophobe".

Are homos scary?

The swishy types couldn't punch their way out of a wet paper bag. The gym rat types could, but aren't known for above-average aggression. Homos even can be personable and charismatic, though they're pretty tedious if their only hobby is being gay.

Homos aren't threatening, unless you drop the soap in prison. Other than that, *homophobes don't actually fear homos*. Some simply think two men banging is disgusting. Others don't care what homos do in private—*if it stays private*—but don't believe it should be encouraged, or that society must accommodate their every demand.

Fatphobia

No, start listening to your doctor instead. We don't want people to suffer.

Translated, fatphobia means "I don't want to exercise or push the fork out of my face". Even so, nobody hates fat people. We hope that they get better, and we'll help too. *ROK* has several articles about diet and physical fitness, and I also explain how to get in shape.

Are fatties scary?

Actually, in the 19th century, fat guys were considered jolly and prosperous. Fat chicks were considered quite attractive during the Renaissance. However, that just doesn't fly these days. Being overweight isn't a sign of prosperity; unhealthy artificial food is cheap now.

Anyway, it's silly to argue that anyone's afraid of fatties. If 400-pound junk food junkies try to mug someone to feed their addiction, they're easily outrun.

Loading...

Transphobia

Someone needs a hug.

Originally, trannies were men believing they're women trapped in men's bodies. It's far weirder lately, especially following countless made-up genders. Some trannies even think they can switch between being male and female according to their mood.

That said, all their rhetoric fails the Occam's Razor test. It's impossible to prove the existence of female souls inhabiting male bodies. However, crazy people certainly exist, and this particular delusion should be considered no differently. If someone calls bullshit on this mental illness, the "transphobia" label implies *it's pathological to disbelieve in their aberrant version of reality*.

Are trannies scary?

Bruce Jenner might outrun you, but he won't outfight you. Although some trannies actually are violent criminals, the vast majority are merely tedious and annoying.

Islamophobia

If Muslims don't like criticism, they should stop doing things that get them criticized.

During the Age of Enlightenment—when liberalism was still a good thing—the right to dissent from religious orthodoxy was one of the first major causes. Today, you can criticize any religion freely, *except special ones*. Dissenting from Islam is now a "phobia".

Are Muslims scary?

Your nearby convenience store manager is probably an okay guy. However, when large numbers are involved, Muslims are lots of trouble. How many Methodist suicide bombings have there been, or Amish buggies running through crowds? It's not exactly an irrational fear when lots of them *really are* out to get you.

Femmephobia

So frightening, oh my!

Strangely, this applies both to disliking sissy guys and feminine women. However, someone who considers a dude in a pink ballerina outfit to be a fruitcake won't have any objection to feminine women. Why is this even a word?

Are femmes scary?

Get real.

Whorephobia

They just want to love you long time (for a price, of course).

This one's for "sex workers" who don't like criticism. So having the very common traditional belief that sex for money is immoral is now a "phobia".

Are hookers scary?

I saw a few scary-looking ones in Barcelona, but most hookers are attractive. (Those who aren't are in the wrong "career".) Since I don't pay for it, I don't care.

Lesbophobia

The odd haircut is part of the uniform.

For some unfathomable reason, someone made up a special category apart from homophobia, as if lesbos get criticized worse than male homos. Most people don't want to see two men banging, but would be delighted to see two women banging (so long as they're actually cute).

Are lesbos scary?

No way! Actually, lesbos are awesome if they make exceptions. Otherwise, thanks for nothing!

Psychophobia

Oxygen thief Jared Laughner as The Joker

Psychophobia is also called “sanism”, another newly made-up anti-concept. This is proof that the leftist mania for the abnormal is—dare we say it—getting crazy. Sanity is normal and good, but the phobia rhetoric makes this obvious conclusion—*you guessed it*—supposedly pathological.

Are psychos scary?

If someone wearing a tinfoil hat warns you that Martians are invading Uranus, you’ll laugh it off. When psychos are both crazy *and* violent, then fears aren’t exactly unjustified.

Vegaphobia

Eat all the veggies you want. Cool by me!

This is the silliest “-phobia” word ever. Why did they even bother making it up? Maybe a vegan got butthurt after being laughed at for mainlining pureed cauliflower.

Are vegans scary?

Absolutely! Vegan gangs roam around at night, clubbing innocent citizens with celery. Don’t even get me started about the Broccoli Mafia.

Homosexuals Are Getting Angry That So Many Straight People Are Attending Their Pride Events

June 22, 2018 | by News Syndicator | Link | Original Link

Via USA Today:

Paul Ellis has seen a lot of gay pride parades. He marched in Pittsburgh's first one in 1973 with just 40 other people, flanked on either side by angry residents holding glass bottles and rocks with only two unhappy police officers for protection.

Ellis, manager at Cliff's Variety Store in the historic Castro district, is part of the generation of LGBTQ activists who fought for basic rights, to get jobs and to avoid arrest. So when he most recently attended the San Francisco Pride Parade with his partner, he was shocked by what he saw.

"I stopped and said (to my partner), 'Do you see any gay people around us?' And it was like, 'Oh my God, no,'" he said.

They had run into a cultural shift breathtaking in its speed and still something of a disconnect to many in the gay community. **In many large cities, gay pride marches have become the new St. Patrick's Day, only with rainbow tutus instead of shamrocks.**

The parades in honor of Ireland's patron saint began as religious celebrations and in the United States date back to the 1700s. They eventually morphed into statements of Irish pride and solidarity, but have now become an excuse for many to wear green and drink Guinness stout.

When it comes to LGBTQ pride marches, that same shift has happened in less than 50 years. Today, the streets along the parade route throng with groups of people in their teens and 20s, dancing and partying while sporting rainbow-colored wigs, sunglasses and feather boas, along with the ever-present tutus.

Ellis says he doesn't have a problem with non-LGBTQ people going to the Pride

parade, but he thinks they should be focused on supporting the gay community.

“This is not their party,” Ellis said. “They are attending someone else’s party. … It just felt disrespectful.”

Straight people showing up to gay pride parades is nothing new. But the growing phenomenon of straight young adults attending just to party, sometimes in large numbers, has burgeoned in recent years. University of California-Berkeley gender and women’s studies professor Paola Bacchetta sees it as a kind of co-opting of the underlying political necessity of the marches.

“It’s not in the interest of most (LGBTQ) people of color to be in this kind of celebratory type of gay pride that has absolutely no political vision,” she said.

Groups joining pride events from outside the gay community have, at times, been a point of tension and debate within the gay and lesbian community, especially as the number of corporate sponsors joining the parades grows each year.

The first gay pride parades began in 1970 to commemorate the 1969 Stonewall riots in New York. Back then, they were called ‘Gay Liberation’ marches and were both controversial and radical.

In the 1980s, gay pride’s protest culture began to evolve. “Gay Liberation” marches became “Gay Pride” parades, and the events became more mainstream.

Loading...

In the 1990s and 2000s, the LGBTQ movement began to grow, slowly winning legal victories. Pride celebrations swelled into huge affairs in many major cities globally. Last year in San Francisco more than one million people took part, while in New York attendance numbered more than 40,000.

Those wins are, in fact, one of the reasons behind the influx of straight partygoers. For many young people now, being gay is cool, not condemned.

This progress of acceptance has become something of a double-edged sword. On the one hand, say some, previous generations of LGBTQ activists fought for this acceptance, for a world in which being gay or lesbian was a non-issue.

Another gay pride miracle

On the other hand, this acceptance could fall into complacency, dulling the importance of the movement given the ongoing issues still facing the community and cloaking the history of resistance that helped achieve that acceptance in the first place.

Andrew Jolivette, a San Francisco native and American Indian studies professor at San Francisco State University, actually has a name for what he views as the commercialization of gay culture — he calls it “Gay Inc.” He says he has stopped going to pride parades, upset by what he sees as the false perception that the LGTBQ community has made enough progress to stop resisting.

Going to gay pride, he said, has become just a “cool thing” to attend rather than a place to uplift marginalized voices and to acknowledge the community’s ongoing struggle to achieve progress. Like St. Patrick’s Day or Cinco de Mayo, he believes Pride has been taken over by people who want an excuse to drink and party, displacing the LGBTQ community from a festival meant to celebrate them.

“These young people are not concerned about the issues that continue to impact the (LGBTQ) community that much,” Jolivette said. “What they want is the freedom without the struggle.”

Not everyone believes that this phenomenon is a problem. Greg Pennington, curator for the GLBT Historical Society in San Francisco, has resigned himself to the fact that younger generations will never know the trials older LGBTQ members had to go through

just to get to where they are today — and that they may not feel the need to take gay pride as seriously politically as the community once did.

He, personally, is happy to see more straight people showing up at pride events, even if they're only there to have a good time.

It's just part of progress, he says, and it's what older LGBTQ activists were fighting for.

"For some of us, we feel like we're losing that specialness that we have as gay people," Pennington said. "That specialness was a defense. We created that sense of specialness among ourselves, and that is the price of progress, losing that sense of specialness."

Shocking: “Body Positive” Models Are Normalizing Obesity And Making The Problem Worse

June 24, 2018 | by News Syndicator | Link | Original Link

Via Daily Mail:

Plus-size clothing ranges and models such as Ashley Graham may be normalising obesity, it has been warned, as growing numbers of people fail to realise they are overweight.

A study of more than 23,000 people has found more than half of men do not recognise they are overweight or obese. Almost a third of women underestimate their true weight, compared to under a quarter two decades ago.

The results are concerning because those who misjudge their size are 85 per cent less likely to try to lose weight.

The University of East Anglia research found only about half of overweight people were making efforts to slim down, which could put them at greater risk of heart attacks, strokes and type 2 diabetes.

Study author Dr Raya Muttarak said plus-size clothing ranges, such as Marks & Spencer’s Curve range for ‘curvy’ women sized 18 to 32, may be behind people’s denial about their weight.

She said: ‘Seeing the huge potential of the fuller-sized fashion market, retailers may have contributed to the normalisation of being overweight and obese.

‘While this type of body positive movement helps reduce stigmatisation of larger-sized bodies, it can potentially undermine the recognition of being overweight and its health consequences.

The increase in weight misperception in England is alarming and possibly a result of this normalisation.’

There has been a rise on the high street in ‘vanity sizing’, where dress sizes are inflated for women with larger waists and hips and bigger busts, to flatter them that they wear a smaller size. Experts say this can ‘undermine’ action to lose weight.

The study analysed the Health Survey for England, to find the answers of 23,459 people asked whether they were about the right weight, too heavy or too light.

Loading…

The results, analysed for five years between 1997 and 2015, show the proportion of overweight men in denial has leapt from 48.4 per cent to 57.9 per cent in that period.

At the same time, the proportion of overweight women misjudging their weight has jumped from 24.5 per cent to 30.6 per cent.

The study, published in the journal Obesity, says the normalisation of being large has become ‘widespread’ in England, with men most likely to ignore their weight problem.

On the Marks & Spencer range, Dr Muttarak wrote: ‘By introducing a new design and styling tailored for plus-size customers and using carefully selected fabrics complementing fuller figures, Curve primarily contributes to promoting body positivity.

‘While this type of body-positive movement helps reduce stigmatisation of larger-sized bodies, it can potentially undermine the recognition of being overweight and its health consequences.’

Among people who were overweight and obese, 38.5 per cent of men and 17.2 per cent of women thought they were ‘about the right weight’. The proportion of obese men misperceiving their weight in 2015 was almost double that seen in 1997.

People who underestimated their weight were 85 per cent less likely to try to lose it, with only 51.8 per cent of those who were overweight in the study telling the Health Survey they were trying to shed the pounds.

Almost two-thirds of adults in Britain are overweight or obese, with the study focusing on those with a body mass index (BMI) of 25 or over, classed as overweight, and of 30 or over, classed as obese.

Dr Muttarak, a senior lecturer in UEA’s School of International Development, said: ‘Identifying those prone to misperceiving their weight can help in designing obesity-prevention strategies targeting the specific needs of different groups.’

Flipping The Script On Feminist Buzzwords Reveals How Ridiculous They Are

June 24, 2018 | by Beau Albrecht | Link | Original Link

Feminists love using newly-invented buzzwords to push their narratives. Often they grossly exaggerate real problems, or even gripe about nothing. Their absurd framing tactics would be laughable if they weren't propping up a dismal and cheerless ideology poisoning the natural affection between women and men.

It's much funnier if the script is flipped.

The ambition gap

Ladies, join us down here! It pays better than retail.

You've heard the "women are paid 77 cents on the dollar" baloney, right? Pay discrimination became illegal in 1962 per US federal law. Actually, if employers *really* could get away with hiring women at a 23% discount, the female unemployment rate would be zero. However, the fuzzy math unravels when these factors are considered:

- Women tend to study easier majors in college;
- Men choose to work more overtime;
- Mothers often stay home to care for young children while the fathers support the household;
- Men work dirty, tedious, and dangerous jobs that women avoid (consequentially, men are over 90% of workplace fatalities).

That's right—**feminists have the balls to complain about men being more productive**. Should we draft babes as coal miners, loggers, and construction workers? They couldn't handle the work. Besides, it'll be super-duper productive to gripe about *THE AMBITION GAP!*

So whenever you're working late to help finish a project on schedule, but you see a woman clocking out at 5pm, give her a dirty look and tell her to check her privilege. Does someone use a sick day because of menstrual cramps? Well, straighten out that uterus, soldier! As every good liberal knows, *making people feel guilty will heal the world*.

Femsplaining

Ever heard a feminist talking down to a man because she has a chip on her shoulder longer than her dildo? If you thought she's merely being snotty, or making an ass of

herself, then you failed to apprehend the cosmic injustice of femsplaining. I mean, *how dare* anyone talk to members of a preferred class in a way they don't like? As every good liberal knows, *your right to free speech ends where my feelings begin*.

Now let's put the buzzword on steroids. We'll *also* make femsplaining include any time there's condescension to a man, for any reason. No, let's make it any time he *thinks* that's happening, whether or not she intended it that way. Better yet, whenever we want to shut down an argument, we'll shriek *"FEMSPLAINING"*! We'll make ourselves the sole deciders of when it's happening—I feel *so empowered* now!

False accusation culture

She tried to ruin someone's life because she got dumped.

Phony allegations can ruin people's lives. Sometimes journalists neglect to investigate facts (that's *supposed to be their job*), and spin them into media feeding frenzies. That demonizes men generally. Everything is quietly forgotten when the truth emerges. The false accuser almost never faces consequences.

Despite that, "false accusation culture" isn't real, any more than bars prove "drunk driving culture" exists. If society *really* approved of it, then perjury and obstruction of justice wouldn't be crimes, and "Thou shalt not bear false witness against thy neighbor" wouldn't be a commandment anyone takes seriously. Everybody knows that accusing people of things they didn't do is wrong, and decent people don't do that.

Still, if we can get enough suckers believing in false accusation culture and whipped up into a moral panic, we can *get away with anything*. Suppose I sneak up behind the secretary and grab her ass. Then I'll call the Patriarchy Police when HR busts me because I harassed her. Soon her ass will be dragged to a Star Chamber tribunal. There, due

process will be thrown out the window, because—according to “false accusation culture” rhetoric—women are liars until proven truthful. As every good liberal knows, *the truth of something is decided by how it fits the narrative*.

Loading...

Now let’s put the buzzword on steroids. We’ll also make this mean stuff having nothing to do with phony allegations. If some chick tells her friend that you’re lousy in bed, if you get probing questions about your finances while on a date, if someone even ghosts you unexpectedly—it’s *FALSE ACCUSATION CULTURE!*

The Gynarchy

Queen Dworkin headed The Sisterhood until her fatal cheeseburger overdose.

Long ago, some trend-setting feminists *actually did* define all men as oppressors. This wasn’t the first time that a henhouse of eccentric, malcontented activists declared a grudge-fest against half of humankind. Feminists today still are ruining society in countless ways. They get away with this because they have the backing of leftist politicians, media figures, and women’s studies professors paid to indoctrinate girls.

Still, let’s blow the truth *way* out of proportion and pretend that they’re omnipotent. This cabal meets in a subterranean, vagina-shaped hideaway. There, bulldykes resembling manatees with buzzed, blue hair plot new ways to make men suffer, while they sip their coffee-flavored milkshakes and twirl their waxed mustaches. Let’s pretend *every* woman agrees with The Sisterhood completely. We’ll scorn them all as agents of The Gynarchy. As every good liberal knows, *instilling collective guilt is the neatest thing since flavored condoms*.

Therefore, The Gynarchy is responsible for *anything* wrong that happens in a guy’s

personal life. Even the smallest inconveniences, under any circumstances, are systematic oppression. If a dude gets lousy service by a Fivebucks Coffee barista, is rejected for being a hipster soy boy, his Hannibal Lecter themed pickup line isn't received well, or even if he even gets stuck in traffic—that's *all THE GYNARCHY'S fault*!

Femspreading

Yes, this feminist professor complained bitterly about "manspreading".

Does a woman sitting on a bus, subway, or any other public area take up more space than she should? Maybe she put her purse or shopping bags on another seat. *Oh noes!* If she lets a body part cross over onto another seat, *that's an atrocity*. We guys are good with spatial geometry, so visualize a line extending from the midpoint between the seats. If one of the thunder thighs ever crosses this line *even slightly*, then stand up and scream *"FEMSPREADING!"* If enough of us do this, people will start acting like it's a serious problem, instead of the ridiculous joke I'm making.

Speaking of public transit, it used to be considered courteous for gentlemen to give up seats to ladies. I'm not sure how long that custom lasted, but it was probably a long time. Seating arrangements are more likely to be first-come first-served these days, but I bet some innocent boy out there is being taught that this archaic custom is part of being polite. Well, it's the Current Year!

To redress this shameful past, women should now give up seats to men. Punishing people in the present for things that happened generations ago makes *perfect* sense, because as every good liberal knows, *two wrongs make a right*. If a woman has lots of heavy shopping bags, so what? I bet that there've been lots of construction workers who, after a long day carrying bricks or bags of cement, still happily got up so that a lady could relax in comfort. However, pregnant women should be exempted, because the kid could be a boy. Anyway, we'll send a press release to the gals whenever we decide that they can

stop deferring to us.

Finally

All that was pretty goofy, right? So are those silly feminist buzzwords. BTW, the *Jerusalem Post* won't like the following. (Hint: *stop doing things like that*, and you'll stop receiving criticism.)

10 Attractive Teachers Who Had Sex With Their Teenage Students

June 25, 2018 | by Jared Trueheart | Link | Original Link

Compared to just 30 years ago, so much of what we expected from men and women has reversed. Men used to be the ones spending extra hours at work trying to climb the corporate ladder. Now women do that. Women used to dedicate their time to pursuing a good mate. Now men do that. Male high school teachers used to be the ones arrested for having sex with their female students. Now there is a new headline every few weeks about a female teacher arrested for having sex with her male students.

I remember when I was in high school and one of the male English teachers was about to go on trial for having an affair with a 15-year-old girl. Just two days after the story spread through the school, that teacher killed himself before facing a trial. I still remember my own English teacher discussing the situation with us.

But those days are gone. It's women who are having affairs with their students, and some of these women are surprisingly attractive.

Stephanie Peterson

This 26-year-old middle school science teacher was arrested for sending nude pics to a 14-year-old student, having sex with him in her car and in a barn, and bringing him marijuana. She was arrested just two weeks after she filed for divorce from her husband, a firefighter. Her bond was $12,500.

This hot 26-year-old science teacher from Florida was arrested for sleeping with a 14-year-old boy

Fatima Grupico

This 24-year-old middle school teacher of a Catholic high school in New Jersey was arrested for having sex with a 17-year-old student from that school. The affair took place in May of 2015. In June of 2015, that high school closed its doors due to financial reasons.

She almost looks like wife material

Sarah Fowlkes

This 27-year-old Texan was arrested for having an affair with a 17-year-old student at the high school where she taught. After a warrant was issued for her arrest, she turned herself in.

27-year-old Sarah Fowlkes had sex with her 17-year-old student

Michelle Preston

This 28-year-old taught geography and cheerleading. And in a case of the inmates running the asylum, she also taught psychology. She was arrested for, and plead guilty to, having sex with three teenagers aged 16-17. She could have gotten eight years in prison. Instead, she got 36 months of probation.

The psychology of these women baffles the sane

Lindsey Banta Jarvis

This 27-year-old teacher from Kentucky had an affair with a 15-year-old student. The affair lasted for more than a year before it was discovered. She faced one charge of third-degree rape, one count of sodomy, and one count of unlawful transaction with a minor. Her husband stuck by her throughout her arrest.

Loading...

This 27-year-old teacher from Kentucky had sex with a student but her husband still loves her

Erin Elizabeth McAuliffe

This 25-year-old math teacher was arrested for having sex with three students aged

16-17. Her bond was $20,000.

News articles didn’t say if she had the affair with all three students simultaneously

Jessie Lorene Goline

This 26-year-old art teacher plead guilty to sexual indecency with a child, though she had affairs with four teenage high school students. In another example of the pussy pass, Goline was only sentenced to 42 months probation.

Jessie and her husband

Kayla Sprinkles

This 26-year-old teacher from North Carolina was arrested for having sex with a 16-year-old student. She tried to flee the county after being indicted on five counts of sexually

assaulting a minor, but eventually turned herself in.

Taylor Ivy Boncal

This 22-year-old social science teacher and track coach from Connecticut was arrested for sleeping with an 18-year-old student.

Brittany Zamora

This 27-year-old sixth-grade teacher from Arizona was arrested for performing oral sex on a 13-year-old student. Investigators found correspondence between the two in which she told the 13-year old that she wanted him every day with no time limit. She told him that if she could quit her job to have sex with him all day she would. She also sent him a nude pic of her self and another of herself in lingerie.

Brittany with her husband. Did his soyboy behavior drive her into the arms of a 13-year-old?

Beware of Teachers

Here is a great article recommending you avoid dating teachers. Teenagers are almost universally horrible, annoying people. When women choose to be high school teachers, there is some deeper psychology behind their decision. They are to be avoided, both for our own sakes and for our sons'.

Arab Spinster Crisis Proves Toxicity Of Female Empowerment Is Worldwide

June 25, 2018 | by Ryan Jones | Link | Original Link

Arab governments are growing increasingly concerned with the marital (or lack thereof) trends in their nations. Threatening to change the fabric of their societies, as well as their gene pool.

First is the dramatic rise in the number of unmarried Arab women (spinsters), with such findings in reports:

> The highest rank of unmarried women are in Lebanon, where it reaches **86%**.
>
> The Gulf states have been rising steadily in recent years, the UAE leads the top ranking by **70%**. In Saudi Arabia, the number of unmarried women who are above the age of marriage reached 2 million, which is equivalent to twice the population of Bahrain.

Second is the rise of Arab men marrying foreign brides. As one the article states:

> Almost one in three marriages in the first half of the year were to foreigners, according to the Dubai Statistics Centre, up from **26** per cent in 2006.

The Arab nations have obviously recognized the causal relationship between the two trends and some of the driving factors have been identified. Chief among the reasons is the extortionately high dowries required, stretching into the region of six figures. Add expensive wedding costs, with large Arab families on both sides, and you have a personal

financial meltdown.

Other reasons included were gender segregation limiting the opportunities for interaction and the difficulties of obtaining permission from the bride's family. At least some of the reasons are down to the women themselves, who are seeking educated peers and prioritizing their careers and education first.

In response, the Arab nations have taken to outright banning marriage between locals and certain foreign nationalities (i.e. Saudi Arabia). The Emirates has gone one further by stating brides must be Arab and Muslim. Saudi Arabia has also tried to alleviate the dowry problem by imposing limits on the size of said dowries.

Unsurprisingly these measures have not succeeded in fully reversing either of these trends (given that they are blanket punitive knee-jerk responses). That is because they fail to grasp the true reasons behind these issues; which are extremely familiar to the West,

Marriage is essentially a supply-demand transaction. There are only a certain number of desirable suitors (supply) when limiting them down to the key specifications (demand). The demands of Arab women are for a rich, well-earning Arab Muslim man from a good background (and great physicality). But aside from sharing religion and ethnicity, Arab women do not offer what Arab Muslim men want.

Tipping the scales

Arab countries are among the most obese in the world. Whilst the viewed ideal weight varies across history and county; in the Arab world it most certainly isn't size 16. Obesity is a disease, and most rational people desire physically-fit partners to ensure healthy offspring. To be crude, larger women are far less sexually-able than their thinner superiors. They are far too heavy and inflexible for enjoyable coitus positions and penetration is hampered by the thick layers of adipose tissue. Just like in the West, harpooning land whales is unfulfilling and deeply humiliating.

Loading…

Notice the grin on the right image.

Maid in the Gulf

As a result of migrant domestic workers, Arab women have next to no household skills. Cooking, sewing, and cleaning are useful skills which they cannot boast. Instead they idly lay about, expecting the housekeeper (paid by the man) to do the simplest tasks. Men on some deep psychological level are driven to compare women to their own mothers. If modern Arab women are fatter and less skilled than their predecessors than Arab men will inevitably seek skilled foreigners as alternatives.

Selfie sticks and stones

Capitalist consumerism is an unspoken factor in this predicament. Nowadays women have more interest in material consumption that it distorts their world view. Arab women seek self-gratification by buying the most expensive clothes, jewelry and gadgets. This leads to selfish narcissistic mindset that disallows empathy and relationship building. Such women will never have genuine connections with men, and will ultimately exploit them to fund their extravagant lifestyles.

She can do better

Of course we cannot ignore the feminist empowerment/hypergamy paradox. Women are naturally driven to seek more successful men, however Arab women are sometime more educated and wealthy than their male counterparts. This leads to many women competing for a very small pool of eligible men. Even worse considering that men do not value a woman's salary or education compared to her age, beauty, and personality. So it is no wonder a spinster trend emerges when women are woefully unrealistic in their expectations and refuse to face facts.

In their frustration with their own women, Arab men have vented on social media that these women can remain childless and unmarried. They refuse to wait till they can afford the dowry or win permission and simply choose foreign brides en masse. Marrying a foreign woman means Arab men are liberated from the oppressive chains of tradition and having to answer to in-laws. The women can be much younger and given the cultural practices of child marriage, this is a great boon.

So for all the praise of Islam's strong patriarchal values and conservative attitudes to women, they have been corrupted all the same by feminism and capitalist consumerism. Proving that culture and religion are no match for these insidious movements. The situation will not change unless the women themselves are willing to. Given the attempts to "redefine" spinsterhood into self-deluded female empowerment, this seems highly unlikely.

Arab governments (and the first world) can create as many ineffective controls that they want, but they will inevitably fail unless they temper native women's expectations and make them desirable once more.

Democratic Congresswoman Maxine Waters Urges Liberals To Attack Anyone Who Works For Donald Trump

June 25, 2018 | by News Syndicator | Link | Original Link

Via Breitbart:

Saturday on MSNBC, Rep. Maxine Waters (D-CA) suggested people harassing, and protesting members of the administration of President Donald Trump at stores, restaurants, and gas stations was the new reality for the United States of America.

Waters was referencing White House press secretary Sarah Sanders being asked to leave a Red Hen restaurant in Virginia this weekend.

> Last night I was told by the owner of Red Hen in Lexington, VA to leave because I work for @POTUS and I politely left. Her actions say far more about her than about me. I always do my best to treat people, including those I disagree with, respectfully and will continue to do so
>
> — Sarah Sanders (@PressSec) June 23, 2018

Waters said, "I have no sympathy for these people that are in this administration who know it's wrong for what they're doing on so many fronts. They tend to not want to confront this president or even leave, but they know what they're doing is wrong. I want to tell you, these members of his cabinet who remain and try to defend him, they won't be able to go to a restaurant, they won't be able to stop at a gas station, they're not going to be able to shop at a department store. The people are going to turn on them. They're going to protest. They're absolutely going to harass them until they decide that they're going to tell the president, 'No, I can't hang with you.' This is wrong. This is

unconscionable. We can’t keep doing this to children.”

> Congresswoman Maxine Waters, an extraordinarily low IQ person, has become, together with Nancy Pelosi, the Face of the Democrat Party. She has just called for harm to supporters, of which there are many, of the Make America Great Again movement. Be careful what you wish for Max!
>
> Loading...
> — Donald J. Trump (@realDonaldTrump) June 25, 2018

She added, “We’ve got to push back. We’ve got to say no. I, for example, have stepped way out there. I said this man needs to be impeached. I know a lot of people think we’re not ready to say that. Some people have said a long time ago he would become presidential. He will never be presidential. This man does not have any good values. I believe he needs to be impeached. As a matter of fact, a long time before he’s doing what he’s doing now with these children. I think he had done enough to undermine this country and to have us understand we cannot trust him, that we should have come with an impeachment resolution. So, I believe we cannot wait until the next presidential election. We have to resist him. I want to see him impeached.”

> Did you know:
>
> Maxine Waters doesn't even live in her congressional district
> Maxine Waters lives in a 7 million dollar home
> Maxine Waters employs her daughter for $100K year via her campaign
> Maxine Waters district is one of the poorest in America
>
> She is a fraud, and has a low IQ
>

#MeToo Has Gone Too Far

June 26, 2018 | by Max Roscoe | Link | Original Link

In an earlier article, I examined the sexual groping hysteria of 2018. This week we examine the repercussions of the allegations and possible reasons behind the media conspiracy to make this a national issue.

Why Is This Daily National News?

I have been struggling to understand the reasons for the #MeToo movement gaining speed. Outrage is certainly manufactured, and someone has decided this story will be given lots of media attention.

Is it politicians coddling females and their allies, who together could make up a majority of voters? Is it a tool to control powerful men? Is it someone with a damaging (((agenda))) sabotaging our society?

The Revelations Weaken

Predictably, the claims have weakened. I have yet to hear a serious #MeToo claim that shocks me, or one that calls for the man in question to be imprisoned, or really anything worse than slapped and called a pig by the supposed victim. Indeed, I have suffered more by merely taking a plane flight at the hands of the TSA gropers.

Professional Eye-Raper

The latest claims include a complaint that Morgan Freeman looked at a girl's breasts while he was talking to her at a party, twice requested women in his office to twirl around so he could eye rape them from behind, and one male (presumably gay) actor heard Freeman remark "I'd like to have an hour with her" in reference to an attractive female.

CRUCIFY HIM! He shall never work again. Hollywood is for fags and trannies only!

Chris Hardwick, a nerdy standup comedian and TV actor, had his AMC series cancelled, was erased from the Nerdist website he created, and fired from moderating the Comic-Con convention because a former girlfriend from several years ago made a vague statement that one of her anonymous exes was abusive to her.

TV Actor Chris Hardwick once dated an unstable woman, and must be fired

What was the crime that this unnamed boyfriend, who could be any one of dozens of men this female has dated, committed? He “established rules” for her behavior, including:

- not drinking alcohol
- not having close male friends
- don’t sleep around
- don’t go out alone at night, and
- encouraging her to take a job he gave her in entertainment.

A supposed sexual assault occurred because she “went along with it out of fear of losing him” when they had sex, but now regrets it.

Yes, because this woman had typical relationship conditions imposed, and now regrets having sex with an unnamed man, her most famous ex Chris Hardwick must be fired and never work again.

A woman in need of rules if I’ve ever seen one

I was able to easily find topless photos of this girl, including pictures of her with Hardwick with her ass visible in public, so something tells me her behavior was not very restrained. Nonetheless, even if such claims were true, the rules are completely reasonable and indeed I typically impose them on girls I am dating.

I guess by admitting that, any one of my exes who goes on to date a famous person can now have him fired by publicly reminiscing about our relationship. Apologies to all remaining heterosexual male actors.

Now to the bigger question: why are we seeing such absurd claims become national

news?

A Tool of Control

Most men have sex drives, particularly driven, successful, and prominent men who often have type A personalities and larger-than-life personas. Prior to becoming President, Donald Trump was known for his aggressive if not insulting behavior towards his workers on his TV show The Apprentice. Often the most flamboyant and extroverted men, from Mick Jagger to JFK to Wilt Chamberlain, have sex drives to match.

What is more attractive to the elite than having a natural tool that can automatically control all these men? Simply turn legal sexual behaviors into weapons that are more powerful than the law itself, and you have a way of controlling every powerful man on the planet.

In many US states the penalty for sexual battery is up to one year in jail. The penalty for legally making a woman feel uncomfortable is far greater than committing an actual crime. I can’t help but think of the irony of the ROK rape hysteria. Men could receive lighter punishments if they criminally assault a woman than if they flirt and fail.

Is this really the message society wants to send?

Men like Louis CK must give up their comedy careers, have TV and film projects cancelled, and face a boycott from major brands and entertainment companies. Men like Steve Wynn must resign their post, and face financial repercussions in their industry. Al Franken must resign his career as a US Senator because his hands almost touched a woman's clothed chest in a photo.

Pamela Anderson Gets It

This blonde is a genius by today's standards

Former Baywatch Babe Pamela Anderson was one of the few who called out the absurdity of these claims. Anderson, who was predictably attacked for "victim blaming" stated that:

Loading...

> You know what you're getting in to if you go to a hotel room, alone.

She also gives out some common sense advice to not accept rides from strangers or go to auditions alone. Well, of course.

My first reaction when I hear a claim like "He touched my butt in 1984" is "Really? Is that the last time your butt was touched?"

Apologizing Is A Mistake

Donald Trump made the factual statement that women are so attracted to powerful men that they let them do almost anything, including grabbing them by the pussy. But he did not back down or apologize from that statement. And despite all the wailing and grinding of teeth and "I literally can't evens" he managed to win not only the presidency but the majority of votes of white women.

Bill O'Neill
12 mins ·

Now that the dogs of war are calling for the head of Senator Al Franken I believe it is time to speak up on behalf of all heterosexual males. As a candidate for Governor let me save my opponents some research time. In the last fifty years I was sexually intimate with approximately 50 very attractive females. It ranged from a gorgeous personal secretary to Senator Bob Taft (Senior) who was my first true love and we made passionate love in the hayloft of her parents barn in Gallipolis and ended with a drop dead gorgeous red head who was a senior advisor to Peter Lewis at Progressive Insurance in Cleveland.

Now can we get back to discussing legalizing marijuana and opening the state hospital network to combat the opioid crisis. I am sooooo disappointed by this national feeding frenzy about sexual indiscretions decades ago.

Peace.

Ohio Supreme Court Justice Bill O'Neill displays a normal and healthy attitude towards women

The simple act of not feeling shame or apologizing removes all the power from the "offended" class. While most of the #MeToo stories are lawful interactions, grabbing a woman publicly by her privates could be considered illegal, yet Trump is nevertheless untouchable because he maintains frame. You know this has to keep the cucked

unemployed apologizers up at night.

On the other hand, every single man who has apologized for making a woman feel uncomfortable has ended up fired and permanently ostracized. As Vox Day stated, never apologize to SJWs. It has benefited NONE of these men in any way.

Does the Punishment Fit The Crime?

Love him or not, Louis CK has told some funny jokes in his time. It does not appear that he will ever publicly joke again. It doesn't matter if he had the ability to make millions laugh. If he made one single female briefly uncomfortable, he must go away forever.

It cannot be stressed enough that the punishments meted out by the elites are more severe than almost ANY found in our penal system, even some types of killers are eligible to be released from prison and find employment, but the punishment for flirting is permanent inability to work in your field of choice.

Matt Lauer hosted the Today show for over 20 years. Because he made a woman uncomfortable, he can no longer be a newscaster. While Lauer may be unprofessional,

perverted, awkward, or rude, there are many corrective actions taken short of ending his career as a journalist. The punishment should fit the crime. As a journalist, it is far more important that one has integrity and honesty. When Brian Williams, who has been caught lying multiple times, still has his job as chief anchor, but Matt Lauer is fired and disgraced, something is amiss.

Kentucky Cuckinator Matt Bevin

Kentucky Governor Matt Bevin recently called for any lawmaker in his state who has settled a sexual harassment claim to quit, exclaiming

> These allegations are, as I have said, reprehensible, they're indefensible, they're unacceptable. Period.

Really? Allegations are indefensible?

The Goal: Shaming Masculinity, Blackmail, and Control

While some of these actions are unacceptable ways for men to behave, and some may even constitute criminal behavior, I have struggled with understanding the reason they are made into national news stories. Any time media has a coordinated message, you can be sure there is a propaganda purpose at play. Whether it is fearmongering about North Korea, easing the public into supporting the Gulf Wars, or pretending that gay marriage and trannys are major issues that deserve our attention, there are propaganda aims and distractions at work.

I see two possible goals.

1. Blackmail / Control

One is to control and blackmail the powerful. Almost every man has made a pass at a woman that was rejected. In order to test limits, guys push the envelope to see what

they can get away with. When the modern woman is accepting defecation as a first date activity, it's not unreasonable to try early physical escalation. Any man who has tried this and been rejected or made a woman uncomfortable is now open to termination of his career. This is an extremely powerful tool which can be used to blackmail, or simply physically remove someone who is an obstacle.

2. Shame Men and Attack Masculinity

The second is to shame masculine behavior and further a gynocentric culture. Young men, who are already being exposed to ideas that their testosterone is inherently "toxic" and that they must obtain affirmative consent before proceeding sexually with a woman, will be afraid to escalate, touch, or even look at, women. One American college has already threatened men with expulsion if they dare to whistle at a woman. Men already are afraid to compliment, hug, or approach women.

When the possible result of making a woman uncomfortable is permanent exclusion from your career field and universal condemnation, many will further avoid marriage, family, and sexual relations altogether. At the risk of sounding hyperbolic, I believe many more men will become gay or transsexual.

The end goal is vague; however, Western civilization was built under a strong patriarchy with slut shaming, a class and moral system, and institutions which encouraged ethical behavior. By removing men from positions of power and replacing them with women and gays, the culture is fundamentally and permanently changed.

Popular Country Singer Chris Janson's Teaches You How To Be Captain Save-A-Ho

June 26, 2018 | by Fernando DeVasques | Link | Original Link

Chris Janson's new song suggests that a real man takes care of a drunk girl and assures she gets home. I'm haven't decided on what is more disgusting: Chris Janson for making this, or anyone who puts this on the airwaves. I speculate that this is a parody like Weird Al Yankovich used to do. Below you will find the music video for the song in question. Try not to spit out your whiskey.

I recommend you watch the video itself as it is cringe-worthy of your time. The girl in the video is shown to have a tough childhood because she had an angry father. Years later, she is shown drinking too much at a party, goes to a room with a guy, passes out, and, I assume, has sex with said guy. This isn't x-rated so I can't confirm without evidence.

The pretty blond in the video doesn't seem to learn accountability as she is then shown throwing herself at some long haired guy more years later. What we don't expect is the long hair is a real man because he sends her home rather then give her what she wants.

Chris Janson's Advice: Be a man; take a drunk girl home

Since the song is a plea directed at men, and some of you prefer to read instead of watch a video, I will present to you what Chris Janson suggests you do in order to be a man.

> Couple cover charge stamps got her hand looking like a rainbow
> In and out of every bar on a whim just like the wind blows
> She's either a bachelorette or coming off a breakup
> Take a drunk girl home

Look at her. She's been to more than three bars tonight. Whatever her situation is, she needs a night of heavy drinking. You, White Knight, should make sure she gets home.

> She's bouncing like a pinball
> Singing every word she never knew
> Dancing with her eyes closed like she's the only one in the room
> Her hair's a perfect mess, falling out of that dress
> Take a drunk girl home

She's getting belligerent, don't be afraid. Her red eyes, slurred speech, tangled dress, and messy hair are all so beautiful. Appreciate her and make sure she gets home safely, Beta Boss. She can do no wrong; she had a bad dad. That's enough of an excuse for anything.

Loading...

> Take a drunk girl home
> Let her sleep all alone
> Leave her keys on the counter, your number by the phone
> Pick up her life she threw on the floor
> Leave the hall lights on walk out and lock the door
> That’s how she knows the difference between a boy and man
> Take a drunk girl home

You’re the only one left around her at the end of the night. It is your sole responsibility that she gets home and sleeps **alone**. Fight the urge to say yes to her, hero. Make sure you tidy things up and leave her keys and phone is an obvious spot. She’s a physical and emotional mess and you need to clean it up, Cuck Captain. When she wakes up, she’ll realize you’re a real man and not like her father.

> Took a drunk girl home
> In the sober light of dawn
> She left you a message she thanked you on the phone
> Cause you picked up her life she threw on the floor
> You left the hall lights on walked out and locked the door
> That’s how she knows the difference between a boy and man
> Take a drunk girl home

Congratulations. You took a drunk girl home. She leaves you a thank you message before she texts her friend with benefits. You did deny her action last night. But trust me, this time she’ll know the difference between a boy and a man. You’ll be a man.

> You took a drunk girl home
> Take a drunk girl home

Wow, you actually took a drunk girl home.

Conclusion

Drunk Girl is a ridiculous song and you can't help but laugh, although if the humor is intentional is uncertain. Read the advice that Chris Janson gives and do the opposite. I shouldn't have to say it but you should never follow a woman who is unstable or can't consent to sex. Janson doesn't understand that now women are allowed to drink however much she wants—she doesn't need a hero.

Author Of *Little House On The Prairie* Declared Racist 50 Years After Her Death

June 26, 2018 | by News Syndicator | Link | Original Link

Via CBS News:

An iconic author's name has been stripped from a prestigious literary award because of themes some are describing as racially offensive.

Laura Ingalls Wilder is one of the best-known children's authors. Her "Little House on the Prairie series" is world-renowned for its portrayal of the struggles of prairie life in North America in the 1800's.

Despite the tremendous success of the semiautobiographical series, the Chicago-based American Library Association over the weekend decided to rescind Wilder's Medal for Excellence in Children's literature, a prestigious designation in the children's literary world.

Director of the ALA looks like how'd you expect

"Her works reflect dated cultural attitudes toward Indigenous people and people of color," a statement from the Association said.

Describing the series as "period pieces to spark a discussion," the group is still encouraging people to read the series.

Director of Chicago's American Indian Center, Heather Miller, said she read the books during childhood, and didn't see her ethnicity reflected in the stories.

Loading...

"I absolutely would (read the books again)," Miller said. "But it's also important to provide the education needed to explain why those words were used and what was happening at that time in history."

The books, written in the 1930's, include such titles as "The Long Winter" and "Farmer Boy."

People from as far away as Australia told CBS 2's Vince Gerasole Monday that the books impacted their lives in one way or another.

"To me they are just about wholesome living and families working together," said Louise Tait of Melbourne.

In "Little House on the Prairie," Wilder wrote, "Their Faces were bold and fierce and terrible."

Some characters even say, "The only good Indian is a dead Indian."

The American Library Association knows the books are deeply meaningful to many readers, and they said they are not calling for censorship—just an understanding of the times reflected in the stories.

The award's name has since been changed to the Children's Literature Legacy Award.

Jurassic #Woke

June 27, 2018 | by Keith Mosher | Link | Original Link

"That is one big pile of shit."

I remember giggling like a punch-drunk fool when Jeff Goldblum said that in *Jurassic Park*. It was the first PG-13 movie my parents ever let me watch, and hearing someone swear so casually made me feel like I was one of the adults. Then, the terrifying monsters that used to actually be real showed up, guys were getting eaten alive, and I felt like my 8-year-old self again.

It's a fond set of memories connected to a movie I still enjoy. This weekend I saw the latest installment of the franchise, *Jurassic World: Fallen Kingdom*. As it continued to beat me over the head with woke propaganda, I kept thinking: "that is one big pile of shit." Let's explore the progressive tropes in this pile of shit, and an accidental conservative stance that slipped by unnoticed.

“It’s 2018; I’m capable of saving myself from this volcano, thank you very much!”

The Intention

In chronological order, these are the most prominent leftist social engineering themes imbued in *JWFK*.

1. Dismissal of “Fake News” accusations

As exposition, there is a BBC news segment where an anchor informs the audience of “Save the Dinosaur” rallies and summits. A scrolling chyron reads the unnamed US President denies the existence of dinosaurs.

The filmmakers have concluded that (A) objectively denying the existence of animals viewed by tens of thousands of people and researched with published empirical data in the *JWFK* universe is the same as (B) holding media accountable to fact checking and committing to unbiased reporting in our universe.

2. Gender bender

Two supporting characters are archetypes of their respective opposite sex. One is a male computer programmer who is a frantic, effeminate wreck. He asks for reassurance from women multiple times, and he screams in a falsetto at least twice.

His counterpart is a stereotypical “woman who don’t take no orders from no man” tough girl. At one point she actually says something like “I’m not as fragile as your ego implies” to the double-crossing game hunter, who later calls her a “nasty woman.” The Tumblr-feminism hallmarks of stilted, unwitty quips and the obsession of President Trump’s supposed misogyny made the cut into this movie about dinosaurs.

Scene from original film rebranded as sexual assault PSA

3. Capitalism is bad

To be fair, this theme has been present since the first *Jurassic Park*. However, it has been at the forefront in *Jurassic World* and *JWFK*. In *JWFK*, the animals are only saved because the group funding the rescue operation plans an auction of the surviving dinosaurs.

Later, the buyers are identified as tourism executives or industrial war complex magnates. It's difficult to take the "capitalism is bad" theme seriously when a film is part of a franchise that has grossed over a billion dollars from box office sales alone, not to mention merchandise revenue.

4. President Trump is bad

So far, opinion pieces in *ScreenRant* and *The Guardian* claim the vicious new Indoraptor is a metaphor for President Trump. They cite the Indoraptor's creation by capitalism, purchase by Russian warmongers, and even its spindly head spikes that supposedly resemble the President's coiffure as evidence.

I honestly don't know if this is intentional from the screenwriters and director, or if this is just a case of journalists with Trump Derangement Syndrome seeing what they want to see.

Loading…

Make Dinosaurs Great Again

The movie basically feels like a very long *Vox* video, with decent dinos. But how on earth can you find a conservative stance in this travesty? Well, it happens by accident.

The Mistake

The movie tries to make another woke statement, but it unintentionally supports a conservative policy instead. Toward the end, the auction went awry and most of the people fled. The activists must decide to either let the dinosaurs suffocate from a poisonous gas leak, or they can release the dinosaurs into the forests of Northern California.

Eventually, the little girl decides to free all of the dinosaurs. She says she has to free them because “they’re alive, like me”—she feels connected to them because she just found out minutes ago she is a clone, and she knows the dinosaurs are clones of their ancestors.

It’s a sloppy conclusion, but it’s basically supposed to be about empathy. In this, the filmmakers try to make a case for open immigration policy. However, in their sanctimonious virtue signaling, they didn’t realize that this is a much stronger metaphor advocating restrictive immigration policy.

Before the little girl opens the door leading outside, one of the adults has to unlock the individual cages. The adult unlocks *all* the individual cages, both the herbivores and the carnivores. The herbivores symbolize good illegal immigrants and the carnivores symbolize bad illegal immigrants.

By unlocking all the cages, she symbolizes leftist ideologues who want to give all illegal immigrants unfettered access to the United States. It’s mayhem for both the good illegal immigrants and the citizens of the US to have bad illegal immigrants here. But let’s go a step further.

What if the adult just unlocked the herbivore cages and the little girl released them? Sure, these dinosaurs wouldn’t eat people. But they could step on people, and cause

traffic accidents and damage to property. And it would cost taxpayer money to deploy crews to safely capture the herbivores and get them relocated to a sanctuary.

This symbolizes that even if we only have good illegal immigrants entering the United States, it is still a massive problem. It causes significant disruption and taxpayer money to support them, when they really shouldn't be here in the first place. Dinosaurs and people should not coexist. Illegal immigrants should not be in the United States.

Conclusion

It's a shame that *Jurassic World: Fallen Kingdom* is such a big pile of shit. The acting isn't terrible, and I laughed at a couple of Chris Pratt lines. The visual effects and the sound are good. It's just the latest recipient of a social justice makeover, and that gets old really quick. It's accidental anti-immigration stance will go largely overlooked. I regret giving my money to this movie and the institution it represents, because Hollywood is pushing the entire West to be #woke.

I'll keep in mind the closing scene of the film, where Jeff Goldblum reprises his role as Dr. Malcolm in a testimony before Congress. He says that humans will now have to coexist with dinosaurs, and there's a cut to of the gigantic mosasaurus opening its jaws as it approaches an unsuspecting surfer.

We do not have to coexist with illegal immigrants. Read a book by Pat Buchanan. Promote the work of John Lott. And if you don't already, make sure you know the candidates you're voting for in November commit themselves to immigration reform.

Keith Mosher

Writer Jack London Accurately Predicted The Rise Of China

June 27, 2018 | by Beau Albrecht | Link | Original Link

Napoleon said something like this about China:

> Here rests a sleeping giant, let it sleep, for when it awakens, it will stun the world.

Jack London wrote a short story, “The Unparalleled Invasion”, on that theme.

The author in brief

A century ago, leftists didn't look like Carl the Cuck, AIDS Skrillex, or Trigglypuff.

Proverbially, a conservative is a liberal who got mugged. The reverse proverb says a liberal is a conservative who got arrested. Jack London exemplified that, believing socialism would solve capitalism's problems. It hadn't been tried on a large scale yet, so I'll give him a break for not knowing socialism is worse.

Moreover, this was before cultural Marxism began. Jack London certainly was no self-hating dupe or limp noodled SJW. Instead, he was *quite the opposite*, so today's leftists disown him utterly. I'd have a beer with this guy if we were contemporaries.

Other than that, he lived life to the fullest. Actually, he would've made a great contributor to *ROK.*

"The Unparalleled Invasion"

Let's hope it never comes to this.

Published first in 1910, and later in *The Strength of the Strong*, this recalls the future war beginning in 1976. After the Japanese defeated the Russians in 1904, things went wrong.

The Western powers had little influence on China. The language barrier caused complete

mutual incomprehension. However, the culturally similar and already-industrialized Japanese achieved success. They colonized China, brought industry, and modernized its army.

> In China's councils of empire were the Japanese emissaries. In the ears of the statesmen whispered the Japanese statesmen. The political reconstruction of the Empire was due to them. They evicted the scholar class, which was violently reactionary, and put into office progressive officials. And in every town and city of the Empire newspapers were started. Of course, Japanese editors ran the policy of these papers, which policy they got direct from Tokio. It was these papers that educated and made progressive the great mass of the population.

Sound familiar? Surprisingly, the Chinese *actually benefited* from this subversion! The Japanese apparently forgot to trash China's culture, plunder their economy, invite millions of incompatible migrants, etc. Sensibly, they didn't want to wreck their own gold mine.

However, China's sleeping giant awakened. Invigorated by industrialization, first they kicked out the Westerners, and then the Japanese, even taking over Japan's Asian colonies. Following that, the Chinese were peaceful. The Japanese became surprisingly passive and inwardly-focused.

Soon, this dynamic changed. Modern technology increased life expectancy. China's population grew exponentially. Reaching half a billion by 1970, their numbers slightly exceeded the entire White race, raising concerns abroad. Fully industrialized by then, China became a serious threat.

First they took over Vietnam—still a French colony in this timeline. France retaliated, but naval superiority yielded no advantage. France's land invasion ended disastrously. Following that, the Chinese conquered the rest of Southeast Asia.

Then they took over Siberia. (In the real world, this possibility scared the daylights out of the Soviets.) Here's what happened:

> The process was simple. First came the Chinese immigration (or, rather, it was already there, having come there slowly and insidiously during the previous years). Next came the clash of arms and the brushing away of all opposition by a monster army of militia-soldiers, followed by their families and household baggage. And finally came their settling down as colonists in the conquered territory. Never was there so strange and effective a method of world conquest.

After that, they began spreading elsewhere through Asia. Who could stop them?

> China's population must be seven hundred millions, eight hundred millions, nobody knew how many millions, but at any rate it would soon be a billion. There were two Chinese for every white-skinned human in the world… There was talk of all countries putting bounties on children to increase the birth rate, but it was laughed to scorn by the arithmeticians, who pointed out that China was too far in the lead in that direction.

Where have we heard that before? Smugly, China's Emperor basically told the world, "Come and get us!" The Western nations set aside their differences and mobilized. The mission was for containment. Biological warfare did the dirty work—a pretty grim end.

Loading…

> Five years and hundreds of millions of treasure were consumed, and then the world moved in—not in zones, as was the idea of Baron Albrecht…

That wasn't me! After Western nations repopulated the desolate land that was China…

> It was in 1987, the Great Truce having been dissolved, that the ancient quarrel between France and Germany over Alsace-Lorraine recrudesced.

Despite renewed warfare, the world renounced biological weapons forever.

What really happened

At least we put the kibosh on the Kaiser, boy howdy!

In 1910, Jack London wasn't holding a crystal ball. Still, changing the timeline and the players involved produces prophetic historical and modern parallels.

The French-German dust-up began first in 1914, though merely part of the horror engulfing Europe and elsewhere. In hindsight, all this was a terrible mistake. WWI launched a catastrophic chain of events: Communism, WWII, a string of spit-in-your-eye wars, and unfathomable damage to our culture. After a century, reversing this train ride to hell is long overdue.

The Japanese didn't subvert China; they invaded in 1937. The Chinese became the victims, not the marauders, suffering an estimated 15-20 million dead. Americans

typically have little awareness of how horrific it got, or even forget this item from history class. For that matter, few students remember how many Americans died in WWII.

WMDs featured in both World Wars. However, biological warfare was a Japanese specialty—another *forgotten detail*. The germ bomb researchers went unpunished, in exchange for translating documents about their human experimentation in China.

Ever heard of places like Unit 731?

Chairman Mao tried to industrialize China, but bungled it disastrously. His successors succeeded, and foreign investment provided capital. The cheap labor situation is wrecking industry abroad, but that's another story. Eventually, China became Communist in name only. They also instituted the one-child policy. China's population is about 1.4 billion, climbing but slowing. They're coping fairly well with the infrastructure strain.

Meanwhile, exponential growth continues unabated in vast regions elsewhere. Developed countries have become safety valves for Third World overpopulation. In the 1970s, only "extremists" cared about demographic pressures. Good liberal opinion called these concerns overblown alarmism. Today, good liberal opinion says our demise is inevitable.

They built their wall long ago.

China has rather frosty relations with some close neighbors. Further, their expatriates are acquiring a reputation for ethnic networking. However, as for the West, fortunately China would rather make consumer goods than make war. They'd be good friends to have. Among East Asia, only the Norks are particularly aggressive.

Anyway, if China needs extra territory for *Lebensraum*, Mexico is a large country with awesome beaches…

What's next?

The only unparalleled element is modern Western governments *decisively defending their countries*. Jack London understood about tyrants and greedy plutocrats. However, he didn't foresee today's politicians being this irresponsible and hostile to the public, or the globalist regime destroying their own nations. In 1910, *that absurdity was unimaginable*.

If the Endless Night results, East Asia becomes the world's last superpower. China might make Europe a theme park. Living on a reservation would be somewhat better than unabated globalist misrule. Ethnic networking, subversion, and domination by the Chinese actually would be an improvement over some varieties.

However, a much better outcome would be the sleeping giant of the West awakening soon.

American Corporations Are Taking Steps On Their Own To Limit Gun Sales

June 27, 2018 | by News Syndicator | Link | Original Link

Via Yahoo News:

With Gary Ramey's fledgling gun-making business taking off in retail stores, he decided to start offering one of his handguns for sale on his website.

That didn't sit well with the company he used to process payments, and they informed him they were dropping his account. Another credit card processing firm told him the same thing: They wouldn't do business with him.

The reason? His business of making firearms violates their policies.

In the wake of high-profile mass shootings, corporate America has been taking a stand against the firearms industry amid a lack of action by lawmakers on gun control. Payment processing firms are limiting transactions, Bank of America stopped providing financing to companies that make AR-style guns, and retailers like Walmart and Dick's Sporting Goods imposed age restrictions on gun purchases.

The moves are lauded by gun-safety advocates but criticized by the gun industry that views them as a backhanded way of undermining the Second Amendment. Gun industry leaders see the backlash as a real threat to their industry and are coming to the conclusion that they need additional protections in Congress to prevent financial retaliation from banks.

“If a few banks say ‘No, we’re not going to give loans to gun dealers or gun manufacturers’, all of a sudden the industry is threatened and the Second Amendment doesn’t mean much if there are no guns around,” said Michael Hammond, legal counsel for Gun Owners of America. “If you can’t make guns, if you can’t sell guns, the Second Amendment doesn’t mean much.”

The issue has already gotten the attention of the Republican who is chairman of the Senate Banking Committee. Sen. Mike Crapo of Idaho sent letters criticizing Bank of America and Citigroup, which decided to restrict sales of firearms by its business customers, over their new gun rules in the wake of the Florida high school shooting in February.

“We should all be concerned if banks like yours seek to replace legislators and policy makers and attempt to manage social policy by limiting access to credit,” Crapo wrote to Citigroup’s chief executive.

Honor Defense is a small operation with a handful of employees that include Ramey’s son and his wife who work out of a non-descript building in a Georgia office park north of Atlanta. In 2016, its first year, it sold 7,500 firearms. Its products — handcrafted 9mm handguns that come in a variety of colors — can now be found in more than 1,000 stores.

When Ramey noticed that neither Stripe nor Intuit would process payments through his site, he submitted a complaint with Georgia's attorney general's office, counting on help from a state law that prohibits discrimination by financial service firms against the gun industry. But the state rejected it, saying that credit card processing is not considered a financial service under state law.

He views the credit card issue as companies "infusing politics into business."

Loading…

"We're just a small company trying to survive here," Ramey said. "It's hard enough competing with Smith & Wesson, Ruger and Sig Sauer."

The financial industry actions came amid a broader pushback by corporate America in the aftermath of the Florida shooting. Delta and United Airlines stopped offering discounted fares to NRA members, as did the Hertz, Alamo and National rental car companies. First National Bank of Omaha, one of the nation's largest privately held banks, decided not to renew a co-branded Visa credit card with the NRA.

Walmart and Dick's Sporting Goods both decided they would no longer sell "assault weapons" or firearms to people under age 21. REI, an outdoor-gear shop that doesn't sell firearms, joined in and decided it would stop selling such items as ski goggles, water bottles and bike helmets made by companies whose parent firm, Vista Outdoor, manufactures ammunition and AR-style long guns.

There's been election-year response from some lawmakers, notably in Georgia where Lt. Gov. Casey Cagle, who is running for governor, led a move in the Legislature to kill a tax break on jet fuel to punish Atlanta-based Delta over its NRA actions. The move cost the airline an estimated $40 million.

Gun-control advocates have applauded the efforts, saying it demonstrates responsible leadership at a time of paralysis in government. Experts say it's a sign that the business world views wading into the gun debate as not at all risky — and, in fact, potentially beneficial to their brand.

"Companies by and large avoid these issues like the plague and they only get involved — whether they're credit card companies or airlines — when they feel like doing nothing is as bad as doing something and they feel completely stuck," said Timothy D. Lytton, professor at Georgia State University's College of Law and author of "Suing the Gun Industry: A Battle at the Crossroads of Gun Control and Mass Torts."

The gun industry acknowledges that there's nothing requiring companies from doing business with gun manufacturers or dealers. Monthly reports from the federal government show background checks to purchase a firearm are up over last year so far, so the early actions apparently have not put a dent in sales.

Still, the industry believes it needs stronger laws against financial retaliation in the future.

6 Theories Why Women Have Rape Fantasies

June 28, 2018 | by Jared Trueheart | Link | Original Link

A surprising amount of women have rape fantasies. If you don't understand that true statement you have a great deal of company. Researchers and scientists have been baffled by this counter-intuitive phenomena as well.

There's been quite a bit of research on this topic over the last 40 years. In their analysis of rape fantasy research titled "Women's Erotic Rape Fantasies: An Evaluation of Theory and Research," published in the Journal of Sex Research in 2008, Joesph Critelli and Jenny Bivona present several theories explaining why women have rape fantasies.

Sexual Blame Avoidance

This is the most common explanation for women's rape fantasies. Essentially, a woman will want to sleep with a man, but because she may gain a reputation as a slut or because it may involve cheating or any other social consequences, she won't actually do it. The

fantasy involves the desired man raping her so that she gets sex with him without any social consequences.

The support:

There's not much. The feelings of guilt aren't avoided if they are present when women have rape fantasies. The research suggests the opposite. Women who have feelings of guilt do not have rape fantasies, they are less sexual and less prone to sexual fantasies in general.

Red pill wisdom:

We all know women want plausible deniability. This allows them to have sex with men but still act like "it didn't count" in their heads. With the ongoing cultural decline and female empowerment, women need plausible deniability less than ever. Women are not taught shame anymore. They are taught empowerment. You won't find any Cosmo girl who needs plausible deniability. If the modern woman wants to be degraded, she goes for it.

Openness To Sexual Experience

This theory states that women who are open to sexual experimentation are more likely to have rape fantasies. The more open they are to unique and frequent sexual experiences, the more likely they are to have rape fantasies.

The support:

There is some support for this theory. The problem with it is that it doesn't explain why force and non-consent are part of the fantasy.

Red pill wisdom:

We've all been with some freaks—girls who liked to be choked, degraded, humiliated, etc.

A woman who has rape fantasies might be just another freak.

Desirability

In this explanation, women want to be so desirable that men just have to have them, even if that means rape.

The support:

There is also some support for this. The problem is that these theories are not mutually exclusive. For example, women also fantasize about being desired by many men (and servicing them simultaneously), and role-playing as a more desirable woman. These provide evidence for this theory but they may also be part of the previous theory.

Red pill wisdom:

We all know women want attention. They've even replaced it with love across some demographics. But we've yet to see any evidence that attention results in sexual stimulation rather than just ego stimulation, which is more important to the modern empowered woman.

Loading...

Male Rape Culture

Women have rape fantasies because the patriarchy has taught them from birth that they are sexual objects. Men will have sex with them whether they like it or not, so they have been taught by the patriarchy to want to be raped.

The support:

Men do not fantasize of rape from the perspective of the rapist. In fact, more men have fantasies about being forced to have sex with women.

Red pill wisdom:

Red pill men never have and never will desire to rape women.

Biological Predisposition to Surrender

Male dominance/female surrender is common in the animal world. There may be a similar dynamic in human mating.

The support:

The biological argument is one that has not been tested yet. There are other theories you'll see in evolutionary psychology textbooks on the evolution of rape (orangutans do it, for example), but hypotheses based on biological theories require further research.

Red pill wisdom:

As a general rule, all women like rough sex. The question is, where does rough sex become rape? In the majority of rape fantasies, as outlined in another study about rape fantasies by Joesph Critelli and Jenny Bivona, a woman imagines a handsome man desiring her and courting her. She refuses and he non-violently dominates her. She doesn't provide physical resistance, though she may say no again. In the fantasy that doesn't stop him.

It comes back to that joke of a woman saying "no" during sex, causing a guy to stop giving her the business. Then she looks back and says, "Why'd you stop?"

Adversary Transformation

A woman fantasizes about a handsome man being her good husband. The man wants her too, but only sexually. He rapes her in the manner described above, but she sticks with him. Eventually, he wants her for more than just sex and transforms from a sex-crazed rapist to a loving husband.

The support:

The support for this argument came from an analysis of rape scenes in romance novels. One review found rape scenes in 54% of them.

Red pill wisdom

When women desire the sex-crazed dominant man, they are pursuing an alpha-fux strategy. When women approach the wall they will begin to pursue the beta-bux strategy. If they can change an alpha who pleases them sexually into a beta who supports them, they will. That's part of the fantasy. But how many alphas let themselves be manipulated like that?

Rape is wrong. Don't do it. With that being said, if the rape of women's fantasies doesn't sound like rape to you, that thought also occurred to the researchers. Women rarely, if ever, fantasize about being beaten by some syphilitic crackhead who forces dry sodomy on them. They want handsome, dominant men to desire them and they want a man who won't give up on pursuing them easily. If she says no, leave it at that, but if you're a handsome dominant man she probably won't want to say no.

3 Powerful Tips For Optimizing Your Facial Hair

June 28, 2018 | by Fernando DeVasques | Link | Original Link

Men must use their God-given facial hair follicles to their advantage. Facial hair is The Lord's way of giving you the opportunity to enhance yourself. We are bestowed countless opportunities daily—don't let them all slip. You can hide a lot with a beard, especially a weak chin.

He can hide his childlike chin with more months of growth.

There are others who don't know how to properly style their beards and half-ass it with

chin straps. Chinstraps and thinly trimmed mustaches are for sensitive R&B wannabes. The worst men are those who make fun of beards while their own skin is constellation of pores and acne scars.

I will remind you: a beard can cover a lot of imperfections. If done right, it can get the girls coming your way. I've heard the excuse that one's employer won't allow them to grow a beard. You shouldn't work anywhere that controls the way you want to where your face. Of course, don't quit your job just to grow a beard if you can't afford it.

As a person with a great beard and mustache, I come up with tips for my brothers to find their way to the facial haired promised land. It will not be easy for some, but the path of an itchy face will be worth it. You don't have to grow a full grown beard because we are all not similar. Yet, you can mold your hair into something socially acceptable at any growth stage if you follow these three tips.

1. Know Where To Line Your Face Hair

No matter the type of facial hair that you want to showcase when you are out on the town, make sure that you are lining your facial in the correct spot. The correct spot is not the line that your mandible creates. Shaving along the line that is created by your jaw will render your facial hair useless. Do not shave under your chin. You're going to want to avoid going the thin-line beard route, it's for teenagers.

Doesn't need advice on picking up women.

If your goal is to grow a luscious beard, you must follow the neckline, not the jawline. Following the jawline will only make you look like you don't know much about yourself.

2. Use Beard Balm/Oil and Mustache Wax Early

You’re going to have to take your face, therefore yourself, a lot more seriously now. Not only do you not want to be a fat guy with a beard, you’re going to want to present yourself well. If you find yourself with an itchy face, or dry looking hair, go look for beard balm or oil. Get mustache wax if you’re a true man who will doesn’t want to show his lips like women do.

Loading...

Balms, oil, and waxes will all depend on the kind of hair you have. I have a somewhat curly beard so I go for balms rather than oil. Finer hair men are prone to oils but using both every know and then is recommended. You’re going to play with your new hair and trying out the different products is part of the fun. You will notice how much more you pay attention to your whole self soon.

Self-Care is important. Love yourself.

3. Let The Hair Grow

Patches are the number one killer to what would be a great beard. Don't allow one patch or two or three to dictate what you can accomplish with your facial hair. You must get past the stages where you think that you look idiotic. What if you do? Nobody cares about you that much. Accept your early beard of pubic hair and give it time to flourish. As the hair grows long, patches will disappear. With enough hair, patches can get covered.

This is not me, but his beard almost looks as good.

Conclusion

“Your girl called me to test your new bed. Wait here.”

I don’t think that a beard is for every man, but I do believe that every man should attempt to grow one. These tips are for those of you who want to grow your hair when you don’t know how to start off correctly. Spread these tips to your brethren and pillory those with trimmed mustaches, and chin straps.

You will grow personally along with your beard. Taking care of yourself will become a priority and you’ll unknowingly thrive to be better than yesterday. Just making an attempt to grow a quality beard will get the birds noticing.

United States Declared The 10th Most Dangerous Country For Women In The World, Right Behind Nigeria

June 28, 2018 | by News Syndicator | Link | Original Link

Via CBS News:

The United States has been ranked for the first time among the 10 nations deemed to be the most dangerous for women by experts in the field. **A survey by the Thomson Reuters Foundation of about 550 experts in women's issues around the globe labeled the U.S. the 10th most dangerous nation in terms of the risk of sexual violence, harassment and being coerced into sex.**

The foundation said the U.S. placement on the dubious list was down **largely to the #MeToo and Time's Up campaigns** increasing awareness of sexual violence and intimidation of women in the U.S. in the wake of the criminal allegations against movie mogul Harvey Weinstein.

"People want to think income means you're protected from misogyny, and sadly that's not the case," Cindy Southworth, of the Washington-based National Network to End Domestic Violence, told the foundation. "We are going to look back and see this as a very powerful tipping point… We're blowing the lid off and saying '#Metoo and Time's Up'."

Cindy Southworth looks exactly like you'd expect!

According to the survey, which was last carried out in 2011 and did not then rank the U.S. among the top 10 most dangerous nations, India is the most perilous country for women right now.

The survey noted that Indian government data shows reported crimes against women were up 83 percent between 2007 and 2016. During that year, there were an average of four rapes reported every hour in India.

India has seen a series of horrific attacks on women in recent years, the most recent example being five female activists working to raise awareness of human trafficking who were gang-raped at gunpoint in the eastern Indian state of Jharkhand just last week.

Loading...

Other Indian women and even young girls have brutally assaulted, a couple even set on fire, in recent attacks, which have drawn huge protests onto the streets in defense of women's right to safety.

Most of the other countries in the top-10 determined by the foundation's survey are countries with ongoing military conflicts or insurgencies, or where long-held religious and political views have kept women on an unequal footing in terms of law enforcement and treatment in society generally.

The foundation asked the experts which five of the 193 United Nations member states they felt were "most dangerous for women and which country was worst in terms of health care, economic resources, cultural or traditional practices, sexual violence and harassment, non-sexual violence and human trafficking," according to the foundation's article on the survey.

Immediately behind India in the survey were Afghanistan and Syria. The full list of the 10 most dangerous countries for women, as picked by the experts surveyed by the foundation is as follows:

1. India
2. Afghanistan
3. Syria
4. Somalia
5. Saudi Arabia
6. Pakistan
7. Democratic Republic of Congo
8. Yemen
9. Nigeria
10. United States

This place (Nigeria) is as dangerous for women as the USA

Boomercore Band “Bad Religion” Releases New Song Attempting To Bash The Alt Right

June 29, 2018 | by Don Alfredo Cabrera | Link | Original Link

Bad Religion, an American ~~punk~~ rock band formed in the ’80s, just released their new single entitled “The Kids Are Alt-Right”. The song is a failed attempt to satirize the Alt-Right movement and everything related to it. That is no surprise since the band is very well known for its far-left political activism.

> Here are the lyrics:
>
> Jackboots cracking on a polished floor
> Red hats gathered in the liquor store
> Pure hearts race on a crystal night
> Everybody, grab a torch to light
>
> Everybody, need somebody, join the party
> The kids are Alt-Right today
>
> Now grab your partner and do-si-do
> Populism is a sold-out show
> Humanity is a nowhere scene
> When everybody has an Ar-15
>
> Everybody, need somebody, join the party
> The kids are Alt-Right today
>
> We love God, we love our women
> We love tradition, we love kin
> We’ve got shiny new tools

> For ancient impulses that we can’t even understand
> So if you feel alone and downtrodden
> There’s an elixir for your ills
> Join the Alt-Right post-light endarkenment order
> And the rest of those bastards can go to hell
> Alternative facts, alternative lies
> Alternative names, alternative tribes
>
> Everybody, let’s get bloody, join the party
> The kids are Alt-Right today

The song video clip was posted on YouTube a few days ago and quickly became targeted by thousands of Alt-Right supporters and common people who simply noticed the very low quality of the “critique”.

In the comments section, it is very hard to find any positive responses at all—I struggled to find a single one compliment to the band—most comments are guys ironizing this “masterpiece” of punk rock music and pointing out to their laughable cringe, some even said the song made them want to join the Alt-Right or that the Alt-Right should use it as a recruitment anthem.

When the video starts, we are shown images of Hitler, Pepe the Frog, Swastikas and, of course, references to President Trump, the KKK, and gun control. Can you picture a more liberal cliché than that?

The user Chester Belloc commented, “This sounds like it was written by a Boomer college professor.”

Bingo! Greg Graffin, Bad Religion’s founder alongside Brett GUREWITZ, is in fact a Baby Boomer who happens to be a college professor of anthropology at UCLA. Apparently, Greg is also an anti-religion activist: the band’s logo designed by GUREWITZ is a Christian cross with a red prohibition sign over it (that must have been quite a shocker for old ladies of the past century).

Hatred for Western Civilization is latent in their work. The vocalist is your typical Baby Boomer elitist liberal. Very punk, huh?

Boomer, Liberal, Educated, Superior

Delineator of Light noted:

> Imagine Bad Religion's mostly white audience looking at pictures of healthy white couples in this video as images of "white supremacy" they're supposed to be disgusted by. Seriously, you have to wait until very late in the video until it becomes obvious that it's anti-alt-right and not pro-alt-right, because so much of the imagery is attractive and the lyrics are vague.

Well, I guess having this sort of political position when your musical genre is "hardcore/punk", which is almost entirely related to working class/middle class white people, is not a very cleaver idea. Do minorities and wealthy white people listen to this type of music? No, I am pretty sure they don't.

Loading…

Another user called Andrew Jones said, "'We love our women, we love tradition, we love kin.' Oh no, the absolute horror!"

Indeed only a bunch of deeply degenerate humans that lost complete touch with reality and live on a bubble of delusion could see it as negative acts.

Evil white couples in the clip!

The verses ,"We've got shiny new tools", "For ancient impulses that we can't even understand" and "Alternative facts, alternative lies" clearly indicate the disdain and hate that these liberal Boomers have for the free internet. They really preferred the days when we didn't have a voice and were all indoctrinated without any questioning whatsoever. For them the internet is a plague. I always hear older leftists cursing the social media for their defeats.

"We must talk about the dangers of social media and how it activates kids' most ancient impulses as love for kin."

Growing up as a skater kid in Brazil, I used to enjoy listening to Bad Religion and similar bands like NOFX; after all that was the soundtrack of skateparks and games such as Tony

Hawk's Pro Skater. Back in the day I didn't pay much attention to the lyrics and their political stances, I just wanted to be this rebel skater kid (self-affirmation when skateboarding was cool and not owned by big corporations with lots of real posers). By that time, the left had not gone publicly insane yet. In my perception that happened somewhere around 2012.

Now, with 23 years of age, my mind is incapable of imagining a more depressing and ridiculous image than that of these middle-aged (now almost elderly) Baby Boomer dads on a stage pretending to be bad, acting like "punks", banging their heads and playing these terrible and poorly written liberal songs. It is so freaking shameful.

When I was 12, punk rock music was awesome and it sounded great, but I can't imagine how these 50-something dudes can still enjoy it. That must require a very low IQ I am sure. If we analyze carefully, punk rock was never really "counterculture", because it was widely idealized by people like Malcom McLaren, who were businessmen of the fashion industry and showbiz. Punk rock and related genres are to music what abstract modern art is to real art. We are the real counterculture.

Look how awesome and bad we are!

I highly recommend that all of you check the comments section of this video, it is funny as HELL. This attempt at music once again proves that the left can't meme.

Man Kills 5 People At Maryland Newspaper Because Of An Article About His Sexual Harassment Conviction

June 29, 2018 | by News Syndicator | Link | Original Link

Via Globalnews:

The suspect charged in the killing of five people at the Capital Gazette in Maryland, Jarrod Ramos, had a longstanding vendetta against the paper and disturbing history of harassing women.

Ramos' sued the paper for defamation in 2012 after it reported accurately on his guilty plea for harassing a woman he went to high school with.

Brennan McCarthy, the attorney who represented the woman Ramos tormented, told CBS that Ramos used Facebook and email to harass and stalk his client for years.

"He was as angry an individual as I have ever seen," McCarthy said. "She lost her job because of this individual … He is malevolent. He forwarded a letter to her employer, basically stating that she was bipolar and a drunkard which is ridiculous."

The victims

Court documents show that harassment began in 2009 when Ramos and the woman became friends on Facebook. In 2011, Ramos pleaded guilty to criminal harassment and was handed a 90-day jail sentence but was ultimately placed on 18-months' probation.

Five days after Ramos pleaded, The Capital published a column by Eric Thomas Hartley titled, "Jarrod wants to be your friend." [Read the original article in this court filing.]

The article reveals details from the trial outlining how shortly after becoming friends on social media, Ramos became angry and fixated with the woman and started sending threatening messages.

"I just thought I was being friendly," the woman told the court. "But when it seemed to me that it was turning into something that gave me a bad feeling in the pit of my stomach, that he seems to think there's some sort of relationship here that does not exist … I tried to slowly back away from it, and he just started getting angry and vulgar to the point I had to tell him to stop.

> "He was not OK with that. He would send me things and basically tell me, 'You're going to need restraining order now.' 'You can't make me stop. I know all these things about you.' 'I'm going to tell everyone about your life.'"

In April 2010, she received a message: "Have another drink and go hang yourself, you cowardly little lush. Don't contact you again? I don't give a (expletive). (Expletive) you."

Loading...

She also said she was put on probation at the bank where she worked and was told by a supervisor that Ramos had called and advised the bank to fire her. She said she believed, but could not prove, that Ramos had played a part in the loss of her job.

Ramos sued the newspaper and Hartley in 2012. The lawsuit was dismissed in 2013 and an appellate court upheld the dismissal in 2015.

“There is nothing in those complaints that prove that anything that was published about you is, in fact, false,” the judge ruled. “It all came from a public record. It was of the result of a criminal conviction. And it cannot give rise to a defamation suit.”

A Twitter account appearing to belong to Ramos featured a picture of Hartley’s and a banner image included photographs of Thomas Marquardt, the paper’s former editor and publisher, and The Capital’s former owner, Philip Merrill.

Under the bio, it read: “Dear reader: I created this page to defend myself. Now I’m suing the s— out of half of AA County and making corpses of corrupt careers and corporate entities.”

He regularly used the Twitter account to post threatening messages about The Capital and its staff. In one tweet, he said he’d enjoy seeing the paper stop publishing, but “it would be nicer” to see two journalists “cease breathing.” He also called the 2015 shooting at the French publication Charlie Hebdo a “funny thing.”

The account had been quiet since January 2016, according to the Baltimore Sun, but moments before the shooting Thursday — the account posted a message that read: “F— you, leave me alone.”

Twitter has suspended the account.

McCarthy told CBS that Ramos was “obsessively” angry with the paper and the 2011 story.

“He wanted to get revenge,” McCarthy said. “It was inevitable. He was going to do something violent. The only question was, who would he get first.”

Acting Police Chief William Krampf of Anne Arundel County told reporters the gunman “looked for his victims” Thursday in the newsroom before opening fire with a shotgun.

> “This person was prepared today to come in, this person was prepared to shoot people,” Krampf said.

Bloomberg reporter Madi Alexander created a GoFundMe account to help the newspaper's journalists pay for medical bills, funeral costs, newsroom repairs and other expenses.

It has raised over $117,000 as of Friday morning.

French Divorcée Has Sex With Arab, Gets Killed

July 1, 2018 | by André du Pôle | Link | Original Link

Many females manage to wreck men's lives without having their own life ever affected. However, it also happens that sometimes the pussy pass doesn't work anymore. This is especially true when your average spoiled white woman has to deal, not with a browbeaten white male, but with some "empowered" and fashionable violent bastard.

In Limoges, Southwest of France, one of these "attractive" bad boys stabbed his notch before burying her.

> At the beginning of June, the body of a woman was found buried in the garden of her housing. She had been stabbed a dozen times. Her partner, held in police custody, was indicted for murder.
>
> The Prosecutors Office of Limoges announced that said partner… had avowed having killed her, which led to his indictment and incarceration.
>
> The suspect, who had been taken into police custody at Alfortville (Val-de-Marne) before getting transferred to Limoges the day after, "provided several versions of what had happened, some extremely dubious; he even explained he had no responsibility in what has happened and that several people had killed the victim in front of him", explained Limoges public prosecutor Gilbert Emery during a press conference.
>
> Asked about the inconsistency of his version and about material evidence the investigators had found, the suspect finally avowed having killed his girlfriend with a "kitchen knife"… She was 35 years old and mother of two teenagers.
>
> A 29 years old Algerian national, apparently an irregular migrant, the suspect explained he had been dating her—who had divorced the father of her

> children—since they had met in a bar some weeks before the murder.
>
> “He said she had a dissolute life. She was dating several men at the same time, and this made him furious”, the prosecutor added, while emphasizing that the man was indicted for a premeditated murder.
>
> Loading…

Karma’s a bitch. And as the saying goes, no one gives a better beating to a bitch than another bitch. (Based patriarchs used to take care of this kind of problem before they even appeared, but doing the same today could get you jailed or divorce-raped.)

If we lived in a healthy civilization, with native, patriarchal families and no mass immigration, this woman would still be married. She would be alive and likely happier than the alcoholic harlot she had become. Wanting to be “free”, she literally destroyed herself.

If someone deserves compassion here, I would point out to the poor teenagers who had to grow with a dissolute whore instead of a proper model. At least she won’t make her sons ashamed anymore. Sometimes growing up an orphan is better than getting overburdened by a disgraceful parent.

I also wonder whether the Algerian killer isn’t, deep down, a classic romantic male who started falling in love with his new significant other but had his heart broken after he saw she just wanted to *have fun*. The only difference between this alien and a usual white beta male being, besides the obvious illegality, that he reacted as an Arab does—namely, with violence—-in circumstances when the white beta politely goes to a dark corner and cries while listening to sad music.

In any case, the ex-sperm drinker, now newly elected food for worms can rest happy. The

awful cisgendered white male patriarchy did not interfere with her empowered destiny.

Did Roseanne Barr Deserve For Her Career To Be Destroyed For Mocking Obama Adviser Valerie Jarrett?

July 1, 2018 | by Beau Albrecht | Link | Original Link

Comedian Roseanne Barr launched a firestorm with the following tweet about Valerie Jarrett:

> muslim brotherhood & planet of the apes had a baby=vj

In the aftermath, ABC cancelled her show. She might now find herself as unemployable as celebrities busted for bad flirting.

Obama's consigliere

Valerie Jarrett was born to two Americans living abroad in Iran, and spent her early childhood there. Perhaps that inspired the "Muslim brotherhood" part of Roseanne's quip. If not, maybe it references pro-Muslim sentiment. *Who the hell knows?*

Valerie's parents are Black, though not pure African. She doesn't much look like it. Actually, it's hard to describe her appearance. Even so, this makes the rest of the quip very politically incorrect. Was Roseanne really talking about Valerie's ancestry, or was she merely implying a resemblance to Zira from the classic 1968 movie? *Who the hell knows?*

What's more noteworthy is Jarrett's radicalinski ancestry. *Frontpage Mag* describes some family members—including her husband Vernon—involved in front groups, one linked to some leading Weathermen. Other family connections included figures like Alfred Stern (a Soviet spy), Frank Marshall Davis (a Communist writer who was also Obama's mentor, but speculated by some to be his biological father), among others. Still, I can't come down on Valerie too hard for that, since I'm technically a red diaper baby too.

During Obama's Chicago days—about which far more could be said—his future wife Michelle was hired by Jarrett at the mayor's office. The three of them hit it off pretty well, friends since 1991. When The Lightworker was elected President, she became a top advisor. While he was acclimating to the new job and seemed rather stunned by it all, his friend Valerie was a comforting presence. Jarrett also had leadership roles in the White House Task Force to Protect Students from Sexual Assault and the White House Council on Women and Girls.

Following the Obama administration, she's been staying active. Most notably, Jarrett joined Lyft's Board of Directors. However, she's been out of the news until now.

Roseanne's damage control attempts

At first, Roseanne apologized, stating that it was a bad joke. That much is plausible; outrageous stuff is one of her shticks. Sometimes she overdoes it, like her awful attempt at singing the “Star Spangled Banner” in 1990. That one struck a sour note, but it didn’t end her career.

Apparently monkey business is more serious than mocking the national anthem. What she *really* meant by what she wrote might be a mitigating factor. Still, it won’t matter in the court of “public opinion”. Did she cross boundaries? Sure. Still, the reaction is disproportionate.

Later, she blamed her posting on Ambien. That would create sufficient plausible deniability. (There are anecdotes about airline passengers on sleeping pills who do things like sleepwalk naked or even urinate on their clothes.) However, since Roseanne first said it was a bad joke, it’s hard to change her plea to diminished capacity.

Virtue signaling doesn’t work

Other damage control efforts got weirder yet. The *Daily Mail* describes some of these:

Loading…

> ‘Rod Serling wrote Planet of The Apes. It was about anti-semitism. That is what my tweet referred to-the anti semitism of the Iran deal. Low IQ ppl can think whatever they want.’

Further along those lines:

> ‘My childhood was spent growing up in an apartment house owned by my grandmother filled with survivors of Auschwitz and Belsen. I am an advocate 4 them & for all oppressed ppl. I will always be 4 FREEDOM FROM MOB MENTALITY,’ wrote Roseanne.
>
> The previous night she had responded to a tweet about her Planet of the Apes interpretation by stating: ‘i dreamed about my childhood, growing up with survivors of nazi camps-.’

Clearly she’s grasping at straws, but the Ambien excuse was better than this.

> She wrote: ‘I want u all2 know I’m fine. I’ve been using this time2 reflect & 2 gain insight on what I said & how it was misunderstood.. Needless2 say I’m NOT what people have accused me of! I’ve never practiced ‘RACISM’ in my entire life & never will.’
>
> Barr then revealed her 2012 presidential campaign manager Thomas Muhammad is to be allowed to speak for her because, ‘he knows the work I have done in civil rights against racism ALL MY LIFE & understands my tweet was about Iran’s regime, not race’.

She’s trying desperately here, but being liberal and Jewish won’t get her out of this one. Even before political correctness began going full retard during the 1990s, the celebrated sportscaster Howard Cosell had an ambiguous monkey business gaffe too. His damage control speech was orders of magnitude more eloquent than Roseanne Barr’s efforts. Still, his career was toast.

She tried, but failed, to smooth things over with management:

> ‘I begged Ben Sherwood at ABC 2 let me apologize & make amends. I begged them not to cancel the show. I told them I was willing to do anything & asked 4 help in making things right. I’d worked doing publicity 4 them 4 free for weeks, traveling, thru bronchitis. I begged 4 ppls jobs,’ she tweeted.
>
> ‘He said: what were you thinking when you did this? I said: I thought she was white, she looks like my family! He scoffed & said: ‘what u have done is egregious, and unforgivable.’ I begged 4 my crews jobs. Will I ever recover from this pain? omg.’

This weird ethnic pecking order that’s been promoted for decades sometimes inflicts unexpected collateral damage. Things are going in unexpected directions, and in ways that the types who started this never anticipated. It may get worse yet for them. *What the hell were they thinking?*

Political correctness killed comedy

Roseanne Barr represents some things that *ROK* generally dislikes. She's a liberal celebrity—though she's showing some signs of disenchantment lately, and this latest mess might further her education. Sometimes she's an obnoxious blowhard. She could stand to cut down on the snacking, but that's the least of her worries lately. (For the record, I don't hold her ancestry against her. Much to her credit, she doesn't behave like Tim Wise.) Despite all this, Roseanne has become a tragic figure, a casualty of political correctness.

Saying something just once can ruin a career overnight. That's true even for ordinary folks outside the public spotlight. *This is the problem.* It was her job to be witty and outrageous, but it's impossible to do that effectively without crossing boundaries sometimes. Talking about ape men is highly taboo, despite leftist efforts to create them.

Roseanne was from a generation of liberal comedians who *actually were funny*. (I've heard some of her early routines; she had her moments.) Lenny Bruce caught heat for too-risqué performances, but after the 1960s, comedians could get away with joking about nearly anything. Lately, political correctness limits their options greatly, and sour snarling about Republicans is one of the few safe mainstays. Perhaps Roseanne forgot that it's the Current Year. Even if Robin Williams was resurrected and said something like that, the SJWs would try to kill him all over again.

Perhaps the greatest lesson is that when a politically correct dogpiling happens, begging for mercy doesn't work. The better response is to stay prepared and strike back. If Roseanne starts making fun of SJWs—a very easy target—she'll gain many new fans.

Beau Albrecht

My father was a high-ranking student radical poobah and still thinks Castro was the bees' knees. Although I'm technically a red diaper baby, I've rejected all that baloney. I write **off-the-wall fiction**, and ***Righteous Seduction*** concerns next-generation game. My **blog** concerns "deplorable" politics, game, and my writing projects.

My Success With Women Did Not Make Me Feel More Masculine

July 2, 2018 | by Rohan Artino | Link | Original Link

I discovered ‘game’ in 2007, when I was 18 years old. A shy kid, I had not been close to my father growing up, and was mainly raised by women.

I immediately drank the ‘Kool-aid’ that the RSD’s of the world seemed to be offering—the idea that chasing lots of women was the key to happiness in life, and that the measure of a man’s success wasn’t how much money he made, or his physique, but how many women he could get.

“What’s the point of having money or a great physique”, I’d think to myself at the time, “if you can’t sleep with a ton of women.”

And so, I set off, an 18 year old ‘lost boy’ who had no idea how to be a man, chasing the self esteem boost that came from hedonism. Night club after night club, I thought I had landed on something profound, some cheat code to life. I looked at all the other men who didn’t ‘game’—men who were building their careers or eating their meals religiously to build a physique they wanted—and I laughed at them.

I was reasonably ‘popular’ with women for those couple of years—I had one night stands, favours performed on me in alleyways, and stuck my tongue in more alcohol and cigarette flavoured mouths than I can count.

The validation of women was powerful at that stage. As I made bad decisions in other areas of my life, like dropping out of law school and avoiding weightlifting (It’s hard to ‘lift’ three times a week when you’re regularly drinking heavily and chain-smoking), I continued to tell myself that success with women was the only measure of a man that mattered.

With the amount of sex on offer at the time for guys who knew ‘game’, it was hard to break the delusion. Fast forward 11 years, though, and the landscape has changed.

Women are no longer feminine. The little feminine energy that existed in 2007-08 (it was already dwindling then) has well and truly evaporated. As I walk around, I see that women have become miserable, angry consumers. Consumers of the newest smartphones and social media outlets, consumers of the latest fashion trends that leave nothing to the imagination, and, most of all, consumers of men.

Women have the highest expectations of men, but are really not prepared to offer much themselves. Add to that the fact that we’re now in the ‘MeToo’ era (where many women try and ruin a man for simply not living up to their lofty expectations) and it all makes for an uninspiring landscape.

Typical current day standards.

So, then, men must look elsewhere for meaning. Here are some ways I am bringing about that meaning in my own life:

Attaining the best physical condition possible

I am currently reading Yukio Mishima's book "Sun and Steel", where he talks about his love of weight lifting. Mishima argues that although in modern society the body and soul have been seen as separate, the reality is the opposite.

The body is the primary expression of who you are in the world; more important than the words you speak or the work you do. Your body is your orchard, your temple; something capable of beautiful creation (bodybuilding) or abject destruction (obesity).

Loading...

Yukio Mishima.

I am finding meaning in cultivating my body daily, weekly, and getting closer to my ideal vision of myself. I see this also as paying respect to my ancestors from hundreds of years ago, who surely had to be fitter than most people in modern Western society. The feeling of having a physique close to your ideal will give you much satisfaction, and, as Mishima described, be a “protective function in the face of the chaos around it”.

Getting paid to do something you really enjoy, that you can do from anywhere

One thing I can’t fathom today is living the corporate life. Waking up at 6am to get on the train or other public transport by 7am, to be in a miserable, spiritually desolate office by 8.30am. Being surrounded by women who wear low cut tops, short dresses, and a ton of makeup, only to be readily ‘offended’ and ‘threatened’ if you so much look at their flesh on display.

I had a taste of this myself about three years ago, and I couldn’t get out of there fast enough. It was simply insufferable. The men were like caged animals. No wonder they looked so forward to Friday 6pm drinks; a time to drown their sorrows and forget about their life.

If you are in this trap, you most likely want to escape it. Find out something you do genuinely well, and work on it. Even if you make less than your 9-5, it is worth it.

Being internally immune to the degeneracy of society

Becoming emotionally and spiritually stronger, although it may sound ambiguous, is something I’m very proud of. At the start of 2017, I would wake up depressed almost every morning, contemplating whether life was worth living. I hated what was going on in society, and the sheer degeneration of people.

Through reading a range of materials in the last year or so—spiritual and religious texts, Nietzsche and other philosophers, red pill material, and novels from both the current day and many generations ago—I have started to form a world view that is more in touch with reality than the one being pushed today. I see the reality of human existence and biology more clearly, and can make conscious decisions about what to allow into my life, and what to eschew.

None of the above would be possible if I was still in the mode of “the more girls I can get, the more meaningful my life will be”; something that many men live by today, whether consciously or unconsciously.

So, stop thinking that today’s women will give you and meaning and fulfilment; by all means get your biological needs met, but look deeper in yourself, transcend this generation and culture, and live in a way that would give you true meaning in any era.

This barren time may seem hopeless, but it is an opportunity to become spiritually, physically and mentally stronger than you ever thought you could be.

8 Steps To Mastering Money So You Don’t Go Broke

July 2, 2018 | by Howard C. Roark | Link | Original Link

In the consumerist society that we live in nowadays, we are constantly being tempted by advertisements and the best marketing strategies out there to tempt us to spend our money on foolish things. It’s hard to save money, after all, we are constantly showered with propaganda to spend all of it. What would be the best way to save? Below I will give you some advice based on what i learned in the School of Hard Knocks.

1. Save while you are young—afterwards it gets harder

He that is slow to wrath is of great understanding: but he that is hasty of spirit exalteth folly – Proverbs 14:29

Saving is the first and most important principle of having success with your money. John Jacob Astor once said that it cost him more to get his first thousand dollars than it did later on to get a hundred thousand; but if he had not saved that first thousand he might have died in an almshouse broke, sick, sad and alone.

When we are young and don't have as many responsibilities as an adult, it's way easier to accumulate wealth. As you grow older and have to pay bills or support an entire family, it gets harder. If you're still living with your parents and not paying tuition, this is the best time to save your capital.

This is why I think it's such a shame to see our youth recklessly spending all their earnings in futile things such as video games, electronics, gold diggers, or brand new cars. If only they knew it would be much harder to save later on in life, maybe they would be more careful with they dimes. They should leave their desire to have the fanciest truck or biggest house for later on in life when money is no longer an issue.

2. Instant gratification will cost you later on

Every prudent man dealeth with knowledge: but a fool layeth open his folly. – Proverbs 13:16

We all love to have neat stuff to show off and to increase our quality of life. However, it's important to keep in mind that we can't have the best of everything. Our money is a limited resource.

Lacking self-control and long-term strategy with your money can be extremely detrimental to your financial well-being. I recommend you to pick only one or two things that really matter, such as investing, and not spend much on anything else in case you want to save part of your money.

3. Stop living paycheck to paycheck

There is treasure to be desired and oil in the dwelling of the wise; but a foolish man spendeth it up – Proverbs 21:20

Living paycheck by paycheck is a big sign of inability to plan ahead. It's not safe at all. How many times have we met someone who ended up broke and poor because he was fool enough to never consider that his financial situation could change at any moment.

It’s smart to save for an emergency, such as being fired or a salary reduction. Never spend your entire salary always save a bit for emergencies or a long term goal.

4. Avoid lending to unreliable people even if they are close to you

Let him that stole steal no more: but rather let him labour, working with his hands the thing which is good, that he may have to give to him that needeth – Ephesians 4:28

Well, this one is obvious. If you know someone who has the reputation of always asking for money to borrow and never paying back, you’re dealing with an impulsive person that suffers from an inability to plan ahead. Unless you won’t mind not seeing your money again, under no circumstances lend to this kind of individual even if they are close relatives.

If you feel sorry for them the best way to help them out is to offer them to run a small errand for you in exchange for money or point to them their lack of ability to manage their own capital.

5. Never get into debt

Owe no man any thing, but to love one another: for he that loveth another hath fulfilled the law – Romans 13:8

Tightwads might live boring lives due to their obsession of always saving to the point of never using part of their money to have a break and enjoy a bit of the wealth they accumulated. They do all of this with the hopes of achieving prosperity when they older. Nevertheless, if there is one thing they are good at, it is that they never allow themselves to fall into debt.

Loading...

Luckily, I've never got into debt. However, I've seen how sad is the state of those who do. They're always worrying and have no ability to take back control over their lives.

If you don't have money, then don't buy. It's as simple as that! Avoid borrowing or buying what you know you can't afford! Apply thrift to your money.

6. Make your money work for you

Do not become Uncle Scrooge. Saving is not the fastest way to accumulate wealth

Some people go through their entire lives being tightwads, thinking that it's going to make them rich and happy later on, only to find out later that they sacrificed precious years of their life that they could have traveled and risked some of their money to bring prosperity early on in their lives. After all, it's not fun at all to be rich when you are in your 80s.

This is why you need to find a way to make passive income as soon as possible. Learn as much as you can about copywriting, marketing, computer programming and lastly, learn about farming and breeding animals as well. It can be a very profitable business.

7. Be realistic

Let your conversation be without covetousness; and be content with such things as ye have: for he hath said, I will never leave thee, nor forsake thee – Hebrews 13:5

Lets face it: just because you save your money regularly for a retirement plan, investing, or planning to start an online business to have a passive income, it doesn't mean that you are going to get rich.

I'm not trying to discourage you of following your dreams, but what I'm trying to ask you is to be realistic and not set your expectations too high. Few people are able to make a living off their hobby or retirement savings and those that do took years of sacrifice, commitment, and a lot of patience.

8. You will always regret some of the investments you made later on

Give a portion to seven, and also to eight; for thou knowest not what evil shall be upon the earth. Ecclesiastes 11:2

Like life regrets and relationships regrets, every now and then we also change our minds about how we should've spent our "moolah". This will always occur no matter how much of a tightwad or thrift consumer you are.

Have you heard of the old saying, "Don't put all your eggs in one basket?" Well I would

change it to “Don’t put all your money in one goal/investment.” Whether it is a savings account, business plan, college fund, or retirement accounts, they can all fail or be spent in something that you can consider later on futile. What you think is worth investing your money and time right now might turn out to be a bad idea.

As you get older, you will change your mind about several things. Your tastes will change, but you will get more experienced in knowing when your brain is just over-hyped about buying something or when its really important to spend money on it.

Conclusion

Trust not in oppression, and become not vain in robbery: if riches increase, set not your heart upon them – Psalm 62:10

While the steps described above won’t guarantee that you become the next millionaire, I can promise you that they will give you a life free of debt and less worries. You will certainly be more prosperous and guarantee a more dignified life for you and your family, in case you decide to start one.

12 Photos That Reveal How Degenerate Soccer Has Become

July 3, 2018 | by John Carver | Link | Original Link

The British have a famous saying when it comes to comparing their two most famous homegrown team sports (Association Football and Rugby Union) when they are played on home turf. Football is “a gentleman’s game played by hooligans” while Rugby is “a hooligans game played by gentlemen”.

The comparison was always meant to be tongue-in-cheek, but when you look at a modern day professional soccer pitch (sorry British readers, I’m going back to Americanisms now), it doesn’t appear to be highly distorted from reality. Soccer stars are plastering themselves in copious amounts of jailhouse ink, and this will have disastrous consequences for a whole new generation of young people around the world who idolize these men.

The current World Cup in Russia is beaming this whole new level of degeneracy right into the living rooms of 14-year-old Thiago in Brazil, 16-year-old Pedro in Mexico, 13-year-old Ivan in Russia, 15-year-old Giuseppe in Italy, and countless other easily-swayed young minds across the planet. Let’s take a look at what we are dealing with shall we.

1.

These aren’t photos from the World Cup, but this clearly shows how international superstar Lionel Messi actually had more brains in his 20-something youth than his jailhouse tattooed and peroxide-blonde early 30’s carcass on the right.

2.

Have no fear, fathers-with-daughters and employers of the world. For this Brazilian man is “spiritually in tune”.

3.

Lionel Messi and Marcus Rojo. Giving their young fans in Buenos Aires and Rosario a good idea of how they can spend their pesos before sky-high Argentinian inflation eats it all up.

4.

Mexican players disembarking from a plane in Russia, with the man on the right looking like he'd fit right in with MS-13 once his career is over.

5.

The current Brazilian squad is so inked up, it’s almost counter-culture to **not** have a tattoo.

6.

I hope that Spanish man’s not looking at them like he’s considering it for himself…

7.

Mais tinta Brasileira! (**More** Brazilian ink!)

8.

Not in the World Cup, but if David Beckham is declared “sexiest man alive” while famously having over forty tattoos, you know a lot of his imitating young fans—and their future employment prospects—will be in for a world of hurt.

Loading…

9.

Even the Belgians are waffling up their arms.

10.

A substantial injury forced the English player Ryan Mason into “soccer retirement” at the premature age of 27 (in lieu of 33 or so), but he’s still probably sporting this bizarre looking tattoo of a grumpy harridan.

11.

“What’s that? You’re one of my biggest fans and your having trouble finding a living wage job? Only a part-time gig at Starcucks is offering? How can that be?”

12.

Non-white “English” star Raheem Sterling showed off this poor taste tattoo to his 3.6 million Instagram followers before the World Cup. It looks like something Carl Johnson could get at the tattoo parlor in Grand Theft Auto San Andreas.

Conclusion

As expected, perennial ROK favorite Japan is keeping it clean.

Soccer stars have incredible agency and sexual market value through their fame, fortune, lean physiques, and being in the prime of their adult life (20-35). ***They've got it all.*** So by all means, they can afford to be covered in tattoos without far-reaching consequences to themselves, their relationships, or their financial prospects.

However, once upon a time, sports stars were encouraged to be good role models to young people, and expected to have a clean and friendly image both on and off the field of play. Having tattoos even as recently as the 90's would have been highly discouraged.

The fact of the matter is that many young fans will aspire to be like their favorite player, and yet 99,999 out of 100,000 will not make any kind of headway in the world of professional soccer. They are going to have to (for lack of a better word) look for "normal" jobs one day, and we've explored the dangers and red flags behind tattoos countless times before.

Heck, even the players should avoid tattoos for the sake of their own abilities. There is some evidence to suggest that soccer players suffer a 3-5% drop in performance level after having tattoo work done.

How “Sexual Harassment” Evolved Into A Witch Hunt

July 3, 2018 | by Beau Albrecht | Link | Original Link

Bill Clinton, Ted Kennedy, and Dan Quayle were in a spelling bee, and Quayle won because he knew that “harass” was one word, not two.

So that’s an old joke, but the subject is pretty serious. First of all, what exactly does harassment mean? The definition is remarkably fuzzy after evolving over the years.

Legal precedents

Originally, only “quid pro quo” offers were forbidden. That means employment or favoritism in exchange for sex. For example, one of my former colleagues had a salary nearly 50% higher than mine. I was busting my ass every day, though I had no idea what her job involved. Later, I found out that the district manager banged her. Was she exploited? Mainly the joke was on the company paying her a hefty salary for doing probably nothing.

This is reprehensible conduct. People shouldn’t have to compromise themselves for employment. On the other side of the coin, if the offer is accepted, it’s essentially soft prostitution. So the boss is a sleazebag and his employee is a hooker. However, it’s enforced like prostitution laws in Sweden and Canada; only the “johns” risk getting busted.

Later, a Supreme Court case ruled that a *hostile work environment* constituted illegal discrimination. What the plaintiff had endured on the job was disgusting. I’m not a lawyer, but it was already illegal for three reasons that I can see. Despite that, the Court created

a new frontier of the law, eventually becoming a bonanza for attorneys.

The definition of “hostile environment” they created is fairly blurry, depending on the “reasonable person” doctrine. The Court should’ve known that the law is a blunt tool, and that enforcing matters of propriety and taste is very tricky. During the previous decade, they’d effectively capitulated on pornography, allowing it to become mainstream. Obscenity failing the “Miller Test” is still technically enforceable, but authorities seldom bothered after the 1980s. Meanwhile, the hostile environment doctrine started expanding, eventually enforced to the point of scrupulosity.

Does saying “nice dress” create a hostile environment? A reasonable person would laugh at that, but lawyers might launch a DEFCON1 lawsuit. Technically, only acting like a pig should get anyone in trouble. However, throwing an employee under the bus for the tiniest peccadillo becomes an expedient measure. Another preventative measure is not hiring women.

Clarence Thomas

No, not this Anita!

The Clarence Thomas brouhaha became the mother of all media circuses. It was a fairly normal Supreme Court nomination until National Public Radio intervened, and you know what *that* means. NPR’s Nina Totenberg revealed a leaked sexual harassment allegation. Insider information reported by the media can be rather dodgy; “anonymous sources in the Pentagon” could mean a general, the janitor, or the reporter’s fertile imagination. Even so, there was a real person behind it, and Anita Hill took the stage.

Following that, this politically-charged event became a classic “he said / she said” case, where neither side really could prove anything. Did Clarence Thomas formerly talk about dirty movies, Long Dong Silver (a porn star with a prosthetic shlong), or a pubic hair on a soda can? Even if nothing was embellished, Anita Hill wasn’t too offended to follow him to his next job in the EEOC. There, he promoted someone else as his chief of staff instead of

her. *Perhaps that's when the jokes he used to tell stopped being funny retroactively?*

Still, all that took place (or not) before the "hostile environment" doctrine was developed. This type of workplace douchebaggery was handled by ordinary disciplinary processes, and wasn't a special category that could launch a DEFCON1 lawsuit. Therefore, he was criticized on *ex post facto* standards about his alleged bad jokes. He had to play the race card to escape the "high-tech lynching". As far as dirty tactics go, it was basically fighting fire with fire at that point.

In the wake of that, flirting at work became taboo, even when it was well-received. Following the sexual revolution, society had gone through a tremendous cultural shift. By the 1990s, morality was optional; basically "anything goes". However, the workplace was now a special exception, where conditions reverted to Victorian standards.

Loading...

Bill Clinton

How about some dictation lessons, Monica?

A much larger brouhaha began when Bill Clinton got busted for hanky panky at the Oral Office. Granted, his presidency was one scandal after another, from the travel office business in the beginning to pardoning deep-pockets contributors in the end—not even to mention his earlier career. "Loose cannon on deck" is one of the nicer ways to describe him.

This certainly wasn't the only bimbo eruption, but "Fornigate" spun out of control because the evidence was overwhelming. All plausible deniability was shot to hell when the blue dress tested positive for residue of Big Mac sauce. Several people who Clinton got to be character witnesses for him—including Al Gore and even Cupcake herself—ended up looking pretty silly. Still, the impeachment was close, but no cigar.

Chubby Bubba only escaped it because Democrats circled the wagons. (Better yet for him, the year of wrangling left everyone too exhausted to investigate the far more serious charges by Juanita Broaddrick.) Throughout, the Democrats were in a bind. By their standards, workplace nookie was strictly forbidden. A few years ago, they'd tried to

shoot down Clarence Thomas merely for bad jokes. Further, they were shackled to the ball and chain of feminist ideology, a major constituency.

This further reinforced the taboo against workplace relationships. However, Republicans weren't making a crime of getting BJs on the clock. *The problem was Clinton lying under oath.* Many Democrats argued that it wasn't really a big deal; it was only about sex. However, this position never became a permanent revision to liberal doctrine. Because of this omission, an even more noxious leftist (a pretty tough act to follow) would find himself hoisted on his own petard much later.

It goes nuclear

This is the wrong way to fertilize potted plants.

In 2017, Harvey Weinstein got busted for acting like a pig. Still, that was business as usual in Hollyweird; for decades nobody did anything about it until his movies started bombing. (His weird political posturing probably didn't help.) All his feminist street cred counted for nothing.

After that, the #MeToo movement settled many old scores, and eventually became a witch hunt. Several more liberal celebrities became friendly-fire casualties of feminism. Political figures were targeted too: Roy Moore, Jesse Jackson, Carl Sargeant (driven to suicide), and even Bush the Elder. Actual harm to the complainants was often absent, likewise real evidence.

Still, it's unclear why this merits a special category. Hostile environments certainly can happen without any sexual element. Workplace bullying is serious business too. I've been sexually harassed on the job—so yeah, "me too". Being approached repeatedly by the ugly bisexual CEO was grotesque. Still, one of his underlings constantly screaming at me

was far worse. When she got me fired, no longer being forced to tolerate her bipolar issues was a blessing.

It’s perfectly legal for mentally unstable supervisors to berate employees daily and threaten their livelihood. That’s quite common in “kiss up / kick down” corporate cultures. If saying “nice dress” is worse and needs special protection, then someone should explain why.

Female Prison Guard Fights Back Against Being Objectified By Becoming A Porn Star

July 3, 2018 | by News Syndicator | Link | Original Link

Via The Mirror:

Isabelle Deltore knew she was good at her job as a prison officer, but she still wasn't completely happy.

She was fed up with the violence and office politics, but there was one thing that bothered her more than anything – the way the male prisoners looked at her.

So she decided it was time for a change and started paving the way for a drastic career move.

"I was constantly being objectified and was like 'why not make money out of it'?", she told news.com.au.

She decided to try stripping and immediately fell in love with it, quickly realising she could make more in one night than she did in two weeks at her day job.

Isabelle, who lives in Melbourne, Australia, handed in her notice and hasn't looked back since.

Since then she's been on the front of several adult magazines, had her own calender, runs a successful adult website and been named Miss Nude World twice.

She took the sash back in 2015 and she's now been named the 2018 champion.

She said: “With my current line of work everyone knows what’s on the table. If they want to buy a lap dance, well here are the boundaries, we’re exchanging money for it so it’s very out in the open.

Loading…
“Previously I would complain if I had some officer or prisoner make a pass at me. Now I’m much happier and my self-esteem has increased.”

But she claims her experience as a prison guard has helped her when dealing with some difficult customers in her new career.

Would you bang?

During her time in jails she would manage between 20 and 40 inmates so she knows how to be assertive without being aggressive.

Since quitting she claims she’s seen several ex-inmates at her shows, and enjoys seeing them trying to work out where they know her from.

“My” Rape

July 4, 2018 | by Mitch Smith | Link | Original Link

Four out of the last five girls I went out with told me they were raped. And two of them told me this within the first week of dating.

One girl said, “My rape happened during freshman year.” As if she knew that every other girl I was hanging out with had also been raped. As if all girls were raped. As if rape was happening everywhere. As if right at that moment there was probably someone being raped out in the parking lot while we sat at the bar and drank our beers.

She of course expected me to frown and nod and be worried and concerned for her. Which I was, because what the hell else was I going to do? I was also worried and concerned I was on a date with her. What kind of nutjob says something like that to someone they barely know?

I began looking around the bar. Which of these people could be a witness to the fact that I had NOT raped her? How was I going to politely wrap this up and get out of here? Maybe go to the bathroom, climb up on the back of the toilet and crawl out that little window? But that might be a form of rape. It probably is.

Date escape

The next time this happened, I handled it better. We were on a second date at a dumb Japanese restaurant. When she dropped the R-bomb, I maintained a firm and neutral demeanor. I did nothing and stared down into my thirteen dollar bowl of ramen noodles. Then I changed the subject by cleverly taking one detail of her rape (in a youth hostel in France) and asking her something about it. “Really? You got raped in France? I heard they have good wine there. They say the cheese is awesome.”

The way these girls talk about “their rape”, it’s like their pet, or their imaginary friend, or some sort of bauble they can show off to each other. These girls must get together to talk about their rapes. In the old days girls gathered to compare notes on their boyfriends:

“Mine snores.”
“Mine smells bad after he eats Doritos.”
“Mine falls asleep still on top of me.”

Now they gather together to compare and contrast their rapes:

“Mine was in a youth hostel in France.”
“Mine was my best friend.”
“Mine was with my boyfriend, after we broke up.”

Loading…

My rape happened in the top right bunk

Women do this to compete with each other. Whose was the most embarrassing rape? Who was raped at prom? Whose been raped by a famous person? Being raped by a famous person is like having an ace in the hole in poker. If you've been raped by a famous person, hold back for a while before letting everyone else tell their story and then BAM you smoke everyone with your incredible rape story by a real celebrity. (Of course you let him have sex with you, but if he hadn't been a celebrity, you probably wouldn't have, which is rape.)

Obviously, this phenomenon is all about the redefinition of the word "rape," which now means "sex," or actually just the word "no," since you can be raped by hostile words or inappropriate staring or someone following you home, even though he wasn't following you home—he just happened to live in the same neighborhood and was going to the same store.

Women are literally out of their minds at the moment. How do we re-attach them to reality? Oh right. They were never attached to reality in the first place.

Of course, everything they know about rape they learned in college. When I gently suggested to one of my dates that an incident she described might not be rape, she told me, that no, it was definitely rape because “rape isn’t about sex, it’s about male power,” she knows this for sure, she told me, because she took a class in it.

I’m sorry but my definition of rape is when a man forces a woman to have sex against her will. But that’s just me. I’m old fashioned I guess. In the meantime guys, better work on your “rape face.” A lack of concern for past rapes may constitute rape.

10 Things I Use Every Day

July 4, 2018 | by Roosh Valizadeh | Link | Original Link

I want to share ten products I use every day that make my life a tad more comfortable, productive, or enjoyable.

1. ASUS ZenBook UX303UB

All my work is produced on this. It’s fast, lightweight, has a long battery life, and reboots in seconds thanks to a solid state hard drive. I would say it’s even too powerful for my

main application of writing and browsing the web.

There are a couple of downsides. First, the trackpad is clumsy so I feel compelled to use a wireless mouse. Second, there is a production flaw that creates a noticeable bulge on the left side of the keyboard (I've seen two laptops of this model with the problem). This causes impressions of the keys to be left on the screen. Lastly, it has Windows 10. It took me a week of hacking to add features that I used on Windows 7.

Click here to view on Amazon.

2. Samsung J7 Smartphone International Version

The best thing about this phone is that it has dual SIMs and manages to get an H+ data connection (a speed in between 3G and 4G) within any country I visit, unlike non-international phones that may only get 2G. I leave my phone on for twelve hours a day and from that I get four days of use before having to recharge. If I could do it all over again, I'd buy the J5 version that has a smaller screen to make it more convenient to put in my jean pocket.

Click here to view on Amazon.

3. Bread Machine

I've been making my own bread for one and a half years. While I don't make a loaf every day, I do eat my bread daily. The recipe I use calls for a mixture of white and rye flour to get the texture and taste that I prefer, with low amounts of salt and sugar. There are many bakeries near my apartment that has fresh bread, but I get a humble satisfaction from eating my own.

Click here to view on Amazon.

4. Panini Maker

For lunch I take two slices of my bread and make a ham and cheese sandwich with a panini maker. I then top it off with two fried eggs. I don't know why, but a panini maker significantly enhances the taste of a sandwich when compared to using a normal toaster oven.

While many people get tired of eating the same food every day, my lunch is usually the highlight of my day. No matter where I am in the world, or what troubles I have, my lunch offers me a feeling of stability and comfort.

Click here to view on Amazon.

5. Bosch Electric Kettle

I had never seen an electric kettle until I left America. Before that, I'd put water into a stove top kettle and wait for the whistle. Or when making pasta, I'd put water in the pot and wait for it to boil. Europe has rid me of these barbaric practices.

My electric kettle can heat a cup of water in less than a minute. When cooking pasta, I boil the water in the kettle first to save time. Whenever I go back to the States and see my mother using a stove top kettle, I cry for her on the inside. I bought her an electric kettle, but she's too old to change her ways.

What I love about this kettle is that it can heat water at temperatures below 100 degrees. This is perfect for green and white teas that should not be used with boiling water.

Click here to view on Amazon UK.

6. Butter Tray

Loading…
For most of my life, I was content with taking a stick of butter from the refrigerator, unwrapping the plastic, cutting off a pat, re-applying the wrapper, and then putting it back into the refrigerator. This is acceptable in America where a stick of butter is small, but in Europe the butter doesn't come in sticks but huge rectangle bricks.

European butter bricks take so long to finish that the wrapper becomes a greasy mess after just a few uses. After shopping around three stores in my area, I found a butter tray with a metal base and clear plastic top. It's now such a pleasure to use butter in my cooking.

Click here to view on Amazon.

7. Simply Noise

I have severe sleep problems. First, my body clock seems to be based on a 25-hour day, which means that if I solely listen to it on when to sleep and wake, I will soon go to bed in the morning and wake up at night. More severely, I am an exceedingly light sleeper—far lighter than a cat—even though I can fall asleep quickly. (One benefit of being a light sleeper is that no girl has successfully robbed me.)

In Europe I live in a shabbily constructed apartment building where I can easily hear my neighbors. In fact, I can hear them talking right now as I type the draft of this article. So they don't wake me up at 8am, I put on brown noise from SimplyNoise every single night before going to bed. The noise is loud enough to mask my neighbors, but it doesn't interfere with my sleep.

Click here to visit.

8. Cheap Nightmask

Girl included

I don’t like the light, especially since I prefer to wake up at noon or after. I sleep with a cheap nightmask that I buy in packs of ten. Each one lasts about two months. With my white noise and nightmask, I have to debrief women who sleep over that the experience will be a bit different from the hundreds of other men they’ve been with.

Click here to view on Amazon.

9. Baking Soda

Seven years ago I discovered how baking soda acts as a strong deodorant. I still use it every day after showering by applying a fingertip worth onto my armpits. A $1 package lasts me two years. For many men, baking soda was the first red pill they took.

Click here to view on Amazon.

10. Sensor Excel Razors

I like having only two razors because it’s easier to maneuver around my face. Two razors is like a sports car while three razors or more is like a family minivan. I don’t have a corporate job so I don’t need a close shave to appease anyone. Unfortunately, in the past few years it has become impossible to find these razors in a normal store, so I usually order them in bulk online at a premium markup.

Click here to view on Amazon.

There are many other things I use regularly, such as a lint roller and Amazon Kindle, but not daily like the items above. As you can see, I have a simple life, and I hope I can keep it that way.

6 Reasons Why Rio De Janeiro Sucks

July 5, 2018 | by Howard C. Roark | Link | Original Link

If you are planning to travel to Brazil, you might want to look for another city to stay. Rio de Janeiro is no longer the paradise that it used to be.

How the mighty have fallen! A city once famous for its pretty girls, great beaches, beautiful views, and friendly people is now a shadow of its former self. Decadence lurks every street corner of Rio. It is no longer the jewel of Brazil and South America as it used to be in the 80s. Nowadays, Rio de Janeiro is a city ridden with crime, violence, corruption, greedy politicians, poverty, and crooked entrepreneurs trying to take advantage of the poor and naive. Here are six reasons why the city is no longer worth a visit…

1. Girls Are Self-Centered And Lacking In Christian Values

Living between TV stars and being considered as Brazil's postcard has taken its toil in the expectations cariocas have about life

I believe this applies to almost all good looking girls, since Brazilian women have the reputation of being among the most attractive and enjoyable in the world. But when talking about cariocas (Brazilian girls born in Rio) their ego-centrism can reach new heights.

I don't like generalizing, but unfortunately they are more narcissistic than girls from other regions. This is due to the fact that Rio de Janeiro is considered the postcard of Brazil. Plus it doesn't help that all of Brazilian mainstream media headquarters and movie studios are located in this city. As a result, most of the local population want to have the same lifestyle as that of the local stars and entrepreneurs.

Carioca girls constantly dream about glamour and the material things they see these TV stars possessing. They act like girls from LA and tend to be way more ego driven than Brazilian girls from other regions. They dream of fame, wealth, and plastic looks. This phenomenon can also apply to a lot of low-T men from here .

Your gringo card will help you score a few extra points than the locals when you first start approaching, but if you are not rich or didn't master your game skills, you can forget about dating them, even if you are good looking. You will have to settle with the more average looking girls.

2. It's Too Militarized And Violent

[image]
Welcome to Hell de Janeiro! Enjoy your stay!

Shootouts between the police and gangs happens daily to the point that the local

population is used to hearing gun shots all the time. Early this year, criminality and street violence got so high and uncontrollable that the city declared a state of emergency. The solution that the president and the Congress decreed is military intervention for the city as a desperate attempt to bring back law and order.

Street gangs, mafias, and paramilitary groups that live hidden in favela slums are usually better equipped than most cops thanks to our corrupt politicians, who misappropriate public funds that should've been destined to give better equipment to the police. Nevertheless our greedy politicians don't give a damn.

3. You Have No Right To Self Defense

Brazilian Federal Police taking away guns from the Population and destroying them in 2003

If you are an American, after hearing all of this you might be wondering, why the heck the population don't buy guns to defend themselves?

Loading…

Well we used to be able to until a Populist Socialist party called the Workers Party, and a communist president named Luiz Inacio Lula da Silva, took control of the country in 2001 and banned the right of self-defense and to have guns. This communist party took control of the state and brainwashed everyone into thinking guns are "evil" to make it easier for them to seize control of the country, but this is a story for another article.

Now, the right of self-defense is a luxury that only our military, police enforcement, crooked entrepreneurs, wicked TV stars, and our beloved corrupt politicians hold. It's still possible for the average citizen to have the right to bear guns, but they make it expensive and bureaucratic, to the point that you need to allow the government to invade your privacy and property whenever he pleases. And you are still only allowed to carry and use your weapon inside your property, thus making impossible for the poor citizen to

have one. If you are caught using an unregistered weapon without a license, you can face up to four years in prison.

4. The Infrastructure Is Third World

Traffic jams are very common in Rio de Janeiro

Politicians, crooked entrepreneurs, lazy city managers—you name it, Rio got it! As hilariously as it may sound, considering that Rio is considered as Brazil's postcard, the city is poorly managed which, as a consequence, reflects on the lack of a good infrastructure. Traffic jams along with crowded and inefficient public transportation is all part of daily life.

5. Criminals Are Everywhere

Can’t even wait to steal some “moolah” from these stupid gringos hahahahahah!!!

From street artists begging for money to vagabonds threatening to scratch or smash your parked car if you don’t “give” them money, Rio has an insane amount of street thugs trying to take advantage of gringos who lack street smarts.

Let’s also not also forget about our beloved dishonest local store merchants charging extra for gringos and Brazilian tourists from other regions. They are so desperate to get some extra moolah that they don’t mind taking advantage of their fellow Brazilian brothers from other regions as well. This all happens very frequently in the streets of Hell—oops I mean Rio de Janeiro.

6. It’s An Extremely Expensive City

Living in Rio de Janeiro can be very costly. Unless you earn dollars or Euros, it’s hard to afford rent outside of favela slums that ridden with gangs, street violence and paramilitaries groups. Outside of the slums, prepare your pockets for insanely high Singapore-styled taxes and bills for everything. This applies to other big cities in Brazil as well.

Consider that having an apartment or house in a good neighborhood can cost up to 2 million dollars. Also there is even an additional tax you have to pay each month if you have a front beach property. This applies to all states in Brazil. Yes you heard that right—our beloved government and entrepreneurs are very creative when it comes to finding ways to rob us more.

Conclusion

Trash floating in sunny Rio de Janeiro. Hmmm sounds like a nice day to take a dive….

Unless you want to have relive the experience of living in Chicago during the prohibition-depression era, I recommend you to stay out of Rio de Janeiro and visit other parts of Brazil.

To sum it up for the conservative Christian men out there looking for a loyal wife, or for the young man just "wanting to have some fun," Rio de Janeiro is no longer a recommended destination at least until the high criminality and street violence situation improves.

If you still want to visit Brazil you are better off going to Southern Brazil or small towns. While I can't guarantee you that every girl will be more virtuous and less degenerate, the more southern you go, the more good looking and respectful women get. Rio de Janeiro is far from the paradise that American TV movies and children's animations such as Rio portray it to be.

The Link Between Your Testosterone And Sexual Attractiveness To Women

July 5, 2018 | by Mo Saleem | Link | Original Link

Seventy-six men were brought into a lab in pairs and instructed to compete for the attention of an attractive female confederate. As it turned out, the men's testosterone levels directly tied with their expression of dominant behavior and with how much the female confederate indicated that she "clicked" with each man.

Researchers from the study concluded:

> These findings provide novel evidence linking T with evolutionarily adaptive behaviors in humans and suggest that T interacts with people's explicit dominance motives to regulate behaviors that enhance mating success.

That's all good and well, but we can't extrapolate the results from this study because they observed the preferences of just one woman. To define the relationship between testosterone and attractiveness, we've got to dig deeper…

Testosterone and Facial Masculinity

Studies have found testosterone levels to directly correlate with perceived facial masculinity.

A square jawline, a chiseled face, and tight cheekbones – all signs of high T.

In this study, researchers constructed pairs of digital composites from the faces of men with high and low testosterone. These composites were then presented to subjects who were assigned the forced-choice task of assessing the masculinity of the pairs of photographs. Across the board, the photographs from the high testosterone composites were judged to be more masculine than the photographs from the low testosterone composites. The attractiveness of the faces, however, were open to interpretation.

Women assess a man's attractiveness based on whether her goal is short-term or long-term mating. In this study, researchers tracked the possible facial cues in men's faces that women use to assess attractiveness. Here's what they concluded:

> Men's actual and perceived affinity for children predicted women's long-term mate attractiveness judgments, while men's testosterone and perceived masculinity predicted women's short-term mate attractiveness judgments. These results suggest that women can detect facial cues of men's hormone concentrations and affinity for children, and that women use perception of these cues to form mate attractiveness judgments.

In other words, when a woman's goal is short-term mating she goes for the man with high testosterone. When her goal is long-term mating, she assesses how interested a man may care for infants.

And this leads us to the question…

How Would You Define An Attractive Man?

Loading…

You might say that an attractive man is one who is strong, assertive, dominant, and sure of his path and purpose in life. I agree. But to break it down from an evolutionary standpoint, the traits we consider attractive are simply those that enhance our chances of survival and reproduction.

So the question to ask is:

> *What traits in a man would a woman seek out in order to enhance her own (and her offsprings) chances of survival and reproduction?*

Confidence, strength, and decisiveness are definitely traits that factor in, but in his exhaustive 20-year cross-cultural analysis, Dr. David Gilmore makes the case that all masculine traits fall under the umbrella of three larger traits that embody what it means to man. These three traits, as Gilmore writes in his book *Manhood In The Making,* are 1) Protection, 2) Procreation, and 3) Provision. Let's go over each of these "P's" one at a time.

How Testosterone Factors In To The 3 P's Of Masculinity

The 3 P's of masculinity explore the big picture of what it means to be a man across all cultures. As you'll see, testosterone is a major driver in the expression of each of them.

The first "P" is protection. As Dr. Gilmore writes in his book, the essence of *protection* comes down to the need to "establish and defend boundaries." A man must be able to draw the line between safety and danger. If that line is crossed, he must have the ability to spur into action and defend his family and tribe against outside threats. It's plainly obvious how testosterone factors into this – a man with low testosterone will not have the strength, endurance, or mental fortitude to deal with outside threats (if you're wondering what defines an "optimal" T-level, check out my ultimate guide here).

The second "P" is procreation. This trait requires for a man to successfully pursue women and spread his seed. Testosterone is a biological determinant of this trait. Without optimal T-levels, a man lacks the potency and virility to actually "get it up" and sexually satisfy his woman.

The third "P" is provision. A masculine man provides the majority of resources – whether financial, emotional, spiritual, economic, etc. – for the sustenance of his family and tribe. Once again, you can see how testosterone factors in – without optimal testosterone production, a man will lack the motivation and drive to provide.

Conclusion

In essence, higher testosterone levels make a man more masculine – this point is undisputed. In general, women find masculine men more attractive. But in reality, it will vary on a case-to-case basis depending on whether a woman's goal is short-term or long-term mating.

Feminists Shut Down Advertisement Of Man Politely Explaining Things To Women

July 5, 2018 | by News Syndicator | Link | Original Link

Via ABC News:

An advertisement outside a future university building in Adelaide [pictured above] which attracted big criticism on social media has been replaced just days after making international headlines.

The ad hoardings outside the old Royal Adelaide Hospital (RAH) site featured an image of five women surrounding a man talking with his arms raised.

It wasn't long before the image circulated online, with many describing it as "mansplaining".

Ad removed from hoarding

The controversial ad — which belongs to Renewal SA — has been replaced with an advertisement for an open day.

The replacement sign depicts the words "experience the new creation and innovation neighbourhood" in an advertisement for a former RAH site open day to held on July 11, featuring demolition tours, virtual reality, 3D printing, immersive art and robotics.

Renewal SA is the State Government's development body responsible for projects including the old RAH site.

A spokeswoman said the photograph in discussion "was taken from a series of

engagement workshops held with real university students to showcase talented students actively expressing ideas for the future of the old Royal Adelaide Hospital site".

"The image taken was not a staged photo shoot, and intended to help promote the site and attract future business leaders, entrepreneurs, and start-ups to be a part of Australia's first creation and innovation neighbourhood," the spokeswoman said.

"In recognition of the personal impact of the social media speculation for the individuals in the image, the image was replaced with details about the upcoming open day, on Wednesday 11 July.

"The images on the hoarding boundary are expected to change over the evolution of the project to reflect our continuous engagement with stakeholders, community and on site activation experiences."

'Master of mansplaining' post made international headlines

Mansplaining's misogynist cousin, manspreading

The advertisement was noticed around the world with one of Britain's highest-circulating newspapers, Metro, and the BBC both reporting on the ad.

Loading...

A photo of the advertisement hoarding was posted on Instagram by a local parody social media account which commented that the "innovative education precinct" now appeared to be offering a "Master of Mansplaining".

The term 'mansplaining' is widely used to refer to a man explaining something to a woman in a way that is considered patronising, arrogant or condescending.

The Instagram post received more than 400 comments with many of those criticisms of way the ad had condoned 'mansplaining'.

"What the hell were they thinking with this photo?" one user said.

"How was this image approved?!" another user said, while another suggested "it was a

room of men who came up with that ad".

Others were not as unforgiving, with some adopting a more irreverent tone.

"How do you know it is a man? How can you decide gender by appearance?" one said.

Many users also thought the post was being taken too seriously.

"I cant believe a simple joke turned out this way. Original post was hilarious and shouldn't have been taken so seriously," one user said.

University distanced itself from ad

The University of Adelaide distanced itself from the advertisement and a spokesperson said it would not be commenting further following its replacement.

Over the weekend a spokesperson said the ad was not linked to the university, and the people depicted were not from the institution.

"The hoarding in which that image appears belongs to Renewal SA, not the university," the spokesperson said last weekend.

> "The photo of the hoarding has been deliberately angled and cropped to suggest that the image is directly related to the university, which it is not.

"Our logo is part of a separate image, which has been cropped out.

"The photo in question on the Renewal SA hoarding is not a university image. It was not supplied by us. It was not approved by us. The people depicted in that photo are not university people."

3 Examples How Persons Of Color Appropriated Other Cultures

July 6, 2018 | by Larsen Halleck | Link | Original Link

About a year ago, I did an article on the topic of the dread “cultural appropriation”, that longstanding claim that all white culture consists of things “stolen” from noble, benighted People of Color. While that has certainly happened in the past, I discussed several instances in which the reverse is true and people of color appropriated things from the blue-eyed devils.

Since that was a lot of fun, let us go over a few more more examples of cultural appropriation that went from white people to non white people…

1. Dreadlocks

Yes, true believers, the hairstyle known as the dreadlock, often associated with the Rastafarian religious sect, where it is worn to symbolize the Lion of Judah (i.e., the holy lineage ascribed to Menelik I), did not, in fact, originate in Jamaica or any other part of the Caribbean for that matter. And it is here that I must make a clarification in that while this hairstyle was not invented by the black man, it wasn't entirely invented by white people either, or at the very least, any group of people that folk ethnography would classify as "white".

The earliest evidence that is known of this hairstyle comes from India, as a matter of a fact, where they are known as *jaata* and worn by sadhus and hermits and other devotees of Shiva. But speaking of whitey, the Minoans and other ancient Peloponnesians are known to have worn the style as well, as seen in this fresco from Santorini, Greece.

Ancient Egyptians, Hittites, Canaanites, Persians, Israelites, and Armenians were also known to wear the style, as were certain Native American tribes. And while the kinky texture of Afro hair does indeed make the hairstyle substantially easier to form than in straight hair, the lack of combing and washing in the past made even the straight hair of white people substantially more matted. Indeed, something resembling dreadlocks will form if you just leave your hair unwashed and uncombed for a few months.

2. Hoop Earrings

Last year, there was a big controversy about how white women were “appropriating” hoop earrings from black and “Latinx” women. It turns out that, much like dreadlocks, these may not have been invented by white people specifically, but certainly not by those ethnic/racial groups that are today associated with them either.

In fact, hoop earrings are one of the oldest forms of body ornaments that are found in archaeological digs around the world, having been found in Sumerian, Minoan, and Mycenaen sites as early as 2000 BC, and were observed amongst the Ainu people of Japan as early as 500 AD.

Loading…

Why the near-universal prevalence? If I had to guess, it’s that the concept of “a loop of gold wire through the ears” isn’t a particularly complicated one, and thus multiple groups came up with the idea simultaneously.

3. Rap music

“What?! How could this be?” you might be asking yourself. Am I seriously implying that black people didn’t invent rap music? How dare I do that?

That is not quite what I’m doing with this entry. I am not denying that rap and hip hop music as we know them originated predominantly amongst African-Americans in 1970s New York. What I will point out, however, is that the basic concept of “improvised or pre-written poetry set to music” is hardly a unique concept to one specific group of people. Much like the other two examples that I discussed above, it is fairly universal.

It is speculated by several anthropologists and historians that ancient Greek poets, including the semi-historical Homer, would in fact have needed to recite their poems from memory, since the Greek alphabet as we know it today was invented after many of the ancient epics were first recited.

Secondly, a casual perusal of, say, *The Odyssey* will note that many phrases like “the rosy fingered dawn” and “the wine dark sea” are repeated throughout the poem. It is speculated that, much like how freestyle rappers will have a “bank” of easily rhymable phrases they commit to memory to use in their songs, these repeated phrases were memory pnemonics to help Homer. Combine that with the probable musical accompaniment that was performed with ancient Greek Poetry, and what you have there is essentially freestyle rapping, done a millenia before the Crucifixion.

And don’t think this is just a Greek thing—pre-colonial Inuits engaged in song duels (battle rapping?), as did ancient tribes in Ghana and Nigeria. Again, I would attribute this to less of a deliberate “appropriating” from one culture to another, and more to the fact that people generally tend to like music and poetry, and putting them together seems like a fairly “bread and butter” concept.

Conclusion

So why did I write this article? Just to thumb the eye of stank-faced PC commissars? Well, yes, but not JUST that—I also wanted to point out how stupid the concept of cultural appropriation is, because many similar cultural practices have existed between wildly divergent cultures, and because said historical research will point out that in many cases cultural appropriation is an inevitable result of cultures coming together.

In other words, if you're going to demand multiculturalism, you're pretty much by default going to get "cultural appropriation", so pick your poison!

Why Do Leftists Get So Triggered From Hearing Contradictory Viewpoints?

July 6, 2018 | by Beau Albrecht | Link | Original Link

Why does simply disagreeing with leftists sometimes make them scream like they're being tortured? First we'll explore a recent mass "triggering".

Trump Derangement Syndrome

Hillary Clinton is uncharismatic, petulant, and frumpy. While Trump's rallies drew huge crowds, she could barely pack a high school auditorium. Events during the campaign revealed her questionable finances, wiping her illicit email server, etc. Cupcake certainly isn't JFK in a skirt; she even makes LBJ seem halfway decent.

How did Democrats react when their very uninspiring candidate lost? At her campaign, a sea of young faces appeared absolutely shell-shocked. Some even wept. Stronger reactions occurred elsewhere, including a tidal wave of furious social media posts, and even wailing in public.

In 2008 and 2012, liberals gloated immodestly when The Lightworker won, though it's hard to blame them for exuberance. Conservatives weren't too thrilled, but neither were they in tears. I don't recall anyone howling in the streets,or demanding to "take me off your friends list if you voted for Obama". What might explain the striking difference in reactions?

Generation Snowflake

When leftists get “triggered” after hearing ideas they don’t like, later they’ll describe how they were quaking with rage, about to vomit, bursting into tears, etc. To the rest of us, that sort of reaction seems pretty disproportionate. We might suspect it’s merely butthurt hyperbole. Actually, maybe *they really do* freak out that badly.

What’s the matter? Proverbially, “sticks and stones may break my bones, but names will never hurt me.” Being contradicted should be even less painful than being insulted. Possible explanations for inability to handle disagreement include:

- Sheltered helicopter parenting
- Lack of character-building hardship
- Too much Barney the Purple Dinosaur during childhood
- Campus safe spaces with coloring books and toys
- Mental weakness

The younger ones might simply be a product of their times, needing some long-overdue “adulting”. (That wasn’t even a word until recently.) However, that doesn’t explain older ones overreacting. For instance, Paul Krugman *still* seems obsessed with moping and pouting on Twitter, as if The Donald stole his pacifier. *Dude, get a life!*

Some people are just thin-skinned. At a certain level, mental pain is interpreted in a similar way to physical pain. People can toughen themselves through practice. That’s why minor injuries don’t make adults scream like babies. Likewise, normal grownups can handle ordinary social stresses (like conflicting opinions) without throwing tantrums. However, certain critical functions remain underdeveloped in people who never learn to butch up.

The neurobiology of triggering

This is why they clutch their pearls and get the vapors.

Suppose you see three rough-looking characters walking your way. They haven't done anything to you, *but they might*. Instantly, you'll assess their behavior and threat potential. If you remain guardedly calm, you can consider options logically: play it cool, negotiate, bluff, change direction, Jedi Mind Trick, etc. *If you're too scared to think, your options are limited to running away screaming, freezing in terror, or going berserk.*

Obviously, reacting appropriately avoids unnecessary trouble. Obliviousness to danger makes someone easy prey. So does acting too submissive. Unwarranted provocation escalates the situation or looks insecure. Fighting when unnecessary causes obvious problems. The least bad failure result is looking stupid.

In brief, the amygdalae are two small brain structures in the limbic system. Terror from a perceived major threat causes an "amygdala hijack". It's a fast circuit—the sudden panic shuts off rational thought, allowing a rapid "fight, flight, or freeze" reaction. Larger amygdalae allow one to assess threats more accurately. Because of neuroplasticity, keeping cool is a learnable skill.

Loading...
Social stress and real danger are different, but the mind reacts similarly. (That's why Approach Anxiety can make someone freeze up during a set, or avoid trying.) Arguments cause social stress, even when there's zero chance of a fight resulting. Not having the learned mental toughness to handle disagreements is an immature characteristic, leading to overreactions or even rage.

Princess Amygdala

To summarize a long discussion, men have larger amygdalae than women do, and signals are processed somewhat differently. (Once during high school, several girls immediately shrieked when the power blipped out briefly—apparently rather ill-prepared for actual urban survival situations.) It makes basic evolutionary sense; tribesmen had to be able to think tactically under pressure, and not panic if confronted by large animals or enemies. Tribeswomen were better served by hiding, or running and screaming to summon help.

Also, r/K selection is a factor. Carnivores (K-selected) have large amygdalae; they must understand their chances against another animal. Being too cautious means they don't eat; overconfidence means they get eaten. Herbivores (r-selected) have small amygdalae. All they can do is run or play possum. A rabbit trying to fight a wolf will earn a Darwin Award in the bunny division.

Interestingly, liberals—the "rabbit people"—tend to have smaller amygdalae. This does approximately fit political stereotypes. Right-wingers might be very vigilant: survivalists, gun collectors, and conspiracy-mongers like me. Liberals worry about all the wrong things. They don't understand civilizational threats, and either react apathetically or assist the enemy. Still, I wouldn't make *too* much of the correlation; people can change political opinions. If things were that simple, I'd give martial arts academy coupons to hipsters.

Again, arguments cause social stress, subconsciously seeming like a threat. Given all of the above, *take a wild guess here*. What types of people can handle disagreements and stay logical? What types will take it as a personal attack and react like Godzilla is trying to eat them?

How to melt special snowflakes

Or if you're in a hurry, this works too!

Armed with this knowledge, you can leave liberals stunned and twitching, without having to buy a Taser. Granted, that's kind of a dick move, but sometimes the situation just calls for it.

Again, a panic reaction is "fight, flight, or freeze". It's easy enough to goad leftists into shouting matches. For example, tell a tranny to grow a pair (or use the correct pronoun). Tell the feminist that she looks cute when she's mad. They'll look stupid, especially if you're staying cool and not shouting back, but there's little gained.

You can make them leave you alone too, or even produce submission. As the *SJW Survival Guide* states:

> Fortunately, SJWs are highly emotional, cowardly, and prone to depression, so demoralizing them tends to be considerably easier than you might imagine. They will still hate you, but after repeatedly meeting with staunch and confident opposition, they will usually decide to leave you alone and go in search of less difficult prey.

For example, an old friend of mine often got politically-motivated harassing phone calls. He told one of them that he was the reincarnation of a certain meanie from history, and got pretty outrageous with it. The caller quickly hung up and never bothered him again. Once I was nearly ambushed by several campus lefties. They greatly outnumbered me, but they didn't mess with me after I showed some audacity and a "zero fucks given" attitude. That's how to handle rabbit people.

Best of all is staying calm and destroying their worldview. Tell the tranny that the answer to his mental problems is embracing reality, not living in delusion or mutilating himself.

Tell the feminist she’s been duped by evil people who’ve harmed society. They’ll still get “triggered”, but hopefully you’ll plant some seeds of doubt.

What I Learned From Being Charged With Felony Domestic Violence

July 8, 2018 | by Iago Stanford | Link | Original Link

In the United States, domestic violence is taken very seriously. While most of the alleged victims are true victims, the laws surrounding domestic violence (DV) offenses make it easy to report a false charge. In fact, out of the ~2.5 million reported DV cases each year, 700,000 of them result in someone wrongfully arrested. I was one of them.

Nowadays in many states, there does *not* need to be any sort of injury in order for an arrest to be made. We all have engaged in some form of an argument in our home lives, but now such arguments can lead to an arrest and possible DV conviction (disturbing the peace, disorderly conduct, etc). I won't share too many of the details in my case, as every single case is unique, but I will share with you what I have learned from the ordeal.

1. Prosecutors Use Dirty Tricks to Seal Convictions

If you are facing a misdemeanor DV charge, there is a good chance that you will be released on your own recognizance. Because of this, most defense attorneys are able to take their time with your case to provide you with the best outcome. Prosecutors know this, and therefore may charge you with a felony.

In my case, I was charged with multiple felonies, including strangulation and kidnapping. Because of this, I was given a 5-figure bail with an ankle monitor. I was also facing several years in prison. Even though there was no proof that I did the things I was charged with, the prosecutors wanted to “play it safe” and overcharge me. Although I was lucky enough to have the money to bail myself out, I was still strapped with an EM device around my ankle, along with a curfew, for over 6 months.

This is how prosecutors get you to plead guilty to something you may not have even done: they request that your pre-trial conditions be so harsh, and charge you with enough serious felonies, that you simply give in to move on with your life. Although a judge is the one who ultimately sets your release conditions, it’s unlikely a judge will lessen them before a case is settled.

Note that while any crazy female can make an unfounded report against you, it is ultimately the prosecutor that is keeping the allegations alive.

2. The (In)justice System

The (in)justice system does not only hurt men, it hurts women too. Take for example the story of Cyntoia Brown, a 16-year-old runaway in Tennessee that was taken captive into sex slavery. She was “bought” by an older man, and held captive for several weeks until she took it upon herself to kill her kidnapper, and has since been sentenced to life in prison.

The prosecutors, the judges, the parole board, and the people of Tennessee don’t seem to care too much about her story. Maybe you don’t either. Just keep in mind, if such injustice could happen to a 16 year old black girl, much worse could happen to you.

3. Forgiveness

Unlike some defendants who are released on their own recognizance (OR), I was constantly thinking about my case as I had a big reminder of it around my ankle. I had to keep the EM device charged every day (which takes ~2 hours), and I had to check in with my bail bondsman twice a week.

Loading…

The alleged victim, some girl I was just having sex with, found out she wasn't the only female I was with, so she was essentially a "scorned woman." She was not going to let it go. She apparently got angry with the prosecutor when she saw the plea deal I was offered. Every time my attorney filed a motion, the alleged victim would tell the prosecutor to not let it pass. She was willing to go all the way through trial and would not let the prosecutor accept a lesser plea.

Most men would want to seek revenge against those who put them in such a conundrum. Believe me when I say I thought long and hard about it, but then how would I be any different?

Both the accuser and the prosecutor did not have any sort of forgiveness for me. The accuser however is most likely going to live a very sad life. She has nothing but scorn to offer. I, on the other hand, have moved on, and am writing this just to share my story. And my life is much better now. If I chose not to forgive, or maybe decided to seek some sort of revenge, I can almost guarantee that I would be just as miserable as my accuser.

4. Being the Bad Boy Isn't as Cool as You Think

I guess if there is one positive consequence from my experience, it would be that I am now officially a bad boy. I was one good lawyer away from being a felon. I don't need an arm sleeve of tattoos to prove this to the world either: my friends, family, and even girls I chat up can smell it on me.

The only problem with this is that prospective employers, clients, and customers can smell it on me as well. I now have to make an effort to make myself look like a good ol' boy. You get a lot more when you embrace a good Christian look than you do trying to emulate Chris Brown or Charlie Sheen.

A Return to Faith

Before my arrest, I had not stepped foot in a catholic church in a long time. In fact, other than funerals, I don't think I stepped foot in one since I was a young kid. I almost forgot how to pray.

It's funny how when we face such hard times in our life, we tend to return to our church. One thing to keep in mind is that god will not make your problems go away, but will give you the inner strength you need to overcome such problems.

Be Humble

To conclude this story, I must confess that I did accept a plea deal. It was for one misdemeanor, no jail time, and was ordered to complete anger management classes. My attorney had enough to get all of the felonies dropped for lack of evidence, but due to the current DV laws (especially in my state), he did not have enough to get the misdemeanor dropped. I would have had to fight it in trial and could have been sentenced to a few months in jail if I was found guilty. I also would have forked over another $20,000 for a trial, and would have had the ankle monitor on the entire time. I am lucky because in my state we have expungement laws, so in a few years it will be like this never happened.

As much as I wanted to fight the case, to have a crystal clean record and to see the look on my accusers face after winning, that was not what was really important to me. What was important to me was getting the ankle monitor/curfew off so that I can move on with my life and live it to the fullest.

Sometimes you have to ask yourself what is important to you, and if what you are doing really matters. A problem that many young men face nowadays in America is that nothing truly matters to them. They have everything to the point that they have nothing. Instead of taking advantage of the gifts many of them have, they use heroin, watch pornography,

engage in pointless street battles like what we saw in Charlottesville, commit suicide, and essentially throw their lives away.

I was given a second chance, and will not take it for granted. Hopefully after reading this, you could see how good you may have it and not throw your life away over something unimportant to you.

French-Turkish Patriarch Stands Up Against France's Homosexual Mafia

July 8, 2018 | by André du Pôle | Link | Original Link

At the end of June, a Frenchman of Turkish origin, Mourad Ghazli, had had enough of seeing rainbow flags prominently displayed on public buildings and now on Parisian pedestrian crossings. Revolted by this blatant taking over of public space, he took his phone while at the pool to record the following video.

A Turkish Muslim's critique of the LGBT community

Mourad Ghazli is a versatile man. Back in the 90s, he had a semi-professional sports career in various disciplines: judo, sumo, jujitsu, then rugby. He worked as a subway driver in Paris, was fired over denouncing corruption, and became a Freemason. He also had a short-lived radio career before embarking in politics, which allowed him to join the town council of Thiais, near Paris. Moreover, if we are to believe him, he sired no less than eight children.

In his video, Ghazli makes the following points:

1. Organized minorities rule through shaming, pressuring people into conformism and isolating the least hint of criticism. Such rule only works up to a certain point. Past some degree of robustness and independence, the pressured start revolting openly. Especially since degenerate bullies tend to create resentment.

2. People use the "I have a X friend" card to try to exert freedom of speech without being bullied. This usually fails as leftists typically answer "If you notice some bad minority

behaviour, you're an –ist and a –phobic!" Ghazli rejects the card and reaffirms two distinctions: between the individual and the group, between (private) sexual practices and (public) group identity.

3. There's no reason why sexual practices should be a social badge, much less a right-bearing, pedestalized, "empowered" social identity. Why do not pussy lickers, escort fans, bestiality amateurs, and wide sex party practitioners get their own celebrated group identity too? This would be consistent with the special snowflake atomization road.

4. LGBT activism bears no relationship with any rational idea of social justice. In France, laws against "discriminating" are already in full force to make sure employers hire abnormal people over the average Jean. LGBTs are already a wealthy, well-connected, financially and culturally powerful urban group. What could they ask for in the name of repairing a purported wrong? Their pride is not about justice—it is sheer narcissism.

> When you're parading with a leather suit, leather in the butt, and howling how proud you are to be a homo, you're not asking for rights. You're just saying, I'm proud to be a member of a special tribe, screw you! Well, screw you too.

French National Assembly today

5. LGBT narcissism and taking over on public space is going very far: putting the rainbow flag above and wider than the national flag means desecrating the latter. Likewise, imposing it as a prominent part of the urban landscape manifests a shameless arrogance. Such behaviour can be perceived as provocative, because it is.

6. Is Islamophobia justified when it is meant not to protect European cultures and peoples but sexual degeneracy and dubious groups?

7. LGBT activists routinely use the apex fallacy: they single out heterosexual parents

mistreating their children to compare them with apparently good homosexual adopters. Of course, comparing the few rotten apples among the normal with the best and brightest homosexuals is fallacious. This is unsurprising, given that feminists used to pull the very same trick from their sleeves when they compared noble, wealthy one-percenter men with penniless women while conveniently forgetting millions of normal, much poorer men.

Ghazli ends up his speech with an interesting idea:

> I would like that all homosexuals who do not raise children pay a higher social contribution for retirement plans. Why? In the French pay-as-you-go retirement scheme [different from the American funded pension scheme], the younger pay for the older. When you don't have children, you force the heterosexuals to pay for your retirement. Right now heterosexuals are badly discriminated compared with homosexuals.

This is basically an extension of the family quotient policy. The more children you have, the less taxes you pay, which lets the single pay the highest taxes.

If that seems way too socialist to you, remember that the family quotient was enacted when nationhood meant something, when women still depended upon men and when jobs were still there. In other words, the family quotient encouraged men to become fathers, or to help their national brothers and cousins—not beta workhorses paying for all kinds of parasites as today.

> I had eight children. Eight taxpayers then. And you, Mr. Homo? How many taxpayers did you give to the country? Who's paying for you now?
>
> Loading…

The LGBTBBQXYZ get triggered

The LGBTXYZ are one of the most cushioned groups right now. They are also very prone to mental diseases, AIDS-spreading behaviour, and fits of violence. As a result, they can't stand the least criticism without getting angry. A homo association has nearly doxxed Ghazli and is asking people to pressure the Thiais town council into firing him. The MSM is following closely.

> L'élu de la ville de Thiais, Mourad GHAZLI (@ghazlimourad) a un message à faire passer aux LGBT.
>
> Première partie : pic.twitter.com/1bpOGLgTUo
>
> — L'Amicale des Jeunes du Refuge (@AmicaleRefuge) 2 juillet 2018

Ironically, if you scroll down the (now deleted) Twitter thread, you will see fussy progressives bashing Ghazli *as a Turk*. They accuse him of being too Turkish to speak as a French citizen. Hmm, isn't that a bit xenophobic—or do gender freaks have some right to lash out at other "minority" identities that the regular disenfranchised white doesn't have?

The LGBTs are far more powerful and privileged than Erdogan fans. They are also cunning crooked dishonest sophisticated enough to be racist while maintaining an impeccable progressive veneer. In any case, the fact that we have to weigh the purported power of all these groups and identities, in a society basically created by *our* identity, shows how much ground we've lost.

But the story doesn't stop here. In spite of the screeching sodomites' best efforts, one cannot fire an *elected* councilor that easily. (Oh, the awful democracy! How easier it

would be if everyone outside of the Cathedral had no constitutional rights!)

Contacted by journalists, Mourad Ghazli refused to apologize. He bravely upheld his distinction between private sexuality rights and public encroaching. Yet he also added that he had left the country to settle down in Turkey. As other town councilors eagerly mentioned on Twitter, Ghazli has stopped coming to the town council meeting.

To the journalists asking him about this weird situation, Ghazli answered he had no intention to resign, and added he mostly stayed in the council "to piss off the mayor," whom he hates.

This mess is but a representative sample of what's supposed to be my country, or wider yet, our whole Western civilization. What identity do you want to defend? What principles would you like to uphold (beyond kicking them all out)?

"Mourad Ghazli is being defamed. He just dared to say he condemned Gay Pride obscenities… From our leftist friends' point of view, a good Muslim is a Muslim who keeps his head down and denies is own values."

Granted, Turkish men have a reputation for hard work that other annoying groups do not have. I can personally testify that Turks hate being confused with North Africans, whom they despise, but the Turks also have a reputation for ethnic networking, and their identity is not mine anyway.

While I'm glad to share some of Ghazli's points, I would like these made by an actual Westerner. And I have absolutely no desire to risk my life, or any Westerner's life, in a war against Islam or immigration if said war is meant to defend blue-haired whales, wealthy crooks, and other degenerates.

As Western Europe is sinking into chaos, perhaps Ghazli was right to go back to his country.

Ramène une poutre, on va poutrer !

As a conclusion, let me share this: a French indie rap song expanding Ghazli's critique humorously. Perfect for your next training even if you don't get the lyrics.

4 Ways The Marvel Movies Are Porn For Soy Boys

July 9, 2018 | by Jared Trueheart | Link | Original Link

The Marvel extended film universe began in 2007. Since then there have been 19 films, many of which are record-breaking, and nearly all of which make film critics cream their pants. Five of the movies grossed over $190 million in their opening weekend alone. Black Panther sits at 98% on Rotten Tomatoes. But all that really reflects is how much nerd culture has become mainstream.

The Marvel films are written and directed in a way that makes soy boys and nerds feel a sense of self-pleasure. When a man wants to ejaculate but doesn't want to do the work of gaming women, he will masturbate to feel pleasure. The nerd version of this is to watch Marvel movies to feel good about their lives without putting forth the effort to better themselves. They live through the nerd fantasies that are in the films, and because the films are so popular, they feel a sense of validation to their nerd fantasies.

Here are four of those nerd fantasies that make nerds pleased with themselves…

1. Captain America's Origin Story

Captain America starts off as a scrawny guy with health problems in the 1940s. He means well, and has a fighting spirit, but he doesn't have the physicality to enlist to fight Nazis in the US Army. After trying to enlist, he gets sponsored to be part of an experiment. He's injected with a serum and grows taller, gets large muscles, has excellent hand-eye coordination, and better physicality than the most elite athletes. The nerd fantasy is very blatant—weak men are heroic, they just need a serum to facilitate their heroism.

The masturbatory effect comes when nerds fantasize that they are like the scrawny Captain America before he gets the strength serum. They relate to the weak version of the hero and imagine that if they had a serum, they would be a superhero just like Captain America. The similarities between the nerds and weak original Captain America validate this belief. In that way, they get a sense of unearned pride.

2. Tony Stark (Iron Man)

Tony Stark is a billionaire genius who creates the Iron Man suit and the software that makes it work. He's a jerk, though not the sort of jerk that's tolerable. At first, he is seen with many beautiful women, a sort of ladies man. He's also seen as somewhat suave with strangers, a good salesman.

Tony Stark's main and only power is that he designs software and hardware. Before becoming Iron Man, he designed weapons and made a lot of money selling his weapons to governments. Then he used his software writing powers to design the Iron Man suit and become a hero.

Nerds love to relate to Tony Stark. They write computer software just like he does, meaning they have the same "superpower," but they're also anti-social know-it-alls just like Stark. The fantasy appears when they see their heroic software developer with billions of dollars and beautiful women.

Loading...

These nerds know they can work hard and be more fit, groomed, and talented like the fictional character, but that takes too much effort. Instead, they get good feelings from watching Stark get the acclaim, just like when guys masturbate they get good feelings from watching some other man take a mound to pound town.

3. The Heroes Play-Fight Each Other

In nearly every Marvel movie, the heroes fight each other. There's very little suspense in these fights because we know nothing significant can come from them. The entire Captain America: Civil War movie was just superheroes fighting but pausing to compliment each other. They were never going to kill each other. It was a child's play-fight.

More than anything, it reminded me of Star Wars nerds reenacting light saber battles. The Marvel superhero movies are the same way. When nerds watch the superheroes play fight, it reminds them of their light saber “battles” and they feel like their lame activities aren’t so lame after all.

4. Marvel Superheroes Don’t Rise To The Occasion

Captain America took a serum to get his strength and that was enough to beat the bad guys, but when the heroes’ innate strengths aren’t enough to beat the bad guys, what do they do? In a good hero story (not a superhero story), when the hero isn’t good enough, he improves. He makes himself better until he is able to defeat the bad guy. Marvel superheroes don’t do that. Most commonly they recruit more heroes. Why improve when you can recruit?

In Avengers: Age of Ultron, the heroes aren’t good enough to beat the bad guys. They know it, but they do nothing about it. Luckily for the good guys, two of the bad guys defect and Tony Stark uses his software powers to make a new superhero. That does the trick.

In Thor: Ragnarok, Thor can’t beat the bad guys (Cate Blanchett). Does Thor work hard to gain more strength to beat her? Of course not. He destroys his home with her in it.

The latest offender is Avengers: Infinity Wars. Thanos is the bad guys. Nobody can beat him, but none of them really better themselves in an attempt to beat him either. Instead, they lose to him. The movie's sequel will be resolved when a new good guy (Captain Marvel) is recruited to beat the bad guy.

The message to nerds is simple: if there's a challenge you face, don't rise to the occasion and solve the problem, just call for help. They already do this, but seeing it on film makes them feel good about their (lack of) actions.

Nerds do none of the things they can do to be more like superheroes. They don't work out or groom themselves or learn how to fight. But that's the masturbatory aspect of these films. They make nerds feel good about themselves without the nerds having to work for anything. That's the real reason these movies are so successful.

For more from Jared Trueheart on the roles of men and women in literature and film check out his writing at Legends of Men.

Iranian Thot Patrol: Instagram Skank Rightfully Gets Jail Time For Subversion

July 9, 2018 | by James Miller | Link | Original Link

A story going viral throughout social media over the weekend involves ‘oppression’ against women in Iran. A recent case of a dancing attention whore on social media being arrested for her lascivious behavior has many, even some people on the right, up in arms.

> Iran has detained a teenager who made dance videos in her bedroom and then posted them on social media. Maedeh Hojabri, 18, had garnered 60,000 followers before her arrest and her offending Instagram account shut down.

A middlingly attractive Iranian Thot was regularly shaking her tits and ass on camera for attention. Her blasphemous acts raised the attention of Iranian authorities, who are especially sensitive to subversion after many Western-backed coup attempts over the years. They are exceptionally vigilant when it comes to keeping the poz out of their society.

The 19-year-old skank, Maedeh Hojabri wiggled her hips in her videos like a red light district hooker trying to win customers. She showed skin that only should be seen by her husband. She gazed at the camera with the sultry eyes of a pole dancer. Anyone who cares about turning the tide against global degeneracy should applaud this move by the Iranian mullahs.

> Since when did acting like a ho make you a "dancer"? https://t.co/GY9HfhOtRP
> — Roosh (@rooshv) July 8, 2018

Sadly, that has not been the reaction from Westerners. Feminism and the sexual

liberation of women are the only Western values that remain in this Orwellian hellscape of a society. So-called conservatives look at thottish behavior and jump to defend it, deriding Islam for taking a stance that would also be in line with the writings of the Bible. It probably won't be long until they are calling for another aggressive war for Israel for this harlot's honor.

As can be clearly seen above, this thot has the air of feminism about her. Her boyish, masculine haircut downplays her natural attractiveness. Her baggy clothes hide the curves of her physique. She possesses no actual talent as her dancing is stilted and awkward, and she might as well just wear the burka and have a little class rather than dressing like an urban sodomite. Her ghetto aesthetic is offensive to all the senses.

> #MaedehHojabri was reportedly arrested. Her crime is dancing! #FreeMaedeh #Iran pic.twitter.com/Sy7WwWHlQ7

> — Maryam Nayeb Yazdi (@maryamnayebyazd) July 8, 2018

This subversive apostate represents the worst of the Western culture. Attention whoring on social media for instant gratification can quite literally kill a civilization. Because women are rarely actualized human beings and have a difficult time grasping simple logic, they cannot resist the mobile phone apps designed by men to fulfill their base desires. Women will normalize this behavior as soon as they are given an opportunity, and it will spread like a plague unless consequences are enforced.

Rather than having an inner moral compass, the woman takes cues from society. If one woman can get away with brazenly flouting traditional customs, it can poison the well. Women will always get together and encourage their worst modes of behavior. It is the strong arm of the patriarchy that prevents this from happening. Women need the guidance and the strength that a sword-wielding Islamic despot can provide.

This won't just end at tossing off burkas and guaranteeing basic freedoms for women in Iran. In and of itself, that would not be particularly objectionable, but it is in a woman's nature to take, take, take until there is nothing left. Once they are empowered with rights they cannot handle and do not deserve, it is only a matter of time before the entirety of the culture is completely desecrated. Mohammad will be replaced with over-the-counter abortion pills. Modesty and submission will be replaced with the Persian equivalent of Oprah and Ellen. These women will still be on their knees five times a day, but not for prayer.

The Iranian mullahs deserve a great deal of credit for their social media crackdown and swift thot patrolling. They are actually conserving their culture against an existential threat. Hojabri should be preparing food, tending to a home, raising a family, and serving her man and her God instead of gyrating her youthful physique to please cock-stroking perverts thousands of miles away.

Only ruthless authoritarianism can hold back the gynocracy before the gendostate can be established. Technology and progress work in our favor toward making femininity obsolete, and thus breaking the hold of feminism and re-subjugating the woman, but authoritarianism is the necessary stopgap in the interim.

Why Do Liberals Care More About Other People's Children Than Their Own?

July 10, 2018 | by John Connor | Link | Original Link

By far the most bewildering feature of the liberal worldview is their denial that they have any responsibility towards the generations of the future. Liberals have a very low penchant for inter-generational responsibility. This is most observable in the stark differences between liberal parenting strategy and right-minded parenting. This difference ultimately influences the amount of parental investment observed between the offspring of liberals and the offspring of right thinking peoples.

How can we draw more attention to ourselves in Church?

Liberals seem to show little concern for their own offspring or the well-being of their genetic descendants, preferring investment in the children of “others” to investment in their own. This contrasts sharply with the parental investment strategies of right-minded peoples who invest in their children as opposed to investing in the children of others.

What Is Parental Investment?

When I refer to parental investment in one’s offspring, I am alluding to the effort expended on raising them to become competent and confident members of the society in which they live. Such efforts include: time, attention, affection and monetary investment. These resources are finite and scarce by their very nature. Time spent working is time which you are unable to spend on hobbies, exercise and gaming. Time is a non-renewable resource.

Poster child for misguided “charity.”

Likewise, money spent on a vacation is money that cannot be spent on a home. Money may be a renewable resource but in order to obtain it the non-renewable resource of time must be expended in its pursuit. The scarcity of the earth’s resources and the finite nature of time are readily understood by every child who has reached the age of reason.

Now, you may be wondering what resources and time expenditure have to do with liberalism and their penchant for low-investment strategies in their own offspring. I contend that right minded men and women invest heavily in their offspring at the expense of stranger’s offspring and that liberals invest heavily in the offspring of others at the expense of their own descendants, usually out of an irrational and misguided desire to virtue signal and a total disregard for the generations of descendants which succeed them.

Case In Point

“Why focus on parenting your children when other people’s children need your time and resources too?” Cuck

This observation was highlighted for me recently when a recently divorced, co-worker of mine announced that he was moving in with his new girlfriend and her two children. This co-worker already has three children of his own. At the family level of parental investment, a man that has children and whom has been divorced owes it to his children to devote his energies to their development.

Loading…

When a man marries a single mother and blends his family with hers, he is transferring his resources, wealth, time and affection from children whom he has fathered onto the offspring of another man. It is right to assume that any man you meet who has married a single mother is a liberal of the highest magnitude as he is funding his children’s competition, or has no offspring of his own.

This is an obvious betrayal of one’s descendants and a slap in the face to one’s ancestors. Such a man is so emotionally needy and desperate for sex that he will jeopardize his investments in his own children in order to assuage his emotional and sexual needs.

Societal Scope of Parental Mal-investment

“How the hell did this happen?” Naive soy-boy

When men and women invest in the development and rearing of the children of others at the expense of their own, the injustice is palpable yet limited to the two families involved. This investment becomes more malicious when it is societal in scope.

At the benevolent end of parental investment in the offspring of “others,” liberals invest in their children’s competitors through the encouragement of mass migration into their ancestral home lands. They saddle their children with future dependents in the form of third-world immigrants and their offspring – truly, a gift that keeps on giving. Likewise, liberals saddle themselves and their children with overly generous welfare states which largely benefit immigrants and single mothers at the expense of the hard working people of their society.

At the other end of the spectrum, the malevolent end of parental investment, liberals even condone and participate in the murder of their own descendants in the wombs of their mothers. Nothing indicates a hatred of one’s own offspring more than murdering them in the womb; yet, abortion is the sacred sacrament of “tolerant” liberals everywhere. One cannot invest in the rearing of the children now dead and so liberals devote still more of their time into causes diametrically opposed to their surviving descendants.

Privilege Your Own: In Group Preferencing

That idiotic grin says it all.

The ultimate difference between liberals and right-minded parenting is the level of parental investment each group puts into their children and the level of commitment to ameliorating the conditions of future generations.

Liberal minded people will almost always invest in the offspring of others, whether by marrying single parents and forming “blended” families, encouraging the immigration of “others” into their countries thereby causing an influx of their children’s competition or by outright murdering their children in the womb.

In contrast, right minded people marry for life, have children with one spouse (barring exceptional circumstances such as re-marriage after the death of one’s spouse), and work hard raising them into proficient adults necessarily privileging their own children at the expense of others.

Bulgaria Is A Great Destination For Masculine Men

July 10, 2018 | by Jonathan Livingston | Link | Original Link

I'm an American digital nomad guy who's been living in Bulgaria for over a year, I've lived abroad for 6 years now in a couple of different countries and see more of a future for myself here than elsewhere. Bulgaria offers almost all of the quality of life, accouterments and conveniences that you'll find in any of the developed western "democracies" but without the overwhelming feminism, globalism, "diversity" and cultural self loathing. You would think that you would have to choose between one or the other, but surprisingly here in this little country on the south eastern edge of Europe I've found both.

Me at the military museum, I was filming a videoblog about the airplane metaphor which

explains why human rights are antithetical to human nature

The Women

This is probably what you're most interested in so let's talk about it first!

If you're not convinced yet just Google Bulgarian women

From my article Seducing Sofia (Bulgaria)

> Bulgarian women are aesthetically a whole lot closer to my fantasy girl; they are curvier and a little darker than Ukrainians yet refreshingly elegant and well put together compared to the frumpilicious Romanians. A bulgarski trotting down the avenue in her heels, form fitting jeans and fashionable scarf could easily be confused for a light skinned Colombiana, until she opened her mouth and spoke quite competent English.
>
> **Most of the Eastern European woman stereotypes apply**; they are feminine and pleasant, relatively submissive and take extra care of their appearance but they don't have a ton of personality and aren't really chatty like the modern western woman of Anglo extraction is and they don't have a lot of money.
>
> At least in Sofia, while not nearly as feminist as say German women, the women are modern European women;
>
> They speak English well.
>
> Most of them attend college and are eager to discuss their careers.
>
> **They are more family oriented**. Almost all them come from nuclear families who they seem to respect and love.

> **I've met zero single mothers**. I'm sure there are some here but I've met none in my social circle or dating here.
>
> **They are a little religious**, they attend eastern church service a couple times a year but most are not pious practicing Christians.
>
> I don't meet a lot of married young women as I have elsewhere in Eastern Europe.
>
> Like latinas you kiss them on both cheeks when greeting them.
>
> Ukrainians age better, although most Bulgarian women over 35 are still relatively attractive and skinny. So if you're considering a long term investment, take a good look at her mother and ask yourself if you in 20 years would be happy with an approximation of that in your bed every night.
>
> I've slept with two women here, I'm not sure if that's enough experience to rate the general sluttiness of the bulgarskis but based upon my experience and that of other guys I've talked with they are probably easier than Russian or Ukrainian girls but will require more investment than Western woman who you hookup with 2 hours after meeting them.

Progressivism and Political Correctness

I don't go out of my way the push the bounds of polite conversation with strangers but I've gotten the distinct impression that political correctness is virtually none-existent here. An off-color joke about women or black people really won't earn you social ostracism here.

I regularly attended English language meetup groups here and elsewhere I've found the content of these kinds of meetups to be a bit dull; the conversation is usually pretty limited to generic questions about where you're from, where you've visited, what food you tried, etc. But here we would have these wide ranging philosophical discussions about history, sex, politics, business, morality and religion. No way you could discuss those sorts of things with strangers in the west without triggering and offending someone!

There was one gay parade in June but that's it. I've seen no pride flags around town. No conspicuous gay bars. It's acceptable (and often encouraged) to mock gays in social settings. I've encountered no women bragging about being bisexual.

Walking around the center I'll occasionally see some deviant looking young people with the weird tie-dye hairstyle and torn alternative-look clothing but it's not the norm.

In the English language meetup I told them about the #MeToo hysteria in the west and retroactive sexual consent laws which they found baffling.

I've met zero self identified feminists here and more than a couple women who seemed to revile feminism.

I've seen zero activism promoting mass migration. Bulgarians are naturally wary of Turks

and Arabs.

Once on Facebook I saw an event posted for an antifa rally BUT it only had 7 people RSVP'd. In the year that I've lived here in the center I've seen zero public political squabbling or protesting going on.

Funnily, I see swastikas from time to time spray painted on buildings. I see more of those than I do leftist symbols. You'll also see some pro-putin artwork here and there. I haven't seen anything mocking Trump. Mostly you just see a lot of Bulgarian flags, walking down the street you really won't forget what country you're in.

Communism was not quite as cruel and tyrannical to Bulgarians as it was to Romanians or Russians but Bulgarians have a healthy skepticism of socialism and leftism.

Quality of Life

After spending time in over 25 countries Bulgaria is probably the best compromise I've found for quality of life vs cost of living.

The speed and reliability of the Wifi really matters to me and in Bulgaria you will not be disappointed! It's very fast, almost everywhere in the country. It's certainly better than in Spain and Germany, two countries I spent some time in.

In a year of living in the country I've generally felt very safe. My Bulgarian friends have advised me that petty violence is pretty rare here. So while you should always watch your back walking home from a bar you don't need to worry much. The exception to this might be the neighborhoods or street corners where gypsies hang around; women steer clear of these areas after dark. In a year in the country the worst thing to happen to me was a taxi driver who ripped me off late one night.

The Capital Sofia

I found Sofia to be quiet cosmopolitan, I never ran out of entertainment options. There's a wide spectrum of fine dining restaurants, hole-in-the-wall joints and cafes where you can sit outside and enjoy the sunshine.

The nightclubs and nightlife don't quite measure up Western Europe, the United States or

Medellin, Colombia but I certainly wasn't bored by the nightlife. There's a good scene for salsa and Kizomba dancing.

Apparently the city has over 70 escape rooms, of which I did several with my friends, which was a blast!

Unlike many European capitals there's no river running through it with corresponding riverfront district but there is a big pedestrian boulevard lined with all sorts of great places to eat, drink and be merry.

Every day I would stroll right past a cool archaeological site downtown and the well preserved ruins of the ancient Roman city of Serdika.

The city has an abundance of parks and green spaces.

Being the bourgeois blogger I am, I revile public transport and usually insist upon being chauffeured around in the finest of little yellow taxi cabs, but the few times I took public transport it was clean and very functional. The Sofia metro is very modern and on par with the metro in Germany and my native Denver, Colorado.

There is no Uber in Sofia but there's an intuitive App called Taxime that is almost as good. I've never had to wait more than 10 minutes for a taxi using it. A 15 minute taxi ride across town would cost $5 – $7.

Some of the streets, sidewalks and old buildings are kind of beat up and crumbling but it's not nearly as bad as in some parts of Eastern Europe that I've visited. At least in Sofia, the infrastructure seems pretty on par with anywhere in western Europe. Although you do see some of those ugly communist apartment blocks around town.

Cost of Living

My meager freelancer income buys me a pretty fabulous existence here.

Enjoying a succulent dinner with friends at Shtastlivetsa (The Lucky Man) – I think it's best restaurant in town!

I rented a room in a (not opulent but not terrible) flat right in the center of the city for about $300 monthly. A datenight dinner and drinks at a fancy restaurant is about $20.

Loading...

Groceries are pretty good value, my weekly budget for the two simple healthy meals I eat a day at home was about $45 a week even accounting for some of the fancier organic foodstuffs I like. Like in many poorer countries eating out is often a better value, a tasty sandwich or salad at a cafe is about $3, and a filling sushi dish at a nicer restaurant is about $10. A decent beer about $3, a glass of wine is even cheaper and the shitty local beer is almost free.

I became a regular at the best cafe in the town that served high quality coffee which satisfied my snobbish tastes. A strong cafe Americano costs about $1.50. Nightclub cover charges are almost never more than $5.

The most outstanding value I found was a 24/7 accessible coworking space (in a not amazing location} for $40 a month.

I got a very relaxing but not exactly therapeutic (and definitely not sexy) 60 massage for about $22 which is a pretty good value.

We took several romantic weekend get away mini-vacations to the seaside. These decadent weekends of fine food, booze, sun and sex always ended up costing less than

$150 total.

The Culture

This is southeastern Europe so think of Eastern European stereotypes of slavic stoicism with a bit of southern European charm and hospitality.

The Bulgarian mentality seems pretty healthy to me. They are proud of their little nation that has been around in one form or another for thousands of years. Their national psyche still seems to be overcoming the trauma of communism, they have some inbred humility unlike Russians or the french. Bulgarian men are hardworking and generally reliable but not particularly ambitious. Bulgarians have a quintessentially middle class mindset.

In this little country of only 7 million people, Bulgarians have a healthy in group preference and desire for self preservation.

As far as "diversity" there is a little; about 5% of the population are gypsies who everyone seems to hate, generally the gypsies seem to be a poorly behaved k-selected demographic but they don't seem to cause any serious trouble like minorities do the West. Bulgarians are really NOT in a hurry to apologize for history and redistribute their resources and property to gypsies. Turkish or Bulgarian Muslims are about 15% of the population although different sources and people I've talked with argue that it's a lower percentage – as far as I can tell they are very well behaved Muslims; it's been decades since a Muslim terrorist attack here and this survey found no radicalisation among Bulgaria's Muslims.

Walking around the center of the capitol I'll see a black guy here and there but I really suspect that they are tourists, this country has closed borders and is really not in a hurry to import Africans. The two black guys that live here that I know actually speak Bulgarian

and have families here. I've seen zero race mixing propaganda here. So there's a little "diversity" but it's really not being shoved down the collective throat of the country.

They seem to really like Americans despite our bombing their cities into rubble in WW2. They also like the anglo British cheeky sense of humor and accent.

The People

I was quite impressed with the general cultural sophistication of (especially) the young people. A number of young Bulgarians have read Tolstoy, Dostoevsky, and Ayn Rand. They have a cogent understanding of the more recent history of WW2 and the soviet union.

Many young Bulgarians have remarkably good English – better than what you'll hear in the neighborhood I grew up in Denver. My friend Nikolay here out of the blue dropped used the word profane to describe the local pop music and once my girlfriend was describing an novel and she said that book is very… grandiloquent.

They regard themselves as offspring of the Byzantines and the Thracians. They enjoy relaying stories and legends of saints and heroes of their past.

Meanwhile… in Bulgaria

Walking around Sofia, people generally dress in a none-retarded way. A lot of guys looking professional in suits or dress shirts and women looking feminine wearing casual summer dresses or skirts. I'd love to see more Bulgarian women dressing in the really traditional long slavic gowns but am just happy that they don't seem to be succumbing to the lazy hipster style sweatpants and tennis shoes look like many of Europe's women are.

Bulgarians do like to smoke and drink but it's not as bad as in some Eastern European countries. In over a year here I'm yet to encounter drunk Bulgarians really making asses out of themselves.

The men are generally competent and hardworking. My landlord is a gruff yet friendly guy, when I signed my lease I worried to myself: How is this guy going to screw me over with this lease? But a year later he's been a pretty fair and honest landlord that fixed things when they were broken.

Interestingly here women's middle names are always their father's first names and there's no way to change it. You're stuck with your father's name for life. Their surname changes when they marry like elsewhere in the world.

Male Female Dynamics

A lot of the problems of feminism and cultural decline that we bemoan in the manosphere are really manifestations of economic forces on humans.

“Menver”

Take my hometown of Denver, Colorado. For the past 10 years it’s gone through incredible economic boom times, job and business opportunities abound there. Thus, it’s earned the nickname Menver because it’s attracted so many men in search of the best job market.

I’ve seen more than a few of my old blue pilled friends and acquaintances on Facebook complaining about the ultra competitive sexual marketplace for men – or as they experience it, how hard it is to just get a nice girlfriend. Thus, the single men of Denver will need to do A LOT of personal development, hit the gym or drop some serious coin on the most fly threads (that or start dealing cocaine, become a nightclub DJ or a “model photographer”) to receive sex, affection and (perhaps) commitment from a pool of single women that are increasingly slovenly, overweight and entitled.

In Bulgaria you have the opposite dynamic, the economy and job market here is not quiet as bad as in say Greece or Ukraine, but most ambitious young men are eager to move to London or Germany for better job prospects, in fact the emigration of young people is one of the driving factors of population decline in Bulgaria (I don’t think population decline is necessarily a bad thing though). Thus more young Bulgarian women are watching their girlish figures, dressing in an alluring, feminine style and generally being pleasant in hopes of locking down one of the dwindling number of attractive single young Bulgarian men in the country.

One of first things I noticed in Bulgaria was an Airbnb host of mine was a guy who was, frankly, a loser; he had poor personal hygiene, mediocre personality and style and unimpressive career prospects. During the evenings he would sit around watching soccer and drinking crappy beer alone BUT he actually had a more or less cute young girlfriend –

no way that guy would have a girlfriend in Menver!

The Weather

I found Bulgaria quiet a bastion from the soul chilling (and sock soaking) winter of Eastern Europe. I arrived in early Jan, the Balkan winter is downright moderate compared to the Romania and Ukraine. During the Bulgarian winter you get about 45 days of really cold weather and slippery sidewalks.

Bulgaria assuaged my Vitamin D deficiency, many days were sunny and I could actually hang out on my patio. During the spring and summer it rained about every other day for a few hours, not a torrential downpour but it's a good idea to bring an umbrella with you. If you're a nomadic seducer in Europe, looking to geoarbitrage your lifestyle and income, Bulgaria is a great option during the colder months. As you can see in this videoblog about meditation that I filmed in the center, the weather is gloomy but not bad enough to keep you holled up in your flat.

If you're not sold yet on Bulgaria…

I'll add that it's relatively undiscovered by the nomadic PUA/digital nomad crowd, unlike some place like Ukraine or Colombia where western men flock like the salmon of Capistrano in search of some femininity and cultural sanity.

In case you're wondering that cover image at the top is the Asen Monument in the center of beautiful Veliko Târnovo. According to the tourism website it commemorates the…

> …uprising of Asen and Petar, which led to the liberation of Bulgaria from the Byzantine Empire. The sword located in the middle is a symbol of the power and prosperity of the Second Bulgarian Kingdom.

It really is a beautiful place

Travel vlogs are not really my foray so checkout this excellent one by the very red pilled Iconoclast.

5 Phases Of Civilizational Decay

July 11, 2018 | by Beau Albrecht | Link | Original Link

How do healthy countries become so pozzed-out that they collapse? This happens one step at a time.

The rise of great nations

What characterizes countries at peak health? In historical times, they often became expanding empires. The right of conquest was simply how things rolled. Robust superpowers today likely will focus on building infrastructure, economic development, and scientific achievements. An impoverished country can become strong if conditions are steadily improving and its society is healthy.

Since the 1920s, imperialism and even recapturing occupied provinces became unfashionable for countries with bad press. Since the 1950s, territorial aggrandizement stopped being chic even for those with good press. Alliance-building happens, spit-in-your-eye wars occur too, but actual expansionism is rare. *However, healthy countries are potentially capable of it.*

Further, they also resist invasion by armies and opportunistic migrants. A country that can't defend its borders—or doesn't—inevitably falls.

Their decline

Frivolous materialism, inertia, and inattention will bring increasing decadence. It's usually a slow process. A country might even coast along a few centuries before all hell breaks

loose.

However, corrupt elites and political factors can cause terminal decline *within a few generations*. Why doesn't the public do something? As the old proverb goes:

> How do you boil a lobster alive without it jumping out of the pot? Turn up the heat *very slowly*.

They haven't noticed us. Awesome!

Decadence generally begins in urban areas. This usually includes the capital itself, where a normal nation is expectedly the strongest. If most of the country is urbanized, without a strong rural population, the results are obvious. However, the decay eventually pozzes things everywhere.

Much of the public might remain pretty normal even in badly pozzed societies. Some will give warning about the way things are headed. *However, they're neither in charge, nor holding the Big Megaphone.* Therefore—especially in recent times—they become marginalized dissidents. It's an uphill battle, but with proper foresight and proper action, the decline can be reversed.

What follows is only a rough capsule summary. (Several other factors could be detailed: economy, religion, etc.) The following generally apply to each phase, though some specifics can occur earlier or later.

Neg: Perfectly normal

Probably not dancing to hip-hop.

- The government, whatever form it takes, prioritizes *the well-being of its people*. Politicians act sensibly.
- The founding population is firmly in charge.
- Incompatible immigrants are not permitted.
- Women and men get along harmoniously. Traditional sex roles are observed, family life is healthy, and immorality is strongly discouraged. A *demi-monde* may exist, but *stays behind closed doors*.
- Citizens treasure their culture. Patriotism is strong.

That's what a normal country looks like. These things aren't even questioned; *everyone knows what works*. As a result, social cohesion is very strong. A moderate economic downturn won't disturb the social fabric.

Poz1: Slight decadence

Not quite Miley Cyrus levels yet.

- Wealthy interests begin co-opting the legitimate government.
- The founding population becomes apathetic and distracted by idle pursuits.
- Ethnic tensions create new challenges, sometimes encouraged by political factors.
- Minor degeneracy becomes visible: mild immorality, a little open homosexuality, slight gender bending, etc. Most consider all this abnormal, grudgingly tolerated.
- Artificial cosmopolitanism gets chic.

The public is kept unaware of the first item. The other items are *made fashionable* among some circles. Norms are challenged, but the common people still understand what's normal. Strange academic theories arise. They have no effect then, *but will later*.

This modest degree of decadence isn't particularly threatening—*yet*. However, a colonial empire starts running out of steam. A superpower begins losing its dynamism.

Poz2: Aggressive abnormality

Charming, innocent maidens enjoying the fresh air

- Leftists start getting everything wrong. Nominally conservative politicians neglect to fix these mistakes. Bureaucrats become obstructive careerists.
- The founding population loses its resolve and self-awareness.
- Open borders policies begin.
- Traditional morality loses official support. In-your-face degeneracy appears. The sexual marketplace is in chaos. Relations between the sexes decline. Fertility begins dropping.
- Patriotism and cultural pride start diminishing.

Serious structural problems develop. Colonial empires start crumbling. Superpowers become lackluster. Even responsible leaders who manage to get in office can only do so much.

Loading...
Social cohesion diminishes. Courts start being more about word games than justice. Abnormality demands accommodation—*and gets it*—then they demand more. Sporadic riots (usually politically motivated) and high crime rates become a regular feature of urban life, ineffectively handled by the government.

Poz3: Decadent decline

This is your brain on feminism.

- Plutocratic convergence is complete. Even ostensible representative democracies are hostile to the public. The lunatics are running the asylum.
- The founding population is perilously declining in numbers and power.
- The country has become thoroughly colonized through population replacement immigration.
- Healthy families are becoming relatively scarce. Dysgenic trends long in place are dragging down society.
- National sovereignty becomes a joke.

Abnormal is good; normal is wrong. *Fair is foul and foul is fair.* The government might *appear* stable, but tremendous problems are accumulating. Opposition is suppressed by any means available.

Still, the country itself is *literally fragmenting*. Their enemies openly gloat. Not even the police can control "no-go" zones. Massive riots erupt. Secession movements may arise, either from ethnic separatists, or the founding population wishing to preserve part of its own country. However, the government remains overconfident, sometimes doubling down on their mistakes.

The last hope is dissidents gaining power and cleaning house. Moderate reformers will roll things back to Poz1 or perhaps Neg. Meanie dictators will reboot society violently, creating a country with bad press. These counterrevolutions can go too far. However, the alternative is becoming a failed state.

Poz4: Civilizational collapse

Her last words: “Fuck you, Dad!”

Shocked, the ineffectual government discovers that *it’s lost control*. The nation can’t survive with incompetents, crooks, and saboteurs in charge, or with a demoralized public. A radical regime or a civil war become possible.

Also, enemies might take over: either from outside, or those the government had let in. The hippies once said, “What if they had a war and nobody came?” This happens for the citizens, but not for the barbarians. The result, as may be expected, is devastation.

If the barbarians are intelligent and well-organized, healthy nations eventually re-emerge. If the barbarians are dull or unskilled at statecraft, it permanently becomes a Third World slum. Unfortunately, we’re out of Visigoths lately.

Examples

To make a *very* long story short, ancient Rome was Neg for centuries—eventually amassing a vast empire—but began decaying. Tacitus described the Germanic tribes and their deeply traditional society, contrasting them with Rome’s decadence. Juvenal’s *Satires*—written around then or shortly after—showed Rome’s Poz2 absurdities. (They tried to warn those guys…) During the Commodus administration, the slow decline began. The Dark Ages followed.

The USA first became Poz1 during the Roaring Twenties. The Great Depression—certainly a less extravagant time—restored Neg conditions, other than new globalist ascendancy in government. During the mid-1960s, an especially chaotic Poz2 condition rapidly emerged, partly from Soviet ideological sabotage intending to bring Poz4. During the mid-1970s,

the cultural sphere reverted to just above Poz1. The USA returned to Poz2 in the 1990s, now almost Poz3.

Europe’s history is too complex to cover fully. As a rough summary, Western Europe is generally Poz3, following decades of cultural Marxism and misrule by globohomo Eurocrats. Sweden rapidly approaches Poz4. Germany, Britain, and France aren’t far behind. Eastern Europe is generally Poz1 or Poz2, depending on the location.

Rolling back the decline would be quite prudent.

I Was Detained By Icelandic Police After My London-Bound Flight Redirected To Keflavik Airport

July 11, 2018 | by Roosh Valizadeh | Link | Original Link

This article was originally published on Roosh V.

For my June trip to Washington D.C., I chose Icelandic discount air carrier Wow Air to save $400 compared to the airline I normally use. There was only one catch: on my return, I would have a connecting flight in London's Stansfeld airport. I know I'm banned from England, but it should be safe to have a layover where I don't have to go through customs, right? Four-hundred dollars was enough motivation to find out.

The journey began with Wow Air #116, a red eye flight from BWI airport to Keflavik, Iceland's main airport. I landed in Iceland without incident and had a brief layover that did not require me to go through passport control. I then boarded Wow Air flight #826, an Airbus A321 that was full with over 200 passengers. I sat in my assigned window seat, 6F, next to a cute American girl. I was too tired to make small talk. The plane departed on schedule and I dozed off.

Not long into the flight, I woke up to the captain making an abrupt announcement: “Flight staff to the captain’s deck.” The lead flight attendant went into the cockpit and came out a few minutes later. The captain then made another announcement: “Because of a security issue, we have to return to Keflavik. We will land in ten minutes. I’m sorry for any inconvenience.” The airplane made a U-turn and dropped altitude.

I’ve been on a lot of flights in my life, but I never had one turn around due to a “security issue.” Was it because of me? There’s no way the authorities would inconvenience hundreds of people because one writer said some mean words on the internet, I thought. But as we approached the runway for landing, I began to mentally prepare for the worst.

After we landed, I asked the American girl for some gum in case I'd have to do some talking. She only had white Tic Tacs. I took them and added, "If they take me off the plane, it was nice sitting next to you." She gave a weak smile.

The airplane taxied to an isolated area away from the terminal. I saw one police car parked outside. I closely observed the flight attendants to see if they would give a tell by looking in my direction, but they held a stiff poker face. They must be trained to not let the "terrorist" know that he has been found out.

The front door opened and two male Icelandic police officers entered. The lead officer started counting rows as he walked down the aisle. An excited man wearing a yamaka stood up and filmed the scene with a tablet. Would I be the lucky game show winner today? The officer stopped on row 6 and looked directly at me. "Daryush?" he asked. I nodded my head.

My two seat mates cleared the row so I could get out. I glanced behind me and saw a lot of nervous faces. "Should I get my stuff?" I asked. The officer said yes. I opened the overheard compartment and grabbed my laptop bag and hand luggage. The entire cabin was silent. I hadn't trimmed my beard in months so they probably thought I was a real terrorist trying to Allahu Akbar the plane. I kept my head down. I felt so embarrassed. I didn't mean to delay everyone's travel plans to save a couple hundred bucks, but I underestimated how far the UK government would go to prevent me from stepping foot into the country, even for a layover.

The officers escorted me to the police car. I sat in the backseat with the junior officer. He kept a close eye on me for any signs of illegal aggression. All my fatigue disappeared.

"I know why this is happening," I blurted out. "I'm banned from the UK, but I thought it would be okay to have a layover there since I wouldn't have to go through UK passport

control.”

“We’re not familiar with your case,” said the officer in the driver’s seat. “Why are you banned?”

“Because of *words*! Because of things I’ve *written*!” I lowered my voice. “Theresa May is keeping me out because she says I’m a misogynist while she lets in thousands of migrant criminals. It’s so dumb.”

Icelandic people are not normally chatty and these two officers were no exception. I looked at my hands. There were shaking. I squeezed them between my legs.

The car stopped and the officers escorted me into a holding cell. It had a cot with a pillow and a short table with two blankets. They took my passport and locked me in. I looked up at the ceiling and noticed a camera in the corner. I wondered if there was also a microphone. The wind was so strong that cold Icelandic air was whistling into the room. I briefly considered joking with the officers that I would complain to the United Nations for inhumane treatment.

The junior officer came back with a cup of water and told me to hang tight. I alternated between pacing the room and sitting down. I tried to inhale deeply to relax myself but I could only manage shallow breaths. I took some pictures of the room and imagined what I would tell my mom.

Loading…

The supervisor came into the room. “So after your flight left we got a call from England…”

“A call from who? Someone in the government?” I eagerly wanted to know how their border system worked.

“We just got a call,” the officer replied, not wanting to give details. “And it said that you’re on the flight and you’re not allowed in England. At first we weren’t going to do anything, but then my station manager called and said that we need to bring you back.” So the UK government receives passenger data from all inbound flights that is

cross-checked with their immigration and criminal databases. It's great that they have a locktight system to keep their citizens safe from a thought criminal like myself, yet somehow *thousands* of Muslim immigrants manage to enter the country to sexually mutilate and abuse females, including children. It's okay to harm British girls with physical violence as long as you don't trigger them with internet articles.

"I bought this flight because it was cheap. I know I'm not allowed in England, but I thought a layover would be fine. I guess they didn't know I had another flight out of the country. Well, I'd like to book another flight if that's possible. I just don't want to go back to the US. I'll go to Africa, even."

"Okay, this will take some time." He left the room but didn't close the door, indicating to me that things were de-escalating.

Serving hard time in Iceland. I almost got a prison tattoo.

Ten minutes later, the supervisor came back and showed me his smartphone. It had the cover of my book Bang Iceland. I grimaced. How do I explain to him that Iceland was one stop on a multi-year fuck tour?

"I was in Iceland a long time ago," I started, noticing that there was a female officer standing outside the room. "When I was younger, I would travel to countries and then write books about how to… date women."

"So you have a black belt in women?" The officer grinned while motioning to his belt.

"Something like that. It's macho talk. I believe men should be masculine and women should sub… should follow men. That's why I got banned in England. But you can't say that anymore. I know in Iceland the women are more strong and independent. They don't believe in old-fashioned arrangements."

“Are you married, by the way?”

“Obviously not,” I joked. Him and the three officers outside the cell started laughing. He left the room and told me to continue waiting.

I stared out the window and saw an airport worker driving a baggage car. One of the bags fell out and he immediately stopped the car to retrieve it.

How many more bags will fall out of my baggage car? The book I wrote in 2011 will cause me trouble in this country. The article I wrote in 2015 will ban me from that country. The meetups in 2016 will get me attacked from this mayor or that politician for cheap political points. Bags will keep falling out because of things I’ve done in the past, even if one day I become Mother Teresa.

The supervisor came back. He said, “You’re free to go. There’s no reason for us to hold you.” I served one hour of hard time. Any longer and I would have started my first prison workout.

“Do I have to get a stamp to enter Iceland?” I asked.

“I already gave it to you.” He handed me my passport.

I gathered my things and he escorted me into the airport hall. “I hope I made your day a little more interesting,” I said.

“You did, but a few of my officers were reading the news articles and got upset over the things you said.”

“The media has made me a total monster, a rapist, a horrible person. It’s all fake news. I’m not a bad guy. They ruined my reputation and…” I considered explaining further, but even if you accept the most rosy interpretation of my writing, without all the distortions from the media, can you name someone who is more extreme than me when it comes to

sex relations? Maybe I really am a monster. “They ruined my reputation and… I will always have to deal with that.”

I stuck out my hand and added, “Thank you for treating me well.” He shook my hand. I walked away and sat down on a bench. I would have to book another flight, and maybe a hotel room, but first I had to call my mom and tell her what happened. She won’t believe it.

(((Sacha Baron Cohen))) Pretended To Be A Disabled Veteran To Humiliate Sarah Palin And Other Republicans

July 11, 2018 | by News Syndicator | Link | Original Link

Via Breitbart:

Sarah Palin excoriated Sacha Baron Cohen for disrespecting the military after the comedian posed as a disabled veteran to interview the former Alaska governor for his upcoming Showtime special.

Comedian Sacha Baron Cohen is preparing a new seven-episode series for the premium cabler called *Who is America*, where he reportedly dupes famous Americans such as former Vice President Dick Cheney. Palin was just one of those personalities and former government officials the comedian tricks into appearing on camera.

On Tuesday, Matt Drudge Tweeted and deleted a post about Palin and other political figures on the right and left being tricked by the Cohen, specifically naming "Cheney, Palin, Howard Dean, Alberto Gonzales, Bernie, Trent Lott, Patraeus, Ted Koppel, and more."

"Yup – we were duped. Ya' got me, Sacha. Feel better now?" Palin said on Facebook.

"I join a long list of American public personalities who have fallen victim to the evil, exploitive, sick 'humor' of the British 'comedian' Sacha Baron Cohen, enabled and sponsored by CBS/Showtime," Palin added.

But Palin went on to explain what she experienced under the guise of participating in

what she thought was a “documentary” about American veterans.

> This “legit opportunity” to honor American Vets and contribute to a “legit Showtime historical documentary” was requested of me via a speakers bureau.
>
> For my interview, my daughter and I were asked to travel across the country where Cohen (I presume) had heavily disguised himself as a disabled US Veteran, fake wheelchair and all. Out of respect for what I was led to believe would be a thoughtful discussion with someone who had served in uniform, I sat through a long “interview” full of Hollywoodism’s disrespect and sarcasm – but finally had enough and literally, physically removed my mic and walked out, much to Cohen’s chagrin. The disrespect of our US military and middle-class Americans via Cohen’s foreign commentaries under the guise of interview questions was perverse.

Palin slammed Cohen and CBS Corp., which owns Showtime, as “truly sick” and challenged them to donate the money made from the project to “a charitable group that actually respects and supports American Vets.”

“Mock politicians and innocent public personalities all you want, if that lets you sleep at night, but HOW DARE YOU mock those who have fought and served our country,” Palin said.

Palin continued:

> And as an aside, for further insight into the wealthy corporate enablers of this kind of “joke”, I’ll add that after great costs on our part in time and resources to contribute to their “documentary” the Cohen/CBS/Showtime production team purposefully dropped my daughter and me off at the wrong Washington, DC airport after the fake interview, knowing we’d miss all flights back home to Alaska. After refusing to take our calls to help get us out of the bind they’d put us in for three days, I wrote this off as yet another example of the sick nature that is media-slash-entertainment today.
>
> Loading…

Palin ended her explanation slapping Cohen for his ignorance, “Feel good and manly about your M.O., Sacha? By the way, my daughter thinks you’re a piece of ****, Sacha. Every honorable American Vet should feel the same.”

Over the weekend Baron Cohen posted a promotional video to Instagram which showed Cheney signing a “waterboard kit.”

> A post shared by Aligboratbrunodictator (@sachabaroncohen) on Jul 8, 2018 at 3:04pm PDT

The video came days after Baron Cohen released another promotional video of Donald Trump railing against the *Borat* star, footage which first appeared in 2012.

A Showtime description of *Who Is America*, which airs Sunday, July 15, says, “In the works

over the past year, the seven-episode series will explore the diverse individuals, from the infamous to the unknown across the political and cultural spectrum, who populate our unique nation.”

At press time, Showtime had not publicly responded to Sarah Palin.

4 Surprising Benefits Of Being A Housewife

July 12, 2018 | by Robin Hennesy | Link | Original Link

My husband and I dated a few short months before marrying last year. We were both working full time and living alone before our marriage. Being a regular ROK reader and fan for nearly four years now, I recognized the potential benefits for our marriage when my husband presented the opportunity for me to stay at home.

My husband has a good job, is religious, and is somewhat traditional. For the first couple months staying at home, I was riddled with guilt about my husband working while I got to stay within the comforts of our home. I worried about being a financial burden and wondered what his family (all of who are very successful in their careers), friends, and coworkers would think of our situation.

After some months, these feelings mostly faded away as I began to see great benefits that my work was bringing to our life. Besides the obvious benefits of my husband knowing I'm safely working in our home and not parading in the streets all day, and having home cooked meals and a clean house, there were many other benefits we gained that surprised me.

1. Our Weight

Basic items like lentils, white beans, bulgur, rice, and ingredients for soup are not only healthy but also quite inexpensive.

My husband has lost 30 pounds since we married. Before we married, my husband was mostly ordering take out to the home or eating pre-packaged snacks and treats. Don't get me wrong, I feed by husband plenty, but somehow he has still managed to effortlessly shed a ton of weight.

I cook him breakfast every morning before work, he usually has two helpings of our dinner meal, and we always have dessert with tea at night. Our friends are shocked that eating like this, especially dessert every night, hasn't led to weight gain for both of us.

As for me, I was hardly eating at all before we married in order to keep down my weight. I often ate only one small meal a day. I was actually terrified that living with a man who ate so much would cause me to gain weight. Shockingly, I have not gained weight since our marriage despite eating at least three times as much as I was before (I now eat brunch, dinner, and dessert).

Being a Nutrition Science graduate, I have no logical explanation for being able to maintain my weight despite eating much more. I can only assume our weight loss and management are attributable to having most everything including bread, dessert, sometimes even yogurt, prepared from scratch.

2. Money

Embracing my husband’s minimalist philosophy really curbed my desire for material things.

My husband has a nice job but we are by no means rich. As I mentioned earlier, I was super concerned about being a financial burden staying at home and have my husband support us. However, my husband shocked me by saying that since we’ve been married, he has been able to save so much money.

Loading…

Staying at home has definitely limited expenses on my end. When I was working and living alone, I would constantly make impulse purchases that added up. Filling up on gas, buying drinks or snacks outside because I was running around busy, and meeting friends for drinks or dinner out would make money disappear fast.

Now I mostly stay home unless we need something like groceries and I try and make meals from cheap ingredients and only buy what we really need. I have decreased purchases for myself down to next to nothing. For example, I have adopted a more natural approach to my beauty routine which my husband actually loves. Instead of getting expensive highlights once every two months or constantly restocking makeup, I have embraced my natural hair color and only use just enough makeup to look tidied up and fresh.

3. In Laws

The success of my husband's family was pretty intimidating at first. My husband's father is a doctor, his sister is in medical school, the other sister is an engineer, and his mother studied chemical engineering before getting married. With all these hardworking women in the family, I was scared what they would think of me with my lowly bachelor's degree and opting to stay at home.

However, I was super pleased to hear that my in laws couldn't be happier with the person their son married. They have seen how well I take care of their son and I think his mother sees that he is being taken care of like she would take care of him.

Even his go-getter sisters have been affected: they have both expressed to me that they want to eventually stay at home after they marry (one of them is affected upon seeing how her career could compromise this dream). I don't think anyone was expecting me to take my role this seriously, least of all my husband, but my efforts have made an impact and I believe our home and marriage is a source of pride for my husband not only with his family, but also with his friends and coworkers.

I may not have a super impressive job, but one would be surprised how even nowadays a woman taking care of her home, husband, and herself can gain respect in even upper-class circles.

4. My Husband's Demeanor

My husband’s coworkers joke that they know he is happy because he always races to the home after work.

When we first married, my husband was very gentile with me. I believe he wasn’t fully sure how to own all the power I was giving him. However, over time, he began to get used to me serving him and me having my role. I couldn’t help but smile when he would ask “Where’s my tea?” or “Why didn’t you bring me water after breakfast?” He had come to expect these things from me and personally I feel it’s truly a pleasure to be needed. It makes me feel irreplaceable. It’s really the biggest compliment for me.

Being a stay at home wife (and hopefully mother one day sooner than later) has really benefitted us both in so many ways our first year of marriage. Of course, there are still times when I feel self-conscious about my status when people ask what I do, but I can honestly say this position feels right in so many ways for both of us.

When a housewife works hard in all aspects, amazing things can get done and she can become a source of pride for herself, her in laws, and most importantly her husband.

5 Classical Composers You Should Listen To

July 12, 2018 | by William Messerschmidt | Link | Original Link

True classical music has remained nearly uncorrupted by modern influence. It is a favorite of many individuals I have known in traditionalist circles, thanks in part to its healthy blend of culture, spirit, emotion, and liveliness. Unlike most modern music, the classical genre maintains Western heritage in its very notes.

Since I was a young child, I personally have listened to classical music. I grew up engaged in the styles and sounds of Bach, Mozart, and Vivaldi. For those of you who are newer listeners to what should be the most revered form of music in the Western World, I have put together a list of my top five favorite composers of all time.

5. Frédéric Chopin

Chopin was a half Polish, half French composer who is quite famous for his nocturnes (short romantic compositions) more than anything. Through his somewhat tragic life, he managed to produce some of the greatest and most recognizable compositions in the entire field of classical music. Two examples would be “Tristesse” and “Op. 28 No. 4,” the latter of which has been sampled in many other tracks.

Chopin’s music is often darker in general feel than that of the others mentioned here, normally conveying emotions of sadness and grief. One could assume that this is mostly due to his short life in which he faced many struggles and unfortunate events. However, some examples contain more positive elements, such as “Nocturne Op. 9 No. 2.” Overall, Polish and French influences adorn much of his musical portfolio.

4. Franz Liszt

A musical genius from Hungary in the 1800s, Liszt produced some seldom heard (in modern times), but very intriguing pieces. I find him to have been a particularly skilled composer who was able to take on many fronts of the orchestra and piano. He was quite well known in his day for departing from the normative principles of music.

His music is normally lighthearted and inspiring, and is one of my personal favorites for listening to while I work or study. Influences in his music came from Slavic, Hungarian, German, and Romani music. Some of my personal favorites from his works are "Hungarian Rhapsody No. 2," "Paganini Etude No. 6," and "Sonata in B minor."

3. Felix Mendelssohn

Mendelssohn was another one of the German greats who was recognized as an extremely talented individual from a young age. Hailed as the “Mozart of the 19th Century” by Schumann, his stance on the development of musical form was rigidly strict, in contrast to Liszt who was mentioned above.

Mendelssohn is famed for his many symphonies, of which I find particular enjoyment in listening to. Some of my favorites out of his symphonies are the “Symphony No. 1” and “Symphony No. 5.” This article could not be written, however, without mentioning Mendelssohn’s astounding piano works and chamber music, of which the “Variations Sérieuses” stand out. Mendelssohn also composed some extraordinary hymns which each deserve a good listen as well.

Loading…

2. Wolfgang Amadeus Mozart

Mozart is one of the few names from classical music that virtually everyone knows. An Austrian prodigy who mastered the concerto, the opera, and the symphony to a degree that few others can boast of, his legacy stands strong today. Even as a man, Mozart displayed a pious faith in the Roman Catholic religion, and lived a moral life that anyone could admire. He did not profit all that greatly off his works, and the cause of his death has been often debated.

Pieces such as the “Magic Flute,” “Requiem,” and “Clarinet Concerto K. 622” display his talent at its most wonderful. Mozart’s music had wide influences to it, from Turkey to Italy, to Austria, and beyond. This musical genius’s works flow best when reading, studying, sleeping, or simply relaxing.

1. Ludwig Van Beethoven

In my opinion, no musician can ever surpass the legacy of Beethoven. Born in Germany, but finding a residence in Austria, Beethoven's skill in composing was matched only by the sheer perseverance seen in his life story. Barely able to hear on his own , and forced to survive some of the most turbulent events in European history, he still produced what are to me the greatest sonatas, symphonies, and concertos of all time.

"Für Elise" is one of the first works that comes to my mind when I think of Beethoven, with its calm and relaxing tone, and varying pace. "Moonlight Sonata" is yet another remarkable construction of Beethoven's, in the same league as "Ode to Joy" and "Rage Over a Lost Penny." I personally listen to Beethoven's compositions constantly, and at many different times in the course of the day.

Honorable Mentions

There are many other composers who made exceptional musical works, but who I did not feel were at the absolute top of the charts. Some of these honorable mentions, who I considered placing in this list but eventually did not, include:

- Johann Sebastian Bach: An extremely skilled German composer famous for his harpsichord and organ works
- Antonio Vivaldi: An early Italian composer famous for his orchestral works like "The Four Seasons"
- Camille Saint-Saëns: A later French composer with a gift for comical and darker sounding pieces such as the "Danse Macabre"
- Pyotr Illich Tchaikovsky: A reasonably well-known Russian composer famous for his "1812 Overture" and ballets
- Johannes Brahms: Yet another German composer, hailing from Hamburg, famous for his many variations on the themes of other composers

I consider the above listed composers to be the greatest of all time. Their works are giants compared to those of modern musicians in any genre, and their legacies have not faded as time strolls on. I encourage the reader, even if they are not an avid listener of classical music, to try listening to some of the enthralling pieces developed by these artists of our past. Who knows, you may find that you enjoy some of them even more than I do.

Australian Government Launches “Code Word” Program To Protect Fragile Women From Bad Dates

July 12, 2018 | by News Syndicator | Link | Original Link

Via News.com.au:

Women who fear they might fall victim to sexual assaults and unwanted propositions have been given a new weapon to defend themselves while on a night out.

From this weekend, women feeling uncomfortable on their date just have to ask staff for “Angela” at almost any bar pub, bar, hotel or nightclub Sydney and the trained professionals will leap into action.

Staff across the city have been trained to either lead the person who asked for help discreetly out of the premises so they can escape or take the complainant to a safe space within the venue — such as a kitchen or staffroom.

If you're not attracted to him, you're in danger!

Bar staff have also been trained to ensure the person who complained has a safe option to get home, by either calling a loved one, ordering a cab or calling police if the situation becomes too heated.

It's all part of a new campaign, launched by the NSW Government this morning, to encourage those feeling unsafe to speak out.

The state's Police Minister Troy Grant says he does not want people to feel "intimidated" or "threatened" when they are socialising in the city.

"Given the increasing popularity of online dating apps, many people are meeting for dates at bars, clubs and pubs having never met beyond the screens of their phone or computer," he told The Daily Telegraph.

The launch comes as crime statistics published by NSW Police reveal sexual assaults in the state have shot up by 7.2 per cent in the past two years up to March 2018.

Indecent assault and other sexual offences have also increased by 6.3 per cent in the same time.

Central Metropolitan Region Police Commander, Mark Walton APM, said Licensing officers are already training venue staff.

"We have been working with our Liquor Accord partners, the Australian Hotels Association, the City of Sydney and others to ensure staff can respond to the code-word concept," Assistant Commissioner Walton said.

"It could be someone on a social media-arranged first date or perhaps a couple has met at one of the 13-hundred or so licensed venues in the Sydney CBD."

The "Ask for Angela" scheme was originally launched in the UK about two years ago in Lincolnshire. After it found support and success among local women, it spread across the country.

When a student in Lincoln posted a picture of the poster on social media, it was circulated more than 25,000 times around the world — with many praising the idea.

Hayley Child, the sexual violence and abuse strategy co-ordinator for Lincolnshire County Council, came up with the idea and said she is delighted with the response it has received across the world.

Loading…

“We’d seen that a few individual pubs around the country had done similar messages at the bar saying that if people’s dates weren’t going well the bar staff would help and call them a cab,” she said in a statement.

“We wanted to do this in a more organised way.”

She added the popularity of dating apps like Tinder meant more people might find themselves in difficult situations, adding that “feedback suggests having the scheme in place makes people feel safer”.

“We have had a really positive response to the campaign, including thanks from victims of abuse for the work that’s being done,” she added.

“Around the country and the world people have sent us messages saying what a great idea this is, and the response has been amazing.”

AHA NSW Director of Liquor and Policing, John Green, said many licensed premises in the Sydney CBD have signed up to the program.

“We have been busy educating venue staff about how to enact the concept and how to facilitate the safety measures within their own environments,” Mr Green said.

“This is not about venue staff replacing the role of police or putting themselves at risk,” he said.

“This is about reinforcing the need to be aware of patron behaviour and to provide options when a date or social encounter doesn’t go as planned.

He’s creepy! Arrest him!

“Participating venues have been quite enthusiastic about introducing “Ask for Angela” to the city of Sydney and we’re rolling out a fair bit of messaging about the initiative,” Mr Green added.

Sydney’s Deputy Lord Mayor, Jess Miller, said, “Everyone has a right to feel safe in the City, at all times.”

“Ask for Angela sends a message that creepy behaviour will not be tolerated and that nobody has the right to make anyone else feel threatened in any way,” Councillor Miller said.

“I, like many people, have zero tolerance for bad behaviour and this is a step toward ensuring that being made to feel threatened, or intimidated is not something anyone should have to put up with.”

In addition to training licensees and their staff, Police and their partners have produced a demonstration video, posters and other materials to highlight how the initiative works.

8 Signs Your Christian Preacher Is Not A SJW

July 13, 2018 | by Howard C. Roark | Link | Original Link

Whether you follow a priest, pastor or reverend, there are signs to look for in order to know if he really wants to help his community or if he just wants to get as many followers as possible by pandering to them.

Nowadays it’s hard to find decent spiritual leaders who really care about their communities and followers. Religion has been turned into a money-making machine, leaving faithful Christians lost in their quest to find a messenger from God who is not trying to take advantage of his role for his own gains.

Is there any way to check for signs that your current priest or pastor is a good one that is masculine, genuinely worries about his community, and isn’t affected by the Cultural Marxist cancer?

Below I will give you some insights that are helpful to know when looking for a good preacher and to also check if a church only wants your money. We already have too many false prophets becoming rich with the word of the Lord and not giving back to their followers. This has got to stop.

1. He has the word of the Lord in his heart, not in his mind

Trust in the Lord with all thine heart; and lean not unto thine own understanding. – Proverbs 3:5

A great preacher doesn't need to know the word of the Lord by tongue, because he already has it all in his heart. He doesn't try to over-complicate his sermon with fancy talking or complicated subjects that make the average Joe feel small or intimidated. He makes his sermons as easy as possible to the average person, who is not so cultured in theology, to relate to them and understand them.

To make it easier for everyone to understand the point he is trying to make, he combines old biblical stories and difficult ancient religious text with daily issues we face today. This combination of the familiar past and present allows the listener to relate to those old biblical stories of centuries ago.

2. He uses the donations to improve his preaching, the Church, and the local community

Iron sharpeneth iron; so a man sharpeneth the countenance of his friend. – Proverbs 27:17

Like a wise entrepreneur uses his profits first to improve his corporation before using for himself, a good preacher uses the donations he received first to improve his sermons and his church. Most of the church money should be used to better equip the church, give more comfort to its people, and help those in need.

3. He knows boys will be boys

For bodily exercise profiteth little: but godliness is profitable unto all things, having promise of the life that now is, and of that which is to come. – Timothy 4:8

He knows boys can't handle staying idle for too long and that they are always in need of some manly activity to canalize all their energy and frustrations. Otherwise, his flock of boys and men will get easily bored. This is why a good masculine preacher proposes every now and then some masculine activities for the boys during the weekend, such as Camping, hunting, soccer, football, baseball, and so on.

A good leader knows that their masculine followers are different from their female counterparts. He knows each one needs to canalize their frustrations and energy in different ways.

4. He preaches "tough love"

He that spareth his rod hateth his son: but he that loveth him chasteneth him betimes.
– Proverbs 13:24

A real masculine and godly preacher doesn’t care if he is going to lose some of his flock when preaching sermons about sensitive issues or hot potato topics. What he really cares about is to bring the truth and real wisdom of the Lord at all costs. For him it doesn’t matter if some people are going to be upset.

Loading…

If your preacher avoids preaching about sensitive topics, such as the role of patriarchy, debt, toxic friendships, the dangers of sodomy, and fake Christians, it means that he is not an old-time preacher and is more like a motivational guru than a spiritual leader.

A masculine preacher doesn’t let his audience control him or his message. If this is not the case, it’s likely that your local preacher and his church only cares about having as many followers as possible. Instead of being a preacher, he is more like a motivational guru who only wants to gather as many followers as possible by only preaching about cheerful, SJW-friendly, and motivational passages of the Bible.

5. He is not afraid of preaching about a women’s true role in life

But I suffer not a woman to teach, nor to usurp authority over the man, but to be in silence. – 1 Timothy 2:12

A good preacher does not cater to his female audience. He teaches them to be sweet obedient followers of their husbands. He also taught their male follower to stop worshiping their wives and carry themselves as the captains of their respective households rather than be wimps who are submissive to their wives.

6. He really helps those in need

But to do good and to communicate forget not: for with such sacrifices God is well pleased. – Hebrews 13:16

When I was living in Arkansas, I knew a wise old preacher who allowed a family that just lost their house in a fire to live in the church's spare rooms while they were looking for

another place to live. A good preacher will find a way to help those who are going through difficult times. He might not be able to help them directly but he will try his best to advise them about dealing with issues such as debt, family, relationships, child disobedience, career, and so on.

7. He is passionate about his work

And whatsoever ye do, do it heartily, as to the Lord, and not unto men; – Colossians 3:23

Like a good leader in any other area, it's indispensable that a preacher is charismatic and put effort into his sermon and way of talking. Everyone should feel his enthusiasm through his preaching and the way he carries himself. A good preacher make his followers feel infected by his euphoric rhetoric to the point that his followers become enthusiastic about it as well.

8. He is old school

He uses the KJV version of the Bible

This one isn’t a requirement, but more of a correlation I found between most good English-speaking preachers. They usually like to use the KJV version instead of the new ones.

A good preacher uses the KJV version and preaches in a way that makes it easy for the average Joe to get the point and assimilate it into his life and daily challenges. He is able to mix the old with the modern life as stated in the first sign to look for in this article.

Conclusion

When looking for a good spiritual leader, remember this: a bad preacher tries to twist God's word to fit into the crazy modern Cultural Marxist agenda and politically correct narrative we live in today. He is nothing but a puppet of his followers, especially women.

How To Survive A Long Haul Flight

July 13, 2018 | by Albert Pike | Link | Original Link

I have spent many a day and night on long haul flights to Europe and Asia, both personally and professionally. Although I don’t have an exact count, from reviewing my frequent flyer credits it has probably been a few dozen in the last five years. So I have a decent amount of experience that I would like impart with my fellow man on tactics I use to confront this type of travel.

Class of Service

First class is obviously the best. Business class is really just about the same as first class if you end up on a three-cabin plane. Paying or obtaining this premium service, unless you are wealthy, can get tricky.

If you are flying for employment and that travel is going to involve eight or more hours in the air, the company should be paying for at least business class, especially if you are expected to start working with no rest period. Most company travel policies provide for this, but stingy managers might ignore that to save a few bucks on the travel budget.

If you are on a federal contract, it is sometimes required, or at least optional, by policy. Also, if your boss still will not comply with company policy and you are entitled to premium seating at the the company's expense, don't feel bad about "going over his head". You shouldn't have to sacrifice your well-being just so a pencil-neck boss can save a few dollars in travel expenses. (And don't think for a minute when it comes his turn to take a 12-hour flight to Asia, he is going to ignore company policy and take a seat in economy instead of booking business class).

If you are flying personally, purchase the premium seat if you have the money. There are many websites available that have "discount" bookings on these seats, and when the cost is compared to economy, it sometimes is not much more. Unless you have some sort of high-end status with a frequent flyer program, don't expect a "free" upgrade at the gate. Even using frequent flyer miles to purchase upgrades has been getting difficult in the last few years. A decade ago these upgrades were easier to obtain. Now, it is almost impossible.

Sometimes when checking-in at the airport, a deal on an upgrade may be offered. Consider it. Otherwise just get a window seat if stuck in economy (even if it is a few

dollars more) so you can sleep without having some fat dude constantly waking you up to go to the bathroom.

If you want to take a chance on a rare free upgrade, dress well. Look like a businessman. Carry at least a blazer and be extremely nice to the gate staff. They are the ones who run the “departure management list” or “standby list” and control access to any empty premium seats. Gate staff goes through training on managing upgrades and are taught to make premium service look premium. A guy with a nice blazer and polo is going to get an upgrade well before a man wearing cargo pants and his vintage Metallica t-shirt.

Carriers

Pick a foreign flag (non-US) company. Generally, they provide better international service. Foreign carriers will give out a decent free meal and drinks whereas American Airlines serves you something worse then a frozen meal and charges for any alcoholic drink.

Direct Flights

If you can book it, even if that means a longer drive or overnight stay in a hotel, definitely book a direct flight if at all possible. Making connections, especially outside of the US, can be like trying to get the last flight out of Saigon before it falls. I’ve had complications on just about every trip because I thought it would be just fine to make a connection, even in Western Europe, but it has never paid off.

Visas

Always check for visa requirements, especially if you carry a non-US passport. Check for visa requirements for interim stops too. And remember if you are traveling for work (even if it is for a short conference), visa requirements can be vastly different then that if you are just traveling for tourist purposes.

Some countries require a visa to make a connection. I have seen many of my non-US co-workers get confined for failing to have the proper visa to get on a plane that is going to their final destination even though they had boarding passes, hotel reservation, itineraries, and other such documentation.

One time I was with a colleague holding a passport from India. He did not get the proper transit visa and while attempting to make the connection was held up for three days while the company and embassy sorted out the paperwork.

Remember that outside of the US and parts of Europe, countries still care about immigration and will enforce it strictly.

Alcohol Use

Back in my 20’s, I used to get blitzed before a flight. We would start drinking in the office before hitting the car service. That is a bad idea though once a few years beyond college age. A beer, glass of wine, or mixed drink isn’t going to have much of an adverse effect. But anything beyond that is going to dehydrate you and those small airline cups of water will not be enough to get you hydrated by arrival time.

I still will have one or two servings of alcohol on a plane but also make sure I have a large bottle of water, which I will consume, about an hour before landing. **Pro Tip**: Buy electrolyte packs that can be easily mixed with water to enhance rehydration.

Dehydration and a hangover is not going to enhance your traveling experience. If you do drink on or before a flight, keep it reasonable.

Drugs

DISCLAIMER: This is NOT medical advice. Consult your doctor before taking anything especially when flying.

I know many men who have various "dosing strategies" for long haul flights. Especially if you are sitting in economy, the experience is torture and most would prefer to sleep through it. If you select that as your choice and strategy, here are the rules I have come up with taking drugs during long haul experiences:

Loading...

Rule #1: Don't take a sleep aid of any kind unless your flight is longer then five hours

The effects will not wear off by landing time, leaving you partially impaired.

Rule #2: Tylenol PM (which contains Benadryl or generic diphenhydramine) is a sound choice

This works for most, but it tends to produce a "hang over" effect. If acetaminophen is not necessary, just take 25-50mg of Benadryl (or a generic) as that is the drug which induces drowsiness.

Rule #3: If you want to go the prescription route, at least here in the US, you may want take a benzodiazepine

To talk your doctor into prescribing one say that you get flight anxiety and most doctors will give you at least the minimum pill amount and dose. Xanax is a good first line solution. It kicks in quick and but wears off in a few hours.

If you have a longer flight, Ativan is an excellent second line option. It has a longer half-life but also takes longer to kick in. And if you really suffer from flight anxiety ask for klonopin as its half-life is about 12 hours and it wears off pretty evenly. At least in the US, these are not handed out like candy though so don't expect to show up to any walk-in

clinic and get a script. Only a doctor which you have had a previous relationship with will most likely prescribe this class of drug to a patient.

Rule #4: A lot of long haul flyers tend to prefer drugs like ambien or ambien CR

These work well for most. Ambien will knock you out for about 4 hours and ambien CR is about 6-7 hours. Take the lowest dose and give it a "test drive" at least a few nights before your flight. Side effects tend to be rare but they do happen.

I remember talking to a guy who dosed on Ambien during a flight. A few days later he was reviewing video on his phone and found one of him eating a steak and drinking with a fellow passenger but had absolutely no memory of the experience.

Rule #5: Certain antihistamines that are OTC (over-the-counter) will have similar sedative effects

Meclizine is effective especially for those who get motion sickness and will induce drowsiness in most. The maximum dose for this should be 50 mg. Pop it when you hit the security line because the action has about an hour of start up time.

Hydroxyzine (antihistamine but used for routinely for anxiety and sedation) is also available by prescription in the US (OTC in other countries), works for about 3-4 hours, can be repeated if desired, tends to produce less of a "hang over," and is easier to talk a doctor into giving you then say a benzodiazepine as it is not a scheduled substance heavily regulated by the FDA.

Rule #6: Always keep any medication in its original prescription bottle or packaging

Some governments strictly regulate these types of drugs. Make sure it has your name on the bottle too and not that of your friend or even wife. Don't "borrow" a drug unless you plan taking it before departure leaving no evidence of consumption or possession. The last thing you want to do upon arrival is end up in confinement because you brought in regulated substances without a proper script into a country with a tight regulatory system.

Rule #7: It is not a good idea to take any drugs before you are actually rolling for take off

The last thing you want to deal with is get a last minute delay or cancellation and then have to try to navigate the airport half whacked-out trying to get to a hotel, rebook a flight, or get back home. Get a drink at the bar just before boarding. Once you start rolling, pop the pill. Both will kick in about the same time and you should be feeling the effects by the time cruising altitude is reached.

My Preference: Ambien does not sit well with me so I usually go for a benzodiazepine. Ativan at 1 mg usually will put me out for 4-5 hours if I have a cocktail to accompany it. I also don't have a problem keeping a small supply around for when I travel.

Here in the US, most doctors won't question a request for such a low dose for your "flight anxiety." Just don't expect to get more then a handful dispensed at a time, as they are a regulated scheduled substance. My doctor will give me ten 1 mg tablets upon reasonable request and that matches the anecdotal experience of my colleagues. As a backup, I will go for fifty (50) mg of diphenhydramine.

Eye Masks and Pillows

These might work for some men but have never for me. I find them annoying and would prefer not to use them. They also bulk out my carry-on bag. If you would like to try them anyway, there are many combos available from major retailers for as little at $20. If you do need hearing protection to fall asleep, I recommend the small plastic disposable kind which can be purchased at just about any drug store or most airport convenience stores.

Technology on Long Hauls

My advice is to just flip it off. It is just a distraction that is going to keep you from sleeping or relaxing. I usually have to work at least part of the day I land after a long flight so I want to take the time on the plane to rest. Or if I am traveling personally, I would rather wake up more refreshed and relaxed to enjoy my first day rather then spend time watching some two star movie on my device.

Listening to music also does little for me. The hum of the engines is usually enough white noise to allow me to "zone out." Most long hauls are devoid of noisy children so the cancellation effect of music is not required. But if you need noise canceling headphones to fall asleep, get the smallest ones you can find. On the rare occasion I listen to music on a plane, I find simple ear buds to be sufficient.

Conclusion

Don’t get tanked before or on your flight. Keep it to one or two units of alcohol. Arriving dehydrated and hung over is going to make your first day or two of travels even worse.

Buy a large bottle of water after passing security. Juice it up with an electrolyte packet and consume entirely about an hour before landing.

Turn the tech off. It might serve as a useful distraction for a few hours during your flight, but is not going to improve your overall travel experience.

Most importantly, enjoy the friendly skies.

3 Ways Living In New York City Hinders Spiritual Growth

July 15, 2018 | by Justinian Wick | Link | Original Link

It’s becoming increasingly difficult for any ordinary man to be close to God in the West. Several adversaries to a holy lifestyle, both materially and intellectually, are within our society, which our elitist friends have empowered unapologetically over the last several generations. However, I believe that New York City is a uniquely satanic center where various forces unite against he who wants to be holy.

As someone who is trying to deepen his Orthodox Christian faith while living in the city, and having grown up here, I am obliged to inform my generation and the next of dangers to spiritual growth. In the end, it is mostly a man who is at fault for isolating himself from the Lord. But here are three huge ways being in New York City doesn’t help with that.

1. Radical Feminism

If you wondered what New Yorker women are like, this is it. This sums it up.

Apart from ruining sustainable long-term intimacy between the sexes, and furthering the emasculation of men, radical feminism has leveled the integrity of women. They have been brainwashed to dress immodestly and flaunt their bodies openly in the name of self-expression and independence. To dress immodestly is one of the only ways a female can claim freedom. Humorously, the “liberated” have become enslaved to the validation of men, especially on social media. Nonetheless, it is the ruling culture in the Big Apple.

In New York City, you can’t walk a mile without encountering a woman dressed immodestly. Times Square shoots images of sexualized women at you from all directions. It’s impossible to use public transportation without being exposed to dozens of hundreds of sexualized women, both in advertisements and in real life. Apart from that, New York City’s nightlife brings out levels of sexual immorality you wouldn’t find in the American Midwest.

Abortion is another plague in the city- the Big Apple is full of pro-choice men and women. That means there are hundreds of dead babies, killed by their “liberated” would-be mothers. I say these women are far from liberated and are enslaved to Satan.

But wait, there’s more…

2. The LGBTQ

Do you want your kids to grow up near this lunatic?

Oh boy, the LGBTQ have astronomical levels of support from New Yorkers, and mainly from big corporations. New Yorkers generally accept the LGBTQ and their inconsistent and anti-human nature dogmas and even parade them on the streets through the “Pride Month” of June. Several pockets of Manhattan, like Chelsea, East and West Village, are LGBTQ towns. I remember walking through West Village not so long ago, and although I still found enjoyment and sincere appreciation of people socializing and drinking, I could feel the sinfulness.

Loading…
For both radical feminism and the LGBTQ, there is an insane pressure to approve of both. I stand my ground, but my peers aren’t as firm. As Christians, we are kind to those we hold dear and those we encounter, but the American Left takes advantage of this. Not approving of a lifestyle is not the same as me being “homophobic.” This reasoning does not compute with many New Yorkers.

3. Materialism

How many of these people will be willing to wait outside church this long?

It's important to keep in mind that materialism conflicts with some of the most fundamental laws God gave to us.

- Not having other gods before God (which often meant sculptures or idols)
- No making nor worshiping a carved image (again, a sculpture or idol)
- Don't murder (people often murder for money or drugs)
- Don't steal
- Don't covet your neighbor's house, donkey, etc. (which leads to breaking the other commandments not to steal, murder, etc.)

With that said, America is a capitalist society. New York City is, hands-down, the capital city of capitalism in the West. And its people are materialistic beyond comprehension.

People camp outside of Apple stores so they can be the first ones to enter. Some wait on hour-long lines for gadgets. People are obsessed with fashionable clothing.

There's nothing wrong with wanting things, but New Yorkers dial it up to 100. Many can say that New Yorkers are materialistic because we have plenty of stores and businesses, and that people like to have displays of wealth, but I believe New Yorkers are trying to make up for the spiritual void within them and in their lives.

None of this compares to the ultimate materialistic killer of spiritual growth: smartphone addiction. With a smartphone, you can access pornography. You can shop. You can play games. You can lose yourself in social media.

The smartphone craze is idolatry. We charge our phones, customize them, and lose our minds if we drop them. Mothers take their babies out for a ride in the stroller through the neighborhood while texting on their devices and being utterly unaware of their

surroundings.

A positive note: I predict that within a few months in New York City, being on the train and not using your smartphone will be a secret handshake between “woke” people. That would be cool.

Conclusion

This article is by no means an absolute, exhaustive laundry list of things that are potential spiritual distractions in the Big Apple. But my purpose was merely to give a preview of the spiritual wasteland that is New York City as a cautionary warning for any man who wants to stay or even live here and raise a family. There are temptations around every corner, and violations of God’s Word are commonplace. I realized that one can be angered by these negative influences, let alone be frustrated. Both are detrimental to one’s spiritual well-being.

The churches are not empty, but they are full of old people, and I am the youngest in any church I set foot in, aside from two babies who can hardly walk.

I pray that the youth will come to the Orthodox Church as I have, and I pray for those who seek to advance spiritually in a modern-day Sodom and Gomorrah.

“For all that is in the world-the lust of the flesh, the lust of the eyes, and the pride of life-is not of the Father but is of the world.”
– 1 John 2:16, NKJV

Justinian Wick
Growing up, Justinian was always described as an "old soul", and he sensed something was terribly wrong with the world, despite all the claims of progressiveness. He spent all of 2016 and 2017 forcing himself to overdose on red pills. Having realized the rampant degeneracy around him, the eighteen-year-old now spends his time forging his masculinity, preaching the Gospel, re-instilling traditional gender norms, and making the most out of the life his elitist puppet masters tried to rob from him.

German “Refugees Welcome” Activist Murdered After Accepting Ride With Moroccan Man

July 15, 2018 | by News Syndicator | Link | Original Link

[image]

Via Voice Of Europe:

Sophia Lösche, a 28-year-old German “refugees welcome” activist, was found dead yesterday around 3.20 pm at the Egino gas station in the community of Asparrena in Álava, Spain, Bild reports.

For a week, nothing was known about her whereabouts since she boarded a truck with Moroccan license plates in Schkeuditz, East Germany. She hitchhiked to her hometown Bamberg, about 260 kilometers south.

A Civil Guard traffic control stopped the truck on Tuesday on a road near the Spanish city of Bailén in Jaén. The driver wanted to go to the Strait of Gibraltar, take a ferry and get off in Morocco, where he wanted to protect himself from European justice.

Loading...

On Wednesday he was transferred to the Central Examining Court No. 6 of the Audiencia Nacional. His confession made it possible to locate the body of the young woman yesterday, her case had been reported in the German media after her family reported her disappearance 24 hours after her death.

She had worked with an NGO on the Greek island of Lesbos, where she helped these so-called refugees. Sources consulted by the media emphasized that the body showed “clear symptoms of violence”. The perpetrator had obviously intended to rape her.

The autopsy, which will probably be performed today in the Department of Forensic Pathology in Vitoria, will determine the cause of death. Also the approximate time at which it happened, so that we can determine whether it was in Germany, France or the Basque Country. This will clarify which court will handle the case.

9 Ways Game Has Changed From 2001 To 2018

July 16, 2018 | by Roosh Valizadeh | Link | Original Link

A lot of men ask me what it was like to run game on American women over 15 years ago. While I don't automatically take the nostalgic view that everything in the past was better than today, if you knew how to cold approach in 2001, you received significantly higher results than from the same effort in 2018.

Many men who tried game back then become addicted to it because of how effective it was, but today, a man in the bottom 50% who tries game is likely to quit within two years because of paltry gains, and then join one of many "say no to women" movements online. Here's how game was different when I used it in 2001 at the age of 22 years old…

1. Boldness created greater attraction

Approaching a girl you didn’t know was so novel back then that if you did it, the girl would become extremely curious, even if you had a horrible opening line. Many would say how “confident” you were, a compliment that you rarely hear today. The boldness alone created such a huge spike of attraction that it was enough to propel you to at least a number or kiss as long you didn’t approach huge groups of girls in the Mystery style.

Nowadays, a girl is approached so often in different types of venues and on the internet that the most direct of openers may give you a minute of her attention (if that). What was bold 15 years ago is now the new standard today, suggesting that there is an arms race of game and status within any society that foolishly allows women to choose their sexual partners.

2. Rejections were softer

In the past, I can't remember being punished for an approach as long as I didn't do something stupid. The standard rejection was "Sorry I have to go back to my friends." Another common one was a girl excusing herself to the bathroom but never returning. Getting rejected wasn't fun but you got over it quickly.

Nowadays, girls with fragile egos have the intention of harshly rejecting men because it's a way they can *feel* more beautiful than they really are. Since they cannot get a Persian Chad to commit to them, they will reject most men and rationalize that they are all "losers" instead of improving their own beauty or femininity. This is why you're far more likely to get a harsh rejection from a girl in the 5-7 range than hotter ones who get pursued by higher quality men.

3. Night venues were more consistent

I could set my clock to a bar or club on certain nights. If it was good last Friday night, it would be good this Friday and also be good next Friday, making it easier to be a regular at a venue and get consistent rewards from it. I remember going to venues every week for a year and not seeing any drop in my return on investment.

Nowadays, venues experience fast churn-and-burn rates because of smartphones, which has allowed females to scratch their itch for always hitting “trendy” venues. Since girls stay in touch with their friends throughout the night, they are much more likely to leave a venue and go somewhere else that is good for the moment. It’s unlikely that a venue will give you high returns for more than a month or two, meaning that you must constantly try out new spots.

4. Girls were thinner

USC
USC
USC

I would estimate that about 40% of girls had a cell phone in 2001. This meant that you often had to call landlines and get an answering machine. Sometimes you'd play phone tag for days, and with younger girls, it was common to call and have her parent pick up. Calling girls for the first time would be more nerve-racking if you were a game newbie, which meant you had to pump yourself up before making the call.

Loading…

Nowadays, a monkey can text a girl with a basic script and get her out on a date, and there will be no doubt that she saw your text within a few minutes because of how attached girls have become to their phones. The bright spot is that if a girl is interested in you, it's much easier to get her out on a date than in the past.

6. Conversations had fewer interruptions

When I approached a girl, I had her undivided attention to spit what I can now admit was poor game. I wasn't cockblocked, I didn't have to compete with her phone, and most importantly, she was capable of having a conversation with me where not every little thing I said was amazingly exciting or interesting.

Today, I'll be lucky if I have a stretch of three minutes where she maintains her focus on me. More likely, I'll get a "Hold on" while she messages friends who are on her way to the venue, and then her fat friends will intrude on the conversation and monitor me like I'm some sort of criminal, and then the bartender will cockblock me because he's thirsty, and so on. The only way for a girl to zone all of that out is if she *really* likes you, which is not going to happen every night.

7. Girls had empty penis pipelines

Girls used to go out and have *zero* prospects in their pipeline. Because of that, they would not only show more interest in you but also follow through on dates with only minor flaking. It wasn't uncommon for me to meet girls who hadn't been laid in months.

Nowadays, not only do girls have full penis pipelines, but their bench is also full of backups waiting to get into the main rotation. Many girls simply don't have any more room to get with a new guy. Even if you are slightly above her starting roster in value, she won't be able to recognize it because all the cock in her life is putting her through a dizzy spell. To bang a girl today, you have to find a girl who recently lost one of her starting penises or wants to try something completely new.

8. Girls weren't as sensitive

No topic was off limits. You could joke about gays, people of other races, and even throw

out some sexist humor. The girls may not have laughed, but they didn't get offended. You could recover from a bad joke and continue.

Nowadays, you can't joke, especially in big cities. **I repeat, you cannot joke.** From the moment a girl wakes up, she's braced to hear something offensive and will be triggered at the most banal of comments that suggest not every human being in the world is equal. You can't even say "That's gay" to something that's obviously gay, and if you suggest that homos should not be able to marry, she may call the police on you. It's clear now that male feminists were the early adopters to treating women as the sensitive children they want to be treated as.

9. Sex was more vanilla

I don't remember having much porn star quality sex until the later half of the 2000's. Most girls acted natural in bed and made basic noises and movements that were sufficient enough for me, a man who only needs a vagina attached to a normal body and pretty face to feel sexual pleasure.

Today, girls go overboard in trying to prove how sexy and dirty they are. Instead of giving me pleasure, I feel like I'm on a porno set where a fat Jewish man will yell "Cut!" any second. Their porno style takes me out of the moment and engages my logical brain into thinking *why* she's acting in such a way with a man she has only known for a few hours. Maybe this girl can make me feel good, but only in a technical way.

Conclusion

While not everything was rosy in 2001, it was significantly better as a man who knew how to approach women. On every metric that matters, it was far easier to connect and sleep with them. It's gotten so bad 17 years later that there are now semi-organized movements dedicated to foregoing contact with women altogether, and they seem to be

growing.

Women don’t care about the grievances of normal men because they think they will hit the lottery and snag a high-value stud at the moment their career becomes everything they dreamed of. Though many women will lose this game, that gives normal men little condolence, and unfortunately I believe things will remain at the level we see today for many years to come.

Tekashi 69 Shows How Clownish The Rap World Has Become

July 16, 2018 | by Alfonso Taft | Link | Original Link

Clown World is not without a King. His name is Daniel Hernandez, aka Tekashi 69. As a rapper with rainbow hair, absurd facial tattoos, and history of underage sex crimes, he has single-handedly proven President Trump's infamous quote: "When Mexico sends its people, they're not sending their best" to be true.

It's almost as if Donald J. Trump was describing Tekashi 69 when he said, "They're sending people that have lots of problems, and they're bringing those problems with us. They're bringing drugs. They're bringing crime. They're rapists. And some, I assume, are good people."

In fact, Tekashi 69 might meet all the criteria listed above.

Tekashi 69 *"pleaded guilty to three felony counts of the use of a child in a sexual performance"* after video was discovered of a naked 13-year-old posing naked on an 18 year-old Tekashi 69. In Mexico, where the age of consent is 12, this wouldn't be considered a crime. In Tekashi's defense, he claims he did not know the girl was underage. As part of his plea deal, 69 was ordered to complete his GED.

In regards to drugs, Tekashi admitted to getting fired from a convenience store job for selling heroin and beating up the storeowner. After returning home from his European tour he was arrested in NYC for choking a 16-year-old fan. Tekashi is also currently being investigated for a shooting involving rapper Chief Keef.

Beef with Chief Keef

On June 2, 2018, two black males wearing hoodies fired at rapper Chief Keef and missed outside the W Hotel in Times Square, NYC. No arrests have been made as a result of the broad daylight shooting in the City's most populated district.

After news broke of the attempted slaying, Tekashi 69 took to social media to taunt his rival and imply that he may know something about the shooting.

CHIEF KEEFSHOT AT IN NYC… Rapper Unharmed

The beef with Chief Keef stems from Tekashi 69 publicly face-timing with Chief Keef's cousin Tadoe's girlfriend. Tadoe later beat the shit out of his girl for face-timing with Tekashi.

After the shooting, Tekashi continued ruthlessly trolling Chief Keef by posting videos fornicating with one of Chief Keef's baby mothers and later taking her out shopping. Tekashi even traveled to Chief Keef's old neighborhood to broadcast his disrespect virally.

Chief Keef

Prior to Tekashi, Chief Keef held the title of the most ignorant rapper likely to kill somebody in a fued. It's important to put Chief Keef's thug status in context because before 69, few dared cross Chief Keef and Lil Reese– two Chicago thugs with a reputation for murder.

At the age of 16, Chief Keef was placed under house arrest as a result of a shootout with police. After filming a video for smash hit, "I don't like" Chief Keef signed a deal with Interscope Records. The record deal didn't stop Chief Keef's and his gang's penchant towards violence and crime.

In 2012, Chicago rapper Lil Jojo began trolling Chief Keef and his affiliate Lil Reese on social media. In a viral video where Lil Jojo and his friends drove by Lil Reese hurling insults, Lil Reese can be heard saying "Immah kill you" at the end of the clip. Later that evening, rapper Lil Jojo was shot and killed on his bicycle during a drive by shooting. Hours after the shooting Chief Keef tweeted:

> Its Sad Cuz Dat Nigga Jojo Wanted To Be Jus Like Us #LMAO
>
> — Glory Boy (@ChiefKeef) September 5, 2012

Rap beef is fascinating to study from a sociological standpoint. Within rap and it's criminal underground kin there is a process of "checking in" when traveling into rival territory. This process involves contacting local gang leaders, and "OGs" of a city or territory prior to arrival. If one does not "check in" he is subject to getting robbed or killed.

Loading...
Does the King of Clown world show respect to the "territory" of feudal ganglords? Absolutely not. Tekashi is notorious for refusing to "check in" when traveling to other cities. As a result he receives constant death threats from gangs.

Does it not make perfect sense that the King of Clown World would have rainbow hair, teeth, and a tattoo of Jigsaw from the *Saw* horror film series tattooed on his face? Would the King of Clown World not be a rainbowed rhyming criminal with YouTube views in the hundreds of millions? Would it not make perfect sense that the King of Clown World is an Insane-Clown-Posse-Beastie-Boys-MS-13-hybrid? If Donald Trump is a misunderstood billionaire possessed to save Gotham, is Tekashi 69 his not so serious counterpart? If

there were an open audition for the King of Clown World Tekashi 69 would make a convincing lead.

50 cent has confirmed Tekashi 69's title of King of Clown World by co-signing 69's claim as "The King of New York."

> A post shared by TATI OUT NOW LINK IN BIO (@6ix9ine_) on Jul 6, 2018 at 1:48pm PDT

In a world where dissidents of a global technocratic world order largely choose to remain anonymous online out of fear of being "doxed," the King of Clown World doxes himself. 69 has given out his address repeatedly and brags about it on record.

> *These niggas lookin' for me, you could hit my jack*
> *I done dropped my address, y'all know where 6ix9ine at*

In a time where literal clowns behave with more class than a significant portion of American women, a bastardized constitutional republic referred to as a liberal democracy begets Clown World, the only true Monarchy of the West. It only makes sense Clown world would eventually crown a King.

Women Are Destroying The Lives Of Their Children By Choosing To Work

July 17, 2018 | by Jared Trueheart | Link | Original Link

Working moms… is this anyone more vain than a mother who has prioritized her career over the care and safety over her children? No, there isn't.

Men don't have a choice whether to work or not. A man's ability to provide is a prerequisite to manhood. A man may choose not to support a family, but if he can't support a family he is no man. We don't have a choice. Women do. And if they choose to spend their time working rather than caring for their children they choose their own vanity over the safety of those children.

According to Time magazine, daycare costs on average $198 per child per week and an after-school sitter costs $215 a week. Even if a mother has only one child the amount of money she brings home after paying for child-care is negligible. Perhaps if women were better women and dropped the whole feminist act they'd be able to find a man who could support her and wanted to. Then those women could be loving mothers. Instead, women are choosing vanity, and it results in harm to their children.

These cases exemplify that.

Daycare Workers Neglect Your Children

The people work at daycare centers don't love other people's children. They may like to play with children or care for children… until they stop enjoying that. Children can be tiring and annoying, especially babies. When daycare workers get tired of children or annoyed by children they neglect children.

This is a first-person account of a working mother. On her first day back at work after maternity leave, she dropped her baby off at daycare. She went back less than three hours later to check on her baby, but by then it was too late. A daycare worker was incorrectly performing CPR on her deceased child. She later learned that the baby was furiously kicking in his sleep but the daycare workers chose not to investigate. The baby was also put to sleep on his side, not on his back. Mothers who love their children don't typically make these mistakes.

The worst part of this mother's account was how she contemplated daycare before doing it. After daycare costs, she was barely bringing home any money. She talked about it with her partner, the androgynously named Lee, who is not identified as the baby's father, but decided that she would keep her job at a publishing house because of the health insurance for her child.

With hindsight, we see the wisdom of her decision.

Working Mom's Neglect Their Children

All those laws about children not being allowed left in cars alone are because of working mothers.

In this first example, 35-year-old Karen Osorio-Martinez forgot about her 15-month-old baby, Sofia Aveiro, because she was running late for work. The baby was in the backseat of the car but the mother hurried to work as a scientist at Proctor & Gamble instead of going to the daycare just five minutes away. The baby forgotten in the backseat died due to heat.

Her husband's name was Henrique Aveiro. Karen didn't take her husband's name. This is a signal of her vanity. She neglected her family because her job as a scientist and her individual identity was so important to her.

Loading...

In another example of women loving their careers so much they'll forget about their babies in the car, 38-year-old Nicole Engler of Oregon left her 21-month-old baby in the car while she went to work as, you guessed it, a pediatric nurse. The baby had passed away by the time she realized it was in the car when she left work for the day.

But the worst part of that story is what happened at lunchtime. She went out to the car to get some money to buy lunch at a coffee shop and still didn't remember her baby in the backseat. Then she talked about the baby at the coffee and still didn't remember the baby.

Needless to say, if these mothers were at home with their children these deaths could've been avoided.

Daycare Are Targets For Child Sexual Predators

Again, daycare workers care for your children until they don't want to. Then they don't really care about your children as long as they're getting your money.

In this example, a woman ran a daycare out of her home. Her brother was the handyman there. He's also a child molester. Years ago a mother told the daycare owner that the handyman molested her daughter. The owner said she would fire the handyman. But because the handyman is her brother, she didn't. The sibling duo was finally arrested after another mother of a seven-year-old girl went to the police.

In the most sickening example yet, a woman working at a daycare admitted to raping four children. Her boyfriend was in prison for possession of child pornography. He told her to sexually abuse children and photograph it and send him the images and videos so that he could masturbate in prison. And she did it.

There she is, the child-rapist with whom mothers left their children, and the pedophile she loves.

When young women decide to get knocked up by bad boys rather than save themselves for a good man they have to pay for daycare themselves. It's a safe bet they'll pick the cheapest daycares they can, which don't do background checks on their workers. And this is what happens as a result.

Is it worth it, the empowered lifestyle?

Conclusion

I can hear it now, "But some women have to work because…" Sure they do. "But those are the extremes." Sure they are. Women have to use daycare because our individualist, feminist, post-industrial culture tells everyone they can do whatever they want. To young women that means sleeping around with bad boys or pursuing some career. Children won't get in the way of their lifestyle, even if it means death or sexual abuse.

The purpose of this was not to blame individuals. I think those mothers learned a lesson too late. The purpose of this article is to highlight what happens to children when we encourage women to work rather than do the most important and noble thing a woman can do, raise the next generation.

4 Observations From My Trip To Vietnam

July 17, 2018 | by William Adams | Link | Original Link

Occasionally I write about East Asia here at ROK, and after having spenth about a month in South Korea, Japan, Vietnam and other locations, I have additional insights and information to share.

Since Vietnam, while being a rather interesting emerging market, has almost completely been ignored on these pages, I will specifically look into America's former arch enemy and what it may or may not offer in regard to travel, women, and similar phenomena. Here are my four major observations.

1. Materially and culturally it is somewhere between the Philippines and Taiwan

The average income level in Vietnam is actually lower compared to the Philippines. On the other hand, Vietnam has less of the ultra-poor slums and more people clustered somewhere in the middle. After all, most Vietnamese are peasants or low-skilled urban "entrepreneurs." The communist government aims to avoid the worst living conditions for its people.

In the same spirit as China after the 1978 economic reforms, influenced by the advice from Lee Kuan Yew, however, Vietnam has slowly yet gradually implemented state-capitalist policies which have increased foreign investment, improved the country's poor infrastructure, and led to higher economic growth.

Since economic development and culture often, although not necessarily go hand in hand, the Vietnamese have generally ended repulsive behaviors like feasting on dogs, cats, and even rodents (in the rural areas).

With the tropical climate, multiple motorcycles literally everywhere, a Chinese heritage, and some degree of modernity all taken into consideration, think of today's Vietnam as somewhere between the Philippines (overall poor) and Taiwan (overall wealthy), both materially and culturally.

2. You will see Koreans everywhere

Koreans are not only making themselves globally well-known through K-pop soft power, but by being physically scattered throughout large parts of the world, including Vietnam. Pretty much every corner of major cities like Hanoi and Da Nang are affected by the omnipresence of Korean tourists. You will definitely see more Koreans than mainland Chinese, although South Korea has a population size of roughly 4% of that of China.

While I am generally sympathetic towards South Korea and its citizens and denizens, they can be a bit annoying with their many silly bathing suits and loudmouthed beta boys. On the other hand, you will see quite many young Korean women in tiny shorts, showcasing their long and slim legs. One Korean girl out of ten is attractive, while only one Vietnamese girl in ten is better-looking than the average Korean girl.

Loading…

3. Most women are average or ugly

Most local girls do not look like this, I am afraid

That leads us to the next point. Unfortunately, most Vietnamese girls are not attractive. Lack of make-up and other “inauthentic” measures are some of the underlying reasons for this, but the facial features are perhaps an even more constraining factor. The typical Vietnamese girl is short, slim, and dull.

You will, of course, find cute girls in Vietnam, but not that many, and the stunning Oriental 9s and 10s are extremely few. For instance, I saw a typical postcard beauty outside a temple in Hanoi, who was dressed in a traditional costume, but she must have been one in a thousand.

4. Da Nang and Hoi An are the best places

#Metoo wanna take a leak there

Vietnam is geographically and population-wise a big country, and I have seen far from all of it. On the other hand, I have seen enough to draw the conclusion that Da Nang and Hoi Are likely the best places it has to offer, while you may skip Ho Chi Minh City (Saigon) and the smaller average cities. Hanoi is not that bad but not as nice as Da Nang and Hoi An.

In Da Nang you will find the most optimal balance between tradition and materially developed areas, and at the same time less of the overabundance of pollution and congestion so typical for the largest Asian cities. Typically, you will use GrabTaxi, a rented motorbike, and a little bit of walking as the main ways of transportation, and they are all cheap. Stay close to the beach area but make sure to take a ride with the extensive cable car in Bana Hills. Even the urinals inside the club New Phuong Dong Nightclub are shaped like a woman's ass, and overall Vietnam has nothing of the #MeToo anti-sexist memes and behaviors.

The small and picturesque Hoi An, on the other hand, offers a retreat at some of its fairly cheap yet high-quality hotels, a clean and nice beach (An Bang Beach), and touristic yet somewhat authentic shops and restaurants.

Conclusion

Vietnam seems very far from a poosy paradise and not a place to dwell permanently. Instead it offers great tourism for a rather low amount of money. Especially if one picks the right spots and avoids those that are not worth the investment in time, energy, and money.

Planned Parenthood Tells Women To Sleep Around To Preserve Its Abortion Business

July 17, 2018 | by News Syndicator | Link | Original Link

Via Breitbart:

Planned Parenthood NYC Action's new fundraising campaign touting the "freedom to f**k" comes in the wake of President Donald Trump's nomination of Judge Brett Kavanaugh to the Supreme Court.

"New Yorkers have more sex than the rest of America (Woo! We did it!)," touts Planned Parenthood NYCAction. "Planned Parenthood of New York City is here to make sure that everyone has access to the sexual and reproductive health care services they need."

"F**k man spreaders … f**k anyone who can afford their rent, f**k whoever has a washer/dryer in their f**king apartments," the video continues.

The clearly stated message at the conclusion of the video is "F**k New York and everyone in it. Protect our right to safely f**k whoever the f**k we want. Donate to Planned Parenthood."

Though some constitutional experts say Roe v. Wade is not at stake with the nomination of Kavanaugh to the Supreme Court, the abortion industry has waged a fear-mongering campaign aimed at donations.

"Brett Kavanaugh has a dangerous track record of trying to block women from getting access to birth control and abortion care," wrote Dawn Laguens, executive vice president of the Planned Parenthood Action Fund, in an email letter to supporters this week. "Just last year, he ruled to block an undocumented woman who recently entered the United States from obtaining an abortion. He also ruled in favor of bosses denying their employees birth control coverage based on their personal religious objections."

Loading…

"Now, President Trump wants Kavanaugh's extreme views on the Supreme Court," she continued. "Based on this record, we can safely assume that he will make good on Trump's promise to only appoint justices who will overturn Roe v. Wade. We must stop Kavanaugh — this is a fight we can't afford to lose."

However, Leonard Leo, an outside adviser to Trump on Supreme Court nominations, has said the fate of *Roe v. Wade* remains uncertain and that the left is engaging in scare tactics that Trump's nominee will overturn the controversial decision.

"We've been talking about this for 36 years, going all the way back to the nomination of

Sandra O’Connor,” Leo said, according to *ABC’s This Week.* “And after that 36-year period, we only have a single individual on the court who has expressly said he would overturn *Roe*. So, I think it’s a bit of a scare tactic and ranks speculation more than anything else.”

Is Enforced Monogamy A Solution To The Broken Sexual Marketplace?

July 18, 2018 | by Reggie Morgan | Link | Original Link

Recently, psychologist and lecturer Jordan Peterson received criticism from his detractors for using the term “enforced monogamy” in a NY Times interview. Feminists mischaracterized Peterson as advocating a form of domestic slavery in which hapless women are assigned to undesirable men. Peterson clarified that he meant the type of socially-enforced monogamy already in common practice, as understood by anthropologists and psychologists.

Dr. Jordan Peterson no doubt offending people with his common sense advice

I observe that, while monogamist social enforcement targets women, legal enforcement targets men as manifest in palimony and divorce laws favoring women. The financial and legal risks for a man of fathering a child out of wedlock or cheating on his spouse in a marriage discourage many aspiring womanizers (or at least give them pause).

Sluts, Whores and Johns in the sexual marketplace

The act of slut shaming — often perpetrated on women by other women — along with Christian religious mores curtailed female promiscuity in the modern Western world while female selectivity and palimony laws curtail male promiscuity. Slut walks and other feminist rhetoric work toward breaking social stigma toward female promiscuity, but do nothing to address the legal imbalance against men. Conversely, as women enjoy greater employment opportunities, the US legal system still treats them as the wards of men where palimony and alimony are concerned.

Without social stigma, with ubiquitous access to birth control, and with the legal system in their favor, women can pursue high volumes of casual sex that, while not consequence free, is certainly consequence mitigated. With their sexual needs easily met, social stigma around promiscuity removed and increased financial means to support themselves, fewer women have incentive to commit to monogamous relationships.

In the sexual marketplace, it’s a perpetual sellers’ market with women as the sellers and men as the buyers in the figurative if not always literal sense.

Vaginal futures trading in a bull market

A sexually frustrated man can resort to buying sex from prostitutes with some risk involved. Here, male sex shaming is most prominent. The Nordic Model prostitution laws

in some countries, and their de facto enforcement in some US states, penalize the sex buyer rather than the sex seller. Pro-prostitution feminists employ their own brand of double think rhetoric that depicts first world prostitutes as empowered women exercising their own agency whilst also calling them victims of patriarchy. In contrast, prostitutes' male clients are uniformly depicted in the media and popular culture as pathetic and dangerous sex criminals.

Legal prostitution: panacea or nostrum for frustrated men?

Podcaster and columnist Dan Savage — whom I generally disagree with — posits that legalization and removing the stigma against both sex sellers and sex buyers would solve the incel violence problem while caveating that sex workers shouldn't be "human shields" against male rage (Real Time with Bill Maher s16e16).

Loading...

I think he's partially right that legalizing prostitution and removing the stigma against sex buyers can be a palliative for some men who can't get laid, but argue that it fails to solve the underlying issue of male self-worth. Further, the potential for negative transactions with prostitutes (a demographic not renowned for their honesty or sincerity) can exacerbate a frustrated man's misogyny.

Emotional Currency and Labor of Responsibility

Another question in the enforced monogamy debate centers around why single men are more likely than married men to run afoul of the law or become violent. While many pundits focus on the sex factor, the legions of incarcerated men who have fathered children or were otherwise successful with women belie that causality. I believe it's the responsibility inherent to marriage, rather than merely consistent access to sex, that dissuades men from bad behavior.

Moments like this make putting up with bullshit at work all day seem worth it

What causes single men with no prospects to act out is the nihilism and depression that comes of feeling unnecessary. I consider monogamy to generate a form of emotional currency comprised of men feeling needed as providers and respected as husbands and fathers. Women exchange emotional capital in return for male labor of responsibility (protecting and providing).

Emotional capital is particularly valuable in a technologically advanced society; as Karl Marx once said: “The production of too many useful things results in too many useless people.” As labor becomes more expendable, a person’s self worth derives more from personal relationships than from professional accomplishments.

In Islamic Cultures: Enforced Polygyny

Under Sharia law, Islamic societies employ a form of enforced polygyny where the high status men get the lion’s share of often very young women (up to four wives each). Sharia law allows for the fact that not all men will reproduce and attempts to solve it by covering up women to remove sexual desire in low status males.

They augment this custom with a draconian criminal justice system that includes beheadings and dismemberment to keep low status males in check (many then channel that frustration into sectarian violence). It’s no coincidence that, according to Islam, the divine reward for death during jihad involves a man receiving 72 virgins in paradise.

What low status men get to fantasize about in an islamist dystopia

Were a secular society to adopt a polygamous culture without Sharia-like enforcements, the skewed sexual marketplace would naturally gravitate toward polygyny, leaving a large enough swath of the young male demographic emotionally disenfranchised and prone to crime.

Conclusion

While women aren't the curators of male behavior, the breakdown of the monogamous family unit robs many low status men of a purpose. As lack of purpose can lead to bad behavior, then unsuccessful men will become more criminal. At a certain point societies that don't socially enforce monogamy will break down in favor of societies that do. The ugly alternative once a culture crosses that rubicon would be an oppressive society similar to fundamentalist Islam, which controls low status men by denying them even visual access to women.

How Consumerism Transformed Society And Became The Only Purpose Of Human Existence

July 18, 2018 | by Beau Albrecht | Link | Original Link

In times long past, most people lived in small farming communities. Everyone knew their neighbors, breathed clean air, ate food we'd call organic today (that's all there was back then), and raised large families. For the most part, the villagers had the same language, religion, and culture. Artisans in town made necessary products by hand. Men tended the fields and produced the goods. Wives stayed home to raise the children. Conditions were like this since the Middle Ages, but began changing during the Industrial Revolution.

Today, that would seem like pretty much an entirely different country. Actually, most of that would be quite dreadful according to modern tastes.

The modern era

Scientific progress brought industrialization. Railways crossed the continent; cities connected by them thrived, and some others began to wither. New products became available, most of which had to be built in factories. As this came to fruition, the automobile in particular was a game-changer. In many ways, this was a big step ahead. However, there were drawbacks.

Large corporations were needed to set up these factories. This transformed the economy, and a regular boom-and-bust cycle began. Economic perturbations even affected the rural communities, and so did wild price fluctuations in agricultural commodities. By 1920, the USA's rural population fell to 50%, and kept dropping. Gradually, they came to the cities, where work was available.

Factory conditions were dreadful—long hours, low pay, and little attention to safety. Pollution became a serious problem. Vast extremes of wealth were on the rise. The market economy, which had worked pretty well up to that point, became distorted. Business interests got immensely powerful. A century ago, the last batch of sensible leftists had made inroads into fixing some of that.

To make a very long story short, the Great Depression began because of the confluence of Wall Street gambling, fractional reserve banking, and inadequate planning. A quarter of the USA was unemployed, and this left an imprint on an entire generation. However, massive war production kick-started the economy again. This required unprecedented deficit spending, creating a permanent large national debt, but all that's another story.

The postwar era

Europe and parts of Asia required a massive rebuilding effort, but the USA was almost completely untouched and ready to go. At last, prosperity began returning in the late 1940s. However, citizens were typically very cautious about their spending, remembering what they'd been through earlier. Planners determined that the public needed a morale boost; narratives promoting the new prosperity were made fashionable. During the 1950s, there was tremendous interest in advertising and consumer psychology. Edward Bernays was a pioneer in this, a clever fellow like his uncle Sigmund Freud.

Many in the big cities began moving to the suburbs, prompted in part by the cities getting too vibrant. The new suburbs often were filled with cookie-cutter homes—as the song goes, little houses of ticky-tacky that all look the same. Eventually, getting larger houses became a safeguard against further ethnic cleansing, though pricy real estate ate into household budgets. Urban sprawl began, and dealing with traffic was unavoidable. Small grocery stores went out of business as the big supermarkets sprung up, with their goods laid out in clever ways to maximize sales.

The suburbanites competed with each other in ostentation. If a neighbor got a new color TV, it was time to get one too! They'd go into debt for a new car if someone else got a better one. "Keeping up with the Joneses" became another factor making large families unaffordable.

The 1960s counterculture reacted against all that. The hippies typically led simple lives, unplugging from the produce-consume-discard cycle. Ecology was a major effort, and fixing the pollution problem began to be taken seriously. Sure, the hippies were a little fuzzy in the head from getting indoctrinated with some interesting academic fads in college, and picked up some new vices, but they were onto something with the "back to nature" effort. Their yearning, sometimes subconscious, was to live closer to the land as their ancestors did.

However, it was not to last; the young Boomers eventually became Yuppies. They took on many characteristics they hated about their bourgeois parents. After the Carter malaise

ended, the economy was in pretty decent shape. They loved buying new toys, and the "shop-till-you-drop" days were under way. If they couldn't afford something, no problem—that's what credit cards are for. Broken appliances were thrown away rather than repaired. Worn clothing was replaced, rather than mended.

Loading...

The New Normal

Wages were rising relative to inflation, but peaked in 1972, and it's never been the same since. Productivity per worker kept rising, but wages began to stagnate, while corporate profits increased. Undercutting from cheap imports, enabled by globalist trade policies, started eroding manufacturing. The middle class was on the verge of a decline. A few still lived close to the land (including the very unfashionable rednecks), but their numbers continued dwindling from urbanization and corporate farming.

The economy went through some more boom-and-bust cycles. The latest bust was a decade ago, again caused by Wall Street gambling, banksters, and inadequate planning after the lessons of the past were forgotten. The corporations bounced back fairly quickly—some bailed out for being "too big to fail". Meanwhile, the middle class was devastated.

Still, the Voodoo Economy had enough survivors to keep the produce-consume-discard cycle going. They serve as cogs in the machinery of the big corporations, keeping the deliverables moving down the pipeline. They buy the products too, and having the latest and greatest gadget is one of their few joys. Getting a bigger flat panel TV is a thrill, and upgrading their cell phone every year is a must. There's a name for them: Bugmen.

Life in the Bug Hive

The Queen Bee supervising the drones

It's a pretty hollow existence—not quite to *Brave New World* levels, but not far. Individualism means getting a tattoo or becoming an urban elf. They're disconnected from their roots, yet avid participants in mass culture. Their entertainment is as much of a product as their news is. They know little of their own real culture; many even were taught that it's evil. They care nothing for their folk, and some would even welcome their own extinction.

Still, Bugmen yearn for something missing in their lives. Some fill this void with movies and games about fantasy and adventure, also products. They get a glimpse of another world—a wilder one, filled with thrills and heroism. Even though it's not real, it's a welcome respite from quarterly reports and database-driven metrics. For others, their entertainment is sportsball, a vicarious whiff of something vaguely resembling the clash of arms of ancient city-states. As for relationships, there are apps for that, of course. If that's slim pickings (which it usually is) another product is porn, an endless fountain of ersatz intimacy. All too often, family life is an afterthought.

The Bugmen are alone in crowded cities, scarcely knowing anyone, but at least there's social media. Many have little to no use for religion; their righteousness is "social justice". Some of the Bugmen even hope to upload their souls to the Matrix one day, a goal their CEOs enthusiastically desire too. Still, why bother? *Essentially, they're already there!*

Universities That Catered To SJW's Are Experiencing Lower Enrollment And Dire Finances

July 18, 2018 | by News Syndicator | Link | Original Link

Via Breitbart:

Over the last few years, a select few schools around the country have shown the high cost of catering to the demands of partisan activist groups and mobs of social justice warriors.

Schools like Evergreen State College, the University of Missouri and Oberlin College are all notorious for their tendency to pander to social justice activists — and now they are paying the price. Although college enrollment is slightly declining throughout the country, these institutions have seen massive declines over just the past few years.

Evergreen State College

The protests at Evergreen State came in response to criticism of a social justice activism event called the "Day of Absence," which involved asking white community members to leave campus for the day. Professor Bret Weinstein, who received calls for his resignation after he refused to participate in what the *New York Times* called "a day of racial segregation," shared video and photos on Twitter of Evergreen students roaming the college's grounds with baseball bats to intimidate Weinstein and his few campus supporters.

Evergreen announced in May that the college was facing a whopping 17 percent enrollment drop for the 2018-2019 academic year. Former Evergreen Provost Michael

Zimmerman said that there is no doubt that the administration's sympathies for irrational leftist protesters led to the "enrollment crisis."

"The enrollment crisis at Evergreen, and make no mistake about it, it is a crisis, will not be fixed until the actions of last spring are acknowledged and their underlying causes addressed," Zimmerman said. "To pretend that students fleeing Evergreen is simply a function of the economy or because of bad press generated by the far right is both misleading and counter-productive."

University of Missouri

Loading…
Many people remember the high-pitched yell of former University of Missouri professor Melissa Click. Click found herself at the center of weeks of unrest at the University of Missouri in 2015 and 2016. Click rose to infamy after a video of her calling for a student photojournalist to be physically removed from campus simply because he was documenting the protests. The protests erupted in response to the administration's alleged mishandling of several racial incidents on campus. One of the incidents was later proven to be a hoax.

That was three years ago. Since then, the University of Missouri has faced a host of challenges. By April 2017, the university was forced to close seven residential buildings. The *New York Times* reported in 2017 that enrollment at the university dropped an astonishing 35 percent in the two years following the protests. The university itself even told the *Times* that the 2015 protests are the driving force behind the massive enrollment drop.

Oberlin College

Oberlin College in Ohio is notorious for its over-emphasis on social justice politics. It is the alma mater of social justice icon Lena Dunham, who once published an art video that celebrated the "extinction of white men." In 2015, Oberlin students accused their school of "cultural appropriation" over accuracy issues with certain cultural dishes that were offered in the dining hall. In December 2017, a local business claimed that Oberlin administrators slandered them by calling them racist for prosecuting alleged shoplifters.

It was announced last week in a series of reports that Oberlin now faces a myriad of financial issues including enrollment declines and "negative" credit ratings. In January 2018, reports claimed that Oberlin was facing its lowest enrollment numbers in over a decade.

Most Anglo Men Are Cucks

July 19, 2018 | by Subetei Gur | Link | Original Link

If you are an avid reader of ROK, you will by now be familiar with the catastrophic condition of Western Civilisation. You will also, via the almost repetitive literary exploration on the part of the myriad of writers here at ROK, be deftly familiar with the nuanced reasons as to why this is the case.

Truths such as women's suffrage being the cause of bigger and more Orwellian governments, family courts always screwing over the male in the relationship, unchecked migration leading to higher-birth-rate-higher-violence-demographic-replacement Jihad, and many, many more have been discussed ad nauseam on this site as well as many other reputable collections of masculine utterances on the internet. You would thus understand that it is rather insensitive, then, of me to say that these discussions are **getting fucking boring**. But I had to say it.

We've invested countless hours of internet attention repeating the much needed mantra of these truths, and have lamented in no small measure at the degeneracy of Western society. But what have we achieved? More discussions? More impotent internet outrage? More well spoken public intellectuals that inspire people's heads but remain distant to people's hearts? Quite frankly, nothing is changing.

Intellectual Darkweb

But I know something that many of you also know and are reluctant to divulge. I know that the root cause of all of this is the Western male's pathological deference to women. I know that it was white knights that handed women and those without property the right to vote. I know that cucks and manginas skewered the remnants of male dignity and free market enterprise to the alter of pussy worship and, with masochistic glee, ushered in the fall of their own societies.

And I know that, in the full face of the destructiveness of playing identity politics, it is **Anglo men** that OVERWHELMINGLY succumb to the seductive forces of pussy worship. That's right, you can't fucking help yourselves. Maybe it's genetic, but it doesn't matter. The mere sight of a female in distress causes you to step over your own mothers to rescue them. The disapproving crocodile tears of women causes you to, as if possessed by a demon, hand over the last connecting sections of your testicles on a gold platter.

Anglo fathers would rather accept the destruction of civilisation than swallow the discomfort of seeing their daughters not have their princess demands met. Similarly, Anglo husbands and boyfriends would rather tolerate total self neutering than having to muster the testicular fortitude to confront the horrid behaviour of their partners.

Loading…

They willfully create entire welfare states where the productive are stripped of their resources, often in excess of 50%, in order to appease female voters that feel entitled to those resources. They blindly usher in public sectors that inefficiently guzzle tax funds to create jobs that predominantly gear towards female employees. They corrupt and mutate the legal system such that nowadays, most of the English speaking world criminalises natural verbal conversation between men and women. And, with an air of vociferous righteousness, they make eunuchs of themselves and their fellow men, all in the pursuit of basking in the glory of female approval.

Even nut jobs on the extreme right harbour fanciful illusions about women, and believe

irrationally in the almost laughable idea that white women possess a divinity that must be cherished to the point of explicit worship. The arguably positive elements of their racial homogeneity is more than tainted by the pathetic blue-pilled conditioning that they cannot shrug off.

Not cucked

Perhaps these criticisms seem insensitive or even outright derogatory, but find me a supremely cucked politician in the Anglosphere and I can guarantee that his surname is not Ivanov or Takahashi or Wang for that matter. Most Anglo men cannot be reasoned into springing to action and enacting change in a dying society. But they can be emotionally riled up. And if ROK can lay claim to any immense 21st century achievements, let it be that we riled up men across the West with anger at the enunciation of their pathetic cuckery. I propose two new hashtags that will hopefully go viral and even become culturally ubiquitous across the West: **#AngloCuck** and **#AngloCuckery**

I applaud you all to insert these sweet little encapsulations of facetious mockery into all corners of the internet as you see fit. I applaud you to recruit these terms into your vast arsenal of verbal insults when conversing with friends. I applaud you to reflect on the deeper, albeit comical meaning behind these terms and use them as a constant reminder of your own shameful propensity to white knight for females.

Unless men take the reins of civilisation, the West will continue to crumble. If this (hopefully) seismic cultural movement is the last stand of the West, then so be it. These hashtags are *meant* to be insulting. Get angry, God damn it. Be insulted. Show some fucking rage. And use that rage to fuel the drive to take action. Or your civilisation fucking dies.

Subetei Gur

Gur is a disillusioned descendant of Genghis Khan with too much testosterone for society's good. Women hate him. Women love him. Men admire him. The establishment wants him dead. However, he is not dead, for his telomeres do not shorten upon each successive cell division, rendering his acquisition of slippery vaginal abysses ad infinitum.

What Really Happened During The Russian Revolution

July 19, 2018 | by William Messerschmidt | Link | Original Link

If there is any single event in human history that leftists worship, it is the communist Russian Revolution. They idealize it as some sort of glorious triumph of the common man over the establishment, bringing equality to all. What they do not realize is how foolish that perception truly is. The Russian Revolution was a brutal, horrible, and excessively bloody event fought for nothing but the changing of power to even more sinister hands. In this article, I will explain why I draw that conclusion, and how bad the revolution itself truly was.

The Road to Revolution

As everyone reading this article likely knows, the ideology of communism was a radical (and nonsensical, to boot) solution to the struggles of the individual worker in the Industrial Revolution. It had evolved from the ideologies of Jacobinism and Socialism, with very little difference from their principles. Rather than allow the free market to work as it wished, philosophers supported concepts such as the public ownership of property, free love, atheism, and worse degenerate ideas.

In the 1900s, before the First World War, communism and socialism were fringe ideologies. Some groups had radically attempted to apply it, and failed miserably, due to the economic illegitimacy of communism and socialism, and some (such as the Paris Commune) were stomped out by government forces. However, Russia's poor situation near the end of the war offered the opportunity to the radicals to construct a true communist state.

It is here that we begin to see the roots of the revolution take shape. Russia entered the First World War drastically unprepared and underdeveloped for modern warfare. Their Tsar, Nicholas II, was incompetent and unskilled at political and military matters. Serfdom for many years had crushed the Russian nation's chances at full industrialization, and her economically impoverished state provided no assistance.

Russian troops, often illiterate and uneducated peasants, were sent to fight many of the best equipped and trained armies in the world, while many did not even have a rifle in their hands. As can be expected, the Russians struggled to pull off one major victory. As a consequence, families back home starved, and the poor living conditions grew steadily worse.

As these events happened, radicals began to rile up the populace with promises of wealth, freedom, and unity. Desperate for anything other than the Tsarist monarchy,

Russian veterans and citizens began to follow the communists. In other circles, calls for constitutional monarchy and republicanism were made, and many supported those movements as well.

The February Revolution and the Intermediate Period

As time grew on, large masses of workers and other civilians went on strike, and on 11 March, 1917, the strikes exploded into barbaric riots. Rioters destroyed government buildings, killed officers of the Russian Army, and worse. In need of action to hold the nation together, the Tsar sent out his army to bring the riots to a halt, but instead wound up with his own army deserting to the side of the enemy.

Nicholas II then dissolved the Duma, and stripped it of its power. With disorder engulfing the country, the Russian national parliament (the Duma) established a temporary government to maintain control. Leading the temporary government was Prince Georgy Lvov (in the role of Prime Minister). Under this provisional government, the first Marxist would also enter a government position, Alexander Kerensky.

Loading...

In the course of this, socialist “soviets” that were made up of left leaning soldiers and working classmen, but dominated by the leftist middle class, began to work at dividing the Russian populace. Fragmented socialist groups split apart the alliances in the soviets, and attempted to usurp control of the Duma. Vladimir Lenin’s arrival in April would only further divide the Socialist Party in Russia, splitting it into two separate parties.

He began to preach around this time about how Russia should immediately withdraw from the war, give free land to peasants, and give out free bread. The government refused to leave the war, and the power hungry socialist party orchestrated new militias, given the name “the Red Guard,” to utilize violent methods to accomplish control over the Russian people.

The Reaction

Soon after, the Bolsheviks began a sort of takeover in the Russian Socialist Party, with their main message being the classic slogan “All power to the Soviets!” describing their movement on its own. Immediately, as the Provisional Government began to see the shift in power, they moved to adapt to the situation. Prince Lvov resigned his position in favor of Kerensky, who would then begin arresting his competing Bolsheviks. Leadership figures such as Leon Trotsky were arrested.

However, as the Central Powers continued to batter Russia, she finally snapped. The military mutinied, and a republic was established. It would not be long before the Bolsheviks would destroy their own promise of equality, however, and convinced the government to strip all Bourgeoisie citizens of their right to government participation.

October Turns Red

In November (October on the Julian Calendar), with enough power under them, the Bolsheviks under the command of Lenin made their move. In a sweeping revolution, the communists sent out their militias to occupy government buildings and attack public officials. In the process, they spilled the blood of their own countrymen without remorse, in incidents such as the Assault of the Winter Palace.

In the way they fought, no humanity or dignity was shown. At the end, the Provisional Government was forced to give away its power to the Soviets, of whom a new council was established.

The Catastrophic Aftermath

With the socialists in full control of the Russian nation, many policies against common sense and profit were implemented. All private property was then owned by the state, all banks became property of the state, and fixed wages were implemented. Unsurprisingly, the economy collapsed. Peasants were required to submit all harvests to the state, and were not paid enough in return to survive.

Once again, Russia descended into starvation. A massive black market was established as a result. In response, the government used executions to suppress it, but still failed. Lenin was forced to allow the selling of goods on the market again.

Communist bloodshed was not yet over, however. Later on, as the Russian Civil War brewed, red forces would brutally execute the Tsar and his family, and bury them in shallow graves. Churchgoers and clergy would be tortured and massacred, and any who opposed the iron fist of revolution were executed. The pool of blood then generated by the Russian Revolution became just as great as that establishment they replaced.

A Certain Conclusion

As can be seen from the above article, the Russian Revolution was no glorious affair. It was filled with needless bloodshed, incredible cruelty, and in the end, it would ironically fail for the exact reasons the revolution was fought, nearly reverting to the previous economic system. We can see that there was virtually no “compassion to the poor” that the communists promised. It is obvious that the narrative fed by the left is a falsehood, and so we should educate ourselves to disregard it.

How To Keep Your Crotch Cool During The Summer Heat

July 19, 2018 | by Robert Patton | Link | Original Link

The following article was sponsored by SHEATH Underwear.

The rising temperature tells us that summer has arrived, and with it comes that unmistakable discomfort of a sweaty nether region. It is a predicament we as men are all too familiar with; making your way through the daily grind when, all of a sudden, the boys pass their point of expiry and are now clinging for dear life onto your inner thigh and anything else within their sticky reach.

Nothing can compromise a man's focus and his calm, cool collectedness quite like a moist chafing and the constant need to readjust. Fortunately, there exists a type of undergarment designed specifically for the purpose of making these sweaty stick-situations a thing of the past. Here are just a few of the ways in which a quality pouch underwear can improve your everyday life.

We have a special discount for ROK readers: use promo code KING to save 30% off your first order. **Click here to visit SHEATH Underwear.**

1. Keep it separated

First and foremost, the key to combating vexation in the testicular region is isolation. A carefully designed separative pouch will make a world of difference in both physical activity and one's everyday routine, especially for anyone transitioning from a life of cheap department store multipack underwear.

An important thing to note is that some pouch designs offer different degrees of separation to be considered based on your personal needs. There are the simple yet elegant kangaroo-like pouches that will cradle your package in its entirety, and then there is the dual-pouch design that takes separation to the next level by isolating not just your package, but also the head honcho from his two lackeys.

2. Keep it dry

Perhaps the most crucial component to comfort longevity in the genital region is maintaining a dry habitat for your serpent and danglers. The quality blend of moisture-wicking material goes a long way in preventing unwanted sweat build-up that can lead to chafing, irritation, in-grown hairs and, in serious cases, infection. Pair this with the separative pouch and now we're talking about a truly miraculous and liberating state of comfort maintained in even the hottest conditions.

3. Keep it cool

With separation and dryness in check, the next concern in choosing the right underwear is fabric breathability. Despite its manly nature, the testicular environment is a delicate one, and with some of the cheap fabrics used in creating men’s underwear, you may as well be sticking your boys inside of a toaster oven. While it may not be immediately apparent, inadequate ventilation for one’s groin area can lead to a world of urological and testicular issues down the road, so lightweight and breathable elasticity is a must.

4. Keep it fly

Comfort and functionality is great and all, but let’s face it – style will make or break the majority of men’s apparel decisions, even when it comes to something as seldom seen as underwear. You never know when you might get caught with your pants off, so best make it a sight to behold with a stylish pair of drawers. Additionally, there is something to be said about a bold designer waistband peeking out above your trousers whenever a shirtless opportunity presents itself.

http://www.returnofkings.com/wp-content/uploads/2018/07/ProductVideo.mp4

Try SHEATH Underwear

All things considered, there is only one brand that I feel meets the criteria of a great pouch underwear, a company with the oh-so-fitting name of SHEATH. Developed by a US Army Veteran while he was experiencing the hottest climates Earth has to offer, their underwear is the pinnacle of fashionable, preventative comfort at a reasonable price-point.

From a medical perspective, SHEATH has subjected their pouch design and underwear products to trial and examination by urologist Dr. James Simon, who has given them the seal of approval. What's more, Dr. Simon has even gone as far as to recommend SHEATH products to patients who require aid in the recovery of genital surgery, as well as men who come to him seeking relief for general discomfort in the genital region.

You may think it strange to be so concerned with a man's underwear, but comfort, style and health benefits aside, a man's underwear is his base layer, point of contact and first line of defense in protecting his outerwear from nature's unpleasantries. Why not do ourselves the favor of utilizing the finest options available to us? Unless of course you are one of those thrill seekers who prefer to go commando, in which case keep doing you.

We have a special discount for ROK readers: use promo code KING to save 30% off your first order. **Click here to visit SHEATH Underwear.**

3 Deadly Mistakes That Are Killing Your Testosterone Levels

July 20, 2018 | by Mo Saleem | Link | Original Link

That headline is a tad dramatic, but I needed to get your attention. Why? Because over the past few weeks of talking to guys on the phone trying to figure out their next steps in natural testosterone optimization, these three mistakes have come up again and again. In this article, I will give you the scientifically proven action steps to fix them fast.

Mistake #1 – Thinking That Traditional Cardio Is The Best Way to Lose Fat

Meet Michael:

Michael Shelly is an endurance athlete who regularly competes in long-distance marathons. Judging by his body composition, he's not exactly a high-testosterone man. Why is this the case? Well, a study published in the British Journal of Sports Medicine found that men who regularly ran long distances (> 64 km or 40 miles per week) had significantly lower testosterone levels compared to the non-athletic control group.

Let that sink in for a moment: men who ran long distances had lower testosterone levels than a couch potato.

Long-distance running puts stress on the body in the form of elevated cortisol levels. Elevated cortisol leads to a decrease in testosterone. How much of a decrease? Well, in this Brazilian study, researchers analyzed blood samples from 20 men before and after a 42.2 km (26.2 mile) race. After the race, the men's cortisol levels doubled and testosterone levels were halved (673 to 303 ng/dL).

Does this mean that you should ditch cardio altogether? Traditional, steady-state cardio, yes. But high intensity cardio can be great. This is Harry:

Harry Aikines-Aryeetey is an English sprinter and his physique is lean, muscular, and strong—all signs of high testosterone. Did he build all that muscle by sprinting alone? Of course not. Sprinters lift weights. That being said, high-intensity sprinting has been shown to induce short-term spikes in testosterone.

The takeaway? Ditch the traditional, steady state cardio. Instead, go for short-bouts of high intensity cardio like sprinting, high-intensity interval training, jiu-jitsu, or any other martial art.

Mistake #2 – Being Chronically Sleep Deprived

You already know that sleep is important, but are you actually making it a priority? Probably not. Chances are that you regularly watch TV in bed and scroll through email and social media past dark. But here's something that might make you reconsider:

In this study, men who slept for 4-hours had half the amount of testosterone the next morning compared to men who slept for 8-hours.

You might say:

> But Mo, I get 8+ hours of sleep every single night and I still wake up feeling groggy and tired.
>
> Loading…

Well, the reason for this is because sleep quality is just as important (if not more important) as sleep quantity. According to leading sleep researcher Dr. Kulreet Chaudhary:

> Timing your sleep is like timing an investment in the stock market – it doesn't matter how much you invest, it matters when you invest.

And as Shawn Stevenson writes in his book Sleep Smarter:

> It's been shown that human beings get the most beneficial hormonal secretions and recovery by sleeping during the hours of 10 p.m. and 2 a.m. This is what I call "Money Time." You get the most rejuvenating effects during this period, and any sleep that you get in addition is a bonus. This is based on the seemingly lost realization that we humans are a part of nature, and when the lights go out on the planet, that's a cue from the universe that it's time for us to turn down too.

Research done by the phone companies themselves reveals that the more time you spend on your phone before you sleep, the longer it takes for you to enter into a state of deep sleep, and the less time you spend in that state as well. I've written a 3,500+ word guide on how to optimize sleep (which you can check out here), but if there's one thing you take action on after reading this article, make it this:

Keep a 30 minute gap between the last time you stare at a screen and the time you intend on going to bed. Just this one thing will radically enhance the quality of your sleep and increase the surge of testosterone you experience during the night.

Mistake #3- Having a Micronutrient Deficiency

Micronutrients are the vitamins and minerals your body requires in trace amounts to sustain optimal function. Of particular importance to testosterone are vitamin D and magnesium. As it turns out, these two micronutrients are the most prevalent micronutrient deficiencies in western developed countries with an estimated 74% of Americans being deficient in vitamin D and 43% being deficient in magnesium.

The bad news is that it's impossible for you to have optimal testosterone levels while having sub-optimal levels of vitamin D and magnesium. The good news is that optimizing your intake of them is perhaps the easiest way to bring your testosterone level back up closer to where it should be.

Your skin synthesizes vitamin D upon exposure to the sun, but most of us don't spend enough time outdoors. Dark leafy greens like spinach, broccoli, and kale provide a great source of magnesium, but most of us don't eat them.

What to do? Opt for a quality multivitamin supplement. I emphasize the word "quality" because most of the popular ones are junk. Consider the fact that 52% of Americans take a daily multivitamin, yet large portions of the population are deficient in vitamins A (35%), C (31%), D (74%), and E (67%) as well as calcium (39%) and magnesium (46%).

Before buying a multivitamin supplement, read the label to ensure that it provides adequate amounts of the key vitamins and minerals.

Conclusion

Look man, increasing your testosterone levels and reclaiming your masculinity involves nothing more than making simple changes in your diet and lifestyle. You already know most of the stuff I wrote about in this article. Why, then, do you continue to make decisions that are against your best interest?

Having asked myself this question in the past, the answer came down to identity. Consciously, I knew my life wasn't where I wanted it to be. Subconsciously, though, I was

sabotaging myself from taking right action. That changed when I realized the fundamental truth that beliefs follow behaviour. Once I started doing the things that I knew needed to get done, regardless of whether I felt like it or not, everything changed.

Your identity is nothing but your evaluation of the actions you've taken. Start taking right action and notice your inner alpha start to emerge.

Questions about natural testosterone optimization? Let's chat.

I Hate Living In Toronto

July 20, 2018 | by Sean Robinson | Link | Original Link

When everything you have ever been told is a lie, everything you say will likely be a lie. I feel as though every time I interact with the outside world, I am being lied to in some way or I can detect fakeness in people.

I went to apply to a job at Dollarama last month and when I met the manager, he told me that they were not hiring despite the fact that right on the entrance door there was a sign saying that “We are hiring”. After the store opened a couple weeks later, I noticed that all of the new employees were either black, Muslim or degenerate tattooed young women.

Welcome to Toronto

Of course, I live in Toronto, Canada, arguably the most anti-white male city in the world. Why would they hire me? I went to go visit the house of an old friend whom I had not seen in years and as we approached the house, a white stay-at-home female neighbour came running over, likely looking for a problem to yap about to her husband for the next two weeks.

We asked about if anyone is living in the house and she said yes, someone is living there. So we turned around and parked on the side street, and after she had gone inside we walked up to our old friends house, which turned out to be completely abandoned and empty. The yard was a mess and there were tree branches blocking the entrance.

Why would this white Canadian lady blatantly lie to us for no reason? Because she fits into the 95 percent of woman these days who are non-stop compulsive pathological liars—all day, every day, every word, everything they say is a lie. It's a little less with men, maybe 75% are the same but not nearly on the same level as women—not even close.

My friend and I went to look for a job last month and as we parked on a side street, the owner of the house came out and said we couldn't park there – despite the fact that many other cars parked on the street. He said he was doing us a favour when he was simply hoping we would object to create a problem out of thin air. He drove away but immediately spun around and came back in the hopes that we would still be there so he could call the city and give us a ticket. These people love to create stupid problems for the simple reason of having something to yap and bitch about for next several weeks of their boring, miserable, and empty lives.

Loading…

I went to Tim Hortons to get a bagel sandwich combo for breakfast and the female cashier tried to pretend it wasn't a combo so I wouldn't save a measly dollar seventy five, and she also didn't ask me if I wanted a piece of sausage on it. When I told the server I

wanted bacon instead, the female cashier gave me a hideous dirty look, as if she was furious she couldn’t screw me over in any way.

Yikes

But perhaps I am simply not fortunate enough to live an honest enough society to experience this, and I understand that many who do will strongly disagree with me. Perhaps I go on about this simply because I live in Toronto, Canada which is an incredibly boring and fake city with awful women—arguably the worst on the planet.

And look, I get it—Toronto is a playground for the New World Order and a toy factory for globalism and is arguably the most media brainwashed city on the planet but still, I wish I lived a society where the average person I encounter could be trusted, but unfortunately I personally do not live in that society, at least not yet in my life.

The small five percent of women who understand honesty, being straightforward, and are trustworthy are the gems, let alone if they are also gorgeous and attractive. They are the keepers and if you have managed to find one, hold on to her and consider yourself a lucky man. If you live in a society where you are surrounded by good natured, honest neighbours who go out of their way to help you in times of need, consider yourself lucky and strongly cherish them in return.

6 Reasons Why Hospitals Are A Corporate Scam

July 22, 2018 | by Andrew Clayton | Link | Original Link

An American hospital is a business—nothing more. Some may be subsidized by our socialist-leaning liberal government, but for the most part, hospitals need you there to get paid. And the longer you stay, the more money they make.

Sometimes a hospital is 100% needed (i.e. a heart attack or compound fracture to the femur), but it's how they manage those numerous "gray-area" issues that makes them a total racket. If you know how hospitals operate, you can avoid their scams and avoid getting ripped off.

1. They rely on "urgent care" centers to generate their business

A few weeks ago, I went snorkeling in the Florida Key's with some friends. I accidentally inhaled some sea water, and a few hours later, started coughing up liquid from my lungs. The next morning, I decided to drive myself to an urgent care center just to get checked out.

The doctor at the urgent care took an X-ray and an oxygen sample—paid via health insurance. I was feeling better and my oxygen count was good, but the doctor told me that my lungs "looked really ugly" and that I should be admitted to the hospital. When I asked him why, I was told that the hospital had "the proper respiratory equipment and medicinal treatments" for my condition, which he insisted was life threatening.

Now at this point, he's got me a little nervous and believing (naively) that I would drop dead on the street at any minute from pulmonary edema. I'm not old, but being far from home and thinking that I was going to get some crucial respiratory therapy, I complied and checked myself into the local ER.

2. They will try to sell you on staying overnight for an "observation"

Um…you guys wanna put ANYTHING into this?

Once in the ER, all the staff did was take blood samples and urge me to stay overnight so that they could monitor me—there was no respiratory treatment at all. When I asked the nurses and doctors why I wasn't receiving any medication or treatment for my lungs (as the first doctor implied I would get), they became irritated and kept changing the subject back to how "important it was" that I stayed overnight. Straight answers here were in short supply.

Four hours later, I was still in the same place – and there was no treatment of *any* kind. The entire time I just sat there, being sold by nurse-after-nurse on needing to "stay overnight." It's appropriate that most nurses are female, because the badgering just went on-and-on. Unfortunately for me, the only thing my body received during this time was a Cuban sandwich—not oxygen or medication.

I decided to leave. I was fine, and I could tell my doctor knew it too.

3. They don't want you to know how your health insurance works

Out-patient is when you slice your hand, get patched up in the ER for a few hours, then go home—you are not at the hospital overnight. In-patient is when you stay in a hospital room overnight, and piss-and-shit into pans.

What hospitals don't want you to know, is that with health insurance, your out-of-pocket expenses SKYROCKET once you become in-patient and spend the night there. The room costs money, the food you eat costs money, and your presence overnight allows them to literally charge you $12 for an aspirin every few hours. Then, you wind up paying off your $5,000 deductible for the next three years—all for an "observation."

Loading...

When I started asking the staff what my insurance costs would be and how it worked, they began to "disappear" to assist other patients, so I Googled it on my phone. They don't want you to know how much extra in-patient costs vs. out-patient—and it's why a lot of people get blindsided with ridiculous out-of-pocket hospital bills just for a cough.

5. They use scare tactics against you

A hospital wants you staying overnight—and their arsenal of fairy-tale bullshit scare tactics to make it happen is absolutely endless. Scraped your wrist? You need to be observed for a ***potential*** life-ending blood clot. Got mild indigestion? You could shit yourself to death from that ***possibly*** e-coli ridden hamburger. Your blood-work isn't back from the lab yet, but let's get those pillows ready anyway.

At the end of the day, the hospital wants their money, and it is in their best interest legally and financially to "keep an eye on you just in case" under the guise of "care-giving." This creates a win-win situation for them every time—with you at the disadvantage.

6. Their nurses are overly-dramatic corporate lackeys

Aww…you POOR thing! You could, like, totally die!

ROK readers know that most women are drama queens and actresses, but I found that hospital nurses are *turbocharged* drama queens. Their minds and emotions are very chaotic—just like their jobs are.

Even worse, nurses attempt to play with their ***patients'*** emotions, and this is easily

accomplished because most people are already in a vulnerable emotional state while sitting in an ER. They are corporate lackeys that serve their masters by manipulating you into excessive hospital fees that you don't really need to pay. Considering how overpriced the health care industry already is, their behavior is as predictable as it is abhorrent.

Of course, the nurses then get vindictive when you don't go along with their corporate ruse. The second I told miss man-jawed plumper that I was leaving the hospital, she literally grabbed the IV stuck in my arm, and violently ripped it out like a 90's feminist taking back her borrowed Melissa Etheridge CD. Yeah, very mature.

6. They rely on gullible and emotional patients

Hospitals don't want critical thinkers as patients. They have their own agenda, and want gullible morons who will swallow whatever opinionated BS is spoon fed to them. When you are faced with a less severe ailment like mine, ask cold hard questions to the doctors in order to help sort through any potential BS. Don't accept vague statements, and always seek to clear up any gray area. What is the name of my condition? How is it treated? What specific equipment does the local hospital have to treat this?

In a lot of cases, hospitals rely on gullibility, raw emotions, and low IQ's as a means to prosper financially. According to Trusted Choice, over 60% of all bankruptcies are due to medical expenses. Hospitals don't care, and because the average *Boobus Americanus* has the IQ of a toaster, this is a very convenient racket for them.

Conclusion

I believe that the condition of my lungs *was* bad, but also believe that the severity of my ailment was exaggerated in an attempt to take advantage of me. I was BS'ed by a series of agenda-driven medical professionals, and my lack of respiratory treatment or medication in the ER was the smoking gun.

If you feel fine overall and you are not getting direct answers or treatment specifics from your arrogant and egotistical academy award winning doctor, get the hell out of there and save yourself the $300 copay. Don't be a beta hypochondriac and buy into a

hospital’s BS.

How To Be More Courteous To The Right People

July 22, 2018 | by John Reb | Link | Original Link

Chivalric courtesy was the one most important factor in creating and maintaining the strong patriarchal order of Western Civilization that its wise men today are so nostalgic of. How is that possible, you ask? Isn't courtesy about serving and giving copious amounts of attention to women? And hasn't such behavior led to and maintained the evil and degenerate matriarchal order The West faces today?

What Is Courtesy?

According to the Oxford Pocket Dictionary of Current English, courtesy, specifically its form that pertains to this discussion, is defined as "the showing of politeness in one's

attitude and behavior toward others." The dictionary further defines politeness as "behavior that is respectful and considerate of other people."

The same dictionary defines respect as "a feeling of deep admiration for someone or something elicited by their abilities, qualities, or achievements," and consideration as "careful thought, typically over a period of time." Thus essentially, courtesy can be defined as "the showing of a feeling of deep admiration for someone or something elicited by their abilities, qualities, or achievements, and careful thought, typically over a period of time, in one's attitude and behavior toward others."

One of the most effective lies the left has pushed in order to disassemble the natural patriarchal order has been the idea that every human being is deserving of respect. In reality, it is only deserved when a person has "abilities, qualities, or achievements."

A truly chivalrous Western man has the ability—no, the obligation, if his duty is to keep Western society intact—to properly discern who deserves respect and therefore courtesy, and how much at that.

The Etiquette Spectrum

We will start with what can be called the "etiquette spectrum." The more respect you deem someone deserves, the more to the right you place them.

When considering the actions to take to express the amount of respect decided upon, it is more than helpful to have a strong understanding of what makes proper etiquette. The right end of the spectrum represents polite, and the left impolite.

A man places gestures both polite and impolite on the spectrum. As a general rule, the more out of your way you have to go for a gesture of courtesy, the further away from the origin it belongs. Gestures of courtesy convey respect—or disrespect—simply because it is acknowledged that one must go out of his way to make them. They take effort and consideration, and that means something.

To choose the proper actions to show the decided amount of respect, the man looks at the placement of the person in question with relation to the actions on the spectrum. Proper etiquette would call for the man to treat him with all actions as they become applicable from the person's level all the way to the origin. This means the more right on the spectrum a person is, the more polite etiquette the man treats him with, but it also means that if the person is on the left side, the man is obligated to treat him impolitely.

Loading...

On Impoliteness

Did you think being courteous meant treating everyone politely regardless? If so, you were still under the influence of leftist brainwashing.

In the past, people took for granted that the average man and woman were decent

fellows, worthy of the common handshake or the tip of the hat. One could safely assume that it was correct to treat the random person on the street with a modicum of respect.

But, thanks to the spoiled, lazy and degenerated Baby Boomer Generation, this time has passed. More likely than not, when you meet a woman on the street, she lost her virginity by the age of sixteen and kept fornicating until she lost her soul, and if that isn't the case, nine times out of ten it's because the woman's natural habitat is in fact the ocean with her fellow whale brethren.

Today, truly chivalrous men will actually find themselves being impolite in many cases. This expresses to society that you are not okay with its degenerate behavior. It will make it difficult for you to become friends with everyone you meet, but those who do stick around will respect you much more for sticking to your values. In fact, proper courtesy is a good way of weeding out toxic people in your life. We are the mean of the people we associate with, so if courtesy keeps degenerates, then we are better men for it.

Solution

We, as Western men, face an epidemic of whorish, entitled, and masculine women. This point was largely reached because the baby boomer generation started a trend of "not judging" others, and thus treating everyone with the same, communist level of respect. Women who slept around and developed masculine traits, for example, stopped facing condemnation through impoliteness, and thus became the degenerate, disgusting amalgamations of used up sex vessels they are today. It truly is a shame.

But I propose a solution. As the red pill teaches, as men desire sex, women desire attention. And, as the man desires to obtain sex from the prettiest woman, the woman desires to obtain attention from the highest value male. Reaching a level of high value is

done by simply improving oneself.

If you are an individual of high value, you can begin to train the women around you. Women will vie for your attention. Instead of trying to get laid and playing to their perverted fantasies, as most high-value red pillers do, maintain your dignity and develop courtesy. Take pride in yourself, and don't settle for the common slop the West now tries to pass off as "ladies."

Smile at the woman you know is traditionally feminine, but stop going out of your way to hold the door for the marshmallow monster who has trouble traversing the coffee shop in less than twenty minutes, and give the woman passing underwear off as a pair of pants a dirty look. Women respond to subtle social cues, as they care much more about their social standing than do men. While receiving a dirty look is not a huge deal to you, it is enough to ruin a woman's day—especially the contemporary woman's, who is used to having males fight over the chance to serve her.

Stop forcing a smile when in the presence of a homosexual. Stop acting as though a Muhammadan is your fellow man. Let the land whales and whores know who they are. Treat only respectable women with respect. Be courteous—more specifically, be Alt-Courteous.

11 Real Ratings Of Women On The 1-10 Attractiveness Scale

July 23, 2018 | by Roosh Valizadeh | Link | Original Link

I've been posting pictures of different women on my Twitter with the question "Would you bang?" A few days after sharing a picture, I tallied up on the yes and no responses to calculate a rating on the 1-10 scale.

My methodology was simple: I took the number of yes answers and divided it by the number of total responses. I then added 0.5 points to every score because a lot of men on the internet act like they only bang supermodels (e.g. "2/10, pointy elbows"). We also have to account for the fact that many men confuse "Would you bang?" with "Would you put in a lot of work to bang?" The WYB metric only asks if you would fornicate without having to work for it. Let's review the women from ugliest to hottest…

1. Rating: 2.3

I see pierced nipples

It’s no surprise that most men would not bang a woman with so much plastic surgery and tattoos that she looks like a man, but this specimen is thin enough that I suspect most men would bang her if they received a doctor’s note confirming she’s AIDS-free.

2. Rating: 5.0

I prefer dark chocolate when it comes to chocolate (75% cacao to be exact), but not when

it comes to women. This black woman is objectively attractive for her race, but that's still not enough to push her out of an average rating.

3. Rating: 5.2

I see granny panties

The gigantic butt on this Asian girl could not take away from a Skeletor face. A lot of men also thought her butt was fake, which is generally a boner killer, unlike the case with fake breasts.

4. Rating: 5.6

This full-figured woman lost many points for her hair, but the men who did want to bang her showed a high enthusiasm for taking a wild ride on her voluptuous body.

5. Rating: 6.2

Even thought this newscaster is a bit long on years, with a marshmallow body to match, many men would bang her because of her generally attractive appearance.

Loading...

6. Rating: 7.1

This is a picture of Bill Gates daughter, who happens to love Muslim cock. Personally, I think her face is ugly, but for many men who follow me, white is right and the fact that she's thin *and* young pushes her to a favorable rating.

7. Rating: 7.2

A lesbian haircut and advanced age did not stop this German politician from blitzkreiging to a solid 7.2 score. I do suspect that her breasts played a sizable part in the surprisingly high rating.

8. Rating: 7.4

There were no surprises for this handsome woman. I believe that she would be an ideal girl for a normal man who wants a thin female to reproduce with.

9. Rating: 8.4

Big breasts strike again. This girl is not especially attractive, but she has no major flaw that pushes her into WNB territory. A genuine smile also goes a long way for men who are tired of girls with attitude.

10. Rating: 8.7

I’m not attracted to Asian girls, but I would bang this one in a vigorous manner. Most

other men agree with me.

11. Rating: 9.4

The hottest girl in my sample happens to be a race amalgamation, though with heavy European admixture. Objectively, I believe she does have a superior facial structure and body compared to the other girls and so deserves her rating, which suggests that raw beauty can edge out racial preferences when it comes to solely banging.

Don’t be ashamed if you would bang every single girl on this list. The men who judge you most for your bangs are the ones who feel most ashamed of their own. If you get a boner for a girl, your dick obviously craves her body and you should proceed as long as it does not harm you emotionally or physically. All I can tell you is that my boner has never lied to me. I trust its judgement.

PUA Author Neil Strauss Attempts Polyamory And Fails

July 23, 2018 | by Beau Albrecht | Link | Original Link

After his misadventures in sex rehab, Neil Strauss' *The Truth* seems like a twisted version of Saint Augustine's *Confessions.* After much hand-wringing, personal introspection, and researching relationships, he concluded that monogamy opposes human nature. If that's true, traditional morality is an unattainable ideal. However, as soon as he mentions polyamory to his girlfriend Ingrid, what's left of their relationship pops like a soap bubble.

First gropings

Neil idealizes Father Yod, an oddball counterculture guru with fourteen "wives". Through extensive research—something he does frequently—he encounters concepts like compersion (it's not a city in Persia), hypergamy, the dual mating strategy, etc.

Unfortunately, he only studies Blue Pill sources. Then he begins a quest for hot bi babes—just like any naïve newcomer to polyamory.

He first attends a tantric gathering. The attendees are flabby, over-the-hill New Agers. (It's a fairly typical experience. Hot bi babes into polyamory are called "golden unicorns" for a reason.) He tries to keep an open mind, but soon chokes up with laughter at the spiritual mumbo jumbo. The leader finally kicks him out for eating popcorn.

Later, he attends a Bliss gathering in Vegas, full of smoking hot women. Needless to say, clubs like that aren't for mere mortals. However, Neil's prominence and connections get him in like Flynn. His guide, who suffers from a cuck fetish, loads him up on a drug cocktail—some of it without his permission. He passes out repeatedly during sex. Still, he liked the very little he remembered.

Then Neil finds the magical synergy in the Parisian *demi-monde*; crossing an ocean for nookie. The participants are relatively young and attractive. Neither popcorn nor dope interferes. Undeterred (mostly) by all the swinging dicks, he has a blast.

Throughout, some interesting characters appear. The guy who drugged him is a rental sex toy vendor—*yes, really*. Another is a dweeby-looking polyamory authority named Pepper Mint, who reputedly banged a thousand men and women. One more is Corey Feldman, understandably morose.

The Great Mongolian Clusterfuck

He invites two women he met in Paris (one at the club) and another former prospect to join him in San Francisco. Naturally, that becomes a train wreck. Stupid arguments about car seating are merely the beginning. He spends more time sleeping on the couch than banging, because choosing one partner for the night will offend everyone else. *Pro tip: write up schedules.* Attempts at group negotiations are fruitless.

Everyone agrees to attend a sex club, but the outing ends disastrously. Before even starting, one of them—a wounded bird type—declares that she wants Neil all to herself: not just that night, but indefinitely. The other chicks don't want to share either. This derails what should've been a fun event. After that, Harem 1.0 ends in a bang, but not the good kind. *Pro tip: show leadership and be firm.*

Neil blamed himself. Still, the main problems (beyond four near-strangers cohabiting, and the half-baked concept of free love itself) are inexperience and his lack of requisite

firmness. He never lied; *everyone knew what the arrangements would be*. It's not his fault that the chicks unilaterally started redefining the terms, got catty and jealous, and pussy-blocked their rivals.

More blunders

Some further misadventures are told in illustrations. He creates a retro-hippie commune. Unfortunately, one participant is psychotic and extremely jealous, who nearly murders him. (The deleted chapter is on Neil's site.) Then, he has a fling with a couple of hot bi babes; one isn't too serious, the other is a drunk. Later, he meets someone online seeking a sperm donor, but he sensibly backs out.

His new girlfriend Sage is a hot bi babe from the Vegas misadventure. That works great, until she vacations in Mexico with two of her orbiters. Now Neil gets jealous. He's angered upon discovering that they sucked her toes and discouraged her from contacting him. Worse, on the flight back, Sage met some leather-faced director who offered an acting role. *Uh oh*…

Loading…

Game over

He realized that after achieving all his fantasies, there's nothing left, and that he really blew it with Ingrid. Sage, his coke-sniffing metallic-haired girlfriend with Daddy issues, dumps him by email. Depression sets in.

Neil tries cultivating nonattachment. He consults the sex rehab counselors again, who feed him Blue Pills and convince him to ghost everyone. He does different therapeutic stuff to unscrew his head, somewhat more effectively. He turns down bangs. Then Sage shows up on his doorstep, but he sends her away. *Hopefully she learned a lesson about ditching people by email.*

He finds that Ingrid's available and wants him back. So the nonattachment stuff was all for the better. (He got very lucky; reuniting with lost loves usually only happens in movies, especially when a relationship ends badly.) They start a family, a happy ending following much avoidable drama.

The real truth

"King Solomon had hundreds of wives. What could possibly go wrong?"

Throughout, Neil repeatedly castigated himself, while lengthily analyzing the fallout and planning new angles. Despite the intellectualization, it's pretty simple: *he let the little head do the thinking*. Unfortunately, if choosing lust and Rationalization Hamstering make people evil, I'm afraid everyone's going to hell.

The dream he chased is fundamentally impractical. Actually, these disasters constituted *exceptional results*, available via wealth, prominence, good Outer Game, and California's "anything goes" environment. For most guys, simply struggling to manage an apartment with three attractive, bickering women is an unattainable opportunity. Mere mortals don't always get better quality than the flabby, over-the-hill New Agers.

Hot bi babes lacking jealousy are very rare. (Excluding red flags like mental instability, substance abuse, and STDs narrows the pool even further.) Hot babes exist, but even

California ain't what it used to be. Bisexual babes exist too; I've dated so many that I'm wondering if straight women are real. However, "lacking jealousy" remains a huge limitation. Even one man with two women—the most workable alternative dynamic—is lots of extra drama. (I could write my own novel about that.) It can happen, but polyamory is generally unstable.

It's impractical societally on a large scale. Guys are much less willing to share. Widespread acceptability of men with multiple women would tremendously exacerbate the sexual marketplace's already existing problems. *What happens if everyone does this?* Free love would become a victim of its own success.

Neil, who authored *The Game*, certainly understood pickup artistry. However, he extensively researched feminism-compliant counterculture sources about polyamory. His barely Purple Pilled synthesis left him blindsided. "Deplorable" sites like *ROK* and *Chateau Heartiste* far more accurately describe relationships and male-female dynamics. He delved heavily into therapy and self-help, but that too had mixed results. My own book covers Inner Game heavily for a reason, also providing considerably more realistic perspectives on multiple simultaneous relationships.

Neil explored polyamory after concluding that monogamy collides with human nature. However, so does free love; jealousy happens. Evolutionary biology created this inescapable dilemma. Still, ultimately *behavior is something we choose*. Libertines find conventional morality stifling, but the rules keep people from getting their fingers burnt.

Last but not least, nothing's perfect and nobody gets everything they want.

Being Situationally Aware Is A Matter Of Life Or Death

July 23, 2018 | by Vic Verdier | Link | Original Link

It is 7:30am on the day after Christmas in 2004. The sun is already up in the blue sky of the Andaman sea, and some rare tourists are walking on the main beach of Phi Phi island in Thailand. Most of the tourists are still sleeping, dealing with the usual hangover that comes with the traditional Christmas party.

The locals are busy preparing the long tail boats they use to cruise around the nearby islands. Some Westerners like me, who live here, fill and carry the diving tanks the scuba divers will use to explore the underwater reefs today.

In less than an hour, this idyllic landscape will turn into a dramatic nightmare and many of those people will die, crushed and drowned by the powerful wave of a tsunami coming from the Indian Ocean.

Was there a way to prevent that? Not more than preventing a hurricane in Florida or an earthquake in California. Scientists can predict it, multi-million dollar sensors can detect it, information networks can announce it through various media, but there is no way to prevent it from happening. But we can be more prepared than when I experienced this tsunami in Thailand. Governments and local administrations can invest in infrastructures to mitigate the potential risks and better inform the general public.

And individuals can be better prepared to deal with the consequences of natural events. The people who tragically died on this island were not different from any other people on this planet. As a matter of fact, a vast majority of them were young and relatively fit. They didn't survive for only a handful of reasons, mainly:

- lack of situational awareness
- lack of appropriate mindset
- lack of physical skills

The situational awareness and appropriate mindset are mainly due to the fact that, when we are on vacation on a tropical island, the last thing we want to think about is the remote possibility of a tragic event of any kind. If the place is nice and sunny, if the locals are friendly and smiling, we quickly feel safe and let our guard down. No pickpockets, no fire, no mugging, no earthquake, no car crash, and therefore no need to pay attention to any precursor sign, no need to keep our valuables and documents with us at all times, no need to have a look at evacuation routes, fire exits, etc. In other words we quickly become complacent when everything looks like paradise.

But this lack of situational awareness and appropriate mindset was only one side of the coin for the many fatalities that occurred that day in Thailand. One of the main culprits was the lack of physical skills. Many people didn’t survive simply because they didn’t have the physical abilities to deal with what happened to them and around them.

Some were not comfortable in the water and couldn’t swim across the strong current that the wave and the obstacles created. The event only lasted a few minutes but the water raised quickly and submerged the lowest part of the island.

Some were not able to hold their breath for a few seconds. When the wave hit the hotels and guesthouses near the beach, most of the rooms were submerged very rapidly, but not for very long. Surprise and panic killed a lot of people in their rooms.

Some were not able to hold on to fixed objects for more than a few seconds. The current was strong and being able to hold on something, or even better to climb onto something, was a good way to increase the chance of surviving.

Loading...
Some were not able to run away and climb a hill or a stairway. For those who were on the beach and saw the wave coming, the proper action was to sprint and find high ground. Reaching the highest floor of a hotel or one of the nearby hills was a good way to avoid the full force of the tsunami.

Some were not able to push away heavy objects. Entrapment was one of the major risks in this event. Many people drowned because they lacked the necessary strength to move away the objects that the current pushed onto them.

The Western world tends to rely heavily on tools to make our life easier and tools to make it safer. Instead of dealing with the weather, we use tools to make it more bearable (A/C, heater, umbrella, raincoat, sunscreen, etc). Instead of moving in this environment, we rely on tools (a car or an ATV instead of walking and running, a canoe or a boat instead of swimming). We easily blame the lack of protection that can get us injured ("I cannot walk/run without shoes", "I cannot float without a flotation device", "I will fall and break my skull if I don't wear a helmet", etc).

Tools are fine and make our life more enjoyable most of the time, but what if? What happens when we don't have them? That's where skills and physical abilities make plenty of sense. Every one of us, regardless of age, gender and race should be able to do at least the following things:

- sprint for at least 100 yards/meters in order to get out of danger (collapsing building, wild fire)
- climb over a wall or fence at least shoulder high (to escape an angry pitbull or a group of thugs)
- carry for at least 10 yards/meters someone of 3/4 of your size and bodyweight (to save someone from an immediate danger)

- swim at least 100 yards/meters without stopping and float at least 10 minutes with no aid or support (to get out of a dangerous zone and wait for a rescue vessel)
- walk 5 miles in an hour (to reach a gas station when you run out of gas and you cannot call for help)
- perform some basic self-defense techniques (striking, grappling) to react appropriately in a mugging/rapping/life-threatening situation

- hold your breath for at least one minute while walking/moving at a slow pace (to escape the toxic fumes of a building on fire)
- crawl for at least 30 yards/meters to seek cover (active shooter situation) or rescue someone (a child hidden under a car, or someone trapped under or inside something)

If you think that any of those abilities is way beyond your limits, it’s maybe time to reconsider your priorities in life. Being self-sufficient and prepared doesn’t mean relying on tools—it’s knowing that you can deal with dramatic circumstances to the best of your abilities. Tools come in handy when you have physical limitations (age, injuries, illness) but they shouldn’t be the first line of defense.

Having some regulations that require a floatation device in every hotel room in Thailand will not save any life if the next tsunami in the region happens in South Korea. Use your body and your brain. They are the original tools, and you have them with you all the time!

4 Ways Western Culture Creates Weak Husbands

July 24, 2018 | by Jared Trueheart | Link | Original Link

As much as some of us would like to think women are solely to blame for the degradation of the family unit, they are not. Men are to blame too. More specifically, white knights, soy boys, and blue pill men. But the faults that make them bad husbands or fathers all stem from everything that falls under the umbrella term of cultural decline. In other words, the same forces that make men bad husbands are those that make society a cesspool; perversion of the family unit, digital addictions, post-industrial convenience, policies infected by feminism, and an anything-goes culture.

Here are four ways that our culture molds men to be bad husbands.

1. Women's Careers

Women are in the labor market like never before. I'll spare you the statistics and just ask

you this, have you worked in any job that wasn't a trade but was void of women? Where? Which department? They're as much or more of the labor market now than men, yet women are really only attracted to men who earn more than them.

Not only do they make their own money and dedicate far too much time to their jobs, but if a man doesn't do the same to keep his income above hers, he will lose her attraction. This creates an unhealthy work and personal life imbalance that forces men to make money they might not care about just to keep the marriage together.

Tired and stressed, men are bound to make poor husbands, giving up their precious time to compete in a rat race.

Because women are also working with other men away from their husbands, jealous feelings will likely arise. Cosmo magazine and empowered women tell all women to use their sexuality to get ahead. How are husbands supposed to behave thinking that their wives are showing their cleavage to get a raise?

2. Spouses Treating Each Other Like Roommates

Neither men nor women view their family as a single unit. Instead, husbands and wives live like bachelors and bachelorettes, respectively. They see each other in the morning, go to work, see each other at night, order take-out, and fight over who's going to clean the bathroom. What can they do for each other when traditional sex roles have been replaced with individual ambitions?

This goes both ways but when women wonder why their husbands aren't good husbands, it's because men have too few reasons to think their wives are good wives.

3. Women Want To Always Be In A State Of Attraction

Men today have to game and entertain their wives to keep them interested lest they tap into their penis pipeline from work or a Tinder account to fill any void of excitement. Everyone knows a woman can get sex far easier than a man if a relationship ends. To try and prevent that, men run game on their own wives, but this is an unsustainable lifestyle.

Loading…

When you have a household to run and kids to raise, running game isn't a priority. Women take this to mean that a man doesn't try anymore. In truth, if the wife stayed home and took care of all the menial chores that must be done to keep a house and raise children, he should be more than willing to woo her.

Wooing a wife specifically entails buying her gifts, taking her out to a nice meal, maybe going dancing, things along those lines. Romantic stuff. But all that is meaningless to shopaholic women (and working women love to spend) who go out to lunch every day and go out dancing with their girlfriends from work on Friday nights.

Men can't woo their wives anymore because women steal the novelty of it. But neither can they game their wives for an extended period. They're destined to give up, leading women to say, "He stopped trying when we got married."

4. Too Much Pressure

Thanks to all the women and immigrants in the labor market, men have to compete for jobs more than ever. The women in HR departments or in the cubicle next door are dangers to men at work. One wrong look and that woman in the cubicle next to yours complains to the woman in HR that you were undressing her with your eyes. Next thing you know you're fired and released to an increasingly competitive job market.

Immigrants more than ever take the jobs teenagers used to do. The men in their 20s now are years behind men of prior generations because they couldn't even find a warehouse or fast-food job to let them save up some money and get them into the workforce young. So a 27-year-old man today is years behind 27-year-olds of prior generations in terms of career development.

Conclusion

Wives today still expect as much from their husbands as wives of 50 years ago, plus they expect to be gamed, plus their husbands have to be more attractive than any man they may meet at their jobs, and men have to earn more than their wives, all that despite the fact that men today are years behind the men of 50 years ago.

The consequences are dire for men. They know that women have a full penis pipeline and that losing their jobs may just as well mean losing their wives and divorce rape. Kids don't secure the bond much, just look out how many empowered single mothers are out there. Love is often a weak bond to women who have drunk the feminist kool-aid (even if they claim to be traditional). At any temporary setback, a man could worry that his wife will leave just because she has so many options.

The anxiety of these potential problems often causes marital problems. Anxiety affects men for the worse, reducing T levels, making them possessive, and making their bodies and minds unhealthy, resulting in a downward spiral. Before you know it, fears of divorce leads to a self-fulfilling prophecy.

None of these are excuses. On the contrary, men have to rise to the occasion of being great husbands more than ever. This is especially true if a man has sons because he has to show those sons the way of men. And when he rises to be a great husband he may just lead his wife to be a great wife.

How To Safely Start The Ketogenic Diet

July 24, 2018 | by Charlie Kennedy | Link | Original Link

So, you've heard about all the benefits of a keto diet, and you want to make the switch. Should you just go all in and drop all your carbs? Not so fast. If you happen to have diabetes, or if you're insulin insensitive, you could send yourself into ketoacidosis (the evil twin of ketosis).

Nobody should 0 to 100 with this diet. You need to work your way up to nutritional ketosis. So here are three tips to help you get into ketosis. *Medical Disclaimer: I am not a doctor and my knowledge are from personal experiences and research. Make sure you do your own research before making any changes.*

1. Stop drinking calories

This has no place in a healthy diet

This is the step that gets the ball rolling. No Beer. No Soda. No Juice. Zero liquid calories (diet soda is okay). I did this by accident because I couldn't drink any soda with braces on my teeth. When I noticed how good I felt, I stuck with it. Drink only water, black coffee, and club soda. Quitting soda alone would cut 5,425 grams of sugar a year (that's only average). Just cutting this out of your diet will guarantee better health and weight loss.

If you're overweight, this also includes protein shakes. While I have nothing against protein shakes, they make it harder to lose weight. When you drink all those high glycemic calories, you send your insulin levels through the roof. When that happens, your body will store whatever calories come in as fat (insulins not evil, that's just its job). You can cut these items out slowly, going down each week or every few days until you hit zero.

2. Start following a paleo diet

No Soy Here

The paleo diet is a great bridge for the keto diet and is just a great diet in general. The main thing that makes the paleo diet so great is the it eliminates unnatural foods from your diet. The human body does not know what to do with a lot of modern “foods”. As a result, we now have terrible levels of obesity and various diet related diseases. Cavemen didn’t have to worry about obesity and diabetes. They also didn’t eat soy foods and mystery meats. That’s why paleo helps with some of these problems.

It’s important that you get the best quality food you can afford. Commercial meat and eggs have a different nutrition profile compare to the grass-fed and free-range stuff, and you’ll want to avoid pesticides on normal veggies (rhere’s some things you can get away with).

Loading...

If you can’t afford quality beef and chicken, get the lean stuff and buy healthy fats like olive or coconut oil, raw nuts and seeds, and raw dairy from grass-fed cows. You do this to avoid all the bad stuff commercial fat holds. Don’t eat soy or vegetable fats like corn or canola oil. Those are fats that humans haven’t adapted to, and they weren’t made with humans in mind in the first place. A good rule of thumb is to stick to shopping on the outside aisles. The outside usually hold all the meat, dairy, and produce, which will make up the bulk of your diet.

3. Cut the carbs

Now that you've gotten your diet under control, it's time to cut out the carbs. This basically means the only carbs you'll be taking in will come from leafy green veggies and berries. The goal for most people is 20 grams of carbs or less, but if you're younger and more active you can go a bit higher (up to 50 grams is what is usually suggested).

Carbs help you hold water, so when you cut them, you will have to drink a lot more water. You will also pee a lot more, so keeping your electrolytes balanced will be key. Its best to get your sodium from pink salt and eat more foods high in potassium. Also consider taking a good magnesium supplement.

You'll also have to up your fat intake by a lot. Getting them to 70-80% of your calories from fat is a good place to start. If you like dairy, make sure you get grass fed, raw dairy. Raw dairy contains a lot of good bacteria that helps with gut health and digesting lactose. Dairy that comes from commercial cows is full of hormones that shouldn't be there, so avoid it.

Go Raw

Also note that milk still has carbs, so don't overdo it. Same thing with seeds and nuts. I recommend that you get a cheap scale, so you can make sure you don't take in too many carbs.

You don't need to eat a ton of protein either. You will need a bit more if you are active, but fats are the priority.

When switching from carbs to fat as a fuel source, you may go through something called keto flu (not an actual flu). When I got it, I had muscle cramps, gas, and fatigue. Fight through it. After you adapt, you will get all the benefits that you hear people talking about.

Fat gives you more energy per gram (7 vs 4) so you end up needing to eat less overall. Fat will also keep you satisfied for longer. Don't be surprised if you can go for a whole day without eating. It makes things a lot more convenient for you too. Less meal prep means more time to do other stuff. This makes it easy to make this a part of your daily life.

To make sure you are doing it right, use a keto calculator. The number you get won't be exactly what you need, but it will be a good start.

Some Good Fats

Conclusion

This is one of the best diets out there in my opinion. Ever since I've started it two years ago, I've had increase cognitive function, increase testosterone, clear skin, and all sorts of other health benefits. It's like light and day compared to the old me.

I was angry when I found out that the food guide lines have been so wrong. According to the guidelines, I should drop dead in the very near future. People look at me like I'm crazy when I eat sticks of butter and cheese as a snack, but then they go and eat a whole pizza with soda and cake. They blame my good results on my genes when that's just not the case. They stick to an old system that is clearly not working, and that's a shame.

3 Critical Questions You Must Ask Before Buying Your Next Pair Of Shoes

July 24, 2018 | by Sponsored Article | Link | Original Link

The following article is sponsored by Paul Evans Shoes.

Shoes are an aspect of fashion that most men don't put much thought into. In particular, most men don't think about what their choice of shoe says about them. While most people know the difference between formal-wear and more casual shoes, few have considered all the factors that go into how one's choice of shoe affects how others perceive them.

Choosing the wrong shoe for a situation or event reflects as poorly as you as any other fashion faux pas, so you owe it to yourself to learn more about shoes and how to wear them properly. Here are the most critical questions you need to ask when buying shoes .

1. What is the occasion?

Most people generally recognize that different occasions require different styles of dress. For example, you wouldn’t dress for a wedding in the same way you’d dress for a date, or a business meeting, or a night on the town. Different types of social functions require different types of fashion, including shoes: your choice of shoe can make or break you depending on the situation.

It behooves you to learn how you can pick the best shoe to match any given situation. For example, if you’re going on a date, boots, oxfords, and monkstraps are all wise choices. If you’re going to brunch, you can get by with sneakers or loafers. When heading to the offices, monkstraps and oxfords are ideal. There are a number of different shoe choices you can make depending on the situation.

Shoes are an integral part of your wardrobe and thus you can’t afford to pick the wrong one. Depending on where you’re going and what you’re doing, your choice of shoe can either enhance your presentation or diminish it. Learn what expectations you’re expected to live up to in a given situation and you’ll be able to pick the perfect shoe every time.

2. What Is The Dress Code?

An often-overlooked part of shoe selection is dress code. While many people assume that they know what types of shoes are appropriate for various dress codes, they usually overlook the particulars and assume that there is a one-size-fits-all type of shoe that works for multiple occasions. While there is some truth to this, a closer eye to detail will allow you to pick out the best shoe to fit the occasion.

For example, when dressing for a black tie dress code, any old shoe simply won't do: you need oxfords to match the rest of your outfit. Similarly, oxfords are necessary when dressing for a business formal dress code. On the other hand, cocktail attire gives you more selection when it comes to your choice of shoe, from oxfords to monkstraps to boots. Business casual attire also gives you considerably more leeway when it comes to picking a shoe type.

Most people don't pay attention to these details and are thus left out in the cold when it comes to dressing well. By merely paying more attention to what different types of dress code call for, you can outclass the average man and take your fashion game up a notch.

3. What Is The Pant Color?

Finally, an often-ignored aspect of shoe selection is how the shoes pair with your pants. If you wear pants that clash with the color of your shoes, the contrast will be visible to everyone and will ruin the appearance of your outfit. To maintain consistency with your looks, you need to choose the right color of shoe to match your pants.

For black pants, the choice is simple: only a black shoe will do. However, when it comes to blue or grey pants, you can get more creative. Grey pants are best paired with brown shoes of varying shades, from oxblood to marrone to chocolate. Blue pants can also be paired with brown shoes from oxblood to chocolate and everything in between.

Shoe color is an overlooked detail because many people don’t carefully consider how different colors work together when combined into a single outfit. By specifically picking shoe colors that match your pants, you can take your fashion sense to the next level.

The Paul Evans Difference

Finding a shoe manufacturer that understands the fundamentals of shoe selection is difficult. Fortunately, Paul Evans has a strong reputation for quality and selection. Paul Evans shoes are designed in New York and manufactured in Italy, made with calfskin leather and hand-painted to look gorgeous and stunning. They also feature blake-stitching for improved comfort and easier resoling, further adding to their longevity. They boast a large lineup of shoes in varying cuts and colors, allowing you to select the ideal shoe to pair with whatever outfit you may be wearing.

Additionally, Paul Evans boasts low prices due to their direct-to-consumer business model: you buy from their website and they ship directly to you. Paul Evans boasts free shipping and returns as well as a return policy of 365 days. Finally, Paul Evans allows customers to pay in installments of as low as $36 per month with 0% financing. We're also running a promotion for ROK readers: **use coupon ROK50 to get *$50 off* any pair of shoes**.

Shoes are a far more important part of your fashion style than you may think. Shoes aren't merely something you wear to protect your feet: they signal your fashion sensibilities, wealth, eye for detail, and willingness to invest in yourself. A poorly-chosen pair of shoes can undermine an entire outfit if you aren't careful.

For the best results in your fashion adventures, you need to be mindful as to how your shoe fits in with your look. Whether you're dressing for a black tie affair, a cocktail party, a business meeting, or a date, there's an appropriate shoe for every situation. By carefully considering your shoe selection, you will be able to make the right impression and succeed at whatever you are planning to do. **Click here to visit the Paul Evans web store**. Remember to use coupon ROK50 for your $50 off discount.

10 Reasons Why You Should Own A Jet Ski

July 25, 2018 | by Andrew Clayton | Link | Original Link

Have you always thought about getting a jet ski, but had your doubts about pulling the trigger? Take it from me, they are more fun than you might think—and they can also change your lifestyle. If you don't already own one, here are some reasons why you should get a jet ski:

1. Girls LOVE them

You might think your Xbox is sexy and exciting, but the cute, thin brunette on the other side of your office does not. Yes, girls just wanna have fun—and jet skis are **FUN**. I have been out on the water with doctors that had brand new boats—and the hot 22-year-old blonde college girl they had with them literally jumped onto the back of my ski and said "take me out for a ride." This has actually happened several times—because girls know that jet skis are fun and exciting—and they will know YOU are fun and exciting when they see you pull up to the beach on one.

A lot of times on the water, what you look like is irrelevant—you will have a masculine advantage over Johnny paddleboard or Kenny kayaker any day of the week. And given how superficial, flaky, narcissistic, and overly-picky American girls have become, there is nothing wrong with giving yourself a little competitive advantage in the attraction department.

2. They are the opposite of boring

Hot girls always want to do exciting things—they absolutely hate boredom. Getting out on the water and racing your supercharged jet ski at 70 mph towards the local beach bar is a really good way to attract them and keep them excited, because to do so is the opposite of being bored.

You know that cute blonde who is always quietly tanning over at your apartment pool by herself? Get her out on the water by saying "This place is boring, let's get the hell out of here and get a tan while actually doing something EXCITING." And, if you own a three-seater, you're odds of getting her out are even better, as she'll feel more comfortable by bringing her equally vapid friend as well.

Just make sure that when you get to the bar, you only have one or two while you are there. Many jet skis are high performance machines—and not like that slow, beat-up rental you once used on that trip to Aruba. Not only do you need to stay sharp behind the wheel, but you can easily get a DUI while out on the water.

3. They are masculine

You ever see a soy-drinking, Starbucks buying, yoga loving, #MeToo marching, feminist-supporting boy-bitch at the helm of a 300 horsepower jet ski? Me neither.

4. They are cheap to operate

The phrase “Jet Ski” is actually a generic brand term for “Personal Watercraft” (like Scotch Tape or Rollerblade) and represents watercraft manufactured by Kawasaki. The

other two major brands—Bombardier and Yamaha—each manufacture “Sea-Doo and “Wave Runner” respectively.

My Sea-Doo has a 16 gallon gas tank, and using premium, it costs me about $55 to fill it up for the weekend; a little more if I am taking it on a really long ride and want to use more than one tank. The annual service and oil change at my local shop is $250. You likely spend more than that each year on Red Bulls for the Xbox.

In salt water, you have to spray and oil your ski after each ride—no matter what brand you own. Since I do that, the gas and the annual service fee are the only things I spend on it each year—there is nothing else I need to buy. I also keep my ski stored in a garage, and connect my battery to a trickle-charger in order to increase reliability. If you want, you can also spend a few extra dollars on upgrades to make it go faster; once you get used to some speed, 60 miles per hour will eventually seem “a little slow.”

5. You can trailer them anywhere

No… you do NOT need a Ford F–150 or Jeep 4×4 to trailer a large, three-seat jet ski. I drive an old two door, four cylinder Acura RSX—and it’s not even the beefed-up “Type S” model. Back in 2012, I had a $300 Curt trailer hitch welded on, and I have been towing my 900 pound Sea-Doo GTX with it ever since.

I have been on hundreds of boat ramps all up and down the east coast—and I have never had any towing problems. I have trailered my jet ski to-and-from Atlanta, Charleston, and the Florida Keys—all amazing places to be out on the water. I even evacuated from Hurricane Irma without breaking a sweat. If I can do all this with my little RSX, so can you.

Read your car’s owner’s manual and see what the maximum towing capacity and tongue

weight is. Unless you drive a SmartCar, you'll be surprised at how much you can actually tow.

6. You'll create "bad-boy" street-bike excitement with less risk

Most ROK readers know that girls LOVE street bikes because they are dangerous—which makes the tatted up bad-boy biker dick seem all the sexier to them. Jet ski's are dangerous as well (you can break ribs falling off at 40 mph), but a fast jet ski is still *very* exciting to girls.

Loading...

A supercharged ski (Google what a supercharger is) can launch you and two petite sorority hotties with a cooler full of Lime-O-Rita's across the water at nearly 70 mph—and it can reach that speed in just a few seconds. The intense acceleration that comes with a supercharged engine is what really turns women on—end of story.

As long as you stay alert and be responsible on the water, the risk of injury or death is arguably lower than on a street bike; no red lights that could be run, and nobody cutting you off without a turn signal. Street bikes are awesome, but you can still get those cute girls excited without having to weave in-and-out of text message prone traffic—over pothole-laden concrete—at 140 miles per hour.

7. They will improve your image

Think she’s attracted to you for all those intellectually stimulating conversations? Ha! With young girls in America, it’s all about image—how she sees you through *her* eyes. Again, jet skis are fun and exciting, so when you choose to leave the paddleboard at

home and head out on your jet ski, it tells women something about your excitement level.

At work, I have to behave like a professional nerd to fit in with the climate. Despite this, my co-workers routinely ask, “Did you take your jet ski out this weekend?” Sure you can keep your paddleboard and inflatable kayak, but imagine how you would look to girls if all you did was “take it easy” on the water, then one day you showed up to the lake with a 300 horsepower RXP-X. Your new bad-ass image to them would be the equivalent of you seeing a girl lose 50 pounds overnight—it would create shock and attraction at the same time.

8. The amount of fun you’ll have is well worth the price

Houston—we are GO for launch!!

With a jet ski, the price-to-fun ratio is absolutely insane. Sure, you can buy a brand-new top of the line jet ski for $16,000, (or $24,000 in Australia) but I got mine used off of Craigslist from a guy in Baltimore. I knew I wanted a fast three-seater, had a particular model in mind, and used AllofCraigs.com to find it. The ski was only a few years old, in immaculate condition, and I paid the guy $5,000 cash in an envelope.

For the amount of fun I had, for the amount of memories I made, and for all the amazing places I have been to, that little white envelope was worth EVERY penny.

WAWA and water—doesn’t get much better for Pepe

You don’t live near an ocean or the Gulf? There is most likely a lake or river within a few hours’ drive away that will give you an extremely fun day for less than $100. And trust me—jet skiing on a lake is much more fun than it sounds. You can also get a good tow-tube for about $60 to $100, then grab some sodas and drag the kiddies (slowly) around your local lake. The smiles on their faces will be priceless.

9. They are easy to sell

Almost everyone wants a boat, but even small ones can be expensive to own and operate. You could be out enjoying that *same* gorgeous water in a few weeks without having a major financial burden on your hands. The demand for jet skiis has always been relatively high, and if you ever get stuck financially and need to sell yours quickly, just turn to Craigslist. If you keep it in good shape, it will likely be sold in a few days or weeks.

10. You will meet new people—in real life

Nope, no Xbox here…

Jet skiing to a destination is fun, but jet skiing to a destination with other people is *really* fun. Many people own jet skis, and I have met tons of other skiers out on the water during group rides. A good ice breaker is to complement people on the color and model of their jet ski—even if you believe yours looks better and runs faster. Remember: TV and video games are fun, but it's also important to get out in the world and meet new people in real life—not just an avatar through a gaming headset.

Conclusion

Your life needs balance, and part of that is to get out there and enjoy the world (and also attract women). Jet skis are a fun and cheap way to help do all that. If you don't already own one, save up $6,000 (or get a personal loan from a Credit Union) and buy a good used jet ski off Craigslist. Look for a **supercharged** model (they are *much* faster and well worth the money) that is clean with no rust or fading, and has around 100 hours or less on it. Take care of your machine, be respectful and responsible on the water, and you will have years of great memories.

Even if jet skiing is not your thing, most ROK readers know how important it is to "get out there" and start living life to the fullest. A jet ski will not necessarily change your life, but it can help you get more out of it.

Chad Actor Announces He’s Scared To Hit On Girls Because Of #MeToo, Gets Immediately Attacked

July 25, 2018 | by Beau Albrecht | Link | Original Link

Henry Cavill, an up-and-coming actor, was the subject of a long, breezy feature on *GQ Australia*. Reading between the lines, I gather that attaining stardom had its ups and downs (as can be expected), but he’s handling it well. At the end, he addresses #MeToo Mania.

Cavill’s take

I'd buy this bloke a lager in a pub anywhere. Cheers, mate!

In brief, the worst he'd seen was some cast members "being perhaps overfamiliar", and he told them to knock it off. His conscience is clean about his own conduct, though he notes that anyone's actions can be misinterpreted. He disapproves of genuine bad behavior, though he fears that overreactions are harming courtship. Specifically:

> "There's something wonderful about a man chasing a woman. There's a traditional approach to that, which is nice. I think a woman should be wooed and chased, but maybe I'm old-fashioned for thinking that.
>
> "It's very difficult to do that if there are certain rules in place. Because then it's like: 'Well, I don't want to go up and talk to her, because I'm going to be called a rapist or something'. So you're like, 'Forget it, I'm going to call an ex-girlfriend instead, and then just go back to a relationship, which never really worked'. But it's way safer than casting myself into the fires of hell, because I'm someone in the public eye, and if I go and flirt with someone, then who knows what's going to happen?
>
> "Now? Now you really can't pursue someone further than, 'No'. It's like, 'OK, cool'. But then there's the, 'Oh why'd you give up?' And it's like, 'Well, because I didn't want to go to jail?'"

The first item is that the climate of fear will worsen Approach Anxiety. I'll further add that sketchy dudes who don't care about their reputation or jobs (if they even have any) will ignore all the new unwritten rules and continue having a field day. MGTOW got a little stagnant a while back, but this feminist puritanism might well revive the Black Pilled part of the Manosphere.

The second item is that Bitch Shields as Shit Tests have become a red flag, even for token resistance when they expect the guy to keep plowing. So the ambiguous Chick Game shtick of "Are you man enough to storm my castle?" isn't going to give girls the results they want. This might become an improvement; I have no tolerance for immature games like that, and I disqualify girls who behave that way.

Yahoo!'s reaction

It's a better Yahoo! article than average, simply because it doesn't discuss trannies.

It's hard to find very much objectionable in the interview, even from a Blue Pill perspective. However, speaking of sound bite politics, Elizabeth Di Filippo of *Yahoo! Style Canada* dissected it quite thoroughly. Two days after publication, she fired back with "Henry Cavill missed the point of #MeToo — and he's not the first one".

> Instead of making headlines for his new movie, Henry Cavill is receiving backlash for his off-the-mark comments about dating during the #MeToo movement.
>
> …Cavill exhibits a growing trend for men in the post #MeToo era: A confusion for how to interact with women.
>
> …Cavill comes across as seemingly afraid, or unable to make a misstep — and that fear extends into his romantic life.

Maybe he wants to keep his job?

> At first, his comments read as seriously cringeworthy, and there's no denying that they are. The #MeToo movement wasn't a witch hunt to crucify all men, but an attempt for women to share their experiences of sexual assault to illustrate just how common women and men are victims of verbal, physical or sexual harassment.
>
> Loading…

There's a major difference between this stated objective and what #MeToo actually became. *Why is this hard to understand?* The Spanish Inquisition probably had some lofty-sounding goals too.

She quotes some others who (in her opinion) also missed the point. One stated that #MeToo led to a "climate of mistrust between the sexes." Another is from a psychotherapist who "believes there is an hesitancy for men to pursue women romantically out of fear of their actions being misinterpreted."

According to him, guys see the dating game as having been hard enough already before #MeToo complicated things further: "one false, unconscious move and you have been

categorized … there is no spectrum from being someone who just flirted badly or made a faux pas versus a serial rapist." She also cites a dating coach who's worked with guys fearful that even an innocent past conversation in college could ruin them in the present.

> The confusion and subsequent fear is a new reaction by men to an age-old problem that has impacted women. The newfound paranoia that perhaps a man's interactions with women haven't been appropriate is a direct result of rape culture quieting and discrediting victims, and conditioning women to believe that it was our duty to police our actions, instead of holding men accountable for theirs.

Translation: the witch hunt is *entirely our fault*. Remember that feminists are selective puritans who also say "slut-shaming" is bad. *Can you dig the logic?*

> The over-correction to avoid women altogether out of fear that their flirtations could be misinterpreted is an indication that perhaps men or "some men" are unable to decipher between flirtation and aggression, between a woman's interest and a woman's discomfort.

Really, who's incorrectly deciphering? Let's clarify this.

Everyone disapproves of genuine wrongdoing, except for outright criminals (who get rewarded with sex). However, most of what #MeToo actually has been describing is poorly-received flirting. Although bad game is a mistake, everyone (including women) is "guilty" of it occasionally. Still, #MeToo has effectively conflated that with *real* crimes, and encourages feminists to push the nuclear button. Also, when a guy is dogpiled on social media, investigated by HR, etc., he's guilty until proven innocent. Careers have been destroyed in the wake of this inquisition, an exceedingly disproportionate penalty for botched flirtation.

Further, this emphasis moves the focus from objective wrongdoing to *someone else's subjective reaction*. What may be well-received by some guys and in some circumstances may get a bad reaction in other cases. Men don't want to cause offense, but *we don't read minds*. Unfortunately, crossing the invisible line brings disaster. Finally, remarks without flirtatious intent can be misconstrued too. When drama queens and attention harlots got involved, #MeToo became quite a toxic brew.

She concludes:

> Confusion is a good thing. For any man worried that their actions could potentially be held against them, maybe it's time to be more conscious of what they say to a woman, what they text to a woman and what a woman says in return.

So feminism is still all about that "cold spike of fear" shtick. *Awesome!* Ironically, what Ms. Di Filippo wrote doesn't reflect on the actor in question, but rather the mindset of feminists and journalist types today.

Et enfin

At least they're in little "danger" of a guy asking them out on a date.

It concludes by stating that Cavill apologized for saying what he did. It's rather unfathomable why expressing honest opinions needs an apology, but hey, it's the Current Year.

Christian Doctor Fired In UK For Saying There Are Only Two Genders, Ending His 26-Year Career

July 25, 2018 | by News Syndicator | Link | Original Link

Via News.com.au:

A UK doctor who was sacked for refusing to refer to transgender people by their preferred gender pronoun says there is a “climate of fear” in his profession with staff “trained to inform” on one another for breaching discrimination laws.

Dr David Mackereth’s contract as a medical assessor for the Department of Work and Pensions (DWP) was terminated three weeks ago on the grounds that his refusal to use transgender pronouns could be considered harassment under the 2010 Equality Act.

The 55-year-old said his refusal to comply with the edict from the DWP had effectively ended his career, as he would never be hired for another government or National Health Service job again.

“As a Christian, I believe gender is determined biologically and genetically,” he told The Daily Mail. “I knew it could be the end of my work as a doctor, but I could not live with myself if I didn’t speak up. It would be dishonest — and I didn’t want to live a lie.”

After voicing his objections, Dr Mackereth was called into a meeting with a manager at his employment agency. “He asked, ‘If a man asked him to call you ‘Mrs’, would you do it?’ I said I couldn’t,” he said.

“If somebody has male XY chromosomes and male genitalia I cannot in good conscience call them a woman. We agreed I wouldn’t come into work until the DWP had decided what would happen to me.”

Dr Mackereth said it was “not a question of whether we agree or disagree but whether we are free to say so”.

“I believe with all my heart that God made us male and female and that I should be allowed to believe this,” he said.

“I’m not out to upset anyone. I care deeply about transgender people. But we must be able to say what we think, and defend what we believe in a non-combative way. Otherwise we will turn into a dictatorial state in which we are all enslaved.”

In his entire 26-year career, he said he had only ever treated one genuine transgender patient, but that anyone who questioned the fashionable theory that gender is a social construct risked being “lynched”.

Loading…

Doctors are now advised by the British Medical Association to refer to pregnant women as “pregnant people” to avoid offending transgender people.

Dr Mackereth said there was a “climate of fear” emerging among doctors about the new protocols.

“There is very little talk between staff these days because none of us knows what the rules are,” he said. “We are trained to inform on another doctor if they are unfit to practise and no one wants to get reported.

“There is a belief we cannot say what we think in case we get accused of harassment. Nurses coming across patients with male genitalia on female wards have whispered to me that the situation is wrong.

“Some of my colleagues — senior doctors — are fired up by what happened to me, but what am I supposed to say to them?

“After all, if they say the same thing as me, will the country start losing much-needed, remarkable surgeons who are no longer considered fit to work because they used the wrong pronoun?”

In 2016, Canadian psychologist Dr Jordan Peterson shot to fame over his opposition to anti-discrimination legislation which made it illegal to refuse to refer to a transgender person by their preferred gender pronoun.

Dr Peterson, author of the best-selling book 12 Rules For Life, has aggressively campaigned against so-called “compelled speech” — being forced by law to say something you don’t believe.

“It’s a demand that the population uses a certain kind of linguistic approach,” he said on a tour of Australia earlier this year. “It’s an appropriation of speech. There’s no excuse for that. That never has happened once in the history of English common law. It’s a barrier that we do not cross.”

Rick And Morty Is Targeted For Beta Males Who Crave Alpha Male Fathers

July 26, 2018 | by Jared Trueheart | Link | Original Link

Dan Harmon, a co-creator of the very successful adult cartoon Rick and Morty, is in some heat lately because of a tasteless comedic sketch he filmed some time ago. It's pretty disgusting, and a result of the fact that he didn't have an alpha father.

Hopefully the sketch was nothing more than being a beta comedy writer. For decades, comedians have been telling each other the Aristocrats joke. It's a stupid joke only valued for it shocking, improvised nature. Harmon, as a comedy writer, probably tried to impress his comedian friends with a shocking sketch. It's still horrible, but more than anything, it demonstrates that nobody ever taught him how respectable men behave in society.

More than that, Harmon and crew clearly yearn for an alpha male father figure. This is evident to those who watch Rick and Morty and are willing to do some armchair psychology.

Beta Pussy Pedestalization

To give my argument legitimacy, I must first establish that the show's creators are beta. Fortunately, I have some evidence for that.

Years ago while Harmon was the head writer for the show Community, he got a boner for one of the female writers that worked for him, Megan Ganz. Megan rejected him and he hated her for it. That hatred continued well into his 30s.

Dan Harmon and Megan Ganz

Harmon felt like he was cruel to her for the rejection, despite employing her as a writer for a successful show. He said that if she wanted to be treated only as a writer that he would do just that. It appears from his written and spoken words (which can be read in this Time article) that his idea of treating her cruelly was actually treating her like a professional. He goes into no more specifics than that. Eventually, he apologized to her publicly and privately.

The fact that he needs to virtue signal, call himself a feminist, and take the rejection so personally all signal that he is a complete beta male. But it's not just Harmon. He and the other co-creator made a conscious effort to hire more female writers to write the third season of Rick and Morty. They say that having a gender-balanced writing room made the third season that much better.

The women may not have hurt the show, but to say it needed more female writers despite the fact that it was such a success without them point to beta feminist virtue-signaling.

The Characters

Morty

Morty is the 14-year-old boy at the center of the show. He goes on sci-fi adventures to alternate dimensions with his grandpa Rick. During the course of the show, he gains more competence, confidence, and understanding. In short, by spending more time with Rick, he becomes more masculine.

Loading…

Rick

Rick is the Smartest man in the universe and Morty's maternal grandfather. He's competent in just about every way. Moreover, he acts like a strong man. He's always confident. He's (almost) always calm and collected. He scores the hottest women. His only flaw is that his supreme intelligence has lead him to nihilism, but in the course of the show he grows to be more caring of his family and thus a more complete man.

Jerry

Jerry is Morty's father and the epitome of a beta male. He's a coward, not just to strangers but to his own wife and children. He's incompetent at his job and just about everything that he does. He's weak. He's lazy. He's selfish, even willing to risk his kids' lives more than he is to man up (so to speak). Even his own daughter at one point calls him a beta-male sexist. He has almost no redeemable qualities. Also, in one episode he is homosexual.

The Arm Chair Psychology

At the beginning of the series, Morty is like Jerry, afraid and incompetent. Through his adventures with Rick, Morty grows in all metrics of manhood. Morty is a representation of the creators (and perhaps some male writers) at age 14. Jerry is a representation of the creators and writers as adult men. Rick is the man they all wish they could be and the man they wished had raised them.

Rick is clearly an aspirational figure to anyone who has seen the show. Other characters acknowledge him as a living god. He's cool. Because of his talents, he is free, freer than any man can ever truly be. If he wants something he goes to another dimension and takes it. If he is tired of something he goes to another dimension to avoid it. What man wouldn't want to be Rick?

So the creators of the show made a character they wish had raised them and contrasted that with a miserable character that is essentially their view of themselves. It's a hilarious dynamic and I won't hide the fact that I think the show is funny and well written.

I draw a direct correlation between the beta tendencies of the show's creators and their inability to present themselves as respectable men to society at large. Patton Oswalt and Michael Ian Black fall into this same trap, I suspect. Both defended Disney director James Gunn's horrific tweets. I believe they did this because they're both soy boys (watch Michael Ian Black's stand-up and tell me you don't think that he pleasures men through glory holes) just like Harmon. As such, they don't know that child abuse jokes are tasteless and inappropriate.

Unlike Gunn, who has been connected with a known owner of child pornography, Harmon

seems to be more of the tragic, beta soy boy type who doesn’t know how men behave because a masculine man never raised him.

Societies That Don’t Have A Stable Middle Class Become Matriarchies

July 26, 2018 | by Reggie Morgan | Link | Original Link

I wrote an article about enforced monogamy where I discussed how the responsibility of marriage, rather than just consistent access to sex, keeps men law abiding (if it was just about sex, broadly legalized prostitution would solve the low status male rage problem).

Karl Marx had a few opinions to the tune of marriage being one of the the shackles keeping proletarian men compliant under capitalism. Marx was a married man, by the way, so maybe that was a subliminal expression of his desire to escape the matrimonial ball and chain himself.

“Marriage is for cucks” — something Marx might say

Why would free-thinking iconoclasts reading ROK who just want to bang hot girls and who consume red pills like Ronald Reagan ate jelly beans care about whether or not other men successfully marry and settle down into the purgatorial drudgery that is middle class life? Besides, the middle class sucks: they’re boring consumerist unimaginative petit bourgeois sheep who clog up the freeways with their mini vans, bring their loud kids on airplanes, and blather on about sportsball and reality television.

If the middle class should disappear, it’d be the end of democracy

Consider countries without a large middle class. For one thing, they’re societies more prone to revolution. Did Tsarist Russia have a large middle class? Fuck no. Vietnam, China, and El Salvador, countries where communist revolution fomented, all had one thing in common: no significant middle class. Cuba was an exception and, while Marxists like Mao, Ho Chi Minh and Trotsky were considered middle class themselves, the nations they agitated in lacked a large middle class demographic.

The insipid, blue-pilled middle class keeps society safe and predictable. They provide the anodyne cultural security blanket that allows the standouts — the wealthy, the sexually successful, the rebels and the artists — to operate in contrast to mundanity. Moreover, they act as a buffer against the sanguineous hordes of either anarchy or totalitarianism; the middle class will never revolt because they enjoy lives just comfortable enough to deter them from general strikes and mass civil disobedience.

Think about how wealthy people in developing nations live: fear of kidnappings, Marxist rebels in the jungle, and drug cartels intimidating provincial governments require the third world elite to maintain expensive private security forces. Watch half a season of “Narcos” or the movie “City of God” and you’ll get an idea, or visit any poor country and observe how many buildings have iron gates over the doors and bars on the windows.

Sure, third-world plutocrats can afford to live in mansions with high walls guarded by attack dogs, but they're essentially besieged by the indigent masses.

Loading…

Not to belabor the point, but did Gaddafi foster a large, stable middle class in his country? Of course he didn't, and he died with a bayonet shoved up his ass.

Not even Gaddafi's all girl fantasy security squad could save him in the end

The Middle class is patriarchal

Here's where Marxism and feminism play footsie with each other: the characteristics of the middle class are defined by patriarchy. I didn't make this up—some PhD named Ruby K Payne articulated that idea in the 90's. In her book "A Framework for Understanding Poverty," Payne described the characteristics of social classes in America. Guess which social class was matriarchal> If you said "the lower class," you're right!

In the American socioeconomic strata, according to Payne, generational poverty follows a matriarchal structure, where the mothers, who aren't always certain who the biological fathers of their children are, take on sole caretaker roles for their children. Impoverished women tend to have a rotation of non-committal relationships with men whom they select for being basically "bad boys" (lovers and fighters) and consider fungible within the family unit.

The classic middle class by contrast is patriarchal where the men act as consistent primary providers, with women as either homemakers or secondary income contributors. While divorce is common within the middle class, patrilineal connections remain intact, with subsequent new marriages for each party as post-divorce norms.

When I read comments by single guys lamenting the unfair dating market and promiscuous millennial female behavior, I infer that either the characteristics of generational poverty have encroached into the middle class social strata or they're out

trying to run game in front of the welfare office. Signs point to the former even though the sign in the photo points to the latter.

This way to sarge a few desperate single moms

The Last of the Classy Ladies

If the traditionally patriarchal middle class adopts matriarchal lower class traits then what eventually happens to the middle class? It disappears. What happens when the middle class disappears? Purple haired postmodernists begin tromping through the North American marshlands, coordinating guerrilla raids with their smartphones and setting up pronoun re-education camps. There'd be a rainbow flag with a hammer and sickle emblem on it flying over the White House eighteen months later.

So high five the next paunchy dead-eyed slob you see holding his wife's purse at the mall and tell him: "Thank you for being the socioeconomic buffer between us and totalitarian communism. Well done."

4 Reasons You Should Start Drinking Alaska Chaga Tea

July 26, 2018 | by Rusty Shackleford | Link | Original Link

The following article was sponsored by Alaska Chaga.

Many men drink green tea or other types of tea for health reasons or just as a refreshing beverage. Alaska chaga tea is a tea that you should strongly consider adding to your diet for its numerous health benefits. Created from chaga mushrooms that naturally grow on birch trees in Alaska, chaga tea has been used for centuries as a folk remedy for numerous ailments due to its nutrient-rich nature. Here are some of the benefits of drinking Alaska chaga tea.

1. Antioxidants

Chaga Mushrooms -The Diamond of the Forest – with their All Important Black Crust

Alaska chaga tea is rich in antioxidants, molecules that stop the oxidation of other molecules. Antioxidants are used to eliminate free radicals from the body, which improves overall health and reduces the likelihood of developing cancer. It also slows down aging and prevents long-term cellular damage.

2. Improved Immune Health

Alaska chaga tea is also notable for containing a large variety of sterols, from botulin, lanosterol, ergosterol peroxide, and many more. Sterols are naturally occurring molecules that promote healthy cell division and growth. For example, inotodiol has been shown to enhance cell division and immune system function, as well as inflammation response, as does ergosterol peroxide.

Chaga is also notable for containing betulinic acid, a sterol that is vital for cell health. The betulinic acid found in Alaska chaga is superior to the betulin found in other staple foods of the human diet due to its greater bioavailability, which comes from the fact that chaga mushrooms extract betulin from birch trees and turn it into betulinic acid. Like the previously mentioned sterols, betulinic acid is vital in aiding cell division, immune health, and inflammation response.

Polysaccharides are another beneficial substance that is found in abundance in Alaska chaga. Polysaccharides are naturally-occurring molecules that have been scientifically shown to improve digestive and immune health. Combined with the immune-boosting effects of many sterols, Alaska chaga tea can act as a strong boost to your immune system, protecting you from disease.

Finally, Alaska chaga is also rich in beta-glucans, a substance that has also been shown to improve immune health. Chaga tea has been used for centuries as a means to ward off illness, and the presence of all these nutrients in chaga is why. If you want a healthier immune system, Alaska chaga tea is a very good addition to your diet.

3. Stress Reduction

Most people these days are under a large amount of stress due to their jobs, their

families, or a myriad of other factors. Excessive amounts of stress have been shown to have adverse effects on human health, from increasing the likelihood of getting sick to shortening one's lifespan. If you want to live a long, healthy life, you need to mitigate the effects of stress on your body as much as possible.

Alaska chaga tea is loaded with adaptogens, organic substances that have been scientifically shown to reduce the effects of stress on human health. Adaptogens aid stress response by allowing your body to remain balanced and healthy, making it less likely that stress will make you sick or have other adverse health effects. More importantly, adaptogens have been shown to increase physical and mental energy over time, making you more capable of taking on the day's challenges.

4. General Health

In addition to more esoteric ingredients, Alaska chaga tea is loaded with many vitamins and minerals necessary for good health, from vitamins A, B complex, C, D, E, and K to zinc, calcium, iron, and more. In addition to improving immune system health, chaga tea is also good for your liver and heart, helping you stay healthy in every way that matters.

The Alaska Chaga Difference

Masculine Men Drink Chaga

While chaga mushrooms are native to large swaths of Eurasia and North America, chaga found in warmer climates lacks the nutritional content found in more northern areas. Only chaga harvested in cold regions such as Alaska contains the necessary quantities of nutrients, vitamins, adaptogens, and other substances that make it a nutritious and worthwhile drink.

Alaska chaga is typically sold in chunks, powder, or tea bags, allowing you to make tea in whatever form you prefer. It can be brewed as a warm drink for cold winter days or refrigerated as ice tea for hot, sweltering summer ones. Not only that, Alaska Chaga's chaga products are free of artificial additives such as caffeine, gluten, preservatives, and other junk content that would otherwise blunt its positive qualities. Its lack of caffeine means that individuals who are sensitive to it will enjoy chaga tea as a refreshing alternative.

Finally, Alaska Chaga is a family-owned business that supports traditional masculinity and values. When you buy chaga from Alaska Chaga, you're supporting a small business that celebrates the virtues that made America—and Western civilization—great.

The Importance of Your Health

It may be a cliché, but it's the truth: you get only one body and one life. You owe it to yourself and your loved ones to take care of yourself as best you can, and part of this is consuming products that provide nutrition to your body. Drinking soy-filled lattes and sugar-filled energy drinks will only hurt your health in the long run.

Alaska chaga tea is one of the easiest ways to balance and improve your personal health. The amount of benefits that chaga tea carries, from improved heart and immune health

to healthy cell division and natural stress reduction, make it one of the easiest ways you can protect your body, and it’s a tasty drink as well. Even better, Alaska chaga tea is inexpensive, costing less than a dollar per cup.

In short, you can’t afford to be cavalier with your health, particularly when you have people who depend on you. Alaska chaga tea is one of the simplest ways you can improve your health, whether you want to reduce your chances of getting sick or lower the impact of stress on your body. If you’re a health-conscious man, you owe it to yourself to give Alaska Chaga a try. **Click here to visit the Alaska Chaga store**.

Don’t Believe The Historical Revisionism That Hollywood Inserts Into World War II Movies

July 27, 2018 | by John Carver | Link | Original Link

The United States has a timeless love affair with World War II which is unlikely to subside, even as nearly all veterans of the conflict (whether soldier or civilian) pass away and we draw further and further into the 21st century.

To be fair, this is quite understandable. Due to its immense scale of destruction and epic scope, the conflict is perceived to be the ultimate “Michael vs. Lucifer” face-off in human history.

The great triumph of the unquestionably good—the humanitarian and liberating United States and its Western allies—versus the cartoonishly evil Nazi Germany equipped with their cruel “muh 6 million” gas chambers, frankenstein technology, funky arm gestures, and over-the-top decked out uniforms.

Famous photos like these are supposed to give Americans the warm fuzzy wuzzies inside almost 75 years later. Even when they are working shit jobs, suffering from obesity, and have nothing exciting going on in life.

Sure, Italy and Japan were part of the bad guys too. While Spain, Sweden, Romania and other countries certainly played along by proxy and provided some voluntary soldiers, port access, raw materials, and freedom of movement among other hindsight no-no's.

However, the roles of Italy and Japan are significantly downplayed in modern times compared to the Nazis, who just make far better pop culture villains. (Heck, there are many SJWs in modern times who actually think Japan was a **victim** in World War II.)

The Nazi archetype also perfectly fits the modern 'social justice' zeitgeist in the United States, which is basically a (((puppeteered))) conflict that is designed to pit a broad coalition of "marginalized" peoples against a perceived oppressor.

Ignorant, insensitive, privileged, racist, heterosexual white male American "Nazi." Somebody stop him!

Women, blacks, Hispanics, Asians, Native Americans, gays, transsexuals, disabled people, and self-hating white liberal cucks are the "allies" of the conflict and are on the "right side of history," as the saying goes. Meanwhile, right-leaning and able-bodied heterosexual white males are the "racist" and "white supremacist" Nazi ogres of our age, who have been "emboldened" by the election of Donald Trump in 2016.

There is just one problem with the newly resurrected Nazi-bashing narrative in an increasingly non-white USA: it was almost entirely heterosexual white males who also **put a stop** to the actual Nazi's (and Japanese) in the 1940's and freed nearly all peoples of the world in the process. That unsettling fact needs to get the George Orwell "Ministry of Truth" treatment for all future movies and TV shows right away!

Historical Fact – U.S. Armed Forces Were Segregated In WW2 And Overwhelmingly White

Latino-American actor Michael Pena played a Sherman Tank driver in the 2014 movie "Fury" alongside his four other white crewmen. While not as blatantly inaccurate as a black or Asian soldier, it nonetheless tacitly implies to a modern audience that Latinos played a big role in beating Nazi's. Despite Latinos making up a VERY small percentage of the U.S. population in 1945.

With few exceptions, such as a select group of Navajo tribe soldiers who accompanied white American troops in the Pacific Theater to act as highly-efficient artillery "code talkers" (and bless their souls by the way), all military units of the United States armed forces were racially segregated in World War II.

White troops (making up well over 90% of total strength) fought in white-only units, blacks fought in black-only units, and the famous "go for broke" 442nd Regiment was composed of almost entirely 2nd generation Japanese-American men. This became the most decorated unit in the history of US warfare.

Loading...

Despite the thoroughly commendable contributions of non-white soldiers in World War II, it is **entirely safe** to say that both the European war and the Pacific war would have been easily won just based on the white component of U.S. manpower alone, which was a much whiter country in the early 1940's compared to today. Yet there has been a change in recent years, with an influx of social justice tinged World War II films which imply that 'ignorant' sentiment should be called into question.

Enter The WWII Black Super-Soldier!

Just put a black man in a P-51 Mustang (top speed 437 MPH) and he'll be able to go toe-to-toe with Messerschmitt Me262's (top speed 559 MPH) that his white counterparts couldn't handle. (Red Tails, 2012)

This phenomena of historical revisionist and minority empowering World War II films truly began in earnest with 2012's "Red Tails", which told a (fairy) tale about the Tuskegee Airmen in 1944.

Straight from the get go, it implies that the bombing campaign in central Europe is going very poorly for the USAAF (United States Army Air Force). Experienced German pilots are entering laughable turkey shoots, U.S. bomber losses are heavy, and white American fighter escorts are portrayed as hopelessly inept at protecting them. Thus enter a group of wise-cracking magical negros from Tuskegee, Alabama who save the day (every day) while one of them even gets to bang a smokin' hot Italian woman on his off time.

Voila. The European air war of the 1940's meets fabricated 2010's standards of racial justice, minority empowerment, "we couldn't have done it without you" vibes, and interracial hanky-panky! Just don't let some irritating things called "historical facts" spoil the fun.

And Now Integration!

White supremacist Nazi zombies are gonna git ya black boy! That pretty much sums up the upcoming movie 'Overlord', which automatically throws any semblance of historical accuracy out the window by portraying the African-American protagonist knee deep in a racially mixed group of U.S. paratroopers over Normandy.

Brought to you by director (((JJ Abrams))) and screenwriter (((Billy Ray))), you have a pretty good idea of where this is going. Expect plenty of gleeful killing of Nordic-looking

people, the African-American protagonist stoically taking verbal abuse from his douchebag goy white countrymen, a white female "Mary Sue" stock character who takes a liking to said protagonist, and plenty of other 1940s tropes given the same 2010's social justice twist as Star Wars.

No! Those racist white male zombie Nazi's are over there! Take my hand and let's go hide in the bedroom!

Conclusion

"Inglorious Bleeders" – Will a group of Jewish, Black, and Latinx female commandos fight evil Cis-white male Nazi scum in a future movie or TV series? Who knows.

I touched upon historical revisionism before in a previous article, in which the Game of Thrones developers (((D.B. Weiss))) and (((David Benioff))) wanted to create a TV series called 'Confederate', a show which would cling to the desperate and preposterous liberal

narrative that a hypothetical Confederate States of America would still have slavery in the 21st century (despite still 3rd world Brazil being the last place in the Americas to abolish it in 1888).

Whether it's 'Confederate' or 'Red Tails' or 'Overlord', these revisionist visual works all ultimately serve the same intended purpose. Downplay the importance of white males (or at least make them look bad in the process), and elevate in stature various U.S. minority groups and members of the female gender to rock star status. Simply to fit the emerging demographics and social expectations of an "equitable" 21st century USA.

9 Secrets To Living A Joyful Life

July 27, 2018 | by Howard C. Roark | Link | Original Link

Life doesn’t always have to be boring or sad just because most of the world is. Below I will share some of the ways I try to make my reality more pleasing and satisfying.

1. Avoid toxic people and negative thoughts

I know it’s easier said than done, but in case you want to live a joyful life, it’s quite important for you to practice not thinking negatively. Negative mentality can have extremely bad consequences for your health, mental sanity and habits, thus it should be avoided at all cost.

However, I know the truth is that it’s quite impossible for us to be happy all the time, since there are several things that can lead us to start thinking negatively even if we try our best not to. Some of them include relationship problems, toxic people, life misfortunes, and so on. But still in case you want to avoid bitterness infecting yourself, it’s best to try your best not to let these events consume you!

The best tip I can give you is to avoid as much as possible events or toxic people that trigger these negative thought patterns.

2. Travel

Traveling can be a good way to replenish your energy, make you reflect on life, and give you enough mojo to make sure that, when you get back to your routine and homeland, you will be at your ease, which will translate in you working harder through the rest of the year.

If you can travel with your best friends or family members, I recommend you to do so. It can be one of the best bonding time experience. However, never underestimate the power of traveling on your own. A lot of people are afraid of traveling alone thinking it might not be fun or enjoyable at all, but the truth is if you know yourself well enough, traveling alone can in fact be more enjoyable than traveling with friends or family.

3. Spend more time with family or those who are fond of you

“Many of the best things in life are not remunerative from the money standpoint, but are of immense value to society”- Orison Swett Marden

Let’s face it: your family might not be perfect (neither is mine), but they are probably reliable people that you can always count on. Spend more time with them or with some of your best friends that you know who will always have your back.

In our Matrix, we are forced to waste so much time with people we don’t really like or don’t care about at all. The best way to rebel against the system is to make sure you spend more time with people you really care about.

4. Don’t spend all your time playing video games

“You must keep in touch with the great life arena. Mere theories do not go very far ; it is life that Counts.” – Orison Swett Marden

Well, this one is quite obvious. If you are not where you want to be, you should be hustling right now instead of wasting your valuable time with video games or other time sinking activities.

Cheap forms of entertainment such as games or movies are a great way to refill your energy if you can’t go out or travel, but they do turn into a problem if they are becoming an addiction, thus leading to procrastination.

I’ve seen a boy so addicted with his MMORPGs that he even declined a date with a hot girl just to keep leveling up his stupid fictional character for an entire night. Believe me!

5. Read books and biographies from great men of the past

No great book can replace a great mentor. However, no one has the luxury to have a mentor who has deep knowledge about every subject in life. This is where biographies and technical books come in handy.

Loading...

If you can't find someone in real life to advise you about a certain area you don't have any experience on, search for books that might have answers about what you are looking for. I believe that reading biographies or autobiographies from great men of the past is one of the best ways to find the secret of living a joyful life.

At least for me, there isn't anything more inspirational than to be able to see how great men of centuries ago were once mere average Joes with flaws and facing life problems just like any of us. Every men who succeeded and reached prosperity had to first go through a lot of struggle, pain, and deception before reaching the top.

Whatever your final goal is right now, it's quite important that you never become arrogant to the point of believing you don't need to improve yourself nor look for mentors.

6. Fail big

Yeah, he failed trying to succeed. So what? At least he had the balls to risk his face at something he believed in, beta males will never have this kind of courage.

Failure is a good way to improve ourselves and discover who we really are. It's an adventure of self-discovery. Unfortunately, we live in a culture where people are so worried about their image that they'd rather never risk themselves in new pursuits due to being afraid of looking like a fool. Thus they end up never improving themselves.

Remember this: you can never become the best version of yourself if you don't want to risk failing, whether it is trying to game a girl, opening a business, playing an instrument and so on.

7. Be an example to those around you

"Give not that which is holy unto the dogs, neither cast ye your pearls before swine, lest they trample them under their feet, and turn again and rend you." – Matthew 7:6

Not everyone is bitter because they opted to be. A lot of people became toxic due to life events making them become disillusioned with the world and humanity. However, if they are willing to listen to you and change, you should try to help them out, but if you notice that they are refusing your aid, and their negativity cancer is starting to affect your look in life, then move on and ghost them if necessary.

As Jesus told us:

> Do not give what is holy to the dogs; nor cast your pearls before swine, lest they trample them under their feet, and turn and tear you in pieces.

There are some people who were beaten so hard by the School of Hard-Knocks, that all you can do for them is to let them find salvation on their own.

8. You won't always get what you want!

If you can accept that you won't always get what you want, without throwing a tantrum like a spoiled brat, you are more likely to become a real man and a more down-to-earth kind of person.

9. Find a "sanctuary" to keep you sane during the hard times

There will be times that we will be going through a lot in life. Nothing that we try will be working out while we encounter failure after failure. When those periods arrive, it's always good to have some kind of shelter to keep you sane.

If you have something or someone to fall your back on, it can be way easier to endure those difficult periods. My shelter during hard times is reading the Bible, but if you are not a religious person, look for something else to keep you sane. Your "sanctuary" can be one of your hobbies, someone you trust, or whatever that can keep your mind too busy to think about negative things.

Conclusion

To sum it up we have the power to create our own realities, even if we are not rich. How will you sculpt your world from now on?

The West Has Lost Its Vital Energy

July 29, 2018 | by Wilfried Wendel | Link | Original Link

Back then when our forefathers still chased deer in the woods, when they wrestled invaders in the mountains and threw their spears at ferocious beasts, they did it with fury in their eyes, full of strive and keenness, full of power, full of energy. Those who lacked it were prone to die as energy back then meant life force. Most men today would let the deer flee, would be stomped into the ground by invaders and would be ripped apart by the beast instead of killing it. Men today simply lack energy.

The Tyranny of Comfort

A realm of ease already spans across most of the Western world and turns men into bugmen. The most comfort, convenience, ease and idleness seem to be the highest goals and dreams of the modern human. And this decline, this devolution, is continuing and it seems that nearly everyone, even a lot of right-wingers, support it.

Are you a bugman?

The Industry is doing its best bring us wider screens where we can watch TV or YouTube the whole day while sitting on our cushy couch, jacking off to other men fucking plastic women in porn while sticking our third leg in a synthetic vagina. Truly glorious and manly isn't it?

Maybe sometime in the future, all men will fuck plastic sex robots from Japan that our truly wise and self-sacrificing scientists will develop. And I bet they will do it. They do it with such fanaticism, such faith that they are even willing to use the little remaining amount of energy they have left to attain that ultimate goal in the service of the realm of ease. Surely this leviathan, this god of ultimate degeneration to the most lowly, lethargic, and meaningless, is a form of "progress."

A happy future for the bugmen

Generally we live in a low energy society where low level individuals are rewarded through even more ease while spending even less energy. The bugmen choose the easy way of going through life, they kowtow before the establishment, before leftists, before feminists, before women. They go through school without questioning anything, they get a job where they sit around all day in the office, marry some crazy spinster and produce more bugmen with them, until they get cucked and their wives will continue their rule over them as single moms in form of economic servitude without the small benefit of sex they experienced before.

The energy to overcome those parasites has vanished in the bugmen, there is no true strive, no aspiration, no pursuit of any true goal in them besides worshiping the god of ease. This is the foundation to erase men's true energy, the little remaining energy that remains is used for slave work.

It's not only mental

In my own homeland of Germany, the military is so desperate in its search for new recruits that they even need to take in fat beta men. I even personally know a girl who is barely 62 inches high with a small childlike body serving in the military. Germany is even upgrading tanks and uniforms to be more comfortable *for pregnant women***.** Young men in Germany are often bragging about being manly and strong and hard while simultaneously putting no energy in being so.

Loading…

Single-moms can finally serve in the military!

Most men I know “approach” women only online because they are such faggots that they would never dare to approach girls in real life, while the fat girls get impregnated by low quality men and live through taxpayer money. At least these fathers don’t live in economic servitude of their land whales as in this case both partners don’t have any money. Those men are still powerless, aimless, useless. They don’t understand what they could do with true energy if they even had some.

Bugmen are nothing new

With the end of the stone age, men began to slowly degenerate and lose his energy. Strong and independent hunters became puny agriculture dependent farmers—kowtowing bugmen of their new elite: morose and joyless old hags and grouchy and grudging old men envious of their youthful energy—and worshipers of comfort and ease.

In rare cases, true alpha men ruled this bunch of bugmen and at least showed them an example of true energy and power. They could aspire to become as strong mighty and manly as them and weren’t broken by old hags.

Today's old hags

With increasing commerce and dwindling isolation, men could achieve some degree of independence by using their energy in craftsmanship and becoming masters of it. They could become cunning merchants or great warriors showing their bravery in glorious battle not for old hags but for their and their rulers' advantage.

Those were men who founded nations, progressed not only in technology but also in their existence. They progressed in becoming stronger, smarter, swifter. They tried to become higher men trough goals and aspirations. Instead, the industrial revolution, Marxism, the creation of welfare states, and unhealthy technology resulted in an unhealthy gigantic increase in bugmen.

The Answer

The only answer to this reign of idleness is revolution, revolution in form of strive, aspiration, ambition, in following a path to greatness, in discovering one's own energy, in manifesting it in from action and change. In finding the fury in your eyes. In becoming the storm over the once windless forest and breaking those trees who can't resist your might and energy.

Train in the gym, carve out your body like a Donatello or Michelangelo, sharpen your mind like the great Greek philosophers of old, learn to fight and make yourself and your ancestors proud of you, be a father, be a true man, be the energetic storm in the windless idleness.

I'll leave you with my favorite quote of the ancient Greek philosopher Heraclitus: "There is nothing permanent except change"

Black Doctoral Student Suspended By SJW University Tribunal For Asking White Woman On A Date

July 29, 2018 | by News Syndicator | Link | Original Link

Via The Daily Wire:

An African-American graduate student at the University of Missouri was suspended after asking a white woman on a date. He had been previously accused of sexual misconduct, but was found not responsible. He claims an administrator told him during the first investigation that he "looked like someone who might commit sexual assault."

He was never accused of sexual assault.

The student, identified in court documents as John Doe, was a doctoral candidate in Cultural Anthropology, and took dance fitness classes at the Student Recreation Center. During the 2015-2016 school year, John developed what he thought was a friendship with a female fitness class instructor (The Daily Wire is not naming her since it is not naming the accused student). John asked the instructor on a date in April 2016, and claims she said she was busy but discussed going out later that month. On April 18, she sent John a message asking him "to stop making romantic advances toward her," according to his lawsuit. She did, however, indicate that she still wanted him to attend her dance classes and wanted their friendship to remain professional.

ACTIVISM HIGHER ED BUBBLE POLITICS

Fallout: University of Missouri struggles with $50 million shortfall, reduced enrollment after racial protests

ANDREW JOHNSON - UNIVERSITY OF DENVER
JUNE 25, 2018

John apologized and said he would keep their relationship professional. That fall, he asked the instructor to recommend YouTube videos that could help him improve his dance technique. She suggested he take private lessons, but that she did not teach private lessons. For the next week, the instructor avoided John during her classes.

On October 14, 2016, John gave the instructor a three-page letter "apologizing for being awkward around her, expressing sincere feelings for her, and asking [her] what if anything she wanted from Plaintiff," according to his lawsuit.

After this, Rec Center Associate Director Emily Bach McElwaine told Mizzou's Title IX office that John had harassed and stalked four women who worked at the rec center, including the instructor. She apparently sent in allegations on behalf of three other women.

On October 20, the instructor was interviewed and said that John's communications were "bizarre" and made her "uncomfortable." On November 7, 2016, Title IX investigator Amber Lammers sent John a notice that he was being investigated for sexual harassment and stalking. John said during his interview with Lammers that he was concerned about the involvement of Salama Gallimore, who had, according to John, told him during a previous Title IX investigation that he "looked like someone who might commit sexual assault." John was assured Gallimore would not be involved in this investigation.

The final report on the recent investigation included an interview with John's dance class instructor, but none of the three other women he allegedly stalked. John was asked if he wanted a formal or informal resolution process. He opted for informal, which allowed Assistant Vice Provost for Civil Rights and Title IX Ellen Eardley to make a determination based on her review of the Investigation Report.

Loading...

The marginalization of heterosexuality continues with a newly invented term “stare rape”

Eardley sent John a notice in February 2017 giving him one final chance to request a formal resolution, which would include a hearing and the chance for he, the school, and his accuser to call witnesses. He declined.

On March 15, John was told he had violated the school’s policy on sexual harassment and stalking. He believed Gallimore played a role because the findings were based on his previous investigation — during which he was found not responsible. The findings indicated that his previous disciplinary history supported the accusation, because even though he was found not responsible, he “failed to learn from his previous warning regarding his conduct with an undergraduate female student.”

To be clear, his “previous warning” was an accusation that he had invited an undergraduate female student to office hours and implied that he would exchange exam answers for sexual favors, for which he was found not responsible.

Using the previous investigation to substantiate the current investigation, John was suspended for four years and banned from the Rec Center and residential halls. John says he was surprised by the severity of the punishment, and would have opted for the formal resolution if he had known that he faced such serious consequences. He appealed the findings, but those findings were upheld, although his punishment was shortened from four years to two. The suspension still terminated his participation in his doctoral program, effectively ending his academic career.

We just raped you with this photo

He sued on multiple grounds, including violation of due process rights, sex and race-based discrimination, and argued that the rules on harassment and stalking were too vague.

Mizzou attempted to dismiss the lawsuit, but U.S. District Court Judge Brian C. Wimes upheld many of John's claims, including claims that he was retaliated against for exercising his First Amendment rights in sending his dance instructor that letter, the school's policy against stalking was too vague, part of his due process claims, and his race-related claims.

25 Special Privileges Women Have Over Men—And Yet They Still Complain Like Spoiled Children

July 30, 2018 | by Beau Albrecht | Link | Original Link

Feminists claim they want equality. However, their true focus is maximizing their "empowerment" while constraining men as much as possible. They complain endlessly about The Patriarchy to push their agenda and for trying to recruit normal women. As usual, feminist rhetoric is opposite of the truth.

Double standards

During Victorian times, many regarded women as delicate flowers needing special protection. Today's feminists assert that women are strong and independent. They're scornful of the old-fashioned concept, but still play it for everything it's worth, angling for more preferential treatment. Here are some ways society already caters to the fem-centric agenda.

“Delicate flowers”

1. Affirmative Action programs and contract set-asides
2. Lenient treatment in the judicial system
3. Sexual harassment laws imposing puritanical standards at workplaces
4. Campus tribunals that will expel guys without due process, notorious for punishing consensual hookups that resulted in morning-after regret
5. Countless women-only societies, while male-only institutions are becoming rare
6. Men visually admiring the bodies women put on display is part of “rape culture”
7. Programs at all levels of government exclusively for women
8. Unattractive or socially inept guys subjectively are deemed “creeeepy”
9. Welfare payments for pregnancy that results from sleeping with exciting criminals and deadbeats
10. Women are exempt from the draft in most countries, not conscripted even for relatively safe pogue roles

“Strong and independent”

11. Women can curse, smoke, drink, and dress like men (or even in next to nothing), but men and traditionally-minded women aren’t supposed to call them out for being unladylike

12. Moral standards are effectively optional, and rhetoric opposing slut-shaming further encourages this

13. Consequentially, a young woman can enjoy a long extended adolescence before even thinking of settling down, while all but the most popular guys are invisible to her

14. Some feminist mental microbes argue that being a porn star is “empowerment”

15. Single motherhood is applauded

Both tactics simultaneously

16. After that “journey of self-discovery”, someone who partied away her young adulthood can start trying to lock down the best provider she can find. She’ll be taken seriously as wife material despite her high mileage. Dual mating strategy for the win!

17. Women can opt out of motherhood by getting an abortion for any reason whatsoever. The father has no say in the matter, and certainly not the baby. However, a man has no way of opting out of eighteen years of child support payments.

18. Women are free to act very provocatively, yet expect attention only from guys they like.

19. An office harlot can sleep with the boss for a promotion, but later can be regarded as a victim and sue the company.

20. Men are socially expected to initiate courtship, but the penalties are becoming very bad if it’s not well-received.

21. Women who do enlist in the military have obtained the right to be included in combat roles, where they’re unsuited. Standards are lowered to accommodate them, because political correctness is more important than combat readiness.

Despite *all these benefits and special rights*, feminist damsels in distress feign powerlessness and claim they’re being oppressed, because they want even more freebies. Unfortunately, society has been failing this big Shit Test thus far.

Loading…

But wait! There’s more!

The above is far from an exhaustive list of the preferential treatment society bestows upon women. Many guys automatically will take a pretty woman’s side in an argument. Men usually pay for dates. In clubs, they’ll even allow themselves to be used as vending machines for free drinks. The list goes on.

The Manosphere takes a dim view of all that. Princess Complex has gone too far, of course. Also, supplication is counterproductive. Finally, quality has been slipping in recent times. The knights of legend would put themselves in harm’s way for fair maidens. However, who would want to slay a dragon for an ungrateful feminist with a blue buzz cut, bad tattoos, and an atrocious attitude?

Still, perks for women actually did make more sense when men had some perks of their own. Notably, sex roles in times past included both rights and responsibilities. The traditional social contract between the sexes balanced things much better than today’s fem-centric nonsense. These understandings were reciprocal, within reason, in line with the actual needs and attributes of both men and women, and accorded with sensibility and time-tested tradition.

Naturally, feminists fail to apprehend this point. This is what patriarchy actually used to mean, rather different from how the term is mainly used today.

The fem-centric agenda harms society, including normal women

Although feminism claims to be good for women, are they delivering positive results?

Their rhetoric incites antagonism, disrupting the amicability normal in a healthy society. Promoting single motherhood was quite wrong-headed. Promiscuity takes a psychological toll and destabilizes any future marriages. Partying away one's most fertile years also has obvious effects. So do the promotion of careerism (defining success the way men do), consumerism, and unrealistic expectations. These things ultimately make women stressed, lonely, and miserable. *That's pretty lousy for empowerment!*

Divorce law is particularly harmful and full of glaring double standards. For a quick refresher, much of it still goes back to the Victorian notions. The major notable change is that "irreconcilable mutual differences" invalidate vows of "until death do us part". Actual faults are no longer required that reasonably constitute contractual default. Freebies include:

22. Division of property, meaning the ex-husband loses half of his assets.

23. Alimony must be provided "to support her in the manner to which she has become accustomed". This is extended long after the relationship ends, even if (as happens 75-80% of the time) she pulled the plug on it.

24. The ex-wife usually gets custody of the children. If she wants, she can alienate them from their father, or move across the country.

25. Inflated child support payments are usually well beyond foster care stipends, available even if that's the milkman's kid.

Removing the financial incentives for breaking up families would do wonders to solve this problem. However, if a legislative effort were initiated to fix even a single item of this archaic divorce law—like mandatory paternity testing for child support, or abolishing alimony—the feminists would howl like they're undergoing an exorcism. Women today wonder why guys are unenthusiastic about getting married. They can blame the feminist home-destroyers for turning marriage into a sucker deal.

Conclusion

It's rather comical that feminists still claim they want equality. That's just rhetoric to push their two-faced agenda. At this point, having equal status would be a big step down off of their pedestal. They haven't relinquished the special benefits and protections afforded to them. Instead, they want more goodies for themselves and more restrictions on men.

Still, after a certain point, griping about miniscule inconveniences just makes them look silly. *What are these spoiled brats complaining about, anyway?* Do these overindulged snowflakes believe they're living in a backward village in Afghanistan? Actually, they pretend that conditions are far worse than even that in their own society that incessantly caters to them.

For the record, I don't hate coddled young feminists who mostly have faced nothing worse than First World problems but claim they're victims. These memebots are annoying, but hopefully they'll grow out of it. However, the professors and other influencers who infect normal women with the mind virus can go to hell.

Girls Just Want To Have Fun

July 30, 2018 | by Roosh Valizadeh | Link | Original Link

A lot of men like to believe that the promiscuous or degenerate impulses of women today had to be programmed into them, but most of those impulses were there all along. All women needed was a more permissible environment. One song that hinted at this truth was Cyndi Lauper's nearly forty-year-old single "Girls Just Want To Have Fun."

On a casual listen, the song seems to portray a girl's innocent need to party, but decoding the lyrics reveal that "have fun" really means "fuck." The song then makes perfect sense and accuately portrays the female behavior we see today.

I come home in the morning light
My mother says when you gonna live your life right
Oh mother dear we're not the fortunate ones
And girls they want to have fun
Oh girls just want to have fun

Cyndi went out, partied, and had sex with a man. After coming home, she received token resistance from her mother, but not enough to change her behavior, perhaps because mother also wanted to live out her own youth in the same manner.

The phone rings in the middle of the night
My father yells what you gonna do with your life
Oh daddy dear you know you're still number one
But girls they want to have fun
Oh girls just want to have

The father is portrayed as a disgusting, idiot slob who is out of touch when compared to his empowered daughter. It's a surprise that he even lived in the house. Today, 23% of children are raised by single parents. Removing the father figure is especially dangerous to a female because she then attempts to simulate his love through shallow sexual encounters or attention whoring. Even with a father in the home, there is no sign that Cyndi was punished for her late-night party lifestyle.

Some boys take a beautiful girl
And hide her away from the rest of the world

I want to be the one to walk in the sun
Oh girls they want to have fun
Oh girls just want to have

Loading…

Cyndi wants to display her beauty to everyone, even if she already has the love of one man. It's important for her to always be in the position of upgrading her current man if she happens to find something better. She wants to have the option of fucking other guys on the side, because relationships are too boring for a young girl who has her entire life ahead of her.

That's all they really want
Some fun
When the working day is done
Oh girls, they want to have fun
Oh girls just want to have fun

Before feminism really dug its heels into the culture, Cyndi already assumed a "working day" for women. Even she knew that work would be so dull that it would have to be counter-balanced with fun and casual sex. Girls spend the day working to be independent from men to spend their nights getting used by attractive men at night.

The song was originally released in 1979, but does it not perfectly describe the mentality of an average woman in 2018? Today's woman spends her prime having fun and only considers settling down when her career is "established" or her options for attractive men begin to dwindle. It then becomes a game of musical chairs to lock down any reasonable man, but even in that case, she will still be open to having fun on the side if a new man excites her vagina.

Have enough fun yet?

I used to believe that men and women had to be somewhat brainwashed to participate in

degenerate behaviors, but I no longer think that is the case. The problem with the modern era is not that it programs people to be bad, but it allows and *encourages* people to be bad by simply acting on their human impulses. The wives you think were so traditional fifty or one-hundred years ago would be just as promiscuous today if they had the choice, and that includes your beloved grandmothers. Societies of the past did a reasonable job of constraining the flaws of our species, but those constraints are now gone, and what you see today is actually more “human” than ever.

Female “Changes” Her Sex To Male—Then Gets Accused Of Male Privilege

July 30, 2018 | by News Syndicator | Link | Original Link

Via The Blaze:

Zander Keig “was an outspoken radical feminist” prior to transitioning into a male and “spoke up often, loudly and with confidence,” the Washington Post reported.

Then Keig made the transition — and life hasn’t always been easy being seen as a male.

“When I speak up now, I am often given the direct or indirect message that I am ‘mansplaining,’ ‘taking up too much space’ or ‘asserting my white male heterosexual privilege,’” Keig, 52, told the paper. “Never mind that I am a first-generation Mexican American, a transsexual man, and married to the same woman I was with prior to my transition.”

Keig — a Coast Guard veteran and now a licensed clinical social worker at Naval Medical Center San Diego — told the Post that workplace suggestions that angry or violent male patients were suffering from trauma or depression were often “dismissed or outright challenged. The overarching theme was ‘men are violent’ and there was ‘no excuse’ for their actions.”

Still, as a transgender male, Keig noted to the paper that the “assertion that I am now unable to speak out on issues I find important” is “offensive and I refuse to allow anyone to silence me.”

‘I was put off by the way that some women want to be treated by me’

More of Keig's revelations to the Post:

> I do notice that some women do expect me to acquiesce or concede to them more now: Let them speak first, let them board the bus first, let them sit down first, and so on. I also notice that in public spaces men are more collegial with me, which they express through verbal and nonverbal messages: head lifting when passing me on the sidewalk and using terms like "brother" and "boss man" to acknowledge me. As a former lesbian feminist, I was put off by the way that some women want to be treated by me, now that I am a man, because it violates a foundational belief I carry, which is that women are fully capable human beings who do not need men to acquiesce or concede to them.
>
> Loading…

'Significant reduction in friendliness and kindness now extended to me in public spaces'

Keig added to the paper there has been a "significant reduction in friendliness and kindness now extended to me in public spaces. It now feels as though I am on my own: No one, outside of family and close friends, is paying any attention to my well-being."

Then a few years into Keig's transition came a ride on a bus, the Post noted, during which "this difference hit home."

Shoe now sometimes uncomfortably on the other foot

Keig said there were six people on the bus, “including me. One was a woman. She was talking on a mobile phone very loudly and remarked that ‘men are such a**holes.’ I immediately looked up at her and then around at the other men. Not one had lifted his head to look at the woman or anyone else.”

Then the woman looked at Keig — and “commented to the person she was speaking with about ‘some a**hole on the bus right now looking at me.’ I was stunned, because I recall being in similar situations, but in the reverse, many times: A man would say or do something deemed obnoxious or offensive, and I would find solidarity with the women around me as we made eye contact, rolled our eyes and maybe even commented out loud on the situation. I’m not sure I understand why the men did not respond, but it made a lasting impression on me.”

Here’s a clip of Keig discussing life as a male — about five years ago — noting that “I love being a man. I love everything about it.”

You can read the complete Washington Post article here, which also profiles two other transgender males.

I Stopped Being A Leftist Who Supported Bernie Sanders

July 31, 2018 | by Edgar Tru | Link | Original Link

> Yeah! I'm fucking better than you!

This quote by Ana Kasparian, a co-host at the Young Turks, summarizes rather well the attitude of many piss-stained leftist. I once thought these cats as authentic, truth seekers, honest Abes – all terms which have laid bare how clearly inaccurate I was in my judgement.

Kyle Kulinski is another lad worth noting because, as I also used to espouse, President Trump is a "bigot." That word alone is a line of horseshit. The meaning of the word is that you (whoever you are out there) do not tolerate another's worldview, values, etc. Thus, you are the bigot. Anyone with a chunk of intellectuality may already foresee the fallacy that I'm about to expose. It is not possible for anyone living in society to *not* be a bigot. It is a literal contradiction.

"Hi. Are you a bigot?"

"Greetings stranger. I am not."

"Well, Jimmy is a bigot. He thinks women shouldn't be president."

"Then he most certainly is a bigot."

"But that's his worldview. He values a woman who stays home, cooks, cleans, takes care of Little Johnny and Little Billy and blows him once a week. Do you not tolerate his values?"

"I do not. It's bigoted."

". . .?"

". . ."

“Do you fucking get irony, bro?”

The word cancels itself out. But that precise attitude when approaching terminology is lost to many folks. The word itself is nothing more than propaganda aimed to make the figure cast over with this label as immoral. And, given one takes it to its full extent, it can easily work to dehumanize and demoralize said bigot. One could claim this is lousy propaganda; however, given its effectiveness, it seems rather good.

The liberal echo chamber

Back in my liberal days, I danced about progressive circles—The Young Turks, Secular Talk, Think Progress, Raw Story, etc. In fact, the two former mentioned often recited news stories from sources such as the Huffington Post, the New York Times, a well-crafted echo chamber hell-bent on forming tunnel vision to its audience.

Tunnel vision creates an unbalanced worldview. An unbalanced worldview forms an unbalanced mind which, if taken fully down the block, forms a *dangerous* mind. One where you think you are the good guy, the contrary is the bad guy. As in, you hold the moral high-ground over that set person whom you’ve so easily stamped on the black mark of Cane. In this worldview, through the eyes of a bigot in denial, you are morally superior.

Now, I dare not claim these sorts of liberal turd monkeys actually *all* believe they are morally superior, but by simply observing their character, and their rhetoric, it states a pretty solid case.

I used to be a Bernie Sanders supporter

Back when I was (God forgive me) a Bernie Sanders supporter, I recall a chat with an older gentlemen as we were discussing politics. I espoused that Trump was a bigot and that I'd never vote for him. In that moment, deep in the under layers of a youthful liberal mindset, I felt I was righteous. It was religious, even. I was standing up for the 'right' thing. To use a perhaps better term, I was standing up for morality and pushing back against bigotry – the immoral and downright detestable.

A part of me can appreciate that religious-esque quality of that time period. In the progressives circles, I was not always so adamantly for our victim-of-the-day games. It was just the right thing to do. Because, despite what many people think of me, I actually cared and owned human compassion. I wanted everyone to benefit. I see this as a reasonably positive sentiment; except, of course, it can never, nor shall it ever, manifest in full-circle within any set society.

Someone who believes another person is immoral, therefore garnering themselves the moral high-ground, may be what I've come to dub the 'moral supremacist.'

The moral supremacist is most likely to come from someone like Ana Kasparian who, by force of thy government, will utilize their big-boy guns to execute their set view of morality. That is what makes them a supremacist. The willingness to stand by as force is brought down upon another (the morally inferior) through guns and rouge badges.

Are you a moral supremacist?

Now, in regards to myself, I cannot logically claim to hold any moral status above anyone else. That would bust open the whole debate about what morality is and where it comes from — religious or secular? It's a whole damn thing for Christ sake. And, given we were to amuse the holy doctrine side of the coin, then I'd need to provide empirical evidence for that set dogma, and to which I'd have none.

On the contrary, taking humanism into account, we can merely extract that it boils down to feelings, whether the feels of the day are either positive or negative. That, in my view, would be far more suitable, if life was ever so simple. It is not. And, the stone-cold piss-and-grit truth is, not everyone benefits from being nice to everyone. That is utter bonkers.

I am not a moral supremacist. May I utilize government to my advantage even in situations where force is shoved into another's face? Yes. The difference in terms of mindset is that I want what I want and fuck you, while my political adversary is claiming to some moral high-ground, or moral status which is above my pay grade. The difference is I'm more in step with Social Darwinism, and the contrary is a manipulative cunt-bucket.

Loading…

Moral supremacy leads to manipulation

Liberal moms in the back, enjoying the show

Manipulation is a curious little bitch. Bitch? Perhaps because women seem to naturally possess it without realizing they do it? Maybe. Maybe I'm suggesting men — especially of the liberal-minded far-left spectrum — are taking on the horrors of female qualities. Moral supremacy bounces right off manipulation because it cannot provide any tangible evidence for its claim; therefore, it aims to make those who stand in its way feel morally inferior, which either makes them back down and shut up, or aims to rally comrades against them.

Morality itself is an abstract word where a-many fine and ugly folk can take from it what they want, often being based, placed and operated through emotion.

I prefer words, at least when engaging intellectual chat, that are observable. Example would be, as it is the core of this article, morality. I look at it like this: that which is good is positive, and that which is positive is constructive, and that which is constructive furthers the human race (or self-preservation) by a variety of means, including health, safety, security and perhaps even some happiness here and there. So, to the contrary, that which is bad is negative, and that equates to being destructive, and that ties into the opposite of its opponent.

That seems an easy, understandable way to view life, if you happen to be like me. And many folks, including right-wingers, do not like this idea that morality is subjective and that we all see different things, or people or whatever else, as being either good or bad. And where it gets tricky is that, again relaying that stone-cold piss-and-grit truth, not everyone benefits.

An easy go-to example is that not everyone benefits from open borders. Not everyone benefits from Affirmative You've-Got-To-Be-Kidding-Me-This-Is-Still-A-Thing? Action. Not

everyone will benefit from more social programs, the expansion of government, and so on.

Beating leftists at their own game

Utilizing the term 'moral supremacist' is some fine means of propaganda against leftism and their overall bitched-tongue mentality. They are supremacist, in the sense of morality, and, to refer back to the beginning quote, they think they are better than you and will dominate you by force, if necessary.

Whether it'd be more taxes, limiting gun rights, open borders to third-world countries which brings in a surfing awesome tide of foreign diseases and rape and butchery — all these things are where the aggressive progressive will go to serve their new god: Humanism. Humanitarianism. Egalitarianism. Something about 'fuck the privileged cracker.' It's all in their holy doctrine: "Feelings and an Open Heart for Middle Eastern Refugees." And now Maria Ladenburger is dead. And that's not meant in humor, but to open up another whole understanding that moral supremacist are dangerous, and people get hurt.

At the end of the day, when times of peace run their course, it's a man-eats-man world. And I'm not willing, in this current state, to compromise with these moral supremacist dogs. I'd rather spit on the ground which they walk than give a progressive a cookie. Then it's milk, staying at my place rent free, and fucking my woman whenever they want. Not happening.

Conclusion

It'd been nice to live in a country where people compromised and we got along despite

our differences. The conundrum is that I want what I want and fuck you. That's how it is now. I'm not up for being lectured to about gun deaths because some kids down in Florida had a really bad school day. If we take that approach, how about we tally all the lives saved by guns, from regular Joe The Plumber types, and see who's dick is bigger?

I'm not interested in hearing how the right thing is to go harder on guns because it may save a Bernie-kid-wannabe from being shot up in some school in California. No offense, but isn't one less liberal skunk muffin good for everyone? That may have been in poor taste. Some may even suggest I'm mocking the Florida school shooting and truly believe, deep down, that it's 'wrong.' It isn't. It's bloody (did you catch that yet?) hilarious.

Just some thoughts.

10 Reasons Why You Should Move To Greece

July 31, 2018 | by Themis Malone | Link | Original Link

The tide of globalism and multiculturalism sweeps the civilized world, and Greece is no exception. Often in the news for the wrong reasons (economic problems, leftism, third world invasion), the country nevertheless has many advantages that merit the attention of an upstanding man. He may well consider that a short or longer stay be worthwhile.

1. Very good healthcare

Most people in the country use the public healthcare system, not only because it is completely free for residents (and very low cost for foreigners). The doctors and other staff in public hospitals are generally competent and experienced, as they see tens of

cases each day. There are administrative problems, but the core of the system is sound.

2. Very good justice system

Compared to the arcane, legalistic and people – squashing Anglo-Saxon legal mechanism, the justice system of the country is good. Just avoid the lawyers whenever possible, because, although cheap, as a rule they do not know what they are doing. Whenever I went to a court, told the truth, and told it in a simple, understandable way, I was given justice.

3. Civilized population

Except for immigrants and Roma (gypsies), which make up already more than 10% of the population, people are basically peaceful and upstanding. Again notwithstanding the aforementioned two categories, criminality is low. You just have to use some psychological tricks, which you learn quickly, to have your work done. Pretty much everybody speaks English.

4. Nice weather

There is sunshine most of the year, with the exception of the North of the country.

5. Low cost of living

Most people live under dire financial straits, and salaries almost never exceed 20,000 EUR net per year. Private and public sector workers are paid the same, but the latter do generally nothing. Self-employed professionals (doctors, engineers, etc.) earn more, but nowhere close to what their Western counterparts make.

Don’t come here looking for a job, but if you have a (net) passive income of 25,000 EUR, you will find out that you can live like a king (okay, like a prince, but you get it). With the exception of branded items, which as a ROK reader you have no need for, products and services in the country cost roughly 50% less than in the West. (If you go to Mykonos in the high season, you just asked for it.)

Loading…

6. Low cost, high quality housing

The Royal Decree of 18/02/1954, byour beloved King Pavlos, made sure that virtually all buildings are made of reinforced concrete, with very high safety factors. As a result, houses are extremely resilient, comfortable, spacious, and cheap.

7. The state subsidizes (real) investors

If you have 500,000 EUR or more to invest, you will find out that the state can give you the same amount, to set up a business. For the price of a third-rate apartment in London or New York, you may become a mighty industrialist.

8. Possibility of provider game

A red-pilled gamer will face the same difficulties with those in Western nations, namely dwindling pool of attractive females, due to promiscuity induced gravitation towards the ultra rich, obesity, bitchiness, body deformation, etc. However, with the pitiful income of most girls, you can apply a reasonable amount of provider game. ‘Reasonable’ is the keyword here—I don’t want you to turn into a sugar daddy.

9. Affordable dating

I follow Mr. Valizadeh’s game advice to the letter, with one exception—I do dinner dates. A nice dinner for two, often with the accompaniment of live music, doesn’t cost more than 30 EUR. Even the famous Gazarte night club, frequented by artsy, cute girls offers 8 EUR drinks. Now, if you go to bouzoukia, reserve bottle service, and park your BMW in front, you’re asking to be ripped off.

10. Affordable whores

In days when game fails, you can have your needs catered for by honest, not ugly Venus priestesses, for a price between 20 (avoid) and 50 EUR. Your health will not be at risk, as long as you don't do something silly.

Conclusion

Greece is an interesting place for men with the mindset of ROK readers. Avoid August when the weather is very hot, and opportunities are stifled by the tourist wave, and visit us from September to see for yourselves.

3 Things I Learned About Modern Women From Watching ‘Sex And The City’

August 1, 2018 | by Rohan Artino | Link | Original Link

I had a lazy week last week. It’s winter where I live, and I had a pretty bad flu. For the first time in a long time, I watched TV. Two nights in a row, I stumbled upon an episode of ‘Sex and the City’. I’d never watched it before, but had heard it mentioned as one of the influences that has driven Western women to be what they are today.

Upon watching for five minutes or so, I saw it as something that, as a red pilled man, could be of use to me—hearing the inner monologues of these women straight from the horse’s mouth (yes, that was a Sarah Jessica Parker joke).

I rented the first two seasons and watched them in about a week. For a while, it was mildly entertaining, but, more than anything else, it solidified beyond a doubt everything that red pilled men have been saying. It truly showed the ugly inner world of the modern Western woman; someone given unlimited options and undeserved attention.

Here are some things I learned:

1. Women want to have their cake and eat it too, and have no self awareness about their hypocrisy

This woman clearly deserves a millionaire Alpha to see her as ‘The One’

Two of the women on the show, the horse face (Carrie) and the brunette (Charlotte), are perpetually looking for love, or ‘the one’. After dating a man about 3-4 points higher than her (known as ‘Mr Big’), and having dated for only a few months, Carrie dumps him because he didn’t want to introduce her to his mother. “I need a sign, tell me I’m the one,” she complains to ‘Big’. After he refuses to give her a ‘sign’, she breaks up with him. Her monologue concludes that she has “faith in myself, faith that I would one day meet someone who would be sure that I was the one.”

This is the same woman who, in the earlier episodes, was having one night stands left, right and center, and who, in another episode, makes out with another guy and takes him home (although they don’t have sex) after a tame disagreement with ‘Big’.

On top of that, in an episode that starts with her period being late, she spends the entirety of it contemplating the horror that she might be pregnant. It’s portrayed as if she potentially has a terminal illness—“Oh no, no more riding the carousel and drinking myself stupid. How will I ever live?” Truly ‘the one’ material.

Another quote from Carrie that shows a total lack of self awareness: “It’s like the riddle of the Sphinx… why are there so many great unmarried women, and no great unmarried men?” I guess she never asked the men whether they found women in their mid 30s with no skills and a significant notch count ‘great’.

2. Men are seen as disposable. There are no ‘feelings’ for the men, only feelings for their utility.

Wants a guy to provide for her and be her handyman, but won't blow him

"Always marry someone who loves you more than you love them," a woman getting married whispers to Carrie on her wedding day. There is no love there, or in 99% of the relationships on the show. The women truly indoctrinated into 'New York dating culture' are pragmatic; putting men into categories of a) can he fuck me good, b) can he buy me nice things, and even c) can he do work around the house for me.

Loading...

In one episode, Charlotte ends up sleeping with the handyman in her apartment building, because he was planning to move to another city to become an actor. She realizes she wouldn't have anyone around to "lift heavy things," so she sleeps with him to try and convince him to abandon his acting dream and stay.

In another episode, Charlotte states that it is a requirement for the man to always make more money than the woman. Meanwhile, she refuses to give oral sex to a boyfriend, frigidly saying she will never do it.

Ask not what a man can do for you, but what on earth do you have to offer a man?

3. Women 20 years ago were much more feminine than women today

‘Mr Big,’ a true Alpha

This was perhaps the scariest discovery of all. In all honesty, the women in this show still blow most of today’s Western women out of the water in terms of femininity.

Despite all the characteristics that I listed above, when they were actually interacting with men, there was a greater deal of respect than what you see today. They weren’t so emboldened to show their solipsism in front of men. Even the way the women moved was more feminine than the women today. I didn’t see a tattoo or an odd piercing on any of them. The women at least smiled a lot when talking to men, and (apart from Carrie) dressed in a classy but understated way.

I can’t help but notice how American women today have ruined their natural beauty by their increasingly masculine behaviour. The fact that even these self obsessed New York yuppies were far more feminine than the average Western woman today shows how toxic things are now.

Final thoughts

If you are a man on the fence about whether to pursue serious relationships with Western women, I would give a few episodes a watch. It shows the inner thoughts of women who have been put up on such a pedestal that they are simply unable to be happy with any one choice.

These women always found a way to make themselves dissatisfied with the men in their lives; And that was 20 years ago, before internet dating, the ‘body positivity’ movement, #MeToo, Instagram, the obsession with tattoos and piercings, the notion of ‘gender fluidity,’ and the general hatred of masculinity that is routinely in the media. Tread carefully, gentlemen.

(I’m off now to get my T levels checked. I think they fell in the last week.)

4 Unusual Punishments That May Be Better Alternatives To Expensive Prisons

August 1, 2018 | by Beau Albrecht | Link | Original Link

The deterrence theory of criminal law is about making an example of wrongdoers. As one British statesman put it:

> Men are not hanged for stealing horses, but that horses may not be stolen.

In late 18th century Britain, there were 220 possible capital offenses. In actual fact, only about a fifth of death sentences actually resulted in execution. For the less severe crimes, there were ways of reducing the penalty. Benefit of clergy evolved into a one-time mercy allowance. Enlistment was another avenue. Surely this was a great recruitment tool for the British Navy. It's certainly better to hoist ropes than to be suspended by one.

The following are some old-time punishments that have been effective deterrents. Some are rather harsh, so this is merely something to think about, not necessarily specific recommendations. We've covered flogging and the cucking stool before; here are some others.

Reciprocal penalty for false accusations

The first items in Hammurabi's Law Code concerned false accusations.

> If any one bring an accusation of any crime before the elders, and does not prove what he has charged, he shall, if it be a capital offense charged, be put to death.
>
> If he satisfy the elders to impose a fine of grain or money, he shall receive the fine that the action produces.

Determining the truth of the matter involved a flotation test in the sacred river. Ancient Anglo-Saxon law had similar trials by ordeal. One method involved grabbing a stone from a cauldron of boiling water—one hand deep for ordinary cases, elbow-deep for serious ones. Making accusations required skin in the game.

Feasibility

Trial by ordeal is a bit outdated, though modern lie detectors don't do much better. Still, making a perjurer face the same penalty as the falsely accused did is the major takeaway.

Who deserves it

Perjury and obstruction of justice are increasing problems. There have been countless cases where someone is accused of something dreadful, facing "trial by media" and general character assassination while it's under investigation. Then when the truth comes out, the media that promoted the story (because it fit their narrative) is curiously silent. Meanwhile, false accusers are seldom punished. Instead, they get lots of attention and accolades. This needs to end.

Penal transportation

One way out of the death penalty for petty criminals in Britain was agreeing to be sent abroad. To pay for the trip, they would become indentured servants. This meant temporary slavery, though of course there were clever ways of increasing the nominal seven year term. About 50,000 came to colonial America this way. After the American Revolution, Australia became the destination for debtors and pickpockets.

Much was wrong with all this. However, removing troublemakers is needed more than ever before. If the tradition is revived, we'll forego indentured servitude and just load undesirables onto troop transports.

Feasibility

Deportation of some of the following is already permissible. It's time to enforce laws already on the books, and perhaps add some new ones.

Who deserves it

First, illegal aliens should go home, no questions asked. That's what normal countries do, including the places they came from. Also, those recently granted citizenship who become career criminals here can leave too. "Aztlan" supporters, including participants in groups advocating Mexico's conquest of the American Southwest, are clearly subversives who should GTFO.

Foreigners advocating Sharia law should be deported, because this contradicts Constitutional law. That's sedition. Naturalized immigrants supporting Sharia law should go too, because they lied during their citizenship oath when they agreed to accept our legal system.

Spies should be deported, even from "friendly" countries, even merely for industrial espionage. Dual citizens in government positions who agitate for wars that benefit their other country of citizenship should leave too. Those conflicts of interest are treasonable, which is why dual citizens don't belong in government positions. Politicians, lobbyists, or

media figures covering for spies or warmongers-by-proxy should leave too.

Loading...

Judicial amputation

The Middle East isn't exactly considered a high-trust society, but theft is very rare. That's because the thief gets a hand chopped off. It's pretty nasty, but it works. It's excessive to punish petty theft so severely. Unlike Sharia standards, this should be reserved for the worst cases.

Feasibility

Again, this is gruesome, though the Fifth Amendment does specifically mention "crimes punishable with loss of life or member".

Who deserves it

Robbing a liquor store might get five years in prison. However, stealing with a pen is different. White collar crooks generally get much lighter sentences (if anything), probably served in Club Fed. This is despite stealing orders of magnitude more than the contents of a cash register and a bottle of bug juice.

Suppose that if a million dollars in economic damage is involved (theft, embezzlement, stock market manipulation, etc.), chopping off the hand becomes a possibility. That would give crooks something to think about!

This can go further; over a billion could constitute *capital theft*. This has precedent from British law; stealing goods of twelve pence (about the price of a silver spoon then) was a

hanging offense. Keep in mind that after the banksters and Wall Street whiz kids crashed the economy ten years ago, *not a single arrest followed*. If they'd feared becoming lamppost ornaments, maybe they'd have reconsidered their high-stakes gambling.

Jail therapy for addicts

Whenever a Viet Cong guerrilla got hooked on opium, they'd put him in a hole in the ground for three weeks. The addicts went through withdrawal, their brain chemistry normalized, and meanwhile they contemplated their mistakes. As we'll see, Communists are more sensible sometimes than liberals.

Feasibility

Unfortunately, jailing someone for addiction was deemed cruel and unusual punishment, according to Earl Warren's hug-a-thug Supreme Court. The *Robinson v. California* case of 1962 was the first misapplication of the Eighth Amendment.

Lawrence Robinson, who had needle tracks on his arm, either confessed (according to the cop) or didn't (according to him) to using heroin. Instead of learning from his 90 day sentence, he lawyered it up to the Supreme Court. The majority opinion ruled that addiction is *only a disease*. Didn't they know that junkies usually steal to support their habit? Didn't they realize people get hooked because they abuse illegal and dangerous narcotics repeatedly? Nope; they argued that maybe he was *born that way*—yes, really.

Were these bleeding-hearted judges utter dimwits? Or did they *understand perfectly* but push a soft-on-crime agenda for nefarious reasons? Robinson himself died of an overdose before his SCOTUS appeal was even filed. However, the Supreme Court kept it going to make their point, even though the outcome obviously wasn't going to affect the

dead junkie.

Who deserves it

Fortunately, people still do get busted for dope possession, allowing them a chance (hopefully) to unscrew their heads before they kill themselves. So should addicts.

Conclusion

The US Constitution's Eighth Amendment forbids cruel and unusual punishment. Prolonged executions like drawing and quartering, breaking on the wheel, hanging in chains, and crucifixion are indeed excessive. However, because the Constitution supposedly is a "living document", the Supreme Court habitually legislates from the bench, especially since the liberal Warren Court. That's why all this won't fly.

Finally, disproportionately severe penalties are unjust. However, it's equally true that the law is an ass.

UK Dissident Tommy Robinson Freed After Being Imprisoned For Reporting On Grooming Gangs

August 1, 2018 | by News Syndicator | Link | Original Link

Via Breitbart:

The British Court of Appeal has released street organiser and citizen journalist Tommy Robinson from prison on bail, pending a fresh hearing over his contempt of court charge.

Lord Chief Justice Lord Burnett quashed the contempt of court conviction handed to the former English Defence League leader in May, which saw the activist going from arrest to trial, and to prison in just five hours and under a blanket of enforced media silence.

The court's written judgement stated the speed with which the original conviction was

made “gave rise to unfairness”, and that there was a “lack of clarity” over evidence for the charge of contempt given to Robinson.

Further, the document states the original judge should have resisted “the temptation” to rule on Robinson’s behaviour there and then, as after he had offered to delete the video he created from Facebook the “urgency went out of the matter”. Instead, the judge should have referred the matter to the Attorney General rather than acting immediately.

In all, the judgement found, the original case had the opportunity to “have avoided the risk of sacrificing fairness on the altar of [haste]”, but failed to take it.

Loading…

Robinson’s defence team have maintained that the unusual speed with which he was jailed had led to “deficiencies” in the legal process.

The QC defending Mr Robinson in the appeal told the court the original trial had been “unnecessarily and unjustifiably rushed”, had featured “procedural difficulties”, and the sentence was “manifestly excessive.”

Robinson had been live-streaming the arrival of defendants of another trial outside Leeds Crown Court at the time of his arrest, and part of his bail conditions prevents him from returning to that court. Another trial has now been ordered to take place by the Court of Appeal, but the Lord Chief Justice ruled that Robinson had already served sufficient time pending the outcome of the retrial, and was, therefore, to be released.

The order to release came after a short hearing which followed longer proceedings on July 18th, where the judges hearing the case delayed their finding to give themselves time to confer.

Following the hearing, it was claimed by Robinson's lawyers that the judge who served the first sentence in May was in such haste to pass his judgement, he didn't even take time to watch the full video created outside the court, which was the basis for the prosecution.

4 Reasons That Make Austin A Great City For Men On The Prowl

August 2, 2018 | by Jon VonStroke | Link | Original Link

When it comes to U.S cities that offer favorable conditions for single heterosexual men, most would agree it's slim pickings. It's no surprise that so many men have grown disenchanted with the American dating market and therefore are looking elsewhere, such as eastern Europe and Asia. Austin, while not perfect, does have a lot of upside for men who are willing to put the work in.

I have spent a total of four years in the trenches and while I have certainly encountered my fair share of knocks on the way, all-in-all it's been a fruitful experience. Here are four reasons why Austin should be on everyone's radar, particularly if you're in the pump and dump business.

1. The Women

Austin earns decent marks in this department. While nines and tens are not as abundant as other major U.S cities such as Miami or New York, you should have little trouble running into myriads of single women that fall within the seven to eight category range. This is because the University of Texas, located in the heart of Austin, is responsible for producing an almost endless supply of young-attractive coeds. Health and fitness is also trendy—which helps keep the obesity rates at bay.

Women for the most part are friendly and have an approachable aura, making day and night game quite lucrative (assuming you have an adequate level of game). Austin is a

city full of transplants, which means most people you will encounter are new to town or have only been living in the city for the last two to three years. This eliminates many of the social-clique-barriers you would normally be forced to contend with and considerably reduces the propensity for women to be bitchy and dismissive when cold-approached. The result is a refreshingly pleasant and productive gaming experience.

Dating apps are ubiquitous and therefore offers another viable resource for meeting and attracting women. I personally only use them sparingly during times when I am bored or need to supplement the pipeline. Between the University that acts as feeder system, the booming job market which draws in young post-college-graduate floozies, and the amicable nature of most women, Austin is an environment that even a novice seducer should find relative success, while the more advance players have the potential to inflict some serious damage.

2. The Music Capital Of The World

Austin has the unique distinction of being dubbed the “Music Capital of The World”. This slogan originated when it was discovered Austin had the most live music venues per capita than any other city in the nation.

While this label may be an exaggeration, Austin does have over 250 live music venues and close to 1,900 bands/performing acts that play a wide variety of diverse genres of music. There is live music available for consumption everyday of the week and best of all, many of the shows are free or under twenty dollars. This provides an inexpensive and unique date option for women who are opposed to meeting up at bars or lounges (my preferred choice).

Two of the most renowned festivals in the world are located here. South by Southwest (SXSW) and Austin City Limits (ACL). Both of these events fill the city up with swarms of loose women from all four corners of the world. The majority of them stay in hotels and Airbnb’s that are within close proximity to the venue(s) which can result in some easy same day romps.

During my first SXSW, almost four years ago, I managed to rack up three notches in the span of six days. It is worth noting my game was mediocre at the time but that glorious week served to be the catalyst for my future successes.

Loading...
I was initially not the biggest fan of live music, concerts, and festivals but this happens to be one of the major keystones that provide the city with its unique charm. With time and the fact that I discovered it to be an effective medium to meet women, I gradually came around to it. If music is one of your pastimes or you're a starving artist look no further.

3. Outdoor Culture

With an average of 228 sunny days of the year, mild winter weather, outdoor marketplaces, seven lakes and a plethora of parks/trails, Austin is a perfect destination for the outdoorsy person. Zilker park, the jewel in the crown, is a 351 acre plot of land that is dedicated for running, jogging, biking, swimming, and kayaking.

Lake Travis and Austin are two of my favorite spots. In the summer you will encounter flocks of intoxicated women on boats listening to talentless top-40-artists. As long as you are not socially inept and possess adequate muscle tone you should have little trouble engaging these shit-faced harlots.

The key to extracting these women from opposing beta-manned enemy boats is simple—you and your crewmen must establish your boat as the most alpha and lively vessel on the seven lakes. This can be achieved by proudly displaying your "Make America Great Again" trucker hats and body-shaming every obese blue-haired feminist and soy boy in sight.

Another trademark of Austin is its bizarre obsession with dogs. If you detest dogs this

might not be the city for you. There are dogs everywhere and when I say everywhere I mean everywhere—bars, restaurants, coffee shops and even indoor shopping centers, to name a few. Eighty percent of the women you will make contact with will more than likely own a dog. I saw this as an opportunity and ended up adopting a dog of my own. I have earned quite a few scalps at the park by virtue of having a dog. They say a dog is a man's friend—it might be his best wingman too.

4. The Nightlife

6th Street, a historic bars and entertainment district located in the urban core of downtown Austin, is a must see attraction. This district of town has 88 bars, which ranks No. 1 in the nation for most pubs per capita. Thursday through Sunday all year long, the street is filled to the brim with hordes of cum-thirsty women. It lives up to most of the hype and is an essential destination for any man who is looking to inflate the notch count. If you are living in Austin this will be your primary battleground and if you are just visiting or passing by, make it your obligation to see it, you won't regret it.

The Rainey Street bar district of town is also worth investigating. It is a street full of renovated houses turned into bungalow-styled bars that has increasingly become popular in the last few years with the young professional contingent, particularly with an archetype of hipster men that like cat t-shirts, have an affinity for distasteful sleeve-tattoos, and sport methodically sculpted designer-lumberjack-beards. Have no fear, these men are only masquerading as alphas but are actually betas who offer little to no threat.

Conclusion

I did not delve into infrastructure, affordability, and the job market purposefully. Most of that information can be obtained online. Plus, I wanted the focus of the article to be on the dating landscape. While Austin is no poosy paradise, it's a less grueling environment

than a place like Seattle or Toronto. If you’re a bachelor that is looking for a new stomping ground, you may want to consider Austin.

4 Alternative Christian Pastors You Should Follow

August 2, 2018 | by Edgar Tru | Link | Original Link

I am not religious. I've amused spirituality and with other ventures in seeking anything which may be above, or below, us. I would still consider myself leaning more on the atheist side of the spectrum; however, I am not militant in regards to spitting upon religion's face as I once was back in those naïve years of liberal atheism. But I can still appreciate a Sam Harris or Christopher Hitchens book here and there, despite our opposing views.

I enjoy listening to others divulge their set religious or spiritual beliefs and practices. Everything from a recently converted Roman Catholic, to a Southern-based witch and her rituals with witchcraft, to the exorcist Bob Larson, whom I'll first be discussing.

I've witnessed our contemporary liberal society, whom seemed to only seek equality for all, take advantage by doing the exact same thing they claimed was perpetuated against them. A recent example is the bake-a-gay-cake scenario. The bakers were far less discriminating toward the queer couple because, despite not approving of their lifestyle or whichever way you view it (nature vs. nurture), they are still willing to provide them with already available options. The queer couple, however, are the ones who act on moral supremacy and are willing to invoke government to essentially financially (including risk of jail) pressure the bakery to perform an action they are religiously against.

One is being denied a service with other readily available options, while the other is being forced to perform a task without *any* other options. See how big the difference is? This proves quite easily that separation of Church and State is a lie.

So, here are five pastors I find to be pretty damn cool.

The Exorcist Bob Larson

Bob Larson was the slick cat who interviewed the first official Family of Satanism. Heading off with some other cats who, to the offense of even liberals and the era of the flower children back way when, held fascist-esque views and espoused ideals adhering to Might Is Right. Truly glorious characters they are.

Bob Larson has come into controversy for perhaps obvious reasons. He's been seen to be taking advantage of folks and their naivety in terms of understanding science and mental illness. And that may be so. Myself, I can not be certain, but, either way, I still enjoy watching a good exorcism and the flailing of the supposed possessed victim. No disrespect intended either.

I will not attempt to mock these folks, as they could be potential victims of 'evil' spirits or be mentally disturbed. They may outright be paid actors. Either way, Bob Larson chucks on through the liberalism of today and does not back down from the beliefs he espouses he adheres to.

Baptist Pastor Steven Anderson

Steven Anderson is far more controversial than the previous mentioned. He is a beautiful spark of "No homos will ever be allowed on this church as long as I'm the pastor here! Never!" that spits fire in the face of today's peer-pressuring society. You often times, more than not, *must* accept (or be friendly-esque) gay marriage with open arms or be labeled a bigot or homophobic. Regardless of my views on gay marriage—I frankly do not care who wishes to invoke even more government into their lives—I can appreciate Pastor Anderson's piss-and-grit honesty as he attempts to stand by what he preaches.

He's also no comrade to this idea that Jews are God's chosen people. His documentary Marching To Zion attempts to expose this lie of Jews being this special chosen group. Now, I am no expert on religious studies; however, from the perspective of any Israel-supporting West-bound Christian, this documentary may be of value to you.

Loading...

If that isn't fuel-to-fire enough, then take his questioning of the Holocaust and the official numbers. Regardless of the numbers, or whether there were gas chambers or an attempt to literally genocide an entire group, it is still a hot topic that one even *dares* to question the official body count. And I can appreciate that he does not back down in the face of flying accusations he's a racist, anti-Semite or else-wise. He holds to what he feels God is and marches onward.

Pastor Jesse Lee Peterson

On his show, he’s had on atheist Jaclyn Glenn, anti-white propagandist Tariq Nasheed, white nationalist Richard Spencer, heavy metal LaVeyan Satanist Brian Werner, transgender Blaire White, and quite a few other fun guests.

What I appreciate about this man is how loving he seems to be. He’ll have on seemingly anyone just because he wants to chat. It doesn’t matter what side the spectrum you’re on, whether politically, religiously, culturally. This attitude is *clearly* lost to many folks, both leftist and right-wingers. He doesn’t have to support your set values, but he also doesn’t have to be this hot-headed antagonist either. I can really appreciate that about a person.

This man grew up working on a plantation, yet harvests no anti-white hatred. In fact, if one listens to him regularly, you’ll find he’s alt-right friendly and understands the issues plaguing the black folk and that it’s not all the cracker’s fault, and that America would most likely be better off with a European-based majority.

Pastor Bob Beeman

This is a less-known cat. He operates the Sanctuary International Matrix. He's a heavy metalist and pastor. In one of his videos, he displays a sentiment of minimalism, which I've come to embrace more and more into my adult years.

When he felt the Lord told him to downsize, he went from a home of 4300 square feet to 300 square feet. Even in lack of religious adherences, I do not engage in consumerism. I find it often repulsive, empty and overall not satisfying. I've not been sucked into this consumer-based deadened society hell-bent on the latest Apple product, despite how fantastic some of their products no doubt are. I'm still pro-PC, anti-MacBook, though.

One thing I really appreciated was he once talked about Christians who takes a non-Christian's moment of despair or depression, as an attempt to basically say, "If you accept Christ you'll be happy." He recognized the dishonesty in that because, as he essentially said, everyone (religious or otherwise) suffers from time to time, and that taking advantage of someone in their time of grief isn't very dignified. That's a solid approach to being more honest in your life, especially as a Christian.

Conclusion

Again, as I made mention way above, in this West-based era of liberalism and the pressures it cast upon so many who defy it, standing by your religious values can be difficult; especially, since science may give way to addressing many topics within religion, I still find a sense of respect and admiration to those standing by their beliefs. And given, statistically speaking, many atheists lean toward leftist politics, I find myself distancing from them more every day.

I cannot handle this overblown sarcasm of atheist like Kyle Kulinski and this smug, bitched-tongue attitude he displays toward many Christians, along with his followers and those alike. It repulses me greatly. And I now see quite clearly why Tucker Carlson always displays that the-fuck-you-saying-bro? face.

7 Ways That Modern Women Use Their Bodies To Profit From Male Thirst

August 3, 2018 | by Beau Albrecht | Link | Original Link

The traditional sexual marketplace transaction is that men trade resources with women for companionship. There always have been ways to circumvent the system. However, modern technology has created a vast new landscape in cyberspace to profit from their bodies.

1. Vlogger

If you send them donations, why not also send donations to guys too?

Today, some make a full-time living by producing videos on a wide range of subjects. Income is derived by donations and monetized revenue from the shows. This is a limited niche, of course. There's a great deal of public attention out there, but even this is a finite resource. It takes quite a bit of it to be able to support oneself this way. Naturally, being cute helps to attract viewers. It's basically a "something for nothing" proposition, though the least personally damaging of these new hustles.

Fairly recently, this has generated political controversy. (Do guys like Stefan Molyneux gets extra views and contributions based on their looks?) I'd prefer not getting into the tradthot debate, but this is the basic idea. Some female vloggers are making a living mainly because they're cute, not from the ideas which they discuss but usually didn't originate and sometimes don't exemplify personally. Basically, they're much like regular celebrities, though with better political messages.

2. Instagrammer

Aww, how romantic!

A reasonably cute babe can post a goofy duckface picture on social media and get dozens of “likes” from guys who barely know her but wish they did. Some of them turn it into a profession. The revenue keeps instagrammers stocked with lots of designer goodies and allows them to travel the world.

The money comes from “sponsors”. Their johns are often Arab oil barons, and they’re into pretty extreme stuff. They typically tag-team the instagrammers, and sometimes poop on these “Dubai Porta-Potties”. Tag The Sponsor revealed how this works.

Making a lewd proposition up front is pretty bad game, but trying to sweeten the deal by offering money is even more likely to get someone slapped. However, *everything is different* for Instagrammers. Without the slightest hesitation, they negotieate deals to rent themselves out as cum dumpsters to Arabs with too much money. That’ll give you something to think about next time you fill your gas tank.

3. Cam Girl

Not pictured – a dildo collection, and a bottle of pain reliever for carpal tunnel syndrome

For some, flicking the bean or playing with dildos isn't just scratching an itch; it's a "job". This is similar to old-fashioned peep shows, but the Internet gives "live video models" a worldwide audience. They masturbate on livestream, and their fans pay them while they're masturbating too. *What a deal!*

Seriously, why pay to whack off?

4. Sugar Baby

Courtesans have been around for ages. Now there are websites to facilitate this, allowing the "sugar babies" to maximize opportunities far and wide like women already do with online dating. (If only DARPA had known the interesting ways their civil defense communications network would be used!) The sugar daddies should find a real girlfriend instead of these greedy gold diggers.

5. Stripper

Sucker!

These gals dance on stage while the guys behind the “pervert rail” shower them with money. Further, they perform lap dances. However, the big money happens in the back room from “extras” delivered away from the eyes of any vice cops. The following quote says everything you need to know.

Loading…

> I’ve worked in bikini, topless, and currently nude. In my opinion it’s all basically the same. I say that because the goal is the same… aka hustle the men for as much as you can. This is especially true because no matter what your wearing the goal is to get them in a VIP room.

Proceeds are split 50/50 with management, sometimes linked with organized crime. The stripper’s half usually goes straight up her nose.

6. Porn star

This is what bad parenting does.

The difference between porn stars and hookers is only a technicality. According to American law:

- Banging for bucks is illegal except for regulated brothels in rural Nevada.
- Banging for bucks on camera is perfectly legal.

A court decision long ago ruled that when a camera is rolling in the room, then having sex for money is *only acting*. Huge difference, right? Naturally, this helped enable porn to go mainstream. It's great money, but drug abuse and STD scares are common.

7. Prostitute

Prostitution in Amsterdam

At the very end of the continuum are hookers who *don't pretend they're not hookers*. The

“oldest profession” now has websites too; one no longer needs to find them in a bad neighborhood. Some do argue that any transactional exchange of resources for companionship is itself prostitution. However, there are some key differences. For one thing, traditional relationships can lead to love and family, while the likely result of sleeping with hookers is catching herpes.

Most outright hookers have two things in common. First, they come from highly dysfunctional backgrounds. Second, they’re addicted to hard drugs, usually crack. Smoking Satan’s boogers is one of the most corrosive things there is to the human soul, even worse than banging strangers for money. In times past, prostitution resulted from extreme poverty; now it’s for dope.

What kind of women sell their bodies?

Is the deal ioo good to be true?

I’ve dated three especially entrepreneurial sorts, not as a customer, though admittedly my wisdom was questionable. I’ve known several others socially. They can be personally charming, though they’re pretty flaky and have chaotic personal lives. Some say they’re lazy and greedy, and I can’t argue with that.

The money can well exceed that of a normal job, and the social penalty for selling one’s body isn’t what it used to be. The temptation is understandable, but it’s still a bad decision. One of my friends insisted that she had no well-paying alternatives to being a porn star. All I can say is that careers aren’t built overnight, and her drug habit wasn’t helping her finances.

Actions have consequences

Exit strategy? What's that?

Obviously, the long-term viability is pretty limited. These hustles are dependent on looks, so after hitting The Wall, the party's over. Then they'll have to find real jobs. On the cusp of middle age, they'll enter the workforce without experience or real employment history.

Can they become housewives? Presently, there's no shortage of guys willing to close the deal on heavily shopworn merchandise. However, a woman who wasted her early life doing this must choose someone who isn't too picky because he has few options himself. She might even have to settle for a guy who is neither rich nor handsome—*horrors!* Further, time is running out to have children.

Also, how many of them have great financial expertise? Quite often, they blow much of their money on dope. They might've gone into these "professions" because they were desperate for cash, and they'll leave them just as broke. Further, they generally won't have Social Security credits, 401K savings, IRAs, or stock portfolios. That means eventually they get the bargain basement nursing home, perhaps with nobody visiting them.

Other than that, pursuing prostitution ("soft" or otherwise) causes grief and psychological damage. Exploiting the sexual marketplace like this is no different from any other "get rich quick" scam. *If something looks too good to be true, it probably is.* In a healthy society, most would've made better choices. If they didn't make these mistakes, they could've been great girlfriends, wives, mothers, or even merely productive workers.

Men can stop this by not paying for it. *Don't support degeneracy.*

3 Must-Read Books For Men In Their Late Twenties

August 3, 2018 | by Alfonso Taft | Link | Original Link

27 is a big year for men. 28, even bigger. For men around or approaching this age, there are three books I recommend: *Righteous Indignation* by Andrew Breitbart, *Death of Cool* by Gavin McInnes and *A Dead Bat in Paraguay* by Roosh.

In these three books the authors describe what their life was like in their late 20's. All three share in common a transformative change during this period. For readers, especially those in their late 20's these books provide the worthwhile tool of perspective.

Personally, I'm 27 approaching 28; I found it valuable to read about what other relatable men were like at this age.

These three books also double as history lesson concerning our modern media landscape. Although the authors all have recognizable names online today, life at this age for these men was far from glamorous.

Righteous Indignation: Excuse Me While I Save the World!

Before launching their websites and giant media brands, Andrew Breitbart and Matt Drudge spent their time on obscure message boards.

> "The Clinton alt group was my favorite, and it really exemplified what the early Internet was all about," wrote Andrew Breitbart, "The other person dropping his ideas into this alt group (and many others) was somebody named Matt Drudge."

After forming a friendship online, Matt Drudge later introduced Andrew Breitbart to Arianna Huffington. At the age of 28, Andrew Breitbart began his first media job.

> "I'd be working out of Arianna's house in Brentwood, not far from my apartment in Santa Monica."
>
> "I had my buddies Arianna and Matt, and we were all hanging out together, and we were all doing more from Los Angeles with minimal resources that the mainstream media were doing from Washington, DC, with hundreds of reporters. It was great fun."

Can you believe Andrew Breitbart, Arianna Huffington, and Matt Drudge used to all hang out as friends? Can you also believe Mike Cernovich, Milo Yiannopoulos, and Baked Alaska used to all hang out as friends?

The moral of the story here is that your friends and business partners in your late 20's will likely change, sometimes dramatically. Andrew Breitbart died in 2012. Matt Drudge is now the most recognizable name in media. Arianna took a sharp turn left and her husband left her for a man.

> .@ariannahuff is unattractive both inside and out. I fully understand why her former husband left her for a man- he made a good decision.

> — Donald J. Trump (@realDonaldTrump) August 28, 2012

Click here to view Righteous Indignation on Amazon.

The Death Of Cool

In his late 20's, Gavin McInnes started *Vice* alongside a heroin addict and a man referred to as "Bullshitter Shane."

Before *Vice* became the horrific pile of Satanic globohomo trash it is today — it was still pretty degenerate. But they had some good writers. Mainly, Gavin, and Jim Goad, author of *The Redneck Manifesto.*

As revealed in the book, Gavin was the main creative force behind the brand's early success:

> "I worked my ass off every waking moment and cut costs to the point where we were doing the whole thing for free."
>
> "I shot the pictures myself, wrote the articles, edited them, and laid them out. When people said we needed more women or minorities, I made up ethnic-sounding or female aliases for myself."
>
> "Our computers were refurbished pieces of shit we were hustled into buying and they contained so many defects, it wasn't unusual for me to lose a ten-page layout I'd spent all night assembling. Every time something like that happened, I'd get up off the floor, sweep away all the pieces of the chair I just smashed to bits, and focus on the fact that most people would have quit at this point, and that I wouldn't. I was also happy not to be planting trees anymore."
>
> Loading…

Gavin left *Vice* in 2008, and the brand went from being somewhat edgy to what it is today, an HIV-positive media virus. If you told a typical leftist millennial *Vice* employee, reader, or viewer that Gavin McInnes is the paternal creative behind the brand and Jim Goad used to write for them, they would roll on the ground crying, shitting themselves uncontrollably.

What else makes the book worthwhile for a man to read in his late 20's? Gavin had game. He "managed to lay a good three hundred women over the course of twenty years and they were usually in the 7 range."

> "Threesomes are a cinch if you're good-looking and famous. I'm ugly and hated so I had to work hard to set them up."

He also had a sense of his own SMV and adjusted accordingly:

> "When the bands were done and *Vice* was broke I marked myself down 50 percent off and fucked fatties, AKA "slumpdumpsters."

He describes his late 20's sexlife in such graphic detail, I'd rather not pull quotations from some of the more action packed chapters. Some of the paragraphs venture into the *50 Shades Of Grey* territory from a man's perspective.

Click here to view The Death Of Cool on Amazon.

A Dead Bat In Paraguay

After quitting his job as a microbiologist at the age of 28, Roosh left the United States en route to bang his way through the continent of South America. *A Dead Bat in Paraguay* gives the reader a first hand account in the evolution of Roosh's international game.

Things didn't go exactly as planned for our protagonist and in the beginning and there are many rejections, flakes, and unexpected bowel movements. Roosh gave a few readings from this book on a recent live stream:

> "The closer I got to giving Dr. Wang my two weeks notice, the more insolent I became. I started coming in extra late to minimize the time I would see him. I went home for lunches so he couldn't find me. I took walks to the convenience store nearby instead of hanging out in the break room. Just a bit longer, my wall calendar told me, and I could go, until the day finally arrived.
>
> I asked Dr. Wang if he could talk for a minute. He knew something was wrong because I never asked him for a private conversation. I just came out with it.
>
> "Dr. Wang I'd like to put in my two weeks notice."
>
> "Whaaaaaaaat?"
>
> "Yeah, umm, it's just time for me to move on. I want to take some time off."
>
> "But I thought you were so happy here. You were going to start working on getting your masters degree. Why would you want to leave?"
>
> "I just want to take a long vacation I guess. I'm not sure, but I want to take a break."
>
> "If there is a problem, we can fix it. Is it your pay? Tell me."
>
> I wanted to tell him all the reasons I hated him and the work. I wanted to tell him why working for a corporation is a one way path to a stale, monotonous life where the only thing to look forward to are increasingly dull weekends. But what would be the point? I would just waste my energy on a man who believed in the system. There was nothing he could do to change my mind."

For those of you new to Roosh or ROK, *Dead Bat* is essentially Roosh: Episode 1. There are plenty of points in the book where Roosh could've "given up on game" or "went back home." If he did, you wouldn't be reading this today.

Click here to view A Dead Bat In Paraguay on Amazon.

Conclusion

The late 20's are a time for the execution of intuitive bold decisions. The three books above show how three different men approached that crucial period of their lives.

What 50 Years Of The Birth Control Pill Have Done To Society

August 5, 2018 | by Max Roscoe | Link | Original Link

On July 25, 1968, Pope Paul VI published his seventh and final encyclical titled Humanae Vitae (Of Human Life), subtitled On the Regulation of Birth. It addressed the question of artificial contraception, the importance of marriage, the role of women in society, amongst the growing problem of rapid population growth.

Background

In 1960, the first oral contraception pill was released. "The Pill," as it became to be known, began the sexual revolution, and is directly responsible for many of the societal problems today, from rampant divorce to high promiscuity to lack of happiness in both women and men.

Interestingly, while the pill is widely used in the west, less than 1% of women in the ethnostate of Japan take contraception pills. Their divorce rate, which has quadrupled since 1950, is still less than half that of the US.

Church Position on Moral Behavior, Marriage, and Life

The first encyclical addressing birth control was issued by Pope Pius XII in 1930. Titled Casti connubii "Of Chaste Wedlock," it reaffirmed the sanctity of marriage, prohibited artificial birth control, and reasserted church authority over private life and civil governments in this realm.

While modern Republicans love to throw around terms like "sanctity of marriage" while flirting with their soon-to-be fifth wife, they ignore its meaning. Sanctity is holiness or sacredness. There is nothing holy or sacred about wifing up a girl who has been slammed by 100 other guys before you, even if you both manage to be loyal to each other. This type of union violates the sanctity of marriage, just as much–likely MORE– than gay marriage or any other weakening of the institution.

Marriage ≠ Holy Matrimony

Pius XII reaffirmed that holy matrimony is a sacrament of the church, and supported the role of the wife as a homemaker, insisting that wives obey their husbands and husbands love their wives, as Christ loved the church.

Pius XII: No Ma’am!

I consider marriage and holy matrimony two completely different things. If a friend of mine wifes up a slut, goes to the courthouse, plunks down $35 and gets a marriage license, that is a marriage. If a man takes a virgin into the church, and they emerge as man and wife, as was the custom for 1,900+ of the 2,000 years of Christianity, then that is holy matrimony.

Due to scientific advances, including the oral contraception pill introduced in 1960, it was necessary for the church to reassert its position on marital and reproductive issues. Paul VI addressed four main issues.

1. Married Love

A union all our ancestors had the opportunity to consummate

Holy matrimony is much more than a union of two people. Paul VI stated that:

> It is a love which is total—that very special form of personal friendship in which husband and wife generously share everything, allowing no unreasonable exceptions and not thinking solely of their own convenience… Though this fidelity of husband and wife sometimes presents difficulties, no one has the right to assert that it is impossible; it is, on the contrary, always honorable and meritorious… Marriage and conjugal love are by their nature ordained toward the procreation and education of children
>
> Loading…

2. Responsible Parenthood

Opening Scene of Idiocracy: Responsible Family Planning

> Responsible parenthood is exercised by those who prudently and generously decide to have more children, and by those who, for serious reasons and with due respect to moral precepts, decide not to have additional children for either a certain or an indefinite period of time

Responsible parenthood is thoughtfully planning and deciding when to have, or not have children. Ironically, even today, with the sanctity of marriage all but gone, and the disappearance of chastity, so many children are the products of accidental unplanned births, one night stands, or random hookups. These are all violations of responsible parenthood, no matter how much the single mother insists “My baby comes first!”

3. Rejection of Contraception

> Let [responsible men] first consider how easily this course of action could open wide the way for marital infidelity and a general lowering of moral standards. Not much experience is needed to be fully aware of human weakness and to understand that human beings—and especially the young, who are so exposed to temptation—need incentives to keep the moral law, and it is an evil thing to make it easy for them to break that law. Another effect that gives cause for alarm is that a man who grows accustomed to the use of contraceptive methods may forget the reverence due to a woman, and, disregarding her physical and emotional equilibrium, reduce her to being a mere instrument for the satisfaction of his own desires, no longer considering her as his partner whom he should surround with care and affection.

If you ask me, Paul VI is either an omniscient genius, or had some experience with women. Here is the warning, plain as day, that predicted exactly what has happened in the 50 years since this work was published.

Contraception has increased the propensity of both men and women for not only marital infidelity, but for discreet sexual encounters outside the bounds of even a dating relationship. And men, myself, and many of the authors and readers here, increasingly see women as merely masturbatory aids. And indeed, the tragedy is that modern women have become little more than sexual objects good for one thing.

4. Promotion of Chastity and Rejection of Degeneracy

> Everything therefore in the modern means of social communication which arouses men's baser passions and encourages low moral standards, as well as

> every obscenity in the written word and every form of indecency on the stage and screen, should be condemned publicly and unanimously by all those who have at heart the advance of civilization and the safeguarding of the outstanding values of the human spirit.

We have an obligation to reject almost (((everything modern))).

Birth Control Damages Women

Aside from the problems addressed above, birth control can be physically and medically harmful to women. It has been proven to cause vaginal dryness, low sex drive, hormonal imbalance, and even infertility. And yet it is allowed and encouraged, because it allows women to have no strings attached sex. Is it worth it?

Population Control and Eugenics

The only major issue I have with the treatise is the issue of population control and eugenics. The burgeoning population was a major issue in 1960, and there are now over twice as many people on the planet. While this is a different debate, I would say that what is right for a Christian in a moral and healthy society need not be a rule universally applied everywhere on the planet.

A principle need not be universal for it to be considered good. Contraception would alleviate much suffering and poverty in Africa, and the dysgenic world we have created today is quite ungodly in my mind. It is possible to have a pro-eugenic society that rejects recreational contraception, but allows for it in cases deemed detrimental to society.

We already see that first world nations naturally do not overpopulate–the net birth rate

for all modern societies is currently less than two children per female, indicating population would regress to a more sustainable level without immigration in an educated populace.

Conclusion

The words of warning Pope Paul VI spoke 50 years ago have proved sadly true. Is there any hope for modern marriage? What happens to human society and civilization in a world where we reject even the basic rules of civility developed 2,000 years ago? Is it possible to lead a moral and happy life in the modern world? I am still seeking the answers.

Women Are Now Using Social Networking Platforms Like Instagram To Declare Themselves “Goddesses”

August 5, 2018 | by John Carver | Link | Original Link

Women have been the gatekeepers of sex and relationships since the dawn of recorded history, and for that matter, probably all of history in general. Any caveman or Mammoth hunter who was considered “creepy” or “awkward” by the standards of 12,000 B.C. would have been sidelined from intimacy with the female gender just as much as they are today.

Instead, Chad “Bam Bam” Thundercock would have always been the caveman with the most notches during this bygone era. Both in the context of the number of cave ladies he slept with, and with the number of actual notches on his club. All of them brought about through incidents of violence with wild game, or with other cavemen who had crossed him or intruded upon his semi-subterranean harem.

Thankfully, Chad Thundercock isn’t quite as medieval in dishing out this kind of retribution anymore. In fact, he is probably “thanking” a lot of beta bux for letting him sleep with their wives or girlfriends as part of the emerging cuckoldry craze, and genuinely laughing at their sorry asses behind their backs.

It is this kind of mainstream media endorsed cuckoldry, the overly left-leaning female vote, 'hire-females-first' employment practices, and other offshoots of third wave feminism, which have given women tremendous economic and social power over all the frustrated beta males of the west.

They pretty much only continue to fall under the spells of the top 5-10% of men (the now clubless Chads) who are generally doe-eyed criminals, psychopathic financial sector Don Draper doppelgangers, or tattooed soccer stars. Only these kinds of wealthy and famous men will "truly" suffice, regardless of their moral standing.

And with the dawn of Instagram, in addition to the well established women's empowerment rhetoric in the progressive media, women who are not held sway to the Chads have now become "goddesses" in the eyes of a huge chunk of that remaining 90% of men. The beta cavemen of 12,000 B.C. had things pretty good by comparison.

Super Duper Jumbo Ultra Mega Male Thirst

What is partly to blame for even semi-attractive women being dubbed online goddesses now?

Well first of all, human males are far more outwardly horny creatures than their female counterparts. Despite the preposterous claims of the cultural Marxist sect who espouse that both genders are "equal" in every conceivable fashion, this is an irrefutable fact.

It is this insatiable male sex drive that fuels the 'male payer-female payee' prostitution, strip club, bachelor party, escort, and pornography industries that have stratospheric demand compared to the heterosexual 'female payer-male payee' variety. In fact, alpha Chad prostitution or escorting services to attractive women is an absurd trope which almost exclusively exists in American (((television shows))) like "Hung" or "Satisfaction". Rare exceptions have existed, but it's not a reflection of real life in the slightest.

Sure….

In reality, most non-obese women between ages 15 and 50 can by and large have sex whenever they want without dropping a dime. But what women REALLY wanted all along, after all these thousands of years, was not exclusive raw sexual encounters with a Chad, but **attention**. And Instagram likes for women are like sex for men. It's what they crave the most, and will go to great lengths to get it.

Combine female vanity with the modern epidemic of horny and yet low-energy "bugmen", and calling bikini-clad women "Goddess!" or saying "You're beautiful!" on Instagram is the biggest value exchange of the age.

Loading…

There’s always at least one somewhere

Not just Goddess, but “Pure Goddess”

Better get down on those knees boys. 50,000 Goddesses await.

You Go ~~Girl~~ Goddess!

Male thirst in our ultra lazy phone-flipping environment isn't the entire culprit. For years, women have been spoon fed so much women's empowerment and "you go girl!" narratives that they truly are starting to act like they are some kind of divine being. On the other hand, men being told they are gods would (naturally) be considered "uber problematic toxic masculinity", or something to that effect.

Take a look at this snippet from a Broadly article.

> "I tried polyamory first but found that to not work for me at all. The poly world wants you to be completely open. The mono[gamous] world, well, we already know what they want," says a 38-year-old Colorado woman who asked to be called Goddess Andromeda.

Newly minted spinster thinks she's a Goddess now. So she can feel better.

That's right. If he haven't landed a husband yet, and are staring a childless second half of your life right down the tube, just inhale some new age mumbo jumbo and you are a "goddess" now!

Also, morbid obesity (and general butt ugliness) should be no barrier to inhaling a heavy dose of that goddess empowerment either. All women are goddesses if they want to be, and that's final. End of story.

Some Goddesses of Gluttony

Conclusion

Bow before your Goddess my millions of Instagram beta orbiters! Hit that “like” button and message me endless “Goddess!” and “You’re Beautiful!” messages! I need that daily dopamine hit!

The rubicon has been crossed, and we are forever in this brave new world of 24/7 female attention whoring and beta male thirsting. A raging river of Instagram uploads cannot be

stopped by a few rebellious hands sticking their hands in the water to try and stop the flow. There is absolutely no point even trying.

Instead, roll with the punches and separate yourselves from the “Goddess!” thirst tsunami as best you can. Lift those weights, avoid those carbs, learn that game, make that bank, and look but don’t ~~touch~~ comment. “God Speed” gentlemen.

3 Reasons You Shouldn’t Move Out Of Your Parents’ Home Until You’re 30

August 6, 2018 | by Papa Selo | Link | Original Link

Family values are the one thing that remain constant in life. However, in modern times the average person feels as though they should leave home by the time they’re 18. Living at home is often looked down upon by Westerners, especially by thots, career bros, and Boomer dads who tend to look down on you if you aren’t slaving away for a mortgage on a condo by the time you’re 25.

Don’t you find it odd that for anywhere other than America, living at home until you’re 30 is actually the norm? If you think that living at home is weird, you’ve been sold a lie. Fortunately for those of us in the know, living at home is not such a raw deal. In Europe the average age of leaving home is 26:

> Average age youth leave parents' home, 2017.
>
> Montenegro: 32.5
> Croatia: 31.9
> Italy: 30.1
> Greece: 29.4
> Spain: 29.3
> Poland: 27.7
> Ireland: 26.3
> UK: 24.4

The following are three reasons you should refuse to leave home (and learn to tame your parents) until you've at least hit 30.

1. You Will Get Laid More

What do the top five countries in the list above have in common? Clearly, the Mediterranean Gods and Goddesses who hail from these locales have the best sex in the world.

It appears that there is a strong relationship between living at home in your 20s and having lots of good sex. According to a 2009 global survey of sexual behaviors, the average Greek is extremely sexually satisfied, having sex 164 times per year, while experimenting with at least six different sexual positions in the bedroom. The Poles, the Italians and the Spanish lag not far behind.

In Europe, unlike the West, your sexual marketplace value is not determined by whether you live at home or on your own. Imagine not having to host lewd parties and do drugs in order to be valued by your peers, and to be found attractive by most women.

I can personally vouch for this. For the past year, I've been living at home with my parents. Before that I was living in in a large metropolitan city in Central Europe. I am

currently having better sex living at home than while I was while living alone abroad. Part of the reason for this is that I can't take girls back home. I don't want to tell them that I live at home, so I come off as mysterious.

At some point after the second or third bang, they typically ask me what I do and where I live. I just tell them that "I import and export exotic animals." They laugh, then I change the subject. When it comes to short-term romance, girls don't actually care what you do, how much you make, or whether you live on your own. They only care that you own your life choices, and that you are confident. You can always bang at their place. Besides, the impossibility of a long-term relationship means that you are forced to stay on top of your game if you want to regularly meet new women.

2. You Will Become Financially Independent

One of the best things about living at home is saving money. Unless your parents are stingy Anglos, you aren't paying for rent, food, or utilities such as internet and hot water. This means more money for your financial investments, your nascent internet businesses, and the rest of your personal expenses.

By comparison, most people spend one-third to one-half of their income on rent, groceries, and their heating bill. Despite the fact I know how privileged I am, I do still understand that it really sucks not to have a family that actually loves you. Trust me, if living at home until you are 30 is not an option, your family doesn't actually love you as much as they love themselves.

Loading...

I am 27 years old and have been living at home for the past 10 months. In that time I have managed to save quite a bit of money securing independent contracts for web and

app development work. I spent nearly every day of the past 6 months cold-calling business owners over LinkedIn, Upwork and Freelancer.

With the profits I've acquired fulfilling independent projects (along with a hefty dose of family debt financing), I was able to bring in 1,000 liters of olive oil from my family farm in Croatia. I am now starting an olive oil import and export business with a friend that will earn us a considerable income quite quickly. I will never need to have a full time job ever again, allowing me to focus on even larger ventures. This is only the beginning.

3. The Bond You Share With Your Family Will Grow Stronger Than Ever Before

As a practicing Catholic, my Church, family, and community are very important to me. Even though I am a regular sinner, and go to Church every Sunday, it took quite some time for me to come around to the idea that attending mass was actually a worthwhile investment.

The droll and drudgery of the weekly liturgy, especially on mornings where I would rather be nursing my hangover instead, was far too much for me to handle in my youth. Today, however, it is both a blessing and something of a requirement for maintaining my sanity throughout the week. Without influence from those closest to me, I don't believe I would be attending Church as often as I do now.

Every morning, I wake up and do the sign of the cross, then pray the Apostle's Creed. I perform three "Hail Mary's" for hope, faith, and charity, then finish with one "Glory Be." While I am no Saint, my life has never been more centered, and my family has never appreciated my presence as much as they do now.

I credit the vast majority of my recent growth in personal decency to God, of course, but

otherwise living at home has been my saving grace. After a decade of unavoidable debauchery and bad influences in Western social climes, including high school and college, I have come to realize that society's hedonic treadmill, that vile social force which venerates loveless sex and hip hop, is a worthless investment of mental energy. I am now more at home with myself than I have ever been.

So it stands to reason. Are NEETs actually killing the game? They have more passionate sex, they save more money, and have better family relations than most; in the long run, they have brighter futures. Given that you never chose to be born, you should seriously consider the notion that living at home until you are 30 is your birthright, and that it is your parent's privilege to invest in your well-being. At the end of day, all you have is your legacy. For most middle-income people, there is no legacy beyond their kids.

So make sure you remind your parents that you are the most important thing in their life, especially if they step out of line and decide that they would rather buy dirt-bikes and careen over sand dunes in the Oregon Park National Recreation Area in favor of sending you to private school.

At the end of the day, the fun you have in yours 20s doesn't really matter, but your 30s are your Golden Years. You have to be prepared if you don't want to waste them because after that there's no starting over. Living at home is a Godsend that allows you to prepare for the future without the distraction of nappy-headed hoes and utility bills eating away at your valuable creative capital. When you are financially secure enough to provide for children of your own, your parents will ultimately thank you for the tenacity and stoicism you exhibited in your 20s.

Some Women Only Marry Men They Can Cheat On

August 6, 2018 | by Roosh Valizadeh | Link | Original Link

In the past I wrote about an Italian friend who taught me how to play "real-life Tinder." One of his specialties, if you want to call it that, are Polish and Ukrainian women who are in relationships. He concluded that a Polish woman will only marry a man she knows she can cheat on, which is compatible with my own experiences in Poland. After further consideration, I started to wonder if that could be applied to all women.

In Poland, it's common to see attractive women with "beetroots," the local slang for a standard-issue Polish man who always happens to be far uglier than his woman. In a globalized world where a Polish woman can date any man from the world, why marry a beetroot? The answer is that Polish women are aggressive and blatant with cheating.

I've seen Polish women grind on other men in the club while the drunk boyfriend was nearby; I've heard incredible stories of Polish men allowing their girlfriends to enjoy what is essentially a single lifestyle; and I've been on the receiving end of many casual sex encounters from women who had Polish boyfriends. If you have a Mediterranean or African look, it's almost a guarantee that any Polish girl you sleep with already has a boyfriend, or a man who at least considers himself the boyfriend.

Even when a Polish girl gets married, her eyes stay open for attractive men. I feel almost disturbed when one gives me long eye contact while holding hands with her man. Polish women are smart with securing their future by marrying a beta male at a relatively young age (though that is changing for the worse), but that doesn't stop their pursuit of alpha cock on the side. This is far better than the American woman strategy of wasting prime years with alpha males to only look for a beta when it's too late.

Not only does a Polish woman marry the beta male, but she settles on one she *know* will be so clueless to her true nature that she will be able to take a trip every summer to Spain or Greece with her girlfriends. Sadly, I've also seen other Eastern European men get cucked in this manner.

A common manosphere belief is that women want strong, dominant men. This is not the full truth. A woman wants to *fuck* strong, dominant men, preferably when she already have a stable provider, and maybe even cuck her husband with superior alpha seed, but she doesn't necessarily want to marry the alpha. There are two reasons why: (1) a true alpha offers little long-term stability since he has so much choice in women, and (2) he can't be controlled.

When it comes to *marriage*, most women will choose the rich beta provider who she can dictate terms to over the less resourceful but sexy alpha. In fact, many women specifically marry men they know are much uglier than they can get to maintain a dominant frame in the relationship where the man is more scared to lose her than the other way around.

If you don't believe me, simply think of all the men you know who are married or in long-term relationships. Are they dominating their women? Are they upholding strict standards? Are they fielding multiple sexual offers from other women? The answer is that a man who willingly gets into a long-term monogamous relationship is opposed to being the real alpha that women get instantaneous sexual excitement for, because to voluntarily enter a relationship with a woman means to compromise and bend your masculine will for the sake of comfort, stability, love, and female happiness. You're still a man if you get married, but you're likely not the type of man that many women who already have beta providers would cheat on and sacrifice their relationships for.

Loading...

The very word "husband" further proves the point. The images that *don't* come to mind when you envision one are warrior, killer, barbarian, sexy, or famous. Instead, you may think of words like compliant, hard worker, reliable, hen-pecked, fatigued, and boring. I may very well be a husband some day, so I'm not criticizing those who are married, but the nature of marriage will stuff a man into a beta male mold that then creates desire in his wife for an alpha.

Therein lies the double-edged sword: either you started off as alpha but marriage softened you into a beta or your wife picked you out *because you were beta* and offered her the comfort and stability that the previous alphas in her life didn't. If she picked you because you're a beta, which is what happens in Poland, that means she has room for an alpha in her life, and sees you as someone who wouldn't interfere with that plan.

Strangely enough, men who are most successful with long-term relationships are *not* the most alpha. Women want to feel attraction to a man but she also wants to exercise all the options that modern feminism allows her. She wants to work, party with friends in venues

that serve alcohol, flirt with other men, and take girls-only vacations. She doesn't want to be limited or controlled compared to her peer group, and the only man who won't dare to wrangle her choices is the beta male.

I ended things with one girl because I wouldn't tolerate behavior that other men she had known would. It's no surprise that her next boyfriend was not only more beta than me, but more beta *than her*. When it comes to getting laid, being alpha is key, because it's raw attraction that you transmutate into fast sex, but it's not the key for relationships. This is why men who are good at casual sex often don't get into relationships and men who are good at relationships don't get much casual sex.

The best solution we have to this problem is to be the alpha provider, meaning that you satisfy both alpha and beta desires within a woman to ensure that a relationship is successful:

> The fabled Alpha Provider is the captain of his ship and has the genuine respect and adoration of both his woman and his children. He does not tolerate foolishness in his household and is quick to punish such shenanigans. But he is equally bountiful whereas he rewards his woman for the nurturing of his brood, her sexual loyalty, and the upkeep of his domicile and property. Though it took him quite a while, his patience and red pill wisdom allowed him to successfully find a woman worthy to be his first mate.

The verdict is still out on if this can work in the real world, but it is the one that I am open to attempting. I'll tread the middle between being an attractive, dominant man while also showing that I'm ready to provide for my family. The problem with this approach is that a woman doesn't expect to have both the alpha and beta in one man, and they much

rather compartmentalize them like Polish women do.

In the end, I rather be seen as a side dick to a girl than a stable provider because then I will experience no hidden deceit in believing she loves me while fooling around behind my back. In other words, I choose truth over love, because I know that if a woman has targeted me for marriage, it won't necessarily be my idea of what a marriage should be.

Alex Jones Shut Down By YouTube, Facebook, Apple, And Spotify In Shocking Orwellian Crackdown

August 6, 2018 | by News Syndicator | Link | Original Link

Via CNBC:

YouTube has removed Alex Jones' page, following bans earlier Monday from Apple and Facebook.

The Alex Jones Channel, which counts 2.4 million subscribers, still appeared in YouTube search results by midday Monday, but presented only a take-down notice when users clicked in.

"This account has been terminated for violating YouTube's Community Guidelines," the notice says.

This account has been terminated for violating YouTube's Community Guidelines.

Banned from YouTube. All 2 million subscribers, gone with a click

Banned from Facebook

Google had previously declined to comment on the InfoWars host's standing, but said in a statement to CNBC in response to the removal of the page: "All users agree to comply with our Terms of Service and Community Guidelines when they sign up to use YouTube. When users violate these policies repeatedly, like our policies against hate speech and harassment or our terms prohibiting circumvention of our enforcement measures, we terminate their accounts."

YouTube counts "strikes" against pages for posts that violate the company's policies. Jones received a strike in July when he posted four videos that violated YouTube policies against child endangerment and hate speech, the company said in a statement to CNBC.

Loading...

> The final verdict has been delivered! Guilty! Guilty! Guilty! Our infallible Silicon Valley kommisars have decided to annihilate one man and his employees for anti leftist activity. If only there was a Gulag to thrown this criminal in so that his hateful mind could be reformed! pic.twitter.com/w5ykcgdTg1
>
> — Roosh (@rooshv) August 6, 2018

A page with one strike against it is suspended from live streaming for 90 days, YouTube said, but Jones attempted to circumvent the suspension by live streaming on other channels. As a result, his page was terminated, the company said.

The InfoWars YouTube page, which has significantly fewer subscribers, was still live as of noon ET.

Jones and his controversial radio show have for several weeks been at the center of a debate around fake news and misinformation on digital platforms. Facebook and CEO Mark Zuckerberg drew criticism last month for declining to remove the InfoWars page.

> They did it all on the same day so you'd know without any doubt that they are working together. Monopolies of the internet, uniting together, to stomp their boot on Alex Jones' bearded face. And you're next. pic.twitter.com/FI2QqnQw11
>
> — Roosh (@rooshv) August 6, 2018

Music streaming service Spotify removed InfoWars podcasts last week, and Apple and Facebook each cited violations of company policies regarding hate speech in banning Jones on Monday.

4 Reasons Why You're Failing To Find A Good Woman

August 7, 2018 | by Jared Trueheart | Link | Original Link

The "player " lifestyle isn't for everyone. Hell, most men don't want to be "players," and by that I mean they don't enjoy the process of playing the game. More than anything, men want to be secure in their ability to get sex when they want it, but they don't want to burn so many calories pursuing the base, biological urge to orgasm.

Even experienced players can spend time, money, energy, and emotional investments trying to get laid only to be left watching Pornhub alone at the end of the night. That's the main reason so many young men want loyal women; they don't want families (even though they should)—they just want to get laid and move on with their lives.

And yet, so many men today complain about not being able to find wife material. They blame society and feminism and the chosen people, but the reason you, the man reading this, can't find wife material is that you're not willing to work for it. Yes, western decadence and degeneracy have shrunk the pool of good women, but that's not why *you* haven't found a good woman. Men out there are still finding good women.

So why aren't you?

1. You're Expectations Are Too High

Here's the truth behind each young man's complaint about modern women. When they ask, "Where can I find a good woman?" they really mean, "Where can I find a young, beautiful virgin who loves to give blowjobs but only wants to give them to me and who cooks well, cleans, doesn't spend money, avoids social media, doesn't have any baggage, and respects her elders?" You don't want a wife or a good woman, you want a beautiful virgin-sex slave-maid servant.

Women are people and people have flaws. There's a girl out there who might want to blow you in-between cooking and cleaning for you, but she's definitely not a virgin and

she’s probably chubby (to put it nicely). You want an ideal, a fantasy woman. The best advice I give men I know is to lower their standards for happiness. You might just meet your standards for happiness if you don’t set them impossibly high.

2. You’re Not Willing To Sacrifice

Jeff Bezos earned his wife, with whom he has four children. Notice that she still looks great at almost 50 years old

There are beautiful virgin-sex slave-maid servants out there, but why would they choose you? Good women typically come from good families. They know their value, and it’s greater than yours.

If you’re not a player, how much are you worth today? How about five years from now? If the answer to either of those questions isn’t $1 million forget about getting the woman you envision. She can get a millionaire. What exactly are you sacrificing to be as valuable as good women, who are increasingly rare and in-demand in such desolate times?

If you are a player, why would a good woman want you? Getting with you lowers her value because she loses the ideal that men want. As a player, you spend your time banging loose women, you don’t have much value to good women with family and domestic values. If she gets with you, by definition, she isn’t a good woman anymore. You’d have to give up the player lifestyle for a few years before genuinely seeking a good woman. Otherwise, as a player, your inability to find a good woman becomes a self-fulfilling prophecy.

Loading...

The regular guys aren’t busting their butts spending time and energy to get a good woman, but neither are the players willing to sacrifice casual sex with loose women. Why should you expect to get something valuable without sacrificing for it?

3. You’re Not Mormon

I’m not Mormon, nor do I particularly like or dislike Mormon people, but Mormon women are good women. If you really wanted a good-looking woman (especially guys who prefer

white women) who cleans and cooks and isn't a whore but will do what you want in the bedroom, you'd convert to Mormonism. The reason you're not a Mormon is that you don't want to sacrifice your time for church, alcohol, caffeine, R-rated movies, etc.

From a study by Brigham Young University's Family and Demographic Research Institute

Even red-pilled men can have a sense of entitlement. Even we can blame feminism and the deep state for a problem when a solution to that problem is right in front of us. Do you want a truly good woman? Make the sacrifices, convert at your local LDS church, sell your car and ride a bike, and go on a mission to convert aborigines to Mormonism. You'll get that good wife.

4. You're Looking For Shortcuts

You already knew about Mormons. You also know you haven't done much to earn that good woman most men seek. You also already know deep down that what you want is an ideal, not a genuine person. But instead of doing things the hard way, making the necessary improvements and sacrifices to attract a good woman, you'll look for a shortcut.

How many guys travel to Southeast Asia for a wife while knowing nothing about the culture there? Western men think that Laos (or wherever) is filled with beautiful virgin-sex slave-maid servants eager to worship a Western cock. Guess again. Those women are flawed too. The more shortcuts you take the more you feel the burn. How many American men have been divorce raped by Filipina women?

It's the same in Eastern Europe and South America. The good women there don't want you any more than the good women of your own country. They can smell that you're not worthy and that you're trying to take a shortcut. The bad women there will gladly take advantage of you. They'll fool you into thinking they're good women because you don't know any better and you have already put them on a pedestal in your mind.

Conclusion

So stop asking where to find wife material. Be worthy of wife material by doing it the hard way: sacrifice and energy and effort and being good husband material. Accept that women will always have some flaws, though some women are undoubtedly better than others. You can lead a woman who will follow you to improve herself as you improve yourself. It won't be easy, but you also won't have to search for sex whenever you feel the urge.

4 Children’s Films With Subliminal Adult Messages That Affected How You See The World

August 7, 2018 | by Edgar Tru | Link | Original Link

Recently, I had a good chat with a comrade about our childhood films. Now, I’m not familiar with what children have for entertainment these days, but I can speak on the things my childhood-era films had to teach me about life. Even if at the time I wasn’t consciously aware of their potential meanings and real-life reflections.

The Land Before Time

This film, directed by Donald Virgil Bluth, tells the tale of a tragic event where the earth splits in two as chaos erodes the planet and a longneck, named Littlefoot, is separated from his family. The film is rather dark and paints a horrifying image of childhood trauma through means of family separation, environmental catastrophe and death.

This film teaches the lesson that death is part of life. The protagonist, Littlefoot, is playing with a friend, Sarah, when a T-rex (a.k.a Sharptooth) attacks. The mother of Littlefoot eventually makes way to defend her young with a look of fury only a mother can conjure when her young is threatened.

The fight scene ends after Littlefoot lays bare witness to the beast jump upon his mother's back and rip a chunk of her flesh off, as can be seen via shadow on the wall. That's fucked up.

Later, when the earth begins to split, Littlefoot is separated from his grandparents and mother. He finds his mother, in the middle of night, lying half-dead, in the rain. He watches, face to face, his own mother die. *In the rain.* That does not paint this happy-go-lucky world but one of war, natural tragedies and fighting between different races. Longnecks simply do not walk the same route as the carnivore. And, as real-life demonstrates, the ignorant savage always wins over the intelligent and developed if they're not protected by a wall, hence The Great Valley.

The Lion King

This film displays the horror of dishonoring one's own family, or tribe for favors as they ally with outsiders. The ending, where Simba and Scar face off in that epic slow-motion collide of alpha, is just epic.

It relates well to the perpetuated anti-white politics by *actual* European-Americans toward their own tribe as they actively preach against their own kind in favor of an outside group. Scar, in this case, murdered his own brother and allied against his own clan while the hyenas took place over them, and all for means of power.

The more low-life, less intelligent, less noble beasts were granted authority over the

majestic, powerful and beauty of the lion clan. It is made clear, in this film, that hyenas and lions simply do not mix. One group resides in the Pride Lands, while the others lay in piss and rot in the Elephant Graveyard.

Princess Mononoke

Now, I did not discover this masterpiece, directed by the very skilled and talented Hayao Miyazaki, until I was older. This film can easily be geared toward a more mature audience, but it certainly provides commentary on our contemporary state of politics.

The two sides at odds with one another are man and the beast of the forest. The expansion of man upon Nature and the gods of the forest, and the beast which reside within Nature's trees, tackles the issue of man's destructive nature in favor of capitalism, corporatism, and consumerism. This has an environmental factor to it. However, what is interesting is that it displays how no side is either villain nor hero. Each side has their own struggle and cause.

Loading…

It demonstrates how it may seem one is the villain, such as the character of Lady Eboshi. This female antagonist means to expand her enterprise for riches. By her desire for expansion she is both responsible for turning a beast of the forest into a demon and causing harm to the forest. At the same time, she cares for her tribe and looks after the weaker ones whilst finding a place of production and constructive garnering toward capital. On the front, she may seem, in layman's terms, a villain; yet, on the flip side behind the curtain, lies a leader who fights for her people and cares for their protection.

Then, on the other spectrum, you have the female raised by the wolf clan, San (Princess Mononoke, Wolf Girl), who aims to protect her family and surrounding mates. She may

not be of wolf blood but strives to uphold their honor and self-preservation. And, like any warrior, she is willing to wage war for those she holds loyalty to.

This paints a fine photograph that everyone is, at the end of the day, striving for survival. It may seem Europeans have perhaps opted out of that, but the point still stands overall.

Pocahontas

The song “Colors of the Wind” is beautiful both in its instrumentation and lyrics. Many may dismiss this as an anti-European or anti-imperialist position. I’m frankly not interested in addressing such a complaint, as this song and film touch on a specific topic I’m not sure many self-proclaimed conservatives adhere to.

Environmentalism is often associated with tree-hugging hippies and anti-corporatism. Despite how one may argue corporatism leads to radical individualism, and thus playing its part in the decay of the West as perhaps healthy tribalism is stomped out, let us put aside our emotions and tunnel-vision aroma and examine just the environment.

Conservatism, in part, is based on traditionalism, in the sense of the West, which means adhering to typical masculine and feminine roles when in a relationship or marriage, and the overall old-school structure of the post-Western Anglo-Saxton family unit. It invokes preservation. Not just for one’s tribe but the home Nature bestowed upon us.

Capitalism sounds good on the surface, yes. But in reality, just like communism or libertarianism or anarchy, it cannot actually manifest itself in the real world, in a real society. It leads to greed, consumerism and, ultimately, a deadened society where the only thing worth aspiring to is making bank to spend on meaningless product; thus, your identity becomes race-less, baseless, shameless.

“You think you own whatever land you land on, the earth is just a dead thing you can claim.”

When I step outside, or I’m driving, I do not want to see litter about the streets, or always see trees being torn down to make way for another fast-food chain. That is, perhaps on a less frantic level, still a conservative mentality. The above lyrics display a sense of respect and understanding that, whether one believes in some Divine Beast or that the Roswell Greys put us here, we are earth-bound creatures. It is even perhaps more fascinating to find we may have come from the earth, hence Mother Earth, by sea to land,

only to turn around and disrespect Her.

Not to add controversy by means of being edgy, but Adolf Hitler was a conservative. He may have leaned left on the political spectrum in terms of more government, but that does *not* disqualify the fact he was a conservative, traditionalist and nationalist. He respected environmentalism and the strength and beauty within Her.

Conclusion

Some may find myself looking too deeply into the animation of those old films, but I find it rather intriguing to ponder on and finding the messages, and examining where they come from and which angles to view them – in part, based on your own personal struggle.

What I Learned From Honoré de Balzac's Novel "La Peau De Chagrin"

August 7, 2018 | by Dawn Pine | Link | Original Link

I recently read, for the first time, the great novel "La Peau de chagrin" (The Skin of Sorrow or The Wild Ass's Skin) by Honoré de Balzac. Balzac is considered to be one of the great 19th century French writers. He is regarded as one of the founders of the Realism in Europe's literature. The guy, apart from being a great writer and journalist (when it was still a worthy profession), was also very red pill. At the age of 30, still not married, he published the book: "The Physiology of Marriage" where one can find the following text:

> Marriage is a fight to the death, before which the wedded couple ask a blessing from heaven, because it is the rashest of all undertakings to swear eternal love; the fight at once commences and victory, that is to say liberty, remains in the hands of the cleverer of the two…
>
> Find some means by which her sum of force which inconveniences you may be carried off, by some occupation which shall entirely absorb her strength. Without setting your wife to work the crank of a machine, there are a thousand ways of tiring her out under the load of constant work.

Satire or not, the guy actually understood females.

You may find the text here

The book

The book consists of three sections: “Le Talisman” (“The Talisman”), “La Femme sans cœur” (“The Woman without a Heart”), and “L’Agonie” (“The Agony”). The first edition contained a Preface and a “Moralité”, which were excised from subsequent versions. A two-page Epilogue appears at the end of the final section.

“Le Talisman” is the plot of a young man named Raphaël de Valentin, who wagers his last coin and loses, then proceeds to the river Seine to drown himself. On the way, he decides to enter an unusual shop. The elderly shopkeeper leads him to a piece of Chagrin hanging on the wall. It is inscribed with “Oriental” writing. The skin promises to fulfill any wish of its owner, shrinking slightly upon the fulfillment of each desire, until its owner dies. Valentin waves away the shopkeeper’s warnings and takes the skin, wishing for a royal banquet, filled with wine, women, and friends. He is immediately met by acquaintances who invite him to such an event; they spend hours eating, drinking, and talking.

Part two, “La Femme sans cœur”, is narrated as a flashback from Valentin’s point of view. He tells about his early days as a scholar, living in poverty with an elderly landlord and her daughter Pauline, while trying fruitlessly to win the heart of a beautiful but aloof woman named Foedora (yes, like the hat). Unable to win her affection, however, he becomes the miserable and destitute man found at the start of “Le Talisman”.

Loading...
“L’Agonie” begins several years after the feast of parts one and two. Valentin, having used the talisman to secure a large income, finds both the skin and his health dwindling. He tries to break the curse by getting rid of the skin, but fails. He organizes his home to avoid the possibility of wishing for anything. Events beyond his control cause him to wish for various things, however, and the skin continues to recede. Desperate, the sickly Valentin tries to find some way of stretching the skin, and takes a trip to a spa town in the hope of recovering his health.

With the skin no larger than a leaf, he is visited by Pauline in his room. She expresses her love for him. When she learns the truth about the Chagrin, she is horrified. Raphaël cannot control his desire for her and she rushes out to escape him and so save his life. He pounds on the door and declares both his love and his desire to die in her arms. She, meanwhile, is trying to kill herself to free him from his desire. He breaks down the door, they consummate their love in a fiery moment of passion, and he dies.

Lessons learned from the book

The first, and maybe the most important one is, “Don’t get sucked into oneitis”. Balzac masterfully portrays the way our hero gets oneitis for Foedora. This girl collects orbiters who provide attention, and showers her with resources. And of course, they don’t get to touch her. She clearly states in the book that she likes the situation as it is. As a Femme Fatale, she takes advantage of societies rules in her favor. So there is nothing new under the sun.

That oneitis destroy's our hero's life and send him to "make a deal with the devil," which drives the story. The reason for that affection is more than looks, it's her un-attainability.

The next lesson is that passivity will make you pay dearly. Our hero is driven by others and his emotions. Every one he comes across spins him to a new trail. It is a "Dog Eat Dog" world, and Balzac's portrait of early 19th century society shows it. Everyone has an angle. The only one who actually takes care of him (Pauline) is pushed aside by him. He also doesn't take his goals seriously (he writes a book for three years and then just gives up). When he understand that he will die, he makes an effort to "freeze" his life in order to preserve it.

The next one is that a balanced life and fortitude wins in the end. Our hero suffers

poverty and goes to extreme wealth. He also swings from mania (being in love) to depression. Almost all other characters seem more balanced. They may stumble from time to time, but they show fortitude and balance. Even if their goals are dubious (Rastignac) or honorable (Pauline) they have a far balanced life and character. So they succeed more in getting what they want.

I recommend the book, if you can muster the patience to read through all the detailed description and nuances that Balzac provides.

4 Foods That Are Destroying Your Manhood

August 8, 2018 | by Mo Saleem | Link | Original Link

There are many reasons for the generational decline in testosterone as we face it today – porn addiction, xenoestrogens, and a sedentary lifestyle are just some of the many. But the one thing that is responsible more than all of these other factors combined is our dietary habits.

Our food culture has changed more in the last 100 years than it had in the previous 100,000 years. The reason? Large-scale industrial food processing. The industrialization of food introduced us to 4 foods in particular that are starving your brain, expanding your waistline, and wreaking havoc on your testosterone.

1. Refined Sugar

In 1822, the average American consumed about 40 grams of sugar every 5-days – equivalent to the amount in a 12-ounce can of coke. Today, the average American consumes that much sugar every 7-hours (1).

> Over the course of the past two hundred years, we've increased our sugar intake by 3,000 percent. This is the single biggest change to the human diet since the invention of fire.
>
> – Tyler Graham and Drew Ramsey, authors of The Happiness Diet

The problem with consuming refined sugar is that it instantly enters your bloodstream and spikes your blood glucose levels way up. Your body responds to this by releasing insulin to help deposit the glucose because excess amounts of it are extremely toxic – as any diabetic can tell you. Insulin does such an efficient job at removing the glucose molecules, that blood glucose levels immediately come crashing down – only to have you craving more sugary foods.

These crazy fluctuations in blood sugar lead to a decrease in insulin sensitivity, which means that more and more insulin becomes required to do the same amount of work. Lower insulin sensitivity leads to a significant decrease in both testosterone and growth hormone levels (2, 3). Over the long term, it can even lead to the development of type 2 diabetes.

So yeah, kick your sugar habit. Tame your sweet tooth with some fruit or dark chocolate.

2. Refined Grains

We did not have refined grains before the industrial revolution. We had grains, yes, but they were all stone-ground, which means that we were unable to separate the germ from the kernel. After the industrial revolution, we began to press grains with iron rollers to remove the germ from the kernel. Why did we do this? Because although the germ and kernel packed the grains full of fiber and nutrients, they are also what caused the flour to spoil faster. By removing the germ from the kernel, grains developed a longer shelf-life and were able to be transported far and wide without spoiling.

But here's the thing about refined grains – your body responds to them the same way it does to refined sugar – sometimes worse, actually. The Glycemic Index (GI) – a figure that represents how much a particular food spikes blood glucose – tells us that white bread spikes insulin even more than a tablespoon of sugar. Furthermore, grains also reduce your body's ability to synthesize vitamin D – a critical component in testosterone production.

What to do? Switch out all refined carbs—white bread, bagels, white rice, pasta, etc.—for complex carbs like legumes, starchy vegetables, and brown rice.

Loading…

3. Vegetable and Seed Oils

Just because vegetable oils have the word “vegetable” in them doesn’t mean that they’re healthy. All vegetable oils—canola, safflower, sunflower, soybean, etc.—are manufactured in an industrial factory through which plant sources are refined and heavily processed. Before the industrial revolution, none of these oils existed in our diet. Today, the average American gets 20% of his calories from soybean oil alone (4). And soy, as you already know, exerts its own share of feminizing effects.

The problem with vegetable and seed oils is that they contain an omega-3 to omega-6 ratio that’s completely out of whack. Omega-3’s are anti-inflammatory fatty acids. Omega-6’s are inflammatory fatty acids. Your body requires both to maintain optimal function, but the ratio in vegetable/seed oils is something like 16:1 in the favor of omega-6’s (5). The result? Chronic inflammation.

Inflammation not only lowers your testosterone (6), but it also leaves you at an increased risk of developing a myriad of other health issues as well—heart disease, diabetes, cancer, and depression to name a few (7).

Toss out all of the vegetable and seed oils in your pantry and replace them with male-friendly alternatives like olive oil, coconut oil, MCT oil, grass-fed butter, and avocado oil.

4. Factory Farmed Meats

Animals brought into a factory farmed environment are introduced to an unnatural diet (animals that are used to eating grass are being fed grains and GMO'ed corn), growth hormones (to get them to grow as fast as possible), and antibiotics (because they are getting sick from an unnatural diet and growing too quickly).

The only study I was able to find on this topic observed how a man's sperm quality was affected by his mother's meat consumption during pregnancy. In sons of "high-beef consumers" (mothers who ate more than 7 beef meals per week), sperm concentrations were 24.7% lower than in men who's mothers ate less beef (8). There was no further research I was able to find on how the consumption of factory farmed meat affects a man's hormones, but an important point to understand is that most of the research performed in this area is sponsored by the food industry giants themselves.

If you want to be an experiment of the FDA, go ahead and keep eating factory farmed meat. Otherwise, opt for organic and grass-fed.

Conclusion

When it comes to naturally increasing your testosterone levels, what you don't eat might be even more important than what you do eat. There are a bunch of other foods you should avoid as well—soy, flaxseed, and alcohol to name a few—but the above 4 form the bulk of our nutritional intake.

If you're a man of purpose that wants to function near his peak potential, definitely avoid these 4 foods. Doing so will have profound effects on your energy, mental clarity, as well as your ability to enter your true power.

Interested in natural testosterone optimization? Let's get on a call to figure out where you're at, where you've been, where you want to be, and then determine whether I can help you get there. Schedule your free appointment here.

When Will Boomers Stop Swindling Wealth From Younger Generations?

August 8, 2018 | by André du Pôle | Link | Original Link

Among the many elephants dwelling in the Western room today, the retirement one is far from the smallest. Namely, the retirement system works like a Ponzi scheme: boomers, who are very numerous in proportion thanks to them not having had enough children, and who live much longer than the elders of before, keep milking the younger generations to maintain their costly lifestyle.

Boomers also rely on a number of pillars, both public and private, to maintain themselves: immigration guaranteeing cheap labour; student loans, high rents so that the young keep shoveling hard-earned money into their capitalization schemes, offshoring, freelance work, and so on. Fortunately, every empire falls and the boomers' one is showing signs of serious decline.

> The Social Security system is in trouble. It's not just a future problem; America's retirement insurance program is in trouble now. The federal government will start dipping into its Social Security savings account this year to help pay retirement benefits to millions of Americans.
>
> In 2018, the federal government expects to receive about $2 billion less in payroll taxes and investment income than it will need to pay workers through the Old-Age, Survivors, and Disability Insurance program. If nothing changes, that savings account will run dry by 2034, right around when the last of the baby boomers reach retirement age. After that, the government will only have enough

> money to pay retirees and disabled workers 79 cents for every dollar they're owed.
>
> These findings were recently published in the Social Security Administration's 2018 trustees report, prompting the expected torrent of alarming headlines…

To "save" muh medicare, the journalist promotes immigration, including the illegal one, and more taxes on "rich workers." Are young workers rich when they manage to scramble beyond minimal wage? And, when boomers who claim to be conservative support such ideas, where's the rule of law when illegal aliens are celebrated as such instead of getting kicked out immediately?

> Undocumented immigrants and immigrants with legal status pay billions of dollars each year into the Social Security system through payroll taxes. Based on estimates in the trustees report, the more immigrants that come in, the longer the Social Security system will stay solvent. That's because immigrants, on average, are a lot younger than the overall US population, so their retirement is far off. And undocumented immigrants pay for Social Security, but they're not allowed to get benefits…
>
> The reason for that nose dive is because, for the first time in more than 30 years, the Social Security system is running a deficit. That means that in 2017, the federal government cut more Social Security checks to retirees and disabled workers than it collected in payroll taxes from the current workforce. The federal government will have to start dipping into the $2.9 trillion trust fund to keep paying out benefits. This year, the government will probably have to take about $2 billion from the trust fund, according to the report.
>
> Furthermore, Social Security now costs more than before because more Americans are retiring, and they are living longer. In 1960, about 5.1 workers supported each person receiving a retirement or disability check, and that ratio has been shrinking ever since. In 2013, there were 2.9 workers for every beneficiary. So the current level of payroll taxes is no longer enough to keep the program afloat.

Dear boomers, let me tell you what *you*—not the State, not the X and millennials, not immigrants, no one but *you*—need to do to solve the problem. Stop thinking you are the only ones who matter. If you were responsible elders, you would accept renouncing to some of your costly habits. No, you don't need to travel that expensive cruise, take a trip to the spa every month, go to the restaurant all the time or keep these big houses all for yourselves. And no, you don't have an unconditional right to do so, nor do you deserve to.

The elders of before—you know, those you called fascists back in these awesome 60's and 70's—did not pretend they could take everything they wanted. They didn't blurt out *dat's mirite!*, vote for Big Government and let their children, grand-children and baby grand-grandchildren sank into debt. They knew there is no such thing as a free lunch, and even when they had toiled all their lives in factories or tilling the Earth—not in a cushy office like most of you boomers did—they also knew that, at some point, they have to pass the torch.

The media complaining that boomers are "hurt" are as dishonest as Silicon Valley moguls weeping crocodile tears to get more HB-1 workers. No, there is not, and there never was any lack of competent workforce in the US or anywhere in the West when it comes to STEM jobs: moguls just wanted cheaper labour. In similar fashion, the boomers complain solipsistically about themselves without ever paying attention to the obvious—they have already milked everything they could, and now, if they don't have new slaves they can suck dry, they may have to renounce building that second swimming pool behind their McMansion. Wow, so sad!

No, boomers aren't getting "hurt" and they aren't little innocent angels. Their lifestyle and their stubborn willingness to maintain it no matter the cost is hurting *us*. X, Y, Z—and all the Western civilization that is now imploding from debt, feminism and non-whites'

migratory onslaught. Millennials work multiple jobs, jump from one gig to another, compete with millions of Juan Illegals so that Courtney and Brett can get a luxury dinner for the third time this week.

Loading…

Boomers then: “We want Communism today! Viva Che Guevara! Spread the wealth!” Boomers now: “hey Millennials, go back to slave work, someone must pay for my cruises!”

Poor boomers? Give me a break. As a generation they have already wasted their own inheritance long ago. They became used to living well beyond their means. Worse, they pretend that drowning us all under debt, high rents, unfair competition and so on is all and well to maintain these expenditures they shouldn’t even have done in the first place.

Want a common-sensical solution to Medicare and retirement pensions deficit? Simple: lower them, so that they become cheaper and don’t drain the wealth. During hard times, rationing is the evident thing to do. Boomers should just stop gushing into luxury and accept that they, too, have some duties to fulfill. After all, they talked so much about the future generations when it was fashionable. You’ve already consumed way too much when you were younger. Now accept life as it is and learn voluntary simplicity instead of spending, spending and spending like you always did.

Some will point out that boomers’ lives are not only a bed of roses. Aging comes with drawbacks and most, if not all boomers, keep a keen eye on not paying for the expensive treatments they need. But even then—yes, even when we’re talking of Alzheimer disease, cancers and other unglamorous afflictions—I’d still say this: *just accept it*.

“I don’t want to pay for my cirrhosis and plastic surgery, I just want to live like it’s Woodstock up to 2050”

People have always declined and died off because of old age. There’s no reason it does not happen to boomers as well. And I don’t think fair to pay a couple more years to an old bag of wrinkles who swallows fifty pills a day when young families struggle to barely pay their rent.

Death makes room for the future generations to grow. If boomers want to live for more than a century, that’s simple: go back to work and earn your right to keep living for so long. If you want a luxury lifestyle—earn it, do not steal it cunningly as you already did for too long.

This is as simple as that. Most boomers already had too much ease and cultural weight in the course of their lives. Now learn to shut the fuck up and pass the torch before it blows up in your faces.

The retirement system was sustainable when there were numerous workers and pensioners living within their means. We millennials won’t benefit from it. Any knowledgeable young person knows the whole system will crash well before we get old enough to ask for any money. Well, as it will blow up anyway, the better outcome would be a early crash so that we don’t get drained anymore.

Making America great again doesn’t mean saving its millions of parasites. The same thing goes for the whole West, by the way—France has the exact same problems of social security and retirement deficits, compounded with Africans systematically clogging our hospitals, too. No: MAGA equates to higher wages, more jobs, more opportunities, less immigrants and less parasites. Including those who believe they can sink the ship with them.

If we survive at all, no doubt the future generations will thank The Donald for draining the swamp.

Deep Diving Into Text Game With A Real-Life Example On An American Girl

August 8, 2018 | by Jon VonStroke | Link | Original Link

The art of text game has to be one of the most contentious subjects around. Various so-called experts will advocate for one strategy, while other so-called experts will preach another. All of the conflicting doctrine can be highly frustrating for someone who is in search for a reliable gospel.

While there are certainly text messaging do's and don't's, when it is all said-and-done, text game is not all that black and white. The obvious axioms of not texting too much, not excessively validating the girl and so-forth still hold true, but many situations require a case-by-case approach. Below are a two real life examples that showcase some of the different strategies I use when texting a girl.

1. Keep it light, Keep It Flirty, Keep It Alpha

The "Lol Jk" response was probably not necessary. I was tipsy though.

There is a sizable contingent of men in the manosphere who believe in order to be successful with women you have to be a frosty, no-nonsense, dark-triad , Tyler Durden (Fight Club) type of character. While adopting some of these characteristics can be beneficial, a lot of men struggle to find a happy medium, especially one that is congruent with their identity. Most men are too submissive and needy which unequivocally decreases sexual attraction. The other side of the coin is being so brash and disagreeable that you actually become off-putting to the opposite sex.

I am a proponent for being self-assured, unflappable, direct, but approachable and disarming. This is most easily achieved through your actions, but can also be conveyed through text. In the example above, you can see that I inquired if the girl I had just met was still at the bar (this was roughly an hour after I got her number by cold-approach).

Her response was “who’s this”, which is a common hot-girl response to an unknown number. This broad happened to be a solid 8.5. Early on in the interaction she was glued to her phone. I could sense she had a host of eager beta males lurking in the fringes, waiting for their shot to pounce.

The women you encounter, particularly the higher value ones, are going to attempt to throw you off your game in order to test your resolve. In order to succeed you’ll need to have an answer for these cheap gimmicks. As you can see from the next response, she reveals her hand to me. She knew it was me who texted her, but instead she decided to play coy.

The second text message she sent me, “Wait were you leaving green light and *gave* me your number,” is a seemingly harmless response for most, but when you truly adopt an entitled give-no-fucks disposition, you’ll recognize the indignity of such a statement. She obviously remembered who I was and tried to pretend like I forced my number onto her. This is a subtle shit-test and a common strategy women will employ to quickly appraise a man’s value and to establish the “I am the prize” dynamic.

In my response, instead of going along with it, I re-frame the interaction and insisted it was her who sought after my number. Shit test passed. My witty, yet confident response conveyed to her that I have high self-worth and I don’t take myself too seriously, a stark contrast from the typical soy boy type she is accustomed to dealing with.

The reward for my unorthodox response—an admission of interest; “i think i did tbh” and some validation, “we both did the double take”. As you can see, a little fuck-boy-confidence and some ingenuity can pierce through a woman’s bitch-shield.

Loading…

2. Give Her The Gift Of Missing You

Never get relegated to the pathetic text-buddy status.

When it comes to texting a female, it is my contention that less-is-more. The most optimal dynamic to fashion is one in which the woman is texting you more than you are texting her. This may sound rudimentary to some, but the reality is, most men text way too much and therefore never attain this dynamic.

When you text a woman profusely, not only are you pedestalizing her, you are acknowledging to her that you are a low-status male with few options and way too much free time on your hands. Texting should be used as a medium to create attraction and schedule meet-ups—not to have meaningless and sterile small-talk.

Unfortunately the screenshots in the above message do not show timestamps. In the first exchange, I texted “i look forward to it” in response to an earlier conversation we were having about hanging out over the weekend. She never responded, so neither did I. Abstaining from texting back takes discipline and mental fortitude. You should never message a girl who does not message you back first, especially if your last message was something warm and sincere.

I proceeded to not text back and instead decided to devote some time to my other leads (abundance is paramount). Two days later my patience pays off as seen from her “hi” response. Mission accomplished? Well, not quite. I decided to take it a step further. I respond to her “hi” message and she replies immediately. Instead of continuing the conversation as normal, I opted to not reply to her “laying around in bed” response.

A ballsy move to some, but one that would instantly pay off as seen by the double-text I received after she had not heard a response from me for the second time (the double text is the holy-grail of IOI’s). I finally reply roughly four hours after the double-text, disregarding everything she said and alternatively, inquiring if she happened to be back

home.

This obviously did not sit well. “Can you not give me attention via text” and “too busy with one of your gals” says it all. I am unapologetic in my response, by telling her “all of the above”. Since I got the desired effect I decide to bring it down a notch. I give her a disingenuous “just kidding” and assure her that I was only ignoring her because I was working, and not because I was seeing other women (obviously a lie).

Someone with an untrained eye would tell me that I blew it, but that fool would be dead-wrong. This girl happens to be one of my most loyal harem members to date, thanks to my aloof and outcome independent nature. When a man is unavailable, unapologetic and cares little about the outcome, this gives him a mystique that happens to drive women crazy.

Texting too much also increases the likelihood of fumbling or saying something incriminating. Many times the most powerful and influential reply to a text is no response at all.

Male sexual privilege at its finest.

Conclusion

Good text game is an art form. It is something that can only be developed and refined through trial and error. Most men over-complicate matters or invest too much thought into crafting the perfect response.

Always remember, when it is all said and done, texting means very little unless the net result is a meetup or best of all—sex. Maintaining an assertive, flirty, entitled frame, while also regulating availability, seems to be the most effective approach for keeping women interested.

The New York Times Wants To Make New Hampshire Less White

August 9, 2018 | by Paul Padmore | Link | Original Link

Recently, the New York Times came out with an article discussing the idea of diversifying New Hampshire, and also floated the same idea for Vermont and Maine, due to their majority white population along with the struggle of a "lack of community" that non-natives and immigrants face when moving here. Being fed up with this "diversity" bullshit, I felt a response was in order.

Dear America,

We, the states of Maine, Vermont and New Hampshire, have heard of late through the southern rag known as the New York Times that you think we are too white. And we have only one thing to say to you…

We are not too white, you are just too racist.

We are not too white; that is not a thing a state can be. We are not keeping people of different races from living here. They simply do not wish to live here. And that is something we always considered just fine. We cannot force people to want to live here anymore than you can bully us into wanting to change who we are simply to fit into what you currently consider "the correct mix of people".

We have no problem with minorities and the “issue” of our whiteness has never occurred to us. In the same way that the “blackness” of Kenya or the “Asianess” of Japan never occurred to us either. Did you ever stop to think that perhaps it’s not us who have a problem but you?

You are spending so much time concerning yourself over race that you are beginning to become almost a basket case over it. You rage over three small states having a majority white population while you praise the future that minorities will hold in the nation. Why does this matter to you so badly? Aren’t we all just people? Can’t we be who we are?

Your racism on the matter has shown through perfectly. You think that by making us “the correct mix of people” will achieve something? But what? It doesn’t make any sense whatsoever, and we cannot wrap our minds around why you continue to pretend that you’ll somehow make us better in this way. We are prosperous just the way we are. And to be entirely honest, we have grown rather tired of your bigotry towards us more photosensitive Anglo-saxon types.

This is just an attempt to justify your racism and ethnic hatred towards a group of people because their population percentages in a few states don't suit your narrative. You dislike us for our skin pigment and our culture, consistently try to belittle our food, fool our youth to into your indoctrination camps known as universities, and enable crime dens you call cities to suck us dry of our vitality like the shameless vampires you are. All the while, you send in people from other states and countries to serve as your shock troops to change us so we bow down before you.

Loading…

The threat of genocide that you have levied against we New Englanders is as horrifying as it is pathetic. You pretend it is for our betterment when you know full well that we are already just fine. We may be somewhat liberal, but we are neither fools nor Californians (I repeat myself). We have pride in our culture, identity, and way of life.

In truth, we have a just fine mix of people. We're liberty minded, hard working, and grounded to the earth. We did not ask for your opinion. Nor did we ask the fat cats who want to bring in cheap labor what they thought. The immigrants who come here both from other parts of the country and from abroad are welcome to stay, but we do things our way, not theirs. This is our native-born home, not theirs. They can adopt a New England state of mind or get packing.

We invite you and all who take issue with how we are to take a long walk off one our fine short piers. We do not desire to be like you, we do not desire to take in thousands of people and become a modern tower of babble like you. We do not wish to be an ethnic colony fighting over the crumbling remains of our once great civilization. We want to be America. We want immigrants to come in small numbers, if we even want any at all. And we want to retain our cultural heritage for future generations to come.

You need to stop with the white hatred towards us and stop trying to change the world in degrading ways. There are far more pressing concerns like the imminent collapse of your welfare state and the current brewing Civil War caused by your constant subversion.

We three states, along with the rest of New England, will be 400 years old in 2020. We have gotten along just fine being ourselves this whole time. We are of the same stock today as we have been since the pilgrims first landed here in 1620. On our 400th birthday, we will continue to enjoy our hearty, underwhelmingly seasoned food, we will burn at the beach and call it a tan, we will still not pronounce our Rs, we will continue to pick apples in the fall, and eat delicious cider donuts. We will continue to shoot our machine guns, go to our agricultural fairs and drink our craft beers. and lastly we will be white majority, not because we are racist, not because we dislike minorities, but because that’s just the way we are and happy to be so. We appreciate your concern but mind your own damned business.

Sincerely, your older cousins,

Maine, New Hampshire and Vermont

4 Masculine Films That Are Free Of Liberal Propaganda

August 9, 2018 | by Edgar Tru | Link | Original Link

The West has become a very feminine society. That is an obvious statement to any person paying attention and can see with eyes unclouded by hate. America, in particular, has allowed much art to be feminized and watered down. Films today are boring and frail with a limp wrist, and adult comedies have been reduced to obnoxious humor as if a thirteen-year-old doofus going through puberty wrote the script, such as the film Sisters, starring Tina Fey and Amy Poehler. (The most recent films I've seen, that aren't ages old and are rather good, would be the drama Nocturnal Animals, the comedy The Edge of Seventeen, and the horror film A Quiet Place.)

The Hollywood of today's era have now put out many films which perpetuate the hell of feminism, such as Seth Rogen's sequel, Neighbors 2. Chloë Grace Moretz bitches on in the film about our sexist society and plays into the typical women-are-always-oppressed mindset. It is only one of many, and I'm sure the many to come.

So, allow us to examine four films which still hold some piss and grit to them with a dose of masculinity.

V For Vendetta

This gem quite easily portrayed a vision of the future—one of censorship, overstepping the bounds of people's personal space by means of spying on them, ruthless propaganda, etc. This film I watched when I was in my youth. Even then it shook me despite not fully grasping the elements encapsulated within it.

One intriguing piece of propaganda in the film are the two detectives, one of whom comes to more-or-less see the side of V. They are conversing over security footage of the character of Evey laying unconscious as V stands over her. Evey assisted V from capture by macing one of the detectives. The two detectives seemed slightly baffled this supposed monster would bother helping her at all.

"Right there. What's he thinking?"

"He's considering leaving her… after she just saved him."

"But he's a terrorist. You can't expect him to act like you or me."

"Some part of him is human."

They refer to V several times throughout this enticing film as a 'terrorist.' This plays into the expression 'one man's terrorist is another man's freedom fighter.' As in, there are no villains, only perspectives. As well, the above lines of dialogue display well the demoralizing and dehumanizing of another person. And one who was tormented by his own government whilst being labeled the bad guy by mere retaliation.

The cast is wonderful and Natalie Portman puts on a fine performance. This isn't as much fiction as it is reality coated over with a story. It demonstrates our contemporary state and society, and where we may be heading next. There is a lot to extract from this terrific film, and it may be worth your time.

Ninja Scroll

If you’re interested in a hard R-rated anime, it’d be Ninja Scroll. The plot is basic and straightforward. A ninja named Jubei Kibagama stumbles across one of the Eight Devils Of Komon, who are on a mission to take over the Tokugawa Shogunate, about to have his way with the lead female character, Kagero.

Jubei ends up being intertwined in this whole debacle and essentially forced into helping stop these devilish ninjas, along with a kooky spy, Dakuan. Some may, in our current PC culture, complain about the possible ‘misogyny’ of the film and its sexual portrayal of women, including an odd and dark scene with a devil attempting to rape Kagero and fingering her. It may not be a film that could’ve so easily been made today.

Loading…

The film is laced with gore, explicit violence and sexuality, while keeping sharp pace and a very fine style of animation to which has kept this film in high regards as far as anime is concerned. It’s a raw, gritty hell-ride. A rather macho, if you will, movie.

Death Wish

I'm not sure I've come across a film with more of a pro-gun message than Death Wish. Director Eli Roth claimed it was not a pro-gun film, then adding:

> …what I really try to do more than anything is show it how it really is, and leave it for the audience to decide.

Regardless of his rhetoric, the biggest theme throughout the film is that cops cannot always protect and, if a man wants to protect what's his, he does it at the end of the barrel of a gun.

The film itself is somewhat of a letdown and doesn't compare to other Bruce Willis film, like Die Hard, Sin City, or Hostage, but if you're exhausted by the anti-gun mentality of today, watch this flick and feel better.

American History X

This is one of the best films I've ever seen in dealing with racial conflict. And I'd find it an honest one in many ways. But look out for the propaganda and how it aims to manipulate the truth by drenching it over with what's perceived as immoral actions.

The beginning has the character of Danny, who has a standoff with a fellow black student in a high school bathroom as he defends a fellow white boy. It ends peacefully but plays a role further down the line. At the beginning, as Danny walks through his multiracial neighborhood, his voice-over says:

> Venice Beach didn't always look like this. It used to be a great neighborhood. The Boardwalk's always been a dump, but when our dad moved us out here, Venice was a nice, quiet place to grow up. Over the years, though, it's just gone to hell. The gangs are like a plague.

At this point, the film displays a group of adult black men getting confrontational on the basketball court. This image paints a horrifying one in terms of safety and security for European-Americans, who have already given up much of the fight for their people.

This film may have never been intended to be a red-pilled film, but to anyone who is aware of the conundrums involved in race and racial diversity, then this film is eye-opening. As I see it, the film aims to give way to a nasty violent image associated with strong arguments on things like illegal immigration, black crime stats, race riots, the changing shift in culture due to race, and so on. The attempt *could* be to demonize the truth by coating it over with behavior many are repulsed by.

This film holds much truth about our multicultural, multiracial society. It is a strong film and holds up nicely over the years. Very strongly recommended.

Conclusion

Hollywood is drowning in failure and it appears many of our self-righteous overlords are too ignorant to perhaps grasp how unpopular they are outside of their little holier-than-thou bubble. And, though it is seemingly rarer and rarer, some decent flicks are still produced and give way to some decent entertainment and escapism. The above mentioned are certainly worth a take.

7 Things That Will Sharply Boost Your Cognitive Function

August 9, 2018 | by Sponsored Article | Link | Original Link

The following article is sponsored by Synapse Supplements.

As a man who is out to succeed, you need to be on your A-game at all times. Keeping your body and mind in top condition is mandatory for whatever you're looking to do, whether you want to excel at work, impress a girl on a date, or perform in the gym. Unfortunately, many modern foods and drinks are full of substances that muddle your thinking and make you logy and tired.

To get the edge you need to succeed every day, you need nootropics, special substances that boost your brain function by giving you more energy, a better memory, and other positive effects. Here are seven nootropic substances that you can use to give your brain a boost when you need it the most.

1. Uridine monophosphate

One major problem when doing mind-intensive work is keeping your eye on the ball and avoiding distractions. Uridine monophosphate is a nootropic that can lengthen your attention span, allowing you to focus for longer periods of time and get more work done.

Not only that, uridine monophosphate can also improve your mood, smoothing over depression and making you more calm and collected. Scientific studies have also shown that uridine monophosphate increases neuroplasticity, making it a good substance to take when you’re studying something new.

2. CDP choline

CDP choline is a nootropic that aids memory and brain function by increasing the density of your brain’s acetylcholine receptors, improving their performance and making them

more efficient. Acetylcholine is a major neurotransmitter responsible for pain response and a number of other brain functions, and denser receptors allow for a more efficient nervous system.

3. Phosphatidylserine

Phosphatidylserine is a vital component of cell membranes, playing a role in coagulation (the clotting of cuts) and other important cell functions. As a nootropic, phosphatidylserine binds to neurotransmitters in the brain, allowing them to more easily absorb glucose, which improves overall brain function.

4. DMAE

DMAE (dimethylaminoethanol) is a nootropic that has been shown to increase attention span and concentration, making it possible to focus on tasks for a longer period of time and get more work done. Not only that, DMAE has been shown to have strong neuroprotective qualities, slowing down the aging and deterioration of brain cells. It's because of this that DMAE has increasingly been used to treat sufferers of Alzheimer's and other degenerative brain disorders.

5. Bacopa monnieri

Bacopa monnieri is a nootropic that improves both spatial and working memory, making it easier for you to recall and absorb information. This makes it an exceptionally useful nootropic for those who need to study for a test or absorb information in a learning setting. Not only that, bacopa monnieri has been shown to lower stress due to providing increases in adaptogenic stress inhibition, calming you down and making you more relaxed and less anxious.

6. Ginkgo biloba

Ginkgo biloba is a versatile nootropic that greatly enhances short- and long-term memory recall. In addition to this, it is also capable of greatly improving blood circulation in the brain, improving your brain health and lowering the risk of a stroke. Finally, ginkgo biloba has been shown to increase concentration.

7. Lion’s mane

Finally, lion’s mane is an extremely helpful nootropic because it speeds the creation of nerves and neurotransmitters in the brain. This not only improves brain function across the board, but reduces the likelihood of developing dementia and other degenerative brain disorders.

The gBoost Advantage

While all of these ingredients are effective ways to improve your brain function, chasing them down and taking them individually can be both a hassle and expensive. What if there was a way for you to gain access to them in a single product?

This is where Synapse Supplements' gBoost comes in. gBoost is a nootropic product that contains each of these seven ingredients, balanced to provide a cognitive boost to anyone who needs it. Instead of having to fiddle with seven different types of products—some of which may have questionable additives or low-quality ingredients—you can take one supplement each day.

Each of the ingredients in gBoost has been shown to enhance brain function on their own, and combining them amplifies their effects to make you into a powerhouse of mental acuity. For writers, programmers, or anyone else who engages in cognitively demanding work, gBoost will enhance your memory, concentration, and attention span, enabling you to get more done in less time. gBoost also boosts verbal acuity, making it a good choice for anyone who needs to give a public speech or impress a girl on a date. **Use coupon code "ROK" to get 10% off your order today.**

gBoost Gives You The Edge You Need

Given the fast-paced nature of modern life, you need the gBoost edge in order to successfully compete. Staying in physical shape and cultivating an interesting life are vital for any man's success, and nootropics such as the ones listed above are vital when it comes to accomplishing your goals. Whether you need to succeed at your job or in social situations, nootropics provide the extra push you need to rise above your competition.

Nootropics are an invaluable aid in maintaining brain health because they provide boosts to various aspects of brain function. Whether its nerve regeneration, memory enhancement, or anti-aging qualities, nootropics are a strong booster to the brain's functionality and will allow you to stand head and shoulders over your competition. Now there's gBoost to provide the most beneficial nootropics in one package. **Click here to learn more gBoost**. Remember to use coupon code "ROK" for 10% off.

7 Tips For Surviving In The SJW Workplace

August 10, 2018 | by C.D. Rhodes | Link | Original Link

It should be no surprise to you that the modern work environment is now dominated by cultural Marxist/SJW culture. Unfortunately, there is almost no profession or industry that is safe from these influences. Some blue collar jobs, law enforcement and certain military units are still tolerable, but the inexorable march of political correctness has influenced these institutions as well.

The white collar workplace is now dominated, numbers wise, by these cultural Marxist zombies, many of whom are women. Office culture has become catty as a result. In any modern office setting, you will see nice caring attitudes and smiles on the outside, while backstabbing and general crab basket type behavior dominates behind the scenes. Even in offices where men are present, you see them taking on these behaviors. The picture looks grim; feminism is firmly entrenched and males are disadvantaged and under the spotlight simply for being male.

In a perfect world, every masculine man would be self-employed and have a steady income stream that relies on nothing but his own hard work and ingenuity. The reality is that some of us haven't made that move yet, or have fallen on hard times and have to make ends meet. This article is to help you survive those times when you must conceal yourself in the politically correct hell hole that is the modern western office.

I have had the misfortune to spend several years in one and I hope that my experience can help others. When I say that my office was PC, I mean it—I worked in an environment in which I was expected to ask callers on the phone about their preferred pronouns. Here

is how I survived.

1. Be quietly efficient and overlook inefficiency in others

Stay undercover and escape at the first opportunity

Any office in which females are present in significant numbers is inefficient. They would rather discuss each other, their sex lives, and who they hate than actually do any work. The good news here is that you can use this to your advantage by being efficient and getting your work done. This will make you indispensable, which provides you some level of job security.

Show up for work early, complete tasks on time, and always be ready to take the lead on a new project. However, you need to show no signs of pride in the job you do and always ignore it when your fat coworker is consistently fifteen minutes late to work. Remember that women instinctively hate anyone doing better than them and as a man, you already have a target on your back. So much as a raised eyebrow at a late or inefficient coworker can cause a case of “muh feelings” and suddenly you’re in front of HR having to explain your outburst of toxic masculinity.

2. Do not run game at work

Don’t even think about it, or it could be #YouToo

This ought to be a no-brainer at this point. There is no one at work that is worth your paycheck, your reputation and your chances of future employment. In the era of #MeToo simple flirting can go south before you know it. I’ll say it again; do not game at work (and from what I’ve seen around my office, you probably wouldn’t want to anyway).

Loading…

3. Do not talk politics or current events

These people are zombies. They do not deviate from the cultural Marxist/SJW party line and anyone who does is an instant heretic. If they even suspect you are anything but an

average beta soy boy, you are in trouble. Just being in physically good shape made me an object of suspicion. Keep the discussion work related or stay on light, PC type topics to keep yourself safe.

4. Do not use social media

Ditching social media is advisable for a number of reasons, but it's especially important here. When I started at my office, no less than three people asked me about my Facebook within the first week. Females thrive on drama and dirt and they want yours.

The easiest way to keep them out of your business is to cut ties with all social media. Simply not posting anything controversial isn't enough. Instagram, for instance, can show photos of others based on ones you liked or even viewed. Don't let looking at a photo of a pistol or a frog meme cost you your paycheck.

5. Enjoy masculine hobbies and activities outside of work

Lift heavy, be a man, stay sane

Keeping up the beta blue pill image for any length of time is stressful and can drive you crazy. I have found that engaging in hobbies and activities that are traditionally masculine help me blow off steam and get re-centered.

Hit the gym, go rock climbing or fishing, or write an article to help other men to ensure

that you don’t become the person you pretend to be at work. Being a man in your free time keeps you from becoming an office drone and preserves your sanity at the same time.

6. Have a backup plan

Despite your best efforts, things can go wrong at any time. Make sure you are saving for the inevitable rainy day. A minimum of two months salary can keep you in the black while you job search, should you lose yours. Keep your resume fresh and ready, and maintain contact with your references should they become necessary in a hurry.

Another good idea is to have a side gig or keep up a technical certification which can keep you on your feet should the worst occur. I maintain certification as a personal trainer so that I can always walk into a commercial gym and get a paycheck if necessary. It isn’t the highest paying job, and it certainly isn’t what I want to do with my life, but it’s there if I need it.

7. Always be hustling for a better gig

If you're constantly seeking self-improvement, you're probably doing this anyway. You have to think of this job as not an end, but a means to something better. Use it to pay the bills while you get that technical certification or get your new business off the ground. Not only is this practical as far as bettering yourself, working toward a goal focuses your mind and helps you preserve your sanity.

Conclusion

In short, the modern white collar office is a cesspool of SJW ideals. If you're there now, you have my condolences. I hope these tips will help you to stay undercover, stay successful, and get out of there as soon as you can.

How The Elites Are Using Radical Islam To Subvert And Destroy Western Civilization

August 10, 2018 | by Beau Albrecht | Link | Original Link

While touring Washington, D.C., I saw a wrinkly old geezer with frizzy hair and thick glasses leaving a posh nightclub for the wealthiest of the wealthy. While getting into a limo, a note fell out of his pants pocket.

It was an encrypted message. Surprisingly, my vintage Little Orphan Annie decoder ring could decipher it. This correspondence from someone calling himself Maximum Leader Rosso began:

> Your last note questioned the wisdom of Open Mankind Foundation Governance doing everything inhumanly possible to overrun Europe with Muslims—particularly ones least inclined to assimilate and become productive citizens. Obviously it's imperative that we make Europeans strangers in their own homelands, import a violent underclass we can mobilize as needed, and eventually fulfill the Coudenhove-Kalergi Plan. However, you fear we're shooting ourselves in the foot, threatening our entire power structure in Europe.
>
> Rest assured, this is merely one of OMFG's classic pincer strategies. Radical Islam won't become a serious threat; OMFG also intends to neuter the Middle East. We're building up Muslims to knock them down. I've mentioned this briefly before; here are the details.

Whew! I figured I was onto something big. Here are some highlights of the long-winded

text.

Women

We have to fix this, pronto!

> Muslims obviously have some rather provincial attitudes about their ladies. Fortunately, our own useful idiots in the West have paid little attention, even though they're paying with their lives! As for Arab women, we certainly don't give a damn about them, but there's a huge opportunity to create discord and weaponize it. OMFG will divide society in two and stab those bastards right in the heart.

Say it like you mean it!

> Should we merely convince Middle Easterners to stop doing acid attacks, quit cutting off clits, forbid husbands from beating their wives, that sort of thing? Certainly not! After they acquiesce to reasonable demands, we'll keep pushing ad infinitum. We'll choose the bitterest and craziest bints for our figureheads. Then we'll convince normal Muslim women that these hags speak for them and are working in their best interests. Meanwhile, the men will be endlessly browbeaten.

It's heart-warming that Rosso is so enlightened.

> After three generations, Arab society will be utterly transformed. Women constantly will be told that all men are oppressors, making no distinction between actual wrongdoers versus guys who treat women decently. When men

> start getting sick of the snotty attitudes that result, it will be a major milestone.
>
> After about five decades, Yemeni girls will be tatted up, have pierced faces, and show off their funbags in the street. Further, bad life choices must be promoted as "empowerment". Soon, dysfunctional families will be the norm, not the rare exception. As an added bonus, getting women out of homes and into cubicles means lower wages and more tax revenue.

Gays

Gay pride parade in Istanbul: already there!

This one will be *faboo*.

> There's a large covert homosexual underground in the Arab world, despite the extreme penalty for getting caught. Polygamy makes it difficult for average young men to find wives. Even straight guys are turning into part-time faggots. (No offense meant to you, of course! It helps that our Arab cousins are a little pervy like we are.) This is a huge opportunity for OMFG.
>
> Even stupid Bible thumpers in Flyover Country can see that throwing gays off of buildings is a little extreme. OMFG's bathhouse front will start by seeming reasonable, but have hidden agendas. We intend much more than simply leaving people alone to do in private whatever twists their nipples. After society accedes to reasonable demands, we'll push much further.
>
> Loading…

I can hardly wait for the Oscars parties!

> Tolerance is merely the first step, followed by celebration, then mandatory

> acceptance of the agenda. The first gay pride parades in Riyadh, Medina, and Mecca itself will be a huge milestone. The next is when *liwat* is taught in schools as an alternative lifestyle choice. Another biggie is allowing Adam and Istifanus to get married.

Trannies

I always figured there was something a little weird about Saddam.

> Everyone leading OMFG is well aware that transsexuals either are biological aberrations, or (more commonly) suffer mental delusions. However, the useful idiots doing all the work for us are poised to use these freaks for the next human rights crusade in the Middle East.

It’s getting fruitier yet!

> Will we convince Muslims that trannies are just a little different and deserve tolerance and compassion? Ha—that’s merely the beginning! We’ll make society cater to them, new laws will force people to use those weird pronouns, Persian dudes will be in the women’s bathrooms, and we’ll even use the schools to try to convince little boys that they’re actually girls.
>
> We’ll also gradually erase the distinctions between the sexes. Arabs are getting pretty chubby already from all the new junk food. Soon, the residues of agribusiness pesticides and plastic congealers will lower the testosterone levels in the men and make them androgynous. Meanwhile, women from Morocco to Pakistan will be encouraged to start looking and acting like lumberjacks.

Some other agendas

> Slavery has featured prominently in Islam, even long after it was abolished in the Western world and eventually elsewhere. We'll make Muslims wallow in guilt about their historical misdeeds. That's effective even for those whose families had nothing to do with it. While we're at it, we'll browbeat them about past imperialism too, even though the Islamic Caliphate was building an empire just like most other major superpowers have done. Although OMFG intends to reduce the world to serfdom, hypocrisy certainly is no barrier to us!

I'm so glad to know Rosso really cares.

> The Middle East doesn't have many descendants of slaves, because they were castrated upon arrival. However, OMFG can flood the place with tens of millions of migrants that have a grudge with them. We'll use universalist scriptures in the Quran selectively to promote all this, and browbeat anyone who doesn't want their countries invaded. The more diverse we make the Middle East, the easier it is for us to operate unnoticed.
>
> Earlier you expressed doubt about disarming the militias that OMFG has propped up to keep them destabilized. However, they're not our target at all. Neglecting crime to justify repression works wonders! The more trouble they cause, the easier it will be to sell the Middle Eastern public on gun control. The common citizens will hand over their weapons, and accept police state "security" measures too, convinced that all this is for their safety.

I'm beginning to doubt Rosso's good intentions.

> Other measures to make the Arabs become docile will include silly distractions like video games, sports, and so forth. Bread and circuses, my friend! Finally, it's imperative to make them lose confidence in their religion. It'll take a while, but constant mockery and removing official support will help.

How they'll accomplish this

The last part of the letter is badly stained, because the old geezer's adult diaper had leaked. I got bits and pieces of things like subverting their education system, taking over the Boards of Directors of Al Jazeera and other Arabic media outlets, bombarding them with constant propaganda in movies and television, and instituting thought control laws.

The letter's last sentence is fully legible:

> Don't doubt that all this will work; it certainly has before.

Gosh, what could Rosso mean by that?

Read More: *How A Small Cabal Is Using Socialism & Cultural Marxism To Consolidate World Power*

Beau Albrecht

My father was a high-ranking student radical poobah and still thinks Castro was the bees' knees. Although I'm technically a red diaper baby, I've rejected all that baloney. I write **off-the-wall fiction**, and ***Righteous Seduction*** concerns next-generation game. My **blog** concerns "deplorable" politics, game, and my writing projects.

What The Movie Memento Teaches Us About Achieving Our Goals

August 12, 2018 | by Alain Deloin | Link | Original Link

In Christopher Nolan's movie, Memento, the protagonist, Leonard, is attacked in his home. His wife is killed and he is injured. He remembers everything until the aggression, but beyond that, all new memories vanish within 15 minutes. Yet he decides to find the murderer and take revenge. With obstinate work, he designs a system of notes and pictures that allows him to move forward despite of his impairment. The principles he uses can boost any kind of endeavor, even for people with no head injury.

A routine of reminders

Every performance guru will tell you that routines are of foremost importance to achieve goals, yet Leonard’s case makes this statement even more dramatic. His routines allow him to lead an investigation even though he swiftly forgets everything he does. Polaroids help him keep track of crucial information. Words written on papers and tattooed on his skin remind him of his goal and progress. As a bonus, a policeman calls him every morning to explain him who he is and what he is aiming for. All this allows him to work his way towards his goal every day.

Leonard has to be deadly persistent; he has no choice. His routines hold his life together, literally. Yet memories and motivation fade away even in normal people. Maybe not at the same rate and not completely, but they do fade, so everybody can benefit from a system that frames their effort.

Perseverance cannot depend solely on motivation. If one had to make the decision every morning of training or not, writing or not, one would certainly not be persistent on a daily basis. Decision-making is tiresome; unnecessary small decisions drain unnecessarily much time, emotion and energy. These limited resources deserve to be used wisely.

A routine and external instructions that do the decision-reminding for us allow us to spare that daily valuable time and mental energy for the decisions that really matter: the strategic decisions about life goals, daily routines and reminders. Thus, chosen daily routines are both helpful and liberating.

I was a teenager when I first saw this movie. Leonard’s fierce efficiency struck me. It inspired me to build my own daily routine that I use for weight lifting and to plan my life.

The importance of believing

While it is crucial to have a routine, it is not enough. In order to persevere, one has to believe in the outmost importance of the targeted goal. This can sometimes be easy, while other times it may need an extra push.

In Leonard’s case, his motivation appears self-evident. We see him as a true hero, fueled by his thirst for justice. Yet this picture slowly changes. The policeman helping him appears to use him for his own purpose. The targeted murderer is probably already dead, but the policeman keeps redirecting Leonard towards new victims, people he wants to get rid of without dirt on his hands.

Poor naive Leonard, we may think to ourselves. Yet the situation becomes even more complex when in a very short but memorable scene, Leonard discovers that his wife's murderer is already dead. Nobody to hunt any more! He thus decides to choose a new target: the policeman.

Loading...

The decision is cruel. Leonard knows he is issuing an unfair death sentence when writing down that the policeman is his wife's murderer. Yet he also knows that he will soon forget his choice. The guilt will be gone, and he will again be the bewildered knight with the pure soul fighting to avenge his beloved lady.

So it turns out that our sweet protagonist is probably a serial killer. Not that he would be a bad person *per se;* he does not act out of hate, but simply out of needing a purpose in life. This subtle but essential turnaround in the plot is a compelling depiction of the human condition: it showcases the deep human yearning for meaning and purpose.

Leonard fights not only to take revenge for his wife, but also (maybe mainly) to give a meaning to his life. This insight may help us understand all kinds of fanatics, for instance SJWs. Some people would bite your head off rather than admit that the goals they are fighting for are fake.

The importance of well-targeted self-deception

Let's be clear: the take-home message here is not that you should become a serial killer. It is to fully realize the efficiency of a clear, emotionally charged goal that you can believe in. Even if it is somewhat of a lie.

Those of us who have a properly functioning memory won't be able to make such a radically self-deceptive choice as Leonard did. Yet one can truly benefit from convincing

oneself of the usefulness of one's goal. In this world, anything can be seen as useful or useless. Gaining muscle. Achieving the 48th repetition. Recording a video, finishing to write a book, or this article.

Thinking too much may lead to the conclusion that human existence is shallow and pointless. One may just give it up and spiral down into self-doubt and black pills. So it is extremely important to convince ourselves of the world-changing importance of our goals.

Luckily, strategically designed routines can sustain the lies we chose to tell ourselves. – Of course, genuine values and really important goals are even better. But until those appear in our lives, strategic self-lies are quite okay to help us move forward.

Remember Sammy Jankis

Sammy Jankis is Leonard's former colleague. He has the same memory impairment, but no system. He lives in a retirement home, remote control in hand, watching TV day and night. No system, no goals. His favourite movies are commercials, short enough for him to fully enjoy. 'Remember Sammy Jankis' – these words are tattooed on Leonard's hand. This is what he doesn't want to become.

Actually, one doesn't even need a head injury to become a couch potato. The lack of goals can make us sink into the sofa, eyes glued to the TV or internet while the minutes, hours and years of our lives pass by without any new achievement. Beware, anybody can become a light version of Sammy Jankis.

This movie struck me when I was quite young, and stayed with me. I will never have tattoos, but if I had one, it would be 'Remember Sammy Jankis'. What I have is an old-timer telephone, with heavy buttons, a copy of the one ringing in Leonard's hotel room. It draws me to stay focused on my goals every time I see it. It replaces the motivation that a gym team or a personal coach would provide: it gives me the kick to start my workout

every day, and helps me to stay focused in other areas of my life too. It stays unplugged.

8 Reasons The Rise In Feminism Can Be Traced To The Failures Of University Education

August 12, 2018 | by Matthew Moore | Link | Original Link

The rapid rise of extreme feminism can be observed in many countries—most visibly in the UK/Australia and the US. *But why is it that women have turned to hate against men? Why does it happen and why does it happen now?*

Can the source of hate against men be traced down to one single cause—the failure of higher education in the 21st century? I believe it can.

1. The ever-rising cost of tuition

According to numbers from collegeboard.org, the tuition per semester at a private college has more than doubled to about $35,000 compared to $15,000 from about 25 years ago. Tuition at public colleges has gone up almost threefold.

It is hard to see why the cost of tuition has risen so quickly as teaching and research hasn't gotten much more expensive (adjusted for inflation and GDP growth).

2. The rise of the 'soft degrees'

The proportion of liberal arts degrees compared to STEM has changed quite rapidly. While the investment in a STEM or law degree may still pay off in the marketplace a liberal arts degree is much less of a jumping board into a $150,00 full-time job.

3. The student loan dilemma

Colleges would have never been able to have their tuition rise so much if students would have to pay cash for tuition. Some parents may pay for their kids college but the ability to borrow almost 100% of your education creates a ‘candy for all’ marketplace. Remember that you can’t simply declare bankruptcy on student loans but have to prove ‘undue hardship,’ a much harder thing to prove.

The student loan market looks much like the mortgage market a few years ago. An originally sound marketplace was extended to anyone who wanted a loan.

4. Professors being disintermediated by the Internet

It is rare to find a subject of higher education where you can't find all lectures readily available on the Internet for free. The MIT started it, but almost every discipline eventually followed. Clearly it is a wonderful tool to build name recognition for professors and a way for students to shop for the best education. But guess what, you don't need most professors anymore (in their teaching role).

It's now enough to have a few of them worldwide put up the best lectures on Youtube. You watch them online instead of going to a lecture in person and voila—you (at least theoretically) have the same education. Most modern day, real-life professors aren't very useful beyond being a 'dating supervisor' for their students.

It's no secret that the lifespan of the classic university is coming to an end. Most students already realize that—it will just take a while until parents have come to the same understanding.

Loading...

5. Colleges turning far left

What do professionals do if an industry is visibly dying? They leave the sinking ship or turn hard left since no normal investor would touch most private or public universities that are not ivy-league or cheaply run online outfits anymore.

The amount of conservative professors in the US colleges in under 10% (likely even less). And even these few Republicans are stifled by a climate of political correctness and hardline Marxism in the faculties.

6. Low starting salaries after graduation

What goes around, comes around

After graduation the opportunities that unfold for many students often are much more bleak than it seemed before. Students generally have to accept a much lower entry salary unless they attended an Ivy League school. Blame it on the patriarchy, but liberal arts degrees barely make you any (extra) money.

7. Introduction of second income streams

Every girl at the age of 16 realizes she can attract plenty of attention just by

manipulating the male sex drive. Most girls need a few years of experience to master the techniques but by the age of 23 they usually know how to ‘monetize’ their beauty.

If you owe $300,000 from your liberal arts college and are barely able to stay afloat with your daily expense, you WILL look for a new income stream.

If you are a girl there are a number of places to look:

- go on Seeking Arrangement and look for older guys interested in ‘sponsoring’ you
- go on Tinder and put up a ‘donation’ requirement

This is a capitalist society—girls have figured out that they can ‘charge for sex’ without being a prostitute. I have been on many dates with girls who graduated a few years ago and student loans come up in every single date. It is on everyone’s’ agenda, all the time.

I also had plenty of Tinder dates where girls ask me outright for:

- paying their rent
- a monthly allowance ($500 – $1,000 is usually enough)
- pay for their travel plans

I never went for it but I’m sure some men consider these deals carefully.

8. The rise of extreme feminism and social justice

The current Marxist ideology pushed by so many feminists is ideal—it allows you to portray men as oppressors and the obvious enemy you can treat with cruelty, without a moral consciousness. As a girl you contribute to stop the “oppressive patriarchy” by manipulating men into paying up for sex.

Now it all makes sense, doesn’t it?

Wikipedia Editors Have Declared Spokane Washington As Too White

August 13, 2018 | by John Carver | Link | Original Link

As the United States is soon to reach a key milestone of being less than 60% non-Hispanic White due to rampant non-white immigration, tanking fertility levels, and increasing amounts of interracial offspring from black male-white female and white male-Asian female pairings, anti-white media propaganda has been revving up big time.

Whether it's (((MTV News))) browbeating white men on how they can "do better", the (((New York Times))) allowing a female Korean immigrant (Sarah Jeong) to keep her job despite having a laundry list of tweets that would get any white person fired in a flash, or Jon Hamm race-cucking himself on the African-American centric (but tribe financed) "Random Acts Of Flyness" TV show, the media assault is relentless.

Increasingly, cities and even entire states which remain well above this 60% white population threshold are being targeted for curing the inherent evil of "whiteness". The state of New Hampshire for instance (94% white) was recently chided in the (((New York Times))), saying the state cannot "move forward" unless it has more non-white employees.

Apparently, the states somewhat infamous and uber-patriotic motto "Live Free Or Die" must become "Accept (Die)versity Or Die Anyway".

Furthermore, any U.S. city with a population of over 100,000 which remains stubbornly white as we close in on the 2020's is also a prime target for derision. Spokane, Washington (population 220,000 and 85% white) is one of those places in the elitist

crosshairs.

A Common Foe Whiplashes Spokane On Wikipedia

Spokane, Washington. 85% White. Unlike Haiti, it must be a shithole. Needs more diversity.

Wikipedia, the ubiquitous online encyclopedia, is **supposed** to be as fair and impartial as possible when presenting properly referenced information. However, don't count on (theoretical) encyclopedic neutrality to stymie the leftist agenda whenever the need arises.

For instance, here is a snapshot of the 'Demographics' subheading for the city of Spokane, which chastises the comparatively large town in Washington State for being too white, an unspeakable crime for late 2010's USA (full text is below the image).

Here is a reprint of the smoking gun text, and with key words highlighted in bold.

> **Spokane has been criticized and sometimes derided for its lack of diversity and multicultural offerings**, but the city has become more diverse in recent decades. People from countries in the former Soviet Union (especially Russians and Ukrainians) form a comparatively large demographic in Spokane and Spokane County, the result of a large influx of immigrants and their families after the collapse of the Soviet Union in 1991. According to the 2000 Census, the number of people of Russian or Ukrainian ancestry in Spokane County was reported to be 7,700 (4,900 residing in the city of Spokane), amounting to two percent of the county. Among the fastest-growing demographics in Spokane is the Pacific Islander ethnic group, which is estimated to be the third-largest minority group in the county, after the Russian and Ukrainian community and Latinos. Spokane was once home to a sizable Asian community, mostly Japanese, centered in a district called Chinatown from the early days of the city until 1974. As in many western railway towns, the Asian community started off as an encampment for migrant laborers working on the railroads. The Chinatown Asian community thrived until the 1940s, after which its population decreased and became integrated and dispersed, losing its Asian character; urban blight and the preparations leading up to Expo ’74 led to Chinatown’s eventual demolition.
>
> Loading...
>
> Spokane and its metro area in general, particularly northern Idaho has been stigmatized in the popular consciousness by a number of **hate groups** that have been set up in and around Coeur d’Alene, Idaho, in the past. **Low ethnic diversity** made the region a destination for some seeking to escape more cosmopolitan cities for a locale with a relatively homogenous, white population. This trend increased with the arrival of retired engineer Richard Butler from California who traveled to Hayden, Idaho, in 1974 to eventually establish a **white**

> **supremacist** church called the Church of Jesus Christ Christian, better known by its political arm, the **Aryan Nations**. Aryan Nations recruits and associates were responsible for several **hate crimes** and terror plots during the mid 1980s and 1990s. The group went defunct in 2000 when the **Southern Poverty Law Center** filed a civil suit which resulted in a $6.3 million settlement, which led to the eventual bankruptcy and closure of their Hayden compound. Another significant **act of hate** was the attempted bombing of Spokane's Martin Luther King Day Parade by Kevin Harpham of Addy, Washington in 2011. The **Southern Poverty Law Center** currently lists three **hate groups** in the Spokane and Coeur d'Alene metro areas, in the categories of **anti-Muslim**, **Holocaust denial**, and **general hate**.

As you can clearly see, the Wikipedia page for Spokane was infiltrated by lackeys of the (((Southern Poverty Law Center))). Butthurt beyond all comprehension that there are too many "fellow white people" in this beautiful urban spot of the country.

Without any shadow of a doubt, a place with such a high percentage of whites must be a hotbed of "white supremacy", "holocaust denial", and searing "hatred" stemming from it's unbearable whiteness right? Well the SPLC always seems to think so, and slow (die)versity is the only logical solution for such cities.

Rounding Up The White Holdouts

"Whitopia is in my sights. Master SPLC, where shall I airdrop the Somali and Syrian refugees on this white supremacist hovel?"

The whitest remaining small cities in the continental United States, such as Boise (Idaho), Spokane (Washington), Bend (Oregon), Salem (Oregon), and Eugene (Oregon) have

quietly become somewhat popular relocation destinations for young white families of all political affiliations, who are seeking an American way of life more akin to the 1950's rather than the United Nations style melting pot (or rancid stew?) brought about by the 1965 Immigration Act.

They are NOT so-called "white supremacists" or "hateful" people as they are so often mischaracterized, but peaceful and rational individuals who simply want to raise their children (or intend to raise children) in a cleaner, safer, environmentally beautiful, and more socially cohesive environment than what's available in pretty much all of the major cities.

As mentioned before in "5 Ways Northeast Asian Countries Benefit From Having No Diversity", it is entirely natural and normal to have a preference for 'homophily'. That is the tendency of people to prefer the company of others who are most like themselves when entirely left to their own devices. And with many ways to now earn a viable income online, it is now no longer a requirement to live in a large (and mega diverse) city for career purposes.

The question is, will increasingly rare places like Spokane even be allowed to exist in the coming decades? Will **every** single comparatively white city in the United States need to be force-fed diversity through executive order?

5 Habits That Make Me A Superhuman Fornicator

August 13, 2018 | by Roosh Valizadeh | Link | Original Link

Having casual sex with promiscuous women is not a sport, but it does take on sport-like attributes if you do it for decades. To a normal man, getting laid mostly involves a night of drinking heavily and getting lucky, but to a more serious man like myself, there is discipline, work ethic, and penis hacks that allow me to keep going in a way that has prevented many other men from reaching their fornication goals.

I'm inching closer to 40, but thanks to some tinkering, I've been able to maintain my sexual vigor at nearly the same level as when I was 25. Here are five things I do…

1. I eat two eggs every day

I'm convinced that egg yolks are God's elixir to man. I don't have any scientific evidence to prove it, but eating two eggs a day has noticeably increased my horniness, along with other testosterone boosting foods like broccoli and avocados. While a lot of men go on testosterone replacement therapy to increase their T levels, I believe lifestyle changes concerning diet and weightlifting will get you there without the pharmaceutical dependency.

2. I moisturize my penis with coconut oil

As you get older, your penis will get less supple. You may also get chafing or dryness from rough sex sessions. On days I have sex, I lather my penis with extra virgin coconut oil after showering. I maintain that regimen for a few days until my penis is silky smooth to the touch. I also rub coconut oil in the pubic area to combat any vaginal yeast odor that wants to attach itself to me.

Not only does coconut oil help your skin, but it gives your penis a tropical fresh smell for any lucky lady that gets near it.

3. I conserve precious seminal fluids when not getting laid

Within the past couple of years, I can actually feel a mild hangover the day after I masturbate. I believe it is due to my body marshaling its resources to replenish the valuable sperm that I wasted into the ether. More crucially, masturbation takes sex off my mind for at least a couple days, which is bad when you want to have sex with a real-life female.

Loading...
These days, I only masturbate when I'm approaching a sexual emergency, but not more than twice a week, and never with hardcore pornography. Young men can probably masturbate daily and still have plenty of fluid left over for sex, but not when you're my age.

4. I empty my balls with every sexual encounter

I've lost count how many times I've received compliments from girls in their early 20's about how I can go for more rounds than guys their age. The reason is that when I'm with a girl, I assume that it is the last time I will ever have sex, because you never know. I keep going until I no longer get a boner or faint. If I haven't been laid in a while, the girl will get the night of her life and certainly come back for seconds. I've surprised myself with my endurance on hundreds of occasions.

One thing I don't like about having a girlfriend is that I have to space out my orgasms to keep some gas in the tank, but the drawback is that sex stays on my mind throughout the week. I much prefer Ball Drainage Events so that I can't do anything but focus on work for several days.

5. I maintain proper urethra functioning with 100% pure cranberry juice

Even if you use a condom, it's not rare for the tip of your penis to at some point come into contact with a girl's vaginal fluids. This could lead to a urethral irritation or a urinary tract infection that falls short of a full-blown sexually transmitted disease.

After I sleep with a questionable girl, which is most of the time, I buy a 500 milliliter bottle of 100% cranberry juice and take 100 milliliter doses every eight hours until the bottle is done. I've knocked out some crotchal symptoms with this formula, including a case of acute ball pain. Be sure to check the label of any cranberry juice you buy, because it may be adulterated with apple or grape juice.

Conclusion

If you're finding yourself less horny than before, or if you take too long to recover from a dynamite sex session, the things I listed above will keep you in peak physical shape for when sexual duty calls. I'm confident they'll keep me fornicating at a professional level for at least three more decades.

4 Books That Help You Make Sense Of The Decline Of Western Civilization

August 13, 2018 | by Edgar Tru | Link | Original Link

The West is dying. And there have been many warning signs, rational literature, and wise men who saw the impending cancer before it took on its full form. To help make sense of this decline, I recommend the following five books.

1. ¡Adios, America! by Ann Coulter

Ann Coulter was the woman laughed at on Bill Maher's HBO show when she predicted Donald Trump would win the general election. It is clear she had wisdom not held by her co-guest that night as she saw something beyond their recognition. And, like that glorious prediction, we can see the wisdom in her book.

It tackles immigration in regards to Mexico. It edges into race-based territory and recognizes that demographic changes of such a large scale have severe consequences and overall effect on the culture which allows them in. She addresses crime and gangs, the butchery and rape of US citizens, how the environment and our nature parks are destroyed and littered upon, along with quite a few packed in horror stories which, after awhile, begins to feel like being dragged in a pit of nails whilst realizing how much closer it gets to your own doorstep.

One thing we can certainly take away is that European-based majority countries suffer in terms of safety and security when third-world folk are allowed in as if they stand on equal grounds with Europeans. Then again, one must ponder if the ones who allow their own citizens to be replaced, bashed on through the dominant pop culture while screaming they're the issue, are perhaps the lesser ones while the ignorant savage beast is the more noble one by Nature's standards.

Click here to view on Amazon.

2. White Identity by Jared Taylor

Jared Taylor seems a gentleman worth conversing with over some coffee or a nice glass of whiskey. He's been advocating on behalf of European-Americans for quite some years, and still going strong today. He has, in part, helped bring to light that, yes, it *is* okay to be (hu)white and that European folk have their fears, interest and preferences. He operates American Renaissance and has produced some very well-worded, well-thought out video content addressing issues in regards to race and how they play a serious role in our lives, our society, our culture.

Whether one is of European heritage or otherwise, this book is a damn good read and written in a fashion anyone with an open mind, and mind of honesty, can read and evaluate without feeling Mr. Taylor's allowing his emotions to slip in and craft his reality.

This book addresses the ethnic conundrums in places which are more diverse than others, including the clash between blacks and Hispanics in schools and jails out in California. Important factors such as racial tribalism amongst non-whites, and advocacy groups like La Raza, hit hard the impending shift which is surely to occur in America and where European-Americans shall be replaced. It seems highly plausible we'd be a very hated minority.

The book is fueled by facts and stats, accompanied with news stories which display the raw reality many Westerners seem to ignore with such dangerous ignorance.

Click here to view on Amazon.

Loading…

3. Lying by Sam Harris

Myself, I find lying repulsive. I'm not sure why I've come to put such an emphasis on this value. And I've tried examining my psychology as well. The best I can garner is that I'm an objectivist and I prefer things as they are. To see the world as it is, not as I want or feel it should be. I've been around ruthless liars and manipulators to the point reality was smashed together with the fiction eroding from their devil-it tongue. I'm just not a fan.

I quite like Sam Harris. He seems a gentleman I'd enjoy being indulged in with good chat and intellectual stimulation. We most certainly have our opposing views — like his opposition toward pro-white politics — but I still appreciate the man nonetheless.

This particular book is quite short and can be easily read in a day. He clearly values honesty, which seems lost in much of American culture. Everyone from celebrities, to politicians, to greed-bent globalist pastors, to your everyday encounters. I fucking hate it. Even when engaging in chat with everyday folk am I questioning their words and intentions in my mind. I do not trust people.

From telling your wife how she really looks in that dress, to weighing the deceit of lying by omission, this book is a short and sweet piece of literature that I'm glad to have purchased. The amount of deceit plaguing the West (particularly America) is astonishingly gross and could use some fixing up.

Click here to view on Amazon.

4. Might Is Right by Ragnar Redbeard

It’s been around since 1889. And it is a book that *must* be mentioned because it lays bare, as I see it, a very open and honest worldview. In a sentence, morality is wherever your ethics leads you. Not the most appealing to the brainwashed West-bound liberal dwellings of today, but it holds weight.

As I read through this for the first time, I had to ask myself, quite a few times if, I was being pranked. How is it this mysterious Ragnar Redbeard could foresee the decline of the West with seemingly ease? It is perhaps obvious now that he was a man simply unfit for certain propaganda aimed to distort his reality and saw Nature as She is, for who She is. And it’s that simple.

It touched on the dangers of female-led societies, the ills of humanitarianism and spreading your care beyond your borders, the hippie-esque version of Jesus Christ and the equality-for-all mentality, the weakening of city men compared to men of the country, etc.

It is truly a fantastic read and is very accurate. And our Mr. Redbeard saw straight through the bullshit, and now, about 130 years later, we lay witness to the tragic and natural collide of cultures when one is weak enough to allow the other to stomp their backs in.

Click here to view on Amazon.

Conclusion

Literature can hold such wisdom and mold the mind in ways far more positive than one could ever foresee. These books are only a sample of the raw piss-and-grit truths of our world divulged by means of literature. They are brutal and they are honest. I’d highly recommend them.

The War On Male Sexuality

August 14, 2018 | by L.T. Smash | Link | Original Link

The government and society is waging war on men's sexuality. We are being attacked for being men. Everything that is perceived to be male or masculine is being attacked, put down, condemned, and criticized. The general idea is the attacks are simply the outgrowth of feminism; this is partially true. The attacks are from feminism's parent ideology. The war on men's sexuality are organized lies to reshape western reality, eliminate due process, and replace our constitution with a totalitarian rule.

Consider the organized lies of such things as mansplaining, manspreading, manterrupting, male privilege, toxic masculinity, rape culture, the patriarchy, etc. How many have considered these to be broader tactics for the regulation of men's sexuality and the eventual regulation of men, and thus the population as a whole?

Most young people are not familiar with cultural war tactics. While the tactics can change, the general concepts are the same as general warfare. Many men in the west do not realize that Western society is at war with them. Male sexuality and masculinity are under attack from every progressive front. Progressives begin by corrupting children when they are young. SJWs hate it when children tell them the truth.

The Rewriting of History

Men like sex. Men want sex. Many women like sex and want sex. The sex drive in humans is powerful. Women have a powerful sex drive too. Men's sex drive is typically more on display because men respond more to visual sexual stimuli while women respond more to

emotional sexual stimuli.

Some of the most natural activities of men are now being regulated, made illegal, or redefined. Rape culture is one example of an attempt at redefining male sexuality. The advocates of rape culture claim the *desire to rape* is within every man and always lurking beneath the surface in every man and men "must be taught not to rape".

In November 2017 New York Times columnist Stephen Marche published an article titled "The Unexamined Brutality of the Male Libido." He compares the sexual libido in men to vampires and werewolves. The Obama Administration's "Dear Colleagues" letter, a letter designed specifically to subvert U.S. law and due process as guaranteed by the U.S. Constitution created the environment and framework for the regulation of sexual relations between men and women.

Over the last several years, media attention has exploded in coverage of transgender events and individuals. The media is widespread with articles about boys competing in women's competitive sports. Naturally, the competitors that were born as boys defeat the women. In November 2017, the New York Times published an article titled, "His Makeup Is Way Better Than Yours". The article praises young men that decide to wear makeup and their masterful application of makeup.

Gay activist Daniel Villarreal wrote an article titled, "Can We Please Just Start Admitting That We Do Actually Want To Indoctrinate Kids" expressing frustration with gay community leaders in constantly reciting the lie that the gay community does not want to "indoctrinate" children.

A group at Claremont College call "5C Thrive" held a workshop discussing "the mental health problems caused by masculinity". Several other colleges are offering "safe spaces" from "toxic masculinity."

When progressives constantly call President Trump and his supporters “Nazis” this is a deception and attempt at rewriting history and painting the Nazis as something different from socialism. The Nazis were socialists. Fascists are a socialists. Hitler himself declared the party socialist. Hitler advocated for “a socially just state.”

The Creation of an Enemy

Many more examples could be given. Since the U.S. Constitution forbids the passage of Bills of Attainder, the current cultural tactic, organized lying tactic, being used is to *paint all human vices as exclusively the result of “the patriarchy”, male, and male sexuality and thus any man as a perpetrator of said vice*. It is no coincidence that most feminists are devout socialists.

Progressives will gladly accept a world with enforced poverty, will publicly decry totalitarian organized lies of “inequality”, all while accepting an extreme hierarchical order and rigid class structure as exists in China and existed in Soviet society.

Loading…

SJWs cannot bear reality so everything becomes political. George Orwell stated in his article, The Prevention of Literature, how organized lying is part of the integral fabric of totalitarianism to shape and constantly reshape reality. Literature, art, music, science, knowledge, technology, and sex are heavily politicized to perpetuate and push the organized lies and fit the “correct” ideology and narrative. The Mainstream Media, the Deep State, and other organizations are part of a large apparatus of systematic lying to destabilize society, divide the people, and remove due process as guaranteed by the U.S. Constitution, and obtain political power. History is constantly rewritten to facilitate the reshaping of the present reality and the writing of the future.

In all societies that are socialist, or desire to be socialist, there has to be an enemy, usually fabricated, a group to receive blame for what socialists will label as "societal injustices". The Chinese Communists, the Soviets, and the Nazis, all had people and groups that were used as ***initial lackeys and targets*** to promote and spread the organized lies and the war, the revolution in the progressive or socialist mind. Crimes committed by "protected classes" which are considered to be "victims" are explained away as the result of oppression and the "societal injustices" perpetuated by the "enemy of the people".

Some of these people and groups were later targeted and labeled as "enemies of the people" and exterminated. Concentration camps and labor camps are common in communist countries. Hitler did not come up with the idea of concentration camps on his own. Hitler copied what was already being done in the Soviet Union.

"Enemy of the people" is a broad and fluid term used to attack anyone that is a potential ideological opponent, anyone who is a potential threat to the regime, or anyone considered to be subpar, weak, ideologically impure, or undesirable. As Augusto Zimmermann stated in his article "Adolf Hitler's Debt to Karl Marx" these "enemies of the people" were arrested and executed for what they were and not any specific crime and the repressive machinery created by Marxists is then used to "hunt people down, to destroy their lives not for what such people have done but because of their social 'category'". Targeting a social class for extermination or enslavement is not any different than exterminating or enslaving a race or demographic group.

Socialists want to force people into what they think is a perfect society. This society would be amoral and have no rights since, according to Marx, morality and natural, civil, or human rights are oppressive tools used to suppress others. Male Privilege, White Privilege, or Asian Privilege are concocted terms and concocted crimes used to mask the elimination of the natural, God given rights, of a person or group of people, and the subsequent elimination of due process. The socialists in the Western world have chosen

men as the current “enemy of the people”. These terms pave the way for imprisonment or death of men and white and Asian people for what they are and not any real crime and eventually anyone else that disagrees with them. Socialism wears the mask of benevolence and uses colorful language to disguise its inherent racism, genocide, theft, misandry, misogyny, and rot.

What You Can Do

I like being a man. I love sex. I love women. I will not apologize for being a man, nor should you. The male sex drive, male sexuality, and sex are not vices any more than the female sex drive and female sexuality are virtues. Masculinity is not any more toxic than femininity. There are ***toxic people,*** both men and women. Do not tolerate and accept the ideology of progressives or accept that human vices are exclusively male and masculine. Reject the organized lies and realize you are at war.

Cleon Skousen summed up what Marx, and thus socialists, really want.

> He visualized a regimented breed of Pavlovian men [people] whose minds could be triggered into immediate action by signals from their masters. He wanted a race of men who would no longer depend upon free will, ethics, morals or conscience for guidance. Perhaps, without quite realizing it, Marx was setting out to create a race of human beings conditioned to think like criminals.

White Male Professors In The UK Will Be Assigned Younger Black Women As Handlers

August 14, 2018 | by News Syndicator | Link | Original Link

Via The Telegraph

Male, pale and stale university professors are to be given “reverse mentors” to teach them about unconscious bias, under a new Government funded scheme.

Under the project, white men in senior academic posts will be assigned a junior female colleague from an ethnic minority as a mentor.

Prof John Rowe, who is overseeing the project at Birmingham University, said he hoped the scheme will allow eminent professors to confront their own biases and leave them “feeling quite uncomfortable”.

The professor who instituted the policy. If he was a history professor, he would know that the policy will eventually put him on the chopping block.

“What is understood about unconscious bias is that we have all got it, but the more you learn about it and become conscious of it, the more you can act,” he told The Daily Telegraph.

“While it is well known and obvious that women and minority groups suffer setbacks to their career progression no one really understands why.

“It’s not as if there is any overt prejudice – it is something to do with the way the system is or the way it has evolved and we needed to find out why.”

The mentor scheme is one element of a broader project aimed at challenging bias, funded by the Engineering and Physical Sciences Research Council’s (EPSRC).

Loading...

“Here is your new handler… I mean mentor.”

Prof Rowe, who is director of research at Birmingham University’s College of Engineering and Physical Science, said he hoped to interrogate the “underlying causes” that lead to the underrepresentation of female and ethnic minority academics at the top of academia.

“We are mindful that previous attempts at addressing such imbalances have not been successful, so we are investigating new ways of understanding how to support progression of our female and ethnic minority colleagues,” he said.

“Questions such as ‘Is there a bias when the gender of the academic is known?’, ‘Is it the result of the group dynamic of a panel of assessors?’ and ‘Are women encouraged to work in particular research areas, perhaps those outside of STEM subjects?’ will also be addressed.”

Staff from Birmingham will work with researchers from Aberystwyth University and University Hospitals Birmingham NHS Foundation Trust.

The EPSRC, a government agency, is funding eleven “Equality, Diversity and Inclusion” projects as part of an £5.5 million anti-discrimination drive in engineering and physical sciences.

It has previously been claimed that Oxford porters should be given “unconscious bias” training, amid claims that they assume black students are trespassing when they enter College grounds.

Why American Education Sucks

August 14, 2018 | by Larsen Halleck | Link | Original Link

Seeing as about a month ago I wrote an article on the decline of fitness training as an organized discipline, and possible ways to redeem it, I started thinking about whether or not this process could be applied to the state of education as well—education being something that I think we all can agree sucks the big one. And much like fitness, modern education has a few deeply buried nuggets of ancient wisdom that can be dug up and polished and made to serve a new generation. But to see that, we must first look at ancient education:

The Ancients

Curiously, when I was reading Aristotle's *Rhetoric*, I noticed that a lot of what he discusses was, in fact, very similar to a few things that I recall learning in elementary—the concept of the apparent enthymeme is almost identical to the "if-then" statement that most of us learned in elementary school… and that's basically the full extent of the rhetorical training we received in our lives.

The first "educated" men were those who had to learn the needlessly complicated systems of writing that existed in the past, such as in Mesopotamia. Once writing was simplified enough for the masses, we see a sea-change in which it appears that the training of any "gentleman" in the past was to make him something of a polymath. For example, in the West, Greco-Roman education involved music, poetry, drama, history, wrestling, ethics, and rhetoric, as well as several different methods of pedagogy such as the famous Socratic method.

Similarly, in the East, Confucian scholars advocated the “Six Virtues” (ranging from archery to calligraphy) as the basis of any educated man’s curriculum, and broadly similar concepts existed in other places in the world as well. The point I’m making is that “mens sane corpore sano” was an ideal across the globe, and continued to be for centuries.

Naturally, from these ancient tomes came the various instances of rebirth of classical education in both East and West, allowing the concept of the well-rounded gentleman polymath to live on around the world for centuries.

Hell, a look at a modern school curriculum still asks you to fulfill all general requirements ranging from English to math to the sciences and many other subjects, so deep down, buried under the sands of time, the ideal is still there. But clearly, we’re not raising a generation of brilliant polymaths, so what the hell happened?

In the modern USA, a staggering amount of high school “Graduates” can’t read at a remedial level. Children in many countries, including but not limited to America, barely know anything about their own country’s history, let alone the histories of other countries. And as the steadily declining PISA scores show, the hard sciences like math aren’t doing so hot either.

We must ask, why is this happening? Every kid literally has the equivalent of the Library of Alexandria at his fingertips, and he chooses to not use it. Why?

Loading…

Probably not reading Nietzsche

I worked as a teacher for three years, and my father has been one for most of his life (in fact he retired this year) and thus I like to think I have a fair amount of knowledge of the field—and I will tell you outright: I don't know how to solve this problem. If I had a quick answer, I'd be a billionaire—and no, I'm *not* joking.

However, I do have a couple of suggestions as to how education (At least in the USA) can be made a little less crappy.

1. It's not always the teacher's fault

Teachers get a bum rap often in America; especially from the “fat cuckservative” faction of the Republican party, but from various other factions as well. And certainly some teachers are crappy—and not just the ones who bang their students.

But with that being said, it’s not *always* the teacher’s fault. This will upset parents who can’t possibly conceive of their precious little angels doing anything wrong. Many (not all, but many) kids are complete shitheads that make the school environment absolutely toxic. Whether its fighting, general fuckery, or just not paying attention, a school can overcome poverty and a lack of supplies, but it absolutely cannot overcome a shitty student body with no desire to learn. And frankly, it shouldn’t be the school’s responsibility to instill discipline. At the risk of sounding cliched; if cohesive families existed in the US, this wouldn’t be a problem.

2. Standardized testing and constant inspections from some ivory tower suit won’t solve anything

Vaguely related to the first issue, I find that a lot of school policies are made by people in the school board who more often than not have little, if *any* experience actually teaching in a classroom. But naturally they have to justify their massive salaries somehow (spoilers: their salaries are *much* greater than the actual teacher’s), which leads to the constant shuffling around of curricula and endless standardized testing and stupid shit like Student Growth Objectives that has been yet to be shown to achieve anything.

And really, that’s it. A simple problem to state but impossibly difficult to actually solve—I have seen many idealistic young teachers get chewed up and spit out by the school system and its students.

Conclusion

And all you'd have to do to do this is solve the crappy cultural climate; everything else would follow. You could engender a love of learning, you would see test scores go up, and more importantly, you would see people resembling those fabled polymaths of the past. But that is unfathomably easier said than done—and if you have kids that are beginning school, I'd recommend looking elsewhere beyond the public school system.

3 Day Game Disasters I Have Experienced And How I Got Over Them

August 15, 2018 | by Ozz Kuragin | Link | Original Link

The benefits and rewards of practising day game have been covered many times on this website and it is generally accepted as a superior way of meeting women than online dating or Tinder. Furthermore, it is a tough, courageous activity in which fewer than 1% of men ever manage to take part.

Day game, however, can be far scarier and riskier than other forms of game: there is the ever-present social stigma attached to it which one feels when doing it on the street; it can be long and arduous compared to the quicker, more thrilling environments offered by night game and the learning curve is so steep, that 80-90% of men drop out before 1,000 approaches.

I have been practising day game for the last two years in Scotland. In this article, I shall share three off-putting experiences I have experienced on the street, how I managed to get over them and why I decided to persist with day game despite the highly unpleasant scenarios in which I found myself.

1. Approaching the same girl three times and getting threatened with police action

Edinburgh, yesterday.

One niggling question I keep hearing repeatedly is: “What if I approach the same girl twice?” Day gamers fear that they will be perceived as sleazy pick-up artists and creeps if they use the exact same line on the exact same girl in the same city by mistake.

I, and just about every day gamer I have met on the road, have made this mistake and will continue to do so in the future. Unfortunately, the truth is that especially in small Scottish towns, it is highly likely that a day gamer will approach the same girl twice. It is

simply not possible to remember the face of everyone you've approached, trying to do so will only hinder the day game experience.

In my case, I was particularly unlucky when I chanced upon a sullen-looking brunette who proceeded to threaten me with police action after I had approached her on three separate occasions. I cannot lie and say that I was unfazed by the matter: the incident affected my vibe and I suffered from heightened approach anxiety for weeks afterwards.

Me getting rejected, yesterday

Fortunately, nothing ever never came of it and I believe I have not approached that girl since. I learnt that threats like these are often hollow and just the result of the girl's own personal problems, whatever they may be. It does not help to dwell and over-think on such scenarios and the quicker incidents like these are forgotten and overcome, the better.

2. Being stopped by the police and having my address and contact details taken

The scariest experience I had whilst day gaming was being stopped by three police officers in set on a cold, autumn evening in 2017. After successfully taking the number of a charming and attractive student on the street, a police officer took the girl to one side and proceeded to subject me and my wing to a long interrogation. We were accused of acting suspiciously and lying when I told them what I was doing. Our details were then taken and we were told that we could not approach girls in this manner on the street again.

Loading…

The police, yesterday

Somewhat naively, I did not expect that doing day game would attract the attention of law enforcement. I also did not know that they had the right to take the address and telephone number of anyone they wished without arresting them. I cannot lie: this event struck fear deep into the heart of me and I did not approach for two months afterwards.

Despite the stern warning and my trepidation, I resumed approaching women after a break and have not had any trouble from the authorities since. I have since concluded that this was an isolated incident, a black swan event where I just happened to chance upon a moody set of bored police officers who had nothing better to do than harass me. When doing day game, it is critical to accept the very worst along with the best, there will be rejections, cockblockers, nastiness and unexpected turns of events. The only way to overcome them is to plough through them.

3. No successful sets in 2017

In 2017 I did over 1,000 approaches and got no successes at all. None.

The reason for my poor results was largely down to the fact I became too robotic and mechanical in my approaches. I had done so many that I started to look at day game as a chore and that came across in my vibe.

The way I managed to overcome this problem was to take a break. When day game gets too repetitive and monotonous, it is essential to take time out or to at least change things up a bit. I decided to try a bit of night game and immediately noticed the difference.

A Scottish club

In a single instance, I managed to kiss a girl and then sleep with another two weeks later whom I had met that same night, ending a dry spell of over one year. I firmly believe this was down to my change in vibe and scene. The novelty of a new situation gave my behaviour the injection of spontaneity which it desperately needed.

I have recently resumed day game on the first weekend of the Edinburgh Festival and no longer feel the same sense of monotony and boredom which I felt before taking a break.

Conclusions

Disasters and misfortunes are inevitable in life, especially for straight, white men in the 21st century. The only way to deal with this is to soldier on without faltering. It is not good enough to let failure and bad luck sucker you into idleness and inaction.

I suffered through a massive dry spell and have been threatened by the law for practising game, yet through sheer persistence I kept going and finally got some success. The key is to exhaust all the possibilities available to you: switch things up, try new environments to keep the spontaneity fresh and just keep going until you succeed.

Can The Hijab Save Women?

August 15, 2018 | by Edgar Tru | Link | Original Link

If a right-winger was to convey to another right-winger that the hijab may be the unseen force of balance to preserve the West from faltering into total degenerate decay, what do you think the common response would be? A common response may be one of the following: *"Islam oppresses women and that's not what America is about!" "How can you side with the liberals like that? Gasp!"* Or, perhaps the most heartbreaking of all, *"Women deserve the same rights as men!"*

Back in my youthful years of developing the brain-eating virus known as liberalism, which has now thankfully been cured, I embraced the dangers of female empowerment, equality, and standing up for 'what is right' in America. Women should be able to do as they please as any man—pursue a career, become president if they're qualified, get a solid career and make bank, etc. On the surface, to the untrained eye, yes, these may seem like reasonable things to desire in your society. And who could possibly be against equality?

The balancing factor

I've only recently come into this perspective and, if you're open-minded enough for just a moment, whether you emotionally agree or not, you may at least understand where I'm coming from. Now, one may be able to observe that there is always this balance – scale, if you will – that comes through Nature and Her line of law and order.

Peace brings war, war brings peace. Peace brings too much freedom, to which develops into more liberal lifestyles, which leads to degeneracy, to which leads to an overall general sweep of societal decay. Thus, that society is weakened. What happens next? When one culture is weakened, in comes another hailing as the Vikings once have. War brings chaos, to which creates law and order by destroying the weakened culture, to which creates stability, to which, overtime is looked at and taken granted for, to which, again, brings peace. And the cycle begins all over again.

That is a huge general sweeping concept to which I'd find holds a strong case. The West has too much freedoms, too many options. Myself, I *do not* want someone limiting what I'm already able to legally do. However, my intellectual side recognizes the human animal's need to buck up against things which may literally be for their own benefit. It is natural for man to look his authority figure in the eye and give him the old-fashion middle finger. Again, though, I recognize that sometimes a strong hand must be put over certain people in order to maintain law and order.

Women endanger law and order

I'm sure you've heard many Western women talk about how oppressive the hijab is and that America is one of the best countries to be a woman because it grants them more freedom than other countries. Well, that's the goddamn problem. And that may sound bloody harsh, but there is a serious danger to allowing this imbalance within our society. When women were allowed to vote, back way when in August 18, 1920, it seemed like a progression in American society, sure. Today, however, 2 years shy of a 100 years, we can observe what our society has become.

The men have lost their place of authority in the household, in the education system, in many aspects in the art world such as TV and feature-length film, in the literary world and publishing industry, etc. Both women and men have become whores, divorce rates are high, broken homes craft the child with an unbalanced and unhealthy mind which he then takes out into society furthering its infection, there's an epidemic of drug abuse and overdose, alcoholism, high abortion rates, suicide, and so on the list continues.

Is this all due to allowing women the right to vote? Of course not. Men held the power, men let it go. They perhaps became too soft, too comfortable, too influenced by female emotion rather than that piss-and-grit brute mindset of their ancestors. So, when I hear females talk about how Islam sucks and the hijab is oppressive, I do find myself wondering if that's the point to law and order.

Loading…

Equality does not exist by Nature nor our own damn laws. What happens when we defy Nature when She has clearly given us rules to observe on how things ought to operate in order to keep a society and culture overall healthy, strong, safe and secure? Man has been given the responsibility to own this burden and either adhere to it, or defy it. It is a great responsibility. And, to quote Ben Parker, *"With great power comes great responsibility."*

Is the hijab actual female empowerment?

In the whoredom which is the West, allowing a woman to engage in coitus on-screen, while being gang-banged by three different males squirting sperm onto her face—that is what is considered female empowerment in today's terms. Allowing a woman to get up on-stage while stimulating penetration from behind as she sticks her tongue out like a retarded sheep, that is considered female empowerment. Allowing a potential million young American women to never be shown the life of traditionalism and motherhood as propaganda aims to demonize it, while never showing any of the perhaps positives of it; that is considered female empower so that they may enter the workforce, slave to a corporation as her eggs die off and drown herself in her substance of choice. *That* is female empowerment. *That* is freedom.

I do not buy into this slogan that allowing a women to do whatever she pleases is actual female empowerment. Then *what is* empowerment to the female? There may be a multiple of answers to this inquiry, depending upon whom you ask, but let me give it a go: adhering to the laws of Nature as best you can is the closest you'll ever get to obtaining empowerment. To adhere to the highest of laws, while being complimented by them, that is how you achieve the highest level of empowerment.

On this planet, if there be any god or goddess which exist, I'd claim to Nature. She is everywhere. In everything you touch, She is there. Touch your clothes, the carpet, a car or fence – it all comes from Her and we are all connected. There are a natural set of rules to best perform the task of law and order. And the Western liberal mentality of the twenty-to-twenty-first century are pissing away at those laws.

Now, some may disagree on what empowerment really means. But I cannot come to siding with the dogmatic view of freedom in terms of allowing ourselves, as a whole, to dwindle away into nothingness as some form of empowerment. That is suicidal. That

could give way to suggesting this idea of ’empowerment’ is really non-existent at the end of the day. And, just like ‘freedom,’ if it leads to your destruction over time, is it *really* empowerment? There’s a lot to unpack there and many could chime in on it, but I’ll keep it simple for now.

Conclusion

If the Muslim women are adhering to Nature, by means of submitting to the dominance of man who, he himself plays his role in adherence to Nature by dominating the submissive, they are in step with law and order. And no matter how many liberals-in-denial preach on about how glorious the freedoms are here in America and how great women have it, it is certainly obvious, at least to myself, that it is ironically the one thing about to kill us off and wipe the slate clean.

If one possesses existential intelligence, then one may be able to see far beyond the horizon. We’re outside with a bunch of people and we see this beautiful array of light in the distance. Some say it is the dawn rising. For me, I get this cold chill running down my spine. While everyone pops out a chair and sits, drinking their vodka and chatting about the place, I decide to grab a ladder, climb to the very top step, and take out my binoculars. While everyone around me sees freedom and equality and a gorgeous sunrise, I see what it really is: the fires of destruction impending.

Why Is Donald Trump Allowing Melania To Cuck Him In Public?

August 16, 2018 | by G.S. Luthra | Link | Original Link

Ever since the "Locker room talk" incident involving president Trump and Billy Bush, it seems he hasn't received as much support as he normally would have from his wife. It's as almost as if Melania is using some form of passive aggression to get back at him, especially after the accusations of Trump having an affair with a dirt bag prostitute.

Over the past year, incidences such as slapping Trump's hand away have raised suspicion as to what is really going on between them, but from her behavior it just seems to be due to anger. However, it appears to be expressed tactfully in subtle ways only a smart woman would do and this is hurting Trump's position as president giving his enemies more fuel to fire more attacks.

Praise was given to Melania by Republicans, making her look like the perfect conservative housewife, but with the latest incident involving the feud between LeBron James and the president, Melania is revealing more of her true colors, and oddly enough, her actions do not appear to be inline with the president but rather against him.

LeBron attacks Trump

The 'dumbest man in television, Don Lemon', interviewed the dumbest man in sports, LeBron James. They laughed saying Trump is dividing people and LeBron referred to him as a "Bum", and that he wouldn't sit across from him in a room. He promoted his "I Promise" school and at a follow up interview, expressing no remorse for his name calling.

Instead of standing by her husband and defending him, Melania praised LeBron, taking the side of the enemy.

> On Saturday afternoon, Melania Trump also issued a surprising, positive statement about James, but did not reference her husband.
>
> "It looks like LeBron James is working to do good things on behalf of our next generation and just as she always has, the First Lady encourages everyone to have an open dialogue about issues facing children today," a statement provided by her spokeswoman said. "As you know, Mrs. Trump has traveled the country and world talking to children about their well-being, healthy living, and the importance of responsible online behavior with her Be Best initiative. Her platform centers around visiting organizations, hospitals and schools, and she would be open to visiting the I Promise School in Akron."

CON-servatives and Republicans were praising her for being the perfect elegant wife as though she has always been the conservative obedient spouse so this is a big slap on their faces.

Loading…

When women gain power

I remember watching one of the presidential debates while Donald was still running, and the cameras were recording him getting out of his limo in the parking garage and then proceeding to walk into the building for the debate. What stuck in my memory is how he was walking. He had the billionaire's walk – chest out, head held high, chin up with a little smirk like he didn't give a dame.

Trump slowly made his way inside swinging his arms like he owned the place. He looked like he was a single man with no care in the world. What happened next made me laugh – after Trump entered in followed by security and other suits, then after a good gap of time

came Melania scampering behind like a mouse. She hurriedly followed *after* Trump, *and* her head was held down. That was when Donald was in full power, at least more than he is today.

However, ever since the vicious assaults from the media, he started walking side by side Melania with arms locked. That's when it all went downhill. Shortly after, you saw other small things like slapping his hand away and the almost cold shouldering by her.

Melania now walks with her head held high and said in an interview that they disagree on things but in the end Trump does what he wants. What she doesn't understand as the First Lady, is that it is her job to support her husband, not showing the world that she has a different opinion.

Melania is out of line

Siding with LeBron was a very foolish move by her. One can only wonder why. Based on her background, she can't be stupid; it's likely something else. Now, all of a sudden her parents become US citizens and their lawyer is attacking Trump. Something doesn't smell right. This is what happens when women become Americanized and given more attention than they deserve. Melania thinks she is independent and self-made… from what, posing naked for millions of men? Without her husband, she's nothing. Nobody would care about who she is.

Most men fall prey to the charms and beauty of Eastern European women, but experienced and seasoned men are well aware of their manipulative and diabolical nature. Let this be a lesson for those who blindly believe that Eastern European women are obedient slaves who just want to serve your every command. And also the dangers of giving women too much power and control. Look what equality is doing to Trump's marriage. Women by nature, are all the same, they just have different tactics for getting what they want.

8 Lessons I Learned About The Free Market By Investing In Real Estate

August 16, 2018 | by Harry Lime | Link | Original Link

Over the past year, this ROK writer has taken a leave of absence to pursue his local real estate market in Ontario, Canada. Starting out in November 2017, I have managed to achieve very good educational, interpersonal, and (some) financial growth after beginning as a complete greenhorn.

Pursuing real estate offered me a big bay-window view into the essence of free markets and individuals. Prior, I may have understood these concepts in theory from books and websites, but did not fully appreciate them until experiencing their mechanics at work, affecting and influencing my well-being in real-time.

Understanding these maxims and learning how to apply yourself will help you thrive in the business. Like any ecosystem, you must adapt to survive. If one is new or continues to engage in real estate or another highly oversaturated part of the private sector, here are eight maxims one should grasp in order to outlast the competition.

1. Everything Is Negotiable

Bacon is for winners.

Yes, everything. A colleague of mine had his offer accepted on a property because he threw in a pound of bacon with the purchase agreement. My partner and I got our price by allowing the seller to take their water softener with them (barely a concession). When everything is negotiable, get what you want and give up what makes the other side happy if you don't care about it.

Like Trump did in real estate and does in politics now, you should start out every deal by making extreme demands that favour your side, then—if you have to—walk it back closer to the middle (but where you still come out winning).

If you want something, ask for it and only consider relinquishing if the buyer or seller objects. If you have to drop a condition, do it if it will not hurt your deal, but ALWAYS counter with your own condition.

For example, you present an offer to a seller. They agree on the price, but don't want you to inspect the property or make it conditional on inspection. But it's an old house, you think the septic is bad, so you reply: "Fine, I will remove the inspection condition from our agreement. However, we will still conduct an inspection within 5 business days at our own expense. If that septic tank ends up needing to be replaced, up to 20 thousand dollars will be deducted from the purchase price." Here, the seller gets their firm offer but you also get your inspection and the right to adjust the price if the septic is gone.

When everything is negotiable, there's no sense being soft in your approach. Trust me, the other side will appreciate your strength and willingness to give and take.

2. People Aren't "Greedy", They Just Need Incentives

Ninety-nine percent of the real estate investors, agents, and entrepreneurs I've encountered are not greedy profiteers in it for zero-sum gain. They cannot afford to be as reputation is crucial in the biz. If one is regarded as a scammer by the local real estate community, they will lose out on lucrative partnerships and deals.

The threat of reputation destruction helps regulate greed or misbehaviour. While self-aggrandizement is rampant among them, real estate types do not want to screw each other over. Simply, they need incentives to work with and help you. Altruism in a vacuum doesn't exist. Even people who say, "I'm happy to help" without pushing for compensation will eventually walk if you do not deliver the goods.

Every deal must be a win-win and structured in proportionate to each party's value and output. There is no free advice or favours; you have to know your value and bring it *immediately* to the table. If you're new, admit it upfront and pay that mentor for their time or partner with a pro and offer them a disproportionately larger profit share (like 70-30, or even 100-0!).

Real estate entrepreneurs are not given benefits, a steady salary, or a cushy pension. They are independent wealth creators and thus need an incentive to participate and produce that wealth. That doesn't make them greedy jerks, just individuals requiring the necessary motivation to offer value to benefit themselves and others.

3. Everyone Is Inherently Selfish

Everyone, at the end of the day, is in it for themselves.

This point may seem contradictory to #2, but it isn't. Let me explain. When you invest yourself in real estate, you start to tune into everyone's ulterior motives. The more you commit yourself to the free market, your brain evolves and develops an ability to read people's minds and motivations because you need that information to appeal to them.

Here, you realize that everyone has deep-seated ulterior motives. They have dreams, expectations, goals, and personal/familial needs that precede the interests of anyone else. You witness The Selfish Gene quite vividly through real estate as everyone is vying—and cooperating—for greater success and power.

This type of "selfishness" is completely natural (selection). That fact is not an argument against capitalism and the free market, but rather for it. People are so hungry to be "selected" that we need capitalism to regulate those selfish instincts and provide an outlet that allows people to express those instincts so long as they create surplus value in society.

Socialism, on the other hand, denies this fundamental reality and pretends we are all inherently selfless. In the end the socialist's paradise becomes unequal, immoral, and murderous. Free markets are the opposite: cynical, tough, but fair.

4. It's A Relationship Business

In business, people need to trust you.

Paradoxical, isn't it? Humans are inherently selfish, laden with ulterior motives, they need incentives to work for you… but real estate is a relationship business. The beautiful thing about free markets is selfish people have to add value not only to themselves but others. You have to build genuine relationships to do this. You cannot win on a lonesome crusade. Connections build the networks to success.

Loading…

In real estate, people seek out relationships that service their goals and needs. In turn, they must reciprocate by servicing other's goals and needs. As soon as a relationship becomes one-sided, it falls apart. You need solid two-way relationships to gain access to great deals and business partners.

Beyond the quid pro quo, people also must trust you. If colleagues believe you are only about money, your growth in the business will reach an alarming standstill because no one will see a future working with you. In that case, that's the free market punishing you for not playing its game. Once again: it's tough, but fair.

5. Price Is Relative and Not Always Most Important

Unlike gender, price is relative and whatever we agree it to be. There's a certain limit to that claim—for instance, a fully renovated estate home is objectively more valuable than a dilapidated fixer upper (though the exact price would vary greatly in different markets).

Oftentimes, "fair market value" price is determined after several volleys of counteroffers, power plays, and knowledge drops. When buyer and seller agree on price, market value emerges—but it's ever-changing.

Price is a state of mind. It's an attitude, a feeling. And a higher price doesn't always mean *more* to a seller. Admittedly, I have at times capitulated to sellers and offered more money on their house, only for them to reject the higher offer. They rejected it because they sensed weakness.

My weakness changed the market value of that house. Sellers who start with a firm price often drop five figures by signing. On the other hand, sellers who seem "negotiable" from the outset will back out on a deal even when they get a great price.

Price only *truly* matters when a seller faces foreclosure or a certain defined amount of debt that locks their price in place. Generally though, price is secondary and you win by (a) solving the seller's problems (e.g. closing fast and buying their junker as-is) or (b) holding your ground against a seller who threatens to walk away, jerk you around, or raise their price.

Price is often about knowledge and power. Which leads to #6…

6. Knowledge Is Power, Always

Whoever knows the most wins.

At many points in real estate, you will encounter things you don't know. It is your duty to learn them after to patch up that area of ignorance in your brain. In a voluntary business transaction, it's up to you to tip the scales in your favour.

You cannot force someone to accept your price; you have to convince them. You do this through knowledge gathering (or what is referred to as "due diligence"). When you research the market, know what adds value to a home and how much a repair costs. You will gain a dramatic upper hand at the negotiating table.

Say you're trying to buy a home that is located close to the water. You do your research and find out the home is on the floodplain. Hmm. You go to the house and ask the owner if the basement is waterproofed and if the downspout's leader pipe discharges at an acceptable distance from the foundation. No, it doesn't.

The foundation is concrete block, the seller mentions. You reply that poured concrete is more durable and easier to waterproof. Also, unlike the comparables, this home's basement doesn't have a separate entrance, you add. You'll have to cut one in, add drywall, and make sure it's up to code. The seller nods.

Some of these are fairly standard and inexpensive problems, but the more knowledge you have the more you can handle objections and leverage deals in your favour. The free market rewards those who are the best equipped—so why not play by the rules and get equipped?

7. The Pareto Principle Is Real!

Bernie Sanders be damned!

In real estate, the majority of brokers make very little commission and a tiny minority of well-connected, knowledgeable, and go-getting ones reap the harvest. That is not because real estate is mean or unfair, but because it rewards the fittest.

Most of the agents I've encountered are all talk. Incompetent, lazy, and terrible at negotiating. That's not to impugn the job of realtors. There are fantastic brokers out there, and the 1% of realtors that have the most skills bring in most of the clients and sales commission.

Similarly, most investors will start off, fail, make excuses, and just quit. The reality is many people go into real estate, but few are actually successful. That's no systemic imbalance; regardless of race and gender, most novices don't have the persistence, resilience, or IQ to tackle real estate in the long-term.

That's a good thing, if you're a winner. That means less competition for you and still plenty of properties to buy and sell.

8. Abundance Mentality Matters

In real estate, volume is essential.

Like in game, abundance mentality is king. In real estate and the free market in general, you need systems and people that produce volume for your business. If you do not have multiple opportunities, others will sense your singleminded desperation in their deal. When they do, you're burnt toast.

Whoever is genuinely able to say "no" and walk away in a deal wins *every time*. When you don't care about a deal working out because you have too many on the go, it is an aphrodisiac for the people on the other side of the negotiating table. They will often chase you down and give a better price without you even asking.

In the past, my partner and I have encountered screaming deals, gotten emotional over the potential profits, and ultimately lost out in the end. Didn't matter the seller's situation; they sensed our neediness. When big money is involved, you can easily get too attached.

To compensate for that, we created a lead-generating system in real estate that, at this point, brings in enough volume that we don't have to fake that calm and collected mindset. It just *is* with us.

Once you have gained an abundance mentality in real estate, even if your net worth has not moved yet, you will have already won.

10 Reasons To Visit The Brazilian City Of Curitiba Instead Of Rio

August 16, 2018 | by Howard C. Roark | Link | Original Link

Whether you plan on setting down in Brazil or just looking to have some fun, Curitiba is one of the best cities Southern Brazil has to offer. If you like European cities you will definitely love Curitiba. Which feels like a mix between Latin American and European culture.

1. Great infrastructure

Like the rest of Southern Brazil, Curitiba offers top notch infrastructure. The infrastructure might not be as good as the one from developed countries,but it certainly gets close.

Unfortunately, in recent years the infrastructure degraded a bit, due to Brazil being under it's worst economic recession in history, but like the rest of Southern Brazil, Curitiba's infrastructure is still of higher quality than the rest of Brazil.

2. Weather that reminds you of Europe

Curitiba's Jardim Botanico covered in snow

For those who hate Latin America's sunny tropical weather like me, I've got good news for you! Like the rest of Southern Brazil, Curitiba has a Subtropical Highland climate which means it's not as hot nor as sunny as most of South America and sometimes it even

snows in the city. Europeans will feel like they are at home. Cold fronts from Antarctica bringing cold winds and rain, comes very often to Curitiba and the rest of Southern Brazil.

3. Vibrant nightlife

Curitiba offers a wide variety of things to do during the night

With the many options of activities, different nightclubs and pubs the young men out there won't ever feel bored during their nights in Curitiba. He will always find new places to have fun partying and trying to game chicks or just enjoy a bonding time with his bros.

4. High quality of life

Curitiba's Rua das Flores

Like the rest of Southern Brazil, Curitiba has some of the highest standards of living if compared to other cities in Brazil. Curitiba's population are mostly composed of high middle class and high class individuals.

5. Bilingual schools for children

This is useful for those ones planning on starting a family in Brazil or had to temporarily relocate in here due to work reasons. Curitiba is home to many bilingual schools that offer an education in English or German alongside Portuguese. From kindergarten to high school, these bilingual schools will give the chance of your children to become fluent in

two languages. The famous International School of Curitiba is a good option to those from English speaking countries.

6. Low crime rates

The streets of Curitiba and other cities from Southern Brazil are much less violent than Rio de Janeiro or São Paulo. However, just because the crime rates are lower in here, it doesn't mean that you can walk around holding a sign saying "Please rob me!" I still recommend you to take the same safety measures that you would if you were visiting any other big city in the world. Yes, there is crime in the city, but if you have some common sense and don't let your guard down chances are that you won't be robbed and you will enjoy your stay in here.

7. It's close to the coast

Ponta do Sul beach, Parana is only 76.11 miles away from Curitiba

Curitiba might be a landlocked city, but that doesn't stop you from exploring the beautiful Southern Brazilian Coast that is a few miles away from Curitiba. In less than two hours of a road trip you can get to see the beautiful coastal towns Southern Brazil has to offer. Some of them include Pontal do Sul, Ilha do Mel, Pontal do Paraná, Praia de Leste, Matinhos,Caiobá, Guaratuba and so on.

Loading...

8. There are girls for everyone

Curitiba has several girls of Polish, German, Ukranian and Italian descent

For the young men just looking to have some fun or the conservative Christian men, Curitiba has girls that attend requisites for both parties. For the young man just looking to have some fun, I advise him to look for girls in the pubs and nightclubs the city has to offer. Bonus points if you have a Brazilian friend to be your wing man and help you break the ice with the locals.

As for the older men out there looking for a more serious relationship or wife material, I advice him to pick one of the many churches the city has to offer and start frequenting their church services and events. While every Church has their share of fake Christians, you will always find a group of real Christians who follow God's guidelines to live a godly life.

If you are into blondes, gingers or asians then you will love this city! Due to the mass immigration of Germans, Polish, Ukrainians, Italians and Japanese. Curitiba offers girls from various ethnicities.

9. Beautiful churches from all branches of Christianity

Thanks to Curitiba's European cultural background, the city offers a wide variety of Christian Churches from various branches of Christianity such as Catholic, Lutheran, Baptist, and Orthodox. Curitiba offers several options to faithful Christians of all branches of Christianity

10. Vibrant community of ancestors from Europe and Japan

Curitiba's German community doing their annual gatherings to preserve their cultural roots

The City has a very rich cultural story, thanks to the mass immigration of Germans, Polish, Ukrainians, Italians and Japanese. Nowadays the city is home to many descendant of those immigrants who do their best to keep their cultural roots intact by enforcing them through cultural events and teaching their children the tongue of their ancestors. It's not hard to find fluent speakers of German or Italian in Curitiba.

Beware for rich SJWs

As the saying goes “There’s no sunshine without rain.” Curitiba is home to many high class individuals and this come with a cost. Many of the young men of the high classes were raised with their parents paying their tuition, cars, houses, and getting them recommended for jobs. This leads to spoiled leftist adults, who always got their way in everything and suffer from Peter Pan syndrome.

Thus don’t be surprised if you find yourself talking with friends and girls and struggle to explain to them concepts like hard work, economy, and why socialism always fails. But still I’d say this is a very minimal issue Curitiba faces if compared to having to worry about being robbed or murdered in the violent streets of Rio de Janeiro.

Conclusion

Orthodox Christian Brazilians of Ukrainian descent celebrating Easter in Curitiba

Curitiba can be both a great destination for those just looking to travel and “have some fun” or for those looking for a fresh start, such as the German man tired of seeing Germany and its culture being destroyed by Angela Merkel’s SJW policies or the American tired of seeing his homeland being desecrated by Cultural Marxism and Globalism.

However, don’t come in here hoping for streets made of gold or angelic blondies that respect men and will beg to date you. Like the rest of the world, Brazil suffers from the same Cultural Marxist fungus that is destroying Western culture. But with a population that possesses strong regional identity and political views, I can safely say that it will take a while before Cultural Marxism is able to completely vandalize Southern Brazil and its culture as it did to the rest of Brazil, America and Germany.

The Next James Bond Is Rumored To Be Black

August 17, 2018 | by Jean-Batave Poqueliche | Link | Original Link

That's it. One more symbol soon defiled, just a few to go. After attacking numerous European figures in film and series, twisting the history of the Ancient Greeks, Romans and insulting Nordic folklore and Medieval Britain, our favourite tribe of innocent Vietnamese peddlers decided that it was time to tear down one of the last remnants of white masculinity, the charismatic, blue-eyed James Bond.

Idris Elba lately tweeted a picture of himself captioned "My name's Elba. Idris Elba" as a nod to a rumour that has been gooing on for months.

> my name's Elba, Idris Elba. pic.twitter.com/kEyyaVg8JX
> — Idris Elba (@idriselba) August 12, 2018

The name is Bond, Bail Bond.

Although it is not confirmed, I believe Elba has been given the green light by his hand-rubbing masters to taunt us about the programmed death of that inspiring, objectively White character.

The sky is green and the sun is cold

Heimdall VS Heimdall: Enriched

Elba is not just any black actor. He has been a useful stick chosen by the treacherous Finns to poke European culture in the eye, particularly when he portrayed the guardian god Heimdall in Thor, the Hollywood parody of Viking mythology.

A sketch of James Bond, as commissioned by Ian Fleming

James Bond, being the son of a Scotsman and a Swiss woman was not, and never will be, Black. James Bond is, as its creator described:

> "…slim built; with a three-inch long, thin vertical scar on his right cheek; blue-grey eyes; a "cruel" mouth; short, black hair, a comma of which falls on his forehead"

It is all so tiresome

I can't wait for the sequel of Schindler's list, starring Woody Allen as the SS officer and

Dolph Lundgren as Itshak Stern but something tells me it will not happen anytime soon.

I find the directors of this future Bond film extremely intolerant. Indeed, they think that a Black man has to fit in the role of an oppressive White devil, instead of having his own version of Bond in Wakanda, for example.

Loading…
In addition, Bond will be depicted as an evil heteronormative, able-bodied membre of the patriarchy. We need a transexual midget male-to-female Bond and we need it now! #NotAllBonds!

At least the friendly film purveyors, in their eternal arrogance, stopped being subtle and even the simplest mind can clearly see the motives behind the decision.

Let's hope that the crowd behind James Gunn's removal will find a way to torpedo Elba or his handlers.

Bond is everything they fear and hate

It was really too much for them to endure this problematic figure of the cool and unapologetically masculine European hero that inspired and keeps inspiring millions of young men to seek their inner alpha.

Hence why he must not only be destroyed, but replaced. Although I am certain that his love interests will not suddenly become "exotic". On the contrary, those women will have even fairer traits than before, thanks to the thoughtful Quechua recruiters in charge of the project.

#BlackBondRightSideOfHistory

I can hardly wait for the realistic scenes where Idris T’challa Bondatrius the Third tries to sneak into a Siberian nuclear plant, fooling the guards by giving the password with a perfect Russian accent. Because We Wuz Russians, wuzn’t we?

No, my esteemed colleague. The reactor is THAT way!

I have no idea how the puppet masters will spin the plot without the audience worldwide bursting in laughter at the sight of a Black James Bond, trying to be believable.

White guilt does not work everywhere

If they go ahead and fund the film, and I sincerely hope they do this mistake, they will fail and sink the franchise, just like with Solo, Ghostbusters, and other PC failures. In the event of this farce to take place, I would obviously invite ROK readers to boycott it, as they did with the last Star Wars. The amount of Kemetic screeching it will cause shall be pleasant. It is the only language they understand.

Instead make yourself some vodka martinis and watch again the classic James Bonds for some instant, raw alpha attitude. Let them unveil their master plan to all, for this bait is this time to big to take.

Fumiers de marchands, vous êtes démasqués !

We should fight fire with fire and start our own crowd-funded movie project. Why not an adventure-packed biopic with Roosh to portray Martin Luther King, where he would team up with Nelson Mandela (myself) and travel back in time to discover why it is always the same small group of Bosnian market dwellers that keeps being kicked out of countries? I think we have a blockbuster right there.

Did John G. Trump Inspire The Space Force From Examining Nikola Tesla’s Secret Work?

August 17, 2018 | by Alfonso Taft | Link | Original Link

What sort of new technologies was President Trump referring to when he proclaimed in his inaugural address that we’re “at the birth of a new millennium, ready to unlock the mysteries of space”?

The statement implies President Trump has had plans for The Space Force for quite some time. Is it because President Trump has had access to secret knowledge about the inventions of famous Serbian-American inventor Nikola Tesla? The same Tesla that Elon Musk named his company after? Is it possible that knowledge about Tesla’s inventions is the source of President Trump’s confidence concerning a forthcoming branch of the military, The Space Force?

Wait, what? A link between President Trump and Nikola Tesla that has something to do with the Space Force? It all make sense shorty. Firstly, who was Nikola Tesla?

Nikola Tesla

“When natural inclination develops into a passionate desire, one advances toward his goal in seven-league boots.”

Nikola Tesla was a man ahead of his time. An inventor originally from Serbia, Nikola Tesla immigrated to the United States in the 1890’s where he patented the induction motor, the magnifying transmitter, Tesla coil, Tesla Turbine, shadowgraphs, neon lamps, and alternating current.

Tesla had many other ideas for inventions including an earthquake machine, a thought camera, wireless energy, and an artificial tidal wave machine. Tesla’s most notable idea of all was a frickin’ laser beam also referred to as a death ray, death beam, or Teleforce.

Tesla’s social circle consisted of Thomas Edison and Samuel Clemens. He received a congratulatory letter on his 75th birthday from Albert Einstein and was at one point contacted by Henry Ford himself. In 1901, J.P. Morgan bought a 51 % stake in Nikola Tesla’s patents and future inventions for $150,000.

When Tesla died in 1943, the FBI raided his apartment. Leading the task force that

confiscated Tesla's papers was none other than former MIT Professor, John G. Trump.

Loading...

The Trump Effect

"My father's brother was a brilliant man . . . We have very good genetics."

If there is one person, who had unfettered access to the ideas and concepts of Nikola Tesla, it was engineer and nuclear physicist, John G. Trump. After the raid on Tesla's apartment and subsequent investigation he stated, "Tesla's thoughts and efforts during at least the past 15 years were primarily of a speculative, philosophical, and somewhat promotional character, but did not include new, sound, workable principles or methods for realizing such results." Was John G. Trump telling the truth when he publicly dismissed Tesla's ideas? Or was he playing a multi-dimensional game of chess decades before his nephew Donald?

If knowledge is power, why would any man voluntarily give up the knowledge about a potential death ray that could "stop armies dead in their tracks"? In reference to Uncle John, President Trump said he would talk to him "about the power of weapons someday" and "that the destructive force of these weapons would be so massive, that it's going to be a scary world."

Is it possible President Trump was alluding to a future Space Force as far back as July, 2015? At a speech in South Carolina, a then candidate Donald J. Trump announced: "nuclear is powerful; my uncle explained that to me many, many years ago, the power and that was 35 years ago; he would explain the power of what's going to happen and he was right, who would have thought?" John G. Trump died in 1985 when he was 77. The question remains, did he pass on any secrets to his nephew?

The Tesla Border Wall

The inventions of Tesla are not limited to The Space Force. Tesla also had ideas for The Wall. In the Fall of 2017 the FBI released 64 pages to the public about Tesla. In a report titled, "NY 65-12290" a plan for a highly advanced border wall are revealed:

> TESLA's only military invention was a method to which he once eluded but never

> [sic] fully described. This invention was a means whereby an impenetrable [sic] 'wall of force' can be erected around the United States' borders which would render helpless any military attack. TESLA disclosed the existence of his plan in 1934 and stated he intended to present it to the Geneva Conference but seldom referred to it afterward.

Prior to hitting a home run Babe Ruth used to "call his shot" by pointing to the fences with his baseball bat. The creation of the Space Force is President Trump "calling his shot" in regards to space exploration and unprecedented human achievement. President Trump is dead serious about The Space Force, the power of which is beyond our current scope of technology.

4 Things I've Learned About Online Dating

August 19, 2018 | by Edgar Tru | Link | Original Link

Online dating is a horror show. It makes one feel even further alone, isolated, and depressed. The results are usually unattractive and/or overweight women attempting to find that love which isn't looking for them. Not to be utterly crass, but a lot of men do not attempt online dating to meet the undesirables.

So, I would enjoy divulging my observations, as I'm sure have been made by a-many fine gentlemen seeking romance and a relationship.

Women like Keira Knightley are NOT waiting for you on OKCupid

1. If there are multiple girls in a photo, she's the ugliest one

If you've explored dating sites or apps, you'll soon discover that if there are two women in a photo, one being far more appealing to the eyes, chances are its not that one. If you discover a seemingly half decent-looking woman with the first few photos being close-ups that look edited to glamourize her apparent beauty, it turns out many times over it's an unattractive, overweight option. It's as if only the desperate and least desirables attend these dating sites more than the opposite.

Look, I understand people cannot *always* help how they look, and I personally do not enjoy making fun out of another's appearance. It makes me feel shitty. But, after awhile of fishing for goods, one begins to lose patience for the sloppy choices placed before him.

Hate her or not, Emma Watson is a gorgeous woman and you won't find many Western women to match her looks.

2. Girls show their immaturity though cliche poses

I've noticed this trend where editing on a cartoon-esque dog or cat nose and animal ears onto a person's face and head is in their photo, I would assume, to be taken as cute. If that's not annoying enough, when a woman over the age of 25 is still sticking her tongue out in every other photo, it begins to display well a frightening realization which was always in front of me: the bitch isn't worth it.

Online dating exposes in broad daylight the pain-staking obvious that women are, naturally, immature. I'm not necessarily faulting them for their silly girls-just-want-to-have-fun mentality, but I certainly despise it. And a young woman (most certainly *not* a lady) who feels this desire to stick out her tongue may seem petty to some, but I see it as

the image of hopelessness in finding a decent, mature lady.

Now, there have been whispered rumors women secretly have oral sex with their dogs of whom often times are male. Perhaps it's late one lonely night, you happen to spill some peanut butter onto your crotch and Fluffy just so happens to be nearby, and tongue stuff happens.

When I first was made aware of this, I couldn't help but be amused at how many women have photos with their dogs emphasizing being a dog mommy. It repulses me because, what I believe, is that they've been robbed of traditionalism and motherhood, and they still have those motherly instincts. But since they've no baby they end up putting that maternal drive elsewhere, such as in their pets, or activism for an outside group whom the motherless winch sees as a victim in need of her care and affection.

And let's rant a moment about the female who post photos of herself holding a glass of vodka while laughing like an autistic horse. It could lead one to hoping hell is a real place and bad people go there forever. Granted, the vodka-lit chick may rarely party and wanted to attempt conveying how she's not a total deadbeat, but I've heard stories from close female sources that the women of today, my generation and older, are pretty lousy if you're searching for anything remotely close to wife material. They're drunks, drug abusers, whores, money-grubbing snakes, cheaters, pill-popping fanatics, drama queens, and so on this list goes. It truly is a bloody disgrace. Where are the ladylike females?

Loading...

3. The most annoying and bitchy women talk about politics

After the election of Donald Trump, it hit a hard nail in the spine of many who bought into the "*He's a racist and America is a hate speech nation!"* narrative. Thus, as inspired by madness itself, many women now take to making note that if you voted for President Trump, then swipe left. The last thing I want is some bitch expressing anything about politics when I'm damn sure she still believes criticizing immigration or Islam equates to anything about race. They *do not* need to talk politics. Unless you're Lauren Southern or Ann Coulter, *zip it!*

When I see photos of liberal bitches holding their signs at a protest a part of me is repulsed while the other is fine with it because they look like a pig reincarnated as a human being, and that somehow makes me feel better. It astounds me the liberalism within the female sex and how aggressive these motherless winches are. I don't care if you believe 'love is love' or 'no one is illegal.' And when these are the sorts of women who advocate for abortion, despite how grotesque I've come to recently view the procedure, I wouldn't bother stopping them from aborting anything which could be influenced by their natural frantic lunacy and have their offspring effect our society.

4. There are hardly any attractive women

The stunning Ana de Armas

There are far too many profiles with several close-up car selfies. Perhaps it’s due to the sun providing enough light to make you appear fuckable when you’re clearly laced with fat and triple-chinned. The profiles where the chick is McDonald’s disgusting, yet she writes very little on her profile with short responses and poor grammar, is odd to me.

If you’re what is commonly less desirable in society, then your personality may be the only thing to save you. Some may say beauty is subjective. Perhaps it is given beauty cannot be measured in a lab with empirical evidence; however, we can most certainly observe there is an *objective* preference.

Conclusion

Tinder is lifeless and has become, as obvious as it may be, a slideshow for attention whores who find bathroom photos with their ass halfway on the sink counter as somehow appealing. Granted, I enjoy the looks as much as the next heterosexual male, but if one is still searching through the vast mere-to-nothingness of the sexual market place for a decent partner, these are not my first pick.

Bumble is okay and you may be more likely to just meet guy friends on the BFF sector rather than a decent woman who is currently too busy building her career as her eggs die off. OKCupid and Hinge have also been fair options, if you dare indulge in the insanity.

To wrap things up, many men accept the dating arena has changed and has been breaking down for some time; thus, they aim for game. Some men would prefer the road travelled not by whoredom but by traditionalism, or at least some form of something now long behind us, and seemingly never coming back round. At least not in my lifetime as far as the West is concerned.

I'd avoid online dating unless you're looking for a cheap thrill and a bottomless human interaction. They are a gateway to potentially furthering your despair as you scan the landscape realizing, with a hard red-pill gut-punch, that what is online is often offline as well, and that we cannot escape the stomping triple-chinned atrocities which come our way, cheeseburger in one hand, milkshake in the other, with a liberal message of hate and bombastic delusion.

Classic Country Music Is A Goldmine Of Masculine Wisdom

August 19, 2018 | by Peter Blackmire | Link | Original Link

Men looking for truth and inspiration about romance, dating, and marriage should consider examining the treasure trove of stories and testimonials that comprise the canon of classic country music.

Classic country celebrates the rugged individual American setting forth into the unknown vagaries of life. This includes the archetype of the lonesome cowboy journeying into the unforgiving frontier to discover his fortune. The hardscrabble trucker who traverses the sprawling and perilous highways of the nation – chatting up truck stop waitresses in countless towns along the way. The down on his luck gambler who only needs another shot and a change of luck to get back on the winning side of life. But few genres of music are populated with as many convincing and revealing songs about heartbreak and mistreatment by womenkind as classic country.

The songs don't always have to be serious or downtrodden in spirit. 'She Got the Goldmine (I Got the Shaft)' by Jerry Reed is a comedic testimonial to the gynocentric bias of the divorce courts.

More than just a litany of complaints, the lyrics rattle off what would be considered chauvinistic observations by today's standards, in such an offhanded way that every time I hear this song I break out in good natured laughter. For example, take the opening lines, where the singer confesses his true motivation for proposing.

Well, I guess it was back in '63
When eatin' my cookin' got the better of me,
So I asked this little girl I was goin' with to be my wife.

This line strikes me as funny for both its humble honesty and its old fashioned assumptions. Proposing marriage to a girl you're dating because you're tired of preparing your own meals seems like as good a reason as any, I guess. Of course women seldom cook for men on a regular basis now, so that throwback is a nostalgic glance into a traditional way of life.

In my current relationship, I do the majority of the shopping and cooking for my little lady, so I can only shake my head and chuckle. Unfortunately for our protagonist, the next stanza reveals the cautionary morale of the song.

Well, she said she would, so I said "I do".
But I'da said I wouldn't if I'da just knew
How sayin' "I do" was gonna screw up all of my life!

Eventually their love diminishes and Reed inevitably comes home to the locks on the front door having been changed. The chorus of the song expands on the tragicomic nature of the title.

She got the Goldmine, I got the shaft.
They split it down the middle
Then they gave her the better half.

The inequity of divorce settlements has never been summarized more succinctly or hilariously then in these few lines. Reed goes on to lament his post marital lifestlye.

Loading...
While she's livin' like a queen on alimony,
I'm workin' two shifts eatin' baloney,
Askin' myself, "Why didn't you just learn how to cook?!?!"

This song is an anthem for divorced men sleeping on futons throughout the nation,

struggling to make alimony, while their exes enjoy the fruits of the settlement. Incidentally, of the many inequalities feminists rail about I have yet to hear much about leveling the playing field in this regard.

Country has its share of cheating songs. This vast storehouse of testimonials covers the thrill and guilt of behaving badly and the fear of being found out. What is refreshing about this corner of the classic country music catalog is the abundance of songs about men catching their women in the act and the heartbreak and disillusionment that follows. The vulnerability that songs like this entail is generally missing from the contemporary landscape where men often assume the role of boasting of their conquests while women take on the mantle of victimhood and vindictiveness. Consider the lyrics to Carrie Underwood's more recent hit 'Before he Cheats'.

Took a Louisville slugger to both head lights
I slashed a hole in all four tires
Maybe next time he'll think before he cheats

Here the feminine hero is praised for bashing up a car. This act of petty vandalism is supposed to represent the height of feminine empowerment. Of course, she betrays no feelings of guilt or remorse, and there is no consequence for her actions. The guy, after all, deserved it.

Compare this to Porter Wagoner's chilling confession in 'The Cold Hard Facts of Life'.

In this dark tale, Porter returns from a business trip a day early to find his wife partying with a bunch of strangers in his home. Porter pulls a knife and dispenses with the strangers. The song ends with him rotting in a jail cell and contemplating an eternity spent burning in hell.

Lord, you should've seen their frantic faces
They screamed and cried, please put away that knife
I guess I'll go to hell or I'll rot here in this cell
But who taught who the cold hard facts of life

This is a song not about petty revenge but about life and death choices and the heavy consequences that follow. Still, lurking on the edges of this song, as with all classic country is the call for understanding, the possibility of forgiveness, and the faint hope for redemption.

Peter Blackmire is a writer who has lived and travelled throughout America. He believes that America and the freedom it respresents is the greatest culmination of the Western tradition.

How To Make A Woman Orgasm

August 20, 2018 | by David Carreras | Link | Original Link

In Napolean Hill's Think and Grow Rich, the idea is presented that sex is the main driving force behind everything we do as men. You may or may not agree with this idea, but without a doubt, sex is on the top of most of our priority lists as men. And women know this. Knowing the power of the vagina, they can try and use it as a tool to control us if we're not aware of the fact.

However, something that is of vital importance, is that when sex does arise, you can at least handle your part of the job. I'm not talking about a one-night stand with a whatever chick you won't be calling again. I'm talking about a girl that you want a relationship with, or at least a continued sexual relationship with.

Make her orgasm, and you can be confident that at least that part is covered. Give her strong enough, and consistent enough, orgasms, and she'll be coming back to you, if that's what you want (as long as you don't fuck it up too bad in other areas).

However, don't make her orgasm – or have no idea how to – and you'll be operating out of a position of weakness. Besides the lack of physical satisfaction and building up of frustration from not having orgasms (and resulting bitchiness), she may also begin to look at you like a man who can't finish the job.

This is not a problem if you're able to maintain an ultimate sense of not giving a shit. But most of us care at least to some degree if she's not getting off during sex regularly.

With estimates of as high as 75% of women not having orgasms during regular intercourse, and most requiring oral or manual stimulation to get off (and even in that case, as high as 15% saying they never get off), this is an area that many men are obviously striking out at, and where you can gain an advantage, both in the dating world and in your relationship.

Follow these basic guideline and sooner or later you'll be getting any woman you want off (unless she has some issues with her sexual anatomy), at least with a bit of practice:

1. Foreplay

Boring for some, but it will get her engine hot and make your job much easier when you do start penetrating. Foreplay isn't brain surgery. Stimulate her nipples, ass, vagina, clit, neck, ears, lips orally and manually, and try circling around them to build up arousal, teasing, before finally giving in and zeroing in on her "hot ends". She'll go nuts in no time. Keep your cool.

2. Clitoris is key

When I first started out having sex, I would bang as hard as I could for as long as I could (which wasn't very long back then), slapping ass, talking dirty, etc, like I had seen in porn. I thought that was what it was all about. Sure, this is important, but that one little button is what's really responsible for her orgasm. Some even go as far as to say the G-Spot is the internal portion of her clitoral cluster, so even g-spot orgasms come from this "control center".

3. Learn *how* to stimulate the clit

With your tongue, repeating what makes her react (don't switch up strokes like an idiot. Imagine a girl trying to do the letters of the alphabet on your dick when giving head;

you'll never get off). During intercourse, try and rub hard into the clit on the in- and out-stroke during penetration.

4. Pay attention to her erogenous zones during intercourse

Even if it takes some contortion, sucking on a nipple, fingering around her ass, or pulling on her ponytail, all the while talking dirty, are like pressing fast-forward towards her orgasm.

5. Keep in mind, all this may also press fast-forward on your own process

Holding back from busting your shot may seem difficult when all this increasing of her arousal is going on. Solo ejaculation control exercises and learning how to keep an erection after orgasm by clamping down hard with a timed PC are two physical methods you can learn to extend your performance.

Loading…
Vitamin B12 and winter savory are said to possibly have ejaculation control properties. If it's bad enough, popping a prescription paroxetine (SSRI antidepressant) on demand can help delay ejaculation, without regularly having to take meds.

This is worth learning how to at least get this down, so you can maintain the upper hand when in the bedroom.

Mastering the female orgasm

In the early days of my sex life, I was dating a Colombian Dominican goddess. She was a freaky little thing with some amazing ass and thighs, super thin waist; dark curly hair and eyes. I was in love and so was she. We had that fresh, young, overpowering kind of love. Physically, she was like my drug, and she wanted to get me off all the time, and did some over and beyond things like jerking me off in restaurants out of the blue, giving head while driving, etc.

But besides that, we got along amazingly. We had a matching sense of humor and sarcasm, and a similar way of looking at life. But there was just one issue: I couldn't make her orgasm.

Like mentioned, I thought I just had to "bang" her a little harder, for longer, talk dirtier. I paid zero attention to her clit, barely knowing what it was there for. Each time after sex, no matter how hard I tried, I'd ask her if she orgasmed, and while she'd try and comfort me, it would always lead to the truth. "No."

My stress of not being able to make her orgasm made me stranger, more nervous, needier. I became obsessed with wanting to get her off during sex. This took away everything that made me attractive to her. I overcompensated with my "personality" and activities with her, making me seem so "forced". Our relationship soon become something strained, before falling apart altogether.

Years later she called me out of the blue. After some small talk, the conversation turned to what went had gone wrong with us. Without much hesitation, she said everything was good about our relationship, but the sex is what caused the split.

Her enjoyment with sex is important

Immediately after she had left me, I was in a depressed, yet anxiously obsessed state where I had to learn as much as I could about the female orgasm in order to not let this BS happen again. I learned, and learned and learned, but still, deep down something in me said it wouldn't work.

After some time I was able to get back on my feet, and through the right mix of events, the next major one came along. Colombian Cuban mix. Bigger ass, bigger tits, thin waist as well, not as pretty. But fuck it. When it came to the sex, it felt like I was walking into game 7 of the finals. So much was riding on this.

I put my techniques to work, warmed her up, paid attention to the clit, rubbed hard on the in- and out-stroke, and low and behold, her pussy tightened up, legs wrapped around me tightly, and she began vibrating and breathing quickly and shallowly through the nose, and then release. I still had some stamina in me, kept going, and was able to repeat the process.

I got her off twice. One of the greatest barriers in my life ever, one of the biggest lies I had been telling myself, broken. Surpassed. Six months in I felt like I was rightfully the most eligible bachelor in Miami and wanted to roam guilt-free, so dumped her, but at least it was me in control.

Since then, I've had many women come in and out of my bed, and since following these same rules, I've been consistently getting them off.

I've had women fake pregnancies and send in order to keep me in the picture (crazy), women go from seeing me just as a friend, to becoming obsessive/possessive once they gave me a shot in bed, women wanting to get married. The opposite of the "fleeing effect" not giving a woman an orgasm had.

Learn how to make a woman orgasm, and practice, and you'll at least have that corner of

your life taken care off. Then you can concentrate on improving in all the other areas.

4 Reasons America Needs An Elected Monarchy

August 20, 2018 | by Jared Trueheart | Link | Original Link

At one point while serving in the military I was pursuing a master's degree in international relations. The first course I took for that was about the history of international relations. In that course, we learned a great deal about the formation and subsequent prominence of the nation-state and the evolution from feudalism to democracy. The professor asked us, "Is democracy the end of that evolution? Should it be? Is that what is best for the citizens of the nation-state?"

It was a rhetorical question. We discussed it, and a surprising amount of people did not think democracy was so great. But if not democracy, then what? The answer is a democratic monarchy. Here's why…

1. Accept That We Will Always Have A Government

I'll never claim to be in the top tier of intelligent people, but I am smart enough to know when smart people say dumb things. Libertarians take the cake for smart people who say dumb things. For them, the government is the root cause of everything wrong with society. If only the government were abolished and got out of the way people could solve all of their problems. But first libertarians need everyone to adhere to the non-aggression principle because they're such proud nerds that they can't admit they need the government to protect them from stronger men.

Yet the libertarians from their high horses have never been able to address why we have governments at all. People chose governments. We saw a benefit to having a government and stuck with it. Man in his primitive state did not form governing bodies until it was pertinent to do so, probably because of population growth and resource limitations. Government organizations could have been abolished in those early stages as counter-productive, but they weren't. As populations continue to grow and resources become depleted in greater amounts, government organizations become more valuable, not less.

Once you accept that a governing body is necessary you can begin to address the problem of fixing our current corrupt and inefficient system.

2. Monarchy = Simplicity

Democratic republics have never been and never will be simple. They weren't simple in 1776 when universal surveillance, internet censorship, and ocean pollution were non-existent and it has only gotten more and more complex since then.

One of the principles of logistics is simplicity. In order to accomplish any task, added complexity allows for more points of failure. In government, added complexity allows more opportunities for corruption. Forget the philosophical questions behind internet censorship for a moment (though they are relevant) and just ask, has YouTube broken any laws by removing the Infowars channel? At this point, it doesn't look like they did, but it would take a team of experienced lawyers and judges to answer that conclusively.

With a monarchy, the state moves back to simplicity. The monarch declares whether or not YouTube was justified. If the monarch finds corruption in the FBI, he has the guilty parties imprisoned or beheaded, or (if he wants to go more medieval) quartered. Is there any doubt, given all of the baseless investigations about Russia collusions that leaders in the FBI are corrupt or at the very least incompetent? If the monarch says off with their heads and decrees that the FBI accomplish its jobs, the jobs will finally get done correctly.

3. Decrees Get The Job Done

The best part of a monarchy would be the decrees. If the monarch decrees taxes be cut, they get cut. If he decrees they be raised, they get raised. No need for months of back and forth on the Senate floor. No more filibusters. No more do-nothing politicians

spouting empty words. The monarchs words are law. His will be done. If it works, great. If not, there's nothing to blame except the decree.

Loading…

The worst part of our current government is how much we pay for it to do surprisingly little for us. That's because it's too complex. There are too many points for failure. When the monarch decrees something you will feel its effects.

4. Bad Monarchs Get Pushed Out

What's to keep the monarch from corruption? That's easy—we'll elect him, every three years. If he's incompetent or evil or whatever, we'll elect the next guy. What allowed monarchs in the past tyrannical control was their ability to use the military to suppress their own people. The American military would never obey an order to harm its own people. The monarch would be entirely at the whim of the citizens (no illegals would be allowed to vote).

Everyone remembers monarchs as tyrannical. That's just because they're interesting. Here are some incredible monarchs:

Emperor Meiji of Japan (1867-1912)

Emperor Meiji (a posthumous name) took Japan from the middle ages into the modern world. When he took power Japan was feudal, not so different than European middle ages. The emperor saw the writing on the wall. He made the hard call to reform Japan to industrialize. As a result, Japan had an industrial revolution and became one of the most powerful nations in the world.

Augustus of Rome (27 BC-14AD)

Most people think of monarchs as power-hungry warlords but Augustus of Rome initiated the Pax Romana, a period of two centuries of peace. He also had roads, police forces, fire-fighting forces, and a courier system developed. One man with the authority to do great things can do many.

Louis XIV of France (1638-1715)

Commonly referred to as the Sun King, Louis XIV made France the most powerful nation-state in Europe. He ended feudalism in France and consolidated power for the monarch. As a result, he was able to make France stronger both militarily and commercially.

Conclusion

The fundamental problem with our current government is bureaucracy. Nothing gets done because of it. It's so complex that we can't hold anyone or any system accountable when things don't get done. We just keep pouring our tax dollars into that system. But the answer isn't to get rid of government altogether, it's to choose a government that eliminates the bureaucracy and complexity. An elected monarchy accomplishes that. Therefore, I reluctantly nominate myself for the role of monarch.

“My Way” Is The Most Masculine Song Ever Created

August 20, 2018 | by Roosh Valizadeh | Link | Original Link

Over the past couple of years, I’ve been increasingly listening to oldies music. While the messages can be often cheesy and beta, I prefer yesterday’s innocence and naivety compared to today’s degeneracy and mumble rap.

There are many songs that were popular in their day that I’m only now discovering. One of those songs is My Way, originally recorded by Frank Sinatra, though better performed by Elvis Presley. Let’s take a look at the lyrics.

And now, the end is near
And so I face the final curtain
My friend, I’ll say it clear
I’ll state my case, of which I’m certain
I’ve lived a life that’s full
I traveled each and every highway
And more, much more than this, I did it my way

He sees that it’s his turn to die and accepts it. He doesn’t look for miracle cures or beg God for more time. Instead, he does an accounting of the life he’s lived, and because it was rich and fill, the end is far easier to accept than if he had lived with the expectation that he could delay the inevitable.

Regrets, I’ve had a few
But then again, too few to mention
I did what I had to do and saw it through without exemption
I planned each charted course, each careful step along the byway
And more, much more than this, I did it my way

Sure, he made mistakes and lost out on opportunities. He said things he shouldn't have said and hurt people he shouldn't have hurt, but he did these things based on how he wanted to live his life. He doesn't allow regrets to hang over him or make him feel guilty for who he is.

Loading…

Yes, there were times, I'm sure you knew
When I bit off more than I could chew
But through it all, when there was doubt
I ate it up and spit it out
I faced it all and I stood tall and did it my way

His ego repeatedly got the best of him and he was often checked by powerful forces, but he humbly took his lashes and carried on. He wasn't ashamed of the mistakes he made because he believed he was acting righteously at the time. Perfection was never his goal.

I've loved, I've laughed and cried
I've had my fill, my share of losing
And now, as tears subside, I find it all so amusing
To think I did all that
And may I say, not in a shy way
Oh, no, oh, no, not me, I did it my way

His life wasn't always easy. There was pain and setbacks, but also pleasure and love. What's left but to see it all for what is was: a big game of laughter and tears. He moved through life with confidence, and for him, that's what really matters.

For what is a man, what has he got?
If not himself, then he has naught
To say the things he truly feels and not the words of one who kneels
The record shows I took the blows and did it my way

If a man is not living as a man, why he is living? If he does not act or live in the moment, who is he existing for? If a man can't take a punch and get right back up, until he no longer can, how can he call himself a man?

I will instruct my next of kin to play this song at my funeral. I want people to be reminded that I lived life in the way I saw fit, and endured what was thrown my way. By doing so, I hope that my end will be a bit easier to bear compared to a life that was full of regret and things left unsaid.

The above article was first published on Roosh V.

4 Male Artists That Inspire Masculine Virtues

August 21, 2018 | by Jared Trueheart | Link | Original Link

There is a philosophical question that I've argued with others in my personal life on more than one occasion. Can art be masculine? I say it can, others say art is neither masculine nor feminine, it just *is*.

My argument is simple. Many of the same words that we use to describe alpha males or the most masculine men can also be said about many pieces of art. Art, like men, can be powerful, insightful, supremely skillful, and inspirational. I would add that masculine art depicts a subject matter men find especially appealing: war, adventure, sexy women, heroism, etc.

Art in the 20th and 21st centuries has gotten a bad rap. Thanks to modern art, which most people agree isn't powerful, isn't inspirational and does not take much skill to execute men have largely been turned off of art. Modern art is meant to be provocative, not artistic. That's why the best example of modern art is that "Piss Christ." It's a Catholic crucifix in a clear vat of pee, not worth showing.

Great, masculine art is still out there and better than ever in the last 50 years. When you see these artist's paintings you get inspired to bravery, or to be strong, or to bang hot women. Masculine art is inspiration worth having in your home in a place of prominence. Here are four artists who demonstrate that masculine art is worth owning.

Frank Frazetta

The best-known artist among men is Frank Frazetta and for good reason. His art is everything we think masculine art should be. The men are strong. The women are sexy damsels in distress. The villains are superhuman. Much of his art represents a scene of action. When he paints a battle you can feel the fury of that battle play out in your mind.

Moon Rider by Frank Frazetta

Death Dealer II (Prisoner of the Horned Helmet) by Frazetta

Conan The Barbarian by Frazetta

Boris Vallejo

Frank Frazetta and Boris Vallejo are often compared to each other for several reasons. Their styles are similar as is their subject matter. When they paint women they paint

them naked, with big luscious breasts and firm, round butts. When they paint men the men are ripped and usually in battle.

The two are also comparable because they were commisioned to paint book covers. Many of both artists most famous pieces come from book covers, either for a Conan book or one of the many Edgar Rice Burroughs books. A Frazetta book cover for a Burroughs book recently sold at auction for nearly $2 million.

Boris Vallejo paints much more women than Frazetta did. His style is also a little sharper and more vibrant.

People of the Black Circle (a Conan story) art by Boris Vallejo

Vampire’s Kiss by Vallejo

At Dawn They Came by Vallejo

Ivan Aivazovsky

Ivan is considered one of the best artists to paint seascapes and especially one of the best to paint naval battles. He comes from the Russian Romantic period and died in the year 1900 at 82 years old. Most artists before the 20th century who painted war well painted much more feminine pieces as well; portraits of women and scenes from dull,

daily life for example. Ivan was one of the few who painted war more consistently. When he didn't paint naval battles he usually painted seascapes.

Loading...
[image]
Battle of Cesme at Night

Sea Battle at Navarino

Storm Over The Black Sea

Joe Jusko

I met Joe once. He was a very cool guy. He's a modern artist who paints very much in the Frazetta style. Jusko represents a sad fact about men and art—there is very little demand

for masculine art outside of comic book covers and adventure book covers. Jusko is best known for his Conan paintings as well, indicating that masculine art requires masculine characters for inspiration. Perhaps the reason there is so little masculine art today is that there are so few masculine characters worth painting.

It's also a reminder of the lack of men's fiction being produced today. Young men, boys really, would rather play video games and have Marvel movie marathons than read a good book. Jusko has gotten most of his commissions from Marvel Comics, but a glance at his other art shows the deep masculine nature of his style.

Hellriders by Jusko

Berserker by Joe Jusko

Conan’s Throne Room by Jusko

These paintings took extreme skill and care and vision to create. They inspire the men who view them. Personally, I have ten Frazetta prints framed and hung on the wall over my desk. When I write or study and need that boost of motivation I look up and see Death Dealer raining fury on his enemies. It’s hard not to work at that point.

The great tragedy is that today, masculine art is mostly commisioned for the least masculine products like comic books and video games. If the masculine revolution ever comes, perhaps that will change.

The Pussification Of Western Society And How To Overcome It

August 21, 2018 | by Mo Saleem | Link | Original Link

The average man today has slouched shoulders, an expanding waistline, is indecisive, and presents an overall timid nature. He exemplifies the pussification of western society. But what's causing this? Why is it that men today are less manly than they used to be? Is it because of the rise of feminism? Porn addiction? Processed foods? Environmental toxins? I'd say yes – all of these are contributing factors. But the real reason for this decline in masculinity is something very different. And once we address this root cause, all the other factors become irrelevant.

But before diving in, let's discuss what it means to be a man in the first place…

What Does It Mean To Be a Man?

This is a question that will get many different answers depending on who you ask. But if you asked it of the philosopher king Marcus Aurelius (or any of the ancient Stoics for that matter), he would tell you that to be a man means to live with virtue. In fact, the root word of virtue is “virtus,” which is Latin for manliness. The four cardinal virtues that the Stoics abided by were 1) Wisdom, 2) Justice, 3) Fortitude, and 4) Temperance.

Wisdom is knowledge of life and the ultimate Stoic wisdom is to concern yourself only with factors that are within your control. What are those factors? Your thoughts and your behaviors. Nothing else. Never play the victim. If you have a problem, ask yourself if there’s anything you can do about it. Yes? Then get to work. No? Then don’t worry.

Justice is living in integrity with your ideals. When we live with integrity, there is a match between our intentions and our actions. When we live without integrity, we procrastinate on the actions that would move us towards our goals.

Fortitude is courage. The courage to make decisions based on standards rather than emotions. The courage to do what needs to be done regardless of whether you feel like it or not.

Temperance is self-mastery. A master of self is engaged in the consistent pursuit of narrowing the gap between where he is and where he knows he’s capable of being. He understands that there is no finish line and that progress is the only way forward.

That’s a quick look at the four cardinal virtues that embody what it means to be a man. If you want me to dive deeper into them in another article, let me know in the comments. But now, let’s dive in to the root cause of the masculinity crisis as we face it today.

The Real Reason Men Are Less Manly Than They Used to Be

The first men walked the earth more than 5 million years ago. Through the trials and tribulations of harsh environments and dangerous predators, nature slowly molded us into what we are today. Man has taken control of his environment, tamed the wilderness, sailed the oceans, conquered nations, and even walked the moon.

Loading…

You and I are the fine-tuned result of countless iterations of evolution. You were designed to be strong, fearless, confident, and powerful. The drive for greatness has been hard-coded into your DNA. Why, then, do none of these characteristics seem apparent in the average guy? Well, it's because we are born in a modern world with a mind and body that was designed for something very different.

Genetically, we haven't changed much over the past 100,000 years. Technologically, however, we have advanced exponentially. We are born in a world of instant gratification, social media, and Domino's delivery with a brain that was designed for hunting wooly mammoths and fighting saber toothed tigers.

The real reason men are less manly than they used to be is because we are no longer being forced to exercise our masculinity. The human brain is a very efficient machine that was designed to conserve resources. That is another way of saying that we are lazy by nature. Since the environment is no longer forcing us to man up, the majority of men succumb to the temptation of the path of least resistance.

Our primal drives are survival and reproduction. No matter where a man falls in the strata of western society, he is likely to scrounge enough food and water to survive. As for reproduction, most men are chronic masturbaters and trick their brains into thinking that they're reproducing. With the primal desires met, it is very easy to fall back into comfort. To become a masculine man, however, you have to exert the evolutionary pressure on yourself. You have to force yourself to grow.

How to Reclaim Your Masculinity

Yes society is becoming more feminized and there are a lot of forces trying to suppress your masculinity. But if you let these factors hold you back, then you are nothing but a pussified bluepill beta cuck. To reclaim your masculinity you have to exercise your masculinity. If you don't use it, you lose it. How do you exercise your masculinity?

Well, the first step is to get clear on your path and purpose. Your thoughts and behaviors are the only things you have control over, so always make sure that they are directed to some end. Know the intended outcome of your actions. Begin with the end in mind.

The second step is to live with integrity. Stick to your commitments. Keep a task list everyday and complete it. Do what you said you were going to do. Keep your word to yourself.

The third step is to build courage. Take cold showers. Cold approach women. Practice martial arts. Get comfortable being uncomfortable.

And finally, understand that mastery is a never ending process. Life is about climbing one mountain peak after another. Each mountain you conquer reveals the view to a completely new landscape. There is always another level. And at every new level there is a different devil. If you're not growing, you're dying.

God speed.

Are Leftist Radicals Literally Mutants And Mattoid Freaks?

August 21, 2018 | by Beau Albrecht | Link | Original Link

Have you ever thought of today's leftists as a modern-day freak show? If so, perhaps you're onto something.

Degeneration theory

During the mid-1800s, concern about degeneration began. Many feared an *Idiocracy* scenario. Others believed Western civilization might become threatened. Some focused on degenerate individuals. Bénédict Morel speculated that degenerates eventually would become too dysfunctional to procreate. Others were much less optimistic, apparently a well-founded concern. During the mid-1900s, these concepts became taboo.

Cesare Lombroso was a criminologist who noted that offenders tend to have certain primitive characteristics. So this was the beginning of profiling, likewise the "funny looking criminal" stereotype. Of course, having a brutish appearance doesn't make someone guilty. Rather, the idea is that nonstandard anatomy can coincide with abnormal psychology that encourages antisocial tendencies.

It's easy to read too much into the concept. Perfectly normal people fuck up sometimes. Likewise, an ugly guy can be righteous and outstanding. Consider all this a matter of statistical correlation, not absolute causation.

Anthropological criminology created mugshots. Featured, Communist Party USA leader Gus Hall. Looks like trouble?

Max Nordau developed this further, though focusing more on mental characteristics. He was a highly influential old-school Zionist. Despite what cynics might say, he was on the right track about some things. For starters, he figured that his fellow Jews needed more sunshine, fresh air, and especially exercise. He helped popularize fitness, disliking the (((wimpy intellectual))) stereotype. Indeed, working out is good for everyone.

Also, Nordau didn't appreciate degenerate art, which *actually wasn't too bad* when he wrote *Degeneration*. This book contained a psychological profile of degenerates. He called out some contemporary cultural figures and intellectuals. Again, they were small potatoes compared to today's celebrity horribles, or postmodernist sickos like Lacan, Foucault, and Derrida. *Apparently things have deteriorated.*

Degenerates need proper guidance and to be kept on a short leash. Like everybody, they're responsible for their actions and have moral agency to choose between right and wrong. Bad outcomes aren't inevitable; normal social standards usually restrain deviant tendencies. However, if unbridled degenerates become cultural trendsetters, then degeneracy becomes fashionable. If they become politicians or society's upper crust, then they start writing the rules to suit themselves. These things accelerate societal decay.

Mattoids and their origin

Lombroso speculated that mattoids are throwbacks with primitive characteristics.

Lombroso's term "mattoid" basically means half-crazy, describing characters who look like trouble and are prone to criminality. Nordau focused more on misfits and degenerate intellectuals. (Indeed, antisocial behavior is the *real* problem.) Consider it a category beyond eccentricity.

Do physical and mental oddities coincide? Sometimes they do. Syndromes that cause retardation often have a distinctive look. Lesser abnormalities might also produce certain peculiarities of behavior, appearance, or both. Mutations and chromosomal abnormalities lead to hereditary diseases. Random changes to DNA occasionally advance evolution forward, though usually this causes a biological BSOD.

Was Andrea Dworkin bitten by a radioactive hippopotamus?

The following factors might put populations at elevated risk:

- Past genetic bottleneck or small number of founders
- Dysgenic mate selection
- Present-day inbreeding

In these groups, maladaptive recessive mutations can accumulate, leading to above-average incidence and varieties of hereditary disorders, some affecting the mind. The deranged hillbilly stereotype is a little overdone, but it can happen. This also accounts for some screwballs among hereditary nobility, likewise ill health.

Fetal development problems (such as exposure to toxins or lack of specific nutrients) are another possible factor. However, entirely psychogenic conditions can cause degeneracy. Often this results from dysfunctional childhoods. Again, antisocial behavior is the major concern. *Looking weird might be a tip-off, but not always.*

Mattoids in society

WHY IS THIS PERMITTED?

I've noticed that gays tend to have an above-average incidence of nonstandard anatomy. There's no clear consensus on "queer theory" yet. Some do get turned out by early experiences. However, maybe some others really were born that way.

Loading...

Also, back when I was dating strippers, one brought me to a Narcotics Anonymous meeting. Half the White attendees looked rather strange. Could some inborn disinhibition or lack of impulse control make mattoids more inclined to get hooked on dope, part of the criminal tendencies Lombroso discussed? However, the Blacks looked normal. Likely the inner city drug problem unfortunately is worse, ensnaring more average people. At least these recovering addicts realized their mistake and were trying to get better.

Actually, some degenerates are very talented. Nordau explained this essentially as an *idiot savant* effect. They might even become brilliant, *if their skills are channeled in the right direction*. If not, things like degenerate art and screwy philosophy will result.

Hollyweird even has a few with striking features (unusual appearance doesn't *always* look bad), odd personal histories, and peculiar parenting styles.

Some high-functioning mattoids even flourish in universities, lately an asylum for kooky professors and grad students in unproductive soft studies departments. It's particularly troublesome when they've been educated beyond their ability to understand, but overestimate their intellect. Many degenerate trends and ideologies have thrived and even originated in academia.

Mattoid radicals

In formal rhetoric, ideas should be evaluated on their own terms, independent of whoever articulated them. However, personal perspectives can shape viewpoints, also a hot topic in literary analysis. Leftists often bring personal stuff into political discussions—"You only believe that because you're a straight White male" and all that. So, turnabout is fair play.

There are oddballs in any "fringe" pursuit, including unconventional politics. Rightists should screen out anyone with signs of instability, shady personal backgrounds, incorrect motives, hobbyism, etc. These troublemakers aren't *really* in it for the ideology, so they often betray their friends. Also, they create drama and controversy. Fortunately, degenerates are usually disinterested in efforts to sustain or reinvigorate society.

Leftist causes are naturally a better fit for mattoids. Leftists are special and don't have to worry about their public image, which their media cronies always airbrush. As Nordau indicated, degenerates are naturally malcontented. Thus, their sympathies don't align with normal society. They're more likely to identify (at least for rhetorical purposes) with others they consider downtrodden. That's why screwy SJWs find cultural Marxism's privilege rhetoric, radical egalitarianism, and Victim Olympics so appealing.

It’s not difficult to guess their ideology.

For leftists, fanatics and mental cases make for great useful idiots, agitators, and bomb-chuckers. However, they even can rise to the top. Kerry Bolton provided some interesting new perspectives. He identified several textbook degenerates like Marquis de Sade, Jean-Paul Marat, Karl Marx, and Leon Trotsky. I’ll add that St. Che fits that profile too.

He also had some interesting observations about Comrade Lenin. Soviets eager to pronounce him a hereditary genius commissioned an independent physician to study his brain. Embarrassingly, it turned out that the USSR’s founder was rather “special”. If that wasn’t bad enough, he suffered from late-stage neurosyphilis.

Bolton also mentions Theodor Adorno’s “F-scale”, which this Frankfurt School figure presented as a scientific psychometric test. It’s essentially like an online quiz about “How Fascist are you?” It presented rightist values as abnormal, and leftist values as healthy. (Ain’t that cute?) Actually, that’s the overall theme of *The Authoritarian Personality*, which speaks volumes about Adorno himself.

Today, most leftists actually *started out as decent, normal people*. Then toxic influences turned them freakish and made them hate their own society. Most opinion-forming institutions (particularly the media and the educational system) were converged long ago. They aggressively indoctrinate the public, and their increasing degree of degeneracy is infecting society with these mind-viruses. *That's why freaks shouldn't be allowed in positions of authority and influence.*

The Real Reason Women Get Abortions

August 22, 2018 | by Donovan Sharpe | Link | Original Link

This isn't political or religious, but there are red pill implications around every corner when it comes to abortion. This is a fundamental right to human decency.

I'm not anti-abortion for religious reasons (I'm in a bit of a transitional phase regarding my own religious views these days). I'm not anti-abortion because of my political views (I'm certainly not Democrat but that doesn't automatically make me a Republican either). I'm anti-abortion because abortion is wrong. I'm going to talk about why it's wrong, and the real reason women get them.

Let's get one thing straight here: abortion is literally killing people before they're born. We can give it all kinds of fancy medical terms like and terms like "early pregnancy termination", "forced miscarriage", and things like that, but at the end of the day, abortion is killing people before they are born. Period.

Something people seldom realize…

Anytime there's a polarizing political or religious issue, the two sides become very angry with each other. We've seen it on the news, on social media, and on YouTube videos. The thing is, most of these people don't feel as much passion for their side of the cause as they do anger for the opposition. And at some point it becomes more about pissing the other side off and hating those who oppose them than the actual cause itself.

It's almost as though if there were no opposition, there's no cause.

People who are pro-choice (which is pro-abortion without actually having to say that they are) are generally very angry because of people who are pro-life and vice versa. Bombing abortion clinics is an idiotic thing to do but they justify their anger with their position. Encouraging young women to sleep around for the sole purpose of getting an abortion then posting it to social media is equally foolhardy and is only done to incite anger and hostility with the other side.

At some point it becomes more about the opposition than the actual cause

People can say whatever they want, there's no way pro-choice advocates are this passionate about killing babies before they take their first breaths. In an honest moment, if posed the literal question "Are you really this gung ho about inserting sheers into a vagina and cutting up a fetus?" they'd tell you they were not.

But their anger simply comes as an overcorrection to pro-life advocates and that's all there is to it.

The excuses they use to justify abortions

Let's keep it 100 here… there are so many bad excuses I don't even know where to start, but I'll point out a few of the most ubiquitous:

"I don't want to bring an child into this cruel world!"

Bullshit. You don't give a damn about anybody but yourself and now we're supposed to believe that all of a sudden you care about your unborn child? So much so that you're willing to kill it to keep it away from the perils of life? Get the fuck outta here with that noise.

Have the kid, put it up for adoption. There are plenty of barren couples who would love to adopt an infant and raise it as their own, *and you know this.*

"I'm not ready to be a parent!"

Nobody is, sweetheart. But you shoulda thought of that before you let him raw dog you and beg him to shoot his load in you because it was "soooo hawt!" Thankfully for you, as

stated above, there's the adoption option if you want to circumvent the consequences of your slutty actions… again.

There are also thousands of firehouses, police stations, and other organizations that will take a newborn off your hands no questions asked. But that would be too easy wouldn't it?

No excuses not to take advantage of this easy, free option

"Well I don't want it to be in foster care! I've heard stories!"

So raise it yourself. Oh, you don't want to? Right…. that "cruel world" excuse again.

"My body my choice!"

Ahhh, so now that you want an abortion, daddy doesn't get a say but if you have the kid NOW you want his financial support. NOW you want him involved. Making selfish decisions is always unilateral. Making selfless decisions has to involve the father, especially if there's a financial windfall.

You don't have the kid without his sperm. Your baby's body does not belong to you. Making a decision to end his or her life is not your decision.

"What if the mother's health is at risk?!?"

It ain't 1820 people, it's 2018. Women don't die during childbirth anymore. With all the advances in made science and medicine the last half century, mother and child would both be just fine. Try again.

“What if she was raped?!”

Regret sex isn’t rape. Getting raw dogged in a bathroom club isn’t rape. Having consensual sex under the influence of alcohol isn’t rape. Getting knocked up by your boss isn’t rape.

Even if a woman was forced to have unprotected sex against her will, why would she punish the kid? It didn’t ask to be conceived. Again, give it up for adoption if you can’t stomach looking at it as a reminder of your assailant (and make sure you call the cops).

Loading…
All of these weak “reasons” are just excuses not to carry a child to term. So let’s stop beating around the bush and say out loud what people are afraid to say when it comes to why women get abortions…

Women get abortions because they don’t want to ruin their bodies

Childbirth is hard on a woman’s body

That’s right I said it. Women get abortions because they don’t want to ruin their bodies. And any pregnant woman thinking about abortion would tell you the same thing if she’s being honest.

Having a kid destroys a woman’s body. They get stretch marks (if they don’t do what’s necessary to avoid them and most don’t), their tits sag, their vaginas get looser, the list goes on and on. If a girl’s body isn’t as tight and supple as it was pre pregnancy this means she’s going to get a lot less of what women covet the most.

Male attention.

Girls can say whatever they want but they don’t want the the c-section scars, the weight

gain, the postpartum depression, and everything else that comes with passing a kid through their money makers. Then in order to get their bodies to some semblance of what it used to be, they've gotta do kegels, live in the gym, slather on cocoa butter, watch their diets, all while raising a miniature person who doesn't speak English, cries every hour, shits every two hours, and requires 'round the clock monitoring. A tall task indeed.

"Oh c'mon Donovan! You don't know what's in people's minds! You don't know this is the reason women get abortions!"

Oh? Well consider this: 99.9% of women who get abortions don't have children. This means that most women who terminate their pregnancies have never carried a pregnancy to term. Do I need statistics to back that up? No.

The only exceptions are wives who get knocked up by their paramours and don't wanna blow up the sweet deal that is married life as a woman in this day and age. And most of those women end up having the kid anyway and let the husband think it's his (unless of course, she gets fertilized by a brotha, but that's for another post).

But women who get abortions aren't women who have had children. Most women who make this choice have never carried a pregnancy to term because they simply do not want to ruin their bodies. A woman with children has already ruined her body, so what's another kid?

Girls don't want their young, tight, nubile bodies to go through the arduous task of having a kid so they take the easy way out and blame it on the aforementioned "reasons" to justify their bad decision to do so.

I will never understand…

Why do people seem to care more about animals than people? Sure, familiarity breeds contempt but that doesn't rise to the level of losing our minds when we find out Michael Vick had a dog fighting ring but yawning when Dante Stallworth drives drunk and kills a pedestrian. These liberal fucktards think it's cool and chic to "prefer animals to people."

Micheal Vick caught more heat for this than Stallworth caught for killing a PERSON

If we found out there was a veterinarian aborting puppies and kittens we'd lose our fucking minds. But human babies? Oh we're good with that.

Conclusion

Regardless of religion or politics, there's no way you can tell me that killing people before they are born is the right thing to do in any situation. 99.9% of the time abortions are performed for selfish reasons.

And don't start with the outlier situations. Don't come at me with "Well I know a girl who would have died had she had the kid" or "I knew a girl who couldn't find the right family to adopt her kid so she said fuck it!" Miss me with that bullshit.

My own mother had at least 2 abortions after she had 5 kids as a result of an affair she was having, so there's your outlier. My sisters on the other hand have had multiple abortions. One has 3 children, but the first time she was pregnant, she had an abortion. My other sister doesn't have any kids and has also had multiple abortions. It is disingenuous and irresponsible to refute a macro argument with a micro argument.

The bottom line is that women get abortions to keep themselves fuckable, so they get more chances to have unprotected sex which leads to… wait for it… **more abortions.** Its' fucking sad but that's how it is.

Killing people before they're born because women can't be bothered to carry a pregnancy—that she was complicit in—to term so she can go out and party and do drugs, and drink, and continue to have unprotected sex so she can do it all over again is wrong. And that's all there is to it.

Feminism Is Making It Harder For Feminine Women To Find A Masculine Man

August 22, 2018 | by Layla Jax | Link | Original Link

I truly believe that society today is not a good place for masculine men. The #MeToo movement (the outrageous 'feminism' *excuse* that's used to normalise pretty much everything that is wrong with society and women today), and the lunacy of all this 'gender confusion' nonsense makes me almost glad I myself am not male.

Having been an avid fan of this site for some time, I am yet to find anything that I am not in agreement with. And now I find myself writing my first article.

Let me give you some background in to myself: yes I am a women and yes I admit I can be a little crazy at times, but that's part of the difference between our genetics and it's sad that the fundamental differences between men and women are no longer celebrated like they should be. I have never been the type to ride the cock carousel like there's no tomorrow. I enjoy commitment, I can hold down an intelligent conversation, and I look after my appearance.

I appreciate nothing more than a masculine man, the confidence they exude, and their ability to filter through the bullshit most women surround themselves. He makes me weak at the knees. I want nothing more than to attract a high value masculine man, and commit my life and soul to him. I believe if I was to ever hit the jackpot and attract this type of male, I would be in my element—I would be the best and most feminine version of myself I could be.

5 things high value women want from a man

1. I want to prioritise the man above myself. His wish will be my command.

2. I want to fully commit my life to him. I would give myself to him sexually, physically and emotionally.

3. I want marriage, though not a big fancy wedding where it's all a facade for social media. I want your last name to show you own me, to feel like I am truly yours. I am aware divorce is such a strong point to masculine men, concerned about the splitting of assets and finances if it goes wrong. But I don't believe in divorce; I believe in hard work and commitment, and I would more than willingly sign a prenuptial agreement. In fact, I

would encourage it.

Loading…

4. I love housework, cooking, cleaning, admin, and organising. I want to benefit a man's life by doing this for him. He works hard and provides, and deserves to put his feet up.

5. I want to bring ONE man's children in to the world and bring them up as they should be, with a father present, and a mother at home to support them.

So why am I yet to find that man I want more than anything? My belief is men nowadays, even masculine true red pill taker style men, that are looking for a high value female are being blinded by the sheer volume of low value women. They are drowned in this sea of feminist culture that they are struggling to know when they've met a high value woman.

I don't blame them—there are too many women today trying to cuckold men, lie and fake it, ride the cock carousel like there's a world shortage of dick out there, and generally make minimal effort to even attempt to be of any value to a real man. It's a sorry to state of affairs, and I completely blame it on the female of the species, as usual they've ended up causing more harm than good.

Conclusion

High value women need masculine men to come and save the genuine high value women out there. With such a lack of masculine men on the scene, the sad matter of fact that attracting cucky, blue pill, feminine men is just too easy. Genuine feminine women like myself need more than that, and we will not lower our expectations. We have more self respect and dignity then to lower our value and stoop to the lows of join the brigade of slutty women barely dressed in bars waiting open mouth for some guy to come and buy her a drink and sweep her off her feet without taking the effort to prove her value.

Please ROK readers, don't give those women that are exceptions to the rule no option but to date low value, cucky, blue pill men. Don't let feminism and today's completely unappealing state of affairs make you give up looking for a high value woman. There are a few of us still out there!

Girl Tricks Hundreds Of Men To Show Up For Tinder Date At The Same Time

August 22, 2018 | by News Syndicator | Link | Original Link

Via NY Post:

Dozens of dudes showed up to Union Square for Tinder dates on Sunday — only to learn they were all there to meet the same woman, and she wanted them to battle it out "Hunger Games"-style for her heart.

One Twitter user recounting his version of events says he met a woman named Natasha through the hookup app and she invited him to meet her at the public space to watch her friend DJ — but he arrived to a totally surreal scene.

"I make my way to Union Square. Eat a hot dog and look over by this open lot by 17th Ave and there is a stage and a DJ and about 100 ppl and cameras and sh-t and I think well this is some random ass Manhattan sh-t," wrote @bvdhai.

> THE THIRSTY GAMES. pic.twitter.com/vK4AvJhGMk
> — Chem Golden (@DJChemGolden) August 20, 2018

"Eventually I see a girl moving towards backstage with two enormous bodyguards in sunglasses and realise it's her and I'm thinking WHAT THINE F–KETH IS GOING ON," he continued.

Natasha then took to the mic and told the assembled men that she knows they all came from Tinder.

Loading...
“Then she says I’ve invited you all here for a chance to go on a date with me and proceeds to give a hunger games speech about what its gonna take to date her,” @bvdhai recalled.

“Every man in the crowd looks down and mimes WHAT IN THE NAME OF SCOOBY DOO THE IS THIS S-IT to themself.”

At that point, he says, he left — but others who stayed told Gothamist that Natasha began discarding men and making the rest compete to go on a date with her.

“The gist of it was she wanted to do Live Tinder. Folks were pretty mad,” a guy named Nicholas told the website.

“And she started calling the different characteristics she doesn’t like. ‘If you’re Puerto Rican and support Trump, leave!’ ‘If you have a long beard, leave.’ Then she did a competition.”

“The majority of the group, like 95 percent, were like aaahhh, watching as the f–king idiots fell in line to her demands to do pushups and run … She did a live swipe line, right and left. I left at that point,” he continued.

Video of the spectacle shows at least 10 guys participating in a sprinting competition.

It’s unclear who, if anyone, won the coveted date.

3 Myths Believed By Men Who Haven't Correctly Applied Manosphere Teachings

August 23, 2018 | by Jon VonStroke | Link | Original Link

They say the truth can be a hard pill to swallow; the red pill being a markedly unpleasant one for most. Since the inception of the manosphere and red-pill-awareness, droves of men have come to realize the true essence of women: they are manipulative, inconsistent, emotional, fickle, hypergamous, and covet attention. Since the dawn of time, women have demonstrated these qualities.

There is a belief among men that women of past generations were moralistic sweet little angels before the advent of feminism. While cultural, ideological, and technological changes in society have unquestionably exacerbated these deep seated character flaws, these frailties have always been there and always will be there. Wise men throughout history were cognizant of this. One only has to pick up the Bible and read the opening few pages to see this.

Eve, the first supposed female on earth, was deceived into eating from the forbidden tree of knowledge by the serpent, despite being warned by God not to. You can derogate the validity of the bible as a historical document, but you cannot deny the durability and utility of a lot of its wisdom.

This is one of a few worrying misconceptions I have noticed of late. Below are a few more beliefs that need a little debunking, which are often shared by men who don't actively apply manosphere and game teachings.

1. False Poosy Paradises

Is it really worth leaving my cushy life and native country for this?

There is a large contingent of men that believe moving to more traditional thinking destinations, like Eastern Europe or Asian will solve all their issues. While I agree that many of these places offer bigger pools of women to choose from that have not been exposed as severely to modern degenerate ideals. This does not mean these women are incorruptible or immune to the harmful effects of postmodernist indoctrination. Sorry to tell you this, but even those presupposed paradisaical countries for men will eventually become just like their western counterparts.

Plus, many of those countries are poverty stricken shit-holes: also, it might just be my own personal preference, but the vast majority of Asian women are aesthetically unpleasing. When I went to Thailand last year to see what all the fuss was about, it left a lot to be desired. Most of the nightclubs were littered with prostitutes. Being an outsider and coupled with the fact that I don't know the language finding a chaste and conservative local dream girl seems unfeasible.

Lastly, while I commend anyone who musters up the courage to leave their native country in the hopes of discovering a better quality-of-life or better dating prospects, you shouldn't kid yourself. If you had meager success with women from your own country, chances are you're gonna struggle wherever you go unless you improve your attractiveness/game.

2. The "Chad"

You gonna let this chump keep you out of the game?

A disturbing trend I have noticed of late, is the notion that game is futile unless you are a "Chad".

Loading...
While winning the genetic lottery undeniably has it's advantages, the "Chad" theory is just a convenient excuse that was created by weak men with victim mentalities as a means to justify their poor results with women. I have a friend who fits the "Chad" archetype. Although he gets more ogling stares than I do when we go out, I routinely outclass him because he does not have swagger.

He is so reliant on his attractiveness that he resorts to wallflower game. This results in him either going home dick-in-hand, or having to settle with orcs. He is too prideful to approach and loves to denounce game. Even though he is attractive, the only girls that are shameless enough to directly approach a man in a a club are fives and below (possibly not for long though; male-thirst, particularly from online, makes even these grotesque looking women choosy).

Being dealt a good hand can come with a cost. Due to things coming easy I have noticed many of these rare individuals are impaired on many fronts. These types of men can be eclipsed by the more industrious and dynamic types. Don't let this silly misconception deter you from pursuing women. Improve your physique, find your optimal style, enhance your social status, always keep improving your game, and get your money right.

3. The Confidence Lie

An amusing doctrine that is sold to naive men is that having confidence is the key to getting laid or succeeding at anything you do in life for that matter. If you have not done something how can you have confidence? That is like me saying, “I am confident I can operate a plane despite never having piloted one.” Real confidence is hard to feign. “Fake it till you make it” will only get you so far. Too much false confidence is masked low self-confidence, which is easily picked up on by others.

Instead of faking confidence, put forth your energy into developing authentic confidence. Derive real confidence by learning a valuable skill or offer some kind of utility that sets you apart from the next person.

Sorry, but nothing worth having comes easy. The only way you’re going to ooze that sexy confidence that gets the ladies wet is from years of pounding the pavement. Next time someone tells you, “if you would have just been a little bit more confident you could have got that girl” you have my permission to slap that person upside the head.

Conclusion

While there are many other false opinions worth addressing, I chose these three because I believe them to be the most harmful and detrimental to men. Many of these beliefs, like “false poosy paradises” promote this idea that you can skip having to learn game or work on self-improvement if you just move to one of these *special* male friendly destinations.

And this new obsession with the “Chad” is not only faggy, but it is also quite pitiful. It is a concept that has merit, but for whatever reason is being used as an excuse for men who don’t want to acknowledge, the reason they are striking out is because women don’t find them attractive. Not because some coalition of Chads’ are raiding and pillaging the nation of all the attractive women; “Vikings Style”.

Instead of trying to find shortcuts or finding more things you can blame your lack of success with women on put the emphasis on becoming your best self first; by doing that

everything else should fall into place.

8 Songs You've Never Heard Of That Offer Subtle Red Pills

August 23, 2018 | by Edgar Tru | Link | Original Link

I look back on songs from years past and find myself, to some amusement, finding little red pills here and there. I have compiled a list of songs that are red-pilled on leftism, women, and the overall horrors of modern society.

1. Any Man In America by Blue October

Blue October, fronted by Justin Furstenfeld, is a Texas-based band formed in 1995. If anyone knows anything about the bias nature of family courts, it'd be Mr. Furstenfeld. In 2011 they released a record titled Any Man In America.

This record is possibly one of most saddening records I've listened to. The emotions felt

through the vocals are believable and the stain on the man's heart, due to a money-grubbing snake and home-wrecking whore, echoes loud and wide across the sphere where men understand the brutality of a woman's nature.

She is, by nature, many times more than not, a natural manipulator and seeks resources while giving back little-to-shit in return. That's been my keen observations, along with utilizing the internet to further that observation. I'm not sure I ever heard a record that touched on family courts and the discrimination against fathers. This is one for the books.

The album has some hard-hitting unapologetic lyrics:

> *"You don't know. You act like you believe it, that you're in control. It's just your legal system though. Ya, they don't think about it. No, they don't care about it. Now every man in America take back your control."*
>
> *"Lying ass, play the judge with your crying ass. Had your nose wide open when you saw the cash. Grimy bitch, growing tired of you trying shit. Women run the courts, men provide the chips."*

Very strongly recommend giving the whole album a go-through *at least* twice.

2. Better Sorry Than Safe by Halestorm

> *"I can't think of one good reason, why I'm always thinking about leaving. It's not like everything's so horrible."*

These are the opening lyrics to a song which, quite bluntly, describes how the female sex is seemingly, more times than the contrary, dissatisfied and seeking something more — always craving *more, more, more!* Now, not to bash into Elizabeth 'Lzzy' Hale, but this is

a red-pilling song for anyone who has had the heinous experience of dealing with females in an unpleasant fashion.

This idea of trading up seems, from my ever-increasing observations, that a female will split whenever that new guy pops in who 'raises the bar.' A woman is *never* satisfied.

3. American Idiot by Green Day

Is the liberal devil truly a hypocrite? No, they simply understand what they want and utilize manipulative tactics to achieve their goals. So, when we hear the lyrics to American Idiot, though a solid record I find, it is laced with the vocals of some post-punk drooling queer-lit buffoon.

> *"Welcome to a new kind of tension, all across the alien nation. Where everything isn't meant to be okay. Television dreams of tomorrow, we're not the ones who're meant follow. For that's enough to argue."*

Listen to that song and apply it to our contemporary liberal hellhole, then put it through the eyes of a modern-day post-Bush era right-winger. Very revealing, and a bit humorous given the current state of American politics and how things seem strangely flipped inside out.

4. The Power's Out by Flogging Molly

> *"From the town of Detroit where my job is secure, yeah. Secure in the fact that it's gone for good, yeah. So I'll scrimp and I'll scrape at this pension I saved. So it should be gone by the end of the day."*

This song is for the working-man. It makes mark on the struggle through poverty and job loss. This band, led my Irishman Dave King, is a solid piece of work and rings well a sad tune to the struggle of the working class. This band always produces fine content. A band worth exploring, if you haven't already.

Loading…

5. Get Well II by Icon For Hire

Icon For Hire and their sequel song to Get Well tackles the issue mental illness. The below

lyrics display the sentiment that people indulge in their mental problems, or that they're really emphasizing or faking them for attention. Surely many out there have witnessed this on a few occasions.

> *"Do you want me to write you another sad song? Would you like that? Do you want me tell you we'll never belong? Would you like that? Cuz the truth is we're no different than the others, wearing our sob stories like colors. The truth is we like it, we like it here. We're better off than we let on I fear."*

In the latter teens of twenty-first century America, it is popular to play the game of victimhood. Being a victim-dweller, while attempting to climb the oppression ladder to success where you earn brownie-points for being supposedly oppressed and discriminated against, is hip and cool.

The lyrics display well the struggle of many people, and especially millennials, in their struggle growing up with depression, suicidal tendencies and things related in this Christ-awful liberalized America.

6. No One Gets Left Behind by Five Finger Death Punch

> *"Politicians bathing in their greed. No idea how to be all they can be! Have you no honor? Have you no soul? What is it they're dying for? Do you really even know? Have you no backbone? Have you no spine? Whatever happened to no one gets left behind!"*

This song echoes well the mentality of many right-wingers today. Many of us voted for President Trump due to his rhetoric on being anti-war. His two strikes into Syria did not

display that rhetoric. Let us hope he does not turn into another Bush-style wardog.

7. Revolution Begins by Arch Enemy

Arch Enemy has put out some fine melodic death metal tunes, with some ruthless female-fronted vocals. The song Revolution Begins echoes an anarchist mentality—a real 'fuck you' to your overlords.

> *"Since the day that you were born, the wheels are in motion. Turning ever faster, play your part in the big machine. The stage is set, the road is chosen. Your fate preordained. We are watching you every step of your way!"*

Many may find a hint of George Orwell's book 1984 in the above lyrics. Perhaps so. Nonetheless, in these modern times, it seems obvious how controlled America (and other countries as well) is by its government and the degenerate rat bastards who operate much of our mainstream, centralized media.

8. Don't Tread On Me by Metallica

> *"Don't tread on me!"*

This song is simply fucking awesome. A very conservative/libertarian mindset. The slogan 'Don't tread on me' is something many leftist are fond of breaking, due to their moral supremacy and outrageous self-righteousness.

> *"Liberty or death, what we so proudly hail. Once you provoke her, rattling of her tail. Never begins it. Never, but once engaged. . .never surrenders, showing the fangs of rage."*

The rattling is happening now with many right-wingers.

Conclusion

One can take many things from a single lyric or entirety of any given song. Though, within the red-pilled sphere, I find the more intelligent will surely see the red-pill in each of these songs, and be able to observe them on a far broader scale than your average 'woke' person.

#MeToo Hero Asia Argento Had Sex With A Minor Who She Groomed From Childhood

August 23, 2018 | by News Syndicator | Link | Original Link

Via Page Six:

Actress Asia Argento allegedly admitted she did have sex with a 17-year-old former co-star — but claimed he "jumped" her, according to explosive texts published Wednesday.

The texts, which TMZ says are between Argento and a friend, come a day after the 42-year-old actress claimed she never had sex with former child actor Jimmy Bennett but **admitted her late boyfriend Anthony Bourdain agreed to pay him hush money.**

> This is how young Jimmy Bennett was when Asia Argento worked with him. She knew him as a child and stands accused paying him off $380,000 after grooming him in a mother-son style relationship and turning the relationship sexual right after he turned 17. https://t.co/qTVs0tTa0k pic.twitter.com/FtQyKO9PI0
>
> — Robby Starbuck (@robbystarbuck) August 20, 2018

"I had sex with him it felt weird. I didn't know he was a minor until the shakedown letter," Argento allegedly wrote to her pal.

"The horny kid jumped me … It wasn't raped but I was frozen. He was on top of me. After, he told me I had been his sexual fantasy since was 12."

A bombshell New York Times report published Sunday first alleged that Argento paid $380,000 to Bennett — who once played her son in a movie — after he accused her of raping him in her California hotel room when he was 17 and she was 37.

The age of consent in California is 18.

> Anthony Bourdain paid the $380,000 settlement to Asia Argento's grooming victim. What was he thinking? https://t.co/BDUuvbpbW0
>
> Loading...
> — Roosh (@rooshv) August 22, 2018

Argento finally responded Tuesday, saying Bourdain coughed up the cash because he feared negative press and because Bennett was broke, but said she never had “any sexual relationship” with the teen.

A photo published by TMZ appears to show Argento and Bennett topless in bed, but Argento allegedly claimed “It doesn’t mean s–t” in the text exchange.

“You can see my t–s,” she wrote. “That’s all.”

Argento, now 42, also allegedly texted her friend a letter she said Bennett gave her afterward.

“I love you with all my heart. So glad we met again and I’m so glad your in my life. Jimmy,” reads the note scrawled on Ritz-Carlton stationery.

Argento then claims Bennett sent “unsolicited nudes” to her for years afterward — until two weeks before his lawyers reached out demanding a payout, according to TMZ.

“I didn’t report because I always felt bad for this Hollywood failed child actor, a casualty of the machine, of his parents,” she allegedly texted.

“I have 80 pages on him by a PI that Anthony hired.”

> When men do something wrong… "Arrest him!" "Toxic masculinity!" "Rape culture!" "We need more laws!"
>
> When women do something wrong… "She's only human □"
> pic.twitter.com/AuZFGxizQi
>
> — Roosh (@rooshv) August 22, 2018

The Italian actress became an icon of the #MeToo movement when she accused producer Harvey Weinstein of sexual assault last year.

Argento’s lawyer didn’t immediately return a call seeking comment.

47-Year-Old Single Mom Sues Matchmaking Firm For Not Finding Her A Rich Man

August 24, 2018 | by Beau Albrecht | Link | Original Link

Tereza Burki is a London resident from the Netherlands with three children. She wants one more child. Commendably, that goes above the call of duty, though it's getting pretty late for that. Since she's divorced, she's looking for another man to be the next father.

Although she's 47 now, actually she's aged pretty well. Perhaps she could find someone willing to wife up a single mom with three kids and wanting to try for another. Still, that part is a tougher sell. However, she had some pretty *lofty income requirements*, surely a greater sticking point. That makes a hell of a shopping list.

The quest for Prince Charming

As the *Daily Mail* states, in 2014, she sought out the services of the high-end matchmaking service Seventy Thirty.

> '[H]er ideal partner would be someone with multiple residences'.
>
> The dating business, based close to Harrods in Knightsbridge, calls itself the 'ultimate matchmaking service' with an 'international membership comprising of men and women of affluence and influence'.
>
> In return clients get their own personal matchmaking specialist who can send them on dates with 'entrepreneurs, senior businesspeople, hedge fund specialists' and 'those who come from wealthy and prestigious backgrounds.'

Holy hypergamy, Batman! She paid a membership fee of £12,600 (about US$16K). That's no small chunk of change, of course. Still, that's a great investment if it delivers Mr. Moneybags. However, it was not to be.

> Its founder Susie Ambrose insists Ms Burki was offered six matches, all of them 'plainly successful men in her preferred age bracket who were open to having children'. It is not clear if she ever met any of those men for dates.

So they presented six men who met her highly ambitious expectations, but *that didn't work*. Did she meet with them and was dissatisfied, did they fail to see her good qualities, or did she not contact them? It's unclear exactly what went wrong with the six Prince Charmings.

The lawsuit

In The United States District Court
Southwestern District, Tempe, Arizona

The Honorable Homer Simpson, Presiding

Wile E. Coyote,)
Plaintiff)

Chapter 47, section 2072, subsection (a), relating to product l

The following year, she asked for her money back, but didn't get a refund. She sued to recover the money.

> The High Court heard Miss Burki was looking for a high-earning international jet-setter who was also open to having children with her.
>
> She says she was shown profiles of men she liked and, based on that and the company's claims over the number of suitable men it had on offer, she paid £12,600 to join in 2014.
>
> But she became unhappy with the service when she was shown profiles she did not deem to match her criteria.

The big point of contention is that they didn't have enough available men in their database, leading to basically a false advertisement claim. There's much wrangling essentially about active versus inactive members, which would decide the outcome. Still,

there’s a chance it would’ve worked out with one of the other rich dudes they did have, or would join later. Further, she stated that the men had free memberships.

> Miss Burki, who lives in a street in Chelsea where flats go for over £3m, said she had paid thousands to join and did not want to be matched to men who had not paid a penny.
>
> Men who didn’t pay were less likely to be committed to finding a partner and might not be as well-off as claimed, she told the court.

Dreadful, isn’t it? Furthermore:

> She had expected an ‘in-depth analysis of characters, a whole scientific approach’ to finding her a soulmate, she added.

Well, OKCupid does that, and a free account is fully functional. They probably even have a few millionaires.

The company’s lawyer disputed the claims. For a few particulars:

> ‘Seventy Thirty maintains an extensive database of men and women who can reasonably be described as wealthy and/or successful,’ she continued.
>
> ‘Based on the preferences expressed by Miss Burki, the company identified 70 men in its database as possible matches for her.
>
> Loading…
> ‘All were Gold members who had paid for their membership. Each of these men could reasonably be described as ‘high net worth’.’

Meanwhile, the company counter-sued because Burki described them online as a scam.

The judgment

The *Daily Mail* had a follow-up with an evocative title, "Divorcée, 47, seeking romance on dating agency which promised the 'crème de la crème of bachelors' WINS £13,000 in court battle after it failed to provide a wealthy suitor (and £500 for her sadness)". What it came down to was this:

> Although the agency boasted of more than 7,000 members, the truth was that only about 100 of them were men actively looking for love, he said.
>
> And the management consultant would never have paid her money and joined up had Mr Thomas not knowingly given her 'a wholly false impression'.

Apparently with matchmaking sites for those seeking the wealthiest, there are far more interested women than men. *Who would've guessed?* It's the opposite problem of conventional online dating, which is well known for being a sausage fest.

> When she signed up with the agency in 2014, Mrs Burki's requirements for the men she wanted to meet were 'not modest', the judge added.

Ya think? The ruling was essentially that she was entitled to the *wide selection* of Prince Charmings that she was promised. However, although she won that part of the case, she lost the counterclaim:

> Speaking about the Google review that called the agency a 'scam', the judge ruled: 'Ms Burki has not proved that Seventy Thirty lacked the means or intention to operate an effective match making service, let alone that it was engaged in a fraudulent scheme to extract money from its clients for the benefit of its founder.'

So the company was awarded £5,000 in damages. (Does that get deducted from her own £13,100 payout?) The company representative remarked:

> ‘Ms Burki was found to have libelled Seventy Thirty, as the judge said that we had sourced excellent matches for her.
>
> ‘Therefore, her remarks about us being a non-reputable and fraudulent company were deemed untrue and entirely without foundation.’

The company really did try to help her find what she wanted. Supply chain problems are understandable. Inventory is limited, and multimillionaires simply don’t stay stocked on the shelf long. For that matter, how many divorcées have thought they could trade up to a much pricier model, but instead discovered that they’ll be pretty lucky just to get the same overall quality of merchandise they had before?

Summary

It gets confusing:

- She successfully sued the company for scamming her; and
- The company successfully counter-sued because she wrongly said they scammed her.

Did the judge mean they’re 60% scam and 40% reputable or something? If I could figure it out, maybe they’d give me a powdered wig and let me be a British judge. *Still, could I move to the UK, get a paid membership to an expensive dating agency, and then sue them because they don’t have supermodels beating down my door?* Something tells me that wouldn’t work.

All matters of the law aside, what’s the deal with these elevated expectations? Wanting a man with steady income, reliable transportation, and his own place is reasonable. Expecting multiple residences and a jetsetter lifestyle goes a little too far with the

Princess Complex. Someone with those demands needs to bring something exceptional to the table herself; Mr. Moneybags might have requirements too.

Game Helps Us Understand The Insanity Of 21st Century Liberalism

August 24, 2018 | by Rusty Seven | Link | Original Link

One of these Universal Truths is that liberalism is essentially female in nature. The Democratic Party mainly consists of single white women, beta males and people of color (PoC). The largest and arguably most influential group within the Democratic Party is the highly-educated (see: overcredentialed) single white woman (SWW). When it comes to things such as organizing banquets, running fundraisers or compiling the talking points for the party platform — these women are the true beasts of burden. Yes, there are (((others))) who run their own narratives but we are discussing how and why women are willing to do most of the heavy lifting for that agenda.

Liberalism as Constant Drama

Women love drama. They create it and they thrive off of it. Recently a woman at a language exchange social event asked me to start a fight with the host because he forgot to announce last call before closing the bar. She had paid $20 for an open bar but only had the chance to consume three drinks. It didn't matter that we were surrounded by other open bars. She wanted to see if she could play the game called "Let's You and Him Fight."

I declined stating simply, "The Future is Female. I think you could take him yourself. I see women bench pressing 350 pounds at the gym all the time." The woman playfully punched me in the shoulder and exclaimed, "The Future is Female? That's such a lie!"

We can adapt this story to the current push to normalize transgenderism. When a neighboring county decided to install transgender bathrooms in their city hall, I e-mailed the council members inquiring as to whether there had even been any requests for a transgender bathroom. The ombudsman of thirty years responded by stating that he had never once been asked about a transgender bathroom.

Watching the local nightly news, I saw the proponents of the unrequested transgender bathroom: fat, ugly, feminist women. These women don't personally need the transgender bathroom and the few of them that do have children will not send their own children into the new bathroom. They simply needed a reason to foist themselves into the spotlight to receive what women want most… attention. When asked to explain the science behind transgenderism or whether or not there would be a risk to children, these women remained silent.

Liberalism as an Excuse to Spend Money

The rise of Bernie Sanders could also be described as the rise of the "Free Shit Army." Many Bernie Bros are deeply in debt with worthless liberal arts college degrees that qualify them to wear a green smock at Starbucks. Two thirds of the $1.5 trillion in outstanding student debt loans belongs to women.

Women love to spend money. In fact, if you marry one, you will find out that they will spend 65% of your money whether you stay married or not. So, in this sense, liberalism encourages a "spend today, pay later" attitude which is prevalent among so many women. The "modern" economic system was created by a homosexual who, when asked about national debt, stated, "…in the long run we are all dead." It's fitting that a man whose lifestyle will produce no offspring would promote an economic system that would be embraced by the Spinster Generation.

Loading…

An acquaintance recently asked me what I was looking for in a woman. My response was, "a sugar momma." Both and men and women find the concept amusing and silly. He can't possible mean that! Why not? Millions of women are willing to put pimp themselves out on SeekingArrangements.

In any case, I came across a young woman who stated she had quite a few Bitcoin. "Wow, I was just joking but it looks like I did find a rich, reasonably attractive woman," I thought to myself. On the first date, Nerdy Girl informed me that she had bought close to $100,000 in cryptocurrency at the height of the Bitcoin Bubble and that she was stressed out from checking the price every morning hoping to get even half of that back.

Women are more likely than men to make terrible financial decisions. If a woman can find someone to marry then you can bet that she will transfer $100,000 of student debt to the husband. If that fails, she will vote for Bernie or Hillary and talk about how school ought to

have been free for her and everyone else because it’s only fair.

Open Borders Equals Hypergamy

A recently conversation with some German men led me to make the following statement: “The women who were holding signs down at the train stations in 2015 about how refugees were welcome and borders were hateful are simply trying to replace you. Although these women are ugly and fat, they are a clear and present danger to you and your family by pushing African, AKA “New Germans,” into your country.” The men, who had been discussing their plans to expatriate to another country to escape the violence simply nodded and agreed.

It can accurately be stated that the most beautiful women in any country will most likely only speak the language of their parents. The most beautiful Brazilian women only speak Portuguese. The most beautiful Japanese women will only speak Japanese. The exception to this rule would European countries such as Sweden or Germany where fifty years of Americanization means that everyone under 30 speaks English.

That being said, the women of any country that learn English or listen to Anglosphere media are going to be less feminine than their peers. These women will use the knowledge of English to expand their dating potential in the same way that men travel to countries in which they are exotic to the local women. Many of these women, especially in Asia, are completely ignored by the local men.

The problem for all men is that instead of dating a bloke from Nottingham, these women are using liberal agitprop to invite African rocket scientists into Europe. Liberalism encourages Open Borders and fat women who look like Pepsi cans need Open Borders to get attention from anyone.

Conclusion

These are just a few examples of how we can pull back the layers of the onion called liberalism and see the feminine ID at work. Those of us in the Manosphere should take this into consideration and act accordingly.

Texas Law Student Forced To Write 6-Page Essay About His “Toxic Masculinity” Or Face Expulsion

August 24, 2018 | by News Syndicator | Link | Original Link

Via Breitbart:

A law student at the University of Texas was forced to reflect on “toxic masculinity” as a punishment for harassment.

An anonymous law student at the University of Texas at Austin spoke to Toni Airaksinen of Campus Reform about his experience with ideologically-driven punishment after the school found him guilty of harassment.

The student was asked by University Hearing Officer Jennifer Zamora to write a six-page assignment that would “identify gender role stereotypes/concepts and how [these] have impacted your relationship with women,” and “define your idea of ‘healthy masculinity’ and describe what active steps you can take today to encourage healthy attitudes around masculinity at all levels of society.”

Toxic masculinity essay reminiscent of Chinese communist “struggle sessions”

“Be advised that this [reflection assignment] may not serve as a defense of your actions, but as a reflection of what you have learned about yourself through this experience,” Zamora continued.

While the student should certainly face punishment after being found responsible for harassment, it’s entirely unclear if reflecting on “toxic masculinity” is an appropriate punishment considering its ideological origins. It is appropriate for public universities to suspend students who harass others. It is not appropriate for them to adopt partisan talking points about the negative impact that men have on society.

Loading...

“Repent you masculine scum!”

The anonymous student told Campus Reform that the assignment made him feel like the university was pathologizing his gender. “That’s not just discrimination; that’s treating masculinity as a mental health issue, and pretending they have some pretentious duty to correct the supposed defects in my sex for the betterment of all society,” the student said.

“If the University of Texas-Austin had a program to counsel black students on how to tamp down characteristics associated with black stereotypes, nobody would hesitate to call that racist,” he added.

Why We Must Not Allow Progressives To Control The English Language

August 26, 2018 | by James Steele, Esq. | Link | Original Link

Let me take this opportunity to turn a smug Marxist aphorism on its head: language (and not religion) is the true opiate of the masses. It is for this reason that so many tyrannical regimes throughout history have cloaked their true despotic natures in the disarming nomenclature of enlightened, urbane, first-world, free societies.

Dystopian dictatorships habitually employ language that superficially calls to mind the benevolent governments of western civil society: the Union of *Soviet* Socialist *Republics*, the *Democratic People's Republic* of (North) Korea, the *People's Republic* of China, the (East) German *Democratic Republic*, and *Democratic* Kampuchea are but a few examples. Each of these states is or was a smoldering beacon of hell on earth. But by invoking universally desirable governmental attributes like "representation," "democracy," "populism," and "republic" in the titles of their respective states, Machiavellian autocrats have mollified their gullible subjects through sheer power of suggestion. Red-pill men must learn from the mistakes of history; we must concertedly resist the slow-poison of SJW lingual manipulation.

Lexical trickery is not limited to tin-pot dictatorships. Quite the contrary, it is a tactic employed universally by the left. Progressives know that if they were to do intellectual battle with free-market, natural-rights conservatives on a level academic playing field, they'd be thoroughly humiliated—dominated by the cruel hand of unshackled reason. Thus, to borrow from Captain Jack Sparrow, that doesn't give liberals much incentive to "fight fair," does it? After all, "facts are stubborn things" that speak volumes if left unmolested by deceitful party lines. Since political leftism is wrong in both its presuppositions and conclusions, its recent palpable successes can only have followed on the heels of the left's success in controlling our language and discourse.

American Progressives' Campaign of Deception

Examples of the American left's lingual tampering are legion. Brutally slaughtering and dismembering babies *in utero* is lauded as "women's reproductive rights"; hordes of invading illegal aliens are now "undocumented workers"; the judicial redefinition of marriage to include deviant sodomitical unions is "marriage equality"; workplace and educational sex-based favoritism has become "women's advancement"; disarming law-abiding citizens is now praised as "common sense gun regulation"; Muslims beheading people in the name of Allah is "workplace violence"; the most violent religion on earth is the "religion of peace"; anti-Christian bigotry masquerades as "the separation of Church and state"; morbidly obese land-cetacean women are heralded as "curvy"; indoctrinating 6-year-olds with homosexual and transsexual filth is simply an "anti-bullying campaign"; and government theft through unfairly staggered tax brackets is "having the rich pay their fair share." We are living in Orwellian times.

To draw upon a few of the foregoing examples, it can be confidently stated that Planned Parenthood wouldn't be long for this world if it had to admit that its business model revolves around child-assassination. Few people would balk about deporting immigrants if they understood them to be criminally present in the United States. If the left had to admit that homosexuals have always had the right to marry (a person of the opposite sex) no one would favor the capricious redefinition of a timeless institution.

Fat women wouldn't shamelessly flaunt their nauseating, lumpy, cottage-cheese asses in skin-tight yoga pants if people had enough candor to admit that gelatinous rolls of amorphous lard are not aptly described as "curvy." There would be a dearth of "gender dysphoric," synthetic-hormone guzzling, mutilated 11-year-old freaks running around if we could only admit that it's virtuous to be repulsed by hairy female-impersonating men wearing lipstick and gowns. Thus, for the left, these facts must be circumvented with mendacious euphemisms.

Loading...

SJW Butchery of Pronoun Usage and Titles

A major front of the feminist war on English comes in the form of a push for "gender-neutral language." We must resist this initiative at all costs, because it is an indispensable facilitator of the larger feminist agenda. One component of the gender-neutral language theater that is particularly deserving of our attention is the use of "inclusive" pronouns.

It is (and always has been) proper to use the masculine pronouns "he," "him," and "his" when referring to a generic person, or to a person of unknown sex (since English does not have a third-person singular gender-neutral pronoun). In precise writing and speaking, all gender-neutral alternatives to the masculine, third-person pronoun are "to be shunned" as they represent nothing short of the sheer torture of the English language (*see Theodore* M. Bernstein, "*The Careful Writer: A Modern Guide to English Usage*" (New York: Atheneum, 1977), 351).

I observe too many lobotomized, neutered men bending over backwards to use unwieldy politically-correct phrases like "he or she," "his or hers," "s/he," or the cringe-worthy "they" when speaking of a singular third person, to avoid seeming "chauvinistic" (gasp). By capitulating to the SJW bowdlerization of the English language, we implicitly concede that the feminist critique of "latent sexism" in the language is meritorious, whether we mean to convey assent or not.

What's more, we need to eradicate gender-inclusive alternatives to job titles. Words have consequences. If we truly believe that the most fitting place for women is in the home, then our language should reflect a preference for men in outward societal roles, especially in certain professions. I relish loudly referring to "firefighters" as firemen, "police officers" as policemen, "representatives" as congressmen, and "chairs" as chairmen.

Meanwhile, the aberrant cases where women feature in prominent leadership roles should be clearly demarcated, so that no one infers a false equivalency with men occupying similar stations. Hence, a female administrator should be referred to as "administratrix," an executor should be called "executrix," a governor should be "governess," a comedian should be a "comedienne," and a master should be a "mistress," etc. There is a reason that after the women's revolution of the 1960's, pronouns and titles became a priority target for barren, crew-cutted hags: language serves as a reflection of a society's values.

Conclusion: Resist Blue-Pill Grammar

Language matters. A lot. And progressives are highly cognizant of this. If men continue to cede control of the English language to scoldy, imperious SJWs; then we might as well just officially surrender western society to them, as a *fait accompli*.

We must fight tooth and nail to conserve the classical usage of our language. We must never budge an inch. It is easily observed that when naïve eunuchs make any type of "magnanimous" concession on even seemingly inconsequential issues to satiate the voracious appetites of SJWs, such a concession does not result in appeasement. Quite the contrary, weakness only hastens the decay of civil society, in that, after tasting initial

success, feminist bloodlust is triggered. Let’s smite that bloodlust with a giant lingual tampon, starting right now.

5 Ways To Keep Your Cool When Shit Hits the Fan

August 26, 2018 | by Howard C. Roark | Link | Original Link

There will be times in life that you will be so angry or upset that you will be tempted to do some dumb shit that could ruin your life, career, or reputation forever. The world is full of toxic souls that feel a pleasure in pushing everyone's buttons or causing trouble.

Nevertheless, no matter how angry or upset you're about what someone did or said to you, or some misfortune in your life, some fights are not worth picking. Below I will give some tips on how to keep your cool when you are too blinded by hatred to calculate the casualties and consequences of the vendetta you are about to embark upon. Since none of the tips I give below can be considered a "one size fits all," my best recommendation is to use a mix between them depending on the situations and problems you face in your future.

1. The 10 second rule

“Who wishes to fight must first count the cost” — Sun Tzu, The Art of War

Before I decide to do anything when I get some upsetting news or provoked by someone, I do what I call the 10-second rule. Breath heavily, close your eyes, and count to 10 before doing anything. This really helps me to think more clearly about the consequences of what I will say or do next. Always try to do this before acting on your impulses and ending up doing something stupid, like punching someone in the face. It may cost your job, a lawsuit, your reputation, career and even your freedom.

2. Remove yourself from the situation until your temper has cooled down

“know yourself and you will win all battles” — Sun Tzu

When you receive some bad news or someone provoked you in some way or another, the best way to deal with the problem without risking yourself to act on your emotional impulses is to simply back down temporarily from the situation that triggered those negative thoughts. Wait until you can think more logically about how to face the situation. Then go back and do your best to deal with the problem in a logical manner.

3. Think about the consequences and what you’ve got to lose

“There is no instance of a nation benefiting from prolonged warfare.” — Sun Tzu, The Art of War

Sometimes just reflecting about the negative outcomes that an impulsive action can have upon you and your family is enough to most men to not let their emotional impulses possess them and make them do dumb shit that they will regret for the rest of their lives. Remember, before saying or doing anything stupid, always think about the repercussions your action will have in your life and to others depending upon you.

Loading...

4. Use the art of rhetoric to humiliate the other person

“The supreme art of war is to subdue the enemy without fighting.” — Sun Tzu, The Art of War

In case the person hasn’t made physical contact with you but is trying to humiliate you in the verbal or psychological realm, I recommend you to try to humiliate him back through mocking. Sometimes the best way to deal with toxic people who constantly try to humiliate or belittle you is to use what the other person has said against them.

If you don’t have enough information about him, wait until you’ve gathered more information about him through his reputation, past doings, and so on. Or you can just make a joke out of what the other person said about you.

“To know your Enemy, you must become your Enemy.” — Sun Tzu

The art of joking can be a powerful ally to defeat your haters. You can destroy his plans of making you lose your shit if you can make a joke out of something negative someone said

about you. You will be able to make most of your haters give up on destroying your frame. And that’s not the only benefit of it: if you can joke about your flaws and your overall personality it shows to others that you are a very self aware person. In short, not only no verbal bully can affect you but you will also come off as having a strong charisma and frame to others.

5. No way out, just punch the guy in the face!

“The wise warrior avoids the battle.” — Sun Tzu, The Art of War

There will be some cases that you will be deliberately provoked in such an offensive manner, such as when someone hits you, that if you don’t punch the guy in the face or fight back everyone will consider you a total wimp. In those cases, I do recommend you to say fuck it and just do it. I’d rather be hated by everyone and have the reputation some kind of violent primitive caveman than to have the reputation of a pussy doormat that everyone can push around.

It’s up to you to decide which fights are worth picking. However, if you do decide to act on your impulses, beware of the consequences that you might face. Remember the repercussions of your impulsive action can be worse than having the reputation of a thug. You and him may be fired, get sued, face prison time, and so on. If you did opt to act impulsively, I seriously hope it was really worth it. Also, if you see violence coming, you have the right to defend yourself.

Conclusion

“Thus the expert in battle moves the enemy, and is not moved by him.” — Sun Tzu, The Art of War

In the end, it’s up to you to decide which fights are worth picking and which are not. In case you decide to act impulsively upon then, I hope you really thought about the short and long-term consequences. We are all adult men to know well enough that, unlike hot girls, the world won’t turn a blind eye if we screw up. We live in a world full of malice and wickedness. As much as you try to get along with everyone, there will always be some people who get a kick out of stirring up controversy and creating circles of hate. Beware some people love to get others in trouble.

Don’t Date A “Dog Mom”

August 27, 2018 | by Josh Neal | Link | Original Link

It’s mid-morning on a Sunday in April, which just so happens to be your favorite time of the year. The sun deftly emerges behind the trees, as the air sprightly nips at your cheeks. While taking your dog for a stroll through the park, you meet “Madison”, who is jogging alongside her golden retriever. After exchanging brief yet knowing glances, you slowly approach her.

Sanguine in stride, the two of you indulge in small talk about each other’s pet. In between coy flirtations, she tells you his name is Maxwell. Gushing as wildly as a new mother, she declares, “I just adore him. I feel like he is just the most perfect dog. He’s my whole world. Is that weird to say? Sometimes I call him my fur baby. I don’t know – I love being a dog mom.” And that was the moment where you hit the eject button on the conversation. Or at least you should have, anyway.

See, “Madison” is just one of many basic MAW’s (Millennial American Women), possessed by this strange notion that owning a canine is just like parenting a human child. The next time you hear a woman declare that she is a “dog mom”, grab her by the shoulders (carefully though, or you might get charged with sexual assault), and repeat the following: “No, you’re not. You’re a dog owner, not a ‘dog mom’. You didn’t carry the dog to term. You didn’t deliver the dog. You’re not genetically related to the dog. And while it is just precious to insinuate that you are its mother, you are just its owner. It is property, not a person.” Maybe give her the old Sean Connery treatment for good measure (please don’t).

Virtually every woman holds a desire, or at the very least a capacity, for maternal

nurturing. Certainly, we can conjure examples to the contrary, but those are by and large outliers and as such will not be discussed here. Most women hold either a conscious or unconscious desire to be a mother – it is an undeniable component of female psychology. Foundational, even. Considering this, it is tragic what our culture has done to the feminine instinct to nurture.

Since at least the 1960's, women have been conditioned to view maternity as a barbaric institution of male enslavement. According to the feminists and gender activists, motherhood is for peasants and dullards. Real women go to graduate school. Real women grind out a 50 or 70-hour work week! Female empowerment is just over the other side of a 401k plan. And even with all this anti-feminine programming, women still look for ways to express their maternal instincts.

Yes, those are dogs in that baby carriage instead of children

Enter: The Dog Mom. Women who give the gift of unconditional love. Unconditional love is critical in the early years of a child's life because they need that warmth to develop empathy and social skills. Without it, they quite literally perish. Medical and psychological research confirmed this fact in the early years of the twentieth century, referring to the absence of maternal warmth as 'the failure to thrive.' But since our culture works to make marriage and childrearing as distasteful as possible, MAW's are herded away from this path.

Loading…

I'm sure there is more to it than that; the failures of the Boomer generation have also contributed quite heavily to the collective bad taste in the mouths of Millennials. Rampant philandering, divorce, drug problems, and a litany of other hypocrisies and immoralities produced countless broken homes and ruined childhoods. Many American Boomers lived

as if their careers were more important than their own children. Babies raising babies, as it were. So, who picked up the slack? Television. Daycare centers. Or worse, the other kids in the neighborhood.

The Boomers failed to uphold the cultural and moral values that America was founded on, and in doing so, undermined the beauty of our Western way of life. Combine intergenerational trauma with the social engineering I have discussed, and you create the necessary conditions for young people to abandon that most noble act of procreation. But these circumstances do not change female biology; women still want to love and nurture adorable little balls of flesh, and so that maternal instinct gets displaced.

The anxiety and unresolved emotional distress around childlessness drive women toward a softer, more infantile target, and so the new object of unconditional love becomes Bailey the beagle, a kind of canine surrogate. And a miserable one, at that. If you observe a pattern of displaced feminine instincts (of which this is merely one expression), you should probably start looking elsewhere – especially if you are interested in things like, say, reality, or having children.

It’s not your job to screw a damaged person’s head back on straight. In fact, in attempting to do so, you will only loosen the screws of your own. The mental gymnastics it takes to justify the phenomenon of the Dog Mom all but confirms the stereotype of the solipsistic woman.

I think the most pernicious aspect of this whole ordeal lies in the fact that only the young fall prey to this trap. In other words, when we are young, lacking in experience and vital brain development, we are told certain untruths about the future. An untruth like, “Children are less important than your career. They are less important than your education. Don’t worry, you can put off that messy, time-sensitive biological business. Go out there and make your government some money!”.

Our society can benefit from that lie for the next ten, fifteen, maybe twenty years before those being lied to realize that life has passed them by, and they will no longer have the kinds of options that they might have had in their youth. Marriage and children might not even be on the menu by then. It's tragic.

The dog mom phenomenon cheapens true motherhood by insisting that wholly different things are identical – a false equivalency of the highest order. It is a truly misguided attempt at self-delusion by MAW's, and an abdication of their truest and most natural role. Desperate for meaning, but not desperate enough to do the right thing, MAW's think that adopting the 'mom' moniker will set their world right.

She may have her reasons, such "The world is overpopulated," "I'm just not the mom-type," "I just can't imagine bringing another life into such a horrible world," and so on, but these are nothing more than a loose stitching of psychological defenses, flimsily arranged to avoid examining the damage beneath them. In short, she is not worthy of your time or attention.

6 Reasons Why I Probably Won’t Get Married

August 27, 2018 | by Roosh Valizadeh | Link | Original Link

Recently I spent time with extended family. A common question was, “Why aren’t you married yet?” I replied by asking them how much time they had for me to explain all the reasons. While it’s easy to portray modern marriage as a bad deal, most of my reasons are purely individual in nature.

Here are six reasons why I’m not cut out for marriage…

1. I need more alone time than a woman can tolerate

I only like being social for 2-4 hours a day, preferably at night. Once I fulfill a day's social interaction needs, I power down and rather not talk anymore.

The problem when living with a woman is that they want to be social as soon as they get up and remain social for the rest of the day. They talk to me, ask me questions, and generally want to feel like they are living with another human being. Even worse, I'm exceedingly moody and sometimes want to go a day or two without talking to anyone. My wife would probably find this intolerable.

Possible solution: find an introverted girl who is less social than me

2. I don't permit my woman complete "freedom" because I understand her true nature

A big reason I don't want to get married is that I understand women. Most women are driven by emotional states and social trends—she's your woman as much as she is everyone else's. If my woman doesn't have traditional values, I'll be forced to lay down rules that block the serpent from tempting her, but that will lead her to resent me for limiting her freedom. She'll rebel and pick senseless fights with me. A woman may want a strong man to feel maximum attraction, but she doesn't want him to limit her lifestyle options.

Possible solution: find a traditional woman who already knows how to be reasonably good

3. I don't like sharing my bed because I'm a light sleeper

While I can fall asleep easily, I wake up often and have trouble going back to sleep. Reading before bed, putting on white noise, and wearing a night mask help only somewhat. The problem is that women who sleep in my bed want to touch me or cuddle, but this causes me to wake up, destroying my sleep further. With one girlfriend, I floated the idea of having separate bedrooms upon marriage. Needless to say, we're no longer together.

Possible solution: build a pillow wall in the middle of the bed so she doesn't try to sneak in any touches while I'm sleeping

4. I'm exceedingly rigid in my daily routine and how I like things done

Loading…

I'm an easy-going and flexible guy when it comes to social interactions, and many girls I've slept with would probably say I'm "fun," but I'm a nightmare to live with. I want everything done my way with little deviation. My tea has to be a certain temperature, my bread has to be sliced at an exact thickness, and the sunlight coming into my room has to be just right.

I tried teaching previous girlfriends how to make things the way I prefer, but they just can't duplicate my perfection. I firmly believe that I do things in the best way, so I see no need to compromise on that.

Possible solution: find a younger girl without rigid living habits who doesn't mind adopting mine

5. I don't want to be with a woman who makes my life more difficult or stressful

Satisfy me Rooshiepoo!

Let’s be honest: most women take way more than they give, and all they really give is sex and basic companionship. I don’t mind giving everything I have to the woman I love, but if she’s not actively reciprocating to make my life better, what’s the point of marriage?

Very few women are trained these days to improve the lives of men. In fact, they are trained to believe men are the enemy and they are entitled to some sort of reparation package just because they were born a woman.

Possible solution: find a traditional woman who was trained to please her husband

6. I have an abnormally high need for peace and quiet

My job requires a high degree of concentration and focus. When things get too loud, I'm unable to produce such fine writing as what you're enjoying right now. The problem is that women prefer a background loudness in their lives so they don't feel alone. They wake up and want to watch YouTube videos, put on music, or talk on the phone. I can't work under those conditions, especially during the day. In the evening, a woman can make all the noise she wants, especially in bed, but upon waking I need complete and utter silence.

Possible solution: buy a house so big that I can't hear my wife (and children) while writing or meditating in my study

Conclusion

Note how I didn't mention becoming bored sleeping with the same woman. A lot of other men have this problem, but if I get horny, which still happens, I'm more than eager to put it in her after removing the wall of pillows between us.

All of the reasons I mentioned are not insurmountable obstacles, and the solution may be as simple as finding a young, shy, traditional, virgin girl raised on a farm, but I must admit that the kind of man I am doesn't lend well to the compromises that marriage demands. If I find a woman who can handle the quirks above, she may very well be the one.

Jewish Video Gamer David Katz Kills 2 After Losing In Video Game Tournament

August 27, 2018 | by News Syndicator | Link | Original Link

Via Forward:

A professional video gamer from Baltimore is suspected of killing at least two people and wounded several others on Sunday when he opened fire at a video game tournament that was being streamed online from a restaurant in Jacksonville, Florida, police and local media said.

> At least 4 dead, 11 injured following a mass shooting at a gaming tournament in Jacksonville, Florida. Shooter is said to be a participant of the tournament, who lost a game, started shooting and then killed himself. Video may be disturbing for some. pic.twitter.com/pRxYKt7EDN
>
> — BNL NEWS (@BreakingNLive) August 26, 2018

David Katz, 24, of Baltimore then turned the gun on himself. Jacksonville Sheriff Mike Williams declined to comment on what led to the third major mass shooting to hit Florida in the last two years.

Police swarmed the home of Katz's family in the tony Federal Hill neighborhood, near the Inner Harbor in downtown Baltimore.

Dozens of ambulances and police cars flooded into The Jacksonville Landing, a waterfront dining, entertainment and shopping site in the city's downtown, after several shots rang out on a sunny Sunday afternoon.

> Something has to be done about these white male shooters!

> pic.twitter.com/gdJPcp8tBv
> — Roosh (@rooshv) August 27, 2018
> Loading…

The shooting took place during a regional qualifier for the Madden 19 online game tournament at the GLHF Game Bar inside a Chicago Pizza restaurant, according to the venue's website.

The bar was livestreaming the football video game competition when the gunfire started, according to video of the stream shared on social media. In the video, players can be seen reacting to the shots and cries can be heard before the footage cuts off.

One Twitter user, Drini Gjoka, said he was taking part in the tournament and was shot in the thumb.

> WOOF WOOF WOOF WOOF WOOF WOOF https://t.co/7tojVe3GDz
> — Racism WatchDog (@RacismDog) August 27, 2018

"Worst day of my life," Gjoka wrote on Twitter. "I will never take anything for granted ever again. Life can be cut short in a second."

Another gamer, Chris "Dubby" McFarland, was hospitalized after a bullet grazed his head. "I feel fine, just a scratch on my head. Traumatized and devastated," he wrote on Twitter.

4 Reasons Why Social Media Is Killing Your Game

August 28, 2018 | by Jon VonStroke | Link | Original Link

With all the hoops a man must jump through in order to achieve moderate success with women in this dysfunctional sexual marketplace, it's no surprise a lot of men are dropping out of the game. The aspiring Casanova is faced with many obstacles as is; your social media accounts are probably not doing you any favors. Below are four reasons why social media is inhibiting your success with women, and why you are better off without it.

1. It's Not Masculine

Masculine men have little use for social media. Nothing says beta cuck more than a man that gets satisfaction from uploading and sharing unoriginal pictures of his cookie-cutter existence. Think about some of the premier alphas of old. Would a modern-day John Wayne have any use for an Instagram account? Absolutely not. Real men don't need to showcase to the world what they ate last night or what concert they attended.

Social media outlets like Facebook and Instagram catalog their users' activity for the world to see. It's easy to identify which types of users have little going for them. Choosing to spend your free time seeking validation from strangers and stalking insta-whores that you will never touch is not only beta, but is also a complete waste of time.

2. It Invites Scrutiny

“Only 600 followers. He must be a loser”

When you meet a woman through day, night or online game, the first thing she is going to do before she considers going out with you is carefully go through your social media accounts with a fine-tooth comb. What she is doing is looking for any incriminating evidence she can use to disqualify you. She is also, albeit, not always an accurate method; appraising your social and economic standing in society by the number of followers, likes, and extravagant vacation pictures you have on your timeline.

She might even seek the opinion of a jealous and bitter friend who more likely than not, will find something negative to say about you, in hopes of dissuading your prospect from going out with you. You might think you have an impervious social media presence, but trust me; if you put your stuff out there in public, you are inviting some degree of negative scrutiny. Not having a Facebook or Instagram makes this a non-issue.

3. Cultivates Male-Thirst

It is widely known in the Manosphere that social media is one of the core reasons for the lopsided dating market we see today. Social media has devolved into a platform for women to attention whore, boost their egos, and con thirsty beta men out of their hard earned money. It also, subconsciously makes you more thirsty and needy.

Loading…

There was a time in my life in which I was addicted to Instagram. I would spend countless hours scouring through the feeds and stories of attention whoring skanks; marveling at all the edited half-naked pics. It took me a while to realize this unhealthy obsession. One day it finally occurred to me that Instagram was essentially a Pornhub lite. It was distorting my perception of beauty and causing me to pedestalize degenerate and phony women. There is already enough desperate men in the world who choose to naively validate these damaged women—don't be another sucker. When you like or comment on a woman's picture you're effectively relegating yourself to beta simp status.

4. Not a Worthy Use Of Your Time

Social media game is only worth it if you're that guy.

What utility does social media have for heterosexual men? There are other methods that can be used to stay in touch with family and friends; such as text, email, Skype, or a phone call. When you really think about it, unless you are using it as a marketing outlet with a monetary incentive in mind, there is really no point in having it. You are better off allotting your time to self-improvement, honing your game by throwing yourself in the trenches, or pursuing some other form of enrichment.

A person I use to work with told me his obsession of social media became so severe, his job was put into jeopardy due to low productivity and performance. He was forced to put a locking feature on his account to limit the amount of time he could spend on Facebook to no more than one hour per day—that is pretty pathetic, don't be that guy.

Conclusion

All things considered, there is very little benefit in having social media. If anything, it limits the amount of time you could be spending pursuing more worthwhile endeavors, further skews the dating market, increases male thirst, and offers another medium for disqualification.

If a woman you are pursuing inquiries about your Facebook or tries to bust your balls about you not being on social media (I have had this happen before many times), shrug your shoulders and tell them that social media is for little kids who require validation, that the people close to you in life know how to reach you, and that well-to-do people like yourself have little time or utility for such brainless recreation.

Disclaimer: If your social media contains pictures of you with models, bottles, weekly trips to exotic places or over ten thousand followers, disregard this advice. For all other

men, you’re better off just ditching social media; the return on investment just isn’t that great.

3 Ways To “Hypnotize” A Girl Into A Sexually Submissive Trance

August 28, 2018 | by Avery Hayden | Link | Original Link

Have you noticed that in bed, women often climax immediately after you do? This happens because when a girl arouses you, her own arousal increases, too. Sexual desire is a positive feedback loop.

I’ve even had women orgasm while giving me a blowjob. How is this possible? Because for women, arousal is largely psychological. If a girl sees a man become overwhelmed by sexual desire for her, she feels the same emotions he does.

You can use this principle to your advantage in the bedroom, sure, but you can take it a step further. You can make a girl feel intense sexual arousal in public – simply by making her feel that she’s turning you on.

In this article, you’re going to learn 3 ways to put yourself into a sexual state that will ‘hypnotize’ the women you meet into a sexually submissive trance.

The techniques you’re about to learn are what took me from occasionally pulling a girl on a night out, to consistently hooking up with beautiful women.

1. Appreciate The Female Form

Social conditioning teaches us to be so ashamed of our sexuality that we hide it (until we’re in a bedroom with a girl). Because of this conditioning, we fight our natural urge to appreciate a beautiful woman’s beauty when we see her walk by.

To an extent, this is necessary. We couldn’t function in polite society if we blankly stared at women’s breasts while they talked to us. However, modern men are so uncomfortable with their sexuality that their interactions with women are neutered.

Sexuality is everywhere. If you can appreciate female beauty when you go out to meet women, your interactions will have a powerful sexual charge to them. Without this charge, the interactions will most likely remain platonic. With it, your interactions will naturally escalate towards sex.

Society has programmed us to deny our own sexuality: it’s time to delete that program and regain our natural masculinity. To do this, observe women with sexual intent. When you see an attractive woman, appreciate her figure, the way her body moves, and even the feminine look in her eyes.

Let yourself “perv out.” If, for example, you’re a connoisseur of the derriere, make sure to appreciate that particular part of women’s bodies. Of course, use common sense: don’t stare at women in a way that gets noticed as creepy. But do make a point to look at women through a sexual lens.

Even while you’re talking to a girl, you should be able to feel a sexual charge emanate from her eye contact and facial expressions. You should be able to feel her feminine energy wash over you, simultaneously soothing you and exciting you.

It’s very easy to tell if you’re doing a good job at appreciating the beauty of women. Simply notice whether you feel aroused. If you don’t, you’re still holding yourself back from being truly sexual. To put it crassly, just being in an environment with attractive women should be enough to give you a boner.

This exercise is extremely measurable (pun intended). To get the maximum effect, I recommend putting a conscious effort into appreciating the beauty of women until it becomes an automatic habit.

If, after practicing this, you still find it difficult to feel aroused by the women you look at, the next exercise will help.

Loading…

2. Sexual Visualization

In the first exercise, you simply observed women with sexual intent. Now, you're taking things a step further by imagining yourself doing salacious things to the women you encounter.

When you see a beautiful woman walk by you in a bar, imagine yourself ripping off her clothes and ravishing her. Imagine what it would look like, imagine what it would feel like. Again, the goal here is simply to get yourself into a sexual state.

If you approach a woman and she feels raw sexual energy radiating off you, there's a very good chance she'll get drawn into that energy – this is what puts her into a sexual trance.

To be fair, a good number of the women you approach won't be open to engaging with you sexually. These girls will reject you regardless of how you approach them. Some rejection is inevitable.

However, when you get yourself into a sexual state, many of the women you meet will be so aroused by your energy that they lose control of themselves.

3. Masturbate Less

If you've been practicing the first two exercises, but you're still having trouble getting yourself into a sexual state, you might be masturbating too often.

Sexual desire is a craving, much like food or water. The longer you go without water, the more you will desire it. The same is true with sex: if you masturbate every day, you're craving for sex will be weak.

Personally, I don't recommend 'nofap'. Completely eliminating masturbation is too extreme for me (I end up getting unhealthily desperate for sex after about a week). However, I do recommend cutting out porn and only masturbating once every few days.

Set a schedule, try masturbating only once a week or twice a week. Adjust your schedule based on your experience:

- If you're getting so horny that you can't focus on regular life, masturbate more.
- If you're not feeling any arousal when you see an attractive woman, masturbate less.

Simply controlling your masturbation habits will help you create natural sexual tension with the women you meet.

Conclusion

Mating is like a dance; one partner must lead for the other to follow. Women will rarely lead the dance towards sex – you must give women the opportunity to follow you there.

Use the three strategies you learned in this article to inject raw sexual energy into your interactions with women. Once you learn to fully own your own sexuality, you might be shocked at the way women start reacting to you.

When I'm in a sexual state, I'll often end up making out with a girl only seconds after

having met her. Other times, women will suggest we find a private place to “hang out” (I.E. have sex in) within the first ten minutes of conversation.

Women make themselves sexually available to me because I show them my own sexuality, first. Anyone can get the same reactions from women I get, simply by making a conscious effort to cultivate their own sexual energy.

San Francisco Health Organization Insists You Replace “Vaginas” With Inclusive Term “Front Holes”

August 28, 2018 | by News Syndicator | Link | Original Link

Via The Daily Caller:

You may think this story is better suited for *Clickhole*. If only. Instead, *Healthline*, a California health info provider, is trying to ruin the term “vagina.” It’s not gender inclusive enough. The word they prefer? “Front hole.”

Other hot stories on the site: Why women should bring back body hair. “It’s time we change how we feel about body hair,” the piece says. (Do not look at this while you’re eating lunch.) There’s also an “Editor’s Picks” piece about taking genitals out of the mix to revive a waning sex life. They suggest a “sex position bucket list.” For example, “hello kitchen island.”

But let’s get back to that pesky v-word.

According to *Healthline*‘s sex-ed guide, higher rates of HIV and STD’s are a direct result of discrimination,” reports *Caldron Pool,* a righty Christian site. “It’s imperative for safe sex guides to become more inclusive of LGBTQIA and nonbinary people.”

The clincher: “For the purpose of this guide, we’ll refer to the vagina as ‘front hole’ instead of solely using the term ‘vagina.’” Oh God.

"Front hole"

Also at risk are the terms "penis" and "vulva." They prefer the word "parts" across the board.

Loading…

Here's why: "The notion that a penis is exclusively a male body part and a vulva is exclusively a female body part is inaccurate. By using the word 'parts' to talk about genitals and using medical terms for anatomy without attaching a gender to it, we become much more able to effectively discuss safe sex in a way that's clear and inclusive."

So if I go to the ER and I say my "parts" are hurting, no doubt the doctors will know what I mean.

> Whoa! I just read this article by @Healthline where author(Janet Brito PhD!!!)asserts that using the medical term 'vagina' is not gender-inclusive language so she uses the term 'front hole' instead.
>
> How much further are we going to go before capsizing?https://t.co/gcL4n1hjsu pic.twitter.com/qyxxvlJotr
>
> — Obianuju Ekeocha (@obianuju) August 21, 2018

The Mirror tried to contact **Charles Hodgkins**, the site's senior copyrighter and newsletter content manager, but to no avail. Calling is a tedious experience. A woman's voice gives you six options — none of which lead you to a human being with "parts" or a "front-hole."

Check out the health guide here.

4 Things I Enjoy About My White Privilege

August 29, 2018 | by Edgar Tru | Link | Original Link

It is obvious, in twenty-first century America, that European-Americans are the most privileged group in the country. We essentially are the bees knees and everyone else is oppressed just because we exist. So, as a white man, I want to share how I enjoy my white privilege.

1. I Am Allowed To Be Openly Discriminated Against

If a black man rants and raves on about how he hates me just because of my ethnic heritage, he cannot be racist. That is impossible. If a Jewish professor advocates all whites commit mass-suicide due to slavery, or that until the white race is gone we cannot rid our society of 'oppression,' he clearly isn't a racist.

See, as a cisgender heterosexual white male, I am the cherry on top. Even if crime stats display black-on-white crime is far worse than the contrary, it really is because we're oppressing them; therefore, it's not racist.

I love my privilege.

2. I Cannot Wear Symbols Of European Pride

If I want to sport a Kolovrat (Slavic Swastika, sunwheel, spinning cross, circle of life)

necklace, that's clearly a pendant of racial hatred and that automatically makes me a flaming racist; thus, I am a bad person.

If I like the Celtic cross, I cannot wear that without people seeing a living, breathing Nazi marching their way while Adolf Hitler gives a speech in the background. That, or I'm a backwoods-dwelling hillbilly Ku Klux Klan member.

I'm also not allowed to be proud of my ancestry and all the years of war, trial and error, hells and glories. I cannot appreciate my people's poets and writers, musicians and philosophers, or the pre-Christian Pagan path, or our dances or architecture or family traditions. But every other race can.

See, it doesn't matter if I'm part of a long history of people and it's my turn to carry on their story. I do not get that opportunity without potentially suffering, societally speaking. I am told to abandon it altogether.

I love my privilege.

3. I Get Legally Discriminated Against In Jobs And Universities

European-Americans and Asian-Americans are the two groups you can legally discriminate against, in the open and on enforced policy, based solely on our ethnicity through the means of Affirmative Action.

Isn't it fun to wonder whether checking your race on that job application, or college you're applying for, might cost you the position or slot?

Marxism must be enforced and outcome of equality is the set standard. It'll never happen, but America seems to think that is actually possible. Therefore, the white man must be told, and forced, to step down and move aside.

I love my privilege.

4. I Am Not Allowed To Use Racial Slurs But Other Ethnicities Can Without Much Consequence

Loading…

If I dare slip up and utter a racial slur, it is damn near the apocalypse. And, if I'm really unfortunate and caught and I'm famous, then I need to go on a bunch of late-night talk shows and apologize to a potential million people of whom I've offended.

But a man of African heritage or a Hispanic may go on calling me a cracker or whitey all they please. But that's obviously not racist because I'm super privileged and my existence oppresses them. See, they're really giving it hard to 'the man.' It's almost like they're only defending themselves and my words might as well be literal violence.

I love my privilege.

Who Is Really The Most Privileged?

Sarcasm aside, who is *really* the most privileged in contemporary America? Well, let us see here. Who is the one group you dare not criticize over *all* other groups? Who is the apparent minority that somehow manages to operate much of Hollywood and mainstream media? Who is the group that gets to perpetuate their moral compass and their politics due to owning so much control over film and media? Who is fine seeing another entire group of people be trampled on just so they can keep their little ethno-state, and the West is totally cool with it?

People do not have to like it, but it is obviously the Jewish folk. To me, if I was to talk about who is really privileged, it'd be them. I do not feel privileged. I'm not saying my life was hardcore and that I fought gangs off to see the light of another day, but that word doesn't sit well with me. And, to be a blunt bastard here, if I am privileged, then I do not care.

This observation of this ethnic group has nothing to do with blind senseless hatred, or bias. It does not equate to hating an entire group either. But much of the Jewish folk have far to many leanings toward liberalism, open borders for European-majority countries, and find many conservative values as 'backwards.' See the manipulative language? Designed to put them on the moral high-ground while you sit in your outdated world.

Conclusion

I'm seeing this idea of white privilege spread ever-faster to the point that people I know, of whom never really heard this sort of rhetoric before, are finally getting a taste. Far too many times I've seen and heard of black folks carrying on about slavery and my people's privilege. It's beyond madness. We've entered a state of insanity and it may get even worse when America faces the 2020 elections. I foresee some very haunting things a-coming.

At this stage in American politics, to engage liberal-minded buffoons about this issue, is worthless. You'll most likely receive some line of piffle while being casted as a hate-filled devil. The leftist of today are truculent as hell and they want blood. There's really little-to-no point debating those who believe European-Americans are privileged. It's not worth the time anymore.

Autistic Male Student Is Hit With Title IX Harassment Violation For Offering Fist Bump To Female Student

August 29, 2018 | by News Syndicator | Link | Original Link

Via The College Fix:

A “fist bump” and a selfie may have ended Marcus Knight’s educational career right as it started. The student, who has autism, cerebral palsy and a shunt to relieve fluid pressure on his brain, was not allowed to defend himself against allegations in two Title IX investigations this past fall, his mother told The College Fix.

Aurora Knight has raised more than half of the money to cover legal fees through a GoFundMe campaign as she challenges the sexual-misconduct findings on her son’s record.

Though Saddleback College lifted Marcus’s suspension a day before a hearing last month, it has thus far refused to remove the findings from his record, Aurora wrote in an update to the campaign Wednesday.

Her son (below) has limited expressive language capabilities and cannot negotiate social situations as easily as others, she told The College Fix.

Though he receives academic accommodations for his disabilities, he was not offered accommodations in the Title IX process, Aurora wrote in an email. “When we look at individuals with limited social skills, we cannot expect that they responded the same way as a typical individual.”

The family has raised money to defend against the accusations

Former Drake University trustee Thomas Rossley, whose learning-disabled son is suing the university for a similar ordeal, told The Fix in a phone interview that Marcus's case "goes to the whole problem with disability issues with Title IX."

"Most schools don't even let the students know how to ask for accommodations within a disciplinary process," said Rossley, whose own "Title IX retaliation" claims against Drake were dismissed in court last month.

"So these students don't know that they can even get accommodations within the disciplinary process," whether the accused student or the accusing student, he said.

Aurora Knight laid out her narrative of the allegations in a phone interview with The Fix.

The first incident occurred in **the first week of September when Marcus was in the Student Services office and asked a female student working there if he could "fist bump" her. She agreed but soon filed a Title IX complaint.**

The next week Aurora and Marcus were asked to meet with the school's Disabled Students Programs and Services coordinator, who allegedly called the fist bump "inappropriate behavior." Aurora told The Fix that Marcus did not "bump" anything other than the female's knuckles. (The Fix has reached the coordinator but that person has not been available for a phone interview as of Thursday night.)

Loading...

His mother told the coordinator that Marcus had been at the office seeking campus employment. The official allegedly said that would be "totally pointless" because Marcus was "obviously incapable" and should be taking adult disability classes instead of college classes.

Though the coordinator said the incident would not go on her son's record if the behavior stopped, according to Aurora, the mother became aggravated by the description of a consensual fist bump as "inappropriate."

She asked the coordinator "Did he touch her? Did he hug her? Did he follow her? Did he try to get her phone number? Did he expose himself?" When the coordinator allegedly

said no to each, Aurora said she responded: “Then stop calling it inappropriate. He’s just trying to make a friend.”

Aurora explained to Marcus that the female student did not want to be his friend, and he agreed not to interact with her anymore.

A month later, an official who served as both vice president of student services and Title IX coordinator called the Knights into another meeting – with police present – because the female student had reported the incident as sexual harassment, according to Aurora. This official did not respond to a query from *The Fix*.

The student had changed her story to say Marcus hugged her, sat very close to her, grabbed her with one hand, and with the other tried to get her hands onto his upper thighs. Aurora said that did not seem physically possible, given that the female student had been sitting behind the counter. Marcus acted out what he did – a two-handed fist bump – at that meeting.

Ordered to bring a ‘personal student assistant’

Aurora and her son were never allowed to formally defend him throughout this process, and didn’t hear back from the school between meetings except for an email from the coordinator recommending life-skills classes for Marcus, the mother told *The Fix.*

College staff present at the October meeting had Marcus sign an informal resolution of sexual harassment and told him not to have contact with the female student, according to Aurora.

Because of his autism, Marcus did not understand that he could not apologize to the student in person. **When he approached her in the cafeteria, “everybody was pointing at him” because the female student “had been telling everybody he was weird or dangerous,” Aurora said.**

Though he left the cafeteria before reaching the student, she filed another complaint against Marcus, his mother said. When Aurora complained that the student was spreading around rumors about Marcus, Aurora said an official told her in so many words that “gossiping was not against the law.”

The Single Belief That Many Men Foolishly Believe About America

August 30, 2018 | by Jared Trueheart | Link | Original Link

When we hear about the rise in cultural degeneracy, it is typically associated with cultural Marxism, feminism, multiculturalism, and the umbrella term leftism. How did all of those gain traction in the nation of freedom, the nation founded by patriots who bled and died for independence? The machinations of the wealthy elites certainly put things in motion, and their greatest tool was a single piece of propaganda that has become so ingrained in American thought that both Republicans and Democrats repeat it.

The meta-propaganda that enables all other devious influences is the belief that America is built on an idea rather than the American people.

America As An Idea

Here is a quote from Bloomberg about Senator Lindsay Graham:

> "America is an idea, not a race," the South Carolina Republican said, adding that diversity is a strength and not a weakness. The senator reiterated these sentiments in a statement released as the controversy over the president's words grew. "I've always believed that America is an idea, not defined by its people but by its ideals."

Michael Koplow writing for International Policy Digest writes in his article titled "America Is An Idea" that:

> America is not just a place. America is an idea…The power of the United States comes from many sources, but more than anything else it comes from the strength of the American idea.

In his 1993 inaugural address Bill Clinton says:

> "Today we do more than celebrate America. We rededicate ourselves to the very idea of America, an idea born in revolution and renewed through two centuries of challenge; an idea tempered by the knowledge that, but for fate, we, the fortunate, and the unfortunate might have been each other…"

In his 2016 film "Hilary's America," Dinesh D'Souza teaches an incoming group of immigrants that America is an idea. He can't go to Mexico and become a Mexican any more than a Mexican can go to India and become an Indian. Anyone, however, can be an American because America is an idea.

As you can see, this belief spans the left-right political spectrum. Some like Dinesh D'Souza have probably just been brainwashed since birth that America is an idea. Others like Bono and Michael Koplow are probably just useful idiots. Politicians like Bill Clinton and Lindsay Graham are purposefully spreading the idea like a virus.

What Is The Idea Of America?

The idea of America can be anything, and that's precisely what makes this the meta-propaganda. If huge corporations want waves of third-world immigrants to provide them with cheap labor the idea of America becomes "diversity is our strength" or "America is a melting pot" or "America is a nation of immigrants."

If the rich want to get richer they spread the nugget that America is the idea that a person can be anything they want to be. So Americans believe that the rich are rich because they earned all that wealth. Yet when they clearly do a bad job they're not held accountable for crimes or even allowed to go bankrupt.

Loading…

Just look at the big bank bailouts of 2009. The idea of American social mobility was very inconvenient then, so social engineers stopped pushing it for a while. The wealthy elite loves the social mobility fallacy as a means to lower taxes for themselves. After all, if people believe that they can be one of the wealthy elites they won't want to pay more taxes at that time, so they vote for tax cuts for wealthy elites now. Yet the chances of the average man becoming rich do not portray America as a land of social mobility.

When social engineers want to inspire racial hatred they say America was built on racism. Yet when they want to bolster feminism they say that America was built on equality and proceed to spew some lie about women making less money for doing the same job as men.

The “idea” of America can be anything. It is used to push an agenda that benefits very few at the cost of many.

America Is Not An Idea, It Is A People

When the founding fathers and settlers of this nation fought the revolutionary war and won their independence, they didn’t do it for an idea. They risked their lives (many gave their lives) for the people that surrounded them. They fought for the people of their new nation and the American way of life. They had no one but each other then. Even if the settlers of Scottish heritage were hostile to the settlers of German heritage (or any such rivalry), they came together against common enemies that threatened the American people.

People get the idea that America is not a nation of people because of the diversity of settlers. Hungarians are Hungarians because they were born in Hungary and so were their ancestors. America is such a young country that for a long time it didn’t sound right to say somebody was an American because their ancestors were not born in America. If their grandparents were immigrants, where does that put their long-term heritage?

Now America is over 240 years old. We have many high points in our history and also some low points. That puts America on par with every nation-state in Europe. America has been around long enough for us to say that America is a people and has been for a very long time.

When we accept that America is a people it becomes much harder for Americans to be callous to other Americans. Maybe those people on welfare will do everything they can to get off of it if they believe they are taking resources from their own people. Maybe criminal bankers would be imprisoned for their crimes if we suspected them of doing damage to our fellow Americans. Maybe we would have more compassion for people than dogs if we believed that those people were our people, Americans like us.

Those are dangerous beliefs to social engineering puppet-masters. The only way Americans can unite is if they cast aside the belief that America is an idea and accept that America is a nation of Americans. As we have proven in the past, when Americans unite and care for each other there is no enemy we can't defeat.

The Roulette Nature Of Game

August 30, 2018 | by Jon VonStroke | Link | Original Link

Assuming you do not have any glaring chinks in the armor and your game is up to par, the number one reason you are not getting traction with women has to do with something that is actually virtually out of your control: sexual availability. If a woman is not sexually available it matters little what your market value is, your attractiveness, or the adeptness of your game. If she is not available you're not getting shit.

What is Sexual Availability

"Wait, come back! RSD swore to me this opener always works"

Sexual availability is just that: when a woman is willing and ready to get intimate with a man, she will open her legs to him if he plays his cards right: if she is not available sexually then she won't be having sex with him; end of discussion. Due to the volatile nature of women, there are myriads of different reasons as to why she is not in a sexually available state.

Sexually Compromised

Due to male thirst and the lopsided nature of the marketplace, a women's pipeline is always full. Since there is an enormous supply of eligible bachelors available to her, the large majority of women are sexually involved with at least one person (often times multiple). This person could be a husband, a boyfriend, or just some fuck buddy she met on Tinder a week ago. If a woman is satisfied with the person(s) she is having intimate relations with, there really is not much you can do but wait your turn in line. No amount

of game, wealth, or status is going to change this if her sexual needs are being met.

Fortunately, a woman's sexual status is ever changing due to her fickle and hypergamous nature. There have been countless times in my career in which I would meet a woman, we would hit it off, but since she was already sexually invested in someone else things would go nowhere; then out of the blue, in a matter of weeks once things inevitably fizzled out with her current squeeze she would reach out to me. The key is to not waste too much time with a girl you sense is already sexually spell-bounded, or is not currently looking to add to the roster. If you made a good enough impression, weren't needy, and there was real attraction established, once she is back on the market she'll seek you out.

Emotionally Unavailable

Women are easily unhinged and inherently emotional creatures. They change their minds as often as a person changes their clothes. Don't let a bitchy and dismissive woman throw you off your game. A few years ago I met a cute gal at an after party. I approached, introduced myself, and tried to establish rapport with the intent of getting her number. She was low energy and almost seemed bothered by my advances; talking to her was like talking to a wall. Since I was not getting a lot of traction I ejected.

Four weeks later I was out with a friend and his girlfriend. His girlfriend mentioned to me that one of her attractive friends had inquired about me. I asked to see pictures of her—to my surprise it was the disinterested bitch from the party. I was baffled that she was asking about me considering how cold she was the night I met her. When I told my friends how uninviting she was, they informed me that she had just broken up with her boyfriend whom she discovered was cheating on her, and was therefore in a deep state of despair. Quite an eye-opening experience: this woman was unresponsive to me because she was undergoing a difficult moment in her life, not because she was not attracted to me.

Loading...
If you talk to as many women as I do, you're going to encounter women who just don't give you much to work with. Oftentimes, it has nothing to do with you, but more to do with her. She could be going through a breakup, just lost her job, dealing with a death in the family, and countless other reasons for her unapproachable disposition. This segues to my final point…

Timing & Logistics

A lot of your success with women is going to be dependent on good timing and proper logistics. You ever court a woman and everything just seems to fall into place with such minimal effort? You then try to repeat the same formula with a new girl but it just doesn't play out the same way. This was because you were probably in the right place at the right time.

Sometimes the stars just don't align properly. Everyone has had that experience in which they've met a cute girl at the bar, sparks are flying, everything seems to be going

according to plan, yet inexplicably they find themselves going home empty-handed at the end of the night. Little did they know she had a plane to catch at 5:30 am, or it may have been that time of the month, and as a result, she could not go home with him; the reasons are infinite.

The most common obstacle that I've been faced with when trying to get a slut from the club to come home with me is trouncing her overprotective and jealous friends. It is difficult to extract a woman you've just met that is having a "girls night out". Women place so much importance in the approval of friends. It is unlikely she is going to go home with a man she just met due to the fear of being slut-shamed by her friends, even if in her heart she desires him. Note: a good wingman or two can greatly increase the odds of success when approaching a group; most times it's futile trying to single-handedly penetrate a group on your own.

Logistics are pretty straight-forward. If you're with a girl and not within good proximity to take her home it's always going to be an uphill battle. I have conflated sexual availability with timing and logistics because they are all intertwined. If it's not the right timing, or you don't have the right logistics, you're probably not going to get laid; thus making that woman you are in pursuit of sexually unavailable to you.

Conclusion

Experienced players and men who play the numbers game quickly realize that there is a small window of opportunity. When the window is open you must strike while the iron is hot or risk not having that opportunity again. While things such as sexual market value and game have a direct impact on the amount of success you will have, there are many things that are unfortunately out of your control.

Take solace in the fact that game success is largely contingent on timing and good fortune. The women you court won't always be primed for seduction, and very often than not it has little to do with you and mostly to do with her. Your recourse should be to

approach often and not give a shit about the outcome. You mitigate the frustrations by staying on your grind and living a life of sexual abundance. A good player can quickly determine which girls are ripe for the picking and which girls are just there to waste his time.

How To Break Through Beta Male Conditioning

August 31, 2018 | by Mo Saleem | Link | Original Link

Are you alpha?

The Red Pill glossary of terms defines an alpha male as one who is socially dominant and displays high-value traits that are attractive to women. To expand on this definition, I would add that a true alpha male is one who has achieved total freedom not only in his choice with women, but in his ability to do what he wants, when he wants, where he wants, with whomever he wants.

As David Deida writes in *The Way of the Superior Man:*

> *The priority of the masculine is the mission which leads to freedom. You are always searching for freedom. Your basic motivation is to be released from constraint and experience the freedom on the other side.*

The following is a 4-stage model I propose that every man must go through in order to break out of beta and become the badass alpha male he was meant to be.

Level 1 – Bluepill Spectator

The blue pill marks a path of conformity with society's expectations. Men trapped at this level don't even know that they don't know. They are hypnotized and caught in the hamster wheel of going through the motions. They take what they are given. They are mere spectators in life, leaves in the wind, running on a script that was handed to them. They don't ask questions. They do what they are told.

Level 2 – Choosing the Red Pill

Choosing the Red Pill means waking up and becoming aware of the games being played around you. At this level you are consuming the information to help you get better at these games. You are gaining knowledge on how to optimally function in a society that's increasingly lacking a positive identity for men. But contrary to popular belief, knowledge is not power. Knowledge is only potential power. Without application, knowledge doesn't

amount to shit. Merely knowing something is not enough because you can know what to do but still not do what you know.

I've talked to a lot of guys over the past few weeks, and the majority of them are trapped at this level. They've read the books, they know the theories, and they understand what's going on. Yet, they are caught up in the accumulation of knowledge and haven't gotten down to application. They justify their inaction by placing blame on external factors, failing to realize that this mindset leaves them powerless.

Loading…

Level 3 – Swallowing the Red Pill

Swallowing the Red Pill means taking what you know and actually applying it. You can read all the books you want on how to lift properly, but until you actually get your ass in the gym you're not going to make any progress. You can accumulate all the information out there on how to get laid, but until you actually get in the field and approach you're never going to get better with women.

At level 3, you understand that taking action provides access to the most information-rich stream of data. Only by taking action is the path revealed to you. Only by taking action can you gain an understanding of nuance and the areas that you need to improve on.

Knowledge can never lead to wisdom. The only thing that leads to wisdom is experience. And the only way to gain experience is by actually doing it.

Take advantage of the community, take advantage of all the resources you have available, but understand that action is the only thing that will move you forward.

Level 4 – Living the Red Pill

At level 4, you have results. You've been taking consistent action and are at the point where you actually identify with the particular belief system. It is who you are.

But "living it" is about taking consistent action. It's not like you go to the gym for 12-weeks and then never have to go again. Living as an alpha male means that you're always growing and striving for constant and never-ending improvement in every area of your life.

Call To Action

Knowing what to do is only 1% of the battle. Developing the discipline to do what you know you need to do, day in and day out, is a whole other animal. And then there's the aspect of whether or not your actions are actually moving you towards your goals. Such is life. I've been working hard on my business and my body, but it has come at the expense of my dating life. All of us are on this journey and all of us have different areas that we need to improve on. What is the one area of your life that needs the most improvement and what actions can you commit to in order to improve it? Comment below. For me, it's definitely women. Come September, I intend on traveling to either Vegas or South America and doing a minimum of 5 approaches every single day for (at least) 30 days.

As a man, your testosterone level is a major driving force in your overall health, energy, and assertiveness. Download the FREE 5-Step Blueprint that (almost) doubled my total T-level from 564 to 902 ng/dL in less than 4-months.

Why Are Older Women Chasing Young Men?

August 31, 2018 | by G.S. Luthra | Link | Original Link

In the old days when the world was more sane, marriage was between a young fertile woman in her prime and an older man who had an established career. This was sensible because the man provided resources and wealth while the woman was young and strong enough to bear and raise children. Additionally, she was attractive enough for her husband to want to fornicate with her.

Other reasons that were common sense came into play – the girl was young, meaning she was happy and eager to please. This gives joy to an accomplished man, especially after working hard for so many years in the sick cutthroat world of modern "civil"-lization. There was little to no drama between the husband and wife, because the wife was disciplined to know her place and so she knew not to even attempt any shenanigans. Order and respect were given to the father in the household. This method worked, however now in the modern age, people have more options, particularly women. With this, the roles have been reversed.

Old women with sagging skin think they deserve young hunks. Any guy wouldn't even look at such a rotten thing, but ironically enough, not only are they having intimate relationships with them, they're freaking marrying them! The roles have been reversed, now older females are bedding young studs, and because these guys lack the ambition to make money compared to their predecessors, they succumb to these old bags.

Erroneous Expectations

Today, more women who are way past their childbearing years expect to get the most virile and best-looking man. I remember seeing one time on Million Dollar Matchmaker a cougar wanted a younger guy. Even after she was set up with a fit and successful older

gentlemen, she stormed out crying and complaining that he looked too old.

Recently, I went for a swim at the beach to relax. Everything was going well—there were very few people in the water, low waves, and no annoying lifeguards. Suddenly a 47-year-old real estate agent who's been trying to get with me ever since I moved to the city appeared. I was happy that I hadn't seen her all summer, but to my displeasure she arrived. I stayed low in the water so she couldn't see my physique, and gave short replies to her chit-chat while allowing the waves to suck me in deeper. As the distance between us grew, I felt safer and was happy when she said she had to go meet her sister. Thankfully, she wasn't in a bikini, but I saw more than I wanted to.

Swimming after that was heaven. I floated while gazing at the blue sky, dove through waves, and enjoyed the sunlit sparkles on the water. There was a family of small brown stingray which made it even more enjoyable. Later on, more people came in and I had been there long enough so I got out of the water. While searching for my towel, to my displeasure she was there again. Thankfully, I saw my stuff was away from her so I quickly turned right and stood back facing while cleaning up. While walking away, my peripheral caught her lying on the sand. I let out a breath of relief and went to pick up my laundry at the condominium.

Loading…
Folding the clothes was relaxing, but then again, she appeared. She saw me by the laundry exit and again made small talk where I gave a few one-word replies while shielding myself with clothes and the drying machine. She said "Maybe I'll see you tomorrow" on the beach, but I smirked knowing I was leaving that week to see family. By the time I return, she'll be back at her school day job looking after kids as an unmarried career woman, and hopefully, I'll never see her again. It's awkward, it's annoying, but men have to put up with it in the city because there's no one to complain to.

Society's Double Standard

The leader of the MeToo movement had sex with a 17-year-old boy, yet no outrage like there was for Harvey Weinstein. Bill Cosby gets screwed and yet women get off easy. Nobody brings up the issue that if these girls were forced against their will, why did they willingly go to the homes of these men multiple times even after they were allegedly raped? It just doesn't make any sense unless you acknowledge that the rules have been rigged against men where weasel lawyers are in the sprint positions ready to pounce on every opportunity they get to sue the life out of a successful wealthy man (e.g. Angelina Jolie who expects Brad to pay).

When a man engages in intimacy with a younger female, he's a pervert, but when the roles are reversed, then the man or in some cases the boy is blamed for being a horny dog.

It's Not Working for Women

The reality is that when a man is well-settled, he has a normal natural attraction to the most desirable YOUNG women. There's nothing wrong with a man for wanting it, he's smart. That means teens or early twenties. Girls past 25, or even 21 in America and other western nations, are already screwed up.

The guy who goes after the maturer women is usually inexperienced, and looking to get his first time or thrill. Some, however, do it for money, Africa has become popular for that. But in a sane world, older guys marry younger girls as seen in Orthodox Jewish, Hindu, Sikh, Muslim, and other traditional marriages.

Women worked to present themselves as desirable housewives, not business leaders. So from now on, they are responsible for whatever happens to them. If a woman is single past her prime, it's her fault.

The Life Expectancy Of Americans Has Started To Decline

September 2, 2018 | by G.S. Luthra | Link | Original Link

Remember when Roosh said on Dr. Oz that we will see the first time in history where the life expectancy will be lower? Well, it just happened. According to Reuters Health, the national average lifespan has decreased in America and other high-income countries. Unsurprisingly, the U.S. and U.K. were at the top of the list.

What is disturbing about the U.S. is that the younger populations (20s-30s) were the concentrated age groups whose life expectancy was lower. Bad lifestyle choices and alike are the usual suspects of this predicament, but the problem seems to go much further.

These deaths may please the eugenicists like The Silicone Men of Silicon Valley, but this is concerning considering the fact that Asians are getting richer while producing at a rapid pace while the West continues to get weaker.

Losing the elderly is one thing, but if the West has no strong youth, then Asia could dominate, and you'll be living under their communist/dictatorship/totalitarian rule where you'll have no freedom or rights whatsoever. So what are the reasons for this decline? Well, it seems there are a few…

Drugs

According to Reuters, substance abuse has been growing and is a big contributor to the decline among the younger generations. This is not a surprise. Just recently a gamer who was on anti-depressant drugs went on a shooting spree. There have been other cases like the Virginia Tech massacre, the “Batman Bomber”, and an eleven-year-old boy grabbing his parent’s gun and shooting up his school.

The drug and psychiatric industry have been pulling in huge profits by getting kids hooked on drugs, but the other problem is the ease of access kids have these days to over the counter medication without needing a prescription. College students are at risk for suicide, and the numbers have reached scary amounts. The stress and pressures of life are making a lot of lost and confused students to drugs which makes them crazier, eventually leading to suicide. Big name universities like Rutgers, have very high student suicide rates, yet it’s all kept hush hush.

Obesity

FAT people have been sprouting like weeds in America, and that leads to more health problems resulting in shorter longevity. Blame McDonald's, attack Monsanto, point the finger at high soy and high carbs… it doesn't matter. Those come into play, but it would not have affected things this much if people weren't suffering from the next problem.

Lack of Exercise

Loading…

To some, diet matters little so long as you move your body. Growing up, I've seen people, including myself, who ate horrible diets consisting of Big Macs, Quarter Pounders, pizza, fries, and everything else you're not supposed to eat. However, they exercised – baseball, basketball, football, tennis, etc.

Playing outside kept us skinny despite our diets being a recipe for a heart attack, which would make the doctor gasp. This liberalism pushed on people today, particularly women, is contributing to the problem.

Step climbers, treadmills, and spin classes aren't going to do jack. Strength training, calisthenics, and sprinting should be advocated instead with recreational activities such as swimming should be promoted. I don't care if they play ping pong, I don't care if they play tag, hey, it kept us skinny growing up.

Alas, playing outside has become a thing of the past. I see more elderly folks at tennis courts than I do kids. When I used to go to parks for pull-ups, they were deserted. Orthodox Jewish families, however, were there some days and their women are thin compared to standard Americans.

Junk Food

Too many people are consuming candy, cookies, processed foods, high carbohydrates and sugary foods which are further contributing to the decline in health and longevity. The young that are left are usually feminized and weakened. These foods give people sugar highs like a drug, and contain high fructose corn syrup. That's why diabetes is one of the major killers in America.

Sedentary Lifestyle

How long do you think this guy would last in a forest?

Trash TV, texting, internet, phone, desk jobs, this has created a nation of fat useless pigs waiting to be slaughtered. New studies are emerging that suggest that remaining in these positions for prolonged periods of time cause health problems because the circulation is cut off to vital organs leading to ailments.

Many Americans suffer from constipation, weak eyesight, and protruding guts, and other modern problems like hunched over shoulders and crunched-over neck.

Until people make changes in their lifestyle, these continued habits will further contribute to the decline of longevity.

Red Pill Lessons From The Final Season Of “The Wonder Years”

September 2, 2018 | by Lucas Simon | Link | Original Link

A ritual my wife and I often do after putting the kids to bed is watch a TV show together. With most of the current TV shows being subpar, and since we recently cut our cable, we decided to go with an older show. Our app “Kodi” has an infinite number of TV shows and we agreed to watch The Wonder Years as we both have fond but vague memories of the show.

The six seasons of the show ran from 1988-1993 but takes place from 1968-1973. It may have run longer but even in the early 90’s Hollywood got an early glimpse of the destruction from the #MeToo movement. The first five seasons brought about your typical comedy, but the sixth and final season brought about truths that many in the manosphere know.

Jack and Norma Arnold

Jack you worked so hard today, I made your favorite dessert!

Jack (Dan Lauria) and Norma (Alley Mills and the late Andrew Breitbart's mother in law) are your prototypical American couple. Born and raised during the era of the Great Depression, they display conservative values but have faced newfound difficulties raising their Baby Boomer children.

Season 6 sees a shift in character for Norma. She spent the first five seasons being the super stay-at-home mother. By the early 70's—and spawned on by the feminist movement—she feels the need to seek something more "meaningful." With their youngest child, Kevin, a year from graduating high school, she no longer believes that being a housewife will bring her happiness. Feminism told her that she would be empowered by getting into the working world. Shortly after, you see the order the Arnold house fall apart. Not many would foreshadow the effect a two-parent working household would have on the family, but at least she raised her kids to 17 before falling into the traps of feminism.

On the other hand, Season 6 sees Jack take a positive spin for his career. The first five seasons he was busting his back in the corporate world but decides to become the owner of a furniture store. You see his character become lighter-hearted in season 6, and that could be because of the sense of fulfillment that he finally had in being self-employed. ROK has been at the forefront of advising men to stop working in the corporate world and start working for yourself.

When I originally watched the series, I could really only relate to Kevin Arnold and his peers. It was sobering to find out that this time around, I actually related to his parents just as much as the teenagers. Jack came from the "Silent Generation" and his mentality was not to speak out against the rebellion of social norms. This mindset is what allowed the hippies to flourish and basically turn this country into what it is today. By the time he tried to reign in on his teenage daughter's behavior in seasons 1-4, it was pretty much too late. It serves as a stark reminder for me as a father of two young kids about how important it is to be active during the formative years of their lives.

Loading…

Winnie Cooper and Hypergamy

et tu Winnie?

If you were a red-blooded American preteen/teenage male in the late 80’s to early 90’s, you probably had a crush on Winnie Cooper (Danica McKellar). Kevin (Fred Savage) and Winnie have been going out off and on since Junior High. A brief change in Winnie’s attitude toward Kevin is apparent in the last few episodes of the series.

Kevin scores a respectable 1240 on his SAT but Winnie scores over a 1450. Winnie now has an abundance of college options, but her longtime boyfriend will most certainly not get accepted into whatever college she chooses. Then Kevin makes the mistake of telling Winnie that they should take a “break”. If Kevin would have had access to the manosphere in 1973, he would know that a cute 17-year-old female has way more options than an average 17-year-old male. Within the same episode, she ditches Kevin for a tall handsome Chad of a lifeguard. Even the sweet, little Winnie Cooper cannot resist the traps of hypergamy because AWALT.

Wayne Arnold

Who that is, that’s just my baby daddy

Wayne (Jason Hervey) portrays every terrorizing, annoying older brother perfectly. He graduates high school at the end of season 5 and we see a different side of Wayne in season 6. He starts to change when he meets the 23-year-old Bonnie. On the surface, things seem okay, but it turns out Bonnie is a recent divorcee with a 6-month son.

Wayne’s parents try to appear nonjudgmental but they express their concerns about this

relationship to Wayne. The red flags were there: the divorce, child, and jerk husband, but Wayne was blinded and ultimately gets his heart broken when she leaves him to get back with her ex-husband. In 1973 this was so out of the norm that a majority of men may have white-knighted to help this damsel in distress. To this day there are countless average men who have made the sacrifice and taken on the role of a stepdad, only to have this taken away from them as their partner leaves him for her ex-con/loser baby's father.

Rewatching the whole series reminded me of how great of a show it was when it was on, especially season 6 because of the situations described from above along with other subjects like veteran PTSD, the losing connection of a childhood friend in Paul Pfieffer, etc. Of course, having red pill knowledge makes you evaluate these situations with stronger insight.

The era was the start of a lot of downturns in our society, but people still had that genuine friendliness of them that has almost all but evaporated 45 years later. Living in an era where people lived with gender roles clearly defined can truly be referred to as "The Wonder Years."

6 Job Ads That Reveal The Anti-White And Anti-Male Agenda Of Corporate America

September 3, 2018 | by John Carver | Link | Original Link

By now, we are pretty well aware of how most white-collar jobs in the United States and other western countries absolutely blow for a myriad of reasons.

A huge percentage of them only exist for selling an arguably useless vanity product, in lieu of an essential service that most skilled tradesmen or specialty doctors provide. Others objectively make society **worse** by promoting mass media degeneracy (Buzzfeed etc) or AIDS-spreading sexual promiscuity (Grindr apps etc).

Many office environments are clearly becoming 70% or more female, and there is increasingly a dearth of white men in such places other than the CEO or upper management positions. Many of these men are often Jewish on closer inspection. Certainly not a member of the USA's core Anglo-Germanic stock of yesteryear.

This stands in stark contrast to the idea that everyday Christian white men are still the "supreme" choice in being hired above all other candidates.

What social justice wants to make you “think” about current hiring practices

Additionally, a lot of today’s job advertisements are clearly indicating that—presumably heterosexual—white men rank near the bottom for what many employers seek in new candidates. This article will provide six examples of employment ads seen on Indeed.com, which shows it **literally** pays to be non-white or a woman.

1. Jewish Supremacy

Director of Jewish Enrichment, Immersives

BBYO ★★★★★ 9 reviews - New York, NY

Apply On Company Site | Save this job

As the Director of Jewish Enrichment, Immersives, you will report to the Associate Vice President for Jewish Enrichment and be responsible for working with BBYO staff, teens, and volunteer advisors along with other stakeholders to coach and train around the planning and implementation of activities and content that deepen Jewish impact.

You will be responsible for developing high-quality, high-impact experiences in a variety of settings, from small group chapter meetings and community-wide events to weekend conventions and multi-week domestic and international immersive experiences. Through your leadership you will be helping us achieve our organization's core educational outcomes to:

- Identify: Strengthen Jewish Identity
- Connect: Create Jewish Community
- Improve: Change the World

Core Responsibilities:

Educational Coach and Resource Provider: Train, inspire and empower BBYO staff, teens and volunteer advisors to deliver (plan, implement, support, facilitate, assess) meaningful Jewish experiences across the BBYO movement.

Just leave the world alone please…

Along with Tel Aviv, New York City is the most Jewish city on Earth, so in many respects this advertisement comes as no surprise. However, replace all instances of ‘Jewish’ with ‘White’ and suddenly this ad will look like it came straight from ‘Mein Kampf’ according to

modern leftists.

Not only is it insanely hypocritical for the Jewish community to create such initiatives specifically for their own enrichment (when they are the most active group involved in crushing any white identitarian movements), but it looks like 98% of their "fellow white people" in the United States can't expect to be hired for this position anyway.

2. Superior Benefits For Women

We hear spiels about "women's economic empowerment" and "gender wage gaps" and "workplace equality" seemingly all the time. So why are women afforded vastly superior parental leave benefits compared to men if they truly want to take this "equality" stuff seriously?

If I was personally running this business, I would see absolutely no benefit whatsoever to hiring any women under the age of 45. Any pregnancies at work would result in me losing **two entire months** of productivity that would not be lost in an all-male environment. Many soon-to-be fathers would, in fact, be willing to take no paternity leave at all, so that they could bring in additional income for their growing family.

3. Easy Money For Attractive Women

Okay, it's not specifically an "office" environment (other than the casting couch), but this job advertisement shows precisely how easy it is for young women to get a quick nest egg compared to young men, and with minimal effort to boot.

There are **very few** jobs in the nation where an 18-year-old man can expect to earn anywhere near this low-end of $75,000 a year. Especially where just a "high school diploma is fine" and without any formal trade skills. In fact, many college-educated men and other skilled tradesmen won't ever earn $75k a year at any point in their lifetime.

Loading...

4. Hire Only The "Marginalized"!

Employers in the United States are (supposed to) not be allowed to discriminate in their hiring practices on the basis of race, gender, sexuality, marital status, and other criteria. So why are so many now being open in essentially saying “straight white men need not apply”?

When this job placement is saying “people of color, women, people with disabilities and LGBTQ candidates are very strongly encouraged to apply”, you know they are already adamant in their mission of hiring one of those types. All while still giving the veneer that everyone has “equal opportunity” for the job.

5. Bow To The Altar Of Social Justice!

Racial Equity Strategist

Google 2,081 reviews - New York, NY

Apply Now

Responsibilities

- Use subject matter expertise on race, intersectionality, and adaptive leadership to set the strategy for shifting cultural norms and revising it based on feedback, organization cultural norms, and persistent dynamics.
- Deepen the impact of the strategy by evolving process designs, lab content, structure, pace, and activities, building the brand narrative, and reflect on missing elements.
- Re-imagine and re-engineer internal systems, processes, norms, and values in a way that centers race and its intersections across the EDII pillars in partnership with the SI&O Partners and the EDII Leads.
- Employ useful facilitator moves, responding consistently to avoidance and resistance, attends to whoever is speaking and can grasp the significance and meaning of comments while facilitating.

Qualifications Minimum qualifications:

- Bachelor's degree or equivalent practical experience.
- Experience with racial frameworks (i.e. structuralists, belief-centered, critical race theory, intersectional race studies, queer theory).

Fetch me a barf bag because I'm going to be sick….

Not only do you know that Google is going to be offering a low six-figure salary for this epitome of a "make work" job, but you can rest assured it's going to go to anybody but a heterosexual and non-Jewish white male. In fact, it probably **will** go to a Jewish person of some kind.

"Setting the strategy for shifting cultural norms" and "critical race theory" sounds very Frankfurty.

6. We Will "Consider" A White Man… But…

Being both “equal opportunity” and “affirmative action” in the same sentence is an oxymoron if I ever heard one.

A white male maybe has a chance at landing this job if he’s a “rock star” or “ninja” among other eye-rolling office superman terms, but a black female army veteran with Asperger’s syndrome is right on the money.

After all, white men need to “be quiet and listen” in school or the workplace now, so that more historically marginalized voices can be heard in the name of diversity and excellence.

Conclusion

Non-whites can't be racist and there is no such thing as "toxic femininity"

There is no shortage of resources on Return of Kings which shows how unbearable white-collar work has become for masculine and conservative men of any race (1, 2, 3). However, it's undeniable that white men in the United States and other western countries are having to metaphorically devour a particularly foul shit sandwich in the name of being "inclusive". All courtesy of human resources and social justice.

So either get into male-dominated fields like the trades, study something so in demand that petty discrimination is non-existent, or strike out on your own with self-employment. Because things are only going to get a lot worse with white-collar work before things get better. Kind of like South Africa.

When You Set A Goal, You Inherit A Lifestyle

September 3, 2018 | by Roosh Valizadeh | Link | Original Link

The following article was originally published on Roosh V.

Upon setting a goal, you fantasize about the pleasure you'll receive from accomplishing it. The problem is that only a tiny percentage of your overall time is spent enjoying the actual goal. Instead, most of your efforts go into the *tasks* towards achieving it. The work you do for the goal becomes your life, not the goal itself.

Let's say a man wants to get into game because he wants sex. He's a night person so he decides to meet girls at bars. He imagines all the drunk sluts he will sleep with. Even if his game is good, most of his time will be spent at the bars drinking alcohol while a tiny percentage will be spent in actual fornication. His life is not one of sex, but of going to bars.

An obese career woman sits all day at work and binges on junk food at night. She is starting to have back and knee pain. She imagines being thin, more beautiful, and free of pain, so she goes vegan and signs up for Crossfit. Her life now becomes that of veganism and Crossfit, which will dominate her free time. Even when she hits her health goal, she will spend that renewed health to continue being a vegan while doing Crossfit instead of just being healthy in isolation.

Fame works the same way. You work so hard to achieve a goal of receiving adoration from the masses, but your lifestyle becomes one of self-promotion and using Twitter, Instagram, and Facebook. You're forced to spend hours a day referring to yourself in a positive manner instead of receiving the love that you imagined.

Loading…

Whatever you do to achieve a goal becomes your lifestyle. The goal is the dessert, the 1% reward from your efforts, but there is the 99% that you must continually do to maintain the goal. Are you ready to labor and obsess over trivial activities so that you can reach your "dreams"? Because that's the price you must pay when you set goals. You're trained in the West to believe that things are "worth it in the end," but most of the time it's not. The goal is a way to keep you busy and distracted.

As I mentioned before, the best goal is one where you enjoy the entire process. Merely craving the end goal will not be enough. A lot of men want to get laid with beautiful women, but they can't maintain continuous effort of hunting for them on the streets or bars. A lot of men want big muscles, but they can't maintain a continuous program of working out in the gym or watching their diet. If these men set goals around sex or muscles, they will fail. I have a goal to finish books, and since I like the process of writing, my goal is an inevitable conclusion of what I like doing, which means I'm likely to succeed.

A man with multiple goals is stretched too thin, because all of his energy and willpower is being used to maintain multiple lifestyles. He thinks the more goals the better, because then he will reach his potential and enjoy the fruits of life, but those fruits are such a tiny percentage of his overall goal work that he's slowly burning himself out doing things he doesn't feel passionate about. Set a goal, but understand what lifestyle you'll be forced to inherit while you try to achieve it.

2 Masculine Autobiographies That Are Often Overlooked

September 3, 2018 | by Alfonso Taft | Link | Original Link

There are great lessons to be learned in the biographies of prolific men. Contemporary masculine biographies are somewhat rare considering the massive pussifcation that's taking place. Luckily, the manosphere provides an outlet for men looking to escape the horrors of clown world a place to study the plights of modern-day alphas who live a masculine lifestyle despite a demonstrably feminized culture.

Within the biographies highlighted below are lessons in game, SMV, determination, life, and success. Before reaching high status, both of these men spent time at rock bottom.

The Rock

The manosphere is stocked with content about turning betas into alphas — but what about those of us who were born physiologically alpha? How do we enhance our alpha game? How do we stay engaged in the game when we're given a genetic advantage over most competitors? Overlooked in the manosphere no longer is Dwayne Johnson's 1999 autobiography The Rock Says.

A physical specimen by the age of fifteen, Dwayne "The Rock" Johnson discovered his alpha game early.

"I was fifteen years old and looked like a grown man. And I was constantly in the weight room, jacking iron for two, three hours a day."

Alpha Game

The Rock is a man who has checked man-a-buttcheek into the Smackdown Hotel. Equipped with an alpha mentality fueled by lifting, dedication, and competition, the power of confidence and charisma came to The Rock naturally and his game was deduced to a simple rule:

> "If you acted confident around girls, they naturally assumed you were mature and experienced. It was all a game, and I excelled at it from a ridiculously early age."

Charisma is a key component to enhancing one's alpha game. The flashy, 270-pounder known as "The most electrifying man in sports-entertainment" is a case study in charisma. If you want to study charisma, study The Rock. There is nobody else that needs to be studied in this subject. Observe:

An element of charisma is the art of talking shit. An artform The Rock perfected while playing football at The University of Miami and later as a professional wrestler. Talking shit increases alpha status to prolific levels and is a skill reserved for advanced alphas only.

Determination

When Alpha game charisma is combined with status, a man becomes a force of nature. The Rock acquired his status via fierce determination despite devastating setbacks.

While at The University of Miami, The Rock was beaten for the Defensive tackle starting position by NFL legend Warren Sapp and later suffered a catastrophic injury during his senior season. Dwayne "The Rock" Johnson was overlooked by the NFL and decided to take his talents to Canada where he was "playing professional football for approximately $250 in U.S. currency. Take-home pay? About $175."

A far cry from the uber-celebrity we see now, The Rock remembers a time when "None of us could afford a car, we had to borrow a teammate's truck. We all piled and headed off on a glorious quest for bedding. We had no intention of buying anything. We were counting on the kindness of strangers. After a while we found a crappy motel that was in the process of replacing all of its mattresses."

Loading...

> "And that's the way we lived — four grown men sleeping on piss-stained mattresses in a small, unfurnished apartment."

In 1995, when The Rock had $7 in his pocket he claims he "Knew Two Things: I'm Broke As Hell and One Day I Won't Be." He was correct. His alpha mentality could not be shaken by the coldest of Canadian football winds or the dampest of used mattresses. He later left Canada and began a career as a professional wrestler like his father and grandfather.

Click here to view The Rock Says on Amazon.

Anthony Kiedis

Few men will reach the arena of rock star game. Anthony Kiedis, lead singer of The Red Hot Chilli Peppers did in a big way. For men, Scar Tissue offers a lesson in SMV and for those looking to take the Rock Star route — it doesn't seem like a bad play.

Personally, I've fallen victim to rock star game when I lost a model girlfriend to a short, fat, techno DJ. The neighbor I grew up with is a bass player in a metal band and is now accompanied by a 12 out 10 IGthotmoodel girlfriend. Rock star game might be the most elevated of all. Few can match the SMV of a wealthy, high status, risk-taking leader with a massive following.

The confidence of Kiedis is paramount and he seemed to have total clairvoyance in regards to long-term relationships.

> "At that very moment, my destiny became clear to me. She was my new girlfriend. As she walked into the room, I whispered to every dude who was near, "Back off. That's my girl." Then I walked straight over to her.
>
> "Hi, my name's Carmen," she said. "I'm visiting from San Diego."
>
> I introduced myself and told her that we'd be hanging out for the next year or so, and she seemed amenable."

Rock star game is fruitful, although there are some dangerous pitfalls. *Scar Tissue* works as a cautionary tale for aspiring rock stars. There are tons of drugs, and I mean TONS of drugs bought, sold, and consumed in this autobiography. Seemingly pleasant songs like "Scar Tissue" and "Under the Bridge" are about heroin. The amount of junk in this

biography makes a man feel naive. Anthony's father was a notorious Southern California drug dealer named "Spider."

> "If Keith Moon or the guys from Led Zeppelin or Alice Cooper was in town, they'd be sitting with Spider, because he was the coolest guy in the house."

The only thing that curves Kiedis' insatiable appetite for hard drugs are the beautiful women he draws inspiration from.

Muse Game

Scar Tissue introduced me to a new concept, the muse. The muse, or divine feminine inspiration is used by Kiedis throughout his career. He is not purely a hedonist, rather, he falls in love frequently. For a truly red pilled man it is wise to draw inspiration from the feminine versus the black pilled incel who sees women as a point of frustration and despair.

Click here to view Scar Tissue on Amazon.

Conclusion

Masculine biographies are like studying a playbook. A blueprint is provided for a successful masculine lifestyle. It's beneficial for men to study the plights of other prolific men as a way to guide their own life. Perspective is a valuable tool.

What Is Game?

September 4, 2018 | by Roosh Valizadeh | Link | Original Link

---

*The following is an excerpt from the first chapter of my new book **Game**. Click here for full details.*

Game is a collection of beliefs, behaviors, strategies, and tactics that make women more attracted to you while increasing your likelihood of experiencing intimacy. It's often based on cold approaching, an active strategy where you walk up to a girl you don't know and present yourself in the best way possible so that she decides, at some point, to have sex with you. Game can also be used on girls within your social circle, a more passive strategy where you have to be less aggressive, because a hard rejection may lower your status within the group. It doesn't matter if you are rejected a dozen times a day when cold approaching, because you probably won't ever see those girls again, but within a specific social circle it's best not to work on more than one or two girls at the same time to keep conflict and drama at bay.

The popular misconception about game is that it's simply a collection of pick-up lines where you walk up to a girl and say something cheesy while wearing an outlandish hat. Not only is it more strategic than that, but game has evolved into a more holistic program of changing your appearance, behavior, and living habits. I remember the days when boldly approaching a girl was enough for her to think you were confident and attractive, but now that girls are approached so frequently, how bold is she going to think you are when you're the third guy to speak to her that day? As time passes, higher levels of game are required to accomplish the same result.

Back in 2002, the game I needed consisted of rubbing my crotch against a girl's ass while dancing, asking "What is your name?" after a few songs, having a short, banal conversation before resuming crotch-on-ass dancing, and eventually getting her number. Not only is that type of game insufficient today, but it may get you kicked out of the nightclub.

When I got a girl on a date, I would use the “roller coaster” routine that I found on the internet. I’d tell her about the experience of going on a wild roller-coaster ride, up and down, up and down, and how thrilling and exciting the ride was, and how I wanted to go on this ride again and again. The goal of this sexual metaphor was to make the girl horny, and although I’m not sure if it ever did, I never received a bad response. If I tried this routine today, the girl would stare at her iPhone before announcing that she has to leave.

I used countless other awkward moves successfully, but now girls expect much more. If you’re living in a hyper-competitive city that has as many men as women, your game has to be above average just to pull a cute girl, and once you find an effective game strategy, you’ll continually have to improve it so that the tens of thousands of men who are working on their game don’t surpass you.

On the surface, it seems crazy that a man has to put in massive amounts of work in order to have sex with the women he wants, but men who don’t use game, who toil in jobs or businesses to accumulate money and fancy cars in order to impress women, are doing the same thing. They’re just relying on “provider” game that used to work before women made their own money or had a wide choice of who to date. Because having a good job or car is no longer a reliable way to secure the affections of a pretty girl, a more direct method in the form of modern game was developed, which has a far higher return on investment than trying to impress a girl with your career or material possessions.

All around you, men are working hard to get sex, from learning game, opening bars, incurring massive debt to appear rich, or trying to become famous. I’m in my late thirties and can go an entire day without thinking about sex, but I remember when I was in my twenties and couldn’t go an hour. I won’t ever shame a man for moving mountains in order to get laid, because I know that when your hormones are at their peak, you don’t want to hear rational explanations or embrace Buddhist ideas about not desiring pleasure. You want sex and you want it now. My job is to help you meet that need in the

healthiest way possible while preventing it from ruining your life.

The bad news is that it was easier to help you move that mountain years ago when few men were game-aware and only a small percentage of the female population were lesbians, morbidly obese, or green-haired man-haters. There are more men eager for sex with attractive girls than there are attractive girls. This crisis of supply and demand means you will have to work harder to get even less than I did when I was running game full time in the early 2000s, and young boys today will face an even greater struggle than you when they grow up and become men.

I fondly remember one of my first successful nightclub pick-ups back in 2001. It was my third or so visit to the club after graduating from college. I had no idea what I was doing, but I wanted sex badly. I tried my crotch-on-ass dancing move and it worked on a cute Filipino virgin. She gave me her number and I called her. I managed to get her out on a date where I essentially rehearsed memorized routines I had read on the internet. I guess they worked because she allowed me to kiss her. On the second date, I invited her to my apartment. She put up heavy resistance when I tried to take off her clothes, so I did the first thing that came into my mind: I put on a VHS tape of hardcore pornography. It didn't work at getting off her clothes. Do you know what I did next? I gave up! I just stopped calling her because I didn't know what else to do.

It's a miracle that I got as far as I did, and I wonder whether today an attractive Filipino girl of her age would respond to my moves in the same way as the virgin did more than fifteen years ago. Chances are she'd have over 1,000 thirsty male followers on Instagram and get approached in the club by guys who have a more refined technique than my crotch-on-ass move. Back then, the Filipino girl didn't have many options, so my awkward self was enough to get her out on a date, but today she could pick and choose from a

greater supply of men.

A low level of game used to get you dates with attractive women, but advances in technology—particularly the invention of the smartphone—have turned game into an arms race, where every year the level of game that women expect rises in tandem with their options. I experienced this directly in Toronto when I visited in 2013. From the girls I talked to, I noticed that I was being evaluated on *every* joke I told. They would actually complain if a joke wasn't great, and suggest that I was "losing" them because of it. Instead of wanting to connect with men, the girls acted like they were attending a comedy show, eggs in hand, ready to throw them at the comedian if he didn't make them laugh hard enough. It's no surprise that a substantial percentage of my readers come from the Toronto area.

Another reason for the game arms race is the existence of teachers like me. My websites and books are training a large number of men to use game. The more men who know how to use game, the harder things get for every man, because the standard of game that women expect rises. Fortunately, I'm finding that game is becoming *less* popular than before. The younger generation of men is becoming lazier and softer than men of previous generations, mostly because they are addicted to video games, porn, estrogenic soy products, or social networking. This tells me that the technology which allows women to have more dating options is a far greater contributor to the need for higher levels of game than the availability of game knowledge alone.

Whatever the reason for the game arms race, the reality is that you have to become like a doctor who must keep up with the latest medical advances to try improved treatments on your "patients." Thankfully, once you have a basic foundation of game, it's quite simple to maintain it at an optimal level, and by then it's likely that you'll have

discovered a niche or two that reduces the amount of work you have to do.

An additional factor that makes game necessary is that the ratio of men compared to women in the population is far higher compared with the past, when frequent wars killed men almost exclusively. Although I do not wish for a huge war to make my sex life easier, the period of peace and stability we're living in is one of the factors that led to the creation of game in the first place. If there were two women for every one able-bodied man, a book like this wouldn't even be necessary. Instead, *women* would need books on how to compete for the few available men.

Game ends up becoming a scavenger strategy in any environment where there is a decreasing supply of quality females who have unlimited choice on who to date. It works in any society with loose sexual norms and declining birth rates, factors that signify the breakdown of the family unit and the promotion of "free love," where people have sex just for fun. There is a reason that my books don't sell well in countries with high birth rates, such as those in Africa, or where the traditional family is strong, such as those in the Middle East.

The more fractured a society is, the greater the opportunity for game tactics to be useful for men who desire sexual relationships, as long as they continually upgrade their game or find niches that enable them to achieve consistent results among a fickle and bored female population.

The above excerpt was taken from my new book ***Game****. It has been released on paperback, e-book, audiobook, and Kindle. Click here for full details.*

Jews Are Not Entirely To Blame For The Ills Of Modern Western Society

September 4, 2018 | by Larsen Halleck | Link | Original Link

If you make the mistake of reading the work of mainstream journalists, you'll notice that many of them are writing about the sudden and inexplicable rise of bigotry in America in general, and anti-semitism in particular.

Some blame it on the increase of Muslim immigrants to the west, some blame it on the rise of white supremacy and the burgeoning alt-right, but almost everyone agrees it is happening.

Pearls are being clutched left and right

As someone who has a non-hostile view of the Chosen People, and has discussed this issue with said people, I have to recognize there has indeed been a general increase in anti-Jewish feeling. But why is this the case?

Ignoring the delusions of Holocaust deniers and other hysterical idiots who "See Jews in their sandwiches," we can instead look at what is objectively documented. And considering that we see…

…Jews continuing to hold the most minute of grudges a century after the fact.

…Jews showing a barely veiled contempt for the white American gentiles who have never oppressed them.

…Jews manipulating historiography for their own purposes.

…Jews switching between being white and being non-white when it suits them. (I ought to mention the "white/non-white" switch again, because it happens a lot… quite a lot.)

…That Jews are never entirely sure about whether or not they're a religion or an ethnicity (this last one is actually really important, considering that a lot of the "poz pushers" seem to be non-practicing Jews, rather than religious Jews).

…Jews constantly deny the fact that they are disproportionately represented in banking and the media and the "one percent" on the whole.

…Jews will often push the "white privilege" narrative, but will deny that that same narrative can be applied to Jews.

…Jews are involved with many (not all, but many) examples of "poz" in modern pop culture *and freely admit that they're doing this to stick their thumbs in the face of the gentiles.*

…Jews are also disproportionately represented in many of the political/cultural ideologies that we in the reactosphere hate, from neo-conservatism to feminism and all of the other odious facets of the new left (another fact that is often denied).

…Perhaps we can argue that, to at least SOME extent, Jewish behavior causes anti-semitism?

Yeah a little like this (as a side note, it was a little tricky not using anti-Semitic imagery for this article)

Note that this duplicity is mainly in diaspora Jews. Frankly, I much prefer the way they do things in Israel—at least they're honest about their nationalistic and conquering ways.

Two things to point out here—The first being that I am well aware of the long history of anti-Semitic violence and abuse in Europe. Years of being discriminated against and attacked are likely a cause of the infamous Jewish insularity and distrust/barely veiled hatred of "the goyim", which has in turn led to even more anti-semitism, and it just continues in a vicious cycle. Both sides have probably been guilty of wrongdoing against each other, to varying degrees. So let us admit to that.

The other thing to point out here is that, contrary to the beliefs of the aforementioned 1488 crowd, the Jewish people are not, in fact, in lockstep in doing "what's best for the Jews". To illustrate that, all you have to do is look at the differences between Jews in Israel and Jews in America—it's like night and day! And to further elucidate, there are many citizens of Israel who are against the militarism of their fellow countrymen.

So, knowing all this, why are things this way, and what is to be done?

Much ink has been spilled in trying to answer why the animosity between Jews and Gentiles still persists, considering the fact that the Gentiles, at least in America have gone well above and beyond in trying to make amends for any past bigotry—and frankly, in the USA at least there wasn't that much to begin with.

Like I said above, there's a long history of hatred between the two groups, and such a

thing won't go away overnight—especially when the cultural/political climate of the day actively encourages hatred and contempt for the "evil white man". And if one can gain an advantage in suddenly becoming non-white, then why wouldn't they take it? Hell, if *white gentiles* have stooped so low as to pretend to be some other race for the sake of getting ahead, why would you expect Jews not to?

As for what is to be done? Like I said, there are many Jews that don't subscribe to the perfidy that has made the group on the whole so disliked—frankly, most of the Jews I've known have been good people, far from the duplicitous villains that I referenced previously. Sadly, like seemingly all other identity groups, those chattering people who claim to speak for Jews on the whole *are* that sort of person.

I don't think it's too much to ask for the Jewish Alternative types to continue to be promoted from their own platforms and spread their message. As I've repeatedly said, such efforts to steer a culture's morality have been done in the past...

And now that the Jews have thoroughly held the ball in their court, let's look at how the gentiles can carry their end of the bargain!

While I am willing to criticize the actions of many individual Jews, and objectively analyze why those actions may cause some to become anti-semitic, I am not, and will never jump, on the "blame Jews for everything" train. In fact, as the title would imply, I write this article to implore you to stop blaming the Jews for everything. Because sometimes, you yourself are to blame.

Loading...

"What do you mean?" you might be asking yourself—allow me to explain. In my not-so-humble opinion, the Jewish prevalence in "poz" is not the knife that's stabbing the virtuous and noble "goyim" to death, but rather it's the cherry on top of a goyish shit

sundae. In other words, if gentiles weren't such degenerate and corrupted cretins, then even if the Jews were a united front in spreading moral decay and "poz" (and they're not), it wouldn't be effective! In other words, the Jews can only push as much "poz" as the gentiles allow them to.

I'm not the only person to point this out, but the Jews are a tiny minority of people in the world. In the United States, the "Zionist Occupied Government" itself—note to critical readers—I'm using the term sarcastically, hence the scare quotes—Jews are only about 3% of the total population.

So why do the other 97% allow the 3% to push them around?

And no, don't whine about the "Holocaust Industry" being the source of their power—Jews never faced anti-Semitism in the US to a large degree, and even in the 1800s there were Jewish governors and senators and admirals and generals. There were prominent American Jews largely from the inception of the United States, and it's inane to think there was some sort of shadowy Yiddish cabal planning a political takeover out from the beginning.

In terms of politics, there have been several Jewish political figures that have pushed legislation that has been disastrous for the USA, but there's always been a gentile right alongside them. To cite two examples, Wilson signed the Federal Reserve Act, and Ted Kennedy signed off on the Hart-Celler Immigration Act—and for that matter let's not forget Phillip Hart himself, he was no Jew.

Overseas, we can see gentiles and Jews being equally responsible for political malfeasance. Many anti-Semites like to talk about, for example, Lazar Kaganovich and Leon Trotsky being Jewish—and indeed they were. However, Karl Marx was a Jewish apostate who openly renounced the Jewish faith and wrote polemics against it. Lenin wasn't Jewish (no, Lenin's maternal grandfather being a Jew who converted to Christianity doesn't count), Stalin wasn't Jewish, Mao Zedong wasn't Jewish, and so forth.

"It's the media!" many of you are probably saying right now, and this proves my point better than anything else—the gentiles are not innocent victims of "the Jew", but rather his eager cohort and participant.

Let's again be honest: Jews are extremely disproportionately represented in the media, and some of those media creations are indeed objectively terrible and morally bankrupt. But guess who's also eagerly lapping that garbage up? Dumbass goys!

The entertainment industry is an industry, which is to say a business. If it was felt there was a market for upright and decent media, they'd be making it. Do you honestly think Jewish media CEOs are SO dedicated to "corrupting the white man" that they wouldn't miss out on a money-making opportunity to make highbrow and artistically beautiful works? They're not stupid; they can see how doltish the modern gentile population is, and they're targeting their productions to that lowbrow demographic.

You can look at Michael Bay's entire filmography to see that gentiles can make terrible pop culture in their own right**.**

But even if everything bad about pop culture came from a Jewish source, I must ask again: *why is a tiny minority population in control of a major industry?!* Why is the majority allowing a minority to boss them around?

For that matter, what's stopping goys from making their own movies and music and TV shows? On second thought don't do that, you'll probably make *Fireproof* or *Saving Christmas* or some other unwatchable garbage.

And now I'm gonna posit the thesis that's really going to piss people off: When you run around blaming "the Jews" for all your problems, you're no different than the most delusional of black people blaming "the white man" for all of their problems.

When you accuse the Jews of shutting gentiles out of the upper echelons of society by being clannish and xenophobic, how is that any different from the Rainbow Coalition blaming "white privilege" for why they're less successful than white people?

When you accuse Jews of magically imposing guilt and degeneracy on an entire population and controlling the world through nebulously defined resources, you're no different than the "We wuz kangz" crowd talking about how they used to fly pyramids and have psychic powers until the white man "stole" it from them somehow.

You're not much better, Ace.

When you claim that whites are the master race and yet Jews have utterly cowed and defeated them, you're again like the "kangz" crowd—and the most insane subset of that crowd, too.

And considering my previously stated views on how the Neo-Nazi retards hijacked the alt-right and ran it into the ground, I'm going to go out on a limb here: In being subversive

and manipulative and successfully changing a political movement to serve them, in being clannish to the point of idiocy, in being propagators of “righteous” degeneracy and perversion… neo-Nazis are basically the Jews of white people. Or at least the odious, far-left wing subset Jews of white people.

So ignoring that semi-facetious segue, let’s get serious again: please, stop crying about the big bad Jews holding you down. While I criticized the actions of some individual Jews in my previous article, that was written with the goal of reconciliation, “tough love”, and making peace between Jews and non-Jews.

If you really want to fix the problems you claim exist, the media “poz” being the one that is the closest to actually existing from what I see, then do it positively and constructively. Turn off the TV, stop paying for garbage pop culture, and make your own parallel institutions.

How A 23-Year-Old College Dropout Makes $10,000/Month Trading Bitcoin

September 4, 2018 | by Jon Anthony | Link | Original Link

The following article is sponsored by Jon Anthony's Bitcoin Millionaire.

I remember the last job I had, before deciding to say "fuck all" and walk off into the sunset. It was at a tanning salon, funny enough, and the gig seemed great. I was 21 years old at the time, and it paid $10 an hour, gave me free tanning, and best of all there was only one other guy that worked there…good, right? Dead wrong.

Within a week, the shiny veneer of this new job wore off, and countless squabbles between female employees began to emerge. There was drama everywhere you looked—drama over this, drama over that. How the hell is a man supposed to navigate this feminized workplace nowadays when a single look or comment can get you fired?

He's not… and that's something myself and many other men are beginning to realize. If you want to TRULY be financially successful in today's world, you need to develop an income you can control. You cannot allow your financial freedom to be tied to some massive conglomerate with a feminist-laden HR department, ready to fire you at the very first chance they get. You need to take things into your own hands, and that's exactly what I did.

My Story (And How I Made $3,000 in the Past 14 Hours)

My first YouTube video (before I knew how to make money online)

Yesterday I netted $3,000 from a single Dogecoin trade (yes, that's right—the coin with a Shiba Inu on it). I saw an ascending wedge, a direct correlation with Bitcoin's incoming bounce, and my private trading group had heard rumors of a new exchange listing. So, I pulled the trigger. It went up 40% in less than a day.

I remember the exact moment it happened, too. I literally placed the trade at 2am (I don't have a schedule, since I can place a trade 24/7), thinking I'd net maybe a few hundred bucks. The next day I woke up, went to the gym, and checked my phone while I was there. I almost spat out my pre-workout when I saw how much I'd made.

"HOLY SHIT!" I muttered out loud. My portfolio had gone up by over $3,000… literally overnight. I felt so excited and thankful that I'd taken a chance at life. If I hadn't had the courage to pull the trigger and become self-employed, there's no WAY I'd be able to wake up at 2pm each day and rake in tons of cash on my own time.

Like I said, it wasn't always like this though. Back in 2015 when I first made the decision to drop out of college, times were tough. I took a gig as an ROK writer to help get some money on the side (thank you, Roosh) and eventually started my own blog: Masculine Development.

It was a big success, and after several years of extremely hard work (writing over 200+ seriously in-depth articles), I'm able to take it easy. Now I just maintain the website with an article every week or so, and place a few trades here and there, and voila—I'm in the top 1% of earners in the United States.

How You Can Make $100,000/Year Trading Bitcoin

I'm not going to lie, when I first started trading the markets when I was 18, it took a lot of time and effort. I spent literally months and months studying, learning, taking notes, and making mistakes. After time though it paid off. I made my first trade (Michael Kors stock) and netted around 30% in just a short few months. This is about 4x what the average Wallstreet trader makes in a whole year.

Then, I went onto making 268% in just 5 months by leveraging Gold and Silver mining stocks during Brexit. In fact, I detailed how I predicted this, and give proof for my claims in an article I wrote. There is also proof above, of my buy and sell orders at specific prices. You can see I bought ABX at $7.38 and sold it at $19.32 a few months later. I made in 5 months what most Wallstreet traders take over 10 years to accomplish: a 268% return.

Things only got better though. When I discovered Bitcoin in 2017, I was very intrigued. I'd heard about it from my friend back in 2014, but didn't think anything of it. Fast forward a few years, and he was sitting on a massive pile of cash (that allowed him to buy a house at 21 with zero debt). I was immediately obsessed with the cryptocurrency markets, and began my journey learning about them. Little did I know, it would be the craziest thing I ever did, and also the most profitable thing I ever did.

10x Your Money in Just 1 Year

When I started trading Bitcoin in 2017, I was very wary—wasn't that what drug dealers used to buy pounds of heroin from silk road? I only put a few grand into crypto, but within a matter of a few months, I'd turned that $3,000 into over $22,000 thanks to the skills I cultivated from trading the stock markets. In fact, I attached proof right above. That's my Poloniex account back in December. My, how it's grown…

See, what most people don't understand is that you can make 10x, or even 100x your

money by trading cryptocurrencies when compared to stocks, for five simple reasons:

1. There Are Almost No Professional Traders in Crypto (Competition is EASY)
2. Very Few Banks Are Involved Yet
3. Crypto is VERY Volatile
4. There's ZERO Barrier to Entry
5. Bitcoin is Fundamentally Revolutionary

When you understand that these reasons will give you a 10x advantage when you trade Bitcoin, it's almost a no brainer—why would anyone start trading STOCKS when they could apply the same principles to cryptocurrency and make 10x, or even 100x the money?

Some people say that "Bitcoin is Dead," but those fools don't realize Bitcoin has been declared dead over 273 times so far by mainstream media. Bitcoin is NOT dead, and it's going to come back with a HELLISH vengeance in the next two years (according to my algorithms and predictions).

Mark my words, over the next two years, we're going to see thousands of men become financially free thanks to cryptocurrencies. There is going to be an unprecedented explosion of wealth in Bitcoin, Ethereum, Litecoin, and other alt-coins over the next few years… and the only question is, will you be in, or will you be out?

My Offer to You

Over the past six months I've put together an inside trading group with about 30 men, hellbent on becoming millionaires by 2022. Some of them, such as one of my students from India (he's only 16!), have been placing very successful trades, sometimes netting up to 15%, 25%, or even 35% in a single day.

I had initially intended to only allow 30 students into this group, because it's so coaching

intensive for me. Every day I'm answering questions, recording market updates, and telling my students EXACTLY what I'm buying and when I'm selling it.

I've decided to open it up again though to another group of 30 people, to help as many men become millionaires by 2022 as possible.

I remember being a broke, angry kid who didn't want to work in a corporation for the rest of my life… and because that story resonates with me, I want to help as many men as possible attain my lifestyle.

Every day I wake up when I want (usually around 2pm). I go to the gym right afterwards, check a few trades while I'm there, and hit the sauna. I get a nice meal nearby (usually around $50), head home, and check on my trades once more. Then I go out, game some of the girls in my city, and usually end up taking one of them home.

I have no commitments, no schedule, and best of all, NO BOSSES. I want YOU to have this kind of life, because believe me, when you feel the excitement of that "ping, ping!" on your phone going off, to let you know that you've just made $3,000 in a single day, it will all be worth it.

So I'm opening up my highly secretive course: "Bitcoin Millionaire" to another 30 students who want to get in on the offer while it's still good. Believe me when I tell you though, that you'd better act fast—because the last time I opened up the gates, it sold out within 7 minutes (no, I'm not kidding…people were PISSED!).

Some Proof of My Trades

Now I know what you're thinking… "How do I know I can trust you, Jon? I mean you wrote for RoK for 3 years, but still, I just want to be sure." That's a perfectly normal thought to have, and I know there's a TON of scammers out there, so I always try to verify my claims with actual, rock-hard, solid proof.

For starters, do you see that picture right above? That's a screenshot of a mining contract I purchased a while back. At the time, it was making me $200 a day in passive income.

I've perfected the method of purchasing mining contracts (which I cover in my course) at the EXACT right time, so that I can easily make hundreds of dollars a day in passive

income. In fact, that's only one of my contracts.

"Okay, that's cool, Jon—but how about when Bitcoin crashes? How do you know?" Well, would you have guessed that I predicted the cryptocurrency crash of 2017? See my tweet below:

> Get ready for the bloodshed. It's happening. https://t.co/Ghyk8voL7y $BTC.X via @coinigy
>
> — Jon Anthony (@MasculineJon) December 19, 2017

Right before Bitcoin tumbled a whopping 40% in just 3 days, I warned my followers on Twitter to GET OUT and sell EVERYTHING they had! Those who listened walked away with a small fortune. Those who didn't? They lost it all. Using the technical analysis and fundamentals that I teach in my Bitcoin Millionaire course, I'm able to NAIL the exact highs, and buy at the exact lows. This is something that few traders can boast.

Over the past few months, I've seen students of mine accumulate small fortunes by simply applying the knowledge I've taught them in my course. Whether they're young or old, if they're willing to take a chance, and eager to learn from their mistakes, they'll be making a six-figure income in no time at all.

What You'll Get

Like I said, I'm going to open my course up one more time, for any of you men who are eager to learn, and willing to dedicate the time necessary to make a six-figure income from trading cryptocurrencies.

Mark my words though, once that clock strikes "zero" I will close this course FOR GOOD. I've already received dozens of emails from readers begging me to get in, and I've had to

reject almost all of them, because I can't coach more than 50 or 60 students at once. It's just too much for me.

So if you're humble and willing to learn, here's what you'll get when you my buy my course, Bitcoin Millionaire:

- Complete Instant Access to the Full 12-Hour "Bitcoin Millionaire" DVD Modules
- Access to The Millionaire's Executive Suite
- Access to Jon Anthony's Personal Market Updates
- Access to the Elite Trader's Conference Calls
- Access to Jon Anthony Himself
- A Full, 60-Day Money Back Guarantee

This is a once-in-a-lifetime opportunity, and believe me, you will regret it if you don't take me up on it. When you hear about how Bitcoin hit $100,000 on MSNBC next year, you'll think back and WISH you had taken this opportunity when you had the chance. By then though, it will be too late—my students and I will be long gone.

So here is what I ask you to do… Sign up to be notified when the course re-opens, and watch your email like a HAWK. Once I send out the official release date, mark it on your calendar, and be there to claim your spot.

Learn how you can start earning thousands of dollars a month from trading cryptocurrencies, sign up for my personal market updates, and send me a message in our private trader's group so we can start working on a personalized plan for you.

If you buy the course when I re-open it, and don't like what I have to offer… for ANY reason at all, just send me an email personally () and I'll refund your money immediately. You have literally nothing to lose. Just buy the course, check it out, and take your time with it. You have nothing to lose and everything to gain. **Click here to get on the Bitcoin Millionaire early bird list**.

Women Lie… About Everything

September 5, 2018 | by Ezven Kalivoda | Link | Original Link

Women lie. They lie easily, often, and without any sense of guilt. This is all easy and rather fun to prove which I'll show you later. The question that lingers in the air, like smoke, is how do they live with themselves given the blatant immorality of what they're up to?

I struggled with this after I discovered my first wife was someone's mistress at the time I married her, and that she continued in that role until her lover divorced his wife; at which point she left me and married him. My marriage was apparently used as leverage to torpedo the ex-wife. I drove round to the house he bought for her after the nuptials, big and solid as a brick shithouse.

My second wife used to give blowjobs to my cameraman in the parking lot of the television station we both worked for while I was in the editing booth. How did she keep the smirk out of her eyes later? That's the question I'm about to answer.

The key to understanding this is to realize that all women today are the daughters of slaves; slaves both in the physical sense and mental sense. Until a hundred years ago, women were chattel and were passed from father to husband at a public ceremony called a wedding. All the aggressive, self-aware, moral women were long since gone; killed in disputes with their partners or the enemies of their family and tribe. The rest greeted their conquerors as heroes, threw flowers at them and opened their legs.

As slaves, women developed a kind of prisoner mentality: no snitching with the guards, secret codes, networking, compartmentalization of thought. This went on for generations, decades, millennia, until we arrive at today where these patterns of thought and actions are genetic as well as cultural. Women live in a world of compartments. They have one for their partner, a second for their female friends, a third for a lover, and a fourth for their imagination. Actually, they can expand that number easily to create a separate box for every one of their relationships.

They way they manage to live with themselves, questioned above, is to believe that nothing that happens in one compartment impacts anything in any other compartment. So, since an affair is in a separate box from a marriage, there’s no moral problem involved. What he doesn’t know won’t hurt him is what they believe. If an infidelity were to occur in the husband box, let’s say with a mutual friend, well then there would be a crisis, but not of morality, but rather practicality. Her first reaction would be anger at whoever called her out, and secondly, ‘Where do I live now?’

Consider the issue of privacy. It’s a very big issue for women. They hate it, loathe it, if a former boyfriend shows up during a new relationship. He is immediately accused of “stalking” her or worse. The very last thing any woman wants is for a former flame to have a chat with a current lover. All her lies would be exposed immediately; so bad mouth him on social media, threaten to get him fired, apply for a restraining order, make “revenge porn” illegal; anything and everything to keep the boxes separate.

Loading...

This is why when you ask a woman to tell you about herself, she’s momentarily stumped for an answer. Which of her many stories should she give you? Quel problème.

I said earlier I’d show you proof of how women lie. Here’s the first proof: ask your girlfriend how many men she’s slept with. She won’t tell you; that’s private. Actually, she won’t tell you because if she did you’d be appalled at the number, the age of the partners, the sexual games they played, and the number of times money or favors were exchanged. What do I mean by that last crack? I mean that trips, apartment loans, car rides and clothing went one way and sex went the other. Yes, from your little Betty. Shocking, I know.

Secondly, listen closely when a friend or family member asks your partner to come over, join them for an event, or go to choir practice. She’ll say she has a cold, a previous appointment or her period, but that she’d love to join her some other time. The mother-in-law or girlfriend is mollified, and your honey will go on with her day as if nothing has happened. As is always the case with women, a little white lie is easier than honesty if it smooths over a potential social conflict.

Here’s a third proof. Listen to a woman describe a major event you both lived through, like a boat capsizing, a fight at a bar or a bride throwing up at the reception. Look for

exaggeration for effect. Once you do it will stand out like a sore thumb. Women not only lie, they exaggerate everything. And exaggeration is just another form of lying.

Your girl is different— she'd never lie

Back to wife number two. When I demanded an explanation for her adultery, she demanded to know who told me. I give her a name. "That bitch," she shouted. "I'll scratch her eyes out."

Note that the issue wasn't that she'd cheated on me—it was that her girlfriend had told me. The girlfriend had broken the prisoner taboo; snitching to the guard. The girlfriend had breached the invisible barrier that separates one female box from another.

In my whole life, that young woman stands out as exceptional, as an exception to the rule that women lie. She told me what was going on because my wife was planning to have her lover's baby and call it mine. That was a bridge too far for the girlfriend, who spilled the beans.

Thank you, Ruth, wherever you are.

Ezven Kalivoda

Ezven Kalivoda is someone who believes in the the nuclear family, the nation state and the concept of races. He believes the current collapse of Western society is caused by feminism and self-serving male politicians who realized, early on, that since women vote for male substitutes, they would support an enlarged state.

Early Review Of Game Audibook

September 5, 2018 | by Roosh Valizadeh | Link | Original Link

The following review of the Game audiobook, which I recorded in my own voice, was initially posted on Roosh V Forum. The book will be released on Friday.

I want to start this review by saying I'm impressed with the sheer length and volume of the material presented here. Roosh wasn't kidding when he said this was going to contain a lot of information.

Roosh manages to present the data in this book in a very engaging, entertaining manner. [His] background as a scientist shows clear influence in the way this information is presented. I appreciated this, being more of a right-brained type of person, because it highlighted lots of subtle things I had subconsciously noticed but hadn't connected the dots on until it was spelled out the way Roosh has done here. It is self-evident that he has spent thousands of hours into this research and experimentation, all of which lines up perfectly with my experiences with women in regards to what has worked and what hasn't.

In this book, Roosh communicates a completely non-emotional, results-neutral take on the entire modern dating scene; an increasingly rare viewpoint on this subject matter in the context we have come to understand it. He describes, diagnoses, and prescribes helpful information for any man in the game no matter where they are at with it.

In addition, I have a greater appreciation of Roosh's sense of humor after listening to this audiobook, as his dryness comes through even more here. There are passages where you can tell he is trying not to laugh. His imitation of a girl's voice got many laughs from me

while listening.

This book is truly a catch-all game resource. There isn't a single aspect of seduction and long-term game that Roosh hasn't explored here. There is advice for every man, at every level of game that is actionable and easy to implement.

In the chapter on 'pre-game' Roosh's body hair grooming standards and techniques almost matched mine to a T , so I completely co-sign on his judgement of how a man should present himself. He correctly identifies modern women's superficiality without focusing on it or giving it too much weight.

Roosh covers everything from inner game approaching, texting, escalating, closing, and relationship management, training your woman, the importance of holding to your standards as well as social circle game and 'love tourism'.

Despite the fact that the material is conveyed in Roosh's tried and true dry tone, it still flows nicely. It is engaging enough to not bore the listener even though the material is academic in nature. Roosh focuses on the subject matter without deviation, and not a single line in the book is filler.

Personally, I found the chapter on Internal Game to be the most profound. This chapter is so important! Regardless of your game goals, the information contained here is a must listen (or must read) for any man at any level of game or life.

In this chapter, Roosh emphasizes the importance of having a positive belief system, and goes about explaining how to program oneself with such a mindset by using autosuggestion and positive affirmations. It's so easy to overlook the importance of a positive belief system and adopt a negative mindset, which Roosh points out here. He notes how common that is among men in the game which for me, was both comforting and eye-opening.

Roosh lists off 7 core beliefs to assist you in your efforts to program your mind to think like a player. However, the way he reads off the beliefs and explanations was confusing and I had to rewind and listen again to write them down. It would have been easier if he had numbered them, or listed them all of at once before going into specifics about them. *[Note from Roosh: I did number them in the final edition of the audiobook.]*

The segment on texting was great. So many guys get hung up on their text game (myself included) but I'm confident if you follow the texting guidelines he provides you're likely to save yourself from wasting time on leads that will likely go nowhere.

My criticism of this part of the audiobook was that his voice sounded a bit rushed, cracked a few times and you can hear him breathing in and out more than in the other portions of the book which were much smoother. The part of the audiobook focusing on sex itself had me laughing a bit, because it is hilariously specific.

Overall, this is an up to date, well-informed book that anyone would benefit from reading, regardless of your level of experience in life or with women. I give it 9/10.

Game will be released this Friday on paperback, e-book, audiobook, and Kindle. Check back then for full details.

Here’s The Biggest Flaw You Missed About The Founding Fathers

September 5, 2018 | by Edgar Tru | Link | Original Link

Human nature. It’s important. It’s how I’ve come to realize there are serious political and cultural snowball effects when a decision is agreed upon and implemented within society. After gay marriage was legalized, it wasn’t any time shortly after that you could be casted as a bigot for not supporting children who desired to attempt transitioning into the opposite sex. It can *at least* be observed a specific timeframe and the political on-goings which shortly led toward that sickening direction.

Same with feminism and female’s rights to vote. Now it’s considered socially acceptable and admirable that females be field cops and serve on the frontlines of war. There are political and cultural snowball effects to *every* single decision. It’s human nature at play. Why else does the mouse ask for a glass of milk? Because you gave him a cookie. Why is the little punk now staying at your house rent free? It started with a single cookie.

This may get controversial, and a lot of assumptions may be made. But I’m about to divulge things I’m not sure I’ve ever heard anyone else really talk about or write about. I’m about to divulge some thoughts, which some may be construed as outright negative, about the Founding Fathers.

The Founding Fathers Didn’t Understand Human Nature

The Founding Fathers are deified and glorified far too much. I believe their biggest flaw was believing a society, bound by 'independence' and 'freedom,' could honestly sustain itself for very long.

America is dying. She most likely will not survive another 100-200 years, if that. President Trump may halter the impending doom, but that's all it may amount to. Nothing more than a temporary halt on the hell which awaits America. Radical individualism, egoism and a full-fledged capitalist mindset are, what I believe, led us here in 2018 America.

Now, I'm not suggesting I've turned full-fledged socialist, but from my observations, in accordance with human nature, capitalism cannot manifest in a real society and last very long. Neither can anarchy, libertarianism or communism. They all fly in the face of Nature and how She demands we operate.

Law and order *must* be maintained by some sense of force. Ragnar Redbeard himself wrote that there is the man who rules, and who is ruled over. That's paraphrasing but accurate in representing his point. In nature there are rules and, if not followed, they become original sin sand eventually destroy society by crushing the latter generations.

The Founding Fathers Were Radical Revolutionaries

The big beef with Britain was taxation without representation, right? Well, I look around and I do not feel very represented. Hell, a percentage of my tax dollars go toward universities who'd legally discriminate against me due to merely being European-American. My tax dollars are being injected into socialist programs which I do not benefit from while border jumpers cash in on free meals. Taxation without representation much?

I most certainly understand the Founding Fathers aggression toward Britain. If I was in their shoes, I'd probably said fuck it and waged war. It's understandable. But, to the contrary, what did they really accomplish? Many of the folks did not want war. A minority of men – I've heard it estimated around only 10% – wanted to throw their fist in the air and play little revolutionary. If I know anything about revolutionaries, they get a lot of people killed. On both sides.

The term 'radical,' in this sense, is obviously propaganda, as what is deemed 'radical' is in the eye of the beholder. What's the difference between a terrorist and a freedom fighter? Depends on your level of power and/or position. It's that simple. But, to get a tad 'radical' here, the Founding Fathers were terrorists by its given definition. They used both aggression and violence for a political purpose. And, again, what did they really accomplish?

Loading...

Law and order are part of the animal kingdom. The human animal is only exempt due to the fact we seem to possess the ability to defy Nature and Her orders. But that defiance has severe comeuppances.

The Founding Fathers Gave The West A Death Wish

I cannot help but come back to this view that capitalism has its place for scrutiny just like communism, anarchy or libertarianism. They all four seem to believe humans can naturally work together and, for all of time, be peaceful amongst ourselves. Religion, race and differences in political ideologies have damn well made it clear that just isn't the case. And, this I swear to you, never will be. Not ever.

Radical individualism sounds rad on the surface, sure. Myself, I do not like even walking or sitting in groups. I do not care to join the herd and march to the beat of your drum. It goes against my nature. But my intellectual side recognizes this more-so as a flaw and not a compliment. Then again, it depends on the productivity of the herd versus the destructivity of the herd.

Authentic Conservatism Cannot Last

The Founding Fathers could perhaps be, at least somewhat, categorized as anarchist, libertarians or conservatives. There are differences between these terms, sure. But self-governing seemed part of their gig. Self-governing, as I see it, is authentic conservatism, along with traditional roles, in the Western sense, between men and women. Being part of the Republican Party does not equate to authentic conservatism, in my view. You could be liberal as hell (as I'm sure many are) and be part of that damned party.

The conservative aims to be left alone and doesn't tread on others. If your neighbor two blocks over has ten abortions every two years, the authentic conservative doesn't care. As long as you don't come stomping on their grass and banging on their door, why bother?

I believe it is the liberal mindset which aims to spread its ideology and 'tolerance' through force of government. An authentic conservative wants little government as possible. See where I'm going with this? An authentic conservative mentality ultimately gets destroyed because it bucks up against human nature by advocating for individualism on a highly irresponsible level. So, how does one achieve an actual conservative society?

By means of government. My intellectual side sees such flaw in attempting to limit government. It isn't going away. Not ever. There will always be men who rule, and who are ruled over. Accept this hard fact. Now, that doesn't mean one is liberal because they utilize government to enforce their beliefs or ethics, but it does suggest authentic conservatism is just as absurd as, to reiterate yet again, the likes of communism or libertarianism or anarchy. I firmly believe it cannot work.

Conclusion

These are just my thoughts. I've chewed them over for many hours on end. In truth,

humans will always kill other humans. But I do believe some systems last far longer than others. I wish well we could all be bloody humanitarians and just be peaceful little angels. We are not. We are ruthless, we are vicious, we are animal.

Nature is watching. Find a way to adhere to Her, or perish.

Never Follow A Girl’s Lead

September 6, 2018 | by Roosh Valizadeh | Link | Original Link

---

*The following is an excerpt from the Dating chapter of my new book **Game**. It will be released tomorrow.*

More important than the content of your conversation is maintaining the lead. You should control the flow, tempo, energy, and direction of a conversation. It’s okay for a girl to ask questions about you, and discuss topics that interest her, but she should never take over the conversation completely while you wait passively for her to ask another question or bring up the next topic.

Leading the conversation can be tiring, especially when dealing with a girl who doesn’t talk much. It can seem like a relief when you meet a “strong and independent” girl who asks all sorts of questions and raises various topics, but permitting her dominance will cause her to lose respect for you. Most girls are not attracted to men who let them lead. If she is comfortable with leading the conversation, it’s likely she’s not feeling any sexual tension or nervousness, so what you may perceive as a sign of interest is actually a lack of interest. She’s treating you more like a co-worker instead of a potential lover.

Even if a girl is chatty, you should control the conversation. To let a girl know the role I expect her to take, I push back against her attempts to lead the conversation by saying: “Are you normally this aggressive? Let’s take it easy, there’s no rush.” Another possibility: “You’re asking me a lot of questions like this is a job interview. Slow down a bit.”

This principle also applies when making decisions on dates, such as where to go and how long to stay in a venue. I may ask about a girl’s general preferences or tastes, but I don’t allow her to make the final decision. If she does attempt to pick the venue, I will push back by asking, “Are you paying?” Then I will choose my preferred location. She is free to leave at any time if she doesn’t like it.

As with leading the conversation, it can be tiring to always make the decisions on what to do and where to go, but this is what a masculine man does. I've seen many men slip in this area when it comes to relationships. Don't yield the power to your girlfriend because you want to take a mental break from making decisions. Her attraction will decrease as a result, putting the relationship in jeopardy. Strike down a girl's attempt to step out of her submissive role. The reins should be firmly in your hands during the *entire* course of the relationship.

Another sign that you're losing control is when a girl asks nonstop questions and you always answer in a direct manner. If a girl asks you multiple questions in rapid fire, she is testing your masculinity to see whether you will jump through hoops and answer obediently. Even if your honest answers show high value, you're still giving up the lead, which brings that value back down.

Mix up your answering style. For half the time, tell the truth, and for the other half, evade with humor, be annoyingly vague, or tell an obviously exaggerated lie that shows her you don't care about the answer. This strategy will make her expend more energy trying to learn who you really are. You may answer directly more than 50% of the time in traditional countries while less than 50% in degenerate countries such as the USA, Canada, and England.

I'm always experimenting with answers to the most common questions girls ask me, such as "What do you do?", "How old are you?", and when traveling, "Why are you here?" For each question, I test various evasive or humorous responses before using ones that I believe elicit the most attraction based on who I am as a man. If I don't feel like talking about my job, but a girl insists, I will say, "I'm not allowed to talk much about my job." She may think I'm some kind of spy. If a girl in a foreign country asks me why I'm in her city, I respond, "I ask myself that question every day." She'll know I'm not impressed with her country, suggesting that I'm an experienced man. If I feel that a girl has earned a real

answer, I will give it, but if she shows annoyance, or even goes as far as to give me an ultimatum, I will definitely not give in to her.

Direct answers are a reward. A girl has no right to them. I learned this in Brazil when I spent time with a German man who never gave a girl a direct answer besides his name. He didn't even say where he was from. At the time, I thought girls would be so turned off by his evasiveness that they would leave, but it actually made them more curious and turned conversations into a fun game where he doled out clues as if he were giving little treats to an eager puppy.

Curiosity is a form of attraction. Giving direct answers removes curiosity. Therefore, always answering directly can hurt attraction. Imagine an interaction where a girl knew all the pertinent facts about your life within ten minutes. She'd get bored and later say, "There was no chemistry."

It's also important to lead if a girl is using her cell phone frequently enough where you feel disrespected. I used to deal with this problem by teasing the girl so she indirectly got the message, but it's better to take a more direct tack by explicitly telling her how you want her to behave.

The most common situation is when a girl leaves her phone on the table with the screen facing up and looks at it constantly. I won't accept this. I didn't go on a date to speak to a girl who is babysitting her phone.

> Me: "Are you expecting an important call?"
>
> Her: "No."
>
> Me: "Because I don't want to compete with your phone, and you seem overly focused on it. Can you put it in your bag?"

When you make this request, you must be prepared to end the date if she doesn't comply. It's your way or the highway. If she refuses to put away her phone, or she says

it’s on silent mode, say once more that you would prefer her to put away her phone because it’s not respectful. If she refuses to do what you ask her, find out how much she owes, settle the bill, and leave.

It’s even worse when her phone is constantly going off and she’s checking it or replying to messages. I may first warn her by saying, “Do you need a break to catch up on your texting? Go ahead, I’ll wait.” Let her finish the text she has to send. If she grabs her phone again, she is showing disrespect. Say, “I don’t like how you’re using your phone so much. Can you put it away?” If she continues after this, you should end the date.

I advise you not to bring your copy of Game to dates

It’s not fun to scold a girl for her anti-social behavior, but remember that it’s entirely your choice whether or not to accept it. If she’s making you feel bad, don’t put up with it, or you’re explicitly giving her permission to treat you like garbage. Nip the problem in the bud as soon as it happens so she understands you have standards that must be met. A girl will either walk away, which means she wasn’t that attracted to you in the first place, or highly respect you for calling her out on her shit in a way that no other man has probably done before, which will greatly increase her attraction for you.

My experience shows that most girls will comply with your request because they’ve already invested time in coming out on a date. Of course, we don’t want to be a phone Nazi and forbid her from ever using her phone, but if she’s texting more than once every hour, and you’re feeling annoyed, you must tell her what you expect.

Leading starts when we make the decisions on where the date should take place, with minimal input from the girl. During the date, we are careful with how much information we divulge while putting the brakes on her attempts to dominate the conversation or interview us. Lastly, we call out any of her behaviors that make us feel uncomfortable,

the most common of which is her phone use. Being a leader in these areas will show the girl that we have expectations and are willing to walk away if she doesn't behave properly.

*The above excerpt was taken from my new book **Game**. It will be released tomorrow on paperback, e-book, audiobook, and Kindle. Check back then for full details.*

The Right Will Never Win Unless They Go Beyond The Mainstream

September 6, 2018 | by Beau Albrecht | Link | Original Link

During the mid-1960s, the great Cultural Revolution began. 1980s conservatives started holding the line tolerably well, though couldn't press forward. However, since the 1990s, they've been sliding backward, especially in the culture war. *Why is this happening?*

Leftist advantages

A 5-4 majority can rewrite the law. Too bad Scalia got whacked; he was one of the sensible ones.

Liberal judges certainly aren't shy about legislating from the bench, shoving their social engineering down the public's throat. Judge-shopping is a major go-to tactic when leftists want something that legislatures will never support, much less the people.

Beginning with the Warren Court, *SCOTUS achieved most of the left's greatest victories*, disregarding legitimately-enacted laws and the public's will. For the latest example, popular referendums about gay marriage lost by wide margins, *even in California*. Then the Supreme Court's philosopher-kings did their usual *pilpul* stuff and "interpreted" the Constitution according to their political preferences.

Also, the left overwhelmingly controls opinion-forming institutions. Education and the media are the major ones, but even many churches became converged, and also they're making great efforts to silence dissident opinions online. Their milieu control resulted in generations of Blue Pilled liberals and a culture sliding further leftward. *This is no coincidence.* Their "long march through the institutions" is a major strategy, and it's easy to underestimate the left's organization and networking.

Measures allowing for recall of judges who blatantly exceed their authority would help. Changes in university hiring practices could mandate ideological balance, though we're stuck with radicalinski professors until they age out. We also should keep discrediting the media and university system to starve the beast, and perhaps create our own institutions. These things aren't easy, but are worthwhile goals.

Something the right can do *immediately* is start playing hardball. Leftists are out for total war. What are conservatives doing?

Conservatism in theory

"Liberals claim that they want to give a hearing to other views but then are shocked and offended to discover that there are other views."
~William F. Buckley

He certainly had his moments, but he wasn't exactly the right's Final Prophet.

By the textbook definition, conservatism seeks to maintain the *status quo*. William F. Buckley stated famously:

> A conservative is someone who stands athwart history, yelling Stop…

Buckley was unquestionably brilliant, but not perfect. Creating *National Review* was an important development. Unfortunately, *NR* positioned itself as the *non plus ultra* of "respectable" rightist thought. Thus, anyone ideologically beyond their editorial board is an extremist unworthy of consideration. However, "defend left, punch right" isn't a winning strategy. Further, the textbook *status quo* stance has some unavoidable problems.

If conservatism *merely opposes change*, rolling back leftist dysfunction and degeneracy matters little; they *just don't want more of it*. Returning a nation's former glory (MAGA and the like) isn't on the agenda; that's "reactionary". Traditionalism is valuable, but blindly defending a dysfunctional "new normal" is nonsensical. It's almost as silly as the radical leftist "change everything for the hell of it" shtick. As G.K. Chesterton, a founder of Distributism, once put it:

> The business of Progressives is to go on making mistakes. The business of Conservatives is to prevent mistakes from being corrected.

How's *that* helpful?

Status quo is stagnation

Neoconservatives: whose side are they on, anyway?

If the right isn't at least *somewhat* reactionary, it's barely more than centrism for its own sake. There's no room for pursuing past concepts that worked better, carefully

developing new ones, or pragmatically acknowledging another ideology's successful ideas. *Who really wants to conserve the present-day globohomo mess?*

Further, that's passive and strategically ineffective. Not pushing back means repeatedly losing ground. Mainstream nice guys must never diverge *too* far from Current Year liberalism. As fashions change, they must adopt former liberal positions. Holding firm on their principles makes them "extremists". *How terrible!*

So textbook leftists push for constant change, and textbook conservatives must remain not *too* far behind. *Who's in the driver's seat?* To paraphrase Napoleon, never taking the offensive means never winning. Actually, *National Review* printed plenty of stuff during their early days with sentiments that they'd denounce venomously today. Standing athwart history and yelling "Stop" only went so far.

Loading...

American mainstream politics

He who pays the piper calls the tune.

The right does include several variants outside of the textbook *status quo* concept. Many actually are well-developed ideologies. Of all the schools of thought, the following are America's two most prominent.

Paleoconservatism is the old-school variety, including figures like Pat Buchanan. They *certainly do* favor taking the offensive in the culture war. Other than that, they oppose globalism. Their hearts are definitely in the right place. They merely need more awareness, particularly the grassroots. However, many are fairly Red Pilled, and *their detractors know it.*

Neoconservatism offers barely a *status quo* effort in the cultural sphere. However, they

love big business, free trade agreements, and all the rest of it. They're also enthusiastic about American intervention in the Middle East. (Another Buckley flaw was firing *National Review* writers for connecting the dots about things like that.) Whether neocons are actually rightists is pretty debatable. Libertarians are somewhat better; they don't start spit-in-your-eye wars or implement police state measures.

Paleoconservatism was once the GOP's defining ideology. During the 1970s, disenchanted liberals joined the Republican Party, becoming the neoconservatives. By the 1990s, they were calling the shots. Effectively it was a successful entryist strategy. The kingmakers in their smoke-filled rooms represent this faction. During the last primary, these were the ones who wanted to "lose with Cruz", while repeatedly trying to sabotage their party's overwhelmingly most popular candidate. Simply put, they *really do* want to conserve the present-day globohomo mess.

The two-party system essentially became a good cop / bad cop strategy. Meanwhile, mainstream liberalism faces similar problems. Big money financing causes Tammany Hall style corruption, so plutocrat-driven globalism takes precedence over actually eliminating war and poverty. *Funny how that works…*

If you're not taking flak, you're not over the target

The "extremists" of the past.

Status quo conservatism is pretty bland, barely even an ideology. That hardly inspires enthusiasm. There's little to get excited about neocons, either—at least for people like me. Paleoconservatives do want a country that looks like the one they grew up in, but some need to be made aware that the stakes are considerably higher than that.

Leftists *actually do* have energizing visions: social welfare programs, social justice, socialist utopias, etc. Their goals aren't always practical, but it's great advertising to get the rubes on board. That's why top leftists promise the moon. Their supporters certainly

do want to struggle for progress (as they see it). Some will even go to war for that, or chose martyrdom. They certainly have no qualms about raising hell. They're prepared to do anything it takes.

The right needs to get just as enthusiastic, exerting maximal effort within the bounds of the law and sensibility. Mainstream conservatives try to be nice guys. *Do leftists play fair?* Taking the high road is fine, but only up to a point. If you're fighting for your life, then believing you're bound to Marquess of Queensbury boxing rules will get you killed.

Those who are serious about preserving their civilization will need stronger remedies than the mainstream. *That's* how to push back on the Overton Window. Support your favorite brand of "deplorability". Laugh off any name-calling tactics meant to delegitimize the opposition. It drives leftists crazy when they can't browbeat their opponents into submission!

Finally, abide by the "no enemies on the right" principle. There's room for moderate debate, but don't dwell on differences with those outside the mainstream who make good faith efforts. That only helps our opponents.

What Television Does To Your Mind

September 6, 2018 | by Alfonso Taft | Link | Original Link

Cable television is a blue pill pacifier of mind control and psychological conditioning. Within my own personal life, I've noticed a direct correlation between the amount of television somebody watches and how uninteresting they are as a person. The Manosphere offers a plethora of analysis on the mindset of the indoctrinated leftist and what fuels their crude, vitriolic behavior. For the disease of liberalism, I offer a simple diagnosis: they watch too much television.

After Philo Farnsworth invented television in 1938 in Fort Wayne, Indiana, he did not allow his family to watch. "There's nothing on it worthwhile, and we're not going to watch it in this household, and I don't want it in your intellectual diet," said Mr. Farnsworth. He was aware of his invention's ability to control the mind and population at large.

“I know the secret of making the average American believe anything I want him to. Just let me control the television.” – Philo Farnsworth

Your Mind on Television

Have you ever tried to get the attention of a child or friend while they’re watching television? You’re two feet away, practically yelling in their ear and they still don’t hear you because they are consumed by the TV, mesmerized, practically drooling. This is because their mind is in a hypnotic state.

Watching television induces low alpha waves in the brain putting your mind in a passive, suggestive condition. Low alpha waves induced by the flicker rate of television aren’t the same as relaxed alpha wave states created by meditation or going for a walk. Low alpha waves are the opposite of beta waves which are produced during mental activities. Beta waves are associated with active, logical thought.

The logical part of your brain turns off while watching television. Advertisers are aware of this and their task is to simply associate their brand with something positive during this hyper-receptive state, precisely why you see so many hot babes in beer commercials.

Has it happened that you were watching a television show, and when it cuts to commercial break, you forget what you’re watching? This is because your mind is essentially asleep while you’re watching television. Your eyes remain open, but your mind rests in a trancelike state.

Who owns the media?

90% of the media we consume comes from six giant companies—GE, News-Corp, Disney, Viacom, Time Warner, and CBS. GE owns Comcast, NBC, and Universal Pictures. News-Corp owns Fox, The Wall Street Journal, and The New York Post. Disney owns ABC, ESPN, Pixar, Miramax, and Marvel Studios. Viacom controls MTV, Nick Jr., BET, CMT and Paramount Pictures. Time Warner is in possession of CNN, HBO, and Time. CBS owns Showtime and NFL.com.

The media is in the hands of a very few, powerful corporations. Virtually everything on television is globalist approved propaganda. The television consumer is given the illusion of choice.

Loading...

As noted by Phil Farnsworth television is not reality, rather it distorts one's vision of reality. The concept of a media diet is important. Your diet doesn't simply consist of the things you eat. Almost as important, your media diet is a direct reflection of where your intellectual curiosity has taken you which includes things like movies, books, blogs, and live streams. Watching television is a form of mental incarceration where the incurious choose to remain asleep.

As a youth, my young relatives and I would mischievously gather around the television to watch "Trash TV" like Jerry Springer and Maury. An older relative of mine would storm into the room and tell us not to watch "Trash TV." Fast-forward to the current year and that same boomer relative is completely addicted to CNN, MSNBC and other forms of Trash TV.

We are at a point in history where people living in the same countries are actually living in different worlds depending upon where they get their information. For many, especially boomers, a news story is not "real" unless it's on television. In this sense, the television screen completely controls their sense of reality. An issue is not "legit" unless they are programmed to believe it's legitimate. For many Boomers, television is their god. It's their ultimate authority on all information.

A Way Out / Conclusion

Next time you watch a commercial on television, conduct an experiment and see if the commercial fits into the cultural Marxist paradigm. I almost guarantee you the men will be depicted as incompetents and women will have the logic of astronauts. This is especially true in family car and beer commercials, often referred to as Cuckmercials. I can assure you, Cuckmercials are frequent if not dominant.

Once you realize the only product being sold on TV is cultural Marxism controlled by a small group of corporations, it becomes difficult if not impossible to watch. Watching television trains your brain to watch more television. Breaking the habit becomes easy after breaking the behavioral and social patterns involved with watching TV are broken.

Don’t hang out with television addicts. They offer nothing but useless pop trivia and sportsball knowledge. Their bodies will decay into cold bags of soymilk as they melt on their couches glued to the Boomer Tube. The culture of liberalism consists mostly of television, Netflix, Sportsball, Beyoncé, obesity, and homosexuality. The main culprit of their illness is their one true god, the television screen.

READ NOW: Game – How To Meet, Attract, And Date Attractive Women

September 7, 2018 | by Roosh Valizadeh | Link | Original Link

Today I'm proud to release Game, a 375-page book I've been working on for the past two years. It's a reboot of my 2007 book Bang that accounts for the massive changes we've seen in culture and dating during the past decade.

Game teaches men how to meet and attract women in an age where smartphones, feminism, and anti-masculinity propaganda have made connecting with the opposite sex harder than ever before. It is the seminal work of a hyper-sexualized man who dedicated tens of thousands of hours into understanding women and attracting them, all while fending off defamatory attacks from mainstream feminists and fake news journalists who want to criminalize healthy masculinity.

Whether your goal is to have fun in a big city with lots of women or fall in love with only one before getting married, Game will help you accomplish your goals in a way that keeps you safe from degrading cultural winds that continue to divide men and women.

15 key features that are inside Game

–Detailed explanations on the 7 key beliefs you need to internalize so that your mind doesn't sabotage your game efforts. These beliefs allow you to run "unconscious" game and make the right decisions around women even when encountering new situations. Early reviewers have remarked to me that this is the most valuable part of the book.

–How to improve your physical appearance so that you receive warmer responses from the girls you meet. I discuss ways to optimize your body hair, head hair, beard, hygiene, and style, including the one style rule you absolutely must follow.

–8 specific attraction triggers you can display to a girl that increases her feelings of lust, intimacy, and love for you

–9 action-item steps that improve your value, keep you motivated in the game, and get you solid results. As long as you do every step in the program, success is inevitable, meaning that the most common way you'll fail is if you don't put in the work.

–A complete day game program that includes four styles of openers to meet women anywhere, with full conversational examples

–A complete night game program with two classes of opening lines that help you extract intimacy in a degrading nightlife environment, with full conversational examples. I also share how to approach a girl while she's dancing.

–6 universal text messaging tips so you won't ruin things with a solid prospect

–6 master guidelines of my Conversational Framework that maintain attraction while making sure you never run out of things to say

–The smoothest way to get a girl over to your place (or how you can enter her place), with word-for-word examples. I teach you multiple ways to transition things to a private home depending on the situation.

–A full sex escalation program that ramps up intimacy once you're in a private home. It greatly reduces the chances that she'll feel guilty, nervous, or scared.

–An effective regimen to train your girlfriend on 3 key categories of standards that ensure your happiness as long as the relationship lasts

–9 different responses you can give to a girl who is trying to mold you into a beta male slave

–How to safeguard your relationship against your girlfriend's slutty friends who are whispering bad advice in her ear. I teach you an advanced inoculation technique that includes 6 specific examples.

–How to be liked by people who can improve your access to attractive women

–How to pick the most ideal country and city for when you're ready to meet foreign women, and how to plan your trip to give yourself the best shot at success

Order the paperback, ebook, or audiobook today

You can order Game either from Amazon or from my web store using a credit card or cryptocurrency.

On Amazon, the Kindle edition is priced at $9.99, the paperback is $25, and the Audible edition is $22. Upon purchase of the paperback, you can download the Kindle edition for only $0.99 through Amazon's Matchbook program…

Click Here To Order From Amazon
The instantly downloadable ebook edition costs only $9.99 and contains unrestricted PDF, ePUB, and MOBI files that can be viewed on unlimited devices. After submitting your payment, you'll be immediately forwarded to the book's download page…

Click Here To Order Ebook Edition (Instant Download)
The audiobook + ebook edition costs only $17 until Monday and includes both the ebook package ***and*** the 13-hour audiobook in unrestricted MP3 format that is narrated by myself. Hear me say lines in the same way I deliver them to women…

Click Here To Order Audiobook + Ebook Combo (Instant Download)
If you order from my store, you'll have the opportunity to upgrade your purchase to include my entire catalog at huge savings, but only before Monday. Click here to view the full description of Game at Roosh V Store.

Leave a comment below if you have a pre-sale question or contact me directly if you need help with your order. This book has been a huge weight on my shoulders for two years so I can't describe how happy I am that it's finally done. Without the support of readers like you, I wouldn't have been able to spend that much time creating a work of this magnitude. I eagerly await your opinion of the book. Thank you!

Liberals Snowflakes Are Being Massively Triggered By The OK Symbol

September 7, 2018 | by Max Roscoe | Link | Original Link

Millennials. Is there nowhere safe for them? First, it was the possibility that someone might refer to them by an unpleasantly truthful third person pronoun when they were not present. Then it was “triggering” their emotions by failing to adequately warn them before a certain topic was discussed so they could mentally prepare for the stress of thought and dialogue.

Jewish homosexual Milo Y making the… White Power symbol?

The latest thing that millennials are freaking out about is the myth that the OK symbol, making a circle with your thumb and forefinger and extending the remaining digits, is a secret symbol of white power and racial hatred. No, really, they believe this.

Fake image NOT created by the ACLU went viral

While the outrage has certainly been encouraged through trolling, fake tweets and unrecognized sarcasm, such as a forged warning from the ACLU that it's "Not OK to say OK," it does beg the question, will Millennials fall for anything?

#Pissforequality was another successful trolling operation

While other trolling actions, such as the #Pissforequality movement, where feminists were tricked into peeing their pants and posting pictures of it on social media to show "equality" somehow, are a bit more entertaining, I am thoroughly enjoying the nonironic triggering of snowflakes over people flashing the OK sign.

Spread this everywhere.

Of course, the OK symbol is essentially a positive sign, meaning everything is good, I am happy, or Yes!

This trolling action, like many others, appears to have originated from the autistic corner of the internet known as 4chan, who created previous hoaxes such as the notion that publicly drinking milk in front of people of color is a racist move to show "the purity of white milk and the superiority of the white race." The ADL was so bombarded by

triggered snowflakes that it published an article denying that OK means White Power.

Loading...

Toxic Masculinity, White Power, Dicks Out for Harambe, My Penis Is Erect, Smash Feminists, and There are Only 2 Genders, respectively

The best trolling ideas work when there is some tangential believable connection to them. For example, Trump's most often used hand gesture is indeed the OK symbol. And Trump = everything evil and wrong with the world, so he must be secretly communicating to his racist supporters, right?

Israeli PM Bibi Netanyahu is a secret Nazi

I approve of these trolling operations, as they reveal the complete absurdity the left has become. And as a side benefit, they push the Overton Window, the range of ideas that are acceptable for public discourse.

Oprah Winfrey loves her some White Power

As more of these ideas gain traction, membership in groups such as feminists, antifa, and mainstream political parties further dwindles until they are left with nothing but insane extremists. And their ideas die.

The left resorting to threats of violence against someone making the OK sign

There IS, of course, danger, from the violent and extreme left. On September 4, 2018, US Atty John Bash tweeted that his half Mexican half Jewish wife was being violently threatened because she flashed the OK symbol, supposedly signaling her support for White Power. Perhaps it is time for this trolling operation to end, before someone is hurt.

R for Rape Clubs — coming soon!

Generation Snowflake continues to display their absurd stupidity and ignorance. They stand for nothing, and they fall for anything. With democracy and an increasingly dumbed down populace, this is a recipe for disaster. The long term situation in America is not likely to improve, although there is some hope with Generation Z.

In the meantime, anytime you are holding a drink, make sure to flash the Rape Club symbol. The Rape Clubs are returning soon. Watch out!

Are You Too Agreeable?

September 9, 2018 | by Jon VonStroke | Link | Original Link

Society as a whole prefers an agreeable man over a disagreeable one. Folks with high agreeableness tend to be social, cooperative, sympathetic, altruistic, and much more passive than their disagreeable counterparts. The disagreeable person tends to display less pro-social behavior. This person puts the focus on their needs first, even if it conflicts with the interests of other; less agreeable people are oftentimes seen as being narcissistic and self-serving.

Adopting a more agreeable disposition would intuitively seem like the most advantageous way to conduct oneself, but empirical evidence would suggest otherwise. Although the disagreeable man may not always be the most popular figure among his peers, he is commonly the most successful. Let's deconstruct the "disagreeable man", debunk some of the misconceptions associated with him, and explain why your agreeableness could be hindering you professionally and romantically.

Misconceptions

When we think of someone with high levels of disagreeableness, the person that we often conjure is one who struggles to get along with others, argues for the sake of argument, and lacks empathy. Whilst a disagreeable person may generally be less concerned with the well-being of others, this does not necessarily mean he is a bona fide jerk.

He is just less inclined to waste time procuring for the approval and affections of peripheral figures who do little to benefit his purpose. Additionally, due to his skeptical and suspicious nature, he is less apt to blindly adhere to commonly shared beliefs; he is perfectly fine with going against the grain and expressing disapproval to conditions he deems ill-advised or at odds with his ethos.

Career

[image]
Cater to the whims of others and you'll remain broke.

> In 2014, psychologists Samuel Hunter & Lily Cushenbery surveyed 200 college students for five major personality traits: neuroticism, openness, extraversion, agreeableness, and conscientiousness.
>
> After completing the survey, the students gathered in a room where they wrote down original ideas for a marketing campaign. Next, the students were arranged in groups of three and asked to create a plan based on their ideas.
>
> Hunter & Cushenbery found that, while there wasn't a relationship between agreeableness and innovative thinking, students rated as "less agreeable" were more likely to have their ideas included in the group projects.
>
> Why?

> Because “disagreeable” people are willing to argue and fight for their own ideas regardless of what others think.

Being the likable, considerate, and team player of the office isn’t always the most gainful mode of operation. In fact, research suggests that even if nice guys don’t always finish last, they are more likely to make less money than their colleagues who put their own needs ahead of others.

Disagreeable people are also perceived as being more effective and better equipped for leadership positions. Alternatively, women with high levels of disagreeableness benefit little professionally. These dominant women are seen as control freaks and therefore don’t command the same level of respect that the assertive man is afforded.

> The study suggests women get caught in a double standard: If they are tough minded and demanding, they don’t win accolades or a much higher salary. Disagreeable women gained a much smaller 5.5 percent salary advantage over kind women.
>
> “If a man behaves tough-aggressive-hard-nosed, he’s behaving leaderlike. But if a woman does that it really is a turnoff,” Judge said.
>
> Loading…
> One possible explanation for this: “We think we’re very civilized and modern, but we’re still living with some pretty ancient genes that evolved over tens of thousands of years,” Judge said. That affects gender roles and how people are evaluated for pay and senior positions.

How amusing: being a strong, no-nonsense, alpha male will lend you better advancement opportunities and higher compensation. Conversely, the combative, unfriendly, power-hungry woman achieves only a negligible increase in pay and effectively makes herself the most despised person in the workplace.

Romantically

> **When women feel unsafe, they choose macho, disagreeable men.**
>
> "Women have developed a preference for formidable guys capable of protecting them, so under harsh conditions women select less agreeable men."

This should come as little surprise that women prefer a decisive, assertive, valiant man over a passive, meek, and obedient one—alpha fux, beta bux. During times of adversity and chaos women desire a man who can think "outside the box" and usher her to safety. She wants a man who knows when to go left when everyone else is opting to go right—the opposite of bravery is conformity.

> **Coercing women and stealing resources works sometimes.**
>
> "Ancestral men who weren't kind could sometimes have kids through deceiving and coercing women or through taking from other men and groups the resources that women needed for reproduction, like land and food. These nasty habits are heritable too."

It matters little to a woman the manner in which a man has acquired his resources; even if the methods used were duplicitous or immoral. I am not encouraging men to pilfer or scam their way to the top, but putting the emphasis on personal gains above all else has historically been shown to increase his mating opportunities.

Lastly, a disagreeable man is stubborn and set in his ways. He is more likely to stick to his guns, express his disapproval and walk out on a woman who is behaving in a perverse manner.

Enough said.

Conclusion

> *"The reasonable man adapts himself to the world; the unreasonable one persists in trying to adapt the world to himself. Therefore all progress depends on the unreasonable man."—George Bernard Shaw*

There is utility in being a well-liked individual and having the capabilities to work

alongside others, but not at the expense of personal fulfillment. When you're too agreeable of a person you subject yourself to being a communal walking doormat.

The movers and shakers of the past were mavericks; many of which were not always well received or popular figures among their respective circles. In a societal programmed world where there is an over-saturation of "sheep", the "sheep herder" might just possibly be the most sought-after figure.

LAST CHANCE! Today Is The Last Day For Game Combo Specials

September 9, 2018 | by Roosh Valizadeh | Link | Original Link

---

Discounts for the ebook + audiobook combo package and my life's work collection are ending tonight! Here are two excerpts and a review that you may have missed:

- Excerpt 1: What Is Game?
- Excerpt 2: Never Follow A Girl's Lead
- Review: "This book is truly a catch-all game resource"

Order now to take advantage of special combo deals

You can order Game either from Amazon or from my web store using a credit card.

On Amazon, the Kindle edition is priced at $9.99, the paperback is $25, and the Audible edition is $22. Upon purchase of the paperback, you can download the Kindle edition for only $0.99 through Amazon's Matchbook program…

Click Here To Order From Amazon
The instantly downloadable ebook edition costs only $9.99 and contains unrestricted PDF, ePUB, and MOBI files that can be viewed on unlimited devices. After submitting your payment, you'll be immediately forwarded to the book's download page…

Click Here To Order Ebook Edition (Instant Download)
The audiobook + ebook edition **costs only $17 until tomorrow** and includes both the ebook package *and* the 13-hour audiobook in unrestricted MP3 format that is narrated by myself. Hear me say lines in the same way I deliver them to women…

Click Here To Order Audiobook + Ebook Combo (Instant Download)
If you order from my store, you'll have the opportunity to upgrade your purchase to include my entire catalog at huge savings, but only before Monday. Click here to view the full description of Game at Roosh V Store.

That concludes the book launch of Game. Thank you to everyone who bought the book so far!

Metal Music Is Dead

September 9, 2018 | by Kyle Harvey | Link | Original Link

Amongst the relentless and often hyperbolic calls to pinpoint the genesis of the stale feeling of the half-century-old ‘extreme’ genre, I propose something different here and something I’m sure I’m going to be outnumbered by the number of people who will disagree with me.

Metal defies the genre that defined it. It is much more than simply a couple of blokes standing around playing live music featuring themes of Satan worship, womanising or drug use. It is an expression of the dirtiest of subcultures, those who are truly lost amongst the groupings that befall a modern society. It is no secret that ‘the metal community’ has attracted people together purely based on a vague agreement in music they like, but at the expensive of all other interests, values or opinions.

Today, we see a community that will oust the fringe whose ideas began it for being too extreme, controversial or offensive. For now, I feel it has betrayed what it initially was with this regressive open-armed approach to inclusivity.

With the perpetually shifting of the Overton window, some topics that were once controversial can now be discussed on mid-morning television programs where others are now outright banned from even the thought of contemplation, let alone discussion.

If you define the genre of metal as merely that combination of instruments earlier proposed then you needn't worry – as this will continue eternally. The stagnant flesh that hangs off those tired bones will continue for as long as modern-day 'rebellion' can be depicted as doing what your parents didn't. The rise of newer bands on the outskirts of metal – such as Greta Van Fleet -will attract grandparents and their grandchildren, missing out on the parents who chose genres other than those that contained Led Zeppelin or Black Sabbath.

Instead, the beckoning call that I have always felt for was for those earlier years, and those are the records I always default return to, where audiences were genuinely scared at the sights and sounds they were experiencing, the freshest output being in the early 90s with Norwegian Black Metal.

Before Ozzy Osbourne became a meme thanks to $auron Osbourne & MTV, fans of his and of his boys from Birmingham were legitimately terrified of John where the potential for something truly threatening was always present.

Later, symbols of anarchy such as Johnny Rotten left the youth of Britain terrified that he may actually be hiding under the bed. Fights and violence were never far from a good 'music' show. The mystique and intrigue that surrounded even earlier bands such as Zeppelin would be destroyed through the modern way to enjoy music and it's creators.

Loading…

An entire mythos was created around Jimmy Page, the Occult and his fascination with Crowley. Today, music journalists would be requesting his latest opinion on Brexit, Trump,

or any other mindless distraction that keeps ancient and decrepit publications in circulation.

Metal now focuses on inclusivity – that everyone should feel safe in a home that has been created for the homeless. When you've nowhere to go, metal fans will happily take you in. It ignores that you might not actually like anything that's of any stern use. Blink 182 & Green Day? In this paper-thin world, those bands have has much use for tender as fans of Burzum or Witchfinder General.

The value has been betrayed. You are more likely to find the values within other genres that have yet to face this parasitic infestation. True country and electronic music are making big gains where metal has long abandoned the interest of its brothers. This must be stopped.

The message of true strength, true suffering and the strength to be found within the suffering have been replaced by plastic and disposable emotions for a plastic and disposable world. Where safety is the culture's only capability, any danger must be stamped out as quick as a spark is produced.

The myth of the binary black or white and good or bad mindset leaves little room for any real acts of rebellion where attempts to do so will face threats of the law, doxing and hurt to one's family as the outcome. Coming back from a show with a mouth full of blood or the missing of a few teeth is as ancient as listening to the music in a mono output. Instead, the floor is flooded with 'men' weighing six stone ringing wet and Disney neck tattoos.

I've always believed music to be a solo enjoyment and although I enjoy a live show (performer and pedestrian), nothing can get me closer to the experience of the message that being on my own in a dark room with headphones on. It is there where I now retreat to be truly terrified. To clear myself of the distraction, of the bright lights and weak drunken fools who only know a state of being an extreme extrovert to keep the distance

as far as possible from their true thoughts, dreams and fears.

Join me. Grab a Robert Johnson discography CD, smoke a cigarette with Sinatra, put a spell on Screamin' Jay Hawkins, dance to the radio with Ian Watkins, take a soulside journey with Darkthrone. Take what you find into the real world.

There is still time to be you.

2 Signs A Girl Will Cheat On You

September 10, 2018 | by Roosh Valizadeh | Link | Original Link

The following article was originally published on Roosh V.

The opposite of a cuckold is a man who doesn't tolerate his woman messing around with other men, an expectation that was reasonable up until these depraved times of open relationships and "polyamory." If you're like me, you don't want to waste time and effort on a woman who will eventually cheat on you, so it becomes helpful to know the warning signs.

There are two female character traits that highly correlate to cheating. I've found these traits not in women who have cheated on me, but on women who cheated on their boyfriends, fiancees, or husbands *with me*. In many cases, I didn't even know she had a man until after we had sex.

1. She has a high need for excitement

A girl with a high need for excitement believes that life should always be fun. She fears boredom and routine. She may share memes along the lines of “Life is short” or “Carpe diem.” The problem is that relationships are boring by their very nature. Within only a couple of months, they turn into a repeating pattern of eating, having sex, watching movies, and talking about the same group of friends. This is hard for some girls to tolerate. They will cheat not with the intention of leaving their boyfriend, but simply to live the fun lifestyle they believe is coming to them.

The same pattern occurs with a girl who is highly impulsive, meaning she needs to act on whatever random idea pops into her head so that she can see herself as “fun” and “spontaneous.” If she is in a club with friends and sees a hot guy, the impulse of “I want to sleep with him” is one she may act on, even though her loyal boyfriend is waiting at home.

Several years ago in Poland I was in a nightclub when I noticed a tall girl with nice legs staring at me. The conversation between us went well and I tried to move her to the dance floor, but there was a big problem: she had a boyfriend, and he was on his way to the club with his friends. I was ready to move on to another girl, but even after the boyfriend arrived, she kept looking my way. They all went upstairs. Ten minutes later, she came back to me. I knew she wanted to fuck so I told her to come with me to my place, which was only a five-minute walk away. I could tell it was thrilling for her to escape the club with a new man while her boyfriend was still in it.

Once in my apartment, the boyfriend called. She told him that she got tired and went home, but that he should stay in the club and have fun with his friends. She ended the call with “I love you.” We then had sex multiple times, she spent the night, and then we had sex again in the morning. She made effort in seeing me again.

2. She has a high sense of entitlement

Loading...

A girl with high entitlement feels that her current boyfriend should satisfy *all* of her needs. If he doesn't, then he is not holding up to his end of the bargain. She will then feel little or no guilt for fulfilling those needs elsewhere with other men.

Girls want to be satisfied in two areas: physically and emotionally. Physically, a high entitlement girl will expect you to give her as many orgasms and as much pleasure as she gives you, which is difficult unless you spend hours going down on her. Emotionally, she will want to remain in an attracted, happy, and contented state without any feelings of anxiety, regret, dissatisfaction, or fear of missing out. One man simply cannot satisfy both of these areas for eternity, but a high entitlement girl expects it. If you fail, she will cheat.

Another time a high entitlement girl cheats is after you get into an argument with her. She can't believe that you made her upset, so in her mind it's not wrong to feel better in the embrace of another man. If your girlfriend gets upset with you today, there is a line of five men ready to immediately fuck her. Fifty years ago, she may have only had access to the village drunk. If you don't want a high entitlement girl to cheat on you, you must become her hostage and always keep her happy.

Not long ago I met a hippie girl in a nightclub. She wore a small backpack and had weird dance moves that suggested she was on drugs (she told me she wasn't). Her hair went all the way down to her butt, which aroused me fully. We danced extra close but she would turn her head away when our faces got near. I didn't push the matter and later she told me that she had a boyfriend. Things weren't going well with him. I brushed it off and told her to do whatever she wanted, that I'm merely enjoying the moment.

When the dancing got boring, we went to my apartment for a "tea." We ended up having sex five times. During one of the rounds, she scooped up my semen with two fingers and put it in her mouth while locking eye contact with me. Even with my level of experience, I felt disturbed. Before she left, she told me that her boyfriend has a low sex drive, but she

didn’t want to break up with him. She did not make effort in seeing me again.

Conclusion

You may be thinking, “Don’t all girls have a high need for excitement along with high entitlement?” If you’re meeting them on Tinder or in the nightclub, then yes, most will fall into that category. If you’re meeting them in Westernized countries where #MeToo teaches them that they shouldn’t feel uncomfortable for any reason, certainly. Unless you carefully screen your women, it will be hard to avoid the cheating type.

Thankfully, there are some women who just want to find a good man and have a family. They are willing to work out any relationship problems instead of immediately jumping on a new cock, and see fun as the temporal and meaningless distraction that it is. Maybe one day I will meet such a girl.

6 Ways To Become A Better Conversationalist

September 10, 2018 | by Edgar Tru | Link | Original Link

I like to eavesdrop on folk's conversation from time to time. I pay attention to their use in terminology, the subject matter, maturity in their tonality, etc. It's often them bouncing back-n-forward off one another with goofy replies and overall general silliness. That, or it's them gossiping and bitching. Men included in all of that.

I find it rather repugnant when men perpetuate gossip or sit around bitching about work or, even more vulgar, another person. It strikes me as unmanly and adopts the more feminine of qualities. Men today may chat about sports, women, or some other minuscule thing instead of local politics or philosophy. I'm not trying to come off as some conversation supremacist; however, I do find I can hold a good chat, with grit and substance, far better than your average Joe.

So, here are six ways to become a better conversationalist, in my opinion.

1. Take Yourself Out Of The Conversation

While one need not adopt another's position or worldview, it may be obvious that in many conversations, it's this *I'm-right-you're-wrong!* scenario. And even if the facts are on your side, not everything needs to be a debate.

I've enjoyed some wonderful conversations with folks whose minds are so open and free that they totally took me by surprise. I had no idea what to think of them because I was this little liberal atheist shit with my tunnel-vision. I've since become somewhat more spiritual and clearly right-winged in my political, philosophical, and intellectual evolution. But I was challenged on many occasions and, for whatever reason be, I kept going back at it.

And I find not always feeling the need to be right on everything, and to simply listen to another human animal and their experiences and their worldview, is actually a trait many lack these days. In order to be a conversationalist, one must not act as a protectionist. Allow your mind to open and take in what another espouses without always going on the defensive mode. Trust me, you'll be okay.

2. Embrace The Uncomfortable

Challenge yourself to embark on a journey of talking to folks you may disagree with. Vehemently even. I recall times when I felt so challenged and my entire worldview seemed placed before me… then smashed to bits. This is both in terms of religion/spirituality and politics.

Now, there’s no need to get so heated a brannigan breaks out. I find this a helpful pathway if one desires to become a better conversationalist because, even if for a moment, it may widen your worldview. My political, philosophical and intellectual journey could simply not be possible if I remained in my little world through a crafted echo-chamber. That came with time, effort and challenge after challenge. And now, I embrace anyone who genuinely challenges my worldview, whether spiritually, culturally or politically.

3. Hesitate Before Responding Back to Someone

Take a moment and listen to how quickly people respond to their conversation partner. I always take time before responding. I'm not sure if it's on purpose or natural to me because I've done it for so long. It's not a race. When one is a good conversationalist they take in deep what the other says, then chews it over a moment. I find one can hone their skills by trying this out.

Loading…

One reason a person may quickly respond, or already have their sentenced formed and about to go before you've fully finished your line of dialogue, is because you're still on the defensive and are wanting to revert back to the me-versus-you mindset. Avoid it.

4. Limit Your Gossip And Feminine Talk

If you get the chance, listen to what other men are talking about. A lot of times it's just dribble. I understand human nature and that we cannot always chat about politics, religion, or philosophy. I just happen to find those the best of conversation pieces when I'm talking with someone man-to-man.

There's a fine difference between having a discussion about another person or their weak character compared to sitting around continuously taking jabs at them. I once listened to several guys rant on about another man who, by his very nature, is awkward and slower than most. I find that pretty damn repulsive.

5. Limit Your Sarcasm

I enjoy the occasional use of sarcasm; especially the kind that isn't so easily noticed due to your tonality. But tonality certainly plays its part and, unless you're autistic in that fashion, the average bloke with pick up on it.

When I think of the overuse of sarcasm, men like Kyle Kulinski or Cenk Uygar come to

mind. Liberalism and sarcasm seem to breed bitched-tongue men. Avoid it because sarcasm is not a trait I'd consider positive to be associated with. I find it, often times more than not, immature and annoying.

6. Learn To Cuss With Style

I'm sure many have heard folks compare one who cusses like a sailor to being ignorant. Well, some of the brightest men I've conversed with cuss like sailors. But, on the flip side, I've been in the presence of those who *do* cuss like sailors and *are* rather dumb in the head.

Some folks do not like cussing altogether. Personally, I enjoy a really well-placed 'fuck' or 'goddamn.' It seems, to me, one could even suggest there's a genuine art to 'bad words' and how to best utilize them in conversation. However, I do find women who cuss often to be some of the most idiotic compared to men.

We are men. Men cuss. It's manly.

Conclusion

These are a few ways I believe could aid one in becoming a better conversationalist. I've held some of the most wonderful conversations with men who have the ability to display many of these traits.

I'm not sure there's enough talk about how to hone in your skills when in conversation. But I find it a somewhat fascinating topic; especially when one eavesdrops on other's chat only to realize it's laced with immature piffle and emptiness.

Antarctica Is A Perfect Place To Resettle Society's Losers And Slackers

September 10, 2018 | by Beau Albrecht | Link | Original Link

During the Age of Exploration, multitudes of settlers began crossing oceans to tame new frontiers. Many were fleeing religious persecution, such as the Puritans who were kicked out of Britain for being too uptight. Others were young, adventurous, and ambitious enough to seek their fortunes in a far-off land they'd never seen. However, it even worked for the unambitious. Australia was once a colony for pickpockets and other petty criminals. Nonetheless, *they got their act together*, and it became industrialized and (despite some problems) overall a pretty cool place.

There's a place already even cooler, *way* down under. There's a nearly empty continent just right for the ambition-challenged of today. Who should be "encouraged" to get one-way tickets to Antarctica?

Human Resources

Making the workplace pleasant and enjoyable for all

What do HR droids do, anyway? Since I have valuable skills, I'm disqualified from such a position. However, as far as I can gather, it involves a lot of Solitaire, Minesweeper, Facebook, and Tinder. When they're not too busy with that, they push papers, act as the gatekeepers for prospective employees (even though they often don't understand the industry enough to assess qualifications), prevent employees from flirting, and arrange for those all-important diversity and sensitivity training seminars.

HR departments essentially serve as shovel-ready boondoggles for those who made the mistake of majoring in sociology or women's studies. If Daddy's money didn't fund the four-year Cock Carousel ride, they've got to pay off all that student loan debt somehow! Simply put, HR is dead weight for any company. They draw a salary for *doing nothing valuable*. Let's put this unproductive overhead to work, sending them to a promising new continent!

Dope fiends

Smoking weed occasionally has its effects, but isn't the worst thing in the world. However, chronic use makes potheads lazy and stupid. The hard stuff—heroin, crack, and meth—is far worse, making users act like zombies. It's lots of fun, until they go in and out and back again to prison, where these wasteoids are supervised 24×7 at taxpayer expense. They're also a burden on society otherwise, which is why dope is illegal. To get their fix, they'll mooch and steal until they've burnt everyone who cares about them. Then these Gollum-like creatures hit the street and keep committing crimes.

If they realize they're wasting their lives and do something about it, great. All too often, though, they become frequent fliers in prison and otherwise leech off of society. Since Antarctica doesn't have a drug trade, it's the perfect opportunity to unscrew their heads before they die of an overdose.

Beggars

Got any spare change? I promise I'll spend it on food. Malt liquor and Thunderbird are my favorite food groups!

One of the first effects of politically correct language was to get everyone calling vagrants "homeless". The sillier term, "urban campers", never caught on. I prefer the older words. Hobos got whatever day labor they could find, tramps worked if absolutely necessary, and bums refused to work even for survival. On a serious note, it's a complex topic. Some get in that condition after a string of misfortunes. *I have no problem with those ones.* I wish the hobos all the luck in the world.

Other vagrants are dope fiends and winos. They don't belong on the streets; they belong in rehab. Also, many lunatics refuse psychiatric treatment. Back in the day, the Supreme Court changed the rules on involuntary institutionalization, releasing hordes from state bughouses. Soon, the smelly and crazy panhandlers were everywhere. (Somehow Reagan got blamed.) Then there are terminally lazy bums. I've known one; he wouldn't get up off his fat ass if you lit the couch on fire. When deprived of a couch, he'd hit streets, dumpster-diving for junk food. He fathered two kids before his heart gave out in his 30s.

There's an old term that fits: *useless eaters*. Perhaps the *arbeitsscheu* will figure out how to do something constructive in a bright new colony.

Loading...

Social Justice Warriors

Dude, do you even lift?

Feminism is nauseating, but I realize that most *ordinary feminists* were merely suckered by a propaganda campaign conditioning them to believe they're oppressed. Unlike the propagandists themselves, garden-variety feminists have human souls (although it's hard to tell sometimes). However, I have *zero* understanding for Social Justice Warriors, the "anti-everything" crowd. SJWs hate their society with a religious zeal. This goes beyond believing too many lies.

Simply put, they want to make war on society. These nihilistic tempests in a teapot fail to realize that being a rebel without a clue is for fourteen-year-olds. SJWs are pitiable mental cases who repost stupid memes on Tumblr, spout lame slogans like "Check your privilege!", and conduct online dogpiling campaigns to punish people for disagreeing with them. Somehow they think these antics improve the world. SJWs oppose all that is natural, normal, beautiful, productive, and successful.

To hell with them—but until then, to Antarctica! If these pathetic oxygen thieves want a socialist paradise, let them build it among the penguins. Maybe they'll get pecked to death shortly after Year Zero fails horribly.

Chronic welfare recipients

Don’t breed ’em if you can’t feed ’em!

When I was about eight years old, my liberal parents explained the concept of welfare. Innocently, I asked if anyone chooses just to collect a check instead of working. A horrified look followed after what their little hellion said, and I was told emphatically that it never happens. Now their future shitlord is grown up, and like many citizens, I’m sick of paying taxes for millions of loafers who vegetate in front of their TVs all day, most having not the slightest relation to me.

Some are unable to work through no fault of their own. *They’re not the problem.* Rather, it’s insane to support perpetual alms-seekers who don’t even try, despite being perfectly able-bodied and having no mental problems besides the deadly sin of sloth. First, we must bring jobs back. Then we need to pull the remaining slackers off the public tit. A social safety net is beneficial *only* if it’s well-run, efficient, encourages self-sufficiency, and returns people to the workforce.

Res ipse loquitur.

LBJ started the War on Poverty, resulting in *intergenerational poverty*. (Way to go, Champ!) Those who couldn't hack it in society started getting paid to stay at home and reproduce, ultimately worsening urban blight. Meanwhile, higher tax burdens started making it more difficult for productive citizens to have children. In normal families, parents teach kids about their careers, encourage education, and instill a work ethic that gets them ahead in life. As for the single moms (and more rarely, the baby daddies), maybe they show them the ropes about filling out government forms and gaming The System.

It's basically the takers versus the makers; "We feed, they breed." I don't mind the feeding part so much as the breeding. That's what brings us ever closer to an *Idiocracy* scenario. Only adversity can get evolution out of reverse gear, so it's time for Atlas to shrug. Why not end the cycle of poverty and settle them in a land of opportunity where they can figure out how to earn their daily bread?

Fainéants dehors!

One last hit before I have to pack my bags…

Some will object that Antarctica is an icy wasteland with few resources and no agriculture. Well, if Japan and Singapore can support themselves on manufacture, surely our future Antarctic colonists can figure that out too. *Sink or swim*, slackers!

Don't miss Beau's book catalog. Good stuff!

Amazon Has Banned 9 Of My Books Without Explanation (UPDATE)

September 11, 2018 | by Roosh Valizadeh | Link | Original Link

Starting on Friday, September 7, Amazon has gone on a rampage and banned the paperback and Kindle editions of nine of my books, including my new release Game. The sales pages now give you an error message. Despite repeatedly trying to get answers from Amazon via phone and email, they will not tell me why the books have been removed.

UPDATE: I have also had my entire book catalog banned from Barnes & Noble and Kobo. I added their termination emails to the bottom of this article.

The removals started on the first day Game was released

On Friday I received an email from both Amazon's Createspace (paperback) and Kindle Direct Publishing divisions that stated three of my books have been removed because they were in violation of "content guidelines."

The most relevant parts of their guidelines state the following:

> Pornography

> We don’t accept pornography or offensive depictions of graphic sexual acts.
>
> Offensive content
> What we deem offensive is probably about what you would expect.
>
> Illegal and infringing content

Amazon won’t tell me which guideline I broke

I contacted them by phone when I first got the notice, but they stated that the team in charge of removing books doesn’t have phone support. Through email, they told me they could not give me any details.

Hello Daryush

As stated in our content guidelines at https://www.createspace.com/Help/RightsContentGuidelines.jp, CreateSpace reserves the right to determine what content it considers appropriate. This includes both the cover art and interior content.

I'm sorry, but we can't offer any additional insight or action on this matter.

Thank you for your understanding.

Regards,

On Sunday, five more books were banned.

Hello,

We're contacting you regarding the following books:

[illegible] - Sexy Estonia: How To Pick Love With Estonian Girls In Estonia
[illegible] - Sexy Lithuania: How To Pick Love With Lithuanian Girls In Lithuania
[illegible] - Sexy Ukraine: How To Sleep With Ukrainian Women In Ukraine
[illegible] - [illegible]: The Shooting of One Man's Home From Patient Mayor to Hatred and [illegible]
[illegible] - Pussy Paradise

During our review process, we found that the subject matter of your book is in violation of our content guidelines. Our content guidelines apply to the book interior, as well as cover image, title and/or product descriptions. As a result, we cannot offer this book for sale. If we identify additional submissions with similar content that violates our guidelines you may lose access to optional KDP services and/or face account level actions up to and including termination.

Then on Monday morning I wake up to find that my new book Game was also banned.

Hello,

We're contacting you regarding the following book:

[illegible] "Game: How to Meet, Contact, and Date Interactive Women"

During our review process, we found that the subject matter of your book is in violation of our content guidelines. Our content guidelines apply to the book interior, as well as cover image, title and/or product descriptions. As a result, we cannot offer this book for sale. If we identify additional submissions with similar content that violates our guidelines you may lose access to optional KDP services and/or face account level actions up to and including termination.

We've included our content guidelines at the KDP website:

https://kdp.amazon.com/help/topic/G200672390

Best regards,

Amazon KDP

I called again but was given the same runaround. The phone rep could not give me details or connect me with someone who could help.

I believe the bannings began because the launch of Game was extremely successful. I sold 2,000 books in the first two days and hit the top 700 on Amazon paperback on the first day. Even before Friday’s launch, Game was already in Amazon’s top 10,000. As far as I know, Amazon didn’t receive a single complaint about the content, but they removed it anyway.

Amazon sells books that are far more offensive than mine

My dating books contain instructional details on having sex, and contain naughty words like “penis” and “vagina,” but they don’t promote violent or degrading behaviors like other books Amazon has for sale. Stephen King’s compilation *Four Past Midnight* contains the novella *Library Policeman*. It features the prolonged anal rape of a young boy, and is freely available on Amazon.

> When Sam a little boy, he was returning some overdue books when a, man stopped him outside the library. The man claims to be a policeman, and orders Sam to come with him to pay the fine on his books.
>
> The fine ends up being a prolonged anal rape of the boy, and I do mean prolonged. The grown man forces his massive penis into Sam’s ass as he’s forced against a wall, all described with intimate detail of almost every thrust for four whole agonizing pages… King keeps it going and going and going. It may in fact be the most detailed sex scene in all his work, save one. [Source]

One of the best selling books of all time, *50 Shades Of Grey*, features numerous graphic scenes of sexual abuse, including one scene where the sexy male character bludgeons a

female. It is freely available on Amazon.

> "Suddenly he grabs me, tipping me across his lap. With one smooth movement, he angles his body so my torso is resting on the bed beside him. He throws his right leg over both mine and plants his left forearm on the small of my back, holding me down so I cannot move . . . He places his hand on my naked behind, softly fondling me, stroking around and around with his flat palm. And then his hand is no longer there . . . **and he hits me — hard.**"

Another book that Amazon sells is called *Just Fuck Me!* It features extremely graphic depictions of sex and "getting fucked." It is freely available on Amazon.

Loading...

Dozens of books that feature violent rape are not only available on Amazon, but are featured within lists on Amazon-owned Goodreads so shoppers can find them easier.

There are **hundreds** of other pornographic books that depict sex in the most graphic way

possible, with covers that are barely safe for work, and they are all still available.

None of my books contain child rape scenes, physical abuse, pornography, or sexual violence, and yet they were banned.

Were they banned because they were effective at helping men? Was it because executives at Amazon disagree with my political opinions? Was it an action from a rogue employee? They won't tell me. Whatever the case, someone in the company clicked the delete button and I'm supposed to accept it, but it's hard to do that when your livelihood depends on the basic assumption of fair business practices.

I believe I deserve answers from Amazon. Until then, I will begin researching alternative ways to sell paperback copies to my readers.

You can still buy my ebooks on Roosh V Store

Thankfully, I have a web store where I sell all 19 of my ebooks and audiobooks that you can order with a credit card or cryptocurrency. If you want to support me and my new book Game, you can learn more about it here or click the links below to grab your copy. I'm extending the special deals that were supposed to end today.

The instantly downloadable ebook edition costs only $13 and contains unrestricted PDF, ePUB, and MOBI files that can be viewed on unlimited devices. After submitting your payment, you'll be immediately forwarded to the book's download page…

Click Here To Order Ebook Edition (Instant Download)
The audiobook + ebook edition costs only $21 and includes both the ebook package *and* the 13-hour audiobook in unrestricted MP3 format that is narrated by myself. Hear me say lines in the same way I deliver them to women…

Click Here To Order Audiobook + Ebook Combo (Instant Download)
Click here to view the full description of Game at Roosh V Store.

Now what?

The censorship is intensifying. I'm not the only one who noticed the banning of Alex Jones on just about every tech platform in existence. I thought our tech overlords would first censor political figures on the right in preparation for the American midterm election this November, but it's clear that even if your work doesn't contain anything remotely political, like my dating books, they will still go after you.

Amazon and other tech companies have no moral qualms about hurting people's lives under the guise of eliminating "hate speech" or "offensive" content without objectively defining what those terms actually mean. The drive to censor anyone with an opinion not sanctioned by a global corporation will only get worse, but as long as I have a mouth, I

will continue to speak.

UPDATE:

Here's a solid analysis from the Spectator:

> We are living in an Orwellian dystopia. Democrat members of Congress advocate harassment of their opponents, and Republican congressmen are targeted by assassins and GOP candidates are assaulted by knife-wielding lunatics, yet the so-called "mainstream" media insist that it is the Right, not the Left, which is dangerous. In this bizarre mirror-reverse world, atheists, homosexuals, violent anarchists and vehement man-hating feminists are free to say and do what they please, but a guy who tells other guys how to be successful with women is demonized like Emmanuel Goldstein in Nineteen Eighty-Four. Instead of free speech being suppressed by an all-powerful government, the enemies of freedom are gigantic multibillion-dollar Internet companies eager to appease swarming squadrons of social justice warriors (SJWs) who bombard them with complaints about alleged purveyors of "hate."

I also did interviews with Alex Jones, Paul Joseph Watson, JF Gariepy, and Luke Rudkowski.

Below are the termination emails that Barnes & Noble and Kobo sent me. They each banned all 19 of my books, even Free Speech Isn't Free, which does not have any sexual or graphic content.

Dear Daryush Valizadeh,

Your Barnes & Noble Press account has been placed on hold and all of your books are currently unavailable for sale from BN.com and the NOOK Bookstore because there is a business concern with your account.

Please email us using this form for information on why your account has been placed on hold and to discuss any necessary next steps to reactivate your account.

We look forward to hearing from you.

Sincerely,
The Barnes & Noble Press Team

Hi,

Thank you for your interest in publishing with Kobo Writing Life. Unfortunately your title Free Speech Isn't Free has been blocked from publication on our store for the following reason(s):

- Inappropriate content (general policy violation)

Please contact us directly at writinglife@kobo.com if you have any questions about why this title has been blocked.

Sincerely,

The Kobo Writing Life Team

This article was originally published on Roosh V.

4 Famous Celebrities That Are Actually Anti-Christs

September 11, 2018 | by Edgar Tru | Link | Original Link

I recall watching the film Megiddo: Omega Code 2 as a child. In part, it messed with me mentally. But, as I've grown, and in keeping with intellectual company, I find much wisdom in Christianity. Same for Islam, in fact. Same for the old-school cats of LeVeyan Satanism all the way to Might Is Right. Nature. She is real, She is alive, She is watching.

Getting back to Christianity, I remember being told about 'lukewarm' Christians and how they'd be judged, perhaps far harsher, than an atheist or non-believer. I recall rhetoric which espoused that there'd be an anti-Christ which would come (most likely from Rome) upon Mother Earth and many would fall before their deceit.

Well, I came to this observation back in either 2011 or 2012 when working on some literary material. And it rings a tune I can dance to.

Joel Osteen Is An Anti-Christ

Pastor Joel Osteen is a rat bastard, in my humble view. Men like him espouse that God is basically all love. That's simply a lie. I was told, in my youth, that there'd be an anti-Christ which grown men would weep before in total belief. That even the strongest of men would follow them blindly in the potential millions, if not billions.

Pastors like Joel Osteen fit very well the anti-Christ I was warned about. Many other famous TV-based, money-grubbing whore pastors fit the anti-Christ description I was given as well. And many of these pastors, both the TV-based ones and those operating liberal-drenched churches, are very aligned with many leftist values and many still take this let's-all-just-hug-and-love mentality when, in reality, we know that is a limp-wristed, weakening mentality which, in the end, causes a society to become too soft, too accepting, too loving. Are you yet connecting the dots?

Miley Cyrus Is An Anti-Christ

Yes, Miley Cyrus (just to pick one out of the many celebrity higher-up bourgeois brats) is

an anti-Christ. Women like her perpetuate much of the mindless whoredom, party-all-night lifestyle and mentality of the contemporary American youth. And I damn well understand the desire to simply cut loose, get piss-drunk and hit the dance floor while grinding on a fine-looking Latina's ass. It's natural, it's normal, it's human. But these have political and cultural snowball effects and societal comeuppances; especially when perpetuated and glorified by Hollywood, music and literature.

Ben Shapiro and his book Primetime Propaganda lay out very nicely, from the 1960s to our contemporary America, how Hollywood became more and more liberal. And reviewing that process goes to show that every decision truly leads to furthering that decisions extension far beyond its borders. It starts with just hearing a toilet flush on TV for the first time, or allowing two gay men to kiss for the first time. It's quite remarkable to ponder over, I find.

Do not give that mouse a cookie.

Gloria Steinem Is An Anti-Christ

Ever hear of Gloria Steinem? She is an American feminist and political activist who began her operations of advocating for feminism in the 1960-1970s. She's an old rag now but still going strong with her feminist agenda and propaganda. She was a co-founder of New York Magazine and Ms. Magazine, to which she seems to remain a consulting editor.

She pioneers female-empowerment in culture and politics. She's apparently often dubbed the "Mother of Feminism." She also has some very interesting quotes:

> "A woman without a man is like a fish without a bicycle."
>
> "A liberated woman is one who has sex before marriage and a job after."

> “Don’t think about making women fit in the world – think about making the world fit women.”
>
> “Women have two choices: either she’s a feminist or a masochist.”
>
> “We are talking about a society in which there will be no roles other than those chosen or those earned. We are really talking about humanism.”
>
> “We’ve begun to raise our daughters like sons. . .but few have the courage to raise our sons more like our daughters.”
>
> “We can tell our values by looking at our checkbook stubs.”
>
> “The authority of any institution must stop at it’s citizens skin.”
>
> Loading…
> “Clearly no one knows what leadership has gone undiscovered in women of all races, and in black and other minority men.”
>
> “The surest way to be alone is to get married.”
>
> “Law and justice are not always the same. When they aren’t, destroying the law may be the first step toward changing it.”
>
> “On my 70th birthday I was going to get a tramp stamp.”

What *fascinating* propaganda. Her rhetoric, truly so, is an absolute art of manipulation and holds very strong anti-natural sentiments. I must give the old bag credit. The adversary is quite cunning. And this propaganda has surely infested our universities in ways which have already been keenly observed.

The feminist is a suicidal fanatic and danger unto herself. For man has not raised a strong hand to save her from her own destruction; thus, man condemns both his sons and daughters to hell.

Emma Watson Is An Anti-Christ

Personally, if I was to engage in chat with any feminist, it'd be Emma Watson. Mostly because of her looks, but I do appreciate her calm, overall collective demeanor. However, she also believes that men and women can be equal in every aspect of life.

On paper, it looks fine and sounds reasonable. Why hold down another group and cause tension and conflict when we can all be friends and watch rainbows form together? Because Nature doesn't give a shit about emotion. She is all about law and order, dominance and submission. The female is *only allowed* to rule over man because *men* allow it. The female alone is powerless and must have men do their bidding for them. Period.

Why do I show respect toward the female cop? Because, if I get out of line, a bunch of male cops are going to kick my ass. The female cop alone is useless in serious situations. Equality is perhaps the worse myth perpetuated by the West.

If misogyny is able to rise up in the West, it is perhaps possible to regain control of this ever-crumbling empire. If not, another dominant culture and group shall have to swoop in and be the next saviors. And, in time, they may make the same damn mistakes as the post-Western man, and on the cycle continues.

The Apocalypse Already Happened

An intriguing cat, named Boyd Rice, once espoused:

> "I think Armageddon came a long time ago. The end of the world came ages ago, but it happened slowly over a period of time and nobody noticed it. It's an on-going process. The world today is different than the world thirty years ago. It's like decayed so much, and it's decaying more and more all the time. And as that decay gets worse, we get stronger. And we are rising up as the entire world is sinking down, until our world is rotten and corrupt and they're ordaining their own death. To us, they're just dead people who refuse to lie down."

Look around you. The world is in a pot of piss and the West, especially America, is ruining herself. We now have judges who take away a teenager from their parents because they refused to adhere to their brats desire to take hormone-stoppers to transition into the opposite sex. The US army (or global tyrants) is being weakened by allowing females to actually serve on the frontlines of war. People, in everyday public conversation, have to whisper far too much between sentences because someone might over hear, get offended, and enact violence. Homosexual marriage was forced through, which then created a political and cultural snowball effect of far worse degeneracy, as I see it. This is only a minority of conundrums slowly but surely plaguing the West like a virus.

The anti-Christ is anti-Nature.

Conclusion

Conservatism will have to be forced upon the West by means of government. That is my belief. Logically speaking, I cannot foresee any other way. Perhaps a way will appear and we'll finally get that utopia so many progressive liberals aspire to. Of course, you'll have to completely adopt all their views of morality in order to achieve it while completely

rejecting your own.

I think America is done for. When I look at Old Glory, I no longer see what she once was. No, I see an imposter. And I know, as she flies high in the wind, she looks down laughing at us in the grimmest, most sinister of ways.

Cosmopolitan Magazine Defends Gigantic Woman's Bikini Photoshoot In Times Square

September 11, 2018 | by Beau Albrecht | Link | Original Link

Anna O'Brien is a figure in the trend known as body positivity or fat acceptance. She's no stranger to controversy. In the past, she's managed to turn bad publicity into an opportunity to model plus-sized clothing. That's turning lemons into lemonade, right?

She's also appeared on a *Daily Mail* article, featured with her skinny friend who is tatted-up and has a rather odd haircut. Cool deal, having friends is all well and good. I hang with my friends too sometimes, but that hasn't made international news yet. Well, that's probably a good thing.

All told, perhaps she likes publicity. Recently, she made a bit of a splash in Times Square, memorialized in a July 3 Instagram post.

The bikini incident

Phryne had a few too many cheeseburgers.

A *Cosmopolitan* article described the scene. It begins with her nervously stripping down to a bikini. The reaction was unexpected:

> "I want to suck on them tasty toes."
>
> "Hey baby, let me butter them biscuits for you."
>
> I looked up to see three men with camera phones filming me. Our eyes met, and one uttered, "Twerk for the camera baby, show them how that ass clap."
>
> Tears began to well up. I was prepared to be pointed at, shamed, and called fat. I didn't expect to be fetishized.

Okay, so some guys are into that, and apparently foot fetishes too, though that was pretty bad game on their part. Also, they forgot the number one rule of living in New Yawk City: *"Don't get invuolved."*

That said, doing socially inappropriate things often gets a socially inappropriate reaction of some sort. I wouldn't care to walk through Manhattan in a Speedo, even if I looked like a movie star. (If I'd done so back when I was forty pounds heavier, I would've felt guilty of a crime against humanity.) Anyway, exhibitionism in Times Square is nothing new, though it traditionally involves guys in long trench coats.

Still, another detail made O'Brien indignant:

> Fifty feet to my right in the busy, tourist-filled space were two thin, large-busted women, wearing only g-strings and some body paint. I watched them with envy. Nobody yelled at them as they worked to hustle up a few dollars selling photos with eager tourists. They were just another part of New York."

Well, heck, it sounds like she too could've made some dough selling pictures! After basically some more of the same, and then a lame fat joke, a crowd gathered and she began her planned photo shoot:

> "Now I was safely in model mode. Pose. Click. Pose. Click. Magic.
>
> Still, as I turned around for some side-angle shots, I noticed one of the men had continued to film me from behind. In nearly every image I have, you can see him standing there, holding his camera-phone up at the perfect height to capture my backside. I was faceless to him. I was just a body he wanted to exploit and use. My feelings didn't matter.

At the end, a little girl addresses her:

> I waved at her, and she returned my gesture with the biggest grin.
>
> "You're pretty," she whispered.
>
> I realized in that moment, it had all been worth it. I had been seen.

What was this all about?

So her crew can film her, but it's bad when anyone else does?

Likely the guy filming throughout was the one in black (rather "plus-sized" himself), standing behind the stunned-looking lady in the blue-green blouse. Perhaps he was one of the ones making crude remarks, though it's not clear. Bad game notwithstanding, the conclusion is still a bit of a stretch. Since she was in public, with her own camera crew shooting her wearing a provocative outfit, *why was it wrong for someone else to take pictures too?*

Since she drew some conclusions about his motivations, it's not unfair if I guess about hers. It seems that O'Brien wanted attention. That's why people put themselves on display, right? Well, she got attention!

In summary, crowd reactions included:

- Negative (the fat joke)
- Moderately positive (the little girl)
- Excessively positive (the chubby chasers)

Perhaps she only wanted polite congratulations for bravery in defying conventional standards and all that jazz. However, the chubby chaser reaction was the major topic. So she disliked feeling objectified and so on, which occurred after putting herself in a situation certain to get a reaction.

Loading...

However there's an upside. It gained more media attention, which (as in the past) may help promote her supersized clothing model career. Perhaps it's the "all publicity is good publicity" principle. She got to blow off steam about it too. Maybe she's one of those people who get their kicks from being offended, creating opportunities to generate drama. (This seems similar to the "yellow zebra print lady" incident. Some attention-harlotry is politically motivated and geared to generate outrage.) Either way, it's basically a win-win for her.

What's up with *Cosmopolitan*?

At least they edited out most of the cellulite.

Cosmo seems a rather odd venue for the topic. Isn't "THOTs of the world, unite!" their major shtick?

Apparently, things are changing at their editorial offices. Their October 2018 edition continues the trend, controversially featuring a very hefty Tess Holiday. Granted, she has a modestly cute face and appealing hair, but in a couple of other rather obvious ways, she's not exactly the typical *Cosmo* cover girl.

I'm okay with the curvy look, but *within sensible limits*. This supersized business is getting excessive, to put it kindly. Why try to make extreme obesity fashionable?

If they won't cover the health angle, we will

Despite appearances, O'Brien has been into fitness for years. Hey, at least she's trying. For those who aren't making expected progress, lessons learned are the following:

- Aerobics only gets you so far. Lift heavy, especially if your day job doesn't include it.
- If your routine isn't providing forward momentum, then take things to the next level. Gradual advancement (weight lifted, increasing reps, and improved form) should be happening.
- Exercise is great, but a caloric deficit is still necessary to lose weight. Put down those cheeseburgers!
- If you're stuck in a rut, do some research or get some coaching. Also see a doctor to find out if you have a problem such as a hormonal imbalance.
- Keep a realistic self-assessment of where you're at.
- Motivation is essential; banish discouragement immediately.

Other than that, morbid obesity is clearly unhealthy. *ROK* promotes self-improvement. *We don't want people to suffer.* Those who don't listen to us should at least listen to their doctors.

What a crowd thinks is one thing; living longer and healthier is its own reward. Note well, I'm not trying to rain on anyone's parade here. It's not my intention to demoralize O'Brien or anyone else out there who is struggling, which many people are these days.

This is a problem

Dude, pull yourself together!

Junk food and easy living are taking their toll. This point became quite clear when I took a trip to another city recently, and saw several guys who probably weighed five hundred pounds, if not more. It was a deeply saddening experience.

Whether it’s a matter of hitting the gym, cutting out crappy GMO food and garbage loaded with partially hydrogenated grease, or whatever, it takes fixing care of the problem is pretty damned important. For those out there who are discouraged, do something and don’t ever give up.

Don’t miss Beau’s book catalog. Good stuff!

I write **off-the-wall fiction**, and ***Righteous Seduction*** concerns next-generation game. My **blog** concerns "deplorable" politics, game, and my writing projects.

5 Worst Presidents In U.S. History

September 12, 2018 | by Jared Trueheart | Link | Original Link

Why are the worst presidents in U.S. history considered to be so? Many of the same presidents are considered to be among the worst by scholars and historians. When you go in-depth as to why they are considered the worst, you will notice some trends. I've distilled them down to five factors that make or break U.S. presidents.

Decisiveness

Presidents who wait to solve problems or wait to take action in dire situations create more problems and more dire situations. Their indecision represents personal and presidential failures that make earn them a place among the worst presidents.

Imperialism

Presidents who spend American resources on imperialism when they should be solving domestic problems are among the worst. There are no international issues that take precedence over domestic issues. We have everything we need in America. Imperialism at this point is a sort of vanity, especially if it comes at the expense of solving America's domestic problems.

Corruption

An old teacher I once had used to say that the problem with the American government was that all the corruption was legal. Yet, some presidents are far more corrupt than others. Those presidents are among the worst.

Warmongering & Military Spending

The military is expensive. The military industrial machine America has is incredibly expensive. Not only does it cost a great deal of money to keep a well-trained standing army, but once you have such an army there is a temptation to use it. Those who make that call are among the worst presidents.

Racial Tensions

As Ann Coulter says, America has always been a two-race nation. There are the Europeans who settled this nation and descendants of slaves from Africa who labored in the fields. There were some other early peoples (like Native Americans who allied with European settlers and Chinese laborers who worked the railroads), but these two made the vast majority. Many of the worst presidents antagonized the relations between these

groups.

With that said here are some of the worst presidents in U.S. history.

1. James Buchanan

Buchanan is often considered one of the worst because he did very little to prevent the southern states from seceding in the lead-up to the civil war. He influenced a supreme court case which decided that slavery could be outlawed hoping it would put the issue to rest. It did not. The slavery/anti-slavery argument continued and lead to the civil war. Buchanan failed to take decisive action and is remembered for that failure.

2. Warren Harding

Harding admitted to not being fit for the office, but he took it anyway. He was a notorious people pleaser and womanizer. What makes him one of the worst is the corruption. He let his cronies and buddies use public resources and funds for personal gain. What's more, he was notorious for spending his time playing golf and poker when he should've been doing president stuff.

3. Woodrow Wilson

Wilson is guilty of warmongering and imperialism. He had an out-of-control sense of humanitarianism. He wanted to spread democracy across the globe for the betterment of man. He did that by getting the U.S. involved in WWI. It created an economic recession. Domestic economic problems and the loss of American lives were the prices of Wilson's attempt at imperialism.

4. Ronald Reagan

Loading…

Many people like Reagan for his good qualities, but there is no denying how much bad stuff started with Reagan. He shifted the tax burden from the very wealthy to the working class. This resulted in the ever-increasing rich-poor wage gap which may make the U.S. a 3rd world country one day. He placed all woes on the government and taxes but didn't mind spending incredible amounts of money on the military and other acronym organizations.

5. Andrew Johnson

Johnson is often considered among the worst because of his inability (corruption?) in regards to the reconstruction of the U.S. south after the civil war. His actions and inactions resulted in Jim Crow laws and disillusionment of southern states with the federal

government. He was so bad he was impeached and nearly kicked out of office.

Now that we have some historical examples (there were more that I didn't mention), how do 21st century Presidents compare?

Modern Presidents Comparison

George W. Bush

No other president mixed up warmongering, imperialism, and corruption as blatantly as George W. Bush. After 9/11, which he and Bill Clinton should've done more to prevent, Bush got the U.S. into two wars. Rather than just bombing those waste-dumps known as Iraq and Afghanistan into oblivion, he sent in ground troops. We were in Iraq for years after Saddam Hussein was dead.

Halliburton was all anyone could talk about during those years. Did Bush really send U.S. military to die in Iraq so Halliburton could acquire its oil reserves? Or was it also to spread democracy, this siren song of the neo-cons? Who can say? Either way, a century from now Gearoge W. Bush will certainly be remembered among the worst U.S. presidents for these reasons.

Barack Obama

Logic would tell us that the first black president would have strained racial tensions on his CV but he does. Every time somebody got on some podium and said America is a racist nation, Obama should have replied that it wasn't. Yet he never did. His inaction really sent America down the wrong direction. (I'm slightly surprised he didn't say that the only reason he won the presidency was that the white half of him had white privilege).

Corruption scandals abound during his office thanks in large part to his secretary of state, HRC. It was a poor choice, but you also have to wonder why she was never relieved of her duties. He's got warmongering on his resume as well. The war in Afghanistan started before he was in office and continued throughout his presidency. At some point ending a war has to be a priority or you'll be remembered as one of the worst, especially with all the corruption and racial tensions.

Donald Trump

Trump only has two years while the others have eight, so this is probably premature. So far, though, all the corruption charges against have been complete BS. He's accomplished much economically and worked to kill terrorists rather than just prolong the wars against them. His worst flaw thus far is the lack of a southern border wall. It could still happen though.

Thus far, the first two 21st century presidents will undoubtedly go down in history as two of the worst U.S. presidents ever. I have high hopes that Trump will be remembered as one of the best.

For more about manhood and masculinity in literature, history, and the media check out Legends of Men.

Why You Should Never Feed A Dog Pet Food

September 12, 2018 | by Charlie Kennedy | Link | Original Link

But dogs need pet food, right? That's why it's called pet food! Well, I'm here to tell you that pet food is a lie. In fact, that's the worst thing you can feed your dog. So what should you feed him? I'll tell you. You should feed your dog Barf.

Not that kind.

Barf is an acronym for Bones and Raw Food, or Biologically Appropriate Raw Food. It's what your pet should be eating. But that's not what people are feeding pets anymore. Just like with us humans, real wholesome food has been replaced by bullshit.

If you didn't already know, the Standard American Diet was based on a flawed and biased

study called the Seven Countries Study. It was biased against saturated fat and cholesterol and omitted results that contradicted those biases. That's why it's only a seven country study. Human health has been falling in a death spiral ever since.

The pattern repeats in the pet food industry. In the mid-1800s, self-proclaimed pet experts started saying that "civilized" dogs shouldn't be eating raw meat. Around the same time, a man named James Spratt made the first dog biscuit. He called it the "Patented Meat Fibrine Dog Cake". He paved the way for many of the pet food brands that you see today. And pet health has been falling ever since.

Of course, the pet food industry says that raw meat is just horrible for pets. Do you think they would say that raw food is better for dogs or cats? No way! They would lose millions of dollars! So, let's go over a tiny portion of the benefits you can expect.

Better breath

When pets eat BARF, their teeth get cleaner! Dogs and cats were not meant to eat large amounts of carbs. When you do that to them, their mouths start to rot. Just like eating too much candy, pet food causes halitosis, bleeding, pain, broken teeth, and other nasty things. Watch this video.

Look at how much effort it takes this dog to eat his food. That effort is what cleans his teeth. Could you picture a wolf in the wild going to the dentist? Of course not. When we see fossils of carnivores, they have most of their teeth. This is the reason why. If you like kissing your dog, this will make their kisses smell like sunshine. And no, you won't get some crazy second-hand food poisoning. In fact, dog saliva is antibacterial, so you'll probably be fine. Just use good food handling habits.

No major health problems

Loading...
They're cousins.Diabetes? Gone. Heart disease? Gone. Kidney failure? Gone. Skin problems? Gone. Most of your pet's health problems will disappear once you go raw. This is because they're getting all the nutrients they need, in a form that they can digest. Pet food companies can add what they need, but it's no good. The natural form is always better.

So, it's important to not cook the food. Most animals don't know how to cook. So, they don't get all the nutrients in cooked food. Simple. I have a family that always suggest that

I should cook the food, but why should I? My dog can't cook! I've never seen a dog on Hell's Kitchen. That's solid proof. Giving dogs (or cats) cooked food as a treat is okay, but it should not be a major part of a diet.

Lean muscular body

He'll fight for you.Do you want your pet to be strong? Do you want him to be fast? Be able to protect you? If you want your pet to be as buff and as lean as you (hopefully) are, stop feeding him garbage. Humans don't get buff with carbs as their main calorie source. Neither do cats or dogs.

When you think of a wolf eating, do you picture him eating a bowl of cereal? Or maybe a bowl of lasagna? No. That wolf is eating a moose. Pet food is the same as a bowl of corn flakes at best. At worse, it's poison. Some pet food brands don't even have meat. If they do, it's most likely the worst quality you can find. Don't let your pet become obese. Go raw.

Conclusion

I could go on and on, but I won't. I'm just some guy on the internet. You should do your own research. So, go on YouTube and search for the BARF diet. Check out the work of Dr.Ian Billinghurst. Watch Pet Fooled on Netflix. And check out Dogs Naturally, a website that's all about raw feeding. These are great sources of info for the beginner. Most people trust whatever the pet food industry says. I certainly did. But if you're on this site, you know that blind trust is a bad idea. Try it, before your dogs health starts going to the dogs. Your pet and your wallet will thank you.

Serena Williams Blames “Sexism” For Losing The 2018 US Open Championship Match

September 12, 2018 | by G.S. Luthra | Link | Original Link

Serena Williams lost to Naomi Osaka at the 2018 US Open Championship match. What made headline news was the meltdown of Serena over a point and game violation for her behavior. Despite receiving multiple penalties, she kept yelling at the umpire, Carlos Ramos, demanding that he owed her an apology.

Player coaching has been an ongoing problem in tennis and during the match, there were instances where authorities caught her coach giving signals during points, which is a violation. There was nothing ‘unfair’ about giving her a warning for it. Serena just took too far by fighting back, bringing up irrelevant things like having a daughter, which had absolutely nothing to do with the situation. She kept saying ‘I didn’t get coaching,” and “I have never cheated in my life!” She later made exaggerated accusations that escalated the situation.

> You stole a point from me. You’re a thief, too.

Williams demanded to speak with a higher authority, which is when Brian Earley, the referee, stepped in the address the situation. Serena began venting to the other lady, crying and whining. When her coach, Patrick Mouratoglou, was interviewed by an ESPN reporter after the match, he even admitted to it, but then tried to justify it by saying that everybody does it.

> I’m honest, I was coaching. I mean, I don’t think she looked at me so that’s why

> she didn't even think I was. But I was like 100 percent of the coaches on [sic] 100 percent of the matches.

Coaching is fine when marketable players like Serena are involved, but when someone calls her out for it, suddenly, it becomes a gender issue. Ramos is actually one of the few respected umpires because he isn't afraid to make tough calls on elite players which he has on Rafael Nadal, Novak Djokovic, and other rising players like Nick Kyrgios.

The odd thing about the video is that how come you can clearly hear everything Serena says yet not what Ramos or the referee, or anyone else was saying? Something just doesn't sit right with this whole thing. I have heard that The Super Bowl was rigged in the past, and remember watching an interview in school with a man who was in prison for steroids state that the entire Olympics is a sham. Then I hear things like the UFC tells players to make fights last longer to make the audience feel like they got their money's worth.

People like to bash Vince McMahon for the WWE being fake, but if you investigate enough, you'll find that all sports is simply one big entertainment scheme where payoffs and sellouts can manipulate entire matches. So when I see this outburst from Serena, and how the camera so perfectly catches a woman in the audience cheer her stupid behavior at around 9:30 in the video clip, it all seems like a setup to me.

It looks like orchestrated sports entertainment designed to sway sheeple to think a certain way. Call it crazy, but with how things are going on these days, you'd be crazy not to suspicious.

During the after match conference, Serena claimed that what was done to her was sexist and that a man would not have received such a penalty, but the fact of the matter is, she made the situation worse unnecessarily by letting her emotions get out of control and thus paid for it. Ramos did his job, and did it well despite the immense pressure on him from a wild yapping woman.

Loading…

Serena's Bad Behavior

The problem with Serena Williams is that she thinks she's the queen of tennis and expects to be treated like royalty. She plays an act, but when things don't go her way on court, her true colors come out.

Williams was fined $17,000($4,000 for the coaching warning, $3,000 for smashing her racket, and $10,000 for verbally abusing Carlos Ramos). Even though this situation involved a Black woman, a Spanish judge, and a Japanese winner, it's still the White man's fault. Serena has been getting away with it for a while and it's about time he got what she deserved. In the past, she got penalized when an oriental linesman told the chair umpire that Serena threatened her.

Serena said 'Are you serious?' when authority asked about the threat, denying it, however she later apologized for it…

As you can see, Serena has a history of racquet abuse and aggressive behavior.

Defenders of Serena

Billie Jean King, a former player, made these statements on Twitter:

> (1/2) Several things went very wrong during the @usopen Women's Finals today. Coaching on every point should be allowed in tennis. It isn't, and as a result, a player was penalized for the actions of her coach. This should not happen.
>
> (2/2) When a woman is emotional, she's "hysterical" and she's penalized for it. When a man does the same, he's "outspoken"; and there are no repercussions. Thank you, @serenawilliams, for calling out this double standard. More voices are needed to do the same.

Of course, male stooges like James Blake, a former Black tennis player who went to Harvard during the high days of affirmative action, and washed-up has been players like Andy Roddick, bashed the umpire in their tweets.

Roddick himself has a track record of whining like a girl even before the match has begun…

John McEnroe was notoriously known for his anger bursts, but he received many fines and disqualifications. Other men have too, the media is just choosing not to show it.

This is What Feminism Produces

Why is Serena Williams playing at a tournament when she just had a baby? Why isn't she focused on being a mother? What is the point of playing tennis at her age? What is she trying to prove? People don't realize that a woman who recently gave birth still suffers the emotions of after pregnancy, and Serena's case is a clear example of why women need to stop imitating men and instead be better women.

The real victim is Osaka, who earned her win with her talent, but got booed because of the meltdown of an immature 36-year-old woman. Serena usually intimidates her opponents by roaring like an animal, but that didn't work on Osaka and so she resorted to what she normally does when she can't beat better players: aggression and the blaming of others.

The Truth About Game And Money

September 13, 2018 | by Jon VonStroke | Link | Original Link

The juxtaposition between money and game, as it pertains to determining a man's success with women, has to be one of the most hotly contested subjects around. You have one camp of men who believe that deft game conquers all (oftentimes your PUA guys). Then you have a second camp of men who believe that game is futile due to female hypergamy (oftentimes MGTOW guys).

It is the MGTOW contention that women are only drawn to men who are higher up the socioeconomic ladder than them, therefore, investing the time in learning the essence of "game" is pointless. I've spent many years pounding the pavement and have had the experience of being on both sides of the fence: I have played both indigent and an akin variant of provider game. Below is my perspective on this very polarizing topic.

My Origin Story

I would not consider myself a "natural" by any stretch of the imagination, but I was not a complete dud when it came to women during my high school and college years. Despite having a rudimentary understanding of "game," I was able to get some fluke notches here-and-there, due to naturally being an outgoing person, excelling in team sports, and having a decent social-circle. It was not until the end of my senior year of college that I discovered Roosh, the PUA community, and the Manosphere. I took to the concepts, theories, and advice given by many of these self-proclaimed guru's like a fish takes to water.

With my newly acquired knowledge of pick-up lines, female nature, and escalation

strategies, I started getting a lot more traction with women. Fast-forward six months after graduating from college and discovering game; I took an internship at an undisclosed big metropolitan city with the hopes of getting a fulltime position with the company.

Unfortunately, it ended up not working out for me. Instead of going back home I decided to stay put, in the hopes of that I would eventually land a position elsewhere. Since I was unemployed, devoid of an income, and living off my savings; I ended up moving to a three-hundred dollar a month shoddy basement that someone on Craigslist was renting out—It was all I could afford at the time.

My mode of transportation was a dilapidated Pontiac Grand Prix that had an overheating problem due to a blown head gasket. I was so embarrassed by it. During dates, I would park it as far away from the venue as possible; this was so I could prevent my date from seeing what my daily commuter looked like. Despite being in such a lousy predicament, my thirst for sex and the novelty of living in a new city allowed me to remain steadfast in my pursuit of women.

Since I was unemployed and refused to work a low paying menial job (although in retrospect I probably should have), I had quite a lot of free time at my disposal. I was going out about three to four times a week and chatting up every cute girl I laid eyes on—I was obsessed. I became so proficient at my craft that I was getting laid about one in every three dates I scheduled—I never kept track, but I probably racked up close to 50 notches that year.

How did I manage to achieve such success you might ask? Through hard work, dedication and an IDGAF attitude. Since I did not have any money, my game was based around escalating as soon I sensed an opening. I also took risks I would normally not dare to take since I felt like I had nothing to lose. My aim was to approach, captivate, and get to sex as soon as possible. Preferably before the energy and booze begun to fade. That way I could keep things as sexual as possible and prolong having to engage in disqualifying small-talk, such as what I did for a living or what part of town I resided in (the lack of employment and crappy living situation gave me a lot of insecurity).

My hyper-sexual and masculine frame coupled with my evasive nature, particularly to personal questions about my life, gave me an aura that was really conducive for bedding women. This period of excessive serial dating and screwing on a shoestring budget lasted for about thirteen months until I finally got offered a very lucrative job.

I never again managed to reach the heights that I had reached during the time in my life in which I was dead-broke…

The Aftermath

At twenty-four years of age, I had no kids, absolutely no debt and I was making a six-figure annual income at my new job. I was by no means rich, but in comparison to most of my contemporaries, I was doing quite well. Long gone were the days of living in a crappy basement, driving a run-down jalopy, and having to worry if my debit card was going to go get declined. Due to the rigors of working as a corporate slave, five days a week, sometimes six, I took some time away from women to focus on my profession.

When I got back into the game eight months later, I was in for a rude awakening. On paper, I was a much better-equipped bachelor than the destitute man of twelve months ago. Yet for whatever reason, I was nowhere near close to being the pussy-slayer of old. I lost my cutting-edge and killer instinct. Instead of ending my dates/nights with a bang, more times than not, I was coming back home dick-in-hand. The situation I was in was so confounding; I was not doing anything different, so I thought. Plus, my newly acquired resources were supposed to propel me to the next level.

Loading...

After a couple more months of sexless dating, I came to the realization that the reason I was struggling to get women undressed was down to my lack of masculine frame. During dates, I tried way too hard to qualify myself. I would boast about my academic achievements and dramatize the nature of my work. Later I discovered, as long as a man has the means to pick up the tab at the end of the night, the actual title and description of his job means little to a woman. This behavior of “selling myself” was a stark contrast to the mysterious, playful and evasive formula that served me so well in the past.

The extravagant venues I would oftentimes pick for dates and my proclivity to express to girls how “big my dick was” effectively killed off any intimacy or sexual tension that might have been there otherwise. Another side-effect of trying to woo women with displays of wealth is they subconsciously put you in the “provider” box. This is not necessarily a bad thing if you are trying to cultivate a long-term relationship, but if you’re trying to get to sex quickly, this is one of the worst things you can do. A woman will withhold sex from a man she thinks will make for a good beta breadwinner due to fear of not being taken seriously if she puts out too quickly.

She wouldn't want to squander a great opportunity to leach off an unsuspecting man's resources, would she?

So What Does This All Mean?

So you probably think I am one of those guys that believe money is unimportant, that good game and a masculine frame are all that are required to succeed with women. My answer to that assertion would be yes and no.

In the above anecdote when I was penniless but getting laid like it was going out of style; I failed to mention the sheer amount of hours I put in the streets hustling and bustling. It was not a big deal at the time because I was twenty-three years of age and had zero obligations, but today I no longer have the energy or time to partake in such a strenuous endeavor. It helped that I had a schedule and lifestyle that was pretty much tailor-made for seduction, due to virtually being available 24 hours a day, 7 days a week and not having the energy zapping burden of a nine to five job.

So where does money come into play? Although money does not guarantee success with women unless you pay for a prostitute, which I argue isn't a legitimate notch; It does make things a hell of a lot easier when used properly. The biggest obstacle I encountered when running "indigent game" was retaining women, especially the more attractive ones with higher market values. It's a known fact that women seek out men who have the means to provide for herself and offspring. Once a woman discovers you don't have the money to put bread on the table, especially if she is nearing her biological clock, be prepared to get the boot.

Additionally, the highest tier of woman flock to where the money is at. If the runway model archetype is your thing (it happens to be mine), you're going to have to get yourself immersed with the elitist crowd in your respective city or town. Unless you sell drugs or have really good connections, you'll need to have to some status and money to have access to these more exclusive women. Lastly, higher quality women, as in eights and above, aren't gonna be as eager to have an under ten dollars walk in the park kind of

date, unlike women who are seven and below.

Conclusion

I was able to get laid without money and with money. Not having money in the bank does not prohibit a man from bedding attractive women as long as he's well versed in the art of game. However, pursuing women on a tight budget can become quite labor-intensive.

In my experience, the most difficult challenge I was faced with was keeping the women in my roster around. I was constantly having to go back into the field to harvest out more leads so that I could keep my pipeline full. If I was able to get a few bangs out of a girl, I considered that to be a success. With that said, there are plenty of men who despite having lots of wealth can't get laid to save their life—money does not guarantee anything. Therefore, it's in a man's best interest to familiarize himself with the mechanics of game.

What it does do though, is open the doors to many opportunities you would ordinarily not have available to you if you were broke. Additionally, success and money raises a man's market value and provides him better opportunities to score with higher attractive females. An alpha who has his shit together is a force to be reckoned with.

I personally use my good job, nice car, and a luxury apartment as "bait". Instead of lamenting about female hypergamy, I exploit it. I don't brag about my successes like I once did; women can tell pretty quickly what a man's economic standing in society is without him having to publicly announce it. Nor do I try to impress them with by making it rain in the club or taking them to extravagant dates (unless they have earned it). All these props are used to sell these women a "dream". My aloof nature and seemingly affluent lifestyle keeps them spell-bounded.

On the surface, I am just a wholesome and successful man who'd make for an excellent provider. In reality, I am nothing more but a wolf in sheep clothing…

Why Are There So Many Pedophile Priests In The Catholic Church?

September 13, 2018 | by Don Alfredo Cabrera | Link | Original Link

As you probably have heard in the news, earlier in August a Pennsylvania grand jury handed down a 1,356-page account of sexual abuse which involved around 1,000 kids and 300 priests during a period of approximately 70 years. It is another pedophilia scandal within the Catholic Church that adds up to their collection of countless other ones reported in recent years.

The commie pope—while on his two-day visit to Ireland—begged for forgiveness again, just the way he did in Chile back in January of this year.

You can notice how quick and scathing the mainstream media is to denounce these recurring events, after all we know who owns the MSM and the (real) Church has a long, well-known history of “anti-semitism” and resistance against the tentacles of globalism. I wish the media had the same commitment to inform the existence of other pedophile rings full of high-ranking people as well.

What about Hollywood? Remember Corey Feldman and Corey Haim? NXIVM and similar others? You won't see the media going after it. Don't fool yourself, darling! (Picture: Pope in Ireland)

Is the problem of the church's innumerous sexual abuse allegations really pedophilia? To me there is a deeper explanation for it, and that explanation is: homosexualism. 81% of the alleged victims are male and three-fourths of them are post-pubescent. As you guys are certainly aware of, the Church has a very big issue with homosexualism among its clergymen.

I have a theory for the high presence of gay men inside priesthood: until not long ago being gay was definitely not ok, homosexuals were not accepted as they are now, so they became priests.

The developed Western world of today encourages people to become gay, it applauds individuals for their gayness, but it wasn't always like that. Now, try to imagine a closeted homosexual man living in the 50s, for example. What a better place to go than the Catholic seminary? People wouldn't look you down, you wouldn't have to get married, the place was filled with other young men (potential sexual partners) and that's how the Church got corrupted by perverts.

Pedophilia x Homosexualism

One normie could argue "how homosexualism relates to pedophilia?" Any red-pilled person who has ever wondered what causes someone to become gay will notice that there is an undeniable link between pedophilia and homosexualism.

Let's remember the occasion of Milo Yiannopolous' resignation from Breitbart over comments which seemed to endorse sex between "younger men" and older men.

Something that is—as he pointed out—extremely common among gay men. A 2009 report revealed that 74 percent of bisexuals had been sexually abused as children, I am pretty sure homosexuals follow the same numbers.

I won't say homosexual behavior is exclusively caused by pedophilia because human (or animal) sexuality is a very complex topic which can certainly involve many variables. I just don't buy that "born this way" hype, until this day not a single reliable proof of the existence of a gay gene or anything like it was discovered.

The Vatican once bought a £21 million apartment block above 'Europe's largest gay sauna'.

Pope Francis, a champion of the left-leaning agenda inside the Church, has been accused of covering up former Cardinal McCarrick's abuse allegations (one of the many cases in Pennsylvania). The accusations were made by Carlo Vigano, a former Vatican ambassador to the US, and if it proves to be true–I am positive it is—that should result in pope Francis' resignation. As a traditionalist Catholic myself I would be delighted with such an event.

Francis has already been complacent with other pedos before. One good example is the 2015 'Synod on the Family' when the pope invited Godfried Danneels, a Belgium Cardinal convicted of covering up pedophiles in the 90s, to attend the meeting. Danneels is a hard-left priest that tries to push the Church " liberal reformation" and admitted that he was part of a plot against (right-leaning) Pope Benedict and in favor of the election of leftie Francis.

Loading…

To affirm that the Church's gay/pedos are exclusively part of the left-wing priesthood would be too Manichean. I am sure there are tons of sick people who lean right also. But it can't be denied that the liberals make up the vast majority of these issues involving sexual misconduct.

“Religious progressives”

For those who don’t know, the Catholic Church, just as any other political institution, is divided in factions that tend to be more liberal or orthodox. The liberation theology, for instance, is a movement created inside the Catholic Church (and some Protestant denominations) which aims to mix Christianity and Marxism.

Even if you are an agnostic don’t underestimate the influence they played in various regions such as Europe, Latin America and even New England. Brazilian Workers’ Party attributed their success to this movement and Unions.

Be wary of any religious leader that tries to push a liberalization of dogmas and traditions. Because all religions are intrinsically conservative according to their respective contexts, they establish doctrines that dictate sets of rules that must be followed properly in order to attain their objectives (whether is Salvation in Christianity or Nirvana in Buddhism). There are no (real) religions without their traditions.

Whenever you see liberal religious men doubt their characters. There is a good chance they don’t even bother with religion or spirituality, perhaps they are closeted atheist. What they do care about is the religious platform, which can offer various benefits such as large audiences, political influence, money and even sex.

[image]
Estimates of the number of gays in the priesthood are all over the lot, from 20 percent to 60 percent, although a Los Angeles Times poll in 2002 found only 15 percent of priests saying they were homosexual or “somewhere in between but more on the homosexual side.”

Every time pedo priests’ cases pop up in the MSM, secular people are very quick to point fingers and show their moral superiority, but they “forget” the existence of secular institutions that are way more sexually perverted than the “gayish” modern Church, such as Hollywood, the political and corporate world.

Real Church x Sissy Church

It is also important to notice that the Church was emasculated, an emasculation that took place during the process of secularization and establishment of liberal democracies across the Western world (e.g. French Revolution).

The Church had to be softened, becoming an institution that barely resembles the once powerful and great Church of the Crusades or the Inquisitions. This same phenom of emasculation can also happen in other secular institutions too, the Military, mainstream Music, Politics, Sports and even Boys Scouts. And it will only get worse as liberal-democratic globalism advances, so secular people: watch out!

St. Basil the Great, a 4th century bishop and Doctor of the Church, defended that gay/pedo priests should be publicly flogged. That was the (real) Church, not this sissy catholicism created after the Second Vatican Council (a modernist reform imposed in the Church from 1962 to 1965). A lot of things got bad in the 60s.

The (real) Church has a very important and vigorous story in the construction of the West. Always being a target to the globalists and that breed who rules the world, a clear obstacle to their goals.

Examples are many: Gabriel García Moreno, Catholic Equatorian president, who made a terrific job in a Confessional Equator and was killed by the Freemasons; Saint José Sanchez del Rio, who was killed by Mexican secular, freemason and leftist government with the support of the US, for refusing to abbandon his faith.

Inconvenient truths are ignored

The media only goes after what is convenient to their narrative, don't expect them to expose Hollywood pedos nor the obvious link between pedo priests and homosexualism. The left has already pushed the normalization of pedophilia many times and I didn't see the indignation of the MSM.

Late Vatican's Chief Exorcist Gabriele Amorth once said, *"The Devil resides in the Vatican and you can see the consequences"*.

"The floor of hell is paved with the skulls of bishops". – St. Athanasius

How To Train With A Keg

September 13, 2018 | by Larsen Halleck | Link | Original Link

Who doesn't enjoy lifting weights? It's a ripping good time—whether you be training to make yourself stronger and fulfill your potential as a man, or purely to pack on aesthetic muscle and impress the women in your life. Weight training is something we should all partake in.

And not only should you use regular old weights—if you truly want to maximize your strength and ability, you should look into odd object training!

What?

It's exactly what it sounds like: training with oddly shaped weighted objects rather than traditional weights. While these are less regulated and quantifiable than traditional weights, their advantages lay in their irregular and odd shapes, forcing the trainee to utilize stabilizing muscles that the traditional lifts would never even touch.

They more accurately mimic the stresses of actual labor, making you stronger should you have to engage in that. And much like regular weights, the best odd objects can be lifted and manipulated in a variety of different ways and different exercises.

The Keg

There are a variety of odd objects you can use in your training, but the one I would recommend to start off with, and the one that is most likely the easiest to obtain is the humble 50 liter/15.5 gallon keg. Empty, it weighs somewhere in the ballpark of 30 pounds, and difficulty can be increased by adding water—or if you're a glutton for punishment, sand, BBs, or even molten lead or some other soft metal (for the truly insane).

No matter what you fill it with, the substance sloshing around will force your stabilizer muscles to compensate for the extra movement, making the exercise more difficult.

Seeing as a fresh keg from the liquor store will probably run you more than a 100 dollars, I would not recommend buying a new one. Instead, you can do something akin to what I did to get my keg:

Go to your nearest college campus early on a Sunday morning, and poke around the fraternity houses for an empty keg from last night's party. Yes, technically they're supposed to bring it back to the liquor store, but to hell with them, you have more important things to be doing with it then drinking Natural Ice or some other cheap pisswater while chasing after pudgy sluts.

Alternatively, go to a bar or liquor store and dig around the dumpster to see if there is an empty keg—or hell, you could probably ask if they have any old kegs laying around and get it cheap.

Then bring your keg home—you are going to have to modify it to make it "workout capable". And that modification mainly involves taking out the spear, depressurizing the keg, and emptying it if need be.

The Spear

Removing The Spear

If you’re lucky, your keg will be empty and weigh only 30 pounds, making transport a breeze. If you’re unlucky—and I *was*—then the keg will be full or nearly so.

Loading...

A fully loaded keg weighs 160 pounds, and if you must know, the keg that I currently use to work out with weighed 102 pounds when I first brought it home—and carrying that thing home (I live very close to a college campus, and found the keg while out for a walk) was a workout in and of itself!

To open up the keg safely, you will need needle nose pliers, a flathead screwdriver, and an adjustable wrench or vice grip.

Bring the keg outside—unless you enjoy the smell of crappy domestic beer permeating your home—and rest it on its side with the top pointing away from you.

Now you need to release the air pressure. Take your screwdriver, and push it into the release valve in the center of the center column (that column is the spear). Jam it in real hard. You will most likely get an explosive reaction. Aim away from your face and when the spraying stops, you can move on.

Once the keg’s depressurized, you need to remove the retaining ring from the top of the spear. Find one of the two notches from the top of the spear, pry the ring up with a screwdriver and remove it with your pliers.

And finally, use your wrench to rotate the spear clockwise, after which it'll come out when you pull up.

Then, do what you will with the beer inside. Once it's empty, you can leave it as is or fill it up with whatever you want. Make sure you get a sizable bung to plug up the hole. Remember that a keg is 50 liters, and 1 liter is equivalent to 1 kilogram is equivalent to 2.2 pounds. You can adjust the weight easily once you remember that formula.

Three Keg Exercises

Because I like you a lot, here are three exercises to do with a keg.

1. Keg stand pushup

The old reliable from your college days, use the keg as a defacto set of parallel bars and do handstand pushups with it, making sure to go into a deeper range of motion than floor handstand pushups. You can use the wall to balance yourself if need be.

2. Keg Clean And Jerk

A little bit different than the Olympic style clean and jerk—put the keg on its side and lift it up to your hips. Due to the shape of the keg, you should be able to keep your back even straighter than you would doing a proper form deadlift, so throwing out your back is not likely as long as you do it with proper form.

Once it is off the ground, keep your back straight and roll it up to your chest and shoulders. Then lift it up and over your head.

3. Keg Toss

Simple—just put your hands under it and toss it backwards and over your head. MUCH easier said than done.

And with that, you can get a great, total body workout with a keg. Get to it!

3 Important Pieces Of Advice For Incels

September 14, 2018 | by Ozz Kuragin | Link | Original Link

Game is getting tougher. Technology, dating apps and male thirst have all given women the advantage in the dating market. Hypergamy has also meant that the proportion of men getting little to no sex at all has increased. The incel phenomenon has now grown so large that even Mainstream Media outlets such as the BBC and CNN have started using the terms “Chad” and “Stacy.”

Furthermore, the advice found on Manosphere sites in the 2000s and the early 2010s is becoming dated. Simply cold approaching a girl is no longer good enough: she gets approached all the time. Self-improvement and hoping “the girls will come to you” is not good enough: girls are inundated with attention already, so they don’t need to actively seek out a partner, they can just swipe right on the best-looking guy they desire with the stroke of a finger.

Let’s face it: The incels, as loathsome as they may be, are right on some points. A 5’4” Pakistani man who has learned all of Mystery’s lines off by heart, has a successful online business and is competent in day and night game does not stand a chance against the six-foot Chad. Looks are a massive part of SMV and that cannot be denied. He can learn all the game he wants and get his bench press up to three plates, but Chad will still knock him out the park every time.

Having said that, all is not helpless. There are still valid means by which an ordinary-looking man can get his share of the pie without using money or lowering his standards. In this article, we shall examine three alternative ways which can be implemented to tilt the odds in an incel's favor.

1. Break Your Routines

Routines are useful for enhancing productivity and organising time throughout the day. Usually, those with routine and order tend to be more successful than those without.

Having said that, becoming too attached to routines which lead nowhere can be more of a hindrance than a help. There is a fine line between persistence and insanity: it is critical to recognise when a pursuit is going nowhere.

For example, I would approach five girls every day after work on the same street. I got no success but kept at it because I thought: "practice makes perfect." My game did not improve over a period of many months, in fact it gradually got worse as I got more frustrated and fatigued.

It was only when I ditched the daily approaches that I finally found some success: I took a break from day game and tried a bit of drunken night game just for a change and struck gold after months of nothing. I owe my blessing of fate down to a change in routine.

Incels tend to engage in repetitive behaviour without change: they have the same friends (if they're lucky), go to the same bars and surf the internet all day and just hope sex will somehow fall out of the sky.

The best action an incel can take is to change his life: change friends, move to a new city, or even just try a different bar down the road. An incel should go out of his way to ensure he’s doing something new.

2. Indulge in Reckless Behaviour

Incels are boring. Girls do not go for them because they offer no entertainment value. If a man cannot give girls anything extra in terms of looks or money, they need to bring something else to the table.

Loading...

In the 21st Century, it is far more attractive to be entertaining than to be calm and collected. Millennial girls are drawn to the loudmouths and the show-offs on the dancefloor, not the average Joe with his stable income and nine to five.

This can be used to an incel’s advantage: if he is struggling with game, calibration and poor vibe, simply going into a club and creating a raucous is enough to generate attraction from some girls.

After learning long and complicated routines in game books, I was shocked at how much attraction I could generate by mindlessly ingesting large quantities of alcohol and other substances and charging on to the dancefloor without thinking. I didn’t need lines or lengthy routines based on the M3 model, I just needed to kiss the first girl that gave me eye contact and proximity.

My desk, yesterday

Acting recklessly is fun, takes no skill and is perfectly fitting for the modern West. I therefore advise Incels to try this out, sometimes just being on the right dancefloor at the right time is good enough.

3. Join a niche social circle

Incels complain that sex is impossible because girls sleep around with all the Chads at the top of the hierarchy, whilst leaving nothing for the bottom 80%.

Thankfully, both boys and girls find a way round this: they start their own social circles based around niche interests and subcultures. These little groups are not only a great way to enjoy various hobbies together, but they are crucibles of sexual frustration.

The cosplay, goth and fetish scenes (needless to say) are notorious for being havens for promiscuity and they all hold meetups and club nights on a regular basis.

I have had a large amount of success in the goth scene through social connections and night game: I often find running game in goth clubs far easier than competing with the Chads on the dancefloor in the R&B club across the street.

My advice to the incel would be to start attending various niche events: look up niche club nights, go to munches (fetish meetups) and go to Comicon conventions. Very often, little to no game is needed to succeed, it is often sufficient to just be socially calibrated.

Conclusion

In these weird, modern times, entertainment is king. Long gone are the days where temperance and patience were attractive qualities to have.

Improving charisma, looks and status takes a lot of time in our fast-moving, highly competitive age. Simply telling an incel to learn game, read books and approach women is not enough: they may potentially spend years on this without getting anywhere.

It is far more efficient just to tell an incel to go off the rails a little. Join in the fun and capitalize on the narrow attention spans of our generation. Scrap the routines, join a niche social circle, go crazy and see how many girls show you interest as a result.

America Is Headed Towards A Civil War

September 14, 2018 | by L.T. Smash | Link | Original Link

The people of a nation must have common ideological, economic, political, and social ideas they agree upon or the nation, the civilization, will eventually die. Civil war is coming to the United States. Division, contention, fear, and silent invasion are being used to "reshape America." The civil war that will emerge in the United States will not be like the previous one. This war will be for the mind and heart of the United States. It will be for the soul of the United States. What will we do when this occurs and what will be rebuilt.

In 2016 Roosh wrote an article titled, The Culture War Is Being Transformed Into A Hot War. Roosh discusses the methods that are being used to transform the culture war into a hot war. Even the Huffington Post ran an article in 2016 titled, The Coming of America's Second Civil War. The author, a Rev. Dr. Susan K. Smith, paints the coming civil war as the result of white Americans. While she may believe the lies she is speaking and writing, more than likely she failed to realize she is part of the elitist machine which is being used to create contention and divide the United States.

Civil wars are over ideological and social issues. Economic and political issues are extensions of ideological and social issues. As real men, we will continue to have less and less in common with soy boys and progressives. The divide between the people that support the U.S. Constitution and those that want a New World Order is growing.

What does this have to do with us men? Men are the ones that establish order. Men establish civilization and build complex civilizations. Women have a much harder time establishing and completing group functions and tasks without 100 percent consensus within the group. As our civilization crumbles and eventually falls, new order will come

primarily from the masculine, from men.

The Election of Donald Trump and Abraham Lincoln

In the years before the 19th Century U.S. Civil War, there were constant clashes between pro-slavery and anti-slavery forces. We are seeing constant clashed over what is termed Pro-Trump and Anti-Trump forces. Brietbart News has a list of over 500 acts of MSM sanctioned violence against Pro-Trump supporters.

In 1860 free state voting populations were larger than those of slave states so these states, as a total, had more Electoral College votes than slave states. One of the catalysts to the U.S. Civil War was the election of Abraham Lincoln over John C. Breckinridge. Lincoln took office in January 1861 and the war started in April of 1861. Abraham Lincoln was not on the ballot of ten slave states but still won the election of 1860 because he won the largest number of Electoral College votes. Seven of these slave states, unwilling to accept the results of the election, decided to secede from the United States.

Several states considered seceding from the United States over the 2016 presidential election. Oregon, California, and Silicon Valley threatened to secede after Hillary lost. Texas was discussing secession if Trump lost. Canada offered to make several U.S. States part of Canada if they left the United States.

Since the election of Donald Trump to President of the United States, we have seen an escalation of violence. Therapists have increased business because progressives did not have their way in the 2016 election. Many progressives are unable to cope with reality and instead choose to live in a fantasyland. Even before the 2016 election, we witnessed how nasty, aggressive, despicable, and violent progressives have become and these behaviors have escalated since Hillary Clinton lost the 2016 election.

The election of Donald Trump has brought to the fore the stark difference between ideological, economic, political, and social ideas. His election exposed many politicians as the traitors they really are.

We are seeing more and more allegation of electoral fraud. Several U.S. Cities are allowing non-citizens to vote in local elections. Giving non-citizens the ability to vote in U.S. elections is the same as allowing a foreign power to elect government officials. A foreign nation could easily flood the U.S. with people to vote for certain candidates drastically reshaping the U.S. political landscape. The Department of Justice recently filed charges against 19 people that were not U.S. Citizens for voting in the 2016 federal election.

Providing non-citizens the ability to vote also makes it easier to commit electoral or voter fraud. Judicial Watch is currently suing or has sued California, Maryland, Florida, and eight other states over dirty or inaccurate voter records. These states have areas with more voter registrations than eligible voters. The National Voter Registration Act of 1993 requires states to take steps to remove ineligible registrants, to protect the voting process, and to turn over relevant records and information for inspection upon request. Several progressive groups have sued in some states to prevent the implementation or execution of those steps stating the requirements to clean up voter registration rolls is harmful to minorities.

Contention as a Destabilization and Fear Tactic

The elite are working hard to divide people along every possible factor. Sex, race, religion, wealth, speech, education, "equality", and any other factor that can possibly be exploited to divide the people are being used. The goal is the complete overthrow of all liberties of all nations, and for that to happen the U.S. must be fundamentally be reshaped or destroyed. History is and will be rewritten to attain this goal. The deep state, the mainstream media, and other elite outlets, organizations, and front men and women

are being used for this purpose.

We can see forces that are seeking to divide and conquer. Forces that teach men to be weak and women to be whores. This is a strategy of contention, of never-ending conflict. These same forces seek this division to control the people and reshape the United States eliminating all of our freedoms. In the words of Barack Obama, to “Reshape America”. The removal of due process, the attacks on free speech, and the right-to-bear arms are steps in the direction of reshaping of the United States. Economics will one of the primary forces used to reshape the United States.

There are more divisions now and larger divisions in the United States than in the 19th Century. The philosophical lies of progressives did not have a strong following until the 20th Century. We are witnessing the division and the weakness these progressive ideologies create. Progressive ideologies make people weak and afraid.

One of the goals of the division is the elimination of due process. The elimination of due process subverts justice. The elimination of due process creates an environment where someone is guilty until proved innocent. The #MeToo movement, political correctness, the Title IX tribunals on college campuses, the passing of judgement in the court of public opinion, and the idea that a woman should automatically be believed because she is a woman are all designed to undermine justice for everyone.

During World War I, Germany offered financial and military support to Mexico to invade the United States to keep the U.S. out of the war and act as a mediator between Germany and Japan. Mexico rejected the proposal because of Mexico’s own inner turmoil and because the Mexican leadership realized they would not be able to control a population armed better than many other populations.

The actions to eliminate the second amendment are part of the necessary steps the elite desire for control. People that are not afraid and stand up for themselves are threats to the elite and progressives. The actions are aimed at scaring the weak-minded, the emotional. Only the weak fear guns and other means of self-defense.

Mike Adams, a professor in the University of Narcissistic Criminals System (his words), wrote an article about the lack of maturity in younger generations. In this article, he also discusses how campus speech codes enable the aggressor and violence. People that are afraid of speech they do not like or with which they disagree. People afraid of ideas and of thinking and reason. Colleges and society are creating weak adults, and weak people are capable of violent and aggressive behavior because they act out of fear.

Progressives seek to literally, make people afraid of other ideas, and by extension, speech. The first and second amendments are pivotal to the United States and clearly distinguish the U.S. from other nations of the world, past and present. Words have power and ideas are much harder to kill so progressives are using their self-appointed Ministries of Truth: Apple, Google, YouTube, Facebook, Amazon, CNN, NBC, ABC, New York Times, etc. move in the direction of reshaping America.

The self-appointed Truth Ministries have become a de facto fourth branch of government. We are seeing these self-appointed Truth Ministries silence any voices with which they disagree. This has the effect of dividing people into “tribes” and “classes” based upon progressive ideological “protected characteristics.” This psychological warfare tactic effectively reduces people to mental slaves because these “protected classes” believe they will always be oppressed without progressives and the progressive ideology and thus, a psychological dependence is created. The creation of this psychological dependence is the core of progressive racism and oppression.

Destroying confidence in the U.S. Constitution destroys the effectiveness of government and the rule of law. Justice is denied to a person based upon lack of money, lack of access to inner circles, lack of “protected class” status, or perceived privilege. Without law society deteriorates to tyranny and mob rule. Without confidence in the U.S. Government, the government is effectively destroyed and will be replaced by factions that will struggle for control.

Silent Invasion

Mass immigration is being used to create additional destabilization. When speaking with American Citizens, most Americans are not opposed to ***legal immigration***; they are

opposed to ***illegal immigration***. Legal immigrants assimilate into their host culture. Illegal immigration is being used as a way to silently invade the U.S. Many of illegal immigrants do not realize they are being used as pawns. “Refugees” can be in either category. Refugees, if willing to abide the law and become citizens, should be welcomed. If they arrive to take advantage or to plunder they are invaders.

The difference between an immigrant and an invader is the immigrant is willing to follow the laws of the nation in which he residing, the invader has no regard for law. The invader comes to exploit us, to take from us, to use us. There is no such thing as a law abiding criminal. Notice how the majority of politicians and business leaders do not advocate for illegal immigrants to learn about the founding of the U.S., the liberties afforded to U.S. Citizens, and become U.S. Citizens. When political and business leaders do not encourage immigrants to become U.S. Citizens they are importing people they want as slaves and a silent invasion force to “reshape America.”

“Catch and release” fulfills three purposes. The first purpose is to destabilize society so people will accept the elimination of liberty for security because some criminals are released into the population. The second is to ensure the illegal immigrants remain to as competition for jobs with American Citizens to drive down wages. The third is to displace U.S. Citizens and make them aliens in their own country.

LAST CHANCE! Today Is The Last Day For Discount Prices On Game

September 16, 2018 | by Roosh Valizadeh | Link | Original Link

After Amazon banned Game, I extended the discounts in my web store. Today is now the last day for those discounts. Starting tomorrow, the ebook will go from $9.99 to $13, the audiobook will go from $17 to $21, and my life's work package will go from $35 to $41.

Game was banned from Amazon, Barnes & Noble, and Kobo

The big story of the week was Amazon banning Game along with eight of my other books. Barnes & Noble and Kobo followed Amazon's actions by banning my *entire* catalog of books, which includes Free Speech Isn't Free, a work that includes no graphic or sexual content. Here's a solid analysis from the Spectator:

> We are living in an Orwellian dystopia. Democrat members of Congress advocate harassment of their opponents, and Republican congressmen are targeted by assassins and GOP candidates are assaulted by knife-wielding lunatics, yet the so-called "mainstream" media insist that it is the Right, not the Left, which is dangerous. In this bizarre mirror-reverse world, atheists, homosexuals, violent anarchists and vehement man-hating feminists are free to say and do what they please, but a guy who tells other guys how to be successful with women is demonized like Emmanuel Goldstein in Nineteen Eighty-Four. Instead of free speech being suppressed by an all-powerful government, the enemies of freedom are gigantic multibillion-dollar Internet companies eager to appease swarming squadrons of social justice warriors (SJWs) who bombard them with complaints about alleged purveyors of "hate."

I also did interviews with Alex Jones, Paul Joseph Watson, JF Gariepy, and Luke Rudkowski. I appreciate everyone's efforts in getting the word out for censorship that I believe was targeted for purely political reasons.

Order now to take advantage of special combo deals

You can order Game from my web store using a credit card or cryptocurrency. If you order before Monday, the instantly downloadable ebook edition costs only $9.99 and contains unrestricted PDF, ePUB, and MOBI files that can be viewed on unlimited devices. After submitting your payment, you'll be immediately forwarded to the book's download page…

Click Here To Order Ebook Edition (Instant Download)
The audiobook + ebook edition costs only $17 and includes both the ebook package *and* the 13-hour audiobook in unrestricted MP3 format that is narrated by myself. Hear me say lines in the same way I deliver them to women…

Click Here To Order Audiobook + Ebook Combo (Instant Download)
If you order from my store, you'll have the opportunity to upgrade your purchase to include my entire catalog at huge savings, but only before Monday. Click here to view the full description of Game at Roosh V Store. I'm now working on ways to sell paperback editions directly to my readers. This may take a couple of months to work out.

I was really touched by the outpouring of support I received in the past week. I lost count how many messages I received from men who stated that they bought my book not because they want dating advice, but because they believe in what I'm doing. This encourages me to keep going. I may be down, but I'm not out.

How The Sexual Dynamics Of A Collapsing Country Become Degraded

September 16, 2018 | by Jon Anthony | Link | Original Link

In order for a nation to survive, two critical emotions must be controlled. Contrary to popular belief, these emotions are not fear and greed—although these are very important to control, as well. Rather, it's masculine aggression and feminine vanity that must be controlled…and we are doing a terrible job at this.

Unfortunately, over the past 70 years, we've seen sex roles and gender dynamics completely turned on their heads. Rather than men and women working together to create better relationships, more functional families, and more powerful countries, we've been pit against one another by toxic ideologies and ruthless demagogues.

It is not enough to simply know what is happening, however—we must know precisely how it's happening, step by step, and more importantly, WHY it's happening. In this article, I will explore why our society has gone so downhill so fast, and potential solutions we can integrate to remedy it (if we can save it, at all).

The Two Forces

As I said previously, there are two very delicate forces which must constantly be counter-balancing one another, and anytime they grow unbalanced, there will be chaos. These two forces are, of course, masculine aggression and feminine vanity. Too much masculine aggression, and a country becomes war-torn, unable to run itself or stay stable long enough to produce any sort of civilization (think the Middle East).

Too much feminine vanity, however, and the opposite occurs. Men become reclusive, because women become far too difficult to deal with. This is why we've seen the rise of the sigma male over the past 20 years—men who refuse to attach themselves to any sort of social hierarchy. They're not alpha, beta, or omega. They just do as they do, without adhering to any sort of social group or workplace hierarchy.

As feminine vanity grows excessive, female hypergamy is given reign to run loose. Rather than men and women developing healthy relationships with one another, women become so conceited that they refuse to "settle" for anyone less than an alpha male Chad Thundercock, and thus we have a surplus of angry, bitter women who hit the wall at 30 and end up childless and alone.

It's so obvious that it should go without saying, that we are currently in a serious imbalance. For far too long, masculine aggression has been hampered and stomped down by our effeminate school system, our brainwashing devices (aka TV's), and our mass media control system. All the while, these things have encouraged women to do as they please, without any consequences or thought of their actions on a larger, societal scale.

Restoring the Balance

Balance will be restored, one way or another. There are only two ways for this imbalance to possibly be restored, and most men here will acknowledge, at least implicitly, that this is the case:

1. Men in OTHER COUNTRIES restore the balance (by coming here en masse)
2. Men in THIS COUNTRY restore the balance (by not being pussies)

Those are the only two options. There is no third option, where women somehow magically stop giving men 500,000 shit tests a day and step down to become good, faithful girlfriends, wives, and mothers. This will not happen. When a society reaches this critical imbalance, only one of two things can happen.

Of course, we all know what the elites (oy vey!) are pushing for. They want to bring millions of aggressive, young, fighting-age men to this country, to supposedly help combat "population decline." We all know that this is complete horse shit, and that their true motive is to destroy America.

Even so, with the full force of the elites raining down upon us, there is hope. Over the past two years, we've seen more masculine energy emerge and come to the front of our socio-political battlegrounds than arguably any other time in history. For the first time in the past 70 years, men are reclaiming their manhood.

Let me reiterate that *this is the only option.* There is no magical world where everything just works out great, where we have millions of violent, aggressive 20-something-year-old men come into this country, and we retain our values as an Anglo-Saxon country. No. This will not happen. We either get our acts together, collectively, as men, or we watch our nation burn.

Loading...

The Path Forward (2018-2020)

The next two years are of critical importance. We have collectively, successfully memed the most brutally alpha and pro-American president into office arguably since Ronald Reagan. This is not an opportunity that we can afford to squander—we must all begin proactively restoring the balance of masculinity in this country, from the top down, otherwise our nation will perish to globalists and their dumb, but useful allies.

There will be resistance, as there is whenever masculinity tries to assert itself. Pay no attention to this resistance. Simply follow the advice which the manosphere advocates for:

1. Create an income independent of a massive, bureaucratic, globalist corporation
2. Increase your testosterone levels (start by avoiding foods that kill testosterone)
3. Lift weights, and become physically able to stand up for yourself
4. Proactively participate in the upcoming midterms, and the Presidential Election of 2020
5. Do everything you can to red pill those who are ready (emphasis on them being ready)

If we, collectively, as a group of thousands of like-minded men all across the nation can successfully pull this off, we will see a resurgence of economic, political, and social growth which will have been unprecedented.

If we do not pull it off however, and our nation succumbs to the manipulations of the elite, a far more grim and sinister future will play out.

The Alternative

If we do not successfully reclaim the balance of masculine aggression and feminine vanity in this country, all will be lost, and we will be forced to either live through hell, or leave our homelands. Here's what to expect over the next decade or so, if a social justice warrior is elected President in 2020, and we lose the culture wars:

1. Increasing surveillance over the internet
2. More thought crime policies instituted into law
3. The figurative castration of men all across the country
4. Eventual race wars, or religious wars, spurred on primarily by Islamic migrants

This is non-negotiable. If we lose the culture wars to SJW's over the next several years, we will begin to see lobbying to shut down any and all manosphere websites dedicated to spreading the truth. We have already seen PayPal, YouTube, Amazon, Facebook, Twitter, and Google begin to censor people like Roosh, Alex Jones, Donald Trump, and other conservative/red pilled speakers. We cannot afford to stand this any longer.

If we lose these mediums to the globalists, they will easily gain the support of the public to institute thought crime policies into our legal system. You have a book by Bronze Age Pervert, that Amazon can track from your order history? NAZI SCUM! You're going to prison. It doesn't matter that you didn't actually hurt anyone in any way shape or form, because you had an opinion that the globalists dislike.

As this begins to happen, men will self-imprison all over the nation. Some will fight, of course, and maybe win (if we're lucky). Others will leave and attempt to gain citizenship in more male-friendly countries such as Denmark, Austria, and Poland. The rest will be forced to hang their heads in perpetual shame.

Eventually, as the population of third world migrants explodes, and tribalism is exacerbated by the polarizing media, we will begin to see rampant terrorist attacks, which are already happening in Germany, The UK, and other nations around the cucked

European Union. Inevitably, this will end in a civil war.

It’s Our Choice

I have presented to you the only two choices that we have, and to me, the decision is quite simple. We can either sit around passively, and squabble amongst ourselves over stupid theories and philosophies, or we can take action to better ourselves and improve the stance of our nation.

The choice is clear to me. We either succumb to globalist propaganda, see the death of masculinity in the West, and see freedom of speech die as it is destined to do, or we fight back and create a better future. Some may say this is melodramatic. I would say that a mere cursory glance at history will prove otherwise.

All That’s Left For Normal Men Are Rotten Women

September 17, 2018 | by Roosh Valizadeh | Link | Original Link

The following article was originally published on Roosh V.

Nature has given humanity a roughly one-to-one ratio of adult men to women, but the most attractive women are being taken out of circulation to either join alpha male harems or participate in degenerate lifestyle choices. This leaves the average man practically no choice in settling down with a mentally stable and cute woman in her prime.

In Islam, a man is able to marry four wives, which is what my wealthy Iranian grandfather

did on his way to siring 24 or so children that included my dad (the exact number is a mystery). He took away three women that an Iranian man of lesser means could have married, creating a societal imbalance, but that's nothing compared to what we have in the modern Western world, where a single famous man can command the sexual attentions of dozens—if not *thousands*—of women in their sexual prime, spoiling these women for normal men who don't have the ability to tingle their vaginas with the same intensity.

How many actors, musicians, and sports athletes are trying to plow through as much prime pussy as possible? How many Hollywood directors and music producers are leveraging their positions for sexual gain? How many club owners, restaurateurs, Arab sheikhs, and politicians are doing the same? Each one is taking way more beautiful women out of circulation than men like my grandfather, all while elevating their standards to such an extent that no average man can ever gain their love, let alone two hours—or even two minutes–of their uninterrupted attention.

We also have to account for female lifestyle choices that are designed to delay or prevent pair bonding and marriage. The biggest is career. Most girls, while embarking on a career, balance out the boredom of working a meaningless job by hopping on the cock carousel and banging at least a few men every year. By the time a girl hits 25 years old, any man who meets her will have to deal with a walk-in closet of emotional issues and hang-ups from being pumped and dumped as much as a 1930's brothel whore.

Then there is the Instagram and Facebook lifestyle that creates crippling dopamine addiction, which causes a girl to only be satisfied if dozens of men are actively thirsting for her every day. I estimate that if a girl has over 500 followers on Instagram, she is so used to attention from throngs of men that the love of one man cannot possibly satisfy

her.

Loading...

We must also throw in the growing “travel blogger” lifestyle where, instead of using only her body to get attention, a girl uses pictures and video from exotic locations to enhance her beauty. Other girls, with nothing substantial to offer the world, decide to showcase pictures of pets or their tasty overpriced meals, but even that puts them on a dopamine loop that ruins their future interactions with men.

By far, the most damaging lifestyle choice women make is becoming a sugar baby, a politically correct term for “prostitute.” For some easy cash, she whores out her body to the highest bidder (some women combine Instagram and prostitution in a seamless package). How can such an Instagram prostitute ever settle down with a man who has a normal salary? There are also the hundreds of women who enter porn every year, some from seemingly stable families. Sadly, men are so desperate for love that many would wife up a former prostitute or porn star, but it’s highly unlikely those women will make for stable families.

The Western world is a sinkhole for women. The prettiest of the bunch fall into the hole and get spit out years later an entitled #MeToo hag who can never be happy, making the Islamic four-wife rule seem downright egalitarian. The sad truth is that if you meet an attractive girl today, she was pumped and dumped by numerous sexy men, prefers to nurture her career than children, is addicted to attention via the internet, and has participated in some kind of scheme to exchange social status or cash for her pussy. She’s more than suitable for a bit of fun, but would it be wise to seek a relationship with her?

Even with the obesity and short-hair epidemic, I still see a bountiful supply of cute girls I would happily reproduce with. I would love them, let them caress my beard, and lay my seed deep within their vaginal guts, but the problem is that those guts are not for me—they are for the Chads who would never marry her, the beta orbiters who await her newest selfie as if it were a source of food, or the rich and lonely men who would sponsor her for thousands of dollars a month. They're taking her out of circulation at the time I want her most, and by the time they are done with her, I no longer want her. I guess I'll try to weasel in a bang or two when she is not yet fully degraded, and enjoy the fleeting pleasure that comes from it as much as I can.

“His Girl Friday” Is A Red Pill Classic That Most Men Have Never Seen

September 17, 2018 | by R.G. Camara | Link | Original Link

Although there are some great movie reviewers out there who evaluate newly-released films from a red-pill, non-leftist, traditional-Western, masculine viewpoint, I feel it would be worthwhile to review *older* “classic” films through such a lens, especially given that many of us believe that men, movies, and messages were far less cucked in the past, and many more are looking for an antidote to the pretty, poisonous lies spewed by Hollywood today.

I’ll begin this series with one of my favorites: the hilarious 1940 “screwball” comedy, *His Girl Friday*.

Original movie poster. Note the tagline. Dropping red pills even in the ads.

Short Version of the Plot

The basic plot is this: over the course of twenty-four hours, big city newspaper editor Walter (Cary Grant), convinces Hildy (Rosalind Russell) — his paper's former star reporter and also Walter's ex-wife — to cover the story of convicted cop killer about to be executed in the morning. Complicating matters is the fact that Hildy, who has quit the newspaper business, is leaving town that day with her beta fiancée, Bruce (Ralph Bellamy), who is taking her far away to be a stay-at-home wife.

Meanwhile, it turns out the murderer, Earl (John Qualen), is really a sweet, forlorn fellow with a sad life, who only accidentally killed the policeman in a moment of panic thanks to unemployment, loneliness, and desperation; however, despite the plot ostensibly centering around him, Earl's story has become a cheap political football for everyone to use to their own cynical advantage.

This movie is so red pill, it almost hurts, except the comedy is so good it makes swallowing it easier. The more you look, the more truths you see.

The Press is Nothing but Liars, Slanderers, Thieves, and Crooks

One of the major themes of the movie is that reporters are conniving trash and all have agendas that gratuitously shape everything they "report." (Sound familiar, Journolisters?). Almost every scene has a reporter lying, backstabbing, or being a heartless jerk, all for the sake of their stories.

A great illustration is when Earl is finally discovered in the rolltop desk; you get individual close-ups of each reporter as he calls his office, and they each give wildly contradictory

lie-filled accounts. Molly Malloy's accusatory harangue of them could be applied to any reporter working today.

Molly Malloy: "They ain't human!" Hildy: "I know, they're newspapermen."

Politicians Use the Law and People's Very Lives Merely for Political Points

The mayor and the sheriff conspire to deny Earl his lawful reprieve, and thus kill him, all to score political points. The governor is only giving sad-sack Earl his reprieve to push his execution closer to election day. And when the sheriff realizes where Earl is, he gives orders to shoot; it is only the bystanders' protests that make the sheriff arrest Earl instead.

Alpha Fux, Beta Bux, and Cads over Dads…

Walter's an alpha cad, Bruce is a clear beta, and guess who gets the girl here?

Alpha Walter and Beta Bruce. Bet you can guess which is which.

…But Betas *can* Have Dignity

One truth buried a bit is that Bruce, despite being a beta, isn't a total pushover. Although he wrongfully trusts too many people, he still eventually realizes and embraces harsh truth, even if it hurts. Bruce walks out on Hildy in a manly way, and, although he leaves the door open for her to come back, he's resolute in saving his pride. Most betas today lack such a backbone; they merely slink off in denial or humiliation at being rejected, or worse, spazz out like a gamma.

Loading…

Career Women are Bad Wives

A woman obsessed with her career will never obsess over her man or her family. Hildy, despite her protestations, is infatuated with being a reporter and getting famous. She may have hidden behind a mask to nab Bruce's proposal, but the mask slips. Thankfully for beta Bruce, he didn't marry her or get divorce raped by her. Any woman "on the fast track" or is "career-oriented" is a bad, BAD idea.

Tough, Strong Women Existed Before the Feminazis Arrived, and Were *Far* Stronger than the Feminazis

Hildy, despite being bad wife material, is a tough, beautiful broad who has earned the respect of her male peers because she is a good reporter. She takes the guff they give her and gives it right back. She didn't need affirmative action or #MeToo (though sleeping with Walter certainly didn't hurt). She would eat the feminist snowflakes of today alive. (I like to imagine her walking into a *Huffington Post* editorial meeting and making

all the feminists cry).

Hildy Johnson : she'd rip today's women's studies majors to shreds.

Divorce Still Happened Back in the Day

Social conservatives and red-pillers who hate divorce have to come to terms with the fact that divorce didn't suddenly begin in the 1960s with Gloria Steinem's urging. Career gals with options in the big city divorced. Country girls whose society forced them to stay married didn't divorce.

Cowardice, Manipulation, and Scummy are No Bar to a Woman's Panties

Walter is hilariously shown to be a liar, a cheat, a fraud, a conman, a coward, and in bed with criminals — and yet Hildy is madly in love with him. Sure, as many an anti-PUA will claim, it's because he looks like Cary Grant, but that doesn't solve it; objectively, Bruce is as good-looking as Walter. Behavior matters.

She’s saying this to Walter, and just shortly after she’s marrying him. If you can get a woman to hate you, you can get her to love you.

Young Hot Women are Attracted to Older, Established, Powerful Men

Hildy came to work for Walter fresh out of college — meaning she was twenty to twenty-two years of age — who is not only clearly older, but was the big chief editor of the paper. ‘Nuff said.

And, Most Importantly, The Final Scene is a Fountain of Redpill Truth

As the movie closes, shameless conman Walter tries to get rid of Hildy after she’s served her purpose, and even stiffed her with counterfeit money, but Hildy’s hamster takes all this only as proof that Walter loves her. In reality, if you watch Walter’s behavior, it’s hard to say he has any love for Hildy, only a desire to keep her working on the story. Yet despite that, Hildy is willing to do anything Walter demands, breaking down like an obedient schoolgirl.

It’s amazingly bizarre from a logical point of view — even Walter is taken aback by her reaction — but fits in quite well with female psychology: a caddish man who shamelessly manipulates and abuses a woman is catnip to her, and she will love him and apologize for him, no matter what he does.

This is only halfway through the film, and Hildy's already under Walter's spell.

Bottom Line: See *His Girl Friday*, and Absorb its Red Pill Truths

This truly hilarious movie is full of old-school truth buried underneath the intelligent comedy. Watch this film, enjoy it, and be filled with truths that, today, are in far too short a supply.

4 Reasons Women Are Racing To Become Cosplay Models

September 18, 2018 | by Jared Trueheart | Link | Original Link

---

What is every modern, cosmopolitan woman's dream job? You might think something like Princess but you'd be wrong. That isn't a job so much as it is a title and birthright and unattainable. Women want that too, just like men would also like to be born into royalty, but it isn't their dream job.

The dream job of modern women is cosplay model. If you've never been to any kind of nerd convention, you wouldn't have seen any cosplay models in person. Rest assured though, women know about cosplay and they love it for the following reasons.

1. They Receive Vast Amounts Of Male Attention

As Roosh wrote here, modern women have replaced genuine connections with men with the attention they get from endless hordes of beta male orbiters, especially online. Some of these women have hundreds of thousands of Facebook fans and Instagram followers. The real attention high they get comes from going to conventions though.

When cosplay models go to these nerd conventions they get just as much attention in person, thus making the high they receive even greater. Keep in mind, these women have no sexual interest in the guys who buy their photographs or timidly ask to pose in a selfie with them. These women will likely go back to their regular lives and bang whatever Chad tickles their fancy that day. All they want from the guys at these conventions is endless amounts of male attention.

But they'll gladly take money too.

2. Cosplaying Earnts Them A Lot Of Money

Some of these cosplay models make very good money. Some even make over six figures a year. They make their money in a few ways. They get paid to go to nerd conventions and take selfies with beta males to promote whatever video game the nerds will waste their lives playing. They also go to those same conventions and sell prints of photographs of them in a costume. They can easily sell hundreds of prints for $20 or more a day at these conventions, all while getting paid to be there and promote something else.

They get travel stipends. They get paid to use or promote products even outside the conventions. They get paid to model outside of the conventions as well. I don't follow any of these women, but I wouldn't be surprised if they are monetizing their Instagrams, Kickstarters, Patreons, and only-fans accounts to great effect as well.

3. Cosplay Makes Them Look Far More Attractive Than They Really Are

Talk about smoke and mirrors, cosplay models are able to make themselves look like 9s or 10s when they are only 6s or 7s. They are able to do this in a few ways. The first is by choosing a fictional character that is already hot and dressing up as them. When you see the model dressed as the character your mind already has an association with the character and how hot she is.

Jessica Rabbit was a hot character; 10/10. When a woman dresses like Jessica Rabbit your immediate impulse is that she is a 10/10 as well, especially if she has big boobs. But look past the boobs and you begin to see a little bit of a gut hanging out.

Loading...

By my standards, that woman is still attractive, but she gives the illusion of being far more attractive by manipulating your memories of fictional women. By now, you may have seen videos of not very attractive women doing their make-up to look much better. Their skills are impressive, artistic one could argue. Some of these women, especially some of the top-paid professionals, are very attractive even naturally, but that's not the appeal of the being a cosplay model. Even the very attractive women aren't very noteworthy for their natural beauty.

Professional cosplay models may still be attractive but they are punching way above their weight. They do that by using these makeup and costume manipulations to get the attention 9s and 10s get despite their less attractive day-to-day appearance. That's the appeal of cosplay.

4. They Recieve The Celebrity Treatment

Add all these up and cosplay models are essentially being treated like celebrities. They dress up like an anime or video game character and get paid to do a photoshoot. Then some video game marketing agency flies them out to San Diego (or wherever) and puts them up in an expensive hotel room. The next day they don their costumes and get paid to take selfies with nerds at a convention. They sell their prints to make money. Next to their booth is Robert Downey Jr. (or whoever is popular) promoting another Marvel movie. The cosplay model is getting just as much attention as Iron Man.

Cosplay models get to feel like celebrities, and in many ways, they are being treated like celebrities.

Conclusion

Modern women would love to be cosplay models if they could. Most probably can't do their makeup well enough. Already though women get as much attention as they possibly can from Instagram and tinder. They'd get even more without having to make themselves genuinely more attractive if they were cosplay models. Best of all they could take some nerd's money for posing for a picture, thus fulfilling their need for attention and money.

While the attention, money, and celebrity treatment certainly sounds appealing, and it is, it is also what damages people's ability to truly connect with each other. Just like no man wants (or should want) his girlfriend or wife dancing in a strip club no man wants his girlfriend or wife dressing provocatively to get attention from other men. Even if those men are beta males at a nerd convention. The problem comes when women don't understand this and instead decide that their freedom to get male attention unhindered is more important than connecting with a man who may love them.

It's the challenge every man in the dating market struggles to overcome and why so many women fail to deeply connect with a man who would love them.

For more about the roles of men and women in the media, literature, history, and our modern culture check out Legends of Men.

How To Succeed With Women In 10 Minutes A Day

September 18, 2018 | by Sebastian Harris | Link | Original Link

---

The following article was sponsored by Global Seducer.

What does it take to succeed with women? It takes balls. That's true. You need to have the balls to decide "enough! No more Mr. Nice Guy!" Have you already reached this point?

Come on. You already know what point I mean. Yes, the boiling point. You've been way too nice for way too long. You've paid the restaurant bill for way too many ungrateful women who ended up banging some other dude who didn't pay shit. Do you really want to continue this game?

It's time for a change. It's time to become a man who naturally attracts beautiful women. Let's cut through the chase. Success with women doesn't come from being nice, buying her flowers, and doing what Cosmopolitan wants you to do.

It's hard if you listen to the wrong advice but easy if you have the right daily guidance. That's why I decided to start the Global Seducer Quickie Podcast. Why "Quickie?" Well, because every episode is between 10-20 minutes, which makes it easy to consume. Oh, and did I mention that…

This is THE ONLY daily seduction podcast for men on iTunes.

And it's free!

The danger: One of my podcast listeners told me that he almost crashed his car because he was enjoying my recent podcast episode so much that he stopped focusing on the street. But don't worry. He's okay. He even left an iTunes review for me… just like other

satisfied listeners.

“Okay Sebastian, but why should I listen to the Global Seducer Quickie Podcast?”

Nope, not because of my irresistible German accent that makes Arnold Schwarzenegger sound like a native speaker. However, I talk about every dating, pickup, and seduction related topic on planet earth and I do my best to help you every single day, 365 days a year.

Develop Deep Self Confidence

Self-confidence is the key to success with women. And no, I’m not talking about the wishy-washy self-confidence that a lot of dating gurus sell you. I mean, come on. We both know that screaming “I’m the best PUA in the world” in the mirror won’t cut it. This bullshit doesn’t work.

Are you ready for the truth? Low self-confidence is never the problem. It’s just the effect.

The cause, the underlying problem, runs deeper. That’s why I introduce exercises and techniques in my podcast that help men like you to figure out the cause of their self-confidence issues. Eventually, this process leads to healing and to a new and more fulfilling path.

I promise to do everything in my power to support you on your journey to unshakable confidence.

Become a Man with Integrity

What does it mean to have integrity? It means that you do the things you want to do and say the things you want to say. But it also means to not do the things you don’t want to do. A man with integrity doesn’t agree with a woman even though he disagrees with her.

Such a man doesn't betray himself and his values. As a result, she doesn't put him in the friend zone.

Integrity is the greatest aphrodisiac. Speak your truth, live your life on your own terms, and don't give a fuck about what other people think of you. That's what a man with integrity does. It would be an honor for me if my daily podcast episodes help you to become this man.

Train Your Body for Seduction Success

You're a man. You're a warrior. Yes, seduction skills and the right techniques are important. But in order to succeed with women, you have to step back and look at the big picture. Seduction is a holistic art. You might know all the techniques in the world, but if you're too fat to get off the couch, you'll fail.

"But Sebastian, pickup guru X, Y, and Z told me that my body doesn't matter."

Newsflash: They lied to you to get your money.

Let me tell you the truth: Going to the gym, eating healthy, moving your body… these things are important. But that's only the tip of the iceberg. Think about your body language. Think about the way you look at women, the way you smile, and the way you move your hands while talking to women.

All these things matter and I do my best to discuss them in my daily podcast.

Train Your Mind for Seduction Success

Imagine… you walk down the street. Suddenly, you see this incredibly beautiful girl. You want to talk to her. God, she's gorgeous. She has long blonde hair, wears a tight skirt and the way her cheeks (not the one in her face) move from left to right…damn.

You want to approach her, but a thousand thoughts are popping up in your mind.

“How should I approach her?”

“What do I say next?”

“What if she doesn’t smile?”

“How do I connect with her?”

“How do I get her number and how do I get her on a date?”

You need the right information in the right format. That’s why I created the Global Seducer Quickie Podcast. You can listen to my incredibly annoying German accent while you relax, on your way to work, on your way to a date, and whenever your teacher, lecturer, or boss doesn’t look.

And don’t shit me. I know you have 10 minutes a day. Everybody does.

Why don’t you start listening to my podcast on iTunes right now?

Take Consistent Action and Don’t Give Up

Can we make a deal? I don’t give up if you don’t give up. You have to promise me that you do everything in your power to succeed with women. You won’t give up after the tenth girl rejects you and after the fifth date ends with a hug and “it was really nice”. You approach the next girl because you know that overnight success is nothing but a myth.

You keep going. You keep pushing.

“Success is not an accident*. It is hard work, perseverance, learning, studying, sacrifice and most of all, love of what you are doing or learning to do.” – Pele.*

I give you my word: I will continue to publish a new podcast episode for you every day. Now I’m asking you: Will you start your journey towards success with women?

I want you to take action. I want it so bad that I decided to give you an exclusive gift. If you subscribe to my daily seduction podcast (remember, it’s free) and send me an email with the subject line “ROK Subscriber” at …

…I'll send you a FREE PDF with my best 7 Scientifically Proven Seduction Techniques.

Free podcast and free gift…sounds good?

Click here to listen to the Global Seducer Quickie Podcast on iTunes

Vice Editor Jason Koebler Makes Stunning Confession About How Journalists Assist Online Censorship

September 19, 2018 | by Beau Albrecht | Link | Original Link

According to legend, the media is a pillar of democracy. The free press informs the public objectively, without bias, “just the facts, ma’am”. They staunchly champion freedom of speech; that’s their bread and butter! Their intrepid reporters expose high-level corruption, protecting the little guy from abuses by the wealthy and powerful.

Today’s reality is nearly the opposite. Worse, now they’re enthusiastically participating in censorship.

“Shut it down!”

Jason Koebler, a *Vice* editor for Motherboard (their technology column), posted

"Deplatforming Works", practically gloating about it.

> It's true that Silicon Valley's lethargy on the far-right, aided by endless press coverage, helped amplify their message and turned the far right into a real, powerful political force in the United States.

So he believes that tech giants have been too slow in suppressing views that he doesn't like. Still, he worries about what happens when they move to alternative platforms that respect freedom of expression. Further, he laments that censoring popular commentators generates publicity:

> Deplatforming works "best" when the people being deplatformed don't have any power to begin with.

That's quite an unfiltered glimpse into the media mentality. He denies the censorship is ideologically motivated. Well, how often do leftists get banned for "extremist" opinions, criticizing groups they dislike, or controversial opinions about history?

The new Ministry of Truth

Not only do they have a near-monopoly on commercially distributed information, they've taken it upon themselves to suppress dissident viewpoints.

Another whopper, co-authored by Jason Koebler and Joseph Cox, described how journalists serve as social media tattletales:

> In a recent interview at Facebook headquarters, one senior company employee told Motherboard that Facebook somewhat formalized the process of responding to content moderation-related inquiries from journalists, and has a dedicated system for 'escalating' issues highlighted by journalists. This often gets the content in front of those deciding whether to remove it or not more quickly than

> ordinary user-generated reports.

Thanks for the tip, dude. I've been wondering who's been doing this sneaky behind-the-scenes stuff. As I've suspected, this goes much further than tricky "watchdog" outfits, or Social Justice Warriors orchestrating mobbing campaigns on Tumblr.

So he brazenly admitted that *Lügenpresse* employees are colluding with social media companies, ratting out content which they think the public shouldn't be allowed to see. (Is *that* what college journalism departments teach kids these days?) Since the tech giants in cahoots with them created *special pipelines to expedite the snitching*, apparently this happens pretty frequently.

> Last month, when explaining why Twitter hadn't initially banned InfoWars from its platform, CEO Jack Dorsey said "it's critical journalists document, validate and refute [dis]information directly so people can form their own opinions. This is what serves the public conversation best."

Given the MSM's track record of bias, distortion, and outright lies, their new side job of censoring dissident viewpoints is like a fox guarding the henhouse. (Jack Dorsey's statement is almost as much of a whopper as when Barbara Spectre said, "But without that leading role, and without that transformation [to multiculturalism], Europe will not survive.") It gets more nauseating yet:

> Wednesday, at a Senate Intelligence Committee hearing, Dorsey again noted the role that journalists play in counteracting disinformation that spreads and is incentivized on his platform.
>
> "We have this amazing constituency of journalists globally using our service every single day, and they often with a high degree of velocity call out unfactual information," Dorsey said.

Senate Intelligence Committee—well, isn't *that* special? If this "amazing constituency" is up to this daily, is all that *really* topical investigative research, or more like cyber-loafing?

Loading…

Guarding the echo chamber

Journolist closed after this secret back channel was exposed. Is there anything else like that going on now?

Although that article seems unconcerned about ethics or freedom of speech, it correctly explains that tattling about social media posts for Silicon Valley billionaires isn't the job they're *supposed* to be doing. Journalists are paid to write stories. I'll add that if they're acting like *Glavlit* informers while on the clock, they're *stealing from their companies,* just like if they're playing Warcrack.

> To be clear, every platform has moderators or algorithms which catch the vast majority of content violations on a platform. But still, many of the highest-profile content moderation decisions seem to be made only after there's publicity around them. For example, InfoWars was only banned from platforms after a steady drumbeat of reporting surrounding the disinformation and hate speech spread by Alex Jones.

Jones got banned from four major platforms simultaneously. Anyone who believes the timing was a coincidence probably believes in the Easter Bunny too. Are the esteemed members of the Fourth Estate still using transmission belts hidden from the public like Journolist?

Here's how it rolls at *their own* company:

> At Motherboard, we've increasingly decided to withhold specific examples from tech companies when approaching them for an article. Of course, if they really need an example in order to have enough context to comment—if it's a single specific video for instance—it would probably be best to provide a link to the clip. And we will give them enough context about what the videos are and the issue so they can write a statement explaining why they believe the content should or shouldn't be removed. But for more general issues, or especially public material that can be found with a simple search, the companies don't need hand holding to find the videos: indeed, the point is that they could have—and perhaps should have—come across them easily in the first place.

Finally:

> Facebook also told Motherboard many other reporters have stopped sharing links to specific pieces of content until after the stories are published. Facebook believes it is beneficial to everyone if the company is able to remove violating content as quickly as possible.

So their take seems essentially like this:

- Journalists are getting sick of working so hard at performing censorship for other companies, instead of doing their real jobs.
- They wish the tech giants would make better programs to delete politically incorrect content robotically.
- If they write a clickbait article about it, they're disappointed that the content gets banned first.

It's little wonder why people don't trust the *Lügenpresse.* Even *most liberals* today realize the MSM is bullshit!

Why dissident views are important

What's with all these halos? Were they trying to tell us that "The Lightworker" is the Messiah?

Media outlets do have ideological positions. That's understood, so long as long as that stuff stays in the op-eds and news is unbiased. According to legend, diversity of opinion throughout the media will allow the public to sort things out for themselves. However, 90% of the USA's media outlets are owned by six gigantic conglomerates. Five are little more than propaganda factories for cultural Marxism. The one essentially representing the controlled opposition doesn't stray too far from prevailing orthodoxy, or touch many vital topics.

The MSM is an oligopoly with vast powers to shape opinion. Therefore, dissident voices free of interference are the only ones breaking the information blockade. It's the "deplorables" who now are looking out for the public, calling out subversion sometimes

rising to treasonable levels when nobody else dares call it treason.

Finally, Jason Koebler has written several articles about data mining misuses. That much is admirable. Ironically, the MSM overlooks another problem with tech giants abusing monopolistic powers, often even assisting them. Not only do huge social media companies get a free pass for censorship, some journalists merely wish there was more of it so they can quit doing free work for them.

Don't miss Beau's book catalog. Good stuff!

3 Tips On Staying Safe As A “Gray Man”

September 19, 2018 | by Edgar Tru | Link | Original Link

I heard a family member make remarks on the ‘victims’ of Hurricane Florence, who knew well in advance the possible horrors which came crawling their way. But were those who decided to stay victims given the warnings? They also espoused, essentially, that rescue teams shouldn’t put their lives at risk for those who remained in harm’s way.

This brought me back to a conversation with a man who has been big on situational awareness in terms of avoiding assailants who aim to pierce your heart and rob you while you lie in a pool of your own blood. He asked this question about what one does when in a dark alley and you see a suspicious character coming your way? My response was something to the extent of whether or not I even had to be in the dark alley? That was his point.

Now, I’m not remotely suggesting rescue teams avoid doing their job, but it did get me back to situational awareness and understanding the justice brought about when you are foolish enough to venture into a dark alley on the wrong side of town, or remaining in Florida when you damn well knew the potential risk involved.

That got me thinking about the recent political violence and acts of domestic terrorism caused by Black Lives Matter and Anti-Fascists. So, in regards to our contemporary state of the political and cultural arena, and what surely awaits us in the next US presidential election, here are some simple, basic tips about situational awareness and being prepared in case civil unrest breaks out.

1. Understand The Baseline Of Your Environment

Political rallies across the US demonstrate the capacity of violence and the willingness to assault in ruthless manners. Both men and women of more right-wing views have been assaulted, been threatened to be raped, have their families killed, get doxxed, have dead animals thrown at their living quarters, had their finances threatened, etc. It's a goddamn nightmare on the more North Side of America than the South Side, where not everyone has a bamboo stick up their ass.

There are many great articles written on situational awareness. And that's key: situation. The environment, in a general sense, has a baseline. It's the basic overall feel and operation of that set area.

For example, you go to the mall. What'd you expect to see, generally speaking? People walking and talking, laughing and usually carrying a bag or two. It would, in this context, be out of the ordinary if an individual, dressed in all black, is quickly walking through a crowd while he has his hoodie on and hands in his pockets. It's odd behavior. Same for someone moving nervously carrying a bag that does not appear to be bought at a store or, to add to that, he doesn't have workman apparel. It's out of the ordinary.

If I'm at a bank and someone walks in, sits in the corner for an unreasonable amount of time without engaging in any transaction and appears to not work there, I'm alert. Are his eyes moving around scanning for cameras, are his lips moving to suggest he's counting something, is he in apparel which could perhaps more easily conceal a gun?

Loading…

Same if I'm out sitting while enjoying coffee and an all-black car pulls in and just sits. Whether the engine is on are not does slightly change the degree of the potential threat of the situation. If it's on, is it a quick getaway for a potential crime? And is it at night

where there are fewer people and witnesses?

These are all pretty basic to practice, in my view. So it doesn't help when everyone's head is glued to their smartphones. Especially with women. They appear to be much less aware than men who themselves very much have this issue with their smartphones.

2. The Gray Man At Political Rallies

The concept of the Gray Man is simple: blend in. Do not create stimuli around you. Gray is often considered a very bland color. It's boring, lifeless, moot. This isn't to suggest wearing gray makes you undetectable, but the concept works well with this color.

Blend in so well to your environment that you essentially appear bland. But if you're at a political rally, then you know anyone is a potential threat. Wearing a Trump hat or an American flag raises suspicion, creates stimuli from your political adversary, and now you are made. If you're European-American, wearing a hat over your shaved head is a good idea in terms of lessening your presence because there is still widespread delusion about the reincarnation of literal Nazis.

People involved with BLM, AntiFa and other leftist gangs are already going to make assumptions about your character and will dehumanize you and engage violently. Perhaps lessening that delusion, if even possible, could potentially add to your safety and security, in some respects.

It's not that one desires to give up their chosen headwear and so on, but weighing the pros and cons should be obvious if you wish to avoid conflict. Which, again, these days is hard to do.

3. Consider Your Neighbors And Conversation

Depending upon your living situation, if you're in California, talking openly with your neighbors about politics in relations to conservatism, in a positive light, creates quite a stir of stimuli. And, given the next US elections are coming up, you've made an impression in their mind. If they believe you are a literal Nazi, you've coined a political adversary. If you're in the deeper South surrounded by red-necks and American-loving Christians, chances are, from my observations, you'll be less likely to be attacked for your political (or religious) views.

I personally despise having to sometimes lower my voice or take a quick glance around because I'm about to say something that might cause stimuli to a potential assailant. But, in these contemporary times, it's up to you to decide what's worth it and what's not.

Conclusion

These are merely a few things of quality in regards to your safety and security. I've been quite observant. It's not always intentional, but I've seen things and made assumptions (or had a strong thought about it) and turned out to be spot on.

Identity your adversary. Weigh in how much of a threat they are to you. Pay attention to who they know or talk to, then extend that person's conversation partners and then extend it again. Leftist are ruthless, dangerous, hateful devils. And remember, if you ever see anyone wearing the hammer and sickel, then be even more alert.

How The Second American Civil War Will Unfold

September 20, 2018 | by L.T. Smash | Link | Original Link

Previously: *America Is Headed Towards A Civil War*

The coming U.S. Civil War will not have the same outcome as the U.S. Civil War in the 19th Century. As society breaks down, other parts of our economy and civilization break down. Businesses will cease to operate. General services will become unavailable, and confidence in government is destroyed. The legal framework is being destroyed because justice is denied because of ideological lies. When the legal framework is destroyed, the entitlement among the population mindset will lead to murder, rape, destruction of property, starvation for some, and cannibalism for others.

There is no civilization without law and order. A barbaric society is a society with little or no law and order. When Europeans came to the Americas, they brought civilization, i.e. law and order, with them. While there were atrocities committed, the overall effect of European influence was to civilize, to bring law and order, to the peoples in the Americas.

One of the signs of barbarity, or the lack of law and order, is the systematic killing of babies and children (this includes unborn babies). Other signs of barbarity are the lack of children born in the bulk of a nation's marriages and the decline of marriage.

"It's so cool! If you use your imagination, you can blame men for *everything!*"

A New Civil War Will Not Have the Same Outcome

The coming civil war will not have the same outcome of the U.S. Civil War of the 19th Century. In the 19th Century, the U.S. had a more solid and cohesive ideological, social, political, and economic fabric. The people of 19th Century America wanted to preserve the U.S. Constitution. The federal government survived the 19th century civil war. The deep state did not exist on the scale it does now; nor were there so many individual factions within U.S. borders at the time with the intent of reshaping America.

The 19th Century U.S. was more patriarchal. The decline of the patriarchal influence in the 20th century with the rise and elevation of the matriarchal over the patriarchal through feminism, anti-natalism (anti-children) has created a society that lacks foundational social cohesion because the base unit of civilization, the family, has been destroyed. The rise of the matriarchal has created feminized men and angry women.

Many forces within the U.S. do not want to preserve the U.S. Constitution and its guaranteed liberties. An example is the recent anonymous op-ed published in the New York Times. The author, claiming to be "resistance" from within the Trump Administration, declares President Trump "anti-democratic". The irony of this op-ed is the author makes the accusation "while boasting of membership in an unelected cabal that covertly imposes their own ideology with zero democratic accountability, mandate or transparency."

The deep state certainly exists, I know people the deep state is stealing from, and the deep state has stolen from me, but consider the possibility that this specific author may be a fabrication to create further division among the people, sow division and trouble in the Trump Administration, and further destroy confidence in the electoral process.

Trump's election to the U.S. Presidency shows that many U.S. Citizens are not on board with the progressive agenda. If the federal government cannot be changed through legal channels, then the elites and the factions they control will seek to destroy the federal government through division and the deep state and attempt to put a new government in place.

Destroying confidence in the U.S. Constitution destroys the effectiveness of government and the rule of law. Justice is denied to a person based upon lack of money, lack of access to inner circles, lack of "protected class" status, or perceived privilege. Without law society deteriorates to tyranny and mob rule. Without confidence in the U.S. Government, the government is effectively destroyed and will be replaced by factions that will struggle for control. The deliberate creation of more divisions makes it harder for the founding principles of the U.S. to survive. The U.S. Constitution stands in the way of the New World Order.

The U.S. will eventually divide into multiple factions, each claiming legitimate government, but without the liberties of the U.S. Constitution. The U.S. will have no central government. The factions may form temporary alliances but some will seek to dominate all others and impose a new government, a reformed government, upon others. There will be those individuals and areas that will continue to stand for the U.S. Constitution and the rule of law.

Loading...

Today several nations would take advantage of inner turmoil in the United States. Nations such as China, North Korea, Russia, and others would most certainly take military action and invade U.S. territories, Alaska, and potentially the mainland. Most people are so oblivious that they do not potentially see the influence of these nations even now.

Undoubtedly, some of these factions will be destroyed or subjugate by invading nations.

What Will Be Our Response?

Each of us as individuals has several pertinent choices to make. The preservation of our liberties will come from honorable men because typically are the ones that fight for liberty. Preservation of liberty does not come without bloodshed. ROK has articles on survival and why survival skills are important. Most people have not considered the possibility of times without gas, electricity, running clean water, or sewer treatment.

As confidence in the U.S. Federal Government declines and justice declines because of the deep state, mainstream media, and progressivism, people, already divided against each other, will form tribes consisting of family, friends, and others with similar ideas. You are probably already seeing these tribes form in a loose manner. What immediate skills and trades facilitate survival? Skills such as farming, gardening, agriculture, and other trade skills will be of value because these skills can be used to barter or used to sustain oneself and others.

The burden will fall upon masculine men, as it always does in times of war. People will revert to the most basic survival instincts. The soy boys will be busy hiding with the women in their basements or agreeing with whomever has the perceived power before proceeding to murder, rape, and loot those that disagree with them. The larger cities and the inner cities will be more lawless, chaotic, and disorderly. Weather conditions will also affect how people behave. Some people will gladly forsake liberty for food, clean water, or warmth. Some people will sell their children for food, clean water, or warmth or eat their own children.

A sound mind, which includes sound thinking, reasoning, and emotional control, are critical in survival situations. Survival chances increase when working with other people of the same mind. Live where you desire but constantly be aware of your surroundings. Create a network of family, friends, and kindred to increase your support circle will increase chances of immediate survival and the survival of others. Gather around yourself people that are like-minded, with trade skills, people that can think, reason, and are not easily persuaded by the weak-minded and emotional. Catering to the weak drags other people down to the lowest level physically, socially, intellectually, emotionally, and spiritually.

What Will Be Rebuilt?

Civilizations will rebuild, but what will be rebuilt? Most of the time, people typically recreate the society they know unless they are already thinking about things they would change. To rebuild something better we must know what to keep and what to eliminate. We must know the mistakes of the past to avoid repeating those mistakes.

The founding principles, upon which the U.S. was built (the U.S. Constitution itself), will remain. Great care must be taken on what is built upon that foundation. Only patriarchy creates civilization. Societal and government change will come.

There are pertinent questions that will need answering, such as: Should women retain the right to vote? (Women did not have the right to vote prior to the 19th amendment to the U.S. Constitution.) Should traditional marriage be the standard and gay marriage eliminated? Do we really want the society we have now? A society where men are marginalized? A society where white people are demonized and minorities are mentally enslaved by progressive victimhood? Do we want to continue to be oppressed by children and ruled over by women?

I have pondered for many years what would be rebuilt and how to rebuild after the current civilization falls. Patriarchy must assume its rightful place in society. Giving women the right to vote, the sexual revolution of the 1960s, the legalization and acceptance of abortion and the rise of no-fault divorce are pushing our civilization toward destruction.

Undoubtedly, things will be hard. Many of the immediate conveniences our civilization has access to will be gone or reduced. Patriarchy will rebuild civilization. Men will rebuild. Let us rebuild a civilization that will not repeat the mistakes of the past.

8 Ways To Deal With Your Future Death

September 20, 2018 | by Howard C. Roark | Link | Original Link

We never stop to think that our time here is limited. Unlike God, we are mere mortals whose lives are going to end one day. And the sad truth is that we never know when it's coming. For some, it will be a peaceful transition from the physical world to the spiritual world when you reach old age. To others, it will be a painful all of a sudden unexpected experience without a chance to say goodbye to their loved ones.

Unless you are in law enforcement, military, firefighting or any other life-threatening job, chances are that you live your days never stopping to think that you have an expiration date just like the food you bought in the supermarket a few days ago . I'm not trying to make you sad or depressed. Unfortunately, that's just how life goes. Tomorrow I may die in a car crash, be run over by a car, killed by a bullet, contract a deadly disease, or just die of old age in a few decades from now.

There is so much stigma and taboo attached to this subject. In short, everyone wants to avoid talking about it. The goal of this article is to remove all the fear behind it and talk about this difficult topic in the easiest and pleasant way possible to swallow it down your throats.

1. Learn to enjoy the now, but do not become an instant gratification addict

“Learn to enjoy every minute of your life. Be happy now. Don’t wait for something outside of yourself to make you happy in the future. Think how really precious is the time you have to spend, whether it’s at work or with your family. Every minute should be enjoyed and savored.” – Earl Nightingale

We tend to think there will always be a tomorrow and thus end up forgetting about the brevity of life. It’s only when a loved one passes away that we remember that we are all going to die one day. But a few days after the funeral of your loved one, everyone goes back to their daily routine and then this reminder of the fragility of our lives vanishes from our mind.

2. Learn to be happy with who you are and what you have already achieved in this lifetime

“Learn From Yesterday, Live for Today, hope for tomorrow.” – Orison Swett Marden

I’m not asking you to stop trying to improve your life or accept a life of mediocrity. Life

has its ups and downs, but that doesn't mean we can't find happiness and joy at this very moment, even if we haven't achieved all of our goals.

3. Accept that you might not achieve all your dreams in this lifetime

"The man who seeks one thing in life, and but one, May hope to achieve it before life be done; But he who seeks all things, wherever he goes, Only reaps from the hopes which around him he sows, A harvest of barren regrets." – Owen Meredith

I'm not sure if I will live long enough to visit some English castles in Britain or to become fluent in Latin in order to be closer to my Roman ancestors. Regardless of what I will be able to achieve with the time I have left in here, do not waste your time trying to become a Jack-of-all-trades.

When I was younger, I used to waste too much time trying to be good at several things at the same time. This is the main reason I recommend you to pick only one or two skills/goals and focus all your energy and will for the next 40 years of your life if you want to master them. A jack-of-all-trades may know a little bit of everything, but unfortunately this comes with a big cost. He will never master any of them!

4. Prepare a will for your loved ones and leave a message for them

“My soul can find no staircase to Heaven unless it be through Earth’s loveliness.” – Michelangelo

If there is something or several things you wish to tell your loved ones before you go to the other side, I recommend you write all of these things in a letter and ask someone you trust such as a close friend of yours or a trustable lawyer to give it to them whenever you pass away.

Loading...

A lot of people never stop to think about leaving a will for their loved ones, especially their children and this can be detrimental for the future of your children and your family. I’m not sure how US laws are about this subject, since I only lived there for a few years, but at least here in Brazil, a lot of times children or young adults who just lost their mother or father become screwed up, thus losing part of their inheritance thanks to an older brother or smartass step-mother/step father who takes advantage of a lack of a will. All of this could have been avoided had their parents left a very clear testament.

Even if you are still a young man, make sure to at least start thinking about making provisions to not let this happen to your loved ones. After all, it can be detrimental for their future well-being.

5. Make amends/peace before you leave this realm

“To err is human; to forgive, divine.” – Alexander Pope

If you ever had a fight or done something wrong with someone you deeply cared for and regret doing so, it’s time to grow some balls and ask for forgiveness from that person. If they ghost you or they don’t accept, it’s their fault and the burden will be with them. You did your part, so you can feel relieved.

6. Accept that death is inevitable in nature’s law

The journey our soul has to go through of leaving our body and returning to the Kingdom of God is quite scary to most of us

As of right now, we have yet to be able to put a brain in a pot and make it work. And even if we do that, I ask: is it really worth extending your life beyond your biological expiration

date? The idea of me living 200 more years stuck in a pot connected to a super computer doesn't sound like living at all. I'd rather not to try to prolong my time in this planet if I can't live it fully.

7. Accept the fact that death may come unexpectedly

"Realize that illness and other temporal setbacks often come to us from the hand of God our Lord, and are sent to help us know ourselves better, to free ourselves of the love of created things, and to reflect on the brevity of this life and, thus, to prepare ourselves for the life which is without end." – Saint Ignatius

Wars, unexpectedly health issues, accidents, and natural disasters all play a part. This is an unfortunate reality of life. Even if you are young, you are at risk of dying. This is why I ask you to make an effort to enjoy every moment even if your life isn't perfect. Tomorrow may be your last day.

8. Do not be afraid when the Reaper comes

Then shall the dust return to the earth as it was: and the spirit shall return unto God who gave it. – Ecclesiastes 12:7

Do not be afraid when the time comes to leave this realm. Be proud of all your personal, biological and financial achievements! You will still be able to watch the future of your loved ones and legacy in heaven.

Conclusion

Our time in this world is limited. Everyday is a blessing by the grace of God.

Life has its ups and down, but still, this is no excuse for not using our time in here properly. Since none of us have a crystal ball to know which day The Lord will call us back to his palace in heaven, I want you to make a promise that from now on you will try your best to stop complaining about your current situation and start thanking God for giving

you the power to live one more day.

Every day is a blessing! We all have our sad stories to tell, but its quite important for us to make an effort to improve ourselves every day, until we find ourselves six-feet under.

11 Online Personalities You Should Follow

September 20, 2018 | by Edgar Tru | Link | Original Link

Online personalities have helped in many positive ways to shape society, change minds, and encourage more libertarian-esque or conservative values. Ever since YouTube became a well-known website, it made way for new and better voices that have reached in the millions.

What is the irony that capitalism allowed these corporations to gain access to monopoly and then stomp out capitalism by means of total domination? While there is pushback, it may not be enough. The censorship of right-leaning voices grows seemingly daily and monopoly clearly plays its role in this.

However, there are some voices out there you may not have heard of. And you may want to follow them before they are potentially censored.

1. Mark Dice

Mark Dice has been known for his 'conspiracy theories' about the illuminati and secret Satanic organizations. Personally, I find some of it to be farfetched but that's just my view. However, he has made humorous content in criticism of the mainstream, centralized media. He's also been big, more so in the past, on criticizing the dominant pop culture and the political madness within it.

He has a very humorous t-shirt that he sells, which reads: "Liberalism: Find A Cure." I own it. It's great.

2. Red Ice Radio

Red Ice Radio, as they've discussed before, started out in the more 'conspiracy theories' arena, questioning the powers which be and exploring a variety of topics. Over the years they've explored the heavier hitting topics and openly discussed the taboo. They've talked about the JQ (Jewish question), race and demographics change, the corruption of the European governments, etc. They've interviewed many controversial characters including pastor Jesse Lee Peterson, white nationalist Richard Spencer, and Holocaust revisionist David Cole.

They are a bold group and have influenced quite a few folks. I happen to be one of them.

3. Barbara4u2c

This chick is, I'll admit, a tad silly. But her content has become more nationalist and is right-leaning, politically speaking. I do believe, given the lack of men who have a spine left, that women can be utilized to rally comrades in this fight against global domination by means of government and leftist's desire for open borders.

Her material often deals with heavy content dealt with a light-hearted vibe.

4. Charisma Matrix

This guy is big on body language and tonality. His analysis, in terms of body language, of President Trump and President Putin is quite interesting and entertaining. He seems to be apolitical so his analysis is without bias and focuses more on the alpha male, higher-status situation.

Some gentlemen out there may find use of his content. He seems like a genuine guy.

5. Slightly Offens*ve

I came across this cat not too far back when he wasn't as known. And it seems he's become a tad popular and was even on a show with Gavin McInnes.

He once described himself as a centrist. In truth, I'd been fine being a centrist myself. However, as it stands today, that is not an option. And that's also the downfall of the West. A very strong hand must be placed over society to keep the operation running without tearing itself apart. Centrism can easily slip down into liberalism and, of course, that mentality has not panned out too well.

He has great camera charisma and is a Trump supporter. So there's certainly value to his character and what he's doing.

6. Hotep Jesus

Hotep Jesus is part of a black movement of men who have ditched the anti-white worldview and embraced a better side for black men, which includes black fathers being in the home and not spreading their seed around town. It is a great movement to see that

brings ease in terms of racial tension.

Loading...

Candice Owens is amongst the newer black right-leaning voices, and it helps in terms of rounding up comrades in the impending civil unrest which may surely (even if briefly) plague the West.

Hotep Jesus was even interviewed on Fox News after a hilarious video of him getting a free Starbucks coffee due to 'racism.' It was a stunt and demonstrated how idiotic the liberal mindset has become.

7. MGTOW Knowledge – Darius

Discovered this cat not too long ago. He is, from his appearance, a millennial man who discovered the truth about women from hard-hitting experience. He mainly discusses the sexes and encourages men to go their own way given the dating arena and how fucked everything is.

He seems to harvest some bitterness, and reasonably so. It was hard myself when I finally understood the true nature of women. When a man discovers this (frankly put, obvious) truth about the female sex, operating properly in that discovered environment can be a great advantage, lest you become an angry, lonely man.

He has some reasonable things to convey. May be worth checking out.

8. Red Pill Philosophy

This guy is not new to the MGTOW movement. He's made content ranging from anti-feminism, politics of a variety, to flat-Earth debates. He was once interviewed on Red Ice Radio about being a Cuban Trump supporter. Himself, like many others, have had content removed from YouTube due to a 'violation' of their terms of service.

I appreciate a lot of his rhetoric. Seems like a cool guy to chill with.

9. Hunter Avallone

I'm not too familiar with his entire career, but he's produced some humorous content, including recently discussing the rise of ecosexuality.

He's a right-winger and has some decent content. Perhaps, though, geared more toward a millennial audience.

10. An Ear For Men

This gentlemen, who operates An Ear For Men, is another individual who grants well-placed advice for men in an era of absolute disgust where gender roles have been shattered by the vermin she-devil manticores of today, and the men who allowed this cultural switch to occur.

He discusses quite a few things ranging from deal-breakers with women, how to train

your woman, men and suicide, etc. He seems like a reasonable man who understands quite well the opposite sex. His work is worth checking out, in my opinion.

11. Atheism-Is-Unstoppable

And lastly, this man. This is an individual who has had their account deleted a *multiple* of times. It's literally become the norm for him. He is an atheist and, yes, liberal. He's possibly one of the most reasonable of liberals I've watched for some time now. Great social and political commentary and he's exposed Cenk Uygur a multiple of times on his constant race-baiting and anti-white rhetoric.

He also recently had a good chat with Jared Taylor, and he seems to accept the differences in racial IQ and how that effects society overall.

Conclusion

These are just a few voices you may have not heard of. I do enjoy watching folks discuss their worldview and the approach they take to it. But, in the latter months of 2018, censorship has been ramped up and seems to have crafted a snowball effect to which the end results are yet known.

Download content from online of videos you find important and the folks who help shed light on topics of actual substance. Document important things which revolve around conservatism, government corruption, globalism, etc. And consider exploring other less popular websites in order to keep receiving intel in regards to the above mentioned.

It's a war of information. InfoWars was damn right on that.

4 Cosmetic Fixes That Can Make You Significantly More Attractive To Women

September 21, 2018 | by Jon VonStroke | Link | Original Link

We live in the age of social media and celebrity glorification. Facebook, Instagram, and the Kardashians have effectively distorted our perception of beauty. Instagram in particular. It's picture editing capabilities, combined with selfie manipulation techniques, falsely enhances one's physical attributes: butts look bigger, eyes appear brighter, skin seems clearer, six-packs more defined, and so forth.

The media incessantly shoves down our throats their degenerate archetypal interpretation of beauty. Someone with an untrained eye might get the impression that everyone around them is attractive, wealthy, and living a more fun life than them. Fortunately, most people have become aware of the tricks and cheap gimmicks that are employed by attention whores to embellish their lifestyle and sex appeal. In fact, once you become privy to the illusion social media and the entertainment industry perpetuates, you come to realize that the majority of people around you, minus a very fortunate and microscopic amount, are painfully average looking.

Everyone has at least one, sometimes multiple perceived cosmetic defects according to our modern day society's beauty standards. It's my contention that as long as a man has no glaring or atypical physical or facial deformities; if he addresses these four physical characteristics, he'll at a minimum be considered "not ugly". Very often, fixing just one of these chinks in the armor can morph an ordinary looking man into a proper heart-throb. Below are four relatively uncomplicated measures that have the potential to dramatically improve one's physical appearance.

1. Teeth & Smile

Remarkable: the mangled teeth version of Tom Cruise on literal face value alone would likely struggle on Tinder if it not for his celebrity appeal.

> A study has confirmed what we already know – that a white and evenly spaced set of teeth makes people seem more attractive. But it has also explained the reason.
>
> It is because teeth are the human equivalent of a peacock's tail – a sign of health and genetic quality designed to help choose a mate.

A straight and white smile, devoid of missing teeth, can have a profound effect on a person's overall presentation and mating opportunities. Nobody enjoys a trip to the dentist. It's an uncomfortable and costly experience. Despite this, biting the bullet and investing in your mouth is a worthy expenditure. Not only because of the cosmetic benefits it can provide a person with, but because it's your teeth for crying out loud; healthy chompers are an essential component for your overall health and quality of life.

2. Hairstyle & Grooming

Depending on who you ask, women have a distinct advantage over men in regards to beauty routines; they have many more variables that can be controlled and manipulated to bolster their look. Men only have a few things that can be amended to enhance their appearance: physical fitness, skin, apparel, hair, and that's about it. It always puzzles me when I see a guy that puts very little thought into his haircut and style. Sure it costs a little bit more to get a good haircut, but the benefits are undeniably worth the premium.

You wear your hair every day. A cheap or unflattering haircut is evident—a great haircut makes people take notice. Additionally, if you aspire to be put in leadership positions, you've got to look the part. A good haircut will provide the confidence you need to help you make a strong and memorable first impression.

Lastly, if your hairline is receding substantially or if you're just flat-out going bald, you're better off just shaving it off. Yes, I understand having to say goodbye to what's left on your head can be heartbreaking, but adopting a George Costanza style is unlikely to do you any favors. Luckily, guys like Jason Statham, Joe Rogan, and Dwayne Johnson have popularized the look; there are lots of women that actually find the shaved head look sexy and masculine.

Adding some scruff or even better, a beard, is one of the best decisions a man can make for his love life. Facial hair makes a man look more rugged, mature, and can help conceal a weak jaw. Just make sure you keep it neat and well-groomed. The unemployed hobo and low testosterone neckbeard style as seen below is rather pitiful and unsightly to look at.

Loading…

This man probably justifies his repulsive appearance by telling his friends that women don’t matter to him because he has chosen to “go his own way”.

3. Apparel & Style

ill-fitting off the rack clothing can make you appear sloppy and larger than you really are.

They say clothes make the man. While that might be an overstatement, clothes can have an immense impact on your overall appearance and the way people perceive you. There's an allure and magnetic force at work when a man wears a form-fitted suit, similar to how heels and a tight black dress on a woman draws in the attention of a room full of people; men who dress well and wear the correct fitting garments for their body type are seen as higher status and more attractive according to research.

> According to the study conducted by Kelton Research, not only are well-dressed men viewed as sexier, smarter, more successful, and more well-liked, they also fare better in relationships. In fact, 91 percent of Americans think dressing well can make a man appear to be more physically attractive than he really is, while nearly two-thirds (64 percent) believe women are more likely to marry a well-dressed man than one who isn't as put together.

You don't need to spend a fortune to dress the part—quality over quantity. Spending a little extra money to get higher quality apparel is worth it. Superior clothing will fit better, last longer and therefore save you money in the long-haul. Finally, never skimp on your shoe game. Things that you use every day such as footwear should be of good quality—shoes have the potential to make or break your outfit.

I still see guys at the club deploy this combination…

4. Body

Muscles transformed this man from soy boy to fuck boy.

Quite possibly the most significant thing a man can do to improve his overall appearance is hit the weight room. Just like how men are attracted to big boobs, women are attracted to big muscles. If you're a man that does not have the most attractive facial features improving your physical stature is one of the best investments you can make. Akin to how a man will sleep with a girl that has a knockout body despite not having the best face; a women will screw the butter-faced herculean man that works construction because muscularity is associated with high testosterone. In fact, studies show that meatheads are responsible for the bulk of "cuckolding".

> Male peacocks show their good condition with their showy tail," says David Frederick of UCLA's Center for Behavior, Evolution and Culture, a Ph.D. candidate who was lead author of the study. "Muscularity in humans is similar because it requires calories, testosterone, and a strong immune system. It's telling women, 'Hey, look at me — I must be in good condition.'"
>
> Those muscles also tell women to forget about their man at home — at least for a night. The research showed that 32 percent of men defined as muscular are twice as likely to have been with a woman while she was in a relationship.

You don't need to become a bodybuilder, but packing on a little muscle to your frame can do wonders to your sexual desirability. Muscles increase testosterone, garner the respect of other men, improve posture, raises self-esteem, helps improve the fit of clothing, and just overall makes you visually appear more alpha. You're a fool if you are not taking advantage of this easy hack.

Conclusion

As stated in the introduction. Once you remove the curtain that is social media, you'll notice most people are bang average. Improving these four cosmetic facets has the potential to dramatically augment your sexual appeal, which will consequently raise your market value.

With the current state of affairs, success in the marketplace can seem unattainable. With such stiff competition, your success is in this climate can largely be determined by the smallest of margins; life is a game of inches. Therefore, it should be your obligation to make sure you mitigate your vulnerabilities—that way you lend yourself the best odds for achieving success.

Why In Your Own Life You Should Be Very Offensive

September 21, 2018 | by Wilfred Owen | Link | Original Link

The proper response to political correctness could be to go on living life as you see fit. Another option is to cave in, as many in this era do. “Go along to get along,” may simply appear as a necessary expedient when you are told to “pick your battles.”

That may seem innocuous, but the vile act of giving in to what is wrong is at the very heart of the figurative, accurate, and effective pejorative “cuckservative.” If you are a man, you don’t let your vital boundaries get crossed because when you do, you show the world that nothing is sacred to you. In the smallest of behaviors you show the world that when it comes down to it, even your wife is not sacred to you.

In this era, where free speech is aggressively under attack, the superior response to society attempting to silence others is to draw a line that is far beyond legitimate speech that affects you. There are plenty of opportunities in life where you draw a boundary so far from anywhere that matters.

The Mailman Doesn’t Enter the House, Ever

Your mailman or UPS guy drops off packages at the door. Not inside the door. It’s just an extra two feet, it’s not like he’s sitting down at your dinner table or climbing into bed, so what’s the difference? You set that wide boundary at the threshold of your home, no matter how heavy a package is.

You don’t want this guy in your private space because before you know it, this stranger may easily push the boundary a little farther and a little farther. One way to make sure that the mailman is never in bed with your wife is to make sure the mailman is never in the house. The door is the boundary of the home. The home is private. The government worker and the stranger alike are not invited into the home.

Mike Pence Doesn’t Spend Time Alone With Other Women, Ever

Mike Pence famously doesn’t go unchaperoned for a meal with a woman other than his wife. He doesn’t consume alcohol at events where his wife is not present. Those are fantastically wide boundaries in our era. And wise boundaries that have been going on in Pence’s life since as long as 2002 according to some reports.

These are boundaries set by a man that understood long ago that #MeToo accusations have always been easy to make. One way to make sure you are never wrongly accused of fooling around on your wife is to never be in a situation where it is your word against the other woman’s word.

A Smart Man Doesn’t Depend On The Next Paycheck, Ever

You don’t need many years worth of savings and investments to live comfortably. As long as you have marketable skills, you could exist fine with very little saved. But it sure feels good to have a giant buffer protecting you from direly being in need of that next paycheck. One way to make sure you never live paycheck to paycheck is to make sure that you are many paychecks away from that horribly low bar.

The Free Speech Buffer

Free speech should be another boundary where we draw a large buffer.

Serena Williams caricatures must be protected

Because we didn’t successfully protect the rights of the deplorable to draw Muhammad caricatures, we are now fighting over whether any caricature artist will ever again be allowed to caricature any black woman.

How long before all cartoons of anyone on the left becomes forbidden? Before cartoons of any beloved figure adored by many becomes forbidden? Push back. Not only is Serena Williams allowed to be caricatured, so is Muhammad. In fact, the world is better off if artists caricature the two bullies being badly behaved together.

Challenging the official, thoughtless narrative on the Holocaust must be protected

If you don’t fight for that academic freedom, then you end up with a campus environment where even the well-evidenced and relatively tame Charles Murray can’t take a stage in a college. When you stand up for the most out in right field intellectual rigor, you stand up for the concept of intellectual rigor.

It brings greater truth, reason, and honesty. Those all make for a better world. Inviting intellectually rigorous debate makes the world a better place. Yes, that also means inviting intellectually rigorous debate on the Holocaust makes the world a better place.

Gavin McInnes being able to speak to an NYU venue without having a condom full of urine thrown at him must be protected.

It’s almost too ridiculous to mention. That’s how far things have gone. Even the relatively tame Gavin McInnes can’t speak freely on a college campus in his own town. Every deplorable with the most horrible pro-free speech views must be protected.

Loading…

The Overton Window has shifted too far already when Gavin McInnes is among the most

triggering on the right, but as he points out, he makes it cool to be on the political right, and feeling cool is something the snowflakes long ago thought they had monopolized.

Protect Others And They'll Never Come For You

I don't want to draw Serena Williams caricatures, write books about the Holocaust, or wait in line at NYU to hear Gavin McInnes speak, but I see the value in those boundaries being drawn far from activities I care about. Therefore, I support the free speech of others by helping to protect the boundaries around others, speak out against the silencing of them, and push the boundaries beyond what is comfortable.

As the German Lutheran minister Martin Niemoller pointed out in his own fight against oppression:

> "First they came for the socialists, and I did not speak out— Because I was not a socialist.
>
> Then they came for the trade unionists, and I did not speak out— Because I was not a trade unionist.
>
> Then they came for the Jews, and I did not speak out— Because I was not a Jew.
>
> Then they came for me—and there was no one left to speak for me."

If you fight for others, if you fight to keep the boundaries far away from you, you will never need to worry about your own rights. That generosity is self-interested, and is very good for society.

"Deplatforming" and "Hate Crime" Push The Overton Window

Deplatforming is a legitimate behavior on the left. It's currently being celebrated throughout the left as a victory against extremism.

The term "hate speech" is a legitimate distinction on the left. It's merely an attempt to silence. To overpower a person with an opinion. There is no hate speech. There is only speech.

These are never legitimate distinctions between how you can interact with what adults. There is no hate speech, there are no hate crimes, there are no protected classes of adults. That must be the perspective. True to first principles: a human is a human.

Everyone who comes to an intellectual debate must be ready to take off the gloves and to get deep into the truth of the matter being discussed. In a debate, no one is free to be protected from the truths that arise in an intellectual debate no matter how offended they feel, not even if they cry or throw a tantrum. Laugh at them if they do, for they should be very embarrassed.

Marxist Wars On Freedom Are The True Hate Crime

The true hate crime is the promotion of neo-Marxism by social justice warriors. They seek to win debates by pulling apart the freedoms that the freedom fighters of the West, our intellectual forebearers have struggled for centuries to introduce to humanity.

Marxism turns good cultures into legalistic petty cultures that tend to behave culturewide in adulthood as if they've gone through an abusive upbringing. Marxism turns relative paradises on this planet into places of abject squalor. These are hate crimes.

Interestingly, the neo-Marxist social justice warriors overlook this fact and prefer to point to your hurtful words as the real hate crime. Don't let them. They are the domestic terrorists who would repeat the failed Marxist experiment on this wonderful land.

Be A Free Speech Warrior

I request of you that as you go through life, you take the temperature of the place you are in and always seek to push the boundaries. To do so is alpha and feels good. Sometimes you fail, more often you succeed.

Just like pushing boundaries with a woman and weathering shit tests earns you rewards, pushing the free speech boundaries and passing the shit tests of those who would silence you will earn you rewards.

Make the quip that might be considered over the line.

Cross the line. Do it fearlessly. Do it boldly.

Use the words that might be considered over the line.

You know what they are. Use them. All the words that you are told you can't use. Use them. Use them with skill, for maximum effect. But use them. Don't let anyone tell you otherwise.

Share the opinion that might be considered over the line.

The best researched most effective thing you know how to present, present it. Present it in a way that no one can dispute it. If you're not great at anything, present what you're best at. Do it enough and you'll get good at it.

Cross The Line After Taking The Temperature

I'm not saying to be a social pariah who can't take the temperature of his audience, but I am saying to be the one who can see exactly where the line is and to artfully be comfortable pushing beyond it.

This is the requirement of us in our current aggressive anti-free speech era if we are going to preserve the level of free speech we have come to know.

This is why in your own life you should be offensive, very offensive, starting today, before the Overton Window shifts.

4 Ways We Spoil Ourselves Rotten

September 23, 2018 | by Jared Trueheart | Link | Original Link

There's a pattern I've noticed in some of my own friends and people I've met and followed throughout the years. It's a pattern that has led to their unhappiness with life. They are perpetually malcontent, even to the point of depression. And it's something they've brought on themselves.

When thinking of these people I'm reminded of Veruca Salt from Willy Wonka and the Chocolate Factory. She gets everything she wants but she always wants more. Her dad always gets her more. Other people in the film comment about Veruca that she's been spoiled rotten. That's exactly what happens to these people I know. You likely know people who have been spoiled rotten too, or it is the source of your own malcontent.

Worst of all, and unlike Veruca Salt whose father spoiled her, these people have spoiled themselves rotten. Here are the four primary ways people do that.

1. Food

You've probably known people who eat out most meals. When they do cook at home they make something you'd only ever eat at a fancy restaurant; eggplant risotto or quails drowned in butter or a souffle or something along those lines. Eating in this way drains your bank account but people do it just because they can because they are adults and nobody can tell them no.

There's nothing inherently wrong with this if you can always afford it or get your way, but for most people, that's not likely. Eating out gets expensive and cooking these foods takes time and effort and skills most don't have. It's hard for these people to eat something simple like a PB & J sandwich or scrambled eggs. Foods most of us just eat for energy and ease and because it's cheap. These foodies get spoiled by their own food choices and become unable to eat a simple inexpensive meal and move on with their lives. It can become a small but potentially significant source of unhappiness which shouldn't affect one's happiness at all.

2. Travel

I know a person who traveled a lot in their twenties. They went a lot of places, met a lot of people, slept with a lot of people, and got all that insight people like Anthony Bourdain said you get from traveling. Work wasn't life for them. Work was the area between traveling, the period of time spent saving enough funds to buy a new backpack and tent and dry rations and money for hostels. The consequences of that lifestyle weren't felt until they were in their thirties when travel was replaced by college and work.

At that point, life was no longer happy. The adventures, which were no more than backpacking through other places and sleeping with foreigners, were gone. When they "grew up" and tried to get a regular job they were always unhappy. If it wasn't for one reason it was for another. But the real reason for their unhappiness was the fact that they never got content with work. They never accepted the daily grind as part of life.

Most people just accept that they have to work. They might not be content with their particular job but they are content with having to bang out eight hours a day to afford the rent. When people get too used to travel and go back to a more stable life it seems too boring and they feel unhappy. They feel like they are missing out on something.

Loading…

3. Sexual Partners

Normally on red pill/manosphere websites, we only hear about how promiscuity damages women from connecting with men, but the opposite can be true as well. When men or women have many sexual partners they can get used to a certain plethora and variety of sexual experiences and partners. Once they are used to that variety switching to something less exciting can be a challenge and source of unhappiness.

Happily married men will tell you that sex with their wives isn't always an event. There's not usually a date or any seduction. The husband initiates sex and the wife goes with it. The sex isn't particularly thrilling, it's just a good 3-8 minutes of intimacy that results in a nice climax for the man and potentially a climax for the woman. It's no big deal.

But when people get used to seduction and picking through the weeds for a new sex partner the more mundane or routine sex life isn't exciting. There is no thrill in it. The urge to find a new sex partner and experience more "variety" still remains. Having a long-term relationship while feeling that urge becomes a source of unhappiness, one that ultimately prevents people from connecting with the opposite sex in more meaningful ways.

4. Novelty

The common factor here is novelty. Eating extravagant and exotic foods, traveling to extravagant and exotic places, sleeping with exotic strangers, all involves seeking out novelty for the sake of novelty. People who seek novelty or enjoy novelty as a way of life cannot be content with the mundane. That means they'll never be happy in a stable job. They'll never be happy in a family environment. They'll never be content doing boring things with boring people.

Most people aren't like this. Most people have accepted that they have to work Monday-Friday so that they can BBQ with their friends on Saturday and have a few laughs. Most people have accepted day-to-day life without much novelty and they are happier for it.

You can have novelty and be happy with the mundane aspects of life simultaneously. The two are not mutually exclusive. Novelty can very easily be had after your boring work day is over. You can travel and experience new places and eat new foods during your vacations. I don't personally advise finding new sex partners if you already have a stable relationship. Generally speaking, life is better with a stable, faithful partner.

If you are young it is especially important you do not spoil yourself rotten. You'll feel the effects of it later. If you're older and already feel the unhappiness you'll have to figure out how to accept the more mundane side of life. Accept being "normal."

What Is The Difference Between a “Hook Up” Date And A “Serious” Date?

September 23, 2018 | by Troy Francis | Link | Original Link

It would appear that, in the Twitter-sphere at least, there are still men who believe there is a distinction to be drawn between the sort of date that you would go on for a ‘hook up’, and the kind you would arrange for a more ‘serious’ encounter. Of course, this is illusory. A first date, whomever it is with, should always be the same.

You should go for a few drinks, and not overcomplicate things. Perhaps this flies in the face of conventional ‘wisdom’. Well, conventional wisdom is wrong, for at least a couple of reasons. The first is that when you are going on a date with a girl for the first time, you shouldn’t even be thinking about whether this is going to turn into something ‘serious’ or not.

Even if you are in the market for a girlfriend, building up a date with someone who you presumably hardly know into a big deal is the very worst thing you can do.

What if you go out with said girl and she turns out to be a moron who you can’t stand? The whole purpose of meeting up with someone is, after all, to get to know them a little better (whether or not things end up in the bedroom).

And even if she does turn out to be the girl of your dreams, making too much investment before you’ve even slept with her screams of desperation and provider mentality. In fact, if you’re not careful, it might look as though you are trying to impress her simply to get her into bed.

The Truth About Attraction

The reason the men mistakenly believe that they should somehow behave differently with ‘good girls’ they are looking to get more serious with belies a fundamental misunderstanding about how the sexual marketplace works.

Bear in mind that initial attraction operates the same, regardless of whether you wind up as fuck buddies or an old married couple. And attraction has to be there at the beginning no matter what. So whatever your longer term intentions are regarding this particular girl, you must play it cool at the outset. And you *must* spark attraction. And the very best way to do this is not to try too hard.

Think about this. Imagine you meet a beautiful girl who has all the qualities that you desire for a long-term partner or wife. Perhaps you meet her at the library, or in a museum or bookstore, or some other environment that would indicate to you that she is a good catch.

Because she is not a club girl, or the sort who frequents bars (or so you assume), and because you infer that she has long-term potential as a result, you decide to organise something special for your first date. You buy tickets to a recital of a Schubert’s string quartets, and then arrange a candlelit dinner at an expensive restaurant afterwards.

After all, this is a *special girl*. You are not in the market for a one-night stand and neither is she (clearly). And because you are hoping to initiate a relationship with her, you want your first date to be memorable.

Loading…

So you meet the girl, you sit through the string quartet in your itchy suit, and then you go to dinner, where you make small talk about books on the New York Times bestsellers list.

When the evening draws to a close you walk the girl home and she gives you a peck on the cheek at her door. The next day you send her a message telling her how much you

enjoyed her company. She doesn’t reply. You never hear from her again.

The Fatal Nature of Over-Investment

Regrettably, you have made the number-one error of all average frustrated chumps the world over—you have invested too heavily too early on, and this has pushed her away. It is a trope of human nature that which is to available to us is immediately tarnished and soon becomes detestable. And if you indicate to a woman upfront—through your investment level—that you are unequivocally available, then she will be repelled.

Don’t assume that she is so sweet and innocent that she will be grateful for your ministrations. That is naive in the extreme. Instead, control your urge to go over-the-top, and instead, treat her like you would any other girl—in the initial stages at least. If you get on well, and it does develop into a relationship then, of course, you can treat her then.

But never forget that you won’t enjoy the warm comfort of comfort and affection before you have first ignited the white-hot heat of attraction.

Just Meet Her For Drinks

So follow the attraction model. Take her out for a drink, and make the interaction sexy. Flirt with her. Make it clear (in your eye contact, in your tonality, in your touch, and even directly) what it is you want. If she rejects you then fine—plenty more fish. If she doesn't, then take things further.

After you've slept with her and you've spent a bit of time with her, then you can determine whether or not this is someone you want to be in a relationship. And at that point, it's perfectly OK to start organising trips to the zoo, and walks in the park, and so on. If that's your thing.

But for a first date? No, keep things simple. Any other approach could well be counterproductive, and wreak, rather than improve, your chances.

If you would like to receive cutting-edge tips on how YOU too can date beautiful girls and live the renegade playboy life then sign up for Troy's acclaimed DAILY email here.

Conservatives Are Losers

September 24, 2018 | by Roosh Valizadeh | Link | Original Link

The following article was originally published on Roosh V.

For the world to get to how it is today, with the nearly complete elimination of tradition in favor of a globohomo world where diddling little children is becoming normalized, conservatives have had to lose *every* meaningful cultural war in the history of man. When someone declares themselves a conservative, they're in fact stating that they are a loser, someone who is meant to take the fall when the left comes attacking.

Conservatives have lost on every battlefront: free speech, the military, the universities, marriage, nuclear family, child education, the media, the government, Boy Scouts, business, law and justice, Christianity, patriarchy, immigration, the welfare state, and capitalism. The right to bear arms is the only battle they're not losing in a rout, but I'm confident they will lose that too within a decade's time. Conservative institutions are being infiltrated and subverted, or have disappeared off the face of the earth, and there is no sign of them ever coming back.

The enemy

Why are conservatives such losers? Because they desire to merely hold the line while their enemy rushes at them full speed. They don't want to conquer new lands, kill their enemy, or inflict real harm. They want to maintain the status quo while the left froths at the mouth to *win*, energized with momentum and passion. The left is so dissatisfied at the state of the world because of their deep-seated inner dysfunction that they put their entire being into trying to make it better. They don't know how to enjoy their lives so they have to attack the lives of others.

Conservatives, on the other hand, have no momentum or passion. They just want to be left alone, which makes them easy pickings for a collective that is hellbent on achieving their nightmare utopia. In the end, conservatives are the Spartans in *300* who have trained their entire lives to lose the battle, even if they are pound-for-pound stronger than their enemy.

Conservatives have also shown to be comically susceptible to leftist ideas when it's presented as "human rights." Two decades ago, the vast majority of conservatives would have stood against gay marriage, but a few years of cheesy "love is love" commercials was all it took for them to change their mind. Their motto of "live and let live" is only reasonable to hold if their enemy believed the same. They give the crying baby its bottle and from that milk it gets fat and strong and decides to kill the entire family. Conservatives don't understand that giving an inch to the left eventually results in *absolute defeat*. They have to psychotically refuse to give any ground, even if practical logic or fairness is staring them in the face, but we know they won't do that.

Loading…

Conservative bird feeding his enemy

Another problem conservatives face is technology, which is not agnostic but rather liberating. It allows man to rely less on traditions, family, social bonds, and religion, all things that the left hates. The more technology you have, the more you can be an atomized unit in a little urbanized box, reliant only on your service job and digital device to keep you alive and somewhat sane while using Uber and Lyft to travel in and out of your self-imposed quarantine zone. Because of technology, the conservatism of today is merely the liberalism of twenty years ago. I challenge you to find a single attractive "conservative" girl who hasn't tried Tinder or engaged in abundant pre-marital sex. Look at the life of any self-professed conservative and odds are you'll find a rather cosmopolitan existence that is far removed from nature and rural living.

The biggest reason why conservatives will continue to lose is that they're still not ready to kill the left even though the left is ready to kill them. Liberals have been getting conservatives fired on a daily basis while suing their businesses out of existence while the conservative loser merely whines about it on Twitter. You may hate the left, but if you wouldn't dare even punching them in the face because you fear losing your life of comfort, you will lose. If you're not prepared to kill your enemy while your enemy is busy killing you, you will lose. It's that simple. Some think that conservatives have to feel a sense of hopelessness to fight back, but by then there will be nothing left worth fighting for.

“Why would a liberal try to kill me because of my opinion? It must be some kind of a mistake!”

You don’t have to be a historian to know that conservatives will continue to lose. Simple take a look back 50, 100, or 500 years to see how much ground they’ve lost, and amplify that by a factor of ten thanks to technology if you want to imagine how much ground they will lose in the next 50, 100, or 500 years. They are such losers that if you see any sort of organized conservative “uprising” in the years to come, it will surely be a carefully managed scheme by the elites to usher in yet another monumental conservative defeat, just like we saw in the last few years with the alt right’s astonishing rise and then disastrous defeat in Charlottesville at the hands of their more capable enemies.

Since I know conservatives will not win, I do not identify as one, because I don’t see myself as a loser. I will stay under the radar and live with no label, and let the communists on the left defeat the losers on the right like they have been doing for centuries.

Develop Your Discipline With This Simple Habit

September 24, 2018 | by Mo Saleem | Link | Original Link

If you're like most men, there's a gap between your intentions and your actions. You know what you need to do to get what you want, but have difficulty in following through. Want to get better with women? Interact with more women. Want to get in shape? Eat less, move more. Want to make more money? Leverage your time and focus on income producing activities. Sounds pretty simple when I put it like that, but simple does not mean easy.

Not too long ago, I found it difficult to crawl out of bed in the morning. I was always tired and barely had the energy to stay awake, let alone go to the gym, cold approach women, and build a business. I was caught in a downward spiral, breaking out of which required a tremendous amount of will. Thankfully, I realized that the root cause of my problems could be narrowed down to the simple fact that I lacked discipline. Now, I've come to believe that self-discipline is the missing link between everything you are and everything you're capable of being. I believe that self-discipline is the only difference between success and failure in every aspect of life.

In this article, I'll discuss the #1 way I've found to develop my self-discipline and skyrocket my energy, mood, and focus in the process.

Cold Showers: The Secret to Sending Your Discipline Through The Roof

Picture this: You finally realize the power of rising early and set an alarm for 5:00am the next day. The next morning, you groggily wake up to the sound of your alarm buzzing and a part of you tries to convince you to hit the snooze. The decision you make in that moment – whether to get out of bed or to hit the snooze – is the decision that makes all the difference.

Self-discipline is the ability to do what needs to be done regardless of whether you feel like it or not. Getting out of bed at 5am, even though you don't feel like it, sets the momentum towards taking right action despite what your emotions tell you. It's the same with taking a cold shower. When you enter your shower and think about turning the knob to "C," you will hear the same voice trying to talk you out of it. But when you turn the knob anyway, you have effectively overcome that lower part of yourself and are letting your mind know who's in charge. Then, later on in the day, when that voice tries to talk you into skipping a workout or reaching for those cookies, you are less likely to listen.

Having taken cold showers relatively consistently over the past couple of years, I know for sure that the days I start with a cold shower are always more productive than the days that I don't. True freedom is impossible without a mind made free through discipline, and starting my day with a cold shower is the best way I've found to practice my willpower, develop my discipline, and learn to associate pleasure with doing the hard things in life.

Loading…

Can Taking a Cold Shower Boost Your Testosterone?

As a reader of RoK and the manosphere, you've probably heard about cold showers in the context of boosting testosterone. Having researched this topic in-depth (check out my ultimate guide here), I'll be the first to tell you that there is no definitive evidence to back this claim up.

Does this mean that cold showers don't boost testosterone?

No. What it means is that there are currently no studies that have observed the phenomenon. Understand that the majority of scientific research is driven by economics. Since cold water is cheap and nobody owns the rights to it, there is no financial incentive to drive the research. This is where anecdotal evidence (personal accounts) becomes important – and there is no shortage of that. A simple Google search for "cold shower benefits" will reveal countless testimonials from men who've experienced profound transformation by implementing cold showers as a regular part of their life.

Although the direct link between cold showers and testosterone has not been studied, there are a bunch of mechanisms through which cold exposure can indirectly affect your T.

The Scientifically Proven Benefits of Cold Showers

Anyone who's taken a cold shower before can attest to the increased levels of energy and focus they feel afterwards. The reason? It all comes down to a hormone called norepinephrine.

Cold water exposure stimulates the fight-or-flight response in your sympathetic nervous system and causes a massive release of norepinephrine. In this study, 1-hour of cold water exposure at a temperature of 57°F (14°C) caused a 530% increase of norepinephrine and a 250% increase of dopamine – both of which go hand-in-hand to cause a massive lift in energy, focus, and mood. On the flip side, low levels of

norepinephrine and dopamine correlate with diminished focus, drive, and depression. In fact, part of how antidepressants work is by increasing the uptake of norepinephrine and dopamine in your brain. The positive effect of cold exposure on mood is so profound that researchers have begun studying it as a possible measure against depression.

Furthermore, cold water exposure has also been shown to boost immune function, increase fat-loss, and even speed up muscle recovery.

Conclusion

All in all, starting your day with a cold shower is a quick and easy way to boost your immune system, speed up your fat-loss, increase your energy levels, and massively develop your self-discipline in the process.

How To Fight Feminist Organizations Such As "Muslims For Progressive Values"

September 24, 2018 | by Edgar Tru | Link | Original Link

An apparent liberal Muslim named Ani Zonneveld has been making headlines due to her fight against the patriarchy. Now, isn't this sounding familiar?

She operates a website called Muslims For Progressive Values. Already I can feel exactly where this is going, and where it'll end. Islam has very conservative values. One being that man is to dominate and women are to submit. And now, in the latter stages of 2018, another patriarchal culture is at risk.

It is not surprising she dwells within the shithole that is Los Angeles, California. I'm not sure if she already had these 'progressive' values beforehand, but it fits her values well dwelling amongst the scum of Mother Earth.

Regardless if one is misinterpreting the Quran, Islam and its culture is still overall a patriarchal system which now stands only to fall just as the post-Anglo-Saxon-Protestant West.

Where Does It End?

Women are naturally nurturing by their very nature. It's *debatable* now in the West since many have been brainwashed by leftist propaganda and are butch like hell. So when a 'progressive Muslim' comes forward preaching the same doctrine as leftism, equality, gay rights, inclusion and globalism, I foresee a few conundrums.

Below are actual quotes from the Muslims For Progressive Values website:

> We support women's agency and self-determination in every aspect of their lives. We believe in women's full participation in society at every level. We are committed to reproductive justice and empowering women to make healthy decisions regarding their bodies, sexuality, and reproduction.
>
> We support full equality and inclusion of all individuals, regardless of sexual orientation or gender identity, in society and in the Muslim community. We are committed to ending discrimination based on sexual orientation and gender identity. We endorse the human and civil rights of lesbian, gay, bisexual, transgender, queer, and intersex (LGBTQI) individuals.

Ah, I see. This strikes me to be just as sickening as contemporary America's lukewarm Christian culture, if it's even a culture at all anymore. Granted, I understand how one who is outcasted (gays in Islam) by much of a set society would want equality and to be left alone to be as they are. But I've witnessed far too many times that turn into a political and cultural snowball effect that society simply must avoid in order to maintain itself, along with law and order.

And it strikes me with this brutal recognition that not everyone has a say in the public square, or has *as much* as a say in the public square. And I understand the fear of walking outside without your husband and getting a good beating isn't very appealing. I'm not

necessarily saying that's even required to maintain law and order. I just *know* it maintains law and order.

The hard truth is that not everyone benefits, or benefits as much as others. There will always be winners and losers, masters and slaves. I personally don't like it, but that's how the real world operates.

How Do We Fight Against Leftism?

Let us take a look at a Bible story. Eve was tempted by the serpent who she then deceived Adam into biting the forbidden fruit. Manipulation by the female, weakened by another who easily made her swoon into a fib, then cast her natural inclination to manipulate upon man. And what happened? Original sin began which crafted a snowball effect that would infest the world until the apocalypse.

It may only be a fable. But it holds weight nonetheless. And there are other various possible mistranslations and other possible forms of that story. But that particular version indicates the deadening of a society when man falls weak to women.

I've begun looking at them more like devils who, by their given nature, are seductive and sexually desirable. Man's nature is to protect, and man falls weak at the knees for a damsel in distress. So, how is man supposed to protect the devil who, again, is game for manipulation and the impending doom of giving in to her request? It's two forces that are imbalanced in the West. How to balance it?

Loading…

The strength and control of man's emotions would be far too difficult a conundrum for most Western men. The idea itself of never allowing women to be in a higher level of politics or authority over man is not something many Western men would take kindly to.

If anything, they'd turn into white knights and cut out the tongue of the man who speaks the offensive reality.

Perhaps the system must truly break down before a new era of strong men can arise.

Man Must Reclaim The Dominant Role

I honestly am not joking when I write that allowing women to vote was an absolute mistake. That does not equate to hate. But my observations of the political and cultural snowball effect are too radical for my society. It doesn't mean women aren't allowed to have certain jobs or be involved in society or the art world. I don't want a sausage-fest in film or music. And nursing jobs are great for women because they play on their natural tendencies toward nurturing someone. It may be why so many women advocate for open borders.

Why have so many females been raped and butchered in Westside Europe? Open borders was a tragedy on their end and allowed in the barbarian to re-establish law and order. A part of law and order, in accordance with Nature, is men lead and the women follow. I do firmly believe a society that understands and establishes this by a coercive hand are bound to lean toward a more hard-right mentality; thus, ensuring a more conservative society. And, by extension, a safer and more secure society with well-defined gender roles and a general routine that won't get too far out of hand.

I told a man once, while at a store, that I do not support a female as president. His expression seemed to suggest he couldn't believe I'd make such a statement. He was Indian so he didn't throw a white-liberal bitch-fit about it. But that mentality is not going to change in the West as it stands today. Ragnar Redbeard was right when he essentially stated that by means of destruction can only then new life be born. It's a brutal thought

because it suggests the unavoidable. Destruction. . .and renewal.

I'm trying to figure out which systems work the best. The ruthless conundrum is that it involves more than the sexes. It entails race, religion, operations of government, etc. It is a complex matter. But the one keen observation I've made is the roles men and women play in a society, and trying to find a place to draw a line in the sand.

Conclusion

My country, America The Foolish, has such levels of degeneracy that now that I can spot it and identify it, I feel more grossed-out than I've ever been. I see the obese monsters which stomp around every corner, the lifeless limp-wrist men who act on emotion rather than reason and logic, the thickening of multiculturalism and mixing of different languages which may soon become dangerous and tribal, and the watered-down desire for men to be gentlemen and talk about politics or philosophy or religion, or anything of substance rather than video games like Fortnite or goofy piffle which amounts to nothing more than chuckles and brainless nothingness.

I'm not sure what awaits the West or America, to be specific. But I do have one idea: it'll at least start out with queer-lit leftism against the right-winged, gun-slinging man. Who do you honestly think is going to win?

4 Breakthroughs That Helped Me Sleep With 100+ Women on Tinder

September 25, 2018 | by Jon Anthony | Link | Original Link

Gentlemen, it's no secret that in our highly deregulated society, women have access to vast numbers of men at their disposal. With just the click of a few buttons, they can have anyone except the top 1% Chad over at their house, within a matter of minutes.

In order to compete with such rampant sexual deregulation, we must sharpen our game and we must sharpen it often. As Roosh so eloquently detailed in his newest masterpiece Game:

> *Beautiful girls in big cities are now directly and indirectly offered sex more than 1,000 times a month from men on the internet, in bars, on the streets, and within their social circles. If a girl has a basic internet profile, spends time on social networking, and goes out twice a week, I guarantee that she is offered more cock than even the most famous women of the past.*

Unfortunately, this is absolutely true. The days of your "oneitis" sweetheart Jessica have long past, and the days of competing with Chad Thundercocks are among us. Of course, you could go full-on MGTOW and just become a virgin, cucked incel, but that's not an option for any rational man.

So with this in mind, I have compiled four of the most powerful breakthroughs I've ever had in the past five years of gaming on Tinder. These breakthroughs have allowed me to sleep with far over 100 women, and if my writing and teaching are any good, then hopefully these tips will allow you to do the same. So without further ado, let's go.

1. Be An Asshole

When a girl signs up for a Tinder account, she is immediately bombarded by thousands of thirsty guys. It doesn't matter if she's literally just a 4 wearing some makeup in her pictures—if she's on Tinder, there are desperate guys waiting to fuck her.

…and do you know how most of them always start off their conversations? With some lame ass nice guy opener. They say something like "Hello beautiful," or some other infinitely beige and forgettable comment, that is all but lost within a sea of thirsty beta males chasing her validation.

No. If you want to succeed at tinder, you need to learn how to be an asshole. Be okay with teasing her and negging her, and don't EVER give her more validation than she's earned. Funny enough, this may sound cruel, but it's actually how an emotionally healthy man naturally treats a woman.

When a man is fulfilled and happy by himself, he doesn't constantly shower a girl in complements. He only compliments people when they *actually deserve it.* This is the key—you don't want to just be an asshole all of the time. Just being clear about who you are, what you want, and what you think of a girl is acceptable enough.

So next time, instead of opening with "Wow you're gorgeous," try one of these openers instead:

- "You look like trouble"
- "Wow, you look just like that girl from the Office"
- "I don't trust your innocent face for a second"

These have all worked great for me in the past, but better yet, if you can actually personalize an opener WITH a neg, then it's almost a 100% guaranteed response. For example, I recently saw a girl who had a very innocent face, but then upon scrolling past her pictures saw her showing off her butt in a bikini.

So, naturally, my opener was: "Your first pic says you're a good girl, but your 5th pic

definitely disagrees." Anything like this that's sexual right off the bat is good, which gets me to my next point.

2. Screen Hard

If you're trying to get laid fast, and use Tinder EFFICIENTLY, you have to understand that it's a numbers game. Most of my Tinder game is systematized at this point, and one critical element of this system is that I always start off with a slightly sexual opener. This does two things:

1. It shows the girl that I'm not a beta male ashamed of my sexuality
2. It screens her for availability (AKA if she's DTF)

Girls who are just there to waste your time and get attention won't even respond, so using the openers I previously mentioned are critical. This is an important element of text game, as well. Learning to move fast, but with finesse, is one of the greatest tools in a player's toolbox.

Like it or not, Tinder is a numbers game, plain and simple. Anyone who tells you they have a magic formula to bed 100% of the women they talk to is flat out LYING to you. I prefer to think of my Tinder game as a system with multiple phases, so with this in mind, here are my typical close rates:

- Phase 1: Opener (Start Off With 100 Girls)
- Phase 2: Get Her Contact Info (Down to 25 Girls)
- Phase 3: Hang Out With Her (Usually Around 7-10 Girls)

As you can see, these aren't bad odds. A 7-10% chance of banging a girl from Tinder is phenomenal, considering that you don't have to do shit except sound out some copy-and-

paste responses and openers. Once you wrap your mind around this, and start to aggressively screen girls for sexual availability, and take the numbers approach, you'll notice that far more women will be in your contacts list than ever before.

3. Spike Her Emotions

Loading...

The reason why women sleep with a man is partially looks, money, and status, which I will discuss as the next breakthrough. And while women do find these things attractive, they're far more important for an LTR than they are for a casual fling. For a casual fling (AKA from Tinder) emotions are king.

Learn how to spike her emotions. Don't be ashamed of your sexuality or afraid to say things that might possibly offend her. Every single great pickup artist and Casanova in the world knows that women respond to one thing, and one thing only: *how they feel.*

So learn the things to talk about with a girl that will make her feel emotions. Tease her, play with her, say things that are obnoxious, and most importantly, get her hamster wheel running. Any guy who can successfully make a girl's subconscious do the game for him is already 10 steps ahead of the curve.

Here are some easy and simple ways to spike her emotions:

- Be a little bit of an asshole (discussed in point #1)
- Learn how to pass her shit tests
- Get good at dishing out negs (not too many though, just one or two is fine)
- Learn how to tell stories that are interesting and fun

Most importantly, however, *LIVE AN INTERESTING AND FUN LIFESTYLE.* This is something that all people (not just women) are magnetically drawn to, and it's something that cannot be faked. Learn to follow your passions, have hobbies, and become an interesting

man overall.

…and then, learn how to convey these characteristics through spitting game on Tinder.

4. Looks, Money, Status

As shallow as it is, Tinder is simply a looks-based game. When she's on Tinder, she can't sense if you're an alpha male or not, because there's no body language or facial expressions to read. This will come in person.

So, until you do in fact meet her in person, you need to get the "game trifecta" down: looks, money, and status. Ideally, you should have pictures which convey all three of these things, to the point where it's a little bit obnoxious. Take a good look at Dan Bilzerian's Instagram, and you'll see what I mean.

Now obviously I'm not saying you need to be that extreme, nor that you need to be a millionaire playboy, but any little bit of LMS that you can show off helps. I personally recommend getting in great shape and posting some pictures of you at the beach, on a boat, or at a friend's lake house, perhaps.

Return of Kings has already discussed ample strategies for losing weight, building muscle, and getting an aesthetic physique that attracts women. Here are some previous posts to consider reading through:

- 3 Critical Rules to Build A Physique That Makes Women Wet
- 7 Ways I've Maintained My Testosterone Levels At The Upper 98th Percentile
- How to Safely Start The Ketogenic Diet

Once you've got an image showing off your looks, I consider having one or two that show off money and status, but not in an obnoxious way. Something of you on vacation

somewhere tropical is always nice, or perhaps a picture of you speaking at a convention, or in a suit. Anything that conveys status, looks, money, and the fact that you're an alpha male who lives a fun life will always do well.

Conclusion

Tinder has gotten me through more breakups than I can remember. So if you can't stop thinking about her, whoever she is, you need to get on Tinder, Bumble, and every other dating app there is.

Like it or not, the times are changing—and while I do recommend men use online dating to keep a consistent harem of women hanging around, I do not recommend it as the sole source of a man's sexual success.

Spend time learning to cold approach women, go on plenty of dates, expand your social circle, and study the concepts of inner game just as well as the concepts of outer game.

If you're looking for a definitive guide to game, then I suggest you take a look at Roosh's latest publication, aptly entitled: "Game." It covers everything you need to know from why game is important in this day in age, how to study the concepts of game, how to meet and attract women, and how to have effective relationships.

It's also been banned by the elites of Amazon, so you know it must be good. Check it out now, thought criminal, before Orwell's thought police come knocking on your door for the crime of having a penis.

Advice On Giving Advice To People

September 25, 2018 | by Charlie Kennedy | Link | Original Link

Giving advice to people is a challenge at times. Instead of being grateful for your advice, some people spit in your face, and call you some names. What gives?

Say that you're trying to give your mother or a friend some advice. Maybe on nutrition, or maybe financial advice. How does that go for you? If you answered, "terrible", you're on the same boat as me. Try as I might, people that would benefit the most will not take my advice on anything. They call you a know it all, but they're the ones guilty of that.

I tried to give my mom basic nutrition advice a few years ago. I told her, "Stop eating ice cream and drinking soda" as she was getting her daily dose (this was 16-year-old me, if you care). Do you know what she did? She doubled down! As in, she ate double the ice cream! What the hell? I can understand just ignoring me, but going twice as hard on something that is obviously bad for you?

Not my mom

It feels like it’s always the same when I give anyone any advice. The people that need it the most won’t listen. How do we deal with this? Let’s go over a few things that I have done that to keep my sanity (for the most part)

1. Accept that some people won’t ever listen

Don’t even try

Some people just won’t listen. And that’s fine. Just let them fall. That sound harsh, but it’s for the best. We can’t save everyone with life-saving advice.

A know-it-all tells you she majors in creative writing? Just let it happen. A close buddy won’t listen to your marriage advice? He’ll have to learn the hard way. Your energy should not be dumped into these people. Your energy can be used for many more people.

So, focus on the ones that you really care about, like family. Also, try to get people that are on the fence. Just don't worry about people that are dead set on self-destruction.

2.Don't become one of them

It's easy to write off people that won't take good advice. Why should I listen or follow anything that moron says, right? Not so fast. Even a broken clock is right twice a day. We should always remember that this "moron" might know some things that we don't know.

For instance, I had a buddy that was *terrible* with diet. Beer all day, every day. Pizza with ice cream on most nights. Despite that, he was not fat. And he got laid. A lot. He would get laid left and right. He was an animal. But I never tried any of his moves.
Why? Because he didn't take my advice on his diet.

Loading...

Me, 2015

Even though I was having the hardest time getting laid, I would not follow in his footsteps. My pride got in the way. And I missed out because of it. To this day, I regret not following his footsteps. After reading Roosh's book, "A Dead Bat in Paraguay"(still on Amazon!), I realized that what he had was special, and I may never see something like that again. Don't put your head in your ass like I did. Keep your mind open. Try to be skeptical of yourself once and a while. That "moron" might know something that you don't.

3. Write some articles, or join a forum

If you really know what you're talking about, you can tell the entire world. It's the beauty of the internet. People from all around the world will tell you if your ideas are good or valid. They may even add to your ideas or give you inspiration.

It's only right to let as many people in on the good stuff as you can. You can take it a step further and start up a YouTube channel. Share your information with whoever will listen! This really is the best time to be alive. I still take the internet for granted because of my young age. It's a shame.

So, if you only read but never contribute, what are you doing? Get out there and spread your knowledge to the world (or at least get put in your place).

Conclusion

This article is inspired by The Trial and Death of Socrates. He tried to give people the ability to think deeper. All he wanted was for everyone to be wise (or at least know that they were not wise). To be able to live as good a life as they could. To reach their max potential. And for that, he was sentenced to death.

I want to say that I am going through the same things as him. That would be an overstatement though. But there is a lot of similarities. The same mindset is still here from all those years ago: people would rather believe a lie than learn the truth. It's a shame.

I assume that a lot of guys here are close to my age (21-26). This article was geared toward them. Please let me know how old or young you guys are in the comments. And please tell me about the times you've been spit on for trying to help your fellow men or women. I would love to hear about it. See you guys next time.

5 Types Of Women Who Should Quit Acting Like They're Supermodels

September 26, 2018 | by Beau Albrecht | Link | Original Link

Charming young ladies are undeniably alluring. Even those who aren't quite top-shelf certainly can get lots of attention. Those who have good character are a treasure.

For others, unfortunately, it goes to their heads. Since my misspent youth, I've noted the absurd results. They don't realize that the stuck-up act only goes so far before the juice isn't worth the squeezing. For the following, it wouldn't hurt to drop the Princess Complex, learn some humility, or at least show human decency.

1. Bar flies

Denial is not just a river in Egypt.

We're well aware of why some chicks are frequent fliers at bars and clubs. Using hopeful guys as free drink dispensers is only part of it. The other part involves riding the Cock Carousel.

Early experiences turned me off to night game. Although I've had success in later times, still I generally give clubs a miss, focusing instead on day game and social circle game. The cigarette smoke without proper ventilation was unbearable, though fortunately that's less of a problem these days. Music is still so loud that one must scream to make oneself understood. Finally, I don't go for the "buy me a drink" trick, but I don't like paying exorbitant prices for my own beverages.

The worst part of clubbing, though, is unfriendly attitudes. There are countermeasures for cockblocking, AMOGs, and the good old Bitch Shield. Still, all that makes "partying" a pain in the ass. *Why pay a cover charge for a night of aggravation? That's irrational.* As for sex ratios, often there are considerably more guys, and it's understandable why women would take advantage of the situation. On the other hand, I don't feel like wasting my time and money trying to game chicks in a social venue who pretend they aren't in a social venue. Who do they think they are?

My message to them: You bar girls can drop the act. We know you're out to get picked up. If not, then congratulations; you're merely an alcoholic.

2. Women who've hit The Wall

It's a cruel fact of nature that time plays havoc on a woman's appearance. This can be mitigated partially by sunscreen, staying in shape, and not overdoing the partying. Still, it's a fact that a middle-aged woman can't turn heads like she could back in her nubile days. Meanwhile, guys who once were geeky teenagers start looking distinguished and increasing their personal accomplishment.

From considerable painful experience in high school (too many rich bitches) and college (too many snotty feminists), I observed that most chicks tended to act like they were God's gift to men. Those who didn't were truly wonderful, though they never stayed single for long. By age 25, some started coming back down to earth. However, even by 35, there were still a few who didn't get the memo about their declining SMV.

My message to them: You're not a stuck-up teenager anymore. You're a stuck-up adult, and that's worse. In fact, it's pretty sad.

3. Self-proclaimed sluts

Her smile actually is her most endearing feature.

Women face conflicting messages on how they should express their natural desires—be traditional and act demure, or let it all hang out? Their choices have far-reaching consequences. I don't envy them on that dilemma. I'd even sympathize with women about this, except that men not acting with Victorian propriety risk *far worse* penalties. Facts notwithstanding, if someone *even thinks* you've stepped a millimeter out of line, you might be visited by the HR department, get smeared on #MeToo, etc.

Loading…

Women "letting it all hang out" often show their class and sophistication by permanently memorializing their youthful mistakes. Some get inked up like truckers, bikers, or circus roustabouts. Worse, they might get a face full of Borg implants. Essentially they're branding themselves; hopefully they remain happy with their choices. Some even *call themselves sluts*, which in earlier times was unthinkable.

Long ago, there was an email list for self-proclaimed hussies in my area. I got to chat with the "queen bee" once. She wasn't exactly a great prize, but I was interested and willing to give her a chance. However, contrary to advertising, she wasn't exuberantly friendly and vivacious. Unfortunately, I made a game mistake. Naturally, she didn't clue me in that anything was amiss, but told one of our mutual friends about it to maximize drama and funsies. Expressing my own desires certainly was not OK!

My message to them: If you're going to call yourself a slut, then you've relinquished your "vestal virgin" card forever.

4. The less than beautiful

That attitude is even worse than the mohawk or the flab.

Some guys look like Henry Kissinger but don't have his prominence, or look like George Soros and don't have his billions. Likewise, not all ladies win the genetic lottery. It is what it is.

Do chicks undistinguished in the appearance category sensibly adjust their expectations and find someone who might look past their unremarkable exterior and appreciate their inner beauty? From what I've seen, not many do. This leads to chronic bad attitudes. Being sexually frustrated is a big part of that. However, it doesn't help to reject offers from guys who *do* give them a chance. Neither does behaving snotty around guys who might potentially see something in them.

My message to them: You're not exactly movie stars, so acting conceited makes you look silly.

5. Hookers

"Hello Sailor" gals are cute, but nobody mistakes them for royalty.

I met a hooker through an interesting social circle, and knowing her was the gateway to an even more interesting one. (Note well, I'm not recommending the criminal underground for social circle game.) I've never paid for sex, but I've tried to talk sense into some of them. Most didn't listen to sensible advice—*shocking, isn't it?*

Sometimes I'm just too darn Mormon. Admittedly, I had a savior complex back in my Blue Pill days, which I've abandoned. Surprisingly, I discovered that hookers have morals. (Yes, they're first-rate hypocrites.) It gets weirder yet.

One of them wrote me from jail, twice pointedly stating that she wanted a non-sexual relationship with me. *Actually, I'd never tried to get into this walking train wreck's panties*. Surely a wad of cash would've charmed this space cadet, if I really wanted to rent a drug addict with Daddy issues, mental problems, and a criminal record. Still, she preemptively tried to Friend Zone me, despite my decent looks, respectable career, and (surely my worst "failing") treating her like a human being.

She wasn't even some high-dollar "escort". It's axiomatic that she'd had hundreds of penises inside her for money, and many (if not most) of her "customers" were too ugly to get laid without payment and didn't exhibit gentlemanly behavior. I never wrote back, of course. I showed the letter to a former hooker, one of the few who listened to sensible advice. We had a good laugh about it. Her take was that the Duchess of York certainly had a high opinion of herself.

My message to them: Ladies of the evening, if you've traded sex for cash or drugs even once, it's time to stop pretending you're Saint Teresa of Ávila.

Get real!

Friendly ladies are a treasure. Even those who aren't available or aren't mutually compatible are still pleasant company. That's still something, just for its own sake. However, chicks who have inflated egos—or worse, act snotty—are dead to me forever.

Don't miss Beau's book catalog. Good stuff!

Men Have Foolishly Ignored The Warning In The Book Of Genesis

September 26, 2018 | by L.T. Smash | Link | Original Link

> "If civilization had been left in female hands we would still be living in grass huts." – Camille Paglia

The Book of Genesis has a warning to men and to civilizations. People typically only focus on certain phrases in the Genesis account and thus, miss the warning. God's pronouncement of judgement upon Adam and Eve actually tells us some of the problems that will beset men and women and thus, civilization. The Genesis story contains a warning for men and women, individually and nationally. The Book of Genesis established an order, God's order.

Most people are at least vaguely familiar with the account in the Garden of Eden. However, the details about the expulsion provide more information about one of the continuing events between men and women that would occur after Adam and Eve's expulsion from the garden.

Genesis chapter one gives the entire creation account. Mankind is created in chapter one and told to multiply and replenish the earth. The following chapters in Genesis provide additional critical information about mankind and the outcome of certain events. Adam was created first and no suitable mate existed for Adam to fulfill the commandment of multiplying his own kind. God created Eve, not out of the Earth as in the case of Adam, but out of Adam himself. Eve was a reflection of Adam.

The Serpent’s Lie of Equality

After Adam and Eve partook of the Tree of the Knowledge of Good and Evil at the prompting of the beguiling serpent, God came to the Garden of Eden and decreed judgement. The King James Translation is a good translation but many English speakers have a limited knowledge of the definitions of the English language and are typically too lazy to consider additional meanings. The word “desire” in the KJV text is a word that has additional meanings. The following translation from the NLT provides additional clarification.

> “Then he said to the woman, “I will sharpen the pain of your pregnancy, and in pain you will give birth. **And you will desire to control your husband, but he will rule over you**.” Genesis 3:16, NLT
>
> And to the man he said, “**Since you listened to your wife and ate from the tree whose fruit I commanded you not to eat, the ground is cursed because of you. All your life you will struggle to scratch a living from it.** It will grow thorns and thistles for you, though you will eat of its grains. By the sweat of your brow will you have food to eat until you return to the ground from which you were made. For you were made from dust, and to dust you will return.” Genesis 3:17-19, NLT

The phrase “and you will desire to control your husband” is translated as “and thy desire shall be to thy husband” in the KJV. While the word desire certainly means that a woman will long for her husband, the word “desire” also means to desire something to control it and to have power over it. The second meaning is clarified by the clause, “and he shall rule over thee”. This clause tells us something about the nature of women that people,

neglect, forget, overlook, or disbelieve. The desire of women to control men.

The Bible does not provide the conversation that took place between Adam and Eve concerning the fruit from the Tree of the Knowledge of Good and Evil. We know a conversation took place with the intention of convincing Adam to partake of the fruit. God's statement to Adam makes clear there was a conversation. "Since you listened to your wife and ate from the tree whose fruit I commanded you not to eat." Adam knew the commandment but still partook of the fruit.

Part of the lie the serpent told Eve is that she would be equal to God. Another part of the lie is that she would be happier having more power. The idea that men and women are equal is the same lies told differently. Men and women have different God-given roles. Adam was placed into the Garden to cultivate it and keep it. Eve was created after Adam was placed into the Garden. The populists would have us believe that Adam had no dominion over Eve and that they were "equals". Eve was provided to Adam so the commandment to multiply and replenish the earth could be fulfilled and to assist him.

Adam named the animals and he named Eve. Naming is an act of dominion. Adam was given dominion over the earth, the animals, and Eve. Part of Adam's error was he allowed Eve to convince him to break the natural order. Adam allowed Eve dominion over him when he allowed Eve to convince him of the lie of the serpent. Their expulsion from the Garden of Eden meant they had to work harder.

Adam and Eve as a Microcosm of Civilization

The account of Adam and Eve is also a fundamental description of the man and woman's interaction within the family and the interaction of men and women within civilization. In general terms, we should place ourselves in the position of Adam, the women in our lives in the position of Eve.

The family, man, and woman, is a microcosm of civilization. Consider the following:

- Garden of Eden = Civilization
- Adam = the majority of the men of that civilization
- Eve = the majority of the women of that civilization
- The Serpent = Advocates of progressivism, gender studies, that men and women are equal, etc.

Taking into consideration that Adam represents the majority of men in a civilization and Eve the majority of women in a civilization, the civilization fell after the men heeded the promptings of the women and subverted the natural order. The women, flattered by the enticing serpent, taught their sons and daughters that men and women were equals, encouraged the acceptance of homosexuality on par with heterosexuality, encouraged abortion, destruction of the family, and that transsexuality and cross-dressing are acceptable, and in some instances desirable.

Loading…

Since women obtained the right to vote, the family, and by extension our civilization, has

moved more in the direction of disorder and lawlessness, essentially toward destruction. Giving women the right to vote has been a disaster. Giving women the right to vote pushed matriarchy to the forefront and diminished patriarchy. Most women inevitably vote their proclivities and emotions. A woman should voice her concerns to her husband or other adult male family members.

Left to themselves women are not inclined to build. This dynamic can be seen in the television program of Dutch version of Survivor (titled Expeditie Robinson). ROK has an article from 2014 discussing what occurred with men and women in survival situations. Suffice to say, men started working together to survive and the women squabbled. Towards the end of the program, three men went to the woman's location and three women went to the men's location. The men that went to the woman's location became the women's workhorses while they continued to be lazy and worked very little. The women that went to the men's location worked little as well.

Men work with a substantial portion of the fruits of that labor going to their women and children. Ever since women have received the right to vote, they have used that voting power to persuade businesses and politicians that they should still receive the fruits of all men's labors. Since the rise of feminism and the subsequent confiscation of the fruits of men's labors, men are now producing less.

"We used to be a patriarchy, but lately we've become more goddess-centric."

The Upside-Down Order

Voting comes with responsibility, which many women have not been able to handle since feminism has prevented and encouraged a childish and responsibility avoidance mentality. There was a reason earlier civilizations did not give women the right to vote. Voting, and thus government were seen as the realm of men because men are the primary builders of civilization and because of the responsibility that comes with voting rights. Women were to receive support from their husbands, fathers, or other male family

members.

Feminists would have everyone believe that women have always been oppressed and are still being oppressed while this is not the case, wherever women obtained political power civilization fell. Feminism does not discuss or teach the sharing of power but how women need more power and do not have enough power. This desire for political power is the desire to control men. This is why everything is "sexist" in feminist eyes. There are plenty of articles on the Internet about how feminism is not about equality but about power.

A blogger wrote an article about the rise of feminism in Ancient Rome and Rome's subsequent demise. The blogger also mentions Ancient Babylon and some of the Babylonian laws. The Bible, in the Book of Isaiah, states:

> "Childish leaders [adult children] oppress my people, and women rule over them. O my people, your leaders mislead you; they send you down the wrong road."
> Isaiah 3:12, NLT.

Roosh recently proved an excerpt on ROK from his book, Game. The excerpt is titled, Never Follow A Girl's Lead. Adam let Eve lead and look what happened. A woman that tells you to be less of a man and less masculine desires power over you. She is trying to control you. Men want to be respected, women want to be loved, but neither is possible with the lies of equality in the picture. Women will be happier when they stop seeking control over men.

We all know when women obtained the vote feminists began moving in the direction of replacing men with another authority, government. Feminists also began pushing for more women in government and other positions of authority. Men, being ostracized and deceived, began letting more and more women lead. This makes men weak.

The more a woman seeks to control the men around her, the more unhappy she becomes. Feminism deceives a woman into believing that having power will make her happy and if she is not happy it is because she does not have enough power. These are lies. This is why the more power a woman attains the more unhappy she becomes, even if she will not admit her own unhappiness. Hillary Clinton is one example of a woman that desires control. An honest person can see that Hillary is clearly unhappy and she believes the solution to her unhappiness is more power, which is not the case.

There are women that realize there are important differences between men and women, and these women are responsible caring wives and mothers. These mature women realize that feminism harms everyone and creates unhappiness and lawlessness.

We are witnessing the demise of our civilization at the hands of weak men and women that desire to control men. Women will be happier when they stop trying to control the men and return to God's established order. God did not make Eve equal to Adam. Eve was not Adam's slave; she was a helper to him. She was to assist him in his assigned tasks.

Woman, instead of seeking to snatch control from the man, must do what she was created to do and assist the man. Men must lead, which requires responsibility and

masculine strength. A man truly shows he cares for the women and children in his life by leading instead of abdicating his role designated to him by God.

4 Weird Signs That You Have High Testosterone

September 27, 2018 | by Mo Saleem | Link | Original Link

Bigger muscles, fat-loss, and a heightened sex drive are probably the first things that come to mind when you think of testosterone. But did you know that your testosterone also determines your mental health? Or that it determines your risk tolerance and how you show up against competition? That's right.

In this article, I'll discuss 4 little-known benefits of having optimal testosterone levels. See which ones affect you and which ones don't.

Sign #1 – Sharp memory

In this study, men with higher levels of testosterone scored significantly better on tests of visual and spatial memory. These results were mirrored in another study where researchers randomized 37 subjects to receive either a weekly dose of testosterone or placebo for 4-weeks. After 4-weeks, the men receiving testosterone treatments scored significantly better on tests of verbal fluency.

How does testosterone impact brain health?

Well, preclinical observations assert that testosterone protects brain cells against damage and decay. This is why brain fog, memory loss, and difficulty concentrating are some common symptoms of having sub-optimal testosterone. This is also why men with lower levels of T have an increased incidence of Alzheimer's disease.

To ensure that your brain maintains optimal health and function into old age, it's important that you start taking the steps right now to achieve and maintain optimal testosterone levels for years to come.

Sign #2 – Positive outlook

Have those Monday blues turned into an everyday thing? If so, chances are that sub-optimal testosterone levels are a contributing cause. In this meta-analysis spanning over 16 scientific studies and more than 900 subjects, researchers came to the conclusion that testosterone exerts a significant positive impact on mood.

On the flip-side, low levels of testosterone have been found to be a major contributor to depression. And when depressed men are given testosterone treatments, they report significant improvements in mood.

All-in-all, your testosterone has a significant impact on your mood. If you feel like you've lost your zest for life, it's important that you get your testosterone level measured to figure out your room for improvement moving forward.

Sign #3 – Increased risk tolerance

In this study, researchers brought in 154 subjects (78 men, 76 women) and had them

engage in a gambling task. Blood samples were collected before the experiment. Across the board, both the men and women with higher levels of testosterone engaged in a greater amount of risk.

Loading…

In this study on MBA students, the ones with the highest levels of testosterone chose the riskiest careers. And finally, in this study on financial traders it was revealed that a traders early morning level of testosterone accurately predicted his profits for the day. High risk equals high reward, and the traders willing to engage in the highest amount of risk also set themselves up for the greatest amount of profit.

Now, of course taking risks comes with a potential downside – that's what makes it a risk – but without risk there is no growth. Taking risks is what's allowed mankind to conquer the world, build nations, and even land on the moon. No great feat was ever accomplished without some element of risk being involved. What risk are you procrastinating on that has the possibility of taking your life to the next level?

Sign #4 – Competitive drive

In this study, men were brought in to compete in a rigged 1-on-1 competition. Blood samples were collected before and after each loss. Results revealed that the men who experienced a spike in testosterone after the loss were more likely to choose to compete again compared to the men who experienced a drop in testosterone.

In a study on university tennis players, it was revealed that the players with the highest pre-match testosterone levels reported the most significant positive effects on mood. Also, the post-match T-levels rose higher for the match winners compared to the match losers. Furthermore, the rise in T induced the winners to be even more focused and motivated for the next round of competition.

In biology, this is referred to as the winner-effect and it was first demonstrated in mice. Right off the bat, a smaller and weaker mouse is unable to overcome a larger and more dominant opponent. But, when a smaller mouse is allowed to win against a drugged mouse of similar size, his chances of overcoming the larger and more dominant mouse in the next round of competition increase – despite no improvement in fighting ability. The reason? Winning the first round of competition causes the mouse to experience a spike in testosterone, which increases his focus and drive for the next round.

The winner-effect occurs in humans as well. Overcoming obstacles and setting personal records induces a testosterone increase which, in turn, makes us more focused and motivated in the next round of competition.

Testosterone is the fuel to your competitive drive and the winner effect is a feedback loop that feeds into this drive to make you more aggressive and dominant in each subsequent encounter.

The winner-effect could, however, easily go the other way. Each winning encounter could spike your testosterone levels to the point where your estimation of your abilities become exaggerated and impair your decision making. This is why media commentators have mentioned the winner-effect as a possible cause of the 2008 financial crisis.

Conclusion

Yes, testosterone determines your ability to gain muscle, lose fat, and express your sexuality but its true impact extends far beyond just these three areas. Your mental health, your outlook on life, your tolerance for risk, and your ability to show up against competition are all factors impacted by the amount of testosterone running through your veins. Maintain optimal testosterone levels and you'll maintain your health, well-being, and virility well into old age.

If You Hate the Patriarchy, Give Us Back Our Electricity

September 27, 2018 | by Peter Blackmire | Link | Original Link

“Down with the Patriarchy!” shouts a blue-haired, non-binary, non-gender conforming thing at the top of its shrill lungs. Has the world gone mad? Has the apocalypse finally come? What is going on here? Is there a virus in the water? No, it’s just Tuesday at a University in America. And the blue-haired, shrieking thing happens to be your professor. Have fun at school fellas!

Traditional Gender Roles

In traditional society, women's role was to maintain the household, raise the children, and care for her husband. The men ventured outside of the household to hunt, make war, build and gather resources.

In primitive society, where the physicality of existence had not yet been supplanted by technology, there was no way around these rules. Women spent their days cooking, cleaning and caring, sometimes until their knuckles bled. Men tilled the fields or chopped down trees or stalked animals and opposing warriors from dusk till dawn. Sometimes they didn't make it home.

Men could not (and still can not) give birth and breast feed. Women could not (generally speaking) throw spears as far and as fast as men. So there wasn't much room for negotiating gender roles. The roles were appointed by nature.

By the way, while 'women's work' is often denigrated today, especially by the blue-haired feminist things, it is no walk in the park. Anyone who has ever struggled to knead dough, wash clothes by hand, or impose a semblance of order on an unruly gathering of children, is aware that doing so is time-consuming and exhausting labor.

Men’s Technological Inventions Empower Women

With the advent of technology (all of it invented, improved and maintained by the dreaded patriarchy), work has largely evolved into pushing paper, dialing the phone, reading, writing and communicating. Women recognized that with the physical barriers to ‘bread-winning’ having been largely cast aside, they could potentially do these sorts of jobs just as well as the men.

They lobbied their husbands and other powerful men to let them enter the workplace and compete for jobs alongside the men. And men, being reasonable, gracious and accommodating towards the ladies supported their ambitions.

Most reasonable, modern men support a woman’s right to venture outside of the household, earn a living, and gain her independence. (Some men in non-Western countries remain less supportive – i.e. still prone to the occasional public stoning.)

Women Don’t Behave Like Men

What we didn’t count on, however, was that women would bring their tone policing and behavior modification projects – hard wired into them over centuries of domesticating children – into the workplace and focus them on grown ass men. Nobody asked for that!

We also didn’t recognize how women compete for social dominance so differently from men. Probably because we were too busy earning a living and having fun by telling jokes amongst each other without being reported to HR.

Backstabbing, gossip, rumor mongering, slander… that’s how ladies compete with one another. Complimentary to the face and cunning behind the back. And now the men, rubbing their heads in agony, slowly coming to their senses, are realizing the drastic mistake they made in accommodating the demands of the perpetually unsatisfied

feminist agenda.

College, once a haven for free thought, challenging ideas, and ritualistic debauchery, has devolved into a paranoid, politically correct surveillance zone where anyone who dares not conform to the feminist lunacy risks total ruin.

The workplace, once a place where men could work, speak frankly, curse, smoke and drink is now a drab detention center monitored 24/7 by commie, men-hating feminists in HR. Make an ‘off-color’ joke and you get to choose between putting your balls in a cinch while watching re-educational videos or being fired outright.

Bitch, please!

This is your boss

For those interested in the difference between men and women in social competition, I came across an interesting theory in the MGTOW discussion boards before the sensible folks at Reddit decided to ban the forum. We can’t have men speaking to one another without female supervision can we?

The theory was something along the lines of: men learned to be cohesive and loyal to one another in the early days since their gripes were with neighboring tribes. They had to stick together and overlook each other’s faults in order to unify into a cohesive fighting force. The outliers might be killed off in competition by the enemy tribes.

Women, however, determined their social hierarchy amongst themselves back at the homestead. So they developed the skills of infighting, cunning and sabotage since outright hostility within the tribe was not allowed. These are the skills they currently employ against men in all walks of life, walking away with ludicrous divorce and sexual harassment settlements without having done any of the ‘heavy lifting’. These are very advanced social skills that few men naturally possess.

They think we're idiots for communicating in simple and direct and non-duplicitous terms. That's why every television commercial portrays men as stumbling dullards who struggle to plug in a toaster. Because we struggle in a woman's world.

And be honest, it's no fun and nobody likes the world they're making. That includes most women.

Truth is Sexist

So here's my solution. Men, first we should recognize that we are handicapped by a couple things. One is thirst. We can't bring ourselves to tell the ugly truth to pretty woman (or even skanks) that we want to sleep with. In one way or another, to varying degrees, we want to sleep with nearly every female that crosses our path.

Loading…
In a nicer light, many of us are prone to chivalrous behavior. Men are built to protect and cherish the weaker sex. So we support them in their ambitions to challenge and denigrate us. And we let them get away with it.

But it's come time to tell the truth brothers. Here it is. Every technological advancement has come at the hands of men, and sorry my third world brothers from other mothers, but it has been mostly Western men.

I could detail all the inventors who brought us the various machines that have freed us from the daily physical toil that bound our ancestors to their natural gender roles. But instead let's zoom out and focus on the big ones.

Electricity

Electricity is a natural force at work in our bodies and nature. But it was European men (the patriarchy) who discovered and refined this force until it could be controlled and transported in batteries and wires. And it was men who built the transformers, transported them, dug the foundations and laid the electrical wires across the planet.

They used science (another evil invention by the patriarchy) logic and reason (things the blue-haired, woke celluloids severely lack) to bequeath all of humanity with this incredible gift.

The next time some fool complains about cultural appropriation tell her that in complete fairness, only white men are entitled to use electricity then. Keep your tamales and we'll keep electricity. Seems fair.

Oh by the way, electricity covers nearly all modern technological inventions. So there's no need to discuss computers, microwaves, or hairdryers since they all rely on electricity. But I'll mention a few of them anyway.

Transportation

A man probably invented the wheel, because he wanted to impress a women, or sleep with more of them across a wider territory, but who knows maybe it was a non-binary, blue-haired thing with a front hole in its groin region. But we do know that men invented planes, trains, and the automobile.

Here's a quick review – Wilbur and Orville Wright invented the first successful airplane in North Carolina. Richard Trevithick – aka Dick Thick – invented the first steam locomotive. The question of who invented the first automobile revolves around who invented the engine. One thing is settled, the inventors were all European men. Nicholas Joseph Cugnot invented the first steam-powered car in the 1700's for the all-male French military (who invented France).

Internal Combustion Engine

The internal combustion engine gave us the modern automobile and modern transportation. George Brayton, an American male, was the inventor. Go U-S-A! (Side note: it was men who built all the highways and bridges that span America. Thanks guys!)

The previously unpublished version of the iconic photograph.

Computers

The evil white male Charles Babbage invented the modern computer in the 1800’s. The computer has been refined and improved by many hardworking men over several

generations. In the 1970's Ed Robert's invented the concept of a personal computer. We've all heard of Bill Gates.

The Internet

Everybody knows that Al Gore invented the internet. If I wanted to be even more of a dick I could list almost every modern technological invention or innovation and point out how it was created by man. Maybe I'll do that in the future.

Let's Hear it For the Boys

The Patriarchy gets a lot of pushback for the occasional subjugation and genocide but overall it has bestowed enormous gifts upon the world. Men don't ask for a thank you, but the idea that they should bend over backwards in a perpetual apology stance is ludicrous.

Every person utilizes the inventions of men to improve their lives throughout their entire day. Wake up, turn on the lights (*see electricity*), use modern plumbing (thanks guys!) use transportation to get to work (thanks again 0atriarchs) and etc. etc. so on and so forth.

Shout Out to the Ladies

Personally I love women. Besides giving us life and sustaining us in our early years women contribute immensely to life and culture. They often make great professionals alongside men in the workplace. And women's contributions to broader society are notable. Of course, we'd all be rough brutes and life wouldn't be worth living without the refining presence of women.

One More Time for the Fellas

But please recognize that men created the technological advances of the modern world. And the modern world, along with Western men's generous largesse towards women enabled the rise of feminism. Here's my advice to the unhinged, ultra-left feminists

destroying today's campuses and workplaces with their hostile antics.

If you really hate the patriarchy then stop your hypocritical and entitled use of men's great improvements to our material existence. They are gifts bestowed upon us all by Western men through centuries of innovation. These incredible patriarchs labored, experimented, struggled, and created a better world for us. Most of them died anonymously.

They did it all so that one day you could take a selfie and post it to Instagram (invented by a man) inside an air-conditioned, well lit, dry and comfortable dwelling (built by a man).

If you really are so confused and ignorant as to go around proclaiming your incessant hatred of the patriarchy (men) then have a bit of integrity and go carpet munch each other into extinction. But be sure to do it in the cold and dark while being attacked by wild animals. Maybe then you'll realize how much you benefit from the patriarchy every single day. And the world will slowly regain its sanity.

4 Reasons Your Relationships Fail

September 28, 2018 | by Jared Trueheart | Link | Original Link

---

Back when I was playing the game hard, a buddy of mine told me that guys with girlfriends get the most sex. It took a few weeks for me to understood what he meant but eventually, I got it. Even if you're a stud banging women left and right you're still putting in a great deal of effort to meet and seduce new women just for a few moments of pleasure. You might even really dislike these women but choose to tolerate them just so you can orgasm.

Men in healthy relationships get sex pretty much whenever they want. The seduction is unnecessary most of the time. Even better, when you spend time with your girlfriend/spouse, you presumably enjoy their company. Who wouldn't want that?

The problem is that many men can't make their relationships work. The relationship becomes a source of stress more than pleasure or fulfillment. Here are four ways men cause their own relationships to fail. Don't think these failures occur at the divorce stage. Rather, they primarily occur early on, when you are just dating your girlfriend to be something more serious. These failures can occur in marriage as well.

1. You Don't Make Your Girlfriend Invest

I once knew a very wealthy guy who would tell me about his ex-wife. While they were still married they saw a marriage counselor. The counselor told him that she needs to invest in the relationship and household more. So, they agreed that she would pay certain bills and he would pay others. But the wife let her bills go overdue. To avoid the overdue fees, he just paid all the bills. Not long after the counseling, they got divorced.

He told me later that he should've just let her pay the overdue fees as well. Hindsight is always 20/20.

Easy come easy go is a phrase that applies here. If you are doing everything in the relationship, your girlfriend can very easily decide to leave when there is an argument or

even a minor problem. She has to invest in the relationship to care enough to make it work. If you and she decide to live together (what they used to call a trial marriage), is she going to contribute around the house? Is she going to cook and clean? Or is she going to work and contribute to the bills? For her to care about the health of the relationship she has to contribute something to it.

2. You Don’t Enforce Your Boundaries Early

You expect your girlfriend to invest but she doesn’t do it. Too many men decide not to bring it up. Their laissez-faire, live-and-let-live attitude gets them through days of hedonism, but that attitude doesn’t work in a relationship. Eventually, the mercury will burst through the thermometer and you’ll get angry that she isn’t investing. It’s too late by then. You set a precedent by not enforcing your boundaries early on. Now it’s you who are changing the norm instead of her never conforming to the norm.

You don’t like when your girlfriend gets loads of male attention through social media? Tell her to delete her Instagram and Twitter accounts. She doesn’t have to, it’s a free country (presumably), but she also doesn’t have to be with you. If she does it, your relationship has potential. If she doesn’t tell her to kick rocks so you can find a girl who doesn’t need attention from other men.

Loading...

Do you want kids and want your wife to stay at home to raise the kids? Set that expectation early. After the marriage isn’t the right time. You need to know early if she’s going to get with your program or if she wants to do her own. If she wants to do her own that’s fine. She can do it elsewhere. But for her to get with your program you have to communicate that early.

3. You Get Complacent

You've seen it with married guys. They get married and suddenly the beer belly starts growing. "Date night" with the wife gets replaced with "having a few a few beers after work" with the guys. These men take for granted that their wives will always be there. That their wives will always be loyal.

The same concept applies to men with girlfriends. If you want your girlfriend to stay with you because you get something out of the relationship and you want her to stay loyal you'll have to put some work into the relationship. Everybody likes to be appreciated. You'll have to show your girlfriend you appreciate her by romancing her every so often. Most men don't really want to do that but it's better than trying to meet some bar slut and bring her back to your place. At least with your girlfriend, you can someone happy that makes you happy at other times.

Everything is a balance of course. Men need time to hang out with their friends as well. But when men start taking their woman's loyalty for granted is when they lose that loyalty.

4. You're Not Attractive To Her

You want your girlfriend to invest in the relationship? She'll have to be very attracted to you. You want her to accept your boundaries and get with your program? She'll have to be very attracted to you. Not being complacent is equivalent to staying very attractive to her. Physically, when men let themselves go, the attraction is lost. Emotionally, when men stop romancing their girlfriends, the attraction is lost.

Without great attraction, women have only a weak emotional connection to the future of the relationship. It's easy for them to pack their bags and leave. Even the hassle of divorce isn't much incentive to stay in a relationship either.

Her attraction to you will spur her acceptance of your leadership. If you avoid these failures as leader of the relationship, you may just be able to enjoy the relationship as long as you want.

For more about the roles of men and women in the media, literature, history, and our modern culture check out Legends of Men.

The Devolution Of The West Can Be Seen Through Popular Sports

September 28, 2018 | by Rik Storey | Link | Original Link

I am not interested in football, neither the American distortion of rugby nor soccer. Unsurprisingly, this can leave one ostracised from many conversations in the workplace and other modern, bourgeois scenarios. Is it because these sports are just too masculine and rough? On the contrary, it is because they are too feminine!

Things only get worse when I explain that I enjoy more masculine, dangerous (not necessarily violent) sports. The very worst reaction comes when I declare it feminine to not be engaged in such sports personally. After a brief, heated discussion, I am usually on the receiving end of the same, silent, frustrated scramble for a good answer. You can forget about mentioning my thoughts on porn – it is hardly alpha male behaviour to masturbate whilst watching another, better-endowed man plough nubile nymphs. This is no digression, mind you; there is something more masculine to being involved in the action, whether conquering foes or fair maidens.

But, can I really prove it?

After all, I might dislike football because I am not particularly good at it and, conversely, like wrestling because I was. Perhaps I had the bias and the others were right – aside from all the padding and effeminate diving about with feigned injuries, perhaps watching a match of some bourgeois, team sport was just as masculine as becoming the Ultimate Fighting Champion.

What are the fundamental differences between the aristocratic sports of old, which focus much more on the individual man, and the spectator sports of today, which focus more on some team, seemingly devised to maximise profitability from said spectators?

Where the traditional aristocrat sought, for example, the adventure of mountaineering, the bien pensants bourgeoisie thinks, 'Why on earth would you be so reckless? You could get hurt!' The same attitudes apply to the traditional aristocratic sports, such as boxing, wrestling, historical fencing, horse racing and jousting.

Notice how these sports focus on the individuals, often dueling one against the other. A certain sense of transcendence is required to engage in such daring activities, elevating the noble above mere practical concerns in their struggle for glory – immortal fame, as it were. Once you conquer the mountain, conquer your foe and, in so doing, conquer your fear, you have in a certain sense conquered yourself; winner or loser, the shaking of peers' hands afterwards is, yes, out of Christian charity, but also a showing of respect for those on the same noble quest.

So, what changed?

Acclaimed historian, Jacques Barzun's book, *From Dawn to Decadence: 500 Years of Western Cultural Life*, describes the uneasy relationship between the old, knightly order and the newly developing, modern state, headed by an increasingly dominant bourgeoisie, merchant class. On the subject of duels, he wrote that the 'desire for self-vindication is deeply ingrained in western man.'

Up to the early modern and revolutionary periods, this 'was called "the point of honor." Its moral force derived from medieval chivalry, which regarded the knight as the champion of all that is noble and fair and as an independent judge in his own cause. No monarch wanted his subjects to lose all of these qualities, and the ethos persisted.' Time

has since eroded any such regard for masculine virtue, however.

Barzun uses the example of the bourgeois, French monarch, Louis XIV, who led the transition not only from kingship to monarch but also from the quest for honour to quests for honours: ‘titles, decorations, favors slight in themselves but of infinite value, such as being spoken to by the king before anyone else among a cluster of courtiers.

Loading...

As for the love of titles and decorations, it has become the rage in the democracies—prizes for everything and everyone.’ Thus, a mere glance at the transition from the medieval to the modern period can give us a clear picture of how far removed the modern, Western man is from his self-vindicating ancestors; whereas the modern bourgeoisie relies on the ubiquitous state to act as middle-man and safety net for all social interactions, and has no communal or cultural authority in his life except for the state, this is a far cry from the chivalry of old.

The Ten Commandments of Chivalry

1. Thou shalt believe all that the Church teaches and thou shalt observe all its directions.
2. Thou shalt defend the Church.
3. Thou shalt respect all weaknesses, and shalt constitute thyself the defender of them.
4. Thou shalt love the country in which thou wast born.
5. Thou shalt not recoil before thine enemy.
6. Thou shalt make war against the infidel without cessation and without mercy.
7. Thou shalt perform scrupulously thy feudal duties, if they be not contrary to the laws of God.
8. Thou shalt never lie, and shalt remain faithful to thy pledged word.
9. Thou shalt be generous, and give largesse to everyone.
10. Thou shalt be everywhere and always the champion of the Right and the Good against Injustice and Evil.

It is the generally irresponsible attitude of the modernist, bourgeois mind that I take exception to. For over five hundred years now, Western man has been palming off responsibilities to some far off group, purporting to be the Leviathan state, all in exchange for comforts. Of course, we are increasingly comfortable and entertained. I can't complain, but we are also increasingly detached from reality, hardship and the consequent gumption to fight for what is ours, let alone to fight for what is right, good and true.

So, when I see grown men talking with the depth of a philosopher on the eve of battle about what is effectively a game for juveniles, and one in which they shall not participate and indeed will be played by overpaid foreigners, not even kinsmen of their beloved region, I dare not laugh, as these are the death throes of my civilisation.

I cannot help but agree with reactionaries of the 20th century in this regard, but this is no idle or defunct theory and I am in good company – the work of Prof. Walter J. Ong on the subject of masculinity confirmed these intuitions from the data regarding male development and competition:

> 'Historically, the agonistic, masculinising era has given way to one of greater femininity. In a sense, the male television sports watcher…[described elsewhere as] slumped alone with his can of beer before the screen under the glare of his justifiably outraged sports widow…is a product of a highly feminized culture: no earlier oral-agonistic age could have produced this abstract half-disinvolvement with the agōnia in the arena.'

I would recommend his excellent work, *Fighting for Life: Contest, Sexuality and Consciousness*, but more than this, I would recommend we all revolt against the modern world by striving against such disinvolvement, by becoming more engaged in our

communities and also in sports which really test our personal mettle. I realise this will be hard for some of us to come to terms with, but, as the proverb says,

> Proverbs 27:17 Iron sharpeneth iron, so a man sharpeneth the countenance of his friend.

Comfort Will Not Give You Meaning In Life

September 28, 2018 | by Roosh Valizadeh | Link | Original Link

The following article was originally published on Roosh V.

Many people plan their lives around the pursuit of comfort. Whether it comes to work, relationships, or day-to-day living, all decisions are made with the goal to increase comfort while decreasing discomfort. The problem with this approach is that comfort does not provide you with meaning. You can have all the comfort in the world but still feel bored, unhappy, or depressed.

In 2006, I was in a state of extreme comfort. I shared a big house with two other people, had a stable career that wasn't particularly demanding, owned a car and motorcycle, and was able to take exciting vacations abroad. I had no urgent concerns besides securing my next instance of sex from weekends jaunts into the city. I achieved pretty close to the modern ideal of comfort, and yet I saw little value in it. Would comfort inspire me? Would it make me a man? Would it give me even the tiniest scrap of life meaning? Within two years, I got rid of most of my possessions and went to South America, the beginning of an ongoing tale of nomadism.

Hostel in Barcelona, Spain (2006)

Today, I find myself again in a state of extreme comfort. I live in a cozy apartment in the center of an Eastern European city, earn a basic but livable income from book royalties, and receive a mostly stable supply of sex. I experience little anxiety or genuine difficulty from my living situation. Was the point of my decade abroad merely to reproduce the comfort I had before I left? How was the same flavor of comfort able to find me again? Am I destined to grow old without ever having real concern for my survival or material existence?

Is it not degenerate to seek comfort, of desiring to sit and relax while expending the least amount of calories possible, where your muscles physically degenerate, and where you have to artificially simulate a non-comfortable life by lifting weights in a corporate gym? The drive to comfort may simply be a relic of our childhood, where we rushed to our mother's bosom to isolate ourselves from a world that exposed our weaknesses and vulnerabilities. Comfort is a need for mother and the safety she provided us for the bulk of our lives, of running back to the first safe space we have ever known.

Loading…

Margarita Island, Venezuela (2005)

The first time around, I made comfort a goal, but the second time I did not. When your ability to earn a livable wage surpasses a certain threshold, from being born in the resource-rich West or having a competent IQ, comfort will be a part of your life whether you like it or not, and any attempt to fight it will just reinforce how comfortable you really are. We live in a time where food and resources have never been more plentiful for the average man, so we will not face the survival difficulty of our ancestors no matter how hard we try. We are the house cat that can return home whenever things got too cold or dangerous outside.

Right now I'm faced with a decision of remaining in my comfortable Eastern European environment, where I no longer have to work hard to enjoy its rewards, or go somewhere different, challenging, and slightly more uncomfortable. In the past, I would pick the challenging environment to satisfy an ego that was desperate to prove it can overcome hurdles through hard work and intellect, but I no longer have anything to prove. All that's left is asking if I want to grow old in a fashion so stable that most of the lessons I've learned in life will never be called upon for my survival, or if I want to venture out into the unknown and live a *slightly* more raw and spontaneous existence.

Hvar Island, Croatia (2016)

Either way, I know that if I deny comfort today, it will find me soon enough. Stepping foot in another new country will be like going to Corporate Gym—I'll get an intense but short workout before walking back out to sit and eat and relax and consume limitless entertainment. My ability to earn a modern wage means that comfort will always be waiting for me. When the world outside shows me its teeth, I know that mommy earth is always ready to take me into her arms and make things comfortable again.

2 Signs To Identify A Liberal In Disguise

September 30, 2018 | by Edgar Tru | Link | Original Link

What is a liberal? What is a conservative? Many will have different words to describe these terms, and often conflating them with Democrat or Republican.

A conservative does not have to be part of the Republican Party. A conservative does not have to be a wardog. A conservative could be a socialist on a nationalist level. Many have this mainstream idea about what a liberal and conservative are. And many in the political arena fly under the conservative banner when, in reality, they are an adversary to the very foundation of conservatism. Perhaps not today, or next year. But sooner or later, their adherence to liberalism will craft a political and cultural snowball effect which shall be the death of their set society.

So, how does one identify a liberal in disguise, or in denial?

1. They Support Women's Rights

I hold to the claim that allowing females to vote was a rotten call of judgement by men. And, to this day, there are ‘conservatives’ who support this decision. Personally, I find it anti-conservative and pro-liberal to allow women a vote. That doesn’t equate to hating them but rather recognizing they lack logic which, by their very nature, means they cannot vote in accordance with law and order, safety and security. It isn’t complex; unless, of course, you’re a female in which you may not possess the intellect to grasp the overall societal implications of such a manner.

Women like Ann Coulter or Faith Goldy are rare. A beautiful rarity, I might add. In truth, I’d vote for Faith Goldy for mayor of Toronto. I do not dwell there, but I’d support a female who is anti-immigration and pro-borders. I’d vote for Ann Coulter as US President. They both have more backbone than any contemporary limp-wrist Western man. But, again, they are rarities.

Conservatism has a foundation. It does not stray from tradition. In the Ancient World, men dominated and women submitted, or were put in their place if they were too disobedient. Any man, or woman, who supports women’s right to vote, in terms of political power, is liberal-minded. Beware of those prancing around right-winged circles who still hold to this delusional libertarian-esque mentality. They are not conservative in their hearts of hearts.

2. They Support Libertarianism

I'd be fine living in a libertarian society. How cool would that be? I get to live as I please and, as long as I don't harm another, I am free to be myself. What a glamorous fantasy!

It *is* a fantasy. That's not how the real world operates. If it did, I'd subscribe to that ideology. But human nature shall never allow it. In conveying that, it strikes me liberal as hell the one who dares advocate for such a society. They are not only defying human nature, but they are straying from conservatism by giving far too much freedom, on such an irresponsible level, to the citizens of that set society. Libertarianism, along with communism and anarchy, are all ludicrous because they stand on one similar basis: human beings can get along and play nicely.

Loading...

Less government is, in my view, not the solution. I do not like it, but my observations direct me this way, in accordance with maintaining law and order. Some claim the solution to the system is… no system? Sorry but that's childish, stupid and fucking foolish. It's an immature, irrational worldview based on lunacy.

Imagine this: we're all standing around and, just to our left, is an open door. Inside are the controls of all of society. The libertarian says we are all going to behave and no one is to enter that door because 'freedom' and 'liberty' are totally in fashion. Well, human nature will give way and, before the libertarian can finish their line of piffle, someone has already run inside that door, locked it, and is now boss.

Libertarians aren't really that intelligent.

Beware: Dave Rubin Is A Progressive In Infancy

I personally do not have any qualms with Dave Rubin. He is one of the reasons I've found my way to conservatism. He began talking to a variety of different guests which, over time, led me to one character, then another until it networked toward the alternative right (or dissident right), etc. I could most likely get along just fine with the man. But he is liberal. And he is a progressive in infancy.

His ideas, if actually obtained on a societal level, would be fine. Live and let live. It's a fantasy but, if manifested in reality, would be fine. The conundrum is human nature, along with the political and cultural snowball effect of liberalism and its ideals and political decisions made within a society. After women were allowed to vote, it led, many years later, to females on the frontlines of war weakening what is supposed to be the self-defense tool of a nation. After gay marriage, it shortly thereafter became bigoted to be against children transitioning into the opposite sex. There are political and cultural snowball effects to every decision if it strays from orthodoxy.

So, anyone prancing around as a conservative, and believes women should have the same opportunities as a man, are liberal. And, by extension, a progressive in infancy. They may themselves not turn progressive, but their adherences will trickle down to the latter generations allowing a gateway toward leftism.

People, such as Dave Rubin, are gateways into leftism. Not today, or even next year. But, in time, it will lead toward that direction.

Conclusion

We must have comrades if one desires survival over death. Not everyone who is liberal (in disguise or denial) is your adversary. Not for now, at least. But be aware of their worldview and adherences because, again, there is a very serious thing to understanding human nature and the political and cultural snowball effects of the liberal mindset.

It is not wise to constantly bicker at those who will, if civil unrest breaks out, ultimately

land on your side. But, again, understanding the giveaways of the liberal mindset may very well be important in identifying a little problem in the many years to come.

How To Conquer Writer’s Block

September 30, 2018 | by Beau Albrecht | Link | Original Link

If you’ve stared at a blank document and the words weren’t flowing, you’re not alone. Mark Twain sometimes had that experience in front of a typewriter, and Geoffrey Chaucer with an empty parchment and a quill pen. So then, what do you do if you’re blocked while up against a deadline, trying to get that business presentation done, finish the doctoral dissertation about vegetable symbolism in *Hamlet*, or complete your *Jezebel* article about how chewing gum contributes to toxic masculinity?

The creative process

It’s important to understand a writing project’s phases:

- Planning
- Writing
- Editing

Planning is where you develop a general outline. This may be the essentials of a plot, or the points you're trying to make in a monograph. This phase also includes research. If it's a story, you might also detail the characters, to sketch out their personality and history enough that they'll come to life. It doesn't need to be too extensive, though ideally, you'll have enough information about them that you can imagine a conversation with them or know how they'd react to any given situation.

Editing is pretty self-explanatory. This involves checking the spelling and grammar; no word processor will catch every mistake. Also, that's where you sharpen up the style, and fix any problems in logic and consistency. Editing is vital to perfecting the quality, but make it whatever you're doing when you're not in writing mode.

Writing is the most important part. *This is what produces all those words.* When a project starts, you have nothing written down, and this is where many people get blocked. Although planning is the first on the list, most likely you already have at least a basic idea of where you're going with it. Also, it's sometimes difficult to get into writing mode, which is another reason to prioritize it.

Creative flow

Fortunately it's not this tricky, usually!

Most writing happens during creative flow. It's not exactly a trance, but it's somewhat a different state of consciousness. This takes place in any artistic endeavor. If you're out on the town and vibing effortlessly, that's essentially similar. Being blocked in that scenario is the all-too-common experience of wanting to be social or chat up someone but having no idea what to say. Creative flow is necessary even when writing software.

If you've got the inspiration fully in gear, then you're putting ideas down as fast as you

can type. I've had the experience where stories basically write themselves. Not being able to enter creative flow causes the dreaded writer's block. Until your first draft is done, or nearly so, then always try to catch the inspiration where ideas coalesce into words almost magically.

What planning and editing have in common is that they're fairly analytical and detail-oriented. Thus, for the most part, the left hemisphere of the brain is engaged. On the other hand, the writing phase is mainly a right-brained activity. That's where the artistic functions of the mind happen. So this is a very different process from planning and especially editing.

Note well, it's pretty hard to get both hemispheres of the brain fully engaged at the same time, unless you're good enough at meditation to levitate or whatevs.

Loading...

Get in the right mindset

You can stare at this trippendicular fractal until inspiration arrives.

You must shift gears mentally, so to speak, to enter creative flow for the writing phase. Again, this is what gets your first draft finished, so catch the inspiration whenever possible. This is the trickiest part. This doesn't just happen on command, any more than you go to sleep at will.

The right mood music may help, something suitable for the task. (With my latest novel, listening to Espirpe Imperial, Division 250, and Celtica really put me in the right state of mind.) If the lyrics get distracting, find something instrumental or in a language you don't understand well. The ancients invoked the Muses to get into the spirit of things; do that if it works for you.

When you're in creative flow, it's easy to get distracted. Set aside some time when you won't be disturbed. Grab some munchies and your favorite beverage, so you won't have to get up for it. Set aside extraneous worries or other thoughts, and focus on the project at hand. If necessary, tell anyone else nearby to let you finish your task. If they won't leave you alone, persuade them to enroll in STFU.

Since most writing these days is done on computers, it's difficult to avoid distractions. Therefore, you'll have to discipline yourself. Keep off of the email, video games, stock charts, tentacle porn, and all that when you've set aside some time. Turn the ringer off on the phone, or put it in another room if you're still tempted to check it.

Editing must be done with a clear head, or else you'll make mistakes. On the other hand, creative flow can happen even when you're tired. Some writers even prefer to get drunk. (Back in the day, many favored absinthe, though it's hard to get it quite like they used to make it. The scare stories about it were fairly overblown.) All that is up to your personal discretion. However, it's advisable not to overdo the bug juice or rely on it as a crutch.

Igniting the spark

Mehr Licht!

So you're staring at a blank manuscript, and the words aren't coming off of your fingertips—what then? Rack your brains and write down a sentence or two. Surely you can think of something—*anything*. Then see if you can get something else down. Take it as far as it will go. This is what shifts the gears. Soon you'll get a paragraph or two. With luck, words will start flying off your fingers. Run with it as fast as possible!

Note that it doesn't have to be in any particular order. Speed is what counts. Don't dwell too much on fixing mistakes, or that will knock you back into edit mode. If the ideas start coming faster than you can get them into sentences, jot down the ideas elsewhere so you can pick up the thread later.

It's not possible to knock out a novel in one sitting. (With my latest, fourteen chapters and 88K words certainly didn't happen overnight!) So eventually you'll have to stop and

pick it up later. Reigniting the spark is a little easier when you have something in writing already. You can begin in editing mode, putting things in order, making transitions from one block of finished paragraphs to the next, and otherwise polishing up what you already wrote. When you start getting thoughts on where else you want to go with it, then kick into writing mode and start creating new paragraphs.

Sometimes you'll have to step back to planning mode, if you need to work out something with logic or direction. That's fine, but as soon as you come up with some ideas you can write down, then hit it. If necessary, you can go to another writing project, returning to the first later. If all else fails, then start doing some boring, repetitive task that you've been putting off for a while. Mull over your ideas while you paint the living room or whatever.

Most importantly, have fun with it!

Don't miss Beau's book catalog. Good stuff!

My father was a high-ranking student radical poobah and still thinks Castro was the bees' knees. Although I'm technically a red diaper baby, I've rejected all that baloney. I write **off-the-wall fiction**, and ***Righteous Seduction*** concerns next-generation game. My **blog** concerns "deplorable" politics, game, and my writing projects.

Return Of Kings Is Going On Hiatus

October 1, 2018 | by Roosh Valizadeh | Link | Original Link

After six years of continuous operation and 5,800 articles published, I'm putting ROK on an indefinite hiatus so I can take a break from the daily grind of maintaining the site. I don't know when the hiatus will end.

The first factor for this hiatus is that site revenues are too low. We've been banned from Paypal and countless ad partners, which forced me to lay off the site editor last year and also lower payments to regular contributors. This started a negative spiral of declining content quality, site traffic, and revenues. Even the beloved comments section, which many see as the highlight of ROK, was badly hit when Disqus banned us. Currently, ROK receives half the traffic of its peak and less than one-fifth of the income.

The second factor is that I'm burned out. Keeping ROK updated, writing books, posting articles on my blog, doing live streams, and maintaining the forum has put too much on my plate. Out of everything on that list, working on ROK has become my least favorite activity because duties are centered more around editing other people's work than creating my own.

I'm sure many of you understand that we are in the early stages of a censorship wave that will sweep through society. Scoundrels like myself get banned first, and then soon the hammer will come down on anyone who dares to share the truth. Personally, I believe that I will suffer death by a million cuts, but until then, you can continue to follow my work here:

- Roosh V
- Roosh V Forum
- YouTube

- Twitter
- Instagram
- Soundcloud

Lastly, I'm planning on doing a book tour in 2019, mainly in the United States. If you are interested in attending, **complete this brief survey** to help me identify which cities I should visit. The tour will probably happen in the summer.

In the meanwhile, if the situation with ROK changes, or I miss updating it, articles will return. Thank you for supporting the site all these years.
