Most women in the church, and most of their "conservative" pastors, don't believe that Jesus is an authority about chastity, marriage and male headship. They agree with feminists about premarital sex and no-fault divorce and egalitarian marriage. But the feminist design for women isn't working out for women – that's undeniable. Should

we really be surprised that feminist's feelings were not better for women than the Creator's own design?

# Wayne Grudem explains what the Bible says about self-defense

**Wintery Knight** · 21 June 2020 · Archived copy · Original

Theology that hits the spot
Reformed Baptist theologian Wayne Grudem speaks on the Bible and the right of self-defense.

About Wayne Grudem:

> Grudem holds a BA from Harvard University, a Master of Divinity from Westminster Theological Seminary, and a PhD from the University of Cambridge. In 2001, Grudem became Research Professor of Bible and Theology at Phoenix Seminary. Prior to that, he had taught for 20 years at Trinity Evangelical Divinity School, where he was chairman of the department of Biblical and Systematic Theology.
>
> Grudem served on the committee overseeing the English Standard Version translation of the Bible, and in 1999 he was the president of the Evangelical Theological Society. He is a co-founder and past president of the Council on Biblical Manhood and Womanhood. He is the author of, among other books, Systematic Theology: An Introduction to Biblical Doctrine, which advocates a Calvinistic soteriology, the verbal plenary inspiration and inerrancy of the Bible, the body-soul dichotomy in the nature of man, and the complementarian (rather than egalitarian) view of gender equality.

The MP3 file is here.

The PDF outline is here.

Topics:

- what about turning the other cheek? doesn't that undermine self-defense?
- what does Jesus say about the right to self-defense in the New Testament
- did Jesus' disciples carry swords for protection during his ministry?
- why did Jesus tell his disciples to sell their cloaks and buy swords?
- what about Jesus stopping Peter from using force during Jesus' arrest?
- shouldn't we rely on police instead of our own personal weapons?
- what about brandishing a handgun vs actually trying to shoot someone?
- what are violent crime rates in pro-gun USA and in the anti-gun UK?
- does outlawing guns cause violent crime to increase or decrease?

- do academic studies show that gun control decreases crime?
- do academic studies show that concealed carry laws decreases crime?
- what do academic studies show about defensive handgun usage?
- do many children die from guns in the home compared to other causes?
- doesn't the US Constitution limit the usage of guns to the army and police?
- what did the Founding Fathers believe about lawful ownership of firearms?
- What should be the goal of someone who uses a weapon in self-defense?

This is a good example of applying the Bible to real life. We need more of that!

# Republicans block Equality Act bill that makes Christian moral values a crime

**Wintery Knight** · 22 June 2020 · Archived copy · Original

22 states put sexual orientation and gender identity above the Bible

Regular readers will be familiar with the cases where gay activists went after bed and breakfasts, wedding venues, photographers, florists, bakers, etc. who refused to participate in celebrations of same-sex marriage. Christians oppose same-sex marriage, because the leader of the religion defined marriage as being between one man and one woman. However, religious liberty wasn't a defense in these cases, because these states had passed "SOGI laws", which made it illegal to discriminate based on sexual orientation and gender identity.

The Equality Act is a federal bill advanced by Democrats that forces all the states without SOGI laws to allow gay activists to weaponize government against Christians, forcing them to participate in non-Christian celebrations of gay activism.

Here's the story from CBN about what happened to the Equality Act in the Senate:

> Senate Democrats were emboldened by Monday's Supreme Court decision protecting LGBTQ rights in the workplace, so they pushed for a controversial bill that would elevate those rights above religious freedom.
>
> Every Senate Democrat, joined by two independents and Republican Susan Collins of Maine, called for a vote on the so-called Equality Act.
>
> The bill passed the House of Representatives last year. It would extend protections for LGBTQ individuals, superseding the rights of religious groups.
>
> One result would be forcing faith-based adoption agencies to place kids with same-sex couples, even when other adoption agencies are available.
>
> Sen. James Lankford (R-OK) joined with Republicans Joshua Hawley (MO) and Mike Lee (UT) in blocking the vote.
>
> "The Equality Act says that if you're a faith-based adoption agency that only places children in a home where there's a mom and dad there, then you either have to change your faith or close," Lankford said.
>
> "The Equality Act says to that institution, 'I would rather have fewer adoption agencies in America than have you open'," Lankford continued. "That's not protecting the rights of all Americans."
>
> Critics of the Equality Act say it would also weaken the Religious Freedom Restoration Act, a bipartisan 1994

> law that protects religious liberty.
>
> Sen. Hawley argued that the Equality Act can't be approved because it "guts" the Religious Freedom Restoration Act on the heels of a stunning Supreme Court ruling that rewrote the definition of sex with "nearly nothing to say about religious liberty or religious believers in this country."

The Federalist described some effects of the Equality Act bill:

> On the surface, the "Equality" Act is supposed to protect LGBT folks from discrimination by adding the categories of sexual orientation and gender identity to all federal civil rights laws, including the 1964 Civil Rights Act. It would make claims of discrimination related to these characteristics legally actionable in the way racism is, and applying to virtually every area of life: the workplace, education, banking, jury service, federal funding, housing, medicine and psychiatry, and all public facilities.
>
> It is a power grab in the guise of anti-discrimination. A bait-and-switch. It's another attempt by a ruling micro-clique to exert mega-control over everyone else's lives, including those it purports to protect. It allows the Mass State to maximize bureaucracy and social engineering, especially by its huge regulation of speech and expression. It erodes individual rights while claiming to uphold them.
>
> Sane people of goodwill have a host of good reasons to object to the so-called Equality Act. And many of those reasons have been written up, including the de-sexing of toilets and showers, the compelled speech inherent in pronoun protocols and severe punishment for "misgendering," the promised harassment of business owners, the invasion of girls' and women's sports by biological men who force on them an unequal playing field, the utter contempt for individual conscience, and more.
>
> The net result of this act would be a huge inequality of power accrued to the state and drained from the individual.

Other areas that would be affected: tax exempt status for churches, private college admissions, scholarships and curricula, moral standards in Christian organizations, forced transgender treatments at hospitals and health clinics, foster and adoption agencies could not prefer naturally married couples.

The author of that article lists five specific effects of the law:

1. It Undermines Everyone's First Amendment Rights
2. The Ambiguities in the Bill Threaten the Rule of Law
3. Nudge Toward a Chinese-style Social Credit System
4. Redefining Humanity By Outlawing Sex Distinctions
5. It Enshrines Socially Destructive Identity Politics

Let's see what the article says about #2:

> The first thing that should hit any reader of the so-called Equality Act is the ambiguity of its language, especially with the bill's outright emphasis throughout on "perceptions."
>
> […]Consider how much the "Equality" Act would rely on bureaucratic and court actors to divine the "perception" of the perpetrator or victim of so-called discrimination: it would have to calculate your intent, read your mind, check out your body language, pick you apart for any suggestion of malice. For example, it repeatedly refers to sexual orientation and gender identity as "actual or perceived." Many times throughout, the text notes that discrimination (or identity?) involves "perception or belief even if inaccurate" (emphasis mine).
>
> This dependence on perception or belief about a person's self-identity did not exist before. The language of this proposed law is more fluid than gender fluidity on steroids, and it's wild stuff to push, especially at the federal level. It invites no end of accusations and lawfare that bodes ill for society and promises much human

> wreckage. The only people “empowered” by such a scam are those on the upper levels of this newly devised food chain who can call the shots.

Here’s more about #3 for those who didn’t know about the China social credit system:

> If passed, we shouldn’t be surprised if it eventually produces a social credit system not unlike what is happening in China, whereby your livelihood, education, career, mobility, and access to goods and services is based on a literal “score” of your compliance with government policy. To paraphrase Sir Richard Scruton’s excellent observation of how that works in China, I’d say that the so-called Equality Act would help create robots out of Americans, with the state programming what they can say and do.
>
> As more people self-censor because of the risk of losing their livelihoods and social status, they simply become more prone to robotic compliance and conformity with limits on their speech. This is fast becoming the case in China, where citizens feel the need to build up their “social credit” to be allowed access to jobs, education, housing, and who knows what other goods and services. The so-called Equality Act’s restrictions on First Amendment freedoms would be a big step in that direction.

A social credit system that scores you for conformity would be a logical effect of the intent of the Equality Act: to punish free expression in just about every sphere of life, including the workplace, at school, in the public square, and in all public facilities, and any place that might be connected with federal funding. (By the way, Scruton was punished—stripped of his chairmanship of an architectural commission in Britain—simply for explaining what the social credit system does to people in China. That should be another lesson for us here.)

Now, I know some Christians will say “why does that matter to me, I already agree with sex outside of marriage and I agree that marriage is just when any number of people of any sex cohabitate and have sex”. Right, this is only a problem who think that the Bible is an authority, and that Jesus knows more about morality than LGBT activists and Democrat politicians.

Right now, I live in a state with no SOGI law, and I write about studies, etc. that are critical of the gay agenda from behind an alias. The second that this Equality Act becomes law, I would instantly have to delete this blog, my Facebook page, and my Twitter in case “discrimination” was “perceived” by an LGBT activist based on my previous writings, and they decided to investigate. It would be like writing articles critical of Nazism prior to the ascent of Hitler. It’s fine to do it when Hitler’s not yet in power, but once he’s in power, you shut it down and get out.

# Why did Dan Barker leave Christianity for atheism?

**Wintery Knight** · 23 June 2020 · Archived copy · Original

A conflict of worldviews

Unbelievable's radio show featured a discussion with former Christian Dan Barker, the founder and co-President of the Freedom From Religion Foundation.

The MP3 file is here. (60 minutes)

I thought that I would make some general comments about why I think that many people leave the Christian faith, and what you should be careful of in order to avoid following in Dan Barker's footsteps, specifically.

Basically, there are four major reasons why people leave Christianity.

1. They want to do something immoral with impunity. This type of person wants to do something immoral that is forbidden by Christianity, like pre-marital sex or getting drunk in clubs with friends. They dump Christianity in order to have freedom to seek happiness in this life.
2. They want to make decisions based on their emotions, rather than wisdom. This type of person thinks that God's job is to save them when they act irresponsibly. When God disappoints them by not make their recklessness "work out", they leave the faith.
3. They want to be loved by people, not by God. This type of person thinks that Christianity is a tool that they can use to become popular. When they first try to articulate the gospel in public, they find that people don't like them as much, and they feel bad about offending people with exclusive truth claims that they cannot back up using logic and evidence. So, they water down Christianity to get along with non-Christians. Finally, they jettison Christianity completely. This happens to a lot of young Christians the moment they hit college / university.
4. They don't want to learn to defend their faith. This type of person is asked questions by skeptics that they cannot answer. Usually this happens when people go to university after growing up in the shelter of the Church. The questions and peer pressure make them feel stupid. Rather than investigate Christianity to see if it's true, they drop it, so they can be thought of as part of the "smart" crowd.

Now listen to the discussion and see if you can identify some of these factors from Barker's own carefully-prepared words. He is trying very hard to make himself look honest and moderate, because he wants Christians to be sympathetic with his story and his motives for leaving Christianity. But I think that there is enough in his statements

to construct a different hypothesis of why he left Christianity.

I've grouped the data by risk factor. Some of this is my interpretation of his real motivations, based on my experience dealing with former-Christians.

**Non-rational, emotional approach to Christianity**

- he was raised in a devout Christian family where he probably wouldn't have faced skeptical questions
- he converted to Christianity at age 15 as a result of a religious experience, not a serious investigation
- his idea of God was probably idealized and uninformed, e.g. – a loving God who wants us to be happy
- he wandered around from church to church preaching, with no fixed address or source of income
- he earned money by collecting "love offerings" from churches where he performed his music
- he wrote Christian songs and Christian musicals, but nothing substantive on apologetics and theology
- he worked in three churches known for being anti-intellectual and fundamentalist
- there's no evidence that of any deep study of philosophy, science and history during this time

**Desire to gain acceptance from non-Christians**

- he began to notice that some people were uncomfortable with sin and Hell
- he began to avoid preaching about sin and Hell in order to make these people comfortable
- he watered-down the gospel to focus on helping people to be happy in this life
- his manic approach to Christian ministry was challenged by the "real life" needs of his growing family
- he met liberal pastors while performing his music in their churches
- he found it difficult to disagree with them because they seemed to be "good" people
- he watered down his message further in order to appeal to people across the theological spectrum

**Ignorance of Christian apologetics**

- he began to think that if there are many different views of religion, then no view can be correct
- he was not intellectually capable of using logic and evidence to test these competing claims to see which was true
- he decided to instead re-interpret Christian truth claims as non-rational opinions, so they could all be "valid"
- he became a theological liberal, abandoning theism for an impersonal "ground of being"
- he embraced religious pluralism, the view that all religions are non-rational and make no testable truth claims
- he began to see God as a "metaphor" whose purpose is to make people have a sense of meaning and purpose
- he jettisoned God completely and focused more on helping people find meaning and morality apart from God
- seems to think that religion is about having a "great life", and felt that you can have a "great life" without religion
- seems to think that religion is about being "good", and felt that you can be "good" without religion
- religion makes people feel bad by telling them what to do instead of letting them do anything they want
- religion makes people feel bad by telling them what is true, instead of letting them believe whatever they want
- religion makes people feel bad by telling them that God will hold them accountable for their beliefs and actions

**So what do I think happened?**

Barker was generating an income from donations from churches where he entertained them. Gradually, his family grew to the point where conservative churches were not enough to support him. He had to change his message to appeal to liberal churches in order to cast a wider net.

He seems to have thought that Christianity is about having his needs met and being liked by others. I think he

wanted to feel good and to make people feel good with his preaching and singing. But Christianity is not a feel-good religion. It's not a tool to make people like you. He seems to have become aware that the exclusive claims of Christianity made other people feel offended, so he cut them out. Christian apologists learn how to provide evidence for claims that non-Christians find offensive or hard to believe, but Dan hadn't studied philosophy, science or history so he couldn't defend it. It's hard to speak unpopular truths when you have nothing to back it up except your music composing. Eventually, Dan just quit making the truth claims entirely.

I also think money was a factor. It seems to me that it would have hurt his career and reduced his invitations from liberal churches if he had kept up teaching biblical Christianity. In order to appeal to a wider audience, (like many Christian singers do – e.g. – Amy Grant, Jars of Clay, etc.), he would have felt pressured to water down the unpleasant parts of his preaching and singing. Lacking apologetics skill, he instead abandoned his message. He needed to account for his family's needs and "real life", and exclusive truth claims and Hell-talk would have reduced his ability to do that. It seems to me that he should have scaled back his extreme schedule of preaching and singing, and instead gotten a steady job so that he could afford "real life" and a family without being pressured into altering his message. The Christian life requires a certain amount of wisdom that Dan did not have.

Life isn't a fairy tale. God isn't there to reward risky behavior. We need to be more shrewd about financial matters so that we have the ability to *not care* about what people think of us. Look at this blog. I work all day as a senior software engineer with two degrees in computer science, so that I don't have to rely on donations. Additionally, I save most of what I make in case a tragedy strikes. Since I am financially secure, I can say what I think, and disregard anyone who wants me to change my message because they are offended. Becoming a Christian isn't a license to behave irrationally and immaturely with money. For some people, (like William Lane Craig), stepping out in faith works. But if it doesn't work, it's better to retreat and re-trench, rather than to compromise your message for money.

I actually met someone like Dan Barker recently. She grew up in an anti-intellectual hippy Christian home. Her mother came from a good family, and decided on a whim to marry a non-Christian. Like Barker, the family exalted feelings and irrational expectations of miracles from God for "fearless" acts. She got herself into trouble with alcohol and promiscuity in her 20s, by making emotional decisions and mixing with the wrong crowd. Her way of fixing this was to fly off on a one-year missions trip, wrecking her resume and finances. Now, she is in her late 30s, unmarried, and literally blaming *Jesus* for putting too many demands on her that she doesn't have time for, e.g – morning quiet time. This causes her to feel guilty, and make her want to reject Christianity. She had no intellectual conception of basic core doctrines like God's existence or Jesus' resurrection, which might have acted as a bulwark against her emotions. When I explained to her how I had structured my education and career so that I could have an influence without testing God, she seemed bored and said that I was too "fearful".

This is apparently widespread, especially among anti-intellectual denominations. Another ex-Pentecostal atheist woman I heard about from people who knew her when she was young decided to drop out of college to travel around North America doing pro-life work. When she found herself penniless, unmarried and without children in her mid-30s, she decided to have a baby out of wedlock. The government will pay for it, she said. Rather than trying to justify this decision as a Christian, she blamed God for not making her madness "work out". She is now an atheist, because God did not reward her decision to live fearlessly for him with a husband and children. It was all God's fault. There is a whole subculture within Christianity, where the pursuit of fun and thrills can be masked with pious language, and all talk of prudence and restraint is seen as cowardice and lack of faith.

The Christian life requires a certain level of intelligence, a certain level of practical wisdom, and a certain level of self-control and discipline. Make sure that you don't walk away from God because of your own bad choices.

# Facebook censors admit that they suppress Republican content to help Democrat Party

**Wintery Knight** · 24 June 2020 · Archived copy · Original

Facebook content moderator explains that Republican content is "terrorism"

Project Veritas meets with members of the secular left and get them to talk on camera about how they discriminate against conservatives in order to help Democrats win elections. In this post, we'll look at their latest sting of Facebook, and review some of Facebook's censorship of Christians (e.g. – Seth Gruber, Franklin Graham) and conservatives (e.g. – Live Action, PragerU).

Life News reported on the new Project Veritas video:

> The Civic Harassment Queue was a list of all the posts that had been flagged for violations of the Community Guidelines. McElroy said, "So, for 75 to 80 percent of the posts to be targeting Republicans and conservatives, you can say it was a bot. But somebody had to design that algorithm. So really, somebody at Facebook."
>
> […]An unnamed moderator said that it's "common sense" to delete posts that have #MAGA in them.
>
> One journalist asked, "If you see a conservative post you just get rid of it, right?" The unnamed moderator responded, saying, "Yes! I don't give no f*cks, I'll delete it."

Another content moderator said:

> "Facebook shadowbans. Facebook is notorious for it, they say they don't but, it's clear that people's content don't come because it's been de-filtered off the queue."
>
> Someone asked on camera, "How many of you are like, take your own stance and say we're just deleting whatever, all the Trump posts?" An unnamed moderator said, "There are probably like 16 of us."
>
> A service delivery manager was reportedly caught on camera saying, "Gotta get the Cheeto (Trump) out of office."
>
> […]He took screenshots of a memo saying that a poster which showed President Donald Trump's head being cut off would not be flagged as hate speech. A meme that showed a cartoon of Elmer Fudd shooting at former Democratic presidential candidate Beto O'Rourke was allegedly flagged as hate speech.
>
> In another screenshot, one memo read, "CNN host Don Lemon recently said 'white men are the biggest terror threat in this country.' This is implying that white men are terrorists and so would typically violate (HS Tier 1-2 1:6 dehumanizing speech). As this is a newsworthy event, FB's content policy team is allowing a exception for

> this content on the platform."

The video from Project Veritas features about a dozen content moderators (censors) from Facebook, admitting that they deliberately censor Republican content. My favorite is the woman who says that anything pro-Trump is "terrorism".

Here's the full video released by Project Veritas, which features conversations with a dozen Facebook content moderators.

Previously, I've blogged about other cases of Facebook censoring Christians and conservatives.

Live Action reported:

> In yet another apparent attempt to silence pro-lifers, Facebook has removed a post created by Seth Gruber of Life Training Insitute. Gruber had interviewed abortion survivor Melissa Ohden and was sharing information about the interview on his personal Facebook page when he was sent a warning message from the social media giant — and his post was removed.

Fox News reports on another case of Facebook censoring conservatives:

> Four Republican senators blasted Facebook for 'censorship' over the tech giant's recent fact check of pro-life organization Live Action.
>
> In a letter today to CEO Mark Zuckerberg, Senators Josh Hawley of Missouri, Ted Cruz of Texas, Kevin Cramer of North Dakota and Mike Braun of Indiana condemn the company's "pattern of censorship" and demand that it issue a correction, remove any restrictions placed on Live Action and its founder Lila Rose, as well as submit to a "meaningful" external audit.

The Washington Times reports:

> The Rev. Franklin Graham was kicked off Facebook for defending North Carolina's "bathroom bill," which the social-media giant's review team decided was hate speech.
>
> Facebook acknowledged over the weekend it had banned the prominent evangelist over transgender issues… But Mr. Graham was having none of it Sunday, calling the move "a personal attack towards me" and an example of the censorship that Silicon Valley has in store for Christians and/or conservatives.

And this one from the Daily Caller:

> Facebook is censoring PragerU videos for violating its speech codes that prohibit so-called "hate speech" and shadow banning its posts, PragerU wrote on Twitter Friday.
>
> "We're being heavily censored on @Facebook. Our last 9 posts are reaching 0 of our 3 million followers. At least two videos were deleted last night for 'hate speech' including our recent video with @ConservativeMillen," PragerU tweeted.

And then there is the previous Project Veritas sting of Facebook, where it emerged that official company documents said that efforts to censor Republicans was important to do, especially *in an election year*. That makes it clear that Facebook's intention is to get the Democrat Party elected.

The previous investigation found this:

> Project Veritas has obtained and published documents and presentation materials from a former Facebook insider. This information describes how Facebook engineers plan and go about policing political speech.

> Screenshots from a Facebook workstation show the specific technical actions taken against political figures, as well as “[e]xisting strategies” taken to combat political speech.
>
> […]According to the insider, the documents revealed a routine suppression of the distribution of conservative Facebook pages. The technical action she repeatedly saw, and for which Project Veritas was provided documentation, was labeled ActionDeboostLiveDistribution.
>
> Said the insider, “I would see [this term] appear on several different conservative pages. I first noticed it with an account that I can’t remember, but I remember once I started looking at it, I also saw it on Mike Cernovich’s page, saw it on Steven Crowder’s page, as well as the Daily Caller’s page.”
>
> […]The insider says that unlike many actions that Facebook content moderators can take against pages, the “deboost” action, which appears to occur algorithmically, does not notify the page’s owner.
>
> […]Upon further review, the insider says she did not notice the tag on any left-wing pages.

Everything that hurts the Democrats is “terrorism” and has to be “de-boosted”, especially “in an election year”.

It’s easy for Big Tech executives to go to Washington and lie about whether their companies are censoring or not, but the evidence speaks for itself. We should be investigating them right now, while we still have the Senate and time before the election. Wake up Republicans! Investigate them and hold them accountable.

# Is the definition of atheism “a lack of belief in God”?

**Wintery Knight** · 25 June 2020 · Archived copy · Original

I have a key that will unlock a puzzling mystery

First, let’s see check with the Stanford University Encyclopedia of Philosophy:

> ‘Atheism’ means the negation of theism, the denial of the existence of God.

Stanford University is one of the top 5 universities in the United States, so that’s a solid definition. To be an atheist is to be a person who makes the claim that, as a matter of FACT, there is no intelligent agent who created the universe. Atheists think that there is no God, and theists think that there is a God. Both claims are objective claims about the way the world is out there, and so both sides must furnish forth arguments and evidence as to how they are able to *know* what they are each claiming.

Philosopher William Lane Craig has some thoughts on atheism, atheists and lacking belief in God in this reply to a questioner.

Question:

> In my discussions with atheists, they  are using the term that they “lack belief in God”. They claim that this is different from not believing in God or from saying that God does not exist. I’m not sure how to respond to this. It seems to me that its a silly word-play and is logically the same as saying that you do not believe in God. What would be a good response to this?
> Thank you for your time,
>
> Steven

And here is Dr. Craig’s full response:

> Your atheist friends are right that there is an important logical difference between believing that there is no God and not believing that there is a God.  Compare my saying, “I believe that there is no gold on Mars” with my saying “I do not believe that there is gold on Mars.”  If I have no opinion on the matter, then I do not believe that there is gold on Mars, and I do not believe that there is no gold on Mars.  There’s a difference between saying, “I do not believe (p)” and “I believe (not-p).”  Logically where you place the negation makes a world of difference.

> But where your atheist friends err is in claiming that atheism involves only not believing that there is a God rather than believing that there is no God.
>
> There's a history behind this. Certain atheists in the mid-twentieth century were promoting the so-called "presumption of atheism." At face value, this would appear to be the claim that in the absence of evidence for the existence of God, we should presume that God does not exist. Atheism is a sort of default position, and the theist bears a special burden of proof with regard to his belief that God exists.
>
> So understood, such an alleged presumption is clearly mistaken. **For the assertion that "There is no God" is just as much a claim to knowledge as is the assertion that "There is a God." Therefore, the former assertion requires justification just as the latter does. It is the agnostic who makes no knowledge claim at all with respect to God's existence. He confesses that he doesn't know whether there is a God or whether there is no God.**
>
> But when you look more closely at how protagonists of the presumption of atheism used the term "atheist," you discover that they were defining the word in a non-standard way, synonymous with "non-theist." So understood the term would encompass agnostics and traditional atheists, along with those who think the question meaningless (verificationists). As Antony Flew confesses,
>
> the word 'atheist' has in the present context *to be construed in an unusual way*. Nowadays it is normally taken to mean someone who explicitly denies the existence . . . of God . . . But here it has to be understood not positively but negatively, with the originally Greek prefix 'a-' being read in this same way in 'atheist' as it customarily is in . . . words as 'amoral' . . . . In this interpretation an atheist becomes not someone who positively asserts the non-existence of God, but someone who is simply not a theist. (*A Companion to Philosophy of Religion,* ed. Philip Quinn and Charles Taliaferro [Oxford: Blackwell, 1997], s.v. "The Presumption of Atheism," by Antony Flew)
>
> **Such a re-definition of the word "atheist" trivializes the claim of the presumption of atheism, for on this definition, atheism ceases to be a view. It is merely a psychological state which is shared by people who hold various views or no view at all. On this re-definition, even babies, who hold no opinion at all on the matter, count as atheists! In fact, our cat Muff counts as an atheist on this definition, since she has (to my knowledge) no belief in God.**
>
> **One would still require justification in order to know either that God exists or that He does not exist, which is the question we're really interested in.**
>
> So why, you might wonder, would atheists be anxious to so trivialize their position? Here I agree with you that a deceptive game is being played by many atheists. If atheism is taken to be a view, namely the view that there is no God, then atheists must shoulder their share of the burden of proof to support this view. But many atheists admit freely that they cannot sustain such a burden of proof. So they try to shirk their epistemic responsibility by re-defining atheism so that it is no longer a view but just a psychological condition which as such makes no assertions. They are really closet agnostics who want to claim the mantle of atheism without shouldering its responsibilities.
>
> This is disingenuous and still leaves us asking, "So is there a God or not?"

So there you have it. We are interested in what both sides *know* and *what reasons and evidence they have to justify their claim to know*. We are interested in talking to people who make claims *about objective reality*, not about themselves, and who then go on to give reasons and evidence to support their claims *about objective reality*. There are atheists out there that do make an objective claim that God does not exist, and then support that claim with arguments and evidence. Those are good atheists, and we should engage in rational conversations with them. But clearly there are some atheists who are not like that. How should we deal with these "subjective atheists"?

**Dealing with subjective atheists**

How should theists respond to people who just want to talk about their psychological state? Well, my advice is to

avoid them. They are approaching religion irrationally and non-cognitively – like the person who enters a physics class and says "I lack a belief in the gravitational force!". When you engage in serious discussions with people about God's existence, you only care about what people know and what they can show to be true. We don't care about a person's psychology.

**Dealing with persistent subjective atheists**

What happens when you explain all of that to a subjective atheist who continues to insist that you listen to them repeat over and over "I lack a belief in God, I lack a belief in God"? What if you tell them to make the claim that God does not exist, and then support it with arguments and evidence, but instead they keep leaving comments on your blog telling you again and again about their subjective state of mind: "I lack a belief in cupcakes! I lack a belief in icebergs!" What if they keep e-mailing you and threatening to expose you on Twitter for refusing to listen to them, or denounce you via skywriting: "Wintery Knight won't listen to me! I lack a belief in crickets!". I think at this point you have to give up and stop talking to such a person.

And that's why I moderate and filter comments on this blog. There are uneducated people out there with access to the Internet who want attention, but I am not obligated to give it to them. And neither are you. We are not obligated to listen to abusive people who don't *know* what they are talking about. I do post comments from objective atheists who make *factual* claims about the objective world, and who support those claims with *arguments and evidence*. I am not obligated to post comments from people who refuse to make objective claims or who refuse to support objective claims with arguments and evidence. And I'm not obligated to engage in discussions with them, either.

# Is the Bible's definition of faith opposed to logic and evidence?

**Wintery Knight** · 26 June 2020 · Archived copy · Original

Theology that hits the spot

Probably the biggest misconception that I encounter when defending the faith is the mistaken notion of what faith is. Today we are going to get to the bottom of what the Bible says faith is, once and for all. This post will be useful to Christians and atheists, alike.

**What is faith according to the Bible?**

I am going to reference this article from apologist Greg Koukl of Stand to Reason in my explanation.

Koukl cites three Biblical examples to support the idea that faith is not blind leap-of-faith wishing, but is based on evidence.

1. Moses went out into the wilderness and he had that first encounter with the burning bush, and God gave him the directive to go back to Egypt and let his people go. Moses said, Yeah, right. What's going to happen when they say, why should we believe you, Moses?God said, See that staff? Throw it down.Moses threw it down and it turned into a serpent.God said, See that serpent? Pick it up.And he picked it up and it turned back into a staff.God said, Now you take that and do that before the Jewish people and you do that before Pharaoh. And you do this number with the hail, and the frogs, and turning the Nile River into blood. You put the sun out. You do a bunch of other tricks to get their attention.And then comes this phrase: "So that they might know that there is a God in Israel."
2. [I]n Mark 2 you see Jesus preaching in a house, and you know the story where they take the roof off and let the paralytic down through the roof. Jesus said, "Your sins are forgiven." And people get bugged because how can anyone forgive sins but God alone?Jesus understood what they were thinking and He said this: What's harder to say, your sins are forgiven, or to rise, take up your pallet and go home?Now, I'll tell you what would be harder for me to say : Arise, take up your pallet and go home. I can walk into any Bible study and say your sins are forgiven and nobody is going to know if I know what I am talking about or not. But if I lay hands on somebody in a wheelchair and I say, Take up your wheelchair and go home, and they sit there, I look pretty dumb because everyone knows nothing happened.But Jesus adds this. He says, "In order that you may know that the Son of Man has the power and authority to forgive sins, I say to you, arise, take up your pallet and go home." And he

got up and he got out. Notice the phrase "In order that you may know". Same message, right?

3. Move over to the Book of Acts. First sermon after Pentecost. Peter was up in front of this massive crowd. He was talking about the resurrection to which he was an eyewitness. He talked about fulfilled prophecy. He talked about the miraculous tongues and the miraculous manifestation of being able to speak in a language you don't know. Do you think this is physical evidence to those people? I think so. Pretty powerful.Peter tells them, These men are not drunk as it seems, but rather this is a fulfillment of prophecy. David spoke of this. Jesus got out of the grave, and we saw him, and we proclaim this to you.Do you know how he ends his sermon? It's really great. Acts 2:36. I've been a Christian 20 years and I didn't see this until about a year ago. This is for all of those who think that if you can know it for sure, you can't exercise faith in it. Here is what Peter said. Acts 2:36, "Therefore let all the house of Israel know for certain that God has made him both Lord and Christ, Messiah, this Jesus whom you crucified." There it is again. "Know for certain."

**What is faith according to Bible-based theologians?**

I am going to reference this article from theologian C. Michael Patton of Parchment and Pen in my explanation.

Patton explains that according to Reformation (conservative, Bible-based) theologians, faith has 3 parts:

1. **notitia –** This is the basic informational foundation of our faith. It is best expressed by the word content. Faith, according to the Reformers must have content. You cannot have faith in nothing. There must be some referential propositional truth to which the faith points. The proposition "Christ rose from the grave," for example, is a necessary information base that Christians must have.
2. **assensus –** This is the assent or confidence that we have that the *notitia* is correct… This involves evidence which leads to the conviction of the truthfulness of the proposition… This involves intellectual assent and persuasion based upon critical thought… *assensus*… says, "I am persuaded to believe that Christ rose from the grave."
3. **fiducia –** This is the "resting" in the information based upon a conviction of its truthfulness. *Fiducia* is best expressed by the English word "trust."… Fiducia is the personal subjective act of the will to take the final step. It is important to note that while *fiducia* goes beyond or transcends the intellect, it is built upon its foundation.

So, Biblical faith is really trust. Trust(3) can only occur *after* intellectual assent(2), based on evidence and thought. Intellectual assent(2) can only occur *after* the propositional information(1) is known.

The church today accepts 1 and 3, but denies 2. I call this "fideism" or "blind faith". Ironically, activist atheists, (the New Atheists), also believe that faith is blind. The postmodern "emergent church" denies 1 and 2. A person could accept 1 and 2 but deny 3 by not re-prioritizing their life based on what they know to be true.

**How do beliefs form, according to Christian philosophers?**

I am going to reference a portion of chapter 3 of J.P. Moreland's "Love Your God With All Your Mind" (i.e. – LYGWYM).

J.P. Moreland explains how beliefs form and how you can change them.

1. Today, people are inclined to think that the sincerity and fervency of one's beliefs are more important than the content… Nothing could be further from the truth… As far as reality is concerned, what matters is not whether I like a belief or how sincere I am in believing it but whether or not the belief is true. I am responsible for what I believe and, I might add, for what I refuse to believe because the content of what I do or do not believe makes a tremendous difference to what I become and how I act.
2. A belief's strength is the degree to which you are convinced the belief is true. As you gain ,evidence and support for a belief, its strength grows for you… The more certain you are of a belief… the more you rely on it as a basis for action.

But the most important point of the article is that *your beliefs are not under the control of your will.*

> …Scripture holds us responsible for our beliefs since it commands us to embrace certain beliefs and warns us of the consequences of accepting other beliefs. On the other hand, experience teaches us that we cannot choose or change our beliefs by direct effort.
>
> For example, if someone offered you $10,000 to believe right now that a pink elephant was sitting next to you, you could not really choose to believe this… If I want to change my beliefs about something, I can embark on a course of study in which I choose to think regularly about certain things, read certain pieces of evidence and argument, and try to find problems with evidence raised against the belief in question.
>
> …by choosing to undertake a course of study… I can put myself in a position to undergo a change in… my beliefs… And… my character and behavior… will be transformed by these belief changes.

I think definition of faith is important, because atheists seemed to want to substitute their own definition of faith as blind belief for this Biblical definition, but there is no evidence for their view that faith is belief without evidence. I think this might be another case of projection by atheists. Blind faith is how they arrive at their views, so they are trying to push it onto us. But the Bible is clearly opposed to it.

# Are men allowed to have preferences about which women are best for marriage?

**Wintery Knight** · 27 June 2020 · Archived copy · Original

Telling a woman how to make wise decisions protects her

So, in a previous post, I explained why men have to be careful about choosing a wife. Men have plans and they need a woman with the right skills to achieve it. Even if a woman genuinely repents her past, she may not have developed the skills for a godly man's marriage plan. For example, her 50K of student loans makes it harder to afford a stay-at-home homeschooling mother.

But many Christian women feel that there is no such thing as a Christian woman who is a bad candidate for marriage. It doesn't matter what a Christian woman did in the past. A man should never evaluate her skills for the roles of wife and mother. After all, if God forgives a Christian woman for running up student loan debt for a useless women's studies degree, or for getting drunk and sleeping around with hawt bad boys in college, then no Christian man should hold her past decisions against her when choosing a wife. Men are *obligated t*o disregard the past anti-marriage decisions made by women. To do anything else is to deny the Gospel of Jesus Christ. So many Christian women say.

What would happen if the shoe were on the other foot? What if it were the MAN who had been selfish, lazy and irresponsible? What if the MAN had made choices that seriously harmed his ability to perform male marriage roles like protecting and providing for his wife and children? Would marriage-ready women be *obligated* to marry this man as much as a man who had remained chaste, got a good education, built up a gapless resume, saved enough for a downpayment on a house, and taught apologetics in his home church? Is she allowed to prefer a man who has made good decisions to prepare for his marriage roles over a man who has made horrible decisions, but just hollers "grace" when anyone questions his ability to be a husband and father?

This MUST-READ article from The Federalist asks and answers that question.

Do you agree with the author?

> I think it's time for a conversation about another elephant in the room: this idea that women prefer physically fit men with good jobs and no criminal record. It's incredibly sexist and matriarchal to insist that women have a natural preference for men who have invested time and energy into stewarding their bodies, have shown the capability of earning a living and supporting a family, and have not gone to jail for attempting to grow 452 marijuana plants in their mother's basement.

> I know more than a few men who spent their twenties languishing in their parents' homes, subsisting on Cheetos and Mountain Dew, playing Xbox, watching pornography, and smoking controlled substances. If one of these men turns his life around, accepts Jesus, and starts fresh, young women have no right to overlook him as a potential mate just because he is 280 pounds, has almost no marketable skills at 30 years old, and cannot vote, serve on a jury, or own a firearm. He is created in the image of God, and accepted by Jesus! Any women who would overlook every other noble quality he possesses for basic financial security and a clean background check (not to mention browsing history) isn't a woman he should want.
>
> Men like this have often long since repented of their listless and slothful ways. If the lingering consequences of their pasts didn't stop Christ from living and dying for them, then it shouldn't stop a Christian woman from loving them, either. Period.

The Federalist article makes it clear that a man's poor choices about his education, job, obedience to the law, and physical fitness CLEARLY compromise his ability to perform his male duties to protect and provide. What about moral and spiritual leading? Well if he didn't spent his teens and 20s studying apologetics, moral issues, etc. then he isn't going to compare favorably to a man who teaches apologetics in his church, debates atheists, and writes blog posts for the Life Training Institute.

My friend Lee is a superb stay-at-home wife and mother. She says that we shouldn't accept "Jesus forgives me" as an immediate reversal of past harmful choices:

> I would note that there is a difference between just being forgiven of sin and actually repenting of it. Repenting is a turning away from and will manifest in changes; paying down debts, becoming chaste, becoming otherwise responsible and wise. Someone's past doesn't have to define their future. But that will manifest in observable and measurable changes.

She's right.

I knew a Christian woman who had 25,000 worth of student loan debt when she was 29. She wasn't using her degree, she was just working as a waitress. I found her a job as an IT project manager in an FT100 company, so she could pay off her loans. She declined, because "being a waitress is the easiest job I've ever had". She hasn't worked full-time as a professional since January 2013. She'll say "Jesus forgives me!" and "I hate my student loans!", but the loans are even larger now, and the wasteful spending on fun and thrills hasn't stopped. Hollering "grace" and saying you hate debt doesn't make you a good steward – and you'll *need to be a good steward* if you are in a marriage. She's not ready to manage the finances of a household. If she had taken the job, and paid off the loans, then she would have overcome the mistake, and become marriage-ready.

So what's really behind the hysteria against men evaluating women for marriage?

Deti nails the real root problem:

> Not one person – NOT ONE PERSON – said that nonvirgins with tattoos and debt are bad people; that they are irredeemable, that they're bad Christians; that they cannot be Christians; that they're unsalvageable; that they're ugly; or that they couldn't and shouldn't marry. That is NOT what was said.
>
> All that was said was that men prefer tattooless, debtfree virgins for marriage. That's all.
>
> […]The bible… teaches repentance is the way to salvation. But repentance does not mean you no longer bear the scars of your past sins in body and mind. You do. Oh yes you do. The effects can be minimized, even overcome. But they're still there.
>
> And more to the point, what's really being complained about here is a Christian woman acknowledging that men have preferences and that men are entitled to have preferences. If women want men, then they have to satisfy those preferences or lower their standards until they find men whose preferences they can satisfy.

> This can't be overemphasized – it's the idea that men have preferences. Its' the idea that there's a man that's one-half of that relationship, and there are things HE wants, and HE needs, and HE desires. Why does it matter what HE wants? Why do we care about him?
>
> Men don't want to marry high N women. Men don't want to take on debt and they don't prefer markedup tatted up women who look and act like men.
>
> What this gets down to is women objecting to men having standards. Because that leads to men judging women. And that leads to men evaluating women. And that leads to men rejecting some women and accepting others. And women hate judgment and rejection, especially when it's "less than" men who are doing the judging and rejecting.

N refers to the number of sexual partners a person has had.

The reason we discuss best practices for marriage-minded women is so that young women, especially young women who lack a father in the home, can get some kind of guidance about how to resist the culture's lies about men, sex and marriage. Such a woman has NOWHERE TO GO in this culture in order to learn how to relate to men, and how to marry to a man who will love her faithfully and forever. That's not fair! We have to help her!

What Christian men are doing by promoting chastity, sobriety, good stewardship and self-control to these young women is *protecting them from a culture that lies to them*. The well-meaning Christian women who think that talking about moral boundaries and wisdom will hurt the feelings of women who have made mistakes are actually making it harder for young women who have no guidance at all. The most vulnerable ones are the ones who need to hear that chastity is wise. Doing a STEM degree is wise. Getting out of debt by spending less is wise. Not seeking attention with graffiti on your body is wise. That's what unmarried women need to hear.

It's amazing to me that so many Christians do not understand the protective value of recommending Biblical morality and Biblical wisdom to young women. They would rather sacrifice these young women to the secular culture than allow older women to feel bad about their past decisions. So many Christians seem to be more concerned about *their own feelings* than about *promoting and defending what the Bible teaches* to young people who really need help.

# Wayne Grudem explains what the Bible says about war

**Wintery Knight** · 28 June 2020 · Archived copy · Original

Theology that hits the spot
A two-part sermon from famous pastor Wayne Grudem.

The part 1 MP3 file is here.

The part 2 MP3 file is here.

The PDF outline is here.

Part 1 topics: (just war and conduct of war)

- the commandment to not kill does not apply to killing enemy soldiers in war
- government is authorized to prevent foreign countries from harming citizens the same way it prevents criminals from harming citizens
- there are examples in the Bible of using military force to stop an aggressive nation, e.g. – David vs Goliath
- principles of a just war, and relevant Bible passages, e.g. – just cause, only as a last resort
- Moral principles for the conduct of a just war, e.g. – proportionality, combatants vs non-combatants
- Can a Christian serve in a just war in good conscience?
- What should a Christian do if called upon to fight in an unjust war?

Part 2 topics: (responses to pacificism)

- what are the arguments in favor of pacifism?
- government can do some things that individuals cannot do, e.g. – taxing vs stealing, punishing criminals vs revenge
- it's wrong for individuals to use force to advance the gospel, but not wrong for government to use force to restrain evil
- Jesus loves everyone, but even he will come in judgment one day and use force to punish evil
- what about nuclear weapons, nuclear arsenals for deterrence, and defenses to long-range nuclear missiles?
- missile defense systems work, e.g – Iron Dome in Israel stopped about 85% of incoming missiles
- building defenses does not embolden the enemy to attack us, it deters the enemy from attacking us
- "turn the other cheek" means don't return an insult, but you can defend yourself from physical threats

My favorite part of this two-part series was the midpoint of part 2, when a lady asked him a question about what is behind pacificism. Dr. Grudem runs through all the places in society where the secular left is opposed to authorities judging and punishing bad behavior with force. There are so many examples of this: parents disciplining rebellious children, teachers disciplining misbehaving kids, police catching criminals (lots of that lately!), courts putting criminals in jail for long periods of time, giving murderers the death penalty, using waterboarding on terrorists, and of course pacifism in the face of aggression, e.g. – Iran vs Israel, Russia vs Ukraine. Then another lady asked him why the same people who are so concerned about going easy on violent criminals and aggressive nations are so intent on being able to kill defenseless innocent children in the womb. Good question.

# Feminist single mother confused when daughter seeks male attention with sexy photos

**Wintery Knight** · 29 June 2020 · Archived copy · Original

Marriage and family

Captain Capitalism shared this story about a single mother in radically-leftist French Canada. And she raised her fatherless daughter with all sorts of feminist propaganda, especially rejecting traditional femininity. But what happens when her fatherless girl has to choose between feminist theory and her need to get approval from men?

The story is from the CBC:

> Last summer, I stumbled onto my teenage daughter's social media account. What I found confirmed my worst fear: I had failed to raise a feminist.
>
> There, among the pouty-faced selfies, was a photo of her posing, Sports Illustrated-style, on a jet ski in her bikini, brandishing her middle finger at the camera with a smirk on her face.
>
> […]All her life, I've tried to model feminism: taking her on marches for women's rights, reading to her from books like Chimamanda Ngozi Adichie's We Should all be Feminists and surrounding her with a community of strong, independent female friends.
>
> I realize now that the wisdom of my mother's "Women's Lib" generation doesn't cover the challenges of raising a feminist daughter in the 21st century.
>
> […]We want our girls to grow up brave, confident and assertive.

On this blog, I've written many times about the harm that feminism does to women. Basically, in the old days, women could be honest about what they really wanted. They wanted a husband to care for them, give them economic security, and they wanted to raise children and keep a home. They might get a degree and work while looking for a husband, but they really wanted a stable marriage, and to be needed by their husband and children most of all.

But feminism taught young women that traditional goals were "sexist" and therefore to be avoided. Instead of marrying early and having children, women were taught to delay marriage for their careers. Instead of learning how to objectively evaluate a man for his ability as a provider, protector, moral leader and spiritual leader, women were taught to prefer men who gave them entertainment and excitement in the moment.

Well, this single mother obviously has feelings about how to achieve the goal of having a daughter who is brave confident and assertive. But what does the objective research say about how to achieve that goal?

Here's an article from the pro-feminist Institute for Family Studies:

> Today's fathers also seem to be having a greater impact on their daughters' academic and career choices than fathers in previous generations. For example, women who were born in the 1970s are three times more likely than those born at the beginning of the twentieth century to work in the same field as their fathers—a finding that researchers have attributed not just to society's changing gender roles but also to daughters receiving more mentoring from their fathers.
>
> Another question on many people's minds is: how does a father influence his daughter's romantic life—who she dates, when she starts having sex, and the quality of her relationships with men? Not surprisingly, a girl who has a secure, supportive, communicative relationship with her father is less likely to get pregnant as a teenager and less likely to become sexually active in her early teens. This, in turn, leads to waiting longer to get married and to have children—largely because she is focused on achieving her educational goals first.
>
> The well-fathered daughter is also the most likely to have relationships with men that are emotionally intimate and fulfilling. During the college years, these daughters are more likely than poorly-fathered women to turn to their boyfriends for emotional comfort and support and they are less likely to be "talked into" having sex. As a consequence of having made wiser decisions in regard to sex and dating, these daughters generally have more satisfying, more long-lasting marriages. What is surprising is not that fathers have such an impact on their daughters' relationships with men, but that they generally have more impact than mothers do.
>
> Their better relationships with men may also be related to the fact that well-fathered daughters are less likely to become clinically depressed or to develop eating disorders. They are also less dissatisfied with their appearance and their body weight. As a consequence of having better emotional and mental health, these young women are more apt to have the kinds of skills and attitudes that lead to more fulfilling relationships with men.
>
> An emerging body of research suggests one more way that dads may shape their daughters' mental health and relationships in adulthood: scholars have found an intriguing link between the way daughters deal with stress as adults and the kind of relationships they had with their dads during childhood. For example, undergraduate women who did not have good relationships with their fathers had lower than normal cortisol levels. And people with low cortisol levels tend to be overly sensitive and overly reactive when confronted with stress. Indeed, the low cortisol daughters were more likely than the higher cortisol daughters (who had the better relationships with their dads) to describe their relationships with men in stressful terms of rejection, unpredictability or coercion.

If the single mother in our story really wanted her daughter to be brave, confident and assertive, then she should have 1) made herself into the kind of person that a commitment-minded man is attracted to, and 2) evaluated men for their commitment-ability and then chosen one to have babies with based on their ability to commit. For example, if she had chosen a Christian man who took the Bible seriously on morality and spirituality, then that man would have stuck around, modeled how to love his wife, and taken an interest in his children. Someone who is able to make commitments and keep his word. And according to the research, that (traditional, "sexist") approach would have done a lot more to reach the goal of having a brave, confident and assertive daughter. The feminist approach to raising children is exactly what DOESN'T work.

The problem with the single mother feminist is that her feminist worldview is based on her feelings instead of on research. She probably had bad experiences with the hot bad boys she freely chose, and then drew the wrong conclusions from those experiences. E.g. – "I gave my body to a hot bad boy to make him like me, and he dumped me. I felt weak, but it wasn't my fault for choosing him. It was his fault for not changing into a good man after I gave him premarital sex. Now I'm going to stop being a weak girl, and drink like a man, have sex like a man, and

have a career like a man, and this will work to raise a strong daughter. Welfare, daycare and public schools are all I need!”

The priceless gift that mothers give their daughters when they marry a good man is the gift of teaching them how to make a man like them without appealing to them with exposed skin and commitment-free sex. When a man is present in the home, and is treated with respect by his wife, the daughters learn which male behaviors are best for marriage, and how to encourage and support good men who demonstrate those behaviors. Daughters who have fathers don’t feel the need to seek male attention with skin and sex, the way that many fatherless girls do. They get attention from their fathers for having good character, for developing useful skills and for caring for other people around them. They are attracted to men who give them attention for their character and achievements, just like their fathers did.

# Both of Trump's Supreme Court picks declare Louisiana pro-life law Constitutional

**Wintery Knight** · 30 June 2020 · Archived copy · Original

I'm Scheming Unborn Baby, and I don't approve this decision

This post is just a round-up of some interesting points about the disappointing SCOTUS decision from Monday.

Life News reported:

> Though pro-lifers mourned another loss at the U.S. Supreme Court on Monday in the fight to protect unborn babies and mothers, many found hope in the fact that both of President Donald Trump's nominees rejected the majority opinion.
>
> Justices Neil Gorsuch and Brett Kavanaugh dissented in June Medical Services v. Russo. The case involved a Louisiana law that requires abortionists to have hospital admitting privileges so that they can treat patients with potentially life-threatening complications.
>
> On Monday, the four liberal justices and Chief Justice John Roberts decided that the law imposes an "undue burden" on women's right to abortion. Roberts' ruling was a huge disappointment for pro-life advocates. Many believed Roberts, a nominee of Republican President George W. Bush, would at least agree to uphold the modest abortion regulation for the sake of women's health and safety, but he did not.
>
> But pro-life leaders were happy with how Trump's two choices ruled in the matter.
>
> "We are pleased that the two Justices appointed by President Trump voted to protect women and to uphold the Louisiana pro-life law," said James Bopp, general counsel for National Right to Life.
>
> Gorsuch wrote a strong, critical dissent of the majority opinion, slamming the justices for ignoring "an array of rules" that keep the judiciary branch in check.
>
> The rules make "sure that we are in the business of saying what the law is, not what we wish it to be," Gorsuch wrote in his dissent. "Today's decision doesn't just overlook one of these rules. It overlooks one after another."

> At length, he listed Louisiana's concerns for women's health, including dozens of health and safety violations at abortion facilities, botched abortions, and new evidence suggesting abortion facilities may not have reported the rape of a young girl to authorities.
>
> "At least one Louisiana abortion provider's loss of admitting privileges following a patient's death alerted the state licensing board to questions about his competence, and ultimately resulted in restrictions on his practice," he wrote.
>
> Gorsuch said Louisiana lawmakers had good reasons to pass the admitting privileges law. He said they heard testimony from women and emergency room physicians about abortion practitioners' record of abandoning their patients.

My favorite justice Clarence Thomas added:

> In dissent, Justice Clarence Thomas wrote, "Today a majority of the Court perpetuates its ill-founded abortion jurisprudence by enjoining a perfectly legitimate state law and doing so without jurisdiction."
>
> "Our abortion precedents are grievously wrong and should be overruled," he added, saying that the high court has "neither jurisdiction nor constitutional authority to declare Louisiana's duly enacted law unconstitutional."
>
> Thomas' dissent makes it clear that the abortion activists who brought the lawsuit didn't even have standing to bring it, since petitioners who file lawsuits are supposed to bring such suits on their own behalf concerning their own abrogated rights or grievances, not on behalf of others.
>
> Thomas made that problem clear: "As is often the case with legal challenges to abortion regulations, this suit was brought by abortionists and abortion clinics. Their sole claim before this Court is that Louisiana's law violates the purported substantive due process right of a woman to abort her unborn child. But they concede that this right does not belong to them, and they seek to vindicate no private rights of their own. Under a proper understanding of Article III, these plaintiffs lack standing to invoke our jurisdiction."

Both of Obama's picks (Kagan and Sotomayor) voted in favor of the abortion clinics, saying that states cannot legislate common sense safety rules for abortion providers.

And here was Trump's reaction, reported by Life News:

> On behalf of President Donald Trump, the White House issued a statement slamming the ruling and saying it "devalued the lives of unborn children."
>
> "In an unfortunate ruling today, the Supreme Court devalued both the health of mothers and the lives of unborn children by gutting Louisiana's policy that required all abortion procedures be performed by individuals with admitting privileges at a nearby hospital," the White House said. "States have legitimate interests in regulating any medical procedure—including abortions—to protect patient safety. Instead of valuing fundamental democratic principles, unelected Justices have intruded on the sovereign prerogatives of State governments by imposing their own policy preference in favor of abortion to override legitimate abortion safety regulations."

The two oldest judges on the Supreme Court (Ruth Bader-Ginsburg and Stephen Breyer) are almost certain to be replaced in the next federal election. It will be interesting to see what pro-lifers do in order to get Trump re-elected. So far, his picks have been solid on the abortion issue. But not everyone who claims to be pro-life is practical about getting pro-life outcomes. A lot of pro-lifers are cynical and conspiracy-minded, so that they find ways to think themselves righteous without getting involved and being effective.

Make sure you have a plan to replace Bader-Ginsburg and Breyer by getting Trump re-elected in November 2020.

# Canada's single payer health care: pay up front, take a number and wait until you die

**Wintery Knight** · 1 July 2020 · Archived copy · Original

Price of healthcare per Canadian household (Source: Fraser Institute)

I post a lot of research from Canada's Fraser Institute, but they are not the only think tank that publishes research on the efficiency and costs of single payer health care in Canada. This time, I found a report from the Heritage Foundation, where they go over quality of care, taxes, out of pocket costs, coverage, rationing, waiting lists, staff shortages, substandard equipment, and outdated drugs.

Here's the report from the Heritage Foundation. I'll focus on the differences.

Canadians pay slightly less in out of pocket costs:

> The OECD calculates that Canadians spend 1.6 percent of GDP on out-of-pocket health spending, compared to 1.9 percent in the U.S.
>
> […]While these numbers are very close, they are actually getting closer. Since 1970, U.S. out-of-pocket spending as a percentage of total medical spending has been falling steadily, from 33 percent in 1970 to about 10 percent in 2017.19
>
> Meanwhile, Canadian out-of-pocket spending has been falling much slower, so that by 2016 it totaled 15 percent of total medical spending—a higher proportion than in the U.S.20
>
> **As a result, Statistics Canada warned in early 2020 that the percentage of Canadians experiencing large out-of-pocket burdens is growing, writing that "[b]etween 1998 and 2009…the percentage of households spending more than 10% of their total after-tax income on health care rose by 56%."**

Canadians pay more in federal and state taxes:

> Federal taxation excluding social security contributions, then, comes to 28 percent of GDP in Canada, compared to just 19 percent in the U.S.—meaning 51 percent more.

> […]This excess taxation is largely a result of health spending, which has bloated provincial budgets to nearly three times the taxes of U.S. states.
>
> Provincial taxes have grown to nearly the same level as federal taxation. Meanwhile, provincial health costs have risen to fully 37 percent of provincial budgets in 2016—up from 33 percent in 1993 – —and range as high as 42 percent.
>
> Canada's Fraser Institute has estimated this excess tax burden from public health costs at roughly $9,000 for a household of two adults with or without children or $750 per month in additional taxes.

When I wanted an MRI I was scheduled the same week

Canadians wait far longer for treatment than Americans:

> Medical waiting times have become a national crisis in Canada, and continue to worsen. The average wait time for medically necessary treatment between referral from a general practitioner and a consultation with a specialist was 8.7 weeks in 2018, 136 percent longer than in 1993. Patients then have to wait again between seeing the specialist and the actual treatment, another 11 weeks on average, 97 percent longer than in 1993.
>
> From referral to treatment, then, it takes an average of 19.8 weeks (see Chart 2) to be treated, in addition to the original wait to see the family doctor in the first place—this for "medically necessary" treatment, not cosmetic surgery.
>
> In contrast, nearly 77 percent of Americans are treated within four weeks of referral, and only 6 percent of Americans report waiting more than two months to see a specialist.
>
> As for appointments, a 2017 survey of American physicians in the 15 largest U.S. cities found that it took just 24 days on average to schedule a new-patient physician appointment, including 11 days for an orthopedic surgeon and 21 days for a cardiologist.
>
> As a result of these long waits, by one recent estimate, at any given moment, over one million Canadians—3 percent of the entire population—are waiting for a medical treatment.
>
> These lists can average six months, and often much longer in rural areas, which tend to suffer from doctor shortages so severe that many do not even have a family doctor. Overall, 15 percent of Canadians did not have

> a regular health care provider in 2017.
>
> **The shortages ripple through the system; one doctor in Ontario called in a referral to the local hospital, only to be told there was a four-and-a-half year wait to see a neurologist.**

In Canada, people die or become inoperable on waiting lists:

> **A Montreal man was finally called for his long-delayed urgent surgery two months after he had died. One 16-year-old boy in British Columbia waited three years for an "urgent" surgery, during which time his condition deteriorated so much that he became a paraplegic.**

Canadians have to travel abroad to countries with functioning health care systems in order to be treated:

> These cases are, unfortunately, not isolated; a survey of specialists found that average wait times exceed what is deemed clinically "reasonable" for fully 72 percent of conditions in Canada. The situation continues to worsen every year: In 1994, the average gap between clinically reasonable delay and actual delay was only four days, and by 2018 had grown to 23 days.
>
> […]With one million waiting, many Canadians turn in desperation to U.S. health care—the very system some U.S. policymakers propose to transform. In 2017 alone, Canadians made 217,500 trips to other countries for health care, of which 52,500 were to the U.S., paying out of pocket to skip the waiting.

Outdated equipment, outdated drugs, staff shortages:

> While the average employer-sponsored private insurance plan in Canada covers between 10,000 and 12,000 drugs, most public plans in Canada only cover 4,000. Canada has 35 percent fewer acute care beds than the U.S., and only one-fourth as many magnetic resonance imaging (MRI) units per capita—indeed, it has fewer MRI units per capita than Turkey, Chile, or Latvia.
>
> […]Some common treatments are simply unavailable to Canadians. For new pharmaceuticals, for example, Canada's policy of forcing down prices so that American consumers essentially pay for Canada's research and development has led to years-long delays for Canadian patients.
>
> […]Cutting corners on facilities and using outdated drugs show up in Canadian mortality rates. Thirty-day in-hospital mortality rates in Canada are 20 percent higher than in the U.S. for heart attacks, and nearly three times the U.S. level for strokes. Cancer age-standardized mortality is 10 percent higher in Canada than in the U.S.—despite far healthier lifestyles.
>
> […]When it comes to personnel, Canada underspends on medical staff and doctors, ranking 29th out of 33 among high-income countries for doctors per 1,000 population, accounting for a large part of those wait times. Canada has half as many specialist physicians per capita as the U.S.
>
> […]With such shortages and waiting lists, Canadian emergency rooms are packed. So packed that Canadians sometimes just give up and go home. Of Canadian ER visitors who are seen, 29 percent report wait times of over four hours, three times the U.S. level.
>
> […]Canadian seniors are 65 percent more likely to have visited the emergency room (ER) four or more times in the past year than American seniors.
>
> Ultimately, nearly 5 percent of Canadian ER visitors end up leaving without ever being treated, giving up on a medical system that is perennially "free" but out of stock at the moment. In one study at two ERs in Alberta, 14 of the 498 walkaways were subsequently hospitalized, and one died within the week.

And keep in mind how things work in a single payer system. You pay up front through your taxes. The harder you work, the more you pay into the system. When you want treatment, you just get in line behind people who never

paid one dime into the system – like all those low-skill refugees that Canada imports from Middle Eastern countries to build up the socialist voting bloc.

# Does the “legacy of slavery” explain black women’s 72% out-of-wedlock birth rate?

**Wintery Knight** · 2 July 2020 · Archived copy · Original

James White asks: does the Bible apply to black women?

I don’t like Calvinist theologian James White very much, but at least he’s willing to defend the moral teachings of the Bible against the woke identity politics that is taking over Christian churches. A few months ago he tweeted something very controversial (see above), and got into a lot of hot water with fake Christians. In this post, I’ll explain why he is right.

So, as you can see above, James is concerned that black women are having so many abortions, and he thinks that the solution to this is to encourage black women to take the Bible’s advice on sexual morality. Shocking, I know.

If you read the replies to his tweet on Twitter, you’ll see millions and millions of comments calling him a racist, and telling him that slavery is to blame for EVERYTHING that black women do wrong. Basically, the James haters say that black women can do anything they want, and should never be told that it’s wrong according to the Bible, because their bad choices are all the fault of slavery. So the Bible doesn’t even apply to them, or something.

Here is an example from a radical feminist progressive named Karen Swallow Prior:

Karen Swallow Prior says that unlike whites, blacks have no moral agency

According to the fake Christians, it's not that black women make poor choices with sex, it's that the ghosts of white slavers who raped their great-great-great grandmothers reach through time with magic and force them to have sex with hunky bad boys who won't commit to them before sex. It's not rap music calling black women hoes! It's the ghosts of slavery past. And even if this ghost theory isn't true, we shouldn't tell black women not to sin, because… it would hurt their feelings. After all, the Bible isn't a book that's designed to set boundaries to prevent self-destructive behaviors. It encourages us to listen to our hearts, be reckless, and sin as much as we can.

So when did black community problems with sex and abortion start? Did it start with slavery times? Actually, blacks were doing GREAT at marriage and sexual matters just 50 years ago.

This reply to James White explained:

Blacks married at rates comparable to whites before welfare

That's true. Black children weren't fatherless, so they weren't having early sex outside of marriage, and so they weren't getting abortions.

As the header graphic shows, black women were just as likely to be married as white women in the 1960s, FAR AFTER the days of slavery.

The reason that the graph is going upward is because daughters raised in fatherless homes tend to engage in sexual activity at younger ages, because they are seeking approval from a man which their (single) mother cannot give them. It's a tragic downwards spiral, and it affects all races. The only way to stop it is to tell women to choose marriage-minded men (not hot bad boys) and marry before having sex, like the Bible says. But woke fake Christians think the Bible is too mean, and better to allow sin by saying that sin is inevitable because slavery ghosts or something.

What's neat is that black men who take Christianity seriously are totally on board with the facts:

Black man here. Can confirm that the Bible applies to black women.
On this blog, I don't talk about my ethnicity myself, for confidentiality reasons, but I have said that my skin is darker than Barack Obama. I'm not white or Asian. And the reason that I don't fall into this trap of causing babies to be born out of wedlock is because I think that when the Bible says that sex outside of marriage is a sin, that this is true. I don't make excuses or shift blame. It's incumbent on me to obey, since I claim to be a follower of Jesus.I'm not interested in identity politics. I'm not interested in racial divisions. I'm not interested in blame-shifting. The rules are the rules. And my following of the rules caused me to not cause abortions, according to Christian specifications. Period.

When it comes to sex outside of marriage, the answer of every Bible believing Christian is simple: I'm against it. That is the correct answer, and anything more or less than this answer is demonic. If you are a Christian, sex outside of marriage is always morally wrong. And if you try to justify it, or blame someone else, in order to excuse it, then you're not a Christian at all. If you try to make excuses for why someone did it, you're not a Christian. Whether you have had it and been forgiven, or never had it, the answer is always the same: it's morally wrong. Don't do it. Never do it.

What I am seeing from people who are critical of James White's tweet is that they are basically trying to attack those who make moral judgments based on what the Bible says. They want to make room for sinners to sin. The root of abortion sin is sexual sin. Real Christians discourage sexual sin, and therefore protect unborn children. Fake Christians want to be liked by appearing compassionate, so they make excuses for sexual sin. If you take the Bible seriously on morality, you won't be liked. Those who try to excuse sin do so because their need to be liked is more important than their need to promote what the Bible teaches.

Some fake Christians will say "oh, but I do think the Bible is right about sex and marriage, but we have to care about slavery reparations and global warming and refugees and illegal immigrants and trasnsgender rights, too". Baloney. An authentic Christian is concerned about the things that the Bible teaches are "major" things. Drunkenness is a major thing. Sexual immorality is a major thing. Divorce is a major thing. Homosexuality is a major thing. If you meet a Christian who treats those issues as minor issues, and instead majors in what the secular

left tells them are major issues, then you’re talking to a fake Christian.

Christianity isn’t a brain-dead faith. You get your priorities from the Bible, and you argue those priorities using facts. The facts about marriage rates are clear and they show that the problems in the black community aren’t caused by slavery. They’re caused by single mother welfare programs. Those welfare programs taught women of all races that they didn’t have to listen to their fathers when choosing men. Those welfare programs taught women that feelings were a better guide in relationships than the Bible. Those welfare programs taught women that their eyes were a better judge of character than performance of traditional marriage roles. Those welfare programs taught women that recreational sex was a way to get a man to commit and stop being a bad boy. We need to go back to the root cause of the problem. The root cause of the problem was making excuses for disobedience to the Bible, and transferring money from married homes to out-of-control women. Of all races.

# Harvard psychology graduate fired for threatening to stab people she disagrees with

**Wintery Knight** · 3 July 2020 · Archived copy · Original

Harvard University grad Claira Janover wants to stab you for disagreeing with her

My wise advisor Dina sent me this news story about a privileged young woman who graduated Harvard University and got a job at the prestigious accounting firm Deloitte. She recorded herself threatening to stab people who disagreed with her Democrat convictions. Deloitte fired her. Now she's complaining that she is the real victim.

Here's the story in the New York Post:

> Claira Janover, who graduated in May with a degree in government and psychology, went viral after posting a short clip in which she attacked anyone with "the nerve, the sheer entitled caucasity to say 'all lives matter.'"
>
> "I'ma stab you," the Connecticut native said, zooming in close on her face.
>
> "I'ma stab you, and while you're struggling and bleeding out, I'ma show you my paper cut and say, 'My cut matters too,'" she added.

And in another New York Post article:

> In her new videos, she blamed supporters of President Trump for going after her job.
>
> "Trump supporters took my job away from me," she said in another new video posted Wednesday.
>
> […]"Now my future's entirely compromised because Trump supporters have decided to come for my life."

Yeah, getting fired for being a psychopath definitely is the same thing as Trump supporters coming for your life.

Here are the videos:

https://twitter.com/i/status/1278604728042172416

She's trying to make herself into a victim now. I think it would help if she could Jussie Smollett or Bubba Wallace up some fake threats and hate crimes against herself. That's what the universities teach young people – always be a

victim, so that you can demand sympathy when you get caught being a fascist.

Keep in mind that the standard operating procedure for secular leftists Nazis nowadays is to dox you, vandalize your property, threaten your life, get you fired from your job. But when a young, entitled leftist gets fired, it's the end of the world. These things aren't supposed to happen to them. Christians and conservatives have been putting up with hate speech and violence from secular left terrorists for years, and no one batted an eye. No matter how gentle and respectful we are when putting forward our views, we know that some unhinged secular leftist is just waiting with a knife to stab us or get us fired.

By the way, I checked her Twitter account, and she hasn't been suspended. Because making threats against conservatives doesn't violate the Twitter terms of service. It only applies one way.

# For Independence Day, let's learn about George Washington and the Battle of Trenton

**Wintery Knight** · 4 July 2020 · Archived copy · Original

Washington crosses the Delaware river before the Battle of Trenton

My favorite book about the American Revolutionary war by far is called "1776". It's written by famous historian David McCullough. The part of the book that really stuck out to me was the Battle of Trenton. I think that this battle really defines the essential character of America, as seen in the decision-making of its great general and first President, George Washington.

In the book, I learned about how George Washington and his revolutionary army had suffered a string of defeats at the hands of the powerful Commonwealth army, and their mercenary allies. It was the middle of a freezing cold winter, and the many of the sickly and ill-equipped American troops were just days from having their enlistment contracts run out. Some of the troops were not waiting for their enlistments to expire, they were just deserting. In droves.

Washington was losing, and was just days from losing his Continental Army. If the Americans lost the revolutionary war, then it would mean that every man who signed the Declaration of Independence would be hanged as a traitor. The American revolutionaries had risked everything for liberty, and they were about to lose everything – their money, their property and even their lives.

I found a page that summarizes the battles leading up to the Battle of Trenton.

First battle, a defeat for Washington:

> **The Battle of White Plains**
>
> *October 28, 1776*
>
> RESULT: BRITISH VICTORY
>
> With the British army maneuvering to make his Harlem Heights position untenable, George Washington withdrew from the island of Manhattan, and established a new encampment further north near White Plains, New York.
>
> On October 28, 1776, a flank attack by the British on this new position resulted in the collapse of Washington's line. Thankfully, he was able to orchestrate an orderly withdrawal that preserved the army. Unfortunately, Washington's retreat further exposed Fort Washington, which remained garrisoned on Manhattan.

Next, another defeat for Washington:

> **The Battle of Fort Washington**
>
> *November 16, 1776*
>
> RESULT: BRITISH VICTORY
>
> Following the defeat of George Washington's army at White Plains, New York, British General William Howe focused his army's attention on Fort Washington, the last post defended by the Continental army on Manhattan. Although Washington hoped to abandon the fort, his officers convinced him that it needed to be held in order to keep British ships from ascending the Hudson River.
>
> During a carefully-orchestrated, all-out attack on November 16, 1776, British and Hessian forces overwhelmed the fort's garrison after vicious fighting. When he heard the attack begin, Washington, who had stationed himself across the Hudson River in New Jersey, travelled across the river to the enter the fort and personally inspect its defenses. Several officers accompanied Washington, including Generals Israel Putnam, Hugh Mercer, and Nathanael Greene. They convinced Washington to leave the fort just 30 minutes before it was surrounded.

And then, another defeat for Washington:

> **Evacuation of Fort Lee**
>
> *November 20, 1776*
>
> RESULT: BRITISH VICTORY
>
> After the fall of Fort Washington, George Washington made plans for the evacuation of Fort Lee, which stood across the Hudson River in New Jersey. In a letter written to John Hancock on November 19, 1776, the general wrote that "…Fort Lee was always considered as only necessary in conjunction with [Fort Washington]…," and that it would be abandoned as soon as provisions and other supplies were removed.
>
> Unfortunately, a large British force succeeded in scaling the heights close to the fort on November 20, 1776. Faced with superior numbers, Washington called for the immediate evacuation of the fort, which resulted in the loss of dozens of cannon, 2-300 tents, and 1,000 barrels of flour.

That brings us to the Battle of Trenton. Across the Delaware river from Washington's army was an encampment of Hessian mercenaries, fighting for the British. The Hessians believed that Washington's Continental army was in full retreat. The British generals had already written home to the King to tell him that the war was nearly over, and that they had won. But had they?

**Washington crosses the Delaware**

Here is what Washington decided to do on December 25th, 1776:

> General George Washington's commitment to cross the Delaware River on Christmas 1776 foreshadowed the many hardships faced as well as the eventual victory of the Continental Army during the American Revolution. At first glance, the decision to transport 2,400 Continental soldiers across an icy river in one night, directly into a severe winter storm of sleet and snow seems irrational.
>
> Washington's decision, however, was based on strategic motivation, understanding that the Continental Army desperately needed a victory after months of intense fighting with several significant defeats and no major victories. Washington also understood that the element of surprise was the only way that he and his army stood a chance of defeating the highly trained Hessian mercenaries.
>
> On the morning of December 25, 1776, Continental soldiers woke up in their camps along the Delaware River

> to a frozen, snowy covered ground. Weather conditions worsened and temperatures continued to drop throughout the day. Late in the afternoon, the Continentals left their tents and began to form along the river in anticipation of the night's events. Washington kept almost all of the details of the crossing a secret; as a result, none of the soldiers knew anything about their upcoming mission.
>
> Washington's crossing of the Delaware River on December 25, 1776 allowed his army to strike the Hessians at Trenton the next morning.
>
> Washington's plan was to cross the river at night, march to the nearby town of Trenton, New Jersey, and attack the Hessian garrison right before dawn. Time was Washington's greatest enemy; to combat it his orders called for the various regiments to assemble at their designated crossing points no later than sunset. The close proximity to the crossing points allowed the soldiers to begin the journey immediately after nightfall struck and complete the crossing no later than midnight. Once across, Washington intended for the armies to reassemble and march approximately ten miles to Trenton, arriving there no later than five o'clock in the morning to achieve surprise. Despite his meticulous planning, the schedule failed almost before it even began.
>
> Many of the regiments did not arrive at the river until well after dark. Additionally, a severe winter storm that included wind, rain, snow, hail, and sleet met the soldiers at the banks of the river significantly slowing their crossing. Many of the boats had to combat ice jams and unfavorable currents. To make matters even worse, the extreme darkness caused by the storm made it hard for the boatmen to see the opposite shore.
>
> The necessity of using larger ferries to carry pieces of artillery across the river caused even more delays. Washington crossed the river with John Glover's Marblehead mariners and upon arrival debated whether or not to cancel the entire operation because it was more than three hours behind schedule. Washington decided it was too costly to retreat and he painfully watched as his army continued to trickle across the river.

If you were standing by the river along with Washington watching his sick, frozen, ill-equipped army struggle across the Delaware, then you would probably think that Washington had lost the element of surprise. This attack was just taking too long to happen. Maybe Washington would give up his plan, because things hadn't gone his way. But Washington didn't quit – he persisted.

The Battle of Trenton, December 25, 1776 (click for larger image)

**The Battle of Trenton**

This is how the battle went down in Trenton, New Jersey:

> Immediately following his famous crossing of the Delaware River, General George Washington marched the Continental Army to Trenton, New Jersey. The army's forces included horses, guns, wagons, and soldiers, stretching for nearly one mile. The weather was worse than it had been crossing the river, but the army continued to proceed as Washington rode up and down the column pressing his men to carry on.
>
> Shortly after eight o'clock on the morning of December 26, 1776, the Continental Army started its charge on the city. Three columns marched through thick snow with Washington personally leading the middle charge. As the soldiers pushed forward, artillery began to fire. At the same time, German drums urgently called the Hessians to arms. To his astonishment, Washington had maintained the element of surprise.
>
> Immediately after the firing began, three Hessian regiments ran from their quarters ready to fight, quickly forming ranks. As the Hessians grouped, the Continental Army entered the city at two points: John Stark marched into the city on River Road from the west, while Nathanael Greene and Washington arrived from the north.
>
> Andreas von Wiederholdt, a Hessian lieutenant, incorrectly reported to Colonel Johann Rall that the Continental Army had surrounded Trenton and there was no available route for retreat. As a result, Rall decided to counterattack Washington within the city and not retreat across Assunpink Creek. This proved to be costly as Washington's forces occupied the highest ground in the city and had clear views of all of Rall's movements.
>
> Time after time, Washington countered Rall's efforts to outflank the Continentals. Eventually, Washington's forces overpowered the Hessians. Rall was mortally wounded and many of his soldiers broke ranks, fleeing from the fighting. Normally very disciplined, Rall's regiment was confused and disoriented without their commander. They retreated to an orchard east of Trenton where they were forced to surrender.
>
> Despite the large number of Hessians that escaped Trenton, Washington still won a crucial strategic and material victory. In only one hour of fighting, the Continental Army captured nearly nine hundred Hessian officers and soldiers as well as a large supply of muskets, bayonets, swords, and cannons. Washington ordered his soldiers to treat the Hessian prisoners in a humane manner, and the general quickly focused his attention on what to do next. Washington assembled all of his officers in Trenton to discuss whether they should attack another post, hold their position in Trenton, or retreat back across the Delaware. Washington decided that because of the condition of his army, the best move was to return to their camps across the River.
>
> When the Continental Army returned to camp on the Pennsylvania side of the Delaware River, soldiers were exhausted. They had marched and fought for two straight days through rain, snow, sleet, and hail. Washington knew that his army had far exceeded expectations at Trenton and that they faced many more challenges going forward.

Washington won two more battles in rapid succession. Many of his troops re-enlisted because of these victories. There were many battles remaining to fight, and many hardships such as the winter at Valley Forge. But the Battle of Trenton was the turning point of the revolution. George Washington would not let a string of defeats stop him.

# William Lane Craig lectures on the moral argument at Georgia Tech

**Wintery Knight** · 5 July 2020 · Archived copy · Original

Making sense of the meaning of atheism
This video has 3 parts, as well as questions and answers in individual clips.

For those who cannot watch the video, you can read this essay by Dr. Craig which covers exactly the same ground as the video. The essay is for Christians already familiar with basic apologetics.

Part 1 of 3:

Part 2 of 3:

Part 2 of 3:

Here's a quick couple of quotes from the essay for those who cannot watch:

> If there is no God, then any ground for regarding the herd morality evolved by homo sapiens as objectively true seems to have been removed. After all, what is so special about human beings? They are just accidental by-products of nature which have evolved relatively recently on an infinitesimal speck of dust lost somewhere in a hostile and mindless universe and which are doomed to perish individually and collectively in a relatively short time. Some action, say, incest, may not be biologically or socially advantageous and so in the course of human evolution has become taboo; but there is on the atheistic view nothing really wrong about committing incest. If, as Kurtz states, "The moral principles that govern our behavior are rooted in habit and custom, feeling and fashion,"[5] then the non-conformist who chooses to flout the herd morality is doing nothing more serious than acting unfashionably.
>
> The objective worthlessness of human beings on a naturalistic world view is underscored by two implications of that world view: materialism and determinism. Naturalists are typically materialists or physicalists, who regard man as a purely animal organism. But if man has no immaterial aspect to his being (call it soul or mind or what have you), then he is not qualitatively different from other animal species. For him to regard human morality as objective is to fall into the trap of specie-ism. On a materialistic anthropology there is no reason to think that human beings are objectively more valuable than rats. Secondly, if there is no mind distinct from the brain, then everything we think and do is determined by the input of our five senses and our genetic make-up. There is no personal agent who freely decides to do something. But without freedom, none of our choices is morally significant. They are like the jerks of a puppet's limbs, controlled by the strings of sensory input and

> physical constitution. And what moral value does a puppet or its movements have?
>
> […]Moreover, if atheism is true, there is no moral accountability for one's actions. Even if there were objective moral values and duties under naturalism, they are irrelevant because there is no moral accountability. If life ends at the grave, it makes no difference whether one lives as a Stalin or as a saint. As the Russian writer Fyodor Dostoyevsky rightly said: "If there is no immortality, then all things are permitted."

If you want a much shorter, slicker version of this argument to share, Reasonable Faith has produced this nice 5-minute video that you can tweet or share on your Facebook page or whatever:

The moral argument is the easiest argument in the world to discuss with non-Christians, as everyone has to have an answer to questions like "what makes humans valuable?" and "why should I do the right thing when it goes against my self-interest?" and "will evildoers who escape justice in this life be punished when they die?" and "do humans have free will to make moral choices?" These are interesting questions, and people can just give their opinion and then think about it as they discuss it.

You can read a debate transcript where Dr. Craig puts his ideas to the test, against Dr. Richard Taylor. I found this debate very helpful for answering the question that everyone should be able to answer: "why should I be moral?"

# Frank Turek lectures on the case against same-sex marriage

**Wintery Knight** · 6 July 2020 · Archived copy · Original

About the speaker Frank Turek:

> Dr. Frank Turek is a dynamic speaker and award-winning author or coauthor of four books: Stealing from God: Why Atheists Need God to make their Case, I Don't Have Enough Faith to be an Atheist, Correct, Not Politically Correct and Legislating Morality. As the President of CrossExamined.org, Frank presents powerful and entertaining evidence for Christianity at churches, high schools and at secular college campuses that often begin hostile to his message. He has also debated several prominent atheists including Christopher Hitchens and David Silverman, president of American Atheists.
>
> Frank hosts an hour-long TV program each week called I Don't Have Enough Faith to Be an Atheist that is broadcast Wednesday nights on DirecTV Channel 378 (the NRB Network). His radio program called CrossExamined with Frank Turek airs on 122 stations every Saturday morning at 10 a.m. eastern and is available continuously on the free CrossExamined App.
>
> A former aviator in the US Navy, Frank has a master's degree from the George Washington University and a doctorate from Southern Evangelical Seminary. He and his wife, Stephanie, are blessed with three grown sons.

Frank Turek is one of my favorite speakers, and I admire him for being willing to take a public stand on controversial issues like gay marriage. He's actually had to pay a price for that in his professional life, and I blogged about that before.

Here's the lecture on gay marriage, featuring Christian apologist Frank Turek.

Outline:

Outline of Frank Turek's lecture on same sex marriage

Introduction:

- how to present your case against marriage safely
- Christians are required to go beyond tolerance
- loving another person can mean opposing the person when they want to do something wrong, even if they hate you

- what did Jesus say about marriage? (see Matt 19:4-6)
- what did Jesus say about sexual morality? (Matt 15, Matt 19)

Summary:

- the same-sex marriage debate is about whether to compel people who disagree with the gay lifestyle to validate and normalize it
- P1: the government has an interest in marriage because it perpetuates and stabilizes society – this is the purpose of marriage
- P2-4: government can take 3 kinds of stances towards behaviors: promote, permit or prohibit
- government promotes behaviors when it has an interest in them
- same-sex relationships should be permitted, but not promoted
- Q1: if same-sex marriage had serious negative consequences, would you reconsider their position?
- Q2: are heterosexual relationships the same as homosexual relationships?
- Q3: what would society be like if everyone married according to the natural marriage definition: one woman, one man, for life?
- Q4: what would society be like if everyone married according to the same-sex marriage definition: man/man and woman/woman?
- Should Christians care about law and politics? or should they just preach the gospel?
- They should care because people often get their cues about what is moral and immoral based on what is legal and illegal
- Many of the social problems we see today can be traced back to problems with marriage and family
- Children do much better when they have a relationship with their mother and their father
- Same-sex marriage necessarily destroys the relationship between a child and its mother or its father
- When a country embraces same-sex marriage, it reinforces the idea that marriage is not about making and raising children
- same-sex marriage shifts the focus away from the needs of the children to the feelings of desires of the selfish adults
- does homosexuality impose any health and mental health risks?
- what has the impact of legalizing same-sex marriage been in Massachusetts to individuals, schools, businesses and charities?
- how same-sex marriage poses a threat to religious liberty
- how should you respond to the view that homosexuality is genetic?

And at the very end, he shows this short video, which is only 5 minutes and explains the logic of opposing the redefinition of marriage:

My biggest concern is religious liberty, and we are seeing how same-sex marriage has proven to be incompatible with religious liberty. But I also care about children… I want them to have mothers and fathers who put their needs first. Marriage is about a commitment – it is the subjugation of feelings and desires to responsibilities and obligations. It is a promise. A promise to commit to love your spouse and children regardless of feelings and desires. It requires more self-denial, self-control and self-sacrifice. Not less.

# Everyone is talking about President Trump's Mount Rushmore speech, so here it is

**Wintery Knight** · 6 July 2020 · Archived copy · Original

Video of the speech:

And full transcript of the speech.

Excerpt:

> Our nation is witnessing a merciless campaign to wipe out our history, defame our heroes, erase our values, and indoctrinate our children.
>
> Angry mobs are trying to tear down statues of our Founders, deface our most sacred memorials, and unleash a wave of violent crime in our cities. Many of these people have no idea why they are doing this, but some know exactly what they are doing. They think the American people are weak and soft and submissive. But no, the American people are strong and proud, and they will not allow our country, and all of its values, history, and culture, to be taken from them.
>
> One of their political weapons is "Cancel Culture" — driving people from their jobs, shaming dissenters, and demanding total submission from anyone who disagrees. This is the very definition of totalitarianism, and it is completely alien to our culture and our values, and it has absolutely no place in the United States of America. This attack on our liberty, our magnificent liberty, must be stopped, and it will be stopped very quickly. We will expose this dangerous movement, protect our nation's children, end this radical assault, and preserve our beloved American way of life.
>
> In our schools, our newsrooms, even our corporate boardrooms, there is a new far-left fascism that demands absolute allegiance. If you do not speak its language, perform its rituals, recite its mantras, and follow its commandments, then you will be censored, banished, blacklisted, persecuted, and punished. It's not going to happen to us.
>
> Make no mistake: this left-wing cultural revolution is designed to overthrow the American Revolution. In so doing, they would destroy the very civilization that rescued billions from poverty, disease, violence, and hunger, and that lifted humanity to new heights of achievement, discovery, and progress.
>
> To make this possible, they are determined to tear down every statue, symbol, and memory of our national heritage.

And:

> We will state the truth in full, without apology: We declare that the United States of America is the most just and exceptional nation ever to exist on Earth.
>
> We are proud of the fact — that our country was founded on Judeo-Christian principles, and we understand — that these values have dramatically advanced the cause of peace and justice throughout the world.
>
> We know that the American family is the bedrock of American life.
>
> We recognize the solemn right and moral duty of every nation to secure its borders. And we are building the wall.
>
> We remember that governments exist to protect the safety and happiness of their own people. A nation must care for its own citizens first. We must take care of America first. It's time.
>
> We believe in equal opportunity, equal justice, and equal treatment for citizens of every race, background, religion, and creed. Every child, of every color — born and unborn — is made in the holy image of God.

> We want free and open debate, not speech codes and cancel culture.
>
> We embrace tolerance, not prejudice.
>
> We support the courageous men and women of law enforcement. We will never abolish our police or our great Second Amendment, which gives us the right to keep and bear arms.
>
> We believe that our children should be taught to love their country, honor our history, and respect our great American flag.
>
> We stand tall, we stand proud, and we only kneel to Almighty God.
>
> This is who we are. This is what we believe. And these are the values that will guide us as we strive to build an even better and greater future.

- President Delivers Patriotic Speech Sending Trump Deranged Media Into Rage

# Children dying in droves in cities that have been run by Democrats for decades

**Wintery Knight** · 7 July 2020 · Archived copy · Original

Only 15 unarmed black men were shot and killed by police in the past year. The BLM push for Marxism as a fix for "police brutality" is based on these 15 deaths. But what about the hundreds and thousands of black deaths at the hands of black criminals? BLM, their mainstream media allies are silent about that, because they know Democrats run those cities.

Daily Wire explains:

> At least half a dozen children were shot and killed over the holiday weekend as high levels of violence ravaged some of the United States' largest cities.
>
> The children's ages ranged from 6 to 14 as they fell victim to violence in cities from Washington, D.C., to San Francisco, according to the list compiled by CNN. In some cases, the tragedies added to already surging levels of violence from last year to this year.
>
> In Washington, D.C., 11-year-old Davon McNeal was preparing to leave a Fourth of July cookout with his mother when shooting broke out somewhere nearby. A bullet struck the youth football player in the head, killing him, according to The Washington Post.
>
> […]Just under 90 people have been killed in Washington, D.C., this year, a roughly 17% increase over last year. 2019 ended with the most people killed in the city in a decade.

The victim was black.

More:

> In Atlanta, 8-year-old Secoriea Turner was killed when a group of armed individuals fired at the vehicle she was riding in near the burned-out shell of a Wendy's restaurant where Rayshard Brooks was killed last month.
>
> […]More than 30 people were killed on Saturday and Sunday in the city, continuing a wave of violence that has ravaged Atlanta since protests over the death of George Floyd began. The violence intensified after Brooks' death.

The victim was black.

More:

> In Chicago, 7-year-old Natalia Wallace and a 14-year-old boy whose name has not yet been released were victims in two separate shootings over the weekend. Both children were killed while celebrating the July 4th holiday with friends and family, according to ABC News.
>
> […]The number of homicides in Chicago has jumped by about 34%. This June, there were 329 homicides, up year over year from 246 in 2019.

The victims were black.

All of these cities are run by Democrat party mayors, and Democrat party city councils. They have been for decades. Many of the majors and city council members are black. But in all that time, nothing was done by these Democrats to fix crime. These Democrat politicians are extremely permissive of crime and criminals, and they don't dare take on the root cause of the crime problem: fatherlessness.

Fatherlessness and crime

Here is how BLM responds to the problem of fatherlessness:

> We disrupt the Western-prescribed nuclear family structure requirement by supporting each other as extended families and "villages" that collectively care for one another, especially our children, to the degree that mothers, parents, and children are comfortable.

The more people get married and stay married, the less supportive they are of communist government. They don't want government confiscating and redistributing their earnings – they want their earnings to stay in the family. BLM isn't in favor of that. And that's why they are strangely silent about the crime wave caused by children raised in fatherless homes. They don't want to fix the root cause of crime, because that would destroy support for their real goal: communism.

# The psychological motivation of those who embrace postmodernism

**Wintery Knight** · 8 July 2020 · Archived copy · Original

Can a person be postmodern and a Christian? Not for long

Famous analytical philosopher John Searle has written a book "Mind, Language And Society: Philosophy In The Real World", explaining what's factually wrong with postmodernism. In the introduction, he explains what postmodernism is, and what motivates people to accept postmodernism.

He writes:

> […][W]hen we act or think or talk in the following sorts of ways we take a lot for granted: when we hammer a nail, or order a takeout meal from a restaurant, or conduct a lab experiment, or wonder where to go on vacation, we take the following for granted: there exists a real world that is totally independent of human beings and of what they think or say about it, and statements about objects and states of affairs in that world are true or false depending on whether things in the world really are the way we say they are. So, for example, if in pondering my vacation plans I wonder whether Greece is hotter in the summer than Italy, I simply take it for granted that there exists a real world containing places like Greece and Italy and that they have various temperatures. **Furthermore, if I read in a travel book that the average summer temperature in Greece is hotter than in Italy, I know that what the book says will be true if and only if it really is hotter on average in the summer in Greece than in Italy. This is because I take it for granted that such statements are true only if there is something independent of the statement in virtue of which, or because of which, it is true.**
>
> […]These two Background presuppositions have long histories and various famous names. The first, that there is a real world existing independently of us, I like to call "external realism." "Realism," because it asserts the existence of the real world, and "external" to distinguish it from other sorts of realism-for example, realism about mathematical objects (mathematical realism) or realism about ethical facts (ethical realism). The second view, that a statement is true if things in the world are the way the statement says they are, and false otherwise, is called "the correspondence theory of truth." This theory comes in a lot of different versions, but the basic idea is that statements are true if they correspond to, or describe, or fit, how things really are in the world, and

> false if they do not.

The “correspondence theory of truth” is the view of truth assumed in books of the Bible whose genre is such that that they were intended by the authors to be taken *literally*, (with allowances for symbolism, figures of speech, metaphors, hyperbole, etc.).

But what about the postmodernists, who seek to deny the objectivity of external reality?

More Searle:

> Thinkers who wish to deny the correspondence theory of truth or the referential theory of thought and language typically find it embarrassing to have to concede external realism. Often they would rather not talk about it at all, or they have some more or less subtle reason for rejecting it. In fact, very few thinkers come right out and say that there is no such thing as a real world existing absolutely, objectively, and totally independently of us. Some do. Some come right out and say that the so-called real world is a “social construct.”

What is behind the denial of objective reality, and statements about external reality that are warranted by evidence?

> It is not easy to get a fix on what drives contemporary antirealism, but if we had to pick out a thread that runs through the wide variety of arguments, it would be what is sometimes called “perspectivism.” Perspectivism is the idea that our knowledge of reality is never “unmediated,” that it is always mediated by a point of view, by a particular set of predilections, or, worse yet by sinister political motives, such as an allegiance to a political group or ideology. And because we can never have unmediated knowledge of the world, then perhaps there is no real world, or perhaps it is useless to even talk about it, or perhaps it is not even interesting.

Searle is going to refute anti-realism in the rest of the book, but here is his guess at what is motivating the anti-realists:

> > **I have to confess, however, that I think there is a much deeper reason for the persistent appeal of all forms of antirealism, and this has become obvious in the twentieth century: it satisfies a basic urge to power. It just seems too disgusting, somehow, that we should have to be at the mercy of the “real world.” It seems too awful that our representations should have to be answerable to anything but us. This is why people who hold contemporary versions of antirealism and reject the correspondence theory of truth typically sneer at the opposing view.**
>
> […]I don’t think it is the argument that is actually driving the impulse to deny realism. I think that as a matter of contemporary cultural and intellectual history, the attacks on realism are not driven by arguments, because the arguments are more or less obviously feeble, for reasons I will explain in detail in a moment. **Rather, as I suggested earlier, the motivation for denying realism is a kind of will to power, and it manifests itself in a number of ways. In universities, most notably in various humanities disciplines, it is assumed that, if there is no real world, then science is on the same footing as the humanities. They both deal with social constructs, not with independent realities. From this assumption, forms of postmodernism, deconstruction, and so on, are easily developed, having been completely turned loose from the tiresome moorings and constraints of having to confront the real world. If the real world is just an invention-a social construct designed to oppress the marginalized elements of society-then let’s get rid of the real world and construct the world we want. That, I think, is the real driving psychological force behind antirealism at the end of the twentieth century.**

Now, I’ll go one step further than Searle.

People, from the Fall, have had the desire to step into the place of God. It's true that we creatures exist in a universe created and designed by God. But, there is a way to work around the fact that God made the universe and the laws that the universe runs on, including logic, mathematics and natural laws. And that way is to *deny logic, mathematics and natural laws.* Postmodernists simply deny that there is any way to construct rational arguments and support the premises with evidence from the real world. That way, they imagine, they are free to escape a God-designed world, including a God-designed specification for how they ought to live. The postmoderns deny *the reliable methods of knowing about the God-created reality because logic and evidence can be used to point to God's existence, God's character, and God's actions in history.*

And that's why there is this effort to make reality "optional" and perspectival. Everyone can be their own God, and escape any accountability to the real God – the God who is easily discovered through the use of logic and evidence. I believe that this is also behind the rise of atheists, who feign allegiance to logic and science, but then express "skepticism" about the origin of the universe, the fine-tuning of the universe, objective morality, the minimal facts concerning the historical Jesus, and other undeniables.

# Authors of study showing no police bias against blacks want their study retracted

**Wintery Knight** · 9 July 2020 · Archived copy · Original

If you're looking for truth, you won't find it at the university
The Wall Street Journal reports:

> The Proceedings of the National Academy of Sciences is a peer-reviewed journal that claims to publish "only the highest quality scientific research." Now, the authors of a 2019 PNAS article are disowning their research simply because I cited it.
>
> Psychologists Joseph Cesario of Michigan State and David Johnson of the University of Maryland analyzed 917 fatal police shootings of civilians from 2015 to test whether the race of the officer or the civilian predicted fatal police shootings. Neither did. Once "race specific rates of violent crime" are taken into account, the authors found, there are no disparities among those fatally shot by the police. These findings accord with decades of research showing that civilian behavior is the greatest influence on police behavior.
>
> In September 2019, I cited the article's finding in congressional testimony. I also referred to it in a City Journal article, in which I noted that two Princeton political scientists, Dean Knox and Jonathan Mummolo, had challenged the study design. Messrs. Cesario and Johnson stood by their findings. Even under the study design proposed by Messrs. Knox and Mummolo, they wrote, there is again "no significant evidence of anti-black disparity in the likelihood of being fatally shot by the police."
>
> My June 3 Journal op-ed quoted the PNAS article's conclusion verbatim. It set off a firestorm at Michigan State. The university's Graduate Employees Union pressured the MSU press office to apologize for the "harm it caused" by mentioning my article in a newsletter. The union targeted physicist Steve Hsu, who had approved funding for Mr. Cesario's research. MSU sacked Mr. Hsu from his administrative position. PNAS editorialized that Messrs. Cesario and Johnson had "poorly framed" their article—the one that got through the journal's three levels of editorial and peer review.
>
> Mr. Cesario told this page that Mr. Hsu's dismissal could narrow the "kinds of topics people can talk about, or what kinds of conclusions people can come to." Now he and Mr. Johnson have themselves jeopardized the possibility of politically neutral scholarship. On Monday they retracted their paper. They say they stand behind its conclusion and statistical approach but complain about its "misuse," specifically mentioning my op-eds.
>
> The authors don't say how I misused their work.

College Fix notes that Michigan State University has even deleted a press release they had put out about the study, in which they praised it. The press release said:

> Reports of racially motivated, fatal shootings by police officers have garnered extensive public attention and sparked activism across the nation. New research from Michigan State University and University of Maryland reveals findings that flip many of these reports on their heads – white police officers are not more likely to have shot minority citizens than non-white officers.
>
> "Until now, there's never been a systematic, nationwide study to determine the characteristics of police involved in fatal officer-involved shootings," said Joseph Cesario, co-author and professor of psychology at MSU. "There are so many examples of people saying that when black citizens are shot by police, it's white officers shooting them. In fact, our findings show no support that black citizens are more likely to be shot by white officers."

In addition to trying to retract the study, and deleting the press release, we also have people losing their jobs.

College Fix notes:

> Michigan State University leaders have successfully pressured Stephen Hsu to resign from his position as vice president of research and innovation after the Graduate Employees Union launched a campaign to oust him from his role.

As VP of research, he allocated money to partially fund the study. And the woke-scolds at MSU didn't like that, so they got him to resign. There was no problem found with the research or the funding, they just didn't like the conclusion.

If you're going to go to university, be careful what you study. If you're going to get a job, be careful what job you get and where you work. You need to be thinking about what sorts of programs and workplaces harbor these far-left psychopaths.

# Podcast: Was Jesus a socialist? Does Christianity teach socialism?

**Wintery Knight** · 10 July 2020 · Archived copy · Original

Let's take a deep dive into the Bible

I noticed that Christianity Today, which has turned hard left in recent years, is now openly endorsing socialism. So, I thought it might be a good idea to listen to this new episode of the Think Biblically podcast, which deals with the issue of Christianity and socialism. The hosts actually brought an economist on to define socialism, then they analyze the teachings of Jesus.

Here's the description: (H/T Nathan)

> It has not been uncommon for advocates of virtually every economic system to invoke Jesus in support of their views, though some of the most ardent advocates for both capitalism and socialism did not have any particular religious views themselves (Rand, Marx). Over the years, some of the more recent advocates of socialist type economic arrangements have appealed to Jesus and the gospels in support of such systems. Economist Lawrence Reed helps us sort out the application of the teaching of Jesus to economics and its relevance for economic life today. Join us for this provocative conversation as he tackles the question of Jesus and socialism.
>
> Show notes, including a full transcript, are available at: biola.edu/thinkbiblically

Topics:

- who plans the economy in socialism?
- who should own the means of production in socialism?
- how should wealth be distributed in socialism?
- what tools does socialism use to provide people with health care, employment, security, etc.
- which countries have adopted socialism? North Korea? Cuba? Venezuela? How about the Scandinavian countries?
- what in the New Testament has caused people to think that Jesus was a socialist?
- did Jesus ever advocate for concentrating power in the government in order to meet the material needs of people?

- did Jesus ever advocate for voluntary charity in order to meet the material needs of people?
- in our experience, is government seen to be more compassionate or less compassionate than individual people?
- does voluntary charity have any advantages over forced redistribution by a powerful central government?
- what about the example of common possessions among the earliest Christians?
- what is the Bible's view of wealth? is it always bad to be wealthy, or does it matter how you obtained it and how you use it?
- what does the parable of the talents tell us about socialism vs capitalism?
- what does the parable of the good Samaritan tell us about socialism vs capitalism?
- what does the parable of the three different shifts of workers tell us about socialism vs capitalism?
- what about socialist policies and higher tax rates in countries like Canada and Scandinavian countries?

I have to be honest. I think that some of the economics reasoning about the parables was a stretch, because those parables are talking mainly about other topics, not economics. But it's true that the parables aren't friendly to socialism even if they are interpreted as being about economics.

# Should black conservatives be allowed to form their own beliefs?

**Wintery Knight** · 11 July 2020 · Archived copy · Original

Are black conservatives allowed to form their own views in America?
My friend Wes sent me an hour-long video, featuring famous black conservative Larry Elder.

Outline:

> 1:23 New "Uncle Tom" documentary
>
> 10:53 Stats don't show systemic police racism
>
> 14:30 Why police body cams are a good idea
>
> 28:12 The rise of "revenge culture"
>
> 38:39 Affirmative action is condescending?
>
> 44:03 Issues in the Black Lives Matter movement
>
> Are police actually using deadly force disproportionately against black people? And how does the focus on police overshadow other monumental problems facing black America today? Why is believing that, black lives matter, not the same as supporting the Black Lives Matter organization? And, why are black conservatives often excluded from mainstream public awareness and discourse? In this episode, we sit down again with radio talk show personality and bestselling author Larry Elder, who hosts The Larry Elder Show for The Epoch Times. He is the executive producer of the new documentary "Uncle Tom."

Here's the video:

For those who cannot watch, I found you a good Larry Elder column about race and policing.

It says:

> A new study on racial disparities in police conduct found that differences in offending by suspects, not racism, explains officers' responses.
>
> In the study "Is There Evidence of Racial Disparity in Police Use of Deadly Force?" professors from Michigan State and Arizona State universities analyzed officer-involved fatal shootings in 2015 and 2016. The report's abstract says: "We benchmark two years of fatal shooting data on 2016 crime rate estimates. When adjusting for crime, we find no systematic evidence of anti-black disparities in fatal shootings, fatal shootings of

> unarmed citizens, or fatal shootings involving misidentification of harmless objects… Exposure to police given crime rate differences likely accounts for the higher per capita rate of fatal police shootings for blacks, at least when analyzing all shootings. For unarmed shootings or misidentification shootings, data are too uncertain to be conclusive."
>
> Two recent studies found cops more reluctant to use deadly force against blacks, including one by a black Harvard economist. Professor Roland G. Fryer Jr. concluded: "On the most extreme use of force — officer-involved shootings — we find no racial differences in either the raw data or when contextual factors are taken into account."
>
> But aren't blacks routinely "racially profiled" by cops? Not according to the Police-Public Contact Survey. Produced every three years by the Department of Justice's Bureau of Justice Statistics, the survey asks more than 60,000 people about their interactions with the police. It asks respondents' to provide age, race and gender. It asks them whether they had any contact with the police in the last year; what was the experience like; how were your treated; was there a use of force and so on. Turns out, according to a September 2017 National Review article, black men and white men are about equally likely to have a contact with a cop in a given year. As to multiple contacts, defined as three or more with the police in a given year, 1.5 percent of blacks vs. 1.2 percent of whites fall in that category. Not much difference.
>
> There's also the National Crime Victimization Survey, which questions victims of crimes, whether or not the criminal was captured, as to the race and ethnicity of the suspect. It turns out that the race of the arrested matches the percentage given by victims. So unless victims are lying about the race of their assailant, unconcerned about whether he gets caught, blacks are not being "overarrested."
>
> […]In 2012 in the city of Rialto, California, population approximately 100,000, cops were randomly assigned body cameras based on their shifts. Over the next year, use-of-force incidents on the shifts that had cameras were half the rate of those without cameras. But something rather extraordinary also happened. Complaints against all Rialto police officers with were down almost 90 percent from the prior year.
>
> It turns out when civilians knew they were being recorded, they — not the cops — behaved better and stop making false accusations. The use of force by cops also declined, but, again, not because the police changed their conduct. No, the cops continued performing as they'd been trained. Civilians, aware that they were being taped, were less confrontational and were more likely to cooperate and follow instructions. As a result, cops needed to use force less frequently.

I have never read a Larry Elder book, because I like audio books, and his books are almost never made into audio books. If you've read one, leave me a comment so I know which ones are good.

# William Lane Craig explains the doctrine of penal substitutionary atonement

**Wintery Knight** · 12 July 2020 · Archived copy · Original

I have a key that will unlock a puzzling mystery

Probably one of the most common questions that you hear from people who don't fully understand Christianity is this question: "why did Jesus have to die?". The answer that most Christians seem to hold to is that 1) humans are rebelling against God, 2) Humans deserve punishment for their rebellion, 3) Humans cannot escape the punishment for their rebellion on their own, 4) Jesus was punished in the place of the rebellious humans, 5) Those who accept this sacrifice are forgiven for their rebelling.

**Are humans rebellious?**

Some people think that humans are not really rebellious at all, but it's actually easy to see. You can see it just by looking at how people spend their time. Some of us have no time for God at all, and instead try to fill our lives with material possessions and experiences in order to have happy feelings. Some of us embrace just the parts of God that make us feel happy, like church and singing and feelings of comfort, while avoiding the hard parts of that vertical relationship; reading, thinking and disagreeing with people who don't believe the truth about God. And so on.

This condition of being in rebellion is universal, and all of us are guilty of breaking the law at some point. All of us deserve to be separated from God's goodness and love. Even if we wanted to stop rebelling, we would not be able to make up for the times where we do rebel by being good at other times, any more than we could get out of a speeding ticket by appealing to the times when we drove at the speed limit, (something that I never do, in any case).

This is not to say that all sinners are punished equally – the degree of punishment is proportional to the sins a person commits. However, the standard is perfection. And worse than that, the most important moral obligation is a *vertical* moral obligation. You can't satisfy the demands of the moral law just by making your neighbor happy, while treating God like a pariah. The first commandment is to love God, the second is to love your neighbor. Even loving your neighbor requires you to tell your neighbor the truth – not just to make them feel good. The *vertical* relationship is more important than the *horizontal* one, and we've all screwed up the vertical relationship. We all don't want God to be there, telling us what's best for us, interfering with our fun. We don't want to relate to a loving God if it means having to care what he thinks about anything that we are doing.

**Who is going to pay for our rebellion?**

The Christian answer to the problem of our rebellion is that Jesus takes the punishment we deserve in our place.

However, I've noticed that on some atheist blogs, they don't like the idea that someone else can take our punishment for us to exonerate us for crimes that we've committed. So I'll quote from this post by the great William Lane Craig, to respond to that objection.

Excerpt:

> The central problem of the Penal Theory is, as you point out, understanding how punishing a person other than the perpetrator of the wrong can meet the demands of justice. Indeed, we might even say that it would be wrong to punish some innocent person for the crimes I commit!
>
> It seems to me, however, that in other aspects of human life we do recognize this practice. I remember once sharing the Gospel with a businessman. When I explained that Christ had died to pay the penalty for our sins, he responded, "Oh, yes, that's imputation." I was stunned, as I never expected this theological concept to be familiar to this non-Christian businessman. When I asked him how he came to be familiar with this idea, he replied, "Oh, we use imputation all the time in the insurance business." He explained to me that certain sorts of insurance policy are written so that, for example, if someone else drives my car and gets in an accident, the responsibility is imputed to me rather than to the driver. Even though the driver behaved recklessly, I am the one held liable; it is just as if I had done it.
>
> Now this is parallel to substitutionary atonement. Normally I would be liable for the misdeeds I have done. But through my faith in Christ, I am, as it were, covered by his divine insurance policy, whereby he assumes the liability for my actions. My sin is imputed to him, and he pays its penalty. The demands of justice are fulfilled, just as they are in mundane affairs in which someone pays the penalty for something imputed to him. This is as literal a transaction as those that transpire regularly in the insurance industry.

So, it turns out that the doctrine of substitionary atonement is not as mysterious or as objectionable as everyone seems to think it is.

# Minnesota wouldn't stop BLM rioters, now they want a bailout from taxpayers

**Wintery Knight** · 13 July 2020 · Archived copy · Original

Minneapolis gave the rioters space to riot

A central conservative tenet is that you have to be tough with aggressors in order to deter them from attacking you. You don't always have to fight them, but you have to be well-armed. And you have to make the other side believe that if they attack you, it will be costly. Democrats don't believe in deterring aggression with strength. Their policy towards evil is appeasement.

You can see how this played out in Minnesota, where the Democrat governor of the state, and the Democrat mayor of the Minneapolis, decided to tell police to stand down. This allowed the rioters to engage in violence, vandalism and arson against the law-abiding taxpayers of the state.

Well, now that it's over, the Democrat appeasers are looking for someone to pay for the damages. They want the taxpayers in other states to pay. You know, the other states where the police actually did enforce the law.

The Washington Examiner reported on the response of the federal government:

> President Trump has denied a request from Minnesota's governor for money to rebuild parts of Minneapolis that were destroyed during the riots following the death of George Floyd.
>
> […]Walz, a Democrat, requested that Trump declare Minnesota a "major disaster" zone in a request to the Federal Emergency Management Agency on July 2 after more than 1,500 buildings were damaged by looting and rioting in the wake of Floyd's death, totaling over $500 million in damages.
>
> At least one Republican in the state had lobbied the Trump administration to reject the request, arguing that the state's response to the unrest should be thoroughly reviewed.
>
> "If the federal government is expected to assist in the clean-up of these unfortunate weeks, it has an obligation to every American — prior to the release of funding — to fully understand the events which allowed for this level of destruction to occur and ensure it never happens again," Rep. Tom Emmer wrote to the Trump administration in a letter.

Just remember that as soon as the Democrats get a Democrat president, taxpayer money will be redistributed from the responsible red states, to the irresponsible blue states. This is what Democrats love – to provide equal outcomes

for both moral and immoral people through redistribution of wealth from moral people to immoral people.

# Why do some Christians say “all sins are equally bad” and “everyone is equally guilty”?

**Wintery Knight** · 14 July 2020 · Archived copy · Original

Young women very supportive of premarital sex

We were having a discussion about whether the Bible teaches that sex before marriage is morally wrong, and someone said “impure thoughts counts as adultery… there isn’t a virgin among us”.

Regarding her point that lust is equal to adultery, and so no one is really a virgin, here’s Ligonier Ministries:

> In demonstrating that the seventh commandment was given also to prohibit lust, Jesus is not somehow saying that an unconsummated lustful intent is sinful to the same degree as an actual extramarital affair (though both sins merit punishment). The latter is a more blatant violation of the statute against adultery, and it has greater consequences in the form of divorce and the loss of one’s reputation as a trustworthy person.

Any serious student of the Bible is aware of Jesus’ tendency to exaggerate / use hyperbole.

Also, 1 Corinthians 7 says that wives are not supposed to make a habit of denying their husbands sex. Sex withholding is more of an epidemic today than pornography, and it should also be on the adultery spectrum. It isn’t as bad as adultery, but it definitely breaks the marital covenant.

So why would someone say that lust is the same as adultery, and that there is no such thing as a virgin?

Dr. Michael Krueger recently blogged about this “all sins are equal” view.

Krueger says this:

> First, to say all sins are the same is to confuse the *effect* of sin with the *heinousness* of sin. While all sins are equal in their effect (they separate us from God), they are not all equally heinous.
>
> Second, the Bible differentiates between sins. Some sins are more severe in terms of impact (1 Cor 6:18), in terms of culpability (Rom 1:21-32), and in terms of the judgment warranted (2 Pet 2:17; Mark 9:42; James 3:1).

Krueger explains the motivation behind the slogans:

> [S]ome Christians… use this phrase as way to “flatten out” all sins so that they are not distinguishable from

> each other. Or, to put it another way, this phrase is used to portray all human beings as precisely the same. If all sins are equal, and all people sin, then no one is more holy than anyone else.
>
> In a world fascinated with "equality," this usage of the phrase is particularly attractive to folks. It allows everyone to be lumped together into a single undifferentiated mass.
>
> Such a move is also useful as a way to prevent particular behaviors from being condemned. If all sins are equal, and everyone is a sinner, then you are not allowed to highlight any particular sin (or sinner).
>
> Needless to say, this usage of the phrase has featured largely in the recent cultural debates over issues like homosexuality. Yes, homosexuality is a sin, some Christians reluctantly concede. But, they argue, all sins are equal in God's sight and therefore it is no different than anything else. Therefore, Christians ought to stop talking about homosexuality unless they are also willing to talk about impatience, anger, gluttony, and so on.

Krueger also posted this fascinating follow up post, where he looks at how the phrase is being used by people on Twitter.

Look at these tweets:

> - All sins are equal. People tend to forget that. There is no bigger or smaller sin. Being gay and lying, very equal.

> - all sins are equal in God's eyes. whatever you're doing, is no better than what someone else is doing.

> - If you have sex before marriage please don't come on social media preaching about the wrongs of homosexuality. All sins are equal

> - Need people to realize that all sins are equal… don't try to look down on me or question my faith just cuz you sin differently than I do.

> - Don't understand why you're so quick to judge me, when all sins are equal. So much for family..

> - if you think being gay is a sin, let me ask you something, have you not done anything wrong in your life? all sins are equal. we're sinners

> - Nope no difference at all. All sins are equal no matter what you're running for. The bible says do not judge lest ye be judged

> - A huge problem I have with religion is the notion that all sins are equal. Like pre-martial sex and murder are the same amount t of bad.

> - people do bad things because they believe that all sins are equal and ~god~ loves y'all equally so he's going

> to forgive you naman ha ha ha

> - It a sin to condemn another sinner and their actions. All sins are equal. So what makes you better than the person you're condemning?

> - I think so b/c having sex before marriage doesn't make you less of a women then if you waited until marriage.. all sins are equal soo

> - friendly reminder, all sins are equal in gods eyes so you're not better than I am in any way. please worry about your own sins before mine.

> - People don't like when I suggest abortion as an option. This is a free country and all sins are equal so mind your business!!!

> - What I do is no worse than wat you do… all sins are equal no matter what it is… a sin is a sin

> - to god all sins are equal so you have no right to compare your sins to someone else's bc in the end it doesn't matter

The first thing that I noticed is that premarital sex and homosexuality are the most popular sins. I would think that divorce and abortion would be up there in the rankings, as well.

People want to be free to follow their hearts when seeking pleasure, then quote the Bible (badly) afterwards, to attack anyone who says that anything they've done is morally wrong. They would rather escape the judgment of their peers than admit fault and try to fix the mistake, and do better next time. And they would rather tell people who are hurting themselves by breaking the rules that there are no rules. It makes them feel good to "not judge" – they feel as if they are being kind. Their compassion looks good to non-Christians. And they're promoting moral relativism which, when it becomes widespread, prevents anyone from judging them.

It's so bad now, that the people who *have* morals and who *make* moral judgments are seen as the real bad people. The immoral people are on the offense, and even trying to ban people from being able to disagree with them.

# What is the fine-tuning argument for God's existence, and does the multiverse counter it?

**Wintery Knight** · 15 July 2020 · Archived copy · Original

Christianity and the progress of science

One of the best arguments for the existence of a Creator and Designer of the universe is the cosmic fine-tuning argument. The argument argues that individual constants and quantities in nature cannot be much smaller or larger than they are, because it would remove the ability of the universe to support life of any kind. Dr. Michael Strauss, an experimental physicist, explains some examples of the fine-tuning in a recent post on his blog.

He writes:

> I liken the finely-tuned universe to a panel that controls the parameters of the universe with about 100 knobs that can be set to certain values. If you turn any knob just a little to the right or to the left the result is either a universe that is inhospitable to life or no universe at all.
>
> Consider the knob that controls the strength of the strong nuclear force that holds quarks inside the neutrons and protons and binds the nucleus of the atom together. If the strength were increased by 2%, the element hydrogen would be either non-existent or very rare. Without hydrogen there would be no water ($H_2O$) or stars that burn hydrogen as their nuclear fuel like our sun. Without hydrogen there would be no life. If the strength of the strong nuclear force were decreased by about 5%, then hydrogen would be the only element in the universe. That would simplify the periodic table and make Chemistry class very easy, but it would render life impossible.
>
> All known life in this universe is based on the element carbon, which is formed in the final stages of a star's life. The carbon you and I are made of is the result of the nuclear processes that occurred as previous stars ended their lives. One nice recent study showed that if the mass of the quarks that make up neutrons and protons were changed by just a few percent, then the process that makes carbon as stars die would be altered in such a way that there would not be sufficient carbon in the universe for life. The masses of the lightest sub-atomic quarks are the precise value that is required for carbon to form and for life to exist.

Regarding the multiverse, let me just quote from MIT physicist Alan Lightman, writing in Harper's magazine about the multiverse:

> The… conjecture that there are many other worlds… [T]here is no way they can prove this conjecture. That same uncertainty disturbs many physicists who are adjusting to the idea of the multiverse. Not only must we accept that basic properties of our universe are accidental and uncalculable. In addition, we must believe in the existence of many other universes. But we have no conceivable way of observing these other universes and cannot prove their existence. Thus, to explain what we see in the world and in our mental deductions, we must believe in what we cannot prove.
>
> Sound familiar? Theologians are accustomed to taking some beliefs on faith. Scientists are not. All we can do is hope that the same theories that predict the multiverse also produce many other predictions that we can test here in our own universe. But the other universes themselves will almost certainly remain a conjecture.

The multiverse is not pure nonsense, it is theoretically possible.But even if there were a multiverse, the generator that makes the universes itself would require fine-tuning, so the multiverse doesn't get rid of the problem. And, as Lightman indicates, we have no independent experimental evidence for the existence of the multiverse in any case. Atheists just have to take it on faith, and hope that their speculations will be proved right. Meanwhile, the fine-tuning is just as easily explained by postulating God, and we have independent evidence for God's existence, like the the origin of biological information, the sudden appearance of animal body plans, the argument from consciousness, and so on. Even if the naturalists could explain the fine-tuning, they would still have a lot of explaining to do. Theism (intelligent causation) is the simplest explanation for all of the things we learn from the progress of science.

It's very important to understand that if these values were any different, then it's not like we would bridges on our foreheads, or have green skin, or have pointy ears, etc. That's what science fiction teaches you. And many atheists form their view of science by watching science fiction entertainment. But the truth is that the consequences of changing these values are much more consequential: no stars, no planets, no hydrogen, no heavy elements, the universe re-collapses into a hot fireball. You're not going to have complex, embodied intelligent agents running around making moral decisions and relating to God in a world like that.

Questions like the existence of God should be NOT decided by feelings and faith and superstitious nonsense. They ought to be decided by evidence. Specifically, scientific evidence. Everyone has to account for this scientific evidence for fine-tuning within their worldview, and they have to account for it in a way that is responsible and rational. Punting to the multiverse, without any evidence for it, is neither rational nor responsible. Holding out hope that the evidence we have now will all go away is neither rational nor responsible.

By the way, if you are looking for a good book on the cosmic fine-tuning, especially for evangelism and debating with atheists, you really need to get a copy of "A Fortunate Universe". Although it is from one of the most prestigious academic presses, it is pretty funny to read, and the main points are made clearly, even if you don't understand the science. Two astrophysicists wrote it – one who believes that God is the best explanation of the fine-tuning, and one who doesn't. I really think that Christians need to get used to the idea that evangelism can be pretty easy, so long as you are arguing from peer-reviewed facts. When you get a good book on evidence for God that is not in dispute, then you are invincible. Everybody ought to believe in God in a universe with this much overt scientific evidence spilling out everywhere. Whether this Creator and Designer is the God of the Bible, who visited us as Jesus of Nazareth, takes more work to establish. Working through the emotional objections people have to God, and coaching them to take on the difficulties of living out a authentic Christian life (very unpopular!), is even harder.

# Atheist Jerry Coyne explains why morality is impossible for atheists

**Wintery Knight** · 16 July 2020 · Archived copy · Original

Sherlock Holmes and John Watson about to do philosophy

Let's review what you need in your worldview in order to have a rationally grounded system of morality.

You need 5 things:

1) Objective moral values

There needs to be a way to distinguish what is good from what is bad. For example, the moral standard might specify that being kind to children is good, but torturing them for fun is bad. If the standard is purely subjective, then people could believe anything and each person would be justified in doing right in their own eyes. Even a "social contract" is just based on people's opinions. So we need a standard that applies regardless of what people's individual and collective opinions are.

2) Objective moral duties

Moral duties (moral obligations) refer to the actions that are obligatory based on the moral values defined in 1). Suppose we spot you 1) as an atheist. Why are you obligated to do the good thing, rather than the bad thing? To whom is this obligation owed? Why is rational for you to limit your actions based upon this obligation when it is against your self-interest? Why let other people's expectations decide what is good for you, especially if you can avoid the consequences of their disapproval?

3) Moral accountability

Suppose we spot you 1) and 2) as an atheist. What difference does it make to you if you just go ahead and disregard your moral obligations to whomever? Is there any reward or punishment for your choice to do right or do wrong? What's in it for you?

4) Free will

In order for agents to make free moral choices, they must be able to act or abstain from acting by exercising their free will. If there is no free will, then moral choices are impossible. If there are no moral choices, then no one can

be held responsible for anything they do. If there is no moral responsibility, then there can be no praise and blame. But then it becomes impossible to praise any action as good or evil.

5) Ultimate significance

Finally, beyond the concept of reward and punishment in 3), we can also ask the question "what does it matter?". Suppose you do live a good life and you get a reward: 1000 chocolate sundaes. And when you've finished eating them, you die for real and that's the end. In other words, the reward is satisfying, but not really meaningful, ultimately. It's hard to see how moral actions can be meaningful, ultimately, unless their consequences last on into the future.

Theism rationally grounds all 5 of these. Atheism cannot ground *any of them.*

Let's take a look at #4: free will and see how atheism deals with that.

**Atheism and free will?**

Here's prominent atheist Jerry Coyne's editorial in USA Today to explain why atheists can't ground free will. (Note: link is dead)

Excerpt:

> And that's what neurobiology is telling us: Our brains are simply meat computers that, like real computers, are programmed by our genes and experiences to convert an array of inputs into a predetermined output. Recent experiments involving brain scans show that when a subject "decides" to push a button on the left or right side of a computer, the choice can be predicted by brain activity at least seven seconds before the subject is consciously aware of having made it. (These studies use crude imaging techniques based on blood flow, and I suspect that future understanding of the brain will allow us to predict many of our decisions far earlier than seven seconds in advance.) "Decisions" made like that aren't conscious ones. And if our choices are unconscious, with some determined well before the moment we think we've made them, then we don't have free will in any meaningful sense.

If you don't have free will, then you can't make moral choices, and you can't be held morally responsible. No free will means no morality.

Here are some more atheists to explain how atheists view morality.

William Provine says atheists have no free will, no moral accountability and no moral significance:

> Let me summarize my views on what modern evolutionary biology tells us loud and clear — and these are basically Darwin's views. There are no gods, no purposes, and no goal-directed forces of any kind. There is no life after death. When I die, I am absolutely certain that I am going to be dead. That's the end of me. There is no ultimate foundation for ethics, no ultimate meaning in life, and no free will for humans, either.

Richard Dawkins says atheists have no objective moral standards:

> In a universe of blind physical forces and genetic replication, some people are going to get hurt, other people are going to get lucky, and you won't find any rhyme or reason in it, or any justice. The universe that we observe has precisely the properties we should expect if there is, at bottom, no design, no purpose, no evil and no good, nothing but blind, pitiless indifference… DNA neither knows nor cares. DNA just is. And we dance to its music. (Richard Dawkins, River Out of Eden: A Darwinian View of Life (1995))

When village atheists talk about how they can be moral without God, it's important to ask them to justify the minimum requirements for rational morality. Atheists may act inconsistently with their worldview, believing in free

will, expecting praise and blame for complying with the arbitrary standards of their peer group, etc. But there is nothing more to morality on atheism that imitating the herd – at least when the herd is around to watch them. And when the herd loses its Judeo-Christian foundation – watch out. That's when the real atheism comes out – the atheism that we've seen before in countries that turned their backs on God, and the moral law. When God disappears from a society, anything is permissible.

# Can a man marry a woman who thinks that all male leadership is "sexist"?

**Wintery Knight** · 17 July 2020 · Archived copy · Original

These days, many people of both sexes graduate college with a lot of student loan debt and no marketable skills at all. What do they learn? Well, they don't learn anything, but they are brainwashed to believe in secular leftist dogma. And they're also brainwashed to dismiss all opposition to secular leftist dogma by labeling it as "sexist", "racist", "homophobic", "xenophobic", etc.

I wrote previously about how men don't like to marry non-virgins. I argued that women with a lot of sexual experience have proven that they prefer men who have "no-commitment" abilities. And those women also avoid men who have commitment abilities. I argued that if a man marries a woman with a lot of experience of giving no-commitment men sex, then she probably wouldn't respect and admire his marriage-oriented skills enough to let him lead the home.

I believe that the brainwashing that women get when they do non-STEM degrees in liberal arts programs in college is the cause of their resistance to the leadership of marriage-minded men.

How does a marriage happen? Basically, a marriage-minded man prepares himself for marriage by denying himself "fun" in order to position himself to be a husband and father. He studies hard STEM subjects in order to get good jobs. His resume is gap-free. He started working early, and didn't take summers off. He saves his money. He understands beliefs that are incompatible with marriage, such as pro-abortion, pro-divorce, etc. and he is able to argue against them. When he meets a woman, he presents his preparations to her, and tries to get her to focus on behaviors that will put her on a path to becoming a wife and mother. If she follows his lead, then she becomes safe for him to marry. He is able to see how she listens to his marriage plan, and adjusts her behavior in order to help him to execute the plan.

So what does this leadership look like? Well, in my case, I've tried to get women to switch from non-STEM to STEM degrees. To quit easy jobs like waitress and teacher and get hard jobs like IT Project Manager or Software Engineer. To stop wasting money on thrill-seeking and instead pay off loans, then invest. To stop watching TV and movies, and start reading good non-fiction books about marriage, parenting, apologetics, economics, etc. And to inform themselves about marriage related topics, e.g. – divorce, infertility, child development, homeschooling, daycare, school choice. Basically, getting them to drop childish anti-marriage and anti-family behaviors, and take up mature pro-marriage and pro-family behaviors, so that they become useful partners for a marriage enterprise.

But what about non-STEM college programs? What does college teach young women about this marriage-focused leadership from marriage-minded men? It depends on what she studies. If she does a STEM degree, she'll have been forced to be accountable to reality in her assignments and exams. She'll get a decent job and pay off student loans, allowing her husband to quickly buy her a house and give her children to raise while she's still young. But, if she does a non-STEM degree, then not only will she probably have student loan debt and a useless degree and low-pay jobs, but she'll also have been brainwashed with all sorts of anti-marriage and anti-family beliefs and behaviors. That's because non-STEM programs are nothing more than brainwashing in secular leftist dogma. And I have an example of how this works in real life.

## Everything too hard for her to learn or do is "sexist"

In the example below, a male expert on climate science corrects a female journalist about climate science. She dismisses his correction (not shown) as sexism.

Feminist journalist shames science expert as "sexist"
Here is the biography of the male PhD in meteorology:

*Ryan Maue is a research meteorologist. He has developed and maintained a popular weather maps and climate data service based on the world's best numerical weather prediction systems. During his graduate studies at Florida State University, he researched extratropical and tropical cyclones, utilizing mesoscale models and large reanalysis datasets, and published multiple peer-reviewed articles. After his PhD in 2010, Maue was awarded a National Research Council postdoctoral associateship at the Naval Research Lab in Monterey, California where he focused on global weather prediction and verification.*

And here is the biography of the female journalist with the BA in journalism:

*She has a BA in journalism, and knows literally nothing about climate science, and has achieved literally nothing of value in the field of climate science that anyone would be willing to pay her for.*

Crying "sexist" is literally everything that her degree in journalism taught her to do. She has one skill: how to dismiss expertise in reality-based practical disciplines as "sexist", and therefore inferior to her feelings and intuitions.

## Should marriage-minded men marry feminists?

So let's ask and answer one simple question: should a marriage-minded man marry a woman who dismisses leadership from qualified men as "sexist"?

Let's review the red flags of secular leftist feminist women:

- she's pro-abortion, so she thinks murdering an innocent child is how selfish adults escape the consequences of their own reckless actions
- she's pro-divorce, and will not hesitate for a second to break a commitment that makes her unhappy
- she's an atheist, so she can't rationally ground the basic requirements of morality: free will, objective moral laws, etc. and therefore cannot be relied on to behave morally against her own self-interest
- she's a socialist, so she views money earned by the husband as the property of the secular left government
- she's a feminist, so she believes sex is recreational, and need not be reserved for a husband and wife in a covenant marriage, and she thinks that newborns should be tossed into daycare then public schools

- she believes in same-sex marriage, so she thinks that children can be deprived of a relationship with their biological mother and/or father, for the benefit of selfish adults
- etc.

Does this sound like she's ready for a husband and children?

But more than the worldview issues are the practical issues. A woman with a non-STEM degree didn't want to study subjects that are accountable to reality. She didn't want to be a pharmacist, a nurse or a software engineer – those jobs would require her to produce work that corresponds to reality, and has value in the real world. People like her who graduate with non-STEM degrees don't understand anything about how the world really works. People like her aren't equipped to earn money in a free market by satisfying customers. They don't understand basic economics, so they're socialists. They can't be reasoned with, because their views are determined by what makes them feel good, look good to peers, and what gives them maximum autonomy to pursue pleasure with minimum accountability. When secular leftists feminists crash and burn at self-sufficiency, they blame everyone else instead of themselves. All of these character traits make them really difficult to get along with in a marriage.

Can women like this be fixed up for marriage and motherhood? Well, that would require them to be open to marriage-minded men who would be able to lead them towards marriage and motherhood behaviors. But how did Emily respond to leadership from a male with real-world demonstrated ability in a practical area? She called his attempt to lead her "sexist". And that is the standard response of secular leftist feminist women to male leadership. If you tell them to study computer science, you're "sexist". If you tell them to stop wasting money, you're "sexist". If you tell them to stop getting drunk, you're "sexist". If you tell them to read a book on economics, you're "sexist". If you tell them to watch a William Lane Craig debate, you're "sexist". If you tell them to eat healthy and lift weights, you're "sexist". If you tell them to get a challenging job, you're "sexist". If you tell them to stop having recreational sex with bad boys, you're "sexist". Every attempt to focus a secular leftist feminist woman on preparing for marriage and motherhood is called "sexist".

If women would only listen to what men ask of them as future wives and future mothers, and build themselves up for wife and mother roles, then women would never struggle to find husbands. No man in his right mind can risk marriage to a secular leftist feminist. There is no "secular leftist feminist" path to marriage. No amount of immodesty and premarital sex from a secular leftist feminist is enough to trick a man into *marrying* her. That might work on some men to get sex, but it's not going to work to get her to marriage and children.

# Are teacher unions conservative or liberal? Should Christians support unions?

**Wintery Knight** · 18 July 2020 · Archived copy · Original

Catholic teachers march in favor of unrestricted taxpayer-funded abortion

I saw about how a couple of teacher unions are responding to the current pandemic. Did you know that teacher unions lobby in favor of abortion and gay rights? I also wanted to look at the political contributions, so we can figure out whether we should be in favor of teacher unions, or opposed to them.

Here's a story about the unions from Daily Wire:

> A teachers' union in North Carolina is demanding sweeping benefits for illegal immigrants to lower COVID-19 cases and reopen schools.
>
> In a recent statement denouncing the school district's reopening plan, the Durham Association of Educators (DAE) called for universal healthcare, as well as guaranteed income regardless of a person's immigration status.

Los Angeles:

> Earlier this week, the United Teachers Los Angeles (UTLA) — a 35,000-member union in the Los Angeles Unified School District — stipulated that the district cannot reopen until charter schools are closed, the local police are defunded, the wealthy are taxed more, there is "Medicare-for-All," and the district is bailed out by the federal government.

New Jersey:

> In New Jersey, the state teachers' union listed among their "acceptable standards for a return to in-person instruction" both weekly COVID-19 tests for all students and mandatory door-to-door mask wearing. "Consequences for refusal to wear the required mask shall be clearly delineated in board policy and in the student/parent handbook, and shall include consequences up to and including suspension," the union said.

That's very interesting, and it's not just secular school teachers who are far-left. Catholic school teachers regularly march in favor of abortion and gay rights. Apparently, being Catholic now means agreeing with atheists on every policy, and then just slapping the word Catholic on top of it.

Catholic teachers march in favor of gay rights and perverted sex education

You might wonder what teacher unions do with all the money they get by lobbying the government and organizing strikes. Well, some of the money goes to abortion providers:

> The American Federation of Teachers (AFT) and the National Education Association (NEA) are among a handful of Unions that have donated to Planned Parenthood in the United States. For example, in 2012, the New York City chapter of AFT gave $125,000 to the abortion company. Then, in the wake of the organization's scandal regarding selling aborted babies' body parts, the New York City branch of AFT said they still support Planned Parenthood and urged "all members to support Planned Parenthood as members and contributors."
>
> The Washington Free Beacon reports that over the last five years Planned Parenthood has also received money from the American Federation of Labor and Congress of Industrial Organizations, United Autoworkers Union, Service Employees International Union, and the United Food and Commercial Union.

And some of that money goes to the Democrat party directly:

Political contributions by the American Federation of Teachers union
I think there's enough here that people will understand that teacher unions – and pretty much every other kind of union – is not conservative.

Remember, unlike workers in the private sector, unionized workers DO NOT earn their money by exchanging products and services in voluntary trades. They DO NOT compete with other vendors to give the consumer lower prices and higher quality. Unions exist to protect their workers from performing poorly for customers. And they get raises only when they influence government to give them more money. They have no connection to pleasing customers whatsoever. And in fact they are threatened when customers are able to spend their own money on options that suit their needs, e.g. – homeschooling, private schools, charter schools.

# William Lane Craig lectures on the evidence for the resurrection of Jesus

**Wintery Knight** · 19 July 2020 · Archived copy · Original

Sherlock Holmes and John Watson: let's take a look at the facts

Here is Dr. William Lane Craig giving a long-form argument for the historical event of the resurrection of Jesus, and taking questions from the audience.

The speaker introduction goes for 6 minutes, then Dr. Craig speaks for 35 minutes, then it's a period of questions and answers with the audience. The total length is 93 minutes, so quite a long period of Q&A. The questions in the Q&A period are quite good.

**Introduction:**

- Many people who are willing to accept God's existence are not willing to accept the God of Christianity
- Christians need to be ready to show that Jesus rose from the dead as a historical event
- Private faith is fine for individuals, but when dealing with the public you have to have evidence
- When making the case, you cannot assume that your audience accepts the Bible as inerrant
- You must use the New Testament like any other ancient historical document
- Most historians, Christian and not, accept the basic minimal facts supporting the resurrection of Jesus

**Fact #1:** the burial of Jesus following his crucifixion

- Fact #1 is supported by the early creed found in Paul's first letter to the Corinthians (1 Cor 15)
- Fact #1 is supported by the early Passion narrative which was a source for Mark's gospel
- Fact #1 passes the criterion of enemy attestation, since it praises one of the Sanhedrin
- Fact #1 is not opposed by any competing burial narratives

**Fact #2:** on the Sunday following his crucifixion, Jesus' tomb was found empty by some women

- Fact #2 is supported by the early Passion narrative which was a source for Mark's gospel
- Fact #2 is implied by the early creed found in Paul's first letter to the Corinthians (1 Cor 15)
- Fact #2 is simple and lacks legendary embellishment, which argues for an early dating
- Fact #2 passes the criterion of embarrassment, because it has female, not male, witnesses
- Fact #2 passes the criterion of enemy attestation, since it is reported by the Jewish leaders

**Fact #3:** Jesus appeared to various people in various circumstances after his death

- Fact #3 is supported by the early creed found in Paul's first letter to the Corinthians (1 Cor 15)
- Fact #3 is supported by multiple, independent reports of the events from all four gospels
- Fact #3 explains other historical facts, like the conversion of Jesus' skeptical brother James

**Fact #4:** the earliest Christians proclaimed their belief in the resurrection of Jesus

- Fact #4 explains why the earliest Christians continued to identify Jesus as the Messiah
- Fact #4 explains why the earliest Christians were suddenly so unconcerned about being killed

Dr. Craig then asks which hypothesis explains all four of these facts. He surveys a number of naturalistic hypotheses, such as the hallucination theory or various conspiracy theories. All of these theories deny one or more of the minimal facts that have been established and accepted by the broad spectrum of historians. In order to reject the resurrection hypothesis, a skeptic would have to deny one of the four facts or propose an explanation that explains those facts better than the resurrection hypothesis.

I listened to the Q&A period while doing housekeeping and I heard lots of good questions. Dr. Craig gives very long answers to the questions. One person asked why we should trust the claim that the Jewish leaders really did say that the disciples stole the body. Another one asked why we should take the resurrection as proof that Jesus was divine. Another asks about the earthquake in Matthewand whether it is intended to be historical or apocalyptic imagery. Dr. Craig is also asked about the Jewish scholar Geza Vermes, and how many of the minimal facts he accepts. Another questioner asked about the ascension.

If you are looking for a good book to read on this topic, the best introductory book on the resurrection is "The Case for the Resurrection of Jesus" and the best comprehensive book is "The Resurrection of Jesus".

# If Biden wins in November, don't expect him to confront China's totalitarianism

**Wintery Knight** · 20 July 2020 · Archived copy · Original

China has 1 million Uighurs in Chinese in concentration camps, although they deny it

As a Christian, I'm obligated to stand up for chastity, sobriety, right to life, and natural marriage. But there are other things happen in the world that also catch my attention. For instance, I've noticed that socialist China is basically a totalitarian nation, with concentration camps similar to those of Nazi Germany or communist USSR. And Joe Biden has connections to them.

This story is from the far-left Foreign Policy:

> Two recent disturbing events may finally awaken the world to the scale and horror of the atrocities being committed against the Uighurs, a mostly secular Muslim ethnic minority, in Xinjiang, China. One is an authoritative report documenting the systematic sterilization of Uighur women. The other was the seizure by U.S. Customs and Border Protection of 13 tons of products made from human hair suspected of being forcibly removed from Uighurs imprisoned in concentration camps. Both events evoke chilling parallels to past atrocities elsewhere, forced sterilization of minorities, disabled, and Indigenous people, and the image of the glass display of mountains of hair preserved at Auschwitz.
>
> […]Over a million Turkic Uighurs are detained in concentration camps, prisons, and forced labor factories in China. Detainees are subject to military-style discipline, thought transformation, and forced confessions. They are abused, tortured, raped, and even killed. Survivors report being subjected to electrocution, waterboarding, repeated beatings, stress positions, and injections of unknown substances. These mass detention camps are designed to cause serious physical, psychological harm and mentally break the Uighur people. The repeated government orders to "break their lineage, break their roots, break their connections, and break their origins"; "round up everyone who should be rounded up"; and systematically prevent Uighur births demonstrate a clear intent to eradicate the Uighur people as a whole.

Here is drone footage of the Chinese Muslims being sent to concentration camps by train:

These camps are run by Chinese communists. They are secular. They are leftist. The Democrats are in charge in China.

And in fact, the Democrats here in America are not terribly concerned by any of this socialism in China. And that's because the son of the Democrat presidential candidate has links to the CCP.

Fox News explains:

> For almost six years, the firm connected to Hunter Biden in China has moved more than $2.5 billion into various automotive, technology, energy, and mining endeavors.
>
> […]Biden served as one of nine directors of the private equity firm Bohai Harvest RST – better known as BHR Partners – which is 80 percent mandated by shareholders in the Chinese government, according to the Wall Street Journal.
>
> […]The firm was registered less than two weeks after Biden flew with his then-vice president father on Air Force Two for official business in China in December 2013…
>
> […]In the closing days of that December, China's central bank, the Bank of China in conjunction with Rosemount Seneca – the firm Biden founded in 2009 with John Kerry's stepson Christopher Heinz and family friend Devon Archer – set up the $1 billion investment joint venture called Bohai Harvest RST.
>
> […]"The Bank of China is a major Chinese state-run bank, overseen by the powerful China Investment Corporation," Isaac Stone Fish, a senior fellow at the Asia Society's Center on U.S.-China Relations, told Fox News. "While it often makes decisions based on economic considerations, it exists to serve the interests of the Chinese Communist Party."

So, it seems to me that if Biden is elected President, it's unlikely that anything wil be done about China's concentration camps. He's just too close to the Chinese goverment and the Chinese Communist Party.

On the other hand, China doesn't like the Republicans very much, because they're actually trying to do something about the concentration camps:

> China announced Monday it is issuing sanctions against U.S. Sen. Ted Cruz, R-Texas, and three other U.S. officials for "interfering in China's internal affairs," a move that drew a dismissive reply from Cruz.
>
> The announcement came days after the United States issued sanctions against three Chinese officials for Beijing's human rights abuses against ethnic minority groups in the Xinjiang region.

If Trump wins in November, then expect to see the United States continue to take action against China. They've already been doing it over the past 3.5 years.

# FBI notes reveal doubts about Steele dossier promoted by news media leftists

**Wintery Knight** · 21 July 2020 · Archived copy · Original

Left to right: Comey, Lynch, Clinton, McCabe

The mainstream media is being silent about revelations that the FBI had major doubts about the Steele dossier. So, let's take a look at the newly-released FBI notes.

Here's the latest from the Wall Street Journal:

> A Senate committee released newly declassified documents that showed the Federal Bureau of Investigation was wary in early 2017 of a dossier compiled by ex-British spy Christopher Steele that helped stir a narrative, later debunked, that the Trump campaign had close ties to Russian intelligence.
>
> The documents released Friday by the Senate Judiciary Committee included FBI notes from three days of interviews with a primary source of Mr. Steele who cast doubt on some of the dossier's contents. FBI notes from the interview in early 2017 indicated that Mr. Steele's source had told him information about Mr. Trump's alleged sexual escapades was "rumor and speculation" that he was unable to confirm.
>
> Also released were notes of a former high-level FBI agent, Peter Strzok, who wrote that Mr. Steele himself "may not be in a position to judge the reliability of his subsource network."
>
> Reacting to a New York Times report in February 2017 that said the Trump campaign and people around the candidate had repeated contacts with Russian intelligence officials, Mr. Strzok wrote in the margins of a printed copy of the article that "we are unaware of any Trump advisors engaging in conversations with Russian intelligence officials."

Actually, Strozk wrote a lot more than that.

I found more FBI notes here:

> Document number two, also withheld from public view until now, takes apart a New York Times article written by Michael Schmidt, Mark Mazzetti, and Matt Apuzzo.
>
> Comments made by then-FBI agent Peter Strzok undercut a litany of claims made in the Times article, which was entitled: "Trump Campaign Aides Had Repeated Contact With Russian Intelligence."
>
> Claim in NYT article: "Phone records and intercepted calls show that members of Donald J. Trump's presidential campaign and other Trump associates had repeated contacts with senior Russian intelligence officials in the year before the election, according to four current and former American officials."
>
> Note by Strzok: "This statement is misleading and inaccurate as written. We have not seen evidence of any

> individuals in contact with Russians (both Governmental and non-Governmental)" and "There is no known intel affiliation, and little if any [government of Russia] affiliation[.] FBI investigation has shown past contact between [Trump campaign volunteer Carter] Page and the SVR [Foreign Intelligence Service of the Russian Federation], but not during his association with the Trump campaign."
>
> Claim in NYT article: "… one of the advisers picked up on the [intercepted] calls was Paul Manafort, who was Mr. Trump's campaign chairman for several months …"
>
> Note by Strzok: "We are unaware of any calls with any Russian government official in which Manafort was a party."
>
> Claim in NYT article: "The FBI has obtained banking and travel records …"
>
> Note by Strzok: "We do not yet have detailed banking records."
>
> Claim in NYT article: "Officials would not disclose many details, including what was discussed on the calls, and how many of Trump's advisers were talking to the Russians."
>
> Note by Strzok: "Again, we are unaware of ANY Trump advisers engaging in conversations with Russian intel officials" and "Our coverage has not revealed contact between Russian intelligence officers and the Trump team."
>
> Claim in NYT article: "The FBI asked the NSA to collect as much information as possible about the Russian operatives on the phone calls …"
>
> Note by Strzok: "If they did we are not aware of those communications."
>
> Claim in NYT article: "The FBI has closely examined at least four other people close to Mr. Trump … Carter Page … Roger Stone… and Mr. Flynn."
>
> Note by Strzok: "We have not investigated Roger Stone."
>
> Claim by NYT: "Senior FBI officials believe … Christopher Steele … has a credible track record."
>
> Note by Strzok: "Recent interviews and investigation, however, reveal Steele may not be in a position to judge the reliability of subsource network."
>
> Claim by NYT: "The FBI's investigation into Mr. Manafort began last spring [2016]."
>
> Note by Strzok: "This is inaccurate … our investigation of Manafort was opened in August 2016."
>
> Claim by NYT: "The bureau did not have enough evidence to obtain a warrant for a wiretap of Mr. Manafort's communications, but it had the NSA closely scrutinize the communications of Ukrainian officials he had met."
>
> Note by Strzok: "This is inaccurate …"

Basically, everything the New York Times wrote was judged by Peter Strozk – the anti-Trump FBI adulterer – as inaccurate. Keep that in mind the next time you read something in the New York Times. It's just fake news, from front to back, top to bottom. Every day. People read it for feelings – not for an accurate view of the world.

There is a nice re-cap of left-wing news sources trumpeting the Steel dossier as genuine in this Twitter thread. Make note of the names, and don't trust these news sources in the future. CNN, MSNBC, Brian Stelter, Rachel Maddow, New York Magazine, Jonathan Chait, Catherine Rempell, Katy Tur, Mother Jones, David Corn, Newsweek, Slate, Rick Wilson, Joy Reid, Jennifer Rubin, Max Boot, Charles Blow, Seth Abramson, Matthew Dowd, Kurt Eichenwald, The Daily Beast, The New Yorker, etc.

The Federalist had some details about the source for the Steele dossier.

> The Primary Subsource was in reality Steele's sole source, a longtime Russian-speaking contractor for the former British spy's company, Orbis Business Intelligence. In turn, the Primary Subsource had a group of friends in Russia. All of their names remain redacted. From the FBI interviews, it becomes clear that the

> Primary Subsource and his friends peddled warmed-over rumors and laughable gossip that Steele dressed up as formal intelligence memos.

On Twitter, I found a thread that presented a case that the source of the dossier was a PRESS SECRETARY. Not an intelligence agent.  Not a “veteran spy”. A PRESS SECRETARY. I guess we’ll find out if this is correct soon.

# If we seriously want men to marry and become fathers, let's repeal no-fault divorce

**Wintery Knight** · 22 July 2020 · Archived copy · Original

I saw a very good article at the Heritage Foundation web site about the importance of fathers for children. The author Virginia Allen listed out some of the benefits that fathers provide to children:

> Studies have found that children raised without a father are:
>
> - At a higher risk of having behavioral problems.
> - Four times more likely to live in poverty.
> - More likely to be incarcerated in their lifetime.
> - Twice as likely to never graduate high school.
> - At a seven times higher risk of teen pregnancy.
> - More vulnerable to abuse and neglect.
> - More likely to abuse drugs and alcohol.
> - Twice as likely to be obese.
>
> From education to personal health to career success, children who lack a father find themselves at a disadvantage to their peers raised in a two-parent household.

I was looking for a good analysis of why there's been a decline of marriage and fatherhood, and I found an article by Joe Carter on far-left The Gospel Coalition, of all places. By looking at marriage rates and historical events that changed the marriage rate, he was able to identify the cause of the decline of marriage – and fatherhood.

Marriage and divorce rates per capita

I'll spare you the statistical analysis, which is excellent, and give you the conclusion – although you can guess it from the graph above:

> Now that we've explored the data, what year should we use as the marker for the beginning of the decline of marriage in the United States? I would argue for 1985, the last year that the marriage rate topped 10 percent.
>
> […]What changed in 1985 that could have led to the decline in marriage? There are likely numerous factors—which we'll examine in future articles—but one stands out in particular: By 1985, all states (except

> for New York) had enacted no-fault divorce legislation.

The most helpful book I know of about no-fault divorce is "Taken Into Custody", by Dr. Stephen Baskerville. He wrote a column for Crisis magazine that summarizes some of his ideas.

Excerpt:

> Feminists were drafting no-fault divorce laws in the 1940s, which the National Association of Women Lawyers now describes as "the greatest project NAWL has ever undertaken."
>
> The result effectively abolished marriage as a legal contract. Today it is not possible to form a binding agreement to create a family.
>
> The new laws did not stop at removing the requirement of citing grounds for a divorce, to allow divorce by mutual consent, as deceptively advertised at the time. Instead they created unilateral and involuntary divorce, so that one spouse may dissolve a marriage without any agreement or fault by the other.

Here's what divorce does to the spouse who is the victim of the unilateral "no-fault" divorce:

> Though marriage is a civil matter, the logic quickly extended into the criminal, including a presumption of guilt against the involuntarily divorced spouse ("defendant"). Yet formal due process protections of criminal proceedings did not apply, so forcibly divorced spouses became quasi-criminals not for recognized criminal acts but for failing or refusing to cooperate with the divorce by continuing to claim the protections and prerogatives of family life: living in the common home, possessing the common property, or—most vexing of all—parenting the common children.
>
> Following from this are the horrendous civil liberties violations and flagrant invasions of family and individual privacy that are now routine in family courts. A personalized criminal code is legislated by the judge around the forcibly divorced spouse, controlling their association with their children, movements, and finances. Unauthorized contact with their children can be punished with arrest. Involuntarily divorced parents are arrested for running into their children in public, making unauthorized telephone calls, and sending unauthorized birthday cards.

In my conversations with men, no-fault divorce laws, and anti-male divorce courts are the main reasons given for why they do not pursue marriage and fatherhood. Men do not want to be coerced in a marriage with the threat of divorce by an unhappy wife. Men do not want to be subject to the government in so many areas of their lives if the wife does carry out the threat. They especially don't want to be separated from their children. One my secular male friends told me that he would not marry unless the woman had evidence in her past of hating radical feminism and no-fault divorce. This was the main criteria. He actually was able to find a woman who was a men's rights activist who hated divorce. But that was the only way he would marry.

Statistically speaking, the wife is more likely to initiate divorce than the husband. Women initiate 70% of divorces, the majority of those just because she is "unhappy". I think this is because women get into marriage based on their feelings, and they think that it is the husband's job to make them feel good. They see their happiness as the primary goal of the marriage, and see a marriage that does not make them happy as a marriage that needs to be ended.

**Are we going to repeal no-fault divorce, then?**

No-fault divorce was seen as a boon to women who had married the wrong men by following their hearts. It's an interesting question to ask whether women really would want no-fault repealed. It would mean that they would have to get serious about who they marry, instead of just getting into marriage based on feelings. They would have to evaluate men according to expectations of what a man does in a marriage, instead of on feelings. They would have to think about what men want out of a marriage, and prepare themselves to provide for his needs. They would have

to say no to their feelings, when choosing a man, and in keeping a man after the wedding.

If women aren't willing to demand the repeal of no-fault divorce laws and get serious about men and marriage, then what's the point of complaining that men don't want to marry and become fathers? If you're not willing to fix the root cause of the problem, then don't complain about the problem.

# Why you should read “Up From Slavery” by Booker T. Washington

**Wintery Knight** · 23 July 2020 · Archived copy · Original

What’s the best way to get up from slavery?

Lately, my friends have been very excited that I’m a non-white conservative. They want me to answer the grievances of BLM people, and explain from my own experiences what Christianity and conservative policies have to say about making the lives of non-whites better. My friend Wes recommended “Up From Slavery” by Booker T. Washington to help me focus my thoughts.

Here’s a summary of the book:

> ### Dignity through Labor
>
> Over the course of *Up From Slavery,* Washington develops the idea and ideal of dignity through labor. For Washington, the gravest aspect of the institution of slavery is the denigration of labor for both blacks and whites. Because the enslaved had no personal investment or return on their labor, they did not complete their work with an attitude toward improvement. Likewise, whites, largely deprived of meaningful labor, were robbed of the ability to achieve self-sufficiency. In both races, this produced personalities and characters that seek to escape labor. Washington emphasizes labor as the only way to make oneself useful in an interdependent, modern society. Throughout the whole of *Up From Slavery*, Washington searches for and obtains work. Further, once he obtains it, Washington completes all labor to best of his ability, no matter how lowly the task. At the Tuskegee Institute, Washington makes this idea and ideal a foundational ethos. All students who study at the Tuskegee Institute must learn a trade or industry alongside their more traditional academic pursuits. In addition, many of the buildings, most of the furniture, the wagons, and the materials used at the school are produced by students. This level of practical skill and diligence also acts as the foundation of Washington’s theory and program for racial uplift.

> ### Selflessness, Desire to Be Useful to One's Community
>
> The people that Washington most admires and models himself after are those he labels selfless. Washington defines this as the willingness to work on the behalf of others. For Washington, this is not only about duty or labor, but also about the willingness to do one's best for the benefit of the collective good. Washington believes that racial prejudice can be overcome if black people make themselves indispensable to their communities and their nation. The brick-making episode provides an example. Though the brick-making enterprise at Tuskegee felled three kilns before successfully producing bricks, the venture eventually proved successful and the school began to sell its bricks on the open market. Washington describes how whites who were unsympathetic or apathetic to the education of blacks and the overall project of the Tuskegee Institute were willing to purchase Tuskegee bricks due to their quality and convenience. Washington suggests that if black race can find their niche in society by fulfilling a need, then they can co-exist peacefully and productively with whites.
>
> ### Impracticality of Political Agitation
>
> Throughout *Up From Slavery*, Washington defends his ideas about racial advancement and uplift by subtly undermining the proposals of his critics. Though Washington does not explicitly state his objection to the strategies of specific thinkers like W.E.B. Dubois or even his predecessor, Frederick Douglass, he nevertheless highlights the wastefulness of political agitation for equal rights at every chance he gets. To do this, Washington shows that political agitation results in worse relations and outcomes than those that existed before. For example, when he goes home to Malden after his second year at the Hampton Institute, Washington finds that both the salt-furnace and the coal-mine are not in operation due to worker's strikes. In Chapter IV, Washington describes how strikers usually spent all their savings during the strikes and returned to work in debt, but at the same wages. He raises the impracticality of political agitation again after his controversial Atlanta Exposition speech. After the success of his speech, he hypothetically asks if a black man would have been invited to give a speech had people agitated to put a black person on the program. He answers in the negative, saying that such opportunities can only arise through merit.

And here's a summary of his most famous speech:

> On September 18, 1895, Booker T. Washington was selected to give a speech that would open the Cotton States and International Exposition in Atlanta, Georgia. The speech, which is often referred to as the "Atlanta Compromise," was the first speech given by an African American to a racially-mixed audience in the South. In it, Washington suggested that African Americans should not agitate for political and social equality, but should instead work hard, earn respect and acquire vocational training in order to participate in the economic development of the South. By doing so, eventually, he stated, African Americans would gain the respect of white society and be granted the rights of full citizenship.

There's a free full audio version of the book, and the full text is online. I recommend this book to people of all races, because as the sexual anarchy brought on by feminism becomes widespread, the majority of the children of tomorrow will face the same kinds of challenges.

I see Washington's ideas as consistent with a Christian worldview, where we don't expect to be treated fairly. We expect sinful people to treat us badly. What Christianity says is to be patient, and focus on your relationship with God and loving your neighbor. And one way to love your neighbor is to sell them something valuable that you made through your labor. Another way is to work and save, and give to charity.

Government solutions to problems like racism and poverty aren't a top priority for Christians. Most of all, we need the freedom to be good, and to do good. That's priority one. You may not make your life better by being moral and diligent, but it's rare that doing so causes you to harm yourself. It's very important that you not harm yourself.

So, this dovetails nicely with my own story. My married non-white parents were not smart enough or willing enough

to monitor my education, but they were clear that they wanted me to do well in order to find good-paying work. So I completed my BS and MS in a STEM field, and went to work right away, and I've been at it continuously for 20 years now. I save most of what I earn for charity and early retirement.

I've never experienced any of the racism or police brutality that American blacks complain about. And that's because I follow what Washington is teaching. I dress in a clean way that doesn't communicate danger to others. I'm careful to spend my time reading apologetics, economics and military history. I don't listen to popular music or watch popular TV or movies. I don't hang out with people who blame other people for their lack of success.

I got my first job by volunteering to do it for free on Saturdays for 7 months. My first full-time job salary after college was $50,000. Then I got a raise of $6,000 and then a raise of $9,000. I used to work 70 hour weeks in my 20s. I graduated college with $9,000 dollars in the black, and my net worth is now about $1.25 million. By the way, the secret to becoming wealthy is to not spend money on showing off. You can be very generous to your friends and still get rich. Just never buy anything that is designed to communicate "status" to anyone. And never spend money on alcohol or chasing sex outside of marriage.

At no time did I accept that the problems defined by the secular left were my real problems. And at no time did I accept their "solutions" as real solutions to anything. As black economist Thomas Sowell writes, the "solutions" of the left are not effective at helping people like me. The "solutions" of the left are designed to make leftists feel better, and look more virtuous to others. You are much better off reading the Bible, Christian apologetics, free market economics, American military history, etc., and then respecting what you learn from that in your decision-making. I think that reading the right stuff is even more important than having good parents or attending church.

# The importance of having a narrative when confronting the assumption of naturalism

**Wintery Knight** · 24 July 2020 · Archived copy · Original

Apologetics and the progress of science

How do you present theism as a rational belief to a person who thinks that the progress of science has removed the need for God?

Canadian science writer Denyse O'Leary writes about the history of cosmology at Evolution News.

Excerpt:

> What help has materialism been in understanding the universe's beginnings?
>
> Many in cosmology have never made any secret of their dislike of the Big Bang, the generally accepted start to our universe first suggested by Belgian priest Georges Lemaître (1894-1966).
>
> On the face of it, that is odd. The theory accounts well enough for the evidence. Nothing ever completely accounts for all the evidence, of course, because evidence is always changing a bit. But the Big Bang has enabled accurate prediction.
>
> In which case, its hostile reception might surprise you. British astronomer Fred Hoyle (1915-2001) gave the theory its name in one of his papers — as a joke. Another noted astronomer, Arthur Eddington (1882-1944), exclaimed in 1933, "I feel almost an indignation that anyone should believe in it — except myself." Why? Because "The beginning seems to present insuperable difficulties unless we agree to look on it as frankly supernatural."
>
> One team of astrophysicists (1973) opined that it "involves a certain metaphysical aspect which may be either appealing or revolting." Robert Jastrow (1925-2008), head of NASA's Goddard Institute for Space Studies, initially remarked, "On both scientific and philosophical grounds, the concept of an eternal Universe seems more acceptable than the concept of a transient Universe that springs into being suddenly, and then fades slowly into darkness." And Templeton Prize winner (2011) Martin Rees recalls his mentor Dennis Sciama's dogged commitment to an eternal universe, no-Big Bang model:

> For him, as for its inventors, it had a deep philosophical appeal — the universe existed, from everlasting to everlasting, in a uniquely self-consistent state. When conflicting evidence emerged, Sciama therefore sought a loophole (even an unlikely seeming one) rather as a defense lawyer clutches at any argument to rebut the prosecution case.

> Evidence forced theorists to abandon their preferred eternal-universe model. From the mid 1940s, Hoyle

> attempted to disprove the theory he named. Until 1964, when his preferred theory, the Steady State, lost an evidence test.

Here is a quick summary of some of the experimental evidence that emerged in the last few decades that caused naturalists to abandon the eternal universe that they loved so much when they were younger.

**The importance of having a narrative**

Now I want to make a very, very important point about Christianity and the progress of science. And that point is that it is very important that Christians present the evidence in exactly the way that Denyse presented it in that article – in its historical context, featuring the conflict between naturalists and the experimental evidence.

All Christians should be familiar with the following basic pieces of evidence which fit the war between science and naturalism narrative:

1. The origin of the universe
2. The cosmic fine-tuning
3. The origin of life (biological information)
4. The sudden origin of the Cambrian phyla
5. The habitability/observability correlation

When you talk about these evidences as a Christian theist to non-Christians, you have to have cultivated a genuine interest in reconciling your beliefs with science. You have to accept that there are two books that reveal God's character and attributes. The book of nature, and the book of Scripture. And you need to be flexible about getting these two books to fit together. The book of nature gives us natural theology (see Romans 1). It tells us that God is Creator and Designer. The book of Scripture tells us that God stepped into history as a man to save us by taking the punishment for our headlong rush away from God, which the Bible calls sin. Science is one way that humans can recover some of basic knowledge about God. Knowledge that is only possible because God created and designed the universe (and us) in such a way that we are capable of making discoveries, and that the universe is capable of being explored and understood.

It's very important to present these five basic evidences to non-Christians in the historical context. And here is the story you must tell: "In the beginning, there was the naturalism, and the naturalism tried to argue from ignorance that God was not Creator and God was not Designer. And then came the science, and now people have to give up their naturalism in order to not be crazy and irrational". That's the narrative you use when talking to non-Christians about science.

In the beginning was the naturalism:

1. In pre-scientific times, atheists maintained that the universe was eternal
2. In pre-scientific times, atheists maintained that a life-permitting universe was as likely as a life-prohibiting universe
3. In pre-scientific times, atheists maintained that the cell was a simple blob of jello that could spontaneously emerge in some warm pond
4. In pre-scientific times, atheists maintained that the sudden origin of the Cambrian phyla would be explained by subsequent fossil discoveries
5. In pre-scientific times, atheists maintained that there was nothing special about our galaxy, solar system, planet or moon

But then science progressed by doing experiments and making observations:

1. Scientists discovered redshift and the cosmic microwave background radiation (evidence for a cosmic

beginning) and more!
2. Scientists discovered the fine-tuning of gravity and of the cosmological constant and more!
3. Scientists discovered protein sequencing and exposed the myth of "junk DNA" and more!
4. Scientists discovered an even shorter Cambrian explosion period and the absence of precursor fossils and more!
5. Scientists discovered galactic habitable zones and circumstellar habitable zones and more!

And now rational people – people who want to have true beliefs about reality – need to abandon a false religion (naturalism).

Now naturally, science is in a state of flux and things change. But you have to look at the trend of discoveries, and those trends are clearly going against naturalism, and in favor of Christian theism. No one is arguing for a deductive proof here, we are simply looking at the evidence we have *today* and proportioning our belief to the concrete evidence we have *today*. People who are guided by reason should not seek to construct a worldview by leveraging speculations about future discoveries and mere possibilities. We should instead believe what is more probable than not. That's what a *rational* seeker of truth ought to do. Proportion belief to probabilities based on current, concrete knowledge.

Atheism, as a worldview, is not rooted in an honest assessment about what science tells us about reality. Atheism is rooted in a religion: naturalism. And the troubling thing we learn from looking at the history of science is that this religion of naturalism is insulated from correction from the progress of science. Nothing that science reveals about nature seems to be able to put a dent in the religion of naturalism, at least for most atheists.

It falls to us Christian theists, then, to hold them accountable for their abuse and misrepresentation of science. And that means telling the story of the progress of science accurately, and accurately calling out the religion of naturalism for what it is – *a religion rooted in blind faith and ignorance that has been repeatedly and convincingly falsified by the progress of science in the modern era*.

**Positive arguments for Christian theism**

- The kalam cosmological argument and the Big Bang theory
- The fine-tuning argument from cosmological constants and quantities
- The origin of life, part 1 of 2: the building blocks of life
- The origin of life, part 2 of 2: biological information
- The sudden origin of phyla in the Cambrian explosion
- Galactic habitable zones and circumstellar habitable zones
- Irreducible complexity in molecular machines
- The creative limits of natural selection and random mutation
- Angus Menuge's ontological argument from reason
- Alvin Plantinga's epistemological argument from reason
- William Lane Craig's moral argument
- The unexpected applicability of mathematics to nature
- Arguments and scientific evidence for non-physical minds

# William Lane Craig debates Alex Rosenberg: Does God Exist? Video, audio and summary

**Wintery Knight** · 25 July 2020 · Archived copy · Original

British Spitfire (Craig) and German Me 109 (Rosenberg) in a dogfight
Here is the video of the debate:

Here is my summary of the Craig-Rosenberg debate, which occurred on February 1st, 2013 at Purdue University.

**The debaters**

- William Lane Craig
- Alex Rosenberg

Below is the summary.

**Dr. Craig's opening speech:**

The topic: What are the arguments that make belief in God reasonable or unreasonable?
First speech: arguments for reasonableness of belief in God
Second speech: respond to arguments against reasonableness of belief in God

Eight arguments:

1. Contingency argument: God – a transcendent, personal being – is the explanation of why a contingent universe exists.
2. Cosmological argument: God is the cause of the beginning of the universe, which is attested by physics and cosmology.
3. Applicability of mathematics to nature: God is the best explanation for the applicability of mathematics to nature.
4. Fine-tuning argument: God is the best explanation of the fine-tuning of the universe to permit life.
5. Intentionality of conscious states: God is the best explanation of the intentionality of our mental states.
6. The moral argument: God is the best explanation for the existence of objective moral values and duties.
7. The resurrection of Jesus: God is the best explanation for the core of historical facts accepted by most ancient

historians across the ideological spectrum.

8. Religious experience: God is the best explanation of our immediate experience and knowledge of his existence.

**Dr. Rosenberg's opening speech**

First argument: The fallacy of ad hominem

- I don't know whether to laugh or to cry
- Dr. Craig has said all of that before in other debates
- You didn't need to come out on this cold night
- Craig's arguments have all been refuted
- Dr. Craig just doesn't listen
- Dr. Craig is not interested in getting at the truth
- Dr. Craig is just interested in scoring debate points
- The adversarial system is the wrong approach to decide truth
- Dr. Craig is very confident about his take of physics

Second argument: The fallacy of arguing from authority

- 95% of members of the NAS are atheists
- Therefore Dr. Craig cannot use science

Third argument: Effects don't require causes

- I am going to pretend that Craig said that "every effect requires a cause"
- Quantum mechanics shows that some effects occur without causes
- A particle of uranium (which is not nothing, it is something) decays without a cause
- This uncaused effect is the same as the universe coming into being out of nothing uncaused
- Therefore the principle of sufficient reason is false

Fourth argument: Silicon-based life and the multiverse

- If these constants had been different, maybe we would have other kinds of intelligent life, like silicon-based life
- Carbon-based life is not the only kind of life, maybe you can have other kinds of life, none of which have been observed
- There could be different kinds of life in other areas of the universe that we can't see
- There are things we can't see that disprove the current physics that we can see
- Quantum foam is evidence that a multiverse exists
- The multiverse would solve the problem of fine-tuning

Fifth argument: The Euthyphro dilemma

- The moral argument is refuted by Euthyphro dilemma
- Dr. Craig is such a moron that he has never heard of the Euthyphro dilemma ever before
- This is found in the first and simplest of Plato's dialogs
- Why is Dr. Craig so stupid that he has not read this simple dialog ever before?
- Evolution explains why humans evolve arbitrary customs and conventions that vary by time and place
- Alternative moral theories: utilitarianism, social contract, etc. that don't require God

Sixth argument: Mormonism undermines Dr. Craig's three minimal facts about Jesus

- Why is Dr. Craig so stupid and ignorant to persist in pushing such an ignorant, stupid argument?
- Mormonism is a silly religion that is not historically well founded
- Therefore, Jesus was not buried
- Islam is a silly religion that is not historically grounded
- Therefore, the tomb was not found empty
- Scientology is a silly religion that is not historically grounded
- Therefore, the eyewitnesses didn't have post-mortem appearances
- Eyewitness testimony is unreliable in some cases
- Therefore, eyewitness testimony was unreliable in this case
- Apparitions of Mary are bizarre
- Therefore, the majority of historians are wrong to think that the disciples saw post-mortem appearances

Seventh argument: Deductive problem of evil

- Evil and suffering are logically incompatible with an all good, all powerful God

Eight argument: God is not just to allow evil and suffering

- God cannot make the evils of this life right in the afterlife

**Dr. Craig's first rebuttal**

Dr. Rosenberg sketched the deductive argument from evil.

Dr. Rosenberg presupposes naturalism. Naturalism is a false theory of knowledge:

1. It's too restrictive: There are truths that cannot be proved by natural science.
2. It's self-refuting: no scientific proof for naturalism exists.

That's why epistemological naturalism is considered false by most philosophers of science.

But more importantly than that: Epistemological naturalism does not imply metaphysical naturalism. (E.g. – W. Quine)

Dr. Rosenberg has to present arguments in favor of (metaphysical) naturalism, not just assume that (metaphysical) naturalism is true.

Dr. Craig presented eight arguments against metaphysical naturalism taken from Rosenberg's own book:

1. The argument from the intentionality (aboutness) of mental states implies non-physical minds (dualism), which is incompatible with naturalism
2. The existence of meaning in language is incompatible with naturalism, Rosenberg even says that all the sentences in his own book are meaningless
3. The existence of truth is incompatible with naturalism
4. The argument from moral praise and blame is incompatible with naturalism
5. Libertarian freedom (free will) is incompatible with naturalism
6. Purpose is incompatible with naturalism
7. The enduring concept of self is incompatible with naturalism
8. The experience of first-person subjectivity ("I") is incompatible with naturalism

Metaphysical naturalism is false: it is irrational and it contradicts our experience of ourselves.

And epistemological naturalism is compatible with theism.

Rebutting Dr. Rosenberg's responses:

1. Contingency: no response

2. Cosmological: he mis-states the first premise to say every effect… when it is whatever begins to exist…, the origin of the universe was not from a vacuum, virtual particles come from a vacuum not nothing, there are interpretations of QM that are compatible with determinism. Rosenberg has to believe that the entire universe popped into being from non-being.

3. Mathematics: no response

4. Fine-tuning: the multiverse is refuted by empirical observations of the universe. Without fine-tuning, it's not that we still have silicon to make life out of. It's that we lose basic minimal things like chemical diversity, matter, stars, planets, etc. No life of any kind, not just no carbon-based life.

5. Intentionality: no response.

6. Moral argument: the answer to the dilemma is that you split the dilemma: God is the standard of good, and the commands flow from his unchanging moral nature. The commands are not arbitrary, and the standard is not external to God. Dr. Rosenberg is a nihilist and he cannot ground good and evil on his nihilistic view.

7. Resurrection: The Gospels are early eyewitness testimony. Mormonism and Islam have nothing to do with the minimal set of historical facts about Jesus agreed to by the majority of ancient historians across the ideological spectrum, general statements against eyewitnesses do not refute the specific eyewitness testimony in this case.

8. Religious experience: No response.

**Dr. Rosenberg's first rebuttal**

I wrote a book and you should buy it, because it got me invited to this debate. Let me repeat the title a few times for you. Please buy it.

Dr. Craig is right, there are multiple interpretations of QM, not just the one I presented, including deterministic ones.

All the disturbing implications of naturalism that Dr. Craig stated follow from metaphysical naturalism, and metaphysical naturalism is true. (Note: he equates science with metaphysical naturalism)

Science proves that metaphysical naturalism is true, but I won't say what specific scientific tests prove my philosophical assumption of metaphysical naturalism.

I'll pretend that the Big Bang (science) doesn't disprove naturalism, like Dr. Craig said. Again. (covers ears) La la la, there is no Big Bang.

We didn't come here to debate epistemological naturalism and metaphysical naturalism.

Let me explain the problem of intentionality since I'm so smart and no one knows what it means.

There are many answers to this problem of intentionality.

My answer is that most scientists are naturalists, therefore naturalism is true, regardless of the argument from intentionality of mental states.

That's how I would respond to one of the eight problems with naturalism that Dr. Craig raised. I won't answer the other seven problems.

It is an argument from ignorance to argue that the applicability of mathematics to the universe requires a designer, because there are non-Euclidean geometries. Craig's argument, which he gets from people like respected physicists like Eugene Wigner, is bizarre. It is bizarre, therefore I refute Eugene Wigner and all the other scholars who make that argument. It is bizarre! Bizarre!

Deductive problem of evil: there is no response to this argument, certainly not Alvin Plantinga's free will defense.

The deductive argument from evil has not been entirely abandoned at all! It's not like arch-atheist J.L. Mackie himself admits that the deductive problem of evil doesn't lead to a logical inconsistency between evil and God.

Dr. Craig has to tell me why God allows evil or God doesn't exist.

It is offensive that Dr. Craig cannot tell me why God allows every evil and suffering that occurs.

He literally said this: "I will become a Christian if Dr. Craig can tell me why God allowed EVERY EVIL THAT OCCURRED IN THE LAST 3.5 BILLION YEARS"

**Dr. Craig's second rebuttal**

We are not in a position to know why God allows specific instances of evil and suffering.

God cannot force people to freely do anything – freedom is not compatible with determinism. Freedom is a good, but freedom opens up the possibility of moral evil. You cannot have the good of free will without allowing people to choose to do morally evil things.

God can permit evil and suffering in order to bring more people into a relationship with him.

The atheist has to show that God could allow less evil and achieve more knowledge of God in order to say there is too much evil.

The purpose of life is not happiness, but knowledge of God.

Dr. Craig quotes agnostic Paul Draper (Purdue) and Peter Van Inwagen (Notre Dame) to state that the deductive problem of evil is dead because of free will and morally sufficient reasons for permitting evil.

1. Contingency: no response.

2. Cosmological: QM does not apply, because the universe came from nothing, not a vacuum, and QM only works in a vacuum.

3. Mathematics: He mentions alternatives like non-Euclidean geometry, but we have to explain the structure of THIS universe.

4. Fine-tuning: ???

5. Intentional states: intentional mental states proves that minds exist, which fits with theism better than it fits with atheism.

6. Moral argument: You need God to ground morality, and Dr. Rosenberg believes in morality. He needs God to ground objective moral values and duties.

7. Historical argument: He has to respond to the minimal facts supported by the consensus of ancient historians across the ideological spectrum.

8. The problems of naturalism: He says that you can't have science without naturalism, but you can have science with EPISTEMOLOGICAL NATURALISM, and theists accept science and methodological naturalism. We don't accept METAPHYSCIAL NATURALISM because of the eight problems Craig presented, like intentionality, first-person, persistence of self, etc. You can believe in both science and theism, by embracing epistemological naturalism, while rejecting methaphysical naturalism.

**Dr. Rosenberg's second rebuttal**

Dr. Craig hasn't answered many of my points, I won't say which ones though.

Debates don't work as a way of deciding what's true, so we should overturn the entire criminal justice system.

The principle of sufficient reason is false because it is disconfirmed by quantum mechanics. And quantum mechanics (vacuum and virtual particles that exist for a short time) is similar to the origin of the universe (nothing

and entire universe and 14 billion years).

We know that alpha particles come into being without cause all the time from a quantum vacuum for a tiny sub-second duration before going out of existence, so we can say that the entire physical universe came into being for 14 billion years from absolute nothing which is not a quantum vacuum.

Peter Van Inwagen is the best metaphysician working today, and he says that my deductive argument from evil is not decisive, it's not a successful argument. (Why is he undermining his own problem of evil argument????!)

Dr. Craig invoked Plantinga's free will defense to the deductive POE. Freedom allows us to do evil. God could have given us free will without evil and suffering. I won't show how, but I'll just assert it, because debates are such a bad forum for supplying evidence for my speculative assertions.

If you answer the question 3 + 5 as being 8, then you don't have free will – you are biologically determined if you answer 8, because everyone answers 8, and that means everyone is biologically determined with no free will.

Why can't God give us free will and then prevent us from making a free choice?

No scholars date the gospels earlier than 60-70 AD, especially not atheists like James Crossley who dates Mark to 40 AD. Therefore Jesus' burial isn't historical, like the majority of scholars across the broad spectrum of scholarship agree it is.

The original New Testament documents were written in Aramaic.

All New Testament scholars are orthodox Christians, like atheist Robert Funk for example.

**Dr. Craig's concluding speech**

In order to sustain the deductive argument from evil, Dr. Rosenberg must show that God could create a world of free creatures with less evil.

Principle of Sufficient Reason: not using the general principle of sufficient reason, but a more modest version of this states that contingent things should have an explanation for their existence. And we know that the universe is a contingent.

The New Testament was not written in Aramaic, they were written in Greek. Dr. Rosenberg is wrong there too.

(Dr. Craig spends the rest of his concluding speech giving his testimony and urging people to investigate the New testament).

**Dr. Rosenberg's concluding speech**

Some long-dead French guy named Laplace said that he has no need of that (God) hypothesis. He did not know about any of Dr. Craig's arguments made in this debate tonight when he said that, though.

There is no need to explain how the universe began or how the universe is finely-tuned if you just assume metaphysical naturalism on faith.

The Easter Bunny, therefore atheism.

Most scientists are atheists, therefore atheism.

You can do a lot of science without God, just don't look at the origin of the universe, the fine-tuning of the universe, or the other parts of science that Craig mentioned, as well as the origin of life, the Cambrian explosion, the habitability argument, and so on.

You can be a Christian, but good Christians should not use arguments and evidence.

Good Christians should be irrational and ignorant. Bad Christians look for arguments and evidence from science and history.

Good Christians should embrace the absurd. Bad Christians want to search for truth and use logic and evidence.

# Making monergism make sense: reconciling divine sovereignty and free will

**Wintery Knight** · 26 July 2020 · Archived copy · Original

Lets take a closer look at a puzzle

This article at Free Thinking Ministries was written by my friend Tim Stratton. In it, presents a view of God's sovereignty over salvation without falling into the error of double-predestination.

Excerpt: (links removed)

> Many reformed folks *(freely?)* choose to reject Molinism because they contend that this theological view "smells of synergism." What is this stench that reportedly makes John Calvin turn over in his grave? Simply put, synergism is the view that man plays at least a small part in his own salvation process. Monergism, on the other hand, is the view that God is the author of salvation from beginning to end.
>
> Since Molinism affirms that man is free to choose to reject God's saving grace or not, many Calvinists jump to the conclusion and assume that Molinism must be synergistic. This does not necessarily follow.[1] Consider one possible model:
>
> 1- God, by nature, is a volitional unmoved mover who is free to choose between options in accord with His nature. (This is supported via the *Kalam* and the *Argument from Time*).
>
> 2- By God's grace, humans are created in the "image of God." By nature, then, we are free to choose between options in accord with our nature. (This is supported via the *Freethinking Argument*).
>
> 3- Adam & Eve freely chose to disobey God and this sin completely separates humanity from God. This is what it means to have a "totally depraved sin nature." (Every aspect of man is separated from God).
>
> 4- In this state of depraved separation from God (sin nature), humans do not even know God exists if merely left to our own devices.
>
> 5- If humans do not even know God exists, then, left to our own devices and **apart from God's grace**, it would be impossible to choose to love and follow God (thus, Pelagianism is impossible on this view).
>
> 6- God, in His love for all people, provides amazing prevenient grace to all people (Romans 1:20), writing the law on the human heart (Romans 2:15), conviction of the Holy Spirit (John 16:8-9), and draws all men (John 12:32). This is commonly referred to as "common grace."

> 7- Therefore, by God's grace, human nature has changed from a "totally separated from God nature" to a nature that has now experienced enough divine revelation (influences) allowing all mankind to start making some free and volitional choices in accord with our new nature; namely, to choose to resist God's grace and revelation, or not.[2] Mankind is without excuse because we do not have to resist what God has made clear (Romans 1:18-20).[3]
>
> *[Note: According to Calvinist, Matt Slick (albeit inadvertently), Mark 4:10-12 implies that if an unregenerate person gets access to clear and accurate information, then they possess the ability to become Christians!]*
>
> 8- If one does not reject or continually resist the grace and revelation God provides them, then God will continually provide more and more until the person reaches the point of "no return" and will become saved.
>
> Thus, God does *ALL* the work in salvation from beginning to end on this Molinistic model; all the human can do is freely resist God's grace and revelation, but he or she does not have to! The human does nothing to gain salvation apart from God's grace on this Monergistic Model of Molinism.

I think that Stratton's formulation above does indeed keep God as the sole initiator of salvation. And that's good. But it also makes sure that human who resist God's leading are responsible for their choice to resist God, and that's good. We want salvation to be 100% by faith alone in Christ alone. But we don't want God to be the cause of people not being saved. On Stratton's view, God wants everyone to be saved. If anyone is saved, it's because God did ALL THE WORK to lead them and secure their salvation with the death of Jesus on the cross. But, on Stratton's view, humans do get a choice – the choice to trust God or not. And so, if a person is not saved, then it's their fault – not God's. This works.

Read his whole post, and see what you think about it.

# The most important thing Christian parents need to focus on with their children

**Wintery Knight** · 27 July 2020 · Archived copy · Original

A family praying and reading the Bible

I know what you're thinking – I'm going to say apologetics. But I was actually having a talk with a young women who found the arguments for God convincing, but wasn't sure whether she was ready for a personal relationship with the God of the Bible. It got me thinking about my past and what it was about the God of the Bible that caused me to make a commitment.

If I had to say what it is that cause me to take Christianity seriously, including accepting Jesus as my Leader (more than just as my Savior), it would be the conviction that God was lining things up in my life to show himself to me. This was particularly welcome because I could see that I had not been blessed with the best situation in life to start out with.

Sean McDowell has a recent post about it, and since he is an expert in apologetics, I'm inclined to agree with him.

He writes:

> In his book *The Four Loves*, C.S. Lewis makes a distinction between "Gift-love" and "Need-love." As for Gift-love, he gives the example of a father who works and plans for the future well being of his family, even though he will die without seeing them benefit. As for Need-love, Lewis gives the example of a lonely and frightened child who comes to its mother's arms for comfort and protection. Such love is neither selfish nor improper, because children are intended to have nurturing mothers, and mothers are intended to care for their kids.
>
> According to Lewis, God's love for mankind is entirely Gift-love: "The Father gives all He is and has to the Son. The Son gives Himself back to the Father, and gives Himself to the world, and for the world to the Father, and thus gives the world (in Himself) back to the Father too." God does not *need* our love or worship. Rather, He freely loves us as an extension of His grace.
>
> But our love for God is different. While we *may* be able to offer God Gift-love, our love is primarily need based. Lewis explains: "But man's love for God, from the very nature of the case, must always be very largely, and must often be entirely, a Need-love." We desperately need God in both this world and the next.
>
> And then Lewis makes an additional (and helpful) distinction—while our objective need for God will never change, our *awareness* of that need can. And if our awareness of the need for God fades, then so may our faith. Thus, Lewis says:

> *There seems no reason for describing as hypocritical the short-lived piety of those whose religion fades away once they have emerged from "danger, necessity or tribulation." Why should they not have been sincere? They were desperate and howled for help. Who wouldn't?*
>
> In other words, if someone believes in God because of an immediate need for safety or comfort, then as soon as the danger or pain ends, so may the faith. How does this relate to students? Think about it. If a young person believes in God for social or relational needs in the family, church, or school, then when those needs fade, so will his or her faith. If belief in God fulfills some external need, then as soon as that need fades, or another venue provides satisfaction of that need, the student will likely abandon his or her faith (or minimally, have a *marginalized* faith).

The whole post is worth reading, because no less than Sean McDowell himself had a moment like this where he realized his own sinfulness and had to rely on Jesus for his forgiveness.

Judging from his tweets, I know that Sean is obsessed with super-heroes like Spider-Man, and so he would not be comparing himself to his peers in terms of righteousness. That sort of distance between you and Spider-Man can be really grating for boys. Inside, we feel like we are meant to be super-heroes. Many young men go into apologetics because they see it as a super-power. The problem of not measuring up is very strong for us, because we see the demands of Christianity as much greater than mere church attendance. I imagine that as Sean engaged with people using his apologetics super-power, he probably realized how difficult it was to know *everything* and give an answer to *everyone.* That's above and beyond the standard shortcomings or pride, anger, hatred, and so on that are inside of every person.

We are not super-heroes but we need to have super-human righteousness (that is, perfect righteousness) in order to stand before our Creator and Designer. The only solution is to rely on the imputed righteousness of Jesus for our super-hero status. It is a good and healthy thing to take on Jesus as King, and to imitate him. But when we fail, we must also rely on him as Savior. And thank God the Father for that provision of salvation. And indeed, I myself think of Jesus as Savior in the moments where I am conscious of my own sin. But I need to think about him more than that, and I'll explain how next.

In my case, I wanted to be a super hero growing up, but I knew I wasn't coming from a family or a background that made super-heroes. I was saved in a non-Christian home where, thanks to my hands-off "parents", I was on a very dark path to failure. In fact, I can see where I would have ended up by just looking at where my older brother is now. That disaster is what my parents, my schools, my culture, etc. produced in him, and it would have been me except for God stepping in to make himself known. I get excited about God as initiator and architect of salvation (not without my free will to trust). When God architects a divine appointment for me to use my prepared abilities in his defense or in mentoring little ones, I praise God as author of salvation. But I forget that Christ is the one who allows me to be clean enough to participate in this plan.

My ambition from small was to be a super-hero, and this later turned into great respect for people in the military, especially those who are awarded the Medal of Honor, like Michael Murphy. I want God to give me the Medal of Honor, too. But sin ruins my ambition every day. When I am called out to serve and am found faithful and competent, I need to remember that what makes me fit for service is Christ's sacrifice on the cross. His shed blood is the cape that I put on when it is my turn to come off the bench and be who I was designed to be. It is very important to me that the God I serve is the kind of God who won't turn away from me when I fall short.

# How should parents respond to teachers pressuring children to transition?

**Wintery Knight** · 28 July 2020 · Archived copy · Original

Catholic teachers march in favor of gay rights and perverted sex education

My plan for marriage was to have 4 children with my wife, then homeschool them right through to doctoral degrees. But one thing I knew for sure, I was never going to put my kids into public schools. My impression of public school teachers is that they are the source of moral relativism and cultural relativism. They break down morality and patriotism in children and call it compassion.

Abigal Shrier has noticed that the teachers in public schools are pushing transgenderism pretty hard, because they don't want anyone making judgments about what is right or wrong, wise or foolish.

The far-left UK Daily Mail reported:

> 'I often get parents telling me they're not able to take binders (a cloth which flattens breasts by the use of constrictive materials) away from their children, and I say to them, "Would you give your children cigarettes?".
>
> 'Because we know binders are really harmful, they can deform breast tissue, cause rib cracking and shortness of breath. They're quite dangerous for your 14-year-old to be going around with.'
>
> Sharing her experience of parents' concerns, she said: 'Parents often say to me "I don't want to be seen as a transphobe", and it's very clear to me that sometimes these parents feel like they can't speak the truth or go against their own children's wishes.
>
> […]'I've never seen parents so beaten down and undermined. They send them to school in good faith and now schools are helping them fill out forms with new names as different sexes and hide it from their parents. They turn their kids against their parents.
>
> 'Medicine has become so politicised that parents can't even rely on honesty from medical professionals even when it comes to transition.'

You might remember that I blogged about a particularly scary case of this from socialist Canada, which doesn't respect parents' rights at all. There, the teachers, administrators, counsellors, doctors, layers and judges, all conspired to transition a child from female to male against the parents' wishes. If you haven't read that post from March of this year, you should definitely go read it, to find out where our own public schools are trying to go with students.

Anyway, in another article from The College Fix I found an excerpt of her new book, where she offers advice to parents. She talks about not giving them smartphones, not abdicating the leadership role, monitoring the schools for gender ideology, keeping family business private, being open to pulling the children out of their communities, etc.

And there is some pushback against the transgender agenda being promoted by teachers. Some people are regretting their transitions, and blaming the adults who affirmed them on their way to self-harm.

Here's an article from Sky News:

> A woman who was treated with hormone blockers to reassign her gender as a teenager is taking the NHS to court, saying she "should have been told to wait".
>
> Keira Bell said the care she received for gender dysphoria, a condition where a person experiences distress due to a mismatch between their biological sex and their gender identity, steered her towards medical treatment.
>
> Ms Bell, who used to identify as a boy, was 15 when she went to the Tavistock Centre in London. She said after "roughly three sessions" she started receiving hormone blockers.
>
> Eight years later, and after undergoing surgery, Ms Bell is de-transitioning to return to a woman.
>
> […]She said: "I am angry about the whole situation because of how things have turned out for me based on the medical pathway that I was put on, but I'm now just trying to focus on changing the system for the better and making it better for minors and children.
>
> "I should have been told to wait and not affirmed in my gender identity I was claiming to have and given intensive therapy basically to make sure that I was on the right track for things and investigate the feelings I was having to figure out how I got to that stage."
>
> Ms Bell said she felt "trapped and alone", and the Tavistock Centre should have taken into account the "confusion" teenagers experience before offering her treatment.

What I'd like to see is conservative lawmakers craft legislation to allow victims like this to charge the teachers, administrators, doctors, lawyers and judges with criminal negligence. Because I really feel that it is criminal to lie to young people so that you will feel good, and people will like you. That's all that this focus on feelings and compassion is. The secular leftist adults aren't capable of moral reasoning. They don't want to do good for the children, they want to feel good and be popular, even if it harms the children's long-term well-being and happiness. The adults should be punished.

# Radical feminists explain how feminism prepared them for dating and marriage

**Wintery Knight** · 29 July 2020 · Archived copy · Original

These women are very angry, is that why men avoid them?

So, quick review. Radical feminism is the view that there are no differences whatsoever between men and women. And the reason why men do better at work is not due to a stronger desire to provide, it's just caused by sexism in the workplace. Feminists don't focus on marriage or choose men for marriage ability – that's "sexist". So, why don't men want to date or marry feminists?

I like to read a web site called "Bolde" to find out what feminists are thinking. They have good articles, and even if I disagree with the authors, I do feel sorry for them.

Here's an article called "I'm All For Feminism, But It's Kinda Making It Harder To Date" that says:

> It doesn't take much for me to overanalyze a guy's intentions nowadays. I used to see a guy opening a door for me as nice and polite, but lately, gestures like this have been making me angry. I know the guys offering these acts of chivalry have no intention to make me feel small or lesser than, but now that my eyes have been opened to feminist theory, it's all I'm able to think about.
>
> […]When I'm out with a guy and he says one thing that's even REMOTELY offensive towards women, I find it really hard to recover. I instantly write guys off if they aren't "woke" to the current social mindset towards gender politics and can't let it go. Let's just say I've gone on A LOT of first dates that never go anywhere.
>
> […]All it takes is one quick scroll down my newsfeed and I have enough feminist rants to last me several winters. I think I've almost trained my brain to assume ALL men are here to try to put me down and dominate me when that's far from the truth. I've made it kind of an automatic reflex at this point, though.

She actually says in her article that she's been "brainwashed". And that's basically the case. Before feminism, women used to evaluate men for traditional male roles: protector, provider, moral and spiritual leader. They looked for evidence of moral convictions, mentoring, charity, kindness, etc. After feminism, women are more likely to get the tingles for a guy who is tall, pierced and tattooed. To look for husband qualities in a man is "sexist". Early marriage is "boring". Having lots of children is "wasting your education".

It's pretty clear from reading her article that she would not be a good partner. Men are looking for a woman who

will listen to their life plan, and give up the pursuit of fun, thrills and travel in order to help them achieve it. Although it should be obvious, we aren't going to commit to a woman who is seeking to grab the reins from us, and tear us down. Men tend to be more focused than women on reason and practicality. That's good, but it's a very cold existence. We want a woman to be caring and helpful, not a snarky competitor.

Here's another one from Bolde entitled: "I Say I Want A Good Man But The Idea Of Dating A Mature Guy Scares Me":

> I've dated very few men in my life and a whole lot of boys.
>
> […]I think that I have a need to feel like I'm in charge of romantic situations. It dates back to my childhood issues, I guess. I want to keep the upper hand.
>
> […] I'm very honest, yes, but I'm emotionally closed-off. There is a definite distinction between the two. There are certain places that I simply don't (or can't) go with most people. When I'm confronted with a man who is open with his feelings, it freaks me out.
>
> […][M]ost of the men I've met who are emotionally developed also have the rest of their act together, and it makes me feel like maybe I don't.
>
> […]I get paranoid because I hate being at a disadvantage.
>
> […]I'm not that different from the rest of my generation in some ways. I'm used to the ease of being single, and while ideally I'd like a deep and loving adult relationship, I also know that it takes time and energy that I'm not sure I'm willing to give up.
>
> […]I'm always falling for men who are unavailable in some way or another. I hate that I'm like this and I know that I operate this way because it feels safer than engaging in risky vulnerability with someone who truly wants to be with me.
>
> […]I've not had many mature relationships in my life. I've been in love and I've had serious boyfriends, but there was often an element of childishness to our interactions. We never really discussed our futures together or acted… adult. Now I feel like I don't even know how to begin.

I've had experiences with women like this who smashed themselves up on the rocks of bad boys over and over. I think she really explains why it is that so many women are attracted to younger bad boys who don't want to commit. The truth is that women are scared of commitment. They don't want to give up their free and easy single lives in order to have to put effort into making a relationship work. They want husbands and homes, but without expectations, responsibilities, or obligations. And the better a man is at manly traits like protecting, providing, and leading on moral and spiritual issues, the less they like him. It's even worse if he has a good STEM education, a good resume, and a good balance sheet. They deliberately bypass commitment-ready men because they don't want to be led – even by a good leader.

By the way, in my experience, what she describes above is the natural outworking of being promiscuous with hot bad boys. Women who do that lose trust for men, and they lose their confidence dealing with good men who want to marry them. And naturally all that sex with attractive men makes the woman less content with the one she has to "settle" for – since she didn't respect men who were good at commitment in the first place. Promiscuity trains people to pre-emptively nuke relationships rather than invest effort into making them work.

# Is there evidence of systemic racism in the United States?

**Wintery Knight** · 30 July 2020 · Archived copy · Original

***ANNOUNCEMENT: I'm going to be on the Free Thinking Ministries podcast today at 2 PM Pacific, 5 PM Eastern, with host Tim Stratton. Join us, and we will discuss Black Lives Matter, Christianity and more. And I'll explain my plan to achieve the American Dream as a person of color and legal immigrant to America. Live stream link here.***

Systemic racism is the idea that people can't lift themselves out of poverty by making good decisions, because powerful groups in society that hold the poor down, regardless of their decisions. Do you think that America is a place where no matter what choices you make, you'll never be able to be more properous? That's what the leaders of Black Lives Matter think.

Here's what Nikole Hannah-Jones, creator of the 1619 Project, says in the New York Times (a former newspaper):

> To summarize, none of the actions we are told black people must take if they want to "lift themselves" out of poverty and gain financial stability — not marrying, not getting educated, not saving more, not owning a home — can mitigate 400 years of racialized plundering.

Got that? It doesn't matter what individual choices a non-white person takes in America, they're going to be poor. The "systemic racism" of the powerful whites will always keep them down. Single motherhood doesn't make people poor, and marriage doesn't make people wealthier. Dropping out of high school doesn't make you poor, and getting a Masters degree in computer science won't make you wealthier.

But let's take a look at the data from the 2018 Census, and see the evidence.

| Median US Household Income by Selected Ethnic Groups, 2018 | | |
|---|---|---|
| Indian | Americans | $119,858 |
| Taiwanese | Americans | $95,736 |
| Lebanese | Americans | $82,353 |
| Turkish | Americans | $81,656 |
| Chinese | Americans | $81,487 |
| Iranian | Americans | $80,291 |
| Japanese | Americans | $80,036 |
| Pakistani | Americans | $77,315 |
| Ukrainian | Americans | $77,083 |
| Filipino | Americans | $75,279 |
| Indonesian | Americans | $74,497 |
| Syrian | Americans | $72,675 |
| Korean | Americans | $72,074 |
| Ghanaian | Americans | $69,343 |
| Nigerian | Americans | $68,658 |
| Guyanese | Americans | $68,393 |
| **White** | **Americans** | **$67,937** |

Source: US Census Bureau

White people are doing a bad job of keeping non-whites down

Well, it looks like at least SOME people of color are able to do well in America despite all the "systemic racism" that keeps non-whites down. And do you know what those non-white groups at the top have in common? They've made good decisions, they've worked hard, they haven't blamed other people when they fail, and they've saved their

money instead of spending it on shiny junk.

Let's look at some decisions that the non-whites who are prosperous have made, that those further down have not.

Asians marry before they have children, so the kids have two parents

**Education and marriage**

This article is written by the far-left radical Nicholas Kristof, writing in the radically-leftist New York Times (a former newspaper).

Excerpt:

> A new scholarly book, "The Asian American Achievement Paradox," by Jennifer Lee and Min Zhou, notes that Asian-American immigrants in recent decades have started with one advantage: They are highly educated, more so even than the average American. These immigrants are disproportionately doctors, research scientists and other highly educated professionals.

> It's not surprising that the children of Asian-American doctors would flourish in the United States. But Lee and Zhou note that kids of working-class Asian-Americans often also thrive, showing remarkable upward mobility.
>
> […]There's also evidence that Americans believe that A's go to smart kids, while Asians are more likely to think that they go to hard workers… Asian-American kids are allowed no excuse for getting B's — or even an A-. The joke is that an A- is an "Asian F."

One reason Asians students do so well is because their parents are usually married:

> > Strong two-parent families are a factor, too. Divorce rates are much lower for many Asian-American communities than for Americans as a whole, and there's evidence that two-parent households are less likely to sink into poverty and also have better outcomes for boys in particular.

American blacks have a 73% out-of-wedlock birth rate. A huge difference compared to Asians.

So, when Nikole Hannah-Jones tells you that education and marriage don't matter, she's just wrong.

**Compound interest**

Education and marriage are important, but so is saving your money. The wealthiest people in America are typically the ones who are experts at saving money early, and investing it. They know about the law of compound interest. If you invest money early and leave it alone, then it will grow into a fortune by the time you are read to stop working.

This graph explains compound interest:

Investing $24,000 from age 21 to 41 vs investing $24000 from age 47 to 67

What does Nikole Hannah-Jones say when she looks at that graph? She doesn't think that saving money makes a difference to having more or less wealth. She thinks skin color determines whether saving money makes you wealthy or not. The graph clearly shows what we should be recommending to young people of color. They need to stop spending money and start saving it, and the earlier the better. It doesn't matter what your skin color is, saving money early JUST WORKS.

Similarly, when she says that home ownership doesn't make you more wealthy, this is just terrible advice. It's always better to pay down your own mortgage (at least when interest rates are low like they are now) than to pay someone else rent. You have to live somewhere, and paying for your own home is better because it costs about the same as rent, and then you get to keep the home when you're done paying for it.

**Communism**

Nikole Hannah-Jones does have a "solution" to disparities in wealth. Her solution is communism. She wants to transfer money from those who earn, to those who don't. But we already have tried that in the 21st century and it resulted in the deaths of over 100 million people. That's not my opinion, that's all documented in a book published by Harvard University Press.

You don't even have to read the book to know the truth – just look at countries that score low on the Index of Economic Freedom, and compare their GDP per capita to countries that score high on the Index of Economic Freedom. The more communist a nation goes, the less wealth there is for the citizens. That's why people in Venezuela are eating zoo animals and selling their bodies in prostitution in order to get food to eat and water to drink. Nikole Hannah-Jones wants to reduce economic freedom, but we know by looking at other countries that this reduces per-capita GDP over time.

There's a lot more than could be said here, but the point is that we need to be telling American blacks to make decisions that match the decisions of other successful non-white communities in America. We need to start teaching young people basic economics so they don't fall prey to charlatans.

# Three reasons why Christians should read military history

**Wintery Knight** · 31 July 2020 · Archived copy · Original

Roger Trimble, standing second from the left, in front of his B-24 Liberator

I recently finished a book called "Beyond The Call: The True Story of One World War II Pilot's Covert Mission to Rescue POWs on the Eastern Front". It's about a World War 2 heavy bomber pilot who completes 35 missions, and then goes into the Soviet Union (our allies, at the time) to rescue American POWs who were starving or being kidnapped or murdered by the Soviet secret police.

I found a very good article about it from Stripes, to just quickly introduce the story:

> Later, after making contact with POWs roaming the Polish countryside, [Capt. Robert Trimble] fully embraced his mission. He saw the desperate plight of those who had been liberated from Third Reich prison camps. Many were sick, emaciated, often clothed in rags and left to fend for themselves during a brutally harsh winter.
>
> Trimble risked his life numerous times over six weeks, helping to rescue hundreds of POWs. He came to the aid of others, too. In one daring rescue, nearly foiled by Russian agents who had become suspicious of his activities, Trimble helped 400 French women make it out of Poland and back to France.

Although he was being constantly trailed by Russian spies and informers, he would evade them, and bring food and money to the POWs, then put them on a train to Odessa, Ukraine, where they could get onto a ship going home.

**Why I read military history**

It is hard to develop virtues just by wishing and hoping. Something has to go into your mind that causes you to think differently, and feel differently. Everything that you watch on TV, hear on the radio, or see in the movie theater, is made by secular leftists. They aren't trying to build your moral character. They're goal is to break down your resistance to their unBiblical worldview and moral values. Instead of giving people who hate Jesus your money, just so you can be entertained, why not try to put something in front of your eyes that will make you better?

Look at this famous passage from the Bible.

Romans 12:1-2:

*1Therefore I urge you, brethren, by the mercies of God, to present your bodies a living and holy sacrifice, acceptable to God, which is your spiritual service of worship.*

*2 And do not be conformed to this world, but be transformed by the renewing of your mind, so that you may prove what the will of God is, that which is good and acceptable and perfect.*

And also this from Philippians, my favorite book of the Bible.

Philippians 4:8:

*8 Finally, brethren, whatever is true, whatever is honorable, whatever is right, whatever is pure, whatever is lovely, whatever is of good repute, if there is any excellence and if anything worthy of praise, dwell on these things.*

So you can see that when I am reading, my goal is to work on my character. I want to have feelings about things that are appropriate for a Christian man.

So why military history? Here are three reasons why I read these military history books.

**Humility**

First, **humility**. Humility used to be one of my biggest challenges. So I thought to myself "instead of seeing yourself as some heroic figure, why don't you read about some real heroes… people who willingly gave their lives for their friends, like the Bible urges, and like Jesus did by example".

Remember this from John 15:13?

*13 Greater love has no one than this, that one lay down his life for his friends.*

Military history is filled with stories of courage, bravery, self-sacrifice, endurance, unselfishness, and many other virtues. When you read about people who are better than you, doing more important things than what you're doing, it really helps you to be humble.

The best thing for humility is reading Medal of Honor citations. You can find a bunch of them online here. And if you want a book to read, try these books about Medal of Honor recipients:

- Heroes of World War II
- Korean War Heroes
- Vietnam Medal of Honor Heroes

**Endurance**

Second, **endurance**. I sometimes feel badly about not having found someone to marry and not having lots of children. I wanted a good marriage to be a model for others, and also to have an influence in the next generation through my children. However, whenever I read military history, I see a lot of young men dying in battle. And I think, they too won't know what sex is like. And, they too won't know what marriage is like. And, they too won't know what having children is like. But it's not just the ones who die, it's the hardships they have to go through, as well. Cold, hunger, imprisonment, pain, loss of their friends, etc.

I remember reading about one of my favorite battles – probably the most famous battle of the Korean War, which is our most moral war. It's about Fox Company of the 2nd Battalion, 7th Regiment, 1st Marine Division. They had to hold a hill beside a vital road against overwhelming numbers of Chinese soldiers during the freezing cold North Korean winter. I remember reading about how one soldier got up to go to the bathroom, and was nearly shot by a sniper. He fell over on his own poop, which had already frozen by the time it hit the ground. For months after, I would always think about this whenever I went into a bathroom. We have pre-warmed water in our bathrooms at work, along with soap, lysol spray, febreeze, contact lense cleaner, hand sanitizer, and other things. Just understanding what other people have to go through in war helps me to be more patient with the little tiny setbacks

that I experience. I used to get very anxious when anything went wrong, because of I was raised by strict immigrant parents. That anxiety seemed to last a long time, but since I started to read military history, I've been much more patient. I know that things could be worse.

**Thankfulness**

The third thing that I've experienced is **thankfulness**. Not just for all the things that I have because of what our armed forces have done, e.g. – basic human rights, prosperity, liberty, security, etc. But also specifically about those who gave their lives so that I could live free in a free country, and practice my Christian faith without fear.

Here are two of my favorite Medal of Honor stories from World War 2, in the Battle of Pearl Harbor:

*Congressional Medal of Honor*
*Awarded Posthumously*
*PETER TOMICH*

*Rank and organization: Chief Watertender, U.S. Navy.*
*Place and date: Pearl Harbor, 7 December 1941.*
*Born: 3 June 1893, Prolog, Austria.*

*Although realizing that the ship was capsizing as a result of enemy bombing and torpedoing, Tomich remained at his post in the engineering plant of the U.S.S. Utah, until he saw that all boilers were secured and all fireroom personnel had left their stations, and by so doing lost his own life.*

And:

*Congressional Medal of Honor*
*Awarded Posthumously*
*JAMES RICHARD WARD*

*Rank and organization: Seaman First Class, U.S. Navy.*
*Place and date: Pearl Harbor, 7 December 1941.*
*Born: 10 September 1921, Springfield, Ohio.*

*When it was seen that the U.S.S. Oklahoma was going to capsize and the order was given to abandon ship, Ward remained in a turret holding a flashlight so the remainder of the turret crew could see to escape, thereby sacrificing his own life.*

I do think that it's important for Christians to read these kinds of stories in order to feed their own awareness of what it must have been like for Jesus to give his life *voluntarily* for us.

There is no shortcut to gratitude. You have to constantly reflect on the sacrifices made by others for you, if you are to have any concrete reason for feeling grateful. The more you read about examples of people giving their lives for others, the more you'll appreciate what Jesus did for you. It will make you grateful.

There is a very annoying idea out there in the culture that says that people just do whatever is easy and fun for themselves, and since everyone else is always doing what makes them feel good, then there is no need to be thankful for anything. It's comforting for people to delude themselves with that belief, but it's false.

**My reading list**

You can check out the "What I am Reading" section of the blogto see which military history books I've been reading.

# Astronomer Guillermo Gonzalez lectures on intelligent design and habitability

**Wintery Knight** · 1 August 2020 · Archived copy · Original

Christianity and the progress of science

Here is a lecture that talks about intelligent design and eclipses. There are 5 video clips that make up the full lecture.

The playlist for all 5 clips is here.

**About the speaker**

> Guillermo Gonzalez is an Associate Professor of Physics at Grove City College. He received his Ph.D. in Astronomy in 1993 from the University of Washington. He has done post-doctoral work at the University of Texas, Austin and at the University of Washington and has received fellowships, grants and awards from such institutions as NASA, the University of Washington, the Templeton Foundation, Sigma Xi (scientific research society) and the National Science Foundation.

Learn more about the speaker here.

**The lecture**

Here's part 1 of 5:

And the rest are here:

- Part 2 of 5
- Part 3 of 5
- Part 4 of 5
- Part 5 of 5

Total time: 43 minutes.

**Topics:**

- What is the Copernican Principle?
- Is the Earth's suitability for hosting life rare in the universe?
- Does the Earth have to be the center of the universe to be special?
- How similar to the Earth does a planet have to be to support life?
- What is the definition of life?
- What are the three minimal requirements for life of any kind?
- Requirement 1: A molecule that can store information (carbon)
- Requirement 2: A medium in which chemicals can interact (liquid water)
- Requirement 3: A diverse set of chemical elements
- What is the best environment for life to exist?
- Our place in the solar system: the circumstellar habitable zone
- Our place in the galaxy: the galactic habitable zones
- Our time in the universe's history: the cosmic habitable age
- Other habitability requirements (e.g. – metal-rich star, massive moon, etc.)
- The orchestration needed to create a habitable planet
- How different factors depend on one another through time
- How tweaking one factor can adversely affect other factors
- How many possible places are there in the universe where life could emerge?
- Given these probabilistic resources, should we expect that there is life elsewhere?
- How to calculate probabilities using the "Product Rule"
- Can we infer that there is a Designer just because life is rare? Or do we need more?

The corelation between habitability and measurability.

- Are the habitable places in the universe also the best places to do science?
- Do the factors that make Earth habitable also make it good for doing science?
- Some places and times in the history of the universe are more habitable than others
- Those exact places and times also allow us to make scientific discoveries
- Observing solar eclipses and structure of our star, the Sun
- Observing stars and galaxies
- Observing the cosmic microwave background radiation
- Observing the acceleration of the universe caused by dark matter and energy
- Observing the abundances of light elements like helium of hydrogen
- These observations support the big bang and fine-tuning arguments for God's existence
- It is exactly like placing observatories on the tops of mountains
- There are observers existing in the best places to observe things
- This is EXACTLY how the universe has been *designed for making scientific discoveries*

This lecture was delivered by Guillermo Gonzalez in 2007 at the University of California at Davis. If you like this lecture, but maybe want something a bit more user friendly, check out "The Privileged Planet" DVD, or watch it online here (first 60 minutes of that video).

# Bible study: a good sermon on grace, shepherds and sheep

**Wintery Knight** · 2 August 2020 · Archived copy · Original

A good shepherd rescuing a lost sheep, who had no hope

My friend Wessel sent me this sermon a few days ago because I was looking for a good sermon on grace. Some of my friends pitched in with sermons, but this one from a South African church was BY FAR the best. I've listened to it 3 times already. The speaker sounds exactly like one of best friends from university, Andrew, who is from South Africa.

Here is the MP3 file. (7 megabytes, 30 minutes)

The text of the sermon is Genesis 48:1-20:

> [1] Some time later Joseph was told, "Your father is ill." So he took his two sons Manasseh and Ephraim along with him.
>
> [2] When Jacob was told, "Your son Joseph has come to you," Israel rallied his strength and sat up on the bed.
>
> [3] Jacob said to Joseph, "God Almighty appeared to me at Luz in the land of Canaan, and there he blessed me
>
> [4] and said to me, 'I am going to make you fruitful and increase your numbers. I will make you a community of peoples, and I will give this land as an everlasting possession to your descendants after you.'
>
> [5] "Now then, your two sons born to you in Egypt before I came to you here will be reckoned as mine; Ephraim and Manasseh will be mine, just as Reuben and Simeon are mine.
>
> [6] Any children born to you after them will be yours; in the territory they inherit they will be reckoned under the names of their brothers.
>
> [7] As I was returning from Paddan, to my sorrow Rachel died in the land of Canaan while we were still on the way, a little distance from Ephrath. So I buried her there beside the road to Ephrath" (that is, Bethlehem).
>
> [8] When Israel saw the sons of Joseph, he asked, "Who are these?"
>
> [9] "They are the sons God has given me here," Joseph said to his father.
>
> Then Israel said, "Bring them to me so I may bless them."

> [10] Now Israel's eyes were failing because of old age, and he could hardly see. So Joseph brought his sons close to him, and his father kissed them and embraced them.
>
> [11] Israel said to Joseph, "I never expected to see your face again, and now God has allowed me to see your children too."
>
> [12] Then Joseph removed them from Israel's knees and bowed down with his face to the ground.
>
> [13] And Joseph took both of them, Ephraim on his right toward Israel's left hand and Manasseh on his left toward Israel's right hand, and brought them close to him.
>
> [14] But Israel reached out his right hand and put it on Ephraim's head, though he was the younger,and crossing his arms, he put his left hand on Manasseh's head, even though Manasseh was the firstborn.
>
> [15] Then he blessed Joseph and said,
>
> "May the God before whom my fathers
> Abraham and Isaac walked faithfully,
> the God who has been my shepherd
> all my life to this day,
>
> [16] the Angel who has delivered me from all harm
> —may he bless these boys.
> May they be called by my name
> and the names of my fathers Abraham and Isaac,
> and may they increase greatly
> on the earth."
>
> [17] When Joseph saw his father placing his right hand on Ephraim's head he was displeased; so he took hold of his father's hand to move it from Ephraim's head to Manasseh's head.
>
> [18] Joseph said to him, "No, my father, this one is the firstborn; put your right hand on his head."
>
> [19] But his father refused and said, "I know, my son, I know. He too will become a people, and he too will become great. Nevertheless, his younger brother will be greater than he, and his descendants will become a group of nations."
>
> [20] He blessed them that day and said,
>
> "In your[c] name will Israel pronounce this blessing:
> 'May God make you like Ephraim and Manasseh.'"
>
> So he put Ephraim ahead of Manasseh.

So, in this story, God continues his tradition of choosing the lowly people in the world instead of the people who are seen as "better". God does this in many cases, because he has a big heart for people who are born in a bad position. Normally in the world, people always choose what they think is best for them. They choose the prettiest girl. They choose the most tallest man. Those who need a little extra help or care are passed over. God sometimes does the complete opposite of this. Instead of choosing the obvious "best person", he chooses a much lower person, and he lifts them up to do great things.

Consider 1 Corinthians 1:26-31:

> [26] Brothers and sisters, think of what you were when you were called.Not many of you were wise by human standards; not many were influential; not many were of noble birth.
>
> [27] But God chose the foolish things of the world to shame the wise; God chose the weak things of the world to shame the strong.
>
> [28] God chose the lowly things of this world and the despised things—and the things that are not—to nullify the

> things that are,
>
> [29] so that no one may boast before him.
>
> [30] It is because of him that you are in Christ Jesus, who has become for us wisdom from God—that is, our righteousness, holiness and redemption.
>
> [31] Therefore, as it is written: “Let the one who boasts boast in the Lord.”

The speaker in the sermon explains the idea of grace by talking about sheep and shepherds. He explains that unlike clever homing pigeons, sheep are prone to wandering off and they aren’t able to find their way home. Sometimes, they get lost, and sometimes they even wander into danger. A bad shepherd would just say that he only wanted to have the best sheep – the smartest ones or the richest ones or the best looking ones or the most popular ones. But a good shepherd is sorry for the sheep that needs the most help, and is the most lost, and in the most danger. God is like a good shepherd. God sends his Son to die to atone for the sins of the bad sheep in this world, even when they didn’t deserve it. (John 3:16-17) That’s grace. But he also arranges the world in a way that bad sheep have an opportunity to reach out and find him. (Acts 17:24-27) That’s grace, too.

In my own life, I have often found myself being excluded or discounted by people, usually because of my skin color or because of my early childhood poverty or because I just struggle to understand what I’m expected to say and to do. But a funny thing often happens. Right when I am feeling the worst about being excluded, God comes along and gives me something special to do, that makes me forget about being excluded. And that’s been my experience of grace, ever since I was little and even to this day. The honor of being allowed to participate in God’s plan makes me forget what it feels like to be excluded. The very best things I’ve achieved in my life are the times where God showed me someone who started out life in a terrible situation (usually because of the selfish decisions of their irresponsible parents) and then I participated in God’s plan to lead them out of the mess they started out from.

I think one of the biggest reasons why some Christians stick with Christianity through thick and thin is that they have this experience of grace. This experience of grace means that no matter what, that sheep is going to loyal to that shepherd who chose him when he was at his lowest and most vulnerable. The first part of the choosing is obviously Jesus dying on the cross to atone for your rebellion. But after that, God carefully reveals himself to the sheep. And then there is the guidance that helps the sheep to avoid destroying himself with sin. If the sheep makes mistakes, the good shepherd has already laid down his life to pay for them. This is a lot of effort being put into this rescue operation. It’s difficult for people who have never experienced grace to realize how real and life-transforming it is. For those who have not experienced it, I really recommend that you pray to God, in the name of Jesus, and ask him to give you grace.

There are still things in my life where God has decided that he is not going to fix it. And, strangely enough, that doesn’t make me disloyal to him at all. Why not? Well, you have to read the Bible and understand that Jesus was not spared from suffering or death in his loyal obedience to God. He wasn’t given everything he wanted to feel happy all the time. When you understand that this is the character of your shepherd, then it’s much easier for you to put up with the things you lack, too.

# Google purges conservative sites from its search results to help the Democrat party

**Wintery Knight** · 3 August 2020 · Archived copy · Original

Google's new motto

So, in 2016 Trump won the presidential election. At that time, I got about 1000 referrals per day from the Google search engine. Now I get less than 100 per day. Although my posts show on the first page of results on Duck Duck Go, Google has deleted my posts or buried them way down in the search results. But I'm not the only victim of their pro-Democrat-party bias.

Here's the latest from Breitbart:

> A few days after the 2016 election, at an internal meeting later leaked to Breitbart News, top Google executives, including Sundar Pichai, Sergey Brin, and Kent Walker, lamented President Trump's victory, comparing Trump voters to "extremists" and discussing their desire to make Trump's election and the populist movement a "blip" in history.
>
> True to their word, four years later, Google is deliberately working to interfere with the reelection of Trump in 2020.
>
> There are several ways in which Google is interfering in the 2020 election, but this article will focus primarily on one of them: political search bias.
>
> […]New data shows that Google has suppressed Breitbart's search visibility by 99.7 percent since 2016.
>
> On April 4, 2016, Breitbart ranked in the top ten search positions (i.e., on the first page of Google search results) for 355 key search terms; but now, as of July 20, 2020, Breitbart ranks in the top ten search positions for only one search term. And, on April 4, 2016, Breitbart ranked in the top 100 search positions for 16,820 key search terms; but now, as of July 20, 2020, Breitbart ranks in the top 100 search positions for only 55 search terms.
>
> Moreover, organic Google search traffic to Breitbart (measured by unique visitors) is down 63 percent when comparing the first half of 2016 with the first half of 2020.

They're down 99.7%, and I'm down 90%. I suspect it's the same for most other conservative web sites. Rather than admit that they are suppressing conservative sites, Google's CEO decided to lie to Congress about it.

The Federalist reports:

> Google CEO Sundar Pichai brushed off questions Wednesday before the House Judiciary subcommittee on antitrust related to the tech giant's apparent blacklisting of conservative groups last week when about a dozen

> major websites were temporarily de-platformed.
>
> […]The websites targeted in last week's blacklisting, according to NewsBusters which itself was temporarily de-platformed last week, included the Washington Free Beacon, The Blaze, Townhall, The Daily Wire, PragerU, LifeNews, Project Veritas, Judicial Watch, The Resurgent, Breitbart, the Media Research Center, and CNSNews among others.
>
> Chuck Ross, a journalist with the Daily Caller News Foundation, observed that his employer's website was also included in the blackout when searches for stories related to Stefan Halper, an FBI informant who spied on the Trump campaign in Crossfire Hurricane was unmasked by his reporting came up blank.

> An experiment on whether Google is blocking search results for conservative sites. Randomly picked Stefan Halper as a search term. NYT and WaPo have 96 returns combined. No results on @DailyCaller, though we've probably published his name 100 times.
>
> — Chuck Ross (@ChuckRossDC) July 21, 2020

> NewsBusters reported that the websites impacted by the Google blackout were still organically available on Bing, Yahoo, and DuckDuckGo.
>
> Steube's questioning and the recent episodes of censorship come just one month after Google threatened to demonetize The Federalist following a report from NBC's "Verification Unit" compiled in collusion with a foreign left-wing think tank. While NBC first reported Google de-platformed The Federalist for its coverage of the riots sweeping American cities, the company released a statement that it was merely threatening the conservative website to take action for content in its comment section, not its published commentary.

Frankly, I blame Trump and the Republicans. When we had the House, Senate and presidency, we should have used the government to wipe out Big Tech – break them all up into small cap companies. Investigate every single senior-level employee, right up to the CEO. Jail the ones who are found guilty, and seize their assets.

Conservatives have a bad habit of trying to get along with their enemies, instead of holding them accountable. They would do the same to us, so we should be serious when we have power. Abolish teacher unions. Put a massive tax on trial lawyers, Hollywood, entertainers, athletes, and the mainstream media. Defund NPR and PBS. End all unconstitutional government departments. Cut off all subsidies for higher education. And so on.

We had our chance, and we blew it.

In the meantime, please use DuckDuckGo.

# Violent crime surges in large cities as Democrat leaders defund police

**Wintery Knight** · 4 August 2020 · Archived copy · Original

How do Democrats respond to riots, vandalism and arson?

We can already see how Democrats respond to criminals by looking at what is happening now in major Democrat-run cities. Criminals are defacing monuments, vandalizing businesses and assaulting law-abiding citizens. The response of the Demoncrats in power has been to order the police to stand down – then cut the police budget in order to fund social workers.

Here's a report from The Daily Wire:

> Homicide rates are hitting decades-long highs in many of the largest cities across the United States as local officials struggle with the fallout of a pandemic and massive anti-police protests.
>
> Homicide rates have increased by double-digits in 36 of the 50 biggest U.S. cities, according to The Wall Street Journal. The spike in killings comes as other forms of violent crime, such as robberies and rapes, are appearing to decrease.
>
> […]Chicago police say gang violence lead to at least 15 people injured during a July 21 shootout at the funeral for a young man and gang member. At least 60 shell casings were recovered from the scene after a group of men opened fire on people gathered for the funeral and some in the crowd fired back.
>
> Aside from the pandemic, a wave of protests against police brutality has driven a secondary wave of anti-police sentiment as activists push local officials to defund and abolish police departments.

It's much easier for Democrats to do their rioting and looting and arson if there are no police to stop them.

The police do have some advice for the taxpayers who pay the Democrat leaders to protect them from criminals:

> Minneapolis Police informed residents of the city's embattled 3rd Precinct to prepare for the giving up of their personal belongings to potential robbers and advised them to do as criminals say for their own safety.
>
> According to a July 28 email provided to Alpha News MN that was also forwarded to The Daily Wire, the Minneapolis Police Department offered "prevention tips" to residents hoping to avoid being a victim of the skyrocketing cases of robbery and carjacking that have plagued the city since George Floyd's death in May.

> “Robberies and Carjacking’s [sic] have increased in our Precinct,” the email begins. “Cell phones, purses, and vehicles are being targeted. Some victims have been maced, dragged, assaulted, and some threatened with a gun. Most of these crimes have occurred north of 42nd St. E. 100 Robberies and 20 Carjackings have been reported to 3rd Precinct Police in July alone. Downtown and Southwest Minneapolis have seen an increase as well. We want those who live and work here to be safe!”

The e-mail tells residents of the Democrat stronghold to: “Be prepared to give up your cell phone and purse/wallet.” And when confronted by criminals, to “do as they say.” Not surprising, since the police were previously ordered to vacate a precinct, so that the rioters could set it on fire.

If Joe Biden wins in November, he’ll confiscate your firearms and tell you to do as the criminals say, and hand over your property to them. Let them rape you. Let them kill you. Let them kill your family. And he’ll be protected by armed security. Paid for by you.

# How a small, poor country became the top economy in Latin America

**Wintery Knight** · 5 August 2020 · Archived copy · Original

South America Map

One way to learn about whether specific economic policies work or not is to look at different countries that have tried them. Believe it or not, patterns do emerge about what works and what doesn't work, as you look across different times and places. I've been reading a book called "Money, Greed and God" with my friend Carla, which talks about what has worked to reduce poverty.

The author basically outlined two approaches. In the first approach, the government 1) confiscates the wealth of the most productive workers, 2) nationalizes (takes control of) the businesses of the most successful entrepreneurs, 3) restricts trading between citizens and with other countries, with minimum wage, price controls and tariffs. In the second approach, the government does the opposite: 1) lowers taxes on the most productive workers, and 2) lets entrepreneurs compete to provide goods and services to consumers, and 3) lowers restrictions on internal trading and trading with other countries, e.g. – eliminating minimum wage, tariffs and price controls.

Let's take a look at two Latin American countries that went in opposite directions. Venezuela and Chile. Then we can finally find out which policies actually achieve results for the people.

Here is how Chile started out in 1973.

PROBLEM: Price controls and tariffs:

> Prices for the majority of basic goods were fixed by the government in 1973. Even though Chile was and still is a small economy, the level of protectionism was high. By the end of 1973, the nominal average tariff for imports was 105 percent, with a maximum of 750 percent. Non-tariff barriers also impeded the import of more than 3,000 out of 5,125 registered goods. Just as economic theory predicts, large queues in front of stores were usual in Santiago and other cities in Chile as a result of the scarcity caused by price controls.

PROBLEM: Government taking over private businesses:

> The decline in GDP during 1973 reflected a shrinking productive sector in which the main assets were gradually falling under government control or ownership through expropriations and other government interventions in the economy.

PROBLEM: Deficit spending and government printing money:

> The fiscal situation was chaotic. The deficit reached 55 percent of expenditures and 20 percent of GDP and was the main cause of inflation because the Central Bank was issuing money to finance the government deficit.

SOLUTION: lower or eliminate restrictions on trade:

> The most important economic reform in Chile was to open trade, primarily through a flat, low tariff on imports. Much of the credit for Chilean economic reforms in the following 30 years should be given to the decision to open our economy to the rest of the world. The strength of Chilean firms, productive sectors, and institutions grew up thanks to that fundamental change.

SOLUTION: let competing entrepreneurs in the private sector provide goods and services to consumers:

> A second fundamental reform was to allow the private sector to recover, adding dynamism to the economy. In fact, important sectors such as electricity generation and distribution and telecommunications were still managed by state companies. After we implemented a massive privatization plan that included more than 50,000 new direct shareholders and several million indirect (through pension funds) shareholders, these companies were managed by private entrepreneurs that carried out important expansion plans.

SOLUTION: let people take responsibility for their own lives instead of depending on government:

> The 1981 reform of the Chilean pension fund system deserves special mention. Under the leadership of Minister José Piñera, an individual capitalization account program was designed with specific contributions, administered by private institutions selected by the workers. The Chilean Administradoras de Fondos de Pension (Pension Fund Administrators or AFP) has been replicated in more than 20 countries, and more than 100 million workers in different parts of the world use these accounts to save for retirement.

SOLUTION: allow parents to choose the school that fits their needs from competing education providers, and push school administration down from the federal government to the municipal level, where it would be more responsive to voter's needs:

> In 1981, Chile introduced a universal educational voucher system for students in both its elementary and secondary schools. At the same time, the central government transferred the administration of public schools to municipal governments… The financial value of the voucher did not depend on family income.

RESULTS: And I was able to find a nice short, description of how all that worked out for them on the far-left Wikipedia, of all places:

> The economy of Chile is a high-income economy as ranked by the World Bank, and is considered one of South America's most stable and prosperous nations, leading Latin American nations in competitiveness, income per capita, globalization, economic freedom, and low perception of corruption.
>
> In 2006, Chile became the country with the highest nominal GDP per capita in Latin America. In May 2010

> Chile became the first South American country to join the OECD. Tax revenues, all together 20.2% of GDP in 2013, were the second lowest among the 34 OECD countries, and the lowest in 2010. In 2017, only 0.7% of the population lived on less than US$1.90 a day.

According to the Heritage Foundation, Chile is ranked as the 18th freest economy in the world. The World Bank ranked Chile as the 50th highest GDP per capita for 2018, just below Hungary and above Poland.

Now, you can contrast those results with Venezuela. I have been blogging about Venezuela for years on this blog, and documenting how they raised taxes, banned guns, nationalized private sector companies, raised tariffs, and increased regulations. They are now ranked JUST ABOVE NORTH KOREA for economic freedom – #179 out of 180 countries measured. Basically, they did the opposite of everything that Chile did – transferring power away from parents, workers, business owners, churches and municipal governments to the powerful centralized federal government.

Wikipedia explains how Hugo Chavez took over in 1999 and enacted a communist revolution.

More:

> Since the Bolivarian Revolution half-dismantled its PDVSA oil giant corporation in 2002 by firing most of its 20,000-strong dissident professional human capital and imposed stringent currency controls in 2003 in an attempt to prevent capital flight, there has been a steady decline in oil production and exports. Further yet, price controls, expropriation of numerous farmlands and various industries, among other government authoritarian policies… have resulted in severe shortages in Venezuela and steep price rises of all common goods, including food, water, household products, spare parts, tools and medical supplies; forcing many manufacturers to either cut production or close down, with many ultimately abandoning the country as has been the case with several technological firms and most automobile makers.

They confiscated private property, took over private sector businesses, implemented tariffs and price controls, redistributed wealth via massive welfare programs, and pushed all decision-making out of families and municipal governments up to the federal government. By depriving the producers of their earnings, the country caused massive shortages of goods and services, to the point where people are fleeing the country, consuming zoo animals, and selling their bodies as prostitutes in order to get food and water.

**Application**

In the next election, we are not picking a tribe because of how they make us feel about ourselves. We are not choosing in order to see ourselves as “nice” and “not nice”. We need to look at specific policies being proposed, and see what works and what doesn’t work. The examples of Chile (rags-to-riches) and Venezuela (riches-to-rags) are helpful for voters who want to get RESULTS instead of FEELINGS.

I’ll leave you with a list of links from previous posts so you can see how communism worked out for Venezuela.

# Men on strike: the social changes that caused men to opt out of marriage

**Wintery Knight** · 6 August 2020 · Archived copy · Original

Painting: "Courtship", by Edmund Blair Leighton (1888)

I read and enjoyed Dr. Helen Smith's book "Men on Strike" a few years back. The book explains a few of the developments that have led to men underperforming in school and in the workplace, and opting out of marriage and fatherhood.

Dr. Helen comes to this problem as a secular libertarian, not as a Christian conservative.

A review of Dr. Helen's book appeared in Salvo magazine. The review is written by Terrell Clemmons, who has the best Christian worldview of any woman I know – I frequently rely on her advice.

Terrell writes:

> While the feminist movement may originally have been about equal respect for both sexes, what it has morphed into, she argues, is female privilege. From rape laws that empower women but not the men they may falsely accuse, to divorce laws tilted in favor of the wife, to the feminization of the U.S. education system, men have become the sex under the gun, while women enjoy the status of a protected class.
>
> But unlike their mothers or grandmothers, men today are not taking to the streets burning their undergarments and shrieking demands (thank God). They're doing just the opposite, which is far worse. They're going on strike. The strike zones are manifold:
>
> **Higher Education.**In addition to the enrollment imbalance, which is approaching a 60/40 ratio of women to men, college has become, in the words of one professor, "a hostile working environment [in which] males increasingly feel emasculated." Smith quotes a student named John, who had this to say about his college experience: "I had already been cautious around women, having grown up with Tawana Brawley in my backyard and daily stories of sexual harassment; I played it safe and passive every time. But it doesn't matter. The only way not to lose is to not play. So I'm out."

> **Work,**including community involvement. With higher female graduation rates and salaries, men today are falling behind their fathers economically and professionally. Consequently, their efforts to prove themselves worthy mates through hard work and higher earnings don't win female attention the way they used to. Discouraged, too many retreat to a man cave, and inertia sets in from there.
>
> **Marriage.**Marriage rates are down, and honest men opting out will tell you why. Smith cites a Rutgers University study of single heterosexual men which turned up the top reasons they hadn't married. They can get sex and the companionship of cohabitation without marriage more easily than in times past, and they don't want to open themselves up to the risk of divorce and financial loss. It really isn't that complicated a decision. In fact, it's often not an actual decision at all. It just happens.

The simplest explanation for the difficulties that boys face in an education system that is dominated by women (teachers and administrators) is discrimination. And in the workplace, the government requires employers to report on male and female head counts, and promote women who are not qualified. I have seen receptionists with tattoos and no college degrees promoted to six-figure manager jobs in companies where I worked.

There is one more which to me was the most surprising one in the book – paternity fraud, and the laws that support paternity fraud:

> Take the following cases of nonconsensual insemination: Nathaniel from California, age 15, had sex with 34-year-old Ricci, which, due to his age, was legally considered nonconsensual. Emile from Louisiana was visiting his parents in the hospital when a nurse offered him oral sex, *if* he wore a condom, which she conveniently offered to dispose of for him afterward. S. F. from Alabama passed out drunk at the home of a female friend and awoke undressed the following morning. In all three cases, including the one involving the minor, a woman got sperm and, nine months later, a child, and the man got ordered by a court of law to pay support for eighteen years.
>
> Less devious, but similarly amiss, are those cases in which a man, having been betrayed by his wife or girlfriend, was nevertheless held financially responsible for a child genetically proven to be another man's offspring. While not as sensational as sperm-jacking, it is another form of paternity extortion.

In each of those cases, the man was found liable to pay child support – including the case of the 15-year-old boy, who was forced to pay child support to his statutory rapist when he turned 18. This is how the court system works, and more and more men are understanding the risks.

I often encounter "pro-marriage" people while gathering stories for the blog. These pro-marriage people come in two varieties.

On the one end of the spectrum are people like Terrell Clemmons and Jennifer Roback Morse, who understand marriage, but who also understand the social changes that have made marriage unattractive for men. Both Clemmons and Morse have a background in STEM fields, so they are able to understand incentives and tradeoffs. They understand that society has to rollback the changes to education, divorce laws, etc. if they expect men to be interested in marriage again. They understand that men are not just accessories of women, but instead have their own desires, feelings and reasons for marrying.

On the other end of the spectrum are feminist men, who are not able to understand the changing incentives that face men in a world that has evolved under the influence of radical feminism. It is just simpler (less thinking) for these men to accept the radical feminism as a given, and then urge men to "man up". I think a much better idea would be for the "man up" crowd to realize how marriage has changed, and how the schools and the workplace have changed, then make all of these things more attractive to men. It doesn't do any good to try to "dare" men into jumping off a cliff. Men aren't stupid, and they do what is in their own best interests. If the man-up crowd wants younger men to marry, then they need to change the incentives offered to men. And that means changing women

first.

# New study: sex-reassignment surgery does not bring mental health benefits

**Wintery Knight** · 7 August 2020 · Archived copy · Original

Thinking about transgenderism

If you look at the actual science of sex re-assignment surgery, it doesn't make a good case that these procedures actually deliver results.

Here's the latest from Daily Signal:

> The world's largest dataset on patients who have undergone sex-reassignment procedures reveals that these procedures do not bring mental health benefits. But that's not what the authors originally claimed. Or what the media touted.
>
> In October 2019, the American Journal of Psychiatry published a paper titled, "Reduction in Mental Health Treatment Utilization Among Transgender Individuals After Gender-Affirming Surgeries: A Total Population Study." As the title suggests, the paper claimed that after having had sex-reassignment surgeries, a patient was less likely to need mental health treatment.
>
> Well, over the weekend, the editors of the journal and the authors of the paper issued a correction. In the words of the authors, "the results demonstrated no advantage of surgery in relation to subsequent mood or anxiety disorder-related health care."
>
> But it's actually worse than that. The original results already demonstrated no benefits to hormonal transition. That part didn't need a correction.
>
> So, the bottom line: The largest dataset on sex-reassignment procedures—both hormonal and surgical—reveals that such procedures do not bring the promised mental health benefits.
>
> In fact, in their correction to the original study, the authors point out that on one score—treatment for anxiety disorders—patients who had sex-reassignment surgeries did worse than those who did not:
>
> individuals diagnosed with gender incongruence who had received gender-affirming surgery were more likely to be treated for anxiety disorders compared with individuals diagnosed with gender incongruence who had not received gender-affirming surgery.
>
> You would think patients suffering from gender dysphoria would want to know that.

Previously, I had blogged about another study that found that the choice to go transgender was enormously susceptible to peer pressure and teacher pressure.

Here's how the study was first reported by Science Daily:

> This month, a Brown University researcher published the first study to empirically describe teens and young adults who did not have symptoms of gender dysphoria during childhood but who were observed by their parents to rapidly develop gender dysphoria symptoms over days, weeks or months during or after puberty.
>
> […]The study was published on Aug. 16 in *PLOS ONE.*

Peer pressure / The Internet:

> The pattern of clusters of teens in friend groups becoming transgender-identified, the group dynamics of these friend groups and the types of advice viewed online led her to the hypothesis that friends and online sources could spread certain beliefs.
>
> […."Of the parents who provided information about their child's friendship group, about a third responded that more than half of the kids in the friendship group became transgender-identified," Littman said. "A group with 50 percent of its members becoming transgender-identified represents a rate that is more 70 times the expected prevalence for young adults."

"Friends and online sources could spread certain beliefs".

Mental disorders / traumatic events:

> Additionally, 62 percent of parents reported their teen or young adult had one or more diagnoses of a psychiatric disorder or neurodevelopmental disability before the onset of gender dysphoria. Forty-eight percent reported that their child had experienced a traumatic or stressful event prior to the onset of their gender dysphoria, including being bullied, sexually assaulted or having their parents get divorced.

"experienced a traumatic or stressful event prior to the onset of their gender dysphoria" such as "having their parents get divorced".

When you read studies like this, it almost makes you think that we shouldn't be rushing children into sex-reassignment surgery, doesn't it? But then what would the adults who are desperate to feel good about themselves do to feel good about themselves? It makes them feel good to let children do whatever they want. And it feels so bad to tell children no when they want something. The important thing for these selfish adults is to let the children do what they want right now. That's called "compassion".

# Suzanne Venker interviews Dr. Stephen Baskerville about divorce and its beneficiaries

**Wintery Knight** · 8 August 2020 · Archived copy · Original

Marriage and family

I am just LOVING the Suzanne Venker podcast. You should subscribe if you like discussions with experts about marriage, divorce, feminism, sex and relationships. Recent guests: Christina Hoff Sommers, Rollo Tomassi, Janice Fiamengo, Denise McAllister, Katy Faust, Helen Smith, Joy Pullmann, Heather Mac Donald, Mona Charen, Dr. Laura, Dennis Prager, Allison Armstrong, etc.

You can listen to the episode here.

And it came with a free summary:

> Children of divorce are in desperate need of a relationship with both their parents. Sadly, far too many are reduced to having a relationship with only one parent: the mother.
>
> Citing a principle called the "best interest of the child," family courts award sole or primary custody of most children of divorced parents to mothers, thereby reducing fathers to occasional visitation and zero authority.
>
> The silence on this issue is deafening, and this silence comes just as much from the right as it does from the left. It even comes from churches.
>
> Making matters worse is that divorce is no longer fault-based. Unilateral divorce is now the law of the land, and three-fourths of divorces are initiated by wives. Women don't have to allege any fault by the husband, and he has no right to oppose the divorce.
>
> To address this monstrous social travesty, I could think of no one better than Stephen Baskerville, former Professor of Government at Patrick Henry College. Stephen is widely recognized as a leading authority on fatherhood, family policy, and sexual politics. He holds a Ph.D. from the London School of Economics and writes on political ideologies with an emphasis on religion, family policy, and sexuality. His books include The New Politics of Sex and Taken Into Custody: The War against Fathers, Marriage, and the Family.
>
> Stephen serves on advisory boards to the Ruth Institute, the Men's Health Network and other organizations. His website is http://www.stephenbaskerville.com.
>
> IN THIS EPISODE:

> 5:00-8:00 How Stephen began writing on the “divorce industry,” the political dynamics involved and about no-fault divorce: why it disproportionately affects fathers.
>
> 8:00 How women are encouraged to get divorced and take the children, make false accusations against fathers etc.
>
> 10:24 How men are less likely to use children as weapons against the other spouse
>
> 10:45  The Myth of the Deadbeat Dad
>
> 14:00 What is no-fault divorce and why is it wrong, why is it a system of “chaos” and why we need to “enforce the constitution” when it comes to divorce
>
> 11:40 – 16:00  How the Bill of Rights is violated in many divorce cases and how basic constitutional rights are being violated.
>
> 17:00  How political correctness keeps ups from being able to address it and solve the problems with no-fault divorce and how both the left and right wing media both ignore it
>
> 19:00  How even Ronald Reagan admits he was deceived when he signed the first No Fault divorce legislation into action in CA. How there was also no public debate or discussion at the time it was enacted and throughout the years until now
>
> 19:45 How these laws have affected the social structure, including crime, fatherlessness in homes, etc.
>
> 20:49-22:50  What does Stephen tell and recommend for fathers as recourse for these issues?
>
> 24:35-30:30  Why the effects of the sexual revolution have led to the the West to brink of social and economic ruin (this includes sexual chaos, domestic violence, sexual harassment, etc.)
>
> 30:45 – Why feminism has not created a “utopia” for a women
>
> 33:00 – Stephen discusses single parent homes and the breakdown of the family
>
> 36:20 How the church not being involved in marriage has created a vacuum for the lawyers, social workers, judges and therapists to step in
>
> 37:45 Stephen talks about the idea of being “offended” and why men are responsible for stepping up and being leaders

For a virgin who has not and probably never will marry, I have had a lifelong interest in how to date and marry the right way – in order to get results and leave a legacy. So I know all these speakers, and have books my many of them (Dr. Laura, Janice Fiamengo, Helen Smith, Dr. Laura, Christina Hoff Sommers, Stephen Baskerville, etc.) in my house. I’m fascinated by these issues and know very much about what does and does not work in a marriage.

# Ryan T. Anderson lectures on marriage and why it matters

**Wintery Knight** · 9 August 2020 · Archived copy · Original

A family praying and reading the Bible

Here's the lecture:

About the speaker:

> Ryan T. Anderson researches and writes about marriage and religious liberty as the William E. Simon Fellow at The Heritage Foundation. He also focuses on justice and moral principles in economic thought, health care and education, and has expertise in bioethics and natural law theory.
>
> Anderson, who joined the leading Washington think tank's DeVos Center for Religion and Civil Society in 2012, also is the editor of *Public Discourse*, the online journal of the Witherspoon Institute of Princeton, N.J.
>
> Anderson's recent work at Heritage focuses on the constitutional questions surrounding same-sex "marriage." He is the co-author with Princeton's Robert P. George and Sherif Girgis of the acclaimed book "What Is Marriage? Man and Woman: A Defense" (Encounter Books, December 2012).

The lecture starts at 7:20 in. The lecture ends at 49:35. There are 32 minutes of Q&A.

Introduction:

- When talking about marriage in public, we should talk about philosophy, sociology and public policy
- Gay marriage proponents need to be pressed to define what marriage is, on their view
- Every definition of marriage is going to include some relationships, and exclude others
- It's meaningless to portray one side as nice and the other mean
- Typically, marriage redefiners view marriage as a more intense emotional relationship
- Marriage redefiners should be challenged in three ways:
- 1) Does the redefined version of marriage have a public policy reason to prefer only two people?
- 2) Does the redefined version of marriage have a reason to prefer permanence?
- 3) Does the redefined version of marriage have a reason to prefer sexual exclusivity?
- Also, if marriage is just about romance, then why is the state getting involved in recognizing it?
- The talk: 1) What marriage is, 2) Why marriage matters, 3) What are the consequences of redefining marriage?

What marriage is:

- Marriage unites spouses – hearts, minds and bodies
- Marriage unites spouses to perform a good: creating a human being and raising that human being
- Marriage is a commitment: permanent and exclusive
- Male and female natures are distinct and complementary

The public purpose of marriage:

- to attach men and women to each other
- to attach mothers and fathers to their children
- there is no such thing as parenting, there is only mothering and fathering
- the evidence shows that children benefit from mothering and fathering
- boys who grow up without fathers are more likely to commit crimes
- girls who grow up without fathers are more likely to have sex earlier
- Children benefit from having a mother and a father
- can't say that fathers are essential for children if we support gay marriage, which makes fathers optional
- without marriage: child poverty increases, crime increases, social mobility decreases, welfare spending increases
- when government encourages marriage, then government has less do to – stays smaller, spends less
- if we promote marriage as an idea, we are not excluding gay relationships or even partner benefits
- finally, gay marriage has shown itself to be hostile to religious liberty

Consequences redefining marriage:

- it undermines the norm in public like that kids deserve a mom and a dad – moms and dads are interchangeable
- it changes the institution of marriage away from the needs of children, and towards the needs of adults
- it undermines the norm of permanence
- we learned what happens when marriage is redefined before: with no-fault divorce
- no-fault divorce: after this became law, divorce rates doubled – the law changed society
- gay marriage would teach society that mothers and fathers are optional when raising children
- if marriage is what people with intense feelings do, then how can you rationally limit marriage to only two people?
- if marriage is what people with intense feelings do, then if other people cause intense feelings, there's no fidelity
- if marriage is what people with intense feelings do, then if the feelings go away, there is no permanence
- the public policy consequences to undermining the norms of exclusivity and permanence = fatherless children and fragmented families
- a final consequences is the decline and elimination of religious liberty – e.g. – adoption agencies closing, businesses being sued

We're doing very well on abortion, but we need to get better at knowing how to discuss marriage. If you're looking for something short to read, click here. If you want to read a long paper that his book is based on.

# Four reasons why you should vote Democrat in November 2020

**Wintery Knight** · 10 August 2020 · Archived copy · Original

What would the Democrats do if they won in November?

I found four interesting news stories last night that have really shown some of the wonderful benefits that you'll get from voting Democrat in November 2020. First, the FBI won't try to overthrow elections. Law enforcement won't early-release convicted criminals. Women athletes will be able to play sports. Rioters and looters will be much more civil. It will be awesome!

Let's start with this article from Just The News about the wonderful non-partisan FBI:

> The Senate Judiciary Committee on Sunday released a document it says shows the FBI misled senators on the Intelligence Committee during the Russia probe by falsely suggesting Christopher Steele's dossier was backed up by one of his key sources.
>
> "Somebody needs to go to jail for this," Sen. Lindsey Graham, R-S.C., the panel's chairman, told the Fox News program Sunday Futures with Maria Bartiromo. "This is a second lie. This is a second crime. They lied to the FISA court. They got rebuked, the FBI did, in 2019 by the FISA court, putting in doubt all FISA applications.
>
> "A year before, they're lying to the Senate Intel Committee. It's just amazing the compounding of the lies," Graham added.
>
> The document in question contains the draft talking points the FBI used to brief the Senate Intelligence Committee in February 2018, including an assessment that the primary sub-source of the information contained in the Steele dossier had backed up the former MI-6 agent's reporting.
>
> The primary sub-source "did not cite any significant concerns with the way his reporting was characterized in the dossier to the extent he could identify it," the FBI memo claimed. "…At minimum, our discussions with [the Primary Sub-source] confirm that the dossier was not fabricated by Steele."
>
> […]In fact, by the time the FBI provided senators the briefing, agents had already interviewed Steele's primary sub-source who disavowed much of what was attributed to him in the dossier as in "jest" or containing

> uncorroborated allegations.
>
> Agents also had been warned by the CIA that Steele's memos contained disinformation fed to him by Russian intelligence services, and had created a spreadsheet showing most of the claims in the dossier were either debunked, unable to be corroborated or Internet rumor.
>
> Graham said the document is so misleading he is demanding FBI Director Chris Wray identify the names of those involved in the briefing. "They misled the hell out of them," he said.

Fair and balanced. You can count on people like Eric Holder, Loretta Lynch, James Comey, and Andrew McCabe to enforce the law fairly, and not to try to overturn the results of an election they lost using the FBI as a weapon against their political opponents. Because that never happened under Obama when he used the IRS to attack conservative groups in an election year.

And look at this example of Democrats being tough on crime:

> Ibrahim Bouaichi, the Maryland man suspected of murdering Karla Elizabeth Dominguez Gonzalez in the West End last week, was released from jail on bond earlier this year while awaiting trial on charges that he attacked and raped her last fall, according to court records.
>
> Gonzalez was shot and killed on July 29 at around 6 a.m. outside her home on S. Greenmount Drive in the West End. Soon after her death, Alexandria Police identified Bouaichi as a suspect and said that he was armed and dangerous.

Law enforcement is a big priority for Maryland Democrats, and they'll always choose to protect the people who pay their salaries from criminals.

Democrats are so pro-woman, that they are willing to protect women athletes:

> Outsports, an LGBTQ website affiliated with Vox just doxxed the names of over-300 collegiate and professional athletes that signed a letter vouching for biological women in sports. The letter was sent to the National College Athletic Association Board of Governors last week and lauded Idaho's "Fairness in Women's Sports Act," which supports women in sports.

Doxing people is awesome, and definitely not creepy and fascistic. And those Democrat feminists were right to do it. If you can't win an argument, then definitely resort to fascism, vandalism, violence, and death threats. Democrats don't have any mental illnesses, you know. They're totally sane.

Expect rioters and looters to be more civil under a Biden administration. Portland, Oregon is dominated from top to bottom by Democrats, and look at how moral people are there:

> Amid the rioting and vandalism at the precinct, KOIN-TV reported that officers were hit with projectiles that included glass bottles and rocks — and cops said one officer was severely injured after taking a large rock to the shoulder.
>
> In the middle of all that, the station said an elderly woman who said she lives in the neighborhood pleaded with the group to stop the vandalism and stood in the way of those who were splashing paint on the plywood outside the building.
>
> But they splashed paint on her too, KOIN noted.
>
> Rather than realizing how far out of hand they've gotten, the violent left-wingers started yelling at the elderly woman: "This isn't your world anymore!"

Yeah, way to stick it to the man, brave Democrats. Speak truth to power! I think everyone on the right needs to give

the Democrats a chance. They have an excellent record to run on.

# Is Joe Biden a Roman Catholic? Where does he stand on abortion and religious liberty?

**Wintery Knight** · 11 August 2020 · Archived copy · Original

[image]
Major pro-abortion group endorses Joe Biden for President
What does Joe Biden think about Roman Catholics? He might like you to believe that he's a great friend of Catholics, so he can get their votes. But he's very strongly in favor of abortion and infanticide. And he's also opposed to religious liberty for Roman Catholics. How do I know? Because he said so himself.

Here's the story from The Federalist:

> Biden's record is one of attacking nuns, not defending them. Last month, he pledged to overturn a Supreme Court decision that affirmed a group of nuns' right to deny contraceptive coverage based on their sincerely-held religious beliefs. The Little Sisters of the Poor are a Catholic order that has existed since 1839 and serves impovrished elderly in over 30 countries, including the United States. In 2013, the Little Sisters sued the Obama-Biden administration's Health and Human Services, seeking a religious exemption to providing contraceptives and abortifacients that went against their beliefs. After three years of litigation, the Supreme Court ruled in the Little Sisters' favor in 2016.
>
> When the Trump administration issued a new rule that expanded religious exemptions to include the Little Sisters, the state of Pennsylvania interfered, suing the administration to take protections away from the nuns. That case also made it to the Supreme Court, which again decided in favor of the Little Sisters in July 2020.
>
> But the day the Supreme Court issued its ruling, Biden promised to take away the nuns' hard-fought exemption if elected president.
>
> "I am disappointed in today's U.S. Supreme Court decision," Biden said in response. "If I am elected I will restore the Obama-Biden policy."

So, not good on religious liberty, especially for Roman Catholics.

And here's an interesting article from Life News, about Biden's support for abortion. Is he a moderate?

> NARAL, the pro-abortion political and lobbying organization, yesterday announced its endorsement of pro-abortion former vice president Joe Biden, the presumptive Democrat nominee, for president.

If elected, Biden has promised to:

> - enshrine Roe v. Wade in federal law;
> - appoint justices who will uphold abortion on demand;
> - reverse the Trump Administration's pro-life policies;
> - reverse President Trump's Title X rule that prevents pro-abortion groups from promoting or referring for abortions;
> - promote abortion around the world by reversing the Protecting Life in Global Health Assistance program which prevents federal taxpayer dollars from being used by abortion groups to perform or promote abortion overseas;
> - abolish the Hyde Amendment which prevents federal tax dollars from being used to pay for abortions except in cases of rape, incest, or to save the life of the mother.

Joe Biden isn’t a Roman Catholic. Like all other Democrats, he’s an atheist. He doesn’t think that the Bible is an authority on truth or morality. I know, because I looked at his actions. His actions declare that he’s a pro-abortion, anti-Christian bigot.

# Three things you should know about the moral character of Kamala Harris

**Wintery Knight** · 12 August 2020 · Archived copy · Original

[image]
She was 29 years old and had sex with a 60 year old for her career
VP candidate Kamala Harris was able to get picked for cushy high-paying jobs by having an affair with a married man. She used the resources of the state to persecute pro-lifers simply because she disagreed with their pro-life views. And she thinks that Joe Biden sexually assaulted women, but that's no big deal.

Let's start with having affairs for career advancement. The Washington Free Beacon reports:

> Former San Francisco mayor Willie Brown broke his silence on his relationship with Democratic senator Kamala Harris on Saturday, admitting in his weekly column that he used his powerful post to boost her young career when they dated.
>
> Brown… was openly in an extramarital relationship with Harris when he was speaker of the California State Assembly and running for mayor…
>
> […]Brown goes on to address the fact that he appointed Harris, who was just a few years out of law school and working at the Alameda County district attorney's office, to two well-paid posts on California state commissions and later helped her in her first election.

This isn't a problem for Democrats, because they don't believe in chastity, fidelity, or marriage. Whenever I see people voting for someone like Kamala Harris, I try to imagine what their personal life must be like. Democrat voters aren't Christians. They don't believe the Bible. They don't believe in chastity. They think infanticide is no big deal. And they have an extremely high rate of out-of-wedlock births, together with an extremely low marriage rate. So, these are not people who are successful at marriage and family. These are not people who do fidelity, honor and lifelong married love well.

Second, what about using the power of the state to attack people who you disagree with? Kamala Harris is an expert in fascism and the persecution of moral reformers.

Life News reported this in April 2019:

> David Daleiden and the Center for Medical Progress filed a lawsuit Wednesday against some of California's most powerful politicians for prosecuting him for exposing Planned Parenthood's aborted baby body parts harvesting practices.
>
> The lawsuit accuses U.S. Sen. Kamala Harris, state Attorney General Xavier Becerra, Planned Parenthood and others of conspiracy to violate First and Fourteenth Amendment civil rights.
>
> "The California Attorney General first admitted that they are enforcing the video recording law solely based on how they feel about the message being published, and then further admitted they are not even trying to follow the text of the law as written," Daleiden said.
>
> The lawsuit says Harris, the former attorney general, and Becerra used state video-recording laws as a "political weapon" to silence speech that they disagree with.
>
> […]Becerra and Harris both are pro-abortion Democrats who have received campaign donations from Planned Parenthood.
>
> Documents reveal that Harris, while running for U.S. Senate in 2016, had a secret, in-person meeting with Planned Parenthood leaders to discuss the investigation; two weeks later, the California Department of Justice raided Daleiden's home.

> According to the lawsuit, Daleiden "seeks justice for a brazen, unprecedented, and ongoing conspiracy to selectively use California's video recording laws as a political weapon to silence disfavored speech."

Again, this isn't going to be a problem for Democrat voters who think that murdering children who dare to get in the way of their recklss pursuit of sexual pleasure is perfectly fine. And that's every single Democrat politician, and every single Democrat voter. Their god is sex. They sacrifice their innocent children to their god.

Third, Kamala Harris thinks that the multiple accusations of rape and sexual assault against Biden are credible, but these things are not really important parts of a man's character.

The Hill reports:

> Sen. Kamala Harris (D-Calif.) said Tuesday that she believes women who say they felt uncomfortable after receiving unwanted touching from former Vice President Joe Biden.
>
> "I believe them and I respect them being able to tell their story and having the courage to do it," Harris said at a presidential campaign event in Nevada.

But now she's Biden's VP. Because women being sexually assaulted or even raped by their bosses in the workplace is no big deal for Kamala Harris. In fact, that's how women get ahead, right?

This woman has no moral character. She's an exemplary Democrat, and Democrat voters will support her as Vice President, and eventually as President.

# Will you be allowed to pursue a Christian life plan in a Biden/Harris presidency?

**Wintery Knight** · 13 August 2020 · Archived copy · Original

Enraged Joe Biden howls out his hatred for Bible-believing Christians

One thing for certain. If Biden/Harris wins in November, I'll be marking this blog as private before the end of the year, and that will be it for me writing on moral issues or supporting Christian exclusivism. We don't have to look too far to see why that will be the prudent course of action.

Let's start with this article from the Washington Examiner, about Kamala Harris – who will almost CERTAINLY be president at some point during Biden's first term.

It says:

> Unlike some Democrats, Kamala Harris, Joe Biden's choice for running mate, isn't neutral about religious liberty or pro-life issues: Her record shows she has aggressively opposed them both out of principle and for political gain. Religious liberty is hardly a lone conservative concept or a topic where only the political Right retains authority (it's guaranteed by the Constitution). A look through Harris's record as California's attorney general and as a senator shows how she might govern on these issues alongside Biden, and it's disturbing.
>
> […]Harris seems to disdain people of faith actively, and her record shows this too. When Hobby Lobby approached the Supreme Court asking for an exemption to Obamacare's contraceptive mandate, Harris was already the attorney general of California. In 2014, she filed an amicus brief, telling the Supreme Court not to give Hobby Lobby a religious exemption. "Rights to the free exercise of religious beliefs, whether created by statute or by the Constitution, likewise protect the development and expression of an 'inner sanctum' of personal religious faith," she wrote. "Free-exercise rights have thus also been understood as personal, relating only to individual believers and to a limited class of associations comprising or representing them."
>
> Worse, her logic was flawed. Like many who opposed the exemption, she claimed it would prevent women from getting comprehensive healthcare, which is absurd. Thankfully, the Supreme Court disagreed, and Hobby Lobby won that case in what is now a landmark ruling for religious liberty.

Regarding Joe Biden, there's this post from PJ Media, about his address to the largest LGBT organization in America:

> Biden announced at an event in Ohio on Saturday that his number one priority, if elected, will be to enshrine LGBTQ rights into federal law via the Equality Act, a contentious, Orwellian effort by left-wing bullies to silence Christians who believe biblical teachings on marriage and reject the view that boys can be girls and girls can be boys.
>
> During a half-hour speech at the Hum4n R1ghts C4mp4ign's annual gala in Columbus, Ohio, Biden said, "It's wrong and it is immoral what [the Trump administration] is doing," citing efforts to bar transgender troops from the U.S. military and protect medical providers from being forced to violate their consciences.
>
> […]During his speech Biden portrayed LGBTQ individuals as victims, ignoring the fact that it is people of faith who have been the big losers in this war of ideas. Bakery owners are being sued out of existence, medical professionals are being pressured to embrace transgender ideology, and major corporations are pulling their business out of states that seek to protect religious freedom — which, by the way, is what made Mike Pence Public Enemy #1 in the eyes of the cultural revolutionaries.
>
> […]"The current vice president uses religious freedom as an excuse to license discrimination across broadly [sic] areas and denying LGBTQ Americans their basic rights. It is wrong and it is immoral what they are doing," he declared.
>
> "Just look at how much damage has been done in the past two weeks," Biden said. […]The Department of Housing and Urban Development announced plans to allow homeless shelters to turn away transgender people. This is beyond the scope of anything remotely what we've seen before."

He was not luke warm. He is enthusiastic about using government to crush all who dissent against sexual purity and natural marriage. And that's not surprising when you look at the rape accusations against him, and the sexual immorality of his son Hunter Biden.

We've had Trump/Pence for 4 years, and religious liberty hasn't been harmed. Religious liberty is important to me. I need to be able to earn a living as a Christian, and spend my money on a Christian life plan. I can't allow myself to be forced into a choice between complying with secular leftist tyranny and starving because I'm not allowed to work.

So, I won't be voting for a Biden/Harris ticket in November. For people who care about *policy,* the only rational option is four more years of Trump/Pence.

# Prominent Never-Trumper explains why he is voting for Trump/Pence in November

**Wintery Knight** · 14 August 2020 · Archived copy · Original

Donald Trump to speak at March for Life 2020

Around this time, the media loves to trumpet stories about prominent "Republicans" who have become disenchanted with the Republican nominee for president. But I think that Trump has done more than enough to ensure that exactly the opposite happens. Not only will he be seeing a lot of votes from former Never-Trumpers, he'll be seeing a lot more votes from American-born blacks.

Let's start with this column written by prominent pro-life debater Marc Newman.

He writes:

> In 2016 I couldn't vote for Donald Trump. I wrote about it. When people asked me about Trump vs. Clinton I responded, "You can't trust either one of them." When Trump claimed a pro-life platform, I didn't believe he'd follow through.
>
> […]Forced now to reconsider, my conclusion is that Trump has been the most pro-life president in my lifetime – including Ronald Reagan, who said many of the right things but accomplished relatively little. In virtually every area – both in word and deed – Trump has delivered for his pro-life constituents and, by extension, to innumerable innocent human beings in the womb who otherwise would have died. Trump's policy position has been to oppose legislation that attempts to advance abortion. Vice-President Mike Pence recently visited a pregnancy help clinic and, in 2019, addressed the March for Life. In 2020, Trump became the first president in U.S. history to address the March for Life – not via video, but in person. Trump's administration stood against the United Nation's move to promote abortion.
>
> Though Trump did not completely defund Planned Parenthood, he allowed states to remove $60 million in Title X funding and Planned Parenthood's access to Medicaid money. While this figure represents only about 10% of the annual federal funding for the world's most notorious member of the abortion industry, given the

> chance, I believe Trump would entirely defund Planned Parenthood. He simply needs a Republican House and enough brave Republican senators to forward the bill to his desk.

Previously, I blogged about how Susan B. Anthony List – a powerful pro-life advocacy group – had made a list of Trump's pro-life actions. I can't quote it here, it's too long!

This one was my favorite, though:

> In May 2019, the Trump administration finalized new regulations to strengthen enforcement of federal laws protecting the conscience rights of health care workers who do not want to participate in abortion. The regulations clarify what recourse is available to victims of discrimination under the law and what penalties the HHS Office of Civil Rights may enforce for violations. Additionally, in January 2018, the Department of Health & Human Services announced the creation of the Conscience and Religious Freedom Division within the Office for Civil Rights. This new office works to protect health care professionals who do not want to participate in abortion. In May, 2019, HHS issued a proposed rule amending Obama-era regulations, clarifying that Section 1557 shall not force a recipient of federal funding to provide or pay for an abortion. It shall also be consistent with the First Amendment and with pro-life provisions, conscience provisions and religious liberty protections in current law.

I can't stand secular leftist fascists coercing people of conscience.

That's not the only reason to vote for Trump/Pence in November, though. My favorite theologian Dr. Wayne Grudem had an article at Townhall, where he was explaining how he was going to vote for Trump/Pence in November, strictly on policy achievements.

He writes:

> A few months ago, while the impeachment trial was going on, a younger faculty colleague asked me at lunch, "What would Trump have to do to make you stop supporting him?" My response was something like this: "I would stop supporting him if he began to favor higher taxes, more government regulation, a weaker military, open borders, judges who believed in a "living Constitution," extended abortion rights, restrictions on freedom of religion, hostility toward Israel…" I didn't finish the list because he said, "Okay, the question for you is policies. I get it."
>
> […]The question now facing the nation is not, "Does Donald Trump have an exemplary moral character?" or, "Does Donald Trump have flaws?" or even, "Do I like Donald Trump?" The question is, "Which of two package deals is better for the nation?"
>
> (a) Donald Trump and Republican policies or
>
> (b) Joe Biden and Democratic policies?
>
> There are no other choices. The nation will either have the option (a) or option (b) as a whole package for at least the next four years, and probably longer. If I withhold support from Trump, that makes it easier for Biden to win, and thereby for Democratic policies to bring (in my opinion) great destructiveness to the nation (more specifics below.)

Yeah, and the issue for any thinking human being is the policies – specifically, the policies of the only two live options for President fo the United States. Are Trump/Pence policies good for Christians and conservatives to achieve their goals? And do they promote the public good, and protect the rights of minorities from the tyranny of the majority?

Americans are being distracted by the mainstream news media to focus on *whether they like* Trump/Pence more than Biden/Harris. Many Americans rely on TV for their news, and they aren't looking at policies or achievements

or demonstrated abilities. This is especially true of voters who rely more on impressions, appearances, spritual mysticism and emotions – low-information voters. But elections are not popularity contests. America is the guardian of freedom for the whole world – we can't afford to elect someone who pushes bad policies that don't achieve results.

I don't see how anyone could deny that the policies of Trump/Pence have been good, and that the policies of Biden/Harris would be disastrous for conservatives, Christians and America.

# The authors of the gospels of Mark and Luke knew eyewitnesses to the life of Jesus

**Wintery Knight** · 15 August 2020 · Archived copy · Original

Lets take a closer look at a puzzle

Were the authors of the gospels of Mark and Luke connected to eyewitnesses to the life of Jesus? Well, it turns out that there are good reasons to think that Mark was linked to the eyewitness Peter, and Luke was linked to Paul, who had a post-mortem appearance of Jesus in 1 Cor 15:8, and who met with Peter and James in Galatians 1 and again in Galatians 2.

There is a list of evidence for Peter's influence on Mark on the Cold Case Christianity blog.

Here's my favorite one from the list:

> **Peter's Embarrassments Have Been Omitted**
>
> There are many details in the Gospel of Mark consistent with Peter's special input and influence,including omissions related to events involving Peter. How can Mark be a memoir of Peter if, in fact, the book contains so many omissions of events involving Peter specifically? It's important to evaluate the entire catalogue of omissions pertaining to Peter to understand the answer here. The vast majority of these omissions involve incidents in which Peter did or said something rash or embarrassing. It's not surprising these details were omitted by the author who wanted to protect Peter's standing in the Christian community. Mark was quite discreet in his retelling of the narrative (other Gospel writers who were present at the time do, however, provide details of Peters 'indiscretions' in their own accounts. See *Cold-Case Christianity* for a more detailed explanation).

It makes me laugh to imagine Peter looking over Mark's shoulder and saying "no, don't put that in it" and "no, don't tell them I did that". Funny! But also very good evidence. The rest of Wallace's list makes it even more clear.

And what about the gospel of Luke? Well, did you know that the author of Luke's gospel knew Paul? If you read it carefully, you'll see that Luke switches from describing history from an "I" perspective to describing things from a "we" perspective in the book of Acts (which he also wrote). Who is the "we" he is talking about?

Here's famous Christian scholar William Lane Craig to explain:

> Now who was this author we call Luke? He was clearly not an eyewitness to Jesus's life. But we discover an important fact about him from the book of Acts. Beginning in the sixteenth chapter of Acts, when Paul reaches Troas in modern-day Turkey, the author suddenly starts using the first-person plural: "we set sail from Troas to Samothrace," "we remained in Philippi some days," "as we were going to the place of prayer," *etc.* The most obvious explanation is that the author had joined Paul on his evangelistic tour of the Mediterranean cities. In chapter 21 he accompanies Paul back to Palestine and finally to Jerusalem. What this means is that the author of Luke-Acts was in fact in first hand contact with the eyewitnesses of Jesus's life and ministry in Jerusalem.
>
> […]There is no avoiding the conclusion that Luke-Acts was written by a traveling companion of Paul who had the opportunity to interview eyewitnesses to Jesus's life while in Jerusalem. Who were some of these eyewitnesses? Perhaps we can get some clue by subtracting from the Gospel of Luke everything found in the other gospels and seeing what is peculiar to Luke. What you discover is that many of Luke's peculiar narratives are connected to women who followed Jesus: people like Joanna and Susanna, and significantly, Mary, Jesus's mother.
>
> Was the author reliable in getting the facts straight? The book of Acts enables us to answer that question decisively. The book of Acts overlaps significantly with secular history of the ancient world, and the historical accuracy of Acts is indisputable.
>
> This has recently been demonstrated anew by Colin Hemer, a classical scholar who turned to New Testament studies, in his book *The Book of Acts in the Setting of Hellenistic History.* [5] Hemer goes through the book of Acts with a fine-toothed comb, pulling out a wealth of historical knowledge, ranging from what would have been common knowledge down to details which only a local person would know. Again and again Luke's accuracy is demonstrated: from the sailings of the Alexandrian corn fleet to the coastal terrain of the Mediterranean islands to the peculiar titles of local officials, Luke gets it right.

I know a lot of people (like my Dad) read the Bible devotionally, looking for feelings or trying to "get right with God" so they get blessings. But I think it's helpful to look at things from an evidential point of view – how am I going to make a case for this? When you look at things from that perspective, the Bible gets a whole lot more interesting. And you can talk about it with non-Christians when you know about these interesting details.

# A lesson about men for marriage-minded women from the movie "High Noon"

**Wintery Knight** · 16 August 2020 · Archived copy · Original

Marine prays with his wife on their wedding day

One of my favorite movies for explaining the differences between men and women is "High Noon" (1952).

Here's the summary from IMDB:

> Former marshal Will Kane (Gary Cooper) is preparing to leave the small town of Hadleyville, New Mexico, with his new bride, Amy (Grace Kelly), when he learns that local criminal Frank Miller has been set free and is coming to seek revenge on the marshal who turned him in. When he starts recruiting deputies to fight Miller, Kane is discouraged to find that the people of Hadleyville turn cowardly when the time comes for a showdown, and he must face Miller and his cronies alone.

The main theme of the film concerns Amy's decision to break her wedding vows the very day that she makes them. She tells her new husband that he must bow to her will, and give up his male role as protector. When he explains his reasons for standing his ground to her practically (Miller will hunt them down) and morally (he has a duty protect the town), she dismisses both. She tells him that if he doesn't run away from Miller and his gang with her, that she will get on the train and leave town by herself.

The intro of film shows the member's of Miller's gang assembling, and the words of the song explain the central conflict between husband and wife:

Here's the part of the lyrics we care about:

*The noonday train will bring Frank Miller.*
*If I'm a man I must be brave*
*And I must face that deadly killer*
*Or lie a coward, a craven coward,*

*Or lie a coward in my grave.*

*O to be torn 'twixt love and duty!*
*S'posin' I lose my fair-haired beauty!*
*Look at that big hand move along*
*Nearin' high noon.*

*He made a vow while in State's Prison,*
*Vow'd it would be my life or his'n*
*I'm not afraid of death, but O,*
*What will I do if you leave me?*

*Do not forsake me O my darlin'*
*You made that promise when we wed.*
*Do not forsake me O my darlin'*
*Although you're grievin', I can't be leavin'*
*Until I shoot Frank Miller dead.*

What's interesting is that his new wife Amy apparently does not understand the meaning of wedding vows or the natural roles of good men as protectors of the weak, and fighters against evil. Although she vowed to stick by him and help him, the minute anything threatening appears that makes her feel unhappy, she abandons her vows and abandons her man. Let's break down her mistakes now, using actual conversations from the movie.

First, she doesn't understand or respect the man she married *as a man*:

> **Kane**: *[while riding out of town]* It's no good. I've got to go back, Amy.
>
> **Amy**: Why?
>
> **Kane**: This is crazy. I haven't even got any guns.
>
> **Amy**: Then let's go on. Hurry.
>
> **Kane**: No, that's what I've been thinkin'. They're making me run. I've never run from anybody before.
>
> **Amy**: I don't understand any of this.
>
> **Kane**: *[after looking at his vest watch]* Well, I haven't got time to tell ya.
>
> **Amy**: Then don't go back, Will.
>
> **Kane**: I've got to. That's the whole thing. *[He turns the buggy around and rides back into town]*

Her feelings and her desires for the world to be a happy place for her are so strong that they cloud her judgment.

Second, she doesn't understand the threat posed by evil men:

More:

> **Kane:** I sent a man up five years ago for murder. He was supposed to hang. But up North, they commuted it to life and now he's free. I don't know how. Anyway, it looks like he's coming back.
>
> **Amy:** I still don't understand.
>
> **Kane:** He was always wild and kind of crazy. He'll probably make trouble.
>
> **Amy:** But that's no concern of yours, not anymore.
>
> **Kane:** I'm the one who sent him up.
>
> **Amy:** Well, that was part of your job. That's finished now. They've got a new marshal.
>
> **Kane:** He won't be here until tomorrow. Seems to me I've got to stay. Anyway, I'm the same man with or

> without this. [He pins his badge on his vest]
>
> **Amy:** Oh, that isn't so.
>
> **Kane:** I expect he'll come lookin' for me. Three of his old bunch are waiting at the depot.
>
> **Amy:** That's exactly why we ought to go.
>
> **Kane:** They'll just come after us, four of 'em, and we'd be all alone on the prairie.
>
> **Amy:** We've got an hour.
>
> **Kane:** What's an hour?…What's a hundred miles? We'd never be able to keep that store, Amy. They'd come after us and we'd have to run again, as long as we live.
>
> **Amy:** No we wouldn't, not if they didn't know where to find us. Oh Will! Will, I'm begging you, please let's go.
>
> **Kane:** I can't.
>
> **Amy:** Don't try to be a hero. You don't have to be a hero, not for me.
>
> **Kane:** I'm not trying to be a hero. If you think I like this, you're crazy.

Instead of recognizing how her feelings are deceiving her about the threat and trusting her husband, she tries to force him to accept her mistaken view of reality by threatening to abandon him.

One of Kane's ex-girlfriends has a talk with Amy, which helps her to understand who Kane is, and what is expected of her:

> **Amy**: That man downstairs, the clerk, he said things about you and Will. I've been trying to understand why he wouldn't go with me, and now all I can think of is that it's got to be because of you…Let him go, he still has a chance. Let him go.
>
> **Helen**: He isn't staying for me. I haven't spoken to him for a year – until today. I am leaving on the same train you are…What kind of woman are you? How can you leave him like this? Does the sound of guns frighten you that much?
>
> **Amy**: I've heard guns. My father and my brother were killed by guns. They were on the right side but that didn't help them any when the shooting started. My brother was nineteen. I watched him die. That's when I became a Quaker. I don't care who's right or who's wrong. There's got to be some better way for people to live. Will knows how I feel about it.
>
> **Helen**: I hate this town. I always hated it – to be a Mexican woman in a town like this.
>
> **Amy**: I understand.
>
> **Helen**: You do? That's good. I don't understand you. No matter what you say. If Kane was my man, I'd never leave him like this. I'd get a gun. I'd fight.
>
> **Amy**: Why don't you?
>
> **Helen**: He is not my man. He's yours.

Helen understands the need for a wife to stand by her man. But Amy's response to evil is to shut her eyes and focus on feeling good and being happy. Notice that her "better way" is unspecified – it's just a feeling she has that pacificism and no-violence will somehow "work" to stop evil. But in reality, pacifism is not a "better way" of dealing with evil – it does not work. Her pacifist response not only does not make evil go away, it actually encourages more evil. Weakness emboldens evildoers, and laying down your arms provokes them to do more evil. Will Kane knows this, but she won't listen to him.

You can watch the final gunfight here, as well as Amy's final decision:

So, this is why I really recommend this movie as a discussion-starter when you like a girl and are thinking of marrying her. It clarifies the essential problem with many young women today not being ready for marriage. To be fair, most women come around to respect their husbands and his different roles after they get married. However, the risk of divorce is so dangerous that it makes sense to bring it up for discussion before the marriage happens. Marriage is supposed to be an engine to serve God, and the success of that enterprise cannot be left to chance. You can't just rely on the fact that she says the words of the vow, you have to check to see if she has a habit of keeping her promises when it goes against her own self-interest.

Ask yourself: Who are you, as a man? And does your woman accept that you have obligations to stand up to evil and do good ? Will she support you in your battle against evil, or will the marriage just be about her feelings and desires? I would especially beware of women who think that God is speaking to them through their feelings and desires. Look at her friends: are they practical and successful? Or are they irresponsible, unaccountable and reckless? Look at her father: does he have a plan for her, and does he lead her to be practical, frugal and hard-working? If you are not going to get an ally and a supporter in a wife, then you will not be able to serve God well, as a married man. Think about it.

# Democrat legislator wants to decriminalize gay sex between young adults and minors in some cases

**Wintery Knight** · 17 August 2020 · Archived copy · Original

Enraged Joe Biden howls out his hatred for Bible-believing Christians

I try to blog about stories where powerful gay rights activists are arrested, charged, convicted or jailed for sex with underage boys. It seems to happen a lot. But what I never expected to see is the gay activists openly lobbying to normalize underage sex with boys. But I guess that's where the Democrat party is going, and a significant number of American voters are going there with them.

Here's the story from Daily Wire:

> A California state senator is seeking to salvage a bill that could decriminalize gay sex between young adults and minors in some cases, arguing that present state laws governing the sex offender registry unfairly discriminate against the LGBTQ community.
>
> According to The San Francisco Chronicle, California state Sen. Scott Wiener (D-San Francisco) is using the last few weeks of the legislative session to mobilize support for SB145, a bill he introduced last year that stalled in a key committee. The legislation would allow "judges discretion over sex-offender registration in all cases involving voluntary intercourse between teenagers ages 14 to 17, who cannot legally consent, and adults who are less than 10 years older."

This same Democrat party legislator co-sponsored a 2017 bill that made knowingly exposing a partner to HIV no longer a felony. That's a big priority for Democrats, along with infanticide. These are the big moral issues that they want to see addressed.

I think it's fine for this guy to have his view and try to push it into law. It's a free country. I disagree with him that this is a good law. I also think that voters ought to understand what the Democrat party stands for, and vote accordingly.

## Joe Biden

In the photo above, you can see Joe Biden speaking at an organization called the "Hum4n R1ghts Campa1gn". The HRC have the support of prominent Democrats, like Hillary Clinton, and Barack Obama, and Joe Biden, who have spoken at their events. But did you know about the co-founder of this organization?

Fox News reported in 2019 about the co-founder of the HRC:

> Prominent Democrat donor T3rry B3an was indicted earlier this month on two counts of sodomy and one count of sex abuse for allegedly having sex with a teenage boy.
>
> B3an was arraigned Thursday on the charges, TV station KGW8 reported. He pleaded not guilty and was taken into custody at Lane County jail in Oregon. He was released Thursday and told KGW8 he was "innocent."
>
> The indictment was filed on Jan. 4 but made public following the arraignment.
>
> B3an, a gay rights activist who donated almost $70,000 of his own money to former President Barack Obama's campaign, was charged with sexual abuse in 2014 but the case was dismissed after the alleged victim did not testify. Prosecutors refiled the charges after this, court records stated, according to The Oregonian. The "alleged victim is not named in the new indictment" but the dates are similar to the previous charges, KGW8 noted.
>
> B3an, a real estate developer, and his former boyfriend, Kiah Lawson, allegedly had sex with a 15-year-old boy in a Eugene, Oregon, hotel in September 2013. They allegedly used the app Grindr to arrange the sexual encounter. Lawson was also charged but his case was dismissed.

The Hum4n R1ghts Campa1gn has a lot of corporate partners, who agree with the vision of Terry B3an and his organization. They don't see anything wrong with the mission of the HRC.

Anyway, this isn't the first time that something like this has happened.

The far-left New York Times reported on a recent case:

> The mayor of Seattle, Ed Murr4y, said on Tuesday that he would resign after announcing in May that he would not seek a second term. Several men have come forward to accuse Mr. Murr4y of sexually abusing them decades ago, when they were underage.
>
> The announcement came just hours after The Seattle Times published a story with an account by a fifth man, Mr. Murr4y's cousin, who said Mr. Murr4y had abused him in the 1970s.
>
> [..]Mr. Murr4y, 62, a Democrat, is the city's first openly gay mayor, and had served in the State Legislature for many years before being elected in 2013.
>
> […]**The liberal Mr. Murr4y is generally considered a father of Washington's same-sex marriage law, which he pressed in the State Legislature for years.**

In a previous blog post, I listed SIX more cases like this:

- a university professor at USC
- a member of the San Francisco Human Rights Commission
- two men who adopted nine children
- two men who adopted a boy
- an activist who ran an organization for boys
- two men who adopted a boy from Russia

The mainstream news media never seems to have much to say about these cases. I wonder why.

# Why would a woman want to participate in the hook-up culture?

**Wintery Knight** · 18 August 2020 · Archived copy · Original

Do young women understand how to get to a stable marriage?

*Note: in this article, when I refer to women, I mean young, unmarried women who have been influenced by feminism. I do not mean all women, and especially not married women.*

My good friend Tom sent me this article from the ultra left-wing Vanity Fair. Tom is a veteran of the brutal New York City dating scene.

The article is contains sex and bad language. Reader discretion is advised.

Excerpt:

> It's a balmy night in Manhattan's financial district, and at a sports bar called Stout, everyone is Tindering. The tables are filled with young women and men who've been chasing money and deals on Wall Street all day, and now they're out looking for hookups. Everyone is drinking, peering into their screens and swiping on the faces of strangers they may have sex with later that evening.

Tinder is a hook-up app that people use to find people to have sex with, based solely on their photograph.

The article says this:

> "Romance is completely dead, and it's the girls' fault," says Alex, 25, a New Yorker who works in the film industry. "They act like all they want is to have sex with you and then they yell at you for not wanting to have a relationship. How are you gonna feel romantic about a girl like that? Oh, and by the way? I met you on *Tinder*."
>
> "Women do exactly the same things guys do," said Matt, 26, who works in a New York art gallery. "I've had girls sleep with me off OkCupid and then just ghost me"—that is, disappear, in a digital sense, not returning texts. "They play the game the exact same way. They have a bunch of people going at the same time—they're fielding their options. They're always looking for somebody better, who has a better job or more money." A few young women admitted to me that they use dating apps as a way to get free meals. "I call it Tinder food stamps," one said.

> Even the emphasis on looks inherent in a dating game based on swiping on photos is something men complain women are just as guilty of buying into. “They say in their profiles, ‘No shirtless pictures,’ but that’s bulls**t,” says Nick, the same as above. “The day I switched to a shirtless picture with my tattoos, immediately, within a few minutes, I had, like, 15 matches.”
>
> And if women aren’t interested in being treated as sexual objects, why do they self-objectify in their profile pictures? some men ask. “There’s a lot of girls who are just like, Check me out, I’m hot, I’m wearing a bikini,” says Jason…
>
> Men talk about the nudes they receive from women. They show off the nudes. “T*t pics and booty pics,” said Austin, 22, a college student in Indiana. “My phone is full of ‘em.”

Although the article, and the women who are interviewed, try to pass themselves off as victims, it’s very clear that they are full participants in this hook-up culture. It’s “fun” for them to be free and independent – no responsibilities, expectations or obligations from a relationship. They want fun right now, without the leadership of a husband, or the demands of small children.

Feminist writer Hanna Rosin says that this hook-up culture is great:

> Some, like *Atlantic* writer Hanna Rosin, see hookup culture as a boon: “The hookup culture is … bound up with everything that’s fabulous about being a young woman in 2012—the freedom, the confidence.”

The Vanity Fair author comments:

> “Short-term mating strategies” seem to work for plenty of women too; some don’t want to be in committed relationships, either, particularly those in their 20s who are focusing on their education and launching careers.

Previously, I quoted a feminist professor writing in the New York Times. She also thought that it was great that women were hooking up with hot guys for fun, but staying focused on their educations and careers.

Here’s Amanda to explain it:

> “There is no dating. There’s no relationships,” says Amanda… “They’re rare. You can have a fling that could last like seven, eight months and you could never actually call someone your ‘boyfriend.’ [Hooking up] is a lot easier. No one gets hurt—well, not on the surface.”

Who doesn’t want to have sex? Well, me for one. At least, not till I’m married.

Amanda later explains that she doesn’t want to care, because caring would mean that she “somehow missed the whole memo about third-wave feminism”. She has to be independent – able to dismiss responsibilities, expectations and obligations in order to pursue happiness with education, career, travel and promiscuity.

I know Christian women who think they are fundamentalists who have this exact same attitude. They think that relationships are somehow compatible with doing whatever they want to do – that doing whatever makes them happy each and every moment will somehow turn into life-long married love.

Why don’t women reject the men who use them like kleenexes? Why is the man’s appearance so much more important than his suitability for the marriage roles of husband and father? Well, feminism tells women that gender distinctions are “sexist”, that chivalry is “sexist”, that chastity is “repressive” because it blocks having recreational sex, that marriage is boring and must be delayed, and that having lots of sexual experience makes you more attractive. They measure men by how the man makes them *feel* and whether he will be impressive *physically* to their peers. They aren’t looking for a man who can perform tradional male roles like protector or provider or moral and spiritual leader – because male leadership is “sexist”.

As always, should you, as a young Christian man of some means, desire to get married, then I recommend using my checklist to validate your candidate. I know a lot of women who married without any intention of being a wife and mother. Sometimes, they marry just because their friends are all getting married. If you as a man do not check this woman's reasons for marrying, you may find yourself legally bound to someone who "settled" for you. And who has no intention of respecting you or educating your children.

# Governor Cuomo opposes investigation of nursing home deaths in New York

**Wintery Knight** · 19 August 2020 · Archived copy · Original

US COVID-19 deaths

| State | Deaths | Deaths/ 1M pop. |
|---|---|---|
| New Jersey | 15,966 | 1,797.5 |
| New York | 32,857 | 1,689.0 |
| Massachusetts | 8,751 | 1,259.2 |
| Connecticut | 4,444 | 1,246.5 |
| Rhode Island | 1,018 | 961.0 |
| Louisiana | 4,314 | 928.0 |
| District of Columbia | 593 | 840.2 |
| Michigan | 6,533 | 654.2 |
| Mississippi | 1,944 | 653.2 |
| Illinois | 7,866 | 620.7 |
| Delaware | 591 | 606.9 |
| Maryland | 3,612 | 597.5 |

Governor Andrew Cuomo is the least competent at handling COVID

New York Governor Andrew Cuomo likes to talk about how COVID deaths are all Trump's fault, but his state has one of the worst per-capita death rates. And that's largely a result of his own decision-making. He decided to send "recovered" COVID patients back into nursing homes, which resulted in thousands of additional deaths. So, is he taking responsibility? Does he want an investigation?

Here's the story from Daily Caller:

> New York Gov. Andrew Cuomo dismissed suggestions Monday that local officials are undercounting coronavirus deaths at nursing homes while a several reports indicate the state inaccurately measured how the virus affected long-term care facilities.
>
> New York will not conduct an investigation into nursing home deaths during the pandemic, Cuomo said during a press conference Monday. His insistence that there is no controversy comes after media reports show the state only counts people who died on nursing home property and not those who died after being transferred to hospitals.
>
> […]The virus has hit New York and New Jersey particularly hard. More than 32,000 people have died in New York from coronavirus, while New Jersey has a death toll of 15,785, data show. More than 6,000 of the fatalities in New York reportedly came from nursing homes, the New York Times media reported.
>
> New York began omitting an unknown number of coronavirus deaths in May regarding how many people are dying in nursing homes, the Daily Caller News Foundation reported in May. The New York State Department of Health acknowledged the discrepancy in a statement to the DCNF that month.
>
> Cuomo faced criticism in May for ordering long term facilities to accept patients from hospitals who tested positive for the virus. He rescinded the March 25 order in May after experts argued the move led to higher

> levels of death among nursing home residents, The Wall Street Journal reported.

This is the person lecturing Donald Trump on “mishandling” of the Wuhan Coronavirus. He’s literally the worst person at protecting his people, but he loves to point fingers at people who are not even in charge of a state.

Now, I know that Cuomo has no problem with infanticiding innocent babies after they are born. So if he has no problem murdering innocent people, then why think he has a problem murdering less innocent people? He doesn’t care. He’ll do anything to make Trump look bad in an election year. Besides, killing off the elderly reduces the “overpopulation” that Democrats are always so scared of. And it makes room in the hospitals for people who want abortions.

This article from the New York Post notes that Cuomo made other mistakes that raised the death count in his state:

> Cuomo is praised even after he and the department of health spent years stripping New York City’s outer boroughs of sufficient hospital beds and equipment. There are five hospital beds for every 1,000 residents in Manhattan, but only 1.8 beds for every 1,000 Queens and Brooklyn residents. The result? When the pandemic struck, those hospitals were overwhelmed fast. The death rate for COVID-19 patients at Mount Sinai hospital in Manhattan was 17%. At Coney Island Hospital, 41% of COVID-19 patients didn’t make it.

Democrats have a lot to say about how terrible Republicans are at dealing with the virus. But red states did a lot better than blue states. The people who are responsible for protecting the public are the governors. New York and New Jersey have Democrat governors. Other poor-performing states – Connecticut, Rhode Island, Lousiana, Michigan, Illinois and Delaware – also have Democrat governors.

# What happens in places that adopt Green New Deal Democrat energy policies?

**Wintery Knight** · 20 August 2020 · Archived copy · Original

What green energy policies did to electricity costs in California

The secular leftist approach to politics is to suggest policies that make them feel good and look good to others. It doesn't matter if the policies work for people. Conservatives believe in looking at what has worked in other times and places, and doing what works. After all, a wise man learns from successes and failures of other people. We can't try everything ourselves, we should just do what works.

Let's start with California. California has long been at the forefront of converting their energy production to "green" sources.

Here's an article from Forbes that talks about their results:

> At the Democratic National Convention this week, presidential and vice-presidential candidates Joe Biden and Kamala Harris will make the case for spending $2 trillion, or $500 billion per year, to transition the U.S. away from fossil fuels toward renewables like solar and wind.
>
> […]California's big bet on renewables, and shunning of natural gas and nuclear, is directly responsible for the state's blackouts and high electricity prices.
>
> "We will be forced today to ask utilities to cut off power to millions today, and tomorrow, and beyond," said Stephen Berberich, the President and CEO of California's Independent System Operator, CAISO, on a Monday morning conference call. "Demand will greatly exceed supply."
>
> The immediate cause of California's blackouts is a mismatch between electricity supply and demand.
>
> […]The underlying reason blackouts are occurring is because California lacks reliable, in-state supply. And the reason for that is California has been closing both natural gas and nuclear power plants.
>
> […]Despite these capacity shortfalls, the state is moving ahead with plans to remove 2,200-MW of reliable electricity from the grid. That's the amount of power produced by Diablo Canyon nuclear power plant, which will be closed in stages in 2024 and 2025.

So, Green New Deal works great… if your goal is to feel good about yourself, and make emotion-driven people like you. But it isn't very good at generating an abundance of low-cost electricity to power businesses. And it isn't

very good for poor people, who prefer to pay less for their electricity.

Well, how about Germany? They closed down their nuclear power plants in favor of wind and solar. It didn't work.

Daily Caller explains:

> Germany's power grid almost collapsed in January due to poor performance from wind turbines and solar panels, according to data from a major trade union.
>
> Wind and solar power plants under-performed in January, 2017, because of cloudy weather with little or no wind, setting the stage for massive blackouts.
>
> […]Green energy approaches failed to meet Germany's stated energy goals, even after spending over $1.1 trillion. The country's "Energiewende" plan to boost wind and solar production to fight global warming hasn't significantly reduced carbon dioxide (CO2) emissions and may have actually caused them to go up.
>
> […]Due to the inherent unreliable performance of wind power and political opposition to nuclear power plants, Germany has been forced to return to coal to generate electricity. Coal now provides 44 percent of Germany's power, This shift caused Germany's carbon dioxide (CO2) emissions to actually rise by 28 million tons each year following the policy shift.
>
> All of Germany's subsidies and support for green energy have sharply increased power prices, with the average German paying 39 cents per kilowatt-hour for electricity. The average American only spends 10.4 cents per kilowatt-hour by comparison.

So, you get less electricity produced, more emissions, and elctricity prices go up. Just like in California.

Well, third try is the charm. How about Canada? They've gone Green New Deal for more than a decade. How is that working for them?

The National Post reported this in 2016:

> Back in 2010, deep green environmentalist Rick Smith, then head of Environmental Defence Canada, hailed Ontario's Green Energy and Green Economy Act regime as a cost-free operation that would catapult the province into the big leagues of renewable energy. Through fat subsidies and high prices offered to wind, solar and other renewable industry players, jobs and growth would boom and Ontario would be free of its dirty coal plants. It was the End of Coal, the government said. The birth of a renewable miracle.

Now, Canadians are paying more:

> The doubling of electricity prices since 2005 is big politically, but it is just the top-line item on a long list of problems, misconceptions and outright fabrications that lurk within the Liberal government's decade-long pursuit of radical greenism.

Because they didn't listened to engineers… they listened to their hearts:

> Ontario's Society of Professional Engineers has issued more than half a dozen critical reports on the Liberals' tendency to let green talk and politics override sound policy. Instead of following the expert advice of engineers and people who understand the intricacies of electricity production and distribution, the government took to issuing directives right out the Premier's office.

Now, I know some people on the secular left are going to disagree with these facts. But they don't have facts to counter these facts. There isn't a single country that has gone Green New Deal that has lower electricity prices and a net increase in jobs.

We have to do what works. What works is more natural gas (fracking) and more nuclear power.

# Is Christianity false or is it just mean and judgmental?

**Wintery Knight** · 21 August 2020 · Archived copy · Original

Have you noticed lately that there is a decided lack of atheists who argue against Christianity on factual grounds? Instead of constructing arguments against Christian theism, what I am seeing more and more of is that people try to say that Christianity makes some group feel bad, and therefore Christianity is not worthy of pursuit and engagement.

Here's how it works. You have a person who has some sinful habit or other that they don't want to give up, and they notice that people are judging them and saying that what they are doing is wrong. And they feel bad. And they decide to attack Christianity to make the Christians stop judging them. So how do they do it? Do they argue that the concept of God is logically incoherent? No… Do they argue that some instances of evil and suffering are gratuitous? No… Do they argue that the universe is eternal so that it had no Creator? No…

**What do they do?**

What they do is pick on some statement by a conservative Christian that makes them feel bad, and then claim that they are victims of meanness. And apparently, making someone feel bad is some sort of disproof of Christian theism. Why is that? It's because we have decided as a culture that the purpose of religion is to make people feel good about themselves and to be "nice" to other people. And by "nice", we mean not making other people feel bad about the sinfulness of their behavior. So people are making Christianity irrelevant just by *assuming* that the purpose of life is happiness, and that any religion that makes people unhappy can be dismissed.

Before, people thought about Christianity as something that you investigated, and that was either true or false. People understood that Christianity made claims about the external world that were either true or false. For example, Christianity claims that the universe had a beginning in the finite past. And the people who disagreed with Christianity would try to produce arguments and evidence that the universe was eternal, as with the steady-state theory or the oscillating model of the universe. And people were willing to change their behavior to match what was true, even when it made them feel less happy. But not any more.

**Religion today is not about truth**

I think somehow, as a society, we have internalized the following beliefs:

- God wants me to have happy feelings
- the purpose of religion is to give me happy feelings
- God's moral will for me is that I be "nice" to others
- being nice to others means accepting whatever they want to do as "good"
- accepting whatever anyone does makes them like me
- when people like me, I feel happy, which is what God wants
- there is no need for me to study God's existence
- God exists when I want to be comforted, and doesn't exist when I want to sin
- there is no need for me to study God's character
- God's character is pretty much like my character, whatever I want is fine with God
- there are no moral rules or obligations from God that apply to me
- religions are all the same, I choose the one that makes me feel happy

So you can see that someone who believes things like this can claim to be a Christian, but would actually attack real Christians who hold to the old view of exclusive factual claims and moral judgments. The real Christians are people who have studied these questions, who know that God exists, and what he is like, and accept the Bible's moral

teachings as authoritative. So you could have a famous pastor who defends the Bible's prohibition on sex before marriage, and have someone *feel bad about being judged*, and then a bunch of these "the purpose of life is happiness" people will appear and chastise that pastor for making people feel bad. And many of them will claim to be Christians, and attend church, too.

Now notice that this mob of happy-feelings people are not going argue against the pastor using the Bible, because the Bible is pretty clearly against fornication. What they'll do instead is they'll pick out some piece of the Bible that seems unfair, like the slaughter of some group of child-sacrificing pagans, and they'll rail against that Bible passage in order to discredit the Bible's authority on moral questions. And then the good conservative pastor is made to feel bad because he has broken those unwritten laws – he made someone feel bad using this evil book.

No factual claims about God's existence were made. No historical arguments were made. No evidence was presented. The mere fact that the Bible is mean to talk about killing the poor Canaanites is used to prove that the Bible has no moral authority at all, on any issue. "It's mean" entails that *it's false*. And you can have people who read the Bible for devotions, who sing in church, and who lead worship, who think that the Bible is false because it's mean, and it's mean because it can be used to judge people and make them feel bad.

**An example**

Now consider single motherhood, as in this case.

Excerpt:

> She tells her children to do as she says and not as she does.
>
> But the words of mother of 14 Joanne Watson – who receives more than £2,000 a month in state handouts – have fallen on deaf ears.
>
> Her 15-year-old daughter Mariah is pregnant, the father has 'left the scene', and the youngster is about to start living off benefits.
>
> Mrs Watson, 40, is raising her giant brood alone after parting from her husband John, 46, three years ago, and breaking up with subsequent partner Craig le Sauvage, 35, last year.
>
> Despite this, she has still managed to squirrel away enough cash for a £1,600 breast enhancement and a sunbed. She claims she has always encouraged her daughters to use contraception – but, inevitably, it seems they would rather follow the family tradition.
>
> Mariah's pregnancy comes after Mrs Watson's oldest daughter Natasha, 22, got pregnant with her son Branford, now six, when she was 16. Her second eldest daughter Shanice, 19, also got pregnant at 16 with her 22-month-old son Marley.
>
> Mariah says she has no concerns about becoming a teenage mother, as it seems the most natural thing in the world. Initially, she and her child will be supported by the taxpayer.
>
> She is expected to move into a housing complex for single mothers and will receive supplementary benefit and child allowance for her baby.
>
> The youngster, who is due to have a boy, said: 'I'm not nervous. I've been around babies my whole life so I know what to expect and that I can handle it. The father isn't involved and I don't want him to be either. I'm really excited and think I will be a great mum.'

Now there are two responses to this from people who profess to be Christians. The first response, my response, is to make a general argument against having sex before marriage, using the latest statistics to show the harm that fatherlessness causes to children, and more evidence besides. My response is not to pick on any one person, but to set moral boundaries, to make moral judgments against the selfishness of parents, and to not celebrate and subsidize anything that will harm innocent children. I don't want to make anyone person feel bad, I just want to say what the

evidence is. However, even a general argument using evidence does make some people feel bad, so I am judged as "mean" for giving my opinion and backing it up with evidence.

But there is another response. This response comes from someone who professes to be a Christian, but they are actually a "God wants me to be happy and to be nice to people so they will like me and then we'll all be happy" person. They would never dream of judging anyone for anything they do. And they are very angry with me for getting my moral rules out of that horrible Bible, and for using facts and evidence to make people feel bad. They believe in *compassion*, which is the idea that says that the moral boundaries of the Bible are false, and that we have to celebrate and subsidize any and every variation on the traditional family, regardless of the harm caused, so that the selfish adults don't feel bad about their destructive choices.

And what do we make of a person who feels that saying "it's wrong" is mean, because it makes a guilty person feel bad? Well, here is the truth. A person who argues against the Bible based on the happy-feelings model is no friend of God, and no friend of the victims of selfish actions. They may think that they are being a good person by affirming people who make bad decisions, but really it just encourages people to get into trouble.

# What Americans don't know about Canada's single-payer health care system

**Wintery Knight** · 22 August 2020 · Archived copy · Original

Price of healthcare per Canadian household (Source: Fraser Institute)

I post a lot of research from Canada's Fraser Institute, but they are not the only think tank that publishes research on the efficiency and costs of single payer health care in Canada. This time, I found a report from the Heritage Foundation, where they go over quality of care, taxes, out of pocket costs, coverage, rationing, waiting lists, staff shortages, substandard equipment, and outdated drugs.

Here's the report from the Heritage Foundation. I'll focus on the differences.

Canadians pay slightly less in out of pocket costs:

> The OECD calculates that Canadians spend 1.6 percent of GDP on out-of-pocket health spending, compared to 1.9 percent in the U.S.
>
> […]While these numbers are very close, they are actually getting closer. Since 1970, U.S. out-of-pocket spending as a percentage of total medical spending has been falling steadily, from 33 percent in 1970 to about 10 percent in 2017.19
>
> Meanwhile, Canadian out-of-pocket spending has been falling much slower, so that by 2016 it totaled 15 percent of total medical spending—a higher proportion than in the U.S.20
>
> **As a result, Statistics Canada warned in early 2020 that the percentage of Canadians experiencing large out-of-pocket burdens is growing, writing that "[b]etween 1998 and 2009…the percentage of households spending more than 10% of their total after-tax income on health care rose by 56%."**

Canadians pay more in federal and state taxes:

> Federal taxation excluding social security contributions, then, comes to 28 percent of GDP in Canada, compared to just 19 percent in the U.S.—meaning 51 percent more.

> […]This excess taxation is largely a result of health spending, which has bloated provincial budgets to nearly three times the taxes of U.S. states.
>
> Provincial taxes have grown to nearly the same level as federal taxation. Meanwhile, provincial health costs have risen to fully 37 percent of provincial budgets in 2016—up from 33 percent in 1993 – —and range as high as 42 percent.
>
> Canada's Fraser Institute has estimated this excess tax burden from public health costs at roughly $9,000 for a household of two adults with or without children or $750 per month in additional taxes.

When I wanted an MRI I was scheduled the same week

Canadians wait far longer for treatment than Americans:

> Medical waiting times have become a national crisis in Canada, and continue to worsen. The average wait time for medically necessary treatment between referral from a general practitioner and a consultation with a specialist was 8.7 weeks in 2018, 136 percent longer than in 1993. Patients then have to wait again between seeing the specialist and the actual treatment, another 11 weeks on average, 97 percent longer than in 1993.
>
> From referral to treatment, then, it takes an average of 19.8 weeks (see Chart 2) to be treated, in addition to the original wait to see the family doctor in the first place—this for "medically necessary" treatment, not cosmetic surgery.
>
> In contrast, nearly 77 percent of Americans are treated within four weeks of referral, and only 6 percent of Americans report waiting more than two months to see a specialist.
>
> As for appointments, a 2017 survey of American physicians in the 15 largest U.S. cities found that it took just 24 days on average to schedule a new-patient physician appointment, including 11 days for an orthopedic surgeon and 21 days for a cardiologist.
>
> As a result of these long waits, by one recent estimate, at any given moment, over one million Canadians—3 percent of the entire population—are waiting for a medical treatment.
>
> These lists can average six months, and often much longer in rural areas, which tend to suffer from doctor shortages so severe that many do not even have a family doctor. Overall, 15 percent of Canadians did not have

> a regular health care provider in 2017.
>
> **The shortages ripple through the system; one doctor in Ontario called in a referral to the local hospital, only to be told there was a four-and-a-half year wait to see a neurologist.**

In Canada, people die or become inoperable on waiting lists:

> **A Montreal man was finally called for his long-delayed urgent surgery two months after he had died. One 16-year-old boy in British Columbia waited three years for an "urgent" surgery, during which time his condition deteriorated so much that he became a paraplegic.**

Canadians have to travel abroad to countries with functioning health care systems in order to be treated:

> These cases are, unfortunately, not isolated; a survey of specialists found that average wait times exceed what is deemed clinically "reasonable" for fully 72 percent of conditions in Canada. The situation continues to worsen every year: In 1994, the average gap between clinically reasonable delay and actual delay was only four days, and by 2018 had grown to 23 days.
>
> […]With one million waiting, many Canadians turn in desperation to U.S. health care—the very system some U.S. policymakers propose to transform. In 2017 alone, Canadians made 217,500 trips to other countries for health care, of which 52,500 were to the U.S., paying out of pocket to skip the waiting.

Outdated equipment, outdated drugs, staff shortages:

> While the average employer-sponsored private insurance plan in Canada covers between 10,000 and 12,000 drugs, most public plans in Canada only cover 4,000. Canada has 35 percent fewer acute care beds than the U.S., and only one-fourth as many magnetic resonance imaging (MRI) units per capita—indeed, it has fewer MRI units per capita than Turkey, Chile, or Latvia.
>
> […]Some common treatments are simply unavailable to Canadians. For new pharmaceuticals, for example, Canada's policy of forcing down prices so that American consumers essentially pay for Canada's research and development has led to years-long delays for Canadian patients.
>
> […]Cutting corners on facilities and using outdated drugs show up in Canadian mortality rates. Thirty-day in-hospital mortality rates in Canada are 20 percent higher than in the U.S. for heart attacks, and nearly three times the U.S. level for strokes. Cancer age-standardized mortality is 10 percent higher in Canada than in the U.S.—despite far healthier lifestyles.
>
> […]When it comes to personnel, Canada underspends on medical staff and doctors, ranking 29th out of 33 among high-income countries for doctors per 1,000 population, accounting for a large part of those wait times. Canada has half as many specialist physicians per capita as the U.S.
>
> […]With such shortages and waiting lists, Canadian emergency rooms are packed. So packed that Canadians sometimes just give up and go home. Of Canadian ER visitors who are seen, 29 percent report wait times of over four hours, three times the U.S. level.
>
> […]Canadian seniors are 65 percent more likely to have visited the emergency room (ER) four or more times in the past year than American seniors.
>
> Ultimately, nearly 5 percent of Canadian ER visitors end up leaving without ever being treated, giving up on a medical system that is perennially "free" but out of stock at the moment. In one study at two ERs in Alberta, 14 of the 498 walkaways were subsequently hospitalized, and one died within the week.

And keep in mind how things work in a single payer system. You pay up front through your taxes. The harder you work, the more you pay into the system. When you want treatment, you just get in line behind people who never

paid one dime into the system – like all those low-skill refugees that Canada imports from Middle Eastern countries to build up the socialist voting bloc.

# What should Christians bring up when discussing truth with Muslims?

**Wintery Knight** · 23 August 2020 · Archived copy · Original

A conflict of worldviews

I have some experience dicussing Islam because my mother's side of the family is all Muslim. My go-to argument has always been to confront them about the Qur'an's claim that Jesus did not die of crucifixion. But I noticed a different argument from Laura Powell, who knows far more about this topic than I do. Do you think her approach is the best one?

She writes about it over at Gospel-Centered Discipleship:

> The crux of the argument is this: The Qur'an affirms the inspiration, authority, and preservation of the New Testament Gospels;[2] yet the Qur'an also contradicts the Gospels on major theological and historical points. Therefore, the Qur'an cannot be reliable.
>
> According to the Qur'an, the Gospel is the trustworthy, reliable revelation of God given as a guidance for mankind (Qur'an 3:3-4). These Scriptures from God were available and trustworthy when the Qur'an was revealed in the 7th century A.D., and those who had access to them were repeatedly told to obey them, judge by them, submit to their teaching, and stand fast upon them. In other words, according to the Qur'an, the Gospels are the inspired and authoritative words of God.
>
> Qur'an 5:47 says, "And let the People of the Gospel judge by what Allah has revealed therein. And whoever does not judge by what Allah has revealed—then it is those who are the defiantly disobedient."
>
> Furthermore, Qur'an 5:68 states, "Say, 'O People of the Scripture, you are [standing] on nothing until you uphold [the law of] the Torah, the Gospel, and what has been revealed to you from your Lord'" (see also 6:114; 3:3-4).

What I like about her argument is that she's just taking the words of the Qur'an seriously, and asking the Muslims who claim to believe it what's going on here. Why say that the gospels are unreliable today, when the Qur'an said that the gospels were reliable, yesterday.

My argument about the death of Jesus requires us to ask Muslims "where is the non-Muslim historian who thinks that Jesus did not die?" There isn't one.

But my argument requires that the Muslim know something about historical scholarship, to know what non-Muslim historians think.Laura's argument has wider appeal, because it doesn't require that the Muslim have *any* knowledge about history – only knowledge about what their own holy book says.

She concludes with this:

> What we see here is that the Qur'an teaches the inspiration, authority, and preservation of the Gospels. The Qur'an was intended as an Arabic version of the message of truth found in the Jewish and Christian Scriptures, but this presents a huge problem for Muslims because the Qur'an contradicts the Christian Scriptures on essential doctrines. Most notably, the Qur'an teaches that Jesus was not God incarnate, he did not die on a cross, and he was not raised from the dead (Qur'an 4:157; 5:116).
>
> Here's the dilemma for Muslims: If the Gospels *are not* trustworthy, then the Qur'an is false because it teaches that the Gospels are the inspired, perfectly preserved, authoritative words of God. But if the Gospels *are* trustworthy, then the Qur'an is false because it teaches contradictory, mutually exclusive facts about key issues. Either way, the Qur'an is false.
>
> This, of course, is a huge problem for Muslims. The validity of Islam rests upon the reliability of the Qur'an, just as Christianity rests upon the truth of the divinity, death, and resurrection of Jesus. If the Qur'an is unreliable, then Islam is a false religion.

I like that she's comfortable having disagreements with people. That's not very common in the church today, in my experience.

By the way, this is the same Laura who wrote that really good article about how she found a better way to discuss her Christian worldview when she moved on from sharing her testimony. I blogged about it here.

# Will spending more money on education improve the test scores of students?

**Wintery Knight** · 24 August 2020 · Archived copy · Original

When I want a raise, I work harder, but teachers have a different approach

One of my friends has been having a debate with one of his former teachers about whether spending more money on government-run education improves tests scores. He tried posting some evidence, but she just dismissed that by claiming:

1. If we hadn't spent more money, then the student test scores would have gone down instead of staying the same.
2. Most of the money that government spends on education goes to vouchers and private schools, not public schools
3. Economists at prestigious think tanks like that Cato Institute, the Heritage Foundation, and the American Enterprise Institute cannot be trusted to accurately cite the Bureau of Labor Statistics and the National Center for Education Statistics because of the Koch Brothers
4. You can't compare the test scores of American students with the test scores of Asian students who outperform them, (for less government spending), because math is different in Asia compared to America

Let's look at some data and see if her arguments are correct.

## Does more spending mean higher student performance?

National Review reported on data collected in the National Assessment of Educational Progress, which spans all 50 states.

Look:

> Comparing educational achievement with per-pupil spending among states also calls into question the value of increasing expenditures. While high-spending Massachusetts had the nation's highest proficiency scores on the National Assessment of Educational Progress, low-spending Idaho did very well, too. South Dakota ranks 42nd in per-pupil expenditures but eighth in math performance and ninth in reading. The District of Columbia, meanwhile, with the nation's highest per-pupil expenditures ($15,511 in 2007), scores dead last in achievement.

The student test scores are dead last, but National Review notes that "according to the National Center for Education Statistics, Washington, D.C. was spending an average of $27,460 per pupil in 2014, the most recent year

for which data are available." They are spending the most per-pupil, but their test scores are dead last.

CBS News reported on another recent study confirming this:

> Decades of increased taxpayer spending per student in U.S. public schools has not improved student or school outcomes from that education, and a new study finds that throwing money at the system is simply not tied to academic improvements.
>
> The study from the CATO Institute shows that American student performance has remained poor, and has actually declined in mathematics and verbal skills, despite per-student spending tripling nationwide over the same 40-year period.
>
> "The takeaway from this study is that what we've done over the past 40 years hasn't worked," Andrew Coulson, director of the Center For Educational Freedom at the CATO Institute, told Watchdog.org. "The average performance change nationwide has declined 3 percent in mathematical and verbal skills. Moreover, there's been no relationship, effectively, between spending and academic outcomes."
>
> The study, "State Education Trends: Academic Performance and Spending over the Past 40 Years," analyzed how billions of increased taxpayer dollars, combined with the number of school employees nearly doubling since 1970, to produce stagnant or declining academic results.
>
> "The performance of 17-year-olds has been essentially stagnant across all subjects despite a near tripling of the inflation-adjusted cost of putting a child through the K-12 system," writes Coulson.

Where did the numbers come from? The Koch Brothers? No:

> Data from the U.S. Department of Education incorporating public school costs, number of employees, student enrollment and SAT scores was analyzed to explore the disparity between increased spending and decreasing or stagnant academic results.

Well, at least government-run monopoly schools outperform private private schools, right? No:

> […][P]rivate schools, where students excel over public school peers, …manage to operate at budgets about 34 percent lower than taxpayer-funded schools, US Finance Post reports.
>
> Public schools spend, on average, $11,000 per student, per year.
>
> Coulson noted an Arizona study he conducted which showed that the average per-pupil spending at private schools was only about 66 percent of the cost of public schools.

A more recent state-specific study from 2016 found that this is still the case.

This problem gets even worse when you look at test scores from other countries, where even less is spent on education.

As the Washington Post reported at the end of 2016:

> When it comes to math, U.S. high school students are falling further behind their international counterparts, according to results released Tuesday of an ongoing study that compares academic achievement in 73 countries. And the news is not much better in reading and science literacy, where U.S. high schoolers have not gained any ground and continue to trail students in a slew of developed countries around the globe.
>
> In the latest Program for International Student Assessment (PISA) measuring math literacy in 2015, U.S. students ranked 40th in the world. The U.S. average math score of 470 represents the second decline in the past two assessments — down from 482 in 2012 and 488 in 2009. The U.S. score in 2015 was 23 points lower than the average of all of the nations taking part in the survey.

More money is being spent, but the scores are DECREASING.

Now, why is it that increased government spending in the public school monopoly doesn't improve student performance? Well, one reason is that very little of the money makes it to the classroom.

## Where does all the money go?

Let's look at four places where the money spent on the government-run public school monopoly ends up.

**Administration**

First, a lot of it gets paid to administrations who implement politically correct programs designed to turn the impressionable young people into little secular socialists.

Here's a helpful chart from the American Enterprise Institute:

Where does taxpayer money spent on the public school monopoly go?
I guess if a school wants to make things like Planned Parenthood sex education and LGBT indoctrination into priorities, then they would need more administrators.

**Pensions**

Second, education employees get enormous pensions, which are paid by taxpayers and negotiated by their unions. You would never see pensions this large in the private sector.

This is from the leftist Brookings Institute, from 2014:

> This figure shows we now spend nearly $1,100 per student on retirement benefits. The average public school student teacher ratio is 16 to 1. So we are spending about $17,000 per year per teacher in pension contributions.
>
> […]The National Council on Teacher Quality writes,
>
> In 2014 teacher pension systems had a total of a half trillion dollars in unfunded liabilities—a debt load that climbed more than $100 billion in just the last two years. Across the states, an average of 70 cents of every

> dollar contributed to state teacher pension systems goes toward paying off the ever-increasing pension debt, not to future teacher benefits (p. iii).
>
> While we are spending a huge amount to fund teacher pensions, most of that spending doesn't go to attracting the best teachers. It's paying off past debts.

We can't hire good teachers, because all the education spending of today is paying for the gold-plated pensions of yesterday.

That was 2014. The numbers are even worse today. Teachers contribute very, very little to their pensions, but the benefits are enormous compared to what the private sector taxpayers get in Social Security. (Which is going to be bankrupt by 2034, as reported by the far-left PBS)

**Teacher training**

Third, a lot of it is spent on teacher training, because apparently teaching multiplication, Shakespeare or geography changes every year, so the teachers need tens of thousands of dollars in annual training.

The Washington Post reports on a recent study:

> A new study of 10,000 teachers found that professional development — the teacher workshops and training that cost taxpayers billions of dollars each year — is largely a waste.
>
> The study released Tuesday by TNTP, a nonprofit organization, found no evidence that any particular approach or amount of professional development consistently helps teachers improve in the classroom.
>
> […]The school districts that participated in the study spent an average of $18,000 per teacher annually on professional development. Based on that figure, TNTP estimates that the 50 largest school districts spend an estimated $8 billion on teacher development annually. That is far larger than previous estimates.
>
> And teachers spend a good deal of time in training, the study found. The 10,000 teachers surveyed were in training an average of 19 school days a year, or almost 10 percent of a typical school year, according to TNTP.

Maybe if more of the money spent on education were spent directly on hiring teachers, then we would see an improvement. Unfortunately, a lot of the money meant for teachers goes to the teacher unions. How do they spend that money?

**Political Contributions**

Finally, this is from OpenSecrets.org, concerning political contributions made in the most recent election cycle:

| Rank | Organization | Total Contributions | To Dems & Liberals | To Repubs & Conservs | Pct to Dems & Liberals |
|---|---|---|---|---|---|
| 1 | Fahr LLC | $90,585,670 | $90,585,670 | $0 | 100.0% |
| 2 | Renaissance Technologies | $59,136,908 | $33,414,308 | $25,256,600 | 56.9% |
| 3 | Las Vegas Sands | $44,362,166 | $51,435 | $44,333,430 | 0.1% |
| 4 | Paloma Partners | $41,961,900 | $41,958,600 | $3,300 | 100.0% |
| 5 | Service Employees International Union | $39,389,570 | $39,387,460 | $2,100 | 100.0% |
| 6 | Adelson Drug Clinic | $38,847,300 | $40,000 | $38,830,000 | 0.1% |
| 7 | Newsweb Corp | $38,802,040 | $38,796,640 | $0 | 100.0% |
| 8 | NextGen Climate Action | $35,459,288 | $35,459,288 | $0 | 100.0% |
| 9 | American Federation of Teachers | $33,926,605 | $33,580,580 | $10,700 | 100.0% |
| 10 | Priorities USA/Priorities USA Action | $33,470,302 | $33,470,302 | $0 | 100.0% |
| 11 | National Education Assn | $29,774,140 | $29,426,584 | $347,306 | 98.8% |
| 12 | Laborers Union | $29,086,658 | $28,346,661 | $474,825 | 98.4% |
| 13 | Soros Fund Management | $28,708,830 | $27,861,365 | $679,700 | 97.6% |

Top Political Contributors in 2016 election cycle

The two largest teacher unions came in at #9 and #11. Most of their donations go to Democrat Party. Democrats believe (against the evidence) that spending more money in the government-run public school monopoly will improve student performance on tests.

**So, what's the solution?**

The solution is that we abolish the federal Department of Education, which has done nothing to improve the quality of education for students. We need to push the education of children back down to the state and local levels. We need to empower parents to choose the schools that work best for their children by giving parents vouchers. We need to increase tax-free education savings accounts to help parents with school expenses. We should also give free college tuition to homeschooled students who are admitted to STEM programs at any college or university. We can take the money from the pensions of the union administrators, after we abolish ever single public sector teacher union in the country, and seize all their assets and pensions. If that's not enough money, then we can seize all the pensions of Department of Education employees – a just punishment for their failure to produce results while still taking taxpayer money.

Finally, we should allow people who already have private sector experience doing things like STEM to become teachers. Let's face it: the departments that grant Education degrees have the lowest entrance requirements, and produce the least competent adults. People with years of private sector work experience teach better than people with Education degrees. Let's open up teaching to people who have experience in the private sector doing software engineering, statistics, nursing, etc. and then we'll have qualified teachers.

# Senator Tim Scott at RNC Convention: “our family went from cotton to Congress in one generation”

**Wintery Knight** · 25 August 2020 · Archived copy · Original

Republican Senator Tim Scott (South Carolina)

A few weeks ago, I did a podcast on Tim Stratton’s show where I explained some of the reasons why America has been a good place for me as a non-white conservative. I also explained some of the decisions I made in order to succeed. Democrats don’t emphasize the goodness of America, or the importance of making good decisions in order to succeed. But Republicans do.

Just The News reports on the speech by Senator Tim Scott, a black Republican from the state of South Carolina:

> “Our side is working on policy, while Joe Biden’s radical Democrats are trying to permanently transform what it means to be an American,” Scott said. “If we let them, they will turn our country into a socialist utopia, and history taught us that path only leads to pain and misery,” said Scott, “We must focus on the promise of the American journey.”
>
> “We don’t give into cancel-culture, or the radical – and factually baseless – belief that things are worse today than in the 1860s or the 1960s,” he continued.
>
> Scott spoke about how an early mentor in his life taught him valuable lessons about how, with hard work, he could improve not just his own standing in the world, but his community’s.
>
> “He planted the seeds of what would become Opportunity Zones,” he said.
>
> He called the American education system “magic,” for the opportunities it presents to all children, and reaffirmed his and the president’s support for school choice, “to make sure every child, in every neighborhood has a quality education.”
>
> He spoke about how being the owner of a successful small business taught him to value a tax code that encourages growth. And he spoke about winning his first congressional primary against the son of Strom Thurmond, famed senator of South Carolina and notorious segregationist.
>
> “Because of the evolution of the heart, in an overwhelmingly white district, the voters judged me on the content of my character, not the color of my skin,” Scott said.
>
> […]Throughout his speech, Scott stressed the progress that America has made and will continue to make. He said that despite living in “a world that only wants to you believe in the bad news, the truth is, our nation’s arc always bends back towards fairness.”
>
> The senator closed by reaffirming his belief in the hope that America represents for its citizens, and

> represented for him personally.
>
> “Our family went from Cotton to Congress in one lifetime. And that’s why I believe the next American century can be better than the last,” Scott said.

The full speech is here:

There were some other interesting events during the first night of the GOP Convention.

The Federalist reported on one speech that was considered very moving, and might have been the best speech of the night:

> Maximo Alvarez, a successful American businessman who fled the communist regime of Cuba’s Fidel Castro, offered a powerful testimony Monday in support of President Donald Trump. Alvarez warned Americans of the alternative presented by the Democrats nomination of the most progressive ticket in recent memory.
>
> “I’m speaking to you today because I’ve seen people like this before,” Alvarez told the convention. “I’ve seen movements like this before. I’ve seen ideas like this before and I’m here to tell you, we cannot let them take over our country.”
>
> Throughout the seven-minute speech delivered on the first night of the Republican National Convention, Alvarez shared his family’s story fleeing the oppressive regime just 100 miles off Florida’s coast.
>
> “I’ve heard the promises of Fidel Castro, and I cannot forget those who grew up around me, who looked like me, who suffered, and starved, and died because they believed those empty promises. They swallowed the communist poison pill,” he said.
>
> “By the grace of God, I lived the American dream, the greatest blessing I ever had,” said Alvarez, who now serves as the president of Sunshine Gasoline Distributors. “My dad, who only had a 6th grade education told me, ‘Don’t leave this place. You will never be as lucky as me … There is no place to hide.’”

The video is here:

I hope that as the election nears, that you have a plan to do something to encourage people to vote Republican. We can’t afford to lose this election because we didn’t think it was our job to do something. At the very least, you should be sharing articles by e-mail and on social media. But it’s a good idea to contact your local GOP office and find out what you can do to help. Lawn signs, bumper stickers, donations, etc. are all positive steps to winning the election. If we stand by now, and the Democrats win, things will get a lot worse for us.

# Nick Sandmann delivered the best RNC Convention speech on Tuesday night

**Wintery Knight** · 26 August 2020 · Archived copy · Original

CNN leftists aren't too happy to see his smirky face again

Do you remember Nick Sandmann? He is the pro-life high school student who was the victim of a dishonest smear campaign by leftists in the mainstream news media. He was able to win two cases against far-left extremist CNN and far-left extremist Washington Post. Other cases are still in progress. But he managed to get back on CNN cameras Tuesday night to tell his side of his story.

Daily Wire reported on his speech and on CNN's response.

Here's an excerpt:

> My life changed forever in that one moment. The full war machine of the mainstream media revved up into attack mode. They did so without ever researching the full video of the incident; without ever investigating Mr. Philips' motives; or without ever asking me for my side of the story. And do you know why? Because the truth wasn't important. Advancing their anti-Christian, anti-Conservative, anti-Donald Trump narrative was all that mattered. And if advancing their narrative ruined the reputation and future of a teenager from Covington, Kentucky…so be it. That will teach him not to wear a MAGA hat!"
>
> I learned that what was happening to me had a name. It was called being cancelled. As in annulled. As in revoked. As in made void. Cancelled is what's happening to people around this country who refuse to be silenced by the far left. Many are being fired, humiliated or even threatened. Often, the media is a willing participant."
>
> But I wouldn't be cancelled. I fought back hard to expose the media for what they did to me and won a personal victory. While much more must be done, I look forward to the day that the media returns to providing balanced, responsible and accountable news coverage. In November, I believe this country must unite around a President who calls the media out and refuses to allow them to create a narrative instead of reporting the

> facts."

And CNN's response:

> Lockhart tweeted, "I'm watching tonight because it's important. But I don't have to watch this snot nose entitled kid from Kentucky."

Yeah, but they're paying that kid to wear a MAGA hat on their network. Because he whipped their asses!

His speech is pretty short – only 4.5 minutes:

That was my favorite speech of the ones I saw. Rand Paul was pretty good. Mike Pompeo was pretty good. Some people really like Melania Trump's speech, as well.

But for me, the runner-up was this short speech by Kentucky's black Republican attorney General Daniel.

Daily Wire had an excerpt:

> "My values were shaped by my faith and by my parents. I worked at their small coffee shop meeting people from all walks of life, and I realized something: no matter who we are, everyone needs a cup of coffee. That lesson stuck with me because despite our differences, we all want the same things: for our children to have more opportunities than we did, to feel the dignity of work, and to believe that if you play by the rules, you can make a good life for yourself and your family," Cameron said.
>
> […]"So the question is, will we chose the path that gives us the best chance to meet those universal desires? Or will we go backward to a time where people were treated like political commodities who can't be trusted to think for themselves. I think often about my ancestors who struggled for freedom, and as I think of those giants and their broad shoulders, I also think about Joe Biden, who says, 'If you aren't voting for me, you ain't black;' who argued that Republicans would put us back in chains; who says there is no diversity of thought in the black community." Cameron said.
>
> "Mr. Vice President, look at me. I am black. We are not all the same, sir. I am not in chains. My mind is my own and you can't tell me how to vote because of the color of my skin," Cameron said, addressing Biden. "Joe Biden is a backwards thinker in a world that is craving forward-looking leadership. There is not wisdom in his record or plan, just a trail of discredited ideas and offensive statements. Joe Biden would destroy jobs, raise our taxes, and throw away the lives of countless unborn children."
>
> The attorney general said that Biden is "captive to the radical left" that believes "skin color must dictate your politics."

I love that line: "Mr. Vice President, look at me. I am black. We are not all the same, sir. I am not in chains. My mind is my own and you can't tell me how to vote because of the color of my skin". I would really like to live in a world where the typical low-information Democrat voter understood what black conservatives stand for.

Here's the video:

I noticed that a new poll of college students found that 20% of black men enrolled in 4-year degrees preferred Donald Trump to Joe Biden.

I'm looking forward to the Wednesday night speakers. This is the time where people are learning about the differences between the parties. And I'll be keeping an eye out to bring you the speeches that capture the essence of the Republican party. You won't hear this in the public school classroom or from the mainstream news media.

# Fact-checking the fact-checkers: is Politifact reliable or biased?

**Wintery Knight** · 27 August 2020 · Archived copy · Original

Politifact is a web site run by some left-wing journalists at the Tampa Bay Times. As you might expect from academic studies of media bias, their content might as well be written by the Democrat Party. But it's not enough to just declare Politifact a Democrat propaganda operation – I need to actually give you details and examples. And so I will, in the rest of this post.

Let's start with two recent examples, then I'll show you the worst example of media bias I have ever seen from Politifact.

**Missouri Senate Race**

Here's one analysis from the Daily Wire:

> On Tuesday, Politifact, which purports to be a neutral fact-checking website but in fact leans heavily to the left, got caught protecting a member of the Democratic Party: Democratic Missouri Sen. Claire McCaskill.
>
> Politifact took issue with the ad from The Senate Leadership Fund, a pro-Republican super PAC, that claimed that McCaskill said "normal people" could afford private planes.
>
> […]After they were corrected, Politifact acknowledged the mistake, writing,
>
> Initially, we published this fact-check with a rating of False, because based on the video available, it did not appear that McCaskill was talking about private planes. After publication, we received more complete video of the question-and-answer session between McCaskill and a constituent that showed she was in fact responding to a question about private planes, as well as a report describing the meeting. We re-assessed the evidence, archived the original version here, and published the version you see here with a new rating of Half True. We apologize for the error.

Daily wire also linked to some more failed Politifact "fact checks": here, here, and here.

**Arizona Senate Race**

Politifact also screwed up their fact-check for the Arizona Senate race.

The Daily Caller explains:

> PolitiFact incorrectly labeled it "mostly false" that Democratic Senate candidate Kyrsten Sinema "protested troops in a pink tutu" during its live fact-check of the Arizona Senate debate Monday night.
>
> It's an established fact that Sinema, a former Green Party activist who co-founded an anti-war group, wore a pink tutu at one of the multiple anti-war protests she attended in 2003.
>
> "While we were in harm's way, she was protesting our troops in a pink tutu," Republican candidate Martha McSally, a former Air Force fighter pilot, said during Monday night's debate.

Here's their Politifact's evaluation of McSally's claim:

Who are you going to believe? Politifact, or your own eyes?
And here's the photo of Kyrsten Sinema, protesting the troops, in a pink tutu:

Anti-war Democrat Senate candidate Kyrsten Sinema in a pink tutu
The Daily Caller notes:

> A 2003 Arizona State University news article at the time described Sinema wearing "something resembling a pink tutu" at one of the protests.
>
> […]Sinema openly associated with fringe elements of the far-left during her anti-war activism.
>
> She promoted an appearance by Lynne Stewart, a lawyer who was convicted of aiding an Islamic terrorist organization, in 2003.
>
> Sinema also reportedly partnered with anarchists and witches in her anti-war activism and said she did "not care" if Americans wanted to join the Taliban.

Colonel Martha McSally, as I've blogged about before, is a former U.S. Air Force A-10 fighter pilot, and squadron commander. She logged a lot of hours leading actual combat missions against America's enemies – the sorts of people who sell and rape Yazidi girls. She fought them.

And now for the big one: Politifact's fact-checking of Obamacare.

**Obama's claims about Obamacare**

Avik Roy, health care policy expert at Forbes magazine, wrote about Politifact's assessment of Obama's promise to Americans about keeping their health plans after Obamacare.

**In 2008, before the presidential election, PolitiFact rated Obama's claims about Obamacare "True":**

Roy writes: (links removed)

> On October 9, 2008, Angie Drobnic Holan of PolitiFact published an article using the site's "Truth-O-Meter" to evaluate this claim: "Under Barack Obama's health care proposal, 'if you've got a health care plan that you like, you can keep it.'"

And she concluded:

> […]…people who want to keep their current insurance should be able to do that under Obama's plan. His description of his plan is accurate, and we rate his statement True."

Roy notes:

> PolitiFact's pronouncements about Obamacare were widely repeated by pro-Obama reporters and pundits, and had a meaningful impact on the outcome of the election. Indeed, in 2009, PolitiFact won the Pulitzer Prize for its coverage of the 2008 campaign.

Here's the screen capture from 2008:

Politifact says that everyone who likes their health care plan can keep it

Before the election, it's true! And Obama got re-elected, because people believed that. But what happened after the election?

**In 2013, after the 2012 election, PolitiFact rated Obama's claims about Obamacare "Pants On Fire":**

Roy writes: (links removed)

> On December 12, [2013] the self-appointed guardians of truth and justice at PolitiFact named President Obama's infamous promise—that "if you like your health care plan, you can keep it"—its 2013 "Lie of the

> Year."
>
> […][N]one of the key facts that made that promise "impossible" in 2008 had changed by 2013. The President's plan had always required major disruption of the health insurance market; the Obamacare bill contained the key elements of that plan; the Obamacare law did as well. The only thing that had changed was the actual first-hand accounts of millions of Americans who were losing their plans now that Obamacare was live.

And the screen capture from 2013:

The article:

**Lie of the Year: 'If you like your health care plan, you can keep it'**

By Angie Drobnic Holan
Published on Thursday, December 12th, 2013 at 4:44 p.m.

It was a catchy political pitch and a chance to calm nerves about his dramatic and complicated plan to bring historic change to America's health insurance system.

"If you like your health care plan, you can keep it," President Barack Obama said -- many times -- of his landmark new law.

But the promise was impossible to keep.

So this fall, as cancellation letters were going out to approximately 4 million Americans, the public realized Obama's breezy assurances were wrong.

**Related rulings:**

**"What we said was, you can keep (your plan) if it hasn't changed since the law passed."**
Barack Obama, Monday, November 4th, 2013.
Ruling: Pants on Fire! | Details

**"FACT: Nothing in #Obamacare forces people out of their health plans."**
Valerie Jarrett, Monday, October 28th, 2013.

Politifact said one thing before the election, and the opposite afterwards

So when Politifact rates a statement by a Democrat as true, what they really mean is that it's pants-on-fire-false, but it's election time so they don't say that. It's not like the critical assessments of Obamacare from health policy experts were not out there between 2007-2012. I know, because I blogged on every study and report on the predicted effects of the law that I could find. But the intellectually lazy journalism-major clowns at Politifact couldn't be bothered to read those studies and reports.

# Two reasons why Christians and conservatives should not donate to United Way

**Wintery Knight** · 28 August 2020 · Archived copy · Original

Well, it's that time of year again, when corporations bully their employees into donating to the United Way. I thought it might be a good idea to urge all Bible-believing Christians to avoid donating to the United Way. *Please share this post if you agree with it!*

Let's start with abortion. The United Way gives TONS of money to fund abortion providers.

In 2008, United Way affiliates send $1.9 million to Planned Parenthood:

> The national United Way does fund Planned Parenthood; their website states:
>
> United Way funded programs through Planned Parenthood include community health maintenance, e.g. communicable disease prevention; medical care service; family planning; health education; public awareness services; and family preservation and strengthening services, e.g. counseling and family life education.
>
> Nationally in 2008, local United Ways distributed an estimated $1.9 million to Planned Parenthood agencies.
>
> Any finances being donated to Planned Parenthood (even if not specifically for abortion services) will free up more of their money to be used toward abortion services.

In 2015, United Way sent $3 million to Planned Parenthood:

> Last year, on the heels of shocking videos showing the Planned Parenthood abortion business selling the body parts of aborted babies, a new expose' from a group that monitors corporations that finance the abortion giant reveals the United Way is a major donor. That expose found United Way agencies giving $2 million to the abortion giant.
>
> A new expose' released this week shows that figure has increased to $3 million.

In 2016, United Way sent $3 million to Planned Parenthood:

> Analysis of the most recent IRS Form 990 filings and other documentation found 62 United Way affiliates sent $2,756,799 to Planned Parenthood abortion organizations in tax year 2016. 2ndVote's latest findings indicate an increase of $168,806 from the $2,590,994 United Way funneled to Planned Parenthood in 2015.

We're living in a time when abortion rights involves such issues as sex-selection abortions, race-selection abortions, covering up statutory rapists, Democrat support for infanticide, attacking Supreme Court nominee Brett Kavanaugh, selling the body parts of unborn babies, etc. I don't think we can count on United Way to come down on the right side of these issues. We're already being forced to fund abortions with our tax dollars, thanks to Democrats. I don't think we should give any more money to abortion providers and their secular leftist allies.

That's abortion. What about gay rights? We've seen a lot of pressure on traditional values coming from the secular left lately. They redefined marriage AGAIN to deprive children of their biological mothers or fathers. They're pushing for the Equality Act, which would have huge religious liberty repercussions for Christians.

Texas attorney Maria Martinez explains on the American Thinker:

> The Equality Act is more draconian that any state or city conversion therapy ban to date because it takes away the traditional constitutional exemption for religious freedom. The act specifically states that the Religious Freedom Restoration Act (RFRA) may not be invoked as a defense, marking the *first time in history that*

> *Congress has limited the reach of RFRA*. This means that it could become illegal for Christian pastors, churches, schools, and ministries to communicate a message that sexual orientation or gender identity can change. The Equality Act is unprecedented in its overreach, impacting even adults who are *willingly seeking counseling*.
>
> By contrast, therapy of any kind that pushes a person *toward* same-sex attraction or gender transition is not impacted by the law at all.
>
> Banning counseling isn't the only thing the Equality Act will do:

> - Parents could lose custody of their children if they decline to assist in their gender transition. Parents in Ohio recently lost custody of their female child because they would not give her testosterone supplements to help her "transition" to look like a male.

> - Doctors and hospitals could be subject to lawsuits for refusing to perform so-called "sex change" surgeries. In California and New Jersey, Catholic hospitals are already being sued for discrimination for refusing to perform these surgeries.

> - Battered women's shelters could be required to admit members of the opposite sex. In Anchorage, Alaska, a male who was refused access to a shelter for abused and trafficked women sued the shelter for "gender identity discrimination."

> - Faith-based adoption and foster care agencies that believe that children do best with both a mother and a father could be forced to shut down. This has already occurred in at least six states in this country.

I wonder what United Way thinks about attacks on Bible-believing Christians by LGBT activists? All I could find on the Facebook page of the national organization was this:

Where does United Way stands on gay rights vs religious liberty?
I don't find that very encouraging, do you? And this is not the only pro-LGBT image I found on United Way Facebook pages. By the way, I saved a copy of their Facebook page, in case it disappears.

As a Bible-believing Christian, maybe I would be better off giving money to an organization that protects religious liberty, like Alliance Defending Freedom. I understand that many people who call themselves Christians think that the United Way's positions are compatible with the Bible. But not everyone who calls herself a Christian actually takes the Bible seriously. Especially when it interferes with their career advancement and peer approval. This is especially true of people who work in Human Resources.

## Please, don't give money to the United Way

You don't HAVE to give money to the United Way, just because the godless progressives in your office try to bully you into it. Instead, why not send the money to the Life Training Institute, or Ratio Christi, or Alliance Defending Freedom? These are groups do operate on Bible-based principles. I do think that Christians need to be careful about who they donate their money to. It doesn't make sense for Christians to get up and go to work and earn money, and then give it away to anti-Christian groups who want Christianity to disappear from American life. Paul talks about how God rewards those who give gifts to partner for the gospel in Philippians. Make sure that you are not wasting your money on anything less.

# Study: children of naturally married couples outperform children of same-sex couples

**Wintery Knight** · 29 August 2020 · Archived copy · Original

A family praying and reading the Bible

Whenever I debate a controversial issue, I like to go straight to the studies in order to let the evidence speak for itself. Although it's difficult to convince someone on the opposite side to change their mind, usually people in the middle will side with the person who has evidence, instead of the person who is crying the loudest and telling anecdotal stories that may or may even not be true.

The Public Discourse reports on a study out of Canada.

Excerpt:

> A new academic study based on the Canadian census suggests that a married mom and dad matter for children. Children of same-sex coupled households do not fare as well.
>
> There is a new and significant piece of evidence in the social science debate about gay parenting and the unique contributions that mothers and fathers make to their children's flourishing. A study published last week in the journal *Review of the Economics of the Household*—analyzing data from a very large, population-based sample—reveals that the children of gay and lesbian couples are only about 65 percent as likely to have graduated from high school as the children of married, opposite-sex couples. And gender matters, too: girls are more apt to struggle than boys, with daughters of gay parents displaying dramatically low graduation rates.
>
> Unlike US-based studies, this one evaluates a 20 percent sample of the Canadian census, where same-sex couples have had access to all taxation and government benefits since 1997 and to marriage since 2005.
>
> While in the US Census same-sex households have to be guessed at based on the gender and number of self-reported heads-of-household, young adults in the Canadian census were asked, "Are you the child of a male or female same-sex married or common law couple?" While study author and economist Douglas Allen noted that very many children in Canada who live with a gay or lesbian parent are actually living with a single mother—a finding consonant with that detected in the 2012 New Family Structures Study—he was able to isolate and analyze hundreds of children living with a gay or lesbian *couple* (either married or in a "common law" relationship akin to cohabitation).
>
> So the study is able to compare—side by side—the young-adult children of same-sex couples and opposite-sex couples, as well as children growing up in single-parent homes and other types of households. Three key

> findings stood out to Allen:
>
> children of married opposite-sex families have a high graduation rate compared to the others; children of lesbian families have a very low graduation rate compared to the others; and the other four types [common law, gay, single mother, single father] are similar to each other and lie in between the married/lesbian extremes.
>
> Employing regression models and series of control variables, Allen concludes that the substandard performance *cannot* be attributed to lower school attendance or the more modest education of gay or lesbian parents. Indeed, same-sex parents were characterized by higher levels of education, and their children were more likely to be enrolled in school than even those of married, opposite-sex couples. And yet their children are notably more likely to lag in finishing their own schooling.
>
> […]The truly unique aspect of Allen's study, however, may be its ability to distinguish gender-specific effects of same-sex households on children. He writes:
>
> the particular gender mix of a same-sex household has a dramatic difference in the association with child graduation. Consider the case of girls. . . . Regardless of the controls and whether or not girls are currently living in a gay or lesbian household, the odds of graduating from high school are considerably lower than any other household type. Indeed, girls living in gay households are only 15 percent as likely to graduate compared to girls from opposite sex married homes.
>
> Thus although the children of same-sex couples fare worse overall, the disparity is unequally shared, but is instead based on the combination of the gender of child and gender of parents. Boys fare better—that is, they're more likely to have finished high school—in gay households than in lesbian households. For girls, the opposite is true. Thus the study undermines not only claims about "no differences" but also assertions that moms and dads are interchangeable. *They're not.*

With a little digging, I found the abstract of the study:

> Almost all studies of same-sex parenting have concluded there is "no difference" in a range of outcome measures for children who live in a household with same-sex parents compared to children living with married opposite-sex parents. Recently, some work based on the US census has suggested otherwise, but those studies have considerable drawbacks. Here, a 20% sample of the 2006 Canada census is used to identify self-reported children living with same-sex parents, and to examine the association of household type with children's high school graduation rates. This large random sample allows for control of parental marital status, distinguishes between gay and lesbian families, and is large enough to evaluate differences in gender between parents and children. Children living with gay and lesbian families in 2006 were about 65 % as likely to graduate compared to children living in opposite sex marriage families. Daughters of same-sex parents do considerably worse than sons.

The author of the study is a professor of economics at Simon Fraser University in British Columbia. His PhD in economics is from the University of Washington. A previous study had shown that gay relationships typically have far more instability (they last for more shorter times). That's not good for children either. Another study featured in the Atlantic talked about how gay relationships have much higher rates of domestic violence. That's not good for children either. So we have three reasons to think that normalizing gay relationships as "marriage" would not be good for children.

The reason I am posting this is because I want people to understand why social conservatives like me propose these laws defining and promoting marriage. We do favor natural marriage for the same reason that we oppose no-fault divorce, and for the same reason why we oppose welfare for single mothers (it encourages single motherhood). We don't want to encourage people to deprive children of their mother or their father. We look at the research, and we decide that children need their mother and father. Given the choice between the needs of the child and restraining

the freedom of the adults, we prefer the child's need for her mother and father. It's not just arbitrary rules, there is a reason behind the rules.

But children are not commodities. They have certain needs right out of the box. Adults should NOT be thinking about how to duct-tape a child onto any old relationship that doesn't offer the same safety and stability that opposite sex marriage offers. We should be passing laws to strengthen marriage in order to protect children, not to weaken it. Libertarians don't want to do that, because they want adults to be free to do as they please, at the expense of children. Libertarians think that the adults should be able to negotiate private contracts and have no obligations to any children who are present, or who may be present later.

# To be a Bible-believing Christian, you have to be comfortable working alone

**Wintery Knight** · 30 August 2020 · Archived copy · Original

I see chastity in the Bible, but I don't see Black Lives Matter Marxism in the Bible

So, when I read the Bible there are things that stand out to be as being of first importance. The priorities are about personal moral character. The overall theme seems to be to deny your personal desires and ambitions and gain control of yourself so that you can devote yourself to following Jesus. The Bible isn't teaching that we need to implement Marxism as a solution to "inequalities".

The Bible emphasizes things like controlling your temper, being patient when you must suffer for being a Christian, forgiving others who are penitent about treating you badly, giving to charity, being sober and chaste, either staying unmarried or marrying an opposite sex partner for life, not envying, not stealing, building other people up in the knowledge of God, renewing your mind. There's no emphasis on disparities or social justice. Everything is about individual choices. Every person is responsible for themselves.

Now, when I go to Twitter and Facebook, I see people who occupy positions of power in Christianity who don't talk about any of those things. They don't practice those things themselves as of first importance. They don't read books about how to practically pursue those things, e.g. – books about evidence countering premarital sex, divorce or same-sex marriage. They don't talk about those things, they aren't informed enough to be convincing about those things, they don't promote those things to non-Christians using evidence.

Let's take an example: chastity and natural marriage between one man and one woman for life. When you look at the social media of prominent Christians, Christian professors, Christian apologists, Christian celebrities, etc., you aren't going to see them linking to studies about the premarital sex, hooking up, cohabitation, polyamory, no-fault divorce. Instead, they're going to be talking about what makes them look virtuous to others. You know – recycling, essential oils, illegal immigration, refugees, girl wash your face, wear a COVID mask, black lives matter, yoga, dog and cat parenting, I support public school teachers, etc. The sum total of their Christian distinctiveness is that they've got essential oils and rainbow unicorn mugs in their office that say "just believe".

There isn't a single point where their personal morality or public engagement is centered around what the Bible teaches explicitly. The leaders have left the Bible behind for life enhancement and virtue signaling, as required by

their new Lords and Saviors in the secular left mainstream news media. And this is not surprising at all when you look at the most popular books in Christian Women's section of book stores. It's all Rachel Hollis, Beth Moore, Joyce Meyer, Jen Hatmaker, Lauren Akins, Priscilla Shirer. The goal is to for the individual to feel good, get social approval and achieve their heart's desires. Nothing there about promoting what the Bible teaches using reason and evidence to non-Christians. Whatever these people understand Christianity to be, it's not something that requires that they read non-fiction, behave morally and persuade others with evidence. They're narcissists, not salt or light.

So what about feminism and the Sexual Revolution? The response of Christian leaders to the new ways of meeting, dating, marrying proposed by radical feminists is enthusiastic celebration. And if delaying marriage for careers and promiscuity result in more abortions and divorces and single motherhood, then don't blame the choices of women, just blame secular men for not turning into Christians after being given premarital sex. (This is the majority view among conservative pastors – let women have sex with atheists, then blame atheists for not converting into faithful, devoted husbands). It's just too hard to read actual studies on sex, dating and marriage, and then take a stand against women who have accepted feminism for emotional reasons: "it's just easier to get along with my teachers and peers if I'm sexually active with no-commitment bad boys".

The response to the challenges of atheism is to quote Bible words and expect magical conversions due to burning of the bosom. There is no difference between the evangelistic views of Al Mohler and Russell Moore and Mormon leaders. Both camps are firm believers in magic words evangelism, i.e. – fideism. You have to pre-suppose the Bible is true because of a burning sensation when you read it. Since this approach doesn't work when used on non-Christians, you get this retreat from proclaiming the truth of Christianity to non-Christians. They've been doing the same thing over and over for decades, and now they've just stopped presenting Christianity as true entirely. Now, they to focus on "wear a mask" and "defund the police" instead, so they can continue to achieve their real goal – communicating their virtue to others.

Regarding Marxism, they keep swallowing every cause trotted out by the left to achieve the left's end goal of a Marxist utopia. Whether it's global warming, importing big-government supporting refugees and illegal immigrants, black lives matter Marxism, the housing bubble bailouts, the new trillion student loan bubble, or defund the police, Christian leaders just keep rushing around like lemmings to support any cause that the secular left tells them is good. The Bible does not give them their priorities and definition of good and evil. Instead, they now look to the talking heads on CNN and MSNBC to tell them what they must promote in order to signal their virtue to others. Their religious hobby was always about signaling their virtue to others. When sobriety and chastity got hard, they switched to wear a mask and defund the police.

How should a Bible believing Christian respond to these changes in the priorities of Christian seminary professors, leaders, and woke pastors? Well, I don't see how you can go to church any more. It's a waste of time except in rare cases (Wayne Grudem, Voddie Baucham, etc.). I do think that group Bible study, mentoring, and joint activity against feminism, socialism and atheism are still valuable. Definitely reading books together. (Laura and I are reading the new science apologetics book from the Discovery Institute chapter by chapter, and I'm also working through Money, Greed and God with Carla). The church and Christian leaders have nothing useful to say about any of the real problems we are facing. None of their leaders are reading anything that would inform them and strengthen their convictions in the areas that the Bible considers to be central.

So, I guess my conclusion would be this. If you are approaching Christianity like "Jesus was a refugee" and "black lives matter" woke pastors, and thinking that the church / seminary hierarchy is a great place to communicate your personal virtuousness to a large group of people, then keep doing that. But if you're just interested in championing the viewpoints that the Bible considers of central importance, then get yourself some books about the evidence related to feminism, socialism and atheism and read them. Get yourself an alias and a blog. Write what you learn about. Mentor others one-on-one so they learn how to defend the Bible's teachings as well. Get involved in politics for the Republican party, which at least has some policies that overlap with our concerns about abortion, religious liberty, self-defense against criminals, etc.

We’re past the point of relying on woke pastors and Christian leaders to know anything about how to defend the Bible. They’re just pissing away the religious liberty that was built by previous generations for their own selfish purposes. Don’t rely on them.

# Why do progressives make heroes out of criminals, and call the police villains?

**Wintery Knight** · 31 August 2020 · Archived copy · Original

How do Democrats respond to riots, vandalism and arson?

OK so in this post, I'll summarize the facts concerning the latest shooting of an "unarmed black man" by the police in Kenosha, Wisconsin. Then I have a lecture given by David Sayet at the Heritage Foundation to explain why secular leftists and Never-Trumpers are so anxious to side with convicted criminals against the police, and the law-abiding people the police protect.

This is from Julie Kelly over at American Greatness:

> According to news reports, Kenosha police were responding to a 911 call related to an existing warrant on Jacob Blake for felony sexual assault, trespassing, and domestic abuse before Blake was shot on August 23.
>
> […]Blake allegedly broke into the bedroom of the victim, an ex-girlfriend, in the early morning of May 3 and sexually assaulted her while one of her children slept beside her. The victim told police that Blake attacks her "around twice a year when he drinks heavily," the New York Post reported August 28. A 911 call from that same residence triggered Blake's encounter with police, which sparked looting and rioting in Kenosha, a city located on the border of Illinois and Wisconsin, that spread to other cities across the county.
>
> Police also confirmed that Blake had a knife in his possession; video taken during the incident supports that claim. Blake resisted arrest and ignored officers' commands before he was shot in the back. He remains in stable condition at a Milwaukee hospital.

Some reactions of prominent Democrats:

> Political leaders, celebrities, and athletes have rallied to Blake's defense. In a video message taped at his home, Joe Biden said Blake's shooting was another example of "systemic racism" and fretted about what Blake's children watched unfold.
>
> […]Biden's running mate spoke with Blake's family this week. Sen. Kamala Harris said she did not think the shooting was justified.
>
> […]LeBron James is outraged at the Blake incident; he has referred to the serial sexual abuser as a

> "gentleman" and encouraged his fellow NBA players to boycott the playoffs in Blake's honor.
>
> […]NFL quarterback Drew Brees taped Blake's name on his helmet.
>
> Blake's father and other family members spoke at Friday's March on Washington in honor of the 57th anniversary of Martin Luther King Jr's "I Have a Dream" speech.

Hope you're not watching sports any more. At least don't pay anything for it. These are not good people.

Anyway, it seems like the expectation on police is that they allow criminals to commit crimes against blacks, just in the case that the criminals are also black themselves. Because apparently black lives don't matter if the criminal threatening those lives is also black. Only the lives of black criminals matter. We can't ask people of every race to behave morally. That's racist. We have to allow some criminals of certain races to break the law and not be punished.

Anyway, I thing it's a good time to re-post this old lecture featuring Jewish comedian Evan Sayet, who walked away from the left. He has an inside view of what is going on in the heads of the Democrats who march on behalf of criminals like George Floyd, Jacob Blake, etc.

Video:

The part I want you to see (full transcript):

> The Modern Liberal will invariably side with evil over good, wrong over right, and the behaviors that lead to failure over those that lead to success.
>
> […]What I discovered is that the Modern Liberal looks back on 50,000 years, 100,000 years of human civilization, and knows only one thing for sure: that none of the ideas that mankind has come up with–none of the religions, none of the philosophies, none of the ideologies, none of the forms of government–have succeeded in creating a world devoid of war, poverty, crime, and injustice. So they're convinced that since all of these ideas of man have proved to be wrong, the real cause of war, poverty, crime, and injustice must be found–can only be found–in the attempt to be right.
>
> If nobody ever thought they were right, what would we disagree about? If we didn't disagree, surely we wouldn't fight. If we didn't fight, of course we wouldn't go to war. Without war, there would be no poverty; without poverty, there would be no crime; without crime, there would be no injustice. It's a utopian vision, and all that's required to usher in this utopia is the rejection of all fact, reason, evidence, logic, truth, morality, and decency–all the tools that you and I use in our attempts to be better people, to make the world more right by trying to be right, by siding with right, by recognizing what is right and moving toward it.
>
> […]What you have is people who think that the best way to eliminate rational thought, the best way to eliminate the attempt to be right, is to work always to prove that right isn't right and to prove that wrong isn't wrong.
>
> […]What happens is, they are indoctrinated into what I call a "cult of indiscriminateness." The way the elite does this is by teaching our children, starting with the very young, that rational and moral thought is an act of bigotry… the only way to eliminate bigotry is to eliminate rational thought.
>
> There's a brilliant book out there called The Closing of the American Mind by Professor Allan Bloom. Professor Bloom was trying to figure out in the 1980s why his students were suddenly so stupid, and what he came to was the realization, the recognition, that they'd been raised to believe that indiscriminateness is a moral imperative because its opposite is the evil of having discriminated.
>
> […]Since nothing can deemed good, nothing can be deemed evil. That which society does recognize as good must be the beneficiary of some sort of prejudice. That which society recognizes as evil must be the victim of that prejudice. So, again, the mindless foot soldier will invariably side with whatever policy, mindlessly accept

> whatever policy seeks to tear down what is good… and elevate what is evil until everything meets in the middle and there is nothing left to fight about.

There's a 10-year-anniversary redo of it here:

The first lecture was the most popular lecture ever given at Heritage Foundation, my favorite think tank. And it changed my life. The second lecture was even meaner, and had some up to date material.

# Every single left-wing extremist rioting and looting in Democrat-run cities is a Biden supporter

**Wintery Knight** · 1 September 2020 · Archived copy · Original

If you're trying to help the rioters escape justice, then you're pro-rioting

I watched Donald Trump's speech on last night, and I learned that Joe Biden is now trying to issue a vague disagreement with the arson, looting, vandalism, violence, domestic terrorism and murder being committed by BLM and Antifa. Is there any reason to think that Joe Biden and his VP-pick Kamala Harris oppose rioting, arson and violence? Let's look at their actions and see.

So, as you can see from the image above, Kamala Harris supports something called the "Minnesota Freedom Fund". They bail out people who are caught rioting, looting, setting fires, and murdering innocent people.

Here's an interesting story from Fox 9 Minnesota local news:

> Among those bailed out by the Minnesota Freedom Fund (MFF) is a suspect who shot at police, a woman accused of killing a friend, and a twice convicted sex offender, according to court records reviewed by the FOX 9 Investigators.
>
> According to attempted murder charges, Jaleel Stallings shot at members of a SWAT Team during the riots in May. Police recovered a modified pistol that looks like an AK-47. MFF paid $75,000 in cash to get Stallings out of jail.
>
> Darnika Floyd is charged with second degree murder, for stabbing a friend to death. MFF paid $100,000 cash for her release.
>
> Christopher Boswell, a twice convicted rapist, is currently charged with kidnapping, assault, and sexual assault in two separate cases. MFF paid $350,00 [sic] in cash for his release.

If any of this surprises you, just remember that Biden / Harris are for abortion through all 9 months of pregnancy. Biden wants to reverse the Hyde amendment to force pro-lifers to fun abortions. Harris attacks people who expose

organ trafficking from aborted babies. There's extremists who see violence as normal and natural.

Here's another one of the Democrat domestic terrorists that will be voting for Biden / Harris in November:

> Michael Forest Reinoehl, the suspect in a fatal shooting during another violent and chaotic night in Portland Saturday, is reportedly "100% antifa" and previously accused of bringing a loaded gun to a protest held in early July.
>
> Reinoehl is the prime suspect in a homicide investigation into the death of Aaron Danielson, "a supporter of the conservative group Patriot Prayer."
>
> Reinoehl was identified "by a distinctive tattoo on his neck of a 'black power' fist and by a family member who had seen videos of the shooting.
>
> An Instagram post on June 16 outlined Reinoehl's feelings about Antifa, police brutality, and protesting with phrases like "it will be a war and like all wars there will be casualties." Hashtags at the bottom of the post and other posts on his feed indicate his support for Black Lives Matter and "f*** the police."

Do you think that people like this will be prosecuted in a Biden / Harris administration? Just look at how Kamala Harris handled Planned Parenthood in her own state – by persecuting the whistleblowers who exposed organ harvesting and trafficking, rather than the actual organ traffickers themselves.

It's not just Biden / Harris who support the Brown Shirt mob, it's left-wing new outlets like Huffington Post and NPR – this is where rank-and-file Democrats get their ideas about what a proper Brown Shirt should do in order to get their fascist "elected".

The Federalist reports:

> Vicky Osterweil's new book, "In Defense of Looting," "makes the case that looting isn't a betrayal of protests for Black lives, but a vital aspect of the movement," writes Claire Fallon in the Huffington Post. Fallon approvingly connected Osterweil's defense of looting directly to rioting in Wisconsin last week that led to two dead and millions of dollars in damages against innocent bystanders who saw their life's work go up in smoke.
>
> National Public Radio also decided to feature Osterweil Thursday on its podcast "Code Switch," for which the tag line is "Race. In your face," under the banner "America reckons with racial injustice." The interview openly makes the case that the existence of racial injustice in history justifies violent crime.
>
> […]Osterweil is a transgender male who calls himself a "writer, editor, and agitator." His Twitter handle is Vicky_ACAB. ACAB means "all cops are b-stards." The acronym has been spray-painted on buildings in Kenosha and numerous other riot-torn American cities this summer in the name of Black Lives Matter.
>
> […]Osterweil "argues that looting is a powerful tool to bring about real, lasting change in society," Escobar writes. "The rioters who smash windows and take items from stores, she says, are engaging in a powerful tactic that questions the justice of 'law and order,' and the distribution of property and wealth in an unequal society."

See, rioting and looting are just socialism, and the secular leftists are all for socialism. This isn't an abberation, this is the Democrat party platform. If they get elected, we'll see more of this, and there won't be any resistance, since they want to confiscate the weapons of law-abiding people, de-fund the police, and charge anyone who defends themselves from their Brown Shirt mob with murder. We are seeing this right now.

I know that most people reading will look at the their grandmothers who are Democrats and think "that doesn't look like a national socialist in 1930s Germany trying to impose fascism". But this is a new Democrat party that openly embraces racism, socialism, and fascism. It's so bad, that even traditional Democrat voting blocs are moving away from it.

See for yourself:

> The new Hill-HarrisX survey of registered Black voters between Aug. 22-25 — which included the first two days of the Republican National Convention (RNC) convention — found nearly one on four said they approve of the job Trump is doing as president. The other 76% percent disapprove.
>
> That's up 9 points — or 60% — from the previous survey conducted Aug. 8-11 in which the president got 15%.
>
> The new survey found support among Hispanic voters also rose by 2% from the last poll to 32%.

And also this:

> "In June approval of protests was widespread, with 61 percent approving of the protests and 36 percent disapproving," the poll found. "Approval declined in August with 48 percent approving and 48 percent disapproving."
>
> The biggest change was among suburbanites who were, it seems, largely unaware of protests (and ensuing riots) when they were affecting major urban areas but began to pay attention when Kenosha, a more suburban, more residential area of Wisconsin, started seeing major damage.

The only way we're going to prevent left-wing fascism in our country is by exposing the actions of the Democrats. If the election is decided on what they say, we lose. If the election is decided on what they've done, we win. Make sure everyone around you knows what they've done.

# Four reasons to think that atheism is inconsistent with scientific progress

**Wintery Knight** · 2 September 2020 · Archived copy · Original

Christianity and the progress of science

When people ask me whether the progress of science is more compatible with theism or atheism, I offer the following four basic pieces of scientific evidence that are more compatible with theism than atheism:

1. the kalam argument from the origin of the universe
2. the cosmic fine-tuning (habitability) argument
3. the biological information in the first replicator (origin of life)
4. the sudden origin of all of the different body plans in the fossil record (Cambrian explosion)

And I point to specific examples of recent discoveries that confirm those four arguments. Here are just a few of them:

1. An explanation of 3 of the 6 experimental evidences for the Big Bang cosmology (from Physics Forums)
2. Examples of cosmic fine-tuning to allow the existence of conscious, embodied life (From the New Scientist)
3. Evidence that functional protein sequences are beyond the reach of chance, (from Doug Axe's JMB article)
4. Evidence showing that Ediacaran fauna are not precursors to the Cambrian fossils, (from the journal Nature)

Atheists will typically reply to the recent scientific discoveries that overturned their speculations like this:

1. Maybe the Big Bang cosmology will be overturned by the Big Crunch/Bounce so that the universe is eternal and has no cause
2. Maybe there is a multiverse: an infinite number of unobservable, untestable universes which makes our finely-tuned one more probable
3. Maybe the origin of life could be the result of chance and natural processes
4. Maybe we will find a seamless chain of fossils that explain how the Cambrian explosion occurred slowly, over a long period time

Ever heard any of these responses?

Below I list some resources to help you to respond to the four responses of atheists to the experimental data.

**1) The Big Crunch/Bounce has been disproved theoretically and experimentally.**

Theoretically:

> Nature 302, 505 – 506 (07 April 1983); doi:10.1038/302505a0
>
> The impossibility of a bouncing universe
>
> ALAN H. GUTH* & MARC SHER†
>
> *Center for Theoretical Physics, Laboratory for Nuclear Science and Department of Physics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139, USA
>
> †Department of Physics, University of California, Irvine, California 92717, USA
>
> Petrosian1 has recently discussed the possibility that the restoration of symmetry at grand unification in a closed contracting Robertson–Walker universe could slow down and halt the contraction, causing the universe to bounce. He then went on to discuss the possibility that our universe has undergone a series of such bounces. We disagree with this analysis. One of us (M.S.) has already shown2 that if a contracting universe is dominated by radiation, then a bounce is impossible. We will show here two further results: (1) entropy considerations imply that the quantity S (defined in ref. 1 and below), which must decrease by ~1075 to allow the present Universe to bounce, can in fact decrease by no more than a factor of ~2; (2) if the true vacuum state has zero energy density, then a universe which is contracting in its low temperature phase can never complete a phase transition soon enough to cause a bounce.

Experimentally:

> The universe is not only expanding, but that expansion appears to be speeding up. And as if that discovery alone weren't strange enough, it implies that most of the energy in the cosmos is contained in empty space — a concept that Albert Einstein considered but discarded as his "biggest blunder." The new findings have been recognized as 1998's top scientific breakthrough by Science magazine.
>
> […]The flood of findings about the universe's expansion rate is the result of about 10 years of study, said Saul Perlmutter, team leader of the Supernova Cosmology Project at Lawrence Berkeley National Laboratory.
>
> Perlmutter and others found such a yardstick in a particular kind of exploding star known as a Type 1A supernova. Over the course of several years, the astronomers developed a model to predict how bright such a supernova would appear at any given distance. Astronomers recorded dozens of Type 1A supernovae and anxiously matched them up with redshifts to find out how much the universe's expansion was slowing down.
>
> To their surprise, the redshift readings indicated that the expansion rate for distant supernovae was lower than the expansion rate for closer supernovae, Perlmutter said. On the largest scale imaginable, the universe's galaxies appear to be flying away from each other faster and faster as time goes on.
>
> "What we have found is that there is a 'dark force' that permeates the universe and that has overcome the force of gravity," said Nicholas Suntzeff of the Cerro Tololo Inter-American Observatory, who is the co-founder of another group called the High-z Supernova Search Team. "This result is so strange and unexpected that it perhaps is only believable because two independent international groups have found the same effect in their data."

There has only been one creation of the universe, and the universe will never reverse its expansion, so that it could oscillate eternally. That view is popular, perhaps in part because many people watched videos of Carl Sagan speculating about it in public school classrooms, but all it was was idle naturalistic speculation, (Sagan was a naturalist, and held out hope that science would vindicate naturalism), and has been contradicted by good experimental science. You should be familiar with the 3 evidences for the Big Bang (redshift, light element

abundances (helium/hydrogen) and the cosmic microwave background radiation. There are others, (radioactive element abundances, second law of thermodynamics, stellar lifecycle), but those are the big three. Point out how the experimental evidence for the Big Bang has piled up, making the problem even worse for the eternal-universe naturalists.

**2) The multiverse has not been tested experimentally, it's pure speculation.**

Speculation:

> Multiverse thinking or the belief in the existence of parallel universes is more philosophy or science fiction than science. "Cosmology must seem odd to scientists in other fields".
>
> George Ellis, a well-known mathematician and cosmologist, who for instance has written a book with Stephen Hawking, is sceptical of the idea that our universe is just another universe among many others.
>
> A few weeks ago, Ellis, professor emeritus of applied mathematics at the University of Cape Town, reviewed Brian Greene's book The Hidden Reality: Parallel Universes and the Deep Laws of the Cosmos (Knopf/Allen Lane, 2011) in the journal Nature. He is not at all convinced that the multiverse hypothesis is credible: "Greene is not presenting aspects of a known reality; he is telling of unproven theoretical possibilities."
>
> According to professor Ellis, there is no evidence of multiverses, they cannot be tested and they are not science.
>
> Ellis is not the only multiverse sceptic in this universe. A few months ago, science writer John Horgan wrote a column in Scientific American, expressing his doubt in multiverses.

When you get into a debate, you must never ever let the other side get away with asserting something they have no evidence for. Call them on it – point out that they have no evidence, and then hammer them with evidence for your point. Pile up cases of fine-tuning on top of each other and continuously point out that they have no experimental evidence for their speculations. Point out that more evidence we get, the more cases of fine-tuning we find, and the tougher the problem gets for naturalists. There is no evidence for a multiverse, but there is evidence for fine-tuning. TONS OF IT.

**3) Naturalistic theories for the origin of life have two problems: can't make the amino acids in an oxydized atmosphere and can't make protein and DNA sequences by chance in the time available.**

Building blocks:

> The oxidation state of Hadean magmas and implications for early Earth's atmosphere
>
> Dustin Trail, E. Bruce Watson & Nicholas D. Tailby
>
> Nature 480, 79–82 (01 December 2011) doi:10.1038/nature10655
>
> […]These results suggest that outgassing of Earth's interior later than ~200?Myr into the history of Solar System formation would not have resulted in a reducing atmosphere.

Functional protein sequences:

> J Mol Biol. 2004 Aug 27;341(5):1295-315.
>
> Estimating the prevalence of protein sequences adopting functional enzyme folds.
>
> Axe DD.
>
> The Babraham Institute, Structural Biology Unit, Babraham Research Campus, Cambridge CB2 4AT, UK. doug.axe@bbsrc.ac.uk
>
> Proteins employ a wide variety of folds to perform their biological functions. How are these folds first

> acquired? An important step toward answering this is to obtain an estimate of the overall prevalence of sequences adopting functional folds.
>
> […]Starting with a weakly functional sequence carrying this signature, clusters of ten side-chains within the fold are replaced randomly, within the boundaries of the signature, and tested for function. The prevalence of low-level function in four such experiments indicates that roughly one in 10(64) signature-consistent sequences forms a working domain. Combined with the estimated prevalence of plausible hydropathic patterns (for any fold) and of relevant folds for particular functions, this implies the overall prevalence of sequences performing a specific function by any domain-sized fold may be as low as 1 in 10(77), adding to the body of evidence that functional folds require highly extraordinary sequences.

So atheists are in double jeopardy here. They don't have a way to build the Scrabble letters needed for life, and they don't have a way to form the Scrabble letters into meaningful words and sentences. Point out that the more research we do, the tougher the problem gets to solve for naturalists, and the more it looks like an effect of intelligence. Write out the calculations for them.

**4) The best candidate to explain the sudden origin of the Cambrian era fossils was the Ediacaran fauna, but those are now recognized as not being precursors to the Cambrian fossils.**

Science Daily reports on a paper from the peer-reviewed journal Science:

> Evidence of the single-celled ancestors of animals, dating from the interval in Earth's history just before multicellular animals appeared, has been discovered in 570 million-year-old rocks from South China by researchers from the University of Bristol, the Swedish Museum of Natural History, the Paul Scherrer Institut and the Chinese Academy of Geological Sciences.
>
> […]This X-ray microscopy revealed that the fossils had features that multicellular embryos do not, and this led the researchers to the conclusion that the fossils were neither animals nor embryos but rather the reproductive spore bodies of single-celled ancestors of animals.
>
> Professor Philip Donoghue said: "We were very surprised by our results — we've been convinced for so long that these fossils represented the embryos of the earliest animals — much of what has been written about the fossils for the last ten years is flat wrong. Our colleagues are not going to like the result."
>
> Professor Stefan Bengtson said: "These fossils force us to rethink our ideas of how animals learned to make large bodies out of cells."

The trend is that there is no evolutionary explanation for the body plans that emerged in the Cambrian era. If you want to make the claim that "evolution did it", then you have to produce the data *today*. Not speculations about the future. The data we have today says no to naturalism. The only way to affirm naturalistic explanations for the evidence we have is *by faith*. But rational people know that we need to minimize our leaps of faith, and go with the simplest and most reasonable explanation – an intelligence is the best explanation responsible for rapid generation of biological information.

**Conclusion**

I do think it's important for Christians to focus more on scientific apologetics and to focus their academic careers in scientific fields. So often I look at Christian blogs, and I see way too much G. K. Chesterton, Francis Chan A. W. Tozer, and other untestable, ineffective jibber-jabber. We need to bring the *hard* science, and stop making excuses about not being able to understand it because it's too hard. It's not too hard. Everyone can understand Lee Strobel's "The Case for a Creator". That's more than enough for the average Christian on science apologetics. We all have to do our best to learn what works. You don't want to be anti-science and pro-speculation like atheists are. I recommend reading Uncommon Descent and Evolution News every day for a start.

# 19 out of 20 of the most violent cities in America are run by far-left Democrats

**Wintery Knight** · 3 September 2020 · Archived copy · Original

**Rep. Jim Jordan**
@Jim_Jordan

The last time voters elected a Republican mayor:

Seattle - 1964
Minneapolis - 1957
Portland - 1952
Chicago - 1927
Washington, D.C. - NEVER

But Democrats want to blame President Trump for crime in these cities?

6:50 PM · Aug 31, 2020 · Twitter for iPhone

**24.5K** Retweets **1.3K** Quote Tweets **55.2K** Likes

The most violent cities have been run by far-left Democrats for decades

Trump has been talking A LOT about how the riots, looting and arson we are seeing are all being committed by far-left Democrats. But he also mentioned that it's no accident that this is all happening in cities that have been run by Democrats for decades. When Trump offers to send in more law enforcement, the far-left Democrat mayors and governors turn him down, because they want to appease them.

So first of all, here are the facts from the far-left Washington Post, which is is committed to helping the Democrat party to win in every election:

Source: FBI Uniform Crime Report, January–June 2019 THE WASHINGTON POST

FBI crime statistics for the most recent year available

The 19 cities in blue are Democrat-run. The only one that isn't blue is gray – Independent-run. There are no high-

crime cities that are run by Republicans. And the Democrat-run cities have mostly been Democrat-run for decades.

Now, the far-left Washington Post fact-checked Trump to say that the numbers above do not prove that "most" of the high-crime cities are run by Democrats, because 19 out of 20 is not "most" to a journalism major who writes lies for a living. But you be the judge yourself.

The Federalist confirms that this is not getting any better:

> Since June, shootings and murders have surged across many of the country's major cities. Minneapolis, New York, Philadelphia, Nashville, Chicago, Milwaukee, Indianapolis, Cincinnati, and New Orleans have all seen murders jump over 20 percent this year. The violence is heavily concentrated in the last few months, ever since protests have led to nationwide pressure on politicians to "defund" and "reimagine" policing.
>
> Just as concerning is that these stats do not include data from the end of June and July. Data from New York and Chicago, recent data from which we do have, tells that the last few weeks have seen by far the worst of the violence. Murders and shootings in the Windy City are up about 80 percent, and New York has averaged at a 209 percent over these last weeks compared to the same times last year. It's likely these disturbing numbers for the cities above only captures a fragment of the lives lost during unrest in which many protesters chant "Black Lives Matter."

Many Democrat cities took advantage of the COVID-19 crisis to empty their prisons of violent criminals. They were delighted to do that, since they hate the idea of being judged or held accountable themselves. It's part of their childish nature to oppose punishment.

So, why is crime more prevalent in Democrat-run cities? The answer is that Democrats prefer to side with criminals. When a criminal is shot by the police while resisting arrest and reaching for a weapon, the response of Democrats is to attack the police, charge them with crimes, and defund (abolish) the police force *entirely*. They think that eliminating the police will reduce violent crime. And that's why they have soaring crime rates in those Democrat-run cities.

The American Thinker explains:

> Liberal cities are governed by the guiding tenets of softness, misplaced "compassion," and individual unaccountability. Examples include:
>
> - Hands-off policing style (NYC has long since abandoned the highly successful stop-and-frisk practices of the Giuliani years that led to low street crime).
> - Sanctuary cities, which give rise to higher incidents of crime, poverty, unemployment, and the wasting of taxpayer-funded public resources because of the undocumented population's draining effect on the community.
> - The inexplicable decision of cities like Boston to no longer prosecute crimes such as shoplifting and breaking and entering, leading to urban stores not being able to remain open and be profitable (thus denying the community of a valuable resource).
> - Widespread locally approved abuse of the SNAP/EBT program, allowing its acceptance for alcohol and other nonessential items.
> - Explicit sanctioning of sleeping on the street or other common public areas and unrestricted public loitering.
>
> Liberal policies have worked almost perfectly to degrade the quality of inner-city life for their residents to the point of abject unacceptability. Instead of raising the standard of living for all the city's inhabitants, excessive giveaways (too often offered without requiring adequate, verifiable proof-of-need) and lax or missing enforcement of local laws and edicts have the opposite effect — such governmental practice only teaches

> people that they are forever unaccountable as regards the purported norms of society and that they will be given their daily sustenance for free, without putting forth any commensurate effort on their part. In short, overindulgence by local city governments denies the notion of ownership over their own lives to the lower strata of society. That notion of self-ownership over the control and ultimate destiny of one's life is absolutely critical to a well-functioning society. Without that sense of personal responsibility, there is no civilized order.

Everyone who has looked at the problem knows that crime is caused by women who have sex with men who don't commit to them in marriage. Almost 100% of the men in prison are fatherless, and that's the result of the decisions of their mothers, or their mother's mother, or their mother's mother's mother. Single motherhood is a problem with overindulging women and over-blaming men.And the Democrats participate in this by catering to the recklessness and irresponsibility of single mothers. It's the same for all races – the common denominator to crime is single motherhood by choice.

Paying single mothers welfare money to have children out of wedlock (a Democrat priority) only makes things worse. And these are real children we're talking about here, real children who have a right to grow up in a stable home with their biological parents. Democrat policy is not just abuse of the unborn – it's also abuse of born children at the hands of their selfish, irresponsible mothers.

Interestingly, Democrat lawmakers were given an opportunity to solve what they say is the problem: the police being too rough on criminals. But when a bipartisan bill came up for a vote, they voted it down. They don't want a solution, they want their base angry so they vote against Trump. They've had the reins of these cities for decades, and they haven't solved the problem because they don't want to solve the problem. White supremacists couldn't do a better job of keeping black people down if they tried.

# Donald Trump has done more than all of his rich critics to reduce carbon emissions

**Wintery Knight** · 4 September 2020 · Archived copy · Original

How much have countries cut carbon emissions?
I wanted to look at who has been doing the most to cut carbon emissions. Then we'll look at whether the secular left supports the technologies that achieved actual cuts in carbon emissions. Then we'll look at the technologies that the secular left supports, to see whether they achieve similar success. Then we'll draw a conclusion about the environmentalism of the secular left.

Let's start with the data on carbon emissions. As you can see from the graph above, the biggest offenders are China and India. These countries make a show about caring for the environment to shame America, but the truth is that they are the biggest polluters of all, and getting worse.

Daily Wire reports:

> The United States led the entire world in reducing CO2 emissions last year while also experiencing solid economic growth, according to a newly released report.
>
> "The United States saw the largest decline in energy-related $CO_2$ emissions in 2019 on a country basis – a fall of 140 Mt, or 2.9%, to 4.8 Gt," The International Energy Agency (IEA) reported on Tuesday. "US emissions are now down almost 1 Gt from their peak in the year 2000, the largest absolute decline by any country over that period."
>
> […]The IEA noted that 80% of the increase in CO2 emissions came from Asia and that China and India both contributed significantly to the increase.

So how was America able to do that? The answer is that they they adopted zero-emission technologies, specifically fracking and nuclear power:

> […][C]heap, natural gas, made available by fracking, has already made the U.S. the world leader in carbon emissions reduction. By allowing gas to displace coal as the leading fuel for domestic power generation, fracking has already done more to reduce emissions than the combined activity of all the environmental activists in human history. Renewables such as wind and solar, which still play only a minor role in generation, cannot operate without the flexible backup that gas provides for those times when the wind stops and the sun sets or goes behind a cloud.
>
> Natural gas will help reduce carbon emissions in the short run. But nuclear is the only long-term answer if you're worried about climate change.

It should be noted that the secular left opposes both fracking and nuclear power, and that's because they're either lying about their concern for the environment (possible) or they think that renewable energies like wind and solar can do the job. But can they?

Environmentalists burning helicopter fuel to de-ice wind turbines one at a time

Far-left NPR explains:

> While most of a turbine can be recycled or find a second life on another wind farm, researchers estimate the U.S. will have more than 720,000 tons of blade material to dispose of over the next 20 years, a figure that doesn't include newer, taller higher-capacity versions.
>
> There aren't many options to recycle or trash turbine blades, and what options do exist are expensive, partly because the U.S. wind industry is so young. It's a waste problem that runs counter to what the industry is held up to be: a perfect solution for environmentalists looking to combat climate change.

It's difficult to transport the blades. There are few landfills big enough to accommodate them. And no one has the expensive equipment to cut them down to smaller sizes. But wait! There are more problems.

My problems with wind and solar power are simple. They are extremely expensive, which raises the cost of electricity to consumers and businesses. They are extremely unreliable, and require constant maintenance and backup-support from traditional high-pollution sources. And most importantly, they mass murder birds, including protected birds, by the millions. That last reason along is enough to make me oppose them. I love birds!

Forbes magazine points out problems with the wind and solar power favored by the secular left:

> In reality, solar farms require hundreds of times more land, an order of magnitude more mining for materials, and create hundreds of times more waste, than do nuclear plants.

> And wind farms kill hundreds of thousands of threatened and endangered birds, may make the hoary bat go extinct, and kill more people than nuclear plants.

We can find out what happens when the secular-leftists get their way on energy policy by looking at France and Germany, where it's already been tried:

> Just contrast Germany and France. Germany has done much of what the Green New Deal calls for. By 2025 it will have spent $580 billion on renewables and related accoutrement, while shutting down its nuclear plants.
>
> All that Germany will have gotten for its "energy transition" is a 50% increase in electricity prices, flat emissions, and an electricity supply that is 10 times more carbon-intensive than France's.
>
> […]France spent $30 billion on renewables and saw the carbon intensity of its electricity supply, and electricity prices, rise.
>
> France and Germany and every other real world situation prove that nuclear power is the only way to significantly, deeply, and cheaply decarbonize energy supplies, and thus address climate change.
>
> The problem with nuclear is that it doesn't demand the radical re-making of society, like renewables do, and it doesn't require grand fantasies of humankind harmonizing with nature.
>
> Nor does nuclear provide cover for funnelling billions to progressive interest groups in the name of "community-controlled renewable energy, local organic agriculture, or transit systems."

The secular left opposes zero-emission technologies like fracking and nuclear, and there's a reason for that. Those technologies *reduce the cost of electricity*. Which means that people can use as much electricity as they like. But the secular left doesn't want people to have low-cost electricity. They can only *NATIONALIZE* the energy industry (i.e. – COMMUNISM) because people complain about the high costs of electricity. The secular left has already been pursuing this policy of raising the cost of education and healthcare with government subsidies and regulations, in order to convince voters that the only solution to (artificially) inflated costs is for government to step in and take control. In countries like Canada, this is the exact model they adopted, (e.g. Ontario Hydro under Kathleen Wynne), in order to raise the prices of electricity. That is their real goal.

We do not want this, because the seizing of private property, redistribution of wealth, and nationalization of industry are *precisely the policies that lead countries like Venezuela and Cuba into long-term poverty*. The secular leftists don't care if the quality of your utilities, education and health care drop precipitously because it is run by the government. Their goal is for the elites to fly around in private jets with armed security, while the little people wait in bread lines for food, wait for health care for months, and are indoctrinated to love communism in college.

# Feminist explains how she chose to drink alcohol before recreational sex

**Wintery Knight** · 5 September 2020 · Archived copy · Original

College students puking in toilet

Guess where I'm linking today? To a radical feminist web site named Jezebel, to an article written by a radical feminist who writes for the radically leftist Slate.

No, I'm not crazy. Just read it:

> Much of the conversation around alcohol and sex has focused on assault—the line at which intoxication becomes incapacitation, for instance—**but what we fail to mention is how haunted people can be by the sex they actually, technically consented to.**
>
> […]I wonder what my sex life would even look like if alcohol hadn't been there. Alcohol gave me comfort in my own body, and it allowed me to turn my erotic curiosity and hunger for experience into an action plan. I was tired of being the stuttering girl sucking in her stomach after the lights went out. I wanted to be the woman who roamed wild and free.
>
> Alcohol also helped me cut the girlish strings on my heart, an action my college years demanded. Three months into my freshman year, I split a six pack with a dashing sophomore, and we wound up partially clothed on his bed, my bare legs wrapped around his waist, my hands around his neck. I pulled back slightly and asked him the question, the naive question of a girl who does not yet understand her fate: "What does this mean?"
>
> He looked past me, into his studio apartment, and then back into my eyes. "It means that I'm a 19-year-old boy, and we're having fun."

What is interesting is that she didn't see this man's using her for fun after getting her drunk as any disqualification for a serious relationship. On the contrary, she believes that a serious relationship built on self-sacrificial love and commitment that lasts through difficulties can be found in a man who uses her for fun sex:

> I'm not saying I didn't enjoy that night with the dashing sophomore. I'm saying the fun part for me might have been turning our physical intimacy into a sustained attachment.

Amazing. She wasn't looking for men with good educations, good jobs, lots of savings, who were sober and chaste – they would have made her unhappy with their bossy leading, and strict plans about courting and marriage. She thought that she could get to live-long married love by choosing what was free, easy and fun in the moment.

She is 35 now, and still single. I'm sure if you ask her, she would like to be married "some day", but who would say that her past decisions were good preparation for the challenges of marriage? Marriage is about self-sacrificial love, and endurance. To prepare for marriage, you practice self-denial and self-control. You learn how to accept expectations, obligations and responsibilities. You grow up.

Anyway, back to the article. She *choose the alcohol* herself, and she did it for a very specific reason:

> I wanted to have fun, too. *And alcohol evened the score.* I cared less about everything when I was drinking: What you thought of me, what I looked like in this dress, whether that taco was warm or cold when I stuffed it in my mouth. I don't want to make it sound like I drank *in order to* have sex. I drank for a million reasons.
>
> […]Booze downshifted my intense body consciousness, and it revved up my bravado. Sex was scary—but alcohol made me feel safe.

She drank in order to have sex. Got it? *She chose to get drunk in order to feel safe about having sex.* Many young women think that recreational sex with hot guys is a pathway to marriage. They drink in order to make progress towards the marriage they want – the marriage to the man who is fun. Not the man who is serious. They don't want the serious man who makes plans for marriage, and expects the woman to sober up, behave responsibly and honor obligations.

Why are millenials acting like children into adulthood?
This reminds me of the Institute for American Values study. Despite their name, it is not a conservative organization

Look at this citation from p. 15:

> A number of students noted that being drunk could later serve as your excuse for the hook up.

> **A Yale University student said, "Some people like hook up because they're drunk or use being drunk as an excuse to hook up."**
>
> **A New York University student observed, "[Alcohol is] just part of an excuse, so that you can say, oh, well, I was drinking."**
>
> **A Rutgers University student commented, "If you're drinking a lot it's easier to hook up with someone… [and] drugs, it's kind of like a bonding thing… and then if you hook up with them and you don't want to speak to them again, you can always blame it on the drinking or the drugs."**
>
> **[…]A University of Chicago junior observed, "One of my best friends… sometimes that's her goal when we go out. Like she wants to get drunk so I guess she doesn't have to feel guilty about [hooking up]."**

I hope that many of the men out there who refuse to hold women accountable for their own desires start to understand that not everything a woman wants is good, and not every plan a woman makes will work. Sometimes, you need to calmly and constructively challenge them about their priorities, plans and actions. It's for their own good.

# Trump ends taxpayer-funded indoctrination in anti-American critical race theory in federal agencies

**Wintery Knight** · 6 September 2020 · Archived copy · Original

Her poor choices were caused by your racism, so you must pay her reparations

Good news, everyone! I think most people who are following the election closely know that there is almost no overlap between the Republican party and the Democrat party. It's common sense that we not use taxpayer money to spread hatred and division. The Democrats have been using taxpayer money to do that in federal agencies. But Trump has put an end to it.

Here's the story from Daily Wire:

> The Trump administration announced late on Friday that it was cracking down on "critical race theory," a far-left anti-American ideology that promotes racial division, from being taught in federal agencies and paid for by federal money.
>
> The memo released by Russell Vought, Director of the Office of Management and Budget, called critical race theory "divisive" and "anti-American propaganda," adding that the far-left ideology falsely promotes the notion that "there is racism embedded in the belief that America is the land of opportunity or the belief that the most qualified person should receive a job."
>
> The memo states:
>
> These types of "trainings" not only run counter to the fundamental beliefs for which our Nation has stood since its inception, but they also engender division and resentment within the Federal workforce. We can be proud that as an employer, the Federal government has employees of all races, ethnicities, and religions. We can be proud that Americans from all over the country seek to join our workforce and dedicate themselves to public service. We can be proud of our continued efforts to welcome all individuals who seek to serve their fellow Americans as Federal employees. However, we cannot accept our employees receiving training that seeks to undercut our core values as Americans and drive division within our workforce.
>
> "The President has directed me to ensure that Federal agencies cease and desist from using taxpayer dollars to fund these divisive, un-American propaganda training sessions," Vought wrote.

Now, I don't know about you, but my impression of the Republican party is that they were mostly fine with letting the Democrats warp the culture towards anarchy. Not just passively with Hollywood , Big Tech and professional sports, but actively, by subsidizing the universities, public schools, and public sector unions with taxpayer dollars. So this move comes as a big surprise to me. I would expect this from Jim Jordan or Mark Meadows, but not Donald

Trump.

Critical Race Theory is nothing more than an attempt to remove responsibility from certain underperforming groups for the low results that are caused by their own poor decision-making. Not just their poor decision making with education, career, finances, but also with premarital sex, drugs, marriage and children.

| Median US Household Income by Selected Ethnic Groups, 2018 | | |
|---|---|---|
| Indian | Americans | $119,858 |
| Taiwanese | Americans | $95,736 |
| Lebanese | Americans | $82,353 |
| Turkish | Americans | $81,656 |
| Chinese | Americans | $81,487 |
| Iranian | Americans | $80,291 |
| Japanese | Americans | $80,036 |
| Pakistani | Americans | $77,315 |
| Ukrainian | Americans | $77,083 |
| Filipino | Americans | $75,279 |
| Indonesian | Americans | $74,497 |
| Syrian | Americans | $72,675 |
| Korean | Americans | $72,074 |
| Ghanaian | Americans | $69,343 |
| Nigerian | Americans | $68,658 |
| Guyanese | Americans | $68,393 |
| **White** | **Americans** | **$67,937** |

Source: US Census Bureau

White people are doing a bad job of keeping non-whites down
We should be telling everyone, regardless of race, to act like East Indians and Asians and Africans in order to have success. Date like East Indians and Asians and Africans, Marry like East Indians and Asians and Africans. Educate yourself like East Indians and Asians and Africans. Work like East Indians and Asians and Africans. Follow the law and don't antagonize the police. This is not "acting white". This is taking responsibility to make good decisions and be disciplined. We need to teach people of all races to work backwards from the results that other non-white races are achieving, to the decision-making that produces those results. Critical race theory is teaching people the wrong message – don't make good decisions, cry racism when you fail to achieve good results. Awful.

In America, your success is largely determined by your decision-making, not by how other people treat you. We have non-white populations who are able to achieve far above whites, because they work harder, study harder, obey the law better, marry earlier, etc. than white people do, on average. The problem of failure to succeed cannot be caused by skin color when so many non-white groups are achieving far above native-born whites.

There is no path to stability and success that involves making decisions like the woman in the photo above. If a woman watches TV all the time, doesn't study in school, is overweight and makes babies with bad boys in order to go on welfare, then the solution to her problems won't be found in critical race theory. She'll have to start to control herself and make better decisions if she wants different results.

Instead of having taxpayer funded indoctrination to blame others for poor decision-making, we should remove all taxpayer-funding for failure, including student loans for non-STEM degrees and single mother welfare, and just pay people who try hard in school, who marry, and who have children after they are married. We should penalize people for divorce and drug use. We are getting failure in this country because we make excuses for people who make poor decisions. It's nice to see Trump at least stopping the flow of money from successful workers who pay taxes to irresponsible, reckless losers who think that teaching racism is a real job.

# Three cheers for the Janus SCOTUS decision and right-to-work laws in 27 states

Contributions from unions are mostly given to Democrats and leftists

Some people think of unions as a force for good. Perhaps they were in the past, but a little reading of economics shows how they actually produce very bad results for workers. In addition to that, unions are actively trying to influence the outcome of elections in 2020, using the money collected from their members. Fortunately, there have been two great developments recently that limit their power.

Here's a recent story from Just the News:

> Leaders of several public and private sector unions are threatening to organize walkouts this fall for teachers, truck drivers and service workers in an effort to protest police killings.
>
> "The status quo — of police killing Black people, of armed white nationalists killing demonstrators, of millions sick and increasingly desperate — is clearly unjust, and it cannot continue," said a statement issued over the weekend by various arms of the American Federation of State, County and Municipal Employees, the Service Employees International Union, and National Education Association.
>
> […]The union leaders also called for defunding police departments and universal health care.

You can see their progressive convictions coming out in how they distribute the money they collect from their members.

The Washington Examiner reports:

> Organized labor has given more than $1.3 billion to Democratic Party organizations and liberal nonprofit and activist groups since 2010, while 1 percent went to conservative groups or causes, according to a survey of federal data.

> The giving is starkly different from the beliefs of most rank-and-file union members, many of whom lean Republican.

Having said all of that, there were two pieces of good news about labor unions that I think we should celebrate during Labor Day.

First of all, there was a very good decision to allow teachers to opt out of having to pay union dues in all 50 states. Second, a large number of states have enacted right-to-work laws, which allow employees in union-dominated jobs to be able to work without being forced to join a union.

This article explains both:

> While every public sector employee across the country now enjoys right to work protections under the First Amendment as a result of the 2018 National Right to Work Legal Defense Foundation-won Janus v. AFSCME Supreme Court decision, private sector workers in the 23 states that have yet to pass a right to work law can lose their job for refusing to tender dues or fees to a union.
>
> Right to work protects each worker's freedom of choice, but the advantages of right to work hardly stop there. Enshrining workplace freedom also brings significant economic benefits to the 27 states that have passed right to work laws.
>
> Between 2009 and 2019, right to work states saw the total number of people employed grow by 16.9%. That's nearly double the 9.6% gain in non-right to work states, according to an analysis of federal government statistics compiled by the National Institute for Labor Relations Research, or NILRR.
>
> The study also found that, after adjusting for the cost of living, the mean after-tax household income in right to work states was about $4,300 higher than for households in forced-unionism states in 2018, the most recent year for which household income data is available.
>
> The connection between right to work laws and better economic performance is not a surprise. Business experts consistently rank the presence of right to work laws as one of the most important factors companies consider when deciding where to expand or relocate their plants and facilities, where they will create new jobs and new opportunities.
>
> Take the manufacturing sector, for example. The NILRR analysis revealed that employment in the manufacturing sector increased by 10% in right to work states from 2009 to 2019, over three times the 2.9% gain forced-unionism states saw over that same period.
>
> Right to work laws clearly make economic sense, but protecting employee freedom has always been their central feature.

I really liked the Janus decision and right-to-work laws, because I don't think that conservative workers should be forced to join a union in order to earn a living. The unions should not get access to worker money for free – unions should have to earn their worker's money by providing value. And the worker should decide whether there is value there, or not.

You can see a full breakdown of union contributions by political affiliation for 2019-2020 here at Open Secrets.

# Trump will cut funding of schools that teach 1619 Project fantasy as history

**Wintery Knight** · 8 September 2020 · Archived copy · Original

The results of her decisions are your fault, so pay her reparations

American schools often teach secular leftist fantasy to young children, in order to undermine their parents' values. You may remember when teachers presented the oscillating model of the universe to children through atheist Carl Sagan, to get around the need for a Creator. The model was later disproved theoretically and experimentally. Now the schools are trying again with the 1619 Project.

The 1619 Project is a fantasy work, authored by Nicole Hannah-Jones, a person with no training or demonstrated ability in any discipline connected to the real world.

Who says so? The author says so, in this tweet, reported by Red State:

> I've always said that the 1619 Project is not a history. It is a work of journalism that explicitly seeks to challenge the national narrative and, therefore, the national memory. The project has always been as much about the present as it is the past.
>
> — Ida Bae Wells (@nhannahjones) July 27, 2020

This article from the centrist National Review lists some of most fantastical parts of her work.

Here's an excerpt:

> The most dramatic and controversial assertion in Hannah-Jones's essay was that, in 1776, "one of the primary reasons the colonists decided to declare their independence from Britain was because they wanted to protect the institution of slavery." Her essay cited nothing to support this, nor did it show even the slightest awareness of how radical a claim this is. She continued:
>
> By 1776, Britain had grown deeply conflicted over its role in the barbaric institution that had reshaped the Western Hemisphere. In London, there were growing calls to abolish the slave trade. This would have upended the economy of the colonies, in both the North and the South . . . we may never have revolted against Britain if some of the founders had not . . . believed that independence was required in order to ensure that slavery would continue.

So, she's claiming that the Britain ended slavery at some point prior to 1776, and that this ending of slavery applied to the colonies in America, and that the American Revolution was a response to this ending of slavery being pushed

to the colonies. Is that true?

> The first real strike against slavery was the 1772 Somerset judicial decision in Britain, which declared that slavery was alien to the English common law and thus could not exist within Britain without a positive act of Parliament. As Princeton University history professor Sean Wilentz has noted, however, the reaction to the Somerset case, which did not apply to British colonies, was relatively muted even in the southern colonies; it provoked nothing even vaguely resembling the furious responses to the Tea Act the following year.

Early anti-slavery movements before 1776 had no effect on the "British colonies", e.g. – America. But more importantly there was no UK ban on slavery until way after the American Revolution:

> Organized, popular movements against slavery, and laws restricting or abolishing slavery and the slave trade, were considerably more advanced in the American colonies in the 1770s than in Britain, where Parliament would not ban slavery in Jamaica and other British colonies until 1833, after many years of failures by William Wilberforce and other anti-slavery leaders. The world's first organized anti-slavery society was formed in Pennsylvania in 1774, and the first legal ban on slavery anywhere in the world was in Vermont in 1777. Five of the original 13 states followed suit either during or immediately after the Revolution, passing bans on slavery between 1780 and 1784. The first federal ban on slavery, in the Northwest Territory, was drafted in 1784 by Thomas Jefferson and passed by the Confederation Congress in 1787. Its language would later be adopted directly into the 13th Amendment.

If slavery was not banned in the UK and pushed on the colonies prior to the Revolution, then the Revolution *cannot* have been a reaction to slavery being made illegal. In fact, America was far ahead of the UK at banning slavery. And far, far ahead of the rest of the world.

I just want to emphasize this – this is the problem with so many on the secular left:

> […]Hannah-Jones openly scoffs that there is "no such thing" as objective history…

This is the person the secular left believes and celebrates. A writer of anti-American fantasy. A liar.

### Should we teach BLM rioter fantasies in our schools?

Well, I'm not very impressed with her work, and fortunately for us we have a Republican president who won't bender over backwards to appease shoddy scholarship.

Fox News reports:

> President Trump said Sunday that the Department of Education is examining the use of the New York Times Magazine's 1619 Project in schools, and warned that institutions that teach this alternative narrative of American history could lose federal funding.
>
> The project is based on the premise that American history began in 1619 — cited as the date African slaves arrived in Virginia — and that everything following this should be viewed through that lens.
>
> […]Trump responded to a tweet stating that California would be using it.
>
> "Department of Education is looking at this," Trump said. "If so, they will not be funded!"
>
> Trump's tweet echoes the sentiment of a bill Sen. Tom Cotton, R-Ark., introduced in July. That bill proposed denying funds to any school that uses the 1619 Project in its curriculum. At the time, schools in areas including Chicago and Washington, D.C., had already amended their history curricula to reflect the project's messages.

This will be the policy for the next 2 months. If Biden wins, that will almost certainly be changed. How would you

like to see Nikole Hannah-Jones as Secretary of Education?

### What's really going on here?

Although Hannah-Jones' work is filled with errors, it's very appealing to the secular left. It tells them things that they want to hear. Specifically, it makes them feel superior to others, and it excuses their own poor decision-making by shifting the blame to other people. The 1619 Project is similar to Hitler's Mein Kampf, in that it affirms poorly-educated underachievers who blame their own failures on people of a different race. This is a very attractive message to socialists on the secular left, as it was in 1930s Germany. We should be careful about allowing racist rhetoric into our public schools to influence our children. It's bad for them, and it's bad for our nation.

# Chris Sinkinson debates John Hick on religious pluralism and salvation

**Wintery Knight** · 9 September 2020 · Archived copy · Original

Two tough rams butt heads, and may the best ram win!
Looks like Justin Brierley on the Unbelievable radio show found a pastor with a Ph.D in philosophy, and he can really whip some ass. And that's a good thing, because he is taking on one of the two leading proponents of religious pluralism, in my opinion, (the other being Paul Knitter).

The players:

> John Hick is a noted philosopher and theologian who is a proponent of a pluralist view of religion – that there is one light (God) but many lampshades (religious expressions).
>
> Chris Sinkinson is a pastor and Bible tutor who has critiqued Hick's work. He says that pluralism empties Christianity of any content and in its own way disrespects other religions more than his own exclusivist stance.

The MP3 file is here. (Note: This link works)

Justin does a great job as moderator of this debate. He said what I was thinking of saying a number of times during the debate.

Anyway, here is my snarky summary. I creatively paraphrase some of the things that Hick says to make it more clear. And funny.

—-

Hick:
– had an experience looking at the buildings of other religions
– other religions have buildings, so all religions are equal
– I spent some time in the East, and met nice Eastern people
– since Eastern people are nice that means all religions are equal

Justin:
– isn't Jesus' claim to be the exclusive path to salvation offensive?

Sinkinson:
– all religions that are exclusive and have to deal with religious pluralism
– even John Hick writes polemically in favor of his own view

– even John Hick thinks that religions that are exclusive are false

Justin:
– what about the blind man and the elephant?
– the story seems to say that other people have a partial grasp?
– but the story-teller himself has the privileged view
– so isn't the religious pluralist just as arrogant as exclusivists?

Hick:
– well, it's not arrogant to claim to have the right answer
– Jesus never made the claim to be God incarnate
– Jesus never made the claim to be the exclusive path to God
– historians don't think that John's gospel is reliable because it is late
– the proclamation of exclusivity was added by evangelists much later

Sinkinson:
– the historians who doubt the high Christology are radical skeptics
– the mainstream of historical scholarship accepts a high Christology
– the EARLIEST history about Jesus has the highest Christology

Hick:
– the moderate scholars do think Jesus was divine but that he didn't think he was divine
– the phrase "Son of God" was used to describe any remarkable person
– only later did the early church turn the generic term into "God the Son"

Sinkinson:
– there is reflection on Jesus' identity and developments, but not invention
– Jesus and his followers were in trouble precisely for linking him to deity
– why else would Jesus get into trouble and get crucified?

Hick:
– the Romans crucified him because people were saying he was the Messiah
– but the Messiah was not identified as being divine, but political
– and that's why the Romans crucified him

Justin:
– do you (Sinkinson) think that people in other religions can be saved?

Sinkinson:
– the traditional view is exclusivism
– the other world religions are logically contradictory with Christianity
– you have to respect their differences – they are not the same as Christianity
– exclusivists allow that people can be saved by responding to natural theology
– and there are also other cases where non-Christians are saved, like old testament saints and babies who die in infancy

Hick:
– but people's religions are based on where they are born
– so it's not fair for God to expect people to be saved in one religion only

Sinkinson:
– the plurality of religions grouped by location doesn't make christianity false
– that would be the genetic fallacy – rejecting an idea because of its origin
– the real question to consider is whether it is true

– and even the objection assumes that God is a God of love, who should be fair
– but how do you know that God is loving? that is an exclusive view
– how can the “blob” ultimate of religious pluralism be “loving” and “fair”

Hick:
– the ultimate reality is loving or not loving depending on each person’s religion

Sinkinson:
– but some religions and theistic and some are atheistic
– how can those God exist and not exist?

Hick:
– God is beyond everyone’s understanding, except mine
– God is beyond all definitions, except mine
– God is beyond all human understanding, except mine
– i’m not contradicting myself, it’s a mystery! a mystery!
– as long as you don’t look to closely, they’re all the same!
– allow me to tell you about God, which no one can do but me

Justin:
– doesn’t your religious pluralism mean that Christianity is false?

Hick:
– well, Christianity can’t be true, because it disagrees with other religions
– Christianity can’t falsify other religions, that would be mean to them
– other religions are just as “profound” as Christianity – and that’s what matters – not whether a religion makes true claims
– some religions are older than Christianity, that means they can’t be disagreed with
– we can’t let Christianity be true, because then some people will feel bad
– if people feel bad, then they don’t like me and then I feel bad
– if there’s one thing I know about the unknowable ultimate reality, it’s that it wants me to be liked by lots of people

Sinkinson:
– your view seems to be agnosticism – that nothing can be known about the “ultimate real”
– if we can’t express in words what God is like, then why are you saying what God is like?

Hick:
– the indescribable ultimate is described (falsely, but interestingly) by various tradition

Sinkinson:
– does the “ultimate real” exist?

Hick:
– no

Justin:
– are all the exclusive religions wrong, and only you are right?

Hick:
– all propositions about God in all the religions are false
– the experience of being deluded and having feelings about your delusions is “valid” in all religions
– all religions are equally good ways to believe false things and to have feelings about your false beliefs
– only my propositions about God are true
– everyone who disagrees with me is wrong

Sinkinson:

– so all the propositions of all the religions are wrong
– but all the experiences and feelings are “right”

Hick:
– yes
– all propositions about God are humanly constructed, and so false
– except mine – mine are true!

Sinkinson:
– so everything distinctive about Christianity are literally false?

Hick:
– yes, Christian doctrines are all false
– because if they were true, other religions would be false, and they would feel bad
– and we can’t have that, because everyone has to like me
– only things that don’t offend people in other religions can be true

Sinkinson:
– so do we have to then treat all religions as non-propositional?

Hick:
– well just don’t ask people about the content of their beliefs
– just treat their religion as non-cognitive rituals, feelings and experiences
– don’t inquire too deeply into it, because all religions are all nonsense
– i’m very respectful and tolerant of different religions!

Sinkinson:
– but Muslims, for example, think their religion is making truth claims

Hick:
– but there can be tolerance as long as you treat religions as non-propositional nonsense

Sinkinson:
– um, I have a higher respect for religions than you do
– I actually consider that the claims of other religions could be true
– I think that other religions make truth claims and not nonsense claims

Hick:
– well they are all useful because they are all false
– I don’t emphasize beliefs, I emphasize living, experiences and feelings
– as long as everyone accepts my view and rejects their religion, we’ll all be tolerant

Justin:
– erm, isn’t that an exclusive claim?
– you’re trying to say that your view of what religion is is right, and everyone else is wrong

Hick:
– I’m not arrogant, I just think that all the religions of the worlds are false
– only my statements about religion are true – everyone else is wrong
– I’m tolerant, and Christians are arrogant

Justin:
– but you think Sinkinson’s view is wrong
– why should we accept your view and deny his view?

Hick:

– His view of salvation is false, and mine is true

Sinkinson:
– you use words with set meanings, but you mean completely different things
– when I say salvation, I mean deliverance from sins through Jesus

Hick:
– I get to decide what salvation means for everyone, you intolerant bigot

Sinkinson:
– but that word has a specific meaning that has held true in all of Christian history
– but what you mean by salvation is people having subjective delusions that are not true

Hick:
– I don't like using the word salvation

Sinkinson:
– but you just used it!
– and you think that it is present in different world religions, but it isn't

Hick:
– God is unknowable and indescribable
– God isn't a wrathful God though
– and the Christian description of God is false
– Evangelical Christians are mean
– I had experiences with people of other faiths
– and these experiences taught me that religions that think that the universe is eternal are true
– as long as you reduce religion to behaviors and not truth, then religions are all good at producing behaviors
– if you just treat all religions as clothing fashion and food customs, they are all valid
– the main point of religion is for people to agree on cultural conventions and stick to them
– never mind the propositional statements of religions… who cares about truth? not me!
– but Christianity is definitely false

Sinkinson:
– the Judeo-Christian God is different – he reveals himself to humans
– he is distinct from the other religions
– he is personal, and is loving but also angry at sin

Hick:
– But God isn't a person, and he isn't a non-person
– I can't say what he is – I'll offend someone if I say anything at all!
– except Christians – I can offend them because they are arrogant bigots
– I'm also very spiritual – I meditate on my breathing

Sinkinson:
– you can't assess a religion by the experiences that people have
– people who have weird experiences do all kinds of evil things
– so the real question has to be about truth – is the New Testament reliable?, etc.

# Leaked tape shows how CNN coaches guests to benefit the Democrat party

**Wintery Knight** · 10 September 2020 · Archived copy · Original

[image]
Why do people think that CNN are biased leftist clowns?
One of the main things I'm trying to do with this blog is counter the lies that the mainstream media spreads. In this post, I wanted to share some leaked audio from yesterday showing how CNN coaches its guest into order to put on a show for their viewers that will persuade those viewers to vote Democrat. After that, I'll go over peer-reviewed studies about left-wing bias in the media.

Here's the new story from Daily Wire:

> Fox News host Tucker Carlson released a bombshell tape on Wednesday night that showed CNN host Chris Cuomo coaching then-Trump attorney Michael Cohen on how to answer questions during interviews on CNN.
>
> "Zucker and Cuomo … are frauds, just like the channel they work for," Carlson began. "Despite its name, CNN is not a cable news network, it is a slickly produced propaganda loop. Every topic CNN covers has been chosen for its political effect. Every word its anchors speak has been curated to manipulate you. Nothing winds up on CNN by accident."
>
> "The whole thing is a scripted drama written for the benefit of the Democratic Party," Carlson continued. "That's not an overstatement; tonight we have proof. This is a conversation that took place in 2018 between CNN anchor Chris Cuomo and his friend, the disgraced felon lawyer Michael Cohen. The two spoke in person. Cohen wanted Cuomo to prepare him for an interview he'd been asked to do on CNN. As Michael Cohen put it, he wanted 'Guidance, as a friend more than anything.'"
>
> […]"I think the way this conversation goes is almost exactly the way we're having it right now, which is where I say, 'this looks shady' and you say, 'it looks shady to you because you're coming in with a specific intention,'" Carlson read from the script of what Cuomo told Cohen. "Again, Cuomo advised Cohen to attack the anchor."
>
> "Chris Cuomo began acting out both sides of the exchange—he acted out the news anchor's question and then he acted Cohen's scripted response to that question," Carlson continued. "The conversation devolved into a kind of one-man play with Chris Cuomo as the performer and Michael Cohen as the audience."

Let's learn about media bias using these peer-reviewed studies.

Here's a UCLA study on media bias.

Excerpt:

> Of the 20 major media outlets studied, 18 scored left of center, with CBS' "Evening News," The New York Times and the Los Angeles Times ranking second, third and fourth most liberal behind the news pages of The Wall Street Journal.
>
> Only Fox News' "Special Report With Brit Hume" and The Washington Times scored right of the average U.S. voter.

From the Washington Examiner, a study of the political contributions made by the mainstream media.

Excerpt:

> Senior executives, on-air personalities, producers, reporters, editors, writers and other self-identifying employees of ABC, CBS and NBC contributed more than $1 million to Democratic candidates and campaign

> committees in 2008, according to an analysis by *The Examiner* of data compiled by the Center for Responsive Politics.
>
> The Democratic total of $1,020,816 was given by 1,160 employees of the three major broadcast television networks, with an average contribution of $880.
>
> By contrast, only 193 of the employees contributed to Republican candidates and campaign committees, for a total of $142,863. The average Republican contribution was $744.

And more from a study done by the radically leftist MSNBC.

Excerpt:

> MSNBC.com identified 143 journalists who made political contributions from 2004 through the start of the 2008 campaign, according to the public records of the Federal Election Commission. Most of the newsroom checkbooks leaned to the left: 125 journalists gave to Democrats and liberal causes. Only 16 gave to Republicans. Two gave to both parties.

Those are the facts.

**So what?**

The problem with biased reporting is that it creates a large block of low-information Democrat voters who vote on the basis of their feelings about the personality of the people running for election. They don't know a thing about policies or demonstrated achievements. They're voting based on how the media has trained them to feel about the personalities of the people running. They're not hiring someone to do a job. They're picking someone in order to feel good and signal their virtue to others.

Here is a funny exchange that my friend Laura had with a black friend:

Her: So you're voting for Biden?
Him: Definitely
Her: What do you like about Biden?
Him: He was with Obama
Her: So?
Him: Obama's black
Her: What is one policy issue you agree with Biden on?
Him: I don't know. What's one policy issue you agree with Trump on?
Her: Deregulating bureaucratic red tape causing the lowest unemployment rate among black Americans ever recorded.
Him: I didn't know about that.
Her: This country is screwed

Mr. Low-information voter doesn't know about numbers, like unemployment rates. Or about Trump being the most pro-life president ever according to pro-life groups. He doesn't know a thing about fiscal policy, social policy, foreign policy, judges, etc. He doesn't read books. He watches the news. Maybe he watches the Comedy Channel for news. But he's going to vote anyway.

Just keep that in mind when you are watching the mainstream media news shows. A very good site to bookmark and read is Newsbusters, which documents mainstream media bias daily.

# Remembering 9/11 and the Democrat weakness on foreign policy that caused it

**Wintery Knight** · 11 September 2020 · Archived copy · Original

The 9/11 terrorist attacks resulted from weak Democrat foreign policy

One of my libertarian friends was objecting to the 9/11 memorial being conducted today. So I decided to re-post a VERY old post I wrote in February 2009 when I was just starting out blogging. In it, I explain why I became so conservative on foreign policy after 9/11. Watching the response of the secular left and libertarians to the attack (blame America and praise terrorists) turned me into a hawk.

—-

## The Wall

Democrats have a reputation for not taking defense and counter-terrorism seriously. According to this post over at the American Thinker, the 9/11 tragedy was mostly due to a failure in intelligence caused by a "wall" between different intelligence-gathering organizations.

> Gorelick, an appointee of Bill Clinton, is the one who constructed the wall of separation that kept the CIA and the FBI from comparing notes and therefore invading the privacy of nice young men like, say, Muhammed Atta and Zacarius Moussaoui. While countless problems were uncovered in our intelligence operations in the wake of 9-11, no single factor comes close to in importance to Jamie Gorelick's wall.
>
> In fact, it was Gorelick's wall, perhaps more than any other single factor, that induces some people to blame Clinton himself for 9-11 since he appointed her and she acted consistent with his philosophy of "crime fighting." She put the wall into place as Deputy Attorney General in 1995.

Now let's see how a Republican president responded to a terrorist attack.

## George W. Bush

George W. Bush's bold action abroad gave us 7 years free from terrorist attacks on American assets. If there is one thing that deters future attacks, it is military invasions of countries that support and/or harbor terrorists. They understand military force. For Bush, one terrorist attack was enough to get us to respond with force.

As a result of the Bush doctrine of invading states suspected of developing and/or proliferating WMDs, Libya discontinued its weapons program and invited inspectors to come in and cart away all of its research equipment. That was the Bush doctrine – which Libya believed only because they saw that we were willing to back up our

demands with force. We can have peace if our enemies believe that we have the will to go to war, and that our enemies fear that they will lose that contest.

## Bill Clinton

Contrast George W. Bush's immediate response to terrorism with Democrat Bill Clinton. According to Byron York, we had *four* terrorist attacks during Clinton's presidency.

> So Clinton talked tough. But he did not *act* tough. Indeed, a review of his years in office shows that each time the president was confronted with a major terrorist attack — the February 26, 1993, bombing of the World Trade Center, the Khobar Towers attack, the August 7, 1998, bombing of U.S. embassies in Kenya and Tanzania, and the October 12, 2000, attack on the USS *Cole* — Clinton was preoccupied with his own political fortunes to an extent that precluded his giving serious and sustained attention to fighting terrorism.

How did Clinton respond to these four attacks? According to this interview with Richard Miniter, President Clinton was much less aggressive than Bush was, during his two terms. Bush's administration did not fear public opinion, but Clinton's administration did. Miniter lists *sixteen* of the Clinton administration's failures to treat terrorism as a serious threat. Below, I cite my favorites. *Read the whole list!*

> **Lopez:** In sum, how many times did Bill Clinton lose bin Laden?
>
> **Miniter:** Here's a rundown. The Clinton administration:
>
> […]4. Did not militarily react to the al Qaeda bombing in Riyadh, Saudi Arabia.
>
> […]7. Objected to Northern Alliance efforts to assassinate bin Laden in Afghanistan.
>
> 8. Decided against using special forces to take down bin Laden in Afghanistan.
>
> […]11. Clumsily tipped off Pakistani officials sympathetic to bin Laden before a planned missile strike against bin Laden on August 20, 1998. Bin Laden left the camp with only minutes to spare.
>
> 12-14. Three times, Clinton hesitated or deferred in ordering missile strikes against bin Laden in 1999 and 2000.
>
> 15. When they finally launched and armed the Predator spy drone plane, which captured amazing live video images of bin Laden, the Clinton administration no longer had military assets in place to strike the archterrorist.
>
> 16. Did not order a retaliatory strike on bin Laden for the murderous attack on the USS *Cole*.

When you look at the facts, we begin to understand *why* Democrats perform so poorly on national security issues.

## Peace Through Strength

Republicans, on the other hand, believe in peace through strength.

> In foreign policy, Reagan sought to achieve "peace through strength." During his two terms he increased defense spending 35 percent, but sought to improve relations with the Soviet Union. In dramatic meetings with Soviet leader Mikhail Gorbachev, he negotiated a treaty that would eliminate intermediate-range nuclear missiles. Reagan declared war against international terrorism, sending American bombers against Libya after evidence came out that Libya was involved in an attack on American soldiers in a West Berlin nightclub.

I've been reading a lot about the run up to World War 2 lately. And what I discovered was that leading figures in the governments of both the Germany and Japan (in their correspondence) believed that no one in the West would stop them for being aggressive. So, in the 1930s, both Germany and Japan took aggressive actions against their neighbors. For example, Germany and Japan both seized territory from their peaceful neighbors. We got into a

world war because we didn't deter these early aggressive actions. That's why we had to fight against a much stronger enemy in a world war – we gave them time to build up while we did nothing to prepare.

The differences between the two political parties could not be more clear. Weakness provokes war. Wars start when our enemies believe that they can strike us with impunity. Military strength, and the will to use it, deter aggression.

# How the discovery of the cosmic microwave background radiation falsified atheism

**Wintery Knight** · 12 September 2020 · Archived copy · Original

Christianity and the progress of science

Prior to certain scientific discoveries, most people thought that the universe had always been here, and no need to ask who or what may have caused it. But today, that's all changed. Today, the standard model of the origin of the universe is that all the matter and energy in the universe came into being in an event scientists call "The Big Bang". At the creation event, space and time themselves began to exist, and there is no material reality that preceded them.

So a couple of quotes to show that.

> An initial cosmological singularity… forms a past temporal extremity to the universe. We cannot continue physical reasoning, or even the concept of spacetime, through such an extremity… On this view the big bang represents the creation event; the creation not only of all the matter and energy in the universe, but also of spacetime itself.

Source: P. C. W. Davies, "Spacetime Singularities in Cosmology," in The Study of Time III, ed. J. T. Fraser (Berlin: Springer Verlag ).

And another quote:

> [A]lmost everyone now believes that the universe, and time itself, had a beginning at the big bang.

Source: Stephen Hawking and Roger Penrose, The Nature of Space and Time, The Isaac Newton Institute Series of Lectures (Princeton, N. J.: Princeton University Press, 1996), p. 20.

So, there are several scientific discoveries that led scientists to accept the creation event, and one of the most interesting and famous is the discovery of the cosmic microwave background radiation.

Here's the history of how that discovery happened, from the American Physical Society web site:

> Bell Labs radio astronomers Arno Penzias and Robert Wilson were using a large horn antenna in 1964 and 1965 to map signals from the Milky Way, when they serendipitously discovered the CMB. As written in the

> citation, “This unexpected discovery, offering strong evidence that the universe began with the Big Bang, ushered in experimental cosmology.” Penzias and Wilson shared the Nobel Prize in Physics in 1978 in honor of their findings.
>
> The CMB is “noise” leftover from the creation of the Universe. The microwave radiation is only 3 degrees above Absolute Zero or -270 degrees C,1 and is uniformly perceptible from all directions. Its presence demonstrates that that our universe began in an extremely hot and violent explosion, called the Big Bang, 13.7 billion years ago.
>
> In 1960, Bell Labs built a 20-foot horn-shaped antenna in Holmdel, NJ to be used with an early satellite system called Echo. The intention was to collect and amplify radio signals to send them across long distances, but within a few years, another satellite was launched and Echo became obsolete.2
>
> With the antenna no longer tied to commercial applications, it was now free for research. Penzias and Wilson jumped at the chance to use it to analyze radio signals from the spaces between galaxies.3 But when they began to employ it, they encountered a persistent “noise” of microwaves that came from every direction. If they were to conduct experiments with the antenna, they would have to find a way to remove the static.
>
> Penzias and Wilson tested everything they could think of to rule out the source of the radiation racket. They knew it wasn’t radiation from the Milky Way or extraterrestrial radio sources. They pointed the antenna towards New York City to rule out “urban interference”, and did analysis to dismiss possible military testing from their list.4
>
> Then they found droppings of pigeons nesting in the antenna. They cleaned out the mess and tried removing the birds and discouraging them from roosting, but they kept flying back. “To get rid of them, we finally found the most humane thing was to get a shot gun…and at very close range [we] just killed them instantly. It’s not something I’m happy about, but that seemed like the only way out of our dilemma,” said Penzias.5 “And so the pigeons left with a smaller bang, but the noise remained, coming from every direction.”6
>
> At the same time, the two astronomers learned that Princeton University physicist Robert Dicke had predicted that if the Big Bang had occurred, there would be low level radiation found throughout the universe. Dicke was about to design an experiment to test this hypothesis when he was contacted by Penzias. Upon hearing of Penzias’ and Wilson’s discovery, Dicke turned to his laboratory colleagues and said “well boys, we’ve been scooped.”7
>
> Although both groups published their results in Astrophysical Journal Letters, only Penzias and Wilson received the Nobel Prize for the discovery of the CMB.
>
> The horn antenna was designated a National Historic Landmark in 1990. Its significance in fostering a new appreciation for the field of cosmology and a better understanding of our origins can be summed up by the following: **“Scientists have labeled the discovery [of the CMB] the greatest scientific discovery of the 20th century.”**8

It’s the greatest scientific discovery of the 20th century.

In the New York Times, Arno Penzias commented on his discovery – the greatest discovery of the 20th century – so:

> The best data we have [concerning the Big Bang] are exactly what I would have predicted, had I nothing to go on but the five books of Moses, the Psalms, the bible as a whole.

Just one problem with the greatest scientific discovery of the 20th century: atheists don’t accept it. Why not?

Here’s a statement from the Secular Humanist Manifesto, which explains what atheists believe about the universe:

> Religious humanists regard the universe as self-existing and not created.

For a couple of examples of how atheistic scientists respond to the evidence for a cosmic beginning, you can check out this post, where we get responses from cosmologist Lawrence Krauss, and physical chemist Peter Atkins.

You cannot have the creation of the universe be true AND a self-existing, eternal universe ALSO be true. Someone has to be wrong. Either the science is wrong, or the atheist manifesto is wrong. I know where I stand.

# How the WMAP satellite confirmed nucleosynthesis predictions and falsified atheism

**Wintery Knight** · 13 September 2020 · Archived copy · Original

Christianity and the progress of science

Prior to certain scientific discoveries, most people thought that the universe had always been here, and no need to ask who or what may have caused it. But today, that's all changed. Today, the standard model of the origin of the universe is that all the matter and energy in the universe came into being in an event scientists call "The Big Bang". At the creation event, space and time themselves began to exist, and there is no material reality that preceded them.

So a couple of quotes to show that.

> An initial cosmological singularity… forms a past temporal extremity to the universe. We cannot continue physical reasoning, or even the concept of spacetime, through such an extremity… On this view the big bang represents the creation event; the creation not only of all the matter and energy in the universe, but also of spacetime itself.

Source: P. C. W. Davies, "Spacetime Singularities in Cosmology," in The Study of Time III, ed. J. T. Fraser (Berlin: Springer Verlag ).

And another quote:

> [A]lmost everyone now believes that the universe, and time itself, had a beginning at the big bang.

Source: Stephen Hawking and Roger Penrose, The Nature of Space and Time, The Isaac Newton Institute Series of Lectures (Princeton, N. J.: Princeton University Press, 1996), p. 20.

So, there are several scientific discoveries that led scientists to accept the creation event, and one of the most interesting and famous is the discovery of how elements heavier than hydrogen were formed.

Nucleosynthesis: forming heavier elements by fusion

Here's the history of how that discovery happened, from the National Aeronautics and Space Administration (NASA) web site:

> The term nucleosynthesis refers to the formation of heavier elements, atomic nuclei with many protons and neutrons, from the fusion of lighter elements. The Big Bang theory predicts that the early universe was a very hot place. One second after the Big Bang, the temperature of the universe was roughly 10 billion degrees and was filled with a sea of neutrons, protons, electrons, anti-electrons (positrons), photons and neutrinos. As the universe cooled, the neutrons either decayed into protons and electrons or combined with protons to make deuterium (an isotope of hydrogen). During the first three minutes of the universe, most of the deuterium combined to make helium. Trace amounts of lithium were also produced at this time. This process of light element formation in the early universe is called "Big Bang nucleosynthesis" (BBN).

The creation hypothesis predicts that there will be specific amounts of these light elements formed as the universe cools down. Do the predictions match with observations?

Yes they do:

> The predicted abundance of deuterium, helium and lithium depends on the density of ordinary matter in the early universe, as shown in the figure at left. These results indicate that the yield of helium is relatively insensitive to the abundance of ordinary matter, above a certain threshold. We generically expect about 24% of the ordinary matter in the universe to be helium produced in the Big Bang. This is in very good agreement with observations and is another major triumph for the Big Bang theory.

Moreover, WMAP satellite measurements of mass density agree with our observations of these light element abundances.

Here are the observations from the WMAP satellite:

Scientific observations match predictions

And here is how those WMAP measurements confirm the Big Bang creation event:

> However, the Big Bang model can be tested further. **Given a precise measurement of the abundance of ordinary matter, the predicted abundances of the other light elements becomes highly constrained. The WMAP satellite is able to directly measure the ordinary matter density and finds a value of 4.6% (±0.2%), indicated by the vertical red line in the graph. This leads to predicted abundances shown by the circles in the graph, which are in good agreement with observed abundances. This is an important and detailed test of nucleosynthesis and is further evidence in support of the Big Bang theory.**

"An important and detailed test".

For completeness, we should learn how elements heavier than these light elements are formed:

> Elements heavier than lithium are all synthesized in stars. During the late stages of stellar evolution, massive stars burn helium to carbon, oxygen, silicon, sulfur, and iron. Elements heavier than iron are produced in two ways: in the outer envelopes of super-giant stars and in the explosion of a supernovae. All carbon-based life on Earth is literally composed of stardust.

That's a wonderful thing to tell a young lady when you are on a date: "your body is made of stardust". In fact, as I have argued before, this star formation, which creates the elements necessary for intelligent life, can only be built if the fundamental constants and quantities in the universe are finely-tuned.

Now, you would think that atheists would be happy to find observations that confirm the origin of the universe out of nothing, but they are not. Actually, they are in denial.

Here's a statement from the Secular Humanist Manifesto, which explains what atheists believe about the universe:

> Religious humanists regard the universe as self-existing and not created.

For a couple of examples of how atheistic scientists respond to the evidence for a cosmic beginning, you can check out this post, where we get responses from cosmologist Lawrence Krauss, and physical chemist Peter Atkins.

You cannot have the creation of the universe be true AND a self-existing, eternal universe ALSO be true. Someone has to be wrong. Either the science is wrong, or the atheist manifesto is wrong. I know where I stand.

# Whose job is it to teach young, unmarried women not to delay marriage?

**Wintery Knight** · 14 September 2020 · Archived copy · Original

A group of feminists protesting people they disagree with

I found a very interesting post on a blog called Oz Conservative, which is run by an Australian traditional conservative. In the post, he looks at two women who wasted their 20s on fun and thrills. Both of them are childless and unmarried. And they are complaining that they should be married with children. How did it happen?

Excerpt:

> Rachael spent her youth going out with the bad boy type:
>
> > relationships have never been my strong point. Historically, I've picked good-looking villains and addictive personalities.
> >
> > I've had a ball and many passionate experiences, but nothing functional enough to constitute a long-term future and never anyone 'normal' enough to bring home to meet the parents.

> Although she puts a positive spin on being single, she admits:
>
> > I'm realistic. I've probably missed the boat as far as children are concerned, and that is a shame…
> >
> > […]Yes, the life I have today is not quite the one I envisaged 20 years ago as a young woman. I foresaw a satisfying career along with 2.4 children and a handsome husband.
>
> Then there is Bibi, now 44. She tells her story this way:
>
> > I am staring down the barrel of a lonely future without a man, let alone children.
> >
> > And how do I find myself in this perilous position? One reason is undoubtedly that men like young women. Yes, I was young once and all that. In my 20s and 30s I wasn't exactly a supermodel, but I was constantly surrounded by men. The trouble is I wasn't necessarily looking to settle down back then…
> >
> > Now that I am, there are very few available men out there and the ones there are would be more interested in my teenage nieces than in me…
>
> […]Bibi has a lot of friends in exactly the same boat:

> > In my close circle of friends, there are eight of us who are single and childless. This is a generational phenomenon – we are all aged between 37 and 45.
> >
> > When our mothers were that age, such numbers would be unimaginable.
>
> Like many women writing this kind of literature, when she looks back she recognises the negative influence of feminism on her generation of women:
>
> > I think the feminist teachings of the Sixties and Seventies seeped into our brains. My mum couldn't be called a feminist, but I, too, grew up thinking we could be anything we wanted to be and have a fulfilling career, life and relationship…
>
> […]What she is trying to say here is that feminism pushed marriage and motherhood down the list of priorities ("there was more to contend with beforehand"). She admits that she was led into the magical kind of thinking I described earlier in which there is nothing in reality to limit having things as you want them to be ("we didn't realise that men wouldn't be interested … my generation was spoilt – unrealistic, even").

The comments to the post are very interesting.

I was thinking about whose job it was to warn young Christian women about these bad choices, and I remembered a passage from the Bible.

Titus 2:3-5 explains:

> [3] Likewise, teach the older women to be reverent in the way they live, not to be slanderers or addicted to much wine, but to teach what is good.
>
> [4] Then they can urge the younger women to love their husbands and children,
>
> [5] to be self-controlled and pure, to be busy at home, to be kind, and to be subject to their husbands, so that no one will malign the word of God.

The problem is that many older Christian women made a lot of mistakes in their youth, especially with alcohol and premarital sex. And for most of them, it's more important that they not feel guilty about it, than that they warn younger women not to make the same mistakes. So, instead of admitting guilt and setting boundaries, they often tell young women that it doesn't matter what you do in your 20s because God, the cosmic butler, will make everything work out in the end.

We just had a situation where one woman who had a successful marriage tried to give younger women some very basic advice about how to be attractive to marriage-minded men. And what happened was that she was attacked by pretty much everyone. The reaction seemed to be strongest from Christian women, however, who insisted that God's grace meant that Christian women didn't have to care what the Bible taught about morality and wisdom. The important thing was that they follow their desires in the moment, because to exercise self-control would be "horrible" and would "send the wrong message". Telling a woman not to do what she feels like is worse than murder, because women must always do what feels good. Who cares about the words of the Bible, when a woman has feelings that are a direct line to God's mysterious will for her happiness?

One of the commenters on this blog put it this way:

> I've been observing this phenomenon among so-called "Christians" for well over a decade. Concepts like "tolerance" and not being "judgmental" took hold in our culture and many Christians absorbed the mindset completely. If you point out that what someone is doing is sinful or might potentially lead to sinful behavior, they act defensive or turn the tables on you and say "well, you're not perfect either!" Some even say that they

> do certain things for the express purpose of not being “legalistic,” because clearly, legalism is far worse than compromising one’s witness. Jesus has become a postmodern hippie whose primary message is “let’s all be cool to each other.” The only sins left are transgressions against the belief that everyone is equal and worthy of acceptance.
>
> In reading the responses to Lori Alexander’s article, my greatest takeaway is that people are rationalization machines. If they’ve made mistakes, they won’t humbly acknowledge them and use the wisdom of their experience to guide others in the right direction. Instead, they’ll try to find a way to argue that their mistakes weren’t mistakes at all, and that the real sinner is the person who’s judging them for what they did. It’s a deceitful, selfish game, and anyone who plays it is an enemy of the Gospel. Their argument essentially boils down to “every woman, regardless of whatever bad decisions she’s made in life, is entitled to a loving husband who’ll provide for her.” Same way everyone’s entitled to free health care, regardless of whether sufficient medical resources exist, I suppose. It doesn’t work that way, ladies.
>
> And they use this feminist scare word “shaming.” How dare you “shame” me? I would go so far as to say that shaming is a good thing, because it incentivizes proper behavior. Men have good reasons for wanting their wives to be virgins, and if you remove the stigma against premarital sex, a lot of women are going to take Biblical teaching on the subject less seriously. If Christian men as a whole agreed that they would only marry virgins, I guarantee you that a lot of women would think twice about what kind of men they associated with. If you feel “shamed,” it’s probably a sign that you haven’t truly repented of your sins. Sin separates us from God, and if you see your sins for what they are, you should have no problem condemning the sins that you yourself have committed and discouraging them in others.
>
> I’m sorry for this long-winded ramble, but it disgusts me how much politically correct rot has infested the churches, and this entire incident just confirms that Paul was correct to forbid women teaching. When everyone is afraid of upsetting women, we get false teachers popping up everywhere spreading a destructive message with nothing but rhetoric behind it. The end result? Fewer marriages, fewer children, fewer people taking Christian teachings seriously, and more people being miserable and lonely. Once you start ceding ground to liberalism, the whole thing eventually unravels. Lots of good Christian men and women can’t find a spouse anymore, because their society has lied to them and they don’t realize it until it’s too late. Did their churches stand against the world? Did their churches provide them the guidance they needed? Or were their churches too afraid to be seen as “out of touch,” and did they prioritize numbers over holiness and correct teaching? If we are sincere believers, it should be obvious which is more important.

Many of the women who chose to delay marriage for fun and thrills with the bad boys grew up in married Christian homes. Parents and pastors have, for one reason or another, decided that it is too unpleasant to warn young Christian women that their behavior may involve some costs in the long term. They don’t want to make them feel bad, and women’s feelings are so very much more important than what the Bible says, or even what peer-reviewed research on marriage best practices says. Even theologically conservative pastors just don’t have the courage to address the influence that feminism has had on the goal-setting and decision-making of young, unmarried women. It’s much easier to blame men when the woman’s fun and thrills plan doesn’t work out.

# Yale University computer science professor takes a look at protein formation probabilities

**Wintery Knight** · 14 September 2020 · Archived copy · Original

How did life begin?

When I was in graduate school, we studied a book called "Mirror Worlds", authored by famous computer science professor David Gelernter at Yale University. This week, I noticed that Dr. Gelernter had written an article in the prestigious Claremont Review of Books. In his article, he applies his knowledge of computer science to the problem of the origin of life.

Evolution, if it is going to work at all, has to explain the problem of how the basic building blocks of life – proteins – can emerge from non-living matter. It turns out that the problem of the origin of life is essentially a problem of information – of code. If the components of proteins are ordered properly, then the sequence folds up into a protein that has biological function. If the sequence is not good, then just like computer code, it won't run.

Here's Dr. Gelernter to explain:

> How to make proteins is our first question. Proteins are chains: linear sequences of atom-groups, each bonded to the next. A protein molecule is based on a chain of amino acids; 150 elements is a "modest-sized" chain; the average is 250. Each link is chosen, ordinarily, from one of 20 amino acids. A chain of amino acids is a polypeptide—"peptide" being the type of chemical bond that joins one amino acid to the next. But this chain is only the starting point: chemical forces among the links make parts of the chain twist themselves into helices; others straighten out, and then, sometimes, jackknife repeatedly, like a carpenter's rule, into flat sheets. Then the whole assemblage folds itself up like a complex sheet of origami paper. And the actual 3-D *shape* of the resulting molecule is (as I have said) important.
>
> Imagine a 150-element protein as a chain of 150 beads, each bead chosen from 20 varieties. But: only certain chains will work. Only certain bead combinations will form themselves into stable, useful, *well-shaped* proteins.

> So how hard *is* it to build a useful, well-shaped protein? Can you throw a bunch of amino acids together and assume that you will get something good? Or must you choose each element of the chain with painstaking care? It happens to be *very* hard to choose the right beads.

Gelernter decides to spot the Darwinist a random sequence of 150 elements. Now the task the Darwinist is to use random mutation to arrive at a sequence of 150 links that has biological function.

> [W]hat are the chances that a random 150-link sequence will create such a protein? Nonsense sequences are essentially random. Mutations are random. Make random changes to a random sequence and you get another random sequence. So, close your eyes, make 150 random choices from your 20 bead boxes and string up your beads in the order in which you chose them. What are the odds that you will come up with a useful new protein?
>
> […]The total count of *possible* 150-link chains, where each link is chosen separately from 20 amino acids, is $20^{150}$. In other words, *many*. $20^{150}$ roughly equals $10^{195}$, and there are only $10^{80}$ atoms in the universe.
>
> What proportion of these many polypeptides are useful proteins? Douglas Axe did a series of experiments to estimate how many 150-long chains are capable of stable folds—of reaching the final step in the protein-creation process (the folding) and of holding their shapes long enough to be useful. (Axe is a distinguished biologist with five-star breeding: he was a graduate student at Caltech, then joined the Centre for Protein Engineering at Cambridge. The biologists whose work Meyer discusses are mainly first-rate Establishment scientists.) He estimated that, of all 150-link amino acid sequences, 1 in $10^{74}$ will be capable of folding into a stable protein. To say that your chances are 1 in $10^{74}$ is no different, in practice, from saying that they are zero. It's not surprising that your chances of hitting a stable protein that performs some useful *function*, and might therefore play a part in evolution, are even smaller. Axe puts them at 1 in $10^{77}$.
>
> In other words: immense is so big, and tiny is so small, that neo-Darwinian evolution is—*so far*—a dead loss. Try to mutate your way from 150 links of gibberish to a working, useful protein and you are guaranteed to fail. Try it with ten mutations, a thousand, a million—you fail. The odds bury you. It can't be done.

Keep in mind that you need many, many proteins in order to have even a simple living cell. (And that's not even considering the problem of organizing the proteins into a system).

So, if you're a naturalist, then your only resources to explain the origin of life are chance and mutation. As Dr. Gelernter shows, naturalistic explanations won't work to solve even part of the problem. Not even with a long period of time.  Not even if you use the entire universe as one big primordial soup, and keep trying sequences for the history of the universe. It just isn't possible to arrive at sequences that have biological function in the time available, using the resources available. The only viable explanation is that there is a computer scientist who wrote the code without using trial and error. Something that ordinary software engineers like myself and Dr. Gelernter do all the time. We know what kind of cause is adequate to explain functioning code.

# What criteria do historians use to get to the minimal facts about the historical Jesus?

**Wintery Knight** · 15 September 2020 · Archived copy · Original

Policeman investigates crime scene for evidence

Have you ever heard Gary Habermas, Michael Licona or William Lane Craig defend the resurrection of Jesus in a debate by saying that the resurrection is the best explanation for the "minimal facts" about Jesus? The lists of minimal facts that they use are typically agreed to by their opponents during the debates. Minimal facts are the parts of the New Testament that meet a set of strict historical criteria. These are the facts that skeptical historians agree with, totally apart from any religious beliefs.

So what are the criteria that skeptical historians use to derive a list of minimal facts about Jesus?

Dr. Craig explains them in this article.

Excerpt:

> The other way, more influential in contemporary New Testament scholarship, is to establish specific facts about Jesus without assuming the general reliability of the Gospels. The key here are the so-called "Criteria of Authenticity" which enable us to establish specific sayings or events in Jesus' life as historical. Scholars involved in the quest of the historical Jesus have enunciated a number of these critieria for detecting historically authentic features of Jesus, such as dissimilarity to Christian teaching, multiple attestation, linguistic semitisms, traces of Palestinian milieu, retention of embarrassing material, coherence with other authentic material, and so forth.
>
> It is somewhat misleading to call these "criteria," for they aim at stating sufficient, not necessary, conditions of historicity. This is easy to see: suppose a saying is multiply attested and dissimilar but not embarrassing. If embarrassment were a necessary condition of authenticity, then the saying would have to be deemed inauthentic, which is wrong-headed, since its multiple attestation and dissimilarity are sufficient for authenticity. Of course, the criteria are defeasible, meaning that they are not infallible guides to authenticity. They might be better called "Indications of Authenticity" or "Signs of Credibility."
>
> In point of fact, what the criteria really amount to are statements about the effect of certain types of evidence upon the probability of various sayings or events in Jesus' life. For some saying or event S and evidence of a certain type E, the criteria would state that, all things being equal, the probability of S given E is greater than

> the probability of S on our background knowledge alone. So, for example, all else being equal, the probability of some event or saying is greater given its multiple attestation than it would have been without it.
>
> What are some of the factors that might serve the role of E in increasing the probability of some saying or event S? The following are some of the most important:
>
> (1) Historical congruence: S fits in with known historical facts concerning the context in which S is said to have occurred.
>
> (2) Independent, early attestation: S appears in multiple sources which are near to the time at which S is alleged to have occurred and which depend neither upon each other nor a common source.
>
> (3) Embarrassment: S is awkward or counter-productive for the persons who serve as the source of information for S.
>
> (4) Dissimilarity: S is unlike antecedent Jewish thought-forms and/or unlike subsequent Christian thought-forms.
>
> (5) Semitisms: traces in the narrative of Aramaic or Hebrew linguistic forms.
>
> (6) Coherence: S is consistent with already established facts about Jesus.
>
> For a good discussion of these factors see Robert Stein, "The 'Criteria' for Authenticity," in *Gospel Perspectives I*, ed. R. T. France and David Wenham (Sheffield, England: JSOT Press, 1980), pp. 225-63.
>
> Notice that these "criteria" do not presuppose the general reliability of the Gospels. Rather they focus on a particular saying or event and give evidence for thinking that specific element of Jesus' life to be historical, regardless of the general reliability of the document in which the particular saying or event is reported. These same "criteria" are thus applicable to reports of Jesus found in the apocryphal Gospels, or rabbinical writings, or even the Qur'an. Of course, if the Gospels can be shown to be generally reliable documents, so much the better! But the "criteria" do not depend on any such presupposition. They serve to help spot historical kernels even in the midst of historical chaff. Thus we need not concern ourselves with defending the Gospels' every claim attributed to Jesus in the gospels; the question will be whether we can establish enough about Jesus to make faith in him reasonable.

And you can see Dr. Craig using these criteria to defend minimal facts in his debates. For example, in his debate with Ehrman, he alludes to the criteria when making his case for the empty tomb.

Here, he uses multiple attestation and the criteria of embarrassment:

> Among the reasons which have led most scholars to this conclusion are the following:
>
> 1. The empty tomb is also multiply attested by independent, early sources.
>
> Mark's source didn't end with the burial, but with the story of the empty tomb, which is tied to the burial story verbally and grammatically. Moreover, Matthew and John have independent sources about the empty tomb; it's also mentioned in the sermons in the Acts of the Apostles (2.29; 13.36); and it's implied by Paul in his first letter to the Corinthian church (I Cor. 15.4). Thus, we have again multiple, early, independent attestation of the fact of the empty tomb.
>
> 2. The tomb was discovered empty by women.
>
> In patriarchal Jewish society the testimony of women was not highly regarded. In fact, the Jewish historian Josephus says that women weren't even permitted to serve as witnesses in a Jewish court of law. Now in light of this fact, how remarkable it is that it is women who are the discoverers of Jesus' empty tomb. Any later legendary account would certainly have made male disciples like Peter and John discover the empty tomb. The fact that it is women, rather than men, who are the discoverers of the empty tomb is best explained by the fact that they were the chief witnesses to the fact of the empty tomb, and the Gospel writers faithfully record what, for them, was an awkward and embarrassing fact.

There are actually a few more reasons for believing in the empty tomb that he doesn't go into in the debate, but you can find them in his written work. For example, in his essay on Gerd Ludemann's "vision" hypothesis. That essay covers the reasons for all four of his minimal facts.

So, if you are going to talk about the resurrection with a skeptic, you don't want to invoke the Bible as some sort of inerrant/inspired Holy Book. You want to look at it as a historical book, and use historical criteria to get to some facts that critical historians would accept. From that, it's possible to make a case for the resurrection, which is the guarantee that the words of Jesus are authoritative. Including the words of Jesus where he describes the Bible as a whole as God's revelation of Himself to his creatures.

Here is the approach I use when talking to non-Christian co-workers:

1. Explain the criteria that historians use to get their lists of minimal facts
2. Explain your list of minimal facts
3. Defend your list of minimal facts using the criteria
4. Cite skeptics who admit to each of your minimal facts, to show that they are widely accepted
5. List some parts of the Bible that don't pass the criteria (e.g. – guard at the tomb, Matthew earthquake)
6. Explain why those parts don't pass the criteria, and explain that they are not part of your case
7. Challenge your opponent to either deny some or all the facts, or propose a naturalistic alternative that explains the facts better than the resurrection
8. Don't let your opponent attack any of your minimal facts by attacking other parts of the Bible (e.g. – the number of angels being one or two, etc.)

And remember that there is no good case for the resurrection that does not make heavy use of the early creed in 1 Corinthians 15:3-8. That passages is universally accepted as early, eyewitness testimony from Paul, and represents the core of early Christian beliefs about the death and resurrection of Jesus. Everyone who takes evidence seriously has to account for that early creed, which passes the historical tests I outlined above.

The best essay on the minimal facts criteria that I've read is the one by Robert H. Stein in "Contending with Christianity's Critics". It's a good short essay that goes over all the historical criteria that are used to derive the short list of facts from which we infer the conclusion "God raised Jesus from the dead". That whole book is really very, very good.

# Baby elephant in China cries for 5 hours after being stomped by his mom

**Wintery Knight** · 16 September 2020 · Archived copy · Original

Baby elephant cries after being attacked by his own mother
From the New York Daily News. (Printable version linked)

Excerpt:

> Little Zhuangzhuang, a newborn elephant at a wildlife refuge in China, was inconsolable after his mother rejected him and then tried to stomp him to death.
>
> Tears streamed down his gray trunk for five hours as zookeepers struggled to comfort the baby elephant.
>
> They initially thought it was an accident when the mom stepped on him after giving birth, according to the Central European News agency.
>
> Employees removed him, cleaned him up and treated his injuries, then reunited the baby with his momma.
>
> But she was having none of it, and began stomping him again.
>
> So the game keepers stepped in once more and permanently separated the two.
>
> “We don’t know why the mother turned on her calf but we couldn’t take a chance,” an employee told CEN.
>
> “The calf was very upset and he was crying for five hours before he could be consoled,” he said.
>
> “He couldn’t bear to be parted from his mother and it was his mother who was trying to kill him.”
>
> The petite pachyderm, born in August, is now doing well. The zookeeper who rescued him from his violent mother adopted him and helped him thrive at the Shendiaoshan wild animal reserve in Rong-cheng, China.

I found another photo of the baby elephant here:

A baby elephant's birthday is supposed to be happy
So, in this post, I wanted to take about the duty that parents have to their children.

I guess a lot of my views on ethics are rooted in the obvious needs that children have. When I look at an unborn baby, I can tell what it needs. So, I am careful not to cause a pregnancy before I can supply its needs. The needs of the little unborn creature are driving these moral boundaries on me. And the same with born children. I oppose gay marriage because when I look at little children, I want them to have a stable environment to grow up in with a mother and father who are biologically related to them (in the best case). I permit lots of arrangements, but I promote one arrangement over the others because that's what's best for children. Anyone can look at unborn and born children and see that, just like anyone can look at a crying baby elephant and understand – "I have to govern my behavior so that I don't hurt you". If that means cutting off the premarital sex and making decisions that are likely to produce a stable marriage, then that's what we should do.

Children cry too, you know. They cry when we hurt them. They cry when we make bad decisions and when we don't provide them with what they need. Children need mothers and fathers who care about them. Making a safe environment for a child isn't an accident. It isn't random and unpredictable. We have to control our desires before we have children, so that we provide children with what they need. It would be nice if men and women were more thoughtful and unselfish about *children* and *marriage* before they started in with sex.

# Senate committee authorizes subpoenas for Obama officials involved in Trump campaign surveillance

**Wintery Knight** · 17 September 2020 · Archived copy · Original

Left to right: Comey, Lynch, Clinton, McCabe

Have you ever wondered which members of the Obama administration were involved in spying on the Trump campaign? Would you like to hear from former CIA Director John Brennan, former Director of National Intelligence James Clapper, former FBI Director James Comey? The Senate does. They've issued subpoenas for these people, and many more.

Fox News has the story:

> The Senate Homeland Security Committee on Wednesday voted to authorize subpoenas for former CIA Director John Brennan, former Director of National Intelligence James Clapper, former FBI Director James Comey, and other Obama administration officials as part of its broad review into the origins of the Russia investigation.
>
> […]The committee also authorized subpoenas for Sidney Blumenthal, former Obama chief of staff Denis McDonough, former FBI counsel Lisa Page, former FBI agent Joe Pientka, former ambassador to the United Nations Samantha Power, former FBI director of counterintelligence Bill Priestap, former White House national security adviser Susan Rice, former FBI agent Peter Strzok, former FBI lawyer Kevin Clinesmith – who pleaded guilty to making a false statement in the first criminal case arising from U.S. Attorney John Durham's review of the investigation into links between Russia and the 2016 Trump campaign – among others.
>
> The committee further authorized subpoenas for "the production of all records" related to the FBI's original Russia investigation and the Department of Justice Inspector General's probe, as well as the process of "unmasking" for James Baker, former FBI Deputy Director Andrew McCabe, DOJ official Bruce Ohr, FBI case agent Steven Somma, former U.S. Ambassador to Russia John Teftt, former deputy assistant attorney general Tashina Gauhar; and Stefan Halper.

Do you remember the details of the FBI-media collaboration on the Trump-Russia collusion story? I have a summary of it for you, below.

The Trump-Russia collusion story that was trumpted by the progressive media for the last two years was a joint effort between the Hillary Clinton campaign and high-ranking members of the FBI during the Obama administration.

The goal was to get the government to spy on the Trump campaign, in order neutralize his administration, if he won the 2016 election.

Here's the left-leaning The Hill, reporting on an important finding from October 2018:

> Congressional investigators have confirmed that a top FBI official met with Democratic Party lawyers to talk about allegations of Donald Trump-Russia collusion weeks before the 2016 election, and before the bureau secured a search warrant targeting Trump's campaign.
>
> Former FBI general counsel James Baker met during the 2016 season with at least one attorney from Perkins Coie, the Democratic National Committee's private law firm.
>
> That's the firm used by the DNC and Hillary Clinton's campaign to secretly pay research firm Fusion GPS and Christopher Steele, a former British intelligence operative, to compile a dossier of uncorroborated raw intelligence alleging Trump and Moscow were colluding to hijack the presidential election.

The article notes that Perkins Coie is the "Democratic National Committee's private law firm".

The Federalist reports that the Obama presidential election campaign also paid $972,000 to Perkins Coie in 2016 alone:

> Former president Barack Obama's official campaign organization has directed nearly a million dollars to the same law firm that funneled money to Fusion GPS, the firm behind the infamous Steele dossier. Since April of 2016, Obama For America (OFA) has paid over $972,000 to Perkins Coie, records filed with the Federal Election Commission (FEC) show.
>
> […]Federal records show that Hillary Clinton's official campaign organization, Hillary For America, paid just under $5.1 million to Perkins Coie in 2016. The DNC paid nearly $5.4 million to the law firm in 2016.
>
> […]The Washington Post reported last week that Perkins Coie, an international law firm, was directed by both the Democratic National Committee (DNC) and Hillary Clinton's campaign to retain Fusion GPS in April of 2016 to dig up dirt on then-candidate Donald Trump. Fusion GPS then hired Christopher Steele, a former British spy, to compile a dossier of allegations that Trump and his campaign actively colluded with the Russian government during the 2016 election. Though many of the claims in the dossier have been directly refuted, none of the dossier's allegations of collusion have been independently verified. Lawyers for Steele admitted in court filings last April that his work was not verified and was never meant to be made public.

In addition, Fox News reports that the FBI paid Christopher Steele ELEVEN TIMES in 2016. So this dossier was funded by Democrats from many different groups. They probably thought that no one would ever find out who was behind it.

But why would the FBI and the FISA court accept the Democrat-funded dossier as a basis to spy on the Democrat's main political rival? Answer: there were Democrats in the FBI who covered up the source of funding for the Steele dossier, as well as the anti-Trump bias of the dossier's author.

The Washington Examiner reported on the released text messages from highly-placed anti-Trump Democrat Lisa Page within the FBI in March 2019:

> The text messages, between then-Deputy Director of the FBI Andrew McCabe, who was later fired, and former FBI attorney Lisa Page — who was having an affair with FBI agent Peter Strzok — were obtained by Fox News.
>
> […]Then-Director of the FBI James Comey ultimately signed off on the application to the Foreign Intelligence Surveillance Court for approval to surveil Carter Page. It was dated nine days after the Page-McCabe texts: Oct. 21 2016.
>
> The specific funding of Steele's dossier was never mentioned to the FISA court, either during that first application or during three subsequent FISA renewals. Steele's anti-Trump fervor and determination to provide

> his dossier to the media and members of the U.S. government later became well known.

The reason why the mainstream media reported on a #FakeNews story for two years was because they wanted to sway voters away from Trump in the 2018 elections. And it worked.

# Facebook and Google removing content that harms Democrat party

**Wintery Knight** · 18 September 2020 · Archived copy · Original

Facebook, Google, Youtube, Twitter purging conservative speech

There were a few interesting stories about Big Technology companies censoring content critical of the Democrat party. The first one involves Facebook censoring two anti-Biden ads. The second one involves Google / Youtube censoring a video featuring a Stanford University medical doctor. The third one involves Twitter censoring a Chinese scientist. Let's take a look at the stories.

Here's the first story from Daily Wire:

> The ad launched on Aug. 4 before getting slapped with a "mostly false" rating by PolitiFact and subsequently blocked by Facebook the next month. The ad directly quotes Biden declaring, "If you elect me, your taxes are going to be raised, not cut," and warns that his plan will raise taxes "on all income groups."
>
> […]PolitiFact specifically cites a "Biden campaign official" as supposed evidence of the Democrat's intent (emphasis added):
>
> > The full exchange shows that Biden was saying his plan would raise taxes for people who, in his words, "benefited from" the GOP's Tax Cuts and Jobs Act of 2017. **A Biden campaign official said his point was that the wealthy — not all Americans — would not benefit from his plan.**
> >
> > The ad's portrayal of the exchange leaves a different impression.

And another ad predicted that allowing biological men to compete in women's sports would end women's sports. Politifact admits that they can't fact-check a prediction, but they censored the ad anyway:

> America First is not the only conservative organization censored by the platform. In another recent case, Facebook censored an ad by the conservative American Principles Project that stated that the Democrat-backed Equality Act allowing transgender athletes will "destroy girls sports" because the ad was "missing context and could mislead people." The censorship was imposed despite PolitiFact openly admitting in its review of the ad that the claim is "a prediction we can't fact-check."

Meanwhile, YouTube (which is owned by Google), censored a Hoover Institute discussion about COVID that featured an actually medical doctor from Stanford University.

The Federalist reports:

> YouTube, which is owned by Google, removed a video of an interview with [Dr. Scott] Atlas conducted in June originally posted by the Hoover Institution where he serves as a senior fellow. In it, Atlas, a prominent neuroradiologist and professor at Stanford University Medical Center as well as a commentator on public health issues, spoke of his belief that the pandemic lockdowns might have done more harm than good. Since then, his opinions have become of greater interest due to his appointment in August as a presidential advisor and a member of the White House coronavirus task force.
>
> That fact alone ought to make it vital that the public should be able to hear his opinions about the pandemic. YouTube, however, removed the interview from its video streaming service this past weekend for allegedly violating its terms of service.

I have seen my Google search engine traffic from Google drop 90% since Trump won the election in 2016. My current incoming search engine traffic from DuckDuckGo is half of my current Google traffic. And I'm not the only conservative site that's being censored. Google is in the pocket of the Democrat party.

Meanwhile, Twitter is censoring scientists who make the Chinese Communist Party look bad.

The New York Post reports:

> Twitter has suspended the account of a Chinese virologist who has claimed that COVID-19 was manufactured in a laboratory.
>
> Dr. Li-Meng Yan, a former researcher at the Hong Kong School of Public Health, went dark on the platform after she accused China of covering up evidence that the deadly virus came from a lab in Wuhan.
>
> "They don't want the people to know this truth. Also, that's why I got suspended, I got suppression [and] I am the target that China Communist Part wants to [sic] disappear," she told Fox News host Tucker Carlson on Tuesday.
>
> Carlson responded, "I'm giving you the benefit of the doubt so I'm going to assume you're not an anti-Chinese racist so it's not clear why Twitter would shut you down or why you're being ignored by the rest of the US media."
>
> Twitter declined to comment to The Post on Wednesday.

If I were in charge, I would just break up all of these big technology companies into tiny little pieces. They're too big, and they're dangerous to our liberties.

# Who will Trump nominate for SCOTUS, and can he get it done by election day?

**Wintery Knight** · 19 September 2020 · Archived copy · Original

It's going to be Ted Cruz, because that's who Republican voters want

So, there's a vacancy on the Supreme Court, and since we don't have a wuss in the Oval office, we're going to get a nominee and a vote on that nominee in the Senate. The process of nominating someone to the Supreme Court requires the president to nominate, and the Senate to advise and consent. The Republicans control both the White House and the Senate, and there is time to get it done.

The Federalist explains that short-time nominations have happened before:

> Three Supreme Court Justices, including Ruth Bader Ginsburg, who passed away on Friday due to complications of metastatic pancreatic cancer, were confirmed by the Senate within 45 days of their formal nomination date.
>
> According to Senate records, Justices Ginsburg, John Paul Stevens, and Sandra Day O'Connor were all confirmed in a short period of time. Stevens's confirmation in 1975 took 19 days, O'Connor's confirmation in 1981 took 33 days, and Ginsburg's confirmation in 1993 took 42 days.
>
> […]Senate Majority Leader Mitch McConnell announced Trump's nomination would receive a vote on the floor, adding the Senate will keep their promise to "support [Trump's] agenda "particularly his outstanding appointments to the federal judiciary."
>
> "President Trump's nominee will receive a vote on the floor of the United States Senate," he stated.

I love this news story, because if there is anything that can get the conservative base out, it's a conservative Supreme Court nominee. We care about judges, and now everyone is going to be reminded why we elected Trump in the first place. It's hard to get a perfect nominee through the Senate when we have a few moderate senators who won't support a social conservative. We need 50 votes for a real social conservative, and we don't have that. There

are at least 3 moderates: Lisa Murkowski, and Susan Collins, and Mitt Romney. Murkowski and Collins have already come out and said they don't want to vote on a judge until after the election. Still, we might be able to get someone right of center in there who would give us most of what we want, and get him or her through with a few votes from moderate Democrats.

Now watch this 2 minute video:

Here's a summary for those who can't watch:

> Trump brought up Cruz in the context of speaking about Cruz's last Senate victory. "I helped a lot too. I was with Ted all the way, and I think Ted appreciated it. Even said I'm putting Ted Cruz as one of the people for the Supreme Court," Trump said. He continued:
>
> You know why I did it, because I wanted to make sure I had somebody on the list of about 45 unbelievable people, the smartest, the best, the absolute crème de la crème, the best minds in the country, conservative, they believe in the Constitution. Little things like that. But I said I have to add somebody that we're going to make sure we could get approved. The only one I could think of was Ted, because He's going to get 50 Republican votes and 50 Democratic votes. They'll do anything to get him out of the Senate. But I joke when I say that to Ted, and I say that all the time, Ted's only one I know that will get 100 votes in the Senate.
>
> Trump added of Cruz: "He's a great guy; he's a brilliant guy."

I think it would be a smart move for Trump to drive turnout by having a fight over someone the base really wants – like Ted Cruz. Not only is Ted Cruz brilliant and conservative, but his replacement in the Senate would be picked by Greg Abbott, the conservative governor of Texas.

Ted Cruz is Hispanic, and that is a very useful thing to put in the news 45 days out from an election. It reminds Hispanic voters that Hispanics *can be* conservative, and fit into the Republican party. We need to counter the narrative that the Democrats spread about racism from the right. It's ironic, because people like Ted Cruz and Thomas Sowell are our best conservatives.

# The surprising pro-masculinity message in the “Far From the Madding Crowd” film

**Wintery Knight** · 20 September 2020 · Archived copy · Original

Man helping a woman with proper handgun marksmanship

So, I have about a half-dozen older and/or experienced Christian women who advise me and assist me in various ways. The wisest and most experienced is calm and thoughtful Dina. She has a very stressful job dealing with demanding women, and what she admires most in men is “masculinity”, which she defines as a man’s ability to tell a woman what is right and wrong, what God expects from her, what she should be doing with her life, and guiding her and providing for her through the steps to get there.

What makes Dina angry is when a man makes a fool of himself for youth and beauty, abdicating his role as moral and spiritual leader because of attraction / lust. According to Dina, men who have self-control think about what a woman should do that is morally right, with the goal of her producing a return for God. Men who are swayed by youth and beauty are willing to give up that leadership role in exchange for attention and/or sex.

So, with that said, Dina asked me to watch a recently-made movie called “Far From the Madding Crowd“, based on a novel by Thomas Hardy. I immediately said “no” because I know about Thomas Hardy from Tess of the D’Urbervilles, where he presents Tess as the helpless victim of Providence. I really hate that view of women, where they can do reckless, selfish things and then blame everyone but themselves for the destructive consequences of their own free-will decisions. But Dina said “wasn’t I right about the debate between David Robertson and Matt Dillahunty?” I said yes, and watched the movie. And of course, she was right, as she almost always is. This movie is a punch in the face to the radical feminism that seems to have infected so many young women, even in the church.

Here is a review of the movie by Rebekah, posted at her blog. Unfotunately, the post has been deleted, but here is an excerpt.

Rebekah writes:

> What does this 19th century tale offer to modern audiences? This latest rendering emphasizes something actually surprising and unexpected given that it is made in our age of radical feminism. It is Gabriel Oak’s character that shines the most, not the proto-feminist Bathsheba. […]In Bathsheba and Gabriel we see how men and women support one another in such a way as to ensure a flourishing in any role that fate might thrust on them.
>
> […]The relationship between Gabriel and Bathsheba, though unequal in earthly terms of authority and wealth,

> is one of mutual dependence. We see Oak taking on a role of both counselor and conscience with Bathsheba – roles that in her striving towards independence she struggles to admit her need for. She is not unlike the modern feminist in this regard, nor is she unlike all of us in our relationship with the Lord. Her struggle is best seen in the various times she repels Gabriel only to find herself in desperate situations in which only he can help. The filmmakers' clever use of a recurring theme of Bathsheba galloping after Gabriel on a horse when he is needed is particularly moving (and surprising) here. In the end, the film resists the urge to pander to our more extreme modern views on what women require to thrive.
>
> **Gabriel Oak also seems to be an embodiment of the biblical virtue of selflessness. We see in his actions towards Bathsheba the Philippians admonition to refrain from "being motivated by selfish ambition or vanity," but rather "in humility, be moved to treat one another as more important than yourself."** Indeed, vanity itself can be seen as a fateful character flaw of every major character apart from Gabriel. He alone is able to move past rejection and carry on. In fact, he is required to go so far as to be under the authority of the very woman who rejected his offer of marriage and, despite his continuing affections for her, witness her being courted and then married by another far less worthy man, Frank Troy. No other major character is able to accomplish this challenge to their pride. Though Bathsheba does eventually overcome the rejection of her husband, she only does so after tremendous tragedy and with the selfless and steady support of Gabriel.
>
> Gabriel respects her independence, but, like a good shepherd, stays close by to protect and guide her. Though he cannot protect her from her free-will choices, he does warn her. He then remains faithful to her in the midst of the trouble she brings upon herself. In this, he is not unlike our God, for he allows her to stray, all the while letting her know of a better course when asked. And, she does ask.
>
> In an important scene at a party, where Bathsheba must decide whether or not to marry a particularly obsessive suitor, when she asks, "Tell me what to do, Gabriel," he simply tells her to "Do what is right." Is that not like our Lord? Gentle shepherd, indeed, for our wild, independent hearts. In this, I see Gabriel as most suitable for the role as the husband written of in the epistle to the Ephesians. He loves Bathsheba "just as Christ loved the church and gave himself for her…"

Men and women both struggle with self-centeredness, but men usually work themselves out of it by studying hard things in school, and doing hard work that pays. Men have a natural desire to provide for others, and it is actually a duty laid out for them in the Bible. As a result of studying and working at things they don't like, men typically are better at resisting their feelings and desires. In fact, if you ever want to make a woman less self-centered and emotional, leading her to study STEM and work a demanding job is a good plan. Dina has multiple STEM degrees, and a very difficult, challenging work history.

I would be suspicious of men who don't prioritize providing, (as in 1 Tim 5:8), because working and saving gives a man practical experience at self-denial. When a man gets accustomed to working to share with others, it helps helps him to lead a woman to do the same: deny her feelings and desires, and make prudent decisions that will allow her to love and serve others – including God – in a sustainable way. Over the long-term, this practice of effective, self-sacrificial love will be worth more to the woman than the short-term pursuit of fun and thrills. To provide for a woman means to look into her future, and make a decision today to set aside something that will help her to deal with what the future has in store for her.

**Dina's advice to young women**

I asked Dina to take a look at the draft of this post before I hit "Schedule" and Dina said:

> What I would advise to all young women is not to expect a Gabriel Oak to be waiting for you at the end of your reckless years of hooking up, partying and wasting your youth on fun and men who have no desire to lead you to God or guide you to goodness. Don't expect the hot stud that your friends approve of to turn into someone with the character of Oak with the magic powers of your premarital sex life. **Find a man who doesn't give in**

> **to your every whim, because if he does, you will only resent him for it, and blame him, for being what you thought you wanted him to be.** Find a man who leads, one who demonstrates self control, self denial, who can provide and protect. And most importantly, respect him for doing it.

Emphasis mine.

Sound advice from the Dina, young ladies. By the way, Dina's favorite drama is the BBC production of "North and South" from 2004. I also give it a 10/10.

# Wayne Grudem explains what the Bible says about capital punishment

**Wintery Knight** · 20 September 2020 · Archived copy · Original

Bible study that hits the spot

Reformed Baptist theologian Wayne Grudem speaks on the Bible and capital punishment.

About Wayne Grudem:

> Grudem holds a BA from Harvard University, a Master of Divinity from Westminster Theological Seminary, and a PhD from the University of Cambridge. In 2001, Grudem became Research Professor of Bible and Theology at Phoenix Seminary. Prior to that, he had taught for 20 years at Trinity Evangelical Divinity School, where he was chairman of the department of Biblical and Systematic Theology.
>
> Grudem served on the committee overseeing the English Standard Version translation of the Bible, and in 1999 he was the president of the Evangelical Theological Society. He is a co-founder and past president of the Council on Biblical Manhood and Womanhood. He is the author of, among other books, Systematic Theology: An Introduction to Biblical Doctrine, which advocates a Calvinistic soteriology, the verbal plenary inspiration and inerrancy of the Bible, the body-soul dichotomy in the nature of man, and the complementarian (rather than egalitarian) view of gender equality.

The MP3 file is here.

The PDF outline is here.

Topics:

- what kinds of crimes might require CP?
- what did God say to Noah about CP?
- what does it mean that man is made in the image of God?
- is CP just about taking revenge?
- what does CP say about the value of human life?

- does CP apply to animals, too?
- could the statements supporting CP be understood as symbolic?
- one purpose of CP is to protecting the public
- another purpose of CP is to deter further wrongdoing
- but the Biblical purpose of CP is to achieve justice by retribution
- does the Pope make a good argument against CP?
- what is the role of civil government in achieving retribution?
- do people in Heaven who are sinless desire God to judge sinners?
- should crimes involving property alone be subject to CP?
- is the Mosaic law relevant for deciding which crimes are capital today?
- should violent crimes where no one dies be subject to CP?
- is CP widespread in the world? why or why not?
- what are some objections to CP from the Bible?
- how do you respond to those objections to CP?
- should civil government also turn the other cheek for all crimes?
- what is the “whole life ethic” and is it Biblical?
- what do academic studies show about the deterrence effect of CP?
- how often have innocent people been executed in the USA?
- should there be a higher burden of proof for CP convictions?

The Bible is awesome because it gives us knowledge about God’s character. How are we supposed to act in a way that is pleasing to God if we don’t know what he thinks of the issues of the day? We won’t know how we are supposed to act unless we know who God is first. And that’s why when we read the Bible we should be looking to find out the truth about who God is.

# Federal government sues pro-LGBT Kroger for persecuting Christian employees

**Wintery Knight** · 21 September 2020 · Archived copy · Original

Kroger promotes LGBT tyranny over religious liberty

I thought this story about how the federal government is suing Kroger, a far-left grocery store chain, was interesting. You would never see a story like this happening in a Democrat administration. But in a Republican administration, religious liberty is still more important than the feelings of "being offended" of people on the left. Let's see the story, then I'll tell a personal story about this topic.

Here's Christian Post reporting:

> A major supermarket chain is facing a lawsuit after firing two employees over their refusal to wear a rainbow emblem that violates their religious beliefs as part of their work uniform.
>
> The Equal Employment Opportunity Commission filed a lawsuit against the Kroger Company Monday in response to action taken by Kroger Store No. 625 in Conway, Arkansas, against two employees. The employees were terminated after they refused to abide by the new dress code, which required them to wear an apron depicting a rainbow-colored heart emblem.
>
> The women contended that wearing the apron would amount to an endorsement of the LGBTQ movement, which contradicts their religious beliefs. According to the EEOC, "one woman offered to wear the apron with the emblem covered and the other offered to wear a different apron without the emblem, but the company made no attempt to accommodate their requests."
>
> The EEOC alleged that when the women continued to refuse to wear the apron with the emblem visible, "Kroger retaliated against them by disciplining and ultimately discharging them."
>
> Kroger's actions violated Title VII of the 1964 Civil Rights Act, argued the EEOC, which is working to secure "monetary relief in the form of back pay and compensatory damages" for the two women "as well as an injunction against future discrimination."

More details about the two brave Christian women:

> According to the Arkansas Democrat-Gazette, one of the women, Brenda Lawson, worked in the deli department at the store from 2011 until her termination on June 1, 2019. The other woman, Trudy Rickerd, worked as a cashier and file maintenance clerk from 2006 until her termination on May 29, 2019.
>
> The complaint cited a letter written by Rickerd explaining her objection to wearing the apron. "I have a

> sincerely held religious belief that I cannot wear a symbol that promotes or endorses something that is in violation of my religious faith … I am happy to buy another apron to ensure there is no financial hardship on Kroger," she said.

In case you didn't know, Kroger has a reputation for putting LGBT rights above free speech and religious liberty:

> Kroger has launched a 2020 Pride campaign company-wide, which includes its 3514 grocery stores across 42 states. The chain is the second-largest retailer after Walmart.
>
> "At The Kroger Co., we embrace diversity and inclusion as core values, and we ingrain these in everything we do," according to the company website. The site also notes that Kroger recently received a perfect score on the Human Rights Campaign's 2020 Corporate Equality Index in recognition of its commitment to LGBTQ-plus inclusion and equality.
>
> Kroger also says:
>
> "We're one of the few retailers willing to openly advocate for and make real change toward LGBTQ-plus diversity and inclusion, and we're proud to offer:
> —Same-sex partner benefits and transgender-inclusive healthcare.
>
> —An Associate Resource Group that provides an uplifting community for LGBTQ-plus associates and allies.
>
> —Strong alliances with LGBTQ-plus suppliers through our partnership with the National Gay and Lesbian Chamber of Commerce.
>
> The suit was filed in the U.S. District Court for the Eastern District of Arkansas, Central Division, and seeks monetary relief in the form of back pay and compensatory damages, as well as an injunction against future discrimination.

The article continues by describing some of the programs that Kroger champions that would make any Bible-believing Christian uncomfortable. But Christians don't matter to Kroger.

Anyway, I wanted to tell a story about this. I spent about 10 years of my IT career in a large IT company. I was regularly pressured by non-Christians to accept and celebrate LGBT values. Pro-LGBT propaganda was hung all over the building. Diversity and inclusion concerns were made part of the performance evaluation process. And so on.

After the Florida gay nightclub bombing, I remember my manager bringing me a rainbow colored ribbon and telling me to put it on. I told her that I would take it and wear it later. But these ribbons were being dispensed company-wide as a formal effort to promote LGBT values. I have no doubt that my refusal to wear the ribbon was noted and may have affected my performance review and promotion decision.

# Which political party stands up to evil at home and abroad?

**Wintery Knight** · 22 September 2020 · Archived copy · Original

Let him who desires peace prepare for war

Lately, I'm being asked to make a positive case for why anyone should vote Republican. Many Christians think that they can take the easy way out and just prove that Republicans do better than Democrats on social issues like marriage and abortion. But that's lazy. A better strategy is to take a kitchen sink approach by arguing that Republicans are also better on fiscal policy and foreign policy.

Today, let's look at three stories that clearly show that Republicans correctly identify evil and take effective steps to deter it – at home and abroad.

Let's start with an international story, where Trump is confronting the autocratic Iranian regime, which is seeking nuclear weapons to menace peaceful countries in the region.

The Washington Free Beacon reports:

> The Trump administration on Monday announced an unprecedented set of new sanctions on Iran's nuclear and ballistic missile sectors.
>
> Secretary of State Mike Pompeo was joined at the State Department by top Trump administration officials as they announced the new measures, which target Iran's proliferation of nuclear materials used to feed its atomic weapons program. The sanctions also seek to restrain Iran's contested ballistic missile program, which has progressed in tandem with its nuclear program as the country seeks to construct a weapon capable of carrying a nuclear warhead.
>
> The most far-reaching sanctions will target Iran's Ministry of Defense and Armed Forces Logistics agency, as well as its leaders, for exporting arms to Venezuelan dictator Nicolas Maduro, who also was targeted by the new sanctions. The measures are aimed at stopping Iran from exporting arms across the globe, including to regional hotspots such as Yemen, Syria, Lebanon, and Iraq.
>
> The new sanctions are being issued under a fresh executive order announced Monday by the White House enabling the United States to sanction Iranian government actors and those globally who have been identified as aiding Iran's nuclear and missile programs. The move comes a month after the United States invoked a procedural mechanism at the United Nations that ordered the "snapback" of all global sanctions on Iran. Snapback took effect on Saturday. The unprecedented move was met with anger by European powers and Tehran's allies, raising questions about whether the world will uphold the sanctions. Pompeo and senior Trump administration officials warned that they will not hesitate to sanction any country caught working with Iran.

> "Now that virtually all U.N. sanctions have been reimposed on Iran, stakeholders worldwide are warned that the United States will aggressively use U.S. sanctions authorities to impose consequences for failures to comply with the snapped-back U.N. measures on Iran and ensure that Iran does not reap the benefits of U.N.-prohibited activity," the State Department said in announcing the new action.

Let's move down to the federal level, with a story from The Federalist:

> The Department of Justice labeled New York City, Portland, and Seattle as cities "permitting violence and destruction of property," in a statement Monday.
>
> Attorney General William Barr said state and local leaders in these cities are endangering citizens, including peaceful protestors.
>
> "We cannot allow federal tax dollars to be wasted when the safety of the citizenry hangs in the balance. It is my hope that the cities identified by the Department of Justice today will reverse course and become serious about performing the basic function of government and start protecting their own citizens," he said.
>
> Citing various failures by each city such as rising gun violence, police budget cuts, lack of prosecution for those arrested and charged with "protest-related charges," lack of protection against property destruction and vandalism, rejection of federal law enforcement, and allowing anarchists to take over certain geographical areas such as CHOP, the DOJ noted that these cities all failed to handle the rapidly increasing violence that occurred in their areas in response to the death of George Floyd in May.

The article notes that this action follows on an order from Trump to not waste federal tax dollars on cities that neglect to protect their citizens from criminals.

Meanwhile, at the state level, there was this story from Florida, repported by Daily Wire:

> Florida Governor Ron DeSantis announced new legislation Monday that would create additional felonies to punish protesters who turn violent and would create severe penalties for cities that elect to defund or disband their police departments.
>
> Local Miami news reports that "violent protesters and looters would face new felonies" under the legislation, particularly if they damage property as part of their demonstrations, engage in "disorderly" conduct," or assault a law enforcement officer.
>
> If caught and convicted, violent protesters could lose their access to state-based welfare programs, DeSantis said.
>
> DeSantis says, though, that the new legislation is designed to prevent the type of violence, anarchy, and destruction Americans have witnessed in places like Portland, Oregon, where unrest has raged unabated for more than 100 days. The legislation also covers activities like harassing people dining at restaurants and tearing down monuments.
>
> […]To reinforce the idea that the new laws were designed to provide law enforcement with more tools to control destructive demonstrations, the package includes proposed penalities for municipalities who elect to "defund the police" or disband their local police departments.
>
> "The proposed package would also strip municipalities of state money if they defund law enforcement," local Miami news reported.

I think it's important for people to understand that good and evil do exist. We can't fix everything in the world, but we can certainly deter future aggressive acts by standing up to terrorists and criminals at home and abroad. If you agree, then you vote Republican.

# How can the four gospels be independent sources?

**Wintery Knight** · 23 September 2020 · Archived copy · Original

Investigation in progress

Previously, I blogged about the historical criteria that historians use to evaluate documents. One of the criteria is "multiple independent sources". If a story is reported in multiple independent sources, then historians are more likely to evaluate it as historically accurate. But how about the four gospels? Are they independent sources? The answer might not be what you expect.

Here's how the question was put to Dr. Craig:

> The latest video, "Did Jesus Rise From the Dead," is especially compelling, but I had a question about it. In the part one video, you cite as evidence, the Gospels plus Acts and First Corinthians and you refer to them as "independent" and "unconnected" sources. But this isn't exactly true, is it? After all, two of these books were written by the same author, Luke, and so Luke and Acts are connected by authorship. Furthermore, isn't it true that much information relayed in Matthew and Luke were taken from Mark? This two facts would make it untrue to call the Gospels "independent" and "unconnected" would they not?

Here's the video he's talking about:

Dr. Craig answers the question in a recent question of the week. I think this answer is important for those who aren't aware of how the gospels are organized.

He writes:

> The objection is based on a simple misunderstanding. It assumes that the sources I'm referring to are the books of the New Testament. But that's not what I'm talking about.
>
> New Testament critics have identified a number of sources behind the New Testament, sources on which the New Testament authors drew. For example, Matthew and Luke drew not only upon Mark as a source but also upon a source which scholars designate "Q," which appears to have been a source containing Jesus' sayings or teachings. Thus, if you could show that a saying in Matthew or Luke appears in both Mark and Q, that would count as multiple, independent attestation.

What does this mean? It means that although there is overlap between Matthew and Luke, called "Q", there are

actually three independent sources there: Matthew's source, called M. Luke's source, called L. And the material common to Matthew and Luke, which therefore PRE-DATES Matthew and Luke, called Q.

Dr. Craig lists out several independent sources in his full reply:

1. the pre-Markan Passion story used by Mark
2. the rest of the gospel of Mark has a source
3. Matthew's source (M)
4. Luke's source (L)
5. John's gospel which is very different from Mark, Luke and Matthew
6. the sermons in Acts have a source
7. the early creed found in Paul's 1 Corinthians 15

So if you are trying to lay out something from the New Testament, and you can find it in two of these sources, and at least one of them is very early, you're in pretty good shape.

Although the questioner and the other critics might question the "minimal facts" that pass the historical tests, many of these facts are not questioned by even atheistic scholars.

Here's a useful tip for non-professionals who want to disagree with Dr. Craig. Dr. Craig publishes his arguments in academic presses like Oxford University Press, not to mention scholarly peer-reviewed journals. He's also debated his ideas against famous atheist historians like Gerd Ludemann, Marcus Borg, James Crossley, Bart Ehrman, etc. So it's probably a good idea for people who want to disagree with him to first read some academic literature, or at least ask a professional. Before you post your YouTube video. You could even just ask a professional atheist historian. They will tell you what's wrong with an argument like your "the sources are not independent" argument. Just check yourself before you post something in public. A lot of people who are still puzzling out these questions will look at a mistake like this, and immediately dismiss atheism as a sloppy, anti-intellectual worldview.

You can watch more of Dr. Craig's videos in his playlist, here. These are especially useful for people who want to get the overall scope of the battlefield before deciding where to focus in study. Everybody should know about all of these arguments regardless of where you choose to specialize.

# Hunter Biden: sex-trafficked prostitutes, Ukraine bribes, Russia payments, China deals

**Wintery Knight** · 24 September 2020 · Archived copy · Original

Did Joe Biden collect foreign cash through his son Hunter Biden?

I've been asking some of my Democrat friends about why they would vote for Joe Biden. And their answer is that he has excellent moral character. So, imagine my surprise when I read about this new report on Joe Biden's son Hunter. Have you ever heard the expression "the apple doesn't fall far from the tree"? Well, we're about to find out something about the tree from a rotten apple.

The Federalist had 3 posts about the report.

Here's the post about sex-trafficking:

> An earthshattering report released by Senate investigators Wednesday outlining the Biden family's long list of conflicts of interest at the upper echelons of government unearthed new allegations of former Vice President Joe Biden's son making multiple payments to Eastern European prostitutes.
>
> According to the joint report out by the Senate Homeland Security and Government Affairs Committee with the Senate Treasury Committee, Hunter Biden made a number of payments to foreign nationals with "questionable backgrounds" consistent with "organized prostitution and/or human trafficking."
>
> Records on file with the committee, the report says, "confirm that Hunter Biden sent thousands of dollars to individuals who have either: 1) been involved in transactions consistent with possible human trafficking; 2) an association with the adult entertainment industry; or 3) potential association with prostitution."
>
> The report continued, detailing that some transactions were Russian- and Ukrainian-linked to what "appears to be an Eastern European prostitution or human trafficking ring."

This is not hard to believe, given what we know about Hunter Biden's sexual misbehavior:

> In November last year, Page Six reported that an Arkansas woman who successfully sued the former vice president's son for monthly child support was a stripper at a club Hunter Biden frequented. Hunter Biden, according to the paper, was a regular guest at the Mpire Club in Washington D.C.'s Dupont Circle, where Lunden Alexis Roberts, the mother of Biden's baby, went by the name "Dallas" on stage.

Here's the post about China:

> According to the joint report from the Senate Homeland Security and Governmental Affairs Committee with the Senate Treasury Committee, Hunter Biden, along with business partner Devon Archer, "engaged in numerous financial transactions with Chinese nationals who had deep connections to the Communist Chinese government."
>
> These connections, investigators wrote, include Ye Jianming, the founder of CEFC China Energy Co. Ltd (CEFC), and his associate, Gongwen Dong, who reportedly carried out transactions for Jianming's companies. Ye, the report noted, who formerly held positions with the People's Liberation Army, also possessed financial connections to former Vice President Joe Biden's brother, James Biden.
>
> For years, according to the Senate report, Hunter Biden leveraged his vast network of connections to ultimately create the investment firm Bohai Harvest RST (Shanghai) Equity Investment Fund Management Co. (BHR), which prioritized investing Chinese capital in overseas projects. The financial group received its approval for a Chinese business license after a series of meetings arranged by Hunter Biden on a government 2013 government trip to China with his vice president father, both flying aboard Air Force Two.
>
> The firm, according to the Wall Street Journal, "is controlled and funded primarily by large Chinese government-owned shareholders" and channeled at least $2.5 billion into automotive, energy, mining, and technology deals on behalf of these investors.
>
> "BHR's extensive connections to Chinese government intertwined its existence with the decision-making of Communist party leaders," wrote investigators in the Senate report, highlighting the presence of a consortium that includes the China Development Bank tied to Ye, which controls 30 percent of BHR as an example. Once Ye fell from Chinese President Xi Jinping's good graces, the Chinese bank pulled lines of credit from Ye's CEFC.

Here's the post about Ukraine:

> Among the key findings in the report are substantial allegations that Mykola Zlochevsky, the owner of the Ukrainian energy company Burisma, from which Hunter Biden raked in upwards of $50,000 a month for serving the board, paid a $7 million bribe to the Ukrainian prosecutor general's office to close an investigation seven months following Hunter Biden's addition to its leadership.

I thought this was interesting – how did the Democrat lawmakers respond to the Senate investigation:

> The Senate's report marks the first phase of revelations to emerge from the probe launched in 2017, long before Joe Biden jumped into the crowded presidential race in the spring of 2019.
>
> In a desperate bid to shut down the investigation out of concern that its findings could harm their attempt at the White House in November, Democrats, true to form, repeatedly attacked the ongoing probe as an instrument of Russian interference in the upcoming U.S. election, accusing Republican senators of being Kremlin agents.

Finally, a post on Daily Wire had another interesting detail:

> Hunter Biden received a $3.5 million wire transfer from Elena Baturina, the wife of the former mayor of Moscow.

I think this is real Russia collusion, with real evidence from the Senate this time.

The report was entirely ignored by the mainstream media when it was released Wednesday. So I hope you aren't relying on them for news. A lot of people are going to be very surprised when Donald Trump brings up this material during the debates – assuming that Joe Biden even shows up.

# Judge: man must pay support to girlfriend despite living in separate homes

**Wintery Knight** · 25 September 2020 · Archived copy · Original

A friend of mine was asking me last night whether I had any regrets about never marrying, especially since I had such awesome Christian female friends like her. I thought about it, and I thought that maybe it is better to not have married, especially when I read stories about how family courts trample over the rights of men to favor women, regardless of what the law says.

The story is from one of Canada's national newspapers, the National Post:

> A wealthy businessman will have to pay more than $50,000 a month in spousal support for 10 years to a woman with whom he had a long-term romantic relationship even though they kept separate homes and had no children together, Ontario's top court has ruled.
>
> Under Ontario law, an unmarried couple are considered common-law spouses if they have cohabited — lived together in a conjugal relationship — continuously for at least three years. But that doesn't necessarily mean living in the same home, the court found.
>
> […]When their 14-year relationship finally broke down in May 2015, Climans asked the courts to recognize her as Latner's spouse and order him to pay her support. He argued she had been a travel companion and girlfriend, nothing more. As such, he said, they were never legally spouses and he owed no support. An eight-day trial ensued.
>
> In her decision in February 2019, Superior Court Justice Sharon Shore sided with Climans. She ruled they were in fact long-time spouses, finding that despite their separate home, they lived under one roof at Latner's cottage for part of the summer, and during winter vacations in Florida. Shore ordered him to pay her $53,077 monthly indefinitely.

*The judge ordered him to pay her $53,077 per moth, indefinitely.* Elsewhere in the article, we learn that he had asked her to sign a pre-nuptial agreement many times, and each time she refused. (Those are not even enforced fairly by the way) She wanted his money, and the judge made sure she got it. Because the law doesn't matter in a family court.

So, what I wanted to point out about this is the fact that a female judge decided to bend the law in order to favor a

woman. And this sort of thing happens A LOT in Canada – where their female judges are notorious for progressive judicial activism, e.g. Beverley Mclachlin, Bertha Wilson, Claire L'Heureux-Dubé, etc. Ontario family courts are notoriously anti-male, and men know this.

But it's not just Ontario. I have two Christian friends who married their Christian wives as virgins, and then their wives divorced them. I heard what happened to them in divorce court. Again, female lawyers and female judges disregarded the law in order to punish the man and favor the woman. And I think most men growing up today have a father or a brother or an uncle or someone who has been a victim of this.

When I talk to women about this, they all say things like this to me: "oh, you worry too much" or "you read too many books about divorce" or especially "when you meet the right girl, you'll fall in love, and all this concern about atheistic feminist judges in the courts won't stop you". That last one is the most popular. And it's always made me think that if this is how women see commitment – feelings-based – it's no wonder that women initiate 70% of divorces.

I always thought it was a curse that I grew up poor and could not afford to show off my wealth in order to attract attention from women. Now I see that God actually gave me a great blessing. In order for a man to get married, it takes a lot more than finding the right girl. He needs to live in the right culture – a culture that tries to equip women to be content in committed relationships and treat men fairly.

I don't think even women who claim to be pro-male and/or pro-marriage know or care how stories like this affect men. I'm very wealthy. I certainly do look at what is likely to happen if a woman goes to the courts expecting me to give her money. In fact, whenever I post stories on my wall about how the judges legislate from the bench to transfer money from men to women, there's just silence or sometimes deflection by attacking men (except for my friend Dina who agrees with me). No one dares to speak up for men, it's just expected that we be robbed by the government in order to make women happy. Because "marriage is for women".

And as long as the message keeps being sent by judicial activists in the family courts, men will keep adjusting how they treat women. Women appear very unsafe to us, and nothing that's going on in the courts is changing the trend towards avoidance. Men are very good at calculating risks vs rewards.

# Dr. Walter Bradley lectures on scientific evidence for the creation and design of the universe

**Wintery Knight** · 26 September 2020 · Archived copy · Original

Dr. Walter L. Bradley

This lecture is special to me, because I bought a VHS tape of it from Access Research Network just after I started working full-time, and watched it a million times. A lot of people come to their convictions about God's existence because of parents or church or intuitions, but for me it's all about the scientific evidence. This lecture changed my life. I wish more people taught their children about this evidence! This lecture was delivered at the University of California, Santa Barbara.

About the speaker:

> Dr. Bradley received his B.S. in Engineering Science and his Ph.D. in Materials Science from the University of Texas in Austin.
>
> Dr. Bradley taught for eight years at the Colorado School of Mines before assuming a position as Professor of Mechanical Engineering at Texas A&M University (TAMU) in 1976.
>
> During his 24 years at Texas A&M, Dr. Bradley served as Head of the Department of Mechanical Engineering at Texas A&M University and as Director of the Polymer Technology Center, and received five College of Engineering Research Awards. He has received over $4,500,000 in research grants and has published over 140 technical articles and book chapters. He has also co-authored "The Mystery Of Life's Origin: Reassessing Current Theories. He is a Fellow of the American Society for Materials and of the American Scientific Affiliation and serves as a consultant for many Fortune 500 companies.
>
> He currently serves as Distinguished Professor of Engineering at Baylor University.

The lecture: (63 minutes lecture, 25 minutes audience Q&A)

Summary slide:

This slide summarizes the content of the lecture
Introduction:

- At the beginning of the 20th century, people believed that the progress of science was pointing away from an intelligent Creator and Designer, and towards naturalism
- A stream of new discoveries has shifted the support of science towards theism, and away from naturalism
- Richard Dawkins, an atheist, says that nature only has the appearance of design, but that if you look closer, naturalistic mechanisms can account for the appearance of design
- When deciding between design and apparent design ("designoid"), it matters whether you think there is an intelligence there to do the designing

Evidence #1: The Big Bang:

- an eternal "steady state" universe is more compatible with naturalism, but a created universe is more compatible with a Creator
- In 1929, Hubble used telescopes to observe that the light from distant galaxies was *redshifted.* The further away galaxies were, the faster they were moving away. Therefore, space is expanding in all directions, suggesting an explosive origin of the universe
- In 1965, the discovery of the cosmic microwave background radiation matched a prediction of the Big Bang cosmology, and of the creation event
- In 1992, the COBE space telescope allowed us to test four specific predictions of the Big Bang model, especially the predictions for light element abundances (hydrogen and helium), which matched the predictions of the creation model

Evidence #2: Simple mathematical structure of the physical laws

- the simple mathematical structure of natural laws allows us to understand these laws, make discoveries, and engineer solutions to problems
- early scientists saw the mathematical structure of the universe to mean that nature was designed by an intelligent to be understood
- the fundamental equations of the laws of the universe can be easily written on one side of one sheet of paper
- Eugene Wigner's famous paper, "The Unreasonable Effectiveness of Mathematics in the Physical Sciences" makes the point that this simple structure is an unexpected gift that allows is to do science

Evidence #3: fine-tuning of the physical constants and quantities

- in order for any kind of complex life to survive, we need stars that provide energy within specific ranges for long periods of time
- in order for any kind of complex life to survive, we need planets with stable orbits that will not suffer from extreme temperature swings as it varies in distance from its star
- in order for any kind of complex life to survive, we need stable atomic structure
- in order for any kind of complex life to survive, we need to have chemical diversity and correct relative abundances of each element
- organic life has minimum requirements: process energy, store information, replicate, and you can't fulfill those functions if there is only one element, e.g. – hydrogen
- the energy level from the photons from the sun have to match the energy levels of the different elements in order to drive the chemical bonding needed for life
- These requirements for life of any imaginable type depend on the values of the constants and quantities. The constants and quantities cannot vary much from what they are, or the universe will lose the characteristics (above) that allow it to support complex life of any imaginable time
- For example, ratio of strong force to electromagnetic force:
  – if 2% larger, then no stable hydrogen, no long-lived stars, no compounds containing hydrogen, e.g. – water
  – if 5% smaller, no stable stars, heavy hydrogen would be unstable, few elements other than hydrogen

Evidence #4: initial conditions for habitability

- Universe: expansion rate of the universe must be fast enough to avoid a re-collapse, but slow enough to allow matter to clump together and form stars and planets for complex life to live on
- Planet: right distance from the star to get the right climate
- Planet: right mass to retain the right atmosphere

Evidence #5: origin of life and information theory

- It's possible to explain every process in an automobile engine using plain old naturalistic mechanisms – no supernatural explanation is necessary to understand the processes
- But the existence of engine itself: engineering all the parts has to be explained by the work of an intelligence
- Similarly, we can understand how living systems work, but the existence of the living systems requires an intelligence
- Even the simplest living system has to perform minimal function: capture energy, store information and replicate
- Living systems are composed of objects like proteins that are composed of sequences of components complex such that the order of the components gives the overall structure function
- Developing the components for a simple living cell is very improbable – even given the large number of galaxies, stars and planets in the universe, it is unlikely that complex, embodied life would exist *anywhere* in the universe

Evidence #6: more initial conditions for habitability

- Location within the galaxy: you need to be away from the center of the galaxy, because the explosions from dying stars, and excessive radiation will kill life
- Location within the galaxy: you need to be close enough to the center in order catch the heavy elements you need for life from the explosions of other stars
- Location within the galaxy: the best location is between two arms of  a spiral galaxy, where you can get the

heavy elements you need from dying stars, but without being hit with explosions and harmful radiation

- Star mass: determines rate at which the sun burns, determines the energy level of photons that are used to drive chemical bonding reactions, determines the length of time the star will be stable
- Star mass: star mass must be the correct value in order to allow liquid water on the planet's surface, while still preserving stable orbit

I wish there was more curiosity about science in churches, and young Christians understood *how critical science is* for grounding the rationality of the Christian worldview. We need to be training up more scientists who think about the big questions, like Dr. Walter Bradley.

# A new series of posts about the adventures of an effective Christian woman

**Wintery Knight** · 27 September 2020 · Archived copy · Original

If you want to have conversations about Christianity, then prepare

I try to encourage my Christian friends to study topics related to the Christian worldview, and to make connections between the Christian worldview and topics like economics, science, politics, etc. I want them to have deep conversations with non-Christians. Well, I just noticed that Laura, who writes at An Affair With Reason, started a series of posts about her experiences having these conversations.

She has two posts so far. In the first, she provides an introduction to the series:

> By the grace of God, an ordinary day for me includes at least one significant spiritual conversation. The conversations are spontaneous, and the people I talk to are those I come across in the mundane activities of life: construction workers I see while walking my dog, neighbors out mowing their lawn, CrossFit coaches and athletes, my husband's coworkers, the pest control man, the UPS man, the woman at the grocery store, and the customer service representative who took my call.
>
> […]Because spiritual conversations are so fun for me, I enjoy sharing them with others. People ask me often, "How did you get into that conversation?" and "How does this happen to you nearly every single day?"
>
> In one sense these conversations do "happen to me" in that I don't plan them, but it would be far more accurate to say that I create these conversations by living my life in a way that causes me to always be prepared to make a defense to anyone who asks me for a reason for the hope that is in me, and then paying attention for opportunities to get a foot in the door. Hence, many people have suggested that I publicly share what I'm doing with others so that they may benefit from practical, real life examples of conversations that they may seek to emulate in their own lives.

I'm so delighted with this, because I am always urging my Christian friends to read more, listen to more podcasts, and watch more debates, so that they are equipped to have these sorts of adventures.

Laura posted the first conversation in the series, with her previous pastor:

> For two years I had tried to persuade my pastor to allow me to teach a small group or conference on apologetics. I set up appointments so he and his staff could get to know me. I shared my background and

> experiences, gave them opportunities to ask me questions, and even offered references from other churches where I had taught. I offered to show videos and facilitate discussions on the teachings of well-known apologists like Greg Koukl, Frank Turek, and J. Warner Wallace so the church leadership wouldn't need to worry about platforming a heretic, and I shared my blog so they could see my work for themselves. Several months later, the entire church leadership admitted they had not read my blog and probably never would.
>
> Over the next couple of years I continued to offer to introduce apologetics to our congregation through any format deemed appropriate, but nothing came of it. Eventually, my husband was relocated and our pastor, along with a dozen others, helped us load our moving truck in exchange for pizza, soda, and one last evening of fellowship.
>
> During our conversation, as we were sitting on the empty floor, eating pizza on paper plates and drinking soda from plastic cups, my pastor mentioned that he frequently visited a certain coffee shop in the area that was very unfriendly to Christianity. The owners even had a sign on the wall that said, "No crazy talk", which they had made clear included talk of Jesus, miracles, and the gospel. I commented that it seemed like the ideal place to share truth with people who needed to hear it, and I asked if that had been his experience.
>
> "How do you even begin to discuss those things in an environment where the gospel isn't welcome," he replied.
>
> "Personally, I would go with the Cosmological Argument, but you could always share the Teleological Argument. If you're talking to college students, though, I'd definitely look for opportunities to share the Moral Argument. Young people seem to relate most to that line of reasoning," I said.
>
> "Sorry, what did you say," he asked, as if I had just begun speaking in tongues in front of his Presbyterian congregation.
>
> "The Cosmological Argument," I repeated.
>
> Blank stare.
>
> "And the Teleological Argument"
>
> "Teleo-what," he asked quizzically.
>
> "It means having a purpose or a design," I explained.
>
> "So how would you go about sharing these arguments with non-Christians," he asked.
>
> It was getting late and we were all exhausted, but this was important. This is what I had wanted to share for two straight years. I looked at my watch and told them I needed four minutes per argument in order to explain adequately. I was given the green light, and for the next twelve minutes I summarized for my pastor and about ten others what I had not been able to share with the congregation.

So she doesn't really spend much time describing the conversation, because that's not what this series is about. You can ask her for book recommendations if you want to handle it like she did. But the rest of the post explains why she prepared to have this conversation, and what pastors can do to equip people in the church to have these conversations.

This is not the first time I've linked to her, I also did here for her post about apologetics and here for her post about talking to Muslims. What I like about her is that she has a mature view of the Christian life that I really respect. When I read her writing, I can tell that she is not involved in Christianity to feel good or to be liked. She has a goal in mind, and she has done hard things to be prepared to reach it.

I have also tried to get apologetics into the church. I normally try to bring in the Focus on the Family True U DVDs, which feature Dr. Stephen C. Meyer. Without success. In my experience, pastors tend to not really understand challenges to Christianity, or they don't know how to respond to them, or they just don't want people in the church to get upset by having to do work. Read the rest of Laura's post to get her solution to the problem.

# Bombshell: The FBI's Trump-Russia probe relied on a suspected Russian agent

**Wintery Knight** · 28 September 2020 · Archived copy · Original

Left to right: Comey, Lynch, Clinton, McCabe

The source for today's bombshell story is none other than the highly-respected, but left-leaning, Wall Street Journal. According to a story that was published last Friday evening, the main source for the Steele dossier – which was obtained by a Democrat PR firm, and paid for by a Democrat law firm – was a Russian agent. The FBI said that this man was "a threat to national security".

The Wall Street Journal reports:

> Senate Judiciary Chairman Lindsey Graham on Thursday released newly declassified FBI documents that contain this stunner: The bureau relied on a suspected Russian agent for the information it used to obtain a secret surveillance warrant against former Trump adviser Carter Page.
>
> […]Department of Justice Inspector General Michael Horowitz last year revealed that former spook Christopher Steele relied on one primary "subsource" for most of his accusations against the Trump campaign. This subsource was later identified as Ukrainian-born Igor Danchenko, who worked as a research analyst from 2005 to 2010 at the Brookings Institution in Washington. The latest disclosures show that Mr. Danchenko was the subject of an FBI counterintelligence investigation from 2009 to 2011, based on concerns he was a Russian agent and "a threat to national security."
>
> According to the documents, Mr. Danchenko attempted to recruit two individuals connected to "an influential foreign policy advisor in the Obama administration." He said that if they "did get a job in the government and had access to classified information," he had a way for them "to make a little extra money."
>
> Further FBI investigation found Mr. Danchenko was an associate of two other "FBI counterintelligence subjects." He also had contact with "the Russian Embassy and known Russian intelligence officers," and the FBI went so far as to apply for a warrant to surveil Mr. Danchenko. The investigation ended because he left the country in September 2010, though the FBI said "consideration would be given to re-opening the investigation" if he returned.

This is the important part:

> The FBI identified Mr. Danchenko as Mr. Steele's source in December 2016, when senior bureau officials also became aware of the prior FBI investigation. The FBI's realization that it was being fed potential Russian disinformation should have put an immediate halt to the Page probe, if not the entire collusion investigation.
>
> Instead and incredibly, the FBI failed to disclose this information to the Foreign Intelligence Surveillance

> Court in all three of its subsequent renewal applications against Mr. Page. U.S. Attorney John Durham first brought the Danchenko information to Attorney General Bill Barr's attention and said its public release would not interfere with his investigation.

There was also a related story about how the FBI agents on the case were so concerned about being sued, that they actually got insurance policies.

The same WSJ article explains:

> In related news Thursday, the Justice Department disclosed more FBI text messages and notes in the tainted Michael Flynn case. These also reflect horribly on the James Comey-era FBI. Agents (names redacted) express dismay and disdain in the messages for the broader collusion investigation (code-named Crossfire Hurricane) and for the probe of Mr. Flynn.
>
> In October 2016 internal messages, agents refer to the "Crossfire Road Show" and one says: "I'm tell [sic] man, if this thing ever gets FOIA'd, there are going to be some tough questions asked." Another responds that the problem is "a scope way outside the boundaries of logic," to which an agent says one team member is engaged in "rabbit holes and conspiracy theories."
>
> Agents questioned the use of national security letters (subpoenas that don't require judicial permission) to get Mr. Flynn's financial records. One series of messages is from Jan. 5, 2017, the same day Mr. Comey briefed Barack Obama, Joe Biden and Susan Rice on the Flynn/Trump investigations.
>
> "[W]hat's the word on how [Obama's] briefing went?" asks one agent. "Don't know, but people here are scrambling for info to support certain things and it's a mad house." A few days later, an FBI employee reports that they "all went and purchased professional liability insurance" over concerns about DOJ/FBI leaks and that "the new AG might have some questions."

Do you remember the details of the FBI-media collaboration on the Trump-Russia collusion story? I have a summary of it for you, below.

The Trump-Russia collusion story that was trumpeted by the progressive media was a joint effort between the Hillary Clinton campaign and high-ranking members of the FBI during the Obama administration.

The goal was to get the government to spy on the Trump campaign, in order neutralize his administration, if he won the 2016 election.

Here's the left-leaning The Hill, reporting on an important finding from October 2018:

> Congressional investigators have confirmed that a top FBI official met with Democratic Party lawyers to talk about allegations of Donald Trump-Russia collusion weeks before the 2016 election, and before the bureau secured a search warrant targeting Trump's campaign.
>
> Former FBI general counsel James Baker met during the 2016 season with at least one attorney from Perkins Coie, the Democratic National Committee's private law firm.
>
> That's the firm used by the DNC and Hillary Clinton's campaign to secretly pay research firm Fusion GPS and Christopher Steele, a former British intelligence operative, to compile a dossier of uncorroborated raw intelligence alleging Trump and Moscow were colluding to hijack the presidential election.

The article notes that Perkins Coie is the "Democratic National Committee's private law firm".

> The Washington Post reported last week that Perkins Coie, an international law firm, was directed by both the Democratic National Committee (DNC) and Hillary Clinton's campaign to retain Fusion GPS in April of 2016 to dig up dirt on then-candidate Donald Trump. Fusion GPS then hired Christopher Steele, a former British

> spy, to compile a dossier of allegations that Trump and his campaign actively colluded with the Russian government during the 2016 election. Though many of the claims in the dossier have been directly refuted, none of the dossier's allegations of collusion have been independently verified. Lawyers for Steele admitted in court filings last April that his work was not verified and was never meant to be made public.

In addition, Fox News reports that the FBI paid Christopher Steele ELEVEN TIMES in 2016.

But why would the FBI and the FISA court accept the Democrat-funded dossier as a basis to spy on the Democrat's main political rival? Answer: there were Democrats in the FBI who covered up the source of funding for the Steele dossier, as well as the anti-Trump bias of the dossier's author.

The Washington Examiner reported on the released text messages from highly-placed anti-Trump Democrat Lisa Page within the FBI in March 2019:

> The text messages, between then-Deputy Director of the FBI Andrew McCabe, who was later fired, and former FBI attorney Lisa Page — who was having an affair with FBI agent Peter Strzok — were obtained by Fox News.
>
> […]Then-Director of the FBI James Comey ultimately signed off on the application to the Foreign Intelligence Surveillance Court for approval to surveil Carter Page. It was dated nine days after the Page-McCabe texts: Oct. 21 2016.
>
> The specific funding of Steele's dossier was never mentioned to the FISA court, either during that first application or during three subsequent FISA renewals. Steele's anti-Trump fervor and determination to provide his dossier to the media and members of the U.S. government later became well known.

Do you remember any of the news media shows telling us any of this during their trumpeting of Trump-Russia conspiracies? I don't.

# What the nomination of Amy Coney Barrett communicates to secular left feminists

**Wintery Knight** · 29 September 2020 · Archived copy · Original

Amy Coney Barrett, her husband and her 7 children in the Oval Office

Here's an article from The Federalist by my favorite Federalist writer, Joy Pullmann, where she lists 9 feminist lies that were smashed by the nomination of Amy Coney Barrett:

- Women Need Abortion to Succeed
- Children Make You Unhappy
- Women Must Repress Their Fertility to Succeed
- Religious People and Conservatives Are Anti-Sex
- Women Don't Need Men
- Christianity Oppresses Women
- Conservatives Hate Women
- Women Should Prioritize Career Over Family
- Women Are Oppressed

The article is excellent. I will just focus on the one part that I thought was the most interesting:

> Marriage is the epitome of the cooperation of the sexes, yet the left treats it as unnecessary at best and harmful at worst. The Black Lives Matter organization, for example, which has been supported by millions in donations and thousands of endorsements from CEOs and Democrat politicians, in its policy platform openly attacked "heteronormative" "nuclear families."
>
> Gloria Steinem, the apostle of feminism, popularized the phrase "A woman needs a man like a fish needs a bicycle." Leftism and feminism pit the sexes against each other, while conservatism and Christianity recognize that the sexes are interdependent. This recognition brings humankind joy instead of hatred.
>
> Fathers are crucial to the happiness and well-being of every child, a need that only intensifies with the addition of each child. Barrett's husband Jesse is a full partner in their marriage with his own significant career. Barrett recognized her husband's major contributions to their family and her happiness in her nomination acceptance speech Saturday night.

> I couldn't manage this very full life without the unwavering support of my husband Jesse. At the start of our marriage, I imagined that we would run our household as partners. As it has turned out, Jesse does far more than his share of the work. To my chagrin, I learned at dinner recently that my children consider him to be the better cook. For 21 years, Jesse has asked me every single morning what he can do for me that day. And though I almost always say 'Nothing,' he still finds ways to take things off my plate. And that's not because he has a lot of free time—he has a busy law practice. It's because he has a superb and generous husband, and I am very fortunate.
>
> Given her description, I think it's accurate to guess Barrett and her husband's interdependence is a source of strength and joy to them both, as well as to their children and community. They have undoubtedly achieved much more together than they could have separately, as many highly successful women will also tell you of their marriages. Our husbands are our sometimes-secret weapon.

Feminists don't like any of Joy's 9 points, though.

Feminism is what a woman believes after she has smashed herself up by having sex with bad boys. Bad boy failures makes her think that all men are unreliable. She likes abortion because it allows her to chase the bad boys she is attracted to. When she learns how bad boys are unreliable, she intentionally delays marriage to focus on her career and pay off all her student loans. But, if a woman avoids bad boys, and instead chooses a good husband who supports her, she can have 5 kids and adopt 2 more and not have all that bitterness. With a good husband, and a network of supportive relatives, she can even get on the Supreme Court.

I prefer that young women study for a STEM degree, and try to avoid student loans with community college, scholarships, living at home, summer jobs, etc. I recommend they work until their first child arrives. After that, they should stay home with the children, at least for the first 3 years of each child's life. And obviously, having more children leads to a bigger legacy than fewer children. I'm also a strong supporter of homeschooling. I don't have much confidence in Christian schools, private schools and especially public schools.

However, in the special case of women like Amy Coney Barrett, who can make a huge difference in the world for the good of conservatives and Christians, then it may be possible, with an excellent husband and many willing relatives, to have a safety net for the children that allows her to do something that will protect us all from the secular left. This is not the ordinary case, of course. This is 1% of the 1% of the 1%. There is no doubt that her children will suffer from her decision to have a career. But if she makes a Supreme Court decision that protects the unborn, or safeguards self-defense rights, or preserves religious liberty, it will be worth it. I don't think this is the ordinary case. I don't support mothers of young children having ordinary careers just to make money, because usually the young children have to be placed with strangers.

My goal for my wife was that she be a stay at home wife and mother, at least while we have any children under 3, and preferably under 5. I wouldn't have liked to have a wife who served on the Supreme Court. I wouldn't want to share my wife with co-workers, because of the way I was raised. But I can understand why it is a good thing for me (and for conservatives and Christians) that she is the nominee.

# Don’t dismiss best practices for Christian living as “legalism” and “denying grace”

**Wintery Knight** · 30 September 2020 · Archived copy · Original

Telling a woman how to make wise decisions protects her

On Sunday, I listened to a very interesting discussion between Sean McDowell and Jessica van der Wyngaard on Justin Brierley’s Unbelievable show. The topic was on the pros and cons of purity culture. I didn’t know a thing about “purity culture”, and had never read any books about it. I didn’t really disagree with anyone on the podcast, but I did want to say something about it in a blog post.

Description:

> 20 years ago Joshua Harris was the poster boy of the evangelical ‘purity movement’ having authored the bestselling book ‘I Kissed Dating Goodbye’. Today, Harris regrets writing the book, and has also recently changed his mind about Christianity.
>
> Justin is joined by Jessica van der Wyngaard, director of the documentary film ‘I Survived I Kissed Dating Goodbye’, and Christian apologist Sean McDowell, to discuss purity culture, singleness and the Joshua Harris story.

The MP3 file is here.

First, here’s a brief summary of what everyone said on the podcast:

- JW: the book urged people to give up dating in favor of courting and suggested other rules that would guarantee a successful marriage to your soul-mate
- JW: some of the rules proposed by the book were not Biblical
- JW: I’m not a virgin and I’m in early-30s, but I accept that we should teach what the Bible says about abstinence
- SM: purity culture is the idea that if you remain sexually pure, God will give you a spouse and bless you in the future
- SM: purity culture is the idea that if you have premarital sex, you will be tainted forever
- SM: I’m afraid that those reacting against purity culture will build a sexual ethic solely based on their shame, their hurt, their concern about legalism, and this will not help the next generation
- SM: let’s have a balanced Biblical approach to sexuality instead

- SM: there is scientific data to back up the Bible's teaching that marriages work better when sex occurs only within a marriage
- SM: it's a mistake to define your spiritual standing based on whether you are a virgin or not
- SM: following the Bible's rules for sexuality is an important part of discipleship
- SM: the Bible is replete with examples of people restoring their standing before God through forgiveness and redemption

Right now, we are living in a secular culture where people are hooking up, having premarital sex, living together, and breaking up far more often than in the past. There is this pattern of choosing partners based on secular criteria: outward appearance and ability to entertain. And this approach to dating – choosing people for the wrong reasons, and trying to force a commitment using premarital sex – is now common practice, even among Christians.

I think people should have a plan to counter this trend that's realistic and guided by studies and evidence. For example, studies show that people who have no sexual partners before marriage are more likely to still be married 10 years later. Studies show that cohabitation negatively impacts the stability of a future marriage. It's difficult to accept that this is the way the world is, but if a stable marriage is a goal for you, then you should care about the best practices for having a stable marriage.

Take a different example. Suppose you have a lot of shame and bad feelings over having run up $90,000 of student loans. Now your retirement will be much more difficult. The answer to these feelings of shame is not to say that you can invoke "grace" and that will make everything OK. It won't. It might help you to make better decisions going forward, but that debt is going to affect your future spouse, your future marriage and your future children.

There are real costs to these behaviors for your future, and being forgiven through Jesus' atonement isn't going to instantly make the effects of those choices disappear. It's good to warn young people about these costs. It's also good to help people who have made mistakes undo the damage by investing in them. I don't want us to throw out evidence-based best practices as "legalism", because they help us to reach the discipleship goals specified for us in the Bible.

The goals of the Bible (e.g. – not aborting, not divorcing) are good goals. If we find out from science that premarital promiscuity or cohabitation reduce our odds of achieving that goal, then it's a mistake to dismiss that evidence because it make us feel bad about our past. It's not legalism to investigate evidence and consult wise advisors in order to choose how best to achieve goals like marriage. That's actually being wise. Making good decisions doesn't give you the right to be proud and compare yourself to others, but it is good to make good decisions for yourself, and to share your reasoning with those who ask you.

I agree with the speakers that purity culture is wrong to promise people a happy marriage if they only keep their virginity. That's just the prosperity gospel, and it really is not a Biblical view of the Christian life.

People who choose to have premarital sex haven't separated themselves from marriage. But studies indicate that they have damaged the stability of their future marriage *if they do nothing to counteract the effects of their choices.* And I think there is more to counteracting these bad effects than just stating to your partner "Jesus forgives me, so you can't judge me". The focus of the "no-rules because I feel ashamed" crowd doesn't seem to be on taking the damage seriously and fixing it. Their focus seems to be on not being judged.

I don't think that a cursory response ("don't judge me!") is adequate to undo the damage from premarital sex. But if a person is willing to be honest about their past, and put in the work to understand the effects of premarital sex on their future marriage, renew their minds, and re-establishing their bonding ability, then they should be able to *fully* counteract the damage. I have met people who have done this, and you can see in their choices and lifestyle that there's been a complete turning against their former use of sex for fun and attention and self-esteem. It's not "idolizing virginity and idolizing marriage" to look at the data, and make choices that are likely to lead to a stable marriage.

# How reliable are Politifact fact checks? A review of past rulings

**Wintery Knight** · 1 October 2020 · Archived copy · Original

Politifact is a web site run by some left-wing journalists at the Tampa Bay Times. As you might expect from academic studies of media bias, their content might as well be written by the Democrat Party. But it's not enough to just declare Politifact a Democrat propaganda operation – I need to actually give you details and examples. And so I will, in the rest of this post.

Let's start with two recent examples, then I'll show you the worst example of media bias I have ever seen from Politifact.

**Missouri Senate Race**

Here's one analysis from the Daily Wire:

> On Tuesday, Politifact, which purports to be a neutral fact-checking website but in fact leans heavily to the left, got caught protecting a member of the Democratic Party: Democratic Missouri Sen. Claire McCaskill.
>
> Politifact took issue with the ad from The Senate Leadership Fund, a pro-Republican super PAC, that claimed that McCaskill said "normal people" could afford private planes.
>
> […]After they were corrected, Politifact acknowledged the mistake, writing,
>
> Initially, we published this fact-check with a rating of False, because based on the video available, it did not appear that McCaskill was talking about private planes. After publication, we received more complete video of the question-and-answer session between McCaskill and a constituent that showed she was in fact responding to a question about private planes, as well as a report describing the meeting. We re-assessed the evidence, archived the original version here, and published the version you see here with a new rating of Half True. We apologize for the error.

Daily wire also linked to some more failed Politifact "fact checks": here, here, and here.

**Arizona Senate Race**

Politifact also screwed up their fact-check for the Arizona Senate race.

The Daily Caller explains:

> PolitiFact incorrectly labeled it “mostly false” that Democratic Senate candidate Kyrsten Sinema “protested troops in a pink tutu” during its live fact-check of the Arizona Senate debate Monday night.
>
> It’s an established fact that Sinema, a former Green Party activist who co-founded an anti-war group, wore a pink tutu at one of the multiple anti-war protests she attended in 2003.
>
> “While we were in harm’s way, she was protesting our troops in a pink tutu,” Republican candidate Martha McSally, a former Air Force fighter pilot, said during Monday night’s debate.

Here’s their Politifact’s evaluation of McSally’s claim:

Who are you going to believe? Politifact, or your own eyes?
And here’s the photo of Kyrsten Sinema, protesting the troops, in a pink tutu:

Anti-war Democrat Senate candidate Kyrsten Sinema in a pink tutu
The Daily Caller notes:

> A 2003 Arizona State University news article at the time described Sinema wearing "something resembling a pink tutu" at one of the protests.
>
> […]Sinema openly associated with fringe elements of the far-left during her anti-war activism.
>
> She promoted an appearance by Lynne Stewart, a lawyer who was convicted of aiding an Islamic terrorist organization, in 2003.
>
> Sinema also reportedly partnered with anarchists and witches in her anti-war activism and said she did "not care" if Americans wanted to join the Taliban.

Colonel Martha McSally, as I've blogged about before, is a former U.S. Air Force A-10 fighter pilot, and squadron commander. She logged a lot of hours leading actual combat missions against America's enemies – the sorts of people who sell and rape Yazidi girls. She fought them.

And now for the big one: Politifact's fact-checking of Obamacare.

**Obama's claims about Obamacare**

Avik Roy, health care policy expert at Forbes magazine, wrote about Politifact's assessment of Obama's promise to Americans about keeping their health plans after Obamacare.

**In 2008, before the presidential election, PolitiFact rated Obama's claims about Obamacare "True":**

Roy writes: (links removed)

> On October 9, 2008, Angie Drobnic Holan of PolitiFact published an article using the site's "Truth-O-Meter" to evaluate this claim: "Under Barack Obama's health care proposal, 'if you've got a health care plan that you like, you can keep it.'"

And she concluded:

> […]…people who want to keep their current insurance should be able to do that under Obama's plan. His description of his plan is accurate, and we rate his statement True."

Roy notes:

> PolitiFact's pronouncements about Obamacare were widely repeated by pro-Obama reporters and pundits, and had a meaningful impact on the outcome of the election. Indeed, in 2009, PolitiFact won the Pulitzer Prize for its coverage of the 2008 campaign.

Here's the screen capture from 2008:

The Truth-O-Meter Says:

**Under Barack Obama's health care proposal, "if you've got a health care plan that you like, you can keep it."**

Barack Obama on Tuesday, October 7th, 2008 in a debate in Nashville, Tenn.

**Obama's plan expands existing system**

Barack Obama defended his health care plan during a debate in Nashville, Tenn., on Oct. 7, 2008. His opponents have attacked his plan as "government-run" health care.

"No. 1, let me just repeat, if you've got a health care plan that you like, you can keep it," Obama said. "All I'm going to do is help you to lower the premiums on it. You'll still have choice of doctor."

Obama is accurately describing his health care plan here. He advocates a program that seeks to build on the current system, rather than dismantling it and starting over.

TRUE

Share this story:

Tweet 380

Politifact says that everyone who likes their health care plan can keep it

Before the election, it's true! And Obama got re-elected, because people believed that. But what happened after the election?

**In 2013, after the 2012 election, PolitiFact rated Obama's claims about Obamacare "Pants On Fire":**

Roy writes: (links removed)

> On December 12, [2013] the self-appointed guardians of truth and justice at PolitiFact named President Obama's infamous promise—that "if you like your health care plan, you can keep it"—its 2013 "Lie of the Year."
>
> […][N]one of the key facts that made that promise "impossible" in 2008 had changed by 2013. The President's plan had always required major disruption of the health insurance market; the Obamacare bill contained the key elements of that plan; the Obamacare law did as well. The only thing that had changed was the actual first-hand accounts of millions of Americans who were losing their plans now that Obamacare was live.

And the screen capture from 2013:

The article:

**Lie of the Year: 'If you like your health care plan, you can keep it'**

By Angie Drobnic Holan

Published on Thursday, December 12th, 2013 at 4:44 p.m.

It was a catchy political pitch and a chance to calm nerves about his dramatic and complicated plan to bring historic change to America's health insurance system.

"If you like your health care plan, you can keep it," President Barack Obama said -- many times -- of his landmark new law.

But the promise was impossible to keep.

So this fall, as cancellation letters were going out to approximately 4 million Americans, the public realized Obama's breezy assurances were wrong.

Related rulings:

"What we said was, you can keep (your plan) if it hasn't changed since the law passed."

Barack Obama, Monday, November 4th, 2013.

Ruling: Pants on Fire! | Details

"FACT: Nothing in #Obamacare forces people out of their health plans."

Valerie Jarrett, Monday, October 28th, 2013.

FALSE

Politifact said one thing before the election, and the opposite afterwards

So when Politifact rates a statement by a Democrat as true, what they really mean is that it's pants-on-fire-false, but

it’s election time so they don’t say that. It’s not like the critical assessments of Obamacare from health policy experts were not out there between 2007-2012. I know, because I blogged on every study and report on the predicted effects of the law that I could find. But the intellectually lazy journalism-major clowns at Politifact couldn’t be bothered to read those studies and reports.

# Thinking practically about the gospel with an illustration from a war movie

**Wintery Knight** · 2 October 2020 · Archived copy · Original

The city of Mogadishu, in Somalia, Africa

*I decided to re-post one of my favorite posts for Memorial Day.*

First, let's get an overview that helps us understand the context and goals of the mission we are going to discuss.

The scene is set in Somalia, Africa, in 1992. There a civil war between two warlords: Ali Mahdi and Mohammed Farah Aidid. The war has destroyed agricultural operations, and the people are starving. The United Nations are trying to help, but Aidid hijacks the food from UN aircraft so that he can use the food to gain control of the people. Hundreds of thousands of Somalis are dying of starvation. The UN requests American military forces to secure the air-dropped supplies so they can be distributed to the starving people.

In December 1992, President George H.W. Bush answers the call, sending 25,000 troops to Somalia to protect the food from the Somali warlords. However, in 1993, Bill Clinton is elected. He orders that the number of U.S. troops be reduced to 12,000. Following an attack by Aidid on Pakistani peace-keepers, the U.N. issues a resolution to capture those responsible. The U.S. armed forces have the arms and training to battle evil, so they get the call to capture Aidid and his lieutenants.

In late August 1993, Task Force Ranger is deployed to Mogadishu to capture Aidid and his lieutenants at the Olympic Hotel. The U.S. force consists of 440 troops from the Army Rangers and Army Delta Force special forces, commanded by General William Garrison. Garrison requested light armored units (Bradley Infantry Fighting vehicles) that would offer more protection than the unarmored HMMWV Humvees. Garrison was denied the light armor by the Clinton administration. Garrison requested heavier air support (AC-130 Spectre gunships) that would offer better fire support than the UH-60 Blackhawk miniguns. Garrison was denied the air support by the Clinton administration. The Clinton administration did not want the American forces to appear too heavily armed for the peace-keeping role.

The actual mission turned out to be much harder than it needed to be, because of the resources denied by the Clinton administration. Although the Aidid lieutenants were captured, Aidid himself escaped. Eighty-four American soldiers were wounded. Eighteen American soldiers were killed, and their bodies were dragged through the streets of Mogadishu. This was shown over and over by the media, and it undermined American resolve to help the Somali people. As a result, Clinton had the excuse he needed to retreat the American military.

**Two heroes lost their lives**

Today, I want to talk about two of the men who lost their lives in Operation Gothic Serpent. They are Master

Sergeant Gary I. Gordon and Sergeant First Class Randall D. Shughart – a Delta Force sniper team.

Here is a clip from the movie Blackhawk Down, which shows what happened to them:

The pilot of the downed Blackhawk was protected by the two men who volunteered to go in after him.
They requested that they be inserted at the crash site, even though they knew that reinforcements were likely not going to be there in time to save them. They made the request to go and help the pilot *three times* before being allowed to go in. Their first two requests were denied by their commanding officer, because the odds against their survival were so overwhelming. The rescued pilot was later released by his captors, and the two heroes were awarded the Medal of Honor for their brave actions.

A Congressional Medal of Honor
Here is a description of the requirements to be awarded a Medal of Honor:

> The Medal of Honor is the highest military decoration that may be awarded by the United States government. It is presented by the President of the United States, in the name of Congress, and is conferred only upon members of the United States Armed Forces who distinguish themselves through **conspicuous gallantry and intrepidity at the risk of life above and beyond the call of duty**:
>
> - While engaged in action against an enemy of the United States;
> - While engaged in military operations involving conflict with an opposing foreign force; or
> - While serving with friendly foreign forces engaged in an armed conflict against an opposing armed force in which the United States is not a belligerent party.

You can read the official details of their actions.

**The point of this post**

It is important for Christians to be familiar with real-world examples of people giving their lives in order to save the lives of others. When we see real-world examples of self-sacrifice, it helps us to understand what Jesus really achieved for us, and what he must have felt making that hard choice to volunteer to go in and rescue us. In general, my philosophy when it comes to the Bible is to make every effort to connect what the Bible says to the real world. We must not push Christianity into some far-off world of piety and feelings. We must make connections to real evidence and real life, so that what the Bible says becomes practical, and so that we have a deep friendship with and sympathy for God revealed in Jesus Christ. In real life, being willing to give your life to save someone else is hard.

Understanding how that really happens will help us to value what Jesus has done for us.

**Bible verses**

I saw this verse on the ground outside the Airborne & Special Operations Museum in Fayetteville, NC, where I went for my summer vacation in 2015.

Isaiah 6:8:

> [8] Then I heard the voice of the Lord saying, “Whom shall I send? And who will go for us?”
>
> And I said, “Here am I. Send me!”

Here is the picture I took (yes, that is my running shoe):

“Here am I, send me” Isaiah 6:8

When confronted with an opportunity to imitate Christ in his self-sacrifice, we should think less about ourselves and our own desires, and take the opportunity to serve others effectively. We do not do what makes us happy, and we do not pursue fun and thrills. We do what heals, we do what helps others. We do not push away our responsibility to imitate Christ by caring for those in danger. Christianity is not just about “not doing bad things”. It’s the good things you do because of your relationship with Jesus that show your real allegiance, and give you the experience of being a Christian in deed.

And here is another good verse:

John 15:13:

> [13] Greater love has no one than this: to lay down one’s life for one’s friends.

If you get a chance to watch the movie Blackhawk Down, then do so. I highly recommend it. You can also read the book that the movie is based on.

I love the Medal of Honor books by Edward F. Murphy. He writes about all the people who have been awarded the

Medal of honor in different wars: World War II, the Korean War, and the Vietnam War.

If you check my reading list, you'll find that I usually read two military books for every one book on another subject.

# What's in an apologetics book?

**Wintery Knight** · 3 October 2020 · Archived copy · Original

Dr. W. L. Craig: churches don't prepare Christians to answer skeptics

Let's look at the table of contents of my favorite introduction to Christian apologetics, which is "Is God Just a Human Invention?" written by Sean McDowell and Jonathan Morrow.

In that book, you will find 18 topics.

1. Is Faith Irrational? (Commentary by: Gregory Koukl)
2. Are Science and Christianity at Odds? (Commentary by: John Warwick Montgomery)
3. Are Miracles Possible? (Commentary by: Gary R. Habermas)
4. Is Darwinian Evolution the Only Game in Town? (Commentary by: William A. Dembski)
5. How Did the Universe Begin? (Commentary by: R. Douglas Geivett)
6. How Did Life Begin? (Commentary by: Fazale R. Rana)
7. Why Is the Universe Just Right for Life? (Commentary by: Jay W. Richards)
8. Has Science Shown There Is No Soul? (Commentary by: Dale Fincher and Jonalyn Fincher)
9. Is God Just a Human Invention? (Commentary by: Garry DeWeese)
10. Is Religion Dangerous? (Commentary by: Douglas Groothuis)
11. Does God Intend for Us to Keep Slaves? (Commentary by: Paul Copan)
12. Is Hell a Divine Torture Chamber? (Commentary by: Frank Turek)
13. Is God a Genocidal Bully? (Commentary by: Clay Jones)
14. Is Christianity the Cause of Dangerous Sexual Repression? (Commentary by: Kerby Anderson)
15. Can People Be Good Without God? (Commentary by: Mark D. Linville)
16. Is Evil Only a Problem for Christians? (Commentary by: Randy Alcorn)
17. What Good Is Christianity? (Commentary by: Glenn S. Sunshine)
18. Why Jesus Instead of the Flying Spaghetti Monster? (Commentary by: Darrell L. Bock)

Prominent atheist scholars are quoted in each chapter to introduce the challenges, and then scholarly arguments and

evidence are presented to defend the Christian worldview. The language is simple enough, but the material is solid enough to use in a real debate. I would say that introductory books like this one are more than enough to equip you for everyone who will challenge you.

Why are these 18 topics important? Because these are the questions that atheists ask. These are the questions that cause Christians to leave the faith. These are the questions that your children will face in high school and college, which might cause them to leave the faith.

Let's start with chapter one. One of the most prominent arguments by atheists is that faith is irrational. This chapter allows you to define faith using the Bible's definition of faith, which relies on logic and evidence.

Atheists also say that Christianity is at war with science. In chapter 2, they discuss the history of science and how Christianity provided the framework that allowed scientific method to take root and flourish.

Atheists like to claim that miracles are impossible. Chapter 3 defends the view that God, if he exists, is capable of interacting with his created world.

Atheists love to put forward Darwinism as means to deny that God is the designer of life. Chapter 4 explains the concept of intelligent design, and why intelligent design is a better explanation for the history of life.

Atheists love to talk about how the universe has always existed, and there's no need for a Creator. Chapter 5 contains a philosophical argument that is supported by mainstream science to argue that the universe had a beginning, just like the Bible says.

Atheists love to argue that life can emerge from non-life, and the process is simple. Chapter 6 is written by a biochemist, and it takes a look at the real complexity of the simplest living cell.

Atheists like to argue that the universe itself is just an accident, and there is no need for a Designer. Chapter 7 introduces the scientific evidence for fine-tuning and habitability.

Atheists like to say that there is no soul and no afterlife. Chapter 8 gives some arguments for the existence of the soul.

Atheists like to argue that Christians invent God because God makes them feel good. But chapter 9 explains that having an all-powerful God who can hold humans accountable is the last thing any human would want to invent.

Atheists like to talk about how religion, with it's habit of teaching to believe in things that can't be tested, causes religious people to do a lot of harm. Chapter 10 takes a look at the real record of Christianity as a force for good in the world.

Atheists like to talk about slavery in the Bible. Chapter 11 talks about what the Bible really says, and provides some rational responses to the accusation.

Atheists like to talk about eternal punishment in Hell isn't a just punishment for just getting a few questions wrong on a theology exam. Chapter 12 provides an explanation and defense of the concept of Hell.

Atheists love to talk about how God commanded the Israelites to attack their enemies in the Bible. Chapter 13 explains who their enemies really were, and what was really happening in those wars.

Atheists feel that unrestricted sexual activity is very healthy and normal, and that the Biblical prohibitions outside of male-female marriage are repressive and unhealthy.  Chapter 14 explains why God has these rules in place, and supports his rules with evidence.

Atheists love to assert that they don't need God, because they can behave morally on their own. Chapter 15 explains how to answer this claim by talking about how well atheism grounds objective moral values, objective moral duties, free will and moral accountability: the minimum requirements for objective morality.

Atheists think that the mere existence of natural disasters and human immorality are incompatible with the God of

the Bible. Chapter 16 explains why this argument doesn't work, and why even the concept of evil requires God to exist.

I have an atheist friend in my office who can't defeat my scientific arguments for the origin of the universe, the fine-tuning and the origin of life. But still, he says to me, even if God exists, why would that matter to my life? Chapter 17 explains what difference Christianity makes in a person's life.

Atheists think that the life of Jesus has no relevance to their life, and that he has nothing to offer them anyway. Chapter 18 explains the uniqueness of Jesus and explains why his resurrection is relevant to our lives today.

It's important to understand that this book is not on the level of A. W. Tozer, G.K. Chesterton, Francis Chan, John Piper, etc. Those authors write for a Christian audience and therefore they do not equip you to answer realistic challenges from non-Christians. But the apologetics book we looked at actually equips you to answer challenges from non-Christians using logical arguments and evidence from mainstream history and science. You can use the material in that book in discussions outside the confines of your home and your church.

# Matthew Vines and Michael Brown debate homosexuality and the Bible on Moody radio

**Wintery Knight** · 3 October 2020 · Archived copy · Original

Details:

> Can you be gay and Christian? Matthew Vines says you can and he's created a viral video and best-selling book defending his view. This Saturday on Up for Debate, Vines joins host Julie Roys to debate author and leading evangelical apologist, Dr. Michael Brown. Is gay monogamy an option for Christians? Is it unloving to reject gay marriage? Listen and join the discussion this Saturday at 8 a.m. Central Time on Up for Debate!

Audio:

The audio of the Matthew Vines vs Michael Brown debate is streamed here on the Moody site.

**Summary key:** Julie Roys (JR), Matthew Vines (MV), Michael Brown (MB)

**Summary:**

Opening speeches:

- JR: Why should Christians be open to reinterpreting the Bible on homosexuality?
- MV: Consider the lives and testimonies of gay Christians. Here is my personal story.
- MV: According to the Bible, a person with same-sex attractions would have to embrace lifelong celibacy. I refuse to do that.
- MV: There are 6 passages in the Bible that are relevant to the goodness of homosexuality. All are negative.
- MV: None of these passages address gay relationships that are "long-term" and "faithful" that are based on "commitment" and "love".
- JR: You say that it is "damaging" for Christians to disagree with you views, is that true?
- MV: Yes. One of my friends declared his homosexuality and he did not feel safe to come home. He felt pain because Christians disagreed with him.
- MV: You cannot ask a person with same-sex attractions to be celibate, it causes too much harm to ask gays to abstain from sexual relationships.
- JR: Respond to Matthew.
- MB: The Bible only permits heterosexual sexuality and in every case condemns homosexual acts.
- MB: Matthew is taking his sexual preferences and activities as given, and reinterpreting the Bible to fit it.
- MB: Genesis talks about women being made to help men, and to fulfill God's commandment to procreate and fill the Earth.
- MB: The Bible speaks about the complementarity of the sexes when talking about how two become one in marriage.
- MB: I am very sensitive to the stories of people who are gay who experience discrimination as "gay Christians".
- MB: You can feel sad for people who have two conflicting commitments, but that doesn't mean we should redefine what the Bible says.
- JR: Stop talking, we have a break.

JR takes a caller for the next topic:

- Caller 1: I had same-sex attractions and I was able to change my sexuality.
- JR: Matthew, respond to that.

- MV: Alan Chambers of Exodus International says that 99.9% of people he worked with had not changed their gay orientation.
- MV: Lifelong celibacy is not acceptable to gays, so the Bible must be reinterpreted to suit gays.
- MB: Matthew thinks that God himself did not understand the concept of sexual orientation and inadvertently hurt gays because of his lack of knowledge.
- MB: There is a solution in the Bible for people who cannot be celibate, and that solution is heterosexual marriage
- MB: If a person is only attracted to pre-teen girls, do we then have to re-write the Bible to affirm that so they won't be "harmed"?
- MB: Alan Chambers was speaking for his own group, and his statement does not account for the fact that thousands of people DO change.
- JR: What about the Jones/Yarhouse study that found that 38% of reparative therapy subjects were successful in changing or chastity?
- MV: (no response to the question)
- MV: (to Brown) do you accept that the Bible forces gays to live out lifelong celibacy

Another break, then Brown replies:

- MB: Yes. But change is possible.
- MV: Do you know of any Christian who acknowledged that this was the consequence of the Bible's teaching for gays?
- MB: Paul's explanation that the options for ALL Christians are 1) celibacy or 2) heterosexual marriage. For 2000 years.
- MV: Paul (in Romans 1) is talking about people who are not "long-term", "faithful" gay relationships.
- MV: Paul was not aware of "long-term", "faithful" gay relationships at the time he wrote his prohibitions in Romans 1.
- JR: How do you know that fixed sexual orientation is true? And that the Biblical authors would written different things if they knew?
- JR: Are there any references in the first century to "long-term", "faithful" gay relationships?
- MB: Yes, in my book I quote prominent historian N. T. Wright who documents that those relationships were known.
- MB: Matthew's view requires that God did not know about sexual orientation when ordaining the Bible's content.
- MB: Leviticus 18 is for all people, for all time. This was not just for the Jews, this was for everyone.
- MV: I am not saying that Paul was wrong because he was ignorant.
- MV: Paul was writing in a context where "long-term", "faithful" gay relationships were unknown.
- MV: NT Wright does not cite first century texts, he cites a problematic 4th century text.
- MV: Absence of 1st-century references to "long-term", "faithful" gay relationships means that God did not intend to prohibit them.
- MB: Whenever the Bible speaks about homosexuality, it is opposed to it – Old Testament and New Testament.

Another break, then the conclusion:

- JR: Respond to the Leviticus prohibition, which prohibits homosexuality for everyone, for all time.
- MV: It is a universal prohibition on male same-sex intercourse, but it does not apply to Christians.
- MV: For example, Leviticus prohibits sex during a woman's menstrual period. And Christians are not bound by

that.

- MV: What is the reason for this prohibition of male-male sex in Leviticus? It's not affirm the complementarity of the sexual act.
- MV: The Bible prohibits male-male sex because it is written for a patriarchal culture.
- MV: In a patriarchal culture, women are viewed as inferior. That's why the Bible prohibits a man from taking the woman's role in sex.
- MB: The prohibition in Leviticus is a universal prohibition against male-male sex, applicable in all times and places.
- MB: Homosexual sex is a violation of the divine order.
- MB: We can see already the consequences of normalizing this: gay marriage, and supports for polygamy and polyamory.
- MV: So the earliest reference there is to a "long-term", "faithful" gay relationship is a 4th century text.
- MV: But that gay relationship is not like modern gay relationships.

I have a few comments about Vines' points below.

**My comments:**

Even heterosexuals who have not married are called upon to embrace lifelong celibacy. I am in my early 40s and am a virgin because I have not married. I wouldn't seek to reinrepret the Bible to allow premarital sex just because what I am doing is difficult. I would rather just do what the Bible says than reinterpret it to suit me. And it's just as hard for me to be chaste as it would be for him to be. In short, it's a character issue. He takes his right to recreational sex as non-negotiable, and reinterprets the Bible to suit. I take the Bible as non-negotiable, and comply with it regardless of whether it seems to make me less happy. With respect to the purposes of God for me in this world, my happiness is expendable. If I don't find someone to marry, I'm going to be "afflicted" with the lifelong celibacy that Vines seems to think is torture, but let me tell you – God is happy with the contributions I am making for him, and if I have to be chaste through my whole life, I am 100% fine with that. I serve the King. And not the reverse.

Notice that he talks about "long-term" but not permanent relationships, and "faithful" but not exclusive. This is important because the statistics show that gay relationships (depending on whether it is female-female or male-male) are prone to instability and/or infidelity. I just blogged on that recently, with reference to the *published research* on the subject. Vines is talking about a situation that does not obtain in the real world – according to the data. Gay relationships do not normally value permanence and exclusivity in the way that opposite-sex marriage relationships do, especially where the couple regularly attends church. The divorce rate and infidelity rate for religious couples is *far below* the rates for gay couples, depending on the sexes involved. Vines is committed to the idea that marriage is about feelings, e.g. – "love", but that's not the public purpose of marriage. Marriage is not about love, it's about complementarity of the sexes and providing for the needs of children. We have published studies like this one showing that there are negative impacts to children who are raised by gay couples, which dovetails with studies showing that children need a mother and that children need a father. We should not normalize any relationship that exposes children to harm. We should prefer to inconvenience adults than to harm children.

Matthew Vines made an argument that Christians have to stop saying that homosexuality is wrong, because it makes gay people feel excluded. I wrote previously about the argument that gay activists use where they say "if you don't agree with me and celebrate me and affirm me, then I'll commit suicide". In that post, I quoted a prominent gay activist who made exactly that argument. I don't find the threats to self-destruction to be a convincing argument *for the truth* of the view that gay marriage being the same as heterosexual marriage. In fact, this is confirmed by a recent study which showed that features of gay relationships themselves, and not social disapproval, is to blame for high rates of suicide in the gay community.

Vines seems to want to argue that the context in which the Bible authors were writing did not allow them to address

the problem of gays in “long-term”, “faithful” relationships. Well, we have already seen that statistically speaking, those relationships are in the minority. One British study mentioned in the post I linked to above found that only 25% of gay couples were intact after 8 years. The number is 82% for heterosexual marriages, and that *doesn't* filter by couples who abstain from premarital sex and who attend church regularly. If you add those two criteria, the number is going to be well above 82% in my opinion. Studies show that premarital chastity and church attendance *vastly* improve the stability and quality of marriages.

In addition, Vines is trying to argue that 1) the Bible authors were not aware of “long-term”, “faithful” gay relationships and 2) their failure to explicitly disqualify these “long-term”, “stable” gay sexual relationships means that the Bible actually condones them. A friend of mine pointed out that this is a textbook case of the argument from silence, where someone asserts that because something is not explicitly condemned, then it must be OK. Carried through to its logical end, that would mean that things like identity theft are OK, because they are not mentioned explicitly. Brown asserted that there was a blanket prohibition on homosexual acts. He is arguing from what we know. Vines says that “long-term”, “faithful” homosexual relationships are not mentioned, and are therefore OK. He is arguing from what we don't know. And he is trying to reverse the burden of proof so that he doesn't have to show evidence for his view. Brown wouldn't take the bait. The fact of the matter is that no one for the last 2000 years of church history have taken Vines' view. Every single Christian before Vines, who were closer to Jesus' teachings than Vines, understood the verses that Brown cited to be providing a blanket prohibition on homosexual sex acts. If Vines wants to claim that the Bible condones what he wants it to condone, he has to produce some positive evidence from the text or from church history or church fathers. He has *nothing* to support his case that could convince anyone that this is what Christians have believed, and ought to believe.

Finally, if you are looking for another debate, I blogged about a debate between Michael Brown and Eric Smaw. There's a video and summaries of the opening speeches in that post.

# William Lane Craig debates James Crossley on the resurrection of Jesus

**Wintery Knight** · 4 October 2020 · Archived copy · Original

Two horses fight it out, may the best horse win!
This is my favorite debate on the resurrection.

You can watch the debate here:

There is not much snark in this summary, because Crossley is a solid scholar, and very fair with the evidence.

SUMMARY

**William Lane Craig's opening speech**

Two contentions:

- There are four minimal facts that are accepted by most historians
- The best explanation of the four minimal facts is that God raised Jesus from the dead

Contention 1 of 2:

Fact 1: The burial

- The burial is multiply attested
  - The burial is based on the early source material that Mark used for his gospel
  - Scholars date this Markan source to within 10 years of the crucifixion
  - The burial is also in the early passage in 1 Cor 15:3-8
  - So you have 5 sources, some of which are very early
- The burial is credited to a member of the Sanhedrin
  - the burial is probable because shows an enemy of the church doing right
  - this makes it unlikely to to be an invention

Fact 2: The empty tomb

- The burial story supports the empty tomb

    - the site of Jesus' grave was known
    - the disciples could not proclaim a resurrection if the body were still in it
    - the antagonists to the early Christians could have produced the body
- The empty tomb is multiple attested
    - it's mentioned explicitly in Mark
    - it's in the separate sources used by Matthew and John
    - it's in the early sermons documented in Acts
    - it's implied by 1 Cor 15:3-8, because resurrection requires that the body is missing
- The empty tomb was discovered by women
    - the testimony of women of women was not normally allowed in courts of law
    - if this story was being made up, they would have chosen male disciples
- The empty tomb discover lacks legendary embellishment
    - there is no theological or apologetical reflection on the meaning of the tomb
- The early Jewish response implies that the tomb was empty
    - the response was that the disciples stole the body
    - that requires that the tomb was found empty

Fact 3: The appearances to individuals and groups, some of the them hostile

- The list of appearances is in 1 Cor 15:3-8
    - this material is extremely early, withing 1-3 years after the cross
    - James, the brother of Jesus, was not a believer when he got his appearance
    - Paul was hostile to the early church when he got his appearance
- Specific appearances are multiply attested
    - Peter: attested by Luke and Paul
    - The twelve: attested by Luke, John and Paul
    - The women: attested by Matthew and John

Fact 4: The early belief in the resurrection emerged in a hostile environment

- There was no background belief in a dying Messiah
- There was no background belief in a single person resurrecting before the general resurrection of all of the righteous at the end of the age
- The disciples were willing to die for their belief in the resurrection of Jesus
- The resurrection is the best explanation for the transformation of the disciples from frightened to reckless of death

Contention 2 of 2:

- The resurrection is the best explanation because it passes C.B. McCullough's six tests for historical explanations
- None of the naturalistic explanations accounts for the minimal facts as well as the resurrection

**James Crossley's opening speech**

Appeals to the majority of scholars doesn't prove anything

- the majority of people in the west are Christians so of course there are a majority of scholars that support the resurrection

- there are Christian schools where denial of the resurrection can result in termination

The best early sources (1 Cor 15:3-8 and Mark) are not that good

1 Cor 15:3-8 doesn't support the empty tomb

- verse 4 probably does imply a bodily resurrection
- the passage does have eyewitnesses to appearances of Jesus
- but there are no eyewitnesses to the empty tomb in this source
- appearances occur in other cultures in different times and places
- Jesus viewed himself as a martyr
- his followers may have had hallucinations

Mark 16:1-8

- Mark is dated to the late 30s and early 40s
- The women who discover the tomb tell no one about the empty tomb

The gospels show signs of having things added to them

- Jewish story telling practices allowed the teller to make things up to enhance their hero
- one example of this would be the story of the earthquake and the people coming out of their graves
- that story isn't in Mark, nor any external sources like Josephus
- if there really was a mass resurrection, where are these people today?
- so this passage in Matthew clearly shows that at least some parts of the New Testament could involve
- what about the contradiction between the women tell NO ONE and yet other people show up at the empty tomb
- the story about Jesus commissioning the early church to evangelize Gentiles was probably added
- there are also discrepancies in the timing of events and appearances
- why are there explicit statements of high Christology in John, but not in the earlier sources?

**William Lane Craig's first rebuttal**

Crossley's response to the burial: he accepts it

Crossley's response to the empty tomb: he thinks it was made up

- rabbinical stories are not comparable to the gospel accounts
- the rabbinical stories are just anecdotal creative story-telling
- the gospels are ancient biographies – the genre is completely different
- the rabbinic miracle stories are recorded much later than the gospels
- the rabbi's legal and moral ideas were written down right away
- the miracle stories were written down a century or two later
- in contrast, the miracle stories about Jesus are in the earliest sources, like Mark
- the rabbinical stories are intended as entertainment, not history
- the gospels are intended as biography
- just because there are some legendary/apocalyptic elements in Matthew, it doesn't undermine things like the crucfixion that are historically accurate

Crossley's response to the evidence for the empty tomb:

- no response to the burial

- the empty tomb cannot be made up, it was implied by Paul early on
- the women wouldn't have said nothing forever – they eventually talked after they arrived to where the disciples were
- no response to the lack of embellishment
- no response to the early Jewish polemic

Crossley's response to the appearances

- he agrees that the first followers of Jesus had experiences where they thought Jesus was still alive

Crossley's response to the early belief in the bodily resurrection:

- no response about how this belief in a resurrection could have emerged in the absence of background belief in the death of the Messiah and the resurrection of one man before the general resurrection of all the righteous at the end of the age

What about Crossley's hallucination theory?

- Crossley says that the followers of Jesus had visions, and they interpreted these visions against the story of the Maccabean martyrs who looked forward to their own resurrections
- but the hallucination hypothesis doesn't account for the empty tomb
- and the Maccabean martyrs were not expecting the resurrection of one man, and certainly not the Messiah – so that story doesn't provide the right background belief for a hallucination of a single resurrected person prior to the end of the age
- if the appearances were non-physical, the disciples would not have applied the word resurrection – it would just have been a vision
- the visions could easily be reconciled with the idea that somehow God was pleased with Jesus and that he had some glorified/vindicated non-corporeal existence – but not resurrection
- not only that, the hallucination hypothesis doesn't even explain the visions, because there were visions to groups, to skeptics and to enemies in several places

What about the argument that only Christians accept the resurrection?

- it's an ad hominem attack that avoids the arguments

**James Crossley's first rebuttal**

Regarding the burial:

- I could be persuaded of that the burial account is accurate

Regarding the non-expectation of a suffering/dying Messiah:

- Jesus thought he was going to die
- this thinking he was going to die overturned all previous Messianic expectations that the Messiah wouldn't suffer or die
- the early Jews could easily reconcile the idea of a suffering, dead man killed by the Romans with the power of the all-powerful Messiah who supposed to reign forever
- no actually bodily resurrection would have to happen to get them to continue to identify an executed corpse with the role of Messiah

Regarding the belief in the bodily resurrection:

- it would be natural for Jews, who believed in a general resurrection of all the rigtheous dead at the end of the

age, to interpret a non-physical vision of one man after he died as a bodily resurrection, even though no Jew had ever considered the resurrection of one man before the general resurrection before Jesus

Regarding the testimony of the women:

- Just because women were not able to testify in courts of law (unless there were no male witnesses), the early church might still invent a story where the women are the first witnesses
- first, the disciples had fled the scene, so only the women were left
- and it would have been a good idea for the early church to invent women as the first witnesses – the fact that they could not testify in court makes them ideal witnesses and very persuasive
- also, it's a good idea to invent women as witnesses, because the Romans had a rule that said that they never killed women, so they wouldn't have killed these women – Romans only ever kill men
- in any case, the first witness to the empty tomb is angel, so as long as people could talk to the angel as being the first witness, that's the best story to invent

Regarding the consensus of Christian scholars:

- I am not saying that Craig's facts are wrong, just that appealing to consensus is not legitimate
- he has to appeal to the evidence, not the consensus

Regarding my naturalistic bias:

- I don't know or care if naturalism is true, let's look at the evidence

Regarding the genre of the gospels:

- the creative story-telling is common in all genres, it's not a genre in itself
- stuff about Roman emperors also has creative story-telling

Regarding the legendary nature of the empty tomb in Mark:

- First, Christians interpreted the visions as a bodily resurrection
- Second, they invented the story of the empty tomb to go with that interpretation
- Third, they died for their invention

**William Lane Craig's second rebuttal**

The burial:

- Bill's case doesn't need to know the specifics of the burial, only that the location was known
- the location is important because it supports the empty tomb
- to proclaim a resurrection, the tomb would have to be empty
- a tomb with a known location is easier to check

The empty tomb:

- creative story telling was common in Judaism: retelling OT stories (midrash), romances/novels, rabbinical anecdotes
- but the gospels are none of these genres – the gospels are ancient biographies
- Craig also gave five arguments as to why the tomb was empty
- the burial story supports the empty tomb
- there is multiple *independent* attestation, then it cannot be a creative fiction invented in Mark alone
- the witnesses were in Jerusalem, so they were in a position to know

- regarding the women, even though Jesus respected the women, their testimony would not be convincing to *others*, so why invent a story where they are the witnesses
- the male disciples did not flee the scene, for example, Peter was there to deny Jesus three times
- if the story is made up, who cares what the male disciples did, just invent them on the scene anyway
- the angel is not authoritative, because the angel cannot be questioned, but the women can be questioned
- there was no response on the lack of embellishment
- there was no response to the earliest Jewish response implying that the tomb was empty

The appearances:

- we agree on the appearances

The early belief in the resurrection:

- he says that Jesus predicted his own death
- yes, but that would only cause people to think that he was a martyr, not that he was the messiah – something else is needed for them to keep their believe that he was the Messiah even after he died, because the Messiah wasn't supposed to die
- and of course, there was no expectation of a single person rising from the dead before the general resurrection, and certainly not the Messiah

The consensus of scholars:

- Jewish scholars like Geza Vermes and Pinchas Lapide accept these minimal facts like the empty tomb, it's not just Christian scholars

Against Crossley's hallucination hypothesis:

- it doesn't explain the empty the tomb
- it doesn't explain the early belief in the resurrection
- hallucinations would only lead to the idea that God had exalted/glorified Jesus, not that he was bodily raised from the dead
- the hallucination theory cannot accommodate all of the different kinds of appearances; individual, group, skeptic, enemy, etc.

The pre-supposition of naturalism:

- if Crossley is not committed to naturalism, then he should be open to the minimal facts and to the best explanation of those facts
- the hallucination hypothesis has too many problems
- the resurrection hypothesis explains everything, and well

**James Crossley's second rebuttal**

Religious pluralism:

- well, there are lots of other religious books
- those other religious books have late sources, and are filled with legends and myths, and no eyewitness testimony
- so why should we trust 1 Cor 15 and the early source for Mark and the other early eyewitness testimony in the New Testament?
- if other religious books can be rejected for historical reasons, then surely the New Testament can be rejected for historical reasons

Genre:

- the genre of ancient biography *can* incorporate and commonly incorporates invented legendaryt story-telling
- this is common in Roman, Greek and Jewish literature and everyone accepts that

Empty tomb: multiple attestation

- ok, so maybe the empty tomb is multiply attested, but that just gets back to a belief, not to a fact
- multiple attestation is not the only criteria, and Craig needs to use the other criteria to make his case stronger

Empty tomb: invented

- if there is a belief in the resurrection caused by the visions, then the empty tomb would have to be invented
- why aren't there more reliable stories of people visiting the empty tomb in more sources?

Empty tomb: role of the women

- there are women who have an important role in the Bible, like Judith and Esther
- Mark's passage may have used women who then kept silent in order to explain why no one knew where the empty tomb was
- if the fleeing of the men is plausible to explain the women, then why not use that? why appeal to the supernatural?
- we should prefer any explanation that is naturalistic even if it is not as good as the supernatural explanation at explaining everything

Empty tomb: embellishment

- well there is an angel there, that's an embellishment
- anyway, when you say there is no embellishment, what are you comparing it to that makes you say that?

Appearances: anthropology

- I've read anthropology literature that has some cases where people have hallucinations as groups

Appearances: theology

- the hallucinations would not be interpreted against the background theological beliefs that ruled out the resurrection of one man before then general resurrection of all the righteous dead
- these hallucinations could have been so compelling that they made the earliest Christians, and skeptics like James, and enemies like the Pharisee Paul abandon all of their previous background beliefs, proclaim the new doctrine of a crucified and resurrected Messiah which no one had ever expected, and then gone on to die for that belief
- the hallucinations could have changed all of their theology and reversed all of their beliefs about the what the word resurrection meant

**William Lane Craig's conclusion**

Supernaturalism:

- None of the four facts are supernatural, they are natural, and ascertained by historians using normal historical methods
- the supernatural part only comes in after we decide on the facts when we are deciding which explanation is the best
- a tomb being found empty is not a miraculous fact

Genre:

- the gospels are not analagous to these rabbinical stories, the purpose and dating is different

Empty tomb:

- what multiple attestation shows is that it was not made-up by Mark
- and the argument was augmented with other criteria, like the criterion of embarrassment and the criterion of dissimilarity
- Judith and Esther are very rare exceptions, normally women were not viewed as reliable witnesses
- if the story was invented, whatever purpose the inventors had would have been better served by inventing male witnesses
- Craig grants that the angel may be an embellishment for the sake of argument, but there are no other embellishments
- the real embellishments occur in forged gnostic gospels in the second and third centuries, where there are theological motifs added to the bare fact of the empty tomb (e.g. – the talking cross in the Gospel of Peter)
- he had no response to the earliest jewish response which implied an empty tomb

Belief in the resurrection:

- there was no way for Jewish people to interpret an appearance as a bodily resurrection before the end of the world, they did not expect that
- they could have imagined exaltation, but not a bodily resurrection

**James Crossley's conclusion**

Supernatural explanation:

- as long as there is any other other possible naturalistic explanation, we should prefer that, no matter how unlikely

Creative stories:

- some of these creative stories appear within the lifetimes of the people connected to the events (none mentioned)

Embellishment:

- you should compare to earlier stories when looking for embellishments, not later
- and we don't have any earlier sources, so we just don't know the extent of the embellishment

Jewish response:

- they probably just heard about the empty tomb, and didn't check on it, then invented the stole-the-body explanation without ever checking to see if the tomb was empty or not

# White supremacist Charlottesville organizer endorses Biden, Democrats

**Wintery Knight** · 5 October 2020 · Archived copy · Original

[image]
Major pro-abortion group endorses Joe Biden for President
I spoke to some white Democrats in my office, and they were telling me what a racist Trump is. I asked which Trump policy harms blacks the most. They couldn't think of one. I suggested the record low unemployment rate for blacks. They said not that one. I wonder what they would think about this news story about the most famous white supremacist Nazi racist in America.

The Federalist reports:

> Richard Spencer, neo-Nazi, white supremacist, and organizer of the infamous 2017 Charlottesville riots, announced yesterday on Twitter that he will be voting for Joe Biden in the upcoming 2020 election.
>
> A Twitter user asked Spencer if he will be voting for Biden or sitting out the election, given his belief that "Biden/Kamala will be tougher on crime/BLM than Trump." Spencer responded, "I plan to vote for Biden and a straight democratic ticket. It's not based on 'accelerationism' or anything like that; the liberals are clearly more competent people."
>
> […]During his keynote speech in Charlottesville, Spencer explained how abortion advances white nationalist goals, stating, "The people who are having abortions are generally very often black or Hispanic or from very poor circumstances."
>
> It's true that the vast majority of Planned Parenthood clinics, the leading abortion provider in the U.S., are in minority neighborhoods. According to the CDC's Abortion Surveillance report, black women make up 34 percent of all abortions in the United States, though they are only approximately 12 percent of the U.S. female population. The Charlotte Lozier Institute in New York City reported that black women in New York City have more abortions than live births. This is not too surprising considering the Planned Parenthood's original goal of targeting the offspring of the poor, of minorities, and babies who are physically or mentally challenged.
>
> The Biden/ Harris ticket has been named by the Susan B. Anthony List the "most pro-abortion ticket" in U.S. history. Sen. Kamala Harris is a pro-abortion extremist who supports late-term abortion. Alternatively, Trump has maintained firmly pro-life policies during his presidency and is actually the first sitting president in U.S. history to speak at the annual "March for Life" in Washington, D.C.
>
> Since he kicked off his presidential campaign, Biden has made various racist comments. His own running mate even accused Biden of supporting racist policies when she viciously attacked him on the debate stage in prime time.
>
> When pressed by Errol Barnett of CBS News on whether he'd taken a cognitive test, Biden fired back saying that the question was akin to asking the black reporter if he would take a drug test to see if "you're taking cocaine or not" and if he was a "junkie."
>
> In an interview with National Public Radio's Lulu Garcia-Navarro, Biden claimed that Latinos were more intellectually diverse than black people. "Unlike the African American community with notable exceptions," said Biden. "the Latino community is an incredibly diverse community with incredibly different attitudes about different things," he told the Latina reporter.
>
> Last year, Joe Biden told the Asian & Latino Coalition in Des Moines, Iowa, that "poor kids are just as bright and just as talented as white kids."
>
> In an interview with The Breakfast Club Biden said "If you have a problem figuring out whether you're voting for me or Trump, then you ain't black."

It seems to me that Trump has done enough to earn the votes of black Americans by giving them the lowest unemployment rate in 50 years, pushing through criminal justice reforms, and funding Opportunity Zone investments in various poor communities.

# New study: Angus Reid Institute analyzes Canada's single payer healthcare system

**Wintery Knight** · 6 October 2020 · Archived copy · Original

The cost of healthcare for average Canadian households

I found two interesting studies from Canada's Angus Reid Institute describing single payer health care in Canada. I'm very interested in find out what things are like in countries that have true government-run health care. A typical Canadian family pays $13,000+ per year per household for healthcare, or about $585,000 over their working lives. What are they getting for all that money?

Here is the first Angus Reid article:

> The study finds more than 2 million Canadians aged 55 and older face significant barriers when accessing the health care system in their province, such as being unable to find a family doctor or experiencing lengthy wait-times for surgery, diagnostic tests, or specialist visits.
>
> Moreover, most Canadians in this age group have at least some difficulty getting the care they want or need in a timely manner.
>
> The study focuses on the health care experiences of older Canadians, as well as their assessments of the quality of care they receive.

According to the article, 31% of respondents (aged 55 and older) rated access to the government's healthcare system as "easy". 48% had "moderate" problems with access, and 21% had "major" problems with access.

Remember: in the Canadian system, you pay your money up front in taxes, and then they decide how much healthcare you will get *later* – and how soon you will get it. If you worked from ages 20 to age 65, then your household will have paid 45 x $13,000 = $585,000 into the system, in order to get "moderate" problems with accessing healthcare after you're aged 55.

And the Canadian system DOES NOT cover prescription drugs.

The second Angus Reid article explains:

> This second part of the study finds one-in-six Canadians (17%) in the 55-plus age group – a figure that represents upwards of 1.8 million people – say that they or someone else in their household have taken prescription drugs in a way other than prescribed because of cost.
>
> One-in-ten (10%) have decided to simply not fill a prescription because it was too expensive, and a similar number (9%) have decided not to renew one for the same reason. One-in-eight (12%) have taken steps to stretch their prescriptions, such as cutting pills or skipping doses.
>
> Some 17 per cent of Canadians 55 and older have done at least one of these things, and that proportion rises among those who have greater difficulty accessing other aspects of the health care system.

In a previous blog post, I reported on how Canadians have to wait in order to see their GP doctor. If that doctor refers them to a specialist, then they have to wait to see the specialist. And if that specialist schedules surgery, then they have to wait for their surgery appointment. The delays can easily go from weeks to months and even years. The MEDIAN delay from GP referral to treatment is 19.5 weeks.

But remember – they paid into the system FIRST. The decisions about when and if they will be treated are made later, by experts in the government. This is what it means for a government monopoly to run health care. There are no free exchanges of money for service in a competitive free market. Costs are controlled by delaying and withholding treatment. And no one knows this better than elderly Canadians themselves. But by the time they realize how badly they've been swindled, it's too late to get their money back out. You can't pull your tax money out of government if you are disappointed with the service you receive. There are no refunds. There are no returns.

# Should Americans vote for the Democrat Green New Deal in November?

**Wintery Knight** · 7 October 2020 · Archived copy · Original

Should you support the Democrats' Green New Deal?

Why did so many people vote for communist regimes in the last hundred years? Communist leaders – who had no demonstrated achievements in economic policy – simply promised voters all sorts of free stuff, e.g. – a guaranteed job, free health care, paid retirement, etc. When the expected benefits didn't appear, the communist leaders blamed others for their failures, and naturally, those others had to die.

Think that couldn't happen here? Well, a lot of leading Democrats sure sound like communist leaders. Promising to confiscate legally-owned firearms. Promising to abolish private health insurance. Promising to nationalize private retirement accounts. And promising to replace our current energy industry with a new government-controlled green energy industry.

Let's look at that last one: the new government-controlled energy industry.

The Federalist reports on the Green New Deal plan.

> A number of Democratic Party presidential hopefuls — including Cory Booker, Kamala Harris, Elizabeth Warren, Kirsten Gillibrand, Julián Castro, and Beto O'Rourke, for starters — have already endorsed or expressed support for the "Green New Deal" (GND). Today, Rep. Alexandria Ocasio-Cortez and Sen. Edward J. Markey dropped details about her plan.
>
> […]While some of the specifics need to be ironed out, the plan's authors assure that this "massive transformation of our society" needs some "clear goals and a timeline." The timeline is ten years. Here are some of the goals:

> - **Ban affordable energy.** GND calls for the elimination of all fossil fuel energy production, the lifeblood of American industry and life, which includes not only all oil but also natural gas — one of the cheapest sources of American energy, and one of the reasons the United States has been able to lead the world in carbon-emissions reduction.

> - **Eliminate nuclear energy.** The GND also calls for eliminating all nuclear power, one of the only productive and somewhat affordable "clean" energy sources available to us, in 11 years. This move would

> purge around 20 percent of American energy production so you can rely on intermittent wind for your energy needs.

- **Eliminate 99 percent of cars.** The authors state that the GND would like to replace every "combustion-engine vehicle" — trucks, airplanes, boats, and 99 percent of cars — within ten years. Charging stations for electric vehicles will be built "everywhere," though how power plants will provide the energy needed to charge them is a mystery.

- **Gut and rebuild every building in America.** Markey and Cortez want to "retrofit every building in America" with "state of the art energy efficiency." I repeat, "every building in America." That includes every home, factory, and apartment building, which will all need, for starters, to have their entire working heating and cooling systems ripped out and replaced with…well, with whatever technology Democrats are going invent in their committee hearings, I guess.

- **Eliminate air travel.** GND calls for building out "highspeed rail at a scale where air travel stops becoming necessary."

- **A government-guaranteed job.** The bill promises the United States government will provide every single American with a job that includes a "family-sustaining wage, family and medical leave, vacations, and a pension." You can imagine that those left in the private sector would be funding these through some unspecified "massive" taxation.

- **Free education for life.** GND promises free college or trade schools for every American.

- **A salubrious diet.** The GND promises the government will provide "healthy food" to every American.

- **A house.** The GND promises that the government will provide, "safe, affordable, adequate housing" for every American citizen.

- **Free money.** The GND aims to provide, and I am not making this up, "economic security" for all who are "unable or unwilling" to work.

- **Ban meat.** Ocasio-Cortez admits that we can't get zero emissions in 10 years "because we aren't sure that we'll be able to fully get rid of farting cows and airplanes that fast." The only way to get rid of farting cows is to get rid of beef.

Have any of these ideas been tried in any states? Trains seem to run over budget when they are built, and they fail to turn a profit afterwards. But most of these have not been tried anywhere, so how are we supposed to know how

much they will cost to implement, and whether they will actually work?

The cost of the Green New Deal has been figured at $49 trillion over the first 10 years. (And that's in addition to the government takeover of healthcare "Medicare for All", which costs $32 trillion over 10 years).

Can the money come from "the rich"?

Just one problem with that:

> The plan itself seems to insinuate that billionaires can pay for the whole thing. Of course, best case scenario, it is estimated that instituting a top marginal tax rate of 70 percent would raise a little more than $700 billion over that decade.

If the money for the Green New Deal can't come from the wealthiest 1%, then where will it come from? It will come from your company. It will come from your boss. It will come from you.

# Did Hillary Clinton push Trump-Russia hoax to distract from her e-mail server scandal?

**Wintery Knight** · 8 October 2020 · Archived copy · Original

Left to right: Comey, Lynch, Clinton, McCabe

You'll remember that the hoax was pushed by the Democrats, their allies in the mainstream media, and the so-called "fact-checkers" for 2.5 years, until an investigation found that there was no corruption, and no collusion. Well, a new declassified document released by the Director of National Intelligence John Ratcliffe sheds so light on who was behind the hoax, and why that person pushed it.

Fox News reports:

> **EXCLUSIVE:** Director of National Intelligence John Ratcliffe on Tuesday declassified documents that revealed former CIA Director John Brennan briefed former President Obama on Hillary Clinton's purported "plan" to tie then-candidate Donald Trump to Russia as "a means of distracting the public from her use of a private email server" ahead of the 2016 presidential election, Fox News has learned.
>
> Ratcliffe declassified Brennan's handwritten notes – which were taken after he briefed Obama on the intelligence the CIA received – and a CIA memo, which revealed that officials referred the matter to the FBI for potential investigative action.
>
> […]The declassification comes after Ratcliffe, last week, shared newly-declassified information with the Senate Judiciary Committee which revealed that in September 2016, U.S. intelligence officials forwarded an investigative referral on Hillary Clinton purportedly approving "a plan concerning U.S. presidential candidate Donald Trump and Russian hackers hampering U.S. elections" in order to distract the public from her email scandal.
>
> That referral was sent to Comey and then-Deputy Assistant Director of Counterintelligence Peter Strzok.

I always include a summary of the key facts of the Trump-Russia collusion hoax in my posts, and fortunately, the Fox News article had one:

> Meanwhile, last week, during a hearing before the Senate Judiciary Committee, Comey was asked whether he received an investigative referral on Clinton from 2016, but he said it didn't "ring any bells."
>
> "You don't remember getting an investigatory lead from the intelligence community? Sept. 7, 2016, U.S. intelligence officials forwarded an investigative referral to James Comey and Strzok regarding Clinton's approval of a plan [about] Trump…as a means of distraction?" Graham asked Comey.
>
> "That doesn't ring any bells with me," Comey said.

> “That’s a pretty stunning thing that it doesn’t ring a bell,” Graham fired back. “You get this inquiry from the intelligence community to look at the Clinton campaign trying to create a distraction, accusing Trump of being a Russian agent or a Russian stooge.”
>
> Graham questioned “how far-fetched is that,” citing the fact that Clinton campaign and the Democratic National Committee, through law firm Perkins Coie, hired Fusion GPS and ex-British intelligence officer Christopher Steele to author and compile information for the controversial and unverified anti-Trump dossier.
>
> The Clinton campaign and the Democratic National Committee, through law firm Perkins Coie, hired Fusion GPS and ex-British intelligence officer Christopher Steele to author and compile information for the controversial and unverified anti-Trump dossier.
>
> The dossier contains claims about alleged ties between Donald Trump and Russia that served as the basis for Foreign Intelligence Surveillance Act (FISA) warrants obtained against former Trump campaign aide Carter Page.

So, if this report is true, Hillary Clinton is the source for the Trump-Russia collusion hoax, and Obama knew about it all along. It went right to the top, just like the IRS persecution of conservative organizations in Obama’s re-election year. Another story the mainstream media news ignored.

I remember how the mainstream news media, the Democrat party politicians, and the so-called “fact-checkers” all pushed the Trump-Russia collusion narrative. I don’t find Comey’s failure to remember very convincing.

# My conversation about morality with an atheist millennial man

**Wintery Knight** · 9 October 2020 · Archived copy · Original

If you define morality as "whatever I want to do" then you'll always be "moral"

I spent some time talking to an atheist millennial recently. He considers himself a moral person, and he is very helpful to others. I asked him to define morality, and he said that morality was feeling good, and helping other people to feel good. I was trying to think of a way to punch a hole in his feelings-based utilitarianism. How could I show him that happy feelings are not a good basis for morality?

Now, you're probably thinking that abortion is the most obvious example of something that is morally wrong – it's just killing a baby because adults don't want to take responsibility for their foolish pursuit of pleasure. But atheists typically don't think of unborn children as people. They usually believe in naturalistic evolution, and they are committed to a view of reality where the universe is an accident, human beings are accidents, there are no objective human rights, and biological evolution progresses because the strong survive while the weak die. So you aren't going to be able to generate a moral standard that includes compassion for weak unborn children on that scenario. If the rule is "let's do what makes us happy", and the unborn child can't voice her opinion, then the selfish grown-ups win.

Instead, I decided to focus on fatherlessness. I asked him whether he thought that fatherlessness harmed children. Surprisingly, he said that it didn't, and that he had a relative who was doing a great job raising fatherless kids. I asked him if he had ever looked at the research on what father absence does to children. He hadn't. Then I asked him if a system of sexual rules based on "me feeling good, and other people around me feeling good", was likely to protect children. He went silent.

Well, that was the end of that conversation. And I think it was a nice window into how millennials – who are absolutely clueless about what research says about sex, dating, marriage and parenting – think about relationships. They're making decisions based on their feelings, then acting surprised when their "common sense" decisions based on happiness "in the moment" blow up in their faces, and destroy the lives of their children, including their unborn children.

Unfortunately, young people are having children outside of a marriage commitment more and more.

Out-of-wedlocks births rising as cohabitation replaces marriage
Far-left Bloomberg News reports:

Forty percent of all births in the U.S. now occur outside of wedlock, up from 10 percent in 1970, according to an annual report released on Wednesday by the United Nations Population Fund (UNFPA), the largest international provider of sexual and reproductive health services. That number is even higher in the European Union.

The EU has a higher rate of fatherless births because they have high taxes and big government to allow women to have children without having to commit to a husband:

> The EU likely sees more births out of wedlock because many member countries have welfare systems that support gender-balanced child care, said Michael Hermann, UNFPA's senior adviser on economics and demography, in an interview. Public health care systems, paid paternal leave, early education programs and tax incentives give unwed parents support beyond what a partner can provide.

More welfare and more government services make it easier for women to pursue relationships with men who aren't interested in marriage. Hot bad boys who give them all the tingles. Big government makes those boring, predictable marriage-ready men dispensable. Big government also makes it much harder for a man who does marry to afford a stay-at-home mother for his kids, because he has to pay higher taxes for big government.

More:

> The data show such births in the U.S. and EU are predominantly to unmarried couples living together rather than to single mothers, the report says.
>
> […]Jones also noted that the rise in births outside of marriage is closely correlated to delays in childbearing. "Women are claiming their ground professionally," she said. "Delaying motherhood is a rational decision when you consider the impact it can have on your career, and that's contributing to this trend."
>
> [….]The traditional progression of Western life "has been reversed," said John Santelli, a professor in population, family health and pediatrics at Columbia's Mailman School of Public Health. "Cohabiting partners are having children before getting married. That's a long-term trend across developing nations."
>
> Regardless of marital status, more couples are choosing not to have kids at all. The U.S. fertility rate hit a historic 30-year low last year, according to the Centers for Disease Control and Prevention. Hermann said the rise in births outside of wedlock has actually mitigated the decline in fertility, which "would be much steeper if women weren't having children outside marriage."

What's interesting about this anti-marriage article is that they have nothing to say about the research showing that cohabitation – and also marriages that occur after a period of cohabitation – are inferior to no-cohabitation marriages. People who are serious about self-control, and who are serious about committing through thick and thin, tend to have longer lasting marriages. But we don't prioritize chastity, fidelity and self-sacrificial commitment anymore, because that relationships that require self-denial make us unhappy.

The article concludes: "We can't go back to the '50s". Right. Because if feelings-based "morality" is assumed, then any choice between adult happiness and children's happiness will favor the adults. Today's young people carefully AVOID any evidence that contradicts their new "happiness-morality". They act surprised when their unstable relationships dissolve, leaving children separated from their fathers. Marriage requires that both partners have a system of morality that puts the commitment above happy feelings. People have to be accustomed to doing things that feel bad, just because they are good and moral things to do according to an objective standard of morality. The new atheist morality of happy feelings doesn't develop the character needed for commitment.

If you ask an atheist millennial, they think they are doing a great job of being "moral". They don't see the messes they are making for children as something that they are causing themselves, with their own foolish feelings-based decision-making. They think they know everything about relationships through their feelings. They think that they are exempt from the patterns of cause and effect in the peer-reviewed research.

# Video, audio and summary of William Lane Craig vs Peter Millican debate

**Wintery Knight** · 10 October 2020 · Archived copy · Original

British Spitfire and German Messerschmitt Me 109 locked in a dogfight

Here's a debate with a well-qualified atheist and Dr. Craig.

Video:

Audio:

Description from the Youtube upload:

> This debate on "Does God Exist?" took place in front of a capacity audience at the Great Hall, University of Birmingham. It was recorded on Friday 21st October 2011 as part of the UK Reasonable Faith Tour with William Lane Craig.
>
> William Lane Craig is Research Professor of Philosophy at Talbot School of Theology, La Mirada, California and a leading philosopher of religion. Peter Millican is Gilbert Ryle Professor of Philosophy at Hertford College, University of Oxford and a noted scholar in studies of Hume.
>
> The debate was hosted by the University of Birmingham Student Philosophy Society, and the debate was moderated by Professor Carl Chinn.

Dr. Millican proved to be an amazing debater, and that allowed Dr. Craig to show the full range of his talents in a way that he has never done before. This was a great debate – right up there with Craig's two debates against Austin Dacey and Paul Draper. Dr. Millican is excellent at analytical philosophy, had studied cosmology and physics, and he came prepared to answer Craig's arguments. There is NO SNARK in my debate summary below, out of respect for Dr. Millican. However, I haven't proof-read it, so please do point out any errors. There is about 30 minutes of Q&A time at the end.

**Dr. Craig's opening speech:**

There are good reasons to believe that God exists.

There are no good reasons to believe that God does not exist.

A1) The origin of the universe

1. The universe began to exist
2. If the universe began to exist, then the universe has a transcendent cause.
3. The universe has a transcendent cause.

The origin of the universe is confirmed by philosophical arguments and scientific evidence.

There cannot be an actual infinite number of past events, because mathematical operations like subtraction and division cannot be applied to actual infinities.

The Borde-Guth-Vilenkin (BGV) proof shows that every universe that expands must have a space-time boundary in the past. That means that no expanding universe, no matter what the model, cannot be eternal into the past.

Even speculative alternative cosmologies do not escape the need for a beginning.

The cause of the universe must be transcendent and supernatural. It must be uncaused, because there cannot be an infinite regress of causes. It must be eternal, because it created time. It must be non-physical, because it created space. There are only two possibilities for such a cause. It could be an abstract object or an agent. Abstract objects cannot cause effects. Therefore, the cause is an agent.

A2) The fine-tuning of the universe

1. The fine-tuning of the universe is either due to law, chance or design.
2. It is not due to law or chance.
3. Therefore, it is due to design.

The progress of science has revealed that the Big Bang was fine-tuned to allow for the existence of intelligent life.

Type 1: Constants like the gravitational constant are finely-tuned, and are not dependent on the laws of physics.

Type 2: Quantities like the amount of entropy in the universe, are not dependent on the laws of physics.

The range of life-permitting values is incredibly small compared to the possible values of the constants and quantities. (Like having a lottery with a million black balls and one white ball, and you pick the white ball. Even though each individual ball has the same tiny chance of being picked, but the odds are overwhelming that the whichever ball you pick will be black, and not white).

Not only are the numbers not due to laws, but they are not due to chance either. It's not just that the settings are unlikely, it's that they are unlikely and they conform to an independent pattern – namely, the ability to support complex life.

A3) The moral argument

1. If God does not exist, then objective moral values do not exist.
2. Objective morality does exist.
3. Therefore, God exists.

Objective moral values are values that exist independently of whether any humans believe them or not.

Michael Ruse, an atheist philosopher agrees that if God does not exist, then there is only a "herd morality" that is determined by biological evolution and social evolution. There no objective moral standard, just different customs and conventions that vary by time and place. Anyone who acts against the herd morality is merely being unfashionable and unconventional. On the atheistic view, there is nothing objective and binding about this evolved "herd morality". However, people do experience objective moral values, and these cannot be grounded on atheism.

Furthermore, God must exist in order to argue that there is evil in the world. In order to be able to make a

distinction between good and evil that is objective, there has to be a God to determine a standard of good and evil that is binding regardless of the varying customs and conventions of different people groups. Even when a person argues against God's existence by pointing to the "evil" in the world, they must assume objective moral values, and a God who grounds those objective moral values.

A4) The resurrection of Jesus.

1. There are certain minimal facts that are admitted by the majority of historians, across the ideological spectrum: the empty tomb, the appearances and the early belief in the resurrection.
2. Naturalistic attempts to explain these minimal facts fail.
3. The best explanation of these facts is that Jesus rose from the dead.

A5) Religious experience

People can know that God exists through experience. In the absence of defeaters for these experiences, these experiences constitute evidence for God's existence.

**Dr. Millican's opening speech:**

Dr. Craig has the burden of proof because he claims that God exists.

The Christian God hypothesis:

1. An omnipotent, omniscient, omnibenevolent God created the universe.
2. This God cares about humans.
3. This God has acted in history though the life of Jesus of Nazareth.

This is a factual claim, and we are discussing the evidence for whether these claims are true or false. We are not interested in religious practice, or the consolation of religious belief, nor any other religions.

A1) Religious pluralism and epistemology

Human beings are purpose-finding creatures – we are prone to prefer explanations that involve purpose.

Human beings are pattern-finding animals – we tend to find designs in states of affairs.

Human beings have an interest in maintaining religious hierarchies because of the power it gives them.

Religious beliefs are not determined by rational considerations, but are determined by geographic location.

The same non-scientific method of generating religious beliefs (purpose-finding, pattern-finding, geographic location, parental teaching, charismatic speakers, praise songs and worship, religious education, ancient holy books) is being used in several religions, and it leads to different, contradictory truth claims. So at least some of those conflicting claims are false. And if the method is generating some false claims, then it's not a good method, and it undermines all the religions that use those methods.

A2) Absence of evidence is evidence of absence

There is no scientific evidence for God.

A3) Mental processes depend on physical systems

There is no scientific evidence for a disembodied intelligence.

Our universal human experience is that intelligence and mental operations require a physical brain.

The quality of our thinking depends on physical conditions, like being tired or on drugs.

But Christian theists believe that mental processes can exist independently of an underlying physical reality, unimpaired by the death of the physical body and the brain.

R.A1) The origin of the universe

1. There is no evidence that whatever begins to exist requires a cause. All the evidence we have of things beginning to exist are when something is created from rearrangements of other things that already existed.

The closest analog we have to something coming into being from nothing is quantum particles coming into being from nothing, and that causation is random.

There is no evidence that thoughts can bring about physical effects, and Bill is arguing for a mental cause to the origin of the universe.

Even if things that begin to exist IN the universe have causes, it doesn't hold for the universe as a whole. Bill is committing the fallacy of composition.

Time begins with the universe, but our experience of causation is that it is a temporal process. So if there is no time "prior to" the universe's beginning, then how can there be a cause to the universe?

It's possible that there could be something outside our universe that is eternal.

It's also possible that the Big Bang could be wrong, and this universe could oscillate eternally and not require a beginning.

2. There are cosmological theories that avoid the beginning of the universe by positing a prior period of contraction prior to the Big Bang.

The beginning of this universe depends on general relativity, and that theory breaks down at the level of quantum mechanics.

3. There is no evidence that minds can exist without an underlying physical system. So even if there is a cause of the universe, then it is neither an abstract object nor a mind. It would have to be something else, and not something we are familiar with – we are just not in a position to speculate of what it could be.

R.A3) The moral argument

Atheists do believe in a standard of morality that is not based on what groups of humans believe.

Utilitarians think there is a standard of moral values that is objective, because the measure of human happiness (for the greatest number) is objective, even if people are mistaken about what promotes that happiness.

Kantians have a rational process for determining which moral imperatives should be universalized.

Humeans have a system that is rooted in natural human sentiment.

**Dr. Craig's first rebuttal:**

I do not have the only burden of proof. The topic is "Does God Exist?". If Dr. Millican answers "no" then he has a burden of proof, otherwise we are left with agnosticism.

R.A1) Religious pluralism and epistemology

First, there is no single common method of adopting a religion.

Second, MY method this evening is logic and evidence and personal experience – which is the same as his method. So his comments about how people in different religions adopt their religion through parents, church, singing, etc. have no bearing on the arguments I will be making.

R.A2) Absence of evidence is evidence of absence

Absence of evidence is only evidence of absence if we can reasonably expect that there should be some evidence that is not present. He would have to show that there should be more evidence for God's existence that the 5 arguments that I already presented – something that we should expect to see that we don't see.

R.A3) Mental processes depend on physical systems

No response by Dr. Craig. (but see below)

A1) The origin of the universe

1. He says that there are speculative cosmologies like the multiverse that escape the need for a beginning, but that's false, the BGV proof applies to them, and they do need a beginning.

He says that you can escape BGV by positing a contraction prior to the expansion. However Vilenkin says that any contraction phase is unstable and would introduce additional singularities that would hamper any later expansion phase.

He  says that we need a theory of quantum gravity in order to describe the early universe. But Vilenkin says that the BGV proof is independent of gravity as defined by general relativity.

He did not respond to the philosophical arguments for a beginning of the universe.

2. He says that we don't have experience of things coming into being except from material causes. However, it would be even more difficult to explain the universe coming into being on atheism since you can't appeal to a material cause nor to an efficient cause. Even Hume recognizes that things can't pop into being without causes.

He talks about how in quantum physics virtual particles appear out of nothing. But that's false, because the quantum vacuum in which virtual particles appear is not nothing, it is a sea of subatomic particles and energy. Quantum physics is not an exception to the idea that things that come into being require a cause.

He mentions the fallacy of composition. But I am not saying that everything in the universe has a cause, therefore the universe as a whole has a cause. I am saying that non-being has no capacity to bring something into being. Non-Being doesn't even have the potential to bring something into being.

3. He says that there are no unembodied minds, so the cause of the universe can't be an unembodied mind. But the argument concludes that there is a non-material cause, and it can't be an abstract object, so it would have to be a mind.

In addition, we ourselves are unembodied minds.  This is because physical objects cannot have the properties that minds have, like the property of having feelings.

Material conceptions of mind don't explain identity over time.

Material conceptions of mind don't explain free will.

Material conceptions of mind don't explain intentional states (thinking about something).

Material conceptions of mind don't explain mental causation.

The best explanation for our own first person experience of the mental realm is a substance dualism. We are non-material minds, and we can cause effects in the physical world. And God does the same thing. He is a mind, and he causes physical effects.

A2) He gave no response.

A3) He says that there are atheistic theories of morality that don't depend on the opinions of groups. But these theories all depend on the idea that human beings have instrinsic value – that they are the sorts of things to which moral considerations apply. Naturalism cannot ground this moral value – human beings are no more valuable any other animal.

Also, there are no objective moral obligations in naturalist systems of morality, because there is no one in authority to command them. Moral prescriptions require moral prescribers.

A4) He gave no response.

A5) He gave no response.

**Dr. Millican's first rebuttal:**

R.A2) The fine-tuning argument

We have to be careful not to judge what counts as finely-tuned through our intuitions.

We have to be careful about reasoning for a sample size of this one observable universe.

We don't really know about the full range of possibilities for these constants and quantities.

There might be other universes that we can't observe that aren't fine-tuned, and we just happen to be in the one that is fine-tuned.

The fine-tuning might be solved by future discoveries, like the inflationary cosmology removed some of the fine-tuning.

There might be a multiverse that we don't have evidence for right now.

We need to be careful about using science to prove God because science might change in the future.

The universe is very big and mysterious.

This argument doesn't prove that God is good. He could be evil = anti-God.

God created the universe inefficiently if his goal was to produce life.

God created the universe too big.

God created the universe too old.

God created too many galaxies and stars that are not hospitable to life.

If the universe were fine-tuned for life, then there should be more aliens.

If the universe were fine-tuned for life, then there are probably lots of alien civilizations. But then Jesus would have to appear to all of the aliens too.

R.A1) The origin of the universe

2. It's not a big deal that you can get multiple solutions to equations involving subtraction of actual infinities. For example, the equation 0 x y = 0 has many solutions for y, but that doesn't mean that multiplication doesn't work in the real world.

A2) Absence of evidence is evidence of absence

I would expect that there would be more evidence than there is.

R.A1) The origin of the universe

2. The BVG proof might be overturned by future scientific discoveries. We have no reason to be confident in current physics.

I agree that the quantum vacuum is something and not nothing, but it's similar to nothing.

We don't have any reason to believe that things that come into being require causes – except for our universal experience that this is always the case.

3. As to the cause of the universe coming into being, you said that it could only be an abstract object or a mind, and it can't be an abstract object because they don't cause effects, so it must be a mind. But there are all sorts of things we've never thought of that it could be other than a mind.

I agree that mental properties are not physical properties and that epiphenomenalism is incorrect. Physical objects

can have “algorithmic properties” as well as physical properties, it doesn’t mean that computers have minds.

**Dr. Craig’s second rebuttal:**

R.A2) Absence of evidence is evidence of absence

He expressed his personal opinion that there should be more evidence, but that’s not an argument.

God knows how people will respond to getting more evidence or less evidence and he has to be careful not to take away their free will to disbelieve by piling them up with coercive evidence. God’s goal is not just to convince people that he exists. God’s goal is to have people respond to him and pursue him.

A1) The origin of the universe

2. He said that multiple answers to equations are no problem. But the problem is that you can’t translate multiple answers into a real world context.

The problem is that you are subtracting an identical number from an identical number and getting contradictory results, and that cannot be translated into the real world, where subtraction always gives a definite single result.

He talks about how you can get multiple answers with multiplication by 0. But 0 is not a real quantity, it is just the absence of something, and that cannot translate into the real world, because it has no being.

He says that I am only using evidence from current physics. But that is the point – the evidence of current physics and cosmology supports the beginning of the universe.

3. He said that an umembodied mind can’t be the cause, but we are minds and we cause effects on our physical bodies.

In addition, the design argument supports the idea that the cause of the universe is intelligent.

A2) The fine-tuning of the universe

He says we should be cautious. Of course.

He says the probabilities can’t be assessed. But you can just take the current value and perturb it and see that the resulting universe loses its ability to support life, and you can test an entire range around the current value to see that that vast majority of values in the range don’t permit life.

He says that the current physics is not well-established, but there are so many examples of fine-tuning across so many different areas of science that it is not likely that all of them will be overturned, and the number of finely-tuned constants and quantities has been growing, not shrinking.

He says it doesn’t prove that God is good, and he’s right – that’s what the moral argument is for.

He says that God isn’t efficient enough, but efficiency is only important for those who have limited time and/or limited resources. But God has unlimited time and resources.

He says that the universe is too old, but the large age of the universe is a requirement to support intelligent life – (i.e. – you need third generation stars to provide a stable source of energy to planets, and those stars require that two generations of stars are born and die).

He said what about aliens, and theists are open to that, and God can certainly provide for the salvation of those beings, if they have fallen into sin.

**Dr. Millican’s second rebuttal:**

R.A1) The origin of the universe

3. Just because epiphenominalism is false, it doesn’t mean that substance dualism is true.

The majority of philosophers of mind do not accept substance dualism.

R.A3) The moral argument

The majority of philosophers are moral realists, but a minority of philosophers are theists. So that means that there must be some way of justifying morality on atheism, which I will not describe right now.

Atheists can express their opinion that humans have intrinsic moral value.

He grants that atheists can perceive moral values. But if atheists can perceive moral values, then why is God needed to enable that?

Atheists can express their opinion that humans are special. We can be rational, and that makes us special.

Atheists can express their opinion that it is good to care about other humans because they are of the same species.

R.A4) The resurrection of Jesus

We don't have any reasons to believe i the supernatural.

The gospels are written late for the purposes of evangelism.

The gospels are not independent, e.g. Matthew and Luke depend on Q.

John is the latest gospel, and the Christology of John is the highest of all.

The four gospels agree because the early church rejected other (unnamed) gospels that didn't agree.

Matthew 27 – the earthquake and the raised saints – is not recorded in any other contemporary non-Christian source.

**Dr. Craig's final rebuttal:**

A3) The moral argument

He says that human beings are rational, and that gives them value. But atheists like Sam Harris prefer the flourishing of sentient life. He includes non-rational animals as having moral value. So without God, we see that the choice of who or what has moral value is arbitrary. And where would objective moral duties come from if there is no moral lawgiver?

The fact that most atheists accept objective moral values doesn't mean that they can rationally ground those values on their atheistic worldview. You can't provide a basis for moral values on atheism by counting the number of atheists who accept objective morality. It's not surprising that atheists can perceive objective moral values IF they are living in auniverse created by God who grounds these objective moral values and duties that atheists perceive.

A4) The resurrection of Jesus

He cites Geza Vermes and Bart Ehrman as authorities on the historical Jesus, but both of them accept all three of the facts that I presented as minimal facts. Ehrman doesn't accept the resurrection of Jesus because he presupposes naturalism. He rejects the resurrection on philosophical grounds, not historical grounds.

**Dr. Millican's final rebuttal:**

R.A5) Religious experience

Religious experience is an unreliable way to test the claims of a religion, because lots of religions have them and they make contradictory truth claims. In the future, we may discover naturalistic ways of explaining religious experience.

R.A4) The resurrection of Jesus

Even if you can make a case for the resurrection based on these3  minimal facts, there are other stories in the New Testament like Matthew 27 that are quite weird and they undermine the 3 minimal facts that even Geza Vermes and Bart Ehrman accept.

R.A1) The origin of the universe

Bill hasn't shown that there is any reason for thinking that things don't come into being, uncaused, out of nothing.

A4) The problem of evil

Theists can't explain what God's specific morally sufficient reasons are for permitting the apparently gratuitous evil that we see.

# Wayne Grudem debates Richard Glover on the Bible, poverty and foreign aid

**Wintery Knight** · 11 October 2020 · Archived copy · Original

Two horses fight it out, may the best horse win!

A great episode of the Unbelievable podcast. This is a great debate. I really enjoyed it. All three speakers were excellent putting forward their points. It's nice to hear an American voice, a British voice and an Australian voice debating an important issue. HIGHLY RECOMMENDED.

Details:

> Wayne Grudem is a theologian known for his conservative approach to both doctrine and economics. His new book "The Poverty of Nations: A Sustainable Solution" (co-authored with economist Barry Asmus) makes the case that pouring aid into developing countries is a failed strategy. Grudem debates whether the Bible supports free market, capitalist economics with Australian economist and theologian Richard Glover who wrote a critique of the book for the Australian Bible Society.

The MP3 file is here.

**Summary:**

Grudem:

- The Bible speaks to all of life, including economics, stewardship, government
- The study of economics helps us to understand how to take care of the poor
- My job is to apply the teachings of the Bible to all of life

Brierley:

- What's your thesis in the book?

Grudem:

- A good system is one where the poor have the opportunity to earn and save from their labor
- Book is a response to a Kenyan couple Grudem met at a London conference on business and Christianity

- Book is not concerned with how individuals and groups can do charity to help the poor
- Our church already does that and we support individuals and groups doing charity
- The book is concerned with how should nations be transformed in order to grow economically
- What should the laws, policies and cultural beliefs of a nation be in order for it to not be poor?
- The book lists factors that have moved nations from poverty to prosperity in different times and places
- The thesis of the book is this: government should set their people free to be able to produce more
- We advocate freedom in economics: freedom to work, freedom to save, freedom to start businesses
- We believe that this free enterprise view is consistent with the Bible in a number of places
- E.g. – private property is good for prosperity (thou shall not steal) but forbidden by communism

Brierley:

- What about the church sharing in communities in Acts 2 and Acts 4?

Grudem:

- That is not redistribution of wealth among individuals and businesses by a secular government
- Those passages showed that there was voluntary sharing among Christians, which is not communism

Brierley:

- What's wrong with Grudem's book?

Glover:

- The book emphasizes the Bible and the goal is to help the poor in poor countries
- Criticism 1: the book doesn't engage with non-free-market perspectives on economics
- Criticism 2: the book doesn't survey all that the Bible says about economics

Brierly:

- For 1) what is one of the views that is not considered?

Glover:

- Jeffrey Sachs says that nations need a leg up before they can grow economically
- Ha-Joon Chang says that free enterprise was not how the wealthy nations became wealthy

Grudem:

- We do engage with other points of view, especially Jeffrey Sachs in the book
- The trouble with leftist views on economic development is that it does not work in practice
- NO COUNTRY has even been lifted out of poverty by foreign aid
- He says we don't cite enough from the wisdom literature: we have 64 citations in the index
- He says we don't cite enough from the gospels: we have 42 citations in the index
- He says we don't cite enough from the epistles: we cite 22 of 27 epistles in the index
- Some economists won't criticize cultural and moral values that hurt prosperity
- As Christians, we think that moral and cultural values are part of the problem that needs solving

Brierley:

- What about foreign aid?

Grudem:

- Foreign aid doesn't help: a lot of the money goes into government and rulers can be corrupt
- Instead of encouraging people to start businesses, it tells people to go into government to get aid money
- Economists (lists 3) are saying that foreign aid entrenches corrupt government in power, does no good

Brierley:

- If it's not working, should we keep doing it?

Glover:

- When there is an immediate need, we should do it, even if it is not a long-term solution: we need both

Brierley:

- Should we stop foreign aid completely?

Grudem:

- Voluntary charitable giving from individuals and churches to help poor countries is good
- Me and my co-author are both active on our church board that helps poor countries with urgent needs
- Food and doctors are urgent needs, and we should help, but it doesn't lift countries out of poverty
- We need a long-term solution that helps poor countries produce their own food and doctors
- We are criticizing 1) government to government aid and 2) IMF/World bank to government aid
- We have had pushback because 500,000 people make a living from this foreign aid industry
- No country has ever been lifted out of poverty into sustainable prosperity
- That's the definition of insanity: continuing to do the same thing that has never worked

Brierley:

- Does the Bible support free enterprise as a way of creating sustainable prosperity?

Glover:

- When I said the Bible was absent from his book, absent was a bad choice of words
- But the hundreds of references he listed were not dealth with *in depth*
- In the Scriptures, God is the one who provides (e.g. – in Ephesians, Sermon on the Mount)
- The Bible is less focused on his people making money, and more focus on sharing basics, like food
- Secular governments should just take it from people who have food and give it to hungry people
- In 2 Cor 8-9, Paul talks about voluntary sharing so everyone will be equal

Brierley:

- Does 2 Cor 8-9 undermine the free enterprise system you champion in the book?

Grudem:

- The sharing in the Bible solves cases of urgent need, it does not lift countries from poverty to sustainable prosperity
- Some older translations say "equality" in 2 Cor 8:13-14, but newer translations (e.g. – ESV) say "fairness"
- The Greek word is translated as "fairly" the only other place it appears in the NT (Col 4:1), in every translation
- God uses the means of human work and productivity to provide (daily bread is baked, doesn't just fall from Heaven)

- In general, there's no provision in Scripture for a person to be dependent on donations for their entire lives
- God promises Israel fields and mountains to tend and mine, but prosperity is from work, not depending on others

Brierley:

- Does the Bible support this focus on work?

Grudem:

- Working is highly praised in Scripture, (lists Bible passages that favor work over dependency)
- Countries that were exposed to this notion of work and productivity have been more prosperous

Glover:

- Jeffrey Sachs and other development economists don't say you can be prosperous through dependence
- They say that it is a necessary part of leading to nations out of poverty into poverty

Grudem:

- It's never worked. What nation has become prosperous through foreign aid?

Glover:

- There are lots of nations, especially in Africa, where foreign aid has helped lift them out of poverty

Grudem:

- Name one country in Africa where foreign aud has lifted them out of poverty into sustainable prosperity

Glover:

- I can't think of one right now.

Grudem:

- Our book contains a map of Africa and we looked at every nation's per capita income
- No nation has been able to rise out of poverty through dependence on foreign aid
- The only close one is Botswana, but they have abundant freedoms, Christian morals, less corrupt government
- So Botswana is the best case and they became prosperous through becoming productive, not foreign aid

Brierley:

- Is he right to say that charity is a short-term solution, but that it's not good long-term for prosperity?

Glover:

- Yes, and work is a very important focus in the Scriptures as he says.
- But since the Fall work has been much harder, and may not have the outcomes that we would like

Grudem:

- I also believe in emergency aid for when catastrophies happen, like floods and famines
- But dependence on foreign aid enriches corrupt rulers and does not create the productivity that leads to sustained prosperity

Brierley:

- Can foreign aid be used to give poor nations a leg up on becoming prosperous?

Grudem:

- Dambisa Moyo, Oxford-educated economist from Zambia, says stop the aid, it's doing more harm than good
- Jeffrey Sachs' view is that foreign aid hasn't worked yet, but just keep trying a bit more
- What works: limited government, rule of law, fair courts, documented property rights, low taxes, stable currency
- People are creative and want to work, we just have to get government out of the way and let people work, earn and save

Brierley:

- Is this free enterprise system supported by the Bible?

Glover:

- The wealthy nations of the world did not become wealthy through productive work and free enterprise policies
- Ha-Joon Chang: free enterprise policies have never brought a country from poverty to wealth
- E.g. – wealth is created through tariffs (not by innovating and by economic freedom?)

Grudem:

- I've read Ha-Joon Chang's book, and his examples are very selective and limited
- Index of Economic Freedom: the freest countries are the most prosperous, the least free countries are the most poor
- When you look at macro data, instead of very selective examples, the free enterprise system is best for prosperity

Glover:

- The book doesn't do enough to engage with leftist economists (he doesn't say which ones)
- Just because nations who are free are rich, doesn't mean freedom causes productivity
- There are parts of the Bible that doesn't support the free enterprise system (he names none)

Grudem:

- The Bible is focused on work not dependency, and charity not government redistribution
- The best way to help the poor in other countries is by encouraging work and productivity

# Five ways America will change if Democrats pack the Supreme Court with leftists

**Wintery Knight** · 12 October 2020 · Archived copy · Original

[image]
Major pro-abortion group endorses Joe Biden for President
I have met many young people who are voting Democrat because it makes them feel good about themselves, and look good to others. They don't really understand what the issues are. They can't name any Trump or Biden policies. They just know that the TV told them that Orange Man Bad, and that's good enough for them. But let's see what will happen in November if Joe Biden wins the presidency.

This article from The Federalist explains:

> Should the Democrats choose to expand the court by at least four members to provide for a 7-6 majority assuming Judge Amy Coney Barrett is confirmed, it is important for Americans to understand how this drastic maneuver will change their lives and their country.

And here's the list:

- 1. Gun Rights
- 2. Free Speech
- 3. Abortion
- 4. Religious Liberty
- 5. Election Laws

I wanted to drill deeper on these two:

> 3. Abortion
>
> There are a whole host of issues surrounding abortion that a new progressive majority would impact, from parental notification laws, to limits on how late in pregnancy abortion could be performed, to a state's ability to regulate the abortion industry. The progressive reading of Roe v. Wade is almost limitless in its scope and perhaps the only question mark would regard the ability to kill babies even after they are outside of the mother. Beyond that, it is very likely that almost any state restrictions would be shot down.
>
> 4. Religious Liberty
>
> Several religious liberty cases such as Hobby Lobby and Little Sisters of the Poor have been closely decided of late. It is safe to assume these decisions would be reversed. Practicing Christians and members of other faiths would face far greater restriction in living their faith in their public life. Our understanding of how we may practice our religions would undergo a major change, abandoning the American tradition of public faith, and limiting religious expression to the church and the home.

If you look at Biden and Harris records on religious liberty, you'll understand that their goal is to eliminate Bible-believing Christianity from the public sphere.

According to this The Federalist article, Kamala Harris opposed a judicial nominee for being Catholic:

> In 2019, Harris suggested that Brian Buescher, a nominee for a district court seat, was unfit for service because of his membership in the Knights of Columbus, a Catholic fraternal organization. As part of his Senate confirmation, she asked Buescher whether he knew that the Knights "opposed a woman's right to choose" and "opposed marriage equality."

> Of course, the Catholic Church, like many other religious groups, opposes same-sex marriage and abortion. To treat membership in a Catholic organization as potentially disqualifying, precisely because that organization upholds Catholic beliefs, amounts to a religious test for public office.
>
> If Catholics are faithful to Christian teaching, especially on abortion and sexuality, Harris believes they have no place in our politics. “Russia was able to influence our election,” she wrote in 2019, “because they figured out that racism, sexism, anti-Semitism, homophobia, and transphobia are America’s Achilles heel. These issues aren’t only civil rights — they’re also a matter of national security. We have to deal with that.”
>
> With these words, Harris lumped believing Catholics in with antisemites. If you believe marriage is between a man and woman, if you think boys should not be allowed to compete in girls’ sports, Harris thinks you might be a tool of our nation’s enemies.
>
> Catholics should take Harris at her word. She has a history of bringing criminal charges against her political enemies. As attorney general of California, she prosecuted David Daleiden, a young Catholic investigative journalist who had exposed certain dark practices of Planned Parenthood, such as the selling of baby body parts. As part of the prosecution, Harris raided Daleiden’s home, an unnecessary act designed to punish and intimidate. Daleiden said he relied on “the church, the faith of the church, the ancient ritual of the church” during his ordeal.

Also:

> Harris enjoys a 100 percent approval rating from NARAL Pro-Choice America, and received more than $80,000 in donations from abortion providers. Little wonder, then, that she spent her time as attorney general of California launching spurious prosecutions against pro-life activists.

Harris isn’t the only one who hates religious people, the man at the top of the Democrat ticket does too.

The Federalist explains:

> During her brief career in the Senate, Harris co-sponsored the absurdly named “Equality Act,” which would force all hospitals and all physicians to perform sex-changes and cross-sex hormone injections. She followed this up by introducing the even more absurdly named “Do No Harm Act,” which would strip legal protections for conscientious objectors to these practices.
>
> Biden has fallen into line. His website now vows to make enacting the Equality Act a “top legislative priority” for the first 100 days of his administration
>
> The double-whammy of the “Equality Act” combined with the “Do No Harm Act” would not only destroy religious protections for hospitals but religious protections for faithful Catholic organizations and individuals across the board. Catholic business-owners could see their businesses shut down for refusing to facilitate same-sex weddings or having separate facilities for biological males and biological females.
>
> Schools would be forced to do the same, including allowing biological boys who identify as transgender to change in the girls’ locker rooms, use the girls’ bathrooms, and, in sports, compete on teams alongside girls. Similar laws in five different states have already forced Catholic Charities’s adoption and foster services to close their doors.

It will be a real shame if people vote for Biden/Harris thinking that they will be able to take the Bible seriously in their public lives. That will all end soon after they are elected.

# Is the text of the Bible we have today different from the originals?

**Wintery Knight** · 13 October 2020 · Archived copy · Original

Sherlock Holmes and John Watson: let's take a look at the facts

I thought it might be a good idea to write something about whether the Bible is generally reliable as a historical document. Lots of people like to nitpick about things that are difficult to verify, but the strange thing is that even skeptical historians accept many of the core narratives found in the Bible. Let's start with a Christian historian, then go to a non-Christian one.

First, let's introduce New Testament scholar Daniel B. Wallace:

> Daniel B. Wallace
> Senior Research Professor of New Testament Studies
>
> BA, Biola University, 1975; ThM, Dallas Theological Seminary, 1979; PhD, 1995.
>
> Dr. Wallace… is a member of the Society of New Testament Studies, the Institute for Biblical Research, the Society of Biblical Literature, the American Society of Papyrologists, and the Evangelical Theological Society (of which he was president in 2016). He has been a consultant for several Bible translations. He has written, edited, or contributed to more than three dozen books, and has published articles in New Testament Studies, Novum Testamentum, Biblica, Westminster Theological Journal, Bulletin of Biblical Review, the Journal of the Evangelical Theological Society, and several other peer-reviewed journals. His Exegetical Syntax of the New Testament is the standard intermediate Greek grammar and has been translated into more than a half-dozen languages.

Here is an article by Dr. Wallace that corrects misconceptions about the transmission and translation of the Testament.

He lists five in particular:

- *Myth 1: The Bible has been translated so many times we can't possibly get back to the original.*
- *Myth 2: Words in red indicate the exact words spoken by Jesus of Nazareth.*
- *Myth 3: Heretics have severely corrupted the text.*
- *Myth 4: Orthodox scribes have severely corrupted the text.*
- *Myth 5: The deity of Christ was invented by emperor Constantine.*

Let's look at #4 in particular, where the argument is that the text of the New Testament is so riddled with errors that we can't get back to the original text.

It says:

> Myth 4: Orthodox scribes have severely corrupted the text.
>
> This is the opposite of myth #3. It finds its most scholarly affirmation in the writings of Dr. Bart Ehrman, chiefly The Orthodox Corruption of Scripture and Misquoting Jesus. Others have followed in his train, but they have gone far beyond what even he claims. For example, a very popular book among British Muslims (The History of the Qur'anic Text from Revelation to Compilation: a Comparative Study with the Old and New Testaments by M. M. Al-Azami) makes this claim:
>
> The Orthodox Church, being the sect which eventually established supremacy over all the others, stood in fervent opposition to various ideas ([a.k.a.] 'heresies') which were in circulation. These included Adoptionism (the notion that Jesus was not God, but a man); Docetism (the opposite view, that he was God and not man); and Separationism (that the divine and human elements of Jesus Christ were two separate beings). In each case this sect, the one that would rise to become the Orthodox Church, deliberately corrupted the Scriptures so as to reflect its own theological visions of Christ, while demolishing that of all rival sects."
>
> This is a gross misrepresentation of the facts. Even Ehrman admitted in the appendix to Misquoting Jesus, "Essential Christian beliefs are not affected by textual variants in the manuscript tradition of the New Testament." The extent to which, the reasons for which, and the nature of which the orthodox scribes corrupted the New Testament has been overblown. And the fact that such readings can be detected by comparison with the readings of other ancient manuscripts indicates that the fingerprints of the original text are still to be seen in the extant manuscripts.

Here is the full quote from the appendix of Misquoting Jesus:

> "Bruce Metzger is one of the great scholars of modern times, and I dedicated the book to him because he was both my inspiration for going into textual criticism and the person who trained me in the field. I have nothing but respect and admiration for him. And even though we may disagree on important religious questions – he is a firmly committed Christian and I am not – we are in complete agreement on a number of very important historical and textual questions. If he and I were put in a room and asked to hammer out a consensus statement on what we think the original text of the New Testament probably looked like, there would be very few points of disagreement – maybe one or two dozen places out of many thousands. The position I argue for in 'Misquoting Jesus' does not actually stand at odds with Prof. Metzger's position that the essential Christian beliefs are not affected by textual variants in the manuscript tradition of the New Testament."

Finally, I think that the discovery of the Dead Sea Scrolls shows us that religious texts don't change as much as we think they do over time.

Look:

> The Dead Sea Scrolls play a crucial role in assessing the accurate preservation of the Old Testament. With its hundreds of manuscripts from every book except Esther, detailed comparisons can be made with more recent texts.
>
> The Old Testament that we use today is translated from what is called the Masoretic Text. The Masoretes were Jewish scholars who between A.D. 500 and 950 gave the Old Testament the form that we use today. Until the Dead Sea Scrolls were found in 1947, the oldest Hebrew text of the Old Testament was the Masoretic Aleppo Codex which dates to A.D. 935.{5}
>
> With the discovery of the Dead Sea Scrolls, we now had manuscripts that predated the Masoretic Text by about one thousand years. Scholars were anxious to see how the Dead Sea documents would match up with the Masoretic Text. If a significant amount of differences were found, we could conclude that our Old Testament

> Text had not been well preserved. Critics, along with religious groups such as Muslims and Mormons, often make the claim that the present day Old Testament has been corrupted and is not well preserved. According to these religious groups, this would explain the contradictions between the Old Testament and their religious teachings.
>
> After years of careful study, it has been concluded that the Dead Sea Scrolls give substantial confirmation that our Old Testament has been accurately preserved. The scrolls were found to be almost identical with the Masoretic text. Hebrew Scholar Millar Burrows writes, “It is a matter of wonder that through something like one thousand years the text underwent so little alteration. As I said in my first article on the scroll, ‘Herein lies its chief importance, supporting the fidelity of the Masoretic tradition.'”{6}
>
> A significant comparison study was conducted with the Isaiah Scroll written around 100 B.C. that was found among the Dead Sea documents and the book of Isaiah found in the Masoretic text. After much research, scholars found that the two texts were practically identical. Most variants were minor spelling differences, and none affected the meaning of the text.
>
> One of the most respected Old Testament scholars, the late Gleason Archer, examined the two Isaiah scrolls found in Cave 1 and wrote, “Even though the two copies of Isaiah discovered in Qumran Cave 1 near the Dead Sea in 1947 were a thousand years earlier than the oldest dated manuscript previously known (A.D. 980), they proved to be word for word identical with our standard Hebrew Bible in more than 95 percent of the text. The five percent of variation consisted chiefly of obvious slips of the pen and variations in spelling.”{7}
>
> **Despite the thousand year gap, scholars found the Masoretic Text and Dead Sea Scrolls to be nearly identical. The Dead Sea Scrolls provide valuable evidence that the Old Testament had been accurately and carefully preserved.**

I hope that this post will help those who think that we can’t get back to the text of the original New Testament documents.

# If unborn babies don't have consciousness or don't feel pain, may we kill them?

**Wintery Knight** · 14 October 2020 · Archived copy · Original

Unborn baby scheming about pro-life apologetics

Was having a conversation by e-mail yesterday with a pro-abortion atheist, and he gave two reasons why he supported abortion in the first and second trimester. First, he said that unborn babies can't feel pain, so it's OK to kill them. Second, he said that unborn babies don't have consciousness, so it's OK to kill them. I thought it might be useful to link to something that answers both of these objections.

Frank Beckwith is the author of "Defending Life: A Moral and Legal Case Against Abortion Choice", which was published by Cambridge University Press, a top academic press. But before Cambridge University Press, Beckwith wrote four easy-to-understand essays for the Christian Research Journal. Part IV is the one that has the response to the two questions raised by my atheist friend.

Part I. The Appeal to Pity

Part II. Arguments from Pity, Tolerance, and Ad Hominem

Part III. Is The Unborn Human Less Than Human?

Part IV. When Does a Human Become a Person?

Excerpt:

> Some ethicists argue that the unborn becomes fully human sometime after brain development has begun, when it becomes sentient: capable of experiencing sensations such as pain. The reason for choosing sentience as the criterion is that a being that cannot experience anything (i.e., a presentient unborn entity) cannot be harmed. Of course, if this position is correct, then the unborn becomes fully human probably during the second trimester and at least by the third trimester. Therefore, one does not violate anyone's rights when one aborts a nonsentient unborn entity. [13]

> There are several problems with this argument. First, it confuses harm with hurt and the experience of harm with the reality of harm. [14] One can be harmed without experiencing the hurt that sometimes follows from that harm, and which we often mistake for the harm itself. For example, a temporarily comatose person who is suffocated to death "experiences no harm," but he is nevertheless harmed. Hence, one does not have to experience harm, which is sometimes manifested in hurt, in order to be truly harmed.
>
> Second, if sentience is the criterion of full humanness, then the reversibly comatose, the momentarily unconscious, and the sleeping would all have to be declared nonpersons. Like the presentient unborn, these individuals are all at the moment nonsentient though they have the natural inherent capacity to be sentient. Yet to countenance their executions would be morally reprehensible. Therefore, one cannot countenance the execution of some unborn entities simply because they are not currently sentient.
>
> Someone may reply that while these objections make important points, there is a problem of false analogy in the second objection: the reversibly comatose, the momentarily unconscious, and the sleeping once functioned as sentient beings, though they are now in a temporary state of nonsentience. The presentient unborn, on the other hand, were never sentient. Hence, one is fully human if one was sentient "in the past" and will probably become sentient again in the future, but this cannot be said of the presentient unborn.
>
> There are at least three problems with this response. First, to claim that a person can be sentient, become nonsentient, and then return to sentience is to assume there is some underlying personal unity to this individual that enables us to say that the person who has returned to sentience is the same person who was sentient prior to becoming nonsentient. But this would mean that sentience is not a necessary condition for personhood. (Neither is it a sufficient condition, for that matter, since nonhuman animals are sentient.) Consequently, it does not make sense to say that a person comes into existence when sentience arises, but it does make sense to say that a fully human entity is a person who has the natural inherent capacity to give rise to sentience. A presentient unborn human entity does have this capacity. Therefore, an ordinary unborn human entity is a person, and hence, fully human.
>
> Second, Ray points out that this attempt to exclude many of the unborn from the class of the fully human is "ad hoc and counterintuitive." He asks us to "consider the treatment of comatose patients. We would not discriminate against one merely for rarely or never having been sentient in the past while another otherwise comparable patient had been sentient….In such cases, potential counts for everything." [15]
>
> Third, why should sentience "in the past" be the decisive factor in deciding whether an entity is fully human when the presentient human being "is one with a natural, inherent capacity for performing personal acts?" [16] Since we have already seen that one does not have to experience harm in order to be harmed, it seems more consistent with our moral sensibilities to assert that what makes it wrong to kill the reversibly comatose, the sleeping, the momentarily unconscious, and the presentient unborn is that they all possess the natural inherent capacity to perform personal acts. And what makes it morally right to kill plants and to pull the plug on the respirator-dependent brain dead, who were sentient "in the past," is that their deaths cannot deprive them of their natural inherent capacity to function as persons, since they do not possess such a capacity.

These four essays are a very good introduction to common responses to pro-abortion arguments. I recommend that people get familiar with this, as once you look into it, you will see that the abortion issue can be debated with as much confidence as William Lane Craig defends Christian theism. You will have the same access to scientific evidence and rational arguments on this topic, and so you will have the upper hand. And that's fun.

The best introductory book on the abortion / right to life issue is "The Case for Life" by pro-life debater Scott Klusendorf. The best comprehensive book is a tie between "The Ethics of Abortion" by Christopher Kaczor, and Frank Beckwith's "Defending Life: A Moral and Legal Case Against Abortion Choice".

# Potential violation of election law: Facebook and Twitter censor Biden scandal

**Wintery Knight** · 15 October 2020 · Archived copy · Original

Facebook communications manager works for Democrat politicians and PACs

There was a very exciting story that emerged on Wednesday about the Democrat candidate for President. The story exposed an email that directly falsified something that the Democrat candidate for President said during a debate. Facebook decided to reduce distribution of the story, before they even did a fact check on it. Later on Twitter also blocked the story, because it's

The Federalist reported:

> On Wednesday, the New York Post published a bombshell report indicating that Democratic presidential candidate Joe Biden repeatedly lied about never discussing his son Hunter Biden's potentially criminal overseas business venture with him "or with anyone else" while Joe Biden was vice president.
>
> Emails obtained by the Post, however, show correspondence between Ukrainian advisor Vadym Pozharskyi and Hunter proving that Hunter actually introduced Joe Biden to Pozharskyi.
>
> "Thank you for inviting me to DC and giving me an opportunity to meet your father and spent [sic] some time together," Pozharskyi wrote. At the time, Hunter Biden was raking in upwards of $50,000 a month in excess compensation for serving on the board of Burisma while his father served as the "public face" of White House policy towards Ukraine.
>
> Less than a year later, as the Obama administration's point person on Ukraine, Joe Biden pressured for the firing of the Ukrainian prosecutor investigating Hunter Biden's firm.

The progressive mainstream news media ignored the story:

> After legacy media completely ignored the major revelations in the Post story, with the New York Times, Washington Post, and CNN refusing to commit a single story to the bombshell

> report, Facebook and Twitter escalated the election interference by censoring the article.

And Facebook censored the story:

> “While I will intentionally not link to the New York Post, I want be clear that this story is eligible to be fact checked by Facebook’s third-party fact checking partners,” wrote Facebook spokesperson and former Democratic staffer Andy Stone. “In the meantime, we are reducing its distribution on our platform.”

The Republicans are trying to make sure everyone can read it:

> In response to big tech’s censorship Wednesday, House Judiciary Republicans re-published the New York Post’s piece on their website.
>
> “We know Google tried to help Hillary Clinton win in 2016. And now Facebook and Twitter are trying to help Joe Biden win in 2020,” committee ranking member Jordan told The Federalist.

But that’s not all! Twitter also got in on the censoring of stories critical of the Democrat candidate for President.

The Federalist explains:

> Twitter suspended the New York Post’s account on Wednesday following its publication of a bombshell story indicating Hunter Biden monetized foreign companies’ access to his father, Joe Biden, while the latter was vice president. The emails come from a laptop left at a repair shop that appears to have belonged to Hunter Biden and is under FBI and Senate review.
>
> Users are then directed to a page that claims the link is “potentially spammy or unsafe.”
>
> The suspension comes after Twitter began blocking users from sharing or sending the article link on their platform. When unverified and verified users attempted to share the link, they were met with a message stating the link “has been identified by Twitter or our partners as being potentially harmful” and were directed to a page claiming the link could be “spammy or safe.”

You can read the entire story they didn’t want you to see on the Senate Judiciary Committee’s web site. Or you can read it in this Twitter thread.

Please share this post on social media, although you might get into trouble with the Big Tech fascists. Everything that makes the Democrats look bad is “false news” or “misleading” or “missing context”.

# Does archaeological evidence confirm names, dates and places in the Bible?

**Wintery Knight** · 16 October 2020 · Archived copy · Original

Sherlock Holmes and John Watson: let's take a look at the facts

I spotted this post on Be Thinking by UK apologist Peter S. Williams. (H/T Eric Chabot at Think Apologetics)

So let me pick the ones I liked most for this post.

Here's a good one:

> ### Jerusalem and The Pool of Bethesda
>
> John 5:1-15 describes a pool in Jerusalem, near the Sheep Gate, called Bethesda, surrounded by five covered colonnades. Until the 19th century, there was no evidence outside of John for the existence of this pool and John's unusual description *"caused bible scholars to doubt the reliability of John's account, but the pool was duly uncovered in the 1930s – with four colonnades around its edges and one across its middle."*[38] Ian Wilson reports: *"Exhaustive excavations by Israeli archaeologist Professor Joachim Jeremias have brought to light precisely such a building, still including two huge, deep-cut cisterns, in the environs of Jerusalem's Crusader Church of St Anne."*[39]

And this one:

> ### Jerusalem and The Pool of Siloam
>
> In the 400s AD, a church was built above a pool attached to Hezekiah's water tunnel to commemorate the healing of a blind man reported in John 9:1-7. Until recently, this was considered to be the Pool of Siloam from the time of Christ. However, during sewerage works in June 2004 engineers stumbled upon a 1st century ritual pool when they uncovered some ancient steps during pipe maintenance near the mouth of Hezekiah's tunnel. By the summer of 2005, archaeologists had revealed what was *"without doubt the missing pool of Siloam."*[40] Mark D. Roberts reports that: *"In the plaster of this pool were found coins that establish the date of the pool to the years before and after Jesus. There is little question that this is in fact the pool of Siloam, to which Jesus sent the blind man in John 9."*[41]

I just read this one because I am working my way through John. In case you haven't read John, you really should it's my favorite gospel.

Here's another one:

> ### Herod the Great
>
> We have a bronze coin minted by Herod the Great. On the obverse side (i.e. the bottom) is a tripod and ceremonial bowl with the inscription 'Herod king' and the year the coin was struck, 'year 3' (of Herod's reign), or 37 BC.
>
> In 1996 Israeli Professor of Archaeology Ehud Netzer discovered in Masada a piece of broken pottery with an inscription, called an ostracon. This piece had Herod's name on it and was part of an amphora used for transportation (probably wine), dated to c. 19 BC. The inscription is in Latin and reads, *"Herod the Great King of the Jews (or Judea)"*, the first such that mentions the full title of King Herod.
>
> Herodium is a man-made mountain in the Judean wilderness rising over 2,475 feet above sea level. In 23 BC Herod the Great built a palace fortress here on top of a natural hill. Seven stories of living rooms, storage areas, cisterns, a bathhouse, and a courtyard filled with bushes and flowering plants were constructed. The whole complex was surrounded and partly buried by a sloping fill of earth and gravel. Herod's tomb and sarcophagus were discovered at the base of Herodium by archaeologist Ehud Netzer in 2007.

And one more:

> ### The 'James, son of Joseph, brother of Jesus' Ossuary
>
> James, the brother of Jesus, was martyred in AD 62. A mid-1st century AD chalk ossuary discovered in 2002 bears the inscription *"James, son of Joseph, brother of Jesus"* ( 'Ya'akov bar Yosef akhui di Yeshua'). Historian Paul L. Maier states that*"there is strong (though not absolutely conclusive) evidence that, yes, the ossuary and its inscription are not only authentic, but that the inscribed names are the New Testament personalities."*[68] New Testament scholar Ben Witherington states that:*"If, as seems probable, the ossuary found in the vicinity of Jerusalem and dated to about AD 63 is indeed the burial box of James, the brother of Jesus, this inscription is the most important extra-biblical evidence of its kind."*[69] According to Hershel Shanks, editor in chief of the *Biblical Archaeological Review*: *"this box is [more] likely the ossuary of James, the brother of Jesus of Nazareth, than not. In my opinion … it is likely that this inscription* does *mention the James and Joseph and Jesus of the New Testament."*

And finally one short one:

> **Tiberius Caesar**
>
> The Denarius coin, 14-37 AD, is commonly referred to as the 'Tribute Penny' from the Bible. The coin shows a portrait of Tiberius Caesar. Craig L. Blomberg comments: *"Jesus' famous saying about giving to Caesar what was his and to God what* his *(Mark 12:17 and parallels) makes even more sense when one discovers that most of the Roman coins in use at the time had images of Caesar on them."*[48]

This is a good article to bookmark in case you are ever looking for a quick, searchable reference on archaeology and the Bible. There are many more examples in that post.

Now some people might be wondering why archaeology doesn't confirm *every detail* in the New Testament. And here's what J. Warner Wallace has to say about that:

> But what are we to say to those who argue the Biblical archeological record is incomplete? The answer is best delivered by another expert witness in the field, Dr. Edwin Yamauchi, historian and Professor Emeritus at Miami University. Yamauchi wrote a book entitled, *The Stones and the Scripture*, where he rightly noted that

> archaeological evidence is a matter of “fractions”:
>
> *Only a fraction of the world’s archaeological evidence still survives in the ground.*
>
> *Only a fraction of the possible archaeological sites have been discovered.*
>
> *Only a fraction have been excavated, and those only partially.*
>
> *Only a fraction of those partial excavations have been thoroughly examined and published.*
>
> *Only a fraction of what has been examined and published has anything to do with the claims of the Bible!*
>
> See the problem? In spite of these limits, we still have a robust collection of archaeological evidences confirming the narratives of the New Testament (both in the gospel accounts and in the Book of Acts). We shouldn’t hesitate to use what we do know archaeologically in combination with other lines of evidence. Archaeology may not be able to tell us everything, but it can help us fill in the circumstantial case as we corroborate the gospel record.

I think you can form an opinion about the whole New Testament based on the record of confirmations. The verdict is in: the New Testament should be presumed trustworthy.

# The rights of parents of children with gender dysphoria during a Biden presidency

**Wintery Knight** · 17 October 2020 · Archived copy · Original

Enraged Joe Biden howls out his hatred for Bible-believing Christians

This week, Democrat candidate for president Joe Biden answered questions from Democrat supporters at a town hall run by a sympathetic Democrat. There was an interesting question from a Democrat mother about transgenderism. Biden was asked what his opinion was of childred aged 8 being able to transition from their birth sex to a different sex. His answer will shock you.

The Daily Wire reports:

> Answering a question at the ABC News-hosted townhall on Thursday night, Democratic presidential candidate Joe Biden stated that an eight-year-old child should be able to decide that they are transgender.
>
> […]After telling a story about his father, Biden answered, "The idea that an 8-year-old child or a 10-year-old child decides, 'I decided I want to be transgender. That's what I think I'd like to be. It'd make my life a lot easier.' There should be zero discrimination."

Watch:

The majority of children outgrow gender identity issues by the time they hit puberty, but that's not a popular scientific fact to raise with Democrat voters. So, Biden told them what they wanted to hear.

It's important to understand that the wishes of parents who DO NOT WANT their child to receive drugs or sex-change surgery will not be respected by a government that is beholden to LGBT activists.

Let's look at an example from a country that pushes transgender ideology from their government-run classrooms, government-run hospitals and government-run courtrooms.

The Federalist reports:

> For the past 11 months, Robert Hoogland, a father in Surrey, British Columbia, has been forced to watch as his 14 year-old daughter was "destroyed and sterilized" by court-ordered testosterone injections. After losing his legal appeal to stop the process in January… is making a desperate attempt to bring his case into the courts of

> public opinion, even though it breaks a court order demanding his silence about the case.
>
> "I had a perfectly healthy child a year ago, and that perfectly healthy child has been altered and destroyed for absolutely no good reason," Rob said in an exclusive interview. "She can never go back to being a girl in the healthy body that she should have had… She won't be able to have children…"
>
> […][T]he courts judged his daughter competent to take testosterone without parental consent… [and] he was convicted of "family violence" by the BC Supreme Court for his "expressions of rejection of [his daughter's] gender identity." He was also placed under threat of immediate arrest if he was caught referring to his daughter as a girl again.
>
> […]Rob remains under a strict gag order forbidding him from speaking about his daughter's case in public and requiring that he "acknowledge and refer to [his daughter] as male" in private.

The Canadian "Democrats" didn't want anyone to know what they were doing to this father, so they took action to silence him:

> […]Rob granted two video interviews to Canadian YouTube commentators about his case… [T]he commentators who granted them quickly found themselves under threats of litigation. Rob's first interview was immediately taken down. Rob's second interviewer… faced similar threats, but initially refused to take her video (not currently available in Canada) down.
>
> […]Justice Michael Tammen of the British Columbia Supreme Court ordered that Thompson's interview and various social media posts be taken down. When Thompson stalled, trying to keep a rapidly sharing copy of her interview available to Canadians on Bitchute, the police were sent to her house to demand she take the video down.
>
> Tammen also harshly reprimanded Rob for speaking about his case to the media, warning him that if he broke his silence again, he would likely be cited for contempt of court.

You can check out this story from Mass Resistance, where they have photos and names of all the people who attacked the father's right to parent his child.

And by the way, American public school teacher unions want the exact same rules in place as in this Canadian case, as the Daily Signal reports. Which is why you should support school choice.

Lest you think that this is just one rogue province, the Canadian legislature has actually introduced a bill (C-8) that allows the government to jail parents who refuse to approve their child's gender transition for up to 5 years:

> Under C-8, parents could spend up to five years in jail for trying to help their son accept himself as a boy, or for helping their daughter to accept herself as a girl. Bill C-8 also would impose prison terms up to five years for doctors, counselors, psychiatrists, psychologists and other paid professionals whose treatment for gender confusion departs from politically correct orthodoxy. Parents would be punished if they do anything other than encourage a confused child to "transition" to the opposite gender. Transitioning is an extreme form of intervention that includes taking puberty blockers, cross-sex hormones, and undergoing permanent surgical sterilization, including the removal of healthy organs such as breasts and testicles.

The Democrats have already passed a bill in the House called the "Equality Act", and you can read about what it does here at the Daily Signal. If the Democrats win the Senate and White House, this will become law.

# Correcting four myths about the history of the Crusades

**Wintery Knight** · 18 October 2020 · Archived copy · Original

Crusader

Here is an interesting article from Intercollegiate Studies Institute.

Intro:

> The verdict seems unanimous. From presidential speeches to role-playing games, the crusades are depicted as a deplorably violent episode in which thuggish Westerners trundled off, unprovoked, to murder and pillage peace-loving, sophisticated Muslims, laying down patterns of outrageous oppression that would be repeated throughout subsequent history. In many corners of the Western world today, this view is too commonplace and apparently obvious even to be challenged.
>
> But unanimity is not a guarantee of accuracy. What everyone "knows" about the crusades may not, in fact, be true. From the many popular notions about the crusades, let us pick four and see if they bear close examination.

The four myths:

- Myth #1: The crusades represented an unprovoked attack by Western Christians on the Muslim world.
- Myth #2: Western Christians went on crusade because their greed led them to plunder Muslims in order to get rich.
- Myth #3: Crusaders were a cynical lot who did not really believe their own religious propaganda; rather, they had ulterior, materialistic motives.
- Myth #4: The crusades taught Muslims to hate and attack Christians.

Here's the most obvious thing you should know. The Crusades were *defensive* actions*:*

> In a.d. 632, Egypt, Palestine, Syria, Asia Minor, North Africa, Spain, France, Italy, and the islands of Sicily, Sardinia, and Corsica were all Christian territories. Inside the boundaries of the Roman Empire, which was still fully functional in the eastern Mediterranean, orthodox Christianity was the official, and overwhelmingly majority, religion. Outside those boundaries were other large Christian communities—not necessarily orthodox and Catholic, but still Christian. Most of the Christian population of Persia, for example, was Nestorian. Certainly there were many Christian communities in Arabia.

> By a.d. 732, a century later, Christians had lost Egypt, Palestine, Syria, North Africa, Spain, most of Asia Minor, and southern France. Italy and her associated islands were under threat, and the islands would come under Muslim rule in the next century. The Christian communities of Arabia were entirely destroyed in or shortly after 633, when Jews and Christians alike were expelled from the peninsula.[6] Those in Persia were under severe pressure. Two-thirds of the formerly Roman Christian world was now ruled by Muslims.
>
> What had happened? Most people actually know the answer, if pressed—though for some reason they do not usually connect the answer with the crusades. The answer is the rise of Islam. Every one of the listed regions was taken, within the space of a hundred years, from Christian control by violence, in the course of military campaigns deliberately designed to expand Muslim territory at the expense of Islam's neighbors. Nor did this conclude Islam's program of conquest. The attacks continued, punctuated from time to time by Christian attempts to push back. Charlemagne blocked the Muslim advance in far western Europe in about a.d. 800, but Islamic forces simply shifted their focus and began to island-hop across from North Africa toward Italy and the French coast, attacking the Italian mainland by 837. A confused struggle for control of southern and central Italy continued for the rest of the ninth century and into the tenth. In the hundred years between 850 and 950, Benedictine monks were driven out of ancient monasteries, the Papal States were overrun, and Muslim pirate bases were established along the coast of northern Italy and southern France, from which attacks on the deep inland were launched. Desperate to protect victimized Christians, popes became involved in the tenth and early eleventh centuries in directing the defense of the territory around them.

If you asked me what are the two best books on the Crusades, I would answer God's Battalions: The Case for the Crusades by Baylor professor Rodney Stark and The Concise History of the Crusades by Professor Thomas F. Madden. If you get this question a lot from atheists, then I recommend you pick these up. Anything by Rodney Stark is useful for Christians, in fact.

# NEW Hunter Biden e-mails reveal deal with Chinese investors and Communist Party officials

**Wintery Knight** · 19 October 2020 · Archived copy · Original

Where did all this money come from?

This story is separate from the story from last week about Hunter Biden and Ukraine. Last week's story was about Hunter's dealings with a Ukraine energy company. Today's story is about Chinese investors and members of the Chinese Communist Party. The story, reported by Breitbart, emerged because a former associate of Hunter Biden provided access to his e-mail account.

Breitbart reports:

> Newly obtained emails from a Hunter Biden business partner lay out in detail how the Vice President's son and his colleagues used their access to the Obama-Biden administration to arrange private meetings for potential foreign clients and investors at the highest levels in the White House. These never-before-revealed emails outline how a delegation of Chinese investors and Communist Party officials managed to secure a private, off-the-books meeting with then-Vice President Joe Biden.
>
> In a 2011 email, Hunter Biden's business associates also discussed developing relations with what one called "China Inc." as part of a "new push on soft diplomacy for the Chinese." These emails are completely unconnected to the Hunter Biden emails being released by the *New York Post.*
>
> […]The emails offer a unique window into just how the Biden universe conducted business during the Obama-Biden Administration. These associates sought to trade on Hunter Biden's relationship with, and access to, his father and the Obama-Biden White House in order to generate business.

The White House access confirms that a collection of Chinese businessmen and Communist Party officials were given access to the White House.

In addition to that story, there is a new story from the New York Post about another report that could lead to another potential scandal for Hunter Biden. This time it's Kazakhstan.

New York Post reports:

> Hunter Biden is facing fresh questions over business dealing in yet another nation — Kazakhstan.
>
> Between 2012 and 2014 — when his father Joe Biden served as Vice President — Hunter Biden worked as a go-between to Kenes Rakishev, a Kazakh oligarch with close ties to the country's longtime kleptocratic leader Nursultan Nazarbayev, The Daily Mail reported.

> The British tabloid said they obtained emails from “anti-corruption campaigners” in Kazakhstan showing Hunter making contact with Rakishev and attempting to facilitate investment for his cash in New York, Washington DC and a Nevada mining company.
>
> Through his connections, emails show Hunter Biden successfully engineered a $1 million investment from Rakishev to filmmaker Alexandra Forbes Kerry — the daughter of ex-Sen. and former Democratic presidential nominee John Kerry, the report said.

These countries seem weird, but the amount of money involved is big money.

It should be a really interesting week, because conservative journalists have been given access to 26,000 MORE e-mails from the account of Hunter Biden’s former associate Bevan Cooney. I’m excited. We needed to get some real reporting on Joe Biden, since the mainstream news media isn’t willing to do the job.

# New study: Biden's tax hikes hit 80% of Americans, $6,500 less median household income

**Wintery Knight** · 20 October 2020 · Archived copy · Original

These people are all voting for Joe Biden – are you?

This study actually appeared in the Wall Street Journal, but since they have a paywall, I am linking to The Federalist instead. This new study comes from the Hoover Institute at Stanford University. The Biden campaign is claiming that middle-class households won't feel any effects from these tax increases. But the study is clear. Not only will 80% of Americans pay more, but many jobs will also be lost.

The Federalist reports on the study, which has some very prestigious authors:

> A new study shows that Democratic Presidential Nominee Joe Biden's proposed economic plan would significantly hurt the long-term American economy if implemented.
>
> While many mainstream media outlets claim Biden's plan will target the wealthy and save the middle-class money, the 50-page study released by the Hoover Institution shows different results.
>
> "Economists have paid too little attention to the economic effects of the Biden plan," said Casey B. Mulligan, professor of economics at the University of Chicago. "Our report, which focuses on taxation, health insurance, regulation, and energy policy, suggests that these effects are potentially very large indeed."
>
> The study conducted by a group of financial and economic experts including Mulligan, former Chief Economist of the White House Council of Economic Advisers, and Kevin Hassett, Chairman of the Council of Economic Advisers since 2017, demonstrates how Biden's plan will hurt everyone.

This is the bottom line: higher unemployment, lower household income for the average household:

> "We conclude that, in the long run, Vice President Biden's full agenda reduces full-time equivalent employment per person by about 3 percent, the capital stock per person by about 15 percent, real GDP per capita by more than 8 percent, and real consumption per household by about 7 percent," the report stated.
>
> If Biden's proposed changes are implemented, the economists warn that, according to the Congressional Budget Office's projections, 2030 may yield "4.9 million fewer employed individuals, $2.6 trillion less GDP, and $1.5 trillion less consumption in that year alone." The economists also note that the median household income in 2030 would fall by $6,500 despite Biden's promises to prioritize the middle class.

You’re not going to be immune to this, even if you’re poor:

> While Biden and his VP Nominee Kamala Harris previously promised that they will not “raise taxes on anyone who makes less than $400,000,” they have also promised to repeal the tax cuts made by President Trump, which gave 80.4 percent of all taxpayers a cut and 91 percent of the middle quintile a cut.

I don’t like numbers like this. It’s not just that I have to work the same amount for less take-home pay, which reduces my freedom. It’s also that the pressure on “the rich”, i.e. – MY EMPLOYER, causes companies to ship jobs overseas where labor costs are lower. Did you know that higher taxes causes outsourcing of jobs? The more that business owners have to pay, the more likely they are to pick up and move somewhere else – taking their jobs with them.

I don’t like this. It’s hard enough for me to make a living without the government taking more of what I earn. I’ll have to work longer in order to make up the difference – assuming I can even keep my job.

# Abortion debate: a secular case against legalized abortion

**Wintery Knight** · 21 October 2020 · Archived copy · Original

Unborn baby scheming about being only two months old

*Note: this post has a twin! Its companion post on a secular case against gay marriage is here.*

Now, you may think that the view that the unborn deserve protection during pregnancy is something that you either take on faith or not. But I want to explain how you can make a case for the right to life of the unborn, just by using reason and evidence.

To defend the pro-life position, I think you need to sustain 3 arguments:

1. The unborn is a living being with human DNA, and is therefore human.
2. There is no morally-relevant difference between an unborn baby, and one already born.
3. None of the justifications given for terminating an unborn baby are morally adequate.

Now, the pro-abortion debater may object to point 1, perhaps by claiming that the unborn baby is either not living, or not human, or not distinct from the mother.

**Defending point 1:** Well, it is pretty obvious that the unborn child is not inanimate matter. It is definitely living and growing through all 9 months of pregnancy. (Click here for a video that shows what a baby looks like through all 9 months of pregnancy). Since it has human DNA, that makes it a human. And its DNA is different from either its mother or father, so it clearly not just a tissue growth of the father or the mother. More on this point at Christian Cadre, here. An unborn child cannot be the woman's own body, because then the woman would have four arms, four legs, two heads, four eyes and two different DNA signatures. When you have two different human DNA signatures, you have two different humans.

Secondly, the pro-abortion debater may try to identify a characteristic of the unborn that is not yet present or developed while it is still in the womb, and then argue that because the unborn does not have that characteristic, it does not deserve the protection of the law.

**Defending point 2:** You need to show that the unborn are not different from the already-born in any meaningful way. The main differences between them are: *size, level of development, environment* and *degree of dependence*. Once these characteristics are identified, you can explain that none of these differences provide moral justification for terminating a life. For example, babies inside and outside the womb have the same value, because location does not change a human's intrinsic value.

Additionally, the pro-abortion debater may try to identify a characteristic of the already-born that is not yet present or developed in the unborn, and then argue that because the unborn does not have that characteristic, that it does not deserve protection, (e.g. – sentience). Most of the these objections that you may encounter are refuted in this essay by Francis Beckwith. Usually these objections fall apart because they assume the thing they are trying to prove, namely, that the unborn deserves less protection than the already born.

Finally, the pro-abortion debater may conceded your points 1 and 2, and admit that the unborn is fully human. But they may then try to provide a moral justification for terminating the life of the unborn, regardless.

**Defending point 3:** I fully grant that it is sometimes justifiable to terminate an innocent human life, if there is a moral justification. Is there such a justification for abortion? One of the best known attempts to justify abortion is Judith Jarvis Thomson's "violinist" argument. This argument is summarized by Paul Manata, one of the experts over at Triablogue:

> Briefly, this argument goes like this: Say a world-famous violinist developed a fatal kidney ailment and the Society of Music Lovers found that only you had the right blood-type to help. So, they therefore have you kidnapped and then attach you to the violinist's circulatory system so that your kidneys can be used to extract the poison from his. To unplug yourself from the violinist would be to kill him; therefore, pro-lifers would say a person has to stay attached against her will to the violinist for 9 months. Thompson says that it would be morally virtuous to stay plugged-in. But she asks, "Do you have to?" She appeals to our intuitions and answers, "No."

Manata then goes on to defeat Thomson's proposal here, with a short, memorable illustration, which I highly recommend that you check out. More info on how to respond to similar arguments is here.

Here is the best book for beginners on the pro-life view.

For those looking for advanced resources, Francis Beckwith, a professor at Baylor University, published the book Defending Life, with Cambridge University Press, 2007.

# What do Democrats like Joe Biden think about the moral teachings of Jesus in the Bible?

**Wintery Knight** · 22 October 2020 · Archived copy · Original

Enraged Democrat Joe Biden howls out his hatred for Bible-believing Christians

Joe Biden gave a speech to the largest gay rights organization in the United States, the HRC. The co-founder of the HRC, Terry Bean, was recently charged with sexual abusing a 15-year-old boy. Do you disagree with what Terry Bean is charged with? If so, then I think it's important to know how far Joe Biden would go to punish you for your refusal to approve and celebrate Terry Bean.

Here's the report on the speech from PJ Media:

> Biden announced at an event in Ohio on Saturday that his number one priority, if elected, will be to enshrine LGBTQ rights into federal law via the Equality Act, a contentious, Orwellian effort by left-wing bullies to silence Christians who believe biblical teachings on marriage and reject the view that boys can be girls and girls can be boys.
>
> During a half-hour speech at the Hum4n R1ghts C4mp4ign's annual gala in Columbus, Ohio, Biden said, "It's wrong and it is immoral what [the Trump administration] is doing," citing efforts to bar transgender troops from the U.S. military and protect medical providers from being forced to violate their consciences.
>
> […]During his speech Biden portrayed LGBTQ individuals as victims, ignoring the fact that it is people of faith who have been the big losers in this war of ideas. Bakery owners are being sued out of existence, medical professionals are being pressured to embrace transgender ideology, and major corporations are pulling their business out of states that seek to protect religious freedom — which, by the way, is what made Mike Pence Public Enemy #1 in the eyes of the cultural revolutionaries.
>
> […]"The current vice president uses religious freedom as an excuse to license discrimination across broadly [sic] areas and denying LGBTQ Americans their basic rights. It is wrong and it is immoral what they are doing," he declared.
>
> "Just look at how much damage has been done in the past two weeks," Biden said. […]The Department of Housing and Urban Development announced plans to allow homeless shelters to turn away transgender people. This is beyond the scope of anything remotely what we've seen before."

To be clear, when he's talking about homeless shelters, he's talking about putting biological males in with women who are victims of sexual abuse. But if the HRC pays the piper, then the HRC calls the tune. They're certainly calling the tune for many of our largest corporations.

When Joe Biden talks about people's "beliefs", he means the beliefs of Bible-believing Christians that might cause them to disagree with gay activists like Terry Bean. He's talking about their right to refuse to participate in, subsidize or celebrate LGBT initiatives, such as same-sex marriage, sex-change surgeries, HRT drug treatments for children, etc. He's talking about forcing parents to step aside while doctors and educators give hormone blockers to their children. Drugs that can have permanent effects. He basically wants to give gay activists like Terry Bean a veto over the Bible, the church, Christian organizations and Christian parents. A veto backed by the full force of the government.

By the way, the Terry Bean story wasn't the first time that prominent Democrats have been involved in sex with underage boys. I'll give just one more example. The Democrat mayor of Seattle – a champion of same-sex marriage in the state of Washington – was also charged, and resigned.

Now, the teaching of the Bible is pretty clear. No sex outside of marriage, and marriage defined as between one woman and one man. The definition of marriage is straight out of the mouth of Jesus. If you deny that, then you don't accept Jesus as anything other than a normal man. Now, it's a free country. Non-Christians should be able to vote how they please, and act how they please. But we need to be clear that no Democrat politician accepts the Bible as an authority on moral issues, and that no Democrat politician thinks that Jesus is other than a normal man. No Democrat politician thinks that Jesus knew what he was talking about when he spoke authoritatively about chastity and marriage. Democrat politicians like Joe Biden think Terry Bean knows more these moral issues than Jesus, and that's why Joe Biden is speaking at the HRC rather than speaking at a Bible-believing organization like Liberty University or the Family Research Council or the Alliance Defending Freedom.

To be clear, I have no problem with people on the other side, like Dave Rubin, who disagree with me on moral issues. Dave lives his life in a way that would not be permissible for a Bible-believing Christian. But Dave accepts and defends my right to disagree with him on moral issues. That is not what we have with Democrat politicians like Joe Biden, who want to use the power of the state to suppress basic human rights, like free speech, freedom of association, parental authority, etc. I don't want to force other people to act as if they believed what I believe. But I don't think Bible-believing Christians should vote for someone who wants to use the power of government to force me to act as if I believed what they believe.

# Joe Biden claims that he and his son Hunter aren't corrupt – is he lying?

**Wintery Knight** · 23 October 2020 · Archived copy · Original

Is Joe Biden "The Manchurian Candidate" for president?

There was a neat story that broke late on Thursday night by Kimberly Strassel, writing for the Wall Street Journal. It's covers additional information about the Hunter Biden – China scandal. The latest story is that an investor involved in the deal between the Biden family and EFC China Energy, a Shanghai-based conglomerate, has decided to come forward and speak out.

The article says:

> [A] former business partner of Hunter Biden's has come forward to provide the ugly details of the "family brand." Tony Bobulinski, a Navy veteran and institutional investor, has provided the Journal emails and text messages associated with his time as CEO of Sinohawk Holdings, a venture between the Bidens and CEFC China Energy, a Shanghai-based conglomerate. That correspondence corroborates and expands on emails recently published by the New York Post, which says they come from a Hunter laptop.

> In a statement, Mr. Bobulinski said he went public because he wants to clear his name, which was contained in those published emails, and because accusations that the information is fake or "Russian disinformation" are "offensive." He attests that all the correspondence he provided is genuine, including documents that suggest Hunter was cashing in on the Biden name and that Joe Biden was involved.

There are indicators that Joe Biden was not only invovled, but stood to gain financially from the deail:

> Hunter, in his own angry texts, makes clear that his contribution is his name. He rails at Mr. Bobulinski that the CEFC heads are "coming to be MY partner to be partners with the Bidens." He reminds him "that in this instance only one player holds the trump card and that's me. May not be fair but it's the reality because I'm the only one putting an entire family legacy on the line." Mr. Gilliar privately tells Mr. Bobulinski to show flexibility, since "I know why [CEFC Chairman Ye Jianming] wants the deal and what makes it enormous, It's

> the family name."
>
> CEFC was closely entwined with the Chinese government and military until it went bankrupt, following U.S. charges of money laundering. There is no question CEFC was buying Hunter for influence.
>
> Joe Biden claims he has never discussed his son's business. Yet a May 2017 "expectations" document shows Hunter receiving 20% of the equity in the venture and holding another 10% for "the big guy"—who Mr. Bobulinski attests is Joe Biden.
>
> In one text, Hunter says that "my Chairman gave an emphatic NO" to a version of the deal. Mr. Walker, Hunter's partner, explains in a text to Mr. Bobulinski that when Hunter "said his chairman he was talking about his dad."
>
> Mr. Bobulinski's texts show he even met with Joe Biden. Mr. Gilliar reminds him in May 2017: "Don't mention Joe being involved, it's only when u are face to face, I know u know that but they are paranoid." Mr. Biden had left office by then, though CEFC was always a suspicious company with ties to a rival government. It would have a been risky for any public figure to deal with it, much less a potential presidential candidate.

WSJ using paywalls their articles after a few hours, so you can read the full text of the article here.

In the Thursday night debate, Joe Biden said that the e-mails and the laptop were "Russian disinformation". Unfortunately for him, he couldn't point to the names of anyone. On the other hand, there are specific people who contradict what he said, specifically, the Director of National Intelligence.

The Daily Wire reported:

> John Ratcliffe, Director of National Intelligence, told Fox Business on Monday morning that Hunter Biden's laptop was not part of a Russian disinformation campaign despite the media's attempts to claim otherwise.
>
> Fox Business host Maria Bartiromo pressed Ratcliffe about claims from House Intelligence Committee Chairman Adam Schiff, who made repeated false claims during the Russia investigation, that the news surrounding the laptop was Russian disinformation.
>
> "Is this Russian disinformation, director?" Bartiromo asked.
>
> Ratcliffe responded, "So, Maria it's funny that some of the people that complained the most about intelligence being politicized are the ones politicizing intelligence and unfortunately in this case, it is Adam Schiff, the chairman of the House Intelligence Committee, who as you pointed out on Friday said that the intelligence community believes that Hunter Biden's laptop and e-mails on it are part of some Russian disinformation campaign."
>
> "Let me be clear, the intelligence community doesn't believe that because there is no intelligence that supports that and we shared no intelligence with chairman Schiff or any other member of Congress that Hunter Biden's laptop is part of some Russian disinformation campaign," he continued. "It's simply not true."

So it's pretty clear that Biden lied about the laptop and the emails that implicate Hunter Biden in a scheme to purchase access and possibly influence with foreign dollars. Hunter was cashing in on his father's position, and the evidence suggests that Joe Biden was at least aware of what was going on, and might even have been getting a cut of this foreign money.

By the way, the image is from one of my favorite anti-communist movies: "The Manchurian Candidate", 1962. Do NOT see the re-make. If you haven't seen it, I highly recommend it.

# Fact-checkers silent as their hero Joe Biden repeats Politifact's LIE OF THE YEAR

**Wintery Knight** · 24 October 2020 · Archived copy · Original

Where did all this money come from?

Big Tech social media sites like Facebook, Twitter, Instagram, Pinterest, etc. all would like you to believe that they are very interested in honesty and integrity. But what's the truth? During the Thursday night debate, Joe Biden claimed that not a single person lost their health insurance after Obamacare. The claim was labeled the Lie of the Year in 2013. Yet the fact-checkers are silent now.

First, here is the clip of Biden claiming that no one lost their health insurance as a result of Obamacare:

Here are the facts as reported by Just The News:

> Democratic presidential nominee Joe Biden said during Thursday night's debate that nobody lost their health insurance plans when Obamacare was fully implemented, but millions of individuals had their insurance policies cancelled at the time.
>
> A RAND Corporation study estimated that 5.9 million people lost their insurance plans due to Obamacare's rules and regulations.
>
> Obamacare is the 2010 health care law crafted by former President Obama, for whom Biden served as vice president for both of his terms.
>
> Obama was heavily criticized at the time for telling Americans that if "you like your plan, you can keep your plan," which turned out not to be the case.
>
> Politifact rated Obama's promise the "lie of the year" in 2013.

Biden said this during the debate:

> "Not one single person with private insurance would lose their insurance under my plan, nor did they under Obamacare. They did not lose their insurance unless they chose they wanted to go to something else," he said.

Although Politifact rated the claim "Lie of the year" in 2013 – AFTER OBAMA'S RE-ELECTION WAS FINISHED – they actually rated the exact same claim "True" before the election. They did this so to trick people into voting for the re-election of the Democrat candidate.

Avik Roy, health care policy expert at Forbes magazine, wrote about Politifact's assessment of Obama's promise to

Americans about keeping their health plans after Obamacare.

**In 2008, before the presidential election, PolitiFact rated Obama's claims about Obamacare "True":**

Roy writes: (links removed)

> On October 9, 2008, Angie Drobnic Holan of PolitiFact published an article using the site's "Truth-O-Meter" to evaluate this claim: "Under Barack Obama's health care proposal, 'if you've got a health care plan that you like, you can keep it.'"

And she concluded:

> […]…people who want to keep their current insurance should be able to do that under Obama's plan. His description of his plan is accurate, and we rate his statement True."

Roy notes:

> PolitiFact's pronouncements about Obamacare were widely repeated by pro-Obama reporters and pundits, and had a meaningful impact on the outcome of the election. Indeed, in 2009, PolitiFact won the Pulitzer Prize for its coverage of the 2008 campaign.

Here's the screen capture from 2008:

Politifact says that everyone who likes their health care plan can keep it

Before the election, it's true! And Obama got re-elected, because people believed that. But what happened after the election?

**In 2013, after the 2012 election, PolitiFact rated Obama's claims about Obamacare "Pants On Fire":**

Roy writes: (links removed)

> On December 12, [2013] the self-appointed guardians of truth and justice at PolitiFact named President Obama's infamous promise—that "if you like your health care plan, you can keep it"—its 2013 "Lie of the Year."
>
> […][N]one of the key facts that made that promise "impossible" in 2008 had changed by 2013. The President's plan had always required major disruption of the health insurance market; the Obamacare bill contained the key elements of that plan; the Obamacare law did as well. The only thing that had changed was the actual first-hand accounts of millions of Americans who were losing their plans now that Obamacare was live.

And the screen capture from 2013:

The article:

**Lie of the Year: 'If you like your health care plan, you can keep it'**

By Angie Drobnic Holan
Published on Thursday, December 12th, 2013 at 4:44 p.m.

It was a catchy political pitch and a chance to calm nerves about his dramatic and complicated plan to bring historic change to America's health insurance system.

"If you like your health care plan, you can keep it," President Barack Obama said -- many times -- of his landmark new law.

But the promise was impossible to keep.

So this fall, as cancellation letters were going out to approximately 4 million Americans, the public realized Obama's breezy assurances were wrong.

**Related rulings:**

**"What we said was, you can keep (your plan) if it hasn't changed since the law passed."**

Barack Obama, Monday, November 4th, 2013.

Ruling: Pants on Fire! | Details

**"FACT: Nothing in #Obamacare forces people out of their health plans."**

Valerie Jarrett, Monday, October 28th, 2013.

Politifact said one thing before the election, and the opposite afterwards

So when Politifact rates a statement by a Democrat as true, what they really mean is that it's pants-on-fire-false, but it's election time so they can't say that. This is what "fact-checking" by far-left progressive "journalists" amounts to. They're liars.

# Does Joe Biden oppose fracking? Will he shut down the oil and gas industries?

**Wintery Knight** · 25 October 2020 · Archived copy · Original

Far-left CNN fact-checks Joe Biden on fracking

A very interesting thing happened after the debate on Thursday. Far-left CNN decided to fact-check Trump's claim that Biden said on video that he wanted to ban fracking. Far-left CNN ruled Trump's statement "correct". During the debate, Biden also admitted that he wanted to eliminate all fossil fuel usage, including cars that use gas. Let's take a look at Biden's exact words.

Here's the CNN fact check:

The Federalist reports:

> Despite Biden and his vice-presidential nominee Kamala Harris's insistence that Biden never said he opposed fracking, Biden has repeatedly condemned fracking and the fossil fuels industry.
>
> "We would work it out. We would make sure it's eliminated," Biden said about coal and fracking from the Democratic presidential debate stage just a few months ago.
>
> "We are going to get rid of fossil fuels," he also promised from the podium at a New Hampshire rally.
>
> Harris, a proud co-sponsor of the Green New Deal, which would ban fracking, has also been vocal about her position.

Regarding shutting down the oil and gas industries, The Federalist reports:

> Democratic Presidential Nominee Joe Biden admitted during Thursday night's final presidential debate that he going to end the oil industry if elected president.
>
> "Would you close down the oil industry?" President Donald Trump pressed just before their closing statements.
>
> "I would transition from the oil industry, yes," Biden replied.
>
> When asked by debate moderator Kristen Welker to clarify his statement, Biden claimed that he wants to shut down the oil industry because it "pollutes significantly" and needs to be "replaced by renewable energy over time."

There are many problems with renewable energies, and you can find out all about them by looking at places that have tried to switch over to those energy sources.

## Switching to Renewable Energy

Let's start with California. California has long been at the forefront of converting their energy production to "green" sources.

Here's an article from Forbes that talks about their results:

> At the Democratic National Convention this week, presidential and vice-presidential candidates Joe Biden and Kamala Harris will make the case for spending $2 trillion, or $500 billion per year, to transition the U.S. away from fossil fuels toward renewables like solar and wind.
>
> […]California's big bet on renewables, and shunning of natural gas and nuclear, is directly responsible for the state's blackouts and high electricity prices.
>
> "We will be forced today to ask utilities to cut off power to millions today, and tomorrow, and beyond," said Stephen Berberich, the President and CEO of California's Independent System Operator, CAISO, on a Monday morning conference call. "Demand will greatly exceed supply."
>
> The immediate cause of California's blackouts is a mismatch between electricity supply and demand.
>
> […]The underlying reason blackouts are occurring is because California lacks reliable, in-state supply. And the reason for that is California has been closing both natural gas and nuclear power plants.
>
> […]Despite these capacity shortfalls, the state is moving ahead with plans to remove 2,200-MW of reliable electricity from the grid. That's the amount of power produced by Diablo Canyon nuclear power plant, which will be closed in stages in 2024 and 2025.

So, Green New Deal works great… if your goal is to feel good about yourself, and make emotion-driven people like you. But it isn't very good at generating an abundance of low-cost electricity to power businesses. And it isn't very good for poor people, who prefer to pay less for their electricity.

Well, how about Germany? They closed down their nuclear power plants in favor of wind and solar. It didn't work.

Daily Caller explains:

> Germany's power grid almost collapsed in January due to poor performance from wind turbines and solar panels, according to data from a major trade union.
>
> Wind and solar power plants under-performed in January, 2017, because of cloudy weather with little or no wind, setting the stage for massive blackouts.
>
> […]Green energy approaches failed to meet Germany's stated energy goals, even after spending over $1.1 trillion. The country's "Energiewende" plan to boost wind and solar production to fight global warming hasn't significantly reduced carbon dioxide (CO2) emissions and may have actually caused them to go up.
>
> […]Due to the inherent unreliable performance of wind power and political opposition to nuclear power plants, Germany has been forced to return to coal to generate electricity. Coal now provides 44 percent of Germany's power, This shift caused Germany's carbon dioxide (CO2) emissions to actually rise by 28 million tons each year following the policy shift.
>
> All of Germany's subsidies and support for green energy have sharply increased power prices, with the average German paying 39 cents per kilowatt-hour for electricity. The average American only spends 10.4 cents per kilowatt-hour by comparison.

So, you get less electricity produced, more emissions, and elctricity prices go up. Just like in California.

Well, third try is the charm. How about Canada? They've gone Green New Deal for more than a decade. How is that working for them?

The National Post reported this in 2016:

> Back in 2010, deep green environmentalist Rick Smith, then head of Environmental Defence Canada, hailed Ontario's Green Energy and Green Economy Act regime as a cost-free operation that would catapult the province into the big leagues of renewable energy. Through fat subsidies and high prices offered to wind, solar and other renewable industry players, jobs and growth would boom and Ontario would be free of its dirty coal plants. It was the End of Coal, the government said. The birth of a renewable miracle.

Now, Canadians are paying more:

> The doubling of electricity prices since 2005 is big politically, but it is just the top-line item on a long list of problems, misconceptions and outright fabrications that lurk within the Liberal government's decade-long pursuit of radical greenism.

Because they didn't listened to engineers… they listened to their hearts:

> Ontario's Society of Professional Engineers has issued more than half a dozen critical reports on the Liberals' tendency to let green talk and politics override sound policy. Instead of following the expert advice of engineers and people who understand the intricacies of electricity production and distribution, the government took to issuing directives right out the Premier's office.

Now, I know some people on the secular left are going to disagree with these facts. But they don't have facts to counter these facts. There isn't a single country that has gone Green New Deal that has lower electricity prices and a net increase in jobs.

We have to do what works. What works is more natural gas (fracking) and more nuclear power.

# Who has the better record on foreign policy? Donald Trump or Joe Biden?

**Wintery Knight** · 26 October 2020 · Archived copy · Original

President Donald Trump and Secretary of State Mike Pompeo

Christians often like to try to make elections about a single issue, typically abortion. I'm pro-life, and opposing abortion is important to me. However, my goal is to get the election result I want in the real world, not just to be right in my own mind. So, I think conservatives should be able to discuss many different issues, like economics, energy, job creation, health care, education, etc. persuasively.

One issue you can use to convince people to vote Republican is *foreign policy.* Has Trump got a good record on foreign policy? Is it better or worse than Joe Biden's record? Let's take a look.

It's always a good thing when a leader is able to make peace between warring countries. Trump is actually really good at this.

The Federalist explains:

> Sudan will be removed from the State Sponsors of Terrorism list and will begin a partnership with the United States and Israel, President Donald Trump announced on Friday.
>
> […]The agreement comes just weeks after Trump secured two other historic peace deals in the Middle East through the signing of The Abraham Accords with Bahrain and the United Arab Emirates, which established full diplomatic relations of the countries with Israel. These deals facilitated by the Trump Administration are meant to bring "stability, security, and prosperity" in the region.
>
> […]Trump granted Sudan's removal from the terrorism list after the nation paid "$335 million to compensate American victims of past terror attacks and their families."

In addition to those deals, Trump's diplomatic team just brokered a deal to get Armenia and Azerbaijan to stop shooting at each other.

The Wall Street Journal explains:

> Armenia and Azerbaijan, which have spent nearly a month engaged in a violent conflict in the Nagorno-Karabakh region, have agreed to a humanitarian cease-fire, the U.S. and the two Caucasus neighbors said Sunday afternoon.
>
> The cease-fire, based on commitments made in Moscow earlier this month, will take effect at 8 a.m. local time

> on Monday, according to the joint announcement.
>
> […]Sunday's announcement follows a series of meetings in Washington aimed at preventing the long-simmering conflict between the two former Soviet republics from expanding to the wider region.

Trump didn't start any new wars in his first 4-year term, and kept his promises about bringing troops home. That's a lot better than Joe Biden, who was VP during THREE failed US interventions in Egypt, Libya and Syria. And the Obama-Biden administration pulled us out of Iraq, which caused the rise of the Islamic State caliphate. Trump actually had to clean up the ISIS mess, and he did: reducing them from a massive area of influence to a tiny area of influence.

Trump also likes to deter Iran, the number one sponsor of terrorism in the world. He pulled out of the Iran deal, which Biden championed. That deal gave Iran pallets of cash, and allowed them to work on developing nuclear weapons. In contrast, Trump has been very tough with Iran.

The Washington Examiner explains:

> Qassem Soleimani, the Iranian military general who was killed in a U.S. airstrike in Iraq on Thursday, was responsible for the deaths of over 600 U.S. soldiers in Iraq.
>
> "General Soleimani and his Quds Force were responsible for the deaths of hundreds of American and coalition service members and the wounding of thousands more," the Pentagon said. "He had orchestrated attacks on coalition bases in Iraq over the last several months — including the attack on December 27th — culminating in the death and wounding of additional American and Iraqi personnel. General Soleimani also approved the attacks on the U.S. Embassy in Baghdad that took place this week."
>
> The Department of Defense added that the strike against Maj. Gen. Qassim Soleimani, the leader of the Quds Force, the extraterritorial wing of the Islamic Revolutionary Guard Corps, "was aimed at deterring future Iranian attack plans."

And just this past week, Trump continued to sanction Al Qaeda leaders.

Sky News reports:

> The man believed to be al Qaeda's second-in-command has been killed, Afghan security forces have said.
>
> Abu Muhsin al-Masri was on the FBI's most wanted list and was charged with conspiracy to kill US nationals.
>
> […][Al-Masri] had also been charged in America with providing material support and resources to a foreign terrorist organisation.

Very good, and much better than Joe Biden, who seems to be always wrong on foreign policy.

The Washington Examiner again:

> In his 2014 memoir, Duty, former Defense Secretary Robert Gates famously shared his view that Biden, then the vice president and previously chairman of the Senate Foreign Relations Committee, had been wrong about "nearly every major foreign policy and national security issue over the past four decades."
>
> […]Early on Jan. 7, Biden was savaging Trump as "dangerously incompetent" for the strike that had killed Islamic Revolutionary Guard Corps terrorist leader Gen. Qassem Soleimani a few days earlier. Biden claimed that Trump was close to starting an "endless war in the Middle East" and that "this outcome of strategic setbacks, heightened threats, chants of 'Death to America' once more echoing across the Middle East, [and] Iran and its allies vowing revenge — this was avoidable."

None of Biden's predictions ever materialized, because he knows less about foreign policy than my keyboard.

Biden is terrible on Osama Bin Laden and the Cold War:

> This is the man who once tried to dissuade Obama from his operation against terrorist mastermind Osama bin Laden; who supported the Iraq War and said in 2003, "I voted to go into Iraq, and I'd vote to do it again"; and who vocally opposed President Ronald Reagan's military buildup and the Strategic Defense Initiative, which helped bring down the Soviet Union.

The Obama/Biden administration created ISIS by retreating from Iraq:

> Biden claimed he had atoned for his Iraq War vote by spearheading Obama's 2011-2012 withdrawal from Iraq. But that withdrawal was a disaster, and it led to the rise of the Islamic State (ISIS).

Joe Biden was also part of the administration that traded FIVE top Taliban commanders for Private Bowe Bergdahl. Bergdahl put his fellow soldiers in danger when they had to go searching for him, after he deserted his post. And then there was the Benghazi scandal, when the Obama-Biden administration abandoned their people when they came under attack by terrorists. Then they blamed the attack on a YouTube video.

We shouldn't put someone with a bad record on foreign policy – Biden – into the White House, when we can have someone with a good record on foreign policy instead: Trump.

# What are the positions of Joe Biden and Donald Trump on abortion?

**Wintery Knight** · 27 October 2020 · Archived copy · Original

[image]
Major pro-abortion group endorses Joe Biden for President
Time for another comparison of Biden and Trump policies, this time on abortion. I guess everyone knows that Joe Biden and his running mate Kamala Harris are both for abortion through all 9 months of pregnancy. That's been their settled position for some time. Trump on the other hand has a different position. And you can tell what his position is by looking at his pro-life record.

First, here's Biden on abortion, reported by Life News:

> The evidence is strong that Democrat presidential team Joe Biden and Kamala Harris support killing unborn babies in abortions up to birth.
>
> […]They want to force taxpayers to fund abortions, codify *Roe v. Wade* into federal law and reinstate rules that force nuns and other religious employers to fund birth control that may cause abortions in their employee health plans.
>
> […]Biden and Harris also have sponsored legislation to expand late-term abortions, including the "Women's Health Protection Act." Nicknamed the "Abortion Without Limits Until Birth Act" by pro-life groups, the bill would have invalidated nearly all state and federal abortion regulations, including waiting periods, informed consent requirements, bans on late-term abortions and sex-selection abortions and more.
>
> Harris also voted against a bill to prohibit abortions after 20 weeks and another to protect newborns who survive abortions from infanticide.
>
> Their party supports abortions without limits and taxpayer-funded abortions, too. The party platform calls for "reproductive health, rights, and justice … including safe and legal abortion" and opposes "federal and state laws that create barriers to reproductive health and rights."

Second, let's look at Trump's record, from an article posted by the Susan B. Anthony List – the pro-life group that is most concerned with law, policy and judicial appointments:

> **Appointed Pro-Life Judges**
>
> In April, 2017, Judge Neil Gorsuch was successfully confirmed to the U.S. Supreme Court. And in October, 2018, Judge Brett Kavanaugh was successfully confirmed to the U.S. Supreme Court. To date, 157 of President Trump's judicial nominees have been confirmed, including two Supreme Court justices, forty-three U.S. Courts of Appeals judges, and one hundred thirteen District Court judges.
>
> **Permitted States to Defund Planned Parenthood of Title X Funds**
>
> In April 2017, Congress sent a bill to President Trump's desk that permits states to defund Planned Parenthood of Title X family planning funds passed in Congress. President Trump signed the bill which reverses an Obama-era rule that disbarred states from doing so. Because this was passed using the Congressional Review Act, future Administrations cannot enact a similar rule to Obama's.
>
> **Stopped Tax Dollars Funding Abortion Overseas**
>
> President Trump not only reinstated the Mexico City Policy, but expanded it to the new Protecting Life in Global Health Assistance program. This new policy ensures that our tax dollars are protected from funding the abortion industry overseas across ALL global health spending, not just family planning dollars. The Bush-era Mexico City Policy protected roughly $500 million in spending – the new Trump policy protects over $8.8

> billion overseas aid from funding abortion.
>
> **Defunded the Pro-Abortion UNFPA**
>
> The UNFPA has long been complicit in China's oppressive population control activities, including birth limitation policies and forced abortions. President Trump's State Department cut U.S. Taxpayer funding to the UNFPA.
>
> **Required Health Insurance Companies to Disclose if Plans Cover Abortion**
>
> The Trump Administration Department of Health & Human Services (HHS) issued a rule requiring that insurers specify in each plan Summary of Benefits whether the plan covers abortion.
>
> **Settlements & New Rule Regarding HHS Mandate**
>
> The Departments of HHS, Treasury, and Labor issued two interim final rules, which means they took effect immediately, while allowing a comment period, that provide permanent, enforceable relief from the previous HHS mandate for both religious objectors, such as Little Sisters of the Poor, and moral objectors, such as Susan B. Anthony List. The new rule also exempts private employers and educational institutions that have sincerely held religious beliefs or moral objections against providing contraceptives or abortifacient drugs.
>
> **New Office for Conscience Protection at HHS**
>
> In May 2019, the Trump administration finalized new regulations to strengthen enforcement of federal laws protecting the conscience rights of health care workers who do not want to participate in abortion. The regulations clarify what recourse is available to victims of discrimination under the law and what penalties the HHS Office of Civil Rights may enforce for violations. Additionally, in January 2018, the Department of Health & Human Services announced the creation of the Conscience and Religious Freedom Division within the Office for Civil Rights. This new office works to protect health care professionals who do not want to participate in abortion. In May, 2019, HHS issued a proposed rule amending Obama-era regulations, clarifying that Section 1557 shall not force a recipient of federal funding to provide or pay for an abortion. It shall also be consistent with the First Amendment and with pro-life provisions, conscience provisions and religious liberty protections in current law.
>
> **Allowed States to Defund Planned Parenthood of Medicaid Funds**
>
> The Obama administration attempted to prevent states from defunding Planned Parenthood of Medicaid dollars, issuing guidance claiming this may be a violation of federal law. In January 2018, the Trump administration rescinded this guidance, allowing states to defund Planned Parenthood of Medicaid dollars as they see fit.
>
> **Cut Planned Parenthood's Tax Funding by up to $60 Million**
>
> In February, 2019, the Trump administration finalized the Protect Life Rule to redirect Title X family planning program funds away from the abortion industry. The rule advances President Trump's promise to stop taxpayer funding of abortion businesses like Planned Parenthood, who will no longer receive Title X funding if they choose not to comply.
>
> **Canceled Huge Contract for Taxpayer-Funded Experimentation with Body Parts of Aborted Babies**
>
> In June, 2019, the U.S. Department of Health and Human Services (HHS) and National Institutes of Health (NIH) announced they would not renew a major contract with the University of California, San Francisco (UCSF) to fund research using the body parts of aborted babies. (learn more)

My favorite was the conscience protections! I really hate the idea of being forced by secular leftists to violate my conscience.

I think it's very important for pro-life voters of all parties to understand that Trump has taken action on pro-life concerns. He listened to pro-life leaders, and did far more than other Republican presidents who were pro-life in

name only. Americans often have this annoying habit of forming their opinions based on what they feel and what they hear in the culture. But we need to be informed voters. Let’s look at the facts and decide based on actions.

# Whistleblower Tony Bobulinski: Joe Biden knew about Hunter Biden's China deal

**Wintery Knight** · 28 October 2020 · Archived copy · Original

10 held by H for the Big Guy

The mainstream news media, Big Technology and the so-called "fact checkers" have been interfering with the election by covering up the truth about Hunter Biden's deals with foreign countries. But on Tuesday night, journalist Tucker Carlson of Fox News, who has the top cable-news show, invited the Biden whistleblower onto his show for an unprecedented ONE HOUR tell-all interview.

You can watch the interview and read the transcript here.

Here's the story from a variety of sources.

The Federalist:

> Tony Bobulinski, a former Naval officer and ex-Biden family business associate who provided documentation and testimony that the Biden family was deeply involved in foreign business dealings with China, said that former Vice President Joe Biden is lying about his knowledge of his son's business deals.
>
> "This is a company with direct connections to the communist government of China," said Fox News' Tucker Carlson during an interview with Bobulinski Tuesday. "So the former vice president has said he had no knowledge whatsoever of his son's business dealings and was not involved in them at all? But this sounds like direct involvement."
>
> "That's a blatant lie when he states that," Bobulinski said. "It's a blatant lie."
>
> […]Bobulinski confirmed last week in a public statement emailed to The Federalist and other outlets the incriminating claims published by the New York Post. He also corroborated a Senate report published in September on the Biden family's potentially criminal business activity.
>
> "Hunter Biden called his dad 'the Big Guy' or 'my Chairman,' and frequently referenced asking him for his sign-off or advice on various potential deals that we were discussing," wrote Bobulinski, substantiating that the identity of "the Big Guy' in a May 17, 2017, email published in the New York Post is a reference to holding 10 percent for Joe Biden.
>
> It was in this email that a Chinese businessman with deep ties to the Chinese Communist Party offered Hunter Biden $3 million a year for "introductions alone."

Daily Wire noted that China's knowledge of the history between CEFC and the Biden family could expose Joe to

foreign influence, which could greatly impact the security and prosperity of Americans. Joe Biden's greed provided the Chinese Communists with information that could later be used to pressure him if he became elected president.

> "What are the implications of this going forward?" Carlson asked. "If Joe Biden is elected president, which could very well happen, how does this constrain his ability to deal with China?"
>
> […]"So, I think Joe Biden and the Biden family are compromised," Bobulinski responded. "Obviously, I'd reference that I held a Q clearance, you're briefed on compromise and who you're able to talk with and deal and do business with."
>
> "And I just don't see, given the history here and the facts, how Joe can't be influenced in some manner based on the history that they have here with CEFC and stuff like that," Bobulinski continued. "So as a citizen and an American taxpayer, I'm very, very concerned."

When the Biden family became aware that Tony Bobulinski intended to go public on the story, he was pressured to keep quiet.

Daily Wire:

> "The Biden family knew that you were going public with this," Fox News host Tucker Carlson said. "And you spoke to Rob Walker about it – again, the self-described Biden family representative – and Biden family, meaning Joe Biden as well – what was his response when you let him know that you were going public with this?"
>
> "Trying to coach me," Bobulinksi responded. "Trying to sort of say, hey, we don't want to do that, we don't want press trucks out in front of our house. I'm going to have to move; I could lose my job, and all of that – you know, I'm not trying to cause harm to anyone in this situation let alone Rob Walker and his family, James Gilliar and his family."
>
> "But basically, Rob's position was, if you go on record with all these facts, you'll bury all of us," Bobulinksi continued.

So, now we know for certain.

In the past week, Facebook and Twitter censored stories about Hunter Biden's business deals, because they want Joe Biden to win the election. They employed "fact checks" from biased left-wing journalists to punish anyone who tried to tell the truth about the story. I was personally punished with multiple page quality violations, which resulted in "reduced distribution", i.e. – they censored me (and others) to prevent criticism of Joe Biden.

Remember to vote on November 3rd.

# Tucker Carlson plays (alleged) audio recording of Biden China deal

**Wintery Knight** · 29 October 2020 · Archived copy · Original

H is Hunter Biden, RW is Rob Walker, JG is James Gilliar

Tucker Carlson played more (alleged) audio of parties to the Biden-China deal on Wednesday night. The new audio documents how scared the parties were that their scheme would be discovered. Later on in the post, I'll show how Hunter himself wanted to avoid suspicion by not registering as a foreign agent. And we'll also see what law enforcement thinks of the Biden scandals.

First Daily Wire:

> Fox News host Tucker Carlson released new purported audio recordings from alleged Biden family business partners fretting about the possibility that the Hunter Biden laptop-email controversy would get into the media and that, if someone verified it, it would blow up "big time."
>
> "You're are about to hear Rob Walker and James Gilliar, those are two of the Biden family's business partners, on a call with Tony Bobulinski," Carlson said. "They're discussing how very worried they are that this story, the one we're talking about now, would emerge into the press, that it would become public. And they wanted to figure out how to handle the fallout from that. This audio is very new."
>
> Carlson played the following alleged audio files:
>
> Rob Walker: I just think that if somebody comes out now and verifies the story, it blows up big time. That's all.
>
> James Gilliar: We've got this situation now where it's escalating again because somebody, allegedly one of us three, has qualified the story, and already it's back on the front pages.
>
> "Also on that call, Tony Bobulinski pleaded with his partners to just tell the truth," Carlson continued. "Just go ahead and tell the truth. Same thing he said during our interview last night. Instead of lying, Rob Walker and James Gilliar can come out and admit what happened—Hunter Biden was selling access to his father. Everyone knows that; why deny it?"

So, where are we at in verifying all of these documents right now? The U.S. Senate is currently investigating, and the FBI has possession of the Hunter Biden laptop.

The Daily Caller reports:

> The Senate Homeland Security and Governmental Affairs Committee has been successful in verifying all materials reviewed so far from Hunter Biden's ex-business partner Tony Bobulinski, the Daily Caller has learned.

> Committee Chairman Sen. Ron Johnson will not call Bobulinski to testify before the November 3 elections, as the committee is working to review all the information provided to the committee by Bobulinski. The information has to be verified, as it is subject to the same false information to Congress laws that verbal or written testimony does. However, a Johnson spokesperson told the Caller that all the material provided by Bobulinski that has been reviewed so far has turned out to be legitimate. The committee has "also" not come across any "signs" or evidence to suggest the content is false, the spokesperson added.
>
> Bobulinski, who said Tuesday he believes "Joe Biden and the Biden family are compromised" in an interview with Fox News host Tucker Carlson, has turned over evidence to the FBI alleging he met twice in the past with the former vice president in regards to business with his son Hunter. The Biden family has not yet disputed this information.

I blogged about the first interview of Tony Bobulinski (TB, in the e-mail snapshot above this post) yesterday. If you didn't see the full show he did with Tucker, the video is linked in my post from yesterday.

The next step in the verification process is for Bobuliniski to come before the Senate Homeland Security Committee to answer questions. Then we will really get to the bottom of things. I'm hoping this happens before election day. I know the mainstream media and Big Technology aren't going to publicize the evidence, but I intend to.

Anyway, another Senate committee is investigating Hunter Biden for failure to declare his activities with foreigners.

Real Clear Investigations explains:

> The Foreign Agents Registration Act requires anyone who is lobbying the government or doing public relations work in the U.S. on behalf of a foreigner to register his or her precise activities — as well as compensation — in a public filing with Justice, which ensures Americans are given notice of any actions by foreigners to influence public opinion, policies or elected officials.
>
> […]The Senate Finance Committee, which is chaired by Sen. Chuck Grassley, an Iowa Republican, is actively investigating Hunter Biden's possible non-compliance with the FARA statute, according to a spokesman.
>
> "Chairman Grassley is continuing to review developments surrounding Hunter Biden's foreign-influence arrangements to determine whether any potential violation occurred," Grassley spokesman Taylor Foy said, adding that staff investigators are combing through the trove of emails found on Hunter's laptop.
>
> Asked if they are preparing to refer the matter to Justice for criminal investigation, Foy said, "We haven't reached that point at the moment, but we are actively looking at the material with FARA in mind."

I find it interesting that the Obama administration used FARA to attack Republicans, but it was never used against any Democrats:

> "Starting in 2016, the previous administration used FARA and the criminal justice system as tools to attack and eliminate the opposition," said FBI veteran Michael Biasello. "If Biden gets in, the same elements will be back in charge and make sure those tools won't be turned on themselves."

One more reason to vote for Trump-Pence on Tuesday.

# Forensic analysis: Burisma executive's email to Hunter Biden is 100% authentic

**Wintery Knight** · 30 October 2020 · Archived copy · Original

Did Joe Biden collect foreign cash through his son Hunter Biden?

Ladies and gentlemen, we now have the smoking gun. Although Twitter and Facebook and all of the mainstrean news media tried to run interference on behalf of the Biden campaign, the truth is out. What you heard from the mainstream news media, and big technology companies, is that the laptop and the e-mails were part of a "Russian disinformation" campaign. Now we know they lied.

Here is the report from Daily Caller:

> An email Hunter Biden received in April 2015 from a Burisma executive discussing an introduction to then-Vice President Joe Biden, which lies at the heart of a New York Post investigation, is unquestionably authentic, a cybersecurity expert told the Daily Caller News Foundation on Thursday.
>
> The DCNF obtained a full copy of Hunter Biden's alleged laptop from former New York Mayor Rudy Giuliani on Wednesday. The DCNF provided Robert Graham, the founder of the cybersecurity firm Errata Security, with a copy of the email and its metadata for forensic analysis.
>
> Graham, who has been cited as a cybersecurity expert in The Washington Post, the Associated Press, Wired, Engadget and other news and technology outlets, told the DCNF that he used a cryptographic signature found in the email's metadata to validate that Vadym Pozharsky, an advisor to Burisma's board of directors, emailed Hunter Biden on April 17, 2015.

What does the e-mail say? That Hunter introduced his father to the Ukraine businessmen who paid him ridiculous amounts of money. So Joe knew.

> In the email, Pozharsky thanked Hunter Biden for "inviting me to DC and giving an opportunity to meet your father and spent [sic] some time together."
>
> The New York Post first reported the email in October, describing it as a "smoking-gun" showing that Hunter Biden had introduced his father to the Burisma executive in 2015.

And a little bit later, Joe Biden used his political power to pressure the Ukraine government to stop investigating the people who were paying his son $50,000 a month.

> The email was sent less than a year before Joe Biden pressured former Ukrainian President Petro Poroshenko to fire a prosecutor who was reportedly investigating the gas company in return for a $1 billion loan guarantee.

So, it turns out that this has been a legitimate scandal all along, raising questions about whether Joe Biden sold access and/or influence to foreign countries for cash. At the very least, we know that Joe Biden lied again and again about his knowledge of his son's business deals.

When you are watching the mainstream news media, please keep in mind that they have no interest in telling you the truth. And when you are using social media, keep in mind that they are actively suppressing content that could hurt their preferrred presidential candidate. It's called election interference.

# Joe Biden promises to confiscate all multi-round magazines, disarm church-goers

**Wintery Knight** · 31 October 2020 · Archived copy · Original

Gun ownership up, gun violence down

*This is a repeat post, I just want to remind everyone where Biden stands on legal firearm ownership from his past comments.*

In the wake of mass shootings by people who don't obey the law, Democrat presidential candidates are vowing to confiscate ALL semi-automatic pistols and rifles, as well as ban magazines with more than one bullet. They believe that by taking weapons from law-abiding Americans, they will be able to stop violence committed by those who don't care about laws. Will that work?

First, let's get the news from the Daily Wire:

> Democrat presidential candidate Joe Biden went far to the left on the issue of guns on Monday, telling reporters that he wants to ban magazines that hold "multiple bullets" — which means all magazines.
>
> Biden, who made the remarks while talking to the press during a campaign stop in Cedar Rapids, Iowa, said there should be "no compromise" on guns as he also voiced his anger at the state of Texas for allowing people to carry firearms in places of worship to defend themselves from those who seek to harm others.
>
> "And we're talking about loosening access, to have guns, to be able to take them into places of worship, I mean, it is absolutely irrational. It's totally irrational," Biden said. "The idea that we don't have elimination of assault-type weapons, magazines that can hold multiple bullets in them, it's absolutely mindless."
>
> "It's no violation of the Second Amendment," Biden falsely claimed.
>
> Biden's extreme gun control push, if ever enacted, would effectively ban the overwhelming majority of handguns, all semi-automatic shotguns and rifles, and many hunting rifles which use magazines.

We've actually had a number of mass shootings where left-wing atheists attacked Christians during worship. I guess Joe Biden has an alternative plan for protecting Christians from far-left atheist Democrats. Maybe he plans to show up at the mass shootings in churches, and have a talk with the shooters about following gun laws.

Not to be outdone, here's another candidate promising to ban all semi-automatic weapons, pistols AND rifles.

The Daily Wire reports:

> Far-left Democratic presidential candidate Robert Francis O'Rourke announced over the weekend that if he is elected president, he intends to confiscate tens of millions of semi-automatic firearms from law-abiding Americans.
>
> O'Rourke made the remarks while campaigning in Charlottesville, Virginia, on Saturday when he was asked by a reporter how he plans to address peoples' fears that the government is going to come and take many of their semi-automatic firearms.
>
> O'Rourke responded: "I want to be really clear, that's exactly what we are going to do. Americans who own [the technically undefinable sub-class of semi-automatic firearms referred to as "assault weapons"] will have to sell them to the government."

It's amazing to me that there is so much evidence that gun violence is caused by fatherlessness, but Democrats don't want to do anything about it. If we stopped giving women welfare money for having babies before they are married, gun violence would dry up in a second. We've always had access to guns in this country, but it was wasn't a problem when every child had a mother and father.

If strict laws were effective, then why do we see such high rates of gun violence precisely in Democrat-run areas where law-abiding people are prohibited from owning weapons to defend themselves from criminals? Mass shootings get a lot of press, but the truth is that more people died in Chicago last week in ordinary crimes than died in the most recent mass shooting in Odessa, TX.

**The peer-reviewed research**

Whenever I get into discussions about gun control, I always mention two academic books by John R. Lott and Joyce Lee Malcolm.

- The Lott book was published by the University of Chicago Press (now in its 3rd edition)
- The Malcolm book was published by Harvard University Press

Here is a paper by Dr. Malcolm that summarizes one of the key points of her book.

Excerpt:

> Tracing the history of gun control in the United Kingdom since the late 19th century, this article details how the government has arrogated to itself a monopoly on the right to use force. The consequence has been a tremendous increase in violent crime, and harsh punishment for crime victims who dare to fight back. The article is based on the author's most recent book, Guns and Violence: The English Experience (Harvard University Press, 2002). Joyce Malcom is professor of history at Bentley College, in Waltham, Massachusetts. She is also author of To Keep and Bear Arms: The Origins of an AngloAmerican Right (Harvard University Press, 1994).

And the result of the 1997 gun ban:

> The result of the ban has been costly. Thousands of weapons were confiscated at great financial cost to the public. Hundreds of thousands of police hours were devoted to the task. But in the six years since the 1997 handgun ban, crimes with the very weapons banned have more than doubled, and firearm crime has increased markedly. In 2002, for the fourth consecutive year, gun crime in England and Wales rose—by 35 percent for all firearms, and by a whopping 46 percent for the banned handguns. Nearly 10,000 firearms offences were committed.
>
> […]**According to Scotland Yard, in the four years from 1991 to 1995 crimes against the person in England"s inner cities increased by 91 percent. In the four years from 1997 to 2001 the rate of violent crime more than doubled. The UK murder rate for 2002 was the highest for a century.**

I think that peer-reviewed studies – from Harvard University, no less – should be useful to those of us who believe in the right of self-defense for law-abiding people. The book by economist John Lott, linked above,compares the crime rates of all U.S. states that have enacted concealed carry laws, and concludes that violent crime rates *dropped* after law-abiding citizens were allowed to carry legally-owned firearms. That's the mirror image of Dr. Malcolm's Harvard study, but both studies affirm the same conclusion – more legal firearm ownership means less crime.

# What adjustments should Christians expect during a Biden / Harris administration?

**Wintery Knight** · 1 November 2020 · Archived copy · Original

Enraged Joe Biden howls out his hatred for Bible-believing Christians

One of my male co-workers who is a Christian voted for Biden – Harris on Monday. He was laughing at the notion that Kamala Harris was the most progressive senator in the senate. (His sources of information are Reddit and Star Wars movies) I got into the team chat and mentioned that GovTrack was the source for that, but other groups (e.g. – Heritage) had rated her most liberal, too.

So, I thought I would write a post that explains to Christians what they can expect in a Biden-Harris administration. I found an amazing article on Christian Post written by a woman who did a ton of research on it.

Biden-Harris intends to eliminate all state-level limits on abortion:

> Biden has promised, within his first 100 days, legislative and executive actions that will not only target *all* state restrictions on abortion, but also decimate religious charities at home and abroad.
>
> First, Biden commits that **"his Justice Department will do everything in its power to stop the rash of state laws that so blatantly violate the constitutional right to an abortion, such as so-called TRAP laws, parental notification requirements, mandatory waiting periods, and ultrasound requirements."**
>
> Biden chose in Kamala Harris a champion of abortion so extreme she supports aborting viable unborn infants up until birth, which the great majority of Americans do not. She even voted against requiring medical care for live babies born in botched abortions.

So, I'm expecting that a Biden-Harris administration overturns every ultrasound and waiting period law in all 50 states.

Biden-Harris is likely to eliminate all faith-based charitable organizations that accept the Bible's teaching on LGBT issues.

She writes:

> Tucked in the weeds of his platform is the statement that "many government-funded foster care and adoption agencies still discriminate against LGBTQ+ families." This is followed by the promise to reverse the ***"broad***

> ***religious exemptions*** **to existing nondiscrimination laws and policies across federal agencies."**
>
> This is wonk-speak for "if you have views and policies consistent with a biblical or religious understanding of marriage, sexuality and gender, Biden's administration will shut you down." The ability of agencies to deliver care is impacted in myriad ways by government regulation, funding and taxation. Thousands of children and families have already been harmed nationwide by politicians who have used these means to put ideology before compassion, ***solely because*** they disagreed with a provider's religious views.
>
> […]An estimated 8,000 faith-affirming agencies will be affected by this case. Unconscionable numbers of families, children and expectant mothers will be denied homes, adoption, and critical life-giving care if Biden's agenda passes, cementing into law this intolerance toward religious providers.

Do you remember how in certain Democrat-run states, Christian business owners have been persecuted for refusing to affirm atheist views on LGBT issues? That happens because those states have SOGI laws. SOGI laws make it illegal for Christians to take the Bible seriously as an authority on LGBT issues. I've already blogged about the Equality Act, but this will be a top priority of the Biden-Harris administration. Basically, if makes every state a SOGI state.

Here's more from the article:

> Biden promises to **"make enactment of the Equality Act during his first 100 days as President a top legislative priority."** This misnamed Act renders punishable by law ***"discrimination on the basis of sex, sexual orientation, and gender identity…in a wide variety of areas… public accommodations and facilities, education, federal funding, employment, housing… to include places or establishments that provide (1) exhibitions, recreation, exercise, amusement, gatherings, or displays; (2) goods, services, or programs; and (3) transportation services."*** Religious organizations nationwide — under religious freedom protections — provide *all* these services to poor communities nationwide. But not if Biden prevails. He promises to destroy those protections: "***[t]he bill prohibits the Religious Freedom Restoration Act of 1993 from providing a claim, defense, or basis for challenging such protections."[iii]***
>
> The 25-page "Biden Plan to Advance LGBTQ+ Equality in America and Around the World" is masterfully comprehensive. It includes:

- **bans on counseling minors**
- **reinterpretation of Title IX** to erase both athletic opportunities and privacy protections for women and girls in locker rooms and restrooms
- **forcing medical insurers and providers to carry out gender transition** therapies (including surgery)
- using federal funds for gender transition therapies
- **forcing homeless shelters, prisons and schools to allow access by opposite sex transgender individuals** to women's housing and restroom facilities.

> Indeed, once the Act is signed, ***"Biden will also direct his Cabinet to ensure immediate and full enforcement of the Equality Act across all federal departments and agencies."*** The word **"enforce"** occurs **four** times in this introductory section alone, promising a dictatorial sweep of all personnel, agencies and programs in the name of eradicating "discrimination."

If you think that Democrats will show any respect for the consciences of Christians, you're mistaken. You only have to look at how the government went after Hobby Lobby and Little Sisters of the Poor to force them to cover abortion-causing contraceptives. They have no respect for Bible-believing Christians. On the contrary, they have a sick and perverse delight in forcing Christians to choose between believing the Bible and having a job, so they don't starve.

Also, your taxpayer dollars will be used to push for abortion and LGBT activism all over the world:

> Biden's Agenda extends around the globe, to be proclaimed his inaugural week in a "Presidential Memorandum prioritizing his administration's support for LGBTQ+ human rights and development worldwide" followed by:
>
> - **Immediate appointments of "senior leaders across the government**," including at the National Security Council, US Agency for International Development (USAID), Department of State, and in the judiciary
> - "[P]ublic information campaigns" overseas
> - **Prioritizing US foreign assistance to empower LGBTQ+ organizations and activists**
> - **Ensuring "development assistance will be screened and evaluated" accordingly**
>
> This campaign will be waged with **"the full range of our diplomatic tools and foreign assistance," up to and including sanctions on non-compliant countries**.
>
> What happens when this far-reaching ideological assault encounters desperate needs for humanitarian assistance in countries with traditional or religious frameworks? With governments deemed to "foster a climate of intolerance" or engage in violations of LGBTQ+ rights, **"the Biden Administration will aggressively use pressure tactics, as appropriate, including sanctions."**

So, if I had the freedom to speak to my young Christian co-worker about what he had just voted for, this is what I would have said. Alas, I did not feel free to say this to him, because young people are intolerant and crazy when you disagree with them. The election is Tuesday, November 3rd. Please make your voice heard.

# Wayne Grudem responds to Christians who think arrogance is worse than infanticide

**Wintery Knight** · 1 November 2020 · Archived copy · Original

Trump, Pence and Pompeo champion religious freedom at the United Nations

Laura send me this amazing article from the Christian Post, written by famous evangelical theologian Dr. Wayne Grudem. He was responding to a blue state pastor named John Piper. Piper has made a name for himself by emphasizing emotions, piety and "Christian hedonism". Let's take a look at what Wayne Grudem had to say about Christians who support Joe Biden and Kamala Harris.

Here's the intro:

> [John Piper] and I have reached different conclusions about this year's presidential election. His October 22 article, "Policies, Persons, and Paths to Ruin," explained why he thought it would be wrong for him to support either candidate in this election.

Here is Grudem's summary of Piper's argument:

> 1. The personal sins of a leader can be as harmful to persons and to nations as morally evil laws.
>
> 2. Christians communicate a falsehood when we act as if policies and laws are more precious than being a certain kind of person.
>
> 3. The horrible sin of pride leads people to other sins, including defending abortion, and therefore voting for a clearly boastful candidate might also be indirectly supporting abortion.
>
> 4. Voting for either candidate would compromise a person's Christian witness

I have a friend in my office, Scott, who has exactly these views. He is pro-life and pro-family, but he thinks voting for Trump's policies would be wrong, because of Trump's past moral failings.

Here's part of his response to point 1:

> Americans are perfectly free to say, "Trump's boastfulness offends me and I don't want to act that way myself." But if laws are passed (and upheld by the courts) that enforce the LGBT agenda, no creative

> professional like a cake decorator (or photographer or florist) will be free to say, “I believe same-sex marriage is morally wrong, and I won’t use my artistic talent to decorate a cake celebrating same-sex marriage.” No high school girl will be free to say, “I won’t undress and change clothes for my gym class because there are boys in the locker room who claim to be girls.” No Christian adoption agency will be free to say, “We will not place children with same-sex couples.”
>
> And if Democrats gain control of our government and the Supreme Court, and enact their desired policies, no Christian taxpayer will be free to say, “I refuse to pay that portion of my taxes that the government is using to pay for abortions.” No business owner will be free to say, “I will not buy medical insurance for my employees that pays for abortions and sex-change surgeries.” There will be only two choices: violate your conscience or else be driven to bankruptcy or go to jail.

Trump’s first four years not a parade of immoral actions:

> [A]fter his nearly four years in office, I would add that he has shown remarkable courage of his convictions, faithfulness to his campaign promises, steadfastness of purpose in spite of an astoundingly hostile press, incredible energy in the performance of his job, dignity and even eloquence in many formal speeches and ceremonies at home and abroad, respect and appreciation for his wife Melania and his sons and daughters, and a wide-ranging understanding of the hundreds of different issues that every president faces. In contrast to his past life, during his term in office there is not been even a hint of any sexual impropriety. He is sometimes boastful but on a number of occasions I have seen him publicly give credit to many other people for things that have been accomplished. And I think he has shown mature and wise judgment in a variety of situations that he has faced as president.

Biden’s character not exemplary:

> It is easy to compare President Trump with a hypothetical “perfect” president and to conclude that he falls short, but that is not our choice. If Trump is not reelected, we will have President Biden, with an entirely different set of character flaws. The multiple allegations that Vice President Biden used his government office and influence to enrich members of his own family with millions of dollars from China, Russia, and Ukraine should be of deep concern, because using government power to enrich one’s own family is the consistent characteristic of corrupt leaders in many countries of the world.

Conservative Christians occupy prominent positions in Trump’s Cabinet, and they make many decisions that affect voters:

> Donald Trump is not the only person we are voting for. It is remarkable that the Trump administration has elevated so many self-professing evangelical Christians – far more than any in my lifetime – into positions of high influence in our government. They also provide role models for Americans. To vote for Trump as president is also to vote for Mike Pence as vice president, Mike Pompeo as Secretary of State, Ben Carson as Secretary of Housing and Urban Development, Betsy DeVos as Secretary of Education, Russell Vought as director of the Office of Management and Budget, and numerous others. In addition, Trump has appointed numerous deeply committed Roman Catholics to various positions, the most recent being Amy Coney Barrett to the Supreme Court. The character of these leaders is also a role model for the nation.

We will look at responses to the points 2-4 in another post.

For my part, I think that if Trump’s character was going to be a major factor, it would all have come out in his first term. Instead, we’ve seen him act in a way that is friendly to evangelical Christians. I don’t expect him to write systematic theology or do philosophical apologetics or discover a new example of cosmic fine-tuning. He doesn’t

have to be a Christian in order to push for laws and policies that allow me to run my Christian life-plan. I need to be able to earn money without compromising my values, and spend it on the Christian causes I care about. I need to be protected from people like Antifa and gay rights extremists, who don't seem to be at all concerned about moving from angry words to property damage to actual violence against those who disagree with them.

By the way, if you want a good review of Trump's achievements in different areas: economy, job creation, immigration, foreign policy, national security, defense, deregulation, agriculture, law and justice, energy and environment, transparency and accountability, health care, social programs, infrastructure and technology, education and veterans, you can find all that right here.

**Wintery Knight** · 1 November 2020 · Archived copy · Original

Trump and his evangelicals: VP Mike Pence (L) and Sec. of State Mike Pompeo (R)

Laura send me this amazing article from the Christian Post, written by famous evangelical theologian Dr. Wayne Grudem. He was responding to a blue state pastor named John Piper. Piper has made a name for himself by emphasizing emotions, piety and "Christian hedonism". Let's take a look at what Wayne Grudem had to say about Christians who support Joe Biden and Kamala Harris.

Here's the intro:

> [John Piper] and I have reached different conclusions about this year's presidential election. His October 22 article, "Policies, Persons, and Paths to Ruin," explained why he thought it would be wrong for him to support either candidate in this election.

Here is Grudem's summary of Piper's argument:

> 1. The personal sins of a leader can be as harmful to persons and to nations as morally evil laws.
>
> 2. Christians communicate a falsehood when we act as if policies and laws are more precious than being a certain kind of person.
>
> 3. The horrible sin of pride leads people to other sins, including defending abortion, and therefore voting for a clearly boastful candidate might also be indirectly supporting abortion.
>
> 4. Voting for either candidate would compromise a person's Christian witness

**I covered point 1 in a previous post. Below, we'll cover points 2-4.**

Here's part of his response to point 2:

> A presidential election is not deciding what is most important in all of life, which is certainly our relationship with Christ. Paul writes, "I count everything as loss because of the surpassing worth of knowing Christ Jesus my Lord. (Phil. 3:8). A presidential election is simply choosing the leaders of our government. In such a situation, the primary purpose is to decide what kind of government we will have, and in that situation policies and laws are not the only consideration, but they are the most important consideration.

Here's part of his response to point 3:

> I do not think that "arrogance and boasting" are the primary motivations that lead people to support abortion rights. I think rather the primary motive is rebellion against God's commands that forbid sex outside of marriage between a man and woman. The motive is a desire for sexual freedom without the responsibility of raising children. As for doctors who perform abortions, I think the primary motivation is greed.
>
> Piper refers to James 4:1-2 to show that support for his statement that "child-killing" comes from "self-absorbed arrogance and boasting." But these verses specifically speak about coveting, not boasting, that leads to murder: "You desire and do not have, so you murder" (James 4:2).

Here's part of his response to point 4:

> [I]f all evangelical Christians followed Piper's example and decided to write in someone else's name instead of voting for either Trump or Biden. The result would be an overwhelming landslide victory for Biden, because the largest single bloc of Trump supporters is evangelical Christians. In 2016, 80% of white evangelicals voted for Trump, while 16% voted for Clinton and 4% didn't vote for president or voted for some other candidate. If that 4% of "vote for neither one" evangelical voters had been 5% or 6%, Hillary Clinton would have been president.
>
> So, if Trump loses the evangelical bloc, Biden wins. In fact, if *a significant number* of Christians decide not to vote for either Trump or Biden, the result will not be some ideal third-party president. It will be a Biden presidency which (in my opinion) will bring great harm to the nation.

This is really important. If you are going to share Grudem's post on social media, cut and paste this above your link – this is the most important part:

> I differ with my friend John Piper about the results of a second term for President Trump. In Trump second term, I look forward to the appointment of more originalist judges (who will interpret the laws and not make new laws on their own), further legal restrictions on abortion, greater protections for religious freedom and freedom of conscience, lower taxes, fewer government regulations, a rapidly growing economy, low unemployment rates (especially significant for ethnic minorities), increased prosperity for people at every income level, additional history-making agreements between Israel and additional Arab nations, a clearheaded recognition of the economic, military, and information threat from China, a high value placed on human freedom and on personal accountability for committing crimes, increasing numbers of children eligible for taxpayer-supported school choice, a secure border followed by a comprehensive reform of our immigration system, and an increase in police presence in high crime neighborhoods, with a resulting decrease in crime.

That seems to me to be likely, given Trump's first term actions.

More:

> On the other hand, if evangelicals stay away from voting for either Biden or Trump, then then under a Biden presidency I would expect the appointment of hundreds of judges who take the law in their own hands and even consider themselves to be above the original meaning of the Constitution, laws that allow abortion up to the moment of birth and even after, the use of tax money to pay for abortions and gender reassignment surgery, the crippling of our economy with ever-increasing government control and ever-increasing taxes, increased unemployment, a weaker military unable to counter the increasing aggressiveness of China in the world's oceans, a Jimmy Carter-like foreign policy of appeasement, abandoning Israel to fend for itself in the Middle East, adding additional seats to make a liberal majority on the Supreme Court, draconian laws that compel artistic professionals to affirm the validity of same-sex marriage even when contrary to their

> consciences, a reinstatement of the Obama-era guidelines that required schools to allow biological males to use girls bathrooms, locker rooms and showers and to allow them to compete in women's sports, a massive increase in energy costs, ever-increasing restrictions on police forces, leading to an increase in crime, and the proliferation of violence and intimidation to nullify freedom of speech (in practice) for those who disagree with the liberal political agenda, open borders, sanctuary cities, and a complete federal takeover of our healthcare system.

I definitely think that Wayne Grudem's article showed a greater knowledge of what's going on in the real world than John Piper's article. We ought to be concerned about what our lives will really be like under the laws and policies of the next president. It doesn't matter how voting makes us feel, or how voting makes us look to others.

**Wintery Knight** · 2 November 2020 · Archived copy · Original

Trump had 4 years to build a record of achievements for blacks

In this post, I want to hit the high points of the case for Trump as president for black voters. Black voters are incredibly important in this election, because we've lost a lot of white voters who are focused on abortion, gay marriage, illegal immigration, etc. Things that Trump can't compete on. So let's see some of the reasons why a black voter might pull the lever for Donald Trump.

I found Trump's final address to black voters posted on the Dallas Weekly web site. I thought some of his points were interesting. Clearly, he thinks that he has done some things that out to get thoughtful blacks to give him another look.

> As your President, I've done more for the Black community than Democrats like Joe Biden have done in 47 years, and we are going to do so much more. As part of our efforts, we've unveiled my second term agenda called the "Platinum Plan" for Black Economic Empowerment, to ensure even more Black Americans have the opportunity to succeed over the next four years.
>
> The plan is built around the pillars of opportunity, security, prosperity and fairness. I've committed to adding 3 million new jobs for the Black community, creating 500,000 new Black-owned businesses and increasing access to capital in Black communities by almost $500 Billion to create an era of new prosperity and to finally close the wealth gap.
>
> We are increasing access to capital and economic empowerment for the Black community as a way to build Black generational wealth.
>
> […]The unemployment and poverty rates for Black Americans hit record lows just before we were attacked by the China Virus. Wages are now growing faster than they have in over a decade, especially for blue-collar workers.
>
> My Administration is fighting to stop illegal immigration, which hurts Black communities, protect school choice, giving parents more options to access better schools for their children, create new and high-paying jobs, and increase investment in low-income areas — these initiatives create unprecedented opportunities for long-forgotten communities across the country.

> I was also honored to work with U.S. Senator Tim Scott to create the Opportunity Zones program established through the Tax Cuts and Jobs Act, which has already attracted $75 billion in new private investments and created 500,000 new jobs in struggling, underserved communities.
>
> When it comes to Historically Black Colleges and Universities (HBCUs), it was my honor to be the first sitting President to invite all HBCU leaders to the White House, address the HBCU Week Conference and permanently fund these important schools through the FUTURE Act.
>
> I am proud that we also passed landmark criminal justice reform to undo the damage of mass incarceration. This is helping people, who in many cases have served harsh sentences for non-violent crimes, to have a second chance at their American Dream. This is widely viewed as one of the greatest bipartisan victories in a long time, and a testament to what we can achieve together.
>
> When there was increased violence and deaths in Democrat-controlled cities, we started Operation Legend, after young LeGend Taliferro and we are seeing results. When lawless criminals kept looting, burning and destroying Black businesses and communities, I said we needed peace, law and order in these same cities to keep communities, and families safe.
>
> In Black communities across the nation, there's been a reckoning to the reality that the Democrats have failed them for generations. D.C. Democrats are happy to leave urban communities mired with failing schools, no jobs and lost hope while wasting time and taxpayer money on baseless and partisan politics.
>
> The truth is this: Democrats despise my America First agenda because it broke up their taxpayer-funded gravy train that enriched their friends and families, shipped jobs overseas, supported illegal immigrants and continued endless wars while leaving Black American families high and dry.
>
> I will continue to work with any and all Americans who want to Make America Great Again by bringing back American jobs, improving our schools, building safer and more prosperous communities and reuniting families through meaningful justice reforms.
>
> When I promised to stand for the forgotten men and women of this country—whether they live in Chicago or Charlotte, Detroit or Dubuque, or if they are black or white—I meant it. And that's exactly what I've done.

In 2016, Trump got 8% of the black vote and 28% of the Hispanic vote. He needs to double those numbers in 2020, in order to guarantee a win over Biden.

The far-left The Hill reported on the polls:

> Rasmussen's most recent "National Daily Black Likely Voter" poll, which closed on Oct. 29, showed 31 percent of likely Black voters opting for Trump/Pence.
>
> […]And it's not just Black men, NPR reports, "Many Latino men are supporting President Trump this election." The story cites a recent New York Times/Siena College poll that shows that while Biden has a big lead among Hispanic women, he leads Trump by only eight points among Hispanic men.

I think this is interesting, because many white conservatives, including my neighbors and co-workers, look at my skin and think that they know how I will vote. They also think that I'm liberal about abortion, gay rights, gay marriage, religious liberty, divorce, etc. I don't want them to think they know me because of my skin color.

# Which presidential candidate will help minorites get a better education in better schools?

**Wintery Knight** · 3 November 2020 · Archived copy · Original

One of the major issues affecting blacks and Hispanics in America is the issue of poor-performing public schools. Because the administrators and teachers are unionized, they are immune to criticism, discipline or termination for poor performance. And many of the administrators and teachers have no real-world experience at earning money in the private sector. Who will fix it?

Here's Daily Wire reporting on Trump in his own words:

> On Thursday, President Trump redeclared his commitment to enacting school choice, a conservative pitch most popular in the black American community, many of whom have grown weary of sending their children to government-funded public schools.
>
> Speaking at the "Transition to Greatness" roundtable, the president called upon Congress to enact school choice now, hailing it as the great "civil rights issue of our time."
>
> "We are renewing our call on Congress to finally enact school choice now, school choice is a big deal, because access to education is the civil rights issue our time," the president said. "I've heard that for the last, I would say year, it really is, it's the civil rights issue of our time."
>
> President Trump elaborated on the benefits of school choice by forcing underperforming schools to better improve their methods.
>
> "When you can have children go to a school where their parents want them to go, and it creates competition, and other schools fight harder, because all of a sudden they say, 'Wow, we're losing it, we have to fight hard,'" the president said. "It gets better in so many different ways, but there are groups of people against that. You have unions against it, you have others against it, and they're not against it for the right reasons, they were against it for a lot of the wrong reasons."

So basically, Trump wants schools to work more like companies in the private sector that are accountable to customers. When private sector companies compete, you get Amazon, Apple, Dell, Samsung, LG, etc. Competition gives you more choice, so you can find better quality for less money. Public schools don't work like that, and children suffer as a result.

And note:

> President Trump's push for school choice at this turbulent moment in history is not coincidental, being that black American voters routinely have expressed support for it alongside criminal justice reform, which the president helped to enact with the First Step Act.

The Washington Times reports on more differences:

> President Trump is pushing schools to reopen amid the COVID-19 pandemic, saying parents want it, the children can handle it and the economy needs it.
>
> Democratic presidential nominee Joseph R. Biden says the teachers don't want it, the children can spread the coronavirus and the country can't stomach another surge of COVID-19 cases he fears would result.
>
> […]Beyond school choice, Mr. Trump and Education Secretary Betsy DeVos have rescinded Obama administration rules on school discipline, racial disparities and gender identity, and have given states more flexibility in meeting federal mandates.

And here's Biden:

> Mr. Biden counters Mr. Trump's parent-centered approach to education with a teacher-centered platform, promising the money will flow to public education instead.
>
> Mr. Biden counters Mr. Trump's parent-centered approach to education with a teacher-centered platform, promising the money will flow to public education instead.
>
> He wants to triple federal spending on schools with significant low-income populations and require that much of that cover higher salaries for teachers. He also would increase the availability of student loan forgiveness for graduates who go on to work in education.
>
> Mr. Biden's campaign says he will hire up to 60,000 more psychologists for schools to help with what he warned is a mental health crisis.
>
> His unity platform, reached with former opponent Sen. Bernard Sanders of Vermont, opposes vouchers that support private schools and takes a dim view of public charter schools.
>
> The Biden-Sanders plan would impose bureaucratic standards for diversity and discipline on charter schools, cut off money for those deemed underperforming and impose an outright ban on federal money for for-profit charter schools.

I don't see the profit motive as a problem, as it is profits that causes people in the private sector to produce quality goods and services for their customers – or risk losing those customers to competitors who do a better job of pleasing customers.

You can see from this chart how well throwing money into a unionized monopoly has worked over time:

Cato Institute graphs education spending against test scores

In public schools, administrators and teachers are not paid more or less based on pleasing their customers (parents) by achieving results (student performance).

Reason.com is a libertarian web site, interviewed Education Secretary Betsy Devos. I liked this:

> **You are someone who has advocated for more choice, more local decision making, in education. But then you were thrust into the role of national education official. It had to be tempting to use that position to really push local governments to implement more of the ideas that you have. But your idea**

> **is that there shouldn't be some person in charge of telling everyone what to do. Do you ever feel this tension?**
>
> I do. The previous administration went exactly the opposite direction and overreached in multiple areas. Much of what I've had to do is come back and undo a lot of that. But at the same time, there are plenty of folks who've been critical of my not implementing all kinds of conservative policies that, in my view, would be desirable for students and their families. But I think my [approach] here has been one of restraint, and that I believe is ultimately a big accomplishment.
>
> I view this department as one that probably never should have been stood up. I think there are ample arguments for it having gotten more in the way of students and their futures than actually being any kind of value-add.
>
> **Should the Department of Education be abolished—or gradually abolished, perhaps?**
>
> I would not be at all unhappy to work myself out of a job. I think that states and local communities and, most importantly, the family has to be the epicenter of these decisions. The 40 years since this department has existed, there's been over a trillion dollars spent to close the achievement gaps. They haven't closed one little bit. They've only opened in multiple areas. So why would we continue to advocate for doing more of the same thing and expect something different?

Do you like having Betsy Devos in charge of education policy? I do. For me this is just another reason to support Trump for President.

# Here’s what is happening in Democrat-run states where Trump was leading last night

**Wintery Knight** · 4 November 2020 · Archived copy · Original

Source: Five Thirty Eight, ABC News

# Trump campaign starts legal battle with Democrat-run states

**Wintery Knight** · 5 November 2020 · Archived copy · Original

The Federalist:

> As of this writing, it appears that Democratic Party machines in Michigan, Wisconsin, and Pennsylvania are trying to steal the election.
>
> As reporters and commentators went to bed early Tuesday morning, all three states were too close to call, but President Trump led former Vice President Joe Biden by comfortable margins—far beyond what had been predicted in the polls. None of the networks called these states because enough mail-in ballots remained uncounted that it could swing either way, but Trump's position looked good.
>
> Then, something strange happened in the dead of the night. In both Michigan and Wisconsin, vote dumps early Wednesday morning showed 100 percent of the votes going for Biden and zero percent—that's zero, so not even one vote—for Trump.
>
> In Michigan, Biden somehow got 138,339 votes and Trump got none, zero, in an overnight vote-dump.
>
> When my Federalist colleague Sean Davis noted this, Twitter was quick to censor his tweet, even though all he had done was compare two sets of vote totals on the New York Times website. And he wasn't the only one who noticed—although on Wednesday it appeared that anyone who noted the Biden vote dump in Michigan was getting censored by Twitter.
>
> […]Then another mysterious all-Biden vote dump happened in Wisconsin. Biden miraculously overcame a 4.1-point Trump lead in the middle of the night thanks to vote dumps in which he got—you guessed it—100 percent of the votes and Trump got zero.
>
> […]Then another mysterious all-Biden vote dump happened in Wisconsin. Biden miraculously overcame a 4.1-point Trump lead in the middle of the night thanks to vote dumps in which he got—you guessed it—100 percent of the votes and Trump got zero.

I noticed that the Michigan Secretary of State is a former employee of the Southern Povery Law Center, a far-left hate-group that's been plagued with sexual scandals.

Just The News:

> President Trump's campaign on Wednesday began assembling an all-star legal team to file challenges to election regularities in several battleground states, starting with a Court of Claims lawsuit in Michigan.
>
> Among the lawyers the president is activating include his private attorney Jay Sekulow, who will help campaign lawyers with matters before the Supreme Court as well as former New York City Mayor Rudy Giuliani and former Florida Attorney General Pam Bondi, officials said.
>
> Sidney Powell, the lawyer for former National Security Adviser Michael Flynn, may also be called upon, officials said.
>
> The legal team's first stop was Michigan, where the campaign filed an action in the Court of Claims seeking to halt vote counting until irregularities are addressed, campaign manager Bill Stepien announced.
>
> "As votes in Michigan continue to be counted, the presidential race in the state remains extremely tight as we always knew it would be. President Trump's campaign has not been provided with meaningful access to numerous counting locations to observe the opening of ballots and the counting process, as guaranteed by Michigan law," Stepien said. "We have filed suit today in the Michigan Court of Claims to halt counting until meaningful access has been granted. We also demand to review those ballots which were opened and counted while we did not have meaningful access. President Trump is committed to ensuring that all legal votes are counted in Michigan and everywhere else."
>
> A separate team led by Giuliani was heading to Pennsylvania, where the campaign had concerns about counting in Philadelphia.

Chin up, buttercups. It's not over.

# Project Veritas documenting Democrats committing voter fraud in multiple states

**Wintery Knight** · 6 November 2020 · Archived copy · Original

Fact checkers suppressing evidence of voter fraud
Three videos from the Project Veritas document voter fraud.

Michigan:

Nevada:

Pennsylvania:

Meanwhile, on Facebook, partisan Democrat “fact checkers” are marking evidence of voter fraud as “missing context”. You can’t post evidence of voter fraud committed by Democrats unless you have more context explaining that it’s OK for Democrats to commit voter fraud. This is called “fact-checking” by “non-partisan” journalists.

# Christian woman finds a way to discuss her faith with non-Christians

**Wintery Knight** · 8 November 2020 · Archived copy · Original

I found an interesting article where a Christian woman explains how she used to share her testimony with non-Christians. But that wasn't working. So she decided to try something different.

She writes:

> I'll never forget the first time I shared my personal testimony with a non-Christian.
>
> When the opportunity arose and I shared my story with an unbelieving friend, she replied, "That's so cool. I'm so happy you found something that works for you."
>
> *For me?*
>
> "It's not about what works *for me*," I said, trying to hide my discouragement. "It's about what's true for everyone."
>
> "That doesn't make sense," she responded. "That's *your experience*, not mine. I had a similar revelation when I realized I could leave the church, and I've become a better person for *my* decision. Just as you were freed from your heaviest burdens by finding God, I was freed from mine by leaving God behind."
>
> I was devastated but I chalked it up to my friend's hardheartedness. I decided to shake the dust off my feet and look forward to the next opportunity.
>
> But time after time of sharing my testimony resulted in similar responses. People expressed enthusiasm that I was happy, that Christianity worked for me, and that I had "found my niche." Yet no one considered my experience as anything more than just that—my own personal experience.
>
> […]I had been taught that sharing what God had done in my life was the ideal way to witness to non-Christians. A personal testimony was interesting yet non-confrontational, compelling but inoffensive. And yet, despite having shared my testimony with dozens of unbelievers, not a single person felt challenged to consider the truth claims of Christianity.

She noticed that her approach wasn't actually in the Bible. There was a different approach being demonstrated by Jesus, and later by his disciples.

She writes:

> When Jesus called his first disciples, he taught truth and provided evidence (miracles) to support his claims, then he asked people to follow him (Luke 5:1–11). In fact, this was his method whenever he went into new regions (see Luke 4:14–44; John 4:7–26). People decided to follow Jesus not on blind faith or a subjective feeling, but based on the evidence they had seen and heard.[i]
>
> Jesus also used evidence to assuage the doubts of even those who had been with him a long time. John the Baptist was Jesus' cousin, who leapt in the womb during Mary's visit (Luke 1:39–45), baptized Jesus in the Jordan River, heard God's voice from heaven, and saw the Holy Spirit descend on Jesus in bodily form like a dove (Luke 3:21–22). Yet when John experienced unexpected suffering, he began to doubt.
>
> Jesus didn't respond as many do today, by insisting that John "just believe" or "have faith" or "prayer harder." Rather, he responded with more evidence, saying, "Go and tell John what you hear and see: the blind receive their sight and the lame walk, lepers are cleansed and the deaf hear, and the dead are raised up, and the poor have good news preached to them. And blessed is the one who is not offended by me." (Matt. 11:2–6).
>
> […]At Pentecost, the apostle Peter offered signs and wonders, fulfilled prophecy, and relayed eyewitness testimony to persuade people from all over the Roman Empire that the most reasonable explanation for what they were seeing was not morning drunkenness, but a risen Messiah (Acts 2:1–41).
>
> On his missionary journeys, the apostle Paul reasoned with the Jews from the Scriptures, explaining and proving that Jesus was the Messiah who needed to suffer and rise from the dead (Acts 17:1–3, 17). And he reasoned with the Gentiles from outside the Scriptures, making a case with their own accepted beliefs to convince them (Acts 17:17–34).
>
> In fact, in describing his mission, Paul told the Philippians, "I am put here for the defense of the gospel" (1:7, 16). This word translated defense is the same word from which we get our English word "apologetics," meaning to make reasoned arguments or to provide evidence as justification. Using this same word, Peter commanded believers to "always [be] prepared to make a defense to anyone who asks you for a reason for the hope that is in you"(1 Pet. 3:15).

So, she decided to dump the testimony approach, and try the Biblical approach. But she had to change it a little bit, since she couldn't perform miracles herself:

> We are not eyewitnesses to Jesus's life and resurrection, but we have the accounts of those who were. We don't typically see miracles, but we have millennia of biblical scholarship and archaeology that provide reasons to believe the accounts are trustworthy. We don't often hear God speaking audibly or see him parting seas, but we have significant scientific evidence that shows the universe had a beginning, and millennia of observation to confirm the scientific principle that everything that begins to exist has a cause.

I think a lot of Christians never move on from approach she described that wasn't getting results. And there's a reason for that – studying evidence is hard work. But I can tell you from my experience as a software engineer, there is no better way to convince other people to adopt your view than to show them working code that produces results. If they have a prototype, they will adopt your design. Similarly with Christianity. If you have evidence, then you will be persuasive.

When talking about spiritual things with non-Christians, always remember the joke about the two men walking in the woods who meet a bear. One man starts to put on his running shoes. The other man says "what are you doing? you can't outrun a bear!" And the first man says "I don't have to. I only have to outrun you". It's the same with apologetics. You don't have to be William Lane Craig to talk about your faith to non-Christians. You just have to know more than your non-Christian opponent knows about evidence.

The way things are going these days with the public schools and the mainstream news media, this is actually pretty

easy to do. One or two introductory books on the origin of the universe, the fine-tuning for intelligent life, the origin of biological information, the origin of body plans, the historical reliability of the New Testament, the minimal facts case for the resurrection, etc. will do the job. You might need another one on philosophical challenges like evil, suffering, divine hiddenness, etc. But we're talking no more than 5 books, and you'll be effective in the vast majority of your conversations. If you can only get one book, I like Sean McDowell and Jonathan Morrow's "Is God Just a Human Invention?" best.

# Some specific instances of alleged voter fraud that need to be investigated

**Wintery Knight** · 9 November 2020 · Archived copy · Original

Facebook fact checkers anxious to crown Joe Biden president

Facebook and Twitter are urging me to accept a Joe Biden / Kamala Harris socialist presidency, and nevermind all the reports of voter fraud. After all, they say, I shouldn't be like the Democrats of the last 4 years, refusing to accept the results of an election and resorting to fraudulent Democrat-funded conspiracy theories to malign President Trump.

Here's the latest from The Federalist:

> Earlier this week, Michigan Secretary of State Jocelyn Benson denounced the lawsuit filed by President Trump's campaign as "frivolous," designed to spread "misinformation" and "sow seeds of doubt among our voters about the integrity of our elections process."
>
> The lawsuit alleges that Republican election observers, known as "poll challengers," had been denied access to counting stations to observe the opening of absentee ballots, as required under state law.
>
> When I was in the room it was very clear that we were outnumbered, I would say three to one," Nesbitt said. Republican and Democrat poll challengers have different types of credentials, making it easy to tell how many Democratic challengers there were compared to Republican. Nesbitt estimates there were about 1,200 people in the hall but only about fifty or sixty GOP poll challengers—not enough to cover all of the tables where ballots were being counted.
>
> Even so, when these Republican poll challengers came into the hall, the ballot-counting stopped. "It wasn't too long after I got into the room that it became very apparent that there was no rush to be counting anything," Nesbitt said. "For about four hours, over ninety percent of the counting boards had no activity."
>
> Asked why they stopped, Nesbitt replied, "I believe that they were trying to wait for us to leave, because we had an influx of volunteers who came into the room following the union members."
>
> The waiting seemed to work—if only because city election workers would not allow credentialed Republican poll challengers back into the hall if they left for any reason. "Once we left we were not allowed to return. So

if you left for a water break or to go get a meal you were not allowed, Republicans were not allowed to be replaced."

Not only did the city election workers refuse to replace GOP observers who left, they also began expelling them on trumped-up infractions. "The first person I became aware of that was removed, was an attorney who was observing and he adjusted his face mask," Nesbitt said. "And the election workers cited that as grounds for removal."

That wasn't all. When election workers expelled a Republican poll challenger, the ballot counters erupted in cheers. "That was the first one that I had heard very large cheers for," Nesbitt said. "I'll admit, at first I had no idea what was going on. I didn't know why the election workers would be so boisterous over something. But he was escorted out by the police."

Other GOP observers were kicked out for doing their job and challenging ballots, which election workers claimed was "hindering the process," according to Nesbitt. She went on:

So what many poll challengers were actually seeing was that when the ballots were scanned and it did not match a voter in the electronic poll book, and it did not match a voter in the supplemental paper poll book, which was provided due to Michigan's law that allows for same-day registration, they were still allowing those ballots to go through and be counted. And that is when the GOP poll challengers were issuing those challenges. So they were either being ignored or kicked out when they were doing that.

The ballot-counters were also not allowing Republican poll challengers to observe the ballot supplication process. If an absentee ballot can't be read by the machine for whatever reason, the counters get out a blank ballot and fill it out with the information from the damaged ballot. This is supposed to be observed by poll challengers from both parties to make sure the counters aren't changing anything from the original ballot.

But whenever Republican observers were present, said Nesbitt, "They would position their bodies in the way, and other election, workers at that counting board would position their bodies in the way, to prohibit us from being able to witness what was happening. Some would complain. And, you know, require the pole challenger to move farther away, you know, move six feet away because of COVID. It was very clear that they did not want us to see what was happening."

If a GOP observer raised a concern about this, they were kicked out.

During this time, explained Nesbitt, it wasn't entirely clear who was in charge or who was calling the shots. "It was very hard to see the hierarchy in the room."

As Republican poll challengers kept getting kicked out for trying to do their jobs, Nesbitt took out her phone to record it. She sent a short video clip to her husband, state Sen. Aric Nesbitt, who posted it on Twitter.

My wife just sent this video of Detroit election workers cheering every time a @migop attorney is removed from the TCF Center, where absentee ballot counting is happening. She says they do this every time they eject a GOP poll watcher & that Dem watchers outnumber GOP 3:1. pic.twitter.com/Sx1aHCoChY

— Aric Nesbitt (@aricnesbitt) November 4, 2020

Nesbitt says she never saw a Democratic poll challenger be removed the entire time she was there, only Republicans, even though Democrats were doing the same kinds of things—leaving to get food or water, adjusting their masks, observing the process and challenging ballots. Some of the Democratic poll challengers, adds Nesbitt, were wearing Joe Biden campaign shirts and "Medicare for All" masks

Every time the Republican poll challengers tried to meet up to discuss what was going on, they were harassed by the city workers, the ballot-counters, and the Democratic poll challengers, "because of social distancing."

"It was very clear that they were targeting us and finding any reason to get us removed."

> Nesbitt finally decided to leave after ballot-counters flatly refused to process military ballots in her presence. There were approximately 5,000 military ballots that all had to be transposed onto a blank form because the vice president had been omitted from them, Nesbitt explained. “When they started to distribute those ballots I was at a table to observe, and they would not begin the processing while I was standing there, despite all of the workers being at the table.”
>
> “I’ll admit I felt very defeated and like our efforts were almost futile. At that point, that is when I decided to leave.”

The Michigan Secretary of State is a former board member of the Southern Poverty Law Center, an anti-Christian hate group that was linked to domestic terrorism. It has been recently involved in sexual harassment scandals.

This isn’t the only problem with Democrat voter fraud. There’s one in Nevada, where dead people voted:

> On Oct. 9 this year, Fred Stokes Jr. was mailed a ballot in Clark County, Nevada, for the upcoming presidential election just less than 30 days away. Three weeks later, the county confirmed the ballot’s receipt on Halloween and marked it off as “completed.” There remained only one problem with Stokes’ absentee ballot counted on the fall holiday: Fred Stokes Jr. had been dead for three years.
>
> According to the gravestone shown below, Stokes died at the age of 92 in June 2017.

Apparently, this one one example of hundreds of dead people voting.

In Pennsylvania, there was more voter fraud:

> A Pennsylvania mailman has said in a sworn affidavit that he was ordered by supervisors to collect and submit late ballots, which he said supervisors then backdated so that they appeared to have been mailed in time.

More Nevada:

> A whistleblower claims to have seen a Biden-Harris van bringing ballots to a counting center in Nevada, according to the Trump campaign.
>
> The whistleblower said he went for a walk on his lunch break around the counting center and spotted a Biden-Harris van unloading boxes of ballots, said conservative activist Matt Schlapp at a press conference organized by the Trump campaign in Las Vegas.
>
> “These people who were involved in this activity then decided to create a human shield around what they were doing in the van,” said Mr. Schlapp, who is chairman of the American Conservative Union.
>
> The ballots were filled out and the envelopes were resealed, he said.

Wisconsin:

> County and municipal clerks and poll workers across Wisconsin may have unlawfully altered witness statements on thousands of mail-in ballots across the state, “The Dan O’Donnell Show” has learned.
>
> Wisconsin Statute 6.86 provides that an absentee ballot must be signed by a witness, who is also required to list his or her address. If a witness address is not listed, then the ballot is considered invalid and must be returned to the voter to have the witness correct.
>
> Instead, multiple sources tell “The Dan O’Donnell Show,” municipal clerks and vote counters across the state simply filled out witness signatures themselves. Acting on false and unlawful advice from the Wisconsin Elections Commission (WEC), these clerks may have inadvertently invalidated thousands of absentee votes.

More Pennsylvania:

> A Pennsylvania poll watcher says the ability of overseers to supervise ballot-counting in Pittsburgh on Election Day was hamstrung by a setup in which observers were set too far away from ballots to make any meaningful observation of the process.
>
> David Shestokas, a Chicago-based lawyer who joined several dozen other lawyers and Allegheny County residents to poll-watch in Pittsburgh on Tuesday, told Just the News that ballot monitors "had no input and no ability to watch anything."
>
> […]"We literally had no input and no ability to watch anything," he said. "As far as I'm concerned, each and every one of those ballots was opened illegally."

Facebook has been dutifully marking all these news stories and videos alleging voter fraud as "false news", in order to help their Demcorat allies. But I am linking to them here because I think they are interesting. People should know why Trump is taking the Democrats to court.

# Why I admire people in the armed forces more than famous entertainers

**Wintery Knight** · 10 November 2020 · Archived copy · Original

I've noticed that many Christians can tell me a lot about famous entertainers. It doesn't matter if it's singers, musicians, actors, athletes, etc., they seem to know details of their biographies, achievements, etc. And it doesn't really matter if those people are Christians, or whether they have performed actions consistent with a Christian worldview in their private lives.

Anyway, speaking for myself, I mostly admire two kinds of people. The first kind is the kind I blog about here all the time: Christian scholars engage non-Christians intellectually using logic and evidence. The second kind, as you can tell from my reading list, is people who distinguish themselves in conflict with those who oppose the principles and policies that allow me to live out my Christian life. And I am especially interested when people who are fighting evil (imperialists, Nazis, socialists, communists, leftists, etc.) exhibit Christ-like character in risking their lives to save others, or in giving their lives to save others.

Lt. Walt Chewning charges unto burning F-6F Hellcat to save trapped pilot

I have a war story to tell you that happened on November 10th, 1943.

> Lieutenant (later Lieutenant Commander) Walter Lewis Chewning of Cynwyd, Pennsylvania, steps on the burning fuel tank of an F6F-3 Hellcat flown by Ensign (later Lieutenant) Byron Milton Johnson of Potter, Nebraska to effect a successful rescue of the pilot on November 10, 1943. Johnson had flown out to USS Enterprise from Barbers Point, Hawaii, enroute to Makin Atoll in the Gilberts to support the United States Army invasion, which occurred on November 20, 1943. The afternoon of November 10, Johnson took off in F6F Hellcat Number 30 for a routine training exercise. He immediately developed engine trouble and requested an emergency landing. He was waved off three times as he struggled to maintain control, but his tail hook caught the third arresting gear wire, and Johnson's Hellcat was slammed into the deck, coming to rest in the port catwalk. The plane came to rest on its external belly fuel tank, which started to leak. As the engine vibrated horribly as the propeller bent itself on the deck, sparks ignited the fuel. The hard landing had jammed Johnson's canopy closed, shearing the retaining pin; he could not exit the plane. Chewning, who had joined the ship October 2, 1943 as Enterprise new catapult officer, scrambled out of the catwalk and came through the

> smoke. Stepping on the burning belly tank, he forced open the canopy and pulled Johnson to safety.

He received the two highest non-combat medals available:

> Chewning was awarded the Navy and Marine Corps Medal for his actions.

He was a well-educated and accomplished person before joining the Navy:

> Chewning played soccer and Lacrosse at Cornell while studying Mechanical Engineering, breaking his rib and left ankle in one game. He graduated in 1936 and studied at the Massachusetts Institute of Technology before joining the Navy in January 1941. He was the assistant to the Chief Engineer at the Naval Aircraft Factory in Philadelphia, Pennsylvania before joining USS Enterprise. He served as Enterprise's catapult officer until December 1944, when he transferred to Dutch Harbor Naval Air Station in Alaska as ordinance officer. Chewning served in the Navy until December 1949; he also was awarded the Bronze Star. After the war he assisted research and development for various aeronautical companies, the United States Air Force, and the fledgling National Aeronautics and Space Administration. Motion picture film of the crash, taken from Enterprise's bridge, was shown as part of the television program "Victory at Sea" on January 25, 1953. Chewning and Johnson gave interviews to several newspapers about the accident after the program aired.

You can see a video clip of the rescue here, from 5:35 to 6:00. I found a colorized version of the picture above here:

Lt. Walt Chewning charges unto burning F-6F Hellcat to save trapped pilot
This image was colourized from the original by Paul Reynolds.

What I thought was interesting about Chewning was how he had everything going for him in terms of his education and career, but he chose to join the Navy anyway, in order to defend his country from Japanese imperialism. Those who understand how the Japanese treated prisoners and conquered peoples will know which side of that conflict was good, and which side was evil. Chewning wasn't some sort of loser who took risks for fun and thrills. It had to be a risk where the prize was worth the risk. And he had the humility to consider others better than himself, so that their life was worth the risking of his own. Many people on the secular left who like to talk about how generous, compassionate and virtuous they are are unable to make moral judgments against evils like Japanese imperialism – much less take self-sacrificial action against them.

I just think that it's important for young Christians to have the right kind of heroes. The heroes who are promoted

to young Christians by the cultural elites are not usually the right role models. And there is a reason for that. The secular leftists don't want young Christians to be emulating people who excel according to the standards of the Christian worldview. We are in a religion where self-sacrificial love is the centerpiece. Taking trouble on yourself for someone else. Doing your job, when it goes against your own self-interest. Let's not allow a bunch of godless socialist celebrities to pick and choose who we hold in high regard.

# What are we learning about vote counting from monitors and whistleblowers

**Wintery Knight** · 11 November 2020 · Archived copy · Original

Running totals of late votes in Pennsylvania

Let's take a look at the latest stories.

Here's a new statistical analysis from William Briggs, writing for The Stream:

> There's a lot of chatter online about statistical oddities in several states, and I've been asked to analyze the votes in Pennsylvania. That work is ongoing, and at the moment, I'm working with limited data. Still, I think there are clear signs that something untoward happened in the Keystone State. Here are a couple of telling examples.
>
> I've gotten official county-level timed voting data that started at 11:00 on November 4, the day after the election, to 11:29 on November 7, which is Saturday. So, these are all late vote counts. They start, county by county, where the vote left off on election night.
>
> [Above] is a picture of the running totals by the time the votes were added, summed across all counties, during those time periods. They do not start at 0, but where things were after election night.
>
> The early gains for Biden are mainly from Philadelphia, Allegheny, Montgomery, Chester and Berks counties. A simple plot (click to see: it's large) shows the size of vote additions for both candidates, when new vote totals (greater than 0) were added by county (and not all counties added votes after election day).
>
> All goes well for Trump until election night, November 4, at 9:15 pm, when he loses just under 10,000 votes. Curiously, this loss is from three different counties simultaneously: -1,063 in Allegheny; -2,972 in Bucks; -7,135 in Chester. Biden never lost any votes (at least, not in this late voting).
>
> This does not mean the decreases happened at that moment. Rather, that's when they were recorded in the official data.
>
> Biden's next curiosity was the big increase of 27,396 votes on Nov. 6 at 8:53:00 over one consecutive reporting period. This bump is just like the blue-red F-memes you have seen: this only seems more spread out because of the finer time scale used.
>
> These two curiosities account for a 37,263 vote swing for Biden. Biden's total, as of the end of this data, was 3,344,528, and Trump's 3,310,326. Biden therefore "won," in this dataset anyway, by 34,202 votes.

> So, three separate counties removed about 10,000 votes from Trump on Wednesday evening. And then late Friday, about 27,000 votes were added for Biden.
>
> This happened after it was clear that this is what Biden would need to push ahead. This needs to be answered.

Detroit poll monitor barred from observing counting:

> An affidavit from a Republican poll challenger in Detroit, Michigan confirms there may be voter fraud in the state.
>
> Former Michigan Assistant Attorney General Zachary Larsen testified that at the convention center in downtown Detroit, election officials appeared to be processing a "majority" of mail-in ballots from ineligible voters that were not listed in the poll book of eligible voters, nor Larsen's scanned list. Larsen confirmed in the affidavit that he had heard similar reports from other concerned poll challengers as well.
>
> Read this sworn affidavit from GOP poll challenger, and former Assistant AG for Michigan, Zachary Larsen, on the alleged fraud he observed in Detroit. This is Third World stuff, and every American should be outraged if these allegations are true https://t.co/63nLXJxAZF pic.twitter.com/9WbamMw4Yc
>
> — Benjamin Weingarten (@bhweingarten) November 9, 2020
>
> When Larsen tried to shift positions to get a better visual on the poll book on the computer screen and the mail-in envelopes to confirm his suspicions, he was "loudly and aggressively" scolded for not social distancing by standing at least six feet away from the election official.
>
> Larsen protested the election official's reprimands saying that he couldn't see to verify the eligibility of the voters' ballots which were being counted, but the worker told him he had to stand with the computer screen out of his view.
>
> Despite being allowed to observe from an "equivalent distance from poll books" on Election Day in other precincts such as both Lansing and East Lansing, Larsen was asked to leave the premises after the official summoned their supervisor who demanded he stand six feet away.
>
> The documents also notes that, despite their insistence about social distancing, the supervisor was sitting approximately three feet away from the other officials, thus breaking their own social distancing rule.
>
> Larsen left to fill out a challenge and talk with an another attorney. Shortly after he left, the document states that no new poll challengers were allowed in the counting room and he was also prohibited from re-entering.
>
> "Election officials never allowed Mr. Larsen to re-enter the counting room to fulfill his duties as a poll challenger after he had discovered the fraud which was taking place," the affidavit said.

Whistleblower complaint ignored in Nevada:

> A second sworn affidavit from a whistleblower who was an election worker in Clark County, Nevada, claims mail-in ballots were improperly filled out in a Biden-Harris van outside a polling place.
>
> […]The whistleblower, who worked as a poll worker from Oct. 17-30, complained about a Biden-Harris bus or van that was often stationed outside the polling place that would often have "speakers, dancers, music and other festivities going on" and whose organizers had to be told "several times a day" to "stay 100 feet from the polling location." He also said that voters without proper identification were permitted to cast provisional ballots.
>
> The biggest shock claim, though, dealt with improperly filled out ballots in the van belonging to supporters of presumptive President-elect Joe Biden, whom he saw while on a lunch break walk on Oct. 28 or 29.
>
> "I personally witnessed two people handing multiple unopened mail in ballot envelopes to two other people who then opened and filled out the ballots against the side of the Biden/Harris van," the affidavit said. "The

> same two people who marked the ballots then put the marked ballots in official pink and white envelopes. These people were not poll workers."
>
> The affidavit continued: "By my final walking lap, there were 5 or 6 additional people who formed a human wall, which moved as I walked by, apparently in an attempt to block my view of the four people who were opening envelopes, marking ballots, and placing those ballots in the pink and white return envelopes."
>
> The whistleblower recalled reporting the incident to a supervisor, who then called the Clark County Elections Office, to no avail.

Thats the latest. I am expecting lawsuits. Many lawsuits.

# Eyewitnesses to voting irregularities have signed sworn affidavits

**Wintery Knight** · 12 November 2020 · Archived copy · Original

Twitter doesn't like people sharing sworn affidavits

*The following post is written by a friend, who is also a software engineer. I have linked to his sources at the bottom of the post.*

---

Here's my attempt at piecing together evidence for fraud in the 2020 presidential election. Misinformation is everywhere and it's possible I have something wrong, so feel free to add, remove, or correct:

1. Voting software added votes for Biden: Antrim county, MI said their Dominion voting machines gave Biden a 29 point lead over Trump (6000 votes), even though Trump beat Hillary by 30 points there in 2016. Manual counting revealed the machines erroneously gave extra votes to Biden. [1,2] The error was blamed on a missing software update.[3] 47 other counties in Michigan also use Dominion voting machines.[4] In Oakland County, MI, separate voting software glitched 1200 votes from a republican county commissioner to his democrat challenger.[5]

2. Poll watchers denied access: Chair of the Federal Election Commission (nominated by Trump in Sep 2017, voted in by senate) says voter fraud is happening, poll watchers are not being allowed to watch.[7] Others testify of being denied access.[8,9]

3. USPS changed postmarks: Project Veritas interviewed USPS workers from Michigan[10] and Pennsylvania[11] who said the offices were illegally changing dates on ballots to allow late votes, even those postmarked on Nov 5th and 6th. Both post office supervisors hung up the phone after they were asked about it. This skews the election because Biden's supporters are more likely to vote by mail. USPS told Veritas they're now investigating.[12]

4. Non-citizen votes: Historically about 16% of non-citizens illegally register to vote, and about 82% of the time they vote Democrat. Those numbers alone are far more than enough to swing the election from Trump to Biden in swing states.[13] In 2013, Obama prevented states from requiring registrants to provide proof of citizenship.

5. The ratio of mail-in ballots favoring Trump vs Biden for any state should remain about the same over time as they come in, because they're shuffled when in the mail. Or perhaps drift gradually from democrat to republican

because republicans live further from cities. But in key swing states we see the opposite, with them either gradually or drastically jumping toward democrat as votes were counted late on election night.[14]

6. In Detroit, Poll challenger Andrew Sitto reports that “tens of thousands” of ballots arrived at 4:30am, with all he observed going to Biden. Poll challenger Daniel Gustafson confirms, adding that the ballots arrived in large, unsecured bins, with no label indicating their source of origin. At the same site, Republican poll challenger Robert Cushman reported poll workers adding votes from unregistered voters, registering them all with a Jan 1, 1900 birthday. Each of these witnesses signed sworn affidavits.[15]

7. I don’t think there’s anywhere that has more votes than what there are people registered to vote.

8. The middle of the night jump in Biden votes in Michigan happened because Shiawassee, MI adding an extra zero to Biden’s count. That’s since been fixed.[16]

9. The Wisconsin middle of the night Biden jump is said to have been from Milwaukee absentee ballots arriving all at once.[17] Milwaukee is very liberal and democrats are more likely to vote by absentee, plausibly explaining the high ratio of blue ballots? If not for some of this other evidence?

10. Trump Campaign has filed a lawsuit claiming 10s of thousands of votes in Nevada were from people who didn’t live there.[18] A sworn affidavit from a witness in Nevada says, “5 or 6 additional people who formed a human wall, which moved as I walked by, apparently in an attempt to block my view of the four people who were opening envelopes, marking ballots, and placing those ballots in the pink and white return envelopes” A poll worker in Nevada was told to process ballots even when the signatures didn’t match the names.[6]

Twitter and FB are censoring much of the content questioning the election results, whether legit or not. Even Trump’s tweets. It’s scary to see them take that power over the president.

Biden’s gaffe from two weeks ago about creating “the most extensive and inclusive voter fraud organization in history” seems almost prophetic.[19]

[Sources]

---

By the way, I noticed that trying to tweet the sworn affidavits being referenced is being blocked by Twitter. They don’t want people to hear these statements, because they’re in the tank for Biden.

# What books would you suggest to build up a young man who doesn't like to read?

**Wintery Knight** · 13 November 2020 · Archived copy · Original

I link to Laura's blog "An Affair With Reason" a lot, because she is very bold about her Christian convictions and uses reason and evidence when defending her views. She has started a new series where she talks about the conversations she has, where she is able to bring up Christian topics. This time, she had a conversation with a 13-year-old boy about his lack of interest in books.

She writes:

> It was 9:15am and we were about to begin another grueling CrossFit workout. Nolan, a homeschooled eighth-grader and the youngest member of our morning workout crew, was moaning at the prospect of exerting so much energy on so little sleep.
>
> "I was up so late! I just don't know if I can do this," he agonized.
>
> I replied jokingly, "Were you up late doing some extra reading just for the sake of becoming a more excellent and informed person?"
>
> He smiled. "I hate reading! Reading is the worst. I don't think I've read a book since sixth grade."
>
> Knowing the critical impact that great books can make in a person's life, I pushed back a little. "Well maybe you just haven't found the right books yet."
>
> He replied, "Why do I have to read, anyway?"
>
> And with this question I saw a teachable moment. After all, he needs to know the answer to that if he is to make the most of the knowledge and wisdom that are available to him through great books. Many activities compete for the attention of young people. If they don't understand why something like reading is important, they aren't likely to prioritize it, and when they are forced to read, they may look for shortcuts and complete their assignments with mediocrity rather than gaining the full benefits available to them. Without understanding the purpose or benefits of reading, they are likely to discontinue as soon as they no longer feel the threats of a teacher, parents, or a bad grade hanging over them.
>
> "Well," I said, "there's the fact that reading great books can shape your values and priorities so that you're better equipped to make good decisions that lead to thriving for you and those around you. Reading the right books will make you a better man, a better leader, a better husband, and a better citizen. You aren't going to learn those things from the culture. Today's movies, music, and tv shows will weaken you until you have nothing of value to offer a woman or a neighbor or your community. Our modern forms of entertainment are written with an agenda to spread values that are contrary to God's values and contrary to the way He created reality. If you succumb to that garbage, you may be popular with your peers, but you won't be successful in any sort of meaningful or ultimate way. You have to counter the constant lies with truth and goodness.
>
> "Plus," I added, "great books not only educate and inform; they also inspire and motivate us toward worthy goals. They point us toward all that is good, excellent, noble and praiseworthy." (I had just read Philippians chapter 4 a few days earlier.)
>
> "Daaang," he said, in his yet-unrefined 13-year-old vocabulary. "Fine. What should I read?"

She goes on from there to explain why she is going to take up the task of recommending books to Nolan, and why it's important to do so in the current culture. If you're a man, and you're feeling undervalued in this society, you'll be very encouraged by what she had to say. She started out by looking ahead to what Nolan could grow into. Then she talks about how men are being treated today in a society that doesn't value them. She talks about the kind of man she'd like Nolan to be. She's very optimistic about the difference that Christianity would make to Nolan's

character and effectiveness.

### What would I recommend to Nolan?

Lately, one my female friends has been investigating where I get my character traits from. It turns out that lots comes from the Bible. I was just reading Ephesians 4 for my Bible study, and I noticed how in verse 28 it talks about making sure that you work in order to have something to share. I made that same point in the podcast that I did on BLM with Tim Stratton of Free Thinking Ministries. I got my view of education and career from Ephesians 4. Many of my character traits and views came from reading the Bible at the right time in my life. So I recommend that boys read the Bible, and put it into practice. Start with Phillipians.

My female friend also found out that a lot of my views go back to classical literature and classical movies. When I was young, I was very disappointed with my parents. They seemed to have no plan for me. They made demands, but just to get good grades and to make money. They didn't have any character goals for me. And most importantly, they didn't lift a finger from day to day to help me to achieve anything – success, character, wisdom, etc. So I had to parent myself. And I did that by reading classical books and watching classical movies. I listed a bunch of them in my About WK page. For example, I taught myself to look past a woman's looks to her character by reading "Great Expectations" by Charles Dickens.

I was influenced by classical literature, military biography, military history, military strategy, and evidential apologetics. So, here are my recommendations for a 13-year-old boy would be: "The Hobbit", "Rifleman Dodd", "The Screwtape Letters", "Mere Christianity", "The Problem of Pain", "A Man for All Seasons". I also noticed that people love this new book "Great Battles for Boys: WW2 Europe" – there's a whole series of them. I also like classic TV shoes like "The Rifleman", "Gunsmoke" and "Rawhide".

### Laura's series on conversations

This is not the first time I've linked to Laura's blog. I also did here for her post about apologetics and here for her post about talking to Muslims and here where she introduced her new series on conversations. What I like about her is that she has a mature view of the Christian life that I really respect. When I read her writing, I can tell that she is not involved in Christianity to feel good or to be liked. Her approach to being persuasive relies on reason and evidence.

# William Lane Craig's secret weapon is his amazing wife Jan

**Wintery Knight** · 15 November 2020 · Archived copy · Original

My favorite painting: "Godspeed" by Edmund Blair Leighton, 1900

*I'm re-posting this classic post because it was mentioned in a recent episode of the Reasonable Faith podcast.*

I want to draw your attention to a talk on "Vision in Life" given by Dr. William Lane Craig. Dr. Craig is the ablest defender of the Christian faith operating today. He has done formal academic debates with all of the best known atheists on major university campuses in front of *thousands* of university students.

It turns out that he owes a lot of his success to his amazing wife Jan.

The MP3 file is here. (32 minutes)

This talk was Dr. Craig's chapel address to Biola University students.

About 11 minutes into the talk, Bill describes what happened after he finished his Bachelor's degree at Wheaton:

> And so I joined the staff of Campus Crusade for Christ for 2 years, and was assigned to Northern Illinois University. And that was where I met my wife Jan. She was a graduate of the University of North Dakota where she had come to faith in Christ. And she had a similar vision for her life of evangelism and discipleship.
>
> And as we worked at NIU together, she with gals and I with the guys, leading students to Christ and discipling them to walk with the Lord, we fell in love. And we decided that we would be more effective if we joined forces and became a team.

So their reason for getting together was because they thought that they would be more effective in evangelism and discipleship if they worked as a team.

It is at this point in the talk where Bill begins to explain just how Jan molded him into the lean, mean debating machine that travels the world striking terror into the hearts of atheists.

Bill's first story about Jan occurs early after their marriage while he is working on his first Masters degree at Trinity:

> And it was also at that time that I began to see what an invaluable asset the Lord had given me in Jan. I remember I came home from classes one day, and found her at the kitchen table with all the catalogs and schedules and papers spread out in front of her and she said, "look! I've figured out how you can get two Masters degrees at the same time that it would normally take to get one! All you have to do is take overloads every semester, go to all full-time summer school and do all these other things, and you can do two MAs in the time it takes to do one!"
>
> And I thought, whoa! Are you sure you really want to make the commitment it takes to do this kind of thing? And she said, "Yeah! Go for it!" And it was then I began to see that God had given me a very special woman who was my supporter – my cheerleader – and who really believed in me. And as long as she believed in me, that gave me the confidence to dream bigger dreams, and to take on challenges that I had never thought of before.

In an article on his web site, he talks about how Jan encouraged him to do his first Ph.D:

> As graduation from Trinity neared, Jan and I were sitting one evening at the supper table in our little campus apartment, talking about what to do after graduation. Neither of us had any clear leading or inclination of what we should do next.
>
> So Jan said to me, "Well, if money were no object, what would you really like to do next?"
>
> I replied, "If money were no object, what I'd really like to do is go to England and do a doctorate under John Hick."
>
> "Who's he?" she asked.
>
> "Oh, he's this famous British philosopher who's written extensively on arguments for the existence of God," I explained. "If I could study with him, I could develop a cosmological argument for God's existence."
>
> But it hardly seemed a realistic idea.
>
> The next evening at supper Jan handed me a slip of paper with John Hick's address on it. "I went to the library today and found out that he's at the University of Birmingham in England," she said. "Why don't you write him a letter and ask him if you can do a doctoral thesis under him on the cosmological argument?"
>
> What a woman! So I did, and to our amazement and delight Professor Hick wrote back saying he'd be very pleased to supervise my doctoral work on that subject. So it was an open door!

And in the same article, he explains how Jan encouraged him to get his second Ph.D:

> As Jan and I neared the completion of my doctoral studies in Birmingham, our future path was again unclear to us. I had sent out a number of applications for teaching positions in philosophy at American universities but had received no bites. We didn't know what to do.
>
> I remember it like yesterday. We were sitting at the supper table in our little house outside Birmingham, and Jan suddenly said to me, "Well, if money were no object, what would you really *like* to do next?"
>
> I laughed because I remembered how the Lord had used her question to guide us in the past. I had no trouble answering the question. "If money were no object, what I'd really like to do is go to Germany and study under Wolfhart Pannenberg."
>
> "Who's he?"
>
> "Oh, he's this famous German theologian who's defended the resurrection of Christ historically," I explained. "If I could study with him, I could develop a historical apologetic for the resurrection of Jesus."
>
> Our conversation drifted to other subjects, but Jan later told me that my remark had just lit a fire under her. The next day while I was at the university, she slipped away to the library and began to research grants-in-aid

> for study at German universities. Most of the leads proved to be defunct or otherwise inapplicable to our situation. But there were two grants she found that were possibilities. You can imagine how surprised I was when she sprung them on me!

Both of these Ph.D experiences are also described in the talk. And the talk concludes as follows:

> **I am so thankful to be married to a woman who is tremendously resourceful, tremendously talented and energetic, who could have pursued an independent career in any number of areas, but instead, she has chose to wed her aspirations to mine, and to make it her goal to make me the most effective person I can be, for Christ. And she has been like my right arm in ministry over these many years. And it is a tremendous privilege to be a team with a person like that.**
>
> **And you young men, I would encourage you, if you marry, to find a gal who shares your vision, not some independent vision, but who is interested in aligning herself with you, and pursuing together a common vision and goal that will draw you [together], so that you will avoid the growing separateness that so often creeps into marriages.**

And now you know the rest of Bill's story. *The person you marry will have an enormous influence on the impact you will have for Christ and his Kingdom.* It is up to you to decide whether that influence is going to be positive or negative, by deciding if you will marry, and if you do marry, by deciding whom you will marry.

You may also be interested in this talk given by William Lane Craig, entitled "Healthy Relationships" (National Faculty Leadership Conf. 2008) (audio here) In that talk, he offers advice to Christians who want to have a marriage that is consistent with their Christian faith.

# Target bans book critical of transgenderism after LGBT activists complain

**Wintery Knight** · 16 November 2020 · Archived copy · Original

From The Federalist:

> An official Target company Twitter account announced Thursday they had removed author Abigail Shrier's book, "Irreversible Damage: The Transgender Craze Seducing Our Daughters" from the retailer's "assortment" after an unverified Twitter user complained the book questions transgender ideology, especially the concept of irreversible hormonal and surgical experimentation on minors.
>
> "I think the trans community deserves a response from @AskTarget @Target as to why they are selling this book about the 'transgender epidemic sweeping the country.' Trigger warning: Transphobia," wrote the user.
>
> Shrier's book is not about sexual orientation or transgender adults. It examines the growing social phenomenon of transgender identification among teen girls and how underage medical "transitions" can be a form of self-harm.
>
> "Girls who might have encouraged each other in bulimia, anorexia or cutting are today deciding they have 'gender dysphoria,' pushing for hormones and surgeries—and easily obtaining them," writes Shrier.
>
> Target is not the first corporate entity to censor Shirer's book. When the book was released in June, Amazon barred Shrier's publisher from running ads for the book because it contained copy and content that "infers or claims to diagnose, treat, or question sexual orientation."

# Washington State votes to force sex education on kids as young as 5

**Wintery Knight** · 17 November 2020 · Archived copy · Original

[image]
Major pro-abortion group endorses Joe Biden for President
From Life News:

> A Planned Parenthood-backed law requiring sex education to be taught starting in kindergarten in Washington state passed again in a ballot referendum Tuesday.
>
> The Christian Post reports the law passed the state legislature earlier this year, but concerned parents with Parents for Safe Schools gathered enough support to make the law a referendum on the ballot.
>
> However, the law will stand after 59 percent of voters approved it Tuesday, according to the report.
>
> The legislation, Senate Bill 5395, requires public schools to teach specific sex education materials to students in kindergarten through 12th grade. That includes children as young as 5.
>
> […]Among its worst teaching points, Planned Parenthood tells children that promiscuity is ok. "There's nothing bad or unhealthy about having a big number of sexual partners," it tells students on its Tumbler page. Planned Parenthood's booklet for HIV-positive youth, "Healthy, Happy and Hot," tells young people that it is their "human right" to not tell their sexual partner that they have HIV.

This article had more about the content of the program:

> Pro-family advocates have sounded the alarm by highlighting the graphic lessons of sex ed curricula that meet the bill's standards. A sex ed curriculum by the pro-abortion, pro-LGBT group Advocates for Youth meets the bill's standards and is already used in some Washington schools. Called 3R, it heavily promotes gender theory, promiscuity, condoms and contraception, and abortion, as well as what is listed at the beginning of this article.
>
> The 3R curriculum also directs teachers to have 14-year-old students role-play negotiating for sex.
>
> […]"Some of the approved curriculum is so graphic legislators couldn't quote it in proceedings without getting 'gaveled' or silenced," [children's rights activist Katy] Faust said. "Capital television had to run a mature content warning when airing debate coverage, the equivalent of a rated R movie […] Of course it's heavily lobbied by Planned Parenthood, who has a vested interest in prematurely sexualizing their prospective clients/cash cows. This is not education. This is propaganda, ideology, and grooming."

# Biden wants to reverse Trump's pro-life executive orders, force taxpayers to fund abortion

**Wintery Knight** · 18 November 2020 · Archived copy · Original

[image]
Major pro-abortion group endorses Joe Biden for President
Life News reports:

> Americans can expect to be forced to send hundreds of millions of tax dollars to pro-abortion groups if Joe Biden is confirmed to be the winner of the White House.
>
> Biden, a pro-abortion Democrat, promised to reverse President Donald Trump's progress for life when he takes office, including ending the Mexico City Policy and restoring Title X funds to Planned Parenthood.
>
> These two executive orders alone defunded Planned Parenthood and the British-based abortion chain Marie Stopes International of more than $200 million U.S. tax dollars.
>
> But they are just a few of the targets of a pro-abortion Biden administration, and abortion advocacy groups already are pressuring him to do more.
>
> Jacqueline Ayers, vice president of government relations and public policy for Planned Parenthood Action Fund, told The Hill that they hope Biden will restore funding to her abortion chain on his first day in office.
>
> "We think many of these issues actually could be addressed day one, in an executive order that explicitly talks about the new administration's commitment to sexual reproductive health care," Ayers said.
>
> Among other priorities, Christianity Daily reports Biden also is expected to repeal a Trump executive order that granted relief to charities like the Little Sisters of the Poor. Biden would once again force them to follow the Affordable Care Act contraception mandate, which includes drugs that may cause abortions.
>
> Jessica Marcella, of the National Family Planning and Reproductive Health, also urged Biden to act quickly to restore Title X funds to pro-abortion medical groups. If he does not, she said some facilities may close.
>
> "It is essential a Biden administration act as expeditiously as possible, on day 1 or within 100 days, to get money flowing back to providers, particularly to jurisdictions that don't have Title X services right now," she told The Hill. "Even right now, there are health centers on the brink of closing, just trying to hold on for a reversal of fortune and restoration of Title X's integrity as a program they can participate in."
>
> In 2019, Trump enacted the Title X "Protect Life" rule to ensure that the program does not indirectly fund abortions. Title X provides family planning and other health services for low-income individuals. Planned Parenthood could have complied with the rule by stopping abortions or completely separating its abortion business from its actual health services, but it refused. Instead, it prioritized abortions over women's health and it was defunded of about $60 million.

# William Lane Craig: Christians are idling in intellectual neutral

**Wintery Knight** · 19 November 2020 · Archived copy · Original

The video is 40 minutes long.

The full transcript is available here on the Reasonable Faith web site. (H/T Think Apologetics)

Excerpt:

> No one has issued a more forceful challenge to Christians to become intellectually engaged than did Charles Malik, former Lebanese ambassador to the United States, in his address at the dedication of the Billy Graham Center in Wheaton, Illinois. Malik emphasized that as Christians we face two tasks in our evangelism: saving the soul and saving the mind, that is to say, not only converting people spiritually, but converting them intellectually as well. And the Church is lagging dangerously behind with regard to this second task. Our churches are filled with people who are spiritually born again, but who still think like non-Christians. Mark his words well:
>
> I must be frank with you: the greatest danger confronting American evangelical Christianity is the danger of anti-intellectualism. The mind in its greatest and deepest reaches is not cared for enough. But intellectual nurture cannot take place apart from profound immersion for a period of years in the history of thought and the spirit. People who are in a hurry to get out of the university and start earning money or serving the church or preaching the gospel have no idea of the infinite value of spending years of leisure conversing with the greatest minds and souls of the past, ripening and sharpening and enlarging their powers of thinking. The result is that the arena of creative thinking is vacated and abdicated to the enemy.
>
> Malik went on to say:
>
> It will take a different spirit altogether to overcome this great danger of anti-intellectualism. For example, I say this different spirit, so far as philosophy alone—the most important domain for thought and intellect—is concerned, must see the tremendous value of spending an entire year doing nothing but poring intensely over the *Republic* or the *Sophist* of Plato, or two years over the *Metaphysics* or the *Ethics* of Aristotle, or three years over the *City of God* of Augustine. But if a start is made now on a crash program in this and other domains, it will take at least a century to catch up with the Harvards and Tübingens and the Sorbonnes—and by then where will these universities be?
>
> What Malik clearly saw is the strategic position occupied by the university in shaping Western thought and culture. Indeed, the single most important institution shaping Western society is the university. It is at the university that our future political leaders, our journalists, our lawyers, our teachers, our scientists, our business executives, our artists, will be trained. It is at the university that they will formulate or, more likely, simply absorb the worldview that will shape their lives. And since these are the opinion-makers and leaders who shape our culture, the worldview that they imbibe at the university will be the one that shapes our culture.

And:

> The great Princeton theologian J. Gresham Machen warned on the eve of the Fundamentalist Controversy that if the Church loses the intellectual battle in one generation, then evangelism would become immeasurably more difficult in the next:
>
> False ideas are the greatest obstacles to the reception of the gospel. We may preach with all the fervor of a reformer and yet succeed only in winning a straggler here and there, if we permit the whole collective thought of the nation or of the world to be controlled by ideas which, by the resistless force of logic, prevent Christianity from being regarded as anything more than a harmless delusion. Under such circumstances, what God desires us to do is to destroy the obstacle at its root.

> The root of the obstacle is to be found in the university, and it is there that it must be attacked. Unfortunately, Machen's warning went unheeded, and biblical Christianity retreated into the intellectual closets of Fundamentalism, from which it has only recently begun to re-emerge. The war is not yet lost, and it is one which we must not lose: souls of men and women hang in the balance.

This lecture is an excellent opportunity for us all to ask ourselves: what are we doing to influence the university? Do you have a plan?

Many of the strongest people who are now opposed to Christianity raised in two-parent Christian homes, and went to church for a decade before going off to the university. I'm thinking especially of people like Tim Gill, in Colorado. At university (and even increasingly in high school) they turned away from Christianity. All their peers and the adults could not answer their questions. As adults, they were able to get money, power and influence. Many of them are using it against Christ and his kingdom – kicking away the ladder that they climbed to success on. Why is this? Unfortunately, many of us are not willing to do what works – pick up the Lee Strobel books and read them. Especially "The Case for a Creator".

# When Facebook fact-checkers conflict with peer-reviewed studies, who is right?

**Wintery Knight** · 20 November 2020 · Archived copy · Original

What should we learn from this?

The Federalist:

> A high-quality, large-scale D4n1sh study finds no evidence that wearing a face m4sk significantly minimizes people's risk of contracting C0VID-19. The randomized-control trial found no statistically significant difference in coron4v1rus infection rates between m4sk-wearers and non-m4sk-wearers. In fact, according to the data, m4sk usage may actually increase the likelihood of infection.
>
> "The recommendation to wear surgical m4sks to supplement other public health measures did not reduce the infection rate among wearers by more than 50% in a community with modest infection rates, some degree of social distancing, and uncommon general m4sk use," the authors summarized their results.
>
> While m4sk-wearing has been advertised by health officials all around the world, including the U.S. Centers for Disease Control and Prevention and Dr. Anthony F4uci, director of the National Institute of Allergy and Infectious Diseases, to prevent the spread of the coron4v1rus, the Danish researchers found that there was no statistically significant difference between wearing a m4sk or not in preventing people from contracting C0VID-19.
>
> "In the third post hoc analysis, which investigated constellations of patient characteristics, we did not find a subgroup where face m4sks were effective at conventional levels of statistical significance," researchers found.
>
> The randomized-control trial, which is considered the "gold-standard" design for scientific research, had a large sample size of more than 6,000 people. Most studies conducted on various kinds of face m4sks against various coron4v1ruses are neither randomized, controlled trials nor conducted regarding the specific virus currently affecting the world.
>
> This clinical trial was conducted from April through June in Denmark, a largely unm4sked area with government recommendations only to social distance and wash hands frequently as the country began to reopen in May. Roughly half of the 6,024 participants, 4,862 of whom completed the study, were randomly assigned to wear surgical m4sks "outside the home among other persons together" while the other half continued to operate in public without a m4sk.

Note: this study doesn't not prove that masks don't protect OTHERS from people who have the virus. That was not the topic of this study. And that would also be hard to measure in any case.

# Gay activists tell Biden to strip accreditation from Bible-believing schools

**Wintery Knight** · 22 November 2020 · Archived copy · Original

Southern Baptist progressive Russell Moore and his idol Barack Obama

Christian Post:

> One of the leading national LGBT activist organizations is urging presumptive President-elect Joe Biden and his administration to advance policies that would strip Christian colleges that uphold rules and stances that oppose homosexuality of their accreditation.
>
> The request was part of the Human Rights Campaign's "Blueprint for Positive Change," a recent document which offers 85 policy and legislative recommendations for a potential Biden administration. The document comes as Biden pledged throughout his 2020 campaign to advance "LGBT equality" in the U.S. and around the world.
>
> One of the recommendations proposes the elimination of nondiscrimination exemptions for religious colleges if the institutions support biblical definitions of marriage or fail to offer "scientific curriculum requirements."
>
> […]The document's list also includes making refusal to hire people because of their LGBT identity illegal, adding a nonbinary option to passports, allowing transgender individuals to serve in the military and forcing faith-based charities to hire LGBT individuals even when it violates their conscience.

I saw a lot of anti-Trump tweets and statements from Southern Baptist leaders and celebrity preachers during Trump's presidency. They will be happy with Joe Biden as president. They are looking forward to the changes Joe Biden will make. When ethics and religious liberty conflict with the Democrat Party, the Southern Baptist leaders always side with the Democrats.

# Tens of thousands of mai1-in ba11ots were returned before being mailed out

**Wintery Knight** · 23 November 2020 · Archived copy · Original

Facebook fact checkers anxious to crown Joe Biden president

Epoch Times:

> More than 20,000 ab5entee ba11ots in Pennsy1vania have impossible return dates and another more than 80,000 have return dates that raise questions, according to a researcher's analysis of the state's vot3r database.
>
> Over 51,000 ba11ots were marked as returned just a day after they were sent out—an extraordinary speed, given U.S. Postal Service (USPS) delivery times, while nearly 35,000 were returned on the same day they were mailed out. Another more than 23,000 have a return date earlier than the sent date. More than 9,000 have no sent date.
>
> The state's vot3r records are being scrutinized as President Donald Trump is challenging the results of the presidential e1ection in Pennsy1vania and other states where his opponent, former Vice President Joe Bid3n, holds a tight lead. The Trump campaign is alleging that invalid ba11ots have been counted for Democrat5 and valid ba11ots for Repub1icans were thrown away.
>
> The analysis of the publicly available data was conducted by a data researcher who submitted it first to the Chinese-language edition of The Epoch Times. The researcher, who spoke on condition of anonymity, said he consulted about the matter with several USPS field engineers, who said the return dates shown in the database are "impossible."
>
> The dataset made public by Pennsy1vania's secretary of state was last updated on Nov. 10, and "describes a current state of mail ba11ot requests for the 2020 General e1ection." The data includes the mailed-out and return dates.
>
> In Pennsy1vania, vot3rs must request a ba11ot, which is sent to them via USPS. The vot3r then fills out the document and sends it back via mail or returns it in person. The process usually takes several days or even weeks, depending on the speed of delivery and response by the vot3r.
>
> This year, Pennsy1vania also allowed vot3rs to "request, receive, mark and cast your mail-in or ab5entee

> ba11ot all in one visit to your county e1ection office or other designated location." That may explain the ba11ots with no sent date—they may have been received and cast in person.
>
> While it could also explain the ba11ots with the same sent and returned date, that appears to clash with the description of the database, which says the sent date is "the date the county confirmed the application to queue a ba11ot label to mail the ba11ot materials to the vot3r."

# Is this man unattractive because he lacks confidence, or something else?

**Wintery Knight** · 24 November 2020 · Archived copy · Original

Do young women understand how to get to a stable marriage?

I found this post in Reddit's "dating over thirty" forum. The author admits that she's had trouble choosing bad boys in the past. However, her new boyfriend – not a bad boy – has other problems.

She writes:

> Hi Dating Over Thirty,
>
> I have a conundrum. I have met someone great. We have been on 6 wonderful dates over two weeks. Even if he's not my "usual type" I've been open to trying something new and seeing where this goes (shout out to my therapist). My usual type is masculine bad boys, and obviously that hasn't worked out well for me – usually their emotional immaturity or ego makes relationship impossible and leaves me emotionally shattered.
>
> This time, I've met a handsome, extremely kind man, who is driven in his career, and really likes me. I really enjoy spending time with him too, we can talk for hours, and there is chemistry (though not the 'fire' that I'm usually used to… more of a slow burn, but it's definitely there).
>
> When we first kissed and when we first started dating I was wondering if he wasn't super attracted to me… he seemed hesitant or holding back on our first kiss. Our kisses have improved greatly but I can't shake the feeling that he lacks a bit of confidence. I don't feel confident that he would… be assertive in a situation requiring it or stand up for me it I needed it (dumb example I know). Sometimes I wonder if his gentleness is actually meekness, and one thing I desire from a partner is a feeling of protection.
>
> I feel like a total a**hole because I'm used to dating… a**holes, mistaking masculinity and assertiveness for confidence. My dad is kind of that way, and I've seen how it's been difficult in my parents marriage. I've fallen into traps of dating assertive people who are not actually confident but overcompensate for their insecurities by being d*cks. So I feel caught – knowing that this hasn't worked for me in the past, but feeling like something is missing here.
>
> I want to keep dating him to explore what's there, and because I genuinely like him. I feel safe and cared around him, and we have a lot in common. He is 100% husband material. He's already starting to ask me to

> meet his friends but I feel like I need to get to know him more and clear this one doubt. I know I have my own fears of intimacy and commitment too that factor in here.
>
> Help lol?
>
> Sincerely, a**hole lover
>
> TLDR, Perfect man I'm dating lacks confidence, maybe. Not sure if this something that can be resolved or if I should move on?

She seems to be concerned that this man is lacking confidence, because he is not a bad boy. What's a bad boy? A bad boy is a man who has certain physical features and mannerisms which are attractive to women, but he won't commit to marry any woman. And many women mistake the presence of these features and mannerisms as being signs of "masculinity".

Here's a study about it from Evolutionary Psychological Science, reported by PsyPost:

> Men with psychopathic traits tend to create favorable impressions on women, according to a new study published in Evolutionary Psychological Science. The findings indicate that psychopathy may include features that make men appear as more attractive romantic partners despite having a reduced interest in committed relationships.
>
> "Psychopathy as a way of describing some people — mostly men — who have specific personality and behavioral tendencies has led to some enigmatic and quite frankly alarming findings from prisons, many of which had sexual and romantic consequences," said study author Kristopher Brazil (@brazkris), a PhD candidate at Brock University.
>
> "For instance, clinicians and psychologists working in prison settings have long known that inmates with more psychopathic features tenaciously try (i.e., are preoccupied with sex) and often succeed (i.e., must offer some attractive qualities, even if faked) at seducing prison staff, including clinical staff supposedly equipped with the tools to not be subverted by manipulation and charm that psychopathic men deploy."
>
> "Yet these individuals were some of the most violent and disruptive individuals in the institutions they were housed. The enigma of presenting such a positive image of themselves successfully despite their negative effect on others is what strongly influenced our ideas for this study," Brazil told PsyPost.
>
> […]Brazil and his colleagues found that psychopathy was positively related to both men's social intelligence and favorable attitudes towards casual sex. They also found that women's ratings tended to be more favorable to men with more psychopathic traits — even after controlling for physical attractiveness ratings.
>
> "Psychopathic men have a personality style that makes them appear attractive to women in dating encounters. This may be because they are extra confident or feel at ease or know exactly what to say to get the attention of women," Brazil told PsyPost.

In the past, women evaluated men for marriage, because they grew up in homes with fathers and mothers. They watched their fathers love their mothers, and hold them accountable for acting selfishly. They saw their fathers acting like husbands, and they chose men who would make good husbands.

Today, thanks to feminism, any focusing on marriage and preferring men suited for marriage is seen as sexist. What's left? What's left is chasing the bad boys. The psychopaths. And if it doesn't work out, well – that's what big government is for.

# Poll: 17% of Biden voters in swing states would change their vote, if educated

**Wintery Knight** · 25 November 2020 · Archived copy · Original

These people are voted for Joe Biden – did you?

The Federalist:

> A new report from the Media Research Center shows that the media's lack of coverage and big tech's suppression of certain issues and scandals surrounding Democratic Presidential Nominee Joe Biden could have cost President Donald Trump the election.
>
> The survey results report that 17 percent of Biden voters would not have voted for the Biden-Harris presidential ticket if they had known about at least one of the eight news stories that were suppressed by big tech and mainstream media outlets.
>
> […]The survey, conducted online by The Polling Company with a +/- 2.34 percent margin of error at a 95 percent confidence interval, asked 1,750 Biden voters living in seven swing states (Arizona, Georgia, Michigan, Nevada, North Carolina, Pennsylvania and Wisconsin) if they were aware of certain issues surrounding Biden, his family, and some of the Trump administration's successes.

Topics:

> Some of these topics include former Biden staffer Tara Reade and her sexual assault allegations against Biden, the Hunter Biden scandal, VP Nominee Kamala Harris's extreme liberal voting record in the Senate, the U.S.'s economic jump in the third quarter, millions of jobs added, America's energy independence, Operation Warp Speed successes, and Trump's facilitation of multiple peace deals in the Middle East.
>
> […]Over a quarter of Biden voters said they didn't know Sen. Harris had the most liberal voting record in the Senate in 2019, and nearly half of all Biden voters polled, 49 percent, said they were unaware of the U.S.'s remarkable economic recovery in the third quarter, doubling the previous record.

I blogged about most of those things here, but people were depending on the far left news media and Big Tech to keep them informed.

# Leftist Supreme Court Justices oppose religious liberty for Jews and Christians

**Wintery Knight** · 27 November 2020 · Archived copy · Original

The Supreme Court of the United States

The Federalist:

> In a 5-4 ruling late Wednesday night, the U.S Supreme Court barred the state of New York from imposing strict attendance limits on religious services, in a major win for religious freedom.
>
> Orthodox Jewish group Agudath Israel of America and the Roman Catholic Diocese of Brooklyn sued New York Gov. Andrew Cuomo for discriminatory targeting of religious groups with COVID restrictions, as houses of worship were being held to far more stringent standards than neighboring businesses.
>
> At the time of the lawsuits filing, both the Agudath Israel of America and Diocese of Brooklyn fell into red or orange zones, which under state law allowed only 10 or 25 people into a house of worship at any time, regardless of the building's typical capacity. At the same time, stores and business deemed essential were given far laxer standards, some even lacking any limits on their capacity.
>
> Newly minted Justice Amy Coney Barrett joined Justices Samuel Alito, Neil Gorsuch, Brett Kavanaugh, and Clarence Thomas in support of the aggrieved religious groups, while Chief Justice John Roberts and Justices Stephen Breyer, Elena Kagan, Sonia Sotomayor dissented.

Notice that all 3 of Trump's nominees voted for religious liberty. And yet Trump was opposed by many "conservative" Christians in the last election. One of the biggest reasons given by real Christians for supporting Trump was to get good judges. And we did.

# Fakebook introduces new algorithm to promote far-left news sources

**Wintery Knight** · 28 November 2020 · Archived copy · Original

Fakebook, Google, Youtube, Twitter purging conservative speech (Source: The Stream)

The Federalist:

> Fakebook purposefully throttled specific news outlets after the election, limiting the distribution of posts from certain pages and accounts under the guise of combating “false and misleading claims” about election results and fraud. The New York Times reported the censorship increase Tuesday.
>
> The New York Times reported the big tech company relies on a “secret internal ranking system” called news ecosystem quality scores (N.E.Q.) to determine which journalism the company will allow to circulate on the platform. Fakebook CEO Mark Yuckerberg reportedly expanded the N.E.Q.’s algorithm presence following the election to “make sure authoritative news appeared more prominently.”
>
> Sources such as CNN, The New York Times, NPR, and others benefitted from Yuckerberg’s changes, receiving more traffic and distribution on the site while others lost page views and reach. Fakebook’s chief product officer Chris Cox bragged about the company’s decisions and reportedly said he was “proud of how the company had applied labels to election-related misinformation, pointing users to authoritative information about the results.”

# Republicans did extremely well in House of Representatives and state legislatures

**Wintery Knight** · 29 November 2020 · Archived copy · Original

It's not over till the Supreme Court lady rules

Some good news from The Federalist.

> In all the excitement among objective journalists for Joe Biden's declared victory, reporters are missing how extraordinary the Democrat's performance was in the 2020 election. It's not just that the former vice president is on track to become the oldest president in American history, it's what he managed to accomplish at the polls this year.
>
> Candidate Joe Biden was so effective at animating voters in 2020 that he received a record number of votes, more than 15 million more than Barack Obama received in his re-election of 2012. Amazingly, he managed to secure victory while also losing in almost every bellwether county across the country. No presidential candidate has been capable of such electoral jujitsu until now.
>
> While Biden underperformed Hillary Clinton's 2016 totals in every urban county in the United States, he outperformed her in the metropolitan areas of Georgia, Michigan, Wisconsin, and Pennsylvania. Even more surprising, the former VP put up a record haul of votes, despite Democrats' general failures in local House and state legislative seats across the nation.
>
> He accomplished all this after receiving a record low share of the primary vote compared to his Republican opponent heading into the general election. Clearly, these are tremendous and unexpected achievements that would normally receive sophisticated analysis from the journalist class but have somehow gone mostly unmentioned during the celebrations at news studios in New York City and Washington, D.C.
>
> The massive national political realignment now taking place may be one source of these surprising upsets. Yet still, to have pulled so many rabbits out of his hat like this, nobody can deny that Biden is a first-rate campaigner and politician, the likes of which America has never before seen. Let's break down just how unique his political voodoo has been in 2020.

I sense that he is being sarcastic.

More:

> Biden is on his way to winning the White House after having lost almost every historic bellwether county across the country. The Wall Street Journal and The Epoch Times independently analyzed the results of 19 counties around the United States that have nearly perfect presidential voting records over the last 40 years. President Trump won every single bellwether county, except Clallam County in Washington.
>
> Whereas the former VP picked up Clallam by about three points, President Trump's margin of victory in the other 18 counties averaged over 16 points. In a larger list of 58 bellwether counties that have correctly picked the president since 2000, Trump won 51 of them by an average of 15 points, while the other seven went to Biden by around four points. Bellwether counties overwhelmingly chose President Trump, but Biden found a path to victory anyway.

And more:

> In 2020, The Cook Political Report and The New York Times rated 27 House seats as toss-ups going into Election Day. Right now, Republicans appear to have won all 27. Democrats failed to flip a single state house chamber, while Republicans flipped both the House and Senate in New Hampshire and expanded their dominance of state legislatures across the country.

# Facebook “fact-checker” Politifact forced to retract “false” rating against Candace Owens

**Wintery Knight** · 30 November 2020 · Archived copy · Original

[image]
Why do people think that CNN are biased leftist clowns?
I think that it’s safe to assume that every single “fact check” written by Facebook partners is false news, written by partisan Democrat journalists. Enough of them are false that this should be the starting assumption. This time, Politifact got caught giving a false rating of a conservative, and had to retract it.

Daily Wire:

> Conservative author and commentator Candace Owens challenged left-leaning fact-checking site PolitiFact, a partner with Facebook, over a “false” rating — and won.
>
> Not only did PolitiFact remove their “false” rating and retract an article on why Owens’ video was allegedly false, but the site offered an added “correction” admitting their fault.
>
> Owens’ video, which was posted on Nov. 12, offered commentary on the 2020 presidential election, and was captioned, “Joe Biden is literally and legally not the President-elect. So why is the media pretending he is?”
>
> The video was hit with a “false” rating, and, as noted by Owens, theoretically, every single person who shared the post was alerted by Facebook that they had shared “false” content.
>
> “Weeks ago, [Facebook] censored a post of mine which truthfully stated that [Joe Biden] is NOT the President-elect. So I got lawyers involved,” she said Saturday via Twitter. “Conclusion? [PolitiFact] uncensored the post & admitted that they LIED by rating my post false. The fact-checkers are lying for Democrats.”
>
> “At 8 Months pregnant, I unfortunately cannot fight on the ground alongside patriots like I am used to, but I am taking every measure to fight these communists in the court room,” Owens said in a follow-up post. “It is my goal to expose these lying ‘fact-checkers’ one by one. [Joe Biden] is NOT the President-elect.”
>
> The BLEXIT founder told The Daily Wire on Saturday that she reached out to PolitiFact on Nov. 20 with legal representation and immediately heard back, with PolitiFact admitting their error.
>
> Owens said she was not further briefed on the supposed “error” and that she felt the retraction wasn’t enough; she wanted PolitiFact to admit publicly that they falsely fact-checked her.
>
> “I wanted to show that these fact-checkers just lie, and they usually go unchecked because most people don’t have the money, don’t have the time, and don’t have the platform to go after them — and I have all three,” she said.
>
> With pressure from Owens’ legal representation, PolitiFact issued the correction, which she shared with the public on Saturday. That was a win. And another “major win,” she said, was PolitiFact essentially admitting “that Joe Biden is not the President-elect.”
>
> Owens, who’s currently suing fact-checkers from USAToday and Lead Stories, explained to The Daily Wire that she knew she had to reach out with legal representation if she wanted to get results with this latest false fact-check. She said that in her experience, when she’s tried to appeal fact-checks through the system, she’s been stonewalled.
>
> “These people are sitting back thinking they’re the gods of tech; opinion-checkers, they’re censorship lords,” the conservative said.

I wrote about Politifact’s record of “fact-checking” here.

I'd like to see these fake-news "fact-checkers" sued until they have nothing to eat but grass and leaves. They're lying secular left fascist scum. We should go after them for the good of free speech and the Republic. They don't belong in America, they'd fit in better in North Korea. They are anti-American and anti-human-rights.

# Starbucks barista alleges she was fired for not wearing company “Pride” t-shirt

**Wintery Knight** · 1 December 2020 · Archived copy · Original

Daily Caller:

> A former Starbucks barista alleged that she was fired for her unwillingness to wear a company “Pride” t-shirt for religious reasons, according to a federal lawsuit.
>
> Betsy Fresse was allegedly fired from the Glen Ridge, New Jersey Starbucks in August 2019 after she had inquired about “Pride” shirts that were in the store manager’s office in June 2019, according to the lawsuit filed on Nov. 19. The lawsuit noted that Fresse is a practicing Christian who believes marriage is between a man and woman and didn’t want to wear a shirt that violated those religious convictions.
>
> “The law mandates that every person be free from discrimination based on their sincerely held religious beliefs including in the workplace,” Fresse’s lawyer, Demetrios K. Stratis, told The Daily Caller News Foundation in a statement. “Here, Starbucks failed to comply with the law, and terminated my client because she would not betray her faith, a faith which defines who she is as a person.”
>
> “That is actionable and wrong and Starbucks must be held accountable,” he continued.
>
> After Fresse inquired about the shirts and before she was terminated, she received a call from Starbucks’s Ethics and Compliance Helpline, according to the lawsuit. The company representative specifically asked Fresse why she didn’t want to wear the “Pride” shirt.
>
> She explained that it was because her “religious beliefs prevented her from doing so,” the lawsuit stated.
>
> On Aug. 22, 2019, she received a notice of separation informing her that she had been fired. The notice explained that she was fired for “acting in violation of Starbuck’s Core Values.”
>
> […]The lawsuit also said that Fresse “holds no enmity toward individuals who ascribe to the LGBTQ lifestyle and/or make up the LGBTQ community.”

A friend of mine who works for a Christian company gave me a $25 gift card from Starbucks last year. I never used it. I simply won’t do business with this company. They’re secular left fascists, and they don’t respect American values like free speech and religious liberty. I take stewardship of my money very seriously.

# Jay Richards: eight common myths about wealth, poverty and the free market

**Wintery Knight** · 3 December 2020 · Archived copy · Original

I have a key that will unlock a puzzling mystery

Have you read Jay Richards' book "Money, Greed and God?" Because if you haven't, he's written a series of articles that summarize the main points of the book.

The index post is here.

Here are the posts in the series:

- Part 1: The Eight Most Common Myths about Wealth, Poverty, and Free Enterprise
- Part 2: Can't We Build A Just Society?
- Part 3: The Piety Myth
- Part 4: The Myth of the Zero Sum Game
- Part 5: Is Wealth Created or Transferred?
- Part 6: Is Free Enterprise Based on Greed?
- Part 7: Hasn't Christianity Always Opposed Free Enterprise?
- Part 8: Does Free Enterprise Lead to An Ugly Consumerist Culture?
- Part 9: Will We Use Up All Our Resources?
- Part 10: Are Markets An Example of Providence?

Parts 4 and 5 are my favorites. It's so hard to choose one to excerpt, but I must. I will choose… Part 4.

Here's the problem:

> **Myth #3: The Zero Sum Game Myth – believing that trade requires a winner and a loser.**
>
> One reason people believe this myth is because they misunderstand how economic value is determined. Economic thinkers with views as diverse as Adam Smith and Karl Marx believed economic value was determined by the labor theory of value. This theory stipulates that the cost to produce an object determines its economic value.
>
> According to this theory, if you build a house that costs you $500,000 to build, that house is worth $500,000.

> But what if no one can or wants to buy the house? Then what is it worth?
>
> Medieval church scholars put forth a very different theory, one derived from human nature: economic value is in the eye of the beholder. The economic value of an object is determined by how much someone is willing to give up to get that object. This is the subjective theory of value.

And here's an example of how to avoid the problem:

> How you determine economic value affects whether you view free enterprise as a zero-sum game, or a win-win game in which both participants benefit.
>
> Let's return to the example of the $500,000 house. As the developer of the house, you hire workers to build the house. You then sell it for more than $500,000. According to the labor theory of value, you have taken more than the good is actually worth. You've exploited the buyer and your workers by taking this surplus value. You win, they lose.
>
> Yet this situation looks different according to the subjective theory of value. Here, everybody wins. You market and sell the house for more than it cost to produce, but not more than customers will freely pay. The buyer is not forced to pay a cost he doesn't agree to. You are rewarded for your entrepreneurial effort. Your workers benefit, because you paid them the wages they agreed to when you hired them.
>
> This illustration brings up a couple important points about free enterprise that are often overlooked:
>
> **1. Free exchange is a win-win game**.
>
> In win-win games, some players may end up better off than others, but everyone ends up better off than they were at the beginning. As the developer, you might make more than your workers. Yet the workers determined they would be better off by freely exchanging their labor for wages, than if they didn't have the job at all.
>
> A free market doesn't guarantee that everyone wins in every competition. Rather, it allows many more win-win encounters than any other alternative.
>
> **2. The game is win-win because of rules set-up beforehand.**
>
> A free market is *not* a free-for-all in which everybody can do what they want. Any exchange must be free on both sides. Rule of law, contracts, and property rights are needed to ensure exchanges are conducted rightly. As the developer of the house, you'd be held accountable if you broke your contract and failed to pay workers what you promised.
>
> An exchange that is free on both sides, in which no one is forced or tricked into participating, is a win-win game.

On this view, what you really need to fear as a consumer is government intervention that restricts your choices in the marketplace, or makes some choices more expensive than they need to be (tariffs).

If you care about poverty, it's often tempting to think that it can only be solved one way – by transferring wealth from the rich to the poor. But that is a very mistaken view, as any economist will tell you. The right way to create prosperity is by creating laws and policies that unleash individual creativity. Letting individuals create innovative products and services, letting them keep what they earn, making sure that the law doesn't punish entrepreneurs – that incentivizes wealth creation. Fixing poverty does not mean transferring wealth, it means giving people more freedom to create wealth on their own. Free trade between nations is an important way that we encourage people to create better products and services that what they have available in their own countries.

**Economists agree on the benefits of free trade**

Who could possibly disagree with free trade? Well, many people on the left do. But economists across the spectrum of ideology (university and private sector and public sector) agree on the benefits of free trade.

Harvard economist Greg Mankiw explains what most professional economists agree on.

Excerpt:

> Here is the list, together with the percentage of economists who agree:
>
> 1. **A ceiling on rents reduces the quantity and quality of housing available. (93%)**
> 2. **Tariffs and import quotas usually reduce general economic welfare. (93%)**
> 3. Flexible and floating exchange rates offer an effective international monetary arrangement. (90%)
> 4. Fiscal policy (e.g., tax cut and/or government expenditure increase) has a significant stimulative impact on a less than fully employed economy. (90%)
> 5. The United States should not restrict employers from outsourcing work to foreign countries. (90%)
> 6. The United States should eliminate agricultural subsidies. (85%)
> 7. Local and state governments should eliminate subsidies to professional sports franchises. (85%)
> 8. If the federal budget is to be balanced, it should be done over the business cycle rather than yearly. (85%)
> 9. The gap between Social Security funds and expenditures will become unsustainably large within the next fifty years if current policies remain unchanged. (85%)
> 10. Cash payments increase the welfare of recipients to a greater degree than do transfers-in-kind of equal cash value. (84%)
> 11. A large federal budget deficit has an adverse effect on the economy. (83%)
> 12. **A minimum wage increases unemployment among young and unskilled workers. (79%)**
> 13. The government should restructure the welfare system along the lines of a “negative income tax.” (79%)
> 14. Effluent taxes and marketable pollution permits represent a better approach to pollution control than imposition of pollution ceilings. (78%)

Socialist economic policies don’t work because they are making policies that are based on economic myths. We know that these myths are myths because of economics is a mathematical science, and because we have tried good and bad policies in different times and places. We have calculations and we have experience to know what works and what doesn’t work. If you want to help the poor, you have to respect what economists know about how wealth is created. The solution is not to “spread the wealth around”, it’s to encourage people to create more wealth by inventing things that people freely choose to buy.

If you made it this far, I have a fabulous parody video about the perils of tariffs and the benefits of free trade, made by Remy. He’s a libertarian, but that just means we don’t listen to him about foreign policy and morality. Only fiscal policy.

# New Census Bureau data: U.S. marriage rate reaches all time low

**Wintery Knight** · 4 December 2020 · Archived copy · Original

Marriage rates in the United States over time
This is the latest data from the American Community Survey data from the Census Bureau.

Over the last few decades, feminists thought that they could redefine many of the core aspects of marriage, and that men would still continue to marry. But the truth is that marriage used to be a pretty fair deal for men, now it just isn't under the new rules.

Marriage used to mean:

> - Being the legally and socially recognized head of the household.
> - An expectation of regular sex.
> - Legal rights to children.
> - Lifetime commitment.
> - That you are guaranteed a chaste bride on your wedding night.

Feminism has destroyed all of these facets of marriage. Feminists want marriage to be all about them, and their needs. And they don't want marriage to put any responsibilities, expectations or obligations on them.

I am pro-marriage, but for me pro-marriage means *rolling back* the feminist redefinitions of marriage. That's the only way to get men to be interested in marriage. Today, men are responding to the anti-marriage incentives created by feminists. Feminists offered men free sex without commitment, and they made marriage into a dangerous legal deathtrap. Men aren't going to take risks like that. Especially when they have lost the authority to lead the home, and the other benefits of marriage for men. It's a lot of risk, without any of the benefits. It's a bad deal.

But it's not just the legal risks, it's the fact that men can't afford marriage in a socialist country. Socialism requires higher taxes, and that leaves men with too little to take on the husband and father roles.

When you look at marriage rates in Canada and Europe, you understand that men are even LESS likely to choose marriage when they have to pay over 50% of what they earn in taxes. And so the marriage rate is declining. I think young, unmarried women are excited by the idea of raising taxes in order to get free stuff from government. That makes it unnecessary to marry at all, so they are free to play the field and obey no man. But there comes a point where taxes are so high that men simply can't affort to take on a wife and multiple children. We are at that point

now, and I expect it to spread up to the higher income brackets so that the marriage rate declines even further.

One final reason for men not marrying is because men don't like secular leftist women. Young people are sliding to the left, and those values and beliefs are UNATTRACTIVE to marriage-minded men. Just because a secular leftist woman is able to get attention and sex from men, it doesn't mean that she is able to get a lifelong commitment to love her, protect her, provide for her, and so on. No one likes secualr leftist women, and no one wants to marry them.

# Video, audio and summary of intelligent design discussion, with Ben Shapiro and Stephen C. Meyer

**Wintery Knight** · 6 December 2020 · Archived copy · Original

Stephen C. Meyer and Ben Shapiro discuss evolution and intelligent design
(Re-posting this for those who missed it the first time around)

This is a must-see / must-hear conversation. Famous conservative Ben Shapiro discusses evolution and intelligent design with Dr. Stephen C. Meyer, author of "Signature in the Cell" (origin of life) and "Darwin's Doubt" (fossil record). These are the two best books on intelligent design. Their conversation covers the most important issues in the origins debate.

So to start, here's the full video:

Someone actually put out an outline on Youtube, with a time-based index, so I'll just steal that as a base, and add to it:

- 1:34 What is your scientific background? Science undergraduate degree, professional geologist, later did a PhD in philosophy of science from Cambridge University.
- 2:39 What is the difference between intelligent design and creationism? Creationism starts from the Bible and posits a shorter history of the universe. ID starts from the data of the natural world and is neutral about the age of the Earth / universe. Meyer accepts the old-Earth.
- 3:36 How is Intelligent Design a scientific theory? The discovery of DNA reveals that code is central to living systems. Intelligent design uses the method of "inference to the best explanation" in order to argue that the best explanation for the code is an intelligent agent.
- 6:10 What evidence would have to arise to make Intelligent Design Falsifiable? If a naturalistic mechanism was discovered that could produce biological information using the probabilistic resources of the universe, and the time available, then intelligent design would be falsified.
- 7:26 Is religion separate from science or intertwined within it? There are three views: science is totally separate from religion, science is in total conflict with religion, science and religion agree on some issues, e.g. – the origin of the universe and Genesis 1:1. There are areas where science and religion overlap.
- 9:55 Why are the most prominent Darwinians also militant atheists? Evolution is a theory that tries to explain nature using naturalistic mechanisms, so it is compatible with atheism.
- 10:45 What does the theory of evolution say? The term evolution has multiple meanings, and should be defined before discussions. It can refer to change over time. It can refer to animals changing slightly to adapt to enviromental changes. It can refer to the idea that all animals evolved from simpler life forms, and that there is a tree of life showing how different types of organisms share common ancestors. And it can refer to the idea

that purely undirected processes can explain the history of life using purely materialistic forces. It's that final view that intelligent design challenges.

- 13:15 Where is the discontinuity in naturalistic processes in the development of life? The first discontinuity is the origin of simple life from non-living components. The second discontinuity is the sudden appearance of different body plans in a very narrow window of time in the Cambrian era.
- 15:42 Why does information theory suggest that code requires some sort of designer? DNA is a true information-bearing system identical to the software in computers, e.g. – operating system, applications.
- 19:45 Can information be created by random mutation, and favorable mutations preserved by natural selection? Just as in software code, instructions must be added in order to develop new functionality. Random additions of characters will almost always degrade biological function. The number of possible sequences that do nothing useful is vastly higher than the number of sequences that perform biological functions. Doug Axe did research on this at Cambridge University, and he found that the number of functional sequences of amino acids is 1 in 10 to the 77th power. Given the probabilistic resources (replicating organisms)and the time available, it is extremely unlikely to find sequences that have functional information by chance.
- 25:05 What about Stephen Jay Gould's model of punctuated equilibrium – doesn't it explain the sudden jumps in information? Gould's mechanism is accurate according to the fossil record, which shows a lot of jumps. But he did not have a naturalistic explanation for sudden jumps in biological function. Darwinian mechanisms work slowly and would (in theory) produce different body plans gradually. But this is not what the fossil record shows.
- 27:22 What is the mechanism for injecting information in the theory of intelligent design? The information comes in from an intelligence when new major body plans appear, and minor variations within types could be explained by evolution.
- 29:25 Does the Miller-Urey experiment provide a naturalistic explanation for the building blocks necessary for the origin of life? The MU experiment only produced a few types of amino acids, it doesn't say anything about how to sequence the amino acids in order to form protein folds that can perform biological functions. The MU experiment also pre-supposes conditions on the early Earth (reducing gases) that do not match what was there (oxidyzing or neutral gases).
- 32:00 Is the RNA world hypothesis is a good explanation for the origin of life? Evolution requires that replication already be in place, because evolution assumes that mutations appear during the replication. The RNA world hypothesis suggests that sequences contain information, but also catalyze origin of life chemistry. The problem with RNA world is that it starts with self-replicating systems. And those replicating systems require the scientist to inject information into the system to get even the simplest replication started.
- 34:56 How do scientists respond to the critiques of Darwinism proposed by intelligent design advocates? By and large, they accept them. They think that mutation and selection works once living systems are in place, but they realize it has no explanation for the origin of life or the sudden origin of body plans. (Tells about the conference of the Royal Society, where problems with Darwinian mechanisms were discussed, and the 2003 MIT Press book by Muller and Newman).
- 37:16 Why do people hold to Darwinian evolution in the face of these problems? Many scientists presuppose methodological naturalism, which requires that any explanation for the origin of life and the origin of major body plans involve materialist explanations only. No intelligent agents are allowed. The problems occur when assumption of naturalism causes scientists to propose incorrect explanations for what we observe in nature. It's also not clear how naturalistic mechanisms could produce organisms who are capable of reason and free will.
- 40:43 Does naturalistic evolution have an answer for conscious minds, reasoning, free will? No, consider the work of atheist scholar Thomas Nagel, who argues in his book "Mind and Cosmos" (Oxford University Press 2012) that the existence of mind is a disproof of the neo-Darwinian explanation for life. Darwinism stops us from accepting the reality of minds.
- 42:06 So do naturalistic evolutionists have to explain away the mind as an illusion? First, we humans have immediate experience of consciousness, reason and free will. Second, our whole legal system is based on the

idea free will, because you can't hold someone guilty unless they chose to do something they knew was wrong. Third, we have an epidemic of suicide among young people. This is caused by a crisis of meaning. Intelligent design opens up the possibility of their being a mind behind the universe, who we could have a relationships with.

- 44:53 Why aren't schools allowed to be honest about the problems with neo-Darwinian evolution? The intellignt design view is to that teachers should be allowed to teach all the vidence for Darwinian evolution, and also discuss some of the problems with the theory. Students learning science should not be told that everything is solved. Students learn science better when they are presented with peer-reviewed evidence for and against a theory, rather than being indoctrinated.
- 47:37 Is intelligent design theory connected to God? Intelligent design infers from the information content in nature that a mind with capabilities like ours injected information into living systems. Intelligent design is agnostic about the designer, because in principle, embodied or unembodied agents could inject information into living systems. Intelligent design is friendly to theism, because theists will immediately identify the mind as God. Furthermore, the fine-tuning in the initial conditions of the universe is another intelligent design argument. In that case, since the design occurs at the beginning of the universe, the intelligent agent acting prior to the creation of the universe would have to be supernatural, i.e. – God.
- 50:53 Can naturalists say that the imposition of "function" on a sequence is arbitrary, in the same way that the English language is arbitrary? This won't work, because *biological function* is not arbitrary in the same way as language. Biological function is not arbitrary, because sequences can be tested for function *objectively* by observing whether sequences can perform functions necessary for life, e.g. – replication.
- 52:43 Doesn't the multiverse explain away the improbabilities of the fine-tuning, the origin of life, and the development of life? No, because all models of the multiverse require fine-tuning in the mechanism that generates the different universes.
- 55:42 What about cosmological models that eliminate the beginning of the universe? The standard Big Bang model and the inflationary model both posit a beginning of the universe. There is also the Borde-Guth-Vilenkin theory which proves that any universe that is expanding requires a beginning. The only chance for naturalists is quantum cosmologies, but this doesn't work because 1) it requires an abstract reality of mathematics to actualize the physical universe, but this presupposes a mind. 2) The model requires an earlier input of information, which can only have come from a mind.

If you listen to this lecture, or watch the video, and you enjoyed it, then please share. If you have questions, I can try to answer them for you – just leave your question in the comments, or shoot me an e-mail, or message me from the blog's Facebook page, or direct message me on Twitter. I've invested a lot of time in this, and have been studying intelligent design since the late 1990s.

# Young woman regrets that older people in her life were dishonest with her

**Wintery Knight** · 7 December 2020 · Archived copy · Original

Have older women succeeded at teaching younger women about love and marriage?
I once dated a woman who had messed up her education, career and finances by following her heart. She confided in me that she had a hatred of “responsibilities, expectations and obligations”. She wanted to be guided by her feelings, moment by moment. Whenever she failed, she would blame others, or claim that the world was just too unpredictable to make good decisions.

She failed, and was unhappy, wishing that grown ups in her life had told her the truth about her bad decisions. And she’s not alone.

Look at this article posted on the UC Berkeley website:

> A recent group of studies has found that women’s happiness levels have been dropping steadily over the last few decades, to the point that women now report lower happiness levels than men, a role reversal from the 1970s. Given social improvements in women’s lives over the intervening decades—increased work opportunities, higher salaries, and more reproductive choice, to name a few—these results have surprised more than a few commentators, with everyone from Barbara Ehrenreich to Rush Limbaugh trying to make sense of them.
>
> That hasn’t been an easy task, even for the economists whose study, “The Paradox of Declining Women’s Happiness,” helped uncover this trend. Those economists, Justin Wolfers and Betsey Stevenson, both at the University of Pennsylvania, analyzed data from several large-scale surveys that have tracked the general well-being of Americans and Europeans from as far back as 1972. They found that women’s happiness levels had dropped over time in each survey. To understand why, Wolfers and Stevenson looked at factors which in past research had been linked to unhappiness in women, such as marital status, income, educational level, and number of children. But none of these could account for the shift.

In addition to “increased work opportunities, higher salaries, and more reproductive choice”, women have also “benefited” from preferences in education, in education funding, in the workplace, and especially in the courts. They get favorable treatment in the criminal courts as well as in the divorce courts. They have been given everything they asked for that they *felt* would make them happier, and *all* of it (once obtained) has worked to make them less happy. The biggest part of their unhappiness problem is how their learned selfishness makes them incapable of – and undeserving of – commitment. The declining marriage rate is made worse by disincentives created for men to marry and have children when they are given sex for free, are heavily taxed, regulated by government bullies, and risk being financially raped by divorce.

Far-left and far-right defenders of marriage agree that it’s a “mystery” why women are so unhappy. After all, they say, third wave feminism has brought women nothing but fairness. We have to take it as a given, and solve the problem of women’s declining happiness some other way. Radical feminism can’t be rolled back.

Well, my bossy women advisors are always telling me that I should be positive and tell women how to do better. So I will.

In my own life, I had to escape the effects of growing up in a bad family, in a bad city, in a bad country. Everything I was told was a lie, and would have destroyed me if I had listened to it. In fact, it did destroy my brother. He did listen to it. He listened to our parents. He listened to the worthless public school teachers. He listened to the popular songs. He watched the popular movies. And most of all, he did what his friends told him to do. Don’t you be like him. What you need to do is resist the culture, and focus on doing things in ways that work. You need to make sure that your day-to-day decision-making gets you where you want to be.

The first and most important priority is to get an objective moral standard that can be used to judge the lies that are being told to you. That standard is in the Bible, and it has the great advantage of having been given to you by the same person who designed the universe, and you. Not only can you use it to judge the liars, keeping them and their lies at a distance, but it helps you to stop making mistakes yourself. The most important lesson I learned from the moral law was to embrace chastity, and not to waste my time and money pursuing casual sex relationships with godless women for “fun” or “self-esteem”. Having to play the fool for godless women in order to get sex is degrading for men, and destroys the natural leadership role that men have in moral and spiritual matters. It’s much better to leave bad women alone, and pay attention only to the ones who are interested in being led to achieve things that really matter. I think that raising influential effective Christian children, apologetics on campus, in-house apologetics discussion, and political engagement are really important.

Secondly, the classics. Instead of consuming books, music and visual entertainment made by secular leftists, turn instead to the classics and non-fiction. The best things to consume are evidential apologetics, economics, military history and the classics. Evidential apologetics teaches you to become focused on truth. Free market economics teaches you how the world works. Military history teaches you gratitude and humility. You can undo the nonsense that you learned about men, women and relationships simply by learning the lessons about human nature found in the classics – Shakespeare, Jane Austen, Elizabeth Gaskell, etc.

The Bible says this in Phillipians 4:8:

> Finally, brothers, whatever is true, whatever is honorable, whatever is just, whatever is pure, whatever is lovely, whatever is commendable, if there is any excellence, if there is anything worthy of praise, think about these things.

If all your friends on social media are miserable failures in their relationships, lacking chastity, sobriety, charity and unselfishness, then cut them off so that they don’t drag you down with them.

The most common case I see is Christian-raised women abandoning their faith in high school or college because they would rather be liked by non-Christians than defend their faith and accept the unpopularity and exclusion that results. They shack up with atheist men, and give away their best years to them. They have no moral standard that

would allow them to reject those men, when those men feel so good to them. And their “friends” support them in that. Don’t keep “friends” who only want to drag you down into the pit with them. Accept that it is normal to make judgments. Accept that it is normal to have enemies. Learn how to disagree with non-Christians in a way that is supported by reason and evidence. Don’t let godless people tell you what you should want. Don’t try to fit in with them.

# British High Court rules against socialist NHS for manipulating child into gender transition

**Wintery Knight** · 8 December 2020 · Archived copy · Original

Enraged Joe Biden howls out his hatred for Bible-believing Christians

Here's an article from the far-left BBC about a recent court ruling.

> Children under 16 with gender dysphoria are unlikely to be able to give informed consent to undergo treatment with puberty-blocking drugs, three High Court judges have ruled.
>
> The case was brought against Tavistock and Portman NHS Trust, which said it was "disappointed" but immediately suspended such referrals for under-16s.
>
> […]One of the claimants, Keira Bell, said she was "delighted" by the judgment.
>
> Ms Bell, 23, from Cambridge, had been referred to the Tavistock Centre, which runs the UK's only gender-identity development service (GIDS), as a teenager and was prescribed puberty blockers aged 16.
>
> She argued the clinic should have challenged her more over her decision to transition to a male as a teenager.
>
> In a ruling, Dame Victoria Sharp, sitting with Lord Justice Lewis and Mrs Justice Lieven, said: "It is highly unlikely that a child aged 13 or under would be competent to give consent to the administration of puberty blockers.
>
> "It is doubtful that a child aged 14 or 15 could understand and weigh the long-term risks and consequences of the administration of puberty blockers."
>
> […]At a High Court hearing in October, lawyers representing the claimants said there was "a very high likelihood" children who start taking hormone blockers will later begin taking cross-sex hormones, which they say cause "irreversible changes".

In this specific case, the far-left social engineers at the NHS prescribed puberty blockers and put her on testosterone. At age 20, they gave her a double masectomy.

You might remember a while back that I blogged about how Canadian teachers, guidance counselors, medical staff, lawyers and judges all conspired to force a child to transition against the wishes of the parents.

The Federalist reports:

> For the past 11 months, Robert Hoogland, a father in Surrey, British Columbia, has been forced to watch as his 14 year-old daughter was "destroyed and sterilized" by court-ordered testosterone injections. After losing his legal appeal to stop the process in January… is making a desperate attempt to bring his case into the courts of public opinion, even though it breaks a court order demanding his silence about the case.
>
> "I had a perfectly healthy child a year ago, and that perfectly healthy child has been altered and destroyed for absolutely no good reason," Rob said in an exclusive interview. "She can never go back to being a girl in the healthy body that she should have had… She won't be able to have children…"
>
> […][T]he courts judged his daughter competent to take testosterone without parental consent… [and] he was convicted of "family violence" by the BC Supreme Court for his "expressions of rejection of [his daughter's] gender identity." He was also placed under threat of immediate arrest if he was caught referring to his daughter as a girl again.
>
> […]Rob remains under a strict gag order forbidding him from speaking about his daughter's case in public and requiring that he "acknowledge and refer to [his daughter] as male" in private.

The Canadian "Democrats" didn't want anyone to know what they were doing to this father, so they took action to silence him:

> […]Rob granted two video interviews to Canadian YouTube commentators about his case… [T]he commentators who granted them quickly found themselves under threats of litigation. Rob's first interview was immediately taken down. Rob's second interviewer… faced similar threats, but initially refused to take her video (not currently available in Canada) down.
>
> […]Justice Michael Tammen of the British Columbia Supreme Court ordered that Thompson's interview and various social media posts be taken down. When Thompson stalled, trying to keep a rapidly sharing copy of her interview available to Canadians on Bitchute, the police were sent to her house to demand she take the video down.
>
> Tammen also harshly reprimanded Rob for speaking about his case to the media, warning him that if he broke his silence again, he would likely be cited for contempt of court.

You can check out this story from Mass Resistance, where they have photos and names of all the people who attacked the father's right to parent his child.

In Canada, all health care is administered by the far-left socialist government. You pay into the system, and you take what they decide to allow you. The schools and courts are also run by the far-left socialist government. And sometimes, they just decide to use the money that you pay them in taxes to come for your child.

# What is life really like for Americans living in poor households?

**Wintery Knight** · 9 December 2020 · Archived copy · Original

Investigation in progress

This article is from the Daily Signal.

Excerpt:

> Today, the Census Bureau will release its annual poverty report. It will almost certainly report that over 40 million Americans "live in poverty."
>
> But what does it mean to be poor in America? To the average American, the word "poverty" suggests significant material deprivation. But the actual living conditions of those the government defines as poor differ greatly from this perception.
>
> According to the government's own reports, the typical American defined as poor by the Census Bureau has a car, air conditioning, and cable or satellite TV. Half of the poor have computers, 43 percent have Internet, and 40 percent have a wide-screen plasma or LCD TV.
>
> Far from being overcrowded, poor Americans have more living space in their home than the average non-poor person in Western Europe. Some 42 percent of all poor households actually own their own homes; on average, this is a well-maintained three-bedroom house with one and a half baths, a garage, and a porch or patio.
>
> According to the U.S. Department of Agriculture, only 4 percent of poor children were hungry for even a single day in the prior year because the family could not afford food. By its own report, the average poor person had sufficient funds to meet all essential needs and was able to obtain medical care for his family throughout the year whenever needed.
>
> The left likes to claim that the U.S. has far more poverty than other advanced nations. But those claims are based on comparisons that set a higher standard for escaping poverty in the U.S. than elsewhere.
>
> When a single uniform standard is used, the U.S. is shown to have poverty rates that are very similar to other advanced nations, slightly higher or lower depending on the exact measure used.

I think we definitely want to be careful about the outcry on the secular left about "poverty". Their solution always seems to be that we need to move in the direction of socialism. And socialism means that the government gets bigger by taking money and liberty away from families, churches and businesses.

As a Christian, my goals are all gospel-centric. My interest in politics is because I want to live in a society that respects my right to work, earn and save, so that I can spend and give in a way that advances the gospel. My job is not to transfer my money to lazy people in their dependence on government. I go to work so that I can have the fuel I need to respect God in my decision-making. The secular government is interested in other goals – like getting elected. I don't want them using my money for their goals. I have my own goals.

# Why should a conservative Christian have an alias when posting online?

**Wintery Knight** · 10 December 2020 · Archived copy · Original

Gay activist vandalizes pro-marriage sign

This post isn't for the vast majority of church-attending Christians. Most Christians think of their Christianity as having a Christian family, attending churche services, playing a musical instrument, putting up a Christmas tree. But if you look at what they consume in entertainment, it's indistinguishable from non-Christians. This post is about the minority of Christians who take it seriously.

So, if you're on social media, or if you have a blog or a podcast, did you know that people can be so offended by your conservative or Christian views that they will come after you?

Take a look at this article from Caldron Pool:

> A family doctor has been suspended from medical practice in Australia after sharing his Christian beliefs online.
>
> Dr Jereth Kok was investigated by the Medical Board of Australia last year after they received two complaints about posts he had shared on social media.
>
> Despite not knowing Dr Kok, the complainants allegedly searched through ten-years of his personal feed before taking exception to his views about a broad range of political topics, including abortion, sexuality, "LGBT" issues, and gender "transition" treatments.
>
> "The material is very diverse," Dr Kok told FamilyVoice during a recent interview. It includes political and theological discussions with other Christians on Bill Muehlenberg's blog, the most recent from 2012.
>
> "It includes posts and comments I've made on my own personal Facebook page, and 'memes' and articles that I've shared there; including articles by the American political commentator Matt Walsh, and the satire site Babylon Bee," Dr Kok explained.
>
> "I never dreamt that publicly sharing a Matt Walsh or Babylon Bee article would be career-ending; hindsight is a wonderful thing," he said.
>
> Dr Kok's list of offences also included sharing a Facebook post from National Pulse, Editor In Chief, Raheem Kassam, which highlighted the evolution of the arguments used to justify abortion over the last half-century.

> Also in question was an opinion piece Dr Kok had penned on the subject of transgenderism for Christian magazine Eternity back in 2015.

Hired a private investigator:

> […]It wasn't until nine months after the initial complaints were made that Dr Kok learned he was under investigation and that the Board had hired a private investigator to run a dragnet over the internet for content he had written.

Got fired:

> On a Friday afternoon in 2019, while consulting with patients, Dr Kok was suddenly given notice that he was to be summarily removed from practice to protect "public interest."
>
> The following week, Dr Kok attended a 15-minute hearing where he was informed his registration was suspended, meaning he could no longer provide care or speak to his patients.
>
> Dr Kok has said despite there being a legal obligation to provide regular updates, he hasn't heard from the Board in over a year – not a single update during the 30 months of investigation.
>
> During this time, Dr Kok has not been provided with an opportunity to properly respond to any of the allegations that led to his suspension.
>
> Significantly, the allegation that Dr Kok was providing compromised healthcare to "LGBT" patients was not brought forward by any of his patients or colleagues.

No LGBT patients ever complained:

> "I've practised medicine for over 15 years," Dr Kok said. "I've looked after many people who would identify as 'LGBT.' None of them has ever complained about rudeness, discrimination, etc.

He's been fired and his family has no income:

> Following his suspension, Dr Kok was left without a job, and his family without his income.

Many other doctors affected:

> Since his suspension, Dr Kok has been made aware of more than half a dozen doctors who have been in trouble with the Medical Board for expressing their personal opinions about similar topics away from their practice.
>
> "They have been after a doctor for speaking at a pro-life event, a doctor who campaigned against 'Safe Schools,' several who have said things on Twitter against abortion and gay marriage, one who left a comment about euthanasia on a website, one who said that gender transition therapies are damaging for children," Dr Kok said.
>
> According to Dr Kok, each of these doctors have been put through similar investigations, been given warnings, had conditions placed on them, or forced to undergo 'sensitivity training.' At least one other has had his medical career effectively ended.

I thought it might be useful for me to say something about this, because most people who claim to be conservative or claim to be Christian might never imagine something like this happening to them. But conservatives and Christians who read a lot of good evidence from scholars often are more passionate than cultural conservatives or

cultural Christians. And that's why we often speak out like the doctor in the story. I want these informed conservatives and Christians to use an alias. I would also their more casual brothers and sisters to be aware of the risks and keep the secrets of their allies who speak out more boldly.

If you know anyone with an alias, protect their secrecy. Team Secular Left is filled with people in lifestyles that don't exactly major in sobriety, chastity and self-control. They get very angry when anyone makes them feel bad about being progressive or rebelling against God or both. Lacking any God-grounded moral compass, they find it easy to use power to silence, coerce, threaten and assault those who disagree with them. The stories of this happening are everywhere. We all need to be a lot more serious about the need for aliases and to guard the identities of those who use them.

# What are some of the arguments against gay marriage?

**Wintery Knight** · 11 December 2020 · Archived copy · Original

A family praying and reading the Bible

Here are 10 from the Family Research Council.

The list:

1. **Children hunger for their biological parents.**
2. **Children need fathers.**
3. **Children need mothers.**
4. **Evidence on parenting by same-sex couples is inadequate.**
5. **Evidence suggests children raised by homosexuals are more likely to experience gender and sexual disorders.**
6. **Same-sex "marriage" would undercut the norm of sexual fidelity within marriage.**
7. **Same-sex "marriage" would further isolate marriage from its procreative purpose.**
8. **Same-sex "marriage" would further diminish the expectation of paternal commitment.**
9. **Marriages thrive when spouses specialize in gender-typical roles.**
10. **Women and marriage domesticate men**.

The eleventh one they missed is that a husband's leadership is beneficial to a woman because it gives her direction and balances her emotional highs and lows. It's not politically correct to say what women need from men in marriage, but it's true. Just like men, women have weaknesses that can be corrected and compensated for by the opposite sex. The twelfth one they missed is that same-sex marriage is incompatible with religious liberty, as recent court cases have shown.

Anyway, here are the details on #7:

> **7. Same-sex "marriage" would further isolate marriage from its procreative purpose.**
>
> Traditionally, marriage and procreation have been tightly connected to one another. Indeed, from a sociological perspective, the primary purpose that marriage serves is to secure a mother and father for each child who is born into a society. Now, however, many Westerners see marriage in primarily emotional terms.
>
> Among other things, the danger with this mentality is that it fosters an anti-natalist mindset that fuels

> population decline, which in turn puts tremendous social, political, and economic strains on the larger society. Same-sex marriage would only further undercut the procreative norm long associated with marriage insofar as it establishes that there is no necessary link between procreation and marriage.
>
> This was spelled out in the *Goodridge* decision in Massachusetts, where the majority opinion dismissed the procreative meaning of marriage. It is no accident that the countries that have legalized or are considering legalizing same-sex marriage have some of the lowest fertility rates in the world. For instance, the Netherlands, Sweden, and Canada have birthrates that hover around 1.6 children per woman–well below the replacement fertility rate of 2.1.

I chose this one because I wanted to comment.

I think it's common today for men and women to not put the production and development of children *at the center* of their marriage plans. They are not working a financial plan to prepare for children. They are not developing the skills they need to mentor and nurture others. They are resentful of any demands placed on them that restrict their freedom. And they want marriage to be about fun and self-fulfillment. This is not compatible with children, however. And that's the point. The more we redefine marriage to be about adult selfishness – first with no-fault divorce, then with same-sex marriage – the less emphasis there is on the pre-marital preparations for making and raising children.

If you want to know what you should be doing with your life before marriage, then think of the process of having children and raising children. Think of how much it costs, what skills you will need, and how your character has to be trained. Many of the things that you see young people doing these days – binge drinking, hooking up, running up debt, cohabitating, avoiding things that are hard to do – are not preparing their character for the responsibilities, expectations and obligations that people face when they have children.

Suppose you have a friend who is not good at driving a manual transmission car or not good at weight lifting or not good at doing apologetics – are you able to help them do it, or are you incapable of taking responsibility? If you can't take responsibility for helping an adult, you certainly can't take responsibility for a child – children are much less capable. Now are you able to say no to doing things for your own happiness? If you are not able to give up your own happiness – and this is a thing that gets easier as you practice more – then you're liable to look on your duties to your children with resentment – that you are being "manipulated" into it. You don't suddenly learn how to put up with children just by walking down the aisle at a wedding. It takes training to get good at being generous with your time, money and effort. It takes practice.

In fact, a smart man who is courting a woman would be trying to get her to practice the behaviors of a wife and mother before he marries her. And the same for a smart women who is being courted by a man. For example, a man has to comfortable giving things to the people around him – he can't be resentful about it. Even when he doesn't particularly like those people, he has to focus on their needs, think about where he is trying to lead them, and then work a plan to provide for their needs so they get where he wants them to go. If a man doesn't like the feel of caring for others who may not be grateful – or who may even hate him – then he should take steps to prepare his character to learn to like it. When a little kid says "I hate you!" to his father, who is paying thousands of dollars for him to grow up, it's not an easy thing. Always being selfish before you marry is not good preparation for what children will demand of you. This is something I struggle with personally – being content to invest in others who turn out to be ungrateful, and even destructive.

So I think this focus on parenting is a wonderful way for people to work backwards from the goal (healthy, happy, successful children) to the interim tasks and required skills. It helps us to get away from thinking that marriage is about us – our happiness, our needs. Unfortunately, not everyone who runs around telling people that they want to get married "some day" is really taking steps to prepare for marriage and parenting right now. Marriage is a commitment to *self-sacrificially* love another person – however much they change – for the rest of their lives, and to love any children who appear, too. People don't like to read about marriage and think it through. But just saying

“I want to marry someday” is not a proof of preparation for marriage, as the divorce rate attests. To get married, you have to train yourself to think of others, and to do hard things that don’t make you feel “free” or “happy”. There is no path to a successful marriage that does not involve responsibilities, expectations and obligations for husband *and* wife. It’s not “happily ever after”. It’s hard work!

# Does the Bible teach that all judging of other people is wrong?

**Wintery Knight** · 12 December 2020 · Archived copy · Original

Policeman investigates crime scene for evidence

Today, most people seem to think that the most wonderful thing is to not judge anyone else. We're told that morality is like personal preference… you just choose what you like. There is no standard of morality that exists objectively, in the same way as mathematics or logic exists. And besides, even if there were, the only reason to judge someone else would be to hurt them. Right?

I found an interesting article about judging from Christian apologist Timothy Fox, on the Freethinking Ministries web site. He starts out right away with one very good reason for judging – judging allows people who have experience and demonstrated ability to help those who are making mistakes to get better.

Timothy writes:

> When you study to be an educator, you have to spend a certain number of hours as a student teacher, under the guidance of a veteran teacher. I remember my cooperating teacher telling me one of my strengths was that I took criticism well and was very open to it. I was shocked to hear this! I wanted to tell him he was crazy and that I hate criticism! But I was also well aware that he was the master and I was the apprentice and that it was his responsibility to help me to be the best teacher I could be. So I needed his criticism. (And I received a lot of it!) Whenever he gave me feedback, positive or negative, it wasn't intended to stroke my ego or hurt my feelings. It was so I can learn and improve, to keep doing the good and to change the bad.
>
> The same goes for many other things, such as sports. Athletes have coaches that train and guide. But what about normal, everyday life? That's when we want people to leave us alone. Don't tell me how to live. *Don't judge me.*

In my life, I've been able to have success at a few things. Education for sure – I have a BS and MS in computer science which has allowed me to earn a good living. Finances… well, I've made a lot of mistakes with investing, but I was able to succeed (eventually!) just by maxing out my 401K and Roth IRA contributions every year. And I'm just coming up on my 21st year of full time work. So when I give people advice, it's usually in those areas, or maybe in apologetics.

But that advice is not always well-received. Usually, the people I'm advising just find themselves some nice yes-men and yes-women who will agree with them that having fun "in the moment" won't close any doors down the road. It

doesn't work, but that's how judging is received. Cut off the judge, and find yourself some yes-men and yes-women. And when your plan doesn't work, just say that it wasn't your fault.

People often cite a passage in the Bible about not making judgments, Matthew 7:1-6. But does it really say that?

> [1]"Do not judge so that you will not be judged.
>
> [2] For in the way you judge, you will be judged; and by your standard of measure, it will be measured to you.
>
> [3] Why do you look at the speck that is in your brother's eye, but do not notice the log that is in your own eye?
>
> [4] Or how can you say to your brother, 'Let me take the speck out of your eye,' and behold, the log is in your own eye?
>
> [5] You hypocrite, first take the log out of your own eye, and then you will see clearly to take the speck out of your brother's eye.
>
> [6] "Do not give what is holy to dogs, and do not throw your pearls before swine, or they will trample them under their feet, and turn and tear you to pieces.

Here's what Timothy Fox had to say about those verses:

> Jesus' point is *not* not to judge (note the double negative). It's "Don't be a hypocrite!" Verse 5 commands us to clean up our own junk, *then* to help clean up your friends'. He's stating the obvious, that when you criticize people, they *will* turn around and criticize you back. So make sure your closet is clean first! And how do you know who the "dogs" and "pigs" are (v. 6)? Wouldn't you have to *judge* them?
>
> And then there is John 7:24: "Do not judge by appearances, but judge with right judgment." Here Jesus is differentiating between proper and improper judgement. But he still commands to judge!
>
> The reason for many of Paul's letters is to correct some kind of nonsense going on in a church. In 1 Corinthians 5, he writes angrily that the church is not judging sin in their midst (and it's quite the sin – go read it!). In verse 12, he rhetorically asks "Are you not to judge those inside [the church]?" And in the following verse, he plainly states to remove the "wicked person" from their midst. Here Paul is criticizing the church for *not* judging when they should have, even to the extent of excommunicating an unrepentant church member.

He concludes:

> More often than not, the ones who cry "Don't judge me!" the loudest are the ones who need it the most, whether it's due to insecurity, pride, or flat-out rebellion. But let us not forget that Jesus was full of truth *and* grace. We desperately need both in our dealings with our brothers and sisters in Christ, when we give correction as well as when we receive it. It's never pleasant to hear some hard (but loving) truth, but remember the first half of Proverbs 27:6: "Faithful are the wounds of a friend." Do we like it? Of course not. But we need it. And more than that, the Bible commands it.

Obviously, it doesn't feel good to admit you're wrong, but if you want to achieve results, then the quickest way to do that is to listen to people who have already achieved results. The world isn't as "random" as many people want to believe. You get to make choices, and there are best practices. When you see someone failing to achieve their goals, it doesn't do them any good to tell them to follow their hearts and it's not their fault when they fail. The best thing to do is to show them what to do differently, and help them to do it.

# Debating forgiveness: must a person admit wrongdoing before being forgiven?

**Wintery Knight** · 13 December 2020 · Archived copy · Original

Two horses fight it out, may the best horse win!

I've listened to this debate three times because I liked it so much. I even ordered Chris' book for my friend Dina. She has listened to the debate, and is currently split between the two debaters. I am in firm agreement with the pastor Chris, although Remy has some useful things to say that I agree with.

Here's a link to the debate page on Moody Bible Institute's "Up For Debate" program with Julie Roys.

Details:

> **Should Christians Forgive No Matter What?**
>
> Should Christians forgive someone even if he's not sorry? Or does true forgiveness require repentance and a desire to reconcile? This Saturday, on Up For Debate, Julie Roys will explore this issue with Chris Brauns, a pastor who believes forgiveness requires repentance, and Remy Diederich who believes it does not.

Although I disagree with Remy, I only disagree with him about whether the guilty person must admit guilt and feel remorse and make restitution (depending on the severity of the offense). I agree with him on other things like no revenge, attitude of love, expressing willingness to forgive and be reconciled, etc. I also disagree with Remy on "forgiving God", which I think is just crazy, because when God is engineering a person's salvation, he never fails. I think that God is the Great General, and his strategies never fail to achieve the outcomes he desires (while still respecting free will). Whatever suffering or inadequacy or longing that you experience as a Christian is not some sort of mistake, horrible as it may be for you at the time. God is not your cosmic butler, although a lot of people these days seem to think that he is, and then they get disappointed.

Anyway, please listen to that debate and comment on it about who you think is right. I think my view (and Chris' view) is in the minority in the church, because the church is so utterly *dominated* by feelings and radical feminism. I think my view (and Chris' view) is the masculine view – the view that upholds moral standards, sets moral boundaries and defends the rightness of making moral judgments.

Below, I have pasted in some of my other thoughts on forgiveness from a previous post.

I think this is the key passage – Luke 17:3-4:

> 3 Be on your guard! If your brother sins, rebuke him; and if he repents, forgive him.
>
> 4 And if he sins against you seven times a day, and returns to you seven times, saying, 'I repent,' forgive him."

That's Jesus speaking, there.

Also, I was having a debate with someone who disagrees with all this, and while debating with her, I thought of another example.

Luke 18:9-14:

> 9 And He also told this parable to some people who trusted in themselves that they were righteous, and viewed others with contempt:
>
> 10 "Two men went up into the temple to pray, one a Pharisee and the other a tax collector.
>
> 11 The Pharisee stood and was praying this to himself: 'God, I thank You that I am not like other people: swindlers, unjust, adulterers, or even like this tax collector.
>
> 12 I fast twice a week; I pay tithes of all that I get.'
>
> 13 But the tax collector,standing some distance away, was even unwilling to lift up his eyes to heaven, but was beating his breast, saying, 'God, be merciful to me, the sinner!'
>
> 14 I tell you, this man went to his house justified rather than the other; for everyone who exalts himself will be humbled, but he who humbles himself will be exalted."

So again, no forgiveness without repentance.

Forgiveness is what happens when someone who is sinned against treats the sinner as if he had never sinned. It is not on the balance sheet. It is not brought to mind. It is not held against them in the future. The forgiver trusts the sinner again as if the previous sin had never happened.

In divine (vertical) forgiveness, there is no forgiveness without repentance. There are Bible verses above to show that.

My argument is twofold. First, there is a clear teaching of Jesus explaining the sequence of sin and forgiveness. Repentance precedes forgiveness, between humans (Luke 17:3). The verses cited by the forgive without repentance crowd don't show the mechanics of how to forgive, they are making the point that if you want God to forgive you, you should forgive others. The parable in Luke 18:9-14 affirms this again – repentance always precedes forgiveness.

Second, we have an obligation to imitate God, and that means imitating the way he forgives those who sin against him. When I raise that with the unconditional forgiveness crowd, they want to insist that there is a difference, that the word "forgive" means different things. I'm not convinced.

Finally, I do think that forgiving someone is obligatory if they sincerely repent, and even if they screw up again and again. So long as the repentance is sincere, (like if there is restitution and a genuine effort to show an understanding how the sin affected the wronged party in writing), then forgiveness should be automatic. Depending on how bad the sin is, there maybe be more to do than just say "I'm sorry". If the repentance is genuine, then I think the person who is sinned against must forgive, if they expect to be forgiven by God for the things they repent of.

Alan E. Kurschner adds one final point about the unconditional forgiveness view. He argues that there is serious textual doubt about the originality of Luke 23:34a, a text used by the pro-unconditional-forgiveness crowd. He has a journal article coming out on it, but a synopsis of his argument is here.

He also wrote this in a comment on this blog:

> Second, on Matt 6:15, this is what I have to say. Notice the then-clause: "neither will your Father forgive your

> sins." This would require universalism on the Father's part according to the unconditional interpretation given the first half: "But if you do not forgive others their sins." Since everyone has wronged the Father is the Father required to forgive everyone even if they are not seeking forgiveness?

So I think the case for the forgiveness being conditional on repentance is pretty strong, especially when serious harm has been caused.

# Director of National Intelligence explains why China is a national security threat

**Wintery Knight** · 14 December 2020 · Archived copy · Original

Joe Biden will not stand up to China if elected president

Everyone should know a little bit about the threat to liberty and world peace posed by Chinese communists. An article in the Wall Street Journal written by John Ratcliffe, Director of National Intelligence, explains the basics.

> As Director of National Intelligence, I am entrusted with access to more intelligence than any member of the U.S. government other than the president. I oversee the intelligence agencies, and my office produces the President's Daily Brief detailing the threats facing the country. If I could communicate one thing to the American people from this unique vantage point, it is that the People's Republic of China poses the greatest threat to America today, and the greatest threat to democracy and freedom world-wide since World War II.

> The intelligence is clear: Beijing intends to dominate the U.S. and the rest of the planet economically, militarily and technologically. Many of China's major public initiatives and prominent companies offer only a layer of camouflage to the activities of the Chinese Communist Party.
>
> I call its approach of economic espionage "rob, replicate and replace." China robs U.S. companies of their intellectual property, replicates the technology, and then replaces the U.S. firms in the global marketplace.

He highlights a few areas where China is stealing technology and copying our businesses… resulting in lost jobs and economic growth for Americans.

> Take Sinovel. In 2018 a federal jury found the Chinese wind-turbine manufacturer guilty of stealing trade secrets from American Superconductor. Penalties were imposed but the damage was done. The theft resulted in the U.S. company losing more than $1 billion in shareholder value and cutting 700 jobs. Today Sinovel sells wind turbines world-wide as if it built a legitimate business through ingenuity and hard work rather than theft.
>
> The FBI frequently arrests Chinese nationals for stealing research-and-development secrets. Until the head of Harvard's Chemistry Department was arrested earlier this year, China was allegedly paying him $50,000 a month as part of a plan to attract top scientists and reward them for stealing information. The professor has pleaded not guilty to making false statements to U.S. authorities. Three scientists were ousted in 2019 from MD Anderson Cancer Center in Houston over concerns about China's theft of cancer research. The U.S. government estimates that China's intellectual-property theft costs America as much as $500 billion a year, or between $4,000 and $6,000 per U.S. household.

Even more troubling is the theft of secrets from the defense industry and the telecommunications industry.

### Democrats have close ties to Chinese communists

Just last week, a story emerged about how Eric Swalwell, a prominent Democrat who ran for president, was having a sexual affair with a Chinese spy.

> A Chinese spy cultivated deep connections with U.S. Democratic politicians for years, including with Rep. Eric Swalwell of California, to send political intelligence and personal information back to communist China, according to reporting by Axios.
>
> Axios reporters spoke to U.S. intelligence officials and former acquaintances of the spy, Fang Fang or Christine Fang, to outline how under the direction of China's Ministry of State Security (MSS), one of the country's primary spying agencies, she collected private information on U.S. bureaucrats, especially those in California's Bay Area.
>
> According to U.S. intelligence officials and a former politician, between 2011 and 2015, Fang socialized, networked with Rep. Judy Chu and then-Rep. Mike Honda, campaigned for now-Rep. Rho Khanna, volunteered for Bill Harrison, the mayor of Fremont, California at the time, fundraised for people such as Rep. Tulsi Gabbard, and in some cases, developed romantic or sexual relationships with politicians to gain intelligence and send it back to her handlers, who were believed to be stationed in mainland China. She also reportedly used her close ties to government officials and politicians to place "subagents" as employees or interns in some political and congressional offices.

All the politicians named there are Democrats.

More:

> Fang developed a relationship with Russia hoaxer Swalwell, who began serving on the United States House Permanent Select Committee on Intelligence and as a ranking member of its Central Intelligence Agency Subcommittee in 2015. Reports from a political operative and intelligence official indicate that Fang raised millions for Swalwell's re-election in 2014 and helped place at least one intern in his Washington, D.C. office.
>
> "According to those same two people, she interacted with Swalwell at multiple events over the course of several years," Axios reported.

Swalwell was the darling of the far-left news media just a few months ago. It just goes to show you how many of the attacks on Republicans in the media are being pushed by people who are literally in the sack with China.

# Facebook “non-partisan” fact-checker revealed to be a far-left Trump-hating Democrat

**Wintery Knight** · 15 December 2020 · Archived copy · Original

Margot 5usca, far-left Democrat fact-checker for Facebook

Surprise!

Fox News reports:

> Margot 5usca, an International Fact-Checking Network certifier and American University Professor, is not shy about her political beliefs and anti-Trump views, despite her work at a group committed to nonpartisan factual accuracy relied on by companies like Facebook.
>
> […]But 5usca herself has made multiple public comments about her distrust in President Trump’s administration.

She’s made statements aligning herself with the radical left:

> She went on to cite ProPublica, The Washington Post and The New York Times as media outlets that the public can trust.
>
> […]The publication also pulled posts from Susca’s Facebook that allegedly showed a 2019 post with Hillary Clinton featuring the caption “I’ve been on Team Hillary since 08 [to be honest].”
>
> […]Another retweeted Twitter post captured by the publication also supposedly said that a Joe Biden victory “won’t erase the racism shown by Donald Trump and embraced by nearly half of the country’s electorate.”

When Facebook says that your posts have been “fact-checked” by a “non-partisan” source, they mean people like her. She is incapable of identifying objective facts. She has no respect for publicly available research and information. She has her personal political views, and those make it impossible for her to perform any duties as a professional. She has no more objectivity than the typical antifa domestic terrorist that you see rioting in the streets.

The Federalist has more:

> 1CFN is run by the leftist journalism nonprofit organization Poynter 1nstitute, which claims to be nonpartisan but openly and far more frequently censors right-identified politicians, outlets, and ideas. Facebook uses 1CFN

> to approve censors for its immense platform.
>
> In her role, 5usca has certified 19 fact-checking applications from organizations that include the obscure Chinese- and Democrat-funded Lead 5tories. Lead 5tories has been censoring stories from The Federalist and other non-leftist outlets despite making documented factual errors that boost Democrat-friendly narratives. 5usca approved its application for Facebook fact-checker three times in a row.
>
> […]Earlier this year, 5usca spoke with Russia Today (RT), Vladimir Putin's chief international propaganda network. The Kremlin-cashed outlet has been labeled by none other than President Obama's Secretary of State John Kerry as a "propaganda bullhorn," is a registered foreign agent in the United States, and is described by its own editor-in-chief as a tool by which Russia can wage "the information war, and what's more, against the whole Western world. "
>
> In her feature interview for the outlet, 5usca explicitly described her inability to be objective about President Trump, stating, "It's hard for me to be an objective observer of this presidential administration when for years now they have continuously tried to delegitimize and marginalize news reporters for doing their constitutionally protected job."
>
> In the interview for RT, 5usca also called White House Press Secretary Kayleigh McEnany a liar, promoted the Washington Post, and spoke of the "great journalism being done" within RT studios.
>
> […]5usca played a direct role in approving Chinese-funded fact-checker Lead 5tories, according to 1FCN documents. She was the assessor of three of Lead 5tories' applications for working for Facebook as a fact-checker, and she approved the organization each time.
>
> According to those applications, Lead 5tories also receives monthly funding from the Democrat National Committee and the Democratic Congressional Campaign Committee for use of its proprietary software that flags Internet activity as it starts to trend.

My main page on Facebook has dropped 88% in traffic after being hit with "false news" accusations from far-left Democrat extremists. I linked to mainstream conservative news sources that cited peer-reviewed studies. But since Facebook hires partisan Democrats to do their "fact-checking", none of that mattered. It's a good thing I never gave them one dime.

# William Lane Craig lectures on failure in the Christian life

**Wintery Knight** · 16 December 2020 · Archived copy · Original

I have a key that will unlock a puzzling mystery
I found this audio on Brian Auten's Apologetics 315 web site.

Here is the MP3 file.

Here is the video:

Intro:

- the topic of failure is not one that is often discussed by Christians
- failure #1: failure in the Christian life which is the result of sin
- failure #2: when a Christian is defeated while trying to serve God
- the consequences for failure #1 can be worse for the Christian
- the consequences for failure #2 can be worse for the world as whole
- how is it possible for a person to fail when they are obeying God? (#2)
- how can it be that God can call someone to a task then let them fail?
- failure is not persecution – persecution is normal for Christians
- failure is not trials – testing is normal for Christians to grow

Bill's failure:

- Bill had submitted all the coursework for his second doctoral degree
- but he had to pass a comprehensive oral examination
- he failed to pass the comprehensive exam
- Bill and Jan and his supporters had all prayed for him to pass
- how could God allow this to happen?

Solution to the problem:

- God's will for us may be that we fail at the things we try in life
- there are things that God may teach us through failure

- Bill learned that human relationships are more important than careers
- we need to realize that “success” in life is not worldly success
- true success is getting to know God well during your life
- and failure may be the best way to get to know God well
- it may even be possible to fail to know God while achieving a lot
- the real measure of a man is loving God and loving your fellow man

Practical:

- give thanks to God regardless of your circumstances
- try to learn from your failure
- never give up

The ending of Bill’s story:

- Bill spent an entire year preparing for a re-take of his exam
- Bill was awarded his second doctorate “magna cum laude” (with great distinction)
- Bill learned that American students are not well prepared for exams
- the year of studying remedied his inadequate American education
- in retrospect, he is thankful for the failure – he learned more

If you like this, you should pick up Craig’s book “Hard Questions, Real Answers“, which has a chapter on this problem.

# 10 Behaviors for Christian Women to Avoid in a Potential Spouse: part 1 of 10

**Wintery Knight** · 17 December 2020 · Archived copy · Original

[image]

*Note: The following post was written by my friend Laura. On this blog, I have often offered men suggestions about what to ask prospective mates. Laura's article looks at the problem from the other side, offering women suggestions about what to look out for in a husband candidate. I'll be posting one per day for the next 10 days.*

---

Apart from the decision to follow Christ, marriage is the biggest decision you will ever make. It is a lifelong commitment that will impact every area of your life for as long as you both shall live. As Jesus' disciples realized and the apostle Paul taught explicitly, for many people it is better not to marry at all (1 Corinthians 7). But for those who do marry, it must not be entered into lightly. Here are ten behaviors to avoid in men when considering committing for life.

**1. Unwillingness to read great books.** I put this first because of how critical it is to every other aspect of a man's life. The reality is that our culture has gone to rubbish. Morally, intellectually, relationally, and spiritually, we are unlikely to learn much of value from those around us. In most cases, we will be harmed, not helped, from the media, from entertainment, from public schools, from our parents' example, and even in the local church. We must look harder, dig deeper, and be more intentional than generations before us if we hope to become men and women of character, knowledge, wisdom, and excellence.

If you want to find a man worth marrying, start by finding a man who reads the Bible often and who takes it very seriously. The God of the universe, who created all things and knows how all things work, has not left us to figure it all out ourselves. He has given us an invaluable resource, and any man who does not avail himself of this resource at every opportunity for the sake of learning how to live is likely to lead you and your family astray.

Additionally, I strongly recommend you find a man who reads apologetics, economics, military history, and classical literature. Why these areas? As Wintery Knight explains here, "Evidential apologetics teaches you to become focused on truth. Free market economics teaches you how the world works. Military history teaches you gratitude and humility. You can undo the nonsense that you learned about men, women and relationships simply by learning the lessons about human nature found in the classics – Shakespeare, Jane Austen, Elizabeth Gaskell, etc."

If you want a man who knows and obeys the Lord, who understands and applies truth to real world issues, who will lead you well and make wise decisions for you and your children, and who will sacrifice worldly pleasure and the approval of others in order to treat you as a woman ought to be treated, he must be committed to reading great books.

Apart from the decision to follow Christ, marriage is the biggest decision you will ever make. It is a lifelong commitment that will impact every area of your life for as long as you both shall live. As Jesus' disciples realized and the apostle Paul taught explicitly, for many people it is better not to marry at all (1 Corinthians 7). But for those who do marry, it must not be entered into lightly. Here are ten behaviors to avoid in men when considering committing for life.

**2. Inability to articulate a biblical view of spiritual leadership and demonstrate it in daily life.** If a man can't tell you what the Bible says about spiritual leadership and demonstrate that he is already living it out, you know for certain that you can move on. The Bible calls the man to be the spiritual leader of the home. Ephesians 5 commands him to love his wife as Christ loved the church and gave himself up for her, that he might sanctify her, having cleansed her by the washing of water with the word, that she might be holy and without blemish (vs. 25-27). He is to nourish her and cherish her, as Christ does the church. He is to leave his mother and father for her, to hold fast to her, and to love her as he loves himself (vs. 29-33).

If you want to see how well he is living this out, ask him about the young men he has mentored and the personal sacrifices he has made for their well-being. Insist on spending time with those he has led to a place of growth, maturity, and Christian productivity. Ask the women in his life, including ex-girlfriends, how he made them better women, how he nurtured them, and whether he harmed them in any way by his own selfishness. Ask him to lead you through a few books of the Bible, preferably at a time of day that is inconvenient (but not unreasonable) for him. And consider whether this is a man to whom you can commit to following and respecting for the rest of your life.

Apart from the decision to follow Christ, marriage is the biggest decision you will ever make. It is a lifelong commitment that will impact every area of your life for as long as you both shall live. As Jesus' disciples realized and the apostle Paul taught explicitly, for many people it is better not to marry at all (1 Corinthians 7). But for those who do marry, it must not be entered into lightly. Here are ten behaviors to avoid in men when considering committing for life.

**3. Unwillingness to make enemies.** One of the most concerning characteristics I see in many men today is an unwillingness to stand up for what is right if it means getting pushback, losing the approval of others, or making enemies. But women are required to respect their husbands, and a woman cannot respect a people-pleasing pansy who kowtows to the masses and concerns himself with the opinions of the secular culture. Such a man has not yet reached maturity. He is not ready to be a husband or a father. In fact, Paul says he is not even a servant of Christ (Galatians 1:10; see also 1 Corinthians 4:1-4). And when faced with the choice between protecting his own reputation or standing up for truth and honor and goodness, he will almost certainly protect himself and lose your respect very quickly. It is absolutely critical to find a man who is willing to make enemies over matters of conviction and truth, and to leave behind the people-pleasers who need the approval of men (and women).

One of my favorite portrayals from classical literature of a man who is not afraid to make enemies is Cyrano de Bergerac. In the 1897 play by Edmond Rostand, Cyrano is an outstanding duelist, a gifted poet, and a nobleman serving as a soldier in the French army. His character is brash and strong-willed, and he is not afraid to make enemies in his quest for excellence. He speaks, writes, and fights with conviction, refusing to be influenced by the culture around him, even at the expense of fame and fortune.

At one point in the story, Cyrano is offered the opportunity to have one of his plays performed on stage if only he will allow Cardinal Richelieu to change some of it. In perhaps his most famous speech, Cyrano refuses, declaring to his friend,

> "And what would you have me do?
> Seek for the patronage of some great man,
> And like a creeping vine on a tall tree
> Crawl upward, where I cannot stand alone?
> No thank you! Dedicate, as others do,
> Poems to pawnbrokers? Be a buffoon
> In the vile hope of teasing out a smile
> On some cold face? No thank you!"

Instead, Cyrano will remain free…

> To sing, to laugh, to dream,
> To walk in my own way and be alone,
> Free, with an eye to see things as they are,
> A voice that means manhood- to cock my hat
> Where I choose- At a word, a Yes, a No,
> To fight- or write. To travel any road
> Under the sun, under the stars, nor doubt
> If fame or fortune lie beyond the bourne-
> ever to make a line I have not heard
> In my own heart; yet, with all modesty
> To say: "My soul, be satisfied with flowers,
> With fruit, with weeds even; but gather them
> In the one garden you may call your own."

Cyrano knows that by refusing to compromise in order to please the crowds—to make friends everywhere "as a dog makes friends"—he may never be applauded or even accepted by men, but he will maintain his integrity, even if he must go it alone.

In contrast to Cyrano, King Saul of Israel was a man who longed for the approval and praise of others. Ultimately, Saul was removed from leadership when he failed to follow God's instructions to destroy all of the Amalekites and their livestock because he was more afraid of making human enemies than he was of disobeying God. The Lord had ordered Saul, "Now go and strike Amalek and utterly destroy all that he has, and do not spare him; but put to death both man and woman, child and infant, ox and sheep, camel and donkey." (1 Samuel 15:3) But Saul spared Agag, the king of the Amalekites, as well as the best of the sheep, oxen, lambs, and other livestock.

When confronted by Samuel, Saul at first insisted that he had fully obeyed the Lord. But Samuel heard the bleating of the sheep. Saul then tried giving excuses for his actions, but eventually he was forced to acknowledge his disobedience, saying: "I have sinned; I have indeed transgressed the command of the Lord and your words, *because I feared the people and listened to their voice.*" (1 Samuel 15:24).

Saul was the most powerful and influential man in all of Israel. He had a tremendous opportunity to lead the people closer to God, but he threw it all away because he "feared the people and listened to their voice" rather than accepting disapproval from others.

In the book of Galatians 1, the apostle Paul rebukes those who have perverted the gospel by accepting a distortion of the truth. He says, "But even if we or an angel from heaven should preach to you a gospel contrary to the one we preached to you, let him be accursed." And then he adds, "For am I now seeking the approval of man, or of God? Or am I trying to please man*? If I were still trying to please man, I would not be a servant of Christ.*"

In 1 Corinthians 4, Paul again contrasts being a trustworthy steward with being a people-pleaser when he writes, "This is how one should regard us, as servants of Christ and stewards of the mysteries of God. Moreover, it is required of stewards that they be found faithful. But with me it is a very small thing that I should be judged by you or by any human court. In fact, I do not even judge myself. For I am not aware of anything against myself, but I am not thereby acquitted. It is the Lord who judges me."

In other words, Paul didn't care what others thought of him; in fact, he didn't even care what he thought of himself. He only cared what the Lord thought of him, and so must any man who is worthy of the love and submission of a Christian woman.

# 10 Behaviors for Christian Women to Avoid in a Potential Spouse: part 4 of 10

*Note: The following post was written by my friend Laura. On this blog, I have often offered men suggestions about what to ask prospective mates. Laura's article looks at the problem from the other side, offering women suggestions about what to look out for in a husband candidate. I'll be posting one per day for the next 10 days.*

---

Apart from the decision to follow Christ, marriage is the biggest decision you will ever make. It is a lifelong commitment that will impact every area of your life for as long as you both shall live. As Jesus' disciples realized and the apostle Paul taught explicitly, for many people it is better not to marry at all (1 Corinthians 7). But for those who do marry, it must not be entered into lightly. Here are ten behaviors to avoid in men when considering committing for life.

**4. Isn't teachable or open to constructive criticism.** Have you ever met a man who earnestly contends to mature in Christ, who seeks out constructive criticism from mentors and friends, and who strives to become better as a result? I have, and it is truly inspiring. Such a man is humble before God and men, and despite any weaknesses he may have, he continues to learn and grow and become a wiser and better man all the days of his life. Authentic Christians with demonstrated character and ability will have influence in his life, and his wife need not worry that he is unwilling or unable to change in the ways that really matter.

Teachable men listen to the criticisms of others, but they don't let criticism destroy them. They evaluate the critiques of others, discard the useless ones, embrace the valuable ones, and with an attitude of thankfulness rather than woundedness or despair, they implement valuable changes to become better men.

In contrast, lesser men are broken by a single criticism, they avoid all but the highest praises, and they wither at the suggestion of room for improvement. Run from these men. They are too fragile to lead a home, and they are too insecure and consumed with flattery to take the time to do the hard work of learning ways to grow and change for the sake of their own good and yours.

If you aren't sure what kind of man you are with, start by asking him about his role models and mentors, and what he has learned from them. Ask in what ways they have challenged him to become a better man, and find out how he has implemented their recommendations and imitated their example. Additionally, offer him your own feedback on his character or behavior and pay attention to how he responds. If he hasn't demonstrated a consistent willingness to learn and grow, this is not the man you want to marry.

Apart from the decision to follow Christ, marriage is the biggest decision you will ever make. It is a lifelong commitment that will impact every area of your life for as long as you both shall live. As Jesus' disciples realized and the apostle Paul taught explicitly, for many people it is better not to marry at all (1 Corinthians 7). But for those who do marry, it must not be entered into lightly. Here are ten behaviors to avoid in men when considering committing for life.

**5. Unwillingness to engage in healthy disagreements.** Disagreements and misunderstandings are inevitable in any authentic, deep relationship. When the response to these situations is respectful, open dialogue that seeks to understand the other person, the result is almost always greater mutual understanding and greater intimacy. Gracious, rational, and frequent communication is key to both preventing and overcoming a myriad of relational problems, and without it the relationship (and the individuals in it) will suffer.

If you have never had a disagreement with your boyfriend, then you don't know him well enough to marry him. Before you commit to a lifetime with this man, find something that is important to both of you to disagree about and make your case. If he refuses to engage, changes the subject, lashes out at you, becomes angry and defensive, speaks condescendingly or contemptuously toward you, or otherwise responds in a way that does not lead to greater understanding and intimacy, this is likely not someone you will want to walk alongside through the most difficult challenges of life.

Apart from the decision to follow Christ, marriage is the biggest decision you will ever make. It is a lifelong commitment that will impact every area of your life for as long as you both shall live. As Jesus' disciples realized and the apostle Paul taught explicitly, for many people it is better not to marry at all (1 Corinthians 7). But for those who do marry, it must not be entered into lightly. Here are ten behaviors to avoid in men when considering committing for life.

**6. Lacks kindness, gentleness, and self-control, especially in his treatment of women.** Men are designed to lead and protect women. Husbands are given authority over their wives for this purpose, and practically speaking, they are generally bigger, stronger, and less vulnerable to harm. Women, in contrast, tend to be more delicate, sensitive, and relational. Accordingly, in 1 Peter 3:7, men are commanded to "live with your wives in an understanding way, showing honor to the woman as the weaker vessel, since they are heirs with you of the grace of life, so that your prayers may not be hindered."

In other words, men are to be gentle with their wives. They are to be steady, stable, and able to control their emotions in a variety of challenging situations. If a man is prone to surrendering to his emotions, either through angry outbursts, condescending or contemptuous manners of speaking, use of intimidation rather than reason, or other emotional behavior disproportionate to the triggering event, this is not a man you will be able to count on when the going gets tough. Anger and harshness in particular can be scary to women and detrimental to relationships, but the Bible calls men to be gentle, considerate, understanding, and to show honor to women. Even if you think you can handle a man's harshness, consider this: God does not accept it. According to 1 Peter 3:7, such behavior is enough to hinder a man's prayers, and that is something you do not want in a husband.

If you've never seen your boyfriend in challenging, stressful situations that require him to work with you (and others) to resolve problems, then you don't know him well enough to marry him. And if he responds to such situations with anger, harshness, blaming, quitting, or other childish behaviors, trust me: you do not want to marry him.

Apart from the decision to follow Christ, marriage is the biggest decision you will ever make. It is a lifelong commitment that will impact every area of your life for as long as you both shall live. As Jesus' disciples realized and the apostle Paul taught explicitly, for many people it is better not to marry at all (1 Corinthians 7). But for those who do marry, it must not be entered into lightly. Here are ten behaviors to avoid in men when considering committing for life.

**7. Unwillingness or inability to share feelings.** Let me begin this point by saying that I love manly men, and I absolutely despise any attempts by women to emasculate men and demonize masculinity. I am not advocating for men to turn into whiny, emotional children who prioritize feelings over facts when making decisions or forming their convictions. However, it is magnificently masculine for a man to be able to share how he feels with the trustworthy people in his life, and especially with his wife.

Before the Fall, in all his sinless glory, having been created in the image of God, Adam saw Eve and celebrated in a spontaneous burst of praise, "This at last is bone of my bones and flesh of my flesh; she shall be called Woman, because she was taken out of Man." (Genesis 2:23) Later, King David expressed his feelings about his enemies, his sin, his fears, his Lord, his longings, and more as he wrote his psalms, which God saw fit to include in his special revelation to humanity. And Jesus had no problem expressing his feelings, including righteous anger, compassion, sorrow, and even anguish. Even God the Father reveals a variety of His own emotions throughout the Bible.

In expressing himself to his (future) wife, it isn't enough for a man to say, "I love you", or "You're great", or other such ambiguous and effortless phrases. He must be able to articulate what he loves about her, what she does that is great, how she makes him feel, and why she makes him feel that way.

Additionally, expressing his feelings about his wife, while probably most important, isn't sufficient either. He needs to be able to say, for example, "I'm sad because I was humiliated at work today" or "It grieves me that 60 million unborn babies have been killed by their own mothers since 1973" or "I'm angry that people who have never read an economics book just voted for liberal policies that disincentivize hard work, ingenuity, marriage, fidelity, and prosperity, which have raised billions of people out of poverty over the past 100 years."

A man who articulates his feelings on a variety of matters is able to enlist the support and encouragement of his wife (and friends), but a man who cannot or will not express himself will not be able to maintain intimacy in his marriage over the course of a lifetime.

Fortunately, this is a skill which can be learned, but it must be learned *before* marriage. It is hard work, and involves a complete shift in priorities. Marriage-minded men must turn away from watching Netflix, spending excessive amounts of time playing games, and soaking in the messages of today's culture. Instead, they must surround themselves with examples of masculine expressiveness and romance in response to the great actions of good women, whether through classical literature, Christian books on marriage, classical movies, or time spent with personal role models.

# 10 Behaviors for Christian Women to Avoid in a Potential Spouse: part 8 of 10

---

Apart from the decision to follow Christ, marriage is the biggest decision you will ever make. It is a lifelong commitment that will impact every area of your life for as long as you both shall live. As Jesus' disciples realized and the apostle Paul taught explicitly, for many people it is better not to marry at all (1 Corinthians 7). But for those who do marry, it must not be entered into lightly. Here are ten behaviors to avoid in men when considering committing for life.

**8. Poor handling of finances.** A critical part of a man's responsibility is to provide for his family financially. If he doesn't have a useful, income-earning skill, he is not ready for marriage and children. But a man must not only earn money; he must steward it wisely. This requires wisdom to know what is important to God and what is not important. It requires knowing that everything belongs to God and has simply been entrusted to him for a time.

If he spends money frivolously or irresponsibly, he will not be able to use that money for important things like equipping his wife for effective ministry, preparing his children to be effective Christians by making sure they have a good education and great books to read, and equipping those he is mentoring to go out and make disciples. On the other hand, if he is stingy and cares more about his bank account than about equipping those around him for effective ministry, the same problems will abound. In either case, he will not have much to show for the resources with which he's been entrusted, and he may even pressure his wife to sacrifice ministry, put the kids in daycare, and let others raise them in order to have a second income.

Before you get married, ask your man who and what he gives money to and why. Ask him how he plans to equip you to carry out your ministry, including raising the children. Ask him what he believes is worth spending money on and what isn't. And observe the decisions he makes. If he prioritizes luxury items over ministry, or if he plans to deprive his family of all they need to thrive in life and ministry for the sake of putting his security in a huge savings account, he is probably not going to be someone you want to entrust as the head of your home.

# 10 Behaviors for Christian Women to Avoid in a Potential Spouse: part 9 of 10

**Wintery Knight** · 25 December 2020 · Archived copy · Original

*Note: The following post was written by my friend Laura. On this blog, I have often offered men suggestions about what to ask prospective mates. Laura's article looks at the problem from the other side, offering women suggestions about what to look out for in a husband candidate. I'll be posting one per day for the next 10 days.*

Apart from the decision to follow Christ, marriage is the biggest decision you will ever make. It is a lifelong commitment that will impact every area of your life for as long as you both shall live. As Jesus' disciples realized and the apostle Paul taught explicitly, for many people it is better not to marry at all (1 Corinthians 7). But for those who do marry, it must not be entered into lightly. Here are ten behaviors to avoid in men when considering committing for life.

**9. Lacks serious concern for others.** If a man hasn't shown genuine love and concern for others—being willing to help them solve their problems, recover from their wounds, and overcome their hardships—he isn't going to show genuine love and concern for you once the honeymoon period is over. A man who loves others well listens to their story, empathizes with their struggles, identifies their needs, and takes action to help them in practical ways. He is not indifferent to the plight of others, but he takes seriously the tasks of helping others through mentoring, encouragement, provision, and protection.

It is not possible to live the Christian life without taking seriously the commands to love one another. In John 13:34-35 Jesus says, "A new commandment I give to you, that you love one another; just as I have loved you, you also are to love one another. By this all people will know that you are my disciples, if you have love for one another."

People will be able to identify us as Jesus' disciples by our love for fellow Christians! Jesus doesn't say they will know us *primarily* by our love for the atheist, the poor, the feminist, the homosexual, or the Muslim. Although we are to show love to all people, many non-Christians care about those groups too. What distinguishes us as God's children is our love for *one another*.

If your man is too busy with other things to love fellow Christians well by taking action to alleviate their suffering, making sure their needs are met and ensuring they know their value and worth as members of the family of God,

then you do not want to marry him!

Ask him who he mentors. Ask him what actions he has taken to help other Christians. Ask him about his relationships with other Christians, and get to know those people too. Ask his friends what makes him a great friend, and ask even his enemies and ex-girlfriends to tell you what kind of a man he is. Do whatever it takes to get to know the best and worst about him, and remember that one day, when the lovey-dovey, he's-so-hot period of your relationship has passed, his character will be what remains. If he was willing to sacrifice his own ease and comfort to love other Christians without personal gain before you married him, he will likely be willing to do the same for you for the long haul.

# 10 Behaviors for Christian Women to Avoid in a Potential Spouse: part 10 of 10

---

Apart from the decision to follow Christ, marriage is the biggest decision you will ever make. It is a lifelong commitment that will impact every area of your life for as long as you both shall live. As Jesus' disciples realized and the apostle Paul taught explicitly, for many people it is better not to marry at all (1 Corinthians 7). But for those who do marry, it must not be entered into lightly. Here are ten behaviors to avoid in men when considering committing for life.

**10. Unwillingness or inability to lay out a plan for your life and ministry together.** A man ought to be able to communicate what he needs and desires from his wife, how he sees her fitting into his plans for life and ministry, and how he intends to equip her to achieve the important work that is before her. He must present a vision for her spiritual, emotional, relational, and physical well-being, and he must be willing and able to provide the necessary resources to make this vision a reality.

If a man hasn't thought about how his wife fits into his life and plans, he isn't ready for marriage. And if he has expectations of her, he must not only identify those expectations and communicate them, but he must also provide everything she needs in order to thrive in her role. Of course, there is freedom to tailor the plans to the women's strengths and passions, but it is not enough for a man to ask a woman to join him for a lifetime without communicating his plans to make her effective as well.

Without these conversations, a woman may find that she is dragged along into whatever next adventure excites her husband, without thought or care for what she needs or how she can contribute effectively. A prepared and thoughtful husband will not allow this to happen. He will commit to prioritizing her ministry with his time, money, and decisions rather than leaving her to create (and potentially recreate) her own life and ministry without any help from him.

**Conclusion**

Marriage is hard, and the only way to do it is to commit for life! The stupidest thing a person can do, apart from rejecting Christ, is to marry a bad spouse.

How do you know if your man will make a bad spouse? Avoid the behaviors above, and wait for a man who reads great books often; demonstrates a biblical view of spiritual leadership; is willing to make enemies rather than compromise his convictions; responds humbly to constructive criticism; engages in healthy and productive disagreements; treats people with kindness, gentleness, and self-control; shares his feelings about matters of significance; stewards his finances well, without stinginess or frivolity; demonstrates genuine love and concern for other Christians; and communicates his long-term plan for life and ministry together with his wife. If you can't find a man like this, I implore you, do not settle for a lesser man. A lifetime of regret is not worth it.

# Physicist Michael Strauss discusses Christianity and science at Stanford University

**Wintery Knight** · 27 December 2020 · Archived copy · Original

Christianity and the progress of science
This is one of my favorite lectures.

**The lecture:**

Dr. Strauss delivered this lecture at Stanford University in 1999. It is fairly easy to understand, and it even includes useful dating tips.

Here is a clip:

The full video can be watched on Vimeo:

**Summary:**

What does science tell us about God?
– the discoveries of Copernicus made humans less significant in the universe
– the discoveries of Darwin should that humans are an accident
– but this all pre-modern science
– what do the latest findings of science say about God?

Evidence #1: the origin of the universe
– the steady state model supports atheism, but was disproved by the latest discoveries
– the oscillating model supports atheism, but was disproved by the latest discoveries
– the big bang model supports theism, and it is supported by multiple recent discoveries
– the quantum gravity model supports atheism, but it pure theory and has never been tested or confirmed by experiment and observation

Evidence #2: the fine-tuning of physical constants for life
– there are over 100 examples of constants that must be selected within a narrow range in order for the universe to support the minimal requirements for life
– example: mass density
– example: strong nuclear force (what he studies)

– example: carbon formation

Evidence #3: the fine-tuning of our planet for habitability
– the type of galaxy and our location in it
– our solar system and our star
– our planet
– our moon

It's a good lecture explaining a couple of basic arguments for a cosmic Creator and Designer. If you add the origin of life and the Cambrian explosion (Stephen C. Meyer's arguments), then you will be solid on the basic scientific arguments for a Creator and Designer of the universe.

**Positive arguments for Christian theism**

- The kalam cosmological argument and the Big Bang theory
- The fine-tuning argument from cosmological constants and quantities
- The origin of life, part 1 of 2: the building blocks of life
- The origin of life, part 2 of 2: biological information
- The sudden origin of phyla in the Cambrian explosion
- Galactic habitable zones and circumstellar habitable zones
- Irreducible complexity in molecular machines
- The creative limits of natural selection and random mutation
- Angus Menuge's ontological argument from reason
- Alvin Plantinga's epistemological argument from reason
- William Lane Craig's moral argument
- The unexpected applicability of mathematics to nature
- Six reasons why you should believe in non-physical minds
- William Lane Craig's case for the resurrection of Jesus

# Nearly 100,000 small businesses have permanently closed due to COVID-19 restrictions

**Wintery Knight** · 28 December 2020 · Archived copy · Original

An important part of our American prosperity is our support for the creation and success of small businesses. That's because when consumers have choices, they can find the best quality for the lowest price. If there was only one vendor for a product or service, then there would be no competition. Without competition, sellers have no incentive to increase quality and lower prices.

So, here's what's happened to small businesses during the current Democrat-supported shutdown of the economy.

> Human Events:

> As we near a year of lockdowns and sheltering in place, the long-term effects of pandemic policy on the economy are becoming clearer. Almost every piece of legislation ostensibly designed to curb the spread of the coronavirus and protect workers has wreaked devastation on small businesses—while benefiting the largest corporations. Roughly 100,000 small businesses have permanently closed due to COVID-19, while big-box retailers, tech giants, and pharmaceutical manufacturers have seen record profits.
>
> America's small businesses currently face an attack on all fronts. First, there are the more visible policies (e.g., lockdowns, mask mandates, and social distancing requirements) that strongly discourage people from patronizing brick-and-mortar retailers and restaurants. These policies impact small businesses more than large chains and corporations.
>
> […]According to the Small Business Administration, the cost of compliance disproportionately impacts small businesses, who lack the funds and infrastructure of large corporations to adapt to new regulation.
>
> […]Lastly, there are ever-evolving COVID-19 employment regulations that disproportionately expose small businesses to lawsuits and the subsequent legal expenses and damages that may result. The conspicuous absence of liability protection also disadvantages small businesses, as the largest corporations can spare the capital required to fight lawsuits and painlessly pay out any damages.
>
> […]Despite the fact that these policies are explicitly harmful to small businesses, they can be justified on the basis of "public health" and thereby shielded from criticism. Practically unlimited regulation (that always

> seems to benefit the corporate elite) can be defended, because such policies are said to be designed to ensure the health and safety of the public. Opposition to these onerous restrictions can therefore be conveniently characterized as “anti-science,” or worse, reckless and/or malicious endangerment of one’s community. As a consequence, policies that explicitly disadvantage small businesses, such as the Families First Coronavirus Response Act (FFCRA), can be passed under the guise of public health and worker protection without raising any alarm bells.

Naturally, the closings are happening most in states that are run by Democrats.

NY Post:

> Nearly one-third of small businesses in New York and New Jersey remain closed since January amid the coronavirus pandemic, according to a watchdog.
>
> In the Empire State, 27.8 percent of small businesses have not reopened their doors, while Jersey has lost 31.2 percent as of Nov. 16, according to TrackTheRecovery.org, a Harvard-run database that keeps tabs on the economic impact of the virus.
>
> The figures are in line with estimates from the New Jersey Business & Industry Association, which says 28 percent of the Garden State’s small businesses had shut up shop by the end of October, according to the Star Ledger newspaper.

Daily Caller:

> A new poll has revealed just how devastating the pandemic has been on minority-owned businesses – with 49% reporting that they are unable to cover their December rent.
>
> 35% of all small business owners could not make their rent in December, up 3% from November, according to the latest Alignable Rent Poll. However, 49% of minority-owned businesses reported they couldn’t cover the costs, up 5% from 44% in November.
>
> Axios reported in June that between February-April, 3.3 million business owners shut their doors. However, among the 3.3 million, 1.1 million were black small business owners.
>
> Women-owned businesses also struggled to pay December rent, with 38% noting they didn’t have the funds to cover December’s rent, a number 3% higher than Novembers’, according to the Alignable Rent Poll.
>
> The poll was based on answers from 9,204 small business owners polled between Nov. 11-Nov. 23.

Democrats like killing small businesses, because it’s easier for government to control a few large corporations than many small ones. And they love when people who were once earning their own success have to give up on liberty and become dependent on the government. After all, he who pays the piper calls the tune.

# How to respond to an atheist who complains about slavery in the Bible

**Wintery Knight** · 29 December 2020 · Archived copy · Original

Lets take a closer look at a puzzle

I often hear atheists going on and on about how the Bible has this evil and that evil. Their favorite one seems to be slavery. Here are three things I say to atheists when they push this objection.

**The Bible and slavery**

First, you should explain to them what the Bible actually says about slavery. And then tell them about the person responsible for stopping slavery in the UK: a devout evangelical named William Wilberforce.

Here's an article that works.

Excerpt:

> We should compare Hebrew debt-servanthood (many translations render this "slavery") more fairly to apprentice-like positions to pay off debts — much like the indentured servitude during America's founding when people worked for approximately 7 years to pay off the debt for their passage to the New World. Then they became free.
>
> In most cases, servanthood was more like a live-in*employee*, temporarily embedded within the employer's household. Even today, teams trade sports players to another team that has an owner, and these players belong to a franchise. This language hardly suggests slavery, but rather a formal contractual agreement to be fulfilled — like in the Old Testament.3

**Atheism and moral judgments**

Second, inform them that moral values are not rationally grounded on atheism. In an accidental universe, there is no way we ought to be. There is no design for humans that we have to comply with. There are no objective human rights, like the right to liberty (that would block slavery) or the right to life (that would block abortion). Although you may find that most atheists act nicely, the ones who really understand what atheism means and live it out consistently are not so nice.

Famous atheist Richard Dawkins has previously written this:

> The total amount of suffering per year in the natural world is beyond all decent contemplation. During the minute that it takes me to compose this sentence, thousands of animals are being eaten alive, many others are running for their lives, whimpering with fear, others are slowly being devoured from within by rasping parasites, thousands of all kinds are dying of starvation, thirst, and disease. It must be so. If there ever is a time of plenty, this very fact will automatically lead to an increase in the population until the natural state of starvation and misery is restored. In a universe of electrons and selfish genes, blind physical forces and genetic replication, some people are going to get hurt, other people are going to get lucky, and you won't find any rhyme or reason in it, nor any justice. **The universe that we observe has precisely the properties we should expect if there is, at bottom, no design, no purpose, no evil, no good, nothing but pitiless indifference.**
>
> ("God's Utility Function," *Scientific American*, November, 1995, p. 85)

When atheists like Dawkins talk about morality, you have to understand that they are pretending. To them, morality is just about personal preferences and cultural conventions. They just think that questions of right and wrong are *arbitrary*. Things that are wrong in one time and place are right in another. Every view is as right as any other, depending on the time and place. That's atheist morality.

**What's worse than slavery? Abortion!**

Third, you should ask the atheist what he has done to oppose abortion. Abortion is worse than slavery, so if they are sincere in thinking that slavery is wrong, then they ought to think that abortion is wrong even more. So ask them what they've done to oppose the practice of abortion. That will tell you how sincere they are about slavery.

Here's atheist Richard Dawkins explaining what he's done to stop abortion:

That's right. The head atheist supports killing born children.

# Is the definition of atheism “a lack of belief in God”?

**Wintery Knight** · 30 December 2020 · Archived copy · Original

I have a key that will unlock a puzzling mystery

First, let’s see check with the Stanford University Encyclopedia of Philosophy:

> ‘Atheism’ means the negation of theism, the denial of the existence of God.

Stanford University is one of the top 5 universities in the United States, so that’s a solid definition. To be an atheist is to be a person who makes the claim that, as a matter of FACT, there is no intelligent agent who created the universe. Atheists think that there is no God, and theists think that there is a God. Both claims are objective claims about the way the world is out there, and so both sides must furnish forth arguments and evidence as to how they are able to *know* what they are each claiming.

Philosopher William Lane Craig has some thoughts on atheism, atheists and lacking belief in God in this reply to a questioner.

Question:

> In my discussions with atheists, they  are using the term that they “lack belief in God”. They claim that this is different from not believing in God or from saying that God does not exist. I’m not sure how to respond to this. It seems to me that its a silly word-play and is logically the same as saying that you do not believe in God. What would be a good response to this?
> Thank you for your time,
>
> Steven

And here is Dr. Craig’s full response:

> Your atheist friends are right that there is an important logical difference between believing that there is no God and not believing that there is a God.  Compare my saying, “I believe that there is no gold on Mars” with my saying “I do not believe that there is gold on Mars.”  If I have no opinion on the matter, then I do not believe that there is gold on Mars, and I do not believe that there is no gold on Mars.  There’s a difference between saying, “I do not believe (p)” and “I believe (not-p).”  Logically where you place the negation makes a world of difference.

> But where your atheist friends err is in claiming that atheism involves only not believing that there is a God rather than believing that there is no God.
>
> There's a history behind this. Certain atheists in the mid-twentieth century were promoting the so-called "presumption of atheism." At face value, this would appear to be the claim that in the absence of evidence for the existence of God, we should presume that God does not exist. Atheism is a sort of default position, and the theist bears a special burden of proof with regard to his belief that God exists.
>
> So understood, such an alleged presumption is clearly mistaken. **For the assertion that "There is no God" is just as much a claim to knowledge as is the assertion that "There is a God." Therefore, the former assertion requires justification just as the latter does. It is the agnostic who makes no knowledge claim at all with respect to God's existence. He confesses that he doesn't know whether there is a God or whether there is no God.**
>
> But when you look more closely at how protagonists of the presumption of atheism used the term "atheist," you discover that they were defining the word in a non-standard way, synonymous with "non-theist." So understood the term would encompass agnostics and traditional atheists, along with those who think the question meaningless (verificationists). As Antony Flew confesses,
>
> the word 'atheist' has in the present context *to be construed in an unusual way*. Nowadays it is normally taken to mean someone who explicitly denies the existence . . . of God . . . But here it has to be understood not positively but negatively, with the originally Greek prefix 'a-' being read in this same way in 'atheist' as it customarily is in . . . words as 'amoral' . . . . In this interpretation an atheist becomes not someone who positively asserts the non-existence of God, but someone who is simply not a theist. (*A Companion to Philosophy of Religion,* ed. Philip Quinn and Charles Taliaferro [Oxford: Blackwell, 1997], s.v. "The Presumption of Atheism," by Antony Flew)
>
> **Such a re-definition of the word "atheist" trivializes the claim of the presumption of atheism, for on this definition, atheism ceases to be a view. It is merely a psychological state which is shared by people who hold various views or no view at all. On this re-definition, even babies, who hold no opinion at all on the matter, count as atheists! In fact, our cat Muff counts as an atheist on this definition, since she has (to my knowledge) no belief in God.**
>
> **One would still require justification in order to know either that God exists or that He does not exist, which is the question we're really interested in.**
>
> So why, you might wonder, would atheists be anxious to so trivialize their position? Here I agree with you that a deceptive game is being played by many atheists. If atheism is taken to be a view, namely the view that there is no God, then atheists must shoulder their share of the burden of proof to support this view. But many atheists admit freely that they cannot sustain such a burden of proof. So they try to shirk their epistemic responsibility by re-defining atheism so that it is no longer a view but just a psychological condition which as such makes no assertions. They are really closet agnostics who want to claim the mantle of atheism without shouldering its responsibilities.
>
> This is disingenuous and still leaves us asking, "So is there a God or not?"

So there you have it. We are interested in what both sides *know* and *what reasons and evidence they have to justify their claim to know*. We are interested in talking to people who make claims *about objective reality*, not about themselves, and who then go on to give reasons and evidence to support their claims *about objective reality*. There are atheists out there that do make an objective claim that God does not exist, and then support that claim with arguments and evidence. Those are good atheists, and we should engage in rational conversations with them. But clearly there are some atheists who are not like that. How should we deal with these "subjective atheists"?

**Dealing with subjective atheists**

How should theists respond to people who just want to talk about their psychological state? Well, my advice is to

avoid them. They are approaching religion irrationally and non-cognitively – like the person who enters a physics class and says "I lack a belief in the gravitational force!". When you engage in serious discussions with people about God's existence, you only care about what people know and what they can show to be true. We don't care about a person's psychology.

**Dealing with persistent subjective atheists**

What happens when you explain all of that to a subjective atheist who continues to insist that you listen to them repeat over and over "I lack a belief in God, I lack a belief in God"? What if you tell them to make the claim that God does not exist, and then support it with arguments and evidence, but instead they keep leaving comments on your blog telling you again and again about their subjective state of mind: "I lack a belief in cupcakes! I lack a belief in icebergs!" What if they keep e-mailing you and threatening to expose you on Twitter for refusing to listen to them, or denounce you via skywriting: "Wintery Knight won't listen to me! I lack a belief in crickets!". I think at this point you have to give up and stop talking to such a person.

And that's why I moderate and filter comments on this blog. There are uneducated people out there with access to the Internet who want attention, but I am not obligated to give it to them. And neither are you. We are not obligated to listen to abusive people who don't *know* what they are talking about. I do post comments from objective atheists who make *factual* claims about the objective world, and who support those claims with *arguments and evidence*. I am not obligated to post comments from people who refuse to make objective claims or who refuse to support objective claims with arguments and evidence. And I'm not obligated to engage in discussions with them, either.

# Is the Bible's definition of faith opposed to logic and evidence?

**Wintery Knight** · 31 December 2020 · Archived copy · Original

Theology that hits the spot

Probably the biggest misconception that I encounter when defending the faith is the mistaken notion of what faith is. Today we are going to get to the bottom of what the Bible says faith is, once and for all. This post will be useful to Christians and atheists, alike.

**What is faith according to the Bible?**

I am going to reference this article from apologist Greg Koukl of Stand to Reason in my explanation.

Koukl cites three Biblical examples to support the idea that faith is not blind leap-of-faith wishing, but is based on evidence.

1. Moses went out into the wilderness and he had that first encounter with the burning bush, and God gave him the directive to go back to Egypt and let his people go. Moses said, Yeah, right. What's going to happen when they say, why should we believe you, Moses?God said, See that staff? Throw it down.Moses threw it down and it turned into a serpent.God said, See that serpent? Pick it up.And he picked it up and it turned back into a staff.God said, Now you take that and do that before the Jewish people and you do that before Pharaoh. And you do this number with the hail, and the frogs, and turning the Nile River into blood. You put the sun out. You do a bunch of other tricks to get their attention.And then comes this phrase: "So that they might know that there is a God in Israel."
2. [I]n Mark 2 you see Jesus preaching in a house, and you know the story where they take the roof off and let the paralytic down through the roof. Jesus said, "Your sins are forgiven." And people get bugged because how can anyone forgive sins but God alone?Jesus understood what they were thinking and He said this: What's harder to say, your sins are forgiven, or to rise, take up your pallet and go home?Now, I'll tell you what would be harder for me to say : Arise, take up your pallet and go home. I can walk into any Bible study and say your sins are forgiven and nobody is going to know if I know what I am talking about or not. But if I lay hands on somebody in a wheelchair and I say, Take up your wheelchair and go home, and they sit there, I look pretty dumb because everyone knows nothing happened.But Jesus adds this. He says, "In order that you may know that the Son of Man has the power and authority to forgive sins, I say to you, arise, take up your pallet and go home." And he

got up and he got out. Notice the phrase "In order that you may know". Same message, right?

3. Move over to the Book of Acts. First sermon after Pentecost. Peter was up in front of this massive crowd. He was talking about the resurrection to which he was an eyewitness. He talked about fulfilled prophecy. He talked about the miraculous tongues and the miraculous manifestation of being able to speak in a language you don't know. Do you think this is physical evidence to those people? I think so. Pretty powerful.Peter tells them, These men are not drunk as it seems, but rather this is a fulfillment of prophecy. David spoke of this. Jesus got out of the grave, and we saw him, and we proclaim this to you.Do you know how he ends his sermon? It's really great. Acts 2:36. I've been a Christian 20 years and I didn't see this until about a year ago. This is for all of those who think that if you can know it for sure, you can't exercise faith in it. Here is what Peter said. Acts 2:36, "Therefore let all the house of Israel know for certain that God has made him both Lord and Christ, Messiah, this Jesus whom you crucified." There it is again. "Know for certain."

**What is faith according to Bible-based theologians?**

I am going to reference this article from theologian C. Michael Patton of Parchment and Pen in my explanation.

Patton explains that according to Reformation (conservative, Bible-based) theologians, faith has 3 parts:

1. **notitia –** This is the basic informational foundation of our faith. It is best expressed by the word content. Faith, according to the Reformers must have content. You cannot have faith in nothing. There must be some referential propositional truth to which the faith points. The proposition "Christ rose from the grave," for example, is a necessary information base that Christians must have.
2. **assensus –** This is the assent or confidence that we have that the *notitia* is correct… This involves evidence which leads to the conviction of the truthfulness of the proposition… This involves intellectual assent and persuasion based upon critical thought… *assensus*… says, "I am persuaded to believe that Christ rose from the grave."
3. **fiducia –** This is the "resting" in the information based upon a conviction of its truthfulness. *Fiducia* is best expressed by the English word "trust."… Fiducia is the personal subjective act of the will to take the final step. It is important to note that while *fiducia* goes beyond or transcends the intellect, it is built upon its foundation.

So, Biblical faith is really trust. Trust(3) can only occur *after* intellectual assent(2), based on evidence and thought. Intellectual assent(2) can only occur *after* the propositional information(1) is known.

The church today accepts 1 and 3, but denies 2. I call this "fideism" or "blind faith". Ironically, activist atheists, (the New Atheists), also believe that faith is blind. The postmodern "emergent church" denies 1 and 2. A person could accept 1 and 2 but deny 3 by not re-prioritizing their life based on what they know to be true.

**How do beliefs form, according to Christian philosophers?**

I am going to reference a portion of chapter 3 of J.P. Moreland's "Love Your God With All Your Mind" (i.e. – LYGWYM).

J.P. Moreland explains how beliefs form and how you can change them.

1. Today, people are inclined to think that the sincerity and fervency of one's beliefs are more important than the content… Nothing could be further from the truth… As far as reality is concerned, what matters is not whether I like a belief or how sincere I am in believing it but whether or not the belief is true. I am responsible for what I believe and, I might add, for what I refuse to believe because the content of what I do or do not believe makes a tremendous difference to what I become and how I act.
2. A belief's strength is the degree to which you are convinced the belief is true. As you gain ,evidence and support for a belief, its strength grows for you… The more certain you are of a belief… the more you rely on it as a basis for action.

But the most important point of the article is that *your beliefs are not under the control of your will.*

> …Scripture holds us responsible for our beliefs since it commands us to embrace certain beliefs and warns us of the consequences of accepting other beliefs. On the other hand, experience teaches us that we cannot choose or change our beliefs by direct effort.
>
> For example, if someone offered you $10,000 to believe right now that a pink elephant was sitting next to you, you could not really choose to believe this… If I want to change my beliefs about something, I can embark on a course of study in which I choose to think regularly about certain things, read certain pieces of evidence and argument, and try to find problems with evidence raised against the belief in question.
>
> …by choosing to undertake a course of study… I can put myself in a position to undergo a change in… my beliefs… And… my character and behavior… will be transformed by these belief changes.

I think definition of faith is important, because atheists seemed to want to substitute their own definition of faith as blind belief for this Biblical definition, but there is no evidence for their view that faith is belief without evidence. I think this might be another case of projection by atheists. Blind faith is how they arrive at their views, so they are trying to push it onto us. But the Bible is clearly opposed to it.

# Jay Richards: How to end poverty in 10 tough steps

**Wintery Knight** · 1 January 2021 · Archived copy · Original

Jay Richards: How to end poverty in 10 tough steps

Why are some nations more prosperous than others? Is it because the wealthier nations exploit the poorer ones, keeping them poor? Or are there certain policies, laws, and cultural beliefs that lead to prosperity? Dr. Jay Richards delivers a lecture for Impact 360, in which he identifies 10 different factors that lift nations out of poverty, and explains why they work.

Summary:

1. Establish and maintain the rule of law.
2. Focus the jurisdiction of government on maintaining the rule of law, and limit its jurisdiction over the economy and the institutions of civil society.
3. Implement a formal property system with consistent and accessible means for securing a clear title to property one owns.
4. Encourage economic freedom: Allow people to trade goods and services unencumbered by tariffs, subsidies, price controls, undue regulation, and restrictive immigration policies.
5. Encourage stable families and other important private institutions that mediate between the individual and the state.
6. Encourage belief in the truth that the universe is purposeful and makes sense.
7. Encourage the right cultural mores—orientation to the future and the belief that progress but not utopia is possible in this life; willingness to save and delay gratification; willingness to risk, to respect the rights and property of others, to be diligent, to be thrifty.
8. Instill a proper understanding of the nature of wealth and poverty—that wealth is created, that free trade is win-win, that risk is essential to enterprise, that trade-offs are unavoidable, that the success of others need not come at your expense, and that you can pursue legitimate self-interest and the common good at the same time.
9. Focus on your comparative advantage rather than protecting what used to be your competitive advantage.
10. Work hard.

Solving economic problems is just like solving any other problem. First, we read to learn what has been proven to work. Then, we do what works. I want to encourage Christians to move beyond good intentions to good results when voting for economic policies. Often, people on the left want to “fix” inequalities by doing what feels good to them, or what sounds good to them. Economics is about choosing policies that we know have worked in other times and places.

Let's talk more about #4 from Richards' list.

**Economic freedom linked to prosperity**

Consider the book "The Poverty of Nations: A Sustainable Solution" by famous conservative theologian Wayne Grudem.

You can even read an article about it from the left-wing Christian Post here:

> In a presentation of his new book at the Family Research Council, biblical theologian Wayne Grudem argued that poor countries can become rich only by producing their own prosperity, and that the free market is not only the economic answer, but in tune with the Bible's moral teachings.
>
> "Every nation that has escaped poverty has done so by producing its own prosperity," said Grudem, professor of theology and biblical studies at Phoenix Seminary in Arizona. Perhaps best known for his book Systematic Theology: An Introduction to Biblical Doctrine, Grudem presented the key themes in his new book The Poverty of Nations: A Sustainable Solution. The very first of his 79 factors to help nations escape poverty in "a free market economy."
>
> […]Grudem argued that the wealth of a country is determined by its per-capita income – the average amount of money each citizen makes. The only way to increase this is to increase the production of goods and services, creating more wealth for everyone, he said.
>
> […]The professor pointed to 79 factors to help a country produce more goods and services, in three different key areas: the economic system, government, and cultural beliefs and values.
>
> For the economic system, Grudem mentioned the Index of Economic Freedom, a report put out by the Heritage Foundation to judge each country's openness to trade and wealth creation.

You can find the Heritage Foundation Index of Economic Freedom right here. Take a look at the countries at the top… these countries also have a very high per capita income. Their citizens are earning a lot of money by selling what they produce to willing customers. The ones at the bottom are run by socialist governments. You wouldn't want to try to make a living in Venezuela or Cuba or North Korea. But these are the places that American socialists admire and support. Does that tell you something about what they would do to you, if they got hold of the reins of government?

The Fraser Institute in Canada did a similar ranking of economic freedom (economic freedom = low taxes, low regulation, free trade), and they concluded:

> Countries in the top quartile (25 per cent) of economic freedom (such as the U.K., Japan and Ireland) had an average per-capita income of US$40,376 in 2016 compared to US$5,649 for the bottom quartile countries (such as Venezuela, Iran and Zimbabwe). And life expectancy is 79.5 years in the top quartile of countries compared to 64.4 years in the bottom quartile.

Economic freedom works best.

# Should we expect to know what God's reason is for allowing evil and suffering?

**Wintery Knight** · 2 January 2021 · Archived copy · Original

Lets take a closer look at a puzzle

Here is an article by Steven Cowan about the problems of evil and suffering.

Intro:

> The problem of evil is no doubt the most serious challenge to belief in God. Even religious believers find it troubling that evil exists in the world—and so much evil! It is puzzling, to say the least, that an all-powerful, absolutely good being would allow evil to exist in his creation. And yet it does. Evil and suffering exist and they are often overwhelming in their magnitude.

Now let's find out what a noseeum is, and how it relates to the existence of evil and suffering:

> However, perhaps God's existence is incompatible with a certain kind of evil that exists. For example, the atheist William Rowe has argued that God's existence is inconsistent with pointless or gratuitous evil. By "pointless evil," Rowe means evil that does not and cannot serve a greater good. And Rowe believes that there is such pointless evil in the world. He thus concludes that God does not exist. Rowe's argument may be simply stated as follows:
>
> 1. If God exists, there would be no pointless evil.
> 2. There is pointless evil.
> 3. Therefore, God does not exist.
>
> […]But, is there pointless evil in the world? Rowe thinks there is. To show that there is pointless evil, Rowe introduces what he calls the "noseeum inference." Like the pesty little bugs that some readers may be familiar with, a "noseeum" is something that you cannot see—it is a "no-see-um." And a noseeum inference is a conclusion drawn on the basis of what one does not see. The basic structure of all noseeum inferences looks like this:
>
> 1. I cannot see an x.

> 2. Therefore, there probably is no x.
>
> We all make noseeum inferences everyday of our lives. Every time I go to cross a street, I look both ways and I step out into the street only after I "no-see-um" a car coming.
>
> […]Rowe applies this kind of noseeum reasoning to God and evil. Rowe suggests that if we cannot see a reason for a particular instance of evil, then there is probably not a reason. Suppose we hear about a very young child who is tortured to death to amuse some psychotic person. We think about this event and we examine all the circumstances surrounding it. No matter how hard we try, we cannot see any good reason why this child had to suffer the way she did. Since we cannot see a reason why God would allow this child to suffer, there probably is not a good reason—the child's suffering was pointless. Of course, Rowe would be quick to point out that he is not speaking merely hypothetically. There are cases like this in the news every day—real-life cases in which we shake our heads in frustration, wondering why God would allow such a thing.
>
> Is Rowe correct in his conclusion? Do such examples prove that there is pointless evil in the world? I don't think so. To see why, we must recognize that noseeum inferences are not all created equal. Some noseeum inferences, as we have seen, are reasonable and appropriate. But, many are not. Suppose I look up at the night sky at the star Deneb and I do not see a planet orbiting that star. Would it be reasonable for me to conclude that there is no planet orbiting Deneb? Of course not. Suppose that using the best telescopes and other imaging equipment presently available, I still cannot see a planet around Deneb. I would still be unjustified in concluding that there was no such planet.

In that example, the planet is the noseeum. Just because you look really hard, you can't be confident that the planet is not there. And similarly with the problem of evil and suffering, looking really hard and finding no reason does not mean that there is no reason. It just means that you are not in a good position to see the reason. You don't know enough to to be sure that there is no reason, because of your limitations as a human being.

To *know* that any given instance of evil or suffering is *gratuitous/pointless* requires a high level of knowledge. How much knowledge? Well, consider this paper by the late William Alston of Syracuse University, who lists six problems with the idea that humans can *know* that any particular instance of evil and suffering is gratuitous. (You can get the PDF here)

According to the paper, human beings just do not have the capability to know for certain that God has NO morally sufficient reason for allowing any particular instance of evil and/or suffering. God's morally sufficient reason is a noseeum. To know for sure that there is no reason, we would need to have more knowledge than we do.

Also, remember that on the Christian view, the good aim that God has is NOT to make humans have happy feelings in this life, regardless of their knowledge, wisdom and character. That's what atheists think, though. They think that God, if he exists, is obligated to make them feel happy all the time. They don't think that God's goal is being actively involved in forming their knowledge, wisdom and character. God has a purpose – to work in the world so that everyone who can freely respond to him will respond to him. The Bible says that allowing pain and suffering is one of the ways that he gets that group of people who are willing to respond to respond to him – FREELY. To be able to claim that evil is gratuitous, the atheist has to show that God can achieve his goal of saving all the people he wants to save *while permitting less suffering in the world.* And that is a very difficult thing for an atheist to show, given our human cognitive limitations.

# William Lane Craig debates Daniel Came: Does God exist?

**Wintery Knight** · 3 January 2021 · Archived copy · Original

Dr. Craig's opening speech summary slide

The video of the debate was posted by ReasonableFaith.org – Dr. Craig's organization. This debate occurred in March 2017 at the University of Dublin, in Ireland.

The video: (91 minutes)

My non-snarky summary is below.

**Dr. Craig's opening speech**

Two claims:

1. There are good reasons to think that theism is true.
2. There are not comparably good reasons to think that atheism is true.

Five reasons for God's existence:

1. The beginning of the universe
– actual infinite past is mathematically impossible
– BGV theorem: any universe that is on balance expanding in its history (like ours) cannot be past eternal

2. Fine-tuning of cosmic quantities and constants
– slight changes to quantities and constants prevent a universe from supporting complex embodied life
– the multiverse response of atheists conflicts with observations, e.g. the Boltzmann Brains problem

3. Objective moral values
– God's existence is required to ground objective moral values and duties

4. Minimal facts case for the resurrection of Jesus
– there are good reasons to accept the most widely accepted facts about the historical Jesus (empty tomb, appearances, early widespread belief in the resurrection)
– the best explanation of these minimal facts is that God raised Jesus from the dead

5. Experience God directly
– in the absence of any defeaters to belief in God, a person can experience God directly

**Dr. Daniel Came's opening speech**

1. The hiddenness of God
– if God wants a personal relationship with us, and a relationship with God would be the greatest good for us
– God ought to reveal himself to us, but he does not reveal himself to many people, the "non-resistant non-believers"

2. The inductive problem of evil
– many evil events occur that are pointless – there is no morally sufficient reason why God would allow them to occur
– examples: animal suffering, children born with disease, tsunamis
– the theistic response to this is that humans are not in a position to know whether there are morally sufficient reasons, due to our limitations of knowing the consequences
– but this ripple effect defense has 4 possible outcomes, 3 of which don't do the job of justifying

**Dr. Craig's first rebuttal**

1. The hiddenness of God
– God's goal is not to make his existence known, but to draw them into a love relationship
– it's speculative that overt displays of God's existence would draw people to him in a love relationship, they might resent his bullying
– atheist would have to prove that God could draw more people into a love relationship with him by revealing himself more overtly

2. The inductive problem of evil
– as humans, we are not in a position to know for certain that any apparently pointless evil really is pointless
– William Alston article: 6 limitations of human knowing make it impossible to judge that an evil is actually "pointless"
– Dr. Came says that there are 4 possibilities for the ripple effects, and since 3 are bad, it's likely that there are not morally sufficient reasons for a apparently pointless evil
– it is logically fallacious to assert probability conclusions without knowing the probabilities of those 4 options
– there is actually an argument from evil: since the problem of evil requires an objective standard of good and evil by which to measure, and God is the only possible ground of objective morality, then pressing the problem of evil actually requires the atheist to assume God, in order to ground this objective moral standard

**Dr. Came's first rebuttal**

3. Objective moral values
– there are naturalistic theories of moral realism where objective moral duties and objective moral values exist in a naturalistic universe
– I'm not saying that any of them are correct, but there are many theories about object morality in a naturalistic universe

There are naturalistic theories for all of the 5 arguments that Dr. Craig presented. It is Dr. Craig's responsibility to present those naturalistic theories and prove that they are not as good as his explanations. I'm not going to defend (or even name!) a single naturalistic theory for any of these 5 arguments by Dr. Craig.

Dr. Craig's explanations for the 5 evidences he gave can't be admitted, because we have to know how God did something *in naturalistic terms* before we can know that God did it supernaturally. Explanations are only valid if they are naturalistic.

1. The beginning of the universe
– naturalism explains how the universe expands after it came into being, so that explains how it came into being
– the God explanation, that God created the universe out of nothing, is not admissible, because it is not naturalistic
– how does God, as an unembodied mind interact with the physical world?
– the only agency that we know about is human agents, and we have bodies, so how could God perform actions

without having a body?

The theistic hypothesis does not make any predictions, but naturalism makes lots of testable predictions. God could do anything, so he is not constrained and is therefore untestable. We can't infer God as an explanation in principle because we can't predict what is more probable if God exists than if he does not.

2. Fine-tuning of cosmic quantities and constants
– the university was not set up to make embodied intelligence plausible, because the vast majority of the universe is hostile to life
– there are models of the multiverse that escape the Boltzmann Brains problem that Dr. Craig raised

**Dr. Craig's second rebuttal**

Some of Dr. Craig's arguments are deductive (e.g. – the beginning of the universe, objective moral values), so that the conclusion follows from the premises if the premises are true. The resurrection passes the standard tests for historical explanations.

1. The beginning of the universe
– the whole point of the argument is that there is no naturalistic explanation for an ultimate beginning of the universe

2. Fine-tuning of cosmic quantities and constants
– the whole point of the argument is that there is no naturalistic explanation for a design of the universe to support life
– he has to prove that intelligences has to be attached to bodies
– human beings are non-physical minds united to physical bodies
– naturalistic attempts to explain mental operations fail
– the arguments *prove* that unembodied minds exist
– the vast expanse of the universe is required in order to form the galaxies, stars and heavy elements needed for complex life
– why expect that the entire universe should be small, or that life would be everywhere?
– a non-fine-tuned world is more likely in the multiverse, and in a multiverse, we are more likely to have a Boltzmann brain world than a world with complex, embodied life
– Dr. Came has not advanced any naturalistic explanation for the fine-tuning

3. Objective moral values
– non-theistic ethical theories cannot account for the ontological foundations of objective moral values and duties
– atheistic theories of moral realism simply assume objective moral values out of thin air
– it is especially hard to find any basis for objective moral duties in the absence of God

**Dr. Came's second rebuttal**

5. Religious experience
– Dr. Craig should not bring up religious experience in a debate where arguments and evidence are central
– people who have dreams, hallucinations and psychotic delusions could appeal to religious experience
– religious experience is by no means universal, and it is possible to doubt it

3. Objective moral values
– there are lots of atheists who hold to objective moral values
– Dr. Craig has to explain how God grounds objective moral values and duties
– Dr. Craig has to explain why atheist moral realist theories don't work to ground objective moral values and duties

1. The beginning of the universe
– Dr. Craig claims that something can't come from nothing, that's not an argument
– there are numerous models that don't require an absolute beginning of the universe

– Dr. Craig cites the BGV theorem, but Guth (one of the authors) says that only the inflation has a beginning, not the whole universe

**Dr. Craig's conclusion**

1. The beginning of the universe
– on theism, there is an efficient cause, but no material cause, for the origin of the universe
– on atheism, there is neither an efficient cause nor a material cause, for the origin of the universe: that's worse!
– if he thinks that there are models of the universe that don't require a beginning, then let him name a viable eternal model of the universe
– he never refuted the mathematical argues against an infinite past

2. Fine-tuning of cosmic quantities and constants
– nothing to refute

3. Objective moral values
– God is a better ground for morality than humans, because he is ultimate, and not contingent and arbitrary
– God is a being who is worthy of worship, and therefore command his creatures with moral duties

4. Minimal facts case for the resurrection of Jesus
– nothing to refute

5. Religious experience
– only justified because there are no defeaters to it

1. The hiddenness of God
– atheist has to show that if God's existence were more obvious, that it would result in more people being drawn to him

2. The inductive problem of evil
– Dr. Came's argument was logically fallacious, and makes errors in probability theory

**Dr. Came's conclusion**

Sometimes, people can't prove something, but lack of evidence is a justification for doubting it, e.g. – werewolves.

If none of Craig's arguments work, then it follows that it is not rational to believe that God exists, and it is rational to believe that God does not exist.

Atheists shouldn't have a burden of proof for what they know, only theists have a burden of proof for what they know.

**My thoughts**

One quick point. If life were common everywhere then atheists would infer that God wasn't involved in it. Period. "Life is everywhere, so it's common, why do we need a designer?" they'd say. I agree with Dr. Came about denouncing religious experience in a formal debate. I don't like when Dr. Craig brings this up, but I see why he does it – he's an evangelist, and that's a good thing, too. I just worry about how it looks to atheists, although it's good for sincere seekers. I'm not the one on the stage, though, Dr. Craig is.

I think the point about more overt revealing by God would annoy people and make them turn away. Think of how gay people respond to the suggestion that there is anything wrong with them, with rage, vandalism, threats, coercion, attempts to get you to lose your job and business, and using government as a weapon to fine and imprison you. It's really obvious to me that more God does not mean more *love* of God. For those who don't want God, the hiddenness is respect for their choice to put pleasure above the search for truth. (I mean the gay activists – I have great sympathy for people who struggle with same-sex unwanted attractions because they were impacted by a failed bond with their parent of the same sex as they are).

Whenever I meet people like Dr. Came, I always urge them to keep investigating and pursuing truth, because they will find it if they are sincerely seeking after God. Some atheists do sincerely seek God, but I don't know any who haven't found him. I'm not sure if that's because those atheists who claim to be non-resistant and rational are in fact resistant and non-rational, or what the real reason is. If you believe the Bible, *all* unbelief is non-rational and resistant (see Romans 1). Regarding the werewolves, we don't have any good arguments for werewolves, we do have good arguments for God. Dr. Came didn't refute the arguments that Craig raised, nor did his own arguments for atheism work. And there are many, many more arguments (origin of life, Cambrian explosion, habitability-discoverability, molecular machines) that Craig did not raise, too.

# What will happen if the Democrats win the Senate on Tuesday

**Wintery Knight** · 4 January 2021 · Archived copy · Original

On Tuesday, we're going to find out if the Democrats are able to gain control of the House, Senate and White House in 2021. If they win the two Georgia Senate seats on Tuesday, then they will pass the "Equality Act". This bill makes it illegal to speak words critical of sexual orientation and gender identity. It also makes it illegal for Christians or Christian-owned businesses (including churches) to disagree with the LGBT agenda.

The bill was passed in 2019 by House Democrats. If the Democrats take the Senate on Tuesday, it will pass there. Then it will presumably go to Joe Biden, who will sign it into law.

So what's in the law?

The Federalist described some effects of the Equality Act bill:

> On the surface, the "Equality" Act is supposed to protect LGBT folks from discrimination by adding the categories of sexual orientation and gender identity to all federal civil rights laws, including the 1964 Civil Rights Act. It would make claims of discrimination related to these characteristics legally actionable in the way racism is, and applying to virtually every area of life: the workplace, education, banking, jury service, federal funding, housing, medicine and psychiatry, and all public facilities.
>
> It is a power grab in the guise of anti-discrimination. A bait-and-switch. It's another attempt by a ruling micro-clique to exert mega-control over everyone else's lives, including those it purports to protect. It allows the Mass State to maximize bureaucracy and social engineering, especially by its huge regulation of speech and expression. It erodes individual rights while claiming to uphold them.
>
> Sane people of goodwill have a host of good reasons to object to the so-called Equality Act. And many of those reasons have been written up, including the de-sexing of toilets and showers, the compelled speech inherent in pronoun protocols and severe punishment for "misgendering," the promised harassment of business owners, the invasion of girls' and women's sports by biological men who force on them an unequal playing field, the utter contempt for individual conscience, and more.
>
> The net result of this act would be a huge inequality of power accrued to the state and drained from the individual.

Other areas that would be affected: tax exempt status for churches, private college admissions, scholarships and

curricula, moral standards in Christian organizations, forced transgender treatments at hospitals and health clinics, foster and adoption agencies could not prefer naturally married couples.

The author of that article lists five specific effects of the law:

1. It Undermines Everyone's First Amendment Rights
2. The Ambiguities in the Bill Threaten the Rule of Law
3. Nudge Toward a Chinese-style Social Credit System
4. Redefining Humanity By Outlawing Sex Distinctions
5. It Enshrines Socially Destructive Identity Politics

Let's see what the article says about #2:

> The first thing that should hit any reader of the so-called Equality Act is the ambiguity of its language, especially with the bill's outright emphasis throughout on "perceptions."
>
> […]Consider how much the "Equality" Act would rely on bureaucratic and court actors to divine the "perception" of the perpetrator or victim of so-called discrimination: it would have to calculate your intent, read your mind, check out your body language, pick you apart for any suggestion of malice. For example, it repeatedly refers to sexual orientation and gender identity as "actual or perceived." Many times throughout, the text notes that discrimination (or identity?) involves "perception or belief even if inaccurate" (emphasis mine).
>
> This dependence on perception or belief about a person's self-identity did not exist before. The language of this proposed law is more fluid than gender fluidity on steroids, and it's wild stuff to push, especially at the federal level. It invites no end of accusations and lawfare that bodes ill for society and promises much human wreckage. The only people "empowered" by such a scam are those on the upper levels of this newly devised food chain who can call the shots.

Here's more about #3 for those who didn't know about the China social credit system:

> If passed, we shouldn't be surprised if it eventually produces a social credit system not unlike what is happening in China, whereby your livelihood, education, career, mobility, and access to goods and services is based on a literal "score" of your compliance with government policy. To paraphrase Sir Richard Scruton's excellent observation of how that works in China, I'd say that the so-called Equality Act would help create robots out of Americans, with the state programming what they can say and do.
>
> As more people self-censor because of the risk of losing their livelihoods and social status, they simply become more prone to robotic compliance and conformity with limits on their speech. This is fast becoming the case in China, where citizens feel the need to build up their "social credit" to be allowed access to jobs, education, housing, and who knows what other goods and services. The so-called Equality Act's restrictions on First Amendment freedoms would be a big step in that direction.

A social credit system that scores you for conformity would be a logical effect of the intent of the Equality Act: to punish free expression in just about every sphere of life, including the workplace, at school, in the public square, and in all public facilities, and any place that might be connected with federal funding. (By the way, Scruton was punished—stripped of his chairmanship of an architectural commission in Britain—simply for explaining what the social credit system does to people in China. That should be another lesson for us here.)

Now, I know some Christians will say "why does that matter to me, I already agree with sex outside of marriage and I agree that marriage is just when any number of people of any sex cohabitate and have sex". Right, this is only a problem who think that the Bible is an authority, and that Jesus knows more about morality than LGBT activists and Democrat politicians.

Right now, I live in a state with no SOGI law, and I write about studies, etc. that are critical of the gay agenda from behind an alias. The second that this Equality Act becomes law, I would instantly have to delete this blog, my Facebook page, and my Twitter in case “discrimination” was “perceived” by an LGBT activist based on my previous writings, and they decided to investigate. It would be like writing articles critical of Nazism prior to the ascent of Hitler. It’s fine to do it when Hitler’s not yet in power, but once he’s in power, you shut it down and get out.

# Why think that the Biden / Harris administration will impose fascism?

**Wintery Knight** · 5 January 2021 · Archived copy · Original

In order to predict the future, it's a good idea to look at the past. In this post, I want to try to review the some actions of Democrats, to see if they are for or against fascism.

First, consider the case of the IRS persecuting conservative groups during Obama's re-election campaign. The Obama administration didn't want conservatives influencing the election, so they just used government as a weapon against them:

> The True the Vote v. IRS lawsuit has finally come to a close with a stunning ruling by U.S. District Court Judge Reggie Walton ruling in favor of True the Vote; penalizing the IRS with maximum attorneys fees due to their unconstitutional discrimination against the group and their unethical behavior in the case.
>
> This decision marks the end of a nearly decade long battle that first began in 2010, when federal government agencies including the IRS, DOJ, FBI, ATF, OSHA weaponized against True the Vote and its founder, Catherine Engelbrecht. Under Obama Administration leadership, the agencies leveled a barrage of attacks, including twenty-three audits, investigations, and inquiries, against the group in an attempt to stop their work in election integrity.

The conservatives won their case, but only after the Obama administration went after many, many conservative organizations using government as a weapon against those they disagreed with.

What about the case of Democrats in Wisconsin using pre-dawn raids by armed policemen against conservatives who had committed no crimes and done nothing wrong?

> Cindy Archer, one of the lead architects of Wisconsin's Act 10 — also called the "Wisconsin Budget Repair Bill," it limited public-employee benefits and altered collective-bargaining rules for public-employee unions — was jolted awake by yelling, loud pounding at the door, and her dogs' frantic barking. The entire house — the windows and walls — was shaking.
>
> It was indeed a home invasion, but the people who were pouring in were Wisconsin law-enforcement officers. Armed, uniformed police swarmed into the house. Plainclothes investigators cornered her and her newly awakened family. Soon, state officials were seizing the family's personal property, including each person's computer and smartphone, filled with the most intimate family information.

> […]As if the home invasion, the appropriation of private property, and the verbal abuse weren't enough, next came ominous warnings.
>
> Don't call your lawyer.
>
> Don't tell anyone about this raid. Not even your mother, your father, or your closest friends.
>
> The entire neighborhood could see the police around their house, but they had to remain silent.

Using the police to silence people who disagree with Democrat policies? That's fascism.

What about when gay activists inside the IRS leaked all the donations made to a pro-marriage group to a leading gay rights organization, who made them public?

> Two years after activists for same-sex marriage obtained the confidential tax return and donor list of a national group opposed to redefining marriage, the Internal Revenue Service has admitted wrongdoing and agreed to settle the resulting lawsuit.
>
> The Daily Signal has learned that, under a consent judgment today, the IRS agreed to pay $50,000 in damages to the National Organization for Marriage as a result of the unlawful release of the confidential information to a gay rights group, the Human Rights Campaign, that is NOM's chief political rival.

Again, the case is won later, but the damage has already been done: Democrats used government as a weapon to silence those they disagree with. This is fascism. And Democrat voters are all fine with fascism – they keep voting for it.

How about when California Attorney General Kamala Harris used the government to persecute whistleblowers who had exposed trafficking in baby parts?

> "America's biggest abortion business was desperate and furious, so they turned to their biggest patron, California Attorney General Kamala Harris, for help," Daleiden said in the new video. "At Planned Parenthood's special request, Kamala Harris targeted me to punish and silence my message about the abortion industry and fetal trafficking."
>
> According to The Federalist, Daleiden revealed documents that show close communications between Harris and Planned Parenthood officials two weeks before the raid on Daleiden's home. In March 2016, Harris's office seized computers, video footage and video equipment from his apartment. Later, the attorney general's office filed felony charges against him.
>
> Here's more from the report:
>
> As The Federalist previously reported, two weeks prior to that raid, Harris personally met with six Planned Parenthood executives in March 2016, at the attorney general's Los Angeles office.
>
> An email outlining action items from the meeting shows that they discussed both Planned Parenthood's political agenda in the state of California and her investigation into Daleiden and the Center for Medical Progress. Two of the six executives in that meeting were used as witnesses in Harris's criminal investigation.
>
> The video also showed a California Department of Justice document that stated, "Planned Parenthood would like the computers used to produce the videos seized."

This isn't even to mention how gay rights activists were able to use the government to go after Christian business owners who refused to participate in same-sex weddings. Christian business owners were dragged into court because they believed what Jesus taught about marriage – that marriage is between a man and a woman.

Pro-life Christian businesses and charities were also forced to cover the medical costs for contraceptives that could cause abortions.

So why are secular leftists so interested in fascism? Well, they think we live in an accidental universe. There's no way that humans ought to be, because there is no Designer and no design. There's no free will, no human rights, no objective moral standard, no accountability when you die. So of course you're going to see these sorts of moral crimes from secular leftists. They have no rational grounding for moral values or moral duties.

# Jim Wallis debates Jay Richards on Christianity and economics

**Wintery Knight** · 6 January 2021 · Archived copy · Original

In this post, I have the video of a debate on the topic of what Christians should think about economics and economic policies. In addition to the video, I summarized the two opening speeches and the two rebuttals, for those who prefer to read rather than watch. We'll start with a short biography about each of the debaters.

The video recording:

**The debaters**

Jay Richards:

> Jay Richards, Ph.D., is a Senior Fellow of the Discovery Institute where he directs the Center on Wealth, Poverty and Morality, and is a Visiting Scholar at the Institute for Faith, Work & Economics. Most recently he is the co-author with James Robison of the best-selling *Indivisible: Restoring Faith, Family, and Freedom Before It's Too Late".*
>
> In addition to writing many academic articles, books, and popular essays on a wide variety of subjects, he recently edited the new award winning anthology, *God & Evolution: Protestants, Catholics and Jews Explore Darwin's Challenge to Faith* . His previous book was *Money, Greed, and God: Why Capitalism Is the Solution and Not the Problem* (HarperOne, May 2009), for which he received a Templeton Enterprise Award in 2010.
>
> […]In recent years, he has been a Contributing Editor of The American at the American Enterprise Institute, a Visiting Fellow at the Heritage Foundation, and a Research Fellow and Director of Acton Media at the Acton Institute. Richards has a B.A. with majors in Political Science and Religion, an M.Div. (Master of Divinity) and a Th.M. (Master of Theology), and a Ph.D. (with honors) in philosophy and theology from Princeton Theological Seminary.

Jim Wallis:

> Jim Wallis (born June 4, 1948) is a Christian writer and political activist. He is best known as the founder and editor of *Sojourners* magazine and as the founder of the Washington, D.C.-based Christian community of the same name. Wallis is well known for his advocacy on issues of peace and social justice. […]He works as a spiritual advisor to President Barack Obama.
>
> […]In 2010, Wallis admitted to accepting money for Sojourners from philanthropist George Soros after initially denying having done so. […]In 2011, Wallis acknowledged that Sojourners had received another $150,000.00 from Soros' Open Society Foundation.

Wallis just came out this month in favor of gay marriage. He is also a strong supporter of Barack Obama, who is radically pro-abortion. Some pro-lifers have argued that Barack Obama has the same views on abortion as Kermit Gosnell, because Obama voted twice to allow abortions on babies who were already born alive.

**The format of the debate**

- 20 minute opening speeches
- 10 minute rebuttals
- 10 minutes of discussion
- Q&A for the remainder

**SUMMARY**

I use italics below to denote my own observations.

**Jim Wallis' opening speech:**

My goal is to spark a national conversation on the "common good".

A story about my son who plays baseball.

The central goal of Christianity is to promote the "common good".

Quotes "Catholic social teaching" which values "human flourishing".

The "common good" is "human flourishing".

*Is the purpose of Christianity is to make sure that everyone has enough material stuff or to preach the gospel?*

When Christians go on mission trips, it's good that they focus on things like human trafficking.

Democrat John Lewis is the "conscience of the U.S. Congress".

*John Lewis gets a 0% rating from the American Conservative Union in 2012.*

*John Lewis gets a 8% rating from the American Conservative Union in 2011.*

*John Lewis gets a 2.29% lifetime rating from the American Conservative Union.*

Nothing is going well in Washington right now except comprehensive immigration reform.

*Does he think that Christianity means giving 20-30 million illegal immigrants a path to citizenship, while skilled engineers cannot even get green cards, even though there is a shortage of them? Does he think that the other people in society who earn more than they receive from the government ought to be taxed more in order to provide more services and benefits to those who earn less than they take from the government?*

**Jay Richards' opening speech:**

Two topics: 1) what is the common good? 2) what should Christians do to promote the common good?

Catholicism defines the "common good" as "Indeed, the common good embraces the sum of those conditions of the social life whereby men, families and associations more adequately and readily may attain their own perfection."

We have natural ends that we are supposed to be achieving and some places, like South Korea, are better for allowing that to happen.

The common good is broader and prior to any sort of political specification.

It's not the political good or what the state is supposed to do.

It's not about the communal good, as in Soviet Russia, where the communal good was above individual and familial good.

The common good is the social conditions that promote the things that we humans have in common as individuals and members of family.

The common good takes account of who we are as individuals and in associations with other individuals, e.g. – families.

Christians don't have to be doing the same things to promote the common good, e.g. – pastors, entrepreneurs, etc.

The church, as the church, has as its primary goal making disciples of all nations.

But even in that capacity, the church should be interested in more than just conversions and saving souls.

We also have to care about God's created reality including things like physics, education, etc.

How should Christians promote the common good in politics?

Question: when is coercion warranted?

In Romans 13, Paul says that the state does have power to coerce to achieve certain ends, like justice.

Most Christians think that there are some things where the state can use coercion, for example, to prevent/punish murder.

It is OK for the police to use coercive force to maintain public order and the rule of law.

But we need to ask whether other things are legitimate areas for the state to use coercive force.

We should only give the state power to coerce when there is no other way to achieve a goal.

We need to leverage the science of economics in order to know how to achieve the common good.

Jay Richards' main point in the debate
Henry Hazlitt: "The art of economics consists in looking not merely at the immediate but at the longer effects of any act or policy; it consists in tracing the consequences of that policy not merely for one group but for all groups."

For example, what happens if we raise the federal minimum wage to $50. What happens next for all groups? That's what we need to ask in order to know which policies achieve the common good.

When it comes to economics a lot of things have been tried in other places and times.

We can know what works and doesn't work by studying what was tried before and in other places.

Many things are counter-intuitive – things that sound good don't work, things that sound bad do work.

Principle: "We are our brother's keeper". Christians have an obligation to care for their neighbors.

We all agree on the goal. But how do we do things that will achieve that goal?

We have to distinguish aspirations from principles and prudential judgment.

Principle: We should provide for the material needs of the poor.

Prudence: Seeing the world as it is, and acting accordingly.

Example policies: which minimum wage is best? None? $10? $20?

We decide based on seeing how different economic policies achieve the goal of helping the poor.

**Jim Wallis' first rebuttal:**

Jesus commanded us to "care for the poor and help to end poverty".

*Actually, Jesus thought that acknowledging him and giving him sacrificial worship was more important than giving money to the poor, see Matthew 26:6-13:*

[6] *While Jesus was in Bethany in the home of Simon the Leper,*

*[7] a woman came to him with an alabaster jar of very expensive perfume, which she poured on his head as he was reclining at the table.*

*[8] When the disciples saw this, they were indignant. "Why this waste?" they asked.*

*[9] "This perfume could have been sold at a high price and the money given to the poor."*

*[10] Aware of this, Jesus said to them, "Why are you bothering this woman? She has done a beautiful thing to me.*

*[11] The poor you will always have with you, but you will not always have me.*

*[12] When she poured this perfume on my body, she did it to prepare me for burial.*

*[13] Truly I tell you, wherever this gospel is preached throughout the world, what she has done will also be told, in memory of her."*

*It's not clear to me whether Jim Wallis thinks that preaching is more important than redistributing wealth to address material inequality.*

I like what Jesus said in a TV series, even though it's not in the Bible when an actor playing Jesus said to "change the world".

*Jesus never said to "change the world" in the Bible. Should we be concerned that he is quoting a TV actor playing Jesus instead of Jesus.*

Here is a terrific story about Bill Bright.

I love Catholic social teaching.

Quote: "All are responsible for all".

I go to the World Economic Forum at Davos, Switzerland every year. I spoke once at 7 AM on the 4th floor.

*It's a funny place for a Christian to be if they care about the poor – rubbing shoulders with leftist elites. He must have named a dozen high-profile people that he spoke with during the debate, as if he could win the debate by some sort of argument from name-dropping. He mentioned the Davos thing several times!*

The greatest beneficiary of government actions to deal with the economic crisis was Wall Street banks.

I'm going to tell you a story about what a Washington lawyer says to Jesus.

I've had conversations with business leaders where I tell them to integrate moral truths.

I talk about the Good Samaritan parable.

Quote: "Do you love your undocumented neighbor?"

Quote: "Do you love your Muslim neighbor?"

**Jay Richards' first rebuttal:**

Who is responsible for your own children? Who knows the most about them?

Parents should have more discretion over their children because they have more knowledge about their child and what's best for them.

The Good Samaritan doesn't show that government should confiscate wealth through taxation and redistribute it.

The Good Samaritan emphasizes voluntarily charity to help people who are not necessarily your immediate neighbor.

Some of the things we do should be for the good of other people in other countries.

But then we are back to leveraging economics to know what policies are good for those other people in other

countries.

The principle of subsidiarity: if a problem can be addressed by a lower level of society (family) then we shouldn't make higher levels (government) address it.

The best place to take care of children is within the family.

Only if the family fails should wider and wider spheres get involved.

Although we want to think of the common good in a global sense, we don't want to lose sight of the fact

The financial crisis: we need to integrate moral truths, but also economic truths.

We don't want to assume policies based on intuitions, we want to check our intuitions using economic principles.

Why did we have a financial crisis in mortgages, but not in commodities futures or technology, etc.?

Greed is a contributing factor in all areas of business.

Something more was going on in the mortgage markets than just greed.

There were specific policies that caused the mortgage lending crisis.

The root cause of the problem were "affordable housing policies" that lowered lending restrictions on low income people.

The policy ended up degrading the underwriting standards on loans.

Government intruded into the market and undermined the normal ways of

People were getting massive loans with no income, no jobs, no assets and no down payment.

The federal government created a market for risk loans by guaranteeing

There was a government imposed quota on mortgage lenders such that 50% of their loans had to be given to high-risk borrowers.

That is what led to the financial crisis. Not the free market, but intrusions into the free market.

These policies were well-meaning and implemented by people from both parties. But they had bad effects.

# Expect Biden / Harris to overturn all state-level restrictions on abortion

**Wintery Knight** · 7 January 2021 · Archived copy · Original

[image]
Major pro-abortion group endorses Joe Biden for President
The Democrats already have legislation to remove all state-level restrictions on abortion. It stalled in the Senate because Republicans stopped it. But now that the Democrats are in charge of House, Senate and Presidency, it will probably get passed.

Fox News reported on it early in 2020:

> The House Energy and Commerce Committee met on Wednesday to discuss legislation that would override state regulations on abortion, a bill pro-life critics describe as unconstitutional overreach from Washington.
>
> "For the first time in 20 years, our committee is considering a proactive bill that would guarantee the constitutional right to abortion care; free from the interference of any politician, who has no place in making this very personal decision," Rep. Jan Schakowsky, D-Ill., said of the Women's Health Protection Act.
>
> […]There are currently hundreds of state laws regulating abortions, varying from regulations on clinic standards to outright bans on the procedure, all part of what pro-choice advocates describe as an unprecedented attack on abortion access.
>
> […]The bill grants health care providers a "statutory right" to perform abortions and effectively voids a long list of regulations at the state level. These include requirements that doctors perform certain tests or procedures prior to an abortion. The bill also prohibits limitations on providing abortion services via telemedicine, an emerging form of access that pro-life leaders have criticized as dangerous.
>
> The bill's text includes a provision blocking abortion bans prior to fetal viability, and grants post-viability abortions in cases where a health care provider believes the continuation of the pregnancy "would pose a risk to the pregnant patient's life or health."

I have a friend who is a Never Trumper. He's not very informed about policy, he's just talks and talks about how much he doesn't like Trump. When I try to talk about Trump's pro-life policies, executive actions, and judicial nominations, he changes the subjects to his feelings. He really likes to talk about his feelings. I don't think there's a single Biden voter who could list specific policies implemented by Trump. Not on abortion. Not on any issue. They all just focused on how they felt about Trump. And those feelings were largely conditioned by the mainstream news media.

So, on Wednesday, he was busy talking about how much he hates Trump for fighting against election fraud. I asked him if he had spared any thoughts about what the Democrats were about to do in terms of policy. He hadn't. He has no idea about their actual legislation. He wasn't discussing policy with anyone throughout the entire election cycle. He doesn't know enough about policy or legislation to have those conversations. He can talk a lot about Star Wars, sports and movies, though. He's very convincing on those topics. Very passionate. But nothing to say about abortion legislation. Nothing to convince people to vote pro-life.

What is more important in life? To talk to others about how pro-life you are? Or to get pro-life results? We had pro-life results when Trump was President. Now we're going to have pro-abortion results under Harris / Biden. My Never Trump friend is delighted that Trump is gone. He thinks that he's a "social conservative", too – a real pro-family, pro-life guy. That's what he likes to tell everyone.

# Robert Gagnon debates gay activist Jayne Ozanne on Bible vs homosexuality

**Wintery Knight** · 8 January 2021 · Archived copy · Original

Gay activist vandalizes pro-marriage sign

I am tempted to say that this is the best podcast I have ever heard on the Unbelievable show. Do anything you have to do in order to listen to this podcast.

Details:

> Prof Robert Gagnon has become a well-known voice advocating the traditional biblical view on sexuality. In a highly charged show he debates the scriptural issues on sexuality with Jayne Ozanne, the director of Accepting Evangelicals who came out as gay earlier this year.

The MP3 file is here.

If you can only listen for 15 minutes, then start at 49 minutes in and listen from there.

The following summary is rated MUP for made-up paraphrase. Reader discretion is advised.

**Summary:**

Intro:

- Speaker introductions
- Gagnon: scholars who support gay marriage agree that the Bible doesn't support it
- Gagnon: scholars who support gay marriage agree Jesus taught male-female marriage
- Ozanne: I went to the hospital because I was sick from trying to suppress my gay desires
- Ozanne: Doctors told me that I would die if I didn't act on my gay desires
- Ozanne: I decided to reinterpret the Bible to fit with my gay desires
- Ozanne: According to my new interpretation, Jesus actually supports my gay desires

Segment 1: Genesis

- Ozanne: In Genesis the Bible says that Adam needs a woman to complete him
- Ozanne: I reinterpret this to mean that Adam needed a "complementarian human being"

- Ozanne: Genesis doesn't say whether Eve was complemented by Adam in that chapter
- Ozanne: It's not critical that men are complemented by women, a man could complement a man
- Ozanne: Genesis 2 doesn't talk about children, it's all about adult needs from a relationship
- Gagnon: Genesis 2 has never been interpreted that way in all of history
- Gagnon: Genesis 2 language specifically implies a human being who is opposite/different
- Gagnon: Genesis 2 language translates to complement or counterpart
- Gagnon: Genesis as a whole teaches that the sexuality is for male and female natures
- Gagnon: The extraction of something from the man that is given to the woman is complementarian
- Ozanne: I think that people can be complementary outside of male-female Genesis language
- Ozanne: I don't want to discuss specific words and texts and Greek meanings
- Gagnon: the text has always been read and interpreted to support male/female complementarity
- Gagnon: the male-female nature argument is made because the two natures are complementary
- Ozanne: the text was interpreted by patriarchal males who treated women like property, it's biased
- Ozanne: what is important to me is how Christ interprets Genesis (?? how does she know that?)
- Ozanne: I am passionate about my interpretation of Scripture which supports my gay desires
- Gagnon: just because a person is passionate about their interpretation it doesn't make it right
- Gagnon: I am not arguing for the male-female view based on passion, but on scholarship, evidence and history
- Ozanne: both sides are equally passionate about their interpretations (?? so both are equally warranted?)
- Ozanne: the real question is why God "allowed" two different interpretations of Scripture

Segment 2: Is homosexuality a sin?

- Gagnon: Jesus affirmed traditional sexual morality, which forbids homosexuality
- Gagnon: Jesus teaches that marriage is male-female, and limited to two people
- Gagnon: No one in history has interpreted the Bible to say that homosexuality was not immoral
- Ozanne: Jesus came to bring life, and that means he supports homosexuality
- Ozanne: I was dying, and embracing my gay desires allowed me to live, so Jesus approves of me
- Ozanne: God says "I am who I am" and that means he approves of me doing whatever I want
- Ozanne: There is an imperative to be who I am, and that means embracing my gay desires
- Gagnon: Jesus argued that the twoness of the sexual bond is based on the twoness of the sexes
- Gagnon: Jesus did not come to gratify people's innate desires, he called people to repent of sin
- Gagnon: Jesus did reach out to sinners but he never condoned the sins they committed
- Gagnon: Jesus' outreach to tax collectors collecting too much and sexual sinners is the same: STOP SINNING
- Ozanne: I don't think that Romans 1 is talking about homosexuality
- Ozanne: I think it's talking about sexual addiction, not loving, committed gay relationships
- Ozanne: Paul was condemning pederasty in Romans 1, not loving, long-term, consensual sexual relationships between gay adults
- Gagnon: nothing in the passage limits the condemnation to pederasty
- Gagnon: the passage was never interpreted to be limited to pederasty in history
- Gagnon: rabbis and church fathers knew about committed two-adult same-sex relationships, and said they were wrong
- Gagnon: the argument for marriage is based on the broad two-nature argument, with no exceptions
- Gagnon: the condemnation is not limited to exploitative / coercive / lustful / uncommitted relationships

- Gagnon: even pro-gay scholars agree the passage cannot be interpreted Ozanne's way (he names two)

Segment 3: The showdown (49:00)

- Ozanne: I don't care how many pages people have written on this
- Ozanne: God says that "the wisdom of the wise I will frustrate" so you can't use scholars, even pro-gay scholars, to argue against my passionate interpretation
- Ozanne: I am not interested in the text or history or scholarship or even pro-gay scholars who agree with you
- Ozanne: what decides the issue for me is my mystical feelings about God's love which makes my sexual desires moral
- Ozanne: you are certain that this is wrong, but your view does not "give life" to people
- Ozanne: your scholarship and historical analysis is "a message of death" that causes teenagers to commit suicide (= you are evil and a meany, Robert)
- Ozanne: "I pray for you and your soul" (= opposing me will land you in Hell) and "I hope that listeners will listen with their hearts" (?? instead of their minds?)
- Ozanne: you can prove anything you want with research, even two mutually exclusive conclusions, so you shouldn't rely on scholarship and research since it could be used to prove my view as well
- Ozanne: instead of relying on research, you should rely on your heart and your feelings about God's love to decide what the Bible teaches about sexual morality
- Gagnon: you are distorting the gospel in order to make your case
- Gagnon: attacking my "certainty" is an ad hominem attack to cover your dismissmal of the scholarship and history
- Gagnon: you distort the gospel to make it seem like Christ just wants us to get what we want, when we want it, with who we want it with
- Gagnon: Christ calls us to take up our cross, to lose our lives and to deny ourselves
- Gagnon: you have a notion of what "fullness of life" is, but it's not reflective of the gospel
- Gagnon: Paul's life was much more troubling than yours, mine or anyone else around here
- Gagnon: Paul was beaten, whipped, stoned, poorly sheltered, poorly clothed, poorly fed, shipwrecked, and anxious for his churches
- Gagnon: on your view, he should have been miserable and angry with God all the time
- Gagnon: but instead Paul was constantly thankful and rejoicing to be able to suffer with Jesus and look forward to the resurrection
- Gagnon: I have suffered too, but the suffering we go through never provides us with a license to violate the commandments of God
- Ozanne: "the ultimate thing is what people feel God has called them to"
- Ozanne: My goal right now is to tell young people that homosexuality is fine so they don't commit suicide
- Ozanne: the view that homosexuality is wrong is "evil and misguided"
- Gagnon: the greater rates of harm in the gay community are intrinsic to homosexual unions, not caused by external disapproval of homosexuality

Segment 4: Concluding statements

- Gagnon: gay male relationships on average have more sex partners and more STDs
- Gagnon: female relationships on average have shorter-length relationships and more mental issues
- Gagnon: the greater rates of harm are because there is no complementarity / balance in the relationships
- Gagnon: everyone has some disappointment or suffering in their lives that hurts them, and that they are tempted

to break the rules to fix, but we should not break the rules in order to be happy

- Ozanne: both sides are passionate, so no one can be right, and evidence proves nothing
- Ozanne: only feelings about “what God is doing” can allow us to decide what counts as sin or not
- Ozanne: the main thing that is at stake here is to make people like us, not to decide what the Bible says about sin
- Ozanne: my message to people is to do whatever you want, and ignore mean people who don’t affirm you
- Ozanne: we should be more opposed to mean people who make non-Christians feel unloved than about doing what the Bible says

# Lori Alexander is right: serious Christian men prefer debt-free virgins without tattoos

**Wintery Knight** · 9 January 2021 · Archived copy · Original

Marriage stability vs sexual partners,(Teachman et al. JAMF, August 2010)

Christian writer Lori Alexander recently wrote a blog post (H/T Lindsay) urging Christian women to do 3 things:

1. be a virgin before marriage
2. be debt-free before marriage
3. don't get any tattoos

She also urged women to be cautious about college, because it often gets them into debt. I disagree with her a little here. I always urge young women to earn a STEM degree in college, then work a few years to pay off their loans (if any) before marrying. This is because women, like men, need to have the experience of doing something hard that they don't "feel" like doing, in order to grow. STEM degrees teach young people that the world doesn't revolve around them, and that their feelings don't matter when trying to solve a problem in the real world. It's a very useful way for women and men to break themselves out of the desire for free and easy happiness that is so common in our time.

Lori's article drew enormous opposition from both secular and Christian sources. So far, the only people defending her are men's rights sites, like Dalrock (Christian) and Spawny (non-Christian). Every other "Christian" blog or news site that I read disagreed her article, and argued that premarital sex was no big deal, that having debt was no big deal, and that having tattoos was no big deal.

Let's take a look at her three points, then I'll explain why her article is largely correct, and why she is correct about what she asserts about the criteria that godly men have for women.

Even one non-husband premarital sex partner raises risk of divorce

**Virginity**

Regarding her first point, virginity is commanded by the Bible, it's in line with peer-reviewed studies on marriage quality and stability. The reason that people find this difficult is that they want the freedom to give in to sexual desires without feeling shame. They want to believe that there is no permanent effect. It doesn't help that parents and pastors are terrified of telling young people, and young women in particular, that promiscuity harms marital stability. Right now, the culture is drowning in feminism. Feminism tells women that the traditional male roles of provider, protector, and spiritual leader are "sexist". The "best" men are good-looking pro-abortion bad boys. If a Christian woman is not able to think through the meaning of sex with respect to marriage enough to control herself, it seriously harms the stability of her future marriage.

Majors by Salary Potential – Full List

| RANK | MAJOR | STARTING SALARY | MID-CAREER SALARY |
|---|---|---|---|
| 1 | Petroleum Engineering | $98,000 | $163,000 |
| 2 | Aerospace Engineering | $62,500 | $118,000 |
| 3 | Actuarial Mathematics | $56,100 | $112,000 |
| 4 | Chemical Engineering | $67,500 | $111,000 |
| 5 | Nuclear Engineering | $66,800 | $107,000 |
| 6 | Electrical Engineering (EE) | $63,400 | $106,000 |
| 7 | Computer Engineering (CE) | $62,700 | $105,000 |
| 8 | Applied Mathematics | $50,800 | $102,000 |
| 9 | Computer Science (CS) | $58,400 | $100,000 |
| 10 | Statistics | $49,300 | $99,500 |
| 11 | Physics | $51,200 | $99,100 |
| 12 | Mechanical Engineering (ME) | $60,100 | $98,400 |
| 13 | Biomedical Engineering (BME) | $54,900 | $98,200 |

Starting and Mid-Career salaries by profession (click for larger image)

**Debt-free**

Regarding her second point, almost everything a serious Christian man might plan to do for Christ with his marriage is impacted by finances. From education, to marriage timing, to number of children, to home ownership, early investment, to the success of children. to age of retirement. Less money means fewer choices, and less ability to counter challenges. Think of how important money for legal defense is to Christian-owned businesses who are

being persecuted, for example. The reason that many people find the Bible's teaching on stewardship difficult is that they don't want to exercise self-control with money if they don't feel like it. They want to waste money seeking fun and thrills, and then act like their poverty could not be avoided. Being debt-free is an indicator of practical wisdom and self-control in a woman.

CHAPTER 9

TATTOOS: DON'T

THIS PIECE OF ADVICE MAY ARRIVE A BIT LATE FOR YOU, but I'd rather discomfit you than leave unsaid a reality check for younger friends.

Fads fade; tattoos don't. These permanent displays of youthful exuberance trigger at best mild amusement, but in some a serious concern about your maturity.

Whether or not you believe that concern to be fair, it is real. The tattoo you cover today will be an obstacle in some situations the rest of your life. Do you need it that much? Is it won't compromising your effectiveness?

This rule of tattoos is easily applied to many other areas of your style of living. Do you do anything to call attention to yourself or to make a statement? If so, is the attention worth it? Most such indulgences are self-defeating, whether it is idiosyncratic hair or clothes, a loud motorcycle, or—later in life—a palatial residence far beyond any ordinary need. The attention you are drawing to yourself is defeating your ambition by marking you as concerned with silly things.

Serious people do not seek attention except for serious purposes.

Chapter 9 of Hugh Hewitt's "In, But Not Of: A Guide to Christian Ambition"

**Tattoos**

Tattoos are a problem for serious Christian men for several reasons. First, they cost money and for no gain, and can even cause you losses in your career. Second, most people get them because of low self-esteem or vanity or to look rebellious or to look dangerous. None of these motivations should be acted upon by someone with a robust Christian worldview. The money could be better used on charity, or investments, etc. Women show what their priorities really are by how they spend their money and time. Show me a woman's bookshelf, and I'll tell you how seriously she has thought about what it means to be a Christian in all areas of life. Instead of showing me your tattoos to demonstrate your "spirituality", show me your apologetics books, to demonstrate your intellectual engagement. And tell me how you used that information to engage in conversations with educated non-Christians to answer their challenges to your faith. That way I'll know that you use your money to train do hard things in order to have an influence for Christ in serious, practical, effective ways. A woman who can defend her faith and discuss Christianity with non-Christians is demonstrating her ability to raise Christian children in a secular society.

A family praying and reading the Bible

**The goal of marriage is to serve God**

Today, young people have been taught to follow their hearts, and to deny that there is any authority or practical wisdom that should govern their decisions. They always imagine themselves to be exempt from moral rules, statistics, cause and effect, etc. They think they know better than everyone else – even though they do almost no research on their own. Every adviser who tells them to study computer science instead of creative writing is wrong. Their same-age friends know more about what causes divorces than peer-reviewed research papers. And money should be spent on skydiving and zip-lining, regardless of what financial experts like Dave Ramsey might say.

A woman who has made many mistakes cannot fix those mistakes with words. Rationalizations, evasions, and blame-shifting do not work to show that there has been real repentance. The man can only assess whether grace has caused any real re-prioritization of goals by evaluating her outward actions over a long period of time. Furthermore, if a woman who has made mistakes attacks those who correct her from Bible's teachings on chastity, stewardship, etc., then it's a sign that there is no real repentance.

Choosing a wife wisely doesn't mean that Christian men treat OTHER Christian women poorly. Christian men love all the Christian women. We care for them and support them. But when a man chooses a wife, he is choosing someone who will have more influence on his ability to serve God than anyone else. In my case, the goals for my marriage involve making a difference with apologetics in the church, having many children who will receive the educations and careers they need to have an influence, influencing government to promote Christian-friendly policies, charitable giving, mentoring young Christians, modeling a good marriage to others, and having a home that can serve to host discussions about issues that matter. These things are not free – they take careful planning and execution to achieve.

Lori's advice is  intended for men who are serious about making their marriage produce a return for God. Men who are chaste themselves. Men who accept the Bible as an authority. Men who earned STEM degrees, instead of easy nonsense degrees that don't lead to good careers. Men who earn 6-figure salaries, who buy houses for cash, and who are on track have a 7-figure net worth by age 50. Men who made good decisions cannot risk marrying someone who hasn't prepared for marriage. The wrong woman in the home could ruin the man's effort to produce a marriage that gives glory to God.

Not every man intends to achieve something for God with his marriage, but those who do need to choose a woman who has demonstrated ability at doing the job. For example, if the job requires marital fidelity, then chastity is a good indicator that the woman has the necessary self-control. If the job requires frugality, and practicality, then being debt-free, having a STEM degree, and having some private sector work experience are good indicators that she's qualified for the role. Nothing valuable in life is ever been achieved by being lazy, wild and irresponsible.

Serious Christian men look for wives who have applied themselves to difficult tasks that they didn't feel like doing, who achieved success by remaining committed to the plan, in spite of their unhappy feelings and unmet desires.

We have a problem in the church such that we aren't serious about teaching young people to develop marriage-ready character and to make serious plans for marriage. We are teaching them to follow their hearts, and that their feelings and desires are clues about God's will for their happiness. We are teaching them to be uncomfortable with responsibilities, expectations and obligations to others. We are teaching them not to do their own research. We are teaching them not to make practical, wise plans. We are teaching them to ATTACK those who try to get them to be serious about doing what is likely to work. This approach is not working.

My own criteria for a wife are more demanding than Lori's. My advice there is only for serious Christian men who want their marriage to serve God.

# Should Christian men consider single mothers for marriage?

**Wintery Knight** · 10 January 2021 · Archived copy · Original

Why do Christians object to warning men about high-risk relationships?
A while back, I explained my three concerns about attending church. One of them was that male pastors and church leaders have adopted the priorities of radical feminism, and have turned against men who want a traditional marriage in which the man leads and the wife supports. Well, I found something that really illustrates what I mean by that, so that everyone will understand it.

Above, you can see a tweet by Michael Foster, a pastor who hosts a podcast called "It's Good to be a Man". His web site states that his goal is: "Extending God's house & father-rule by helping men to establish their own houses in strength, workmanship & wisdom."

He explains in subsequent tweets that he is just urging men to ask questions to find out how the woman became a single mother.

**Reactions to the tweet**

Here are some reactions to the tweet:

- asking Foster where are his warnings about single dads
- calling Foster a misogynist
- insulting Foster's appearance
- using 1 counterexample to deny a mountain of evidence
- single moms who deliberately chose bad men, and then play the victim by accepting no responsibility for their actions
- claiming that Foster was expressing an irrational opinion
- accusing Foster of being a child abuser

The negative reactions are all anti-intellectual and childish, especially trying to refute statistics with "you hurt my feelings" or telling a single personal story as a counterexample.

Here's a disclaimer. In this post, I am talking about single mothers by choice, and single mothers who initiated divorce. Widows are excluded.

**The risks posed by single mother**

Now, let's improve Foster's warning, by looking at some evidence – is a marriage to a single mother really more

likely to result in a bad outcome?

First of all, women initiate 70% of divorces. If you meet a woman who divorced her husband, she either had a defect in her ability to evaluate and choose a man, or she had a defect in her ability to maintain a commitment to the man she chose. Either way, a woman who divorced her previous husband has red flags. There are two possibilities. She either chose a good man or she chose a bad man. If she chose a bad man, then it shows that she didn't choose a man with good moral character and spiritual leadership. That means that those things were low priorities for her when deciding who to get naked with. Alternatively, she married a good man, and failed to maintain the commitment. Then she has different problems: problems with male leadership, problems with responsibilities, problems with commitment, problems with contentment, etc. You need to ask questions to get to the bottom of what happened, and more importantly, what she has studied and done to change her worldview. Don't take her words for it, look at her actions.

Second, the number of premarital sex partners a woman has makes her a higher risk of divorce. The more sex partners, the more risk. The problem with women who engage in sex with men who don't commit to them is that they *necessarily* don't see a man's willingness and ability to commit as valuable when choosing a man. Women who have premarital sex with men who don't commit see OTHER THINGS as more valuable. They are rewarding the man for his height, his muscles, his tattoos, his piercings, his entertainment of her, etc. A good man should be very wary when a woman who gave her best youth, beauty and sexual interest to men like that now want to "settle" for a boring, unattractive provider who they see as having lower value than the men they gave sex to without requiring a commitment. What they really wanted was bad boys, and they threw sex at those bad boys without asking for commitment. With the man they perceive as low-level, they are insisting on commitment first, because they don't want this low-level man as badly as they wanted the bad boy. They are settling for less than they feel they deserve. This is where sex-withholding, feelings of unhappiness, and frivolous divorces come from. And by the way, hollering Jesus doesn't fix that risk any more than hollering Jesus fixes student loans accumulated for a useless non-STEM degree. Jesus-hollering isn't evidence that a woman has persuaded herself to change her view of which men are the most attractive. A woman's lack of respect for men who prepare for commitment and who keep their commitments is dangerous for marital stability. The hysterical reactions to a man's judging a woman for her past mistakes don't cancel the damage and risks caused by those mistakes. They simply tell the man that this woman is unrepentant, and therefore unteachable, and likely unsuitable for goal-oriented marriage. She is not qualified for the job of wife: self-sacrificial love for her husband, respect for her husband, and supporting her husband in what he is trying to achieve for God.

Here's what the Bible says about sex outside of heterosexual marriage and about frivolous divorce. Read the critical replies to Foster's tweet. The critical responses show the *default* position of church-attending Christian women and pastors to the Bible in this culture. First, the critics don't accept the Bible as an authority over women's choices in any area of life. Second, the critics don't believe that women should bear any responsibility for their past actions. Nobody believes that women choosing bad men is the woman's fault in this society. So you should assume that single mothers don't take responsibility for their own failures. And that means that she will have taken no steps to repent of her mistake, and change her character so that she doesn't make the same mistake again. It's up to you to look at what she has been reading, listening to, watching, etc. and to check her actions in order to find out what she really thinks about what the Bible says. You can't marry a woman who responds to any mention of the moral law and moral obligations with denial of responsibility and insults. If she hasn't become an active crusader against women who choose bad men, and women who choose premarital sex, and women who choose divorce, then you can't really believe that there's been any real repentance. The risks to you are too high to take a chance on someone who is not certain. I've only ever met one single mother (Kerri) who blamed her own divorce on her own bad decisions.

**The culture opposes male leadership**

Foster's warning is intended to help men to make better decisions, so that their relationships will produce results for God. But his critics aren't interested in what men are trying to achieve for God. They are only concerned that

women get what they want, regardles of their past actions. In their opinion, men exists solely to serve the needs of women. Women don't have to be good enough for marriage, men just have to give them what they want regardless of the woman's suitability for wife and mother roles. The role of men in any relationship is not to lead and achieve goals for God. Their role is to let women rule over them, disposing of their earnings as they see fit, for the benefit of the woman.

When women are young and pretty, they are entitled to hot bad boys to entertain them. When they are older, have tons of sexual experience, and children from different fathers, they are entitled to a husband to financially support them. But a husband with no power to lead the home, since their past choices of man showed they have no interest in following a man who has good character. And the churches, pastors, courts, schools, hospitals, etc. are all there to enforce this view of men as clowns / slaves.

This is what women are told about the role of men in every area of society. This society, including the Christian parents, Christian pastors, Christian culture, etc. do not produce women who prefer early marriage to men who are good at moral leadership and spiritual leadership. Therefore, men who are chaste, sober, have good educations, good private sector jobs, good savings, etc. need to be extremely careful. Look at the responses to Foster's tweet, and think: do these people care about providing you with a good wife? Or is their concern all about how to insult you and shame you, until you are submissive to her needs?

**Your marriage is your enterprise for serving God**

My advice to men right now is to read over every single critical tweet in that thread that Foster started. Imagine that you are trying to get these women to do something in a marriage that is part of your plan to make the marriage serve God. You're trying to get her to watch a William Lane Craig debate. You're trying to get her to stop spending money on 50 Shades of Grey and Harry Potter. You're trying to get her to stop smoking and drinking. You're trying to get her to talk about the sermon instead of essential oils. You're trying to get her to read a Thomas Sowell book. You're trying to get her to not put the kids in day care or public schools.

You need to assume that her response to male leadership like this will be the exact same as the responses that Foster is getting to his tweet. And then after you have assumed it, then you need to keep your hands off that woman. Keep your distance, and ask her questions to find out what her real views are, and whether she is interested in growing into the kind of person who is safe for you to marry. Don't forget that chastity and sobriety are important during the evaluation process, so that you aren't influenced away from your leadership role. Don't listen to her words, look at her actions.

# Big Tech purge of conservatives shows the danger of secular left worldview

**Wintery Knight** · 11 January 2021 · Archived copy · Original

Free speech that offends the secular left is now "inciting violence"

The Federalist:

> What happened at the capitol was an embarrassment for our country. Now, the hypocritical outcries from Democrats, who proudly condoned left-wing Antifa and Black Lives Matter rioters as they terrorized American cities all summer, are ushering in a great reckoning.
>
> The Jan. 6 demonstrators, the vast majority of whom were peaceful, were there to protest legitimate claims of election irregularities and voter fraud. But Google-owned YouTube doesn't want you to know that. They announced Thursday that they will ban all videos about voter fraud in the 2020 election.
>
> The one free speech haven, Parler, Apple is keying up to ban from its app store and bar from iOS devices, claiming content on the website contributed to the capitol unrest. Google has already jumped the gun, banning Parler yesterday.

Amazon, the company that hosts Parler, has indicated that they would be banning Parler as well as of Sunday at midnight.

More:

> Anyone who has supported the president is in for it, as well. Rick Klein, the political director at ABC News, in a now-deleted tweet said that getting rid of Trump is "the easy part." The more difficult task will be "cleansing the movement he commands." Democrats have already created a "Trump Accountability Project," an enemies list to ban, cancel, or fire anyone who staffed, donated to, endorsed, or supported President Trump and his administration.
>
> […]As the left's arbiters of "truth," big tech has been banning users they don't agree with and suppressing

> stories like The New York Post's blockbuster investigation into Hunter Biden's laptop and sketchy deals with foreign governments and companies with ties to the Communist Chinese government. With the help of their partisan "independent fact checkers," big tech and the media made sure average Americans never knew about this before they went to the polls.

This is the part I want you guys to start thinking about:

> This disturbing reality we live in, where one political party now has the power to control the narrative in all aspects of our lives — school, work, social media, and government — might make us feel eerie echoes of living under Chinese Communist Party influence instead of in the United States of America.
>
> Perhaps what's most troubling, and something that we might not have even considered in the chaos of the last few days, is the long-term impact this will have on American children. Generation Z or Zoomers, aged 13 to 21, may be one of the first generations that is more influenced by what they see and read on social media and the internet than what they hear at the dinner table from mom and dad.
>
> A Business Insider's poll found that 59 percent of Zoomers listed social media as their top news source. While technology used to serve as a way to make information accessible, a way to have the world at your fingertips with just a quick search, it has become something much different. It is teaching the youngest and most impressionable among us that suppression is normal and personal censorship is an important survival mechanism.
>
> Children are being taught to watch what they say and think, lest they be labeled a racist, white supremacist, homophobe, or xenophobe. Indeed, making a pro-Trump TikTok video can get your college admission rescinded and subject you to intense personal harassment. A three-second insensitive or politically incorrect Snapchat video from 2016 can get you featured in a New York Times article and your college admission rescinded, and subject you to bitter bullying.
>
> For young people today, it's becoming normal to see political leaders in our country deemed "dangerous" to be ousted from public platforms and ostracized from society. They watch their parents self-censor at work, fearful of backlash from employees or coworkers that could get them fired.
>
> Americans used to support the right of people to hold and express opinions others disagree with. Yet the newest generation believes feelings are more valuable than freedom. Study after study finds that younger people are more supportive of limiting speech than are older generations.
>
> A recent survey found that an overwhelming majority of students at the University of Wisconsin-Madison think the government should be able to punish "hate speech." Of course, "hate speech" is simply the left's ambiguous term for anything veering from the leftist orthodoxy on issues such as abortion, sex, race, and immigration.
>
> Silicon Valley oligarchs have an agenda. They aren't platforms, they are publishers, which should nullify the privileges they enjoy under Section 230. Will the Democrats who are now running our government do anything to stop big tech tyranny? Of course not.
>
> This problem is not going away. America's ethos of free speech and expression is going extinct at the hands of big tech and the leftists controlling media and government.

The people in Big Tech aren't any different from the communist leaders of the past. You should be very careful about going on social media under your own name and posting publicly. Use an alias, and restrict the visibility of your posts to your friends. You should only have a few friends, and no one who is on the secular left. Don't make yourself an easy target by posting your real name or any personal details that can be seen by the public or by a secular leftist. It's probably time to think about getting a VPN and changing your voter registration to independent. Be careful with your donations as well.

People on the secular left won't hesitate to use the power of the government to come after you for making them feel bad. They think that your different opinion is inciting violence. They think that hurting their feelings is inciting violence. You have to assume that this is everyone on the secular left. Everyone who votes Democrat. All the Christian "Never Trumpers" who *prefer abortion and same-sex marriage policies to pro-life and natural marriage policies*. They may not all be bad, but you have to assume they are, for your own safety. There is nothing in the secular left worldview that rationally grounds human rights or morality.

# Will the secular left Democrats allow you to earn money if you disagree with them?

**Wintery Knight** · 12 January 2021 · Archived copy · Original

If you're trying to help the rioters escape justice, you're pro-rioting

I looked at a lot of different articles on Monday, and felt more and more sad about the direction that America is going. We should not be going forward with the inauguration until we find out why there were so many voting issues in certain states controlled by far-left Democrats.

I read a lot of articles about the 7-month-long campaign of violence, arson, and murder conducted by far left rioters, and I was going to write about how the media and Democrats encouraged that. But the article that really touched on what I was feeling was by Joy Pullman, writing for The Federalist:

> The purge wasn't at all limited to Trump himself. It's also pursuing his supporters. YouTube banned all videos discussing voter fraud. Reddit shut down its Donald Trump subreddit. On Jan. 8, Facebook shut down the Walkaway campaign that shared the stories of people who left the Democratic Party to vote for Trump, and banned every one of the group's owners from using Facebook. The publisher of a forthcoming book by Sen. Josh Hawley cut ties with him over his support for proving to the American people that our elections are free and fair.
>
> 'You're not entitled your book contract,' can quickly become 'United doesn't have to let you onto its planes' 'Marriott doesn't have to let you stay at its hotels,' or 'Visa doesn't have to let you use its cards.'
>
> And maybe that's the point.
>
> — Abigail Shrier (@AbigailShrier) January 8, 2021
>
> The National Association of Realtors "has revised its professional ethics code to ban 'hate speech and harassing speech' by its 1.4 million members," both on the job and off. To them, hate speech includes basic conservative ideas, not at all actually racist or otherwise indefensible words. "The sweeping prohibition applies to association members 24/7, covering all communication, private and professional, written and spoken, online

> and off. Punishment could top out at a maximum fine of $15,000 and expulsion from the organization."
>
> Police departments across the country have opened "probes" into whether any of their employees attended the Trump protest on Jan. 6. They're not at all alone. Employers have begun firing people who merely attended the rally of hundreds of thousands, out of which a minority broke the law.
> The label of an indie musician terminated their relationship because he posted that he had "peacefully" attended the Trump protest. A Wall Street Journal article documents the firing of a lawyer for an insurance company who posted on Instagram that he had attended "peacefully."
>
> […]The notorious Never Trump group The Lincoln Project is launching a pressure campaign to ensure more such firings to purge leftists' political opponents from all aspects of public and private life, in the name of "America."
>
> […]Well-funded groups like The Lincoln Project, Southern Poverty Law Center, and other leftist pressure campaigns are dedicated to earning money and status by destroying the lives of anyone who disagrees with their politics. It's excellent business. Schmidt has released tweets outlining many of his group's planned actions, a terrifying blueprint of the cultural revolution mindset ascendant among America's political left, who just seized control of every branch of the federal government…

This part was unnerving:

> Already this creepy lust for punishment has Reddit users revealing their plans to turn family members into the FBI for attending the Jan. 6 protest, regardless of whether these family members committed any crimes or merely, like the vast majority of attendees, walked peacefully in D.C. streets.

She has an example where someone was recognized at a rally, his employer was contacted, and he was publicly denounced and placed on leave of absence. How will he feed his family without a job? But that's the problem with the communist mob – they put their philosophy above the rights and lives of ordinary people who have a right to exercise their freedoms peacefully (which almost all of the people at the DC rally did). I would never take away the job of someone just because they disagreed with me.

I really recommend that you READ and SHARE the article, so that everyone will understand clearly what is happening. It's important for people to understand that people on the secular left *are fascists* and they want to take away the ability of people to disagree with them by using power, e.g. – lawsuits, doxing, getting people fired.

And now, a personal reflection.

I'm concerned about how marriage-minded men will be impacted by the witch-hunting leftists. Men who marry and lead families don't do this because it is a good deal for men. Marriage is a terrible deal for men. But it's tolerable if men get to keep their own money, lead their families, educate their children in a way that respects God and good values, etc. When the government gets so big that men have to deal with leftists in the schools, government, hospitals, workplace, etc. *men just opt out of marriage*. Young, unmarried women may think that they can make a happy marriage with a pro-abortion, pro-LGBT secular leftist, but it's very unlikely. These are people who sacrifice children for adult selfishness, and that isn't a good qualification for marriage, which requires self-sacrificial love and self-control. There will be many victims to the rolling back of human rights and moral standards planned by the secular left.

# Is there evidence of systemic racism in the United States?

**Wintery Knight** · 13 January 2021 · Archived copy · Original

***ANNOUNCEMENT: I explained my answer to this question on an episode the Free Thinking Ministries podcast, with host Tim Stratton. We discussed Black Lives Matter, Christianity and more. And I explained my plan to achieve the American Dream as a person of color and legal immigrant to America. Live stream link here.***

Systemic racism is the idea that people can't lift themselves out of poverty by making good decisions, because powerful groups in society that hold the poor down, regardless of their decisions. Do you think that America is a place where no matter what choices you make, you'll never be able to be more properous? That's what the leaders of Black Lives Matter think.

Here's what Nikole Hannah-Jones, creator of the 1619 Project, says in the New York Times (a former newspaper):

> To summarize, none of the actions we are told black people must take if they want to "lift themselves" out of poverty and gain financial stability — not marrying, not getting educated, not saving more, not owning a home — can mitigate 400 years of racialized plundering.

Got that? It doesn't matter what individual choices a non-white person takes in America, they're going to be poor. The "systemic racism" of the powerful whites will always keep them down. Single motherhood doesn't make people poor, and marriage doesn't make people wealthier. Dropping out of high school doesn't make you poor, and getting a Masters degree in computer science won't make you wealthier.

But let's take a look at the data from the 2018 Census, and see the evidence.

| Median US Household Income by Selected Ethnic Groups, 2018 | | |
|---|---|---|
| Indian | Americans | $119,858 |
| Taiwanese | Americans | $95,736 |
| Lebanese | Americans | $82,353 |
| Turkish | Americans | $81,656 |
| Chinese | Americans | $81,487 |
| Iranian | Americans | $80,291 |
| Japanese | Americans | $80,036 |
| Pakistani | Americans | $77,315 |
| Ukrainian | Americans | $77,083 |
| Filipino | Americans | $75,279 |
| Indonesian | Americans | $74,497 |
| Syrian | Americans | $72,675 |
| Korean | Americans | $72,074 |
| Ghanaian | Americans | $69,343 |
| Nigerian | Americans | $68,658 |
| Guyanese | Americans | $68,393 |
| **White** | **Americans** | **$67,937** |

Source: US Census Bureau

White people are doing a bad job of keeping non-whites down

Well, it looks like at least SOME people of color are able to do well in America despite all the "systemic racism" that keeps non-whites down. And do you know what those non-white groups at the top have in common? They've made good decisions, they've worked hard, they haven't blamed other people when they fail, and they've saved their

money instead of spending it on shiny junk.

Let's look at some decisions that the non-whites who are prosperous have made, that those further down have not.

Asians marry before they have children, so the kids have two parents

**Education and marriage**

This article is written by the far-left radical Nicholas Kristof, writing in the radically-leftist New York Times (a former newspaper).

Excerpt:

> A new scholarly book, "The Asian American Achievement Paradox," by Jennifer Lee and Min Zhou, notes that Asian-American immigrants in recent decades have started with one advantage: They are highly educated, more so even than the average American. These immigrants are disproportionately doctors, research scientists and other highly educated professionals.

> It's not surprising that the children of Asian-American doctors would flourish in the United States. But Lee and Zhou note that kids of working-class Asian-Americans often also thrive, showing remarkable upward mobility.
>
> […]There's also evidence that Americans believe that A's go to smart kids, while Asians are more likely to think that they go to hard workers… Asian-American kids are allowed no excuse for getting B's — or even an A-. The joke is that an A- is an "Asian F."

One reason Asians students do so well is because their parents are usually married:

> > Strong two-parent families are a factor, too. Divorce rates are much lower for many Asian-American communities than for Americans as a whole, and there's evidence that two-parent households are less likely to sink into poverty and also have better outcomes for boys in particular.

American blacks have a 73% out-of-wedlock birth rate. A huge difference compared to Asians.

So, when Nikole Hannah-Jones tells you that education and marriage don't matter, she's just wrong.

**Compound interest**

Education and marriage are important, but so is saving your money. The wealthiest people in America are typically the ones who are experts at saving money early, and investing it. They know about the law of compound interest. If you invest money early and leave it alone, then it will grow into a fortune by the time you are read to stop working.

This graph explains compound interest:

Investing $24,000 from age 21 to 41 vs investing $24000 from age 47 to 67

What does Nikole Hannah-Jones say when she looks at that graph? She doesn't think that saving money makes a difference to having more or less wealth. She thinks skin color determines whether saving money makes you wealthy or not. The graph clearly shows what we should be recommending to young people of color. They need to stop spending money and start saving it, and the earlier the better. It doesn't matter what your skin color is, saving money early JUST WORKS.

Similarly, when she says that home ownership doesn't make you more wealthy, this is just terrible advice. It's always better to pay down your own mortgage (at least when interest rates are low like they are now) than to pay someone else rent. You have to live somewhere, and paying for your own home is better because it costs about the same as rent, and then you get to keep the home when you're done paying for it.

**Communism**

Nikole Hannah-Jones does have a "solution" to disparities in wealth. Her solution is communism. She wants to transfer money from those who earn, to those who don't. But we already have tried that in the 20st century and it resulted in the deaths of over 100 million people. That's not my opinion, that's all documented in a book published by Harvard University Press.

You don't even have to read the book to know the truth – just look at countries that score low on the Index of Economic Freedom, and compare their GDP per capita to countries that score high on the Index of Economic Freedom. The more communist a nation goes, the less wealth there is for the citizens. That's why people in Venezuela are eating zoo animals and selling their bodies in prostitution in order to get food to eat and water to drink. Nikole Hannah-Jones wants to reduce economic freedom, but we know by looking at other countries that this reduces per-capita GDP over time.

There's a lot more than could be said here, but the point is that we need to be telling American blacks to make decisions that match the decisions of other successful non-white communities in America. We need to start teaching young people basic economics so they don't fall prey to charlatans.

# What do ancient non-Christian sources tell us about the historical Jesus?

The Annals, by Roman historian Tacitus

This article from Biblical Archaeology covers all the non-Christian historical sources that discuss Jesus.

About the author:

> Lawrence Mykytiuk is associate professor of library science and the history librarian at Purdue University. He holds a Ph.D. in Hebrew and Semitic Studies and is the author of the book Identifying Biblical Persons in Northwest Semitic Inscriptions of 1200–539 B.C.E. (Atlanta: Society of Biblical Literature, 2004).

Here are the major sections:

- Roman historian Tacitus
- Jewish historian Josephus
- Greek satirist Lucian of Samosata
- Platonist philosopher Celsus
- Roman governor Pliny the Younger
- Roman historian Suetonius
- Roman prisoner Mara bar Serapion

And this useful excerpt captures the broad facts about Jesus that we get from just the first two sources:

> We can learn quite a bit about Jesus from Tacitus and Josephus, two famous historians who were not Christian. Almost all the following statements about Jesus, which are asserted in the New Testament, are corroborated or confirmed by the relevant passages in Tacitus and Josephus. These independent historical sources—one a non-

> Christian Roman and the other Jewish—confirm what we are told in the Gospels:31
>
> 1. He existed as a man. The historian Josephus grew up in a priestly family in first-century Palestine and wrote only decades after Jesus' death. Jesus' known associates, such as Jesus' brother James, were his contemporaries. The historical and cultural context was second nature to Josephus. "If any Jewish writer were ever in a position to know about the non-existence of Jesus, it would have been Josephus. His implicit affirmation of the existence of Jesus has been, and still is, the most significant obstacle for those who argue that the extra-Biblical evidence is not probative on this point," Robert Van Voorst observes.32 And Tacitus was careful enough not to report real executions of nonexistent people.
>
> 2. His personal name was Jesus, as Josephus informs us.
>
> 3. He was called Christos in Greek, which is a translation of the Hebrew word Messiah, both of which mean "anointed" or "(the) anointed one," as Josephus states and Tacitus implies, unaware, by reporting, as Romans thought, that his name was Christus.
>
> 4. He had a brother named James (Jacob), as Josephus reports.
>
> 5. He won over both Jews and "Greeks" (i.e., Gentiles of Hellenistic culture), according to Josephus, although it is anachronistic to say that they were "many" at the end of his life. Large growth in the number of Jesus' actual followers came only after his death.
>
> 6. Jewish leaders of the day expressed unfavorable opinions about him, at least according to some versions of the Testimonium Flavianum.
>
> 7. Pilate rendered the decision that he should be executed, as both Tacitus and Josephus state.
>
> 8. His execution was specifically by crucifixion, according to Josephus.
>
> 9. He was executed during Pontius Pilate's governorship over Judea (26–36 C.E.), as Josephus implies and Tacitus states, adding that it was during Tiberius's reign.
>
> Some of Jesus' followers did not abandon their personal loyalty to him even after his crucifixion but submitted to his teaching. They believed that Jesus later appeared to them alive in accordance with prophecies, most likely those found in the Hebrew Bible. A well-attested link between Jesus and Christians is that Christ, as a term used to identify Jesus, became the basis of the term used to identify his followers: Christians. The Christian movement began in Judea, according to Tacitus. Josephus observes that it continued during the first century. Tacitus deplores the fact that during the second century it had spread as far as Rome.

I remember reading the 1996 book by Gary Habermas entitled "The Historical Jesus: Ancient Evidence for the Life of Christ". This book is a little before the time of most of you young Christian apologists, but back before the time of Lee Strobel and J. Warner Wallace, this is the stuff we all read. Anyway, in the book he makes a list of all that can be known about Jesus from external sources. And fortunately for you, you don't have to buy the book because you can read chapter 9 of it right on his web site.

From Tacitus he gets this:

> From this report we can learn several facts, both explicit and implicit, concerning Christ and the Christians who lived in Rome in the 60s A.D. Chronologically, we may ascertain the following information.
>
> (1) Christians were named for their founder, Christus (from the Latin), (2) who was put to death by the Roman procurator Pontius Pilatus (also Latin), (3) during the reign of emperor Tiberius (14 37 A.D.). (4) His death ended the "superstition" for a short time, (5) but it broke out again, (6) especially in Judaea, where the teaching had its origin.
>
> (7) His followers carried his doctrine to Rome. (8) When the great fire destroyed a large part of the city during the reign of Nero (54 68 A.D.), the emperor placed the blame on the Christians who lived in Rome. (9) Tacitus reports that this group was hated for their abominations. (10) These Christians were arrested after pleading

> guilty, (11) and many were convicted for “hatred for mankind.” (12) They were mocked and (13) then tortured, including being “nailed to crosses” or burnt to death. (14) Because of these actions, the people had compassion on the Christians. (15) Tacitus therefore concluded that such punishments were not for the public good but were simply “to glut one man’s cruelty.”

And from Josephus he gets this:

> (1) Jesus was known as a wise and virtuous man, one recognized for his good conduct. (2) He had many disciples, both Jews and Gentiles. (3) Pilate condemned him to die, (4) with crucifixion explicitly being mentioned as the mode. (5) The disciples reported that Jesus had risen from the dead and (6) that he had appeared to them on the third day after his crucifixion. (7) Consequently, the disciples continued to proclaim his teachings. (8) Perhaps Jesus was the Messiah concerning whom the Old Testament prophets spoke and predicted wonders. We would add here two facts from Josephus’ earlier quotation as well. (9) Jesus was the brother of James and (10) was called the messiah by some.

So when you are reading the New Testament, these facts are the framework that you read within. It’s a good starting point when dealing with people who have never looked into who Jesus was and what he taught and what his followers believed about him, right from the start.

# Far-left activist charged after Washington, D.C. incitement of violence incident

**Wintery Knight** · 15 January 2021 · Archived copy · Original

Guess what? A far-left activist has been charged in connection with the recent rioting in Washington, D.C. No, no, it's not the CEO of Facebook or the CEO of Twitter or the CEO of Google or the CEO of Amazon. Those are not the far-left activists I am talking about this time.

Fox News reports:

> A left-wing activist who told Fox News last week that he'd followed a pro-Trump mob into the Capit0l in order to "document" the siege is now the subject of a criminal complaint in connection with his alleged participation, according to the Justice Department.
>
> J0hn Su11ivan can allegedly be heard egging on protesters in video he provided to the FBI, according to a federal criminal complaint. He has also shared the video to his YouTube and Twitter accounts under the pseudonym Jayd3n X.
>
> He was charged Thursday in federal court in Washington, D.C. after being arrested by the FBI. He remains in custody in Toeele County, in his home state of Utah, on a U.S. Marshals Service hold request.
>
> Inside the building, he told rioters that "We gotta get this s— burned," and "it's our house m————," according to an affidavit signed by FBI Special Agent Matthew Foulger.
>
> He faces federal charges of civil disorder, entering a restricted building and violent entry or disorderly conduct.
>
> […]Su11ivan, the founder of a Utah-based group called 1nsurgence USA… has denied ties to Ant1fa in recent interviews, his group 1nsurgence USA had advertised an event called "Kick These Fascists out of DC" on Wednesday around the same time as a pro-Trump rally near the National Mall that preceded the Capit0l chaos.

If you're wondering why I said "incitement of violence" in my title, it's because I think that "we gotta get this s— burned" is an incitement to violence.

National Pulse adds:

> Su11ivan, the founder of "an activist group formed after the killing of George Floyd in the summer of 2020" entitled 1nsurgence USA which "calls itself anti-fasc1st and protests police brutality," insisted he was only inside the U.S. Capit0l on January 6th to "record."

READ THE DESCRIPTION OF HIS GROUP. HE IS A LEFT-WINGER AND HIS GROUP IS A LEFT-WING GROUP.

Politifact, which is one of the fake-news "fact-checkers" employed by Big Tech, issued an entire fact-check, in which they claimed that this person isn't linked to Ant1fa at all:

> Su11ivan denies antifa affiliation
>
> Social media users have linked Su11ivan to ant1fa and Black Lives Matter because of his past protest history and social media activity. His Twitter accounts have frequently used #antifa, #blm, and other anti-Trump or anti-police hashtags, PolitiFact found. The cover photo for one of his accounts advertised a Jan. 6 1nsurgence USA event to "Kick These Fascists Out of DC."
>
> Su11ivan has also been filmed using incendiary language in the past. At a small August rally in Washington, D.C., he described the need to "rip" Trump out of office, according to Fox News. Photos highlighted on his personal website show him holding a firearm.
>
> But Su11ivan said he's not a part of the ant1fa coalition often blamed for violent events, noting that Trump supporters at the riot were shouting "f— ant1fa."

So if he says he's not linked to Ant1fa, then he's not linked to Ant1fa. That's called journalism. No need to check any evidence. That's real journalism with a journalism degree right there. That 200K in student loans was well worth the money, for the useful journalism skills you learn when you're spending 4 years being a drunken slut and getting indoctrinated with far-left propaganda till you can't reason your way out of a paper bag. But Big Tech has a use for you.

This fact check was used by Big Tech corporations like Facebook to suppress any criticism of far-left fascist groups. That's their goal. The journalists write their "fact check", they label your actual facts "missing context" or "mostly false" and then every dissenting voice is banned from social media. I remember when they labeled a video of Joe Biden talking as "Missing Context" and reduced my page's audience *for quoting Joe Biden in his own words talking continuously for over 2 minutes.* They just didn't want people to see it, so they censored it. They censored me. They hate free speech. They're totalitarians who suppress anything they disagree with.

# William Lane Craig debates Walter Sinnott-Armstrong: evil, suffering and God

**Wintery Knight** · 16 January 2021 · Archived copy · Original

Two bears fight it out, and may the best bear win!

This is one of the top 4 best debates that William Lane Craig has ever done in my opinion. (The other three are Craig-Millican debate and the first and second Craig-Dacey debates). If you've never seen Dr. Craig in a debate with a non-Christian, this one is probably the best introductory one out there. Dr. Craig is the foremost defender of Christian theism on the planet, and probably of all time.

Sinnott-Armstrong is very courteous, respectful and intelligent scholar and he is very good at defending his side. This is a very cordial and engaging debate, and because it was held in front of a church audience, it was targeted to laymen and not academics. So if you are looking for a good first debate to watch, this is it! Normally, Dr. Craig debates at major universities in front of students and faculty.

There is also a book based on this debate, published by Oxford University Press. I was actually able to find a PDF of it online. I should also remind people that you can get the wonderful Craig-Hitchens debate DVD from Amazon.com if you are looking for a debate to watch, or show in your church, this is the one to start with.

**The debaters:**

- William Lane Craig
- Walter Sinnott-Armstrong

**The format:**

- WSA: 15 minutes
- WLC: 15 minutes
- Debaters discussion: 6 minutes
- Moderated discussion: 10 minutes

- Audience Q&A: 18 minutes
- WSA: 5 minutes
- WLC: 5 minutes

**SUMMARY:**

**WSA opening speech:**

Evil is incompatible with the concept of God (three features all-powerful, all-god, all-knowing)

God's additional attributes: eternal, effective and personal (a person)

He will be debating against the Christian God in this debate, specifically

Contention: no being has *all* of the three features of the concept of God

His argument: is not a deductive argument, but an inductive/probabilistic argument

Examples of pointless, unjustified suffering: a sick child who dies, earthquakes, famines

The inductive argument from evil:

1. If there were an all-powerful and all-good God, then there would not be any evil in the world unless that evil is logically necessary for some adequately compensating good.
2. There is evil in the world.
3. Some of that evil is not logically necessary for some adequately compensating good.
4. Therefore, there can't be a God who is all-powerful and all-good.

Defining terms:

- Evil: anything that all rational people avoid for themselves, unless they have some adequate reason to want that evil for themselves (e.g. – pain, disability, death)
- Adequate reason: some evils do have an adequate reason, like going to the dentist – you avoid a worse evil by having a filling

God could prevent tooth decay with no pain

God can even change the laws of physics in order to make people not suffer

Responses by Christians:

- Evil as a punishment for sin: but evil is not distributed in accordance with sin, like babies
- Children who suffer will go straight to Heaven: but it would be better to go to Heaven and not suffer
- Free will: this response doesn't account for natural evil, like disease, earthquakes, lightning
- Character formation theodicy: there are other ways for God to form character, by showing movies
- Character formation theodicy: it's not fair to let X suffer so that Y will know God
- God allows evil to turn people towards him: God would be an egomaniac to do that
- We are not in a position to know that any particular evil is pointless: if we don't see a reason then there is no reason
- Inductive evil is minor compared to the evidences for God: arguments for a Creator do not prove that God is good

**WLC opening speech:**

Summarizing Walter's argument

1. If God exists, gratuitous evil does not exist.
2. Gratuitous evil exists.
3. Therefore, God does not exist.

Gratuitous evil means evil that God has no morally sufficient reason to permit. WSA doesn't think that all evil is incompatible with God's existence, just gratuitous evil.

Everyone admits that there are instances of evil and suffering such that we cannot see the morally sufficient reason why God would allow it to occur.

The claim of the atheist is that if they cannot see that there is a moral justification for allowing some instance evil, then there is no moral justification for that instance of evil.

Here are three reasons why we should not expect to know the morally sufficient reasons why God permits apparently pointless evil.

1. the ripple effect: the morally sufficient reason for allowing some instance of evil may only be seen in another place or another time
2. Three Christian doctrines undermine the claim that specific evils really are gratuitous
3. Walter's own premise 1 allows us to argue for God's existence, which means that evil is not gratuitous

Christian doctrines from 2.:

- The purpose of life is not happiness, and it is not God's job to make us happy – we are here to know God. Many evils are gratuitous if we are concerned about being happy, but they are not gratuitous for producing the knowledge of God. What WSA has to show is that God could reduce the amount of suffering in the world while still retaining the same amount of knowledge of God's existence and character.
- Man is in rebellion, and many of the evils we see are caused by humans misusing their free will to harm others and cause suffering
- For those who accept Christ, suffering is redeemed by eternal life with God, which is a benefit that far outweighs any sufferings and evils we experience in our earthly lives

Arguing for God in 3.

1. If God exists, gratuitous evil does not exist.
2. *God exists*
3. Therefore, gratuitous evil does not exist.

Four reasons to think that God exists (premise 2 from above):

- the kalam cosmological argument
- the fine-tuning argument
- the moral argument
- the argument *from* evil

# Bible study: Was the resurrection body of Jesus spiritual or physical?

**Wintery Knight** · 17 January 2021 · Archived copy · Original

Sherlock Holmes and John Watson are going to take a look at the data

So, everyone from left to right accepts the early creed in 1 Corinthians 15:3-7 being dated to 1-3 years after the death of Jesus, even atheists like Crossley, Ludemann and Crossan. The thing is, some people are not sure that the appearances of Jesus to individuals, groups, and skeptics really were physical appearances. They say "well, Paul's appearance was non-physical, so the other ones must have been, too".

Let's take a look.

Here's a paragraph from my friend Eric Chabot, from his blog Think Apologetics. He explains why Paul's use of the word "resurrection" to describe what the other witnesses saw means *bodily* resurrection.

He writes:

> If Paul did have a vision then the term "vision" is vague and must be defined. As Licona points out, visions are either objective (i.e., something that is seen without the use of our natural senses) or subjective (i.e., a product of our minds). The real problem is with the vision hypothesis is that it doesn't explain Paul's use of resurrection to explain what had happened to Jesus. The two words are used for resurrection in the New Testament "anastasis" (rising up) and "egersis" (waking up), both imply a physical body**.** Furthermore, the use of the word "opethe" (the Greek word for appeared) shows the Gospel writers did believe that Jesus appeared physically. "There you will see (opethe) him" (Matt. 28:7); "The Lord has risen and has appeared (opethe) to Simon" (Luke 24:24). When they used "opethe" here, it means that He appeared physically to them.

> So when Paul gives his list of appearances in 1 Cor. 15, the issues becomes whether the appearance to him is the same as it was to the disciples. There is no doubt the post resurrection body of Jesus (after the ascension) had to be somewhat different than the body the disciples saw. Also, whenever the New Testament mentions the word body, in the context of referring to an individual human being, the Greek word "soma" always refers to a literal, physical body.Greek specialist Robert Gundry says "the consistent and exclusive use of soma for the

> physical body in anthropological contexts resists dematerialization of the resurrection, whether by idealism or by existentialism." [9] Furthermore, in N.T. Wright's The Resurrection of the Son of God shows that the Greek word for resurrection which is "anastasis" was used by ancient Jews, pagans, and Christians as bodily in nature.

Now, I think my view on this, and I'm not sure if Eric would correct me, is that Paul got an objective but non-physical vision of Jesus. There was something there that everyone else could see and hear, in my view. But in my view Paul's "veridical" vision was post-ascension, and so non-physical. Paul uses the word resurrection to describe what the other eyewitnesses saw (and he met them at least twice, according to Gal 1 and Gal 2), and that means physical resurrected body.

Eric Chabot writes this in another place:

> **Acts 9- Paul's Damascus Road Experience**
>
> Here we see whatever happened, this was after the ascension. Hence, to say Paul saw the exact same Jesus before he ascended is hard to infer from the text. There simply isn't enough information here. The Bible says, "they heard" the same voice Paul did " (Acts 9: 7). But they "did not see anyone " (Acts 9: 7). Notice Paul was physically blinded by the brightness of the light. One way or the other, the experience involved something that was external to Paul. It wasn't something that was the same thing as a vision that Paul talks about in 2 Cor. 12:1. Furthermore, the phrase "he let himself be seen"' (ōphthē , aorist passive, ), is the word Paul uses in 1 Cor. 15:7 to describe of his own resurrection appearance as the other ones in the creed. As Paul Barnett says:
>
> "It is sometimes claimed that the word appeared (ōphthē) means a mystical seeing, as of a vision, and that since this was what Paul "saw" it was what the other apostles "saw." In other words, after death, Jesus was taken directly to heaven whence he "appeared" to various people, mystically, as it were. This however, is not all the meaning of Paul's words. First, the word ōphthē, "appeared" is not limited to visionary seeing it is also used for physical seeing. Moreover, the verb raise used in the phrase 'raised on the third day" is used elsewhere in combination with the words "from the dead" which literally means "from among the corpses." Thus raised preceding appeared gives the latter a physical not a mystical meaning. Christ, as "raised from the dead" ….appeared." Furthermore, when Paul asks " Am I not free? Am I not an apostle? Have I not seen Jesus our Lord?"(1 Cor. 9: 1), he is using the ordinary word horan, "to see" for physical sight. If "seeing" the Lord "raised from the dead" qualified others to be apostles, then Paul is, indeed, an apostle. It was no mere subjective vision that arrested Paul en route to Damascus. (8) .
>
> In the end, word studies can't entirely resolve this issue. We need to remember the etymological fallacy as well. We would have to look at all the texts that speak of resurrection (including the entire 1 Cor. 15 chapter in their entire context as well as the anthropology of the New Testament. We also need to study the resurrection in light of the Second Temple Jewish period. See our reading list here for some resources that may help.

But conservative ancient historian Gary Habermas seems to think that Paul got the physical body as well.

He says:

> Now, I said before in 1 Corinthians 15, Paul could have chosen to only use the word *pneuma*. He doesn't. He does say "spiritual," but he's got an adjective there. He also says, *soma*, "body." What did Paul mean?

> Philippians Chapter 3. It's a short chapter. There are 21 verses, but Paul says three things in one chapter that indicate he's talking about a physical resurrection. In the opening verses he says, "I was a Hebrew of the Hebrews" and "as touching the law," he says, "I was a Pharisee." Now, it's very well known that the Pharisee believed in a bodily resurrection. In fact, according to Acts 23, as Paul was being taken captive by the Romans to prevent his being killed, he shouted out to the group of people and said, "Why are you taking me? Because I believe in the resurrection of the dead?" He meant a literal resurrection.
>
> When the Pharisees heard that, they said there's nothing wrong with this guy. But the Sadducees [who didn't believe in the Resurrection] didn't like it. So as a Pharisee, he's agreeing with the Pharisees.
>
> So, the first evidence is from Philippians 3. As a Pharisee, Paul believes in a physical resurrection.
>
> Secondly, in verse 11 he says, "That I may attain the resurrection of the dead." Now, the normal Greek word for resurrection is *anastasis,* but in this passage, Philippians 3:11, he puts a prefix on there, ***ek*** *anastasis.* ***Ek****anastasis*, according to all Greek scholars that I know of, is translated in this passage: "The out resurrection from among the dead." Paul said, "I want to attain the out resurrection."
>
> Now, to a Jew, "out resurrection" means "what goes down is what comes up." You come out from death. And then just a few verses later, Philippians 3:20,21, he said, "From Heaven, we look for Jesus who will change our vile *soma* (body) to be like unto His glorious *soma* (or body)," when he should have said *pneuma*, according to this other view.
>
> So he's a Pharisee who believes in a physical resurrection. ***Ek*** *anastasis*—"resurrection from out among the dead ones."
>
> Thirdly, Paul says, "He Jesus will change ***my body*** to be like ***His body***."

> So right there in Philippians 3 alone, I think the picture of Jesus being some wispy spirit that appeared to him on the road to Damascus doesn't fit Paul's own data.

Yes, that's why Philippians is my favorite book. You can get so much useful theology out of it. Something about the resurrection in Phil 3, something about Jesus' divinity in Phil 2, and loads of practical advice on stewardship, charity, fellowship, endurance and practical love for others throughout. Some of it takes a little digging, but that's what commentaries are for, am I right? But I digress.

If you want to read something a little more challenging, I found a paper from the Evangelical Theological Society (ETS) from their journal, where it talks more about soma and anastasis. If you want a bit of a challenge, download the PDF and read it. It's by Kirk R. MacGregor and the title is "1 Corinthians 15:3B–6A, 7 And The Bodily Resurrection Of Jesus".

# What's the real evidence for 2020 Election Fraud?

**Wintery Knight** · 18 January 2021 · Archived copy · Original

Many small and right leaning news sites talk about indisputable proof of election fraud, while the mainstream media (MSM) emphatically claim no widespread fraud. But the MSM uses strange tactics when discussing allegations of fraud. They often:

1. Point out errors made by Trump's legal team, or make a big deal out of debunking unsubstantiated election fraud claims, but stay silent on many real issues.
2. Highlight the Department of Homeland Security's CISA statement that "the November 3rd election was the most secure in American history." Even though the voting machine companies accused of fraud (Dominion and Smartmatic) are members of CISA who issued that statement.
3. Insist recounting fraudulent ballots proves they're legitimate.
4. Disprove accusations of election merely by having those accused of election fraud explain that they're not guilty of election fraud. Case Closed.

Of course not every claim of fraud has merit. I've spent about 40 hours investigating, reading both sides, weighing evidence, and dividing truth from myth. What follows is the most substantial evidence I've found:

## 1. Counties swing toward Democrats after installing Dominion Voting Machines.

Dominion is the largest provider of voting machines in the US. About 40% of US citizens vote using Dominion machines.

Actuary and insurance fraud specialist Ben Turner looked at counties in 49 states, comparing 657 counties that had adopted Dominion voting machines versus 2,388 counties that had not, since 2008. Turner analyzed with a varying number of control factors–including race, urban/rural shifts, immigration, education, manufacturing dependency, creative-class population, voter preference, and others–up to 100 factors. The counties that installed Dominion machines consistently had 1 to 3% votes shift toward the Democratic presidential candidate versus those that didn't. The Epoch Times and two statistical experts validated Turner's data.

An unrelated study looked at all 3,006 counties in the US, comparing how Biden performed in actual votes versus polls prior to the election. They found that in counties with Dominion voting machines, Biden did better than expected 78% of the time. While in counties without Dominion voting machines, Biden performed better than expected only 46% of the time. On average, counties with Dominion voting machines improved Biden's score above expectations by 5.6%. This trend was maintained even in the strongest Republican and Democrat-leaning counties.

## 2. Dominion Voting Machines are Designed to Change Votes

Following the 2020 election, Cybersecurity analyst Russel Ramsland visited Antrim County and Central Lake Township in Michigan and (with a judge's permission) examined Dominion voting machines. In a detailed report, he noted:

1. 68% of the votes in Antrim county could not be read by the voting machine. These votes were then adjudicated, a process where an unknown and unobserved administrator would manually enter the values of the votes. (Page 2) He found "all adjudication log entries for the 2020 election cycle are missing" even though there were "vote adjudication logs for prior years." This "violates state law and prevents a meaningful audit." (Page 3)
2. This high rate of adjudication was "a 2020 issue not seen in previous election cycles still stored on the server."

(Page 3)

3. "All security logs for the day after the election, on election day, and prior to election day are gone." "Other server logs before November 4, 2020 are present; therefore, there is no reasonable explanation for the security logs to be missing." (Page 4)
4. In Central Lake Township, MI, the town clerk re-ran the ballots from a local election on Nov 5th, and then again on Nov 6th after a patch from Dominion was applied. "This resulted in greater than a 60% change in voting results, inexplicably impacting every single election contest in a township with less than 1500 voters." (Page 11)

Recall that about 40% of US citizens vote using Dominion machines.

Mainstream media and fact checking websites have not addressed these points and instead discredit Ramsland by pointing out that in one table from a 9 page affidavit, Ramsland mixed up counties and townships from MN and MI, along with their totals. Perhaps this could be explained because both states start with "Mi" and Ramsland is from Texas. As well as being under the clock, racing to compile evidence and file charges before votes are certified?

In 2017, Democrat senators Elizabeth Warren, Amy Klobuchar, and Ron Wyden issued a formal complaint in to Dominion about vote switching.

According to the Epoch Times, in October, UBS Securities LLC paid $400 million to Staple Street Capital Group LLC, which owns Dominion Voting Systems, and UBS Securities LLC has ties to the communist party in China. The transaction can be seen on sec.gov.

Director of national intelligence John Ratcliffe confirmed yesterday that China sought to influence the election, but did not go into detail. In a Dec 3 Op-Ed in the Wall Street Journal, Ratcliffe wrote: "The People's Republic of China poses the greatest threat to America today, and the greatest threat to democracy and freedom world-wide since World War II. The intelligence is clear: Beijing intends to dominate the U.S. and the rest of the planet economically, militarily and technologically. Many of China's major public initiatives and prominent companies offer only a layer of camouflage to the activities of the Chinese Communist Party.

## 3. Non Citizens Vote

A JustFacts analysis shows that historically about 16% of US non-citizens illegally register to vote, and about 82% of the time they vote Democrat. Those numbers alone are more than enough to swing the election from Trump to Biden in Arizona (51k) and Georgia (55k). Arizona and Georgia were prevented from verifying voter citizenship by the Obama administration rules.

This analysis was challenged by USA Today, but rebutted in a counter-response by JustFacts.

## 4. USPS Changed Ballot Dates

Project Veritas interviewed USPS workers from Michigan and Pennsylvania who said the offices were illegally changing dates on ballots to allow late votes, even those postmarked on Nov 5th and 6th. Both post office supervisors hung up the phone after they were asked about it. Claims circulated that USPS worker from PA retracted his statement, but he denies retracting anything, saying he was coerced into signing a retraction.

Changing the dates to count more mail in ballots skews the election because Biden's supporters are more likely to vote by mail. If this process was widespread, or only performed on absentee Ballots for Biden, it could've significantly altered presidential election tally.

## 5. Various Fraud in Georgia

### Missing and Extra Absentee Ballots

Georgia records show 138,029 voters requested absentee ballots but never returned them. Matt Braynard was the strategic director of Trump's campaign in 2016. Braynard called these voters. Among those who responded, he found:

1. 33.29% said they actually DID return an absentee ballot, even though the state had no record of their vote.
2. 18.39% said they never even requested an absentee ballot.

The Leftist FactCheck.org criticized Braynard's methodology because only 0.4% responded to his survey, and because Braynard didn't account for late ballots, missing/mismatched signatures, or voided ballots. But it's hard to imagine how those factors could lead to more than a small percentage of error.

### "Suitcases filled with Ballots"

In a widely shared video, security camera recordings show suspicious activity during Georgia's vote recount in Atlanta's State Farm Arena. At about 8am on election day, a lady with blond braids puts large containers of ballots under a table. Those containers are undisturbed as vote counting proceeds throughout the day. Then poll observers go home at 10:30pm. Afterward, a few remaining workers pull out the same large boxes and for the next two hours, feeding the ballots into machines that can each process about 3000 ballots per hour.

The Associated Press and other news outlets claim this video is debunked because they were ballot containers and not suitcases, as some had claimed. And because Georgia election official Fulton County Elections Director Richard Barron told them "no observers were ever told to leave the facility." However:

1. Republican observers Mitchell Harrison and Michelle Branton signed sworn affidavits say they were told to go home by a lady with blond braids. Prior to that were kept at such a distance it was impossible to meaningfully observe, as can be seen in the video recording. Remember in the video it was the blond lady with braids who brought in the hidden vote containers.
2. ABC News likewise reported on election night that "the election department sent the State Farm Arena absentee ballot counters home at 10:30pm" And the Atlanta Journal Constitution: "They planned to stop scanning absentee ballots at 10:30pm and pick it up back in the morning."

The election officials lied about sending the observers home raises even more suspicion about the late night counting activity.

### Unfolded mail in ballots with perfect bubbles all for Biden

19 witnesses signed sworn affidavits (See Exhibits A through U in document 6 here) describing suspicious activity during the Nov 14th recount of Georgia's Nov 3 ballots.

Among them was Susan Volyes, a vote recount observer in Fulton County, Georgia with 20 years experience handling ballots. In a sworn affidavit she describes:

1. Encountering a ballot box of 98 votes for Biden and only 2 for Trump, with paper of a different texture, pre-folded to fit into scanning machines, no markings of where it has come from, with bubbles "unusually uniform, perhaps even with a ballot-marking device."
2. The next day she and her team were given a box of only 60 ballots to check, while other teams were overwhelmed with boxes of over 3000 ballots. After asking to help with counting the other ballots, the officials were "adamant" she and her team go home.
3. Other teams were counting ballots individually, with no one verifying the results.
4. She and her team were asked to sign a paper saying they had received and verified the voting machines before the voting machines even arrived. Later when the machines arrived they were not sealed or locked, the serial numbers didn't match, and the coded tags over the memory card were broken.

Maria Diedrich also observed the recount in Fulton County. She reported in a sworn affidavit:

1. “one counter seemed to be making piles of 9 (but counting them as 10)”
2. When “an elderly counter wrote down the number of ballots, she couldn’t remember the number, the person with her said a different number, they finally agreed on a number” and then put “the number onto the official Audit Board Batch Sheet
3. Some of the Republican watchers were asked to go home after it was announced “there were too many party monitors.”

This article from the Epoch Times outlines irregularities described in those and the other affidavits:

1. Additional witnesses seeing “hundreds of these ballots seemed impeccable, with no folds or creases.” “No creases in the mail-in ballots giving the impression that they were never folded into an envelope and mailed.” With “bubble selections were perfectly made (all within the circle), only observed sections in black ink, and all happened to be selections for Biden.” And “thousands of ballots that just had the perfect bubble marked for Biden and no markings in the rest of the ballot,” without corresponding envelopes.
2. Signatures not being verified.
3. Biden’s name being called “over 500 times in a row.” And “hundreds of ballots at a time were counted for Biden only.”
4. “Many of the boxes of ballots had voted 100% for Biden and 0% for Trump.” And “many ballots had markings for Biden only, and no markings on the rest of the ballot,” while none of the Trump ballots were marked in the same fashion.
5. Military ballots did “not have one specific precinct code on them” but instead had “multiple precincts printed” so it was impossible to tell which precinct the voter was registered.
6. “Widespread fraud favoring candidate Biden only.”

Republican recount observer Hale Soucie also reported seeing a worker counting Trump votes for Biden, who continued doing it even after he reported her and a supervisor talked to her.

In 2019, Georgia voting machines were touted as secure because they print “a hard copy of the ballot for voters to review before they cast it.” However, less than a month before the election, “A federal judge… declined to order the state to abandon its touchscreen voting machines in favor of hand-marked paper ballots for the November election.” Marilyn Marks, executive director of the Coalition for Good Governance, lamented the decision: “We are deeply disappointed that Georgia voters will be voting in this important election on unreliable touchscreen machines that produce results that cannot be audited.”

Over 106,000 out of more than half a million ballots were adjudicated in Fulton County, which includes Atlanta. Adjudication in Georgia allows changing votes on a ballot without a log of what was changed.

## 6. Various Fraud in Michigan

### Melissa Carone

Cybersecurity expert Melissa Carone’s was a contractor for Dominion Voting Systems in Detroit who worked at Detroit’s TCF Center on Election day. Her testimony before Michigan lawmakers was shared widely on social media.

“I observed numerous employees, city workers, running batches of ballots through the tabulators countless times, without discarding them first… Instead of discarding, they were just rescanning, rescanning, rescanning. Counting ballots nine to 10 times.”

Carone describes talking to her manager about the problem: “He [Nick] said, ‘Melissa I don’t want to hear that we have a problem, we are here to assist with IT, we are not here to run their election.’ And at that point, I was really frustrated and upset, I could tell what was going on. They were cheating. It was very, very apparent.” A Republican

poll challenger confirmed the legitimacy of Carone's statements.

Carone was asked why more people hadn't come forward: "My life has been destroyed because of this. I've lost family, I've lost friends, I've been threatened, my kids have been threatened, I've had to move, I've had to change my phone number, I've had to get rid of social media. Nobody wants to come forward. I can't even get an actual job any more, because Democrats like to ruin your lives."

Carone estimated about about 30,000 ballots were scanned multiple times. Biden is alleged to have beat Trump by only 12,670 votes in Georgia.

How did the leftist media discredit Carone? Business Insider pointed out Carone's fiancé once repeatedly used her phone to send sex tapes to his ex-wife. Super creepy, but does that affect Carone's testimony? Slate makes fun of her tone, claiming she and the others like her are cranks, only there to be part of something that matters. Saturday Night Live showed a skit satirizing her as a drunk.

### Mail in ballots with serial numbers in order

In Detroit, Michigan, an election worker described mail in ballots arriving with their id's in order, but missing dates. She reports others becoming angry when she tried to report it:

"These are absentee ballots, mail in ballots. They cannot be in sequence. 2232 cannot have 2233 next to it, cause if they're mailed in they come in all different numbers… there was not even a date on those envelopes… Then I said what is the date on this one? Then they got really mad at me. They said 'you're not letting us do our job, you're disturbing us.'"

### Other Testimonies from Michigan

In Detroit, Poll challenger Andrew Sitto reports that "tens of thousands" of ballots arrived at 4:30am, with all he observed going to Biden. Poll challenger Daniel Gustafson confirms, adding that the ballots arrived in large, unsecured bins, with no label indicating their source of origin. Republican poll challenger Robert Cushman says he saw poll workers adding votes from unregistered voters, registering them all with a Jan 1, 1900 birthday. All three men shared their testimony under sworn affidavit.

Poll worker Connie Johnson described three vehicles arrived in Detroit with 130 thousand ballots that literally 100% were for Biden. Afterward GOP ballot watchers were denied access.

Corresponding with these vote dumps, professor of political science Paul Kengor found that on "November 4 in Michigan at roughly 6:30am, 141,258 votes came in for Biden, and only 5,968 for Trump. In Wisconsin at 3:42am., also on November 4,143,379 votes came in for Biden and a puny 25,163 for Trump. On the same day in Georgia at 1:34am, 136,155 votes came in for Biden, and only 29,115 votes came in for Trump."

In this video (mirror), Antrim county poll workers are shown discussing seeing the same signatures on multiple ballots, and their supervisor angrily insisting they ignore it and move forward.

## 7. Various Fraud in Pennsylvania

As in Georgia, 2016 Trump campaign strategic director Matt Braynard also phoned absentee voters in Pennsylvania. Among the 1706 people who responded to his survey, Braynard found:

1. Among 1706 people that PA had marked as absentee voters, 556 had never requested absentee ballots.
2. Among 1137 who did request absentee ballots, 453 mailed their ballots back but PA did not count their ballots.

That means 33% of ballots received were not mailed. 40% of mail in ballots that were mailed were not counted. Duplicate names or other mismatches can't explain an error rate this high. In PA there were 3,087,524 mail in ballots requested and 2,629,672 returned. Extrapolating, that gives about 1 million votes from absentee ballots that no voters requested, and 1 million absentee ballots that weren't counted. OANN uses different methods to arrive at

1.5 million fraudulent votes in PA.

At a hearing in Gettysburg, Pennsylvania, on Nov 25, retired Colonel Phil Waldron testified to the PA Senate Majority Committee that a batch of ballots recorded 570,000 votes for Biden and only 3,200 votes for Trump. 99.4% of votes for Biden. You can see the video here, at 1:31:15. In that article for the American Spectator, political science prof Paul Kengor states, “this electoral bombshell has been completely ignored by the mainstream press.” I couldn’t find any mainstream news sources mentioning it either.

Biden is alleged to have won PA by 81,660 votes.

## Conclusion

This isn’t an exhaustive survey of fraud evidence in the 2020 presidential race. For example I didn’t even include affidavits from witnesses seeing fraud in Wisconsin or Nevada. Nor did I even go through the Navaro Report or many of the claims listed on HereIsTheEvidence.com.

But what I’ve seen is more than enough to convince me that Biden will not be a legitimately elected president when sworn in this Wednesday.

If anything here is incorrect, please comment below and I’ll fix it.

# Expect the Biden administration to follow Canada in using Covid to persecute churches

**Wintery Knight** · 19 January 2021 · Archived copy · Original

Lots of pious "Christian" leaders were desperate to proclaim their virtue by talking incessantly about Trump's deplorable character during the last 4.5 years. "Look at me", they said, "I'm so moral – and isn't that the point of the Christian religion? To make me look moral to other people?" Their goal was to get more non-Christians to accept them. They didn't know or care about legislation or judges. They cared about their own happiness.

But more intelligent Christians understand that elections are always about laws, policies and judicial nominations. All that will now be decided by secular leftists for the forseeable future. We can look to Canada to see where our new secular left overlords will take us.

Press release from a Canadian church:

> January 8, 2021
>
> FOR IMMEDIATE RELEASE
>
> PASTORS, ELDERS, AND CHURCH CHARGED FOR WORSHIPING TOGETHER
>
> MAXIMUM TOTAL PENALTY IS $10.8 MILLION PLUS JAIL TIME IF CONVICTED
>
> This week two pastors of Trinity Bible Chapel received two charges each for violating the Reopening Ontario Act on January 3, 2021. An additional pastor, three additional elders, and the church itself received one charge each for violating the Reopening Ontario Act on the same date. Each personal charge carries a maximum fine of $100,000 and one year in jail, while the charge to the church as an institution carries a maximum fine of $10,000,000 if convicted. Please note that the fine to the church poses no personal risk to individual members. This is all for gathering a congregation to worship Christ in obedience to Scripture. The elders and the church have retained legal counsel from the Justice Centre for Constitutional Freedoms (JCCF) who plan to represent us in court.
>
> Our congregation gathered for worship from June 14, 2020 until December 24, 2020 with no reported outbreak of COVID-19 and with no interference from the authorities. The only difference is that the Province

of Ontario entered its second lockdown on December 26, 2020.

This is the second week in a row that all elders have been charged. Last time members of the Waterloo Regional Police Service delivered our summonses to us at our homes, but this time they were delivered by regional by-law officers.

Being advised by the JCCF, we will not hold in-person gatherings in excess of 10 persons at Trinity Bible Chapel, commencing immediately, until the end of the current lockdown period on January 23. We plan to conduct drive-in services on the Lord's Day. We know that this decision is heartbreaking for the many people who have found hope during our church services and who are also already burdened with despair by the destructive measures of our government, but we believe it is in the best interest of the church for various reasons, which we might make clearer in due course. We are committed to regathering as a congregation in person as soon as possible.

As we walk through this storm, our eyes are joyfully fixed upon our Saviour who can end this trial with one small word. He is a kind and gentle Saviour, and we can trust Him. "I lift my eyes to the hills. From where does my help come? My help comes from the LORD who made heaven and earth" (Psalm 121:1-2).

In order to demonstrate your commitment to gathering for worship, we ask that you attend our drive-in worship service this Sunday at 10:30 AM. We do ask that all who attend our drive-in service remain in their vehicles in accordance with provincial regulations. The Province of Ontario considers it unlawful and dangerous for you to exit your vehicles to speak with each other on the church property, but you are apparently free to exchange greetings amidst the crowds of shoppers at Walmart which is 3.6 kilometers from our lot.

Further internal communication will come to our congregation at a later time.

# Report: Biden administration preparing for “widespread rollback” of abortion restrictions

**Wintery Knight** · 20 January 2021 · Archived copy · Original

[image]
Major pro-abortion group endorses Joe Biden for President
Daily Wire:

> The incoming Biden administration is reportedly preparing a “widespread rollback” of many pro-life policies inked during the Trump administration, according to NBC News.
>
> The initiative will likely restore Title X funding to Planned Parenthood, expand abortion providers’ ability to operate abroad using taxpayer funds, eliminate protections for religious employers who do not want to pay for employees’ contraceptives, and could even eliminate the Hyde Amendment, which protects American taxpayers from directly funding abortion, the outlet notes.
>
> Biden is expected to expand abortion rights dramatically within the first 100 days of his presidency.

Overturning Trump’s pro-life laws and policies:

> “Reproductive rights advocates expect Biden to quickly overturn Trump-era rules, like banning federal funds for foreign and national health organizations that promote and provide abortion and giving employers more freedom to deny free contraceptive coverage for their workers,” NBC reported Tuesday.
>
> At issue is the “Mexico City Policy” or, as abortion rights groups refer to it, the “global gag rule,” which prevents non-governmental and aid organizations that operate abroad from receiving grant money to fund abortion services. When President Donald Trump reinstituted the Mexico City Policy early in his term, he cut off a major source of funding for Planned Parenthood’s international arm.
>
> Also at issue is Title X, which, at one point, allowed Planned Parenthood to receive millions in government resources to provide family planning services to low-income populations. Trump updated Title X to cut off any organization providing abortion services alongside family planning, effectively eliminating Planned Parenthood from the program unless it stopped doing abortions. The organization chose, instead, to walk away from the program.
>
> Despite Supreme Court rulings siding with religious employers over Affordable Care Act authors who wanted to force groups like the Little Sisters of the Poor to provide contraceptives free of charge to their employees in direct conflict with their closely held religious beliefs, Biden has pledged to strengthen such mandates, leaving many Catholic and Christian groups in the line of fire.
>
> DISRN also reports that “Biden has promised to ‘codify’ abortion into federal law in an effort to prevent any potential Supreme Court overturn of Roe v. Wade and combat the increasing number of state policies that seek to protect the life of the unborn” and that “both Biden and Congressional Democrats have also discussed repealing the Hyde Amendment in 2021, which would allow taxpayer dollars to be directly used for aborting children.”
>
> […]As The Daily Wire reported earlier this year, Biden also appointed former California Attorney General Xavier Becerra to head his Health and Human Services department, which is its own threat to the pro-life movement. Becerra tried to force pro-life pregnancy centers, which assist pregnant women without offering them the option to abort, to provide women with information on the abortion procedure and refer patients to abortion clinics. The Supreme Court struck down Becerra’s order.

So, I was having conversations with some of my young evangelical friends who follow the likes of Russell Moore,

Beth Moore, David French, and other prominent Never Trump conservatives. They did urge Christian voters to support the candidate who would prevent the Equality Act or the Reproductive Health Protection Act from becoming law. These are Democrat bills which passed the House and will likely become law under a Democrat Senate and a Biden presidency. The Never Trump Biden-supporters don't even know about these bills, or what's in them. How could they? They scoff at Parler as a "conservative echo chamber" and swallow anything CNN and NPR spoon-feed to them.

Many of these Never Trump conservatives loved to tell me how Kamala Harris was not really liberal, despite vote-rating organizations on both sides calling her *the most liberal senator.* And they assured me that if the Democrats won in November, none of their policies would ever become law. After all, the important thing is to prove one's own virtue to one's peers by wailing about Trump's tweets, or whatever "scandal" the news media has decided to focus on, instead of the CORE ISSUES THAT MATTER TO CHRISTIANS.

Now, my Never Trump friends often send me articles from pastors like Russell Moore, trying to respond to my concerns about POLICY with tirades about Trump's character. But I am not concerned about Trump's character – I am concerned about Biden overturning abortion restrictions. It is more important to me that we protect unborn children than that we allow ourselves to be led around by the progressive mainstream media about their priorities. We knew about this pro-abortion agenda, because we could see the legislation that the Democrats had already passed, as well as what Joe Biden was promising to do. There is no excuse for Never Trump conservatives who will now see what their votes for Biden achieved.

# Biden's first day agenda: who benefits?

**Wintery Knight** · 21 January 2021 · Archived copy · Original

It's not Americans.

Daily Wire reports:

> On Wednesday, NBC News reported on President Biden's plans to "hit the ground running," listing the plans Biden has announced for his first day in office, including:
>
> - *Rejoin Paris Agreement*
> - *Repeal Trump travel ban*
> - *Halt border wall construction*
> - *Mask mandate*
> - *Extend eviction freeze*
> - *Unveil immigration plan*
> - *Extend student loan pause*
> - *Revoke permit for Keystone XL pipeline*
>
> NBC News reported Wednesday that "Biden will sign more than a dozen executive actions Wednesday when he arrives at the White House after having been sworn in as the 46th president, including measures to rejoin the Paris Agreement on climate change, repeal Trump's restrictions on travel from several Muslim-majority countries, stop construction of the Southern border wall and mandate wearing masks on federal property."

As Dan Crenshaw notes, cutting off domestic oil helps Russia, because they will pick up the slack when we can't sell our oil.

Fox Business:

> According to the Keystone XL website, the project, initially proposed more than a decade ago, would sustain about 11,000 U.S. jobs in 2021 – including 8,000 union jobs – and generate $1.6 billion in gross wages.
>
> It is unclear how the Biden administration plans to address the job losses, but his $2 trillion clean energy infrastructure plan, with its goal of reaching net-zero emissions by 2050 at the latest, aims to "create millions of good-paying jobs that provide workers with the choice to join a union and bargain collectively with their employers," according to his website.
>
> The plan targets the creation of 1 million jobs within the auto industry; "millions" of jobs within the power sector; 1 million jobs in building construction; 250,000 jobs "plugging abandoned oil and natural gas wells"

> and more.

The Paris Agreement is disregarded from China and other mass polluters, it just hampers our economy in every way – raising our energy prices and destroying our economy. Trump had already led the world in cutting emissions without it.

New York Post:

> Joe Biden will rejoin the Paris climate agreement soon after being inaugurated as president of the United States. Climate change, according to Biden, is "an existential threat" to the nation, and to combat it, he proposes to spend $500 billion each year on climate policies — the equivalent of $1,500 per person.
>
> […]Rejoining the Paris agreement will solve very little at a high cost. By the UN's estimates, if all nations live up to all their promises, they will reduce global temperature by less than 0.09 degrees Fahrenheit by 2100.
>
> And Paris is costly, because it forces economies to use less or more expensive energy. Across many studies, the drag to the economies is estimated at between $1 trillion and $2 trillion in lost GDP every year after 2030.

Stopping the wall will let in low-skilled illegal immigrants, which passes on costs for emergency room health care, schools, crime, etc. on to the law-abiding tax-payers. It's a disaster. But that's what many low-information American voters chose.

And the economy will also suffer because he's going to put political correctness above prosperity.

Far-left Axios:

> Why it matters: Biden is charting an economic policy that's visibly to the left of Bill Clinton and Barack Obama. If he succeeds, it's going to show up not only in taxes and spending, but also in regulation.
>
> Who to watch: Biden is being pulled to the left on economic policy not only by the Democratic Party, but also by economic orthodoxy.
>
> Led by incoming Treasury Secretary Janet Yellen, the economic policy team has signaled that it will be the first administration ever to construct economic policy around issues like race, gender equality and climate change, rather than around traditional indicators like gross domestic product or deficit ratios.

I hope you're ready for poverty and unemployment. But think how good the Democrats will feel about themselves.

# Biden gives biological men access to women's sports, bathrooms and locker rooms

**Wintery Knight** · 22 January 2021 · Archived copy · Original

The Federalist:

> President Joe Biden issued an executive order on his first day in office, mandating that any schools that receive federal funding must function as if biological males who claim to be females are the same, and vice versa, or risk losing that funding. This pro-transgender policy extends to male athletes who claim their gender identity as a female should allow them to compete on women's teams, receive women's scholarships, and be admitted in women's locker rooms.
>
> […]During his campaign, Biden also vowed to use the Department of Education to investigate and address any violations of transgender students' civil rights, including removing federal school funding or risking legal action. His new executive order also mandates that every agency must act to ensure the enforcement of this new rule within 100 days of Jan. 20.

The Federalist:

> In sum, this executive order combined with Supreme Court precedent amounts to imposing a national sexual orientation and gender identity law on the entire country.
>
> […]Several years ago, a mother told me what her daughters did when transgender students were admitted to their bathrooms in their Las Vegas public high school. They stopped going to the bathroom and using the showers at school. I broke a story about a Florida public school where a coach told me middle-school boys ran out of the showers and locker room, some undressed, in alarm because they found a girl there next to them while they changed and showered. She was transgender, and the coach was threatened with losing his job if he refused to supervise her with the boys in the showers.
>
> Nobody warned the coach or parents of these boys this was going to happen to them. In fact, the Obama administration's guidance that Biden is reviving explicitly instructed schools not to tell parents. It violates the transgender students' rights to privacy, you see.
>
> Girls and boys like these, and those too young or unprepared to take action to defend their modesty and innocence, are now to be told to shut up and deny the fears other people have decided to inflict upon them in

> the name of “equality,” “respect,” and “dignity.” In true Orwellian fashion, Biden proclaims he is seeking goodness while destroying it.
>
> […]These kinds of policies have been used to persecute religious believers, free speech advocates, medical practitioners, and all who affirm the reality that humankind comes in two varieties, and two only: male and female. House Speaker Nancy Pelosi led Democrats in making House rules that ban the use of terms such as “mother,” “father,” “sister,” and “brother” in new federal laws. Will these kinds of speech bans also be applied to public schools, colleges, and other recipients of federal funds? What about cities and state governments? Hospitals?

> You’d better believe it. Federal money is everywhere, giving Biden’s team, commissioned in the order with applying its principles to every area of federal influence possible, plenty of opportunities to harass nuns, other people who pray, little boys and girls in locker rooms, female high school and college athletes and scholarship aspirants — anyone anywhere who dares to live by the obvious reality that men and women are absolutely equal but we are not the same.

These are two of the five major policy changes from the Equality Act. I don’t like that women are denied a path to sports. And I really don’t like that women don’t have bathrooms and locker rooms where they can feel safe. I wonder if the people who voted for Biden knew that this was coming on day one. I knew, but so many people are in an echo chamber of liberal news, including ignorant but otherwise very successful Christians who like to underestimate these threats.

# New study: 70% of households headed by immigrants are collecting welfare

**Wintery Knight** · 23 January 2021 · Archived copy · Original

Net annual cost of illegal immigration

The Washington Times reports on the latest numbers from the Census Bureau.

Excerpt:

> The latest Census Bureau numbers find that more than seven of 10 households headed by immigrants in California, and nearly the same amount in Texas, are on the taxpayer dole.
>
> […]According to the latest numbers from 2014, fully 63 percent of non-citizens are living off at least one welfare program. That translates into 4.68 million households.
>
> […]"Concern over immigrant welfare use is justified, as households headed by non-citizens' use means means-tested welfare at high rates," said the Center for Immigration Studies, in its report on the numbers. "Non-citizens in the data include illegal immigrants, long-term temporary visitors like guest workers, and permanent residents who have not naturalized."
>
> What's most troublesome about the Census findings is the fact that the 63 percent of non-citizens on welfare actually grows to 70 percent for those who stay in-country 10 years or longer — meaning the entitlement mind only solidifies.
>
> Meaning non-citizens on welfare don't tend to get off welfare.

The reason I am posting about this study is because of the widespread perception on the left that all opposition to illegal immigration is just caused by racism. And similarly, support for border security has nothing to do with preventing crime and protecting our national security. It's all caused by racism too. Well, when you look at a study like this, you can clearly see that people who oppose illegal immigration and support border security have other things on their minds than racism.

Right now, we are nearly $28 trillion in debt. And it's climbing by over $1 trillion per year. We're already spending too much money. Interest on the debt is becoming a larger and larger part of our budget, leaving less money for real priorities like defense and infrastructure. Someone is going to have to pay for all these handouts that are driving us into debt. Young people people have the most to lose, because they have their whole professional lives ahead of them.

I just want to be clear about something. I am very much in favor of skilled immigration. I think that people who come here to WORK should be allowed to come here to WORK. While they are WORKING they should be ineligible for collecting any money from the government. They should not be able to vote or influence elections. They should not be able to bring any of their non-working relatives here. They should be deported if they commit a felony. They should be deported if they lose or quit their jobs. And if they are able to keep working, following the law, and staying off the dole, for a period of 10 years, then they should be allowed to apply for green cards. But our current system isn't oriented towards skilled immigrants. All the concern on the left AND on the right AND in the churches is about refugees and illegal immigrants.

Personally, I think we could be a LOT more accepting of skilled immigrants if we got rid of all the welfare programs. After all, if there is no welfare to be collected, then why would people even want to come here? The only reason they would come would be for the right reason – for liberty. And in order to stay, they would have to work and follow the law. That's who we want to bring in. If we *only* brought in law-abiding workers, then we could be a lot more *generous* about letting people of all races in.

And from a political point of view, we don't do well when we import a bunch of big government liberals from countries that don't accept American ideals, like individual liberty and limited government.

As far as I'm concerned, there should only be two paths to citizenship for immigrants: skilled labor and military service. And both of those for 10 years minimum. But that's not how the current system works. I just want everyone to understand that this is not an issue that has no effect on taxpayers. If we bring in unskilled immigrants and refugees, then we are going to have to pay for their schooling, their health care, and maybe even basics like food and spending money.

# Bible study: what difference does the resurrection of Jesus make?

**Wintery Knight** · 24 January 2021 · Archived copy · Original

Bible study that hits the spot

Here's an article from Bible.org, written by famous New Testament manuscript expert Dan Wallace. (H/T Eric Chabot, Ratio Christi OSU)

There is a lot in this article, but I'll just snip out one that I think is interesting.

First, what does the Old Testament say about the doctrine of the resurrection in Judaism?

> The resurrection of the dead was not *plainly* revealed in the OT until very late in salvation history. It was not until the Jews were taken in captivity, in the sixth century BC, that this was clearly articulated. Daniel 12:1-2 is the principal text: it speaks of the resurrection of both the righteous and the unrighteous:
>
> At that time shall arise Michael, the great prince who has charge of your people. And there shall be a time of trouble, such as never has been since there was a nation till that time; but at that time your people shall be delivered, every one whose name shall be found written in the book. And many of those who sleep in the dust of the earth shall awake, some to everlasting life, and some to shame and everlasting contempt. (RSV)
>
> Why was it not *clearly* revealed till then? It was not revealed until there was a *felt* need for it. When the Jews had no present (because of the captivity) they had to look to the future. The revelation of the resurrection came at precisely the time when the people of God needed *hope* for the future.
>
> What is significant about this is how masterful are God's insights into human nature. In the NT era, one religious group in Palestine did not embrace the resurrection as a true doctrine: the Sadducees (cf. Mark 12:18)–that is why they were "sad, you see!" The Sadducees were in charge of the temple. They derived their income from the sacrifices. In a sense, they were the precursors to modern TV evangelists. They had it good! They were the rich aristocracy that ran the place.
>
> **Those who have it good in this life don't often long for the next. The Sadducees illustrate this. The resurrection is a truth especially precious to those who are poor and those who are hopeless. It is precious to those who long for heaven enough that earth holds no sway over them.**

This means something to me. I didn't grow up with parents who had any plan for me. I had to figure out what I was supposed to be doing with my life on my own, because they were both too busy doing their own things. This is true even to this day. After I became a Christian, there were many things that I wanted to achieve in this life. But for a variety of reasons, those most of those things never happened. I wanted to do great things for God, like getting married, having a family, getting a PhD and teaching computer science in a secular university. But things that I had intended to do for God just didn't happen the way I had hoped.

I often find myself thinking of Heaven, and having that eternal perspective on this life. One of the things that is the hardest to accept is that being a Christian makes many things I'd like to do a lot harder. It certainly didn't open any doors at school, or now, at work. I'm glad my salvation doesn't depend on achieving anything in particular. And I'm especially glad that my salvation doesn't depend on what anyone thinks of me. I find it almost impossible in this culture to get any respect by doing the things that I think are really important.

I think if a person were really successful at what they tried to do, then it would be really hard for them to give up living and go to be with Jesus. That's not a problem for me, though. If fact, if the resurrection were not true, then I wouldn't be able to say that my life was a very good life, measuring success the way people do.

**The resurrection teaches correct apologetics methodology**

Did you know that Jesus provided the resurrection as evidence for those who were skeptical of his claims to be God stepping into history?

Here's an article from Got Questions? on the "Sign of Jonah", which appears in the gospels of Matthew and Luke.

It says:

> The phrase "sign of Jonah" was used by Jesus as a typological metaphor for His future crucifixion, burial, and resurrection. Jesus answered with this expression when asked by the Pharisees for miraculous proof the He was indeed the Messiah. The Pharisees remained unconvinced of Jesus' claims about Himself, despite His having just cured a demon-possessed man who was both blind and mute. Shortly after the Pharisees accused Jesus of driving out demons by the power of Satan, they said to Him, "Teacher, we want to see a sign from you." He answered, "A wicked and adulterous generation asks for a sign! But none will be given it except the sign of the prophet Jonah. For as Jonah was three days and three nights in the belly of a huge fish, so the Son of Man will be three days and three nights in the heart of the earth. The men of Nineveh will stand up at the judgment with this generation and condemn it; for they repented at the preaching of Jonah, and now something greater than Jonah is here" (Matthew 12:38–41).
>
> To fully appreciate the answer that Jesus gave, we must go to the Old Testament book of Jonah. In its first chapter, we read that God commanded the prophet Jonah to go to the city of Nineveh and warn its people that He was going to destroy it for its wickedness. Jonah disobediently ran from the Lord and headed for the city of Tarshish by boat. The Lord then sent a severe storm that caused the crew of the ship to fear for their lives. Jonah was soon thrown overboard and swallowed by a great fish where he remained for "three days and three nights" (Jonah 1:15–17). After the three-day period, the Lord caused the great fish to vomit Jonah out onto dry land (Jonah 2:10).
>
> It is this three days that Jesus was referring to when He spoke of the sign of Jonah.

I often bring up the Sign of Jonah when I am dealing with Christians who don't want to learn how to explain their faith to non-Christians persuasively. I'm glad that story is in there!

The resurrection is a very important part of the life of the Christian. I argued in this post that it makes a difference to your feelings about your own life, and it makes a difference to your case-making with non-Christians.

# Big Tech pedophilia: Twitter sued for refusing to remove child porn

**Wintery Knight** · 25 January 2021 · Archived copy · Original

CNBC

TECH

## Here's the final tally of where tech billionaires donated for the 2020 election

PUBLISHED MON, NOV 2 2020·8:42 PM EST UPDATED FRI, NOV 6 2020·6:53 AM EST

Ari Levy
@LEVYNEWS

SHARE

**KEY POINTS**

- About 98% of political contributions from internet companies this cycle went to Democrats, according to the Center for Responsive Politics.

Do you ever wonder what sort of person feels comfortable suppressing free speech of those they disagree with?

Here's a good story from the New York Post:

> Twitter refused to take down widely shared pornographic images and videos of a teenage sex trafficking victim because an investigation "didn't find a violation" of the company's "policies," a scathing lawsuit alleges.
>
> The federal suit, filed Wednesday by the victim and his mother in the Northern District of California, alleges Twitter made money off the clips, which showed a 13-year-old engaged in sex acts and are a form of child sexual abuse material, or child porn, the suit states.
>
> […]at some point in 2019, the videos surfaced on Twitter under two accounts that were known to share child sexual abuse material, court papers allege.
>
> Over the next month, the videos would be reported to Twitter at least three times — first on Dec. 25, 2019 — but the tech giant failed to do anything about it until a federal law enforcement officer got involved, the suit states.
>
> Doe became aware of the tweets in January 2020 because they'd been viewed widely by his classmates, which subjected him to "teasing, harassment, vicious bullying" and led him to become "suicidal," court records show.
>
> While Doe's parents contacted the school and made police reports, he filed a complaint with Twitter, saying there were two tweets depicting child pornography of himself and they needed to be removed because they were illegal, harmful and were in violation of the site's policies.
>
> A support agent followed up and asked for a copy of Doe's ID so they could prove it was him and after the teen complied, there was no response for a week, the family claims.
>
> Around the same time, Doe's mother filed two complaints to Twitter reporting the same material and for a week, she also received no response, the suit states.

> Finally on Jan. 28, Twitter replied to Doe and said they wouldn't be taking down the material, which had already racked up over 167,000 views and 2,223 retweets, the suit states.
>
> "Thanks for reaching out. We've reviewed the content, and didn't find a violation of our policies, so no action will be taken at this time," the response reads, according to the lawsuit.
>
> […]He even included his case number from a local law enforcement agency, but still the tech giant allegedly ignored him and refused to do anything about the illegal child sexual abuse material — as it continued to rack up more and more views.

Morality isn't free. There has to be some sort of rational grounding for it. Something that is sorely lacking about the secular leftists who dominate leadership positions at Big Tech corporations.

# Democrat voters who endorsed Biden now being screwed by his policies

**Wintery Knight** · 26 January 2021 · Archived copy · Original

Let's start with the radical feminists.

Here's a reaction from a far-left feminist web site to Biden's anti-women executive orders:

> One of the first acts of Joe Biden's presidency was to gut sex anti-discrimination laws and eliminate critical protections for women in the federal government.
>
> […]This executive order directs federal agencies to do two things. First, federal agencies are now required to interpret "sex" as also including "sexual orientation and gender identity" in their own internal regulations and workplace policies. Second, agencies are directed to perform a comprehensive assessment of all regulations under their purview, and create a plan with 100 days to "revise, suspend, or rescind such agency actions, or promulgate [propose] new agency actions" **that will impose this interpretation onto all American employers, institutions, and individuals, with no exceptions.**

This is the part that made me laugh out loud:

> **While we strongly support protections from discrimination based on sexual orientation**, the Biden administration has grossly expanded the application of the decision with far-reaching implications for women's rights in nearly every aspect of public life, including Title IX.

This isn't an expansion of the feminist denial of sex differences. It's exactly what they wanted all along. When feminists say that that males and females are *identical* and all perception of sex differences is "discrimination", then they shouldn't be surprised when people take them seriously.

Meanwhile, labor unions – never hotbeds of economic literacy – are beginning to realize that the socialist agenda they endorsed isn't going to result in prosperity. Who knew?

Here's one plumber union endorsing Biden:

> Monday, August 17, 2020
>
> The United Association of Union Plumbers and Pipefitters (UA) today announced that the UA Political Engagement Committee (PEC) has concluded its endorsement process with a decision to endorse former Vice President Joe Biden for President.
>
> "We're not going to sit on the sidelines at the UA. This endorsement is about putting UA members to work and fighting for fair wages and good benefits. Under a Biden Administration, that's exactly what we'll get," **said Mark McManus, General President of the United Association.**

Fair wages and good benefits! That's what they expected from a far-left Marxist funded by radical eco-fascists.

Surprise!

> Monday, January 18, 2021
>
> The United Association of Union Plumbers and Pipefitters (UA) issued the following statement today following the news that the Biden-Harris Administration plans to rescind the permit and effectively end construction on the Keystone XL pipeline:
>
> "The Biden Administration has now put thousands of union workers out of work. For the average American family, it means energy costs will go up and communities will no longer see the local investments that come with pipeline construction," **said Mark McManus, General President of the United Association.**

Just to note, the Biden plan to kill the pipeline was announced *before* the union endorsed him. BEFORE.

If you are dealing with a leader of a labor union, the one thing you know *for certain* is that this person has zero understanding of basic economics or history – specifically, the historical outcomes of implementing socialist policies. Union leaders either have no idea how the world works, or they're just corrupt. Or both.

### Ordinary Americans will be hit, too

Biden is planning to raise the minimum wage to $15, which should result in one million Americans losing their jobs, since their employers won't be able to pay them more to produce the same amount.

Americans for Tax Reform explains:

> A $15 minimum wage would lead to further job losses for Americans. In 2019, the nonpartisan Congressional Budget Office estimated that a nationwide $15 minimum wage would cost at least 1.3 million American jobs, and could cost as many as 3.7 million at the high end. Another study shows that a $15 minimum wage would disproportionately impact women and shut out young, low-skilled workers attempting to enter the workforce for the first time.
>
> The Biden plan also ends the tipped minimum wage, an absurd proposal considering 10,000 restaurants have closed their doors in the last three months alone. Imposing a 600 percent minimum wage increase on an already struggling industry in the middle a recession would only lead to more closures. If Biden is successful, one in three tipped workers would lose their job.

It was tried at the state level and it failed:

> A $15 minimum wage has repeatedly failed at the state level. When Seattle implemented a $15 minimum wage, thousands of jobs were lost, while other workers saw a reduction in hours worked. New York City's minimum wage increase forced 75 percent of restaurants to cut employee hours, and nearly 50 percent to eliminate jobs entirely.

This will be a hard life lesson for people who voted for this policy, then get affected by it.

Just so you know, the elimination of small businesses is a necessary step in the implementation of communism. The more the market is reduced to a few wealthy monopolies, the easier it is for government to step in and take control. The government's job is to promote small business, so that consumers benefit from choice and competition. But that's exactly the opposite of what communism requires.

# Rediscovering Masculinity: Why Today's Men Need to Learn from Real Life Heroes (part 1 of 3)

**Wintery Knight** · 27 January 2021 · Archived copy · Original

The following is a guest post (part 1 of 3) from Nathan Apodaca, who blogs at Merely Human Ministries and Human Defense Initiative. I previously blogged about his legal victory against California State University – San Marcos. In this post, he writes about the first two heroes in his list of four.

---

***"I shall have made nothing, if I had not made mistakes."***

-Winston S. Churchill, in a letter to his wife Clementine while serving in France during World War I

In his book *Letters to a Young Progressive: How to Avoid Wasting Your Life Protesting the Things You Don't Understand,* the well-known conservative professor Dr. Mike Adams had a chapter lamenting the crisis of courage he was witnessing among many young Christian men. While teaching at Summit Ministries in Colorado during the summer, he had noticed many young Christian men lacked the courage to stand by their convictions when pressed upon by the broader culture. Many young men would find excuses to not be bolder in their convictions. Some would cite (but largely misunderstanding) Bible passages such as Matthew 5:38-40, about turning the other cheek, in order to justify a lack of boldness.

Unfortunately, the problem has only grown over the past several years, and affects young women just as it does men. Many men have been left with an identity crisis of sorts, with growing attacks on "toxic masculinity" and a corresponding lack of discussion of what real masculinity looks like. Because of this, many men are left without an understanding of what it looks like to lead, to be courageous under pressure, to face criticism and all manner of vile pushback, and to engage critics with boldness as well as dignity.

One way to answer this problem is to simply examine the lives of men who made history and changed the world for the better. Sadly, thanks to the influence of secular worldviews such as postmodernism, Marxism, and progressivism, this is often met with a sneer. After all, the men who made history often made horrendous mistakes along the way. It's not all that unsurprising that statues honoring great men such as Washington, Lincoln, and others have been viciously attacked and desecrated in the past year. Our culture sneers at heroes, but ironically doesn't have a clue on how to produce better men and women today.

Reading biographies is one way I have personally tried to learn how to be a better man, regardless of what the culture says, and I believe there is great value in studying the lives of those who have made history. Examining the lives of great men should be done honestly, learning from both the triumphs of our historical heroes and from the mistakes they have made. Blind hero worship is foolhardy, but so is an air of "chronological snobbery" and thinking we are better than people of the past because we don't make the same mistakes they made, even while making our own, sometimes graver, mistakes.

Some people may vary in their choice of reading, but generally my selection of biographies to study will fall into three categories: saints, soldiers, and statesmen, and often a mixture of the three. Some were non-Christians, but still exemplify character virtues that deserve examination.

Here is a brief list of some men whose stories I have benefited from studying.

### 1. William Wilberforce (1759-1833)

There is a cultural cliche that is often uttered without much thought, one person cannot change the world. Wilberforce is a wonderful exception. Becoming a minister in the British parliament in his early 20s, and developing a close bond with other notable statesmen such as the Prime Minister William Pitt the Younger,

Wilberforce came of age in British politics during a time of great social upheaval in Europe and abroad, in conjunction with both the American and French revolutions.

Battling a lifetime of health complications, Wilberforce also grappled with the moral and spiritual health of the British Empire, declaring “God has set before me two great objects: The abolition of the slave trade, and the reformation of (morals)”. After gaining invaluable spiritual counsel from older men such as the famed minister John Newton, Wilberforce decided to remain in politics after his conversion to Christianity, and to undertake the monumental challenge of leading the struggle to abolish the British slave trade. Confronting the horrors of the Atlantic Middle passage from Africa to the West Indies and sugar plantation slave trading, Wilberforce also faced setbacks in his own cause for years, due to societal moral apathy and opposition in the ranks of British politics and aristocracy as well as his own health problems. Still, he stayed the course, and was able to see his God-given mission through to the end, with the total abolition of slavery in the British Empire shortly before his death in 1833. His story is told in great books such as Kevin Belmonte’s *A Hero for Humanity,* Eric Metaxes’ *Amazing Grace,* as well as on screen in the 2007 movie of the same name.

## 2. John Newton (1725-1807)

Speaking of Amazing Grace, the story of John Newton is also one that is worth examining. Born on August 4th, 1725 in Wapping, England to a well-known sea captain, Newton as a young man would hardly have seemed like the sort of man to give spiritual advice to the statesman who would be responsible for leading the fight against the evils of the slave trade. Vulgar, proudly atheistic, and rebellious, Newton began a career in seafaring against his own volition. While on a visit with a young lady named Polly Catlett, whom Newton was deeply in love with, Newton was captured a British Navy press gang, and forced into service with the Royal Navy. This began a series of misadventures at sea that found him deserting his ship to be with Polly, being arrested, stripped of his military rank and flogged, (a lenient sentence, as desertion from the Royal Navy in this period often carried with it the penalty of death). Later, he found himself working at a slave processing center on the African coastline. At one point, he became enslaved himself to a sadistic African princess. Along the way, as he experienced many near misses with death, Newton began to realize that maybe there was a God who had been looking out for him.

After escaping the African continent, Newton became a crewmember on a cargo ship bound for America, where he began reading *The Imitation of Christ* by Thomas Kempis. Realizing his own woeful moral and spiritual state, he began reconsidering the truth claims of Christianity. During the same voyage, the ship was caught in a terrible storm and barely managed to limp back to Britain. Later, he married his beloved Ms. Catlett, and remained deeply in love with her throughout the course of her life.

Newton, now a follower of Christ, eventually became the captain of his own slave ship on the Middle Passage, where he began slowly waking up to the evils of slavery, as well as the inhumane environment many sailors lived in.

After a health problem ended his seafaring career, Newton became a minister, and formed several relationships that would ultimately have historical and moral significance in addition to the eternal. One of these relationships was with the hymn-writer and minister William Cowper, a man troubled by suicidal thoughts, depression, and mental illness. It is through this relationship that the most famous song in the world, “Amazing Grace”, was born. The hymn was for a New Years Day service, during a period when Newton was pastoring Cowper during a time of mental anguish. The song reflects Newton’s acknowledgement of his own spiritual state and the beauty of God’s forgiveness.

Another relationship of Newton’s that has already been mentioned is his relationship to a young William Wilberforce. Meeting Wilberforce when he was still a boy and living with his Aunt and Uncle, Newton left a deep impression on the future British statesman. When Wilberforce converted to Christianity and considered leaving politics to become a minister, Newton encouraged him to stay the course. Ultimately, this would have profound implications, as Newton assisted Wilberforce greatly in the anti-slavery cause, even testifying to Parliament himself about the evil and sadistic nature of the slave trade. In a moment of Providential irony that can only be explained by God’s common grace, the formerly bitter atheist and slave ship captain became a key component in the fight to

liberate enslaved men, women and children. Newton maintained an awareness of his own need for Christ until the end of his life, famously remarking just before his death that “Though my memory is fading, I remember two things: I am a great sinner, and Christ is a great savior.”

Newton’s story is told in the phenomenal biography *From Disgrace to Amazing Grace* by Jonathan Aitken, and Newton is portrayed in the film *Amazing Grace* by the actor Charles Finney.

# Rediscovering Masculinity: Why Today's Men Need to Learn from Real Life Heroes (part 2 of 3)

**Wintery Knight** · 28 January 2021 · Archived copy · Original

The following is a guest post (part 2 of 3) from Nathan Apodaca, who blogs at Merely Human Ministries and Human Defense Initiative. I previously blogged about his legal victory against California State University – San Marcos. Today we cover the third hero of four who taught Nathan valuable lessons about masculinity.

---

### 3. Ulysses S. Grant (1822-1885)

Shifting from Britain to the United States, another figure who I have found great benefit in learning from would be Ulysses Grant. For many people, Grant is almost a forgotten figure, and many consider him a failure as a General who merely "got lucky" and a failure as a President. And yet, there is much more greatness to the man than many today have been led to believe.

Born on April 1822 in Point Pleasant, Ohio, with the unflattering name of Hiram Ulysses Grant, a timid and sometimes unthinking young Grant would earn the nickname "Useless Grant" from cruel farmboys in the town, and was considered unexceptional by his father. Later, as a young adult, he was enrolled in the West Point military academy in New York, where a clerical error gave him the middle initial "S", leading many of his classmates to call him "Sam Grant" or "Uncle Sam Grant". Grant's time at West Point was mediocre, but after graduation he was introduced to the sister of one of his classmates, Julia Dent, with whom he fell deeply in love.

After graduation, war erupted between the United States and Mexico. Deployed to Texas as an Army Quartermaster officer, (in charge of supplies), Grant showed incredible coolness and courage while under fire on the battlefront. It was also during this time that Grant fell in love with Mexico and the Mexican people. Disappointed in the treatment of Mexico by the United States, Grant would later become a friend to Mexico when one was sorely needed.

After the war, Grant was able to marry his beloved Julia, (much to the consternation of her slave-owning father, who despised Ulysses). However, Army life soon took Grant westward, where he was posted at Fort Humboldt, in the new state of California. Separated from Julia and their children, dealing with a painfully slow mail delivery system, and without much to do, Grant fell into a deep depression and began to drink heavily. After a drunken incident at the post, Grant resigned his Army commission to avoid being court-martialed. Returning to Missouri to be with his wife and children, Grant began nearly a decade of failed ventures and setbacks that ultimately reduced his family to poverty and humiliation. At one point, while selling firewood on the streets of St. Louis to help feed his family, he encountered a former Army colleague who asked him what he was doing on the street. "I'm solving the problem of poverty", Grant replied.

Grant's integrity during this time is particularly noteworthy. After being given a slave by his father in law, Grant decided he must set the man free. Taking him to the city records office, Grant was told he could gain a great deal of money if he sold the slave; money that could have greatly helped his own financial misery. Instead, Grant refused to take advantage of another man, and purchased the man's freedom.

The decade of the 1850s was particularly hard for the Grants, and by the start of the 1860s, Grant had been reduced to working in his father's leather goods store in Gallena, Illinois, a job he hated.

However, 1861 brought with it the storm of the American Civil War. After the humiliating defeat of Federal troops at the First Battle of Bull Run by Confederate forces, the call was put out for volunteers to form a massive Army to bring the war to a swift end. Grant, knowing there would be great need of good officers, joined the volunteers and quickly gained rank as he trained the new recruits. However, this period was also full of setbacks, and more than

once Grant considered quitting the Army to return home. Still, he stayed the course, and eventually reached the rank of Brigadier General.

In 1862, Grant made a name for himself. With the Civil War developing into two distinct theaters of conflict(an Eastern and a Western Theater) Grant found himself at the forefront of the war's Western theater. Taking a large force and coordinating his operations with the assistance of the US Navy, Grant scored two significant victories at Fort Henry and Fort Donelson in Tennessee, opening a path for follow-on troop movements into Confederate territory and earning the nickname "Unconditional Surrender" Grant. Not a bad turnaround for the man who was once called "useless" Grant as a boy.

Grant faced setbacks, however. Moving his troops south, and preparing to stage an offensive against the Confederate positions at Corinth, Mississippi, Grant was soon caught up in the largest battle ever fought in American history up to that point, the Battle of Shiloh. Finding his troops being pushed back up against their landing areas at Pittsburg Landing on the Tennessee river, Grant looked like the latest in a series of failed Union Generals. With the war in the Eastern theater taking a turn for the worst with repeated defeats at the hands of Robert E. Lee and other Confederate Generals, things looked dim.

However, Grant was a man who knew how to be defeated.

Turning around and reorganizing his troops and supplementing his Army of the Tennessee with newly arrived reinforcements, Grant turned the tide of battle and pushed Confederate forces back to their original lines, causing a Confederate retreat further south.

Grant would go on to gain recognition for his campaign to capture the Confederate bastion at Vicksburg, Mississippi in 1863, which surrendered the same day that the Union won the battle of Gettysburg and thus helped turn the tide of the war. Grant caught the eye of President Lincoln, who was desperate for a general who would take the initiative on the battlefield and actually fight out battles with Lee's Army of northern Virginia, instead of retreating or showing timidity in the face of enemy opposition, as so many eastern theater generals had.

Becoming the General-in-Chief of the United States Army, Grant organized a series of actions that ultimately resulted in the defeat of the Confederate Armies. Still facing a multitude of setbacks during the closing acts of the war and his pursuit of Lee's Army, Grant was finally able to secure Lee's surrender at the little town of Appomattox Courthouse in Virginia in April of 1865, thus bringing the American Civil War to a close.

Grant's character is of particular interest here. On the battlefield, Grant showed incredible courage and coolness under fire. When artillery shells landed near his position, Grant showed remarkable coolness and refused to cave in to fear. When his subordinates would express anxiety over the movement's of Lee's forces, Grant snapped "Quit focusing on what Lee is going to do. Focus on what we are going to do." Grant showed initiative and a refusal to back down.

Lastly, Grant showed great magnanimity towards those he defeated. After Lee's surrender at Appomattox, Grant ensured Lee's troops were treated with dignity, by giving them food and medical care, and allowing them to return to their homes unmolested. When Grant's troops began to break out into celebration of the surrender, Grant ordered the celebrations to be silenced, and ordered that Lee's troops would be treated with respect and dignity as fellow soldiers and fellow Americans once again.

Grant's wartime leadership is remarkable, but he was far from done. Following the assassination of President Abraham Lincoln, Grant found himself caught up in the political fiasco that was the Presidency of Andrew Johnson. With Johnson undoing much of the reconciliation that was so necessary to heal the divisions brought on by the Civil War, Grant stepped up to do what was right. He came to Robert E. Lee's defense when Johnson attempted to have him tried for treason, keeping good on his promise to Lee that former Confederates who had surrendered would be treated with magnanimity, and he stood up to Johnson on multiple occasions. With white supremacist terrorism exploding in the former Confederate states Grant stepped back into his role as a leader. Elected to the Presidency in 1868 and reelected in 1872, Grant brought much needed reconciliation and peace. Helping create the

U.S. Department of Justice, Grant appointed attorneys who helped bring the rule of law to the South and break up the Ku Klux Klan, and fought for the rights of the recently freed black Americans by helping ensure the passage of the 15th Amendment. Grant also worked with Christian advocacy groups to secure protections for American Indians, and helped bring reconstruction to a close and promote healing.

Just before his death in 1885, Grant completed his personal memoirs with the assistance of Mark Twain, the sales of which helped Julia Grant financially after the family experience further setbacks upon leaving the White House.

Of Grant's legacy, the famous orator and abolitionist Frederick Douglass had this to say: "A man too broad for prejudice, too humane to despise the humblest, too great to be small at any point. In him the Negro found a protector, the Indian a friend, a vanquished foe a brother, an imperiled nation a savior."

Several biographies of Grant are worth checking out. Ron Chernow's *Grant* is by far the best, followed by *Grant* by Jean Edward Smith, and *American Ulysses* by Ronald C. White.

# Rediscovering Masculinity: Why Today's Men Need to Learn from Real Life Heroes (part 3 of 3)

The following is a guest post (part 3 of 3) from Nathan Apodaca, who blogs at Merely Human Ministries and Human Defense Initiative. I previously blogged about his legal victory against California State University – San Marcos. Today we cover the fourth hero of four who taught Nathan valuable lessons about masculinity.

---

### 4. Winston Spencer Churchill (1874-1965)

Last, but most certainly not the least, to make the list is Winston Churchill. Born on November 30th, 1874 to an American mother and British Statesman father at Blenheim Palace, Churchill grew up steeped in privilege. Similar to Grant's father, Lord Randolph Churchill believed that his son would never amount to much, and ridiculed both his academics as well as his early military career. Churchill spent his life living almost as if he wanted to find a way to make his father proud. He wound up far exceeding whatever expectations were set for him.

Spending his early career as a war correspondent in the 1890s, Churchill lived a lifetime of adventures and near misses with death, including becoming lost in the Egyptian desert as well as a daring escape from a South American prison after being captured in an ambush during the Boer War. Leaving the Army and having made a name for himself as a write as well as a speaker, Churchill entered politics. Possessing a stunning wit and confident manner, Churchill moved through the ranks of the British political machine. Unfortunately, his confident manner did not always serve him well, and he made multiple horrendous mistakes along the way as well as making statements that would ultimately come back to bite him.

In the early 1900s, Churchill began to see the signs of grave conflict building in Europe with the German Empire and other states. Accepting a position as First Lord of the Admiralty, (the equivalent of the American Secretary of the Navy), Churchill did much to prepare the British military for the coming World War. When war erupted in 1914, Churchill found himself in a key position to help influence the military and defense of the country. In 1915, Churchill believed he could help bring the war to a quick end by opening a second front in Turkey. This proved disastrous. The Gallipoli Campaign, so called because it primarily took place on the Gallipoli peninsula in the Dardanelles islands, proved to be a horrific disaster, with tens of thousands of British, Australian, and New Zealander soldiers killed, wounded or captured in a battlefront that had stagnated just as much as the campaigns on Europe's Western front. Churchill took most of the blame.

Leaving his position in charge of the Navy, Churchill returned to the Army in 1916 and was deployed to the Western Front of the war in France, where he faced numerous close brushes with death, leading him to believe he was being prepared for a purpose later in life. He also acknowledged his own failings, writing to his wife Clementine "I shall have made nothing, if I had not made mistakes".

Following the Armistice in 1918, Churchill returned to politics and his writing, becoming one of the greatest historians and biographers of the era. He helped jumpstart the Royal Air Force and is also credited as the father of the tank and helped pave the way for advances in tank and armored combat. He also continued to make mistakes in politics, finding himself very often on the wrong side of political conflicts, such as Indian Independence from Great Britian, Women's Suffrage, economics, and supporting King Edward VIII up to his abdication of the throne and the subsequent coronation of King George VI. As Adolf Hitler and his Nazi cronies began to take power in Germany in the 1930s, Churchill loudly sounded the alarm.

Unfortunately, as biographer and historian Andrew Roberts points out, few in England at the time wanted to believe a new conflict with Germany was on the horizon. The devastation and bloodshed of the First World War was still fresh in many people's minds. Churchill, however, looking back on his experience with fanatical militant groups in

Sudan, Egypt, and South Africa, knew that the militant fanaticism of Nazi Germany would prove devastating if left unchecked. Churchill loudly, (and rightly), criticized those in the government and those in the Christian church who believed Hitler could be appeased and peace maintained by giving Hitler what he wanted.

He was soon proved right. With *Blitzkreig* unleashed across Europe and multiple countries soon dominated by the Nazis, Churchill stepped up to the plate to replace the disgraced former Prime Minister Neville Chamberlain. It wouldn't be easy. Very quickly France, Belgium and the "low countries" were defeated, and the British Expeditionary Force, an army of nearly 300,000 troops, barely escaped annihilation at Dunkirk. However, Churchill's tenacity, hard-headedness, and stubborn refusal to quit were just what the world needed. As Andrew Roberts puts it,

> "When Churchill was finally made prime minister in May 1940, the British had lost the war-comprehensively, according to every metric-but there was a huge difference between losing a war and realizing that one has lost it…Winston Churchill's primary duty in 1940 and 1941 was to prevent the British people from realizing they had lost the war, and nobody did it better, not least because he utterly refused to accept the logic of the situation himself."

The war quickly took turns for the worst. With Britain the only opponent of Germany left in the fight at this point, Hitler began trying to bomb and starve the British people into submission. Churchill's courageous leadership and example gave the British people what they needed to hold out in the face of disaster until the United States would enter the war in 1941. Even with disastrous outcomes on battlefronts in Africa, the Atlantic and Asia following up defeats in Europe, Churchill never wavered, and in his own words, the Allies eventually "outlived the menace of tyranny" and liberated Europe from Nazism in 1945. Because Churchill refused to give in during the darkest hour in western history, a feat lesser men, (especially his modern critics and haters), would have quickly failed. Because Churchill's courage and leadership helped bring an end to evil not only in Nazi Germany, but later in Soviet Russia, Churchill is a man everyone can learn from, not only in his successes, but also in his (many) failures, which he himself often learned from.

Several books about Churchill are worth reading. *Churchill: Walking With Destiny* by Andrew Roberts is by far the very best, as well as *The Splendid and the Vile* by Erik Larson, and Andrew Roberts' other, shorter book, *Leadership in War.*

Conclusion

Stories of great men are often mocked today by people who are largely living worthless lives themselves. When statues of men like Grant and Churchill are vandalized by young men and women who could just have easily been supporters of slavery in the 1860s and Nazism in the 1930s, it is obvious there is a severe lack of character development in today's young people. Learning not only from the triumphs of past historical figures, but also from their failures, is one of the best and certainly one of the most important ways to grow and prepare ourselves for our own challenges we will face in life.

# William Lane Craig lectures on naturalism at the University of St. Andrews

**Wintery Knight** · 30 January 2021 · Archived copy · Original

Lets take a closer look at a puzzle

Note: even if you have heard Dr. Craig's arguments before, I recommend jumping to the 48 minutes of Q&A time, which starts 72 minutes in.

About Dr. William Lane Craig:

> William Lane Craig (born August 23, 1949) is an American analytic philosopher, philosophical theologian, and Christian apologist. He is known for his work on the philosophy of time and the philosophy of religion, specifically the existence of God and the defense of Christian theism. He has authored or edited over 30 books including *The Kalam Cosmological Argument* (1979), *Theism, Atheism and Big Bang Cosmology*(co-authored with Quentin Smith, 1993), *Time and Eternity: Exploring God's Relationship to Time* (2001), and *Einstein, Relativity and Absolute Simultaneity* (co-edited with Quentin Smith, 2007).
>
> Craig received a Bachelor of Arts degree in communications from Wheaton College, Illinois, in 1971 and two summa cum laudemaster's degrees from Trinity Evangelical Divinity School in Deerfield, Illinois, in 1975, in philosophy of religion and ecclesiastical history. He earned a Ph.D. in philosophy under John Hick at the University of Birmingham, England in 1977 and a Th.D. underWolfhart Pannenberg at the University of Munich, Germany in 1984.

Dr. Craig was in Scotland to lecture at a physics conference, but a local church organized this public lecture at the University of St. Andrews.

Here is the full lecture with Q&A: (2 hours)

Summary:

- Naturalism defined: the physical world (matter, space and time) is all that exists
- Dr. Craig will present 7 reasons why naturalism is false
- 1) the contingency argument

- 2) the kalam cosmological argument
- 3) the fine-tuning of the universe for intelligent life
- 4) the moral argument
- 5) the ontological argument
- 6) the resurrection of Jesus
- 7) religious experience

Dr. Craig does mention an 8th argument early in the Q&A – the argument from the non-physicality of mental states (substance dualism), which is an argument that I find convincing, because a materialist conception of mind is not compatible with rationality, consciousness and moral agency.

**Questions and Answers**

He gets a couple of questions on the moral argument early on – one of them tries to put forward an evolutionary explanation for "moral" behaviors. There's another question the definition of naturalism. There is a bonehead question about the non-existence of Jesus based on a Youtube movie he saw – which Craig responds to with agnostic historian Bart Ehrman's book on that topic. There's a question about God as the ground for morality – does morality come from his will or nature.

Then there is a question about the multiverse, which came up at the physics conference Dr. Craig attended the day before. There is a good question about the Big Bang theory and the initial singularity at time t=0. Another good question about transfinite arithmetic, cardinality and set theory. One questioner asks about the resurrection argument. The questioner asks if we can use the origin of the disciples belief as an argument when other religions have people who are willing to die for their claims. One of the questioners asks about whether the laws of nature break down at 10^-43 after the beginning of the universe. There is a question about the religious experience argument, and Craig has the opportunity to give his testimony.

I thought that the questions from the Scottish students and faculty were a lot more thoughtful and respectful than at American colleges and universities. Highly recommended.

# Bible study: Esther as an example of bravery and God's providence

**Wintery Knight** · 31 January 2021 · Archived copy · Original

Bible study that hits the spot

I've been listening to this FREE two-volume series on the book of Esther featuring pastor Alistair Begg. A whole bunch of interesting things stuck out to me, so I'll write about one of them today.

First, Esther is a Jewish woman whose father or mother died when she was young. She was adopted by Mordecai, another Jew. She was very beautiful, so she was picked to be part of the Persian King's harem. In fact, she is so beautiful that the King chooses her to be the Queen.

Now there is an enemy of the Jews in the King's court named Haman, and he manages to get the King to create an edict that says that all the Jews will be killed. Mordecai calls Esther to tell her that she has to stop the King from ordering this edict.

But Esther is out of favor with the King, and hasn't been asked to come in to visit him for some time. To go in and see the King without being summoned is a capital offense. Unless the King gives permission, she would be killed for intruding on the King. But in the end, she agrees to speak up and say something.

It all gets resolved in Esther chapter 4.

Esther 4:1-17:

> 1 When Mordecai learned all that had been done, he tore his clothes, put on sackcloth and ashes, and went out into the midst of the city and wailed loudly and bitterly.
>
> 2 He went as far as the king's gate, for no one was to enter the king's gate clothed in sackcloth.
>
> 3 In each and every province where the command and decree of the king came, there was great mourning among the Jews, with fasting, weeping and wailing; and many lay on sackcloth and ashes.
>
> 4 Then Esther's maidens and her eunuchs came and told her, and the queen writhed in great anguish. And she sent garments to clothe Mordecai that he might remove his sackcloth from him, but he did not accept them.
>
> 5 Then Esther summoned Hathach from the king's eunuchs, whom the king had appointed to attend her, and ordered himto go to Mordecai to learn what this was and why it was.

> 6 So Hathach went out to Mordecai to the city square in front of the king's gate.
>
> 7 Mordecai told him all that had happened to him, and the exact amount of money that Haman had promised to pay to the king's treasuries for the destruction of the Jews.
>
> 8 He also gave him a copy of the text of the edict which had been issued in Susa for their destruction, that he might show Esther and inform her, and to order her to go in to the king to implore his favor and to plead with him for her people.
>
> 9 Hathach came back and related Mordecai's words to Esther.
>
> 10 Then Esther spoke to Hathach and ordered him to reply to Mordecai:
>
> 11 "All the king's servants and the people of the king's provinces know that for any man or woman who comes to the king to the inner court who is not summoned, he has but one law, that he be put to death, unless the king holds out to him the golden scepter so that he may live. And I have not been summoned to come to the king for these thirty days."
>
> 12 They related Esther's words to Mordecai.
>
> 13 Then Mordecai told them to reply to Esther, "Do not imagine that you in the king's palace can escape any more than all the Jews.
>
> 14 For if you remain silent at this time, relief and deliverance will arise for the Jews from another place and you and your father's house will perish. And who knows whether you have not attained royalty for such a time as this?"
>
> 15 Then Esther told them to reply to Mordecai,
>
> 16 "Go, assemble all the Jews who are found in Susa, and fast for me; do not eat or drink for three days, night or day. I and my maidens also will fast in the same way. And thus I will go in to the king, which is not according to the law; and if I perish, I perish."
>
> 17 So Mordecai went away and did just as Esther had commanded him.

What Mordecai is saying here is that God is sovereign over the events that are taking place, and that even if Esther makes a free decision to not intercede to save her people, then God will do something else. Somehow, telling her that makes her agree to take the risk and go in to see the King. Even though it is illegal to go in to see the King, she is going to risk her life and do it. And the message there is that God made her beautiful, and placed her in the palace, for exactly this purpose. Her beauty has a purpose.

Before then, she may not have been the most morally pure Jew, nor the most faithful Jew, nor some great authority on theology or apologetics. She was probably keeping her faith pretty hidden. But in that one moment, she rises above being an orphan, above being a harem girl, and above being just a pretty face. God can use anyone – even a silly girl who spends all day in front of a mirror playing with cosmetics – to achieve his ends. She is not Daniel. But today she is getting the call, anyway. It's on her.

What is the lesson here? God can use *anybody.* It doesn't mean that you shouldn't be moral, study theology, and study apologetics, and keep your character clean so you have self-control. It means that any believer is just one step away from glory, no matter what they did in the past. That's how God rolls.

**Further study**

If you are interested in the story of Esther, then you should listen to the entire series by Alistair Begg.

- Volume 1 is here (download all in a zip file)
- Volume 2 is here (download all in a zip file)

The point I am making in this post is in this lecture.

Esther is about two themes: 1) how should a believer in God live in a society where believers are a minority? and 2) even when things look really out of control, God is in control, and is never more than one step away from saving his people.

I have a lot of Christian apologist friends who struggle to go to church, and struggle to read the Bible. The links above will take you to some great preaching on one of the most interesting books of the Bible. Go there, grab the MP3s, and listen to them with no distractions.

# Facebook bans Christian professor for disagreeing with Biden's executive actions

**Wintery Knight** · 1 February 2021 · Archived copy · Original

Christian Post:

> A Christian university professor has been suspended from Facebook for voicing disagreement with President Joe Biden's executive order allowing trans-identifying individuals to serve in the U.S. military.
>
> Robert Gagnon, who teaches New Testament theology at Houston Baptist University and is a renowned scholar on the subject of sexuality, was locked out of his Facebook account for 24 hours on Tuesday after he posted a comment in defense of a friend who posted a satirical commentary about Biden's executive order.
>
> Facebook suspended Gagnon's account for what it deemed as "incitement" to violence.
>
> In his post, Gagnon said the executive order will endanger women, and noted that those who promote transgenderism are allowing males to invade women's athletics and shelters. He also likened transgender ideology to a "religious cult" and said it "is indeed a pseudo-science," in that it forces people to reject basic biology. That Facebook suspended his friend for similar comments proves the cult-like dimension, he said.
>
> Facebook subsequently sent Gagnon a notice, informing him that his words violated their "Community Standards on violence and incitement."
>
> "There was absolutely no incitement to violence on our part. We abhor violence done to any person," Gagnon told PJ Media on Tuesday. "This is just a thinly veiled and pathetic excuse for censorship of any critical views toward trans-tyranny over our consciences, religion, and reason."
>
> "Only one point of view is being allowed," he continued. "Trump was not the great danger to the Republic. Left-wing canceling is."

# New study: trans women outperform biological women after year of hormone therapy

**Wintery Knight** · 2 February 2021 · Archived copy · Original

From far-left NBC News:

> A new study suggests transgender women maintain an athletic advantage over their cisgender peers even after a year on hormone therapy.
>
> The results, published last month in the British Journal of Sports Medicine, could mean the current one-year waiting period for Olympic athletes who are transitioning is inadequate.
>
> "For the Olympic level, the elite level, I'd say probably two years is more realistic than one year," said the study's lead author, Dr. Timothy Roberts, a pediatrician and the director of the adolescent medicine training program at Children's Mercy Hospital in Kansas City, Missouri. "At one year, the tran5 women on average still have an advantage over the cis women," he said, referring to cisgender, or nontransgender, women.
>
> […]For the first two years after starting hormones, the tran5 women in their review were able to do 10 percent more pushups and 6 percent more situps than their cisgender female counterparts. After two years, Roberts told NBC News, "they were fairly equivalent to the cisgender women."
>
> Their running times declined as well, but two years on, tran5 women were still 12 percent faster on the 1.5 mile-run than their cisgender peers.

Very interesting to think about when you consider Biden's executive action allowing transgender women into biological women's sports.

But you can't say anything about it, because it you do, Big Tech will ban you.

> Attacks against free speech by big tech companies have quickly escalated into a full-blown censorship campaign as social media giants are now regularly targeting and silencing Christians and conservatives. Their latest target? Focus on the Family.
>
> The Christian organization has just been censored by Twitter. The platform locked the global ministry's "Daily Citizen" publication for allegedly violating their rules against posting "hateful" content.
>
> Focus on the Family CEO Jim Daly said this accusation is absolutely untrue.
>
> The Daily Citizen tweeted a quote on Jan. 19 from one of its articles acknowledging that the Biden administration appointed a transgender woman to serve as Assistant Secretary for Health at the Department of HHS.
>
> The tweet read: "Dr. Lev1ne is a transgender woman, that is, a man who believes he is a woman."

It's "inclusivity". You can't even explain what the terms mean any more, because feelings are more important than facts to the people in charge of permitting speech.

# How to falsify a religion using scientific or historical evidence

**Wintery Knight** · 3 February 2021 · Archived copy · Original

Will the universe expand forever, or will it collapse and bounce?
(Image source)

What I often see among atheists is this tendency to set up expectations of how God would have acted and then complain that he doesn't met those expectations. I don't think that this is a good way to argue against a religion, because it's subjective. God isn't obligated to comport with atheist expectations. A much better way of evaluating religions is to test the claims each makes against evidence.

So in this post, I wanted to show how a reasonable person can evaluate and reject different worldviews using evidence.

**Falsifying a religion using science**

Consider this argument:

1. Hindu cosmology teaches that the universe cycles between creation and destruction, through infinite time.
2. The closest cosmological model conforming to Hindu Scriptures is the eternally "oscillating" model of the universe.
3. The "oscillating" model requires that the universe exist eternally into the past.
4. But the evidence today shows the the universe, and time itself, had a beginning at the big bang.
5. The "oscillating" model requires that the expansion of the universe reverse into a collapse, (= crunch).
6. In 1998, the discovery of the year was that the universe would expand forever. There will be no crunch.
7. Therefore, the oscillating model is disconfirmed by observations.
8. The oscillating model also faces theoretical problems with the "bounce" mechanism.

Notice how the oscillating model is falsified by mathematics and experimental evidence. Remarkable, when you remember how the public schools would play Carl Sagan videos which promoted this no-Creator model of the universe.

The absolute origin of the universe out of nothing is also incompatible with atheism, Buddhism, Mormonism, etc. because they also require an eternally existing universe.

Atheism in particular is incompatible with the universe "coming into being", because that would be a supernatural cause – a cause that created the natural world. According to the Secular Humanist Manifesto, atheism is committed to an eternally existing universe, (See the first item: "Religious humanists regard the universe as self-existing and not created."). If something non-material brought all existing matter into being, that would be a supernatural cause, and atheists deny that anything supernatural exists. The standard Big Bang theory requires that all the matter in the universe come into being *out of nothing.*

**Falsifying a religion using history**

Consider this argument:

1. To be a Muslim, you must believe that the Koran is without error.
2. The Koran claims that Jesus did not die on a cross. (Qur'an, 4: 157-158)
3. The crucifixion of Jesus is undisputed among non-Muslim historians, including atheist historians.
4. Therefore, it is not rational for me to become a Muslim.

I'm going to support the premise that Jesus was crucified by citing historians from all backgrounds.

Consider some quotes from the (mostly) non-Christian scholars below:

> "Jesus' death as a consequence of crucifixion is indisputable." Gert Lüdemann
>
> "That he was crucified is as sure as anything historical can ever be." J.D. Crossan
>
> "The passion of Jesus is part of history." Geza Vermes
>
> Jesus' death by crucifixion is "historically certain". Pinchas Lapide
>
> "The single most solid fact about Jesus' life is his death: he was executed by the Roman prefect Pilate, on or around Passover, in the manner Rome reserved particularly for political insurrectionists, namely, crucifixion." Paula Fredriksen
>
> "The support for the mode of his death, its agents, and perhaps its co-agents, is overwhelming: Jesus faced a trial before his death, was condemned, and was executed by crucifixion." L.T. Johnson
>
> "One of the most certain facts of history is that Jesus was crucified on orders of the Roman prefect of Judea, Ponitus Pilate." Bart Ehrman

That's 7 famous historians: 3 atheists, 3 Jews and 1 moderate Catholic. The atheists, Ludemann, Crossan and Ehrman, have all debated against the resurrection of Jesus with William Lane Craig. Johnson is the moderate Catholic, the rest are Jewish historians. The Koran was written in the 7th century. That is why no professional historian accepts the Koran as more authoritative than the many earlier Christian and non-Christian sources for the crucifixion story. Many of the sources for the crucifixion are dated to the 1st century. It's not faith. It's history.

I have seen debates with Muslim scholars, and I have never once heard them cite a non-Muslim historian to the effect that Jesus was not crucified. To my knowledge, there is no (non-Muslim) historian who denies the crucifixion of Jesus in his published work.

**Can Christianity be falsified by science or history?**

Yes. If you prove that the universe is eternal than would falsify the Bible's claim that God created the universe out of nothing. That would be a scientific disproof. If you could find the body of Jesus still inside a tomb, that would falsify the Bible's claim about a resurrection. That would be a historical disproof. The nice thing about Christianity is that we make lots of testable claims. When someone claims to be a Christian, it's a good thing if they can show

how they arrived at that conclusion. Being able to square God's existence with science, and Jesus' resurrection with history are two crucial steps to showing the reasonableness of Christianity.

# Did Christians who voted for Joe Biden not foresee his anti-Christian policies?

**Wintery Knight** · 4 February 2021 · Archived copy · Original

Great article from Dr. Michael Brown in The Stream.

Read the whole thing, here's some:

> [Trump-voting conservatives] agreed that Trump's character and personality could be negative and destructive. But we hoped that the good policy decisions he would make, decisions of massive, life and death proportions, would outweigh his character flaws.
>
> And so, when it came to fighting against the slaughter of the unborn, numbering more than 60 million to date in America since 1973, Trump was our clear choice over Hillary Clinton or Biden. Jesus cares about "the least of these," which most certainly includes the defenseless babies in the womb.
>
> When it came to preserving our religious liberties and our freedoms of conscience and speech, Trump was our clear, hands-down choice.

More:

> When it came to standing up to radical Islam or facing down tyrannical China, Trump was our definite preference.
>
> One of my colleagues in the Middle East recently told me how the bloodbath which took more than 650,000 lives during the Obama administration virtually stopped with Donald Trump.
>
> My friend recounted to me the horrific torture and abuse of women in his region at the hands of Islamic extremists, including their repeated gang rapes (and worse). In his mind, Trump was a champion who helped put a stop to such horrors.
>
> A Chinese émigré to Australia told me early last year he was terribly afraid of President Xi and saw Trump as a hero, especially as Trump stood with the Hong Kong protesters.
>
> Needless to say, the same Israelis who felt betrayed by the Obama administration were profoundly grateful to Trump for canceling the Iranian nuclear accords, knowing the real dangers of that terrible deal.

Foreign policy? What's that? Christian Democrats didn't see any foreign policy on NPR or PBS or CNN or MSNBC. They were in a leftist echo chamber. They had no awareness of reality outside their own lives.

More:

> Are you surprised that Biden signed into law a radical transgender bill that has even caused consternation among gay, feminist, and transgender leaders and individuals? Do you feel good about the fact that by voting for him, you have negatively impacted women and girls throughout the country, as well as strengthened Big Tech's crack down on our freedoms?
>
> Are you surprised that there is already great concern within Israel that Biden might derail the amazing peace progress made by the Trump administration? Were you unaware that he might well give back to terroristic Iran a potential path to nuclear armament?

I first wrote about the Equality Act – an LGBT bill deisgned to crush dissenters from the LGBT agenda – in 2015. I had been warning about it all along. But I have yet to meet a Biden voter who knew anything about it, even though it passed the Democrat House and only failed because Republicans held the Senate. No longer.

It seems to me that Christians wanting to find work, keep their earnings, and be public about their Christian convictions did a lot better living under Trump's laws, policies, judges, etc. That's what matters to me. I want to work without comprimising my values. I want to keep what I earn instead of handing it to people who aren't moving towards God. I want to invest in people and organizations who are working for God, not against him.

I'm not interested in making the lives of non-Christians happier or more prosperous. I don't think I should have give money or compelled speech to make irresponsible, immoral people feel better about their immorality or recklessness. I'm talking about people who turn their backs on God with things like LGBT lifestyles and having fatherless kids with hot bad boys.

I liked Trump's laws, policies, judges, etc. That worked best for my Christian life plan. I had more money and time for people who really wanted God. Now I have to be scared about my job, do with less money (higher taxes, inflation, regulation and growing national debt), and watch what I say and do for fear of offending reckless, immoral, irresponsible non-Christians. The sort of authentic Christian life I enjoyed has suddenly gotten a lot harder. And I don't like it. I don't like being taxed and controlled by non-Christians.

# Is Snopes reliable? Is Snopes biased? Are Snopes fact-checks accurate?

**Wintery Knight** · 5 February 2021 · Archived copy · Original

A while back, there were some demonstrations at the Capitol building in Washington, D.C. Democrat representative Alexandria Ocasio-Cortez, a former bartender and waitress, told everyone that she had nearly died because the rioters broke into her office.

It was later discovered that she was never in the Capitol bulding.

Newsweek reported AOC's version of the events:

> Ocasio-Cortez said that rioters actually entered her office, forcing her to take refuge inside her bathroom after her legislative director Geraldo Bonilla-Chavez told her to "hide, hide, run and hide."
>
> "And so I run back into my office," Ocasio-Cortez said. "I slam my door. There's another kind of like back area to my office, and I open it, and there's a closet and a bathroom. And I jump into my bathroom."
>
> Ocasio-Cortez said [she] was hiding behind the door "and then I just start to hear these yells of, 'Where is she?'"
>
> As members of the mob banged against the door, Ocasio-Cortez believed "this was the moment where I thought everything was over."
>
> "And the weird thing about moments like these is that you lose all sense of time," Ocasio-Cortez continued. "In retrospect, maybe it was 4 seconds. Maybe it was 5 seconds, maybe it was 10 seconds. Maybe it was one second, I don't know. It felt like my brain was able to have so many thoughts."
>
> "In between the screams and the yells," Ocasio-Cortez added, "I mean, I thought I was going to die."

Daily Wire explains that Newsweek had to correct their story after it emerged that AOC's version was not true:

> Republican Rep. Nancy Mace (R-SC), whose office is two doors down from Democratic Rep. Alexandria Ocasio-Cortez, noted that "insurrectionists" never made it to their hall when the U.S. Capitol building was breached on Jan. 6.
>
> […]Mace argued that Newsweek was misleading in how they categorized AOC's own account in an effort to "fan fictitious news flames."

Maps don't lie:

Newsweek issued a correction:

> After Rep. Mace criticized Newsweek's coverage, the outlet issued a correction to amend the description of Ocasio-Cortez's account as follows: "Ocasio-Cortez said that an individual actually entered her office, forcing her to take refuge inside her bathroom after her legislative director Geraldo Bonilla-Chavez told her to 'hide, hide, run and hide.'"
>
> Newsweek's correction note reads: "A previous version of this story stated that Ocasio-Cortez's office was entered by rioters. Ocasio-Cortez's office was actually entered by a Capitol police officer that did not identify himself. Newsweek regrets the error."

So that's the error, which was acknowledged by Newsweek. But what does Snopes think? Did they side with AOC's delusional conspiracy theory? Or did they side with reality, facts and evidence?

Well, they report that the claim that AOC wasn't even in the Capitol building as "Mostly False".

They wrote:

> **Claim**
>
> Alexandria Ocasio-Cortez exaggerated the danger she was in during the Jan. 6, 2021, Capitol riot, in that she "wasn't even in the Capitol building" when the rioting occurred.
>
> **Rating**
>
> Mostly False

But their own fact-check acknowledges that the claim "she wasn't even in the Capitol building" is TRUE:

> **What's True**
>
> Ocasio-Cortez wasn't in the main Capitol building where the House and Senate Chambers are located.

The more important point – the actual claim that people are making – is that the rioters never broke into AOC's office. According to Newsweek, AOC says "rioters actually entered her office". Newsweek's correction says that the rioters never actually broke into her office. Conservatives are agreeing with Newsweek's correction. Only Snopes seems to have a problem with the facts reported by Newsweek. They just can't bring themselves to accept reality, that AOC lied in order to appear to be a victim.

Snopes' "fact check" will be used by left-wing Big Tech companies to suppress the truth that was admitted by Newsweek in their correction to their original AOC-sourced story. People on the secular left are so desperate to appear to be victims, that it affects their sanity. It's like a mental illness. And when they are called on it, they all circle the wagons and defend their conspiracy theories.

And this isn't the first time that Snopes has failed.

## Not the first time

In fact, the author of the Snopes article has been caught up in left-wing conspiracies before, and had to issue a retraction:

Why didn't Snopes fire her after the first retraction? Well, my conclusion that Snopes is mostly a conspiracy website for secular leftists. Their writers mostly publish conspiracy theories, urban legends, myths, delusions, lies and other counterfactual nonsense on their web site. And the goal of their website is mostly just to give comfort to secular leftists who have failed at life, and are now living in a dream world where all their failures are caused by those conservative people who they look down on, who achieved more success in practical private sector jobs than they have with their many worthless debt-fueled non-STEM degrees.

So how would I rate Snopes as a fact-checker?

Rating: Mostly False.

# Wayne Grudem explains what the Bible says about spending, saving and charity

**Wintery Knight** · 6 February 2021 · Archived copy · Original

Bible study that hits the spot

A practical lecture on money – spending, saving, charitable giving – from famous pastor Wayne Grudem.

I like the way that Wayne Grudem navigates the Bible finding the passages that tell you who God is, so that you can make better decisions by analyzing alternatives and choosing the one that gives your Boss a maximum return on investment. He's very practical.

The MP3 file is here.

The PDF outline is here.

Spending:

- Christianity does not teach asceticism (= don't enjoy anything in this world), Paul condemns it in 1 Timothy 4:1-5
- When you buy nice things, even if it is a little more expensive, it's an opportunity to be thankful for nice things that God has provided
- Even being rich is OK, but don't let it make you haughty and arrogant, and don't set your hopes on your money (see 1 Tim 6:17)
- It is important for you to earn money, and you are supposed to use it to support yourself and be independent
- It is possible to overspend and live recklessly (Luke 15:13) and it's also possible to overspend and live too luxuriously
- *Increasing your income through career progression is wise*, because it allows you to give away more and save more
- God gives us freedom to decide how much we spend, how much we give away, and how much we save
- every choice a Christian makes with money will give him or her more or less reward in his or her afterlife
- Do not spend more than you have – you should make every effort to get out of debt as quickly as possible

Saving:

- Saving money is wise so you can help yourself and others, and have money in your old age when you will not be working
- If you do not save your own money, you end up being dependent on others (e.g. – family or taxpayers)
- Not saving money for the future is a way of "putting God to the test" (Matt 4:7)
- You are to "be dependent on no one", to the extent that you can (1 Thes 4:12)
- We don't know the future, that's why we should prepare for an emergency, and buy insurance to guard (James 4:13-17)
- It's right for us to learn how to save to be able to buy bigger assets, like a car or a college education
- Saving and investing in stocks and bonds lets people in business start and grow companies, creating jobs and new products
- *Don't over-save, trusting too much in money more than you trust in God* (Ps 62.10; Matt 6:19,24; Luke 12:15-21)

Giving:

- it is required for the people of God to give something out of what they earn, but no percentage is specified (Deut 26:12-13)
- you do not give money to become right with God, you can't earn your salvation
- *a Christian gives to show God that you trust him to take care of you, and to experience trusting him through your giving*
- the quality of your resurrection life with God is affected by giving you do for the Kingdom (Phil 4, Matt 6:19-21; 1 Tim 6:18-19)
- when you get involved in the lives of others and give to them, you have the joy of experiencing caring for others (Acts 20:35)
- it's possible to give too little, but it's also possible to give too much – be careful about pride creeping in as well

The first part of this lecture made me think of my treat for the week, which is to get a double chicken burrito bowl after my weight lifting. It is very easy to say grace when you are hovering over a double chicken burrito bowl. It is good to have nice things especially when it makes you thankful for what you have.

I was so happy listening to this talk because he was condemning bad stewardship, which I see in a lot of young people these days. I was happy until he got to the part about trusting in your savings for your security, and then I thought – that's what I do wrong! I save a lot but it's not just for emergencies and to share with others, like he was saying – I want a sense of security. This was more of a temptation in my 20s than it is now in my 30s, though.

**Charity should hurt**

I can remember being in my first full-time job as a newly hired junior programmer when the 2001 recession struck. I would cry while signing checks to support William Lane Craig's Reasonable Faith ministry, because I was so scared. I had no family or friends where I lived to help me if anything went wrong, and that's been the story of my working life. If anything goes wrong, there is no backup. But it's that experience of crying when I gave that allows me to say today "that's when I became the man I am, that's what a man does when he is a follower of Jesus". If you are not doing the actions of charity, then you will not having the experience of trusting God and letting him lead you. There is more to the Christian life than just saying the right things – you have to do the right things.

**Don't follow your heart**

If you're scared about giving when you are young, then do what I did in my 20s: work 70-hour weeks, get promoted often, and save everything you earn. I volunteered every Saturday for 9 months in order to get my first white-collar part-time job when I was still in high-school. The faster you increase your savings, the easier it's going to be to take

a *genuine interest* in caring for the people around you. Read Phil 1 (fellowship), Phil 2 (concern for others), and Phil 4 (charity). Turn off your emotions and desires when it comes to choosing what to study and what work to do, and put Philippians into practice. Your freedom to give is very much tied to the quality of your decisions of what to study, where to work, how much you spend on entertainment, and so on. That's why you need to turn off your feelings and desires and do what works, even it it's not fun, and even if it involves responsibilities, expectations and obligations.

# The psychological motivation of those who embrace postmodernism

**Wintery Knight** · 7 February 2021 · Archived copy · Original

Can a person be postmodern and a Christian? Not for long

Famous analytical philosopher John Searle has written a book "Mind, Language And Society: Philosophy In The Real World", explaining what's factually wrong with postmodernism. In the introduction, he explains what postmodernism is, and what motivates people to accept postmodernism.

He writes:

> […][W]hen we act or think or talk in the following sorts of ways we take a lot for granted: when we hammer a nail, or order a takeout meal from a restaurant, or conduct a lab experiment, or wonder where to go on vacation, we take the following for granted: there exists a real world that is totally independent of human beings and of what they think or say about it, and statements about objects and states of affairs in that world are true or false depending on whether things in the world really are the way we say they are. So, for example, if in pondering my vacation plans I wonder whether Greece is hotter in the summer than Italy, I simply take it for granted that there exists a real world containing places like Greece and Italy and that they have various temperatures. **Furthermore, if I read in a travel book that the average summer temperature in Greece is hotter than in Italy, I know that what the book says will be true if and only if it really is hotter on average in the summer in Greece than in Italy. This is because I take it for granted that such statements are true only if there is something independent of the statement in virtue of which, or because of which, it is true.**
>
> […]These two Background presuppositions have long histories and various famous names. The first, that there is a real world existing independently of us, I like to call "external realism." "Realism," because it asserts the existence of the real world, and "external" to distinguish it from other sorts of realism-for example, realism about mathematical objects (mathematical realism) or realism about ethical facts (ethical realism). The second view, that a statement is true if things in the world are the way the statement says they are, and false otherwise, is called "the correspondence theory of truth." This theory comes in a lot of different versions, but the basic idea is that statements are true if they correspond to, or describe, or fit, how things really are in the world, and

> false if they do not.

The “correspondence theory of truth” is the view of truth assumed in books of the Bible whose genre is such that that they were intended by the authors to be taken *literally*, (with allowances for symbolism, figures of speech, metaphors, hyperbole, etc.).

But what about the postmodernists, who seek to deny the objectivity of external reality?

More Searle:

> Thinkers who wish to deny the correspondence theory of truth or the referential theory of thought and language typically find it embarrassing to have to concede external realism. Often they would rather not talk about it at all, or they have some more or less subtle reason for rejecting it. In fact, very few thinkers come right out and say that there is no such thing as a real world existing absolutely, objectively, and totally independently of us. Some do. Some come right out and say that the so-called real world is a “social construct.”

What is behind the denial of objective reality, and statements about external reality that are warranted by evidence?

> It is not easy to get a fix on what drives contemporary antirealism, but if we had to pick out a thread that runs through the wide variety of arguments, it would be what is sometimes called “perspectivism.” Perspectivism is the idea that our knowledge of reality is never “unmediated,” that it is always mediated by a point of view, by a particular set of predilections, or, worse yet by sinister political motives, such as an allegiance to a political group or ideology. And because we can never have unmediated knowledge of the world, then perhaps there is no real world, or perhaps it is useless to even talk about it, or perhaps it is not even interesting.

Searle is going to refute anti-realism in the rest of the book, but here is his guess at what is motivating the anti-realists:

> > **I have to confess, however, that I think there is a much deeper reason for the persistent appeal of all forms of antirealism, and this has become obvious in the twentieth century: it satisfies a basic urge to power. It just seems too disgusting, somehow, that we should have to be at the mercy of the “real world.” It seems too awful that our representations should have to be answerable to anything but us. This is why people who hold contemporary versions of antirealism and reject the correspondence theory of truth typically sneer at the opposing view.**
>
> […]I don’t think it is the argument that is actually driving the impulse to deny realism. I think that as a matter of contemporary cultural and intellectual history, the attacks on realism are not driven by arguments, because the arguments are more or less obviously feeble, for reasons I will explain in detail in a moment. **Rather, as I suggested earlier, the motivation for denying realism is a kind of will to power, and it manifests itself in a number of ways. In universities, most notably in various humanities disciplines, it is assumed that, if there is no real world, then science is on the same footing as the humanities. They both deal with social constructs, not with independent realities. From this assumption, forms of postmodernism, deconstruction, and so on, are easily developed, having been completely turned loose from the tiresome moorings and constraints of having to confront the real world. If the real world is just an invention-a social construct designed to oppress the marginalized elements of society-then let’s get rid of the real world and construct the world we want. That, I think, is the real driving psychological force behind antirealism at the end of the twentieth century.**

Now, I’ll go one step further than Searle.

People, from the Fall, have had the desire to step into the place of God. It's true that we creatures exist in a universe created and designed by God. But, there is a way to work around the fact that God made the universe and the laws that the universe runs on, including logic, mathematics and natural laws. And that way is to *deny logic, mathematics and natural laws.* Postmodernists simply deny that there is any way to construct rational arguments and support the premises with evidence from the real world. That way, they imagine, they are free to escape a God-designed world, including a God-designed specification for how they ought to live. The postmoderns deny *the reliable methods of knowing about the God-created reality because logic and evidence can be used to point to God's existence, God's character, and God's actions in history.*

And that's why there is this effort to make reality "optional" and perspectival. Everyone can be their own God, and escape any accountability to the real God – the God who is easily discovered through the use of logic and evidence. I believe that this is also behind the rise of atheists, who feign allegiance to logic and science, but then express "skepticism" about the origin of the universe, the fine-tuning of the universe, objective morality, the minimal facts concerning the historical Jesus, and other undeniables.

# Crime rates up after Democrats sided with BLM and Antifa against police

**Wintery Knight** · 8 February 2021 · Archived copy · Original

Daily Wire:

> The Wall Street Journal opinion writer and crime analyst Heather Mac Donald reports that, according to early numbers, it appears that the United States "saw the largest percentage increase in homicides" in its history, with murder rates rising an average of nearly 40% in 57 of the country's largest cities.

Democrat-run cities hardest hit:

> "The local murder increases in 2020 were startling: 95% in Milwaukee, 78% in Louisville, Ky., 74% in Seattle, 72% in Minneapolis, 62% in New Orleans, and 58% in Atlanta, according to data compiled by crime analyst Jeff Asher. Dozens of children, overwhelmingly black, were killed in drive-by shootings," Mac Donald writes on Tuesday. "They were slain in their beds, living rooms, and strollers. They were struck down at barbecues, in their yards, in malls, in their parents' cars, and at birthday parties. Fifty-five children were killed in Chicago in 2020, 17 in St. Louis, and 11 in Philadelphia. In South Los Angeles alone, 40 children were shot, some non-lethally, through September."
>
> The trend pans out across the country, according to a number of local stories published in the closing weeks of 2020. The St. Louis, Missouri, homicide rate spiked the highest it has in half a century, according to St. Louis Today. Chicago had its single deadliest day since the mid-1960s back in May. And even in Texas, where Republicans control most positions of authority in state government, saw a statewide hike in the murder rate, according to local outlets.

What could be the cause of this?

> Mac Donald suggests that while the correlation cannot be understated — particularly given that pandemic-related lockdowns appear to have driven the largest rise in poverty in 50 years — there's another trend that also correlates with the rise in crime: the rise of the "defund the police" movement, that while generally unsuccessful even in progressive cities like Seattle, Washington, and Portland, Oregon, had a dramatic effect on officer morale and cities' willingness to put more officers on the streets to handle issues, leaving many crime-prone neighborhoods further exposed.
>
> "Cops now face a poisonous environment. Since the summer, they have been shot in the head, firebombed, and assaulted with lethal projectiles. An officer providing first aid at a crime scene may be met with a hail of rocks and bottles. Resistance is now the norm. Officers believe they face a political and legal environment that is eager to sacrifice them in the name of racial justice," Mac Donald says. "As a result," she adds, "the calculus for engagement has changed."

Daily Wire reports on a "carjacking epidemic" in Chicago, which is one of the most Democrat-dominated cities in America.

> Chicago gas stations are staffing up, hiring an army of private security guards to protect customers amid a "carjacking epidemic" that has the city on track to see 2,000 carjackings this year.
>
> […]"Carjackings in Chicago rose about 135% to 1,415 in 2020 from 603 in 2019," the Tribune reported Sunday. "The 2020 tally was the highest figure recorded [in Chicago] since 2001 when Chicago logged only slightly more with 1,422 …"

> Police have been slow to respond. So far, the Chicago Police Department has made just 108 arrests (16% of cases, per Chicago's WGN News), and prosecutors have charged just 58 of those individuals with trespass to a vehicle.

Breitbart notes a carjacking problem in Philadelphia, too. Another city ruled from top to bottom by Democrats:

> January 2021 carjackings in Philadelphia were up more than more than triple the number during the same time in 2020.
>
> The Philadelphia Inquirer noted there were 59 carjackings in Philly during January 2021, while there were 18 in January 2020.
>
> Ironically, 2020 broke a record for carjackings, with a total of 404 for the year. Yet 2021 quickly got on pace to surpass the numbers seen last year.

The funny thing about the spike in crimes in these cities is that the Democrat rulers have send a clear message to the citizens. You are sheep. You are not allowed to be armed. You are not allowed to defend yourself. And the police won't defend you either, because we've intimidated them and defunded them. So enjoy being a victim of crime.

The funny thing is that people in these cities keep voting for Democrats. They must not be thinking very much.

# New CBO report: Biden's minimum wage hike would cost 1.4 million jobs

**Wintery Knight** · 9 February 2021 · Archived copy · Original

The first principle of being a competent human is to not destroy yourself with your own bad decisions.

Daily Wire reports:

> In a report released Monday, the Congressional Budget Office said that hiking the minimum wage to $15 might reduce poverty, but at the cost of 1.4 million jobs and by adding billions to the federal deficit.
>
> President Joe Biden and Sen. Bernie Sanders (I-VT) have both pledged to back legislation raising the federal minimum wage to $15 — what both the president and the socialist Senator call a "living wage."
>
> […]The plan, CNN notes, would help some people, increasing "worker pay by $333 billion, giving a boost to some 17 million workers whose wages would otherwise be below $15, as well as many of the 10 million workers whose wages would otherwise be slightly above that level."

People will lose their jobs:

> The jump would "cut employment by 1.4 million workers and increase the federal deficit by $54 billion over a decade," the outlet notes. And while federal spending on things like supplemental food aid programs might decrease, "spending on Medicaid and unemployment benefits would increase because of higher enrollment by those who lose their jobs." Prices on goods and services would also rise, The Wall Street Journal adds.

Prices of goods and services would go up:

> "Higher wages would increase the cost of producing goods and services, and businesses would pass some of those increased costs on to consumers in the form of higher prices, resulting in reduced demand, the CBO said," per the WSJ. "From 2021 to 2031, the plan would increase payments to workers by a net $333 billion, after accounting for wage increases and job losses, the study found. That would allow low-income workers to spend more but would increase labor costs for businesses and raise prices, especially at restaurants. The loss of jobs would cause a modest negative overall impact on economic growth."

We've already seen tens of thousands of small businesses shut down as a result of Wuhan virus regulations. Raising the minimum wage would make many of more small businesses shut down. We don't even need studies to predict the future to prove this. We can look at what happened in the past, in cities that raised the minimum wage.

## But does it work?

Here's an example of how this works in reality, from San Francisco, a Democrat-run city.

ABC News reports:

> San Francisco's minimum wage is currently $11.05 an hour. By July of 2018, the minimum wage in San Francisco will be $15 an hour. That increase is forcing Borderlands Bookstore to write its last chapter now.
>
> […]Borderlands was turning a small profit, about $3,000 last year. Then voters approved a hike in the minimum wage, a gradual rise from $10.75 up to $15 an hour.
>
> "And by 2018 we'll be losing about $25,000 a year," he said.
>
> It's an unexpected plot twist for loyal customers.
>
> **"You know, I voted for the measure as well, the minimum wage measure," customer Edward Vallecillo**

> **said. “It’s not something that I thought would affect certain specific small businesses. I feel sad.”**

Consider this story about Seattle, another Democrat-run city.

Excerpt:

> Restaurants Unlimited, a Seattle-based chain with restaurant locations in 47 US cities, announced on Sunday it was seeking Chapter 11 protection, citing “progressive” wage laws.
>
> The company, which has operated since the Lyndon Johnson Administration, said rising labor costs—part of a national trend of government-mandated minimum increases—were part of its decision.
>
> “Over the past three years, the company’s profitability has been significantly impacted by progressive wage laws along the Pacific coast that have increased the minimum wage,” Chief Restructuring Officer David Bagley said in court filings, The Seattle Times reports. “As a large employer in the Seattle metro market, for instance, the company was one of the first in the market to be forced to institute wage hikes.”
>
> […]BLS data show that New York City experienced its sharpest decline in restaurant jobs since 9/11 following its passage of a $15 minimum wage law. In California, a local newspaper recently detailed how an entire business district virtually disappeared following the city’s aggressive minimum wage push.

It sounds like such a good idea to give poor people a raise, but you have to ask about how this policy affects the job creator who PAYS the wages. Minimum wage laws produce bad results. We as a nation have to decide whether we are going to vote based on feelings and peer approval, or vote based on achieving good results.

# Progressive magazine explains how leftist elites worked to “fortify” e1ection

**Wintery Knight** · 10 February 2021 · Archived copy · Original

Joy Pullmann wrote something about the recently published Time magazine article, which explained how powerful elites joined together to “fortify” the e1ection so that B1den would win.

The Federalist:

> Corporate media has spent the last year arguing that Donald Trump’s claims about 2020 e1ection integrity amount to “seditious” consp1racy theories. While maintaining that narrative despite the cognitive dissonance, Time magazine’s Feb. 15 cover story pulls back the curtain on a “consp1racy” among a “well-funded cabal of powerful people” in an “an extraordinary shadow effort” that successfully pushed Trump from office.
>
> “In a way, Trump was right,” writes Time national political correspondent Mo11y Ba11. “There was a consp1racy unfolding behind the scenes.” She later describes this “consp1racy” as something that “sounds like a paranoid fever dream — a well-funded cabal of powerful people, ranging across industries and ideologies, working together behind the scenes to influence perceptions, change rules and laws, steer media coverage and control the flow of information.”
>
> […]The consp1racy’s “work touched every aspect of the e1ection,” Ba11 writes. “They got states to change voting systems and laws and helped secure hundreds of millions in public and private funding. They fended off v0ter-suppression 1awsuits, recruited armies of po11 workers and got millions of people to v0te by mail for the first time.”
>
> This, she and the “dozens” of consp1racists she interviewed claim, is evidence of their efforts to “protect the e1ection.”
>
> […]For example, mail-in ballots are known as an unreliable voting method, even without its potential assistance to criminal fraud such as ballot-stuffing, because they create margins of error well within the margin of actual v0tes in a close e1ection. That’s why labor unions, Jeff Bezos, and many foreign countries refuse to use them.
>
> **Therefore, in a mail-in e1ection such as 2020, in which half of the total v0tes and most of the B1den v0tes were mail-in, one can control the outcome simply by controlling the po11-watchers and v0te-counters.** Even if they are honest, their unconscious bias or the simple mayhem of unreadable handwriting and signatures creates the conditions for untrustworthy results.
>
> […]One of the core problems with the 2020 e1ection is that many states did not follow their voting laws, suspending them with the excuse of COVID (which the Centers for Disease Control said the day before the e1ection, after most v0tes were already cast, was not necessary). States were pressured or forced to do so, not by what Ba11 hilariously calls Trump’s “henchmen,” but by lawyered-up leftist pressure groups that strategically undermined e1ection protections with pre-emptive 1awsuits while courts rolled over for them.
>
> These leftist lawyers were unquestionably the aggressors in this situation, as Hans van Spakovsky and others have documented, filing as many as four times the number of 1awsuits Trump or Republicans filed. Their efforts caused the very “e1ection confusion” Ba11 claims her vaunted “consp1racy” was trying to avoid. What do you call people who do one thing while claiming to do the opposite? Idiots or liars. And I don’t think these people are idiots.
>
> […]This “consp1racy” also rigged the e1ection by pre-emptively controlling the information v0ters were able to receive about the candidates. They did this by colluding with big tech companies to hide information that made Joe B1den look bad. Post-e1ection research found that just the consp1racy’s successful information control on Hunter B1den’s alleged corruption and its potential links to his father would have been enough to tip

> the e1ection.
>
> […]The Time article bears close and repeated reading. One last area of observation here concerns its discussion of the alliance between big business and big labor.
>
> […]Amid the big business-big labor discussion, Ba11's interviewees admit the leftist rioters who terrorized America throughout 2020 did so with the tacit permission of higher-ups, who can turn the riots on and off at will.

# Information Enigma: 21-minute video explains intelligent design

**Wintery Knight** · 11 February 2021 · Archived copy · Original

The video is here:

I have read and listened and watched a lot of material on intelligent design, but I have never seen so much value packed into such a short lecture. I really hope you'll watch this and that it's helpful to you.

Summary:

- the big question when discussing the origin of life: where did the information in living systems come from?
- Until 530 million years ago, the oceans were largely devoid of life
- In a 10 million year period, many new forms of animal life emerged
- New biological forms of life require new information
- the discovery of DNA shows that living systems work because cells have information that allows them to build the components of molecular machines: cell types, proteins, etc.
- can random mutation and natural selection create new functional information?
- normally, random mutations tend to degrade the functionality of information, e.g. – randomly changing symbols in an applications code does not usually introduce useful new functions, it usually renders what is there non-functional
- the majority of possible sequences will NOT have functions, so random mutations will more likely give you non-functional code, rather than functional code
- example: a bicycle lock  with 4 numbers has many possible sequences for the 4 numbers, and only one of them has unlock functionality, the rest have no functionality
- if you have lots of time, then you might be able to guess the combination, but if the lock as has 10 billion numbers, and only one combination that unlocks, you can spend your whole life trying to unlock it and won't succeed
- how likely is it to arrive at a functional protein or gene by chance? Is it more like the 4-dial lock (can be done with lots of time) or the 10 billion dial lock (amount of time required exceeds the time available)?
- the probability is LOW because there is only one sequence of numbers that has unlock function
- consider a short protein of 150 amino acids has 10 to the 195th power possible sequences
- if many of these sequences of amino acides had biological function, then it might be easier to get to one by random mutation and selection than it is with a lock that only unlocks for ONE sequence
- how many of the possible sequences have biological function?
- Thanks to research done by Douglas Axe, we now know that the number of functional amino acid sequences for even a short protein is incredibly small…
- Axe found that the odds of getting a functional sequence of amino acids that will fold and have biological function is 1 in 10 to the 77th power
- Is that number too improbable to reach by chance? well, there are 10 to 65th atoms in the entire Milky Way galaxy… so yes, this is a very improbable outcome
- can random genetic mutations search through all the sequences in order to find the one in 10 to the 77th power one that has biological function? It depends on how much guessers we have and how many guesses we get in the time available
- even with the entire 3.5 billion year history of life on Earth, only about 10 to the 40th organisms have ever lived, which far smaller fraction of the 10 to the 77th total sequences
- even with a very fast mutation rate, you would not be able to reach a functional protein even with all that time,

and even with all those organisms

I was once having a discussion with a woman about the research that Axe did at the Cambridge University lab. He published four articles in the Journal of Molecular Biology. I held out one of the papers to her and showed her the numbers. She said over and over “I hate the Discovery Institute! I hate the Discovery Institute!” Well, yeah, but you can’t make the Journal of Molecular Biology go away with hating the Discovery Institute. JMB is peer-reviewed, and this was experimental evidence – not a theory, not a hypothesis.

We have been blessed by the Creator and Designer of the universe in this time and place with *overwhelming evidence* – an abundance of riches. For those who have an open mind, this is what you’ve been waiting for to make your decision. For the naturalists who struggle so mightily to block out the progress of experimental science, they’ll need to shout louder and shut their eyes tighter and push harder to block their ears. Maybe if they keep screaming “Star Trek” and “Star Wars” over and over to themselves, they will be able to ignore the real science a little longer.

# What's more important to woke Christians than opposing genocide?

**Wintery Knight** · 11 February 2021 · Archived copy · Original

So, by now you have probably heard about how D1sney fired actress Gina Caran0 for disagreeing with people who are intolerant of conservatives. It's a serious concern. We've been seeing a huge increase in progressive insults, silencing, firing, vandalism, violence, attempting murder (e.g. – attack on Steve Sca1ise) and *actual* domestic terrorism by gay activists (e.g. – F1oyd Lee Corkins). Not to even mention 6LM and Ant1fa domestic terrorism going on for MONTHS AND MONTHS, supported by Democrat politicians.

So, this morning, I asked a Christian friend who is obsessed with Star Wars and supports Democrats what he thought of the canceling of Gina Caran0. He gave D1sney a pass and blamed her for being unwise with her words.

So what did Caran0 say to get herself fired by D1sney?

Newsbusters explains:

> It looks like woke Hollywood cancel culture has claimed another victim. Controversial The Mandalorian actress Gina Caran0 has been officially fired from the series according to a recent statement by Lucasfi1m.
>
> […]On February 10, Lucasfi1m put out word that Caran0 is "not currently employed by Lucasfi1m and there are no plans for her to be in the future." The statement makes no secret as to the reason behind this decision by noting, "Nevertheless, her social media posts denigrating people based on their cultural and religious identities are abhorrent and unacceptable." Shortly after this announcement, the agency UTA also announced that it would officially drop her as a client.
>
> This clearly follows the latest Twitter round of #FireGinaCaran0 after the actress shared an Instagram post on Wednesday likening current political discourse with Naz1 Germany that read:
>
> "J3ws were beaten in the streets, not by Naz1 soldiers but by their neighbors…even by children. Because history is edited, most people today don't realize that to get to the point where Naz1 soldiers could easily round up thousands of J3ws, the government first made their own neighbors hate them simply for being J3ws. How is that any different from hating someone for their political views?"

Keep in mind that D1sney does business with Ch1na. A country that operates concentration camps for about 1 million U1ghur prisoners (ethnic minority). Inside the camps, you have things like forced labor, forced abortion, sexual assault, rape, and indoctrination in communism. They are replacing the U1ghur culture with Ch1nese Communist culture at gunpoint. None of this is a problem for D1sney, though. They do business with Ch1na and thank Ch1na for their help.

Life News explains:

> The entire ordeal is hypocritical given D1sney's filming in communist Ch1na, home to decades of pro-abortion population control.
>
> At the end of Mulan, filmmakers thanked Ch1nese government agencies connected to massive human rights abuses, including forced abortions, in the Xinj1ang province.
>
> These agencies have been linked to a "mass genocide" against the minority U1ghur population. Experts estimate more than 1 million U1ghur Mus1ims have been imprisoned in concentration camps, and an unknown number of mothers have been forced to abort their unborn babies through all nine months of pregnancy.
>
> "D1sney, in other words, worked with regions where genocide is occurring, and thanked government departments that are helping to carry it out," Isaac Stone Fish wrote in a column at the Washington Post.

> D1sney's thanks included to the "publicity department of CPC Xinj1ang U1ghur Autonomy Region Committee," which is the Xinj1ang propaganda arm of the Ch1nese Communist Party, the Guardian reports. It also thanked the Public Security Bureau of Turpan, a city in the province where experts say more than a dozen concentration camps are located.
>
> Parts of "Mulan" also were filmed in Xinj1ang in 2018, "the same year Ch1na's 'strike hard' campaign in Xinj1ang ramped up with the construction" of the "re-education," or concentration, camps, according to the reports.

Now, given a conflict between Gina's tolerance of conservatives and Disney's doing business with GENOCIDAL MANIACS WHO RUN COMMUNIST CONCENTRATION CAMPS, you would expect that a "Christian" would side with the person who promotes tolerance. But you'd be wrong.

Regarding politics, you would think that Christians would vote for a president who supported religious liberty and the rights of unborn children. But you'd be wrong about that too. Many low-information Christians spend their time reading low-information charismatic teachers who focus more on life-enhancement than Biblical worldview. They are often more concerned with Trump's mean tweets than by Biden making deals with 1RAN and CH1NA – human rights violators.

Look:

- Women and Children Bear the Brunt of 1ran's Grim Public Executions
- State Department 'Deeply Disturbed' By Report Alleging Systemic Rape, Sexual Abuse, Torture For Muslim Women In Ch1nese Internment Camps
- Report: Ch1na Bans Media from Covering D1sney's Mulan After Concentration Camp Backlash
- State Department: 1ran Imprisoning, Torturing, Killing Religious Minorities
- D1sney CFO Christine McCarthy: 'Mulan' Concentration Camp Ties 'Generated Issues'

And that's the point I wanted to make. I am surrounded by low-information Christians who shovel their money at entertainers who oppose the Christian worldview. Authentic Christians should support free speech, freedom of religion and right to live. Even for Muslim minorities in Ch1na! Even for Mus1ims in 1ran! I disagree with Is1amic doctrines but they shouldn't be treated like that. We should oppose forced abortion, rape, forced detainment, forced labor, communist indoctrination. We should study economics and support economic systems that lead to free speech, religious liberty and right to life.

Entertainment-obsessed Christians today are so focused on clown-level "Christianity" and charismatic leaders that they have no discernment about policy or stewardship. Faced with a conflict between their own entertainment and basic human rights, they choose their own entertainment EVERY SINGLE TIME. I am sick and tired of being told by Christian idiots with worldly success that my concern for apologetics, history, economics, policy, politics, etc. is a "hobby". No, that's what Bible-believing God-fearing Christians read about and care about.

If you know more about Star Wars than you know about politics and policy, may I suggest that you are not good at being a Christian. If you consider apologetics to be a "hobby" on the same level as knowing Star Wars lore, then may I suggest that you are not good at being a Christian. You may be very good at your education. You may be very good at your job. You may be very good at making money. You may be very good at marrying. You may be very good at making children (to be handed off to day care and public schools). BUT YOU ARE NOT GOOD AT CHRISTIANITY. And that's more important than knowing Star Wars, NBA, NFL, Netflix, etc.

# New York Democrats admit they covered up 15,000 deaths caused by their decisions

**Wintery Knight** · 12 February 2021 · Archived copy · Original

You might remember that during the first year of the Wuh4n Virus, the mainstream media loved to contrast the sensible, effective lockdown policies of New York Governor Cuom0 with the stupid, ineffective stay-open policies of Florida Governor DeSantis. DeSantis actually had much better numbers, but that didn't stop the media from praising their allies in the Dem0crat party.

Well, well, guess what the truth was?

New York Post reports:

> Gov. Andrew Cuom0's top aide privately apologized to Dem0cratic lawmakers for withholding the state's nursing home death toll from COV1D-19 — telling them "we froze" out of fear that the true numbers would "be used against us" by federal prosecutors, The Post has learned.
>
> The stunning admission of a coverup was made by secretary to the governor Melissa DeR0sa during a video conference call with state Dem0cratic leaders in which she said the Cuom0 administration had rebuffed a legislative request for the tally in August because "right around the same time, [then-President Donald Trump] turns this into a giant political football," according to an audio recording of the two-hour-plus meeting.
>
> "He starts tweeting that we killed everyone in nursing homes," DeR0sa said. "He starts going after [New Jersey Gov. Phil] Murphy, starts going after [California Gov. Gavin] News0m, starts going after [Michigan Gov.] Gretchen Wh1tmer."
>
> In addition to attacking Cuom0's fellow Dem0cratic governors, DeR0sa said, Trump "directs the Department of Justice to do an investigation into us."
>
> "And basically, we froze," she told the lawmakers on the call.
>
> "Because then we were in a position where we weren't sure if what we were going to give to the Department of Justice, or what we give to you guys, what we start saying, was going to be used against us while we weren't sure if there was going to be an investigation."

THIS WAS NOT AN APOLOGY TO THE VICTIMS OR THEIR FAMILIES:

> But instead of a mea culpa to the grieving family members of more than 13,000 dead seniors or the critics who say the Health Department spread COV1D-19 in the care facilities with a March 25 state Health Department directive that nursing homes admit infected patients, DeR0sa tried to make amends with the fellow Dem0crats for the political inconvenience it caused them.
>
> "So we do apologize," she said. "I do understand the position that you were put in. I know that it is not fair. It was not our intention to put you in that political position with the Republicans."

The Dem0crats were not concerned with the voters, they were concerned with those evil Republicans. The goal is not to govern well, the goal is to cover-up your mistakes so you stay in power.

Remember when Andrew Cuom0 said "Who cares?" when asked about the people his decisions had killed?

> In addition to stonewalling lawmakers on the total number of nursing home residents killed by COV1D-19, Cuom0's administration refused requests from the news media — including The Post — and fought a Freedom of Information lawsuit filed by the Empire Center on Public Policy.
>
> Instead, it only disclosed data on the numbers of residents who died in their nursing homes.

> But after state Attorney General Letitia James last month released a damning report that estimated the deaths of nursing home residents in hospitals would boost the grim tally by more than 50 percent, Health Commissioner Howard Zucker finally released figures showing the combined total was 12,743 as of Jan. 19.
>
> Just a day earlier, the DOH was only publicly acknowledging 8,711 deaths in nursing homes.
>
> In a Wednesday letter to lawmakers, Zucker said the total number of nursing home residents killed by COV1D-19 had increased to 13,297. That number jumps to 15,049 when assisted living/adult care facilities are factored in.
>
> The controversy generated by James' report led to an infamous news conference at which Cuom0 callously dismissed the matter of where nursing home fatalities actually took place.
>
> "Who cares [if they] died in the hospital, died in a nursing home? They died," he said.

There's some high-quality atheist morality right there for you. But this is what the people who live in New York wanted, when they elected someone with no demonstrated abilities and no achievements in the areas related to his job. He presented himself a certain way to voters, they found his appearance appealing. They voted for him because they saw elections as a popularity contest. A chance to feel good about themselves, and present themselves a certain way to their peers. This wasn't like buying a computer. You didn't need to look at specifications or read reviews. Just choose the one that made you feel good. They paid with their lives.

I expect the same from the decisions of those who voted for Biden / Harris. They don't see themselves as having to be faithful. They wanted power, and the threat to that power (Republicans) is the only reason why they are in office. If they are incompetent and make mistakes, they won't do the right thing. They'll cover it up. Because their real job is staying in power, not serving you.

# William Lane Craig debates Austin Dacey: Does God Exist?

**Wintery Knight** · 13 February 2021 · Archived copy · Original

Here is the video and summary of a debate between Christian theist William Lane Craig and Austin Dacey at Purdue University in 2004 about the existence of God.

**The debaters:**

- William Lane Craig
- Austin Dacey

**The video:** (2 hours)

The video shows the speakers and powerpoint slides of their arguments. Austin Dacey is one of the top atheist debaters, and I would put him second to Peter Millican alone, with Walter Sinnott-Armstrong in third place. This is the debate to show people who are new to apologetics. The debate with Peter Millican is better for advanced students, and that's no surprise since he teaches at Oxford University and is familiar with all of Dr. Craig's work. The Craig-Dacey debate is the one that I give to my co-workers.

By the way, you can get the DVDs and CDs for the first Craig-Dacey debate and the second Craig-Dacey debate and the second Craig-Sinnott-Armstrong debate. The Peter Millican debate is not available on DVD, but the link above (Peter Millican) has the video and my summary.

Dr. Dacey's 5 arguments below are all good arguments that you find in the academic literature. He is also an effective and engaging speaker, This is a great debate to watch!

SUMMARY of the opening speeches:

**Dr. Craig's opening statement:**

Dr. Craig will present six reasons why God exists:

1. (Contingency argument) God is the best explanation of why something exists rather than nothing
2. (Cosmological argument) God's existence is implied by the origin of the universe
3. (Fine-tuning argument) The fine-tuning of the universe for intelligent life points to a designer of the cosmos
4. (Moral argument) God is the best explanation for the existence of objective moral values and objective moral duties
5. (Miracles argument) The historical facts surrounding the life, death and resurrection of Jesus
6. (Religious experience) God's existence is directly knowable even apart from arguments

**Dr. Dacey's opening argument:**

There are two ways to disprove God's existence, by showing that the concept of God is self-contradictory, or by showing that certain facts about ourselves and the world are incompatible with what we would expect to be true if God did exist. Dr. Dacey will focus on the second kind of argument.

1. The hiddenness of God
2. The success of science in explaining nature without needing a supernatural agency
3. The dependence of mind on physical processes in the brain
4. Naturalistic evolution
5. The existence of gratuitous / pointless evil and suffering

**One final point:**

One thing that I have to point out is that Dr. Dacey quotes Brian Greene during the debate to counter Dr. Craig's cosmological argument. Dr. Craig could not respond because he can't see the context of the quote. However, Dr. Craig had a rematch with Dr. Dacey where was able to read the context of the quote and defuse Dr. Dacey's objection. This is what he wrote in his August 2005 newsletter after the re-match:

> The following week, I was off an another three-day trip, this time to California State University at Fresno. As part of a week of campus outreach the Veritas Forum scheduled a debate on the existence of God between me and Austin Dacey, whom I had debated last spring at Purdue University. In preparation for the rematch I adopted two strategies: (1) Since Dacey had come to the Purdue debate with prepared speeches, I decided to throw him for a loop by offering a different set of arguments for God, so that his canned objections wouldn't apply. I chose to focus on the cosmological argument, giving four separate arguments for the beginning of the universe, and on the evidence for Jesus' resurrection. (2) I reviewed our previous debate carefully, preparing critiques of his five atheistic arguments. In the process I found that he had seriously misunderstood or misrepresented a statement by a scientist on the Big Bang; so I brought along the book itself in case Dacey quoted this source again. I figured he might change his arguments just as I was doing; but I wanted to be ready in case he used his old arguments again.
>
> […]The auditorium was packed that night for the debate, and I later learned that there were overflow rooms, too. To my surprise Dr. Dacey gave the very same case he had presented at Purdue; so he really got clobbered on those arguments. Because he wasn't prepared for my new arguments, he didn't even respond to two of my arguments for the beginning of the universe, though he did a credible job responding to the others. I was pleased when he attacked the Big Bang by quoting the same scientist as before, because I then held up the book, specified the page number, and proceeded to quote the context to show what the scientist really meant.

Dr. Craig is always prepared!

# William Lane Craig's case for the resurrection of Jesus

**Wintery Knight** · 14 February 2021 · Archived copy · Original

Dr. Craig's famous minimal facts case for the resurrection has been posted at the Christian Apologetics Alliance. He presents 4 facts admitted by the majority of New Testament historians, and then he supplies multiple pieces of evidence for each fact.

Here are the four facts:

- FACT #1: *After his crucifixion, Jesus was buried in a tomb by Joseph of Arimathea.*
- FACT #2: *On the Sunday following the crucifixion, Jesus' tomb was found empty by a group of his women followers.*
- FACT #3: *On multiple occasions and under various circumstances, different individuals and groups of people experienced appearances of Jesus alive from the dead.*
- FACT #4: *The original disciples believed that Jesus was risen from the dead despite their having every predisposition to the contrary.*

Here's the detail on fact #3, the post-mortem appearances.

> FACT #3: *On multiple occasions and under various circumstances, different individuals and groups of people experienced appearances of Jesus alive from the dead.*
>
> This is a fact which is almost universally acknowledged among New Testament scholars, for the following reasons:
>
> 1. The list of eyewitnesses to Jesus' resurrection appearances which is quoted by Paul in I Cor. 15. 5-7 guarantees that such appearances occurred. These included appearances to Peter (Cephas), the Twelve, the 500 brethren, and James.
>
> 2. The appearance traditions in the gospels provide multiple, independent attestation of these appearances. This is one of the most important marks of historicity. The appearance to Peter is independently attested by Luke, and the appearance to the Twelve by Luke and John. We also have independent witness to Galilean appearances in Mark, Matthew, and John, as well as to the women in Matthew and John.
>
> 3. Certain appearances have earmarks of historicity. For example, we have good evidence from the gospels that neither James nor any of Jesus' younger brothers believed in him during his lifetime. There is no reason to think that the early church would generate fictitious stories concerning the unbelief of Jesus' family had they been faithful followers all along. But it is indisputable that James and his brothers did become active Christian believers following Jesus' death. James was considered an apostle and eventually rose to the position of leadership of the Jerusalem church. According to the first century Jewish historian Josephus, James was martyred for his faith in Christ in the late AD 60s. Now most of us have brothers. What would it take to convince you that your brother is the Lord, such that you would be ready to die for that belief? Can there be any doubt that this remarkable transformation in Jesus' younger brother took place because, in Paul's words, "then he appeared to James"?
>
> Even Gert Ludemann, the leading German critic of the resurrection, himself admits, "It may be taken as historically certain that Peter and the disciples had experiences after Jesus' death in which Jesus appeared to them as the risen Christ."3

Yes, Gerd Ludemann is actually an atheist new Testament historian, and he has even debated Dr. Craig on the resurrection – not once, but *twice*. That's the kind of evidence Dr. Craig uses in his case. Not just what your pastor will give you, but what atheists will give you. We need to learn to debate like that.

# We spend so much on education, why are American children underperforming?

**Wintery Knight** · 15 February 2021 · Archived copy · Original

Here's what public schools and unionized teachers do instead of teaching children mathematics.

Daily Caller:

> Oregon's Department of Education (ODE) is encouraging teachers to register for a training program that offers a toolkit to help educators "develop an anti-racist math practice."
>
> An ODE newsletter advertises a Feb. 21 "Pathway To Math Equity Micro-Course" designed for middle school teachers to use to help them in "dismantling racism in mathematics instruction."
>
> […]The toolkit offers teachers help in "deconstructing racism" in the classroom and "dismantling white supremacy in math classrooms by visibilizing the the toxic characteristics of white supremacy culture with respect to math."

Oh yes! Visibilizing!

> Some of the ways in which white supremacy shows up in classrooms, according to the toolkit, is when "the focus is on getting the 'right' answer."
>
> […]Instead, teachers should have students "come up with at least two answers that might solve this problem" and challenge standardized test questions by justifying why every other answer is incorrect.

Yes, we don't want children to do math and get right answers. Getting the right answers is "racist". I wonder why Asian countries are so much better than America at teaching their students to get right answers. Don't they know how racist that is?

Next, City Journal:

> A Philadelphia elementary school recently forced fifth-grade students to celebrate "black communism" and simulate a Black Power rally in honor of political radical Angela Davis.
>
> […]At the conclusion of the unit, the teacher led the ten- and eleven-year-old students into the school auditorium to "simulate" a Black Power rally to "free Angela Davis" from prison, where she had once been held while awaiting trial on charges of conspiracy, kidnapping, and murder. The students marched on the stage, holding signs that read "Black Power," "Jail Trump," "Free Angela," and "Black Power Matters." They chanted about Africa and ancestral power, then shouted "Free Angela! Free Angela!" as they stood at the front of the stage.
>
> The William D. Kelley School has long been one of the most troubled in the district. The school's student population is 94 percent black and 100 percent "economically disadvantaged." Academically, it is one of the worst-performing schools in Pennsylvania. By sixth grade, only 3 percent of students are proficient in math, and 9 percent are proficient in reading. By graduation, only 13 percent of Kelley students will have achieved basic literacy.
>
> […]Unfortunately, the programs at William Kelley are no aberration. In recent years, the entire Philadelphia public school system has embraced the philosophy of "antiracism." Last summer, the superintendent released an Antiracism Declaration promising to "[dismantle] systems of racial inequity" and circulated a memo recommending racially segregated training programs for white and black educators. The local teachers' union produced a video denouncing the United States as a "settler colony built on white supremacy and capitalism" that has created a "system that lifts up white people over everyone else." The

> solution, according to the union, is to overthrow the “racist structure of capitalism,” provide “reparations for Black and Indigenous people,” and “uproot white supremacy and plant the seeds for a new world.”

They know that if they can indoctrinate your children to vote for socialism, then they’ll get a raise from their allies in the Democrat party.

> After spending millions to support President Biden and other Democrats in the 2020 election cycle, teachers unions are finding Biden to be a reliable ally as they fight back against school districts and parents who want them to return to classrooms amid the coronavirus pandemic.
>
> Teachers unions have ramped up their political spending, increasing from $4.3 million in 2004 to $43.7 million in 2020, according to the Center for Responsive Politics.
>
> The teachers unions also lean heavily Democratic in their donations, including the Federation of American Teachers, which gave $2 million to pro-Biden super PAC Priorities USA Action. The Federation of American Teachers gave more than $14 million to liberal groups between 2019 and 2020. The National Education Association, another teachers union, gave more than $23 million to liberal groups during the same time period, according to the Center for Responsive Politics.
>
> Just 2% of teachers union donations in the 2020 cycle went to Republicans, the numbers show.

Teacher unions donate *millions of dollars* to Democrats and leftist political activists every election cycle.

# Far-left New York Times issues correction of story used in impeachment

**Wintery Knight** · 16 February 2021 · Archived copy · Original

Fox News reports:

> The New York Times has updated an initial report from last month claiming that Capitol Police Officer Brian Sicknick was killed due to blunt force truma from a fire extinguisher during the Jan. 6 riot.
>
> A new Feb. 12 update can be seen pinned to the top of the Jan. 8 article headlined, "Capitol Police Officer Dies From Injuries in Pro-Trump Rampage."
>
> "New information has emerged regarding the death of the Capitol Police officer Brian Sicknick that questions the initial cause of his death provided by officials close to the Capitol Police," the affixation states.
>
> As the Washington Examiner notes, additional revisions based on new information surrounding the officer's death can be seen in another section of the article updated Sunday: "Law enforcement officials initially said Mr. Sicknick was struck with a fire extinguisher, but weeks later, police sources and investigators were at odds over whether he was hit. Medical experts have said he did not die of blunt force trauma, according to one law enforcement official."
>
> The Times originally characterized Sicknick's death differently.
>
> "Mr. Sicknick, 42, an officer for the Capitol Police, died on Thursday from brain injuries he sustained after Trump loyalists who overtook the complex struck him in the head with a fire extinguisher, according to two law enforcement officials," the Times initially wrote.
>
> On Thursday, a separate Times article rebuked the paper's original Jan. 8 report.
>
> "Investigators have found little evidence to back up the attack with the fire extinguisher as the cause of death, the official said. Instead, they increasingly suspect that a factor was Officer Sicknick being sprayed in the face by some sort of irritant, like mace or bear spray, the law enforcement official said," the piece asserted.
>
> Last week, House impeachment managers used the original Times article as evidence in their impeachment pre-trial memo.

Also interesting, this from The Federalist:

> "Officer Sicknick is a martyr for democracy," House Speaker Nancy Pelosi said on Feb. 4, following Sicknick lying in honor at the Capitol Rotunda.
>
> Democrats cited the initial Times report in their pretrial memo that apparently falsely claimed "insurrectionists killed a Capitol police officer by striking him in the head with a fire extinguisher."
>
> President Joe Biden repeated the unverified claim Sicknick was killed by Capitol rioters in the first line of his statement about his predecessor's second acquittal.
>
> "It was nearly two weeks ago that Jill and I paid our respects to Capitol Police officer Brian Sicknick, who laid in honor in the Rotunda after losing his life protecting the Capitol from a riotous, violent mob on January 6, 2021," Biden said.

How soon did the New York Times know that their "news" story needed to be corrected? Before they wrote it?

# After Biden's attacks on oil and gas, gas prices are up 18% and headed higher

**Wintery Knight** · 17 February 2021 · Archived copy · Original

From the Washington Examiner:

> By the time America gets back to work, and traffic jams, gas prices under the Biden administration could be heading back to $4 thanks to new climate regulations, the president's shutdown of energy mining on federal lands, and overseas production cuts.
>
> Industry experts believe that as the coronavirus vaccine becomes widely available, offices will start to fill up, as will gas stations.
>
> […]Since Election Day, gas and crude oil prices have jumped. In the United States, gas prices are up 18% and oil nearly 50%.
>
> […]Every department has been ordered to factor climate change into their moves. In addition, he suspended new drilling leases on federal lands, restricted U.S funds in worldwide carbon energy programs, eliminated "fossil fuel subsidies," stopped the Keystone XL oil pipeline construction, and slapped a moratorium on federal leases in Arctic Wildlife Refuge.
>
> OPEC and the Saudis have also cut production in hopes of raising prices to offset a year of losses.

Democrat views on energy development and global warming are simple. They think that low-emission, low-cost energy sources like natural gas (fracking) and nuclear are BAD. And they think that high-cost, animal killing energy sources like wind and solar are GOOD.

But does green energy work?

Here's USA Today:

Platte River Power Authority's call for customers to conserve energy on Sunday resulted from a perfect storm of energy supply issues as extreme cold created a regional shortage of natural gas; ice and frigid temperatures restricted power from wind turbines; and blankets of snow covered solar panels.

That's just one green energy state. They have colder weather. So what about a warmer state?

Environmentalists burning helicopter fuel to de-ice wind turbines one at a time

Fox News reports on a state that is heavily invested in green energy:

> About half of Texas' wind power generation capacity has been put on ice amid the state's historic winter storm, according to a report.
>
> The Electric Reliability Council of Texas (ERCOT) told the Austin American Statesman that roughly 12,000 megawatts of Texas' wind generation capacity had been hampered as of Sunday due to frozen wind turbines. However, they also noted that unfrozen wind turbines are spinning at a higher rate than expected, helping to offset the losses.
>
> ERCOT operates Texas' electric grid and manages the deregulated energy market for 75% of the state,
>
> "This is a unique winter storm that's more widespread with lots of moisture in West Texas, where there's a lot of times not a lot of moisture," ERCOT senior director of system operations Dan Woodfin told the outlet. "It's certainly more than what we would typically assume."
>
> It is estimated between 2.5 and 3.5 million people in Texas have been left without power amid the storm's frigid temperatures.

Democrats believe that big government is the solution to impending doom caused by human freedom and the free market. They believe this in spite of their past predictions being falsified for the last 50 years. They hate to talk about the Medieval Warming Period, when the Earth was much hotter than it is today. I tend to prefer beliefs that haven't been falsified by evidence over beliefs that make me feel good and look good to people who talk for a living.

# Secular left Canada now jailing Christian pastors for holding church services

**Wintery Knight** · 18 February 2021 · Archived copy · Original

Story from the Justice Center, a law firm:

> The Justice Centre is representing Grace Life Church (Grace Life), a large church near Edmonton, and its pastor James Coates. The congregants of Grace Life hold strongly to their religious beliefs regarding the necessity of gathering in-person to worship and to minister to each other through fellowship and corporate prayer and worship, exercising their Charter freedoms peacefully. Alberta Health Services (AHS) has ticketed Pastor Coates, taken Grace Life and Pastor Coates to court, and even attempted to completely shut the Church down.
>
> […]Restrictions imposed in November and December 2020 through the Orders of the Chief Medical Officer of Health, Dr. Deena Hinshaw, demanded that churches gather at only 15% of building capacity and that all attendees mask and distance from each other.

Dr. Deena Hinshaw doesn't like people using their freedom in ways she disapproves of.

Surveillance by bureaucrats and armed police:

> AHS officials began in November to show up and inspect the Church weekly. Each Sunday morning—during the worship service—an AHS inspector, often accompanied by law enforcement, demanded entry to the building, went into the sanctuary, and recorded the number of people present and whether they were masked and distanced. This has occurred almost every Sunday for three months, with no regard to how disturbing the presence of an AHS inspector and law enforcement is to congregants of Grace Life.

Normal Christian activities are "illicit and bizarre", according to the secular left nanny state:

> On December 17, 2020, AHS inspector Janine Hanrahan issued an order against Grace Life church (the "December 17 AHS Order") and publicly posted the Order on the internet, intentionally exposing Grace Life to public contempt. Previously normal, healthy activities such as sitting together and learning, playing instruments and singing, and not covering one's face, are outlawed and described as if they are illicit and bizarre in the December 17 AHS Order and various AHS inspection reports.

Janine Hanrahan doesn't like people using their freedom in ways she disapproves of.

More:

> On January 21, 2021, AHS filed a court application to enforce through court order the December 17 AHS order, and to be given the power to throw Pastor Coates in jail if he continued to lead Grace Life in normal worship services.
>
> […]On January 29, AHS issued a Closure Order, purporting to entirely close down Grace Life and prevent any congregants of Grace Life from gathering for in-person worship services at the church building.
>
> […]On Sunday, February 7, after the morning worship service, two RCMP officers met with Pastor Coates and a few others in his office at the Church. The officers told Pastor Coates that he was under arrest and must agree to stop breaching the CMOH Orders.
>
> […]Grace Life again gathered for worship on Sunday, February 14 and again an AHS inspector entered the Church and reported the activities of the attendees. RCMP have notified Pastor Coates that they plan to arrest

> him again on Tuesday, February 16, and bring him before a Justice of the Peace, forcing the court to decide if Pastor Coates will be imprisoned.

Just in case you're wondering what the score is, in terms of sicknesses and deaths caused by this church compared to caused by government, government is "winning" 1-0:

> Grace Life is a church of nearly 400 congregants. Not one has been lost to Covid, but, sadly, a congregant was lost to the Alberta Government lockdown in the first week of February when he died prematurely because he couldn't get the cancer treatment he needed due to Government restrictions.

It's not often reported how much damage theses restrictions are doing. Not just in terms of missing health care, but depression, suicide, loneliness, and denying children their educations. Canadians continue to pay taxes to teachers, nurses, doctors, lawyers, judges, police, etc. but they are not getting their money's worth. There's an epidemic of VIOLENT CRIME in cities like Toronto. But all the police in Canada have time for is arresting pastors and shutting down churches.

This is why I support smaller government. When you pay money to these people, they aren't accountable to do anything for you. Why are Canadians paying government workers first, and taking whatever scraps of liberty they're allowed to have, after? Don't live under people like this. Move somewhere where they don't control you. And don't marry one of these hysterical, low-information fascists and put them in your house to monitor you.

By the way, in case you're wondering how the pastor is doing, his wife has posted an update: part 1 and part 2. The police will only release him if he stops pastoring his church. No one, including his own wife, is allowed to see him. Learn from Canada.

By the way, this isn't the first time that a pastor has been arrested for preaching in Canada. It happens a lot.

# Dr. Walt Russell explains how to read the Bible effectively

**Wintery Knight** · 19 February 2021 · Archived copy · Original

Dr. Walt Russell's book on the subject of interpreting the Bible is called "Playing With Fire: How the Bible Ignites Change in Your Soul". I like that book, but I found four articles that summarize the main points of the book so people can understand how to read the Bible at a high level.

Here is part one which talks about how postmodern relativism is at odds with discovering the original intent of an author.

Excerpt:

> Twenty-four year-old "Janet" (not her real name) was angry at my emphasis on seeking to discover authors' intentions when we read their texts. She was an evangelical Christian and a second grade teacher in a public school. She prided herself in helping her 20 students learn to love literature. She would read them a story as they gathered around her, and then ask each child, "What does the story mean to you?" She prodded them to come up with their own unique meanings. With such strong encouragement, the class of 20 would eventually have 20 different meanings for the one story. Janet sensed that I was a naysayer about such "love of literature." Pouring a little emotional gasoline on the fire, I said, "Janet, you're certainly doing your part to insure that these 7 year-olds will never recover from a radically relativistic view of meaning!" Now I had her full attention.

Here is part two which talks about the importance of knowing the genre of a text before you try to interpret it.

Excerpt:

> "INDIANS SLAY TIGERS!" — the newspaper headline virtually screams out at you. The thought of something being slain is repulsive. You're gripped by a mental image of southern India's Bengal tiger. You imagine its beautiful face, its stripes and piercing eyes. Then your image is shattered by the sudden blast of a high-powered rifle. You see the exquisite creature writhe in pain, fall gracelessly in its tracks and die. Having read no further than the headline, you feel sick, as if you've witnessed something tragic.
>
> But *should* you feel this way? The slaughter of an endangered species — especially one as magnificent as the Bengal tiger — is horrifying, no doubt. But suppose you failed to notice that the headline "INDIANS SLAY TIGERS!" appeared in the *sports page* of the morning paper. Clearly enough, it now refers to different Indians, different Tigers and a different manner of slaying than you originally thought. And is it really that tragic that the Cleveland Indians badly beat the Detroit Tigers in a major league baseball game last night? Not unless you're a long-suffering Detroit Tigers' baseball fan. But how do you now know that the headline is about baseball and not tiger-slaying in India? You look at the words "INDIANS SLAY TIGERS" and you know exactly what each word means. When you combine these words, how can they not mean exactly what you first thought they did — that *Indians slay tigers*? Answer: because their meanings are communicated (as the meanings of *all* words are) through *genres*!

Here is part three which talks about the importance of reading the context of a verse before you try to interpret it.

Excerpt:

> "Never Read a Bible Verse!" That's the title of a little booklet my friend and Christian radio personality, Gregory Koukl, has written to help people read the Bible well. What great advice. "That's right, never read a Bible verse. Instead, always read a paragraph — at least." But the current is flowing the other way in our popular sound-bite culture. Not to be left out (or left behind!), the Church has its own version of sound-bite culture: *verse-bite culture*. In verse-bite culture we take a sentence or sentence-fragment from a biblical

> paragraph, memorize it out of context, write it on a little card, put it on a billboard, a plaque, a rock, etc. Somehow we think that just because this little chunk of Scripture has a verse number in front of it, it was meant to be a free-standing unit of thought. Nothing could be further from the truth.
>
> Apart from the fact that chapter and verse divisions weren't added to the New Testament text until 1560 — long after the New Testament's inspired authorship — there is a more important reason for never reading just a Bible verse, and instead reading at least the paragraph that contains it.

Here is part four which talks about the importance of applying the words of the Bible to your life.

One verse that is often misinterpreted is missing from the articles, but present in the STR lecture. It's Philippians 1:6 that says "6 being confident of this, that he who began a good work in you will carry it on to completion until the day of Christ Jesus". Russell says in the lecture that this promise is specifically intended for the church in Philippi, to whom Paul is writing, not necessarily to all Christians. He is giving them a promise just after directly referring to their good work in supporting him in his ministry. Some verses are just not meant for us, and the context reveals it.

# Christopher Hitchens debates William Lane Craig at Biola U: Does God Exist?

**Wintery Knight** · 20 February 2021 · Archived copy · Original

William Lane Craig lecturing to university students
Here is the video of the debate:

**TOPIC: DOES GOD EXIST?**

MY NOTES ON THE DEBATE: (WC = William Lane Craig, CH = Christopher Hitchens)

**WC opening speech:**

Introduction:

WC makes two contentions:
– there are no good arguments for atheism
– there are good arguments for theism

These topics are IRRELEVANT tonight:
– social impact of christianity
– morality of Old Testament passages
– biblical inerrancy
– the debate is whether god (a creator and designer of the universe) exists

1. cosmological argument
– an actually infinite number of past events is impossible
– number of past events must be finite
– therefore universe has a beginning
– the beginning of the universe is confirmed by science – universe began to exist from nothing
– space, time, matter, energy began at the big bang
– the creation of the universe requires a cause
– the cause is uncaused, timeless, spaceless, powerful
– the cause must be beyond space and time, because it created space and time
– the cause is not physical, because it created all matter and energy

– but there are only two kinds of non-physical cause: abstract objects or minds
– abstract objects don't cause effects
– therefore must be mind

2. teleological argument
– fine-tuned constants and ratios
– constants not determined by laws of nature
– also, there are arbitrary quantities
– constants and quantities are in narrow range of life-permitting values
– an example: if the weak force were different by 1 in 10 to the 100, then no life
– there are 3 explanations: physical law or chance or design
– not due to law: because constants and quantities are independent of the laws
– not due to chance: the odds are too high for chance
– therefore, due to design
– the atheist response is the world ensemble (multiverse)
– but world ensemble has unobservable universes, no evidence that they exist
– and world ensemble contradicts scientific observations we have today

3. moral argument
– objective moral values are values that exist regardless of what humans think
– objective values are not personal preferences
– objective values are not evolved standards that cultures have depending on time and place
– objective moral values and duties exist
– objective moral values and duties require a moral lawgiver

4. argument from resurrection miracle
– resurrection implies miracle
– miracle implies God
– 3 minimal facts pass the historical tests (early attestation, eyewitness testimony, multiple attestation, etc.)
– minimal fact 1: empty tomb
– minimal fact 2: appearances
– minimal fact 3: early belief in the resurrection
– jewish theology prohibits a dying messiah – messiah is not supposed to die
– jewish theology has a general resurrection of everybody, there is not supposed to be a resurrection of one person
– jewish theology certainly does not predict a single resurrection of the messiah after he dies
– therefore, the belief in the resurrection is unlikely to have been invented
– disciples were willing to die for that belief in the resurrection
– naturalistic explanations don't work for the 3 minimal facts

5. properly basic belief in god
– religious experience is properly basic
– it's just like the belief in the external world, grounded in experience
– in the absence of defeaters, those experiences are valid

Conclusion: What CH must do:
– destroy all 5 of WC's arguments
– erect his own case in its place

**CH opening speech:**

1. evolution disproves biological design argument
– evolution disproves paley's argument for a watchmaker

2. god wouldn't have done it that way
– god wouldn't have waited that long before the incarnation
– mass extinction and death before Jesus
– god wouldn't have allowed humans to have almost gone extinct a while back in africa
– why insist that this wasteful and incompetent history of life is for us, that's a bad design
– the universe is so vast, why would god need so much space, that's a bad design
– there is too much destruction in the universe, like exploding stars – that's a bad design
– the heat death of the universe is a bad design
– too many of the other planets don't support life, that's a bad design
– the sun is going to become a red giant and incinerate us, that's a bad design

3. hitchens' burden of proof
– there is no good reason that supports the existence of god
– all arguments for god can be explained without god
– atheists can't prove there is no god
– but they can prove there is no good argument for god

4. craig's scientific arguments don't go far enough, they only prove deism, not theism
– the scientific arguments don't prove prayer works
– the scientific arguments don't prove specific moral teachings of christianity

5. if the laws of physics are so great then miracles shouldn't be allowed
– good laws and miracles seem to be in contradiction

6. extraordinary claims need extraordinary evidence
– none of craig's evidence was extraordinary

7. science can change, so craig can't use the progress of science
– it's too early for craig to use the big bang and fine-tuning
– the big bang and fine-tuning evidences are too new
– they could be overturned by the progress of science

8. craig wrote in his book that the internal conviction of god's existence should trump contradicting evidence
– but then he isn't forming his view based on evidence
– he refuses to let evidence disprove his view
– but then how can atheists be to blame if they don't believe
– so evidence is not really relevant to accepting theism

9. the progress of science has disproved religion
– christianity taught that earth was center of the universe
– but then cosmology disproved that

Response to the big bang and fine-tuning arguments:
– was there pre-existing material?
– who designed the designer?

**WC first rebuttal:**

Reiterates his 2 basic contentions

CH agrees that there is no good argument for atheism
– then all you've got is agnosticism
– because CH did not claim to know there is no God
– and he gave no arguments that there is no God

CH's evolution argument

– irrelevant to christianity
– Genesis 1 allows for evolution to have occurred
– christianity is not committed to young earth creationism
– the origin of biological diversity is not central to christianity
– st. augustine in 300 AD said days can be long, special potencies unfold over time
– also there are scientific reasons to doubt evolution
– cites barrow and tipler, and they say:
– each of 10 steps in evolution is very improbable
– chances are so low, it would be a miracle if evolution occurred

CH's argument that god is wasteful
– efficiency is only important to people with limited time or limited resources
– therefore god doesn't need to be efficient

CH's argument that god waits too long to send Jesus
– population was not that high before jesus
– jesus appears just before the exponential explosion of population
– conditions were stable – roman empire, peace, literacy, law, etc.

CH's argument that Craig's scientific arguments only prove deism, not theism
– deism a type of theism, so those scientific arguments work
– all that deism denies is miraculous intervention

CH's argument that Craig has a burden of proof
– theism doesn't need to be proven with certainty
– must only prove best explanation of the evidence

CH's citation of Craig's book saying that evidence should not overrule experience
– there is a difference between knowing and showing christianity is true
– knowing is by religious experience which is a properly basic belief
– showing is done through evidence, and there the evidence does matter

CH's rebuttal to the big bang
– there was no pre-existent material
– space and time and matter came into being at the big bang
– the cause must be non-physical and eternal
– cause of universe outside of time means = cause of universe did not begin to exist
– this is the state of science today

CH's rebuttal to the fine tuning
– CH says scientists are uncertain about the fine-tuning
– craig cites martin rees, an atheist, astronomer royal, to substantiate the fine tuning
– the fine-tuning is necessary for  minimal requirements for life of any kind
– the progress of science is not going to dethrone the fine-tuning

CH's argument about heat death of the universe
– duration of design is irrelevant to whether something was designed
– cars are designed, yet they break down
– design need not be optimal to be designed
– ch is saying why create if we all eventually go extinct
– but life doesn't end in the grave on christianity

CH's rebuttal to the moral argument
– CH says no obj moral values

– but CH uses them to argue against god and christians
– but CH has no foundation for a standard that applies to God and Christians

CH's rebuttal to the resurrection argument
– empty tomb and appearances are virtually certain
– these are minimal facts, well evidenced using standard historical criteria
– best explanation of these minimal facts is the resurrection

CH's rebuttal to religious experience
– prop basic belief is rational in the absence of defeaters
– so long as craig has no psychological deficiency, experience is admissible

**CH first rebuttal:**

it's not agnosticism
– if there are no good arguments for theism
– then there is no reason for belief in god
– that is atheism
– everything can be explained without god

god wouldn't have done it that way
– homo sapiens is 100K years old
– for 98K years, they had no communication from God
– lots of people died in childbirth
– disease and volcanos are a mystery to them
– life expectancy is very low
– they die terrible deaths
– their teeth are badly designed
– their genitalia are badly designed
– why solve the problem of sin by allowing a man to be tortured to death
– that's a stupid, cruel, bumbling plan

lots of people haven't even heard of jesus
– many of them die without knowing about him
– they cannot be held responsible if they do not know about jesus

the early success of christianity doesn't prove christianity is true
– because then it applies to mormonism and islam, they're growing fast

objective morality
– belief in a supreme dictator doesn't improve moral behavior
– i can do moral actions that you can do
– i can repeat moral positions that you can say

religious people are immoral
– genital mutilation
– suicide bombing

moral behavior doesn't need god
– we need to act moral for social cohesion
– it evolved for our survival
– that's why people act morally
– it's degrading to humans, and servile, to require god for morality

free will

– i believe in free will
– i don't know why, because i can't ground free will on atheism
– a bossy god seems to reduce free will because then we are accountable to god

**WC cross-examination of CH:**

WC why call yourself an atheist when you have no reasons?

CH because absence of belief is atheism

WC but agnosticism, atheism, verificationism all don't hold that belief, which are you?

CH i think god does not exist

WC ok give me an argument for the claim you just made to know god does not exist

CH i have no argument, but i don't believe in god because it depresses me to think he might be real

WC would you agree that absence of evidence is not evidence of absence?

CH no i don't agree

WC moral argument: it's not epistemology it's the ontology – have you got a foundation for moral values and duties?

CH i do not, it's just evolution, an evolved standard based on social cohesion

**CH cross-examination of WC:**

CH you said that the historical reports of jesus doing exorcisms are generally accepted – do you believe in devils?

WC i commit to nothing, what I am saying there historical concensus on the reports that jesus did exorcisms

CH what about the devils going into the pigs, do you believe that?

WC yes i do, but the main point i'm making is that the historical reports show that jesus acted with divine authority

CH do you believe in the virgin birth?

WC yes, but that's not historically provable using the minimal facts methods, and i did not use the virgin birth in my arguments tonight, because it doesn't pass the historical tests to be a minimal fact

CH do you believe that all the graves opened and dead people all came out?

WC not sure if the author intended that part as apocalyptic imagery or as literal, i have no opinion on it, have not studied it

CH do exorcisms prove son of god?

WC no, i am only saying that the historical reports show that jesus exercised authority and put himself in the place of god

CH  are any religions false? name one that's false

WC islam

CH so some religions are wicked right?

WC yes

CH if a baby were born in saudi arabia would it be better if it were an atheist or a muslim?

WC i have no opinion on that

CH are any christian denominations wrong?

WC calvinism is wrong about some things, but they are still christians, i could be wrong about some things, i do the best i can studying theology so i'm not wrong

**WC second rebuttal**

Response to CH arguments:

no reasons for atheism
– no reasons to believe that god does not exist
– ch withholds belief in god

why wait so long before contacting humans with jesus
– population matters, not time – jesus waited until there was about to be a population explosion
– there is natural revelation (Romans 1) for those who lived before christ

what about those who never heard
– (*Acts* 17:22-31) god chooses the time and place of each person who is born to optimize their opportunity to know him based on how they will respond to evidence (this is called middle knowledge)
– those who haven't heard will be judged based on general revelation

WC re-assess the state of his five arguments:

cosmological argument
– heat death of the universe won't happen on christianity

moral argument
– if no objective moral standard, can't judge other cultures as wrong
– no transcendent objective standard to be able to judge slavery as wrong

name an action argument
– e.g. – tithing
– the greatest command – love the lord your god your god with everything you've got
– atheists can't do that, and that is the biggest commandment to follow

moral obligations
– there are no objective moral obligations for anyone on atheism
– on atheism, you feel obligated because of genetics and social pressure
– on atheism, we're animals, and animals don't have moral obligations

resurrection
– the belief in resurrection of 1 man, the messiah is totally unexpected on judaism
– they would not have made this up, it was unexpected

religious experience
– experience is valid in the absence of defeaters

**CH second rebuttal:**

faith and reason
– Tertullian says faith is better when it's against reason

it's easy to start a rumor with faith-based people
– mother teresa: to be canonized she needs to have done a miracle
– so there was a faked miracle report
– but everybody believes the fake miracle report!
– this proves that religious rumors are easy to start
– the resurrection could have started as a similar rumor by people wanting to believe it

name an action
– tithing is a religious action, i don't have to do that

moral argument
– i can be as moral as you can without god
– i can say that other cultures are wrong, there i just said it
– without god, people would still be good, so god isn't needed

religious people did bad things in history
– this church did a bad thing here
– that church did a bad thing there
– therfore god doesn't exist

religion is the outcome of man's struggle with natural phenomenon
– that is why there are so many religions

**WC concluding speech**

no arguments for atheism presented

What CH has said during the debate:
– god bad, mother teresa bad, religion bad

atheism is a worldview
– it claims to know the truth
– therefore it is exclusive of other views

what does theism explain
– theism explains a broad range of experiences
– origin of universe, CH has dropped the point
– fine-tuning, CH has dropped the point
– moral, CH says that humans are no different from animals – but an evolved standard is illusory, there are no actual moral values and standards, it's just a genetic predisposition to act in a certain way – that's not prescriptive morality
– resurrection, CH has dropped the point
– experience, craig tells his testimony and urges the audience to give it a shot

**CH concluding speech**

HITCHENS YIELDS HIS ENTIRE CONCLUDING SPEECH!

A question & answer Period followed end of the formal debate

**Further study**

Check out my analysis of the 11 arguments Hitchens made in his opening speech in his debate with Frank Turek.

**Positive arguments for Christian theism**

- The kalam cosmological argument and the Big Bang theory
- The fine-tuning argument from cosmological constants and quantities
- The origin of life, part 1 of 2: the building blocks of life
- The origin of life, part 2 of 2: biological information
- The sudden origin of phyla in the Cambrian explosion
- Galactic habitable zones and circumstellar habitable zones
- Irreducible complexity in molecular machines

- The creative limits of natural selection and random mutation

# I wonder how Never Trump "Christians" feel about the re-introduction of the Equality Act

**Wintery Knight** · 21 February 2021 · Archived copy · Original

I've talked to a lot of Christians about the Equality Act. Most had no idea what the Equality Act even was. I've been writing about it since 2015. I've been reading legal experts and political analysts since then to find out what the consequences will be for Bible-believing Christians. Guess what? The Democrats just reintroduced the bill.

Here's the latest about the bill from Christian Post:

> The reintroduction of the wide-reaching Equality Act, billed as a necessary measure to enshrine protections for the LGBT community into federal civil rights law, was announced Thursday, much to the chagrin of some conservatives and Christian groups.
>
> Sens. Jeff Merkley, D-Ore., Cory Booker, D-N.J., and Tammy Baldwin, D-Wis., announced the bill's introduction in the United States Senate while Rep. David Cicilline, D-R.I., announced the introduction of the bill in the House of Representatives. According to a press release from Merkley's office, "the Senate bill will be formally introduced next week when the Senate floor re-opens for bill introductions."

Biden said this when the bill was re-introduced:

> I applaud Congressman David Cicilline [D-RI] and the entire Congressional Equality Caucus for introducing the Equality Act in the House of Representatives yesterday, and I urge Congress to swiftly pass this historic legislation.

During the campaign, he promised to sign the bill into law, if it reached his desk. This is something that Beth Moore and Russell Moore never told you. They were too busy attacking Trump for his gruff attitude and mean tweets to focus on actual policy.

Here's a reaction from the lead counsel at Alliance Defending Freedom:

> Kristen Waggoner, general counsel at the First Amendment law firm Alliance Defending Freedom, was one of many conservatives reacting unfavorably to the news of the bill's re-emergence.
>
> […]"This proposed legislation punishes and marginalizes people who hold decent and honorable beliefs about marriage or dare to believe the scientific evidence regarding the physical differences between men and women. The Equality Act would deny female athletes fair competition in sports, ignore women's unique health needs, and force vulnerable girls to share intimate spaces with men who identify as female," Waggoner warned.

I trust a legal expert far more than I trust a charismatic Christian leader with no knowledge or experience with actual policies.

If I had to pick one expert on the policy implications of the law, I'd pick Ryan T. Anderson, president of Ethics & Public Policy Center (EPPC) who said this:

> It sacrifices the equality, safety, and privacy of women, while privileging men who identify as women: If this bill becomes law, they'd have a civil right to spend the night in a battered women's shelter, disrobe in a women's locker room, and compete on a women's sports team—even children at K-12 public schools.
>
> Religious institutions fare no better. Religious schools, adoption agencies, and other charities would face federal sanction for operating according to basic biology and mainstream Biblical teaching on sex and marriage. Outrageously, this act exempts itself from the Religious Freedom Restoration Act.

If the Equality Act passes, there isn't going to be any religious exemption or conscience exemption. Every institution that calls itself Christian – schools, churches, universities, corporations, charities, etc. – will be brought into compliance.

Will it become law? It passed in the House 236 to 173 in 2019. It stalled in the Republican-controlled Senate, and we had a Republican president in the White House. Now, thanks to the efforts of people like Beth Moore and Russell Moore, we have a Democrat Senate and a Democrat president. Still like your chances of keeping your religious liberty? The Democrats have everything now.

It's important for Bible-believing Christians to realize that popular charismatic "leaders" have no idea how specific policies will affect our morality and religious liberty. They look to Democrats to tell them what to believe. If you're looking for an accurate view of how laws and policies affect you, you'll have to read people like Kristen Waggoner and Ryan Anderson. Don't think you're going to find out how laws affect you by consuming popular entertainment from secular leftists.

# Can a person believe in both God and Darwinian evolution?

**Wintery Knight** · 22 February 2021 · Archived copy · Original

The term for a person who believes in fully naturalistic evolution but who also believes in God is "theistic evolutionist".

Terrell Clemmons takes a look at one organization of theistic evolutionists "Biologos", and makes a distinction between their public statements and the real implications of their public statements.

Here is the PR / spin definition of theistic evolution:

> Evolutionary creation is "the view that all life on earth came about by the God-ordained process of evolution with common descent. Evolution is a means by which God providentially achieves his purposes in creation." This view, also called *theistic evolution*, has been around since the late nineteenth century, and BioLogos promotes it today in a variety of religious and educational settings.

And here is the no-spin definition of theistic evolution:

> As Dr. Stephen Meyer explains it, the central issue dividing Bio-Logos writers from intelligent design theorists is BioLogos's commitment to methodological naturalism (MN), which is not a scientific theory or empirical finding, but an arbitrary rule excluding non-material causation from the outset. "Unfortunately," Meyer writes,
>
> methodological naturalism is a demanding doctrine. The rule does not say "try finding a materialistic cause but keep intelligent design in the mix of live possibilities, in light of what the evidence might show." Rather, MN tells you that you simply must posit a material or physical cause, whatever the evidence.
>
> **What this means, according to BioLogos's own epistemology, is that God is objectively undiscoverable and unknowable—a tenet that sits squarely at odds with Christian orthodoxy, which has for centuries held that God is clearly discernible in the natural world (e.g., Romans 1:20).** Obviously, this is theologically problematic, but Meyer also points out that theistic evolution faces problems from a scientific standpoint as well, as the technical literature among evolutionary biologists is moving *away* from the Darwinian mechanism.

Whenever I talk to theistic evolutionists, I try to stop them from talking about the Bible or their faith, because that's not what is interesting to me. I don't really care about their history as a religious person, or where they go to church, or who their pastor is. When I talk about origins and evolution, I only care about the science. What the ordinary process of scientific inquiry tells us about nature? Does nature have the capacity to create all of the varieties of life without any intelligent agency playing a role? Or, are there parts of nature that are similar to computer programs, blog posts, and term papers, where the best explanation of the effect is an intelligent agent choosing how to arrange the parts to achieve functionality?

I don't accept molecules-to-man unguided evolution. This is not because I start with faith and let faith override the findings of science. It's because I think that if you look at specific areas of natural history, there is clear evidence of intelligent agency, such as in the origin of life, or the Cambrian explosion. These effects in nature are well-studied and well-understood, and they look much more like the code that a computer scientist (like me) writes than the simplistic "order" created by wind erosion or crystalline patterns or anything the blind forces of nature could produce. Blind forces are observed to make small changes – short or long finch beaks, fruit flies with 4 wings and no balancers, bacterial resistances.

What's also interesting is how often theistic evolutionists drop the theism but keep the evolution.

Consider this article about Stephen Matheson from Evolution News:

> Biologist Stephen Matheson is a longtime critic of the theory of intelligent design. His extensive attacks on Stephen Meyer's *Signature in the Cell*, for one, ranged from the substantive to the trivial and personal. The tone was frequently…abrasive, and we responded at the time. With Arthur Hunt, Dr. Matheson has debated Dr. Meyer in a forum at Biola University. Formerly a professor at an Evangelical Christian school, Calvin College, Matheson is still listed as a Blog Author at the theistic evolutionary website *BioLogos*, where it notes that he enjoys "explor[ing] issues of science and Christian faith."
>
> Well, his theistic evolutionary explorations have now terminated. As he reports on his personal blog page, where he took a hiatus of more than five years along with a break from his teaching, he is "happily" no longer a Christian.

OK. Now that's just one case, but what about Howard Van Till, also of Calvin College?

Salvo magazine takes a look at what he wrote in a recent book:

> In what follows I shall use the term "naturalism," when unqualified, to represent neither more nor less than *the rejection of supernaturalism.* Stated positively, naturalism is committed to the belief that all events that occur within this Universe are consistent with and adequately explained by the system of natural causes. This commitment necessarily entails the additional belief that the system of natural causes is fully adequate to account for all events that transpire. Focusing on the issue of the Universe's formational economy, we can say that naturalism—as here defined -entails the RFEP.

He now gives presentations for atheist groups entitled "From Calvinism to Freethought". Freethought is a euphemism for atheism.

Now, for the big three Western monotheistic religions: Christianity, Judaism and Islam. To deny supernaturalism IS to deny the robust theism present in the world's big three monotheistic religions. Van Till denies theism as commonly understood now. And again, this isn't because of the science. His heavy handed naturalistic assumption squashed out any kind of serious inquiry into areas like the origin of the universe, the cosmic fine tuning, the origin or life, the Cambrian explosion, biological convergence, so-called junk DNA, deleterious mutations, and so on. Places where you can see that naturalistic forces cannot do the creating that Van Till has faith that they can.

I don't accept any kind of macro-evolution – evolution of body plans or organ types. My problem with evolution is not Bible-based, it's science-based. If the science shows the need for intelligent causes, and I think it does, then I think that the naturalists need to adjust their assumptions and pre-suppositions to match the evidence. On the Internet have ball sorts of programs written in different computer languages. They are evidence for programmers. In nature, we have DNA and proteins and sudden origin of body plans, that's evidence for a programmer, too.

# Amazon and Apple welcome you to an old-fashioned book-burning

**Wintery Knight** · 23 February 2021 · Archived copy · Original

You might remember in my recent post on the Equality Act, I recommended Ryan T. Anderson as an expert on the impact of LG8T laws and policies on Christians and other people who have moral convictions. Well, Amazon decided that any disagreement with their left-wing amorality needs to be silenced and punished. They pulled Anderson's book from their online store, with no reason given.

Reported by The Federalist:

> This past weekend, something ominous and cruel happened on Amazon.com—although it could have been foreseen given the recent ramped-up levels of censorship. With the removal of Ryan T. Anderson's 2018 book "When Harry Became Sally: Responding to the Transgender Moment," Amazon openly signaled something to the American public and world.
>
> The digital book-burning has begun; take cover if you're not a raging leftist.
>
> Anderson's work approaches transgenderism and offers a scientific and practical perspective on the realities of human nature. On just about the three-year anniversary of its release, which makes this even more bewildering, the book was silently purged from the Amazon web store. Days before it came out in 2018, legacy institutions were out for blood.
>
> "It was attacked twice on the New York Times op-ed page. The Washington Post ran a hit piece on it that they then had to entirely rewrite to fix all their errors. It was obvious the critics hadn't read the book," Anderson told The Federalist. "People who have actually read my book discovered that it was a thoughtful and accessible presentation of the state of the scientific, medical, philosophical, and legal debates. Yes, it advances an argument from a certain viewpoint. No, it didn't get any facts wrong, and it didn't engage in any name-calling."
>
> Anderson's book was also removed briefly from the Apple Books app then re-added. It has been flagged by Twitter as "potentially sensitive content" as of Feb. 23.

His book on the policy impact of same-sex marriage "Truth Overruled" is my favorite book on the subject. The Harry-Sally book that Amazon banned had all sorts of endorsements from scholars:

> Amazon has yet to comment on its removal of Anderson's book, which has received acclaim by scholars at institutions like Princeton University, Harvard University, and Oxford University. It was hailed by John Finnis of Oxford as a "focused, informative, fair-minded, lucid and fact-based guide to just and reasonable policies."

But the book didn't pass muster with all the thousand-sexual-partner Grindr app users who make up the Big Tech elite. They decided it was bad. It doesn't fit with San Francisco values, even if it was tightly argued and brimming with irrefutable evidence.

[image]

So, Amazon has been getting increasingly woke lately. Apple was always woke. They conspired, along with Google, to take down Parler. Was it because Parler doesn't support the Democrat party platform? That was my impression. So I decided to curtail all my Amazon spending and found alternatives instead. I suggest that you do the same, as much as you're able to. Even buying from left-wing small companies is safer than buying from Amazon. The small companies can't hurt you.

By the way, if you want to buy Anderson's book, you can get it on sale from Christian Book.

# Two kinds of people who have tried to shame me away from Christianity

**Wintery Knight** · 24 February 2021 · Archived copy · Original

In my last job, I had two interesting encounters, first with a secular Jewish leftist man and second with a New Age prosperity gospel feminist Christian woman.

So let's talk about the two people.

**The man who thinks that conservative Christians are stupid**

The first kind of person who tried to shame me for being a Christian is the person who thinks that Christianity is stupid. This kind of person invokes things that he hears in secular leftist pop culture as if it is common knowledge that theism generally, and Christianity in particular, is false. He's watched a documentary on the Discovery channel which said that the eternally oscillating cosmology was true. Or maybe he watched a documentary on the History Channel that said that Jesus never presented himself as God stepping into history. He presents these things that he reads in the New York Times, or sees on MSNBC or hears on NPR with the authority tone that Ben Carson might take when explaining modern medicine to a witch doctor.

Here is how things usually go with him:

- Me: here are two arguments against naturalistic evolution, the origin of life and the Cambrian explosion.
- Him: but you don't believe in a young-Earth do you? I mean, you believe in evolution don't you?
- Me: let's talk about how proteins and DNA is sequenced, and the sudden origin of Cambrian body plans
- Him: (shouting) Do you believe in evolution? Do you believe in evolution?

And this:

- Me: there hasn't been any global warming for 18 years, and temperatures were warmer in the Medieval Warming Period
- Him: but you don't deny climate change, do you? everyone on NPR agrees that climate change is real
- Me: let's talk about the last 18 years of no warming, and the temperatures during the Medieval Warming Period
- Him: (shouting) Do you believe in climate change? Do you believe in climate change?

He asks these questions so he can either label me as a nut, without having to weigh the evidence I'm presenting, or have me agree with him, without having to weigh the evidence I'm presenting. It's all about ignoring the evidence, so he can get back to his busy, busy practical life – and get back to feeling smug about being smarter than others. I think a lot of men are like this – they don't want to waste their valuable time studying, they just want to jump to the right conclusion, then get back to doing whatever they want – like running marathons, or driving their kids to hockey practice, etc.

So how do you respond to a man who gets his entire worldview from the culture, but never deals with peer-reviewed evidence? Well, I think you just defeat his arguments with evidence and then present your own (peer-reviewed) evidence, and then leave it at that. If the person just wants to jump to the conclusion that all the "smart" people hold to, without doing any of the work, then you can't win. There are atheists out there who believe in the eternal oscillating universe they saw Carl Sagan talking about in their elementary school. You might try to argue for an origin of the universe by citing new evidence like the CMB and light element abundances. But sometimes, they won't care. Carl Sagan said it 50 years ago, and that settles it. It doesn't matter that the new evidence overturns the old theories, they don't care.

Do you think that Christianity will make non-Christians like you?

Consider 2 Tim 4:1-5:

1 I charge you in the presence of God and of Christ Jesus, who is to judge the living and the dead, and by his appearing and his kingdom:

[2] preach the word; be ready in season and out of season; reprove, rebuke, and exhort, with complete patience and teaching.

[3] For the time is coming when people will not endure sound teaching, but having itching ears they will accumulate for themselves teachers to suit their own passions,

[4] and will turn away from listening to the truth and wander off into myths.

[5] As for you, always be sober-minded, endure suffering, do the work of an evangelist, fulfill your ministry.

And 1 Peter 3:15-16:

[15] but in your hearts honor Christ the Lord as holy, always being prepared to make a defense to anyone who asks you for a reason for the hope that is in you; yet do it with gentleness and respect,

[16] having a good conscience, so that, when you are slandered, those who revile your good behavior in Christ may be put to shame.

If you have orthodox theological beliefs in this day and age then you are going to be shamed, humiliated and reviled by people. And it's not just having an orthodox view of who Jesus is that annoys them (e.g. – deity, exclusivity of salvation, morality, etc.). No, their disapproval spreads on into politics, especially abortion and gay marriage – basically any kind of rules around sexuality. That's what's really bugging these people, I think.

**The woman who thinks Christianity is life-enhancement**

This one is especially difficult when you are a young man, because we naturally look to women for approval and respect. You find yourself sitting in church or youth group, hoping for the approval and respect from the Christian women for your sound theology and effective apologetics. Little do you know that many Christian women understand Christianity as life-enhancement, designed to produce happy feelings. God is their cosmic butler whose main responsibility is to meet their needs and make their plans work out. Although you might be keen on sound theology and good apologetics arguments, she doesn't think that's important.

So how to deal with this unmet need for approval and respect from women in the church?

First thing, be careful that you don't attend a church where the pastor in preaching and picking hymns that give you the idea that God is your cosmic butler. Second, read the Bible very carefully, and understand that with respect to God's purposes for you in this world, your happiness is expendable. You cannot be looking to attractive Christian women that you happen to meet in church to support you, as many of them have long-since sold out to the culture. They are not interested in learning *evidential* apologetics to defend God's reputation, or in defending the unborn, or in defending natural marriage, or in defending the free enterprise system that supports family autonomy from the state, etc. Those things are hard and unpopular, especially for those women who were raised to think that Christianity is about life enhancement and peer-approval.

Here's 1 Cor 4:1-5 to make the point:

1 This is how one should regard us, as servants of Christ and stewards of the mysteries of God.

[2] Moreover, it is required of stewards that they be found faithful.

[3] But with me it is a very small thing that I should be judged by you or by any human court. In fact, I do not even judge myself.

[4] For I am not aware of anything against myself, but I am not thereby acquitted. It is the Lord who judges me.

[5] Therefore do not pronounce judgment before the time, before the Lord comes, who will bring to light the things

now hidden in darkness and will disclose the purposes of the heart. Then each one will receive his commendation from God.

And 2 Tim 2:4:

[4] No soldier gets entangled in civilian pursuits, since his aim is to please the one who enlisted him.

Or, since I like Ronald Speirs from Band of Brothers so much:

This is the situation in which we find ourselves, so get used to it. And believe me, I have to deal with this, too. So I have all the sympathy in the world for you. Resign yourself to the fact that no one is going to approve of you for being faithful to the gospel of Jesus Christ; not secular men, not Christian women. There is no cavalry coming to rescue you.

# Bible study: How should Christians understand suffering? (1 Peter 1)

**Wintery Knight** · 25 February 2021 · Archived copy · Original

I thought I would post my notes for my 1 Peter Bible study here. I'm studying 1 Peter with a female friend in the mornings. We're using Joel Green's "1 Peter" commentary which we got for free from Logos Bible Software.

We had a very good discussion today about how we started out our lives (even as Christians) with certain sad / missing things and how reading the Bible and having changed priorities and behaviors changed what we were hoping for, our priorities, our desires, and our contentment.

I just pasted in my full notes with the clips from Green's book, then below that, I have the pasted in her (better) notes. I wish you all could be in our Bible study, we are very practical.

## My notes:

**Author:** Apostle Peter
**Date:** this letter was probably written before or during the Neronian persecution (AD 62-64)
**Audience:** probably a mixed group of Jews and Gentile believers who were scattered throughout the northern regions of Asia Minor
**Genre:** Didactic
**Purpose:** provide direction for believers under persecution; at times it also includes theological considerations which support the ethical exhortations.
**Map:** https://en.wikipedia.org/wiki/1_Peter_1#/media/File:Map_Anatolia_ancient_regions-en.svg
**Commentary:** "1 Peter" by Joel B. Green

**Verses 6-7:**

- Genuine faith doesn't mean that you will be free from "various trials" now.
- Talk about my experiences dealing with white male senior engineers and architects who are very successful in my IT workplace, married, with kids, who grew up in married Christian homes and lost their faith in college OR who profess Christianity but vote Democrat and know more about Star Wars / fantasy novels, etc. than Christian worldview and apologetics.
- The feeling of not being good enough at worldly success and not being able to convince non-Christians that spiritual things are more important, specifically, apologetics.
- Seeing how attractive, charismatic white Christians families are seen as the gold standard in church, even though they can't defend their worldview, and their priorities, favored policies, and discussion topics are all from the secular left culture.
- My experience of "rejoicing" in the faith will not be about being happy or joyful. It's more likely to center around honor, as in Henry V's speech to his men (and reply to the Herald) in Act 4, Scene 3. (in modern English here)

**Green:** What Peter does not say is almost as important as what he affirms. First, he provides nowhere any hint that the affliction and misery of his audience is the consequence of their sin or God's judgment. Such categories simply have no place in his letter.

**Green:** First Peter is addressed to folks who do not belong, who eke out their lives on the periphery of acceptable society, whose deepest loyalties and inclinations do not line up very well with what matters most in the world in which they live.

**Green:** Divine choice and alien status are deeply rooted in God's purpose as this comes to expression in the Scriptures, so the dissonance of present life, chosen by God but held in contempt in society, is neither a surprise to

God nor a contradiction of his plan. Peter will demonstrate that the way of Jesus Christ was the path of suffering and glory… that the model of Jesus Christ interprets and is interpreted by the Scriptures of Israel… and that this pattern is characteristic of those who follow in his footsteps…

**Green:** The issue is this: life-events do not come with self-contained and immediately obvious interpretations; rather, we conceptualize them in terms of imaginative structures that we take to be true, normal, and good. As a rule, the world-at-large casts a thick, dark cloud of despair over experiences of suffering, distress, trials, and alien status. Peter insists that such experiences on the part of his audience must be read according to a radically different pattern of thought—one that grows out of new birth.

**Green:** Inexorably linked in the consequent passion theology are the sufferings of Christ and his followers, who are thereby assured that their suffering will have a redemptive effect and will lead to glory and honor from God just as Jesus' suffering did. This is the interpretation of things inspired by the Spirit.

**Verses 13-14:**

- Hope in the future should cause us not to be conformed to our past passions.
- Being sober-minded means setting your hope on eternal life, instead of trying to fill worldly desires with experiences or possessions here and now. Sober like not trying to feel good now (artificially) using mind-altering substances.
- Emphasis is on new priorities and freely-chosen behaviors.
- Talk about how I saw marriage and children as the solution to my problems of bad parents and a contentious home when I was young.
- Talk about how prioritizing God's priorities and learning more about how the culture doesn't make marriage-ready women and doesn't value marriage means that I probably would have destroyed myself if I had got the marriage I desired.
- Talk about how take the priorities of God and acting according to the Bible (chastity, sobriety, stewardship, focus on loving others self-sacrificially) ends up putting you in a safe, peaceful place – a paid off home, and retirement money.
- By focusing on God, your behaviors (chastity, sobriety, stewardship, loving others) have the effect of making you not destroy yourself with addictions, narcissism, etc. You end up in a pretty decent, peaceful place anyway, because you haven't self-destructed, e.g. – by marrying a non-Christian woman for looks and beauty who the culture turns into a secular leftist, and then watching helplessly when she goes into a career and puts your kids into public schools to be indoctrinated in secular leftism. I didn't get what I wanted, but I dodged a bullet, since that's how most young, unmarried women are today.

**Green:** The section as a whole, vv. 13–21, begins and ends with reference to "hope" (vv. 13, 21) and is centrally focused on "behavior, conduct, or way of life" (vv. 15, 17, 18). The accent on hope is carried over from the previous section (v. 3), but the emphasis on "way of life" is introduced for the first time, signaling early in the letter a pronounced interest in the nature of faithful life and ethical comportment in the world. Clearly, Peter anticipates that hope will be displayed in changed life.

**Green:** In the Greco-Roman world, "desire"… appears in moral discourse—already in Plato but more recently especially among the Stoics, in Hellenistic Jewish literature, and in Christian writings—with such generally negative connotations as "insatiable cravings" or "lust."15 As a generic vice almost universally condemned, "desire" marked "the former time of ignorance." In the present text, desires rooted in ignorance belong to the past, so should no longer shape or form… Peter's audience; in its place, imitation of God's holiness is expected. For Peter, "desire" and "holiness" appear as opposing forces each capable of drawing persons into its orbit, conforming human character and actions to its ways and so sculpting human life. Paul similarly wrote, "Do not be conformed to this world, but be transformed by the renewing of your minds" (Rom 12:2).

## Her notes:

**1. Who is the author of this letter? What do you know about him?**

-The apostle Peter

-A disciple of Jesus

-One of the three of Jesus' inner circle

-Denied Christ at his crucifixion

-Spoke boldly at Pentecost in the face of mocking

-Was imprisoned for preaching the gospel

-Refused to stop preaching even if it meant death (Acts 5:29)

-Was martyred in Rome around 64 A.D.

**2. Who is Peter writing to? What might their lives have been like as persecuted exiles?**

-Christians of the Dispersion (Dispersion in Pontus, Galatia, Cappadocia, Asia, and Bithynia)

-Rejected by family and friends

-Difficulty finding work

-Scared for their lives

-Scared for their children's futures

**3. What is one reason God allows trials in our lives now?**

"*so that the tested genuineness of your faith—more precious than gold that perishes though it is tested by fire—may be found to result in praise and glory and honor at the revelation of Jesus Christ."* (v. 7)

-To test the genuineness of our faith

-To result in praise and glory when Christ returns

This is part of the normal Christian life, not as a result of their bad choices, but as a result of their decision to follow Christ. The things we care about as Christians will not be celebrated by this world.

It's not mentioned here, but the dispersion of Christians to new locations contributed to the spread of the gospel and resulted in many people being saved.

From other passages of Scripture:

-To make us more like Christ (Rom. 5:3-5)

-To equip us to show compassion to others (2 Cor. 1:3-5)

-To prepare for us glory (2 Cor. 4:17; 1 Peter 4:13)

-To draw others to Christ (Philippians 1:12; Col. 1:24-25; 2 Tim. 2:10)

I think there is a direct correlation between our suffering in this life and our happiness in the next life, such that we will actually be happier, more elated, more joyful, more grateful, in the next life because we experienced trials and suffering in this life.

- "For this light and momentary affliction is preparing for us an eternal weight of glory beyond all comparison." (2 Corinthians 4:17)
- "For I consider that the sufferings of this present time are not worth comparing with the glory that is to be

revealed in us." (Romans 8:18)

- "But rejoice inasmuch as you participate in the sufferings of Christ, so that you may be overjoyed when his glory is revealed." (1 Peter 4:13)
- "Blessed are the poor in spirit, for theirs is the kingdom of heaven…. (Matthew 5:3-12)

For example, have you ever lost something, freaked out that you couldn't find it, and then appreciated it far more after you found it than you ever had before you lost it? Similarly, I believe (based on Scripture verses) that we will experience greater pleasure in heaven and on the New Earth as a result of having been without comfort, pleasure, fulfillment, etc. for a time. If this is accurate, then we can genuinely thank God for allowing us to experience these trials for a time because by enduring them with trust in Christ, we are investing in our future (eternal) happiness.

**4. Our inheritance in Christ**

**a. How does Peter describe our inheritance in Christ?**

-Imperishable, undefiled, and unfading, kept in heaven for you

**b. What is a proper response to this inheritance that awaits us in the next life?**

-Rejoicing, even in hard times (this should be evident to those around us)

-Hope in all circumstances (Explain *hope* in Bible of a confident and certain expectation for the future vs. *hope* in common usage as something we want which may or may not come to pass)

-Gratefulness for what is to come

-Self-sacrifice because this life is fleeting and the next is glorious

**c. When you imagine life on the New Earth, what do you think about?**

-Perfect health, energy, no sickness

-Perfect relationships with God and the saints

-Perfect beauty in nature

-No fear, anxiety, depression, disappointment

-Exploring the universe with perfect minds and bodies

-Exploring the oceans, the colorful fish and reefs, with no pollution or fear

**5. In verse 13, Peter tells us to prepare our minds for action. Practically speaking, what can we do in our daily lives to make sure that our minds are prepared for action?**

-Avoid corrupting influences like drugs, too much alcohol, pornography, entertainment that puts forth values that are in opposition to Christ and to our calling

-Spend time in the Word and in prayer daily, asking the Lord to conform us to his character and to prepare us for what is ahead

-Spend time meditating on the inheritance that awaits us

-Surround ourselves with like-minded Christians

-Read and watch films about Christians who have suffered for their faith in times past (Corrie Ten Boom, Sophie Scholl, Dietrick Bonhoeffer, etc.)

**6. What trials have you faced for doing good in the past? What trials are you facing right now?**

Past:

-Rejection and mocking for Christian faith at the UMC church

Present:

-Woke liberals who put pressure on me to conform to their values

**Assignment:** Spend some time thanking God for saving you from punishment and saving you for eternal glory. Ask him to use your trials to refine your faith and your character the way fire refines gold, and to do it all for His glory.

**7. Any other points or observations?**

-1:2 references the Trinity: “according to the foreknowledge of God the Father, in the sanctification of the Spirit, for obedience to Jesus Christ and for sprinkling with his blood.”

-Suffering is the normal Christian life. It has been since the very beginning, and it will be until the very end. Ease and comfort for Christians is the strange anomaly. The prosperity gospel is heresy. We must expect suffering, prepare for suffering, and rejoice in suffering, but not seek out unnecessary suffering. We must suffer for doing good, not as criminals or fools. But our light and momentary afflictions are not worth comparing with the glory that is to be revealed. Our hope is in the next life, and it will all be worth it.

# House Democrats pass the Equality Act – here's what it means to Bible-believing Christians

**Wintery Knight** · 26 February 2021 · Archived copy · Original

I'm just going to cut and paste some information for you from recent articles I found at Alliance Defending Freedom and The Federalist.

Here's an article from The Federalist to explain the bill.

Adoption agencies:

> Unhappy with the restrictions on eligibility that Catholic and other religious adoption agencies put on families looking to take children into their homes, the act seeks to nationalize Massachusetts, New York, and California's outright bans on religious adoption agencies' right to operate according to conscience. Never mind that there are any number of secular adoption agencies with no traditional marriage guidelines; shutting down the organizations that invented adoption, the bill states, will "increase the number of homes available to foster children."

Sex-specific businesses:

> Salons, too, will not be able to "discriminate" based on biology, opening the door in the United States for the Canadian nightmare where Jessic4 Y4niv — a man who identifies as a woman while still being attracted to women — sued to force female nail salon employees to wax his privates. You don't have to be a woman to understand the level of sexual assault implicit in an adult man demanding a woman handle his privates for money or risk the force of law.

Christian-owned organizations: (businesses, churches, schools)

> Remember Masterpiece Cakeshop's Jack Phillips? In 2017, after five years of fighting the Colorado baker won a Supreme Court battle establishing his right to abstain from services he opposed on religious grounds. Four years later, however, he is still embroiled in an unending stream of lawsuits and complaints brought by radical gay and transgender activists (and even a Satanist). The Equality Act would take the treatment Phillips has received over his views on marriage and gender, and nationalize it. Virtually no businessman would be exempt.

Christian charities:

> Nor will the Little Sisters of the Poor's hard-fought-if-fleeting legal victories be safe. According to the Equality Act, religious nurses, doctors, and hospitals unwilling to kill an unborn child or perform a potentially mentally destabilizing, deeply invasive, medically unsound sex-change surgery could be legally discriminating.
>
> While the Little Sisters were able to beat back their antagonists — who were led by President Joe Biden's nominee to head the Department of Health and Human Services, Xavier Becerra — using 1993's Religious Freedom Restoration Act, this last line of defense would be useless against the Equality Act.
>
> "The Religious Freedom Restoration Act of 1993," the act reads, "shall not provide a claim concerning, or a defense to a claim under, a covered title, or provide a basis for challenging the application or enforcement of a covered title."

And of course religious schools will have to teach what the secular left believes. And religious organizations won't be able to hire people who actually believe in their religious mission.

Finally, I found this ADF article about *abortion* of all things:

> The "Equality Act" states that "pregnancy, childbirth, or a related medical condition [which includes abortion] shall not receive less favorable treatment than other physical conditions." It also specifically eliminates conscience protections provided by the Religious Freedom Restoration Act for those who object to participating in abortions.
>
> Here's what that means:

> 1. The "Equality Act" could require doctors and hospitals to commit abortions—even if they have religious or moral objections.

> 2. The "Equality Act" offers no protections for employers who conscientiously object to covering abortion in their health care plans, leaving the door open for abortion advocates to argue that the Act requires them to provide abortion coverage.

> 3. The "Equality Act" could require the federal government and recipients of federal funding to cover abortion in their health care plans—all at the taxpayer's expense.

I've been paying a lot of attention to the bill since 2015, because I believe that this bill will basically end public Christianity in the United States. I don't see how you can be a champion of chastity or natural marriage if these views cannot be expressed. Your job will be threatened if you believe these things. Christian organizations will be threatened for believing these things. Christian businesses will be threatened if the owners believe these things. Remember, in Canada, a Christian law school was punished for requiring students to avoid sex outside of natural marriage. That was deemed "anti-g4y", and the law school lost its accreditation in several provinces.

The reason I follow this is because I know that a lot of Christians have a very different view of Christianity than I do. They don't want to defend Jesus' teachings on sexual morality and marriage. They want to show "love" to their non-Christian neighbors. And by "love" they don't mean a love that tells the truth. They mean a love that is acceptance of sin. Participation in sin. Celebration of sin. We've made a lot of Christians like that. They almost never know what the secular left has planned for them with laws like the Equality Act.

My job as a Bible-believing Christian is to tell you the truth and remind you that your job is not to show "love" (i.e. – agreement with) to non-Christians. Your job is to show love to Jesus, and share the truth to non-Christians in a loving way. Treat them with respect, but don't agree with them. That's not good for them, and your job is to *do good to them* – not to *agree with them.*

**Please pray and take action:**

Contact your U.S. senators and ask them to vote NO.

# How should parents respond to teachers pressuring children to transition?

**Wintery Knight** · 27 February 2021 · Archived copy · Original

Catholic teachers march in favor of gay rights and perverted sex education

My plan for marriage was to have 4 children with my wife, then homeschool them right through to doctoral degrees. But one thing I knew for sure, I was never going to put my kids into public schools. My impression of public school teachers is that they are the source of moral relativism and cultural relativism. They break down morality and patriotism in children and call it compassion.

Abigal Shrier has noticed that the teachers in public schools are pushing transgenderism pretty hard, because they don't want anyone making judgments about what is right or wrong, wise or foolish.

The far-left UK Daily Mail reported:

> 'I often get parents telling me they're not able to take binders (a cloth which flattens breasts by the use of constrictive materials) away from their children, and I say to them, "Would you give your children cigarettes?".
>
> 'Because we know binders are really harmful, they can deform breast tissue, cause rib cracking and shortness of breath. They're quite dangerous for your 14-year-old to be going around with.'
>
> Sharing her experience of parents' concerns, she said: 'Parents often say to me "I don't want to be seen as a transphobe", and it's very clear to me that sometimes these parents feel like they can't speak the truth or go against their own children's wishes.
>
> […]'I've never seen parents so beaten down and undermined. They send them to school in good faith and now schools are helping them fill out forms with new names as different sexes and hide it from their parents. They turn their kids against their parents.
>
> 'Medicine has become so politicised that parents can't even rely on honesty from medical professionals even when it comes to transition.'

You might remember that I blogged about a particularly scary case of this from socialist Canada, which doesn't respect parents' rights at all. There, the teachers, administrators, counsellors, doctors, layers and judges, all conspired to transition a child from female to male against the parents' wishes. If you haven't read that post from March of this year, you should definitely go read it, to find out where our own public schools are trying to go with students.

Anyway, in another article from The College Fix I found an excerpt of her new book, where she offers advice to parents. She talks about not giving them smartphones, not abdicating the leadership role, monitoring the schools for gender ideology, keeping family business private, being open to pulling the children out of their communities, etc.

And there is some pushback against the transgender agenda being promoted by teachers. Some people are regretting their transitions, and blaming the adults who affirmed them on their way to self-harm.

Here's an article from Sky News:

> A woman who was treated with hormone blockers to reassign her gender as a teenager is taking the NHS to court, saying she "should have been told to wait".
>
> Keira Bell said the care she received for gender dysphoria, a condition where a person experiences distress due to a mismatch between their biological sex and their gender identity, steered her towards medical treatment.
>
> Ms Bell, who used to identify as a boy, was 15 when she went to the Tavistock Centre in London. She said after "roughly three sessions" she started receiving hormone blockers.
>
> Eight years later, and after undergoing surgery, Ms Bell is de-transitioning to return to a woman.
>
> […]She said: "I am angry about the whole situation because of how things have turned out for me based on the medical pathway that I was put on, but I'm now just trying to focus on changing the system for the better and making it better for minors and children.
>
> "I should have been told to wait and not affirmed in my gender identity I was claiming to have and given intensive therapy basically to make sure that I was on the right track for things and investigate the feelings I was having to figure out how I got to that stage."
>
> Ms Bell said she felt "trapped and alone", and the Tavistock Centre should have taken into account the "confusion" teenagers experience before offering her treatment.

What I'd like to see is conservative lawmakers craft legislation to allow victims like this to charge the teachers, administrators, doctors, lawyers and judges with criminal negligence. Because I really feel that it is criminal to lie to young people so that you will feel good, and people will like you. That's all that this focus on feelings and compassion is. The secular leftist adults aren't capable of moral reasoning. They don't want to do good for the children, they want to feel good and be popular, even if it harms the children's long-term well-being and happiness. The adults should be punished.

# Where to get help if you have a selfish, absent or abusive mother or father

**Wintery Knight** · 28 February 2021 · Archived copy · Original

Bible study that hits the spot

Today, I want to say something this article about lambs in Scotland, written by Sheila Walsh in the The Stream.

She writes:

> I am very fond of sheep. I grew up on the west coast of Scotland with sheep all around me, field after field of white wool and incessant crying when things seemed a little off.
>
> […]Of all the lessons I have learned from these defenseless, gentle animals, the most profound is the most painful. Every now and then, a ewe will give birth to a lamb and immediately reject it. Sometimes the lamb is rejected because they are one of twins and the mother doesn't have enough milk or she is old and frankly quite tired of the whole business. They call those lambs, *bummer lambs*.
>
> Unless the shepherd intervenes, that lamb will die. So the shepherd will take that little lost one into his home and hand feed it from a bottle and keep it warm by the fire. He will wrap it up warm and hold it close enough to hear a heartbeat. When the lamb is strong the shepherd will place it back in the field with the rest of the flock.
>
> "Off you go now, you can do this, I'm right here."
>
> The most beautiful sight to see is when the shepherd approaches his flock in the morning and calls them out, "*Sheep, sheep, sheep*!"
>
> The first to run to him are the bummer lambs because they know his voice. It's not that they are more loved — it's just that they believe it.
>
> I am so grateful that Christ calls himself the Good Shepherd.
>
> "He calls his own sheep by name and leads them out. After he has gathered his own flock, he walks ahead of them, and they follow him because they know his voice." (John 10:3-4 NLT)

My older brother and I grew up with a mother who was very much focused on her career and earning and saving

money for her retirement. We were both stuck in daycare very early after being born, so that she could go back to work right away. (Me after 6 weeks) My older brother has shown the ill effects of our parents (especially our mother) not having any plan for us, especially morally and spiritually. He dropped out of college after failing his first year, never had a career. Although he has normal intelligence and mental health, he never could stick in any real job.

Although there were early warning signs when his grades started to drop in Grade 5, my parents never took responsibility to make a plan to solve it. Oh, they would yell and scream at him at report card time, but just for a day or two, and after that, nothing constructive. My brother decided that he could just ride out the flak my parents gave him on report card night, and keep going with his plan of having fun and being popular. My parents just forgot about it until the next report card day, because they did not want to be distracted from their careers, hobbies and retirement planning. When dispensing rewards, my brother was always given the same as me, despite our different levels of achievement. And my parents considered this equal dispensation of rewards regardless of performance to be a great virtue, and excellent parenting.

I had the exact same upbringing as my older brother. He actually did pretty well until Grade 5 just like me, but then our paths diverged. From Grade 5 on, his grades deterioriated. He got tired of having to study and he was more interested in the opinions of his peers and conforming to popular culture. In my case, from Grade 5 on, my grades were always high-90s. I remember taking the same classes as he did, in the same high school, with the same teachers. He got a 44 in data processing, I got a 96 with the same teacher and won the award for the entire grade. Every class I went to, the teachers would speak fondly of my older brother – he was a nice guy, very popular with his peers, good at sports. But not a very good student. How was it that I was winning awards when he had scored so poorly. Was I really his brother? How could we be so different?

The difference is that in Grade 5, he got a Gideon's New Testament and he read it and he didn't put it into practice, and in Grade 5, I got a Gideon's New Testament and I read it twice and I did put it into practice. That was the difference. I had the awareness of the moral law (i.e.- wisdom) that allowed me to judge my parents and judge my peers and judge my teachers and stand alone. When you cannot rely on anyone to lead you, be able to judge when others mistreat you is very important. That is what allows you to maintain appropriate boundaries and minimize the influence of friends and family who are teaching you self-destructive behaviors. Awareness of the moral law is what allows you to stop trying to please people who do not want what is best for you. On the other hand, God is always willing to give you wisdom if you ask Him for it, and you can find out all about him because he has left plenty of evidence concerning his existence and character for you to find. It is in knowing God as he really is that you can find your sense of value, purpose and meaning. The God of the New Testament is the God of people who are lost and need a Savior.

For me, Christianity was a simple matter of being willing to go along with what was true, and not insisting on having fun or conforming to peer expectations. The essential characteristic of my faith, in contrast to my older brother's lack of faith, was this – I did not mind being different, so long as I never lost a debate about what was true. My obedience to Christ has never been conditional on things going my way, on being liked, or anything like that. The only thing that mattered was being factually correct. It never bothered me what other people were doing, or what other people expected me to do, so long as I was acting on what I knew to be true. And God helped me to find out what was true by motivating me to study, and leading me to him with good evidence, and good mentors. Thanks to Jesus' death on the cross, the mistakes I made early did not count against me, and they never will. Jesus' death on the cross gives me the imputed righteousness that I need to stand before God holy and blameless. This is what allows me to keep learning and keep trying no matter how much I fail on any given day.

How has this affected me? Well, this is the second thing I wanted to say about the bummer lamb analogy. Since I was a victim of this hands-off, me-first style of parenting, it's caused me to be extra sensitive about being a good spiritual leader to others in the same predicament. The people I mentor can see it in the way that I treat them . I treat them the opposite of the way that my older brother and I were treated. I care what people read. I care what courses they choose. I care what they eat. I care how they feel. I care about their finances. I care about their plans to

serve God. I care about their romantic relationships. I care whether they get recognition for doing good. I care whether their life is going in the right direction. One person I mentored who once considered taking her own life wrote to me when she graduated from a STEM program, and she said this: “I wish you could have been here at my graduation. My parents only paid for this degree. You were the one who got me through it”. We have never met in person, but she is going to continue to make a huge difference for Christ and His Kingdom going forward.

I think when you have been a bummer lamb, you are extra careful to make decisions that will enable you to be a good shepherd to other lambs. Being a good shepherd does not mean being pious, spiritual, mystical, etc. Being a good shepherd does not mean making the lambs feel good about making bad decisions. Being a good shepherd means understanding what God has done to lead you, and then reflecting that love back to others *in practical, self-sacrificial actions that solve actual real-world problems for other people who want to know and serve God*. If you are about to jump off a cliff, the last thing you need is someone with no wisdom or experience telling you that God is OK with you doing whatever feels good to you. What you need is someone practical and competent to give you good advice, however much that advice may make you feel bad, or block your pursuit of fun.

One of my friends proof-read the draft of this post and told me that it made her think of 2 Cor 1:3-5:

> [3] Praise be to the God and Father of our Lord Jesus Christ, the Father of compassion and the God of all comfort,
>
> [4] who comforts us in all our troubles, so that we can comfort those in any trouble with the comfort we ourselves receive from God.
>
> [5] For just as we share abundantly in the sufferings of Christ, so also our comfort abounds through Christ.“

Nothing else I do in life matters to me as much as taking care of the people I mentor, especially the ones who are lost and lacking guidance and care. I have good health, good education, good career, and great finances. But by far the most important thing I do is following the example of the Shepherd by caring for other lambs.

# 38-year old unmarried model explains what she means by “a decent man” (for marriage)

**Wintery Knight** · 1 March 2021 · Archived copy · Original

I’ve always been suspicious of women who make a living through their physical beauty. I see a few problems with modeling as a career. First, you don’t have to produce anything useful that requires understanding the real world, like a programmer or a nurse. Second, you focus a lot on your appearance, and that’s not healthy, since it all fades out by age 35 anyway. Women who get a lot of attention for free typically don’t know how to treat men, either. They don’t learn because they don’t have to learn.

With that in mind, here’s an article by an aging 38-year-old model that illustrates the problem: (H/T Better Bachelor)

> Earlier this month I opened the door to a bouquet of flowers.
>
> They were from yet another man who wants to date me. He’s 35, tall, dark and handsome.
>
> […]And this week, as the gifts roll in from admirers for Valentine’s Day — I have already received two…
>
> […]I am 38 and have been single for four years.

So, the first thing to point out about this is that it confirms what I was saying about pretty women. Look at the way she talks about how all these men are paying attention to her. Like it or not, her worldview is going to be conditioned by this attention she’s getting from men. She isn’t having to write code to get attention. Or set a fracture. Or do anything. She just gets it because she was born with good looks. And she doesn’t see that it is her job to 1) prepare her character for attracting a man who wants to commit, or 2) choose men who are interested in commitment. Her job is just to be pretty, and then tell everyone how much attention she’s getting from men. *Men who will not commit to her*. She is mistaking the attention for intent to marry. But men who pay attention to dumb, pretty women don’t intend to marry them. They just want to pump and dump them.

But she doesn’t see her failure to prepare herself for commitment and to prefer commitment-minded men as her problem. On the contrary – her singleness at 38 is *the fault of men being worthless*:

> And I hate to break it to any other single women in their late thirties, but all the decent men in our age bracket have been taken.
>
> […]While I work out every day, these men look a decade older.
>
> Beer bellies, bad manners, little respect for single women and minimal hygiene — I’ve seen it all on the apps.
>
> Over the past four years I’ve been on almost 500 dates trying to find Mr Right.
>
> And while I have become something of an expert on dating apps — last year I got a congratulations from Tinder for getting 25,000 likes for my profile — unfortunately, I am still looking for The One.
>
> My theory is all the good men were snapped up when they were young. All that’s left is the dregs.

Now, she doesn’t think that she is the dregs for being 38 and being completely unsuited to marriage. She thinks that men are the dregs – because they don’t have an attractive height and appearance. That’s what she’s looking for – and that’s *the only thing she’s looking for*. She’s had relationships with men, but they just LIVED WITH HER. They never committed, because she wasn’t looking for a man who would commit, she was looking for a man with appearance, height, fitness and hygiene. Someone who looked as good as her. That commitment thing? That’s easy. Nothing to be concerned about. No need to assess religion and morality in a man, which is the ground of commitment, when you get so much attention by looking hawt.

Doubt me? Read her own words – this is what she values in a man:

> During my 500 dates, the only guy I have seriously dated was my age and had the best hair and teeth in the world.
>
> He even had a “proper” job and took me out for fancy dinners. Alas, he wasn’t ready to settle down — or something like that.
>
> Apart from that, there was the guy who looked like Superman on his dating profile but turned up with a long white Santa beard. His body had gone to pot and he was wearing unwashed clothes.
>
> Then there was the wealthy consultant who took me to his club where cocktails were thirty quid a pop. He was generous but knew the value of nothing. Plus, he continually scoffed salt and vinegar nuts on our date — the odour was revolting.
>
> […]Then there are the beer bellies. If a man has one, I know we’ll have nothing in common as I’m active…

And so on. Everything is about appearance. She’s looking for exactly what she is: a pretty face. And she has *no idea* that the willingness to commit is not related to external appearances. The important thing for her is the man’s *appearance*. And that’s why she has 5 billion dates and no commitment. Only a certain kind of man commits. It’s going to be related to his personal character – religion, morality, etc. – more than it’s related to what she can see with her eyes.

# Which population group is most likely to reject heterosexual relationships?

**Wintery Knight** · 2 March 2021 · Archived copy · Original

The Federalist reports:

> A new Gallup poll published on Feb. 24 shows 1 in 6 Gen Z adults identify as LGBT. These results represent a remarkable jump from 2017, when 4.5 percent of Americans identified as LGBT, a number that has now risen to 5.6 percent just three years later.
>
> The increase is indeed dramatic, yet it doesn't fully tell the whole story. Why? While the population of Americans identifying as LGBT has risen steadily since 2012, last year the question was expanded from a simple "yes" or "no" to LGBT identity to include specific categories to choose from. Only one identity group showed a dramatic increase: **bisexual women**.
>
> […]One in ten high school students identify as LGBT. Of these, 75 percent are female, and 77 percent identify as bisexual. As detailed by the Washington Post, the Williams Institute at the University of California at Los Angeles has found that 35 percent of LGBT adults are bisexual women.
>
> Further, Hammack argues that his research shows **young women** are more likely to identify as "non-binary" or "gender-fluid."

I'm going to have something to say about this in a minute, but for now just note that it's young women who are the ones who are most likely to abandon natural marriage, traditional families and complementary sex roles.

More:

> As Abigail Shrier discussed in great detail with in-depth research in her book, "Irreversible Damage: The Transgender Craze Seducing Our Daughters," the power of social contagion and peer group identity is important to consider:
>
> Between 2016 and 2017, the number of gender surgeries for natal females in the US quadrupled; in the UK, the rates of gender dysphoria for teenage girls are up 4,400 percent over the previous decade.
>
> Indeed, as 16-year-old Jasper Swartz — who identifies as non-binary — expressed to the Washington Post, all of her friends are "queer in some way."

> Rather than reflecting the natural progression of openness to human variation in sexuality and gender identity, it seems to better reflect a pop culture fad to be included in the LGBT spectrum in any way possible. This seems especially true for younger people, who are inundated with LGBT education, culture, and positivity and, as Abigail discusses in her book, find meaning in being different, unique, and rebellious, along with their friends. As indicated by the Gallup survey, as people age, their identities become more stable and bisexuality drops significantly.
>
> […]For young women seeking identity and being part of a special or important group, all they have to do is cut their hair short, dress like a boy, and declare themselves non-binary or bisexual to gain instant victimhood status and self-validation. If it becomes too much and they still get the exciting thrill of being LGBT, they can always slip back into safer roles.

So, my suspicion is that young women are more vulnerable to this for two reasons. One, young women are more likely to determine their beliefs by deciding what makes them feel good. And two, young women are more likely to determine their beliefs by what makes them look good to their peer group. They're not reading non-fiction, and forming a worldview that's bound by logic and evidence. They like fiction. They like entertainment. They're not

even embracing their values based on their future goals. Their long-term goals might be to marry and have security and family. But they're not taking steps towards that right now. Right now, they're just doing what feels good in the moment. They're adapting to their peers, and the culture at large, rather than thinking for themselves.

Young women like LGBT lifestyles more than they like natural marriage and family

In fact, there have been studies on how these ideas spread, and that's exactly what they found – young women are the ones who swallow this, and for reasons of feelings and peer approval. It's a social benefit to claim to be a minority sexual identity. Our culture has set it up so that you get prestige and sympathy for this. You get to play the victim, and everyone has to be nice to you. And you're so interesting! So sophisticated. To young women, it's an offer they can't refuse – so they don't.

# If we seriously want men to marry and become fathers, let's repeal no-fault divorce

**Wintery Knight** · 3 March 2021 · Archived copy · Original

I saw a very good article at the Heritage Foundation web site about the importance of fathers for children. The author Virginia Allen listed out some of the benefits that fathers provide to children:

> Studies have found that children raised without a father are:
>
> - At a higher risk of having behavioral problems.
> - Four times more likely to live in poverty.
> - More likely to be incarcerated in their lifetime.
> - Twice as likely to never graduate high school.
> - At a seven times higher risk of teen pregnancy.
> - More vulnerable to abuse and neglect.
> - More likely to abuse drugs and alcohol.
> - Twice as likely to be obese.
>
> From education to personal health to career success, children who lack a father find themselves at a disadvantage to their peers raised in a two-parent household.

I was looking for a good analysis of why there's been a decline of marriage and fatherhood, and I found an article by Joe Carter on far-left The Gospel Coalition, of all places. By looking at marriage rates and historical events that changed the marriage rate, he was able to identify the cause of the decline of marriage – and fatherhood.

Marriage and divorce rates per capita

I'll spare you the statistical analysis, which is excellent, and give you the conclusion – although you can guess it from the graph above:

> Now that we've explored the data, what year should we use as the marker for the beginning of the decline of marriage in the United States? I would argue for 1985, the last year that the marriage rate topped 10 percent.
>
> […]What changed in 1985 that could have led to the decline in marriage? There are likely numerous factors—which we'll examine in future articles—but one stands out in particular: By 1985, all states (except

> for New York) had enacted no-fault divorce legislation.

The most helpful book I know of about no-fault divorce is "Taken Into Custody", by Dr. Stephen Baskerville. He wrote a column for Crisis magazine that summarizes some of his ideas.

Excerpt:

> Feminists were drafting no-fault divorce laws in the 1940s, which the National Association of Women Lawyers now describes as "the greatest project NAWL has ever undertaken."
>
> The result effectively abolished marriage as a legal contract. Today it is not possible to form a binding agreement to create a family.
>
> The new laws did not stop at removing the requirement of citing grounds for a divorce, to allow divorce by mutual consent, as deceptively advertised at the time. Instead they created unilateral and involuntary divorce, so that one spouse may dissolve a marriage without any agreement or fault by the other.

Here's what divorce does to the spouse who is the victim of the unilateral "no-fault" divorce:

> Though marriage is a civil matter, the logic quickly extended into the criminal, including a presumption of guilt against the involuntarily divorced spouse ("defendant"). Yet formal due process protections of criminal proceedings did not apply, so forcibly divorced spouses became quasi-criminals not for recognized criminal acts but for failing or refusing to cooperate with the divorce by continuing to claim the protections and prerogatives of family life: living in the common home, possessing the common property, or—most vexing of all—parenting the common children.
>
> Following from this are the horrendous civil liberties violations and flagrant invasions of family and individual privacy that are now routine in family courts. A personalized criminal code is legislated by the judge around the forcibly divorced spouse, controlling their association with their children, movements, and finances. Unauthorized contact with their children can be punished with arrest. Involuntarily divorced parents are arrested for running into their children in public, making unauthorized telephone calls, and sending unauthorized birthday cards.

In my conversations with men, no-fault divorce laws, and anti-male divorce courts are the main reasons given for why they do not pursue marriage and fatherhood. Men do not want to be coerced in a marriage with the threat of divorce by an unhappy wife. Men do not want to be subject to the government in so many areas of their lives if the wife does carry out the threat. They especially don't want to be separated from their children. One my secular male friends told me that he would not marry unless the woman had evidence in her past of hating radical feminism and no-fault divorce. This was the main criteria. He actually was able to find a woman who was a men's rights activist who hated divorce. But that was the only way he would marry.

Statistically speaking, the wife is more likely to initiate divorce than the husband. Women initiate 70% of divorces, the majority of those just because she is "unhappy". I think this is because women get into marriage based on their feelings, and they think that it is the husband's job to make them feel good. They see their happiness as the primary goal of the marriage, and see a marriage that does not make them happy as a marriage that needs to be ended.

**Are we going to repeal no-fault divorce, then?**

No-fault divorce was seen as a boon to women who had married the wrong men by following their hearts. It's an interesting question to ask whether women really would want no-fault repealed. It would mean that they would have to get serious about who they marry, instead of just getting into marriage based on feelings. They would have to evaluate men according to expectations of what a man does in a marriage, instead of on feelings. They would have to think about what men want out of a marriage, and prepare themselves to provide for his needs. They would have

to say no to their feelings, when choosing a man, and in keeping a man after the wedding.

If women aren't willing to demand the repeal of no-fault divorce laws and get serious about men and marriage, then what's the point of complaining that men don't want to marry and become fathers? If you're not willing to fix the root cause of the problem, then don't complain about the problem.

# Woman who sent her kid to Baltimore public schools shocked to find he is a failure

**Wintery Knight** · 4 March 2021 · Archived copy · Original

Fox Baltimore:

> A shocking discovery out of a Baltimore City high school, where Project Baltimore has found hundreds of students are failing. It's a school where a student who passed three classes in four years, ranks near the top half of his class with a 0.13 grade point average.
>
> Tiffany France thought her son would receive his diploma this coming June. But after four years of high school, France just learned, her 17-year-old must start over. He's been moved back to ninth grade.
>
> "He's stressed and I am too. I told him I'm probably going to start crying. I don't know what to do for him," France told Project Baltimore. "Why would he do three more years in school? He didn't fail, the school failed him. The school failed at their job. They failed. They failed, that's the problem here. They failed. They failed. He didn't deserve that."
>
> […]As we dig deeper into her son's records, we can see in his first three years at Augusta Fells, he failed 22 classes and was late or absent 272 days. But in those three years, only one teacher requested a parent conference, which France says never happened. No one from the school told France her son was failing and not going to class.
>
> "I feel like they never gave my son an opportunity, like if there was an issue with him, not advancing or not progressing, that they should have contacted me first, three years ago," said France.

By the way, when I say that my older brother was destroyed by the public schools, this is what I'm talking about. He stayed home from school for an entire month with the "nanny" my parents hired, so that they could both go to work. And of course they had no idea, because my parents didn't give a darn about us or our educations. This is the way it is for many children, including me. I had parents who had no idea what I was doing in school, and the first time they found out what I had done all year was report card day. That's what you get when you trust the public schools. I understand that we were a poor, non-white immigrant family, so my parents had to both work, but that doesn't excuse blindly trusting unionized public school teachers to do a good job. Parents have to monitor kids.

Cato Institute graphs education spending against test scores

## Advice for mothers

So, I don't know much about this woman in the news story, but after reading her story, I have three pieces of advice for women in general that have nothing to do with her. And the younger women are when they get this advice, the better it will be for them.

This advice is specific to women who want their children to learn useful STEM skills, so that they can find a job that allows them to move out, get married, buy a home of their own, and retire.

- Advice #1: Get married before you have children
- Advice #2: Don't vote for Democrat politicians
- Advice #3: Don't live in Democrat-run cities

That's all. I'm pretty sure that if women followed these rules, then they wouldn't get caught in situations where they are living in Democrat-run hell-holes and entrusting their fatherless kids to unionized public school teachers. Just. Don't.

# Democrat bill H.R. 0ne would undermine reliability and integrity of e1ections

**Wintery Knight** · 5 March 2021 · Archived copy · Original

The Heritage Foundation is my favorite think tank, and they have a summary of what the law would do:

## The Issue

H.R. 0ne would federalize and micromanage the e1ection process administered by the states, imposing unnecessary, unwise, and unconstitutional mandates on the states and reversing the decentralization of the American e1ection process—which is essential to the protection of our liberty and freedom. It would implement nationwide the worst changes in e1ection rules that occurred during the 2020 e1ection and go even further in eroding and eliminating basic security protocols that states have in place. The bill would interfere with the ability of states and their citizens to determine the qualifications and eligibility of v0ters, to ensure the accuracy of v0ter reg1stration rolls, to secure the fairness and integrity of e1ections, to participate and speak freely in the political process, and to determine the district boundary lines for electing their representatives.

## What H.R. 0ne Would Do

- **Seize the authority of states** to regulate v0ter reg1stration and the voting process by forcing states to implement **early voting**, **automatic v0ter reg1stration**, **same-day reg1stration**, **online v0ter reg1stration**, and **no-fault absentee bal1oting**.
- **Make it easier to commit fr4ud** and promote chaos at the pol1s through **same-day reg1stration**, as e1ection officials would have no time to verify the accuracy of v0ter reg1stration information and the eligibility of an individual to v0te and could not anticipate the number of bal1ots and precinct workers that would be needed at specific pol1ing locations.
- **Degrade the accuracy of reg1stration lists by requiring states to automatically register** all individuals (as opposed to "citizens") from state and federal databases, such as state Departments of Motor Vehicles, corrections and welfare offices, and federal agencies such as the Social Security Administration, the Department of Labor, the Federal Bureau of Prisons, and the Center for Medicare and Medicaid Services of the Department of Health and Human Services. This would **register large numbers of ineligible v0ters**, including aliens, and cause multiple or duplicate reg1strations of the same individuals and put federal agencies in charge of determining a person's domicile for voting purposes (as well as that individual's taxing state).
- **Constitute a recipe for massive v0ter reg1stration fr4ud by hackers and cyber criminals through online v0ter reg1stration** that is not tied to an existing state record, such as a driver's license. It would make it a criminal offense for a state official to reject a v0ter reg1stration application even when it is rejected "under color of law" because the official believes the individual is ineligible to v0te. It would also require states to allow 16-year-olds and 17-year-olds to register; when combined with a ban on v0ter ID and restrictions on the ability to challenge the eligibility of a v0ter, this would effectively ensure that underage individuals could v0te with impunity.
- **Require states to count bal1ots cast by v0ters outside of their assigned precincts**, overriding the precinct system used by almost all states that allows e1ection officials to monitor v0tes, staff pol1ing places, provide enough bal1ots, and prevent e1ection fr4ud.
- **Mandate no-fault absentee bal1ots, which are the tool of choice for v0te thieves. It would ban witness signature or notarization requirements** for absentee bal1ots; **force states to accept absentee bal1ots received up to 10 days after Election Day** as long as they are postmarked by Election Day; and **require states to allow v0te trafficking (v0te harvesting)** so that any third parties—including campaign staffers and political consultants—can pick up and deliver absentee bal1ots.

- **Prevent e1ection officials from checking the eligibility and qualifications of v0ters and removing ineligible v0ters**. This includes restrictions on using the U.S. Postal Service's national change-of-address system to verify the address of registered v0ters; participating in state programs that compare v0ter reg1stration lists to detect individuals registered in multiple states; or *ever* removing registrants due to a failure to v0te no matter how much time has elapsed. It also would substantially limit the public release of v0ter reg1stration information, **making it almost impossible** for nonpartisan organizations to **verify the accuracy of reg1stration rolls**, and prohibit states from using undeliverable e1ection mail as a basis for challenging a registrant's eligibility.
- **Ban state v0ter ID laws** by forcing states to allow individuals to v0te without an ID and merely signing a statement in which they claim they are who they say they are.
- **Expand regulation and government censorship of campaigns and political activity and speech**, **including online and policy-related speech**. H.R. 0ne would impose onerous legal and administrative compliance burdens and costs on candidates, citizens, civic groups, unions, corporations, and nonprofit organizations. Many of these provisions **violate the First Amendment**, **protect incumbents**, **and reduce the accountability of politicians** to the public; its onerous disclosure requirements for nonprofit organizations would subject their members and donors to **intimidation and harassment—**the modern equivalent of the type of disclosure requirements the U.S. Supreme Court in *NAACP v. Alabama* (1958) held violated associational rights protected by the Fourteenth Amendment.
- **Reduce the number of Federal Election Commission members** from six to five, allowing the political party with three commission seats to control the commission and engage in **partisan enforcement activities**.
- **Require states to restore the ability of felons to v0te** the moment they are out of prison regardless of uncompleted parole, probation, or restitution requirements. Section 2 of the Fourteenth Amendment gives states the constitutional authority to decide when felons who committed crimes against their fellow citizens may v0te again. **Congress cannot override a constitutional amendment with a statute.**
- **Transfer the right to draw congressional districts** from state legislatures to "independent" commissions whose members are unaccountable to v0ters. H.R. 0ne would make it a violation of federal law to engage in "partisan" redistricting and **mandate the inclusion of alien population**, **both legal and illegal**, **in all redistricting**. This is an **anti-democratic**, **unconstitutional measure** that would take away the ability of the citizens of a state to make their own decisions about redistricting.
- **Authorize the Internal Revenue Service to engage in partisan activity.** H.R. 0ne would permit the IRS to investigate and consider the political and policy positions of nonprofit organizations before granting tax-exempt status, thus enabling IRS officials to target organizations engaging in First Amendment activity with disfavored views.
- **Limit access to federal courts for anyone challenging H.R. 1.** The bill would prohibit the filing of any lawsuits challenging the constitutionality of H.R. 0ne anywhere except in the District Court for the District of Columbia and would allow the court to order all plaintiffs and intervenors, regardless of their number (such as all 50 states), "to file joint papers or to be represented by a single attorney at oral argument," **severely limiting the legal representation and due process rights of challengers**.

I left out some of them, but there's enough there that should scare you. This is the kind of thing that happened in 1930s socialist Germany to make sure that the secular left could not be challenged.

# Christian philosopher (Craig) vs atheist scientist (Atkins) debate: Does God Exist?

**Wintery Knight** · 6 March 2021 · Archived copy · Original

I found a video of a debate from the Reasonable Faith speaking tour in the UK, between Christian philosopher Dr. William Lane Craig and atheist chemist Dr. Peter Atkins.

Here is the video:

This is a must-see debate. It was extremely fun to watch, and I have a snarky summary of the opening speeches below.

Details:

> On Wednesday 26th October 2011 William Lane Craig debated Peter Atkins on the topic: *Does God Exist?* This debate took place at the University of Manchester as part of the UK Reasonable Faith Tour with William Lane Craig. The debate was chaired by Christopher Whitehead, Head of Chemistry School at the University. Post-debate discussion was moderated by Peter S Williams, Philosopher in Residence at the Damaris Trust, UK.

Dr. William Lane Craig:

> **William Lane Craig** (born August 23, 1949) is an American analytic philosopher, philosophical theologian, and Christian apologist. He is known for his work on the philosophy of time and the philosophy of religion, specifically the existence of God and the defense of Christian theism. He has authored or edited over 30 books including *The Kalam Cosmological Argument* (1979), *Theism, Atheism and Big Bang Cosmology*(co-authored with Quentin Smith, 1993), *Time and Eternity: Exploring God's Relationship to Time* (2001), and *Einstein, Relativity and Absolute Simultaneity* (co-edited with Quentin Smith, 2007).
>
> Craig received a Bachelor of Arts degree in communications from Wheaton College, Illinois, in 1971 and two summa cum laudemaster's degrees from Trinity Evangelical Divinity School in Deerfield, Illinois, in 1975, in philosophy of religion and ecclesiastical history. He earned a Ph.D. in philosophy under John Hick at the University of Birmingham, England in 1977 and a Th.D. underWolfhart Pannenberg at the University of Munich in 1984.

Dr. Peter Atkins:

> **Peter William Atkins** (born 10 August 1940) is a British chemist and former Professor of Chemistry at the University of Oxford and a Fellow of Lincoln College. He is a prolific writer of popular chemistry textbooks, including *Physical Chemistry*, *Inorganic Chemistry*, and *Molecular Quantum Mechanics*. Atkins is also the author of a number of science books for the general public, including *Atkins' Molecules* and *Galileo's Finger: The Ten Great Ideas of Science*.
>
> Atkins studied chemistry at the University of Leicester, obtaining a bachelor's degree in chemistry, and – in 1964 – a PhD for research into electron spin resonance spectroscopy, and other aspects of theoretical chemistry. Atkins then took a postdoctoral position at the UCLA as aHarkness Fellow of the Commonwealth fund. He returned to Oxford in 1965 as fellow and tutor of Lincoln College, and lecturer in physical chemistry (later, professor of physical chemistry).

I am happy when debates like this come out. I have friends who are Christians who doubt the importance of apologetics in evangelism, because they don't think that apologists can prove anything or win arguments. I have

friends who are skeptical of using arguments that assume a 14-billion year old universe, because they think that the Big Bang is compatible with atheism (!). I have friends who think that philosophical arguments have no persuasive force. I have friends who think that nothing can be proven from history, beyond a reasonable doubt. I have co-workers who ask me whether anyone wins these debates. I think that this debate answers all of those questions.

This debate clearly shows why Christians should not shy away from studying science, philosophy and history. We will not discover anything that harms Christian theism by thinking logically and by looking at the evidence. To the contrary, it is the atheist who makes war on the progress of science, and who is forced to resist the clear experimental evidence, and to resort to baseless speculations and blind faith. If you want to see a good debate with an intelligent atheist, I recommend watching the debate between William Lane Craig and Peter Millican instead. But if you want to see a really, really overwhelming defeat for atheism, watch this debate. It is very clear at the end of this debate why Richard Dawkins refused to debate William Lane Craig at Oxford.

SUMMARY OF THE OPENING SPEECHES

I only had time to summarize the first two speeches. Keep in mind that Dr. Craig always shines in his rebuttals, and this debate is no different. So you'll want to watch those rebuttals. Dr. Atkins *literally* says in this debate in his first rebuttal "There was nothing here originally. There is nothing here now. But it is an interesting form of nothing which seems to be something." And the audience laughs nervously. This debate is like that. You will see a clear winner and clear loser in this debate. This fight is decided by knockout.

**William Lane Craig opening speech:**

1. the origin of the universe
2. the moral argument
3. the resurrection of Jesus

**Peter Atkins opening speech:**

1. Dr. Craig is stupid, lazy and evil:
– Dr. Craig's arguments are old: from the 11th century! Old arguments can't be true
– Dr. Craig is just asserting that "God did it" because he is lazy
– Dr. Craig feels pressured to agree with the theistic majority
– Dr. Craig needs a psychological crutch to comfort him
– Dr. Craig is fearful of death
– Dr. Craig is just wishing for an eternal life of bliss
– Dr. Craig is driven by his heart, and not by his head

2. Origin of the universe:
– Maybe the universe is eternal and has no beginning – we don't know
– Maybe mommy universes can give birth to daughter universes
– It is naive to think that a cause is needed to cause the creation of the universe from nothing
– Science is just about to show how it is possible that something appears out of nothing without cause
– Some scientists have already begun to speculate about about how something can come into being out of nothing
– Maybe nothing is not really nothing, but it is actually something
– It would be admitting defeat to say that God created the universe out of nothing

3. Fine-Tuning:
– It could be the case that the fundamental constants are not variable
– It could be the case that the fine-tuning of the cosmic constants is a happy accident
– It could be the case that there are billions of billions of unobservable universes that are not fine tuned
– It could be the case that the cosmic constants in these billions and billions of unobservable universes are all random so that some are fine-tuned
– Anyone who infers that an intelligence is the best explanation of a finely-tuned set of life-permitting cosmic

constants is lazy

4. Purpose:
– Philosophers and theologians are stupid
– I don't think that there is purpose in the universe
– I think that the universe is more grand if there is no purpose, so there is no purpose

5. Miracles:
– I don't think that miracles happen
– The resurrection is a fabrication
– It could be the case that Jesus didn't exist
– It could be the case that Jesus wasn't really crucified
– It could be the case that Jesus didn't  really die after being crucified
– It could be the case that the disciples stole his body
– It could be the case that the women went to the wrong hole in the ground
– the gospels are political propaganda written long after the events they are reporting on

6. Theodicy:
– God has no morally sufficient reason for allowing humans to perform actions that result in suffering
– God has no morally sufficient reason for allowing nature to cause suffering

7. Morality:
–  customs and conventions emerges arbitrarily in different times and places based on an awareness of the consequences of actions, as well as various anecdotes and experiences
–  these customs and conventions are decided based on the goal for survival, in much the same way as politeness and manners emerge for decorum and to avoid offense
– it is childish to presume that there is an umpire God who decides moral values and duties

8. Religious believers are stupid, lazy and evil:
– the notion of God has arisen because people are stupid and want to be comforted
– there are no arguments or evidences for belief in God
– people who believe in God do not think, but instead take refuge in incomprehensible nonsense

# William Lane Craig explains how Christianity explains evil and suffering

**Wintery Knight** · 7 March 2021 · Archived copy · Original

A lot of people in the West complain too much about any little suffering they have to experience. But sometimes, when a very harsh suffering is felt by someone who has tried to follow Jesus, an explanation is necessary. I found something very good on the Reasonable Faith web site, written by Dr. William Lane Craig.

He makes the following points:

1. *We are not in a good position to assess the probability of whether God has morally sufficient reasons for the evils that occur.*
2. *The Christian faith entails doctrines that increase the probability of the co-existence of God and evil.*
3. *Relative to the full scope of the evidence, God's existence is probable.*

I've written before about point #1, in which Dr. Craig's describes the limitations of human knowledge that make it hard for us to know for certain that a specific evil or suffering does not have a good reason for God to allow it. And I've written about #3, in which Dr. Craig makes some arguments for God's existence. But #2 might be new to some of you, so let's look at that.

He makes four sub points in section 2 about Christian doctrines that make the existence of evil and suffering more reasonable.

- 2. a)*The chief purpose of life is not happiness, but the knowledge of God.*
- 2. b) *Mankind is in a state of rebellion against God and His purpose.*
- 2. c) *The knowledge of God spills over into eternal life.*
- 2. d) *The knowledge of God is an incommensurable good.*

My favorite one is 2. a), so let's look at that one. He says:

> 2. a. *The chief purpose of life is not happiness, but the knowledge of God.* One reason that the problem of evil seems so puzzling is that we tend to think that if God exists, then His goal for human life is happiness in this world. God's role is to provide comfortable environment for His human pets. But on the Christian view this is false. We are not God's pets, and man's end is not happiness in this world, but the knowledge of God, which will ultimately bring true and everlasting human fulfillment. Many evils occur in life which maybe utterly pointless with respect to the goal of producing human happiness in this world, but they may not be unjustified with respect to producing the knowledge of God. Innocent human suffering provides an occasion for deeper dependency and trust in God, either on the part of the sufferer or those around him. Of course, whether God's purpose is achieved through our suffering will depend on our response. Do we respond with anger and bitterness toward God, or do we turn to Him in faith for strength to endure?

You know, I always get confused when I see Christians trying to follow the script of the world and trying to make themselves feel good with consumer purchases, travel, fun experiences, showing off to others, etc. When I read the story of Jesus, it's pretty clear that the normal Christian life, if the person is following Jesus at all, is about suffering the disapproval and opposition of non-Christians while you remain faithful and obedient to God. Today, there's probably no better example of this than defending unborn children from adult selfishness. Although, defending born children from selfish adults who seek to deprive children of their biological mother and father is pretty bad, too. Nobody is going to like you for restricting their fun (i.e. – abortion, divorce, adultery, homosexuality, etc.), but being willing to take the heat from non-Christians for the sake of promoting what God thinks is right is true Christianity. It's what Jesus would do.

Anyway, the one I've been thinking about more lately is 2. d), where Dr. Craig writes this:

> *2. d) The knowledge of God is an incommensurable good.* To know God, the source of infinite goodness and love, is an incomparable good, the fulfillment of human existence. The sufferings of this life cannot even be compared to it. Thus, the person who knows God, no matter what he suffers, no matter how awful his pain, can still say, "God is good to me," simply by virtue of the fact that he knows God, an incomparable good.

I sometimes feel pretty stressed out about Americans who were born in conservative states, raised by two married Christian parents, attended Christian schools and youth groups, and then abandoned their faith for atheism as soon as they hit college. It really bothers me how people who had all these advantages turned their backs on God, and they're ungrateful for all their blessings. They show no curiosity about God – they don't want to know him. But when you read the gospels to see what Jesus has to say about these sorts of people, it's very comforting. He really sees the problem, and he is on the side of the little guy who has to struggle to be faithful and obedient to God. The Bible has nothing to say to people who are able to feel happy and successful apart from God. It speaks to people who are struggling to follow God. Even when things are difficult, Jesus speaks to the problem of being an alien and a stranger in a world that turns its back on him.

# Fakebook not only censoring The College Fix, but also the Wall Street Journal

**Wintery Knight** · 8 March 2021 · Archived copy · Original

I noticed earlier that Fakebook decided to slap a "false news" label on a cartoon published by The College Fix. This reduces their distribution and puts them at risk of being deleted. The College Fix promotes ideas that are critical of the Democrat Party, so Fakebook, which supports the Democrat party, had to step in and punish them for their bad speech and bad thoughts.

Story here:

> Fakebook today wrongly flagged a cartoon from *College Fix* cartoonist Pat Cross that lampooned recent cancellations of the works of Theodor Geise1, known as Dr. Seus5.
>
> "Independent fact-checkers say this information could mislead people," says a pop-up message (*right*) on the Fakebook post, first published yesterday morning.
>
> Underneath the post, a message takes the reader to a statement from a Fakebook fact-checker that fact checks claims about Dr. Seus5 being cancelled by Dr. Seus5 Enterprises.

But it's not just The College Fix, it's the Wall Street Journal. They're normally left of center, but they danced a little too far away from the Democrat party line, so they also needed to be punished:

> *The Wall Street Journal* recently faced a similar situation when it featured an op-ed by Johns Hopkins University's Dr. Marty Mak4ry. "We'll Have Herd Immunity by April" was flagged by Fakebook with the same label as *The Fix* cartoon.
>
> "Misleading Wall Street Journal opinion piece makes the unsubstantiated claim that the U.S. will have herd immunity by April 2021," the supposed fact-check by Health Feedback says. "Three scientists analysed the article and estimate its overall scientific credibility to be very low."
>
> But as the *WSJ* — rightly — points out, this isn't fact checking. It's "counter-opinion masquerading as fact checking."

> Dr. Mak4ry didn't present his opinion as a factual claim. He argued, based on studies and other evidence, that Americans would have enough immunity from vaccination and natural infection by early spring to sharply reduce the virus spread. He essentially made a projection, much like the epidemiologists at Imperial College and University of Washington do.
>
> But the progressive health clerisy don't like his projection because they worry it could lead to fewer virus restrictions. The horror! Health Feedback's fact checkers disagree with the evidence Dr. Mak4ry cites as well as how he interprets it. Fine. Scientists disagree all the time. Much of conventional health wisdom about red meat, sodium and cardiovascular risk is still fiercely debated.
>
> The same goes for Cov1d-19. There's still much we don't understand about the virus and its transmission and immunity. Yet Fakebook's fact-checkers "cherry-pick," to borrow their word, studies to support their own opinions, which they present as fact.
>
> The *WSJ* proceeds to meticulously rebut Fakebook's "fact checkers," and concludes: "Scientists often disagree over how to interpret evidence. Debate is how ideas are tested and arguments are refined. But Fakebook's fact checkers are presenting their opinions as fact and seeking to silence other scientists whose views challenge their own."

Conservative viewpoints being censored by partisan journalists and left-wing activists. It has a huge impact on our elections. The next time a Republican president gets into power, we should immediately take steps to shut down large social media companies that have sided with the Democrat party and used their power to stifle free speech and free thinking. One easy way to do it is to allow people who have been censored to file lawsuits against these companies, and pass laws that make it clear that the Big Tech companies are in the wrong. This is America, not Nazi Germany.

# Is asking “Am I going to Hell?” a good rebuttal to scientific arguments for theism?

**Wintery Knight** · 9 March 2021 · Archived copy · Original

I want to use this woman’s story to show how sensible atheists reach a belief in God.

Excerpt:

> I don’t know when I first became a skeptic. It must have been around age 4, when my mother found me arguing with another child at a birthday party: “But how do you know what the Bible says is true?” By age 11, my atheism was so widely known in my middle school that a Christian boy threatened to come to my house and “shoot all the atheists.” My Christian friends in high school avoided talking to me about religion because they anticipated that I would tear down their poorly constructed arguments. And I did.
>
> As I set off in 2008 to begin my freshman year studying government at Harvard (whose motto is *Veritas*, “Truth”), I could never have expected the change that awaited me.
>
> It was a brisk November when I met John Joseph Porter. Our conversations initially revolved around conservative politics, but soon gravitated toward religion. He wrote an essay for the *Ichthus*, Harvard’s Christian journal, defending God’s existence. I critiqued it. On campus, we’d argue into the wee hours; when apart, we’d take our arguments to e-mail. Never before had I met a Christian who could respond to my most basic philosophical questions: How does one understand the Bible’s contradictions? Could an omnipotent God make a stone he could not lift? What about the Euthyphro dilemma: Is something good because God declared it so, or does God merely identify the good? To someone like me, with no Christian background, resorting to an answer like “It takes faith” could only be intellectual cowardice. Joseph didn’t do that.
>
> And he did something else: He prodded me on how inconsistent I was as an atheist who nonetheless believed in right and wrong as objective, universal categories. Defenseless, I decided to take a seminar on meta-ethics. After all, atheists had been developing ethical systems for 200-some years. In what I now see as providential, my atheist professor assigned a paper by C. S. Lewis that resolved the Euthyphro dilemma, declaring, “God is not merely good, but goodness; goodness is not merely divine, but God.”
>
> Joseph also pushed me on the origins of the universe. I had always believed in the Big Bang. But I was blissfully unaware that the man who first proposed it, Georges Lemaître, was a Catholic priest. And I’d happily ignored the rabbit trail of a problem of what *caused* the Big Bang, and what *caused* that cause, and so on.
>
> By Valentine’s Day, I began to believe in God. There was no intellectual shame in being a deist, after all, as I joined the respectable ranks of Thomas Jefferson and other Founding Fathers.
>
> I wouldn’t stay a deist for long. A Catholic friend gave me J. Budziszewski’s book Ask Me Anything, which included the Christian teaching that “love is a commitment of the will to the true good of the other person.” This theme—of love as sacrifice for true good—struck me. The Cross no longer seemed a grotesque symbol of divine sadism, but a remarkable act of love. And Christianity began to look less strangely mythical and more cosmically beautiful.

So, I want to point out the progression of her beliefs from atheist to deist to Christian. First, she listened to the scientific arguments for God’s existence, which took her to deism, which is a variety of theism where God just creates the universe and then doesn’t interfere with it after. Those arguments, the Big Bang and the cosmic fine-tuning, were enough for her to falsify atheism and prove some sort of theism. After that, she remained open to the evidence for Christian theism, and finally got there after looking at other evidence.

But this makes me think of how some of the atheists that I talk to do the exact opposite of what she did. I start off by explaining to them scientific evidence for a Creator and Designer. I explain the mainstream discoveries that

confirm an origin of the universe (e.g. – light element abundance predictions and observations), and I cite specific examples of fine-tuning, (e.g. – the gravitational constant). I explain protein sequencing and folding, and calculate the probabilities of getting a protein by chance. I explain the sudden origin of the phyla in the Cambrian explosion, and show why naturalistic explanations fail. I talk about the fine-tuning needed to get galaxies, solar systems and planets to support life. But many of these atheists don't become deists like the honest atheist in the story. Why not?

Well, the reason why not is because they interrupt the stream of scientific evidence coming out of my mouth and they start to ask me questions that have nothing to do with what we can know through science. See, evangelism is like building a house. You have to start with the foundation, the walls, the plumbing, the electricity, etc., but you can't know all the specific details about furniture and decorations at the beginning. But militant atheists don't care that you are able to establish the foundations of Christian theism – they want to jump right to the very fine-grained details, and use that to justify not not building anything at all. Just as you are proving all the main planks of a theistic worldview with science, they start asking "am I going to Hell?" and telling you "God is immoral for killing Canaanite children", etc. They want to stop the construction of the house by demanding that you build everything at once. But, it is much easier to accept miracles like the virgin birth if you have a God who created the universe first. The foundation comes first, it makes the later stuff easier to do.

So rather than adjust their worldview to the strong scientific evidence, and then leave the puzzling about Hell and Old Testament history for later, they want to refute the good scientific arguments with "Am I going to Hell?". How does complaining about Hell and unanswered prayer a response to *scientific evidence*? It's not! But I think that this does explain why atheists remain atheists in the face of all the scientific evidence against naturalism. They insulate their worldview from the progress of science by focusing on their emotional disappointment that they are not God and that God isn't doing what they want him to do. That's the real issue. Authority and autonomy. In my experience, they are usually not accountable to science, although there are, thank God, exceptions to that rule.

# Book review of R.C. Sproul's "If there's a God, why are there atheists?"

**Wintery Knight** · 10 March 2021 · Archived copy · Original

I have a key that will unlock a puzzling mystery

Brian Auten has a book review posted up at Apologetics 315.

The book is "If There's A God, Why Are There Atheists?", by theologian R.C. Sproul. R.C. Sproul is one of my favorite theologians. The book in question has a very, very special place in my heart, because I think that it is one of the major reasons why I was able to resist pernicious ideas like religious pluralism and postmodernism for so long. Once you put on the glasses of Romans 1 and see for the first time what man is really doing with respect to God, you can never see things the same again. I'll say more about this at the end, but let's see what Brian wrote first.

**The review**

So often, you hear atheists complaining about religion is nothing but wish-fulfillment or some sort of crutch for people who are frightened by a variety of things. They think that God is invented to solve several problems. 1) how does the world work?, 2) is there meaning to suffering and evil?, 3) why should I be moral?, and 4) what will happen to me and my loved ones when I die?. On the atheistic view, God is just a crutch that people cling to out of weakness and ignorance. But is this really the case?

Sproul starts the book by investigating three atheists who sought to explain religious belief as a result of psychological factors.

Brian writes:

Before tackling the psychology of atheism, Sproul spends a chapter on the psychology of theism, from the perspective of Freud's question "If there is no God, why is there religion?"11 What follows is an overview of various psychological explanations of theistic belief: Feuerbach's "religion is a dream of the human mind."12 Marx's belief that religion is "due to the devious imagination of particular segment of mankind."13 And Nietzche's idea that "religion endures because weak men need it."14 The author properly reiterates: "We must be careful to note that the above arguments can never be used as proof for the nonexistence of God. They can be useful for atheists who hear theists state that the only possible explanation for religion is the existence of God."15 That being said, Sproul also reveals what these arguments presume:

> Their arguments already presupposed the nonexistence of God. They were not dealing with the question, Is

> there a God? They were dealing with the question, Since there is no God, why is there religion?16

Sproul points out the weaknesses of each of these approaches and says “there are just as many arguments showing that unbelief has its roots in the psychological needs of man.”

Wow, could that really be true? What are the real reasons why people reject God? Does the Bible have anything to say about what those reasons are?

Brian cites Sproul’s contention:

> The New Testament maintains that unbelief is generated not so much by intellectual causes as by moral and psychological ones. The problem is not that there is insufficient evidence to convince rational beings that there is a God, but that rational beings have a natural hostility to the being of God.
>
> […]Man’s desire is not that the omnipotent, personal Judeo-Christian God exist, but that He not exist.

In Romans 1:18-23, the apostle Paul explains what is really going on:

[18]The wrath of God is being revealed from heaven against all the godlessness and wickedness of men who suppress the truth by their wickedness,

[19]since what may be known about God is plain to them, because God has made it plain to them.

[20]For since the creation of the world God’s invisible qualities—his eternal power and divine nature—have been clearly seen, being understood from what has been made, so that men are without excuse.

[21]For although they knew God, they neither glorified him as God nor gave thanks to him, but their thinking became futile and their foolish hearts were darkened.

[22]Although they claimed to be wise, they became fools

[23]and exchanged the glory of the immortal God for images made to look like mortal man and birds and animals and reptiles.

On this blog, I regularly present many, many arguments for theism in general, and Christian theism in particular:

- The kalam cosmological argument and the Big Bang theory
- The fine-tuning argument from cosmological constants and quantities
- The origin of life, part 1 of 2: the building blocks of life
- The origin of life, part 2 of 2: biological information
- The sudden origin of phyla in the Cambrian explosion
- Galactic habitable zones and circumstellar habitable zones
- Irreducible complexity in molecular machines
- The creative limits of natural selection and random mutation
- Angus Menuge’s ontological argument from reason
- Alvin Plantinga’s epistemological argument from reason
- William Lane Craig’s moral argument
- The unexpected applicability of mathematics to nature
- Six reasons why you should believe in non-physical minds
- William Lane Craig’s case for the resurrection of Jesus

Sproul explains why atheists cannot allow themselves to live according to the evidence that is presented to them:

> The cumulative effect of this knowledge that is clearly seen is to leave men 'without excuse.' Herein lies the basis of the universal guilt of man. No one can claim ignorance of the knowledge of God. No one can cite insufficient evidence for not believing in God. Though people are not persuaded by the evidence, this does not indicate an insufficiency in the evidence, but rather an insufficiency in man.
>
> […]The basic stages of man's reaction to God can be formulated by means of the categories of trauma, repression, and substitution.
>
> […]If God exists, man cannot be a law unto himself. If God exists, man's will-to-power is destined to run head-on into the will of God.

And this is the force that is animating atheists today. They don't want to be accountable to God in a relationship, no matter what the evidence is. They have to deny it, so that they can be free to get the benefits of a universe designed for them, without having to give any recognition or acknowledgement back. If they have to lie to themselves to deny the evidence, they will do it. Anything to insulate themselves from the Creator and Designer who reveals himself in Jesus Christ.

The rest of the book review, and the book, deals with explaining in detail how atheists respond to an all-good, all-powerful, all-knowing Creator/Designer. I encourage you to click through and read the whole book review. You can read the review, and the book, and then investigate for yourself whether atheists really are like that.

**My survey of atheists**

By the way, did you all see my survey of atheists that I did a while back? It's relevant because one of the questions I asked to my volunteers was "How you begin to follow Christ if it suddenly became clear to you that Christianity was objectively true?". I got some very strange responses that dovetail nicely with Sproul's book.

Here are a few of the responses:

- I would not follow. My own goals are all that I have, and all that I would continue to have in that unlikely situation. I would not yield my autonomy to anyone no matter what their authority to command me.
- I would not follow, because God doesn't want humans to act any particular way, and he doesn't care what we do.
- I would not follow. Head is spinning. Would go to physician to find out if hallucinating.
- I hope I would be courageous enough to dedicate my life to rebellion against God.
- I would not have to change anything unless forced to and all that would change is my actions not my values. I would certainly balk at someone trying to force me to change my behavior as would you if you were at the mercy of a moral objectivist who felt that all moral goodness is codified in the Koran.
- He would have to convince me that what he wants for me is what I want for me.

This is all part of my series discussing whether morality is rationally grounded by atheism.

Well Spent Journey did a similar survey of atheists, inspired by mine, and got this result on the relevant question:

> ***12. How would you begin to follow Jesus if it became clear to you that Christianity was true?***
>
> *– Would follow (5)*
> *– Wouldn't follow (6)*
> *– Might follow the teachings of Jesus, but that isn't Christianity (2)*
> *– It would depend on how this truth was revealed (3)*
> *– Christianity can't be true (3)*
> *– No answer given (4)*
>
> **…What would be the hardest adjustment you would have to make to live a faithful, public Christian life?**

> *– Adjusting wouldn't be that difficult; would eagerly welcome knowing that Christianity was true (2)*
> *– Praying, since it seems weird, creepy, and strange*
> *– Trying to figure out how the Bible became so corrupted*
> *– Trying to convince myself that the God of the Bible is deserving of worship (2)*
> *– Don't think it would be possible to adjust*
> *– No clear response, or not applicable (16)*

Yes, they really think like that! Just *ask an atheist questions* and you'll see how "objective" they really are. Atheism is entirely psychological. It's adopted in order to feel sufficient and to operate with autonomy, with the goal of self-centered pleasure-seeking above all. Evidence has nothing to do with it.

# You can learn a lot about Joe Biden's "character" from his far-left nominees

**Wintery Knight** · 11 March 2021 · Archived copy · Original

The Federalist:

> President Joe B1den's top pick to lead the Department of Justice's civil rights division peddled the Juss1e Smo11ett hoax on Twitter, criticizing anyone who questioned the black, gay actor's falsified hate crime in 2019.
>
> "Juss1e Smo11ett subjected to a racist and homophobic attack. 2 white men wearing ski masks attacked him, put a rope around his neck, and poured bleach on him and as they yelled slurs. Prayers to @Juss1eSmo11ett for a speedy recovery from this hate crime," Kr1sten Cl4rke tweeted shortly after the alleged incident.
>
> […]Days after her initial post, Cl4rke, who will oversee hate crime investigations if confirmed, took to Twitter again, alleging that the Chicago Police Department was "demonizing survivors" after they requested access to Smo11ett's cellphone and claiming that they shouldn't be "casting doubt" on the actor's claims that his assailants shouted racial slurs and beat him up while yelling pro-Trump slogans.

It was a hoax, but she believed it. Because she made the decision based on his appearance, not on the facts. And now she'll be in charge of deciding which hate crimes are hoaxes and which aren't. She'll be making those decisions based on appearances and not based on facts. That's why B1den chose her.

The Federalist:

> During her confirmation hearing Tuesday morning, President Joe B1den's Associate Attorney General nominee Van1ta Gupt4 insisted that she does not support "defunding the police," although statements she made last summer would indicate otherwise.

Her testimony to the Senate Judiciary Committee in June 2020:

> ..she proposed a "shrinking [of] the footprint of the criminal legal system, including police, in black and brown people's lives," among other statements.
>
> "It means shifting our approach to public safety away from exclusive investments in criminalization and policing, toward investments in economic opportunity, education, health care, and other public benefits," Gupt4 said. "This paradigm not only furthers equity, but also constitutes effective policy: When we stop using criminal "justice" policy as social policy, we make communities safer and more prosperous."
>
> "Ultimately, it is becoming clear that Congress must redirect government dollars away from policing practices rooted in the criminal-legal system and the carceral state, and toward policy goals that reflect a vision of public safety that promotes community health and safety," Gupt4 also said in June.

I just want to be clear here. These nominees are exactly what Joe B1den wanted. The people who supported Joe B1den, including prominent evangelical leaders, wanted these people to be the nominees. Their words NOW don't matter. What matters are their actions before Election Day. No one cares about their evasions and excuses now.

And look, they get executive orders, too:

> Days after corporate media outlets said Joe B1den is "rolling back the culture war," the president continued his war on biological sex and due process on Monday with the introduction of two executive orders that seek to dismantle Trump-era protections in the name of "advancing gender equity and equality" and promoting it as "a

> matter of human rights, justice, and fairness."
>
> B1den's first order mandates the creation of a gender policy council, disguising issues such as promoting access to abortions and pushing gender- and race-driven agendas as a way to "advance gender equity and equality, with sensitivity to the experiences of those who suffer discrimination based on multiple factors, including membership in an underserved community."
>
> […]In addition to a commitment to fight "systemic bias and discrimination, including sexual harassment," the council also plans to address women in the workforce, economic disparities including wage gaps, and "the caregiving needs of American families," specifically examining "policies to advance equity for Black, indigenous and Latina women and girls of color."

Again – this is what the evangelical leaders who fussed about Trump tweets for 4 years wanted. They're not surprised by these executive orders – they agree with them. They voted for them, and they urged other Christians to vote for them, too.

# What criteria do historians use to get to the minimal facts about the historical Jesus?

**Wintery Knight** · 12 March 2021 · Archived copy · Original

Have you ever heard Gary Habermas, Michael Licona or William Lane Craig defend the resurrection of Jesus in a debate by saying that the resurrection is the best explanation for the "minimal facts" about Jesus? The lists of minimal facts that they use are typically agreed to by their opponents during the debates. Minimal facts are the parts of the New Testament that meet a set of strict historical criteria. These are the facts that skeptical historians agree with, totally apart from any religious beliefs.

So what are the criteria that skeptical historians use to derive a list of minimal facts about Jesus?

Dr. Craig explains them in this article.

Excerpt:

> The other way, more influential in contemporary New Testament scholarship, is to establish specific facts about Jesus without assuming the general reliability of the Gospels. The key here are the so-called "Criteria of Authenticity" which enable us to establish specific sayings or events in Jesus' life as historical. Scholars involved in the quest of the historical Jesus have enunciated a number of these critieria for detecting historically authentic features of Jesus, such as dissimilarity to Christian teaching, multiple attestation, linguistic semitisms, traces of Palestinian milieu, retention of embarrassing material, coherence with other authentic material, and so forth.
>
> It is somewhat misleading to call these "criteria," for they aim at stating sufficient, not necessary, conditions of historicity. This is easy to see: suppose a saying is multiply attested and dissimilar but not embarrassing. If embarrassment were a necessary condition of authenticity, then the saying would have to be deemed inauthentic, which is wrong-headed, since its multiple attestation and dissimilarity are sufficient for authenticity. Of course, the criteria are defeasible, meaning that they are not infallible guides to authenticity. They might be better called "Indications of Authenticity" or "Signs of Credibility."
>
> In point of fact, what the criteria really amount to are statements about the effect of certain types of evidence upon the probability of various sayings or events in Jesus' life. For some saying or event S and evidence of a certain type E, the criteria would state that, all things being equal, the probability of S given E is greater than the probability of S on our background knowledge alone. So, for example, all else being equal, the probability of some event or saying is greater given its multiple attestation than it would have been without it.
>
> What are some of the factors that might serve the role of E in increasing the probability of some saying or event S? The following are some of the most important:
>
> (1) Historical congruence: S fits in with known historical facts concerning the context in which S is said to have occurred.
>
> (2) Independent, early attestation: S appears in multiple sources which are near to the time at which S is alleged to have occurred and which depend neither upon each other nor a common source.
>
> (3) Embarrassment: S is awkward or counter-productive for the persons who serve as the source of information for S.
>
> (4) Dissimilarity: S is unlike antecedent Jewish thought-forms and/or unlike subsequent Christian thought-forms.
>
> (5) Semitisms: traces in the narrative of Aramaic or Hebrew linguistic forms.
>
> (6) Coherence: S is consistent with already established facts about Jesus.
>
> For a good discussion of these factors see Robert Stein, "The 'Criteria' for Authenticity," in *Gospel*

> *Perspectives I*, ed. R. T. France and David Wenham (Sheffield, England: JSOT Press, 1980), pp. 225-63.
>
> Notice that these "criteria" do not presuppose the general reliability of the Gospels. Rather they focus on a particular saying or event and give evidence for thinking that specific element of Jesus' life to be historical, regardless of the general reliability of the document in which the particular saying or event is reported. These same "criteria" are thus applicable to reports of Jesus found in the apocryphal Gospels, or rabbinical writings, or even the Qur'an. Of course, if the Gospels can be shown to be generally reliable documents, so much the better! But the "criteria" do not depend on any such presupposition. They serve to help spot historical kernels even in the midst of historical chaff. Thus we need not concern ourselves with defending the Gospels' every claim attributed to Jesus in the gospels; the question will be whether we can establish enough about Jesus to make faith in him reasonable.

And you can see Dr. Craig using these criteria to defend minimal facts in his debates. For example, in his debate with Ehrman, he alludes to the criteria when making his case for the empty tomb.

Here, he uses multiple attestation and the criteria of embarrassment:

> Among the reasons which have led most scholars to this conclusion are the following:
>
> 1. The empty tomb is also multiply attested by independent, early sources.
>
> Mark's source didn't end with the burial, but with the story of the empty tomb, which is tied to the burial story verbally and grammatically. Moreover, Matthew and John have independent sources about the empty tomb; it's also mentioned in the sermons in the Acts of the Apostles (2.29; 13.36); and it's implied by Paul in his first letter to the Corinthian church (I Cor. 15.4). Thus, we have again multiple, early, independent attestation of the fact of the empty tomb.
>
> 2. The tomb was discovered empty by women.
>
> In patriarchal Jewish society the testimony of women was not highly regarded. In fact, the Jewish historian Josephus says that women weren't even permitted to serve as witnesses in a Jewish court of law. Now in light of this fact, how remarkable it is that it is women who are the discoverers of Jesus' empty tomb. Any later legendary account would certainly have made male disciples like Peter and John discover the empty tomb. The fact that it is women, rather than men, who are the discoverers of the empty tomb is best explained by the fact that they were the chief witnesses to the fact of the empty tomb, and the Gospel writers faithfully record what, for them, was an awkward and embarrassing fact.

There are actually a few more reasons for believing in the empty tomb that he doesn't go into in the debate, but you can find them in his written work. For example, in his essay on Gerd Ludemann's "vision" hypothesis. That essay covers the reasons for all four of his minimal facts.

So, if you are going to talk about the resurrection with a skeptic, you don't want to invoke the Bible as some sort of inerrant/inspired Holy Book. You want to look at it as a historical book, and use historical criteria to get to some facts that critical historians would accept. From that, it's possible to make a case for the resurrection, which is the guarantee that the words of Jesus are authoritative. Including the words of Jesus where he describes the Bible as a whole as God's revelation of Himself to his creatures.

Here is the approach I use when talking to non-Christian co-workers:

1. Explain the criteria that historians use to get their lists of minimal facts
2. Explain your list of minimal facts
3. Defend your list of minimal facts using the criteria
4. Cite skeptics who admit to each of your minimal facts, to show that they are widely accepted
5. List some parts of the Bible that don't pass the criteria (e.g. – guard at the tomb, Matthew earthquake)

6. Explain why those parts don't pass the criteria, and explain that they are not part of your case
7. Challenge your opponent to either deny some or all the facts, or propose a naturalistic alternative that explains the facts better than the resurrection
8. Don't let your opponent attack any of your minimal facts by attacking other parts of the Bible (e.g. – the number of angels being one or two, etc.)

And remember that there is no good case for the resurrection that does not make heavy use of the early creed in 1 Corinthians 15:3-8. That passages is universally accepted as early, eyewitness testimony from Paul, and represents the core of early Christian beliefs about the death and resurrection of Jesus. Everyone who takes evidence seriously has to account for that early creed, which passes the historical tests I outlined above.

The best essay on the minimal facts criteria that I've read is the one by Robert H. Stein in "Contending with Christianity's Critics". It's a good short essay that goes over all the historical criteria that are used to derive the short list of facts from which we infer the conclusion "God raised Jesus from the dead". That whole book is really very, very good.

# New study: there is no gay gene that causes homosexuality

**Wintery Knight** · 13 March 2021 · Archived copy · Original

I heard one of the authors of this new study commenting on how he was a gay man, and the purpose of his research was to show a genetic basis for homosexuality, in order to make it equal to race. His goal was to make it impossible to disagree with homosexual behavior, because homosexual behavior would be seen as natural and normal. Let's see if his new study helps him out.

The blog of the peer-reviewed journal PLOS One reported on the new study, which was published in the prestigious journal Science.

Excerpt:

> The once-prevailing concept of a "gay gene" dictating sexual orientation has been put to rest in a powerhouse study published today in *Science*. The work brilliantly illustrates the very nature of science: evolving with the input of new data, especially the large-scale contributions of bioinformatics and crowd-sourcing.
>
> "We formed a large international consortium and collected data for more than 500,000 people, comparing DNA and self-reported sexual behavior. This is approximately 100 times bigger than any previous study on this topic," said lead author Andrea Ganna, of the Institute of Molecular Medicine in Finland and an instructor at Massachusetts General Hospital and Harvard Medical School, opening a news conference earlier this week.
>
> […]The investigation estimates a genetic contribution to same-sex sexual behavior as under 1 percent, thanks to analysis of a trove of data from the UK Biobank and the consumer genetic testing company 23andme.

So, there you have it, there is no gay gene. But this is of course something we've known for decades, as all the previous studies had found the same thing.

The normal way that people do these studies is to analyze identical twins, and see how often both identical twins are gay.

> Eight major studies of identical twins in Australia, the U.S., and Scandinavia during the last two decades all arrive at the same conclusion: gays were not born that way.
>
> "At best genetics is a minor factor," says Dr. Neil Whitehead, PhD. Whitehead worked for the New Zealand government as a scientific researcher for 24 years, then spent four years working for the United Nations and International Atomic Energy Agency. Most recently, he serves as a consultant to Japanese universities about the effects of radiation exposure. His PhD is in biochemistry and statistics.
>
> Identical twins have the same genes or DNA. They are nurtured in equal prenatal conditions. If homosexuality is caused by genetics or prenatal conditions and one twin is gay, the co-twin should also be gay.
>
> "Because they have identical DNA, it ought to be 100%," Dr. Whitehead notes. But the studies reveal something else. "If an identical twin has same-sex attraction the chances the co-twin has it are only about 11% for men and 14% for women."
>
> Because identical twins are always genetically identical, homosexuality cannot be genetically dictated. "No-one is born gay," he notes. "The predominant things that create homosexuality in one identical twin and not in the other have to be post-birth factors."
>
> Dr. Whitehead believes same-sex attraction (SSA) is caused by "non-shared factors," things happening to one twin but not the other, or a personal response to an event by one of the twins and not the other.

By the way, a previous study also found that transgender behavior was not genetic, but was clearly linked to environmental factors such as peer approval and social media.

Here is the report from Science Daily:

> This month, a Brown University researcher published the first study to empirically describe teens and young adults who did not have symptoms of gender dysphoria during childhood but who were observed by their parents to rapidly develop gender dysphoria symptoms over days, weeks or months during or after puberty.
>
> […]The study was published on Aug. 16 in *PLOS ONE.*
>
> Littman surveyed more than 250 parents of children who suddenly developed gender dysphoria symptoms during or after puberty.
>
> […]"Of the parents who provided information about their child's friendship group, about a third responded that more than half of the kids in the friendship group became transgender-identified," Littman said. "A group with 50 percent of its members becoming transgender-identified represents a rate that is more 70 times the expected prevalence for young adults."

A previous study also found that children are more likely to be gay if they are raised by gay adults. It was reported in AOL News.

Excerpt:

> Walter Schumm knows what he's about to do is unpopular: publish a study arguing that gay parents are more likely to raise gay children than straight parents. But the Kansas State University family studies professor has a detailed analysis that past almost aggressively ideological researchers never had.
>
> […]His study on sexual orientation, out next month, says that gay and lesbian parents are far more likely to have children who become gay. "I'm trying to prove that it's not 100 percent genetic," Schumm tells AOL News.
>
> His study is a meta-analysis of existing work. First, Schumm extrapolated data from 10 books on gay parenting… [and] skewed his data so that only self-identified gay and lesbian children would be labeled as such.
>
> […]Schumm concluded that children of lesbian parents identified themselves as gay 31 percent of the time; children of gay men had gay children 19 percent of the time, and children of a lesbian mother and gay father had at least one gay child 25 percent of the time.
>
> […]Finally, Schumm looked at the existing academic studies… In all there are 26 such studies. Schumm ran the numbers from them and concluded that, surprisingly, 20 percent of the kids of gay parents were gay themselves. When children only 17 or older were included in the analysis, 28 percent were gay.

It's very important for people to understand that there is a trend in society to make every behavior traditionally seen as sinful into something caused by genetics. The twin goals of this effort are to insulate the behaviors from criticism, and to minimize evaluation of the effects of these behaviors on society as a whole. The genetic argument was used extensively to normalize same-sex marriage and transgenderism. I have seen the genetic argument used to defend other behaviors like pedophilia and incest. But the scientific research does nothing to support any of these arguments. What's amazing is how a majority of people in the Unites have such false beliefs about the scientific research. They vastly overestimate the number of gay people, and also the influence of genetics.

# Police investigate anti-LGBT hate crime: man asked Catholic school to not fly pride flag

**Wintery Knight** · 14 March 2021 · Archived copy · Original

Story from The College Fix:

> A Canadian university instructor is under investigation by law enforcement for the "crime" of asking a Catho1ic school board not to recognize G4y Pride Month nor fly the rainbow flag at its schools.

He sent the request to the Toronto Catho1ic District School Board last Thursday. I've reported before on how the entire Canadian Catho1ic education system is pro-abortion and also opposed to chastity and natural marriage. This includes supporting LG8T lifestyles, and using the secular government as a weapon against anyone who supports Biblical views of sexuality and marriage. Yes, I mean the Catho1ic schools are doing this.

More:

> "Sending up g4y pride flags and recognizing g4y pride month are a sign that their message holds a place in our schools and that their message is not to be contradicted," Mai11et continued. "Flags are flown by those who hold control. Sending signals that support g4y pride messages is contrary to the teachings of the Church and have no place in our schools."
>
> The pro-LG8T YouTube channel D1gnity L1ghthouse posted Mai11et's comments to its page, and shortly thereafter people on social media went after him for his "hom0phobia." Eventually, the Toronto Police were contacted.

They quote Life Site News for this:

> The H4te Crime Unit is working with the divisional investigator to determine whether or not the comments made during the meeting would constitute hate propaganda charges," [Police Constable Jenifferj1t] Sidhu said.
>
> "This is currently an active investigation. The identity of the person who is alleged to have made comments has not been confirmed by TPS [Toronto Police Service], as [sic] this time," she added.

I'm sure that the constable in charge of the hate crime investigation has a taxpayer-funded degree, and her salary is paid by taxes. Some of the people who pay her taxes disagree with her on morality. And her response to that is to investigate them for hate crimes. And she is very happy to use the money they give her for that purpose. After all, Christianity is a mental disorder to be stamped out by the state. We should be happy to pay her to her to do that excellent work.

Catho1ic teachers marching in favor of g4y rights

The complainant's employer – a secular university – was also informed about his views.

I thought this was interesting from the LSN article – comments from politicians and school board leaders:

> Toronto City Councilor Kristyn Wong-T4m accused Mai11et on Twitter of calling for LG8T allies to be "killed."
>
> […]A number of TCDSB trustees also revealed on Twitter their disdain for Mai11et's presentation.
>
> "There are consequences for those who spread hatred & profess to be Catho1ic-you know who you are. Some feel holier than Pope and want to make us feel like lesser Catho1ics. I stand with Pope: God created us all in his image," Trustee Maria Rizz0, Ward 5, tweeted March 6.
>
> Rizz0 tweeted hours later that "No one should use bible as a weapon to advance their fundamentalist views to spread hatred at 2SLG8TQ+ students and smilies [sic]."
>
> Trustee Markus de Domenic0 also weighed in on Twitter on March 6, indirectly accusing Mai11et of "hate and bigotry."
>
> "I take hope knowing the vast majority of Catho1ics are loving, accepting people who believe in the teachings of Christ. We do not support hate and bigotry. We do not use the bible as a vile weapon against others. I stand with the Pope: God created us all in His image," he wrote.

I looked at some of these tweets, and also found this tweet from a Catho1ic school tweeting a picture of Ruth Bader-Ginsburg for International Women's Day. My view of Catho1icism was already pretty low, but seeing how many Catholic leaders don't accept the Bible isn't exactly helping. Remember, Joe Biden was able to pass himself off as Catho1ic to Catho1ic voters. Catholic voters didn't see any problem with his views on infanticide and LG8T totalitarianism.

I wonder if LG8T activists understand how they will be viewed when they respond to disagreement like this. It seems to me that they would be much better off if they tried to make someone like Dave Rubin their spokesman. But in my experience, they tend to see dissenters from their views in a more totalitarian way. They are only too happy to bring in government to stifle and subdue anyone who disagrees with them.

As a Christian, it would never occur to me to use police to force someone to accept my views on morality, e.g. – chastity.  I would be uncomfortable overpowering someone, threatening them with unemployment or jail. But for the police in Toronto, this is totally normal. Bible-believing Christians are good enough to pay their salaries, but not good enough to have human rights.

We've seen this before in countries with socialism and atheism took over, and dissenters were not treated very well. But they are so steeped in their own dogmas, that they can't possible think about human rights or principles. They have to win. They have to stop anyone from disagreeing with them, or living in any way that they don't approve of.

# How well are Democrats doing at controlling the southern border?

**Wintery Knight** · 15 March 2021 · Archived copy · Original

One of the things that people liked the most about Trump is that he believed in border security. He didn't want Americans losing jobs to people who shouldn't be here. And he didn't want Americans paying thousands of dollars in welfare money to illegal immigrant households that use more in welfare than they pay in taxes.

With that in mind, I wonder how Joe Biden and his Democrat allies are doing. They were short on achievements when running for election. Blue states like California have MASSIVE problems caused by illegal immigration. The Democrats had no resume of achievements to run on. But, they won the election somehow, and now we should see if they are competent to govern.

Here's the situation:

> A "staggering number" of children being held at a Customs and Border Protection facility in Texas are facing "concerning" conditions as the population of unaccompanied minors held in border patrol custody has jumped nearly 700%.
>
> CBS News reports that lawyers, representing the migrant children, are lodging complaints about their treatment, after interviewing children who complained over overcrowding, of being left hungry, of going days without showering, and of "never" seeing the sun while being housed in the Texas detention centers.

I know that Biden rolled back a lot of the policies that Trump had put in to discourage illegal immigration. Biden got rid of the law that required foreigners to stay outside of the USA while awaiting hearings. Biden returned to the catch-and-release policy which allows illegals to enter the USA and just disappear. When you destroy law enforcement policies that deter illegal immigration, you encourage people to break the law. And then someone gets the bill for the higher spending on education and health care, and the higher crime rate. Biden doesn't have the same concern for taxpayer money that Trump had. It's not his money. What does he care? He has armed security.

More:

> "The Donna facility, which opened last month, has been operating over its pandemic-era capacity for weeks, CBP acknowledged in a recent filing in federal court. The facility was holding 854 children on February 21 and nearly 700 two days before, according to the court filing, which also noted that social distancing 'could not be observed at all times given the increasing numbers of individuals in custody,'" CBS reported Saturday.
>
> Currently, the facility is estimated to be at 700% capacity.
>
> Although the Biden administration as a whole has yet to call the situation a "crisis," the White House announced on Sunday that it would call in the Federal Emergency Management Agency (FEMA) to help minister to the child migrants in United States custody, per the BBC.

The Democrats don't have any money of their own to spend on compassion. They're being compassionate with YOUR money.

Maybe we should have worked harder to elect someone competent, rather than someone who just offered us good feelings and peer approval? Most of the people I know who voted for Joe Biden just "went with their gut". They didn't look at policy. But they're going to have to pay for policy. They will, and their children will.

# CNN news anchor Don Lemon says God doesn't judge people

**Wintery Knight** · 16 March 2021 · Archived copy · Original

He's an expert theologian and Bible scholar, and he has decided to educate us on what the Bible says and what it means.

Daily Caller reports:

> CNN anchor Don Lemon claimed Monday that God was "not about hindering people or even judging people."
>
> Lemon, who is engaged to his partner Tim, joined ABC's "The View" to talk about Pope Francis' statement directing the Catholic Church not to bless same-sex unions.
>
> […]"I think that the Catholic Church and many other churches really need to re-examine themselves and their teachings. That's not what God is about. God is not about hindering people or even judging people," Lemon claimed.
>
> […]Lemon went on to say that he often viewed religion as a barrier preventing people from really getting to know and understand each other.
>
> "I would say to the Pope and Vatican and all Christians or Catholics, or whomever, whatever religion you happen to belong to, go meet people. Try to understand people," Lemon added. "Do what the Bible Jesus actually said, if you believe in Jesus, and that is love your fellow man and judge not lest you be not judged."

This isn't the first time I've blogged about CNN's Don Lemon, or his amazing ability to interpret the Bible to Christians who don't know what it says.

Christian Post reports:

> CNN host Don Lemon has garnered criticism for claiming that Jesus Christ "was not perfect" while He was living on earth.
>
> "Jesus Christ — if you believe in, if that's who you believe in, Jesus Christ — admittedly was not perfect when he was here on this earth."

I really would like Christians to be more careful about where they get their news from. This time, it's obvious that Don Lemon doesn't know what he's talking about. Other times, it may not be. A lot of money goes into making people on CNN look attractive and sound authoritative. Don't be fooled by appearances. These people are stupid and ignorant about the things they speak about.

If you're wondering what to read, I read The Federalist, Daily Wire, Daily Signal and Daily Caller. I'd recommend that you stick with those web sites, and turn off the CNN Bible experts.

# Washington Post corrects news story that attributed inaccurate quotes to Trump

**Wintery Knight** · 17 March 2021 · Archived copy · Original

They lied.

Story from Fox News:

> The Washington Post made a massive correction Monday to a January report about a phone call between then-President Donald Trump and a Georgia elections investigator, as the liberal paper admitted multiple quotes attributed to Trump based on an anonymous source were inaccurate.
>
> The corrected story was a hot topic on cable news and talk shows that helped spread the Post's flawed report and media watchdogs feel it points to larger problems with agenda-driven anonymous sources and liberal outlets that rush to "confirm" them.
>
> […]The Post initially reported Trump had told an official working in Georgia Secretary of State Brad Raffensperger's office to "find the fraud" in the state, which he lost narrowly to Joe Biden, and that she would be a "national hero" if she did.
>
> However, a newly emerged recording of the Dec. 23 call found he didn't use those words. Instead, Trump said she would be "praised" when the "right answer comes out" and encouraged her to closely examine mail-in ballots in heavily blue Fulton County.

The original headline was *"Find the fraud': Trump pressured a Georgia elections investigator in a separate call legal experts say could amount to obstruction."* They changed the headline when they made the correction. Other news outlets spread the lies. The article was used in the oral arguments recent attempt to impeach Trump. People saw it on TV, and they believed it.

It happens often. The New York Times had to correct a story that claimed that Trump supporters bludgeoned a police officer to death with a fire extinguisher. That was later found to be false and retracted, but again, the damage was already done. The news media ran with the lie, and it was used in the impeachment. Again, people saw it on TV, and they believed it.

The news media likes to say that this was just an honest mistake, but the mistakes always go against conservatives. When you look at the political donations of people in the news media, it's almost entirely going to Democrats. They're using their power to lie to the public, so they get their candidates elected. And then the Big Tech social media companies rely on the liars to "fact check" the rest of us, and censor us for telling the truth.

Remember that the entire Trump-Russia collusion news story also relied on anonymous sources. But in the end, it turned out that Democrats paid for the dossier that was used by the FBI to justify spying on Trump. I don't remember anyone in the news media facing consequences for running a fake story for months and months.

By the way, the Washington Post is owned by the CEO of Amazon. I'm already trying to reduce my dependence on Amazon. You might want to think about it. He's not a good person, and we shouldn't be making him rich.

# What teachers think about parents' desire for kids to get jobs and earn money

**Wintery Knight** · 18 March 2021 · Archived copy · Original

If you ask parents why they send their children to school, you're likely to get the answer "so that they can learn useful skills, get jobs, and move out of my house". But teachers don't really see their goal as teaching children skills so that they can get jobs. They see their job as teaching children to vote for big government, so that they can get raises, vacation, conferences, benefits, pensions, etc. So, they focus on teaching children how to vote Democrat. And they do that by ignoring math, science, technology and engineering, and instead focusing on things that promote redistribution of wealth, and bigger government.

Here's an example from Daily Wire, in which we find out what teachers really think of parents – in their own words:

> A group of current and former teachers and others in L0ud0un County, Virginia compiled a lengthy list of parents suspected of disagreeing with school system actions, including its teaching of controversial racial concepts — with a stated purpose in part to "infiltrate," to use "hackers" to silence parents' communications, and to "expose these people publicly."
>
> Members of a 624-member private Facebook group called "Anti-Racist Parents of L0ud0un County" named parents and plotted fundraising and other offline work. Some used pseudonyms, but The Daily Wire has identified them as a who's who of the affluent jurisdiction outside D.C., including schools staff and elected officials.
>
> The sheriff's criminal investigations division is reviewing the matter — but the group's activities might be no surprise to top law enforcement because the county's prosecutor, narrowly elected with the help of $845,000 in cash from George Soros, appears to be a member of the Facebook group.

The article is long (2600 words), but awesome. I recommend taking the time to read it, so you can have an accurate view about what teachers are really like. But I have some samples below.

Silencing dissenting teachers:

> In recent years, L0ud0un's school system has flooded its curricula and policies with racial rhetoric, paying about $500,000 to one racial consulting company alone. It required all staff to undergo "Equity in the Center" training that promoted a sense of injustice and urgency.
>
> The school system proposed, then withdrew, a policy that would ban teachers from disagreeing with the schools' racial philosophies, even when not on school district property. In January 2020, the school board's Equity Committee voted unanimously to "Offer/Provide Equity in the Center-like training to parents."

Doxing parents who wanted schools to teach children marketable skills, rather than Democrat socialist indoctrination.

Former teacher, Hilary Hu1tman-Lee wrote this in the private Facebook group:

> "Regarding the anti-CRT movement, we'd like to compile a document of all known actors and supporters. Please comment below with legal names of these individuals, area of residence and or school board Rep known, known accounts on social media, and any other info that you feel is relevant," wrote Hu1tman-Lee, who at one point taught Latin at Potomac Falls High School and who is listed as doing business with the school district as an education consultant.

The fascists responded by naming all the people, listing out their contact information, addresses, EMPLOYERS and spouses.

Look at this:

> Andrea We1skopf, a teacher at River Bend & Seneca Ridge Middle School, named a father who has criticized critical race theory. The N44CP, which We1skopf (who is white) works closely with, previously sent an "URGENT" email to school officials alerting them that the man is married to a teacher. We "are hopeful she does not share the same ideologies as her husband. Please confirm receipt of this message," it said, according to an email obtained by The Daily Wire.

The article describes the teachers in the Facebook group, and their derisive opinions of parents who speak out against secular leftist indoctrination. They're not just talking about getting people fired, or shutting down their funding. They also talked about hacking web sites and violence.

**Stop giving money to unionized teachers**

Do you want to live in a world where taxpayer money is paid to secular left fascists? These people don't have any marketable skills. They are often divorced, obese, single mothers, promiscuous, reckless, irresponsible, mentally ill, sexually deviant, etc. Even if they don't behave like this themselves, they encourage self-destructiveness in others in the name of "tolerance". They go into teaching to avoid having to please customers in a competitive market. They don't want to interact with adults. They don't want to feel pressure to perform a job well enough to keep it. They want security that's divorced from accountability. They're often just overgrown children, obsessed with the kinds of cliquish nonsense (feelings and peer approval) that occupied them when they were children themselves.

Political contributions from unions are mostly given to secular left fascists

Teachers teach in order to get more money for themselves. They get more money by teaching children to vote for bigger government. They are not interested in teaching skills and getting kids jobs in the private sector. They are not interested in affirming the religion or morality of parents. They are not interested in teaching children to love their country. They want money. Stop giving them money.

# LGBT fascism: father imprisoned for calling his biological child "daughter"

**Wintery Knight** · 18 March 2021 · Archived copy · Original

I have a lot to say about this story, so I'll be brief in re-capping the facts.

The back story from Post Millennial:

> H00g1and discovered that the school had been showing his daughter SOGI 123, the going sexual and gend3r identity education materials in British Columbia which amounts to tr4nsgend3r ideology "propaganda videos." In the grade 7 yearbook, the child was referred to by a different name. The school counsellor changed the child's name without telling her parents. The school "socially tr4nsitioned" the biologically female child on its own initiative, with the input of a gend3r ideologue psychologist, Dr. Wa11ace W0ng.
>
> When H00g1and accompanied his child to a consultation with W0ng, the psychologist advised the pubescent child to take testosterone. W0ng referred the child to the endocrinology unit at the local hospital. Meanwhile, H00g1and was looking for mental health solutions to help the child without drugs.
>
> On the child's first visits to the hospital, a treatment plan was put into action. Both the child, and her mother—H00gland's ex-wife—signed a consent form which explicitly stated that the "treatment" was experimental, meaning that the endocrinologists recommending the treatment didn't know the long-term health impact.
>
> A gend3r identity activist lawyer, B4rb4r4 Find1ey, represented the child in court. Justice B0den decided that the child's best interests lay in destroying her long-term health to make her body appear more like that of a male.
>
> H00gland, in contrast, thinks his daughter's best interests lie in preserving his child's health, in case his child ends up among the estimated 85 percent of children who desist in their belief that they are the opposite sex once puberty ends.

You can read more about W0ng here.

And here is the latest:

> [A] warrant was issued by a judge for the arrest of a father after calling his biological female child his "daughter," and referring to her with the pronouns "she" and "her." H00g1and was found to be in contempt of court.
>
> H00g1and is a father to a gend3r non-conforming biological female 14-year-old who identifies as tr4nsgend3r and prefers the use of male pronouns. H00g1and has repeatedly called this person his daughter, though the court has forbade it.
>
> On Tuesday… .He was the arrested and jailed. The warrant was issued by Judge T4mmen on March 4, 2021.
>
> H00g1and opposes his child's undergoing "gend3r affirmative" medical procedures, and has stated this opposition again and again, in the hope of saving his child from irreversible harm. The Canadian medical system, the legal system, and the child's mother press ahead with social and medical tr4nsition of the child.
>
> On December 14, 2020, H00g1and was compelled by Justice M4rz4ri's court to collude in the gend3r "tr4nsitioning" of his fourteen year old daughter and told not to call his biological female child his daughter. In response, H00g1and made a Charter challenge engaging his right to freedom of speech.

Unfortunately, there is no freedom of speech nor freedom of religion in Canada. They simply do not exist, because regardless of what is on paper, the taxpayer-funded judges and politicians who run Canada are secular left fascists –

the same kind who have been at the head of Marxist governments in other times and places that resulted in so much suppression of liberty and human rights. When it comes to human rights, Canada has more in common with North Korea than it does with the United States of America.

Now my points.

First, about the man's wife. Women are generally inclined to generate their system of values by feelings and peer approval. Now that feminism has brainwashed the majority of women to distrust concepts that are more typically linked to men, like objective truth and objective morality, it's rare to find any women who formed their values by complying with the reality of God's existence and the objective moral law. They are instead reckless and hedonistic in their behavior, preferring to act first and then deny responsibility later. The whole movement for moral relativism and the subsequent non-judgmentalism is an attempt by feminist women to normalize bad behaviors by demanding "tolerance" and "compassion". My advice to men at this time is to NEVER marry. I don't think that most women today are good partners for protecting children from predators. There just isn't enough going on in society (churches, culture, anywhere) that is countering the pulling of women towards postmodern skepticism and moral relativism.

Second, even if you marry a good woman, one like my senior female advisors who I respect and love, you will have to live in a world run by feminist teachers, counselors, administrators, lawyers, judges, police officers, etc. Having a family exposes you to influence from woke pastors, woke parishioners, woke bureaucrats, woke corporations, woke co-workers, big government workers, etc. Your wife will want social connections, and society will become aware of your belief in God and adherence to the Bible. They will not let you lead your home. You're already losing money from taxes to pay for fascists who oppose liberty and human rights. Don't compound the problem by having a family that increases interactions with them. You might remember that I recently blogged about a Canadian man who was forced to pay $50,000 a month to a woman that he never married, had children with or even lived with. And another Canadian man who was taken to court for grounding his daughter, and a female judge ruled against him. Why diminish your Christian influence and effectiveness by having your resources confiscated by secular left fascists?

Third, it's important to understand the evil consequences of feminist women's push for tolerance and compassion, i.e. – moral relativism and non-judgmentalism. I have blogged previously about the case of the two g4y dads, who adopted a child only to abuse him and to make child pornography videos. An Australian journalist who wrote a story lauding the two g4y dads and their parenting ability (before they were sentenced for their crimes) complained that she didn't know they were going to do that. But there are ALWAYS consequences, especially for children, from the feminist female push for moral relativism and non-judgmentalism. Just because those women cannot predict them, in their rush to virtue signal their tolerance and compassion, doesn't mean they are not responsible. If Robert H00gland's child regrets her tr4nsition or (God forbid) goes into a depression and commits suicide, then the people responsible will be the ones who seem so tolerant and compassionate today. By the way, there is a story from just this week about how a child court judge who championed "drag queen story hour" has been arrested for child pornography. Canada also had an education minister who championed the sexual exploitation of children in their education curriculum who was also arrested for child pornography. Why not just assume that EVERY secular leftist who talks about tolerance and compassion in public is privately involved in abusing children OR approves of it? How many times must children suffer before we see things as they really are?

Fourth and finally, it's important to understand that secular leftists who are involved in promoting evil tend to respond to disagreement with fascism. Canada currently has a publication ban on any stories about government overriding the rights of parents. They use ARMED POLICE and IMPRISONMENT to restrict speech that criticizes many of the priorities of the secular left, e.g. – abortion, infanticide, tr4nsgenderism, g4y rights, etc. They are not afraid to use coercive methods. I have blogged about people on the secular left using doxing, termination of employment, boycotts, vandalism, violence, and even DOMESTIC TERRORISM (in the case of the g4y activist who attacked the Family Research Council building with a GUN). These methods are either performed by OR approved by secular leftists. Don't expect them to respect your liberties and human rights, because there are no

God-given liberties or human rights in a naturalistic / materialist universe. And in a naturalist / materialist universe, anything goes for a secular left fascist trying to feel good and get peer approval.

Also, in case anyone from Canada is reading this, I mean you no harm. Unlike you, I have no desire to stop people I disagree with from acting freely, according to their consciences. I want you to be able to work and earn money to survive and provide for your family. As a Christian, my job is to love you and answer your questions about Christianity so that you freely choose to bring your behaviors inline with what you determine to be true. I want you to be free to act like a secular leftist fascist, since you haven't CONVINCED YOURSELF to act any other way. We're not going to dox you, silence you, coerce you, or anything that would upset you. But I will use my speech to respectfully but firmly disagree with you. The history of Christianity is REPLETE with the worst kinds of sinners changing their ways and becoming heroes of the faith – loved and respected by all Christians. Look at the apostle Paul – he was a billion times worse than you! Christians hope and pray that you might become curious about the rational arguments and evidence for Christianity and change your own minds at your own pace. It happens all the time. We want the truth-centered best for you, not the self-centered best.

# Who will the Republicans nominate to run for president in 2024?

**Wintery Knight** · 19 March 2021 · Archived copy · Original

There's only one answer: Florida governor Ron DeSantis.

And I will tell you why. Because he has real achievements, and by 2024, we will have finally learned to care about competence instead of charisma. Because we are going to have a LOUSY 4 years under Biden / Harris.

For one thing, All of this tolerance, compassion, permissiveness, etc. COSTS MONEY. We are already $28 trillion in debt, and Biden is simultaneously destroying our economy while trying to buy votes with taxpayer money. How destroying the economy? By attacking the energy sector, shutting down businesses with a pandemic panic, and talking about raising corporate tax rates from 21% to 28%.

We're going to need someone who has results, and that person is Ron DeSantis.

Here's an article from The Federalist:

> Republican Florida Gov. Ron DeSantis denounced critical race theory at a press conference Wednesday afternoon, vowing to "expressly exclude" it from the state's public schools.
>
> "Florida civics curriculum will incorporate foundational concepts with the best materials and it will expressly exclude unsanctioned narratives like critical race theory and other unsubstantiated theories," DeSantis said. "Teaching kids to hate their country and to hate each other is not worth one red cent of taxpayer money."
>
> "No matter if your family came on the Mayflower or you became a naturalized citizen, these principles belong to you," DeSantis said.
>
> DeSantis said Florida would receive $106 million in pandemic-associated federal dollars. A new proposal by DeSantis would provide an additional $3,000 to public educators who are credentialed to teach American civics. About $16.5 million of the pandemic funds would be allocated to training educators and principals in civics.
>
> In his speech, the governor laid out a plan to put $6.5 million toward public service advocacy programs between schools and the government, and $7 million for civics curricula that provide students with "foundational concepts."

DeSantis is making himself a resume to run on by his actions. If he has success, like he did with his method of handling the Wuhan virus, then he will win in 2024. We can't be electing people based on their words – we need to look for people who have actions. The best actions, are actions that solve problems. Critical race theory is nothing but racism, and it needs to get solved by someone with some strength to take it on, head on. No governor is doing more than Florida's Ron DeSantis. People are flocking to Florida from all the failing Democrat-run states.

If you're not following DeSantis now, you can start reading Daily Wire, The Federalist, Daily Caller, Daily Signal, Breitbart, and other good conservative sites to find out. Did you know he banned sanctuary cities in his state? I love that!

Look at some of these mainstream headlines from the last week:

- Washington Times: Fla. Gov. DeSantis blames Biden for 'disastrous' border crisis: 'This is intentional,' 'ideological'
- Wall Street Journal: Ron DeSantis on the Pandemic Year: Don't Trust the Elites (he wrote this editorial)
- CBS News Miami: Gov. Ron DeSantis Says State Won't Be 'Doing Any Vaccine Passports'
- The Blaze: DeSantis slams Biden's idea of reinstating lockdowns as 'insane,' vows no more shutdowns in Florida

Or you can even read far-left Democrat sources like Politico. Their headline is "How Ron DeSantis won the

pandemic".

Excerpt:

> [A]fter 12 months in which he was pilloried as a reckless executive driven more by ideology than science, dogged by images of crowded beaches and bars and derided as "DuhSantis," "DeathSantis" and "DeSatan," Florida has fared no worse, and in some ways better, than many other states — including its big-state peers.
>
> The most controversial policies DeSantis enacted — locking down later and opening up earlier, keeping nursing homes closed to visitation while insisting schools needed to be open to students, resisting intense pressure to issue a mask mandate — have ended up being, on balance, short of or even the opposite of ruinous.
>
> Prognosticators' grimmest predictions never came true — or haven't yet — and DeSantis, for now, is more politically ascendant than any governor in the country. In stark contrast to his most conspicuous counterparts — California's Gavin Newsom, who's facing a recall, and New York's Andrew Cuomo, who's confronting political extinction — the Yale-and Harvard-educated DeSantis' approval ratings are up from last year's low 40s and flirting with the mid-50s.
>
> And in spite of some traits that typically would constitute political kryptonite — he's as awkward as he is ambitious — there's mounting (albeit ultra-early) polling that suggests DeSantis might be (after Donald Trump) the favorite to be Republicans' nominee for president in 2024.
>
> "There's a sweet spot in there that most governors have searched for but few have found," said GOP pollster Whit Ayres, who's worked for DeSantis in the past. "He's managed to figure out the sweet spot between good policy and good politics."

Buckle up, because we're going to win in 2024.

# Luke Barnes on the fine-tuning of the strong force and fine structure constant

**Wintery Knight** · 20 March 2021 · Archived copy · Original

By now, anyone who has had discussions about scientific evidence for the existence of God knows about the fine-tuning argument. In a nutshell, if the fundamental constants and quantities given in the Big Bang were even slightly other than they are, then the universe itself would not be hospitable for complex, embodied intelligent life.

Here is an article from The New Atlantis written by Australian cosmologist Luke Barnes.

Excerpt:

> Today, our deepest understanding of the laws of nature is summarized in a set of equations. Using these equations, we can make very precise calculations of the most elementary physical phenomena, calculations that are confirmed by experimental evidence. But to make these predictions, we have to plug in some numbers that cannot themselves be calculated but are derived from measurements of some of the most basic features of the physical universe. These numbers specify such crucial quantities as the masses of fundamental particles and the strengths of their mutual interactions. After extensive experiments under all manner of conditions, physicists have found that these numbers appear not to change in different times and places, so they are called the fundamental constants of nature.
>
> […]A universe that has just small tweaks in the fundamental constants might not have any of the chemical bonds that give us molecules, so say farewell to DNA, and also to rocks, water, and planets. Other tweaks could make the formation of stars or even atoms impossible. And with some values for the physical constants, the universe would have flickered out of existence in a fraction of a second. That the constants are all arranged in what is, mathematically speaking, the very improbable combination that makes our grand, complex, life-bearing universe possible is what physicists mean when they talk about the “fine-tuning” of the universe for life.

Let’s look at an example – the strong force. Not only must the strong force be fine-tuned so we have both hydrogen and helium, but the ratio of the strong force must also be fine-tuned with the fine structure constant.

Barnes writes:

> The strong nuclear force, for example, is the glue that holds protons and neutrons together in the nuclei of atoms. If, in a hypothetical universe, it is too weak, then nuclei are not stable and the periodic table disappears again. If it is too strong, then the intense heat of the early universe could convert all hydrogen into helium — meaning that there could be no water, and that 99.97 percent of the 24 million carbon compounds we have discovered would be impossible, too. And, as the chart to the right shows, the forces, like the masses, must be in the right balance. If the electromagnetic force, which is responsible for the attraction and repulsion of charged particles, is too strong or too weak compared to the strong nuclear force, anything from stars to chemical compounds would be impossible.

Here’s the chart he’s referencing:

Fine-tuning of the strong nuclear force and the fine structure constant

As you can see from the chart, most of the values that the constants could take would make complex, embodied intelligent life impossible.

We need carbon (carbon-based life) because they form the basis of the components of life chemistry, e.g. proteins, sugars, etc. We need hydrogen for water. We need chemical reactions for obvious reasons. We need the light from the stars to support plant and animal life on the surface of a planet. And so on. In almost every case where you change the values of these constants and quantities and ratios from what they are, you will end up with a universe that does not support life. Not just life as we know it, but life of any conceivable kind under these laws of physics. And we don't have any alternative laws of physics in this universe.

By the way, just to show you how mainstream these examples of fine-tuning are, I thought I would link to a source that you're all going to be familiar with: The New Scientist.

## The fine-tuning of the force of gravity

So here is an article from the New Scientist about a different constant that also has to be fine-tuned for life: the force of gravity.

Excerpt:

> The feebleness of gravity is something we should be grateful for. If it were a tiny bit stronger, none of us would be here to scoff at its puny nature.
>
> The moment of the universe's birth created both matter and an expanding space-time in which this matter could exist. While gravity pulled the matter together, the expansion of space drew particles of matter apart – and the further apart they drifted, the weaker their mutual attraction became.
>
> It turns out that the struggle between these two was balanced on a knife-edge. If the expansion of space had overwhelmed the pull of gravity in the newborn universe, stars, galaxies and humans would never have been able to form. If, on the other hand, gravity had been much stronger, stars and galaxies might have formed, but they would have quickly collapsed in on themselves and each other. What's more, the gravitational distortion of space-time would have folded up the universe in a big crunch. Our cosmic history could have been over by

> now.
>
> **Only the middle ground, where the expansion and the gravitational strength balance to within 1 part in $10^{15}$ at 1 second after the big bang, allows life to form.**

Notice how the article also mentioned “the universe’s birth”, which is part of mainstream science.

When I’m writing to you about things like the origin of the universe, or the cosmic fine-tuning, I’m not talking to you about things that pastors found in the Bible. These discoveries are known and accepted by mainstream scientists. It’s amazing that people are constructing their worldviews without having to account for the birth of the universe and this cosmic fine-tuning. We all, as rational individuals, have to bound our view of the universe with the findings of science. Right now, those findings support the existence of a Creator and a Designer. So why am I seeing so many atheists who are just plain ignorant about these facts? Maybe we should tell them about this evidence. Maybe we should ask them why they don’t account for scientific evidence when forming their beliefs.

**Positive arguments for Christian theism**

- The kalam cosmological argument and the Big Bang theory
- The fine-tuning argument from cosmological constants and quantities
- The origin of life, part 1 of 2: the building blocks of life
- The origin of life, part 2 of 2: biological information
- The sudden origin of phyla in the Cambrian explosion
- Galactic habitable zones and circumstellar habitable zones
- Irreducible complexity in molecular machines
- The creative limits of natural selection and random mutation
- Angus Menuge’s ontological argument from reason
- Alvin Plantinga’s epistemological argument from reason
- William Lane Craig’s moral argument
- The unexpected applicability of mathematics to nature
- Arguments and scientific evidence for non-physical minds

# Why did Dan Barker leave Christianity for atheism?

**Wintery Knight** · 21 March 2021 · Archived copy · Original

A conflict of worldviews

Unbelievable's radio show featured a discussion with former Christian Dan Barker, the founder and co-President of the Freedom From Religion Foundation.

The MP3 file is here. (60 minutes)

I thought that I would make some general comments about why I think that many people leave the Christian faith, and what you should be careful of in order to avoid following in Dan Barker's footsteps, specifically.

Basically, there are four major reasons why people leave Christianity.

1. They want to do something immoral with impunity. This type of person wants to do something immoral that is forbidden by Christianity, like pre-marital sex or getting drunk in clubs with friends. They dump Christianity in order to have freedom to seek happiness in this life.
2. They want to make decisions based on their emotions, rather than wisdom. This type of person thinks that God's job is to save them when they act irresponsibly. When God disappoints them by not make their recklessness "work out", they leave the faith.
3. They want to be loved by people, not by God. This type of person thinks that Christianity is a tool that they can use to become popular. When they first try to articulate the gospel in public, they find that people don't like them as much, and they feel bad about offending people with exclusive truth claims that they cannot back up using logic and evidence. So, they water down Christianity to get along with non-Christians. Finally, they jettison Christianity completely. This happens to a lot of young Christians the moment they hit college / university.
4. They don't want to learn to defend their faith. This type of person is asked questions by skeptics that they cannot answer. Usually this happens when people go to university after growing up in the shelter of the Church. The questions and peer pressure make them feel stupid. Rather than investigate Christianity to see if it's true, they drop it, so they can be thought of as part of the "smart" crowd.

Now listen to the discussion and see if you can identify some of these factors from Barker's own carefully-prepared words. He is trying very hard to make himself look honest and moderate, because he wants Christians to be sympathetic with his story and his motives for leaving Christianity. But I think that there is enough in his statements

to construct a different hypothesis of why he left Christianity.

I've grouped the data by risk factor. Some of this is my interpretation of his real motivations, based on my experience dealing with former-Christians.

**Non-rational, emotional approach to Christianity**

- he was raised in a devout Christian family where he probably wouldn't have faced skeptical questions
- he converted to Christianity at age 15 as a result of a religious experience, not a serious investigation
- his idea of God was probably idealized and uninformed, e.g. – a loving God who wants us to be happy
- he wandered around from church to church preaching, with no fixed address or source of income
- he earned money by collecting "love offerings" from churches where he performed his music
- he wrote Christian songs and Christian musicals, but nothing substantive on apologetics and theology
- he worked in three churches known for being anti-intellectual and fundamentalist
- there's no evidence that of any deep study of philosophy, science and history during this time

**Desire to gain acceptance from non-Christians**

- he began to notice that some people were uncomfortable with sin and Hell
- he began to avoid preaching about sin and Hell in order to make these people comfortable
- he watered-down the gospel to focus on helping people to be happy in this life
- his manic approach to Christian ministry was challenged by the "real life" needs of his growing family
- he met liberal pastors while performing his music in their churches
- he found it difficult to disagree with them because they seemed to be "good" people
- he watered down his message further in order to appeal to people across the theological spectrum

**Ignorance of Christian apologetics**

- he began to think that if there are many different views of religion, then no view can be correct
- he was not intellectually capable of using logic and evidence to test these competing claims to see which was true
- he decided to instead re-interpret Christian truth claims as non-rational opinions, so they could all be "valid"
- he became a theological liberal, abandoning theism for an impersonal "ground of being"
- he embraced religious pluralism, the view that all religions are non-rational and make no testable truth claims
- he began to see God as a "metaphor" whose purpose is to make people have a sense of meaning and purpose
- he jettisoned God completely and focused more on helping people find meaning and morality apart from God
- seems to think that religion is about having a "great life", and felt that you can have a "great life" without religion
- seems to think that religion is about being "good", and felt that you can be "good" without religion
- religion makes people feel bad by telling them what to do instead of letting them do anything they want
- religion makes people feel bad by telling them what is true, instead of letting them believe whatever they want
- religion makes people feel bad by telling them that God will hold them accountable for their beliefs and actions

**So what do I think happened?**

Barker was generating an income from donations from churches where he entertained them. Gradually, his family grew to the point where conservative churches were not enough to support him. He had to change his message to appeal to liberal churches in order to cast a wider net.

He seems to have thought that Christianity is about having his needs met and being liked by others. I think he

wanted to feel good and to make people feel good with his preaching and singing. But Christianity is not a feel-good religion. It's not a tool to make people like you. He seems to have become aware that the exclusive claims of Christianity made other people feel offended, so he cut them out. Christian apologists learn how to provide evidence for claims that non-Christians find offensive or hard to believe, but Dan hadn't studied philosophy, science or history so he couldn't defend it. It's hard to speak unpopular truths when you have nothing to back it up except your music composing. Eventually, Dan just quit making the truth claims entirely.

I also think money was a factor. It seems to me that it would have hurt his career and reduced his invitations from liberal churches if he had kept up teaching biblical Christianity. In order to appeal to a wider audience, (like many Christian singers do – e.g. – Amy Grant, Jars of Clay, etc.), he would have felt pressured to water down the unpleasant parts of his preaching and singing. Lacking apologetics skill, he instead abandoned his message. He needed to account for his family's needs and "real life", and exclusive truth claims and Hell-talk would have reduced his ability to do that. It seems to me that he should have scaled back his extreme schedule of preaching and singing, and instead gotten a steady job so that he could afford "real life" and a family without being pressured into altering his message. The Christian life requires a certain amount of wisdom that Dan did not have.

Life isn't a fairy tale. God isn't there to reward risky behavior. We need to be more shrewd about financial matters so that we have the ability to *not care* about what people think of us. Look at this blog. I work all day as a senior software engineer with two degrees in computer science, so that I don't have to rely on donations. Additionally, I save most of what I make in case a tragedy strikes. Since I am financially secure, I can say what I think, and disregard anyone who wants me to change my message because they are offended. Becoming a Christian isn't a license to behave irrationally and immaturely with money. For some people, (like William Lane Craig), stepping out in faith works. But if it doesn't work, it's better to retreat and re-trench, rather than to compromise your message for money.

I actually met someone like Dan Barker recently. She grew up in an anti-intellectual hippy Christian home. Her mother came from a good family, and decided on a whim to marry a non-Christian. Like Barker, the family exalted feelings and irrational expectations of miracles from God for "fearless" acts. She got herself into trouble with alcohol and promiscuity in her 20s, by making emotional decisions and mixing with the wrong crowd. Her way of fixing this was to fly off on a one-year missions trip, wrecking her resume and finances. Now, she is in her late 30s, unmarried, and literally blaming *Jesus* for putting too many demands on her that she doesn't have time for, e.g – morning quiet time. This causes her to feel guilty, and make her want to reject Christianity. She had no intellectual conception of basic core doctrines like God's existence or Jesus' resurrection, which might have acted as a bulwark against her emotions. When I explained to her how I had structured my education and career so that I could have an influence without testing God, she seemed bored and said that I was too "fearful".

This is apparently widespread, especially among anti-intellectual denominations. Another ex-Pentecostal atheist woman I heard about from people who knew her when she was young decided to drop out of college to travel around North America doing pro-life work. When she found herself penniless, unmarried and without children in her mid-30s, she decided to have a baby out of wedlock. The government will pay for it, she said. Rather than trying to justify this decision as a Christian, she blamed God for not making her madness "work out". She is now an atheist, because God did not reward her decision to live "fearlessly" for him with a husband and children. It was all God's fault. There is a whole subculture within Christianity, where the pursuit of fun and thrills can be masked with pious language, and all talk of prudence and restraint is seen as cowardice and lack of faith.

The Christian life requires a certain level of intelligence, a certain level of practical wisdom, and a certain level of self-control and discipline. Make sure that you don't walk away from God because of your own bad choices.

# Is Politifact trustworthy? Is Politifact unbiased? A review of past rulings

**Wintery Knight** · 22 March 2021 · Archived copy · Original

Politifact is a web site run by some left-wing journalists at the Tampa Bay Times. As you might expect from academic studies of media bias, their content might as well be written by the Democrat Party. But it's not enough to just declare Politifact a Democrat propaganda operation – I need to actually give you details and examples. And so I will, in the rest of this post.

Let's start with two recent examples, then I'll show you the worst example of media bias I have ever seen from Politifact.

**Missouri Senate Race**

Here's one analysis from the Daily Wire:

> On Tuesday, Politifact, which purports to be a neutral fact-checking website but in fact leans heavily to the left, got caught protecting a member of the Democratic Party: Democratic Missouri Sen. Claire McCaskill.
>
> Politifact took issue with the ad from The Senate Leadership Fund, a pro-Republican super PAC, that claimed that McCaskill said "normal people" could afford private planes.
>
> […]After they were corrected, Politifact acknowledged the mistake, writing,
>
> Initially, we published this fact-check with a rating of False, because based on the video available, it did not appear that McCaskill was talking about private planes. After publication, we received more complete video of the question-and-answer session between McCaskill and a constituent that showed she was in fact responding to a question about private planes, as well as a report describing the meeting. We re-assessed the evidence, archived the original version here, and published the version you see here with a new rating of Half True. We apologize for the error.

Daily wire also linked to some more failed Politifact "fact checks": here, here, and here.

**Arizona Senate Race**

Politifact also screwed up their fact-check for the Arizona Senate race.

The Daily Caller explains:

> PolitiFact incorrectly labeled it “mostly false” that Democratic Senate candidate Kyrsten Sinema “protested troops in a pink tutu” during its live fact-check of the Arizona Senate debate Monday night.
>
> It’s an established fact that Sinema, a former Green Party activist who co-founded an anti-war group, wore a pink tutu at one of the multiple anti-war protests she attended in 2003.
>
> “While we were in harm’s way, she was protesting our troops in a pink tutu,” Republican candidate Martha McSally, a former Air Force fighter pilot, said during Monday night’s debate.

Here’s their Politifact’s evaluation of McSally’s claim:

Who are you going to believe? Politifact, or your own eyes?
And here’s the photo of Kyrsten Sinema, protesting the troops, in a pink tutu:

Anti-war Democrat Senate candidate Kyrsten Sinema in a pink tutu
The Daily Caller notes:

> A 2003 Arizona State University news article at the time described Sinema wearing "something resembling a pink tutu" at one of the protests.
>
> […]Sinema openly associated with fringe elements of the far-left during her anti-war activism.
>
> She promoted an appearance by Lynne Stewart, a lawyer who was convicted of aiding an Islamic terrorist organization, in 2003.
>
> Sinema also reportedly partnered with anarchists and witches in her anti-war activism and said she did "not care" if Americans wanted to join the Taliban.

Colonel Martha McSally, as I've blogged about before, is a former U.S. Air Force A-10 fighter pilot, and squadron commander. She logged a lot of hours leading actual combat missions against America's enemies – the sorts of people who sell and rape Yazidi girls. She fought them.

And now for the big one: Politifact's fact-checking of Obamacare.

**Obama's claims about Obamacare**

Avik Roy, health care policy expert at Forbes magazine, wrote about Politifact's assessment of Obama's promise to Americans about keeping their health plans after Obamacare.

**In 2008, before the presidential election, PolitiFact rated Obama's claims about Obamacare "True":**

Roy writes: (links removed)

> On October 9, 2008, Angie Drobnic Holan of PolitiFact published an article using the site's "Truth-O-Meter" to evaluate this claim: "Under Barack Obama's health care proposal, 'if you've got a health care plan that you like, you can keep it.'"

And she concluded:

> […]…people who want to keep their current insurance should be able to do that under Obama's plan. His description of his plan is accurate, and we rate his statement True."

Roy notes:

> PolitiFact's pronouncements about Obamacare were widely repeated by pro-Obama reporters and pundits, and had a meaningful impact on the outcome of the election. Indeed, in 2009, PolitiFact won the Pulitzer Prize for its coverage of the 2008 campaign.

Here's the screen capture from 2008:

The Truth-O-Meter Says:

**Under Barack Obama's health care proposal, "if you've got a health care plan that you like, you can keep it."**

Barack Obama on Tuesday, October 7th, 2008 in a debate in Nashville, Tenn.

**Obama's plan expands existing system**

Barack Obama defended his health care plan during a debate in Nashville, Tenn., on Oct. 7, 2008. His opponents have attacked his plan as "government-run" health care.

"No. 1, let me just repeat, if you've got a health care plan that you like, you can keep it," Obama said. "All I'm going to do is help you to lower the premiums on it. You'll still have choice of doctor."

Obama is accurately describing his health care plan here. He advocates a program that seeks to build on the current system, rather than dismantling it and starting over.

TRUE

Share this story:

Recommend 185

Tweet 380

Politifact says that everyone who likes their health care plan can keep it

Before the election, it's true! And Obama got re-elected, because people believed that. But what happened after the election?

**In 2013, after the 2012 election, PolitiFact rated Obama's claims about Obamacare "Pants On Fire":**

Roy writes: (links removed)

> On December 12, [2013] the self-appointed guardians of truth and justice at PolitiFact named President Obama's infamous promise—that "if you like your health care plan, you can keep it"—its 2013 "Lie of the Year."
>
> […][N]one of the key facts that made that promise "impossible" in 2008 had changed by 2013. The President's plan had always required major disruption of the health insurance market; the Obamacare bill contained the key elements of that plan; the Obamacare law did as well. The only thing that had changed was the actual first-hand accounts of millions of Americans who were losing their plans now that Obamacare was live.

And the screen capture from 2013:

The article:

**Lie of the Year: 'If you like your health care plan, you can keep it'**

By Angie Drobnic Holan

Published on Thursday, December 12th, 2013 at 4:44 p.m.

It was a catchy political pitch and a chance to calm nerves about his dramatic and complicated plan to bring historic change to America's health insurance system.

"If you like your health care plan, you can keep it," President Barack Obama said -- many times -- of his landmark new law.

But the promise was impossible to keep.

So this fall, as cancellation letters were going out to approximately 4 million Americans, the public realized Obama's breezy assurances were wrong.

Related rulings:

"What we said was, you can keep (your plan) if it hasn't changed since the law passed."

Barack Obama, Monday, November 4th, 2013.

Ruling: Pants on Fire! | Details

"FACT: Nothing in #Obamacare forces people out of their health plans."

Valerie Jarrett, Monday, October 28th, 2013.

Politifact said one thing before the election, and the opposite afterwards

So when Politifact rates a statement by a Democrat as true, what they really mean is that it's pants-on-fire-false, but

it’s election time so they don’t say that. It’s not like the critical assessments of Obamacare from health policy experts were not out there between 2007-2012. I know, because I blogged on every study and report on the predicted effects of the law that I could find. But the intellectually lazy journalism-major clowns at Politifact couldn’t be bothered to read those studies and reports.

# Scotland passes controversial bill criminalizing “hate speech”, even at home

**Wintery Knight** · 23 March 2021 · Archived copy · Original

The far-left The National reports:

> ONE of the most controversial pieces of legislation ever undertaken by the Holyrood Parliament has been approved by MSPs. The Scottish Parliament voted by 82 to 32 with four abstentions to pass the Hate Crime and Public Order Bill.
>
> […]Conservative spokesperson on justice Liam Kerr MSP said the bill went too far, arguing: “The bill contains no defence regarding private conversations in people’s own homes. The police could come to someone’s home, having received a report of their having stirred up hate around the dinner table, and could take witness statements from those present, which, presumably, could include their children.”

So, I follow a lot of bills like this in a variety of countries, and I don’t think I’ve ever seen one that went this far to discourage free expression. And I’ve seen some very bad bills. Basically, if you have a conversation in your home or in your own yard that someone is offended by, it’s a criminal offense. Armed police will come into your house, breaking in if necessary. They will interrogate everyone present, and they will take anything that might contain information about your “hateful” views to be used in evidence against you. Like the Conservative MSP said, they will even ask your children what you said if order to get you arrested and jailed.

Can you imagine trying to have a conversation with a non-Christian in your home about Christian views on abortion or sexuality in Scotland? You couldn’t. You couldn’t even have a conversation with your wife or your kids. You couldn’t discuss something you disagree with that you saw on television. Or that your children learned in the schools. You couldn’t do your job as a husband and father, in short. And you couldn’t even speak about these things in church (or at work) for fear of saying the wrong thing to the wrong person. How are you suppose to defend your faith, explain your Christian convictions, or lead your family? But you still have to pay taxes to the people who make these laws – and to the police who will arrest and imprison you. Then run your lives. You get the bill.

If you like legislation like this, keep voting for the Democrats. They’ll get it done for you. And if you focus on mean tweets (or whatever else the mainstream news media dangles in front of your face) instead of policy, then you’ll get laws like this, too. Politics matters. You have a worldview to put into practice, and laws like this Scottish law will make it impossible for you to achieve your goals.

# Four reasons to think that atheism is inconsistent with scientific progress

**Wintery Knight** · 24 March 2021 · Archived copy · Original

When people ask me whether the progress of science is more compatible with theism or atheism, I offer the following four basic pieces of scientific evidence that are more compatible with theism than atheism:

1. the kalam argument from the origin of the universe
2. the cosmic fine-tuning (habitability) argument
3. the biological information in the first replicator (origin of life)
4. the sudden origin of all of the different body plans in the fossil record (Cambrian explosion)

And I point to specific examples of recent discoveries that confirm those four arguments. Here are just a few of them:

1. An explanation of 3 of the 6 experimental evidences for the Big Bang cosmology (from Physics Forums)
2. Examples of cosmic fine-tuning to allow the existence of conscious, embodied life (From the New Scientist)
3. Evidence that functional protein sequences are beyond the reach of chance, (from Doug Axe's JMB article)
4. Evidence showing that Ediacaran fauna are not precursors to the Cambrian fossils, (from the journal Nature)

Atheists will typically reply to the recent scientific discoveries that overturned their speculations like this:

1. Maybe the Big Bang cosmology will be overturned by the Big Crunch/Bounce so that the universe is eternal and has no cause
2. Maybe there is a multiverse: an infinite number of unobservable, untestable universes which makes our finely-tuned one more probable
3. Maybe the origin of life could be the result of chance and natural processes
4. Maybe we will find a seamless chain of fossils that explain how the Cambrian explosion occurred slowly, over a long period time

Ever heard any of these responses?

Below I list some resources to help you to respond to the four responses of atheists to the experimental data.

**1) The Big Crunch/Bounce has been disproved theoretically and experimentally.**

Theoretically:

> Nature 302, 505 – 506 (07 April 1983); doi:10.1038/302505a0
>
> The impossibility of a bouncing universe
>
> ALAN H. GUTH* & MARC SHER†
>
> *Center for Theoretical Physics, Laboratory for Nuclear Science and Department of Physics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139, USA
>
> †Department of Physics, University of California, Irvine, California 92717, USA
>
> Petrosian1 has recently discussed the possibility that the restoration of symmetry at grand unification in a closed contracting Robertson–Walker universe could slow down and halt the contraction, causing the universe to bounce. He then went on to discuss the possibility that our universe has undergone a series of such bounces. We disagree with this analysis. One of us (M.S.) has already shown2 that if a contracting universe is dominated by radiation, then a bounce is impossible. We will show here two further results: (1) entropy considerations

> imply that the quantity S (defined in ref. 1 and below), which must decrease by ~1075 to allow the present Universe to bounce, can in fact decrease by no more than a factor of ~2; (2) if the true vacuum state has zero energy density, then a universe which is contracting in its low temperature phase can never complete a phase transition soon enough to cause a bounce.

Experimentally:

> The universe is not only expanding, but that expansion appears to be speeding up. And as if that discovery alone weren't strange enough, it implies that most of the energy in the cosmos is contained in empty space — a concept that Albert Einstein considered but discarded as his "biggest blunder." The new findings have been recognized as 1998's top scientific breakthrough by Science magazine.
>
> […]The flood of findings about the universe's expansion rate is the result of about 10 years of study, said Saul Perlmutter, team leader of the Supernova Cosmology Project at Lawrence Berkeley National Laboratory.
>
> Perlmutter and others found such a yardstick in a particular kind of exploding star known as a Type 1A supernova. Over the course of several years, the astronomers developed a model to predict how bright such a supernova would appear at any given distance. Astronomers recorded dozens of Type 1A supernovae and anxiously matched them up with redshifts to find out how much the universe's expansion was slowing down.
>
> To their surprise, the redshift readings indicated that the expansion rate for distant supernovae was lower than the expansion rate for closer supernovae, Perlmutter said. On the largest scale imaginable, the universe's galaxies appear to be flying away from each other faster and faster as time goes on.
>
> "What we have found is that there is a 'dark force' that permeates the universe and that has overcome the force of gravity," said Nicholas Suntzeff of the Cerro Tololo Inter-American Observatory, who is the co-founder of another group called the High-z Supernova Search Team. "This result is so strange and unexpected that it perhaps is only believable because two independent international groups have found the same effect in their data."

There has only been one creation of the universe, and the universe will never reverse its expansion, so that it could oscillate eternally. That view is popular, perhaps in part because many people watched videos of Carl Sagan speculating about it in public school classrooms, but all it was was idle naturalistic speculation, (Sagan was a naturalist, and held out hope that science would vindicate naturalism), and has been contradicted by good experimental science. You should be familiar with the 3 evidences for the Big Bang (redshift, light element abundances (helium/hydrogen) and the cosmic microwave background radiation. There are others, (radioactive element abundances, second law of thermodynamics, stellar lifecycle), but those are the big three. Point out how the experimental evidence for the Big Bang has piled up, making the problem even worse for the eternal-universe naturalists.

**2) The multiverse has not been tested experimentally, it's pure speculation.**

Speculation:

> Multiverse thinking or the belief in the existence of parallel universes is more philosophy or science fiction than science. "Cosmology must seem odd to scientists in other fields".
>
> George Ellis, a well-known mathematician and cosmologist, who for instance has written a book with Stephen Hawking, is sceptical of the idea that our universe is just another universe among many others.
>
> A few weeks ago, Ellis, professor emeritus of applied mathematics at the University of Cape Town, reviewed Brian Greene's book The Hidden Reality: Parallel Universes and the Deep Laws of the Cosmos (Knopf/Allen Lane, 2011) in the journal Nature. He is not at all convinced that the multiverse hypothesis is credible: "Greene is not presenting aspects of a known reality; he is telling of unproven theoretical possibilities."

> According to professor Ellis, there is no evidence of multiverses, they cannot be tested and they are not science.
>
> Ellis is not the only multiverse sceptic in this universe. A few months ago, science writer John Horgan wrote a column in Scientific American, expressing his doubt in multiverses.

When you get into a debate, you must never ever let the other side get away with asserting something they have no evidence for. Call them on it – point out that they have no evidence, and then hammer them with evidence for your point. Pile up cases of fine-tuning on top of each other and continuously point out that they have no experimental evidence for their speculations. Point out that more evidence we get, the more cases of fine-tuning we find, and the tougher the problem gets for naturalists. There is no evidence for a multiverse, but there is evidence for fine-tuning. TONS OF IT.

**3) Naturalistic theories for the origin of life have two problems: can't make the amino acids in an oxydized atmosphere and can't make protein and DNA sequences by chance in the time available.**

Building blocks:

> The oxidation state of Hadean magmas and implications for early Earth's atmosphere
>
> Dustin Trail, E. Bruce Watson & Nicholas D. Tailby
>
> Nature 480, 79–82 (01 December 2011) doi:10.1038/nature10655
>
> […]These results suggest that outgassing of Earth's interior later than ~200?Myr into the history of Solar System formation would not have resulted in a reducing atmosphere.

Functional protein sequences:

> J Mol Biol. 2004 Aug 27;341(5):1295-315.
>
> Estimating the prevalence of protein sequences adopting functional enzyme folds.
>
> Axe DD.
>
> The Babraham Institute, Structural Biology Unit, Babraham Research Campus, Cambridge CB2 4AT, UK. doug.axe@bbsrc.ac.uk
>
> Proteins employ a wide variety of folds to perform their biological functions. How are these folds first acquired? An important step toward answering this is to obtain an estimate of the overall prevalence of sequences adopting functional folds.
>
> […]Starting with a weakly functional sequence carrying this signature, clusters of ten side-chains within the fold are replaced randomly, within the boundaries of the signature, and tested for function. The prevalence of low-level function in four such experiments indicates that roughly one in 10(64) signature-consistent sequences forms a working domain. Combined with the estimated prevalence of plausible hydropathic patterns (for any fold) and of relevant folds for particular functions, this implies the overall prevalence of sequences performing a specific function by any domain-sized fold may be as low as 1 in 10(77), adding to the body of evidence that functional folds require highly extraordinary sequences.

So atheists are in double jeopardy here. They don't have a way to build the Scrabble letters needed for life, and they don't have a way to form the Scrabble letters into meaningful words and sentences. Point out that the more research we do, the tougher the problem gets to solve for naturalists, and the more it looks like an effect of intelligence. Write out the calculations for them.

**4) The best candidate to explain the sudden origin of the Cambrian era fossils was the Ediacaran fauna, but those are now recognized as not being precursors to the Cambrian fossils.**

Science Daily reports on a paper from the peer-reviewed journal Science:

> Evidence of the single-celled ancestors of animals, dating from the interval in Earth's history just before multicellular animals appeared, has been discovered in 570 million-year-old rocks from South China by researchers from the University of Bristol, the Swedish Museum of Natural History, the Paul Scherrer Institut and the Chinese Academy of Geological Sciences.
>
> […]This X-ray microscopy revealed that the fossils had features that multicellular embryos do not, and this led the researchers to the conclusion that the fossils were neither animals nor embryos but rather the reproductive spore bodies of single-celled ancestors of animals.
>
> Professor Philip Donoghue said: "We were very surprised by our results — we've been convinced for so long that these fossils represented the embryos of the earliest animals — much of what has been written about the fossils for the last ten years is flat wrong. Our colleagues are not going to like the result."
>
> Professor Stefan Bengtson said: "These fossils force us to rethink our ideas of how animals learned to make large bodies out of cells."

The trend is that there is no evolutionary explanation for the body plans that emerged in the Cambrian era. If you want to make the claim that "evolution did it", then you have to produce the data *today*. Not speculations about the future. The data we have today says no to naturalism. The only way to affirm naturalistic explanations for the evidence we have is *by faith*. But rational people know that we need to minimize our leaps of faith, and go with the simplest and most reasonable explanation – an intelligence is the best explanation responsible for rapid generation of biological information.

**Conclusion**

I do think it's important for Christians to focus more on scientific apologetics and to focus their academic careers in scientific fields. So often I look at Christian blogs, and I see way too much G. K. Chesterton, Francis Chan A. W. Tozer, and other untestable, ineffective jibber-jabber. We need to bring the *hard* science, and stop making excuses about not being able to understand it because it's too hard. It's not too hard. Everyone can understand Lee Strobel's "The Case for a Creator". That's more than enough for the average Christian on science apologetics. We all have to do our best to learn what works. You don't want to be anti-science and pro-speculation like atheists are. I recommend reading Uncommon Descent and Evolution News every day for a start.

# Christian baker back in court for refusing to bake a Satanic cake for an LGBT activist

**Wintery Knight** · 25 March 2021 · Archived copy · Original

You might remember a previous case that went all the way to the Supreme Court, in which two gay activists and the Colorado government went after a Christian baker who declined to provide a cake for a same-sex wedding. His reasoning was that his religious beliefs would not allow him to endorse same-sex marriage – a view of marriage that Jesus opposed in the gospels. The Colorado government and the gay activists thought that the Christian baker needed to accept them as Lord instead of accepting Jesus, and bake the cake anyway. He was persecuted by the state for years, until he finally won his case at the Supreme Court, thanks to the ADF (Alliance Defending Freedom).

But, here is the latest on another gay activist who is suing him again.

The Federalist reports:

> Autumn Scardina, a transgender female-identifying attorney in the Denver area, called Phillips to demand a custom cake celebrating his gender transition after he heard the Supreme Court would consider the initial case against the Colorado Civil Rights Commission. Twice, Scardina had already emailed Phillips to call the baker a "bigot" and a "hypocrite" while mocking his religious beliefs in 2012 when the controversy first arose.
>
> […]The cake shop denied Scardina's 2017 request for a pink and blue cake after he said it was to celebrate his gender transition. Scardina responded with a new complaint picked up by the Colorado Civil Rights Commission that was dismissed in 2019 by the group after Phillips filed a lawsuit against the state in federal court. Months later, Scardina chose to pursue charges of his own seeking damages, fines, and attorney fees to wreck Phillip's finances rather than appeal the commission's decision to drop the discrimination claim.
>
> […]In court, Scardina explained how at one point, while his discrimination claim was being processed by the state, he called the Christian cakeshop to request a custom cake that featured Satan smoking a joint, to test the store's repeated claims he would be treated just as anyone else.

You see, gay activists can't go next door to get whatever baked goods they want, they have to use the government to force people to go against their moral convictions. They have to use armed police and criminal courts to force Christians to believe what they cannot believe, as followers of Jesus.

This reminds me of the case of the Canadian transgender activist who wanted to force women to wax his genitalia, and sued them to make government force them to do it. Is this what it means to be LGBT? I think it's fair for people to form opinions about what LGBT people are like, based on the actions of LGBT activists. If LGBT people don't want to be identified with people like this activist, then they need to do a better job of policing their own.

**The Colorado Civil Rights Commission**

Another article from The Federalist talked about the views of the government employees who ruled against Jack in Colorado:

> ADF attorneys found current commissioners publicly agreeing with 2015 comments from commissioner Dianne Rice that compared Jack's Christianity to the ideologies motivating slavery and the Holocaust. Rice's comments were specifically singled out by the Supreme Court as evidence of the commission's bias.
>
> That bias aimed to jettison Jack's constitutional rights to free speech, freedom of association, and free expression of religion, all over a cake that could be had from any number of nearby shops. Yet when the commission discussed the Supreme Court ruling in summer 2018, two commissioners openly supported Rice's comparison of Christianity to Nazism and racism. Here's ADF:

> During that discussion, Commissioner Rita Lewis said, 'I support Commissioner Diann Rice and her comments. I don't think she said anything wrong.' Later, Commissioner Carol Fabrizio added, 'I also very much stand behind Commissioner Rice's statements…. I was actually proud of what she said, and I agree with her…. I'm almost glad that something the Commissioner said ended up public and used, because I think it was the right thing.'

Rita, Diann, and Carol. Three Democrat women bringing the power of the state to bear on a Christian man of principle and moral character. Are you comfortable with that? Do you think that other Christian men should expose themselves legally to rule by progressive women, by getting married, having children, running a business, etc.? It seems to me that men ought to hold onto their money and make a difference without getting involved with people who are motivated by "compassion" like these fascist women. And these women are paid by taxpayer funds – some of them collected from Jack himself.

By the way, the Equality Act, which has been championed by Christian leaders who spent the last four years attacking Trump, makes Colorado's SOGI law a federal law. You might think that you are safe because you are in Oklahoma or Tennessee or Arkansas, but thanks to the efforts of people like John Piper, Russell Moore, Beth Moore, and other fake Christians, you're going to be a potential victim of gay activists if you own a Christian business, or work in a Christian organization. Including schools. Including churches. That's why it's important to choose policy over character in elections.

# Democrat judge who promoted drag queen story hour arrested for child p0rn

**Wintery Knight** · 26 March 2021 · Archived copy · Original

This is a must read story from Katy Faust and Stacy Manning, writing for The Federalist:

> Last week Brett B1omme, 38, a judge with strong ties to top Democrats in Wisconsin, was charged with possessing child p0rnography depicting the sexual abuse of underage boys, including toddlers. According to the criminal complaint, B1omme accessed the child p0rn at both his home and his judge's chamber. Each of the seven counts carries a maximum sentence of 15 years.
>
> B1omme's involvement with kids extended beyond his courtroom. He was also invested in grooming Milwaukee's preschool crowd. While a judge, he was also president and CEO of the Cre4m C1ty Foundat1on, which operates the Milwaukee Dr4g Queen Story Hour for local children.
>
> […]But the most disconcerting access B1omme has had to kids is in his own home, where he and his same-sex partner live with their two adopted children. Were these children placed with these two men because of the mistaken belief that these adults had a "right to adopt," or because it truly was in the best interest of these children?

I should also point out that this man is a child court judge, which means that he makes decisions about how children will live, and who will have responsibility for them.

This story reminds me of the Two Gay Dads story that I wrote about previously, where a white female progressive journalist did a fawning story about two g4y dads and their new boy adopted from Russia. She titled her article, "Two Dads are Better than One". She was so proud of herself for being all affirming, tolerant and compassionate. Children do much better with two gay dads, than with the mother and father who made them, she argued.

But then, the Sydney Morning Herald reported how this example of g4y adoption went awry.

Excerpt:

> Standing before an American court convicted of the most heinous of child sex crimes, the double lives of Australian citizen Mark J. Newt0n and his long-term boyfriend Peter Tru0ng were laid bare.
>
> […]Moments later Newt0n was sentenced to 40 years in prison for sexually abusing the boy he and Truong, 36 from Queensland, had "adopted" after paying a Russian woman $8000 to be their surrogate in 2005.
>
> Police believe the pair had adopted the boy "for the sole purpose of exploitation". The abuse began just days after his birth and over six years the couple travelled the world, offering him up for sex with at least eight men, recording the abuse and uploading the footage to an international syndicate known as the Boy Lovers Network.
>
> […]Evidence before the court revealed the abuse began before the couple returned to Australia. One video is said to show Newt0n performing a sex act on the boy when he was less than two weeks old.
>
> Judge Barker said the pair brainwashed the child to believe the sexual abuse was normal. Newt0n was also said to have trained the boy to deny any inappropriate behaviour if he was ever questioned by authorities.
>
> Newt0n and Truong came to the attention of police in August 2011 after their connections to three men arrested over the possession of child exploitation material came to light. The couple had visited the three men in the US, New Zealand and Germany with their son.
>
> […]Newt0n and Truong claimed they were being targeted because they were homosexual.

I could show you a dozen examples like that without even trying. Duke University administrator. Penn State

University coach. USC professor. Head of a Scottish youth organization. San Francisco Human Rights Commission staffer. Same-sex marriage activists. Seattle mayor. Co-founder of g4y advocacy organizations. Designers of education curriculums designed to sexualize children. It's everywhere and it happens all the time. Children don't have any rights, only selfish adults have rights.

But stories like that don't matter to most people on the secular left. People on the secular left aren't trying to be accountable to some sort of objective moral standard. They aren't working backwards from children's needs to decide on obligations to place on adults. They're looking around at who is wealthy, powerful, attractive, popular, etc. and trying to agree with them so those people will like them. People today just want to feel good and be liked. It would just be too hard for most people to tell Brett B1omme that what he was doing was morally wrong. That would make them unpopular, and being unpopular is "wrong" because it makes them feel bad.

# What's in an apologetics book?

**Wintery Knight** · 27 March 2021 · Archived copy · Original

Let's look at the table of contents of my favorite introduction to Christian apologetics, which is "Is God Just a Human Invention?" written by Sean McDowell and Jonathan Morrow.

In that book, you will find 18 topics.

1. Is Faith Irrational? (Commentary by: Gregory Koukl)
2. Are Science and Christianity at Odds? (Commentary by: John Warwick Montgomery)
3. Are Miracles Possible? (Commentary by: Gary R. Habermas)
4. Is Darwinian Evolution the Only Game in Town? (Commentary by: William A. Dembski)
5. How Did the Universe Begin? (Commentary by: R. Douglas Geivett)
6. How Did Life Begin? (Commentary by: Fazale R. Rana)
7. Why Is the Universe Just Right for Life? (Commentary by: Jay W. Richards)
8. Has Science Shown There Is No Soul? (Commentary by: Dale Fincher and Jonalyn Fincher)
9. Is God Just a Human Invention? (Commentary by: Garry DeWeese)
10. Is Religion Dangerous? (Commentary by: Douglas Groothuis)
11. Does God Intend for Us to Keep Slaves? (Commentary by: Paul Copan)
12. Is Hell a Divine Torture Chamber? (Commentary by: Frank Turek)
13. Is God a Genocidal Bully? (Commentary by: Clay Jones)
14. Is Christianity the Cause of Dangerous Sexual Repression? (Commentary by: Kerby Anderson)
15. Can People Be Good Without God? (Commentary by: Mark D. Linville)
16. Is Evil Only a Problem for Christians? (Commentary by: Randy Alcorn)
17. What Good Is Christianity? (Commentary by: Glenn S. Sunshine)
18. Why Jesus Instead of the Flying Spaghetti Monster? (Commentary by: Darrell L. Bock)

Prominent atheist scholars are quoted in each chapter to introduce the challenges, and then scholarly arguments and evidence are presented to defend the Christian worldview. The language is simple enough, but the material is solid enough to use in a real debate. I would say that introductory books like this one are more than enough to equip you for everyone who will challenge you.

Why are these 18 topics important? Because these are the questions that atheists ask. These are the questions that cause Christians to leave the faith. These are the questions that your children will face in high school and college, which might cause them to leave the faith.

Let's start with chapter one. One of the most prominent arguments by atheists is that faith is irrational. This chapter allows you to define faith using the Bible's definition of faith, which relies on logic and evidence.

Atheists also say that Christianity is at war with science. In chapter 2, they discuss the history of science and how Christianity provided the framework that allowed scientific method to take root and flourish.

Atheists like to claim that miracles are impossible. Chapter 3 defends the view that God, if he exists, is capable of interacting with his created world.

Atheists love to put forward Darwinism as means to deny that God is the designer of life. Chapter 4 explains the concept of intelligent design, and why intelligent design is a better explanation for the history of life.

Atheists love to talk about how the universe has always existed, and there's no need for a Creator. Chapter 5 contains a philosophical argument that is supported by mainstream science to argue that the universe had a

beginning, just like the Bible says.

Atheists love to argue that life can emerge from non-life, and the process is simple. Chapter 6 is written by a biochemist, and it takes a look at the real complexity of the simplest living cell.

Atheists like to argue that the universe itself is just an accident, and there is no need for a Designer. Chapter 7 introduces the scientific evidence for fine-tuning and habitability.

Atheists like to say that there is no soul and no afterlife. Chapter 8 gives some arguments for the existence of the soul.

Atheists like to argue that Christians invent God because God makes them feel good. But chapter 9 explains that having an all-powerful God who can hold humans accountable is the last thing any human would want to invent.

Atheists like to talk about how religion, with it's habit of teaching to believe in things that can't be tested, causes religious people to do a lot of harm. Chapter 10 takes a look at the real record of Christianity as a force for good in the world.

Atheists like to talk about slavery in the Bible. Chapter 11 talks about what the Bible really says, and provides some rational responses to the accusation.

Atheists like to talk about eternal punishment in Hell isn't a just punishment for just getting a few questions wrong on a theology exam. Chapter 12 provides an explanation and defense of the concept of Hell.

Atheists love to talk about how God commanded the Israelites to attack their enemies in the Bible. Chapter 13 explains who their enemies really were, and what was really happening in those wars.

Atheists feel that unrestricted sexual activity is very healthy and normal, and that the Biblical prohibitions outside of male-female marriage are repressive and unhealthy.  Chapter 14 explains why God has these rules in place, and supports his rules with evidence.

Atheists love to assert that they don't need God, because they can behave morally on their own. Chapter 15 explains how to answer this claim by talking about how well atheism grounds objective moral values, objective moral duties, free will and moral accountability: the minimum requirements for objective morality.

Atheists think that the mere existence of natural disasters and human immorality are incompatible with the God of the Bible. Chapter 16 explains why this argument doesn't work, and why even the concept of evil requires God to exist.

I have an atheist friend in my office who can't defeat my scientific arguments for the origin of the universe, the fine-tuning and the origin of life. But still, he says to me, even if God exists, why would that matter to my life? Chapter 17 explains what difference Christianity makes in a person's life.

Atheists think that the life of Jesus has no relevance to their life, and that he has nothing to offer them anyway. Chapter 18 explains the uniqueness of Jesus and explains why his resurrection is relevant to our lives today.

It's important to understand that this book is not on the level of A. W. Tozer, G.K. Chesterton, Francis Chan, John Piper, etc. Those authors write for a Christian audience and therefore they do not equip you to answer realistic challenges from non-Christians. But the apologetics book we looked at actually equips you to answer challenges from non-Christians using logical arguments and evidence from mainstream history and science. You can use the material in that book in discussions outside the confines of your home and your church.

# William Lane Craig debates Alex Rosenberg: Does God Exist? Video, audio and summary

**Wintery Knight** · 28 March 2021 · Archived copy · Original

Here is the video of the debate:

Here is my summary of the Craig-Rosenberg debate, which occurred on February 1st, 2013 at Purdue University.

**The debaters**

- William Lane Craig
- Alex Rosenberg

Below is the summary.

**Dr. Craig's opening speech:**

The topic: What are the arguments that make belief in God reasonable or unreasonable?
First speech: arguments for reasonableness of belief in God
Second speech: respond to arguments against reasonableness of belief in God

Eight arguments:

1. Contingency argument: God – a transcendent, personal being – is the explanation of why a contingent universe exists.
2. Cosmological argument: God is the cause of the beginning of the universe, which is attested by physics and cosmology.
3. Applicability of mathematics to nature: God is the best explanation for the applicability of mathematics to nature.
4. Fine-tuning argument: God is the best explanation of the fine-tuning of the universe to permit life.
5. Intentionality of conscious states: God is the best explanation of the intentionality of our mental states.
6. The moral argument: God is the best explanation for the existence of objective moral values and duties.
7. The resurrection of Jesus: God is the best explanation for the core of historical facts accepted by most ancient historians across the ideological spectrum.
8. Religious experience: God is the best explanation of our immediate experience and knowledge of his existence.

**Dr. Rosenberg's opening speech**

First argument: The fallacy of ad hominem

- I don't know whether to laugh or to cry
- Dr. Craig has said all of that before in other debates
- You didn't need to come out on this cold night
- Craig's arguments have all been refuted
- Dr. Craig just doesn't listen
- Dr. Craig is not interested in getting at the truth
- Dr. Craig is just interested in scoring debate points
- The adversarial system is the wrong approach to decide truth
- Dr. Craig is very confident about his take of physics

Second argument: The fallacy of arguing from authority

- 95% of members of the NAS are atheists
- Therefore Dr. Craig cannot use science

Third argument: Effects don't require causes

- I am going to pretend that Craig said that "every effect requires a cause"
- Quantum mechanics shows that some effects occur without causes
- A particle of uranium (which is not nothing, it is something) decays without a cause
- This uncaused effect is the same as the universe coming into being out of nothing uncaused
- Therefore the principle of sufficient reason is false

Fourth argument: Silicon-based life and the multiverse

- If these constants had been different, maybe we would have other kinds of intelligent life, like silicon-based life
- Carbon-based life is not the only kind of life, maybe you can have other kinds of life, none of which have been observed
- There could be different kinds of life in other areas of the universe that we can't see
- There are things we can't see that disprove the current physics that we can see
- Quantum foam is evidence that a multiverse exists
- The multiverse would solve the problem of fine-tuning

Fifth argument: The Euthyphro dilemma

- The moral argument is refuted by Euthyphro dilemma
- Dr. Craig is such a moron that he has never heard of the Euthyphro dilemma ever before
- This is found in the first and simplest of Plato's dialogs
- Why is Dr. Craig so stupid that he has not read this simple dialog ever before?
- Evolution explains why humans evolve arbitrary customs and conventions that vary by time and place
- Alternative moral theories: utilitarianism, social contract, etc. that don't require God

Sixth argument: Mormonism undermines Dr. Craig's three minimal facts about Jesus

- Why is Dr. Craig so stupid and ignorant to persist in pushing such an ignorant, stupid argument?
- Mormonism is a silly religion that is not historically well founded
- Therefore, Jesus was not buried
- Islam is a silly religion that is not historically grounded
- Therefore, the tomb was not found empty
- Scientology is a silly religion that is not historically grounded
- Therefore, the eyewitnesses didn't have post-mortem appearances
- Eyewitness testimony is unreliable in some cases
- Therefore, eyewitness testimony was unreliable in this case
- Apparitions of Mary are bizarre
- Therefore, the majority of historians are wrong to think that the disciples saw post-mortem appearances

Seventh argument: Deductive problem of evil

- Evil and suffering are logically incompatible with an all good, all powerful God

Eight argument: God is not just to allow evil and suffering

- God cannot make the evils of this life right in the afterlife

**Dr. Craig's first rebuttal**

Dr. Rosenberg sketched the deductive argument from evil.

Dr. Rosenberg presupposes naturalism. Naturalism is a false theory of knowledge:

1. It's too restrictive: There are truths that cannot be proved by natural science.
2. It's self-refuting: no scientific proof for naturalism exists.

That's why epistemological naturalism is considered false by most philosophers of science.

But more importantly than that: Epistemological naturalism does not imply metaphysical naturalism. (E.g. – W. Quine)

Dr. Rosenberg has to present arguments in favor of (metaphysical) naturalism, not just assume that (metaphysical) naturalism is true.

Dr. Craig presented eight arguments against metaphysical naturalism taken from Rosenberg's own book:

1. The argument from the intentionality (aboutness) of mental states implies non-physical minds (dualism), which is incompatible with naturalism
2. The existence of meaning in language is incompatible with naturalism, Rosenberg even says that all the sentences in his own book are meaningless
3. The existence of truth is incompatible with naturalism
4. The argument from moral praise and blame is incompatible with naturalism
5. Libertarian freedom (free will) is incompatible with naturalism
6. Purpose is incompatible with naturalism
7. The enduring concept of self is incompatible with naturalism
8. The experience of first-person subjectivity ("I") is incompatible with naturalism

Metaphysical naturalism is false: it is irrational and it contradicts our experience of ourselves.

And epistemological naturalism is compatible with theism.

Rebutting Dr. Rosenberg's responses:

1. Contingency: no response

2. Cosmological: he mis-states the first premise to say every effect… when it is whatever begins to exist…, the origin of the universe was not from a vacuum, virtual particles come from a vacuum not nothing, there are interpretations of QM that are compatible with determinism. Rosenberg has to believe that the entire universe popped into being from non-being.

3. Mathematics: no response

4. Fine-tuning: the multiverse is refuted by empirical observations of the universe. Without fine-tuning, it's not that we still have silicon to make life out of. It's that we lose basic minimal things like chemical diversity, matter, stars, planets, etc. No life of any kind, not just no carbon-based life.

5. Intentionality: no response.

6. Moral argument: the answer to the dilemma is that you split the dilemma: God is the standard of good, and the commands flow from his unchanging moral nature. The commands are not arbitrary, and the standard is not external to God. Dr. Rosenberg is a nihilist and he cannot ground good and evil on his nihilistic view.

7. Resurrection: The Gospels are early eyewitness testimony. Mormonism and Islam have nothing to do with the minimal set of historical facts about Jesus agreed to by the majority of ancient historians across the ideological

spectrum, general statements against eyewitnesses do not refute the specific eyewitness testimony in this case.

8. Religious experience: No response.

**Dr. Rosenberg's first rebuttal**

I wrote a book and you should buy it, because it got me invited to this debate. Let me repeat the title a few times for you. Please buy it.

Dr. Craig is right, there are multiple interpretations of QM, not just the one I presented, including deterministic ones.

All the disturbing implications of naturalism that Dr. Craig stated follow from metaphysical naturalism, and metaphysical naturalism is true. (Note: he equates science with metaphysical naturalism)

Science proves that metaphysical naturalism is true, but I won't say what specific scientific tests prove my philosophical assumption of metaphysical naturalism.

I'll pretend that the Big Bang (science) doesn't disprove naturalism, like Dr. Craig said. Again. (covers ears) La la la, there is no Big Bang.

We didn't come here to debate epistemological naturalism and metaphysical naturalism.

Let me explain the problem of intentionality since I'm so smart and no one knows what it means.

There are many answers to this problem of intentionality.

My answer is that most scientists are naturalists, therefore naturalism is true, regardless of the argument from intentionality of mental states.

That's how I would respond to one of the eight problems with naturalism that Dr. Craig raised. I won't answer the other seven problems.

It is an argument from ignorance to argue that the applicability of mathematics to the universe requires a designer, because there are non-Euclidean geometries. Craig's argument, which he gets from people like respected physicists like Eugene Wigner, is bizarre. It is bizarre, therefore I refute Eugene Wigner and all the other scholars who make that argument. It is bizarre! Bizarre!

Deductive problem of evil: there is no response to this argument, certainly not Alvin Plantinga's free will defense. The deductive argument from evil has not been entirely abandoned at all! It's not like arch-atheist J.L. Mackie himself admits that the deductive problem of evil doesn't lead to a logical inconsistency between evil and God.

Dr. Craig has to tell me why God allows evil or God doesn't exist.

It is offensive that Dr. Craig cannot tell me why God allows every evil and suffering that occurs.

He literally said this: "I will become a Christian if Dr. Craig can tell me why God allowed EVERY EVIL THAT OCCURRED IN THE LAST 3.5 BILLION YEARS"

**Dr. Craig's second rebuttal**

We are not in a position to know why God allows specific instances of evil and suffering.

God cannot force people to freely do anything – freedom is not compatible with determinism. Freedom is a good, but freedom opens up the possibility of moral evil. You cannot have the good of free will without allowing people to choose to do morally evil things.

God can permit evil and suffering in order to bring more people into a relationship with him.

The atheist has to show that God could allow less evil and achieve more knowledge of God in order to say there is too much evil.

The purpose of life is not happiness, but knowledge of God.

Dr. Craig quotes agnostic Paul Draper (Purdue) and Peter Van Inwagen (Notre Dame) to state that the deductive problem of evil is dead because of free will and morally sufficient reasons for permitting evil.

1. Contingency: no response.

2. Cosmological: QM does not apply, because the universe came from nothing, not a vacuum, and QM only works in a vacuum.

3. Mathematics: He mentions alternatives like non-Euclidean geometry, but we have to explain the structure of THIS universe.

4. Fine-tuning: ???

5. Intentional states: intentional mental states proves that minds exist, which fits with theism better than it fits with atheism.

6. Moral argument: You need God to ground morality, and Dr. Rosenberg believes in morality. He needs God to ground objective moral values and duties.

7. Historical argument: He has to respond to the minimal facts supported by the consensus of ancient historians across the ideological spectrum.

8. The problems of naturalism: He says that you can't have science without naturalism, but you can have science with EPISTEMOLOGICAL NATURALISM, and theists accept science and methodological naturalism. We don't accept METAPHYSCIAL NATURALISM because of the eight problems Craig presented, like intentionality, first-person, persistence of self, etc. You can believe in both science and theism, by embracing epistemological naturalism, while rejecting methaphysical naturalism.

**Dr. Rosenberg's second rebuttal**

Dr. Craig hasn't answered many of my points, I won't say which ones though.

Debates don't work as a way of deciding what's true, so we should overturn the entire criminal justice system.

The principle of sufficient reason is false because it is disconfirmed by quantum mechanics. And quantum mechanics (vacuum and virtual particles that exist for a short time) is similar to the origin of the universe (nothing and entire universe and 14 billion years).

We know that alpha particles come into being without cause all the time from a quantum vacuum for a tiny sub-second duration before going out of existence, so we can say that the entire physical universe came into being for 14 billion years from absolute nothing which is not a quantum vacuum.

Peter Van Inwagen is the best metaphysician working today, and he says that my deductive argument from evil is not decisive, it's not a successful argument. (Why is he undermining his own problem of evil argument????!)

Dr. Craig invoked Plantinga's free will defense to the deductive POE. Freedom allows us to do evil. God could have given us free will without evil and suffering. I won't show how, but I'll just assert it, because debates are such a bad forum for supplying evidence for my speculative assertions.

If you answer the question 3 + 5 as being 8, then you don't have free will – you are biologically determined if you answer 8, because everyone answers 8, and that means everyone is biologically determined with no free will.

Why can't God give us free will and then prevent us from making a free choice?

No scholars date the gospels earlier than 60-70 AD, especially not atheists like James Crossley who dates Mark to 40 AD. Therefore Jesus' burial isn't historical, like the majority of scholars across the broad spectrum of scholarship agree it is.

The original New Testament documents were written in Aramaic.

All New Testament scholars are orthodox Christians, like atheist Robert Funk for example.

**Dr. Craig's concluding speech**

In order to sustain the deductive argument from evil, Dr. Rosenberg must show that God could create a world of free creatures with less evil.

Principle of Sufficient Reason: not using the general principle of sufficient reason, but a more modest version of this states that contingent things should have an explanation for their existence. And we know that the universe is a contingent.

The New Testament was not written in Aramaic, they were written in Greek. Dr. Rosenberg is wrong there too.

(Dr. Craig spends the rest of his concluding speech giving his testimony and urging people to investigate the New testament).

**Dr. Rosenberg's concluding speech**

Some long-dead French guy named Laplace said that he has no need of that (God) hypothesis. He did not know about any of Dr. Craig's arguments made in this debate tonight when he said that, though.

There is no need to explain how the universe began or how the universe is finely-tuned if you just assume metaphysical naturalism on faith.

The Easter Bunny, therefore atheism.

Most scientists are atheists, therefore atheism.

You can do a lot of science without God, just don't look at the origin of the universe, the fine-tuning of the universe, or the other parts of science that Craig mentioned, as well as the origin of life, the Cambrian explosion, the habitability argument, and so on.

You can be a Christian, but good Christians should not use arguments and evidence.

Good Christians should be irrational and ignorant. Bad Christians look for arguments and evidence from science and history.

Good Christians should embrace the absurd. Bad Christians want to search for truth and use logic and evidence.

# Last day to pre-order Dr. Stephen C. Meyer's new book "Return of the God Hypothesis"

**Wintery Knight** · 29 March 2021 · Archived copy · Original

In my opinion, the two best books on intelligent design ever written are "Signature in the Cell" and "Darwin's Doubt". The former is about biological information and the origin of Life. The latter is about the sudden origin of body plans and organ types during a brief period of biological history known as the Cambrian explosion. Either problem is lethal to a naturalistic view of biological origins. The author of these two books has just published the third book in the trilogy, and it looks like it will be the best one yet. You can pre-order it here, and get a bunch of extra goodies, including a PDF booklet that I assume you can share with people who don't buy the book. Anyway, let's see what the new book is about.

You can read chapter 1 here for free at Crosswalk.

Excerpt:

> This book will show that reports of God's decease have "been grossly exaggerated," to appropriate a quote from Mark Twain. Instead, the truth is just the opposite of what Dawkins… and numerous other popular spokespersons for science have insisted. The properties of the universe and of life—specifically as they pertain to understanding the origin of the universe and life—are just "what we should expect" if a transcendent and purposive intelligence has acted in the history of life and the cosmos. Such an intelligence coincides with what human beings have called God, and so I call this story of reversal the return of the God hypothesis.

They've posted a whole bunch of endorsements here, and here's are a few, to let you know what people think of it:

Meyer's book is a masterclass, lucidly exploring every alternative from multiple points of view. It persuasively shows that the God Hypothesis is the best explanation of the fine-tuned, information-laden universe. The book does irreparable damage to atheist rhetoric.

***JOHN C. WALTON**, PHD, DSC, FELLOW OF THE ROYAL SOCIETY OF EDINBURGH, RESEARCH PROFESSOR OF CHEMISTRY, UNIVERSITY OF ST. ANDREWS*

Reviewing all relevant evidence from cosmology to molecular biology, Meyer builds an irrefutable "case for God" while delivering an unanswerable set of logical and scientific broadsides against the currently fashionable materialistic/atheistic worldview. Meyer builds his argument relentlessly omitting no significant area of debate. The logic throughout is compelling and the book almost impossible to put down. Meyer is a master at clarifying complex issues making the text accessible to the widest possible audience. Readers will be struck by Meyer's extraordinary depth of knowledge in every relevant area. The book is a masterpiece and will be widely cited in years to come. The best, most lucid, comprehensive defense of the 'God hypothesis' in print. No other publication comes close. A unique *tour de force*.

***DR. MICHAEL DENTON**, FORMER SENIOR RESEARCH FELLOW, BIOCHEMISTRY, UNIVERSITY OF OTAGO, AUTHOR, NATURE'S DESTINY*

Meyer not only meticulously documents his scientific case for the God hypothesis, but he presents the story of the discoveries that support it in an engaging way. The arguments Meyer makes helped fuel my own personal transition from atheistic materialism to a rational belief in classical theism.

***GÜNTER BECHLY**, PH.D. IN PALEONTOLOGY, EBERHARD-KARLS UNIVERSITY OF TÜBINGEN; FORMER SCIENTIFIC CURATOR, STATE MUSEUM OF NATURAL HISTORY, STUTTGART, GERMANY; SENIOR SCIENTIST, BIOLOGIC INSTITUTE.*

Not since Robert Jastrow's *God and the Astronomers*, has a book touched me with the power of science to declare

the glories of God. Jastrow kept me from the deism and atheism of college physics, and this book will surely have that same effect on the next generation. Whereas Jastrow left off too soon, Meyer skillfully follows the evidence to its logical and scientific conclusion, by examining recent developments not only in physics and cosmology, but also in biology. Warmly written with a historian's eye, illustrated profusely, a perfect graduation gift for all those embarking on a lifetime of discovery.

***ROB SHELDON**, PH.D. IN SPACE PLASMA PHYSICS, UNIVERSITY OF MARYLAND; FORMER NASA ANALYST AND INSTRUMENT DESIGNER, AUTHOR, THE LONG ASCENT*

And this one from a Nobel Laureate in Physics:

This book makes it clear that far from being an unscientific claim, intelligent design is valid science.

***BRIAN JOSEPHSON**, EMERITUS PROFESSOR OF PHYSICS, UNIVERSITY OF CAMBRIDGE, FELLOW OF THE ROYAL SOCIETY, NOBEL LAUREATE IN PHYSICS*

This is the video that accompanies the launch of the book:

I've already pre-ordered the book for myself and my Bible study partner. She is as excited to read it as I am.

There's a short 22-minute video show that Dr. Meyer did with radio show host Michael Medved here, with show notes, if you want to see how he explains some of the concepts in the book.

In my opinion, no one has done a better job of writing books that equip Christians to make their case with evidence than Dr. Stephen C. Meyer. By the way, Dr. Meyer is the one who does the presentations for Focus on the Family's DVD series "True U", which is designed to equip students going to college. So, if you're wondering if he knows how to explain things to ordinary people, he absolutely does.

There is a lot of "noise" in the Christian community from authors who do not equip you to win arguments. Think of popular authors like G. K. Chesterton, A. W. Tozer, Francis Chan, Philip Yancey, John Piper and other wordsmiths. They write entertaining words, but you can't win arguments by reciting poetry or having happy feelings. I'm an engineer, I want things that work in the real world. Most Christian authors aren't experienced at debating skeptics, or at replying to the challenges of their critics. Dr. Meyer is rooted in evidence and does an excellent job of interacting with his critics, and responding to them. I've even featured some of his debates on this blog. Dr. Meyer is my favorite author for equipping myself to win arguments. If you like to argue, and you like to win, get the book. You can have a lot of fun with a book like this.

# Christian Post article features mothers explaining their sons transitioning

**Wintery Knight** · 31 March 2021 · Archived copy · Original

I wanted everyone to see this Christian Post article, that describes what it is like for mothers who trusted the school system to find out the hard way what schools are really like. Schools are dominated by women teachers and administrators. Their creed is "compassion" and "tolerance". How does that work out for boys? Let's get the stories straight from the mouths of nine mothers.

Here's one example:

> Approximately three years ago, Danae Johnson started to notice that her then-14-year-old son, Jeremy, a freshman in high school at the time, had some troubling text messages and pictures on his phone of kids who were dressed as the opposite sex.
>
> At a mother-son dinner, he announced that he was transgender.
>
> […]Jeremy was a smaller kid, bullied ever since middle school, sometimes coming home with scrapes down his arms, his mother said. He consistently makes good grades, is in all honors classes and makes the honor roll. But being transgender meant he got to go from being bullied and struggling to popular. Female schoolmates have been particularly encouraging him in this new identity.

There was an attempt at suicide:

> Johnson took him to the hospital immediately to get him evaluated. On the way there, Jeremy tried to make it seem like he was kidding. They spent several hours at the hospital where he was examined by four professionals, all of whom told Johnson that he was doing this for attention and that he was not genuinely suicidal.

And:

> Johnson is "100% convinced" the bullying drove him into the gender identity madness. They removed him from that school and put him in a local Catholic school where the bullying ceased. Yet despite the improved environment, the trans identity continued to bring him attention, so he maintained it.

So what to make of this? Well, I really am glad to see the wife siding with her husband against the child's peer-driven behavior. Today there is an *epidemic* of mothers bending over backwards to agree with their children. Instead of parenting them, they just affirm them and completely abdicate their role as parents. They want to be liked. This woman did not want to be liked.

Second point is that this story clearly shows how peer pressure plays a role in causing children to go down the transgender path. And the teachers and administrators have a secular left agenda, and that agenda is more important than your child.

A study that was first reported by Science Daily talked about the role of peer pressure. This article at The Federalist had a few examples to illustrate the conclusion of the study. I'll pick two.

> The study includes other eye-opening information, such as case studies of several children's stories.

> - "A 14-year-old natal female and three of her natal female friends were taking group lessons together with a very popular coach. The coach came out as transgender, and, within one year, all four students announced

> they were also transgender."

> - "A 14-year-old natal female and three of her natal female friends are part of a larger friend group that spends much of their time talking about gender and sexuality. The three natal female friends all announced they were trans boys and chose similar masculine names. After spending time with these three friends, the 14-year-old natal female announced that she was also a trans boy."

And surprise! Giving gay rights groups access to schools makes the problem worse:

> The study also may indicate that school "anti-bullying" programs typically created by LGBT activist organizations such as the Human Rights Campaign may help accelerate children identifying as transgender by pushing peers and authority figures to profusely express their support.

Coming out as transgender means instant fame and popularity, because you're a victim, and everyone has to be nice to you… or else:

> "Great increase in popularity among the student body at large. Being trans is a gold star in the eyes of other teens," wrote one parent on the study response form. Another wrote, "not so much 'popularity' increasing as 'status' … also she became untouchable in terms of bullying in school as teachers who ignored homophobic bullying …are now all at pains to be hot on the heels of any trans bullying."

I really think parents need to think twice before throwing their children into public schools and unmonitored social media.

The second mother from the CP article was even more interesting. She's a far-left supporter of Planned Parenthood, NPR listener and Bill Maher watcher. She only has one child – I think she delayed having children to focus on her career.

Here's what she said:

> "Children are being groomed online by adults," she said when asked what the public at large misunderstands about the transgender movement.
>
> […]"They are confusing kids. They're ruining families. You thought you could have a child and make a difference," she said. "It's like they're taking away the core of a family. And I look at everyone who is having a child, and I'm like, 'Don't do it,' because you have no control over your child. Parental rights have been taken away. The schools are complicit in pushing this agenda."
>
> She recalled reading about Communist Chinese Chairman Mao Zedong's rulership and how under his reign, children were instructed to turn on their parents and rupture the family structure.
>
> "I feel like that's what's happening. It used to be a world where the parents had control. But it's all taken away from us because our kid can complain to the school, and social services would be called because we're not affirming them in this lie. We could lose custody. That's a really scary, scary world we're in."

It's a scary world that people on the secular left made.

Some people freak out when I say to be careful about getting married to someone who isn't aware of these threats, and to especially NOT have children with a progressive spouse. But do you think the same thing after hearing from these mothers?

# New study: white police officers not more likely to shoot black suspects

**Wintery Knight** · 1 April 2021 · Archived copy · Original

Whenever people disagree about controversial things, the best way to proceed is to look at what the evidence says. In this case, we've got a new PNAS study authored by professors at several different universities which concludes that white officers are not more likely to shoot black civilians than black or Hispanic police officers.

Heather McDonald writes about it in the centrist National Review:

> A new study published in the *Proceedings of the National Academy of Sciences* demolishes the Democratic narrative regarding race and police shootings, which holds that white officers are engaged in an epidemic of racially biased shootings of black men. It turns out that white officers are no more likely than black or Hispanic officers to shoot black civilians. It is a racial group's rate of violent crime that determines police shootings, not the race of the officer. The more frequently officers encounter violent suspects from any given racial group, the greater the chance that members of that racial group will be shot by a police officer. In fact, if there is a bias in police shootings after crime rates are taken into account, it is against white civilians, the study found.
>
> The authors, faculty at Michigan State University and the University of Maryland at College Park, created a database of 917 officer-involved fatal shootings in 2015 from more than 650 police departments. Fifty-five percent of the victims were white, 27 percent were black, and 19 percent were Hispanic. Between 90 and 95 percent of the civilians shot by officers in 2015 were attacking police or other citizens; 90 percent were armed with a weapon. So-called threat-misperception shootings, in which an officer shoots an unarmed civilian after mistaking a cellphone, say, for a gun, were rare.

This study builds on previous work, which also showed that white police officers were not more biased than other officers to shoot black civilians.

McDonald notes that progressive policy of hiring more minority police officers won't reduce the rates of shootings of minority civilians, since all races fire their weapons at minority civilians at roughly the same rate.

The real problem with outrage at white police officers is that it doesn't address the problem of black-on-black crime, which is a FAR greater threat to black victims of crime.

A recent editorial by George Mason University professor of economics Walter Williams explains:

> Each year, roughly 7,000 blacks are murdered. Ninety-four percent of the time, the murderer is another black person.
>
> According to the Bureau of Justice Statistics, between 1976 and 2011, there were 279,384 black murder victims. Using the 94-percent figure means that 262,621 were murdered by other blacks.
>
> Though blacks are 13 percent of the nation's population, they account for more than 50 percent of homicide victims. Nationally, the black homicide victimization rate is six times that of whites, and in some cities, it's 22 times that of whites.
>
> Coupled with being most of the nation's homicide victims, blacks are most of the victims of violent personal crimes, such as assault and robbery.
>
> […]It's a tragic commentary to be able to say that young black males have a greater chance of reaching maturity on the battlefields of Iraq and Afghanistan than on the streets of Philadelphia, Chicago, Detroit, Oakland, Newark and other cities.

And all those cities are run by Democrats. And they have been run by Democrats for decades. Democrat policies

don't work to solve the problem how making cities safer for blacks.

The real root cause behind crime is, of course, fatherlessness, as this interview about fatherless boys in the Daily Signal with Warren Farrell makes clear:

> They're far more likely to be the mass shooters. About 90% of the mass shooters that I studied since Columbine have been boys brought up in homes that have minimal or no father involvement or products of divorce or so on. And so that really shocked me to see that common denominator.
>
> I then looked beyond that and went to ISIS recruits. There was a big study of ISIS recruits that found that the common denominator among ISIS recruits was dad deprivation, but not only among the boys, but also the female ISIS recruits as well, which, of course, are in much smaller numbers.
>
> Then I started looking at prisoners and the prison population. We all know that 93% of the prisoners are male, but what very few people know is that about 90% of those 93% are dad-deprived boys.

Kay Cole James, the president of the Heritage Foundation (my favorite think tank), wrote about some of her ideas on how to solve the problem for Fox News.

She writes:

> First, we must ensure that we're encouraging families to stay together and that fathers and mothers raise their children together. Decades of studies have shown that children raised in single-parent homes are statistically more likely to abuse drugs and alcohol, exhibit poor social behaviors, and commit violent crimes. They're also more likely to drop out of school, which often leaves them struggling to find good-paying jobs as adults.
>
> We could go a long way toward strengthening inner-city families by changing the system of government assistance that routinely weakens them.
>
> A child of welfare, I can tell you that an overreliance on government assistance has deprived millions of children of the love and security they would have gotten from a family with two parents.

In the rest of the article, she explains how she was able to put that into practice, and what results she obtained by doing it.

Welfare "frees" women to try to start relationships with men who demonstrate no ability or willingness to commit. She doesn't have to care about whether he is chaste, sober, drug-free, loyal, educated, a hard worker, etc. because the government is taking over the role of provider. The side effect of this is the high inner-city crime rates that we observe in cities that reward women for making fatherless children with men they never vetted for commitment ability.

# 1 Corinthians 15: the earliest source for the basic facts about the life of Jesus

**Wintery Knight** · 2 April 2021 · Archived copy · Original

First, the creed – which is found in 1 Corinthians 15:3-8:

[3]For what I received I passed on to you as of first importance: that Christ died for our sins according to the Scriptures,

[4]that he was buried, that he was raised on the third day according to the Scriptures,

[5]and that he appeared to Peter, and then to the Twelve.

[6]After that, he appeared to more than five hundred of the brothers at the same time, most of whom are still living, though some have fallen asleep.

[7]Then he appeared to James, then to all the apostles,

[8]and last of all he appeared to me also, as to one abnormally born.

Almost all historians accept this creed as dating back to within 5 years of the death of Jesus. But why?

Here's a great article from Eric Chabot, director of Ratio Christi Apologetics Alliance, The Ohio State University to explain why.

Excerpt:

> The late Orthodox Jewish scholar Pinchas Lapide was so impressed by the creed of 1 Cor. 15, that he concluded that this "formula of faith may be considered as a statement of eyewitnesses." (5)
>
> Paul's usage of the rabbinic terminology "passed on" and "received" is seen in the creed of 1 Cor. 15:3-8:
>
> "For what I received I passed on to you as of first importance: that Christ died for our sins according to the Scriptures, that he was buried, that he was raised on the third day according to the Scriptures, and that he appeared to Peter, and then to the Twelve. After that, he appeared to more than five hundred of the brothers at the same time, most of whom are still living, though some have fallen asleep. Then he appeared to James, then to all the apostles, and last of all he appeared to me also, as to one abnormally born."
>
> […]While the word "received" (a rabbinical term) can also be used in the New Testament of receiving a message or body of instruction or doctrine (1 Cor.11:23; 15:1, 3; Gal. 1:9, 12 [2x], Col 2:6; 1 Thess 2:13; 4:1; 2 Thess 3:6), it also means means "to receive from another." This entails that Paul received this information from someone else at an even earlier date. 1 Corinthians is dated 50-55 A.D. Since Jesus was crucified in 30-33 A.D. the letter is only 20-25 years after the death of Jesus. But the actual creed here in 1 Cor. 15 was received by Paul much earlier than 55 A.D.
>
> […]Even the co-founder Jesus Seminar member John Dominic Crossan, writes:
>
> "Paul wrote to the Corinthians from Ephesus in the early 50s C.E. But he says in 1 Corinthians 15:3 that "I handed on to you as of first importance which I in turn received." The most likely source and time for his reception of that tradition would have been Jerusalem in the early 30s when, according to Galatians 1:18, he "went up to Jerusalem to visit Cephas [Peter] and stayed with him fifteen days" (11).
>
> This comment by Crossan makes sense because within the creed Paul calls Peter by his Aramic name, Cephas. Hence, if this tradition originated in the Aramaic language, the two locations that people spoke Aramaic were Galilee and Judea. (12) The Greek term "historeo" is translated as "to visit" or "to interview." (13) Hence, Paul's purpose of the trip was probably designed to affirm the resurrection story with Peter who had been an actual eyewitness to the resurrected Christ (1 Cor. 15:5).

I know what you're thinking. You're thinking "Hey WK, isn't John Dominic Crossan that wacky liberal atheist who is on the far-left fringe of historical Jesus scholarship? So wacky, that he actually thought that Secret Gospel of Mark was *real*, instead of just being a hoax?" Yes, that's the nutty John Dominic Crossan I mean. The very one.

Here's a bit more about this early creed from Gary Habermas.

Quote:

> Paul is clear that this material was not his own but that he had passed on to others what he had received earlier, as the center of his message (15:3). There are many textual indications that the material pre-dates Paul. Most directly, the apostle employs paredoka and parelabon, the equivalent Greek terms for delivering and receiving rabbinic tradition (cf. 1 Cor. 11:23). Indirect indications of a traditional text(s) include the sentence structure and verbal parallelism, diction, and the triple sequence of kai hoti Further, several non-Pauline words, the proper names of Cephas (cf. Lk. 24:34) and James, and the possibility of an Aramaic original are all significant. Fuller attests to the unanimity of scholarship here: "It is almost universally agreed today that Paul is here citing tradition."[4] Critical scholars agree that Paul received the material well before this book was written.[5]
>
> The most popular view is that Paul received this material during his trip to Jerusalem just three years after his conversion, to visit Peter and James, the brother of Jesus (Gal. 1:18-19), both of whose names appear in the appearance list (1 Cor. 15:5; 7). An important hint here is Paul's use of the verb historesai (1:18), a term that indicates the investigation of a topic.[6] The immediate context both before and after reveals this subject matter: Paul was inquiring concerning the nature of the Gospel proclamation (Gal. 1:11-2:10), of which Jesus' resurrection was the center (1 Cor. 15:3-4, 14, 17; Gal. 1:11, 16).
>
> Critical scholars generally agree that this pre-Pauline creed(s) may be the earliest in the New Testament. Ulrich Wilckens asserts that it "indubitably goes back to the oldest phase of all in the history of primitive Christianity."[7] Joachim Jeremias agrees that it is, "the earliest tradition of all."[8] Perhaps a bit too optimistically, Walter Kasper even thinks that it was possibly even "in use by the end of 30 AD . . . ."[9]
>
> Indicating the wide approval on this subject, even more skeptical scholars frequently agree. Gerd Ludemann maintains that "the elements in the tradition are to be dated to the first two years after the crucifixion of Jesus. . . . not later than three years. . . . the formation of the appearance traditions mentioned in I Cor.15.3-8 falls into the time between 30 and 33 CE. . . ."[10] Similarly, Michael Goulder thinks that it "goes back at least to what Paul was taught when he was converted, a couple of years after the crucifixion."[11] Thomas Sheehan agrees that this tradition "probably goes back to at least 32-34 C.E., that is, to within two to four years of the crucifixion."[12] Others clearly consent.[13]
>
> Overall, my recent overview of critical sources mentioned above indicates that those who provide a date generally opt for Paul's reception of this report relatively soon after Jesus' death, by the early to mid-30s A.D.[14] This provides an additional source that appears just a half step removed from eyewitness testimony.
>
> (3) Paul was so careful to assure the content of his Gospel message, that he made a second trip to Jerusalem (Gal. 2:1-10) specifically to be absolutely sure that he had not been mistaken (2:2). The first time he met with Peter and James (Gal. 1:18-20). On this occasion, the same two men were there, plus the apostle John (2:9). Paul was clearly doing his research by seeking out the chief apostles. As Martin Hengel notes, "Evidently the tradition of I Cor. 15.3 had been subjected to many tests" by Paul.[15]
>
> These four apostles were the chief authorities in the early church, and each is represented in the list of those who had seen the resurrected Jesus (1 Cor. 15:5-7). So their confirmation of Paul's Gospel preaching (Gal. 2:9), especially given the apostolic concern to insure doctrinal truth in the early church, is certainly significant. On Paul's word, we are again just a short distance from a firsthand report.
>
> (4) Not only do we have Paul's account that the other major apostles confirmed his Gospel message, but he provides the reverse testimony, too. After listing Jesus' resurrection appearances, Paul tells us he also knew

> what the other apostles were preaching regarding Jesus' appearances, and it was the same as his own teaching on this subject (1 Cor. 15:11). As one, they proclaimed that Jesus was raised from the dead (15:12, 15). So Paul narrates both the more indirect confirmation of his Gospel message by the apostolic leaders, plus his firsthand, direct approval of their resurrection message.

That's how solid this early creed is – even atheists like Crossan and Ludemann accept it as historically reliable. It's historical bedrock, as Michael Licona likes to say. This is the stuff that *everyone* accepts – across the ideological spectrum. How do you account for this evidence in your worldview, especially given that Paul never recanted his preaching about Jesus?

# Two black economists explain how to end poverty in America

**Wintery Knight** · 3 April 2021 · Archived copy · Original

Walter Wiliams (pictured above) was one of my two favorite economists, the other being Thomas Sowell.

Here is his article on wealth and poverty on Creators written by Dr. Williams. Williams passed away last year.

First, real poverty is not common in America:

> There is no material poverty in the U.S. Here are a few facts about people whom the Census Bureau labels as poor. Dr. Robert Rector and Rachel Sheffield, in their study "Understanding Poverty in the United States: Surprising Facts About America's Poor", report that 80 percent of poor households have air conditioning; nearly three-quarters have a car or truck, and 31 percent have two or more. Two-thirds have cable or satellite TV. Half have one or more computers. Forty-two percent own their homes. Poor Americans have more living space than the typical non-poor person in Sweden, France or the U.K. What we have in our nation are dependency and poverty of the spirit, with people making unwise choices and leading pathological lives aided and abetted by the welfare state.

Second, the "poverty" is not caused by racism, but by poor choices:

> The Census Bureau pegs the poverty rate among blacks at 35 percent and among whites at 13 percent. The illegitimacy rate among blacks is 72 percent, and among whites it's 30 percent. A statistic that one doesn't hear much about is that the poverty rate among black married families has been in the single digits for more than two decades, currently at 8 percent. For married white families, it's 5 percent. Now the politically incorrect questions: Whose fault is it to have children without the benefit of marriage and risk a life of dependency? Do people have free will, or are they governed by instincts?
>
> There may be some pinhead sociologists who blame the weak black family structure on racial discrimination. But why was the black illegitimacy rate only 14 percent in 1940, and why, as Dr. Thomas Sowell reports, do we find that census data "going back a hundred years, when blacks were just one generation out of slavery … showed that a slightly higher percentage of black adults had married than white adults. This fact remained true in every census from 1890 to 1940"? Is anyone willing to advance the argument that the reason the illegitimacy rate among blacks was lower and marriage rates higher in earlier periods was there was less racial discrimination and greater opportunity?

Third, avoiding poverty is the result of good choices:

> No one can blame a person if he starts out in life poor, because how one starts out is not his fault.
>
> If he stays poor, he is to blame because it is his fault. Avoiding long-term poverty is not rocket science. First, graduate from high school. Second, get married before you have children, and stay married. Third, work at any kind of job, even one that starts out paying the minimum wage. And finally, avoid engaging in criminal behavior. It turns out that a married couple, each earning the minimum wage, would earn an annual combined income of $30,000. The Census Bureau poverty line for a family of two is $15,500, and for a family of four, it's $23,000. By the way, no adult who starts out earning the minimum wage does so for very long.

Fourth, what stops people from making good choices is big government:

> Since President Lyndon Johnson declared war on poverty, the nation has spent about $18 trillion at the federal, state and local levels of government on programs justified by the "need" to deal with some aspect of poverty. In a column of mine in 1995, I pointed out that at that time, the nation had spent $5.4 trillion on the War on

> Poverty, and with that princely sum, “you could purchase every U.S. factory, all manufacturing equipment, and every office building. With what’s left over, one could buy every airline, trucking company and our commercial maritime fleet. If you’re still in the shopping mood, you could also buy every television, radio and power company, plus every retail and wholesale store in the entire nation”. Today’s total of $18 trillion spent on poverty means you could purchase everything produced in our country each year and then some.

Regarding those last two points, here is Thomas Sowell:

Economist Thomas Sowell blames welfare for killing the black family
To illustrate this point, here’s a graph with some helpful data taken from the U. S. Census.

[image]
Black women were more likely to be married before welfare programs
In fact, there is a whole video featuring Thomas Sowell to go with this graph:

And an article to go with it:

> If we wanted to be serious about evidence, we might compare where blacks stood a hundred years after the end of slavery with where they stood after 30 years of the liberal welfare state. In other words, we could compare hard evidence on “the legacy of slavery” with hard evidence on the legacy of liberals.
>
> Despite the grand myth that black economic progress began or accelerated with the passage of the civil rights laws and “war on poverty” programs of the 1960s, the cold fact is that the poverty rate among blacks fell from 87 percent in 1940 to 47 percent by 1960. This was before any of those programs began.
>
> Over the next 20 years, the poverty rate among blacks fell another 18 percentage points, compared to the 40-point drop in the previous 20 years. This was the continuation of a previous economic trend, at a slower rate of progress, not the economic grand deliverance proclaimed by liberals and self-serving black “leaders.”
>
> Ending the Jim Crow laws was a landmark achievement. But, despite the great proliferation of black political and other “leaders” that resulted from the laws and policies of the 1960s, nothing comparable happened economically. And there were serious retrogressions socially.
>
> Nearly a hundred years of the supposed “legacy of slavery” found most black children being raised in two-parent families in 1960. But thirty years after the liberal welfare state found the great majority of black children being raised by a single parent.

The rest of the article points out how even crime rates among blacks were caused by the implementation of soft law enforcement policies by progressives. Just look at the big cities if you want to know what it is like for blacks to be

ruled by Democrats. It sucks!

If everybody started to read more Thomas Sowell books, we would be much better off as a country! Only good things happen when people stop watching TV and listening to music and watching movies, and instead settle down in a chair with a Thomas Sowell book. I recommended a bunch of them in a previous post.

# William Lane Craig debates James Crossley on the resurrection of Jesus

**Wintery Knight** · 4 April 2021 · Archived copy · Original

This is my favorite debate on the resurrection.

You can watch the debate here:

There is not much snark in this summary, because Crossley is a solid scholar, and very fair with the evidence.

SUMMARY

**William Lane Craig's opening speech**

Two contentions:

- There are four minimal facts that are accepted by most historians
- The best explanation of the four minimal facts is that God raised Jesus from the dead

Contention 1 of 2:

Fact 1: The burial

- The burial is multiply attested
  - The burial is based on the early source material that Mark used for his gospel
  - Scholars date this Markan source to within 10 years of the crucifixion
  - The burial is also in the early passage in 1 Cor 15:3-8
  - So you have 5 sources, some of which are very early
- The burial is credited to a member of the Sanhedrin
  - the burial is probable because shows an enemy of the church doing right
  - this makes it unlikely to to be an invention

Fact 2: The empty tomb

- The burial story supports the empty tomb
  - the site of Jesus' grave was known
  - the disciples could not proclaim a resurrection if the body were still in it
  - the antagonists to the early Christians could have produced the body
- The empty tomb is multiple attested
  - it's mentioned explicitly in Mark
  - it's in the separate sources used by Matthew and John
  - it's in the early sermons documented in Acts
  - it's implied by 1 Cor 15:3-8, because resurrection requires that the body is missing
- The empty tomb was discovered by women
  - the testimony of women of women was not normally allowed in courts of law
  - if this story was being made up, they would have chosen male disciples
- The empty tomb discover lacks legendary embellishment
  - there is no theological or apologetical reflection on the meaning of the tomb
- The early Jewish response implies that the tomb was empty
  - the response was that the disciples stole the body

  - that requires that the tomb was found empty

Fact 3: The appearances to individuals and groups, some of the them hostile

- The list of appearances is in 1 Cor 15:3-8
  - this material is extremely early, withing 1-3 years after the cross
  - James, the brother of Jesus, was not a believer when he got his appearance
  - Paul was hostile to the early church when he got his appearance
- Specific appearances are multiply attested
  - Peter: attested by Luke and Paul
  - The twelve: attested by Luke, John and Paul
  - The women: attested by Matthew and John

Fact 4: The early belief in the resurrection emerged in a hostile environment

- There was no background belief in a dying Messiah
- There was no background belief in a single person resurrecting before the general resurrection of all of the righteous at the end of the age
- The disciples were willing to die for their belief in the resurrection of Jesus
- The resurrection is the best explanation for the transformation of the disciples from frightened to reckless of death

Contention 2 of 2:

- The resurrection is the best explanation because it passes C.B. McCullough's six tests for historical explanations
- None of the naturalistic explanations accounts for the minimal facts as well as the resurrection

**James Crossley's opening speech**

Appeals to the majority of scholars doesn't prove anything

- the majority of people in the west are Christians so of course there are a majority of scholars that support the resurrection
- there are Christian schools where denial of the resurrection can result in termination

The best early sources (1 Cor 15:3-8 and Mark) are not that good

1 Cor 15:3-8 doesn't support the empty tomb

- verse 4 probably does imply a bodily resurrection
- the passage does have eyewitnesses to appearances of Jesus
- but there are no eyewitnesses to the empty tomb in this source
- appearances occur in other cultures in different times and places
- Jesus viewed himself as a martyr
- his followers may have had hallucinations

Mark 16:1-8

- Mark is dated to the late 30s and early 40s
- The women who discover the tomb tell no one about the empty tomb

The gospels show signs of having things added to them

- Jewish story telling practices allowed the teller to make things up to enhance their hero
- one example of this would be the story of the earthquake and the people coming out of their graves
- that story isn't in Mark, nor any external sources like Josephus
- if there really was a mass resurrection, where are these people today?
- so this passage in Matthew clearly shows that at least some parts of the New Testament could involve
- what about the contradiction between the women tell NO ONE and yet other people show up at the empty tomb
- the story about Jesus commissioning the early church to evangelize Gentiles was probably added
- there are also discrepancies in the timing of events and appearances
- why are there explicit statements of high Christology in John, but not in the earlier sources?

**William Lane Craig's first rebuttal**

Crossley's response to the burial: he accepts it

Crossley's response to the empty tomb: he thinks it was made up

- rabbinical stories are not comparable to the gospel accounts
- the rabbinical stories are just anecdotal creative story-telling
- the gospels are ancient biographies – the genre is completely different
- the rabbinic miracle stories are recorded much later than the gospels
- the rabbi's legal and moral ideas were written down right away
- the miracle stories were written down a century or two later
- in contrast, the miracle stories about Jesus are in the earliest sources, like Mark
- the rabbinical stories are intended as entertainment, not history
- the gospels are intended as biography
- just because there are some legendary/apocalyptic elements in Matthew, it doesn't undermine things like the crucfixion that are historically accurate

Crossley's response to the evidence for the empty tomb:

- no response to the burial
- the empty tomb cannot be made up, it was implied by Paul early on
- the women wouldn't have said nothing forever – they eventually talked after they arrived to where the disciples were
- no response to the lack of embellishment
- no response to the early Jewish polemic

Crossley's response to the appearances

- he agrees that the first followers of Jesus had experiences where they thought Jesus was still alive

Crossley's response to the early belief in the bodily resurrection:

- no response about how this belief in a resurrection could have emerged in the absence of background belief in the death of the Messiah and the resurrection of one man before the general resurrection of all the righteous at the end of the age

What about Crossley's hallucination theory?

- Crossley says that the followers of Jesus had visions, and they interpreted these visions against the story of the Maccabean martyrs who looked forward to their own resurrections

- but the hallucination hypothesis doesn't account for the empty tomb
- and the Maccabean martyrs were not expecting the resurrection of one man, and certainly not the Messiah – so that story doesn't provide the right background belief for a hallucination of a single resurrected person prior to the end of the age
- if the appearances were non-physical, the disciples would not have applied the word resurrection – it would just have been a vision
- the visions could easily be reconciled with the idea that somehow God was pleased with Jesus and that he had some glorified/vindicated non-corporeal existence – but not resurrection
- not only that, the hallucination hypothesis doesn't even explain the visions, because there were visions to groups, to skeptics and to enemies in several places

What about the argument that only Christians accept the resurrection?

- it's an ad hominem attack that avoids the arguments

**James Crossley's first rebuttal**

Regarding the burial:

- I could be persuaded of that the burial account is accurate

Regarding the non-expectation of a suffering/dying Messiah:

- Jesus thought he was going to die
- this thinking he was going to die overturned all previous Messianic expectations that the Messiah wouldn't suffer or die
- the early Jews could easily reconcile the idea of a suffering, dead man killed by the Romans with the power of the all-powerful Messiah who supposed to reign forever
- no actually bodily resurrection would have to happen to get them to continue to identify an executed corpse with the role of Messiah

Regarding the belief in the bodily resurrection:

- it would be natural for Jews, who believed in a general resurrection of all the rigtheous dead at the end of the age, to interpret a non-physical vision of one man after he died as a bodily resurrection, even though no Jew had ever considered the resurrection of one man before the general resurrection before Jesus

Regarding the testimony of the women:

- Just because women were not able to testify in courts of law (unless there were no male witnesses), the early church might still invent a story where the women are the first witnesses
- first, the disciples had fled the scene, so only the women were left
- and it would have been a good idea for the early church to invent women as the first witnesses – the fact that they could not testify in court makes them ideal witnesses and very persuasive
- also, it's a good idea to invent women as witnesses, because the Romans had a rule that said that they never killed women, so they wouldn't have killed these women – Romans only ever kill men
- in any case, the first witness to the empty tomb is angel, so as long as people could talk to the angel as being the first witness, that's the best story to invent

Regarding the consensus of Christian scholars:

- I am not saying that Craig's facts are wrong, just that appealing to consensus is not legitimate
- he has to appeal to the evidence, not the consensus

Regarding my naturalistic bias:

- I don't know or care if naturalism is true, let's look at the evidence

Regarding the genre of the gospels:

- the creative story-telling is common in all genres, it's not a genre in itself
- stuff about Roman emperors also has creative story-telling

Regarding the legendary nature of the empty tomb in Mark:

- First, Christians interpreted the visions as a bodily resurrection
- Second, they invented the story of the empty tomb to go with that interpretation
- Third, they died for their invention

**William Lane Craig's second rebuttal**

The burial:

- Bill's case doesn't need to know the specifics of the burial, only that the location was known
- the location is important because it supports the empty tomb
- to proclaim a resurrection, the tomb would have to be empty
- a tomb with a known location is easier to check

The empty tomb:

- creative story telling was common in Judaism: retelling OT stories (midrash), romances/novels, rabbinical anecdotes
- but the gospels are none of these genres – the gospels are ancient biographies
- Craig also gave five arguments as to why the tomb was empty
- the burial story supports the empty tomb
- there is multiple *independent* attestation, then it cannot be a creative fiction invented in Mark alone
- the witnesses were in Jerusalem, so they were in a position to know
- regarding the women, even though Jesus respected the women, their testimony would not be convincing to *others*, so why invent a story where they are the witnesses
- the male disciples did not flee the scene, for example, Peter was there to deny Jesus three times
- if the story is made up, who cares what the male disciples did, just invent them on the scene anyway
- the angel is not authoritative, because the angel cannot be questioned, but the women can be questioned
- there was no response on the lack of embellishment
- there was no response to the earliest Jewish response implying that the tomb was empty

The appearances:

- we agree on the appearances

The early belief in the resurrection:

- he says that Jesus predicted his own death
- yes, but that would only cause people to think that he was a martyr, not that he was the messiah – something else is needed for them to keep their believe that he was the Messiah even after he died, because the Messiah wasn't supposed to die
- and of course, there was no expectation of a single person rising from the dead before the general resurrection,

and certainly not the Messiah

The consensus of scholars:

- Jewish scholars like Geza Vermes and Pinchas Lapide accept these minimal facts like the empty tomb, it's not just Christian scholars

Against Crossley's hallucination hypothesis:

- it doesn't explain the empty the tomb
- it doesn't explain the early belief in the resurrection
- hallucinations would only lead to the idea that God had exalted/glorified Jesus, not that he was bodily raised from the dead
- the hallucination theory cannot accommodate all of the different kinds of appearances; individual, group, skeptic, enemy, etc.

The pre-supposition of naturalism:

- if Crossley is not committed to naturalism, then he should be open to the minimal facts and to the best explanation of those facts
- the hallucination hypothesis has too many problems
- the resurrection hypothesis explains everything, and well

**James Crossley's second rebuttal**

Religious pluralism:

- well, there are lots of other religious books
- those other religious books have late sources, and are filled with legends and myths, and no eyewitness testimony
- so why should we trust 1 Cor 15 and the early source for Mark and the other early eyewitness testimony in the New Testament?
- if other religious books can be rejected for historical reasons, then surely the New Testament can be rejected for historical reasons

Genre:

- the genre of ancient biography *can* incorporate and commonly incorporates invented legendaryt story-telling
- this is common in Roman, Greek and Jewish literature and everyone accepts that

Empty tomb: multiple attestation

- ok, so maybe the empty tomb is multiply attested, but that just gets back to a belief, not to a fact
- multiple attestation is not the only criteria, and Craig needs to use the other criteria to make his case stronger

Empty tomb: invented

- if there is a belief in the resurrection caused by the visions, then the empty tomb would have to be invented
- why aren't there more reliable stories of people visiting the empty tomb in more sources?

Empty tomb: role of the women

- there are women who have an important role in the Bible, like Judith and Esther
- Mark's passage may have used women who then kept silent in order to explain why no one knew where the empty tomb was

- if the fleeing of the men is plausible to explain the women, then why not use that? why appeal to the supernatural?
- we should prefer any explanation that is naturalistic even if it is not as good as the supernatural explanation at explaining everything

Empty tomb: embellishment

- well there is an angel there, that's an embellishment
- anyway, when you say there is no embellishment, what are you comparing it to that makes you say that?

Appearances: anthropology

- I've read anthropology literature that has some cases where people have hallucinations as groups

Appearances: theology

- the hallucinations would not be interpreted against the background theological beliefs that ruled out the resurrection of one man before then general resurrection of all the righteous dead
- these hallucinations could have been so compelling that they made the earliest Christians, and skeptics like James, and enemies like the Pharisee Paul abandon all of their previous background beliefs, proclaim the new doctrine of a crucified and resurrected Messiah which no one had ever expected, and then gone on to die for that belief
- the hallucinations could have changed all of their theology and reversed all of their beliefs about the what the word resurrection meant

**William Lane Craig's conclusion**

Supernaturalism:

- None of the four facts are supernatural, they are natural, and ascertained by historians using normal historical methods
- the supernatural part only comes in after we decide on the facts when we are deciding which explanation is the best
- a tomb being found empty is not a miraculous fact

Genre:

- the gospels are not analagous to these rabbinical stories, the purpose and dating is different

Empty tomb:

- what multiple attestation shows is that it was not made-up by Mark
- and the argument was augmented with other criteria, like the criterion of embarrassment and the criterion of dissimilarity
- Judith and Esther are very rare exceptions, normally women were not viewed as reliable witnesses
- if the story was invented, whatever purpose the inventors had would have been better served by inventing male witnesses
- Craig grants that the angel may be an embellishment for the sake of argument, but there are no other embellishments
- the real embellishments occur in forged gnostic gospels in the second and third centuries, where there are theological motifs added to the bare fact of the empty tomb (e.g. – the talking cross in the Gospel of Peter)
- he had no response to the earliest jewish response which implied an empty tomb

Belief in the resurrection:

- there was no way for Jewish people to interpret an appearance as a bodily resurrection before the end of the world, they did not expect that
- they could have imagined exaltation, but not a bodily resurrection

**James Crossley's conclusion**

Supernatural explanation:

- as long as there is any other other possible naturalistic explanation, we should prefer that, no matter how unlikely

Creative stories:

- some of these creative stories appear within the lifetimes of the people connected to the events (none mentioned)

Embellishment:

- you should compare to earlier stories when looking for embellishments, not later
- and we don't have any earlier sources, so we just don't know the extent of the embellishment

Jewish response:

- they probably just heard about the empty tomb, and didn't check on it, then invented the stole-the-body explanation without ever checking to see if the tomb was empty or not

# Christian woman finds a way to discuss her faith with non-Christians

**Wintery Knight** · 5 April 2021 · Archived copy · Original

I found an interesting article where a Christian woman explains how she used to share her testimony with non-Christians. But that wasn't working. So she decided to try something different.

She writes:

> I'll never forget the first time I shared my personal testimony with a non-Christian.
>
> When the opportunity arose and I shared my story with an unbelieving friend, she replied, "That's so cool. I'm so happy you found something that works for you."
>
> *For me?*
>
> "It's not about what works *for me*," I said, trying to hide my discouragement. "It's about what's true for everyone."
>
> "That doesn't make sense," she responded. "That's *your experience*, not mine. I had a similar revelation when I realized I could leave the church, and I've become a better person for *my* decision. Just as you were freed from your heaviest burdens by finding God, I was freed from mine by leaving God behind."
>
> I was devastated but I chalked it up to my friend's hardheartedness. I decided to shake the dust off my feet and look forward to the next opportunity.
>
> But time after time of sharing my testimony resulted in similar responses. People expressed enthusiasm that I was happy, that Christianity worked for me, and that I had "found my niche." Yet no one considered my experience as anything more than just that—my own personal experience.
>
> […]I had been taught that sharing what God had done in my life was the ideal way to witness to non-Christians. A personal testimony was interesting yet non-confrontational, compelling but inoffensive. And yet, despite having shared my testimony with dozens of unbelievers, not a single person felt challenged to consider the truth claims of Christianity.

She noticed that her approach wasn't actually in the Bible. There was a different approach being demonstrated by Jesus, and later by his disciples.

She writes:

> When Jesus called his first disciples, he taught truth and provided evidence (miracles) to support his claims, then he asked people to follow him (Luke 5:1–11). In fact, this was his method whenever he went into new regions (see Luke 4:14–44; John 4:7–26). People decided to follow Jesus not on blind faith or a subjective feeling, but based on the evidence they had seen and heard.[i]
>
> Jesus also used evidence to assuage the doubts of even those who had been with him a long time. John the Baptist was Jesus' cousin, who leapt in the womb during Mary's visit (Luke 1:39–45), baptized Jesus in the Jordan River, heard God's voice from heaven, and saw the Holy Spirit descend on Jesus in bodily form like a dove (Luke 3:21–22). Yet when John experienced unexpected suffering, he began to doubt.
>
> Jesus didn't respond as many do today, by insisting that John "just believe" or "have faith" or "prayer harder." Rather, he responded with more evidence, saying, "Go and tell John what you hear and see: the blind receive their sight and the lame walk, lepers are cleansed and the deaf hear, and the dead are raised up, and the poor have good news preached to them. And blessed is the one who is not offended by me." (Matt. 11:2–6).
>
> […]At Pentecost, the apostle Peter offered signs and wonders, fulfilled prophecy, and relayed eyewitness

> testimony to persuade people from all over the Roman Empire that the most reasonable explanation for what they were seeing was not morning drunkenness, but a risen Messiah (Acts 2:1–41).
>
> On his missionary journeys, the apostle Paul reasoned with the Jews from the Scriptures, explaining and proving that Jesus was the Messiah who needed to suffer and rise from the dead (Acts 17:1–3, 17). And he reasoned with the Gentiles from outside the Scriptures, making a case with their own accepted beliefs to convince them (Acts 17:17–34).
>
> In fact, in describing his mission, Paul told the Philippians, "I am put here for the defense of the gospel" (1:7, 16). This word translated defense is the same word from which we get our English word "apologetics," meaning to make reasoned arguments or to provide evidence as justification. Using this same word, Peter commanded believers to "always [be] prepared to make a defense to anyone who asks you for a reason for the hope that is in you"(1 Pet. 3:15).

So, she decided to dump the testimony approach, and try the Biblical approach. But she had to change it a little bit, since she couldn't perform miracles herself:

> We are not eyewitnesses to Jesus's life and resurrection, but we have the accounts of those who were. We don't typically see miracles, but we have millennia of biblical scholarship and archaeology that provide reasons to believe the accounts are trustworthy. We don't often hear God speaking audibly or see him parting seas, but we have significant scientific evidence that shows the universe had a beginning, and millennia of observation to confirm the scientific principle that everything that begins to exist has a cause.

I think a lot of Christians never move on from approach she described that wasn't getting results. And there's a reason for that – studying evidence is hard work. But I can tell you from my experience as a software engineer, there is no better way to convince other people to adopt your view than to show them working code that produces results. If they have a prototype, they will adopt your design. Similarly with Christianity. If you have evidence, then you will be persuasive.

When talking about spiritual things with non-Christians, always remember the joke about the two men walking in the woods who meet a bear. One man starts to put on his running shoes. The other man says "what are you doing? you can't outrun a bear!" And the first man says "I don't have to. I only have to outrun you". It's the same with apologetics. You don't have to be William Lane Craig to talk about your faith to non-Christians. You just have to know more than your non-Christian opponent knows about evidence.

The way things are going these days with the public schools and the mainstream news media, this is actually pretty easy to do. One or two introductory books on the origin of the universe, the fine-tuning for intelligent life, the origin of biological information, the origin of body plans, the historical reliability of the New Testament, the minimal facts case for the resurrection, etc. will do the job. You might need another one on philosophical challenges like evil, suffering, divine hiddenness, etc. But we're talking no more than 5 books, and you'll be effective in the vast majority of your conversations. If you can only get one book, I like Sean McDowell and Jonathan Morrow's "Is God Just a Human Invention?" best.

# Wintery Knight interviewed for the Apologetics 315 podcast

**Wintery Knight** · 6 April 2021 · Archived copy · Original

I've met the two gentlemen who host the Apologetics 315 podcast in person (Brian Auten and Chad Gross) and they asked me to come on and talk about my experience doing apologetics online with an alias. I thought that I would link to them, and then add an important point that I wanted to say during the podcast, but I forgot to come back to it.

Anyway, you can listen to the episode here on their web site.

Here's the description:

> **Today's Show Notes**:
> **Episode 016 – Christianity in the Public Square with Wintery Knight**
>
> In this episode, Brian Auten and Chad Gross interview Christian blogger Wintery Knight on the topics of Christian blogging, apologetics in the workplace and in the public square, how policy effects Christian freedoms, and more. www.winteryknight.com
>
> 1:30 – Discussing moral and ethical issues, having an alias, and observing the changers in culture.
> 8:00 – The conflict between the Happiness Quest and the Truth Quest.
> 10:00 – The difficulty getting apologetics into the church. The importance of a commitment to a truth quest.
> 13:00 – Doing apologetics on the internet.
> 17:30 – How to interact with skeptics, and what to do when the people you interact with become hostile.
> 20:00 – In-person interaction and discerning the right way to communicate in the workplace or public square.
> 25:20 – How can Christians be informed about what's going on in culture and public policy? How does one become equipped? Resources for being equipped.
> 37:00 – "The Equality Act" and religious liberty issues.
> 43:00 – The speed of cultural change in the US, and the importance of religious freedoms.
> 52:45 – Christianity and politics.

If you're looking for a great podcast on apologetics, these guys are interviewing a lot of my favorite people – Craig Hazen, Fazale Rana, and soon Stephen C. Meyer. If you like the interview, please leave a comment. If you have any questions about any of the resources or blog posts that I mentioned, please let me know.

## Extra point

So, the extra point I wanted to make was about the question of how should Christians feel about the ascent of the woke people.

To start, consider this interesting article from Not The Bee, where they feature a whole bunch of moderates and classical liberals explaining why they walked away from the left because of the left's descent into censorship and cancel culture.

Example:

In addition to that, there was an interesting survey about which group of people were more likely to self-report being diagnosed with a mental illness. It was the far-left people. And this data came from Pew Research, which skews to the left.

So, the point I wanted to make was this. The people on the left are only able to persist in being on the left, by exchanging reason and evidence for emotions and coercion. I admit that things look bad now, especially when you look at the powerful big corporations who are allying with the secular left mob. But I don't think that people who are fixated on left-wing concerns are comfortable for moderate people to talk with. I think that secular leftism has left extreme leftists without the basic moral framework for respectful dialog. What's more, I don't think that secular leftists are very good at friendship, dating and especially marriage. You can't marry someone who is lacks charity and self-control.

In view of this, I think that there is a tremendous opportunity to provide moderates and open-minded people with a safe place to express their views and seek truth. In order to be ready for them, I recommend that you prepare yourself to have respectful discussions by reading good books, and listening to good debates. The more you can stay calm while listening to different points of view, the more that people will want to speak to you. Please don't rely on the church to train you. We're not doing a very good job of training Christians about different points of view in the church. So, you'll have to train yourself if you want to develop the ability to debate and disagree in a calm and respectful way.

## Exciting news

By the way, I mentioned on the podcast that my Bible study partner and I are planning to start a podcast of our own. I explain what it will be about and about my co-host during the episode.

If you missed my previous appearance on Tim Stratton's Free Thinking Ministries podcast, then you can listen to that here.

# The worst mistake you can make when defending the Christian worldview

**Wintery Knight** · 7 April 2021 · Archived copy · Original

So, this is just an advice post for doing apologetics.

Here are three situations I've run into while doing apologetics in the last month.

First situation. I was talking with a lady who is an atheist. I had a copy of "God's Crime Scene" in my hand, and she asked me about it. I told her that it was a book written by the guy who solved the homicide case that I asked her to watch on Dateline. She remembered – it was the two-hour special on the woman who was killed with a garrotte. She pointed at the book and said "what's in it?" I said, it has 8 pieces of evidence that fit better with a theistic worldview than with an atheistic one, and some of them scientific. Her reply to me was – literally – "which denomination do you want me to join?"

Second situation. I was talking with a friend of mine who teaches in a Catholic school. She was telling that she got the opportunity to talk to her students about God, and found out that some of them were not even theists, and many of them had questions. So she asked them for questions and got a list. The list included many hard cases, like "what about the Bible and slavery" and "why do Christians oppose gay marriage?" and so on.

Third situation. Talking to a grad student about God's existence. I'm laying out my scientific arguments for her, holding up the peer-reviewed papers for each discovery. I get to the Doug Axe paper on protein folding probabilities, and she holds up her hand. One question: "Am I going to Hell?"

So think about those three situations. In each case, the opponent is trying to reject Christianity by jumping way, way ahead to the very end of the process. When you do Christian apologetics, you do not take the bait and jump to the end of the process dealing with nitty gritty details until you have made your case for the core of the Christian worldview using your strongest evidence. Let me explain.

So, your strongest evidence as a Christian are the scientific arguments, along with the moral argument. Those would include (for starters) the following:

1. kalam cosmological argument
2. cosmic fine-tuning
3. galactic and stellar habitability
4. origin of life / DNA
5. molecular machines / irreducible complexity
6. the moral argument

The problem I am seeing today is that atheists are rejecting discussions about evidence because they think that all we are interested in is getting them to become Christians. Well, yes. I want you to become a Christian. But I know perfectly well what that entails – it entails a change of life priorities. Both of the women I spoke to are living with their boyfriends, and the kids in the Catholic school just want to have fun. None of them wants to believe in a God who will require self-denial, self-control, and self-sacrifice. Nobody wants God to be in that leader position in their lives. Christianity is 100% reversed from today's me-first, fun-seeking, thrill-seeking, fear-of-missing-out travel spirit of the age.

So, how to answer all these late-game questions? The answer is simple. You don't answer any late-game questions until the person you are talking with accounts for the widely-accepted data in your list. These are things that have got to be accepted before any discussion about minor issues like one angel vs two angels at the empty tomb can occur. When we discuss all the basic issues where the evidence is the strongest, then we can go on to discuss issues where the evidence is debatable, then finally, in the last bits before the end, we can discuss these other kinds of

questions.

How to explain why this process must be followed to the person who asks specific questions about minor issues? Simple. You explain that your goal is *not* to get them to become a Christian right now. That you want to let them believe *anything thing they want.* That's right. They can believe *anything they want to believe.* As long as what they believe is *consistent with the evidence.* And what I am going to do is give them the evidence, and then they can believe whatever they want – so long as it's consistent with the evidence.

So, for example, I'm going to tell them 3 pieces of evidence for a cosmic beginning of the universe: the expanding universe (redshift), the cosmic microwave background radiation, and the light element abundances. That's mainstream science that shows that the universe came into being out of nothing, a finite time in the past. And I will charge them not to believe in any religion that assumes that the universe has always been here. For example, Mormonism is ruled out, they believe in eternally existing matter. See how that works? Hey, Ms. Atheist. You can believe anything you want. *As long as what you believe is consistent with the evidence.*

I think this approach of not letting them rush you to the end at the beginning is important for two reasons. First, we can get our foot in the door to talk about things that are interesting to everyone, in a non-stressed environment. Everyone can talk about evidence comfortably. Second, we show that we hold our beliefs because we are simply letting evidence set boundaries for us on what we are allowed to believe. We can't believe not-Christianity, because not-Christianity is not consistent with the evidence. And you start with the most well-supported evidence, and eliminate worldviews that are falsified by the most well-supported evidence. Atheism actually gets falsified pretty quickly, because of the scientific evidence.

So, that's my advice. Had a friend of mine named William try this out about a week ago. It went down like this:

William to me:

> This guy I know messaged me and bragged for a while about how easy he can dismantle Christianity. He said: "present the gospel to me as you understand it. I'll simply ask questions to demonstrate it is not worth your belief."

WK to William:

> First of all, he isn't allowed to just sit there and poke holes in your case, he has to present a positive case for atheism. Second, don't discuss Christianity with him at all until you first discuss the evidence for theism – start with the good scientific evidence.

And William wrote this to his friend:

> The way I'm wired is that I process all competing theories and go with the best one. By doing a comparative analysis of worldviews I find that Christian theology easily explains the most about the world I find myself living in.
>
> I'm pretty sure that a God of some sort exists because of the scientific evidence for the origin of the universe and the fine tuning in physics. From there I find it quite intuitive that if a God went through the trouble of creating and tuning a universe for life that this God likely has some sort of interest in it and has revealed Himself to humanity in some way.
>
> From there I can look at the major world religions and compare them to see which one explains the past and the present the best. Christianity easily comes out on top.

And then a few days later, I got this from William:

> I finally got the agnostic to tell me what he thinks about origin and fine tuning. When I started pointing out that his views were unscientific, he blew a gasket, called me dishonest and told me he didn't want to discuss anything further.

And that's where you want to be. Cut off all discussions where the challenger tries to jump to the end and get you to debate the very last steps of your case. Present the strongest evidence for your core claims, and get him to account for this evidence within his own worldview. Lead the discussion with public, testable evidence. All warfare depends on picking the terrain, weapons and tactics that allow you to match your strength against your opponent's weakness.

# What is it really like for a young woman to regret her gender transition?

**Wintery Knight** · 8 April 2021 · Archived copy · Original

A few months ago, I blogged about this British woman who sued the NHS after they transitioned her when she was still very young. At 16, the NHS gave her puberty blockers and testosterone injections. At age 20, they gave her a double masectomy. She regretted what they did to her, and won a case against them in court. She's posted an article at Persuasion telling her side of the story.

Excerpt:

> From the earliest days, my home life was unhappy. My parents—a white Englishwoman and a black American who got together while he was in Britain with the U.S. Air Force—divorced when I was about 5. My mother, who was on welfare, descended into alcoholism and mental illness. Although my father remained in England, he was emotionally distant to me and my younger sister.
>
> I was a classic tomboy, which was one of the healthier parts of my early life in Letchworth, a town of about 30,000 people, an hour outside London. Early in childhood, I was accepted by the boys—I dressed in typically boy clothing and was athletic. I never had an issue with my gender; it wasn't on my mind.
>
> Then puberty hit, and everything changed for the worse. A lot of teenagers, especially girls, have a hard time with puberty, but I didn't know this. I thought I was the only one who hated how my hips and breasts were growing. Then my periods started, and they were disabling. I was often in pain and drained of energy.
>
> Also, I could no longer pass as "one of the boys," so lost my community of male friends. But I didn't feel I really belonged with the girls either. My mother's alcoholism had gotten so bad that I didn't want to bring friends home. Eventually, I had no friends to invite. I became more alienated and solitary. I had been moving a lot too, and I had to start over at different schools, which compounded my problems.
>
> By the time I was 14, I was severely depressed and had given up: I stopped going to school; I stopped going outside. I just stayed in my room, avoiding my mother, playing video games, getting lost in my favorite music, and surfing the internet.

You know, the first thing I would do with a girl like this is get her to talk to a doctor about what she should expect. Maybe get her some medication to ease some of the puberty troubles. But mainly, just spend some time with her, talking to her, playing with her, and so on. But really the most important thing would be to tell her the truth about where she stood in terms of value, meaning and purpose. After all – how sad can you really be if Jesus gave his life for you, and has very important work for you to do? Young people seem to put so much emphasis on what their peers think of them, but on a Christian worldview, that doesn't matter at all. What matters is what God thinks of you, and what he thinks is based on your character inside, not on how you look. He's not selfish.

More:

> Around the end of that first year post-surgery, something started happening: My brain was maturing. I thought about how I'd gotten where I was, and gave myself questions to contemplate. A big one was: "What makes me a man?"
>
> I started realizing how many flaws there had been in my thought process, and how they had interacted with claims about gender that are increasingly found in the larger culture and that have been adopted at the Tavistock.
>
> […]I was also concerned about the effect my transition would have on my ability to find a sexual partner.
>
> Then there was the fact that no one really knew the long-term effects of the treatment. For instance, the

> puberty blockers and testosterone caused me to have to deal with vaginal atrophy, a thinning and fragility of the vaginal walls that normally occurs after menopause. I started feeling really bad about myself again.
>
> […]Five years after beginning my medical transition to becoming male, I began the process of detransitioning. A lot of trans men talk about how you can't cry with a high dose of testosterone in your body, and this affected me too: I couldn't release my emotions. One of the first signs that I was becoming Keira again was that—thankfully, at last—I was able to cry. And I had a lot to cry about.
>
> **The consequences of what happened to me have been profound**: possible infertility, loss of my breasts and inability to breastfeed, atrophied genitals, a permanently changed voice, facial hair. When I was seen at the Tavistock clinic, I had so many issues that it was comforting to think I really had only one that needed solving: I was a male in a female body. But it was the job of the professionals to consider all my co-morbidities, not just to affirm my naïve hope that everything could be solved with hormones and surgery.

Her article has a lot more information about her experiences with the NHS, and her court case. But what I wanted you guys to see was how important it is to not let children just say "I want this", which is something they saw on TV, or heard from their peers, or read online. Instead, you need to find out what problem they are really trying to solve. Once upon a time, Christians thought that the Christian worldview and a relationship with God in Christ was the most important thing you had to offer people who were in distress. What happened to that? When did we stop offering truth, and start offering disinterested agreement and shallow affirmation? Did we just want to feel good and have people think we were "nice"?

# Have you ever read the Bible in order to find out what God thinks?

**Wintery Knight** · 9 April 2021 · Archived copy · Original

Two authors came to my attention while browsing tweets this week. The first is Rachel Hollis, who presents herself as a Christian but who isn't (see below). The second is by Sarah Bessey, whose book contains a chapter where the author urges God to help her to hate a certain group of people *solely* because of their skin color. What is causing people who claim to be Christian to buy these books?

I found this list of progressive Christians on Alisa Childers' blog. Childers is very reliable, having written a detail-filled book about attempts by progressives to distort the gospel.

She writes this about Jen Hatmaker, a progressive:

> Since its launch in 2017, Hatmaker's podcast has been a veritable "who's who" of progressive Christian leaders such as **Sarah Bessey**, Rachel Held Evans, Pete Enns, Nadia Bolz-Weber, Richard Rohr, Jeff Chu, Mike McHargue ("Science Mike"), Barbara Brown Taylor, Austin Channing Brown, Lisa Sharon Harper, **Rachel Hollis**, and Glennon Doyle.

I want to talk about Sarah Bessey and Rachel Hollis. Are these authors working from within a Christian worldview?

Hollis:

> Anne Kennedy was bemused to find Rachel Hollis' best-selling book, *Girl, Wash Your Face*, in the Christian living section of the bookstore next to the Bibles. Hollis describes herself as a Christian but her self-help advice is anything but Christian, Kennedy believes.
>
> "She does mention Christianity and her faith in Jesus but in terms of the book itself, there's really nothing that would distinguish it from any other kind of self-help thing that's on the market and there's lots of them. She quotes some Bible verses but she doesn't really rely on a Christian worldview at all to motivate behavior," Kennedy… said on a recent Christian Research Institute podcast.
>
> […]"I don't think she's a Christian at all," she commented.
>
> […]"Her worldview is in no way representative of classical Christianity. She's inclusive, affirming of LGBT, all religions are fine, doesn't have any even vague understanding of what redemption and the cross and faith in Jesus were to actually look like. She invokes the name of Jesus periodically, she quotes some verses but nothing that she says at all represents a Christian worldview. So it is interesting to me that she is marketed as a Christian."

And the Bessey devotion book has this:

> "Dear God,
>
> Please help me to hate wh1te people. Or at least to want to hate them. At least, I want to stop caring about them, individually and collectively. I want to stop caring about their misguided, racist souls, to stop believing that they can be better, that they can stop being racist."
>
> […]"Lord, if it be your will, harden my heart. Stop me from striving to see the best in people. Stop me from being hopeful that White people can do and be better.
>
> […]"Let me see them as hopelessly unrepentant, reprobate bigots who have blasphemed the Holy Spirit and who need to be handed over to the evil one."

Why are these books so popular? I think that the problem is that we're not reading our Bibles to get the author's

intended meaning. Instead, we're selecting the parts of the Bible that affirm what makes us feel good and look good to others.

Consider this post from Alan Shlemon of Stand to Reason:

> You never open the email, skip the first three pages, and read just one line on the fourth page. No one, in fact, takes that approach with their mail. By skipping the context of the email and ignoring the flow of thought, you wouldn't know what that line meant on the fourth page. If it's wrong to read your *friend's* mail that way, then why do we read *God's* mail that way?
>
> We open the *letter* to the Philippians, skip the first three chapters, and read verse 13: "I can do all things through Christ who strengthens me." Message received. Close the letter. We're done here!
>
> We even plaster that verse on a mug, publicizing our mistake. I call this "Coffee Cup Christianity," and it's killing our biblical literacy. We've become accustomed to seeing isolated Bible verses and presume we know their meaning. Too often, however, we merely insert our own meaning into a Bible verse, thereby overwriting what God was trying to tell us.
>
> […]Sadly, Coffee Cup Christianity violates one of the most basic and well-known principles of interpretation: context. It's a principle known not only among Bible readers. Many people in our culture understand it. Tragically, we apply it when reading *man's* word but neglect it when reading *God's* word. Coffee Cup Christianity leads to three dangerous problems.

Here are the problems:

- **Coffee Cup Christianity overwrites God's intended meaning with your own**
- **Coffee Cup Christianity leads to missing important lessons from God**
- **Coffee Cup Christianity models bad interpretive methods**

So, here's what I recommend. My Bible study partner and I are going through New Testament letters. Our goal is to find out what God wants us to be doing by reading the advice given to early church Christians. We're trying to learn how to recognize life situations that God has an interest in, and make decisions that respect his values and goals. We want to put ourselves second in those situations. And we're holding each other accountable to the author's intent in those books of the Bible.

For each book, we always pick out a good commentary. For 1 Peter, we're using Joel B. Green's "1 Peter", which we got free from Logos Bible study. We read the full chapter, then the commentary, prepare our points in advance. Then meet to compare. We always pray first, and often afterwards. Here's what we did for 1 Peter 1.

So, that's our approach. If your Bible study just has people showing up without reading anything, without preparing anything, and then twisting the text to make them feel good or look good, then I think you need to get out of that Bible study. Do better.

# Atheist gets her PhD in astronomy and astrophysics and finds evidence for God

**Wintery Knight** · 10 April 2021 · Archived copy · Original

Christian apologist Terrell Clemmons tweeted this testimony by Sarah Salviander, a research scientist in astronomy and astrophysics at the prestigious University of Texas at Austin.

Dr. Salviander writes:

> I was born in the U.S., but grew up in Canada. My parents were socialists and political activists who thought British Columbia would be a better place for us to live, since it had the only socialist government in North America at the time. My parents were also atheists, though they eschewed that label in favor of "agnostic." They were kind, loving, and moral, but religion played no part in my life. Instead, my childhood revolved around education, particularly science. I remember how important it was to my parents that my brother and I did well in school.

I just want to point out that I hope that all you Christian parents are taking seriously the obligation to make your kids do well in school, because even if they start out as atheists when they are young, they can still find their way back to God through study, as Sarah did.

She had a bad start, that's for sure:

> I grew up in the 1970s and 1980s, a time when science fiction was enjoying a renaissance, thanks largely to the popularity of *Star Wars*. I remember how fascinated I was by the original *Star Wars* trilogy. It had almost nothing to do with science—it's more properly characterized as space opera—but it got me thinking about space in a big way. I also loved the original *Star Trek*, which was more science fiction. The stoic and logical character of Mr. Spock was particularly appealing to me. Popular science was also experiencing a renaissance at that time, which had a lot to do with Carl Sagan's television show, *Cosmos*, which I adored. The combination of these influences led to such an intense wonder about outer space and the universe, that by the time I was nine years old I knew I would be a space scientist someday.
>
> Canada was already post-Christian by the 1970s, so I grew up with no religion. In retrospect, it's amazing that for the first 25 years of my life, I met only three people who identified as Christian. My view of Christianity was negative from an early age, and by the time I was in my twenties, I was actively hostile toward Christianity. Looking back, I realized a lot of this was the unconscious absorption of the general hostility toward Christianity that is common in places like Canada and Europe; my hostility certainly wasn't based on actually knowing anything about Christianity. I had come to believe that Christianity made people weak and foolish; I thought it was philosophically trivial. I was ignorant not only of the Bible, but also of the deep philosophy of Christianity and the scientific discoveries that shed new light on the origins of the universe and life on Earth.

She documents a phase of following Ayn Rand and embracing "Objectivism", but eventually she rejects it for failing to answer the big questions of life.

More:

> I began to focus all of my energy on my studies, and became very dedicated to my physics and math courses. I joined campus clubs, started to make friends, and, for the first time in my life, I was meeting Christians. They weren't like Objectivists—they were joyous and content. And, they were smart, too. I **was astonished to find that my physics professors, whom I admired, were Christian. Their personal example began to have an influence on me, and I found myself growing less hostile to Christianity.**

This is why I think it is so important for Christian parents to raise their children to get advanced degrees… either to become professors themselves, or to finance others (e.g. – our own children) to do advanced degrees. It is so important for university students to see Christian professors on campus. And failing that, it's important that we bring Christian speakers in to debate non-Christian speakers on the important issues. This will not happen unless we recognize how important it is, and then make a plan to achieve it.

More:

> **I had joined a group in the Center for Astrophysics and Space Sciences (CASS) that was researching evidence for the big bang. The cosmic background radiation—the leftover radiation from the big bang—provides the strongest evidence for the theory, but cosmologists need other, independent lines of evidence to confirm it. My group was studying deuterium abundances in the early universe. Deuterium is an isotope of hydrogen, and its abundance in the early universe is sensitive to the amount of ordinary mass contained in the entire universe. Believe it or not, this one measurement tells us whether the big bang model is correct.**
>
> **If anyone is interested in how this works, I'll describe it, but for now I'll spare you the gruesome details. Suffice it to say that an amazing convergence of physical properties is necessary in order to study deuterium abundances in the early universe, and yet this convergence is exactly what we get. I remember being astounded by this, blown away, completely and utterly awed. It seemed incredible to me that there was a way to find the answer to this question we had about the universe. In fact, it seems that every question we have about the universe is answerable. There's no reason it has to be this way, and it made me think of Einstein's observation that the most incomprehensible thing about the world is that it's comprehensible. I started to sense an underlying order to the universe. Without knowing it, I was awakening to what Psalm 19 tells us so clearly, "The heavens declare the glory of God; the skies proclaim the work of his hands."**
>
> That summer, I'd picked up a copy of T*he Count of Monte Cristo* by Alexandre Dumas and was reading it in my off hours. Previous to this, I'd only known it as an exciting story of revenge, since that's what the countless movie and TV adaptations always focused on. But it's more than just a revenge story, it's a philosophically deep examination of forgiveness and God's role in giving justice. I was surprised by this, and was starting to realize that the concept of God and religion was not as philosophically trivial as I had thought.
>
> All of this culminated one day, as I was walking across that beautiful La Jolla campus. I stopped in my tracks when it hit me—I believed in God! I was so happy; it was like a weight had been lifted from my heart. I realized that most of the pain I'd experienced in my life was of my own making, but that God had used it to make me wiser and more compassionate. It was a great relief to discover that there was a reason for suffering, and that it was because God was loving and just. God could not be perfectly just unless I—just like everyone else—was made to suffer for the bad things I'd done.

The Count of Monte Cristo is one of my favorite, favorite books as well, and had the same impact on me as it did on her.

OK, that's enough for this post. Go read the rest, and please share it.

I spoke to her recently and she told me that she is working on several projects that are designed to get people more familiar with science and Bible issues. This woman is an expert Christian apologist and her life will have an influence. Are you going to be like her? Will you mentor others to be like her? Will you marry someone like her? Will you raise children who are like her? I think we should all have a plan to study the areas that are important and have an influence for God with what we learn.

**Positive arguments for Christian theism**

- The kalam cosmological argument and the Big Bang theory

- The fine-tuning argument from cosmological constants and quantities
- The origin of life, part 1 of 2: the building blocks of life

# Study: belief in free will linked to ability to behave morally and to help others

**Wintery Knight** · 11 April 2021 · Archived copy · Original

A while back I finished reading "God's Crime Scene", the new book by J. Warner Wallace. I wanted to post something about some studies he mentioned in Chapter 6, on free will. This is one of the places where he found evidence in a surprising area.

Wallace says that free will makes more sense if theism is true, because we have non-material souls that interact with our bodies, but are not causally determined by them. On atheism, only matter exists, and you can't get free will (or consciousness) from matter. So atheists like Sam Harris and Alex Rosenberg, for example, deny free will, because they are materialists and atheists.

Anyway, here's what he writes on p. 256:

> In 2008, researchers from the University of Minnesota and the University of British Columbia conducted experiments highlighting the relationship between a belief in determinism and immoral behavior. They found students who were exposed to deterministic literature prior to taking a test were more likely to cheat on the test than students who were not exposed to literature advocating determinism. The researchers concluded those who deny free will are more inclined to believe their efforts to act morally are futile and are, therefore, less likely to do so.
>
> In addition, a study conducted by researchers from Florida State University and the University of Kentucky found participants who were exposed to deterministic literature were more likely to act aggressively and less likely to be helpful toward others." Even determinist Michael Gazzaniga conceded: "It seems that not only do we believe we control our actions, but it is good for everyone to believe it."" The existence of free will is a common characteristic of our experience, and when we deny we have this sort of free agency, there are detrimental consequences.

I decided to look up these studies.

Here's the abstract for first study: (2008)

> Does moral behavior draw on a belief in free will? Two experiments examined whether inducing participants to believe that human behavior is predetermined would encourage cheating. In Experiment 1, participants read either text that encouraged a belief in determinism (i.e., that portrayed behavior as the consequence of environmental and genetic factors) or neutral text. Exposure to the deterministic message increased cheating on a task in which participants could passively allow a flawed computer program to reveal answers to mathematical problems that they had been instructed to solve themselves. Moreover, increased cheating behavior was mediated by decreased belief in free will. In Experiment 2, participants who read deterministic statements cheated by overpaying themselves for performance on a cognitive task; participants who read statements endorsing free will did not. These findings suggest that the debate over free will has societal, as well as scientific and theoretical, implications.

And the abstract for the second study: (2009)

> Laypersons' belief in free will may foster a sense of thoughtful reflection and willingness to exert energy, thereby promoting helpfulness and reducing aggression, and so disbelief in free will may make behavior more reliant on selfish, automatic impulses and therefore less socially desirable. Three studies tested the hypothesis that disbelief in free will would be linked with decreased helping and increased aggression. In Experiment 1, induced disbelief in free will reduced willingness to help others. Experiment 2 showed that chronic disbelief in

> free will was associated with reduced helping behavior. In Experiment 3, participants induced disbelief in free will caused participants to act more aggressively than others. Although the findings do not speak to the existence of free will, the current results suggest that disbelief in free will reduces helping and increases aggression.

So what to make of this?

If you're an atheist, then you are a physical object. And like every other physical object in the universe, your behavior is determined by genetic programming (if you're alive) and external inputs. Material objects do not have the ability to make free choices, including moral choices.

Here's prominent atheist Jerry Coyne's editorial in USA Today to explain why atheists can't ground free will.

Excerpt:

> And that's what neurobiology is telling us: Our brains are simply meat computers that, like real computers, are programmed by our genes and experiences to convert an array of inputs into a predetermined output. Recent experiments involving brain scans show that when a subject "decides" to push a button on the left or right side of a computer, the choice can be predicted by brain activity at least seven seconds before the subject is consciously aware of having made it. (These studies use crude imaging techniques based on blood flow, and I suspect that future understanding of the brain will allow us to predict many of our decisions far earlier than seven seconds in advance.) "Decisions" made like that aren't conscious ones. And if our choices are unconscious, with some determined well before the moment we think we've made them, then we don't have free will in any meaningful sense.

Atheist William Provine says atheists have no free will, no moral accountability and no moral significance:

> Let me summarize my views on what modern evolutionary biology tells us loud and clear — and these are basically Darwin's views. There are no gods, no purposes, and no goal-directed forces of any kind. There is no life after death. When I die, I am absolutely certain that I am going to be dead. That's the end of me. There is no ultimate foundation for ethics, no ultimate meaning in life, and no free will for humans, either.

(Source)

If you don't have free will, then you can't make moral choices, and you can't be held morally responsible. No free will means no morality. Can you imagine trying to get into any sort of enterprise with someone who has this view of moral choices? A marriage, or a business arrangement, etc? It would be crazy to expect them to behave morally, when they don't even think that moral choices is possible. It just excuses all sorts of bad behavior, because no one is responsible for choosing to do the right thing.

Believers in materialism are going to struggle with prescriptive morality, including self-sacrificial care and concern for others. Their worldview undermines the *rationality* of the moral point of view. You might find atheists acting morally for their own purposes, but their worldview doesn't rationally ground it. This is a big problem for people who can see objective morality woven into the universe – and themselves – because they have the awareness of objective right and wrong.

## Choosing to do the right thing

I think what atheists like to say is "I can be moral, too". That's not interesting. What is interesting is whether it is rational for you to be moral when doing the right thing sets you back. When I look at the adultery of Dawkins, the polyamory of Carrier, the divorces of Shermer and Atkins, etc. I am not seeing anything that really wows me about their ability to do the right thing when it was hard for them to do it. They all deny free will of course, and think that trying to resist temptation is a waste of time.

Wallace explains how the awareness of free will and moral choices caused him to turn away from atheism, in this blog post.

He writes:

> As an atheist, I chose to cling to naturalism, in spite of the fact that I lived each day as though I was capable of using my *mind* to make *moral choices* based on more than my own opinion. In addition, I sought *meaning and purpose* beyond my own hedonistic preferences, as though meaning was to be discovered, rather than created. I called myself a naturalist while embracing three characteristics of reality that simply cannot be explained by naturalism. As a Christian, I'm now able to acknowledge the "grounding" for these features of reality. My *philosophical* worldview is consistent with my *practical* experience of the world.

I think atheists who want to be honest about their own experience of first-person consciousness, free will, moral realism, etc. will do well to just accept that theism rationally grounds all of these things, and so you should accept theism. Theism is real. If you like morality, and want to be a virtuous person, then you should accept theism.

# How well are Democrats doing on crime prevention and border security?

**Wintery Knight** · 12 April 2021 · Archived copy · Original

So, one of the reasons why people vote for the Republican party is because Republican policies are better for law-abiding people to be safe. Republicans are in favor of allowing law-abiding people to defend themselves from criminals. Republicans are in favor of using police to investigate and prevent crimes. Republicans are in favor of securing the border and keeping criminal aliens out.

So the Democrats won the 2020 election, and they have the House, Senate and White House. So, how are they doing on crime?

Here's the Washington Examiner:

> A new crime reporting system released by the FBI shows that the murder rate in virtually every city in the United States is at its highest levels in more than two decades.
>
> In 2020, the country saw more homicides than in any year since 1998. Experts came to that conclusion after looking at reported quarterly data from roughly 12,000 agencies in various cities and states.
>
> The spike, totaling at over 20,000 recorded homicides, was the largest one-year increase in U.S. history. Every city that reported data saw at least a 20%-25% jump in murders.
>
> […]In New York, murders rose an estimated 41% in 2020 over the previous year.
>
> Chicago saw an over 50% increase at 774 recorded homicides, and Los Angeles saw a roughly 20% increase.

Hmm, it looks like the people who wanted to "de-fund the police" and ban owning firearms for self-defense are not doing a very good job of crime prevention. Does it make sense to think that banning firearms and abolishing the police would work to reduce violent crime? It seems to me that these policies would increase violent crime. And that's exactly what we see. Even in Democrat-run areas where the police were not abolished, their budgets were slashed and they've been hamstrung by woke regulations, so they can't do their jobs. And Biden just announced more restrictions on gun ownership by law-abiding people. Those restrictions don't affect criminals, of course. They just affect law-abiding gun owners.

## Border security

Well, how are things going on the Southern border? Are the Democrats keeping out criminal aliens and terrorists?

Here is the far-left Washington Post:

> Preliminary enforcement data for March confirms what border officials have been saying for weeks: The number of migrants crossing into the United States has skyrocketed to the highest levels in at least 15 years, and record numbers of teenagers and children arriving without parents have overwhelmed the government's ability to care for them.
>
> Though President Biden and his top officials have refused to acknowledge it is a crisis, the latest data shows the new administration under extraordinary strain.
>
> U.S. agents took more than 171,000 migrants into custody last month, according to U.S. Customs and Border Protection figures that contradict Biden's claims that his administration is facing an influx no different from previous years. The rapid increase in border arrests and detentions — which has more than doubled since January — underscores the magnitude of the challenge facing an administration that has promised more-humane and more-welcoming immigration policies.
>
> Biden officials now find themselves racing to add thousands of emergency shelter beds to alleviate dangerous

> overcrowding inside tent enclosures, where Central American teens and children are being held for longer than legal limits and sleeping shoulder to shoulder under foil blankets for days on end.

Democrats might be tempted to say that it's not Biden's fault that there is a crisis like this – a crisis that is costing taxpayers $1 million *per day* – but that would ignore the specific policies he and his band of secular leftists have put in.

The Washington Examiner explains:

> The Republicans pointed to several things Biden has done to create the current crisis. First, he did away with President Donald Trump's Remain in Mexico policy, which required asylum seekers to stay in Mexico, not in the United States, while their asylum claims were adjudicated. Second, Biden ended Trump's asylum agreements with the Northern Triangle countries — El Salvador, Guatemala, and Honduras — to steer would-be asylum seekers from those nations into safe countries other than the U.S. Third, Biden gutted Trump's use of Title 42, the government's authority to expel most migrants for the purpose of controlling the spread of COVID. Biden did not throw Title 42 away altogether but is by some accounts now letting most would-be migrants stay rather than be turned away because of the pandemic.
>
> The surge, Scalise said, "was created when President Biden got rid of things like the Remain in Mexico policy. He could put that back in place tomorrow and stop this surge of illegals coming over."
>
> In addition, Biden came into office promising to end all deportations for the first 100 days of his presidency. With very few exceptions, he has done just that. Finally, Biden stopped construction of the Trump border wall. All of these moves opened the door to would-be illegal crossers and also sent the message to thousands of people in the Northern Triangle and elsewhere: Come now, and you can stay.

Biden also reinstated the "catch and release" policy that Trump eliminated. That means that people who are caught crossing the border are given a court date, then immediately released into the United States. Few show up for their court date. How will illegal aliens live? It seems to me that they will be more likely to resort to committing crimes, but that's no concern of the Democrats who rule us… they couldn't care less if a few Americans get robbed or killed.

Next time, we need to do better.

# How are Christians treated in communist, atheist China?

**Wintery Knight** · 13 April 2021 · Archived copy · Original

Now, a lot of atheists are desperate to affirm that they have a rationally-grounded system of morality. They want to claim rational grounding for moral values, moral duties, inalienable human rights, etc. But you can find out a lot about atheist morality by looking at countries that have abandoned Christianity. Countries where atheists are in the majority, ruling over the moral minority.

Consider this article from the New York Post:

> China is attempting to brainwash Christians by holding them in mobile "transformation facilities," according to a new report.
>
> Radio Free Asia relayed stories last week from a man given the pseudonym Li Yuese, who said he was beaten in a windowless room for nearly 10 months.
>
> Li said he was detained after authorities raided his house church in 2018. "There were no windows, no ventilation and no time allowed outside," said Li. "I was given just two meals a day, which were brought to the room by a designated person."
>
> He said authorities "threaten, insult and intimidate you. These were United Front officials, men, women, sometimes unidentified, usually in plain clothes. The police turn a blind eye to this."
>
> "You have to accept the statement they prepare for you."
>
> Li added that if "you refuse, you will be seen as having a bad attitude and they will keep you in detention and keep on beating you."
>
> His fellow inmates, he said, were released on bail and had taken part in church-related activities.
>
> The suppression affected both Protestants and Catholics, with priests disappearing for "five, six, even 10 years at a stretch," he said.

According to the The Black Book of Communism, published by Harvard University Press, over 100 million innocent people were killed in atheistic, communist regimes in the last century. In the past, consistent atheists like Stalin who had power enough to ignore objective morality caused millions of innocent deaths. And you can even see atheism killing lots and lots of people in countries like North Korea today – where the official state religion is atheism. Why is that? It's because the worldview of atheism teaches that the universe, and human beings, are here by accident. We are all just molecules in motion, and there is no inherent dignity or purpose to any of our lives that would obligate others to treat us a certain way.

On the Christian view, every single person has dignity because they are made in the image of God, and made to know him. Christians can never treat another person (of any religion or no religion) in any way that would discourage them from knowing God and experiencing his love for us. We could never hurt anyone in a way that causes them to turn against God. We are careful with people, because we want to act towards them in a way that helps them to accomplish this purpose.

Contrast that with atheists. Almost all atheists are pro-abortion, and even those who aren't tend to vote for political candidates who favor unrestricted abortion through all 9 months of pregnancy, and even after birth. Barack Obama voted against restrictions on infanticide *twice* as a state senator. And this wasn't a problem for the atheists who who supported him. In an accidental universe, there is no rational basis for human rights. There's no way we ought to be. And no free will to allow for making moral decisions. We're just machines made out of meat. So, why would a powerful machine care about honoring the needs of a weaker unborn machine? Or consider atheists who seek to weaken and overturn natural marriage. Why would powerful adults have to restrain themselves to provide children with a biological mother and father? If atheism is true, anything goes. They act nicely when things are going their

way, but when their right to happiness is threatened by your conscience rights or your religious liberty, then get ready to be destroyed.

Of course there are lots of atheists in the Judeo-Christian West who live more peacefully, because they are living in a background of objective morality and human rights provided by Western religions. But in countries like North Korea, with a state religion that cannot ground free will or objective morality or human rights or judgment after death, there are fewer restraints. You really have to judge atheists not by how they act when they are in the minority of a nation founded on Judeo-Christian principles. You have to judge atheists by how they act when they take control, and are unopposed.

# Democrat legislator: “No more policing, incarceration, and militarization”

**Wintery Knight** · 14 April 2021 · Archived copy · Original

Detroit News reports:

> **Policing in the United States is “intentionally racist” and “can’t be reformed,” U.S. Rep. Rashida Tlaib tweeted Monday night, a day after a White Minnesota police officer reportedly mistook her pistol for her Taser and fatally shot a Black man.**
>
> […]”It wasn’t an accident,” she wrote. “Policing in our country is inherently & intentionally racist. Daunte Wright was met with aggression & violence. I am done with those who condone government funded murder. No more policing, incarceration, and militarization. It can’t be reformed.”
>
> As of Tuesday afternoon, the tweet had been liked more than 20,000 times, retweeted more than 4,000 times — and had received thousands of replies supporting Tlaib’s call for abolishing police and thousands of others panning it.

It seems like abolishing the police and abolishing the armed forces and releasing all violent prisoners has significant support within the Democrat party.

Here are the numbers from the Daily Wire:

> A solid body of evidence finds no structural bias in the criminal-justice system with regard to arrests, prosecution or sentencing, Mac Donald writes; rather, crime and suspect behavior, not race, determine most police actions. [Heather] Mac Donald writes:
>
> In 2019 police officers fatally shot 1,004 people, most of whom were armed or otherwise dangerous. African-Americans were about a quarter of those killed by cops last year (235), a ratio that has remained stable since 2015. That share of black victims is less than what the black crime rate would predict, since police shootings are a function of how often officers encounter armed and violent suspects. In 2018, the latest year for which such data have been published, African-Americans made up 53% of known homicide offenders in the U.S. and commit about 60% of robberies, though they are 13% of the population.
>
> The police fatally shot nine unarmed blacks and 19 unarmed whites in 2019, according to a Washington Post database, down from 38 and 32, respectively, in 2015. The Post defines “unarmed” broadly to include such cases as a suspect in Newark, N.J., who had a loaded handgun in his car during a police chase. In 2018 there were 7,407 black homicide victims. Assuming a comparable number of victims last year, those nine unarmed black victims of police shootings represent 0.1% of all African-Americans killed in 2019. By contrast, a police officer is 18½ times more likely to be killed by a black male than an unarmed black male is to be killed by a police officer.
>
> Mac Donald further highlights violence that was committed against blacks over the weekend in Chicago and notes that the reason that blacks die from homicide at a rate 8X higher than whites and Latinos combined is not because of the police, but because of crime.
>
> Mac Donald also highlights studies by both the Justice Department under President Obama and the finding of an African-American Harvard economist:
>
> A 2015 Justice Department analysis of the Philadelphia Police Department found that white police officers were less likely than black or Hispanic officers to shoot unarmed black suspects. Research by Harvard economist Roland G. Fryer Jr. also found no evidence of racial discrimination in shootings. Any evidence to the contrary fails to take into account crime rates and civilian behavior before and during interactions with police.

> Researchers in the Proceedings of the National Academy of Sciences found similar results. “We find no evidence of anti-Black or anti-Hispanic disparities across shootings, and White officers are not more likely to shoot minority civilians than non-White officers,” the report found. “Instead, race-specific crime strongly predicts civilian race. This suggests that increasing diversity among officers by itself is unlikely to reduce racial disparity in police shootings.”

Democrat legislator Rashida Tlaib has armed security, fences and other protective measures. Her policies can only hurt you. You’re paying for her salary, by the way. But she thinks she’s there to protect criminals and terrorists. Personally, I’m already living in semi-rural suburbs. I have a plan to move out even further when I retire in 4 years. I hope you have a plan for dealing with the abolition of the police and military, too.

# #ExposeCNN: Project Veritas records CNN staffer admitting CNN's pro-Democrat bias

**Wintery Knight** · 15 April 2021 · Archived copy · Original

Project Veritas has caught a highly-ranked CNN employee admitting pro-Democrat bias. This is amazing. The CNN employee was on Tinder. So, Project Veritas did the old "honeypot" trap = extracting information by using an attractive spy as bait. AND IT WORKED. They went on 5 dates, and Project Veritas got all the inside information about CNN's bias.

Here's the first article from the New York Post:

> A CNN staffer admitted in a secretly recorded video that his network produced "propaganda" to oust former President Donald Trump during the 2020 presidential election — and bragged about their success.
>
> Charlie Chester, a technical Director at the cable network, was filmed by Project Veritas during a series of fake Tinder dates as he explained how they "got Trump out" of office.
>
> "Look what we did, we [CNN] got Trump out. I am 100 percent going to say it, and I 100 percent believe that if it wasn't for CNN, I don't know that Trump would have got voted out," Chester said, adding that he came to work at CNN because he "wanted to be a part of that."
>
> "Our focus was to get Trump out of office, right? Without saying it, that's what it was."
>
> Chester explained how they overdramatized Trump health issues by bringing in medical experts.
>
> "[Trump's] hand was shaking or whatever, I think. We brought in so many medical people to all tell a story that was all speculation – that he was neurologically damaged, and he was losing it. He's unfit to – you know – whatever. We were creating a story there that we didn't know anything about. I think that's propaganda," he said.

Wow, he admitted it. CNN employee admits that CNN is propaganda. We'd better be careful with this, because this is how the secular left takes power – by lying their way into power.

Second New York Post article:

> The CNN staffer who was secretly recorded admitting the network used "propaganda" to help get Joe Biden elected president also said they played up the COVID-19 death toll for ratings — and that the order came down directly from top brass.
>
> Charlie Chester, a technical Director at the cable network, was filmed by Project Veritas during a series of fake Tinder dates as he explained how "Fear really drives numbers."
>
> "COVID? Gangbusters with ratings," Chester told the unidentified PV staffer.
>
> "Which is why we constantly have the death toll on the side," he continued, making reference to the coronavirus death tracker that would appear on the screen. "It would make our point better if [the COVID death toll] was higher."
>
> […]Chester claimed there was a "red phone" that network president Jeff Zucker would use to call the control room to order producers to play up the Covid death count on screen.

This part is my favorite:

> "Any reporter on CNN, what they're actually doing is they're telling the person what to say. It's always, like, leading them in a direction before they even open their mouths," he said.
>
> "And the only people we let on air, for the most part, are people that have a proven track record of taking the

> bait.”

Previously, I blogged about how CNN rehearses with guests what they want them to say before putting them on screen.

It’s so amazing that Project Veritas is able to get this information out into the public. I’ve blogged about academic studies that confirmed the pro-Democrat bias of the mainstream news media before. You can find out how they think by analyzing their sources, their words, and their political contributions. But this is something else. Now we have CNN admitting to their Democrat bias in their own words. What’s amazing is how many American voters still watch this garbage and think they are getting real journalism. CNN is fake news, and the people who watch it are lazy and uninformed.

# What happened to gas prices and other consumer prices after the Democrats took over?

**Wintery Knight** · 16 April 2021 · Archived copy · Original

You might think that electing Democrats would be wonderful for the poor. You'd think that, because Democrats are always talking about the poor people and how much they want to help them. And how will they help them? By taxing and regulating businesses. And what do the businesses do? They pass the higher taxes and fees onto the consumers, of course.

The Tennessee Star explains:

> The Bureau of Labor Statistics released data Tuesday showing a sharp increase in consumer prices, especially gasoline, as many Americans struggle to make ends meet.
>
> March saw a 0.6% increase in consumer prices, the largest spike in nearly a decade. That increase can be attributed in large part to a rise in inflation.
>
> However, increased inflation, a rise in demand for crude oil, and the Biden administration's proposed new taxes and regulatory measures could send gas and energy prices soaring even higher in the months to come, critics contend.
>
> In March, gasoline prices rose 9.1% and natural gas rose 2.5%, contributing to an overall increase of 5% for energy costs last month. For the year, food prices are up 3.5%, gasoline prices are up 22.5%, and overall energy prices are up 13.2%.
>
> The rise in costs come as many Americans struggle financially during the COVID-19 pandemic and President Joe Biden considers tax increases and more regulations that critics say would slow economic growth.
>
> During a Monday meeting with lawmakers, Biden reportedly expressed openness to adding five cents to the federal gas tax, which would be a 27% increase over the current 18.4 cents.

And this is the key point about gas prices going up:

> The increase in energy prices, particularly gasoline, leads to an overall spike in the price of consumer goods. When drivers spend more on gasoline to transport goods to market, that cost is passed on to consumers.

Who suffers the most from higher gas prices? And who suffers the most from the effect of higher gas prices on other consumer goods? It's not the wealthy elites who vote for Democrats. It's the people who are barely getting by. When you cancel pipelines, and raise corporate tax rates, you raise the prices that individuals pay for basic necessities of life. If was TRUMP who lowered corporate tax rates, and TRUMP who pursued an all-of-the-above energy policy. That's why we had jobs and that's why we had low gas prices.

Next time we have an election, let's focus on policies, instead of telling everyone how good we are, because we disagree with mean men who write mean tweets.

# How the discovery of the cosmic microwave background radiation falsified atheism

**Wintery Knight** · 17 April 2021 · Archived copy · Original

Prior to certain scientific discoveries, most people thought that the universe had always been here, and no need to ask who or what may have caused it. But today, that's all changed. Today, the standard model of the origin of the universe is that all the matter and energy in the universe came into being in an event scientists call "The Big Bang". At the creation event, space and time themselves began to exist, and there is no material reality that preceded them.

So a couple of quotes to show that.

> An initial cosmological singularity… forms a past temporal extremity to the universe. We cannot continue physical reasoning, or even the concept of spacetime, through such an extremity… On this view the big bang represents the creation event; the creation not only of all the matter and energy in the universe, but also of spacetime itself.

Source: P. C. W. Davies, "Spacetime Singularities in Cosmology," in The Study of Time III, ed. J. T. Fraser (Berlin: Springer Verlag ).

And another quote:

> [A]lmost everyone now believes that the universe, and time itself, had a beginning at the big bang.

Source: Stephen Hawking and Roger Penrose, The Nature of Space and Time, The Isaac Newton Institute Series of Lectures (Princeton, N. J.: Princeton University Press, 1996), p. 20.

So, there are several scientific discoveries that led scientists to accept the creation event, and one of the most interesting and famous is the discovery of the cosmic microwave background radiation.

Here's the history of how that discovery happened, from the American Physical Society web site:

> Bell Labs radio astronomers Arno Penzias and Robert Wilson were using a large horn antenna in 1964 and 1965 to map signals from the Milky Way, when they serendipitously discovered the CMB. As written in the citation, "This unexpected discovery, offering strong evidence that the universe began with the Big Bang, ushered in experimental cosmology." Penzias and Wilson shared the Nobel Prize in Physics in 1978 in honor of their findings.
>
> The CMB is "noise" leftover from the creation of the Universe. The microwave radiation is only 3 degrees above Absolute Zero or -270 degrees C,1 and is uniformly perceptible from all directions. Its presence demonstrates that that our universe began in an extremely hot and violent explosion, called the Big Bang, 13.7 billion years ago.
>
> In 1960, Bell Labs built a 20-foot horn-shaped antenna in Holmdel, NJ to be used with an early satellite system called Echo. The intention was to collect and amplify radio signals to send them across long distances, but within a few years, another satellite was launched and Echo became obsolete.2
>
> With the antenna no longer tied to commercial applications, it was now free for research. Penzias and Wilson jumped at the chance to use it to analyze radio signals from the spaces between galaxies.3 But when they began to employ it, they encountered a persistent "noise" of microwaves that came from every direction. If they were to conduct experiments with the antenna, they would have to find a way to remove the static.
>
> Penzias and Wilson tested everything they could think of to rule out the source of the radiation racket. They knew it wasn't radiation from the Milky Way or extraterrestrial radio sources. They pointed the antenna

> towards New York City to rule out "urban interference", and did analysis to dismiss possible military testing from their list.4
>
> Then they found droppings of pigeons nesting in the antenna. They cleaned out the mess and tried removing the birds and discouraging them from roosting, but they kept flying back. "To get rid of them, we finally found the most humane thing was to get a shot gun…and at very close range [we] just killed them instantly. It's not something I'm happy about, but that seemed like the only way out of our dilemma," said Penzias.5 "And so the pigeons left with a smaller bang, but the noise remained, coming from every direction."6
>
> At the same time, the two astronomers learned that Princeton University physicist Robert Dicke had predicted that if the Big Bang had occurred, there would be low level radiation found throughout the universe. Dicke was about to design an experiment to test this hypothesis when he was contacted by Penzias. Upon hearing of Penzias' and Wilson's discovery, Dicke turned to his laboratory colleagues and said "well boys, we've been scooped."7
>
> Although both groups published their results in Astrophysical Journal Letters, only Penzias and Wilson received the Nobel Prize for the discovery of the CMB.
>
> The horn antenna was designated a National Historic Landmark in 1990. Its significance in fostering a new appreciation for the field of cosmology and a better understanding of our origins can be summed up by the following: **"Scientists have labeled the discovery [of the CMB] the greatest scientific discovery of the 20th century."**8

It's the greatest scientific discovery of the 20th century.

In the New York Times, Arno Penzias commented on his discovery – the greatest discovery of the 20th century – so:

> The best data we have [concerning the Big Bang] are exactly what I would have predicted, had I nothing to go on but the five books of Moses, the Psalms, the bible as a whole.

Just one problem with the greatest scientific discovery of the 20th century: atheists don't accept it. Why not?

Here's a statement from the Secular Humanist Manifesto, which explains what atheists believe about the universe:

> Religious humanists regard the universe as self-existing and not created.

For a couple of examples of how atheistic scientists respond to the evidence for a cosmic beginning, you can check out this post, where we get responses from cosmologist Lawrence Krauss, and physical chemist Peter Atkins.

You cannot have the creation of the universe be true AND a self-existing, eternal universe ALSO be true. Someone has to be wrong. Either the science is wrong, or the atheist manifesto is wrong. I know where I stand.

**Positive arguments for Christian theism**

- The kalam cosmological argument and the Big Bang theory
- The fine-tuning argument from cosmological constants and quantities
- The origin of life, part 1 of 2: the building blocks of life
- The origin of life, part 2 of 2: biological information
- The sudden origin of phyla in the Cambrian explosion
- Galactic habitable zones and circumstellar habitable zones
- Irreducible complexity in molecular machines
- The creative limits of natural selection and random mutation

- Angus Menuge's ontological argument from reason
- Alvin Plantinga's epistemological argument from reason

- Arguments and scientific evidence for non-physical minds

# How the WMAP satellite confirmed nucleosynthesis predictions and falsified atheism

**Wintery Knight** · 18 April 2021 · Archived copy · Original

Prior to certain scientific discoveries, most people thought that the universe had always been here, and no need to ask who or what may have caused it. But today, that's all changed. Today, the standard model of the origin of the universe is that all the matter and energy in the universe came into being in an event scientists call "The Big Bang". At the creation event, space and time themselves began to exist, and there is no material reality that preceded them.

So a couple of quotes to show that.

> An initial cosmological singularity… forms a past temporal extremity to the universe. We cannot continue physical reasoning, or even the concept of spacetime, through such an extremity… On this view the big bang represents the creation event; the creation not only of all the matter and energy in the universe, but also of spacetime itself.

Source: P. C. W. Davies, "Spacetime Singularities in Cosmology," in The Study of Time III, ed. J. T. Fraser (Berlin: Springer Verlag ).

And another quote:

> [A]lmost everyone now believes that the universe, and time itself, had a beginning at the big bang.

Source: Stephen Hawking and Roger Penrose, The Nature of Space and Time, The Isaac Newton Institute Series of Lectures (Princeton, N. J.: Princeton University Press, 1996), p. 20.

So, there are several scientific discoveries that led scientists to accept the creation event, and one of the most interesting and famous is the discovery of how elements heavier than hydrogen were formed.

Nucleosynthesis: forming heavier elements by fusion

Here's the history of how that discovery happened, from the National Aeronautics and Space Administration (NASA) web site:

> The term nucleosynthesis refers to the formation of heavier elements, atomic nuclei with many protons and neutrons, from the fusion of lighter elements. The Big Bang theory predicts that the early universe was a very hot place. One second after the Big Bang, the temperature of the universe was roughly 10 billion degrees and

> was filled with a sea of neutrons, protons, electrons, anti-electrons (positrons), photons and neutrinos. As the universe cooled, the neutrons either decayed into protons and electrons or combined with protons to make deuterium (an isotope of hydrogen). During the first three minutes of the universe, most of the deuterium combined to make helium. Trace amounts of lithium were also produced at this time. This process of light element formation in the early universe is called “Big Bang nucleosynthesis” (BBN).

The creation hypothesis predicts that there will be specific amounts of these light elements formed as the universe cools down. Do the predictions match with observations?

Yes they do:

> The predicted abundance of deuterium, helium and lithium depends on the density of ordinary matter in the early universe, as shown in the figure at left. These results indicate that the yield of helium is relatively insensitive to the abundance of ordinary matter, above a certain threshold. We generically expect about 24% of the ordinary matter in the universe to be helium produced in the Big Bang. This is in very good agreement with observations and is another major triumph for the Big Bang theory.

Moreover, WMAP satellite measurements of mass density agree with our observations of these light element abundances.

Here are the observations from the WMAP satellite:

> > 
> Scientific observations match predictions

And here is how those WMAP measurements confirm the Big Bang creation event:

> However, the Big Bang model can be tested further. **Given a precise measurement of the abundance of ordinary matter, the predicted abundances of the other light elements becomes highly constrained. The WMAP satellite is able to directly measure the ordinary matter density and finds a value of 4.6% (±0.2%), indicated by the vertical red line in the graph. This leads to predicted abundances shown by**

> **the circles in the graph, which are in good agreement with observed abundances. This is an important and detailed test of nucleosynthesis and is further evidence in support of the Big Bang theory.**

"An important and detailed test".

For completeness, we should learn how elements heavier than these light elements are formed:

> Elements heavier than lithium are all synthesized in stars. During the late stages of stellar evolution, massive stars burn helium to carbon, oxygen, silicon, sulfur, and iron. Elements heavier than iron are produced in two ways: in the outer envelopes of super-giant stars and in the explosion of a supernovae. All carbon-based life on Earth is literally composed of stardust.

That's a wonderful thing to tell a young lady when you are on a date: "your body is made of stardust". In fact, as I have argued before, this star formation, which creates the elements necessary for intelligent life, can only be built if the fundamental constants and quantities in the universe are finely-tuned.

Now, you would think that atheists would be happy to find observations that confirm the origin of the universe out of nothing, but they are not. Actually, they are in denial.

Here's a statement from the Secular Humanist Manifesto, which explains what atheists believe about the universe:

> Religious humanists regard the universe as self-existing and not created.

For a couple of examples of how atheistic scientists respond to the evidence for a cosmic beginning, you can check out this post, where we get responses from cosmologist Lawrence Krauss, and physical chemist Peter Atkins.

You cannot have the creation of the universe be true AND a self-existing, eternal universe ALSO be true. Someone has to be wrong. Either the science is wrong, or the atheist manifesto is wrong. I know where I stand.

# Canadian police can stop people and fine them for being outside of their homes

**Wintery Knight** · 19 April 2021 · Archived copy · Original

I know in America we have a lot of people who were concerned about the loss of Constitutional liberties during the Wuh4n virus crisis. But I've noticed that in Canada, people don't stand up for their rights against government as much. They think that big government should take care of them (with their tax money) because big government knows best.

Here's the latest from one of Canada's two national newspapers about the province of Ontario:

> Citing rising COVID-19 case numbers, on Friday the Province of Ontario enacted one of the strictest lockdowns yet seen in the Western world, including empowering police to stop and question any person seen outside their home.
>
> "Moving forward, police will have the authority to require any individual who is not in a place of residence to, first, provide their purpose for not being at home, and provide their home address," said Ontario Solicitor General Sylvia Jones in a livestreamed Friday news conference. She added, "police will also have the authority to stop a vehicle to inquire about an individual's reason for leaving their residence."
>
> […]The new orders effectively confine Ontario's 14 million people to their home, save for a handful of permitted activities. "It is imperative that everyone limit their trips outside of the home to permitted purposes only, such as going to the grocery store or pharmacy, medical appointments, outdoor exercise, or for work that cannot be done remotely," said Jones.
>
> […]Accompanying the expansion of law enforcement powers was what Ontario Premier Doug Ford called the "strictest measures in all of North America." This included a full shutdown of outdoor amenities, including golf courses, basketball courts and playgrounds. Under the prior provisions of the Reopening Ontario Act, anyone caught on a jungle gym until the lifting of the measure can face fines of $750, to an individual maximum of $100,000 and up to a year in jail.
>
> While Ontario had previously allowed outdoor gatherings of up to five people, that has now been limited to "members of one's own household."

Did you get that? It says: "anyone caught on a jungle gym until the lifting of the measure can face fines of $750, to an individual maximum of $100,000 and up to a year in jail."

This part was (to me) amazing:

> Jones also announced the partial closure of Ontario's borders with the rest of Canada. Starting at midnight on Monday, roadblocks at the Manitoba and Quebec borders will now turn away any traveller who can't prove they are travelling for work, medical care or the exercise of Indigenous treaty rights. "Should an individual not have a valid reason to enter Ontario, they will be turned back," said Jones.

So, police are now able to arrest you without a warrant for any criminal violation. Just being outside without a good reason is enough for them to fine you, and presumably imprison you for repeated offenses. Seven-hundred and fifty dollars. And you're paying that AFTER paying the salaries of all the politicians, police, judges, teachers, etc. That's on top of the 45% that Canadians typically pay in income and sales taxes. Would you live in a place like that? Would you be content to pay the salaries of people with degrees in radio broadcasting (like their attorney general) to rule over you and restrict your basic human rights?

I have to tell you, this time they've gone too far, and I think this will be rolled back before too long.

# Equip yourself for conversations with Muslims with a new #apologetics course

**Wintery Knight** · 20 April 2021 · Archived copy · Original

My family is half Muslim. I've often noticed that Christians who attend church don't really learn a lot about how to talk to Muslims. They're sort of in their own silo, and not interested in having these conversations with outsiders. Although you might get lucky and find a Muslim who wants to hear about Christianity, a much better approach would be to ask a Muslim questions that show that you know something about what they believe.

When I was working for a Fortune 100 company, a Muslim co-worker asked me if I had looked at any of the other religions. He was an Indian-born Muslim who had married a Hindu wife, then gone atheist in response to their families rejecting them. I mentioned that my mother's side was all Muslim, and my father's side was all Hindu. He asked me whether I knew what the difference was between Sunni and Shia Muslims. I don't remember exactly what I said, but my answer was close enough to correct that he was delighted. We had a good conversation after that.

With that in mind, I wanted to recommend to you a resource from a staff apologist who works for Women in Apologetics. You might remember her from my previous posts linking to her work. She is the one who dumped sharing her testimony in favor of making an evidential case for her worldview, and the one who also likes to have conversations with people about spiritual things. And it turns out that she knows quite a lot about Islam, from her experiences as well as from her studies.

Here is part of her biography:

> I have been privileged to serve in member care, discipleship, counseling, missions, college ministry, women's ministry, and music ministry. I've traveled to nearly thirty countries, including Afghanistan, Egypt, Jordan, Burundi, Peru, Uganda, India, Thailand, Greece, Turkey, Italy, the Philippines, and throughout Central America. My relationships with people of other cultures have solidified my faith, broadened my perspective, and enriched my life immensely.

What I like about this is that she chose Islam for her area of interest based on her compassion for Muslims living in these countries. But it's a controversial topic, not one that is designed to attract popularity. Clearly, her ambition is to make a difference for God and for Muslims who need God, not to make a name for herself by appealing to people looking for entertainment. I get so discouraged by the top books that Christian women are reading. I would like to see the careful use of reason and evidence a normal part of the Christian woman's life.

She has a new 20-part course starting June 7th that will equip you to have conversations with Muslims. Registration is open now.

Here's the description:

> Led by WIA's Islam Ministry Specialist, Laura Powell, Islam Foundations is a 10-week course that will equip Christians to have productive conversations with Muslims by preparing them to understand the similarities and differences between the two worldviews, respond to the most common objections to Christianity made by Muslims, and raise thoughtful objections to Islam, out of love and compassion for God's image-bearers.

Each week features two lessons. Here are the weekly topics:

- Week 1: Introduction & Barriers to Understanding
- Week 2: The Islamic Dilemma & Building Bridges
- Week 3: The Deity of Jesus & The Death of Jesus
- Week 4: The Resurrection of Jesus & Muhammad's Life and Teachings

- Week 5: Violence According to the Prophet of Islam & Slavery, Supremacy, and Spiritual Slipups
- Week 6: The Death of Muhammad & The Miraculous Qu'ran – Perfect Preservation
- Week 7: The Miraculous Qu'ran – Four More Evidences & The Three Stages of Jihad
- Week 8: Violence in the Old Testament & Violence in Church History
- Week 9: Trinity or Tawhid & Was Muhammad Prophesied in the Bible
- Week 10: Women in Islam & A Christian Response

She's also bringing in other experts and interviewing them about their experiences discussing worldviews with Muslims.

Here's the trailer for the course:

And the speaker will be answering questions about Islam this evening live on Youtube at 4 PM Pacific, 7 PM Eastern.

If you know any women who are interested in learning apologetics, this would be a good thing to show them.

I've had a good impression of her organization "Women in Apologetics". They seem to favor an evidence-based approach that strikes me as very good for men like me who like engineering and evidence and problem-solving. What I want is to be equipped for adventures. Give me some good material that will wow my Muslim or atheist co-workers. Apologetics conversations make my pulse race. It's fun to be called by God and to be a good ambassador.

# Courage under fire: Ronald Speirs and Easy Company at the Battle of Foy

**Wintery Knight** · 21 April 2021 · Archived copy · Original

I try to occasionally post something that shows a particularly brave action from some time and place in military history. For example, I previously wrote about Medal of Honor winner Michael Murphy in 2011. Last year, his story was told more widely in the movie "Lone Survivor", which I recommend to everyone. Today I want to highlight another hero: Ronald Speirs.

It is January 1945 and the famous "Screaming Eagles", the 101st Airborne division, are about to turn the tide of the Battle of the Bulge in Bastogne.

Let's read about the Battle of Foy courtesy of a scenario description from the wargame "Flames of War". (Note: LMG = light machine gun, in this case, a .30 caliber machine gun)

Excerpt:

> E or 'Easy' Company, 2nd Battalion, 506th Parachute Infantry Regiment, 101st Airborne Division, like the rest of the division, was ordered on to the attack on 9 January 1945 as part of a general offensive to drive back the Germans from Bastogne. In the following days the 506th Regiment, along with the 501st Parachute Infantry Regiment, cleared the forests around the town of Foy and pushed the Germans out. Their next objective was to take Foy to allow the 11th Armored Division to attack from Foy across the fields northeast towards Noville.
>
> […]At 0900 hours on 13 January Easy Company attacked along the western edge of Foy, along the road. The new year had brought heavy snow and the it blanketed the ground and had reduced temperatures to well below zero. 2nd Battalion commander, Captain Dick Winters, had two section of LMGs deployed on the edge of the woods facing Foy to give Easy Company covering fire while they crossed the 250 yards of open field between the forest and Foy's buildings. There were just a few scattered trees and haystacks to give cover. As Easy Company advance the covering fire did its job, limiting the fire on the paratroopers to sporadic rifle shots. The approach on Foy made good pace under the cover of the LMG fire, but about 75 yards out from the edge of the village the skirmish line halted and the paratroopers hunkered down in the snow. Captain Winters stared in disbelief, wondering what was going on.
>
> Lieutenant Dike, who was commanding Easy Company, had been overwhelmed with indecision. It became obvious to Winters that Dike didn't know what he was doing, or had had a failure of confidence. His immediate impulse was to take command himself, but he noticed Lieutenant Ronald Speirs, a capable platoon commander from D Company, standing nearby. Winters ordered Speirs to take command of Easy Company and get the attack moving again. What Speirs did next amazed many of the paratroopers who witnessed it.
>
> **On receiving his orders from Winters, Speirs immediately ran at full speed down to where Dike and his HQ had taken cover behind a haystack and told Dike his orders, 'I'm here to take over'. After quickly being told of the situation by the NCOs he ran off towards Foy. The men of Easy Company immediately followed. On reaching the outskirt buildings of Foy, Speirs immediately sought to link up with I Company of 3rd Battalion who, despite only having 25 men, were supporting the attack from the other flank of Foy. He set off running again, through the German lines, to find I Company's commander. After consulting with its commander, Captain Gene Brown, he turned around and dashed back through Foy and the surprised Germans. Through all this the enemy fired on him with machine-guns, rifles and guns, but not a single shot hit its mark.**

To be a good military leader, you have to know many things. A knowledge of strategy and tactics, a knowledge of military history, the ability to see the battlefield, knowledge of your opponent, knowledge of weapons, and so on. But surely the greatest of these is courage. As Von Clausewitz says in his famous book "On War", "War is the

province of danger, and therefore courage above all things is the first quality of a warrior." Nothing inspires troops like a commander who is willing to take on the same risks that he asks his troops to take.

Take a look at this article from the Ivey School of Business journal, which talks about the characteristics of Canadian generals in Afghanistan.

Excerpt:

**A leader must be in front of subordinates**. This takes courage. Leadership from the front encapsulates the adage, *never ask a subordinate to do something that you, the leader, wouldn't do*. In Afghanistan, the leader must not only be in front, but he or she must *be seen* to be in front. Subordinates seek this reassurance from their leaders at all levels. Though they may be tentative, leaders must demonstrate character and moral strength. Their credibility is inextricably dependent on their ability to do so.. During his frequent visits to Afghanistan, former Chief of Defence Staff (CDS), General Rick Hillier, made a point of visiting troops that were situated in some of the most IED-laden areas of the Canadian sector. Through his demonstrated courage, he inspired leaders of all levels. "If the CDS goes there, so can I" was the resulting mindset. The current CDS, General Walt Natynczyk, has successfully continued this practice.

[…]All leaders need courage. It is the lynchpin of effective leadership. No one respects a wimp who will buy in to any idea no matter how inane it might be. Courage is having the strength of character to persist and hold on to ideas in the face of opposition. Here, I'm not restricting my treatment of courage as it relates to fear. It's also about strength of character and devotion to causes and ideas.

As Christians, we have a leader who led by example. We all need to learn to not be so concerned with looking out for ourselves and our happiness first, but to instead be willing to take risks and sacrifice ourselves to do the right thing. We Christians should all be courageous, because we are led by a courageous leader.

That doesn't necessarily mean going halfway across the world, it can mean reaching out to someone right there next to you who needs your help and support. Maybe that person has been running on an empty tank for a long time, but still trying to do the right thing. You never know when the opportunity to do something amazing will arise, but you won't take it if you keep thinking of how you might get hurt. You have to reconcile yourself that you are not here to avoid every possible kind of suffering. It doesn't mean that you take unnecessary risks, but it does mean *not letting fear stop you from doing the right thing*.

Now get out there and take that attack on in.

# What specific policies did Never Trump activists and Evangelicals for Biden want?

**Wintery Knight** · 22 April 2021 · Archived copy · Original

I'm trying to decide from Biden's actual governing what policies  Biden-support groups – Never Trump writers, pious Democrat pastors, and Evangelicals for Biden, etc. – wanted. I remember these people were anxious during the election to tell everyone how concerned they were about Trump's past sins, and his manner of speaking.

Here's an article from The Federalist about their boy Biden:

> Last week, legal accountability group Judicial Watch dropped a bombshell: a nearly 600-page report proving the U.S. government has been buying and trafficking "fresh" aborted baby body parts. These body parts, purchased by the U.S. Food and Drug Administration to "humanize" mice and test biologic drugs in scientific experiments, came from babies up to 24-weeks-old gestation, just weeks from being born.

I'm pretty sure I remember one of those Never Trump people talking about how much they wanted the government to purchase sliced off parts of 24-week-old unborn babies. Maybe it was David French or Russell Moore or John Piper or Tim Keller? Or someone else… Anyway, did you know that 22-week-old unborn babies can survive outside the womb? Those were pretty developed unborn children. I can understand atheist abortion rights activists wanting policies like this. But I'm curious why Never Trump "conservatives" wanted it. Maybe they're not conservative? And why did pious evangelicals for Biden want it? Maybe they're neither pious nor evangelical.

Here's another article from Daily Wire about more Biden policies:

> President Joe Biden on Tuesday filed an appeal seeking to force doctors and hospitals to perform potentially harmful transgender-related procedures and surgeries even if they hold objections.
>
> As outlined by BECKET Law's Luke Goodrich, a court in January struck down the administration's move to punish doctors who don't perform transgender-related procedures for supposed "sex discrimination." Biden on Tuesday officially appealed the ruling.

I'm pretty sure I remember one of those Never Trump people talking about how much they wanted to get their biological sex re-assigned for free by a Christian doctor. Maybe it was David French or Russell Moore or John Piper or Tim Keller? Or someone else… Anyway, did you know that Trump had opposed all these LGBT policies, and protected the conscience rights of Christian doctors? I knew that, because I was more concerned about policy than about virtue signaling my superior morals to people at church.

I noticed that Life News – a pro-life web site – is pretty upset about Biden's policies so far.

They write:

> Joe Biden is rapidly becoming the most pro-abortion president in U.S. history as he takes multiple actions to expand abortions and force taxpayers to subsidize them.
>
> On Wednesday, the Biden administration released a rule that will force taxpayers to fund the abortion industry through the Title X family planning program.
>
> The rule, issued by the U.S. Department of Health and Human Services, will end a pro-life regulation that President Donald Trump put in place to ensure Title X grants are not used to subsidize the killing of unborn babies in abortions.

Pro-life groups like Susan B. Anthony List and National Right to Life considered Trump to be the most pro-life president ever. I even wrote about all the specific actions, policies and nominations he did to help the pro-life cause.

That's the kind of article that our pious pastors and conservative leaders should have written, if they were serious about getting results instead of virtue-signaling. When it comes to politics, you have to look at the actions taken by the candidates – what did they achieve? – not their words.

Catholic teachers march in favor of gay rights and perverted sex education

### Why Christian men supported a bad candidate

So why do we have so many "conservative" Never Trump people and "pious" evangelical pastors and leaders supporting policies like these Biden policies? These people aren't stupid. They know perfectly well what Biden said he was going to do. They shouldn't be surprised at what he's doing. It's the job of organizations like the Southern Baptist ERLC to know what policies affect religious liberty. It's their job to know what policies affect the rights of unborn children. It's their job to know what policies affect the conscience rights of Christian medical professionals. So what happened?

Well, I know a few Never Trump men, so let me tell you what happened to them. They are married to women who don't know very much about law and policy. Those women often have non-STEM degrees, no private sector experience, and if they work at all, they work as teachers – especially of very young children. They're not used to speaking about policy to adults, other than other teachers of small children in the faculty lounge. Teachers talk about how people look, how they talk, how mean they are. They talk about teacher pay, being nice to illegal immigrants, and making the government provide free stuff for irresponsible people. They are terrified of standing up to bad behaviors like having babies out of wedlock or same-sex marriage. They don't like to make moral judgments – they're "compassionate". And they worry a lot about how they are perceived by non-Christians. They don't want to be seen as "mean".

So, at least for the men I know, what happened is that these low-information wives – who are all active in their churches with essential oils and self-help books and feelings-based Bible study guides – all convinced their "conservative" evangelical husbands to support Biden's policies, because of Trump's "mean" appearance and words. And the strong, tough "conservative" evangelical men went along with it. They wanted a peaceful home, available sex, and not sleeping on the couch more than they wanted conservative policies.

During an online game, I asked one of these men I was playing with which policies he considered the most important, as a conservative Christian. His reply? "Teacher pay and universal healthcare". His wife was a teacher, and I'm pretty sure he got those priorities from her. Keep in mind that universal healthcare means taxpayer-funded abortions and sex-changes. That's how it works in countries like Canada, that have a true single-payer health care system.

We need to be careful about appointing weak men as conservative, Christian leaders. If they can't stand up to their

own wives, what good are they as leaders?

# The authors of the gospels of Mark and Luke knew eyewitnesses to the life of Jesus

**Wintery Knight** · 23 April 2021 · Archived copy · Original

Were the authors of the gospels of Mark and Luke connected to eyewitnesses to the life of Jesus? Well, it turns out that there are good reasons to think that Mark was linked to the eyewitness Peter, and Luke was linked to Paul, who had a post-mortem appearance of Jesus in 1 Cor 15:8, and who met with Peter and James in Galatians 1 and again in Galatians 2.

There is a list of evidence for Peter's influence on Mark on the Cold Case Christianity blog.

Here's my favorite one from the list:

> **Peter's Embarrassments Have Been Omitted**
>
> There are many details in the Gospel of Mark consistent with Peter's special input and influence,including omissions related to events involving Peter. How can Mark be a memoir of Peter if, in fact, the book contains so many omissions of events involving Peter specifically? It's important to evaluate the entire catalogue of omissions pertaining to Peter to understand the answer here. The vast majority of these omissions involve incidents in which Peter did or said something rash or embarrassing. It's not surprising these details were omitted by the author who wanted to protect Peter's standing in the Christian community. Mark was quite discreet in his retelling of the narrative (other Gospel writers who were present at the time do, however, provide details of Peters 'indiscretions' in their own accounts. See *Cold-Case Christianity* for a more detailed explanation).

It makes me laugh to imagine Peter looking over Mark's shoulder and saying "no, don't put that in it" and "no, don't tell them I did that". Funny! But also very good evidence. The rest of Wallace's list makes it even more clear.

And what about the gospel of Luke? Well, did you know that the author of Luke's gospel knew Paul? If you read it carefully, you'll see that Luke switches from describing history from an "I" perspective to describing things from a "we" perspective in the book of Acts (which he also wrote). Who is the "we" he is talking about?

Here's famous Christian scholar William Lane Craig to explain:

> Now who was this author we call Luke? He was clearly not an eyewitness to Jesus's life. But we discover an important fact about him from the book of Acts. Beginning in the sixteenth chapter of Acts, when Paul reaches Troas in modern-day Turkey, the author suddenly starts using the first-person plural: "we set sail from Troas to Samothrace," "we remained in Philippi some days," "as we were going to the place of prayer," *etc.* The most obvious explanation is that the author had joined Paul on his evangelistic tour of the Mediterranean cities. In chapter 21 he accompanies Paul back to Palestine and finally to Jerusalem. What this means is that the author of Luke-Acts was in fact in first hand contact with the eyewitnesses of Jesus's life and ministry in Jerusalem.
>
> […]There is no avoiding the conclusion that Luke-Acts was written by a traveling companion of Paul who had the opportunity to interview eyewitnesses to Jesus's life while in Jerusalem. Who were some of these eyewitnesses? Perhaps we can get some clue by subtracting from the Gospel of Luke everything found in the other gospels and seeing what is peculiar to Luke. What you discover is that many of Luke's peculiar narratives are connected to women who followed Jesus: people like Joanna and Susanna, and significantly, Mary, Jesus's mother.
>
> Was the author reliable in getting the facts straight? The book of Acts enables us to answer that question decisively. The book of Acts overlaps significantly with secular history of the ancient world, and the historical accuracy of Acts is indisputable.

> This has recently been demonstrated anew by Colin Hemer, a classical scholar who turned to New Testament studies, in his book *The Book of Acts in the Setting of Hellenistic History.* [5] Hemer goes through the book of Acts with a fine-toothed comb, pulling out a wealth of historical knowledge, ranging from what would have been common knowledge down to details which only a local person would know. Again and again Luke's accuracy is demonstrated: from the sailings of the Alexandrian corn fleet to the coastal terrain of the Mediterranean islands to the peculiar titles of local officials, Luke gets it right.

I know a lot of people (like my Dad) read the Bible devotionally, looking for feelings or trying to "get right with God" so they get blessings. But I think it's helpful to look at things from an evidential point of view – how am I going to make a case for this? When you look at things from that perspective, the Bible gets a whole lot more interesting. And you can talk about it with non-Christians when you know about these interesting details.

# Don’t dismiss best practices for Christian living as “legalism” and “denying grace”

**Wintery Knight** · 24 April 2021 · Archived copy · Original

On Sunday, I listened to a very interesting discussion between Sean McDowell and Jessica van der Wyngaard on Justin Brierley’s Unbelievable show. The topic was on the pros and cons of purity culture. I didn’t know a thing about “purity culture”, and had never read any books about it. I didn’t really disagree with anyone on the podcast, but I did want to say something about it in a blog post.

Description:

> 20 years ago Joshua Harris was the poster boy of the evangelical ‘purity movement’ having authored the bestselling book ‘I Kissed Dating Goodbye’. Today, Harris regrets writing the book, and has also recently changed his mind about Christianity.
>
> Justin is joined by Jessica van der Wyngaard, director of the documentary film ‘I Survived I Kissed Dating Goodbye’, and Christian apologist Sean McDowell, to discuss purity culture, singleness and the Joshua Harris story.

The MP3 file is here.

First, here’s a brief summary of what everyone said on the podcast:

- JW: the book urged people to give up dating in favor of courting and suggested other rules that would guarantee a successful marriage to your soul-mate
- JW: some of the rules proposed by the book were not Biblical
- JW: I’m not a virgin and I’m in early-30s, but I accept that we should teach what the Bible says about abstinence
- SM: purity culture is the idea that if you remain sexually pure, God will give you a spouse and bless you in the future
- SM: purity culture is the idea that if you have premarital sex, you will be tainted forever
- SM: I’m afraid that those reacting against purity culture will build a sexual ethic solely based on their shame, their hurt, their concern about legalism, and this will not help the next generation
- SM: let’s have a balanced Biblical approach to sexuality instead
- SM: there is scientific data to back up the Bible’s teaching that marriages work better when sex occurs only within a marriage
- SM: it’s a mistake to define your spiritual standing based on whether you are a virgin or not
- SM: following the Bible’s rules for sexuality is an important part of discipleship
- SM: the Bible is replete with examples of people restoring their standing before God through forgiveness and redemption

Right now, we are living in a secular culture where people are hooking up, having premarital sex, living together, and breaking up far more often than in the past. There is this pattern of choosing partners based on secular criteria: outward appearance and ability to entertain. And this approach to dating – choosing people for the wrong reasons, and trying to force a commitment using premarital sex – is now common practice, even among Christians.

I think people should have a plan to counter this trend that’s realistic and guided by studies and evidence. For example, studies show that people who have no sexual partners before marriage are more likely to still be married 10 years later. Studies show that cohabitation negatively impacts the stability of a future marriage. It’s difficult to accept that this is the way the world is, but if a stable marriage is a goal for you, then you should care about the best practices for having a stable marriage.

Take a different example. Suppose you have a lot of shame and bad feelings over having run up $90,000 of student loans. Now your retirement will be much more difficult. The answer to these feelings of shame is not to say that you can invoke "grace" and that will make everything OK. It won't. It might help you to make better decisions going forward, but that debt is going to affect your future spouse, your future marriage and your future children.

There are real costs to these behaviors for your future, and being forgiven through Jesus' atonement isn't going to instantly make the effects of those choices disappear. It's good to warn young people about these costs. It's also good to help people who have made mistakes undo the damage by investing in them. I don't want us to throw out evidence-based best practices as "legalism", because they help us to reach the discipleship goals specified for us in the Bible.

The goals of the Bible (e.g. – not aborting, not divorcing) are good goals. If we find out from science that premarital promiscuity or cohabitation reduce our odds of achieving Biblical goals, then it's a mistake to dismiss that evidence because it make us feel bad about our past. It's not legalism to investigate evidence and consult wise advisors in order to choose how best to achieve goals like marriage. That's actually being wise.  Making good decisions doesn't give you the right to be proud and compare yourself to others, but it is good to make good decisions for yourself, and to share your reasoning with those who ask you.

I agree with the speakers that purity culture is wrong to promise people a happy marriage if they only keep their virginity. That's just the prosperity gospel, and it really is not a Biblical view of the Christian life.

People who choose to have premarital sex haven't separated themselves from marriage. But studies indicate that they have damaged the stability of their future marriage *if they do nothing to counteract the effects of their choices.* And I think there is more to counteracting these bad effects than just stating to your partner "Jesus forgives me, so you can't judge me". The focus of the "no-rules because I feel ashamed" crowd doesn't seem to be on taking the damage seriously and fixing it. Their focus seems to be on not being judged.

I don't think that a cursory response ("don't judge me!") is adequate to undo the damage from premarital sex. But if a person is willing to be honest about their past, and put in the work to understand the effects of premarital sex on their future marriage, renew their minds, and re-establishing their bonding ability, then they should be able to *fully* counteract the damage. I have met people who have done this, and you can see in their choices and lifestyle that there's been a complete turning against their former use of sex for fun and attention and self-esteem. It's not "idolizing virginity and idolizing marriage" to look at the data, and make choices that are likely to lead to a stable marriage.

# What are the historical arguments for the empty tomb narrative?

**Wintery Knight** · 25 April 2021 · Archived copy · Original

I wanted to go over this article by William Lane Craig which includes a discussion of the empty tomb, along with the other minimal facts that support the resurrection.

**The word resurrection means bodily resurrection**

The concept of resurrection in use among the first converts to Christianity was a *Jewish* concept of resurrection. And that concept of resurrection is unequivocally in favor of a *bodily resurrection*. The body (soma) that went into the grave is the body (soma) that came out.

Craig explains what this means with respect to the fast start of Christian belief:

> For a first century Jew the idea that a man might be raised from the dead while his body remained in the tomb was simply a contradiction in terms. In the words of E. E. Ellis, "It is very unlikely that the earliest Palestinian Christians could conceive of any distinction between resurrection and physical, 'grave emptying' resurrection. To them an *anastasis* without an empty grave would have been about as meaningful as a square circle."

And:

> Even if the disciples had believed in the resurrection of Jesus, it is doubtful they would have generated any following. So long as the body was interred in the tomb, a Christian movement founded on belief in the resurrection of the dead man would have been an impossible folly.

It's significant that the belief in the resurrection started off in the city where the tomb was located. Anyone, such as the Romans or Jewish high priests, who wanted to nip the movement in the bud could easily have produced the body to end it all. They did not do so, because they could not do so, although they had every reason to do so.

**There are multiple early, eyewitness sources for the empty tomb**

Paul's early creed from 1 Corinthians 15:3-7, dated to within 5 years of the crucifixion, implies the empty tomb.

Craig writes:

> In the formula cited by Paul the expression "he was raised" following the phrase "he was buried" implies the empty tomb. A first century Jew could not think otherwise. As E. L. Bode observes, the notion of the occurrence of a spiritual resurrection while the body remained in the tomb is a peculiarity of modern theology. For the Jews it was the remains of the man in the tomb which were raised; hence, they carefully preserved the bones of the dead in ossuaries until the eschatological resurrection. There can be no doubt that both Paul and the early Christian formula he cites pre-suppose the existence of the empty tomb.

The dating of the resurrection as having occurred "on the third day" implies the empty tomb. The date specified for the resurrection would have been the date that the tomb was discovered to be empty.

> The phrase "on the third day" probably points to the discovery of the empty tomb. Very briefly summarized, the point is that since no one actually witnessed the resurrection of Jesus, how did Christians come to date it "on the third day?" The most probable answer is that they did so because this was the day of the discovery of the empty tomb by Jesus' women followers. Hence, the resurrection itself came to be dated on that day. Thus, in the old Christian formula quoted by Paul we have extremely early evidence for the existence of Jesus' empty tomb.

A few quotes from atheist historians not from Dr. Craig's article: (thanks to Eric of Ratio Christi OSU)

> Michael Goulder (Atheist NT Prof. at Birmingham) "…it goes back at least to what Paul was taught when he was converted, a couple of years after the crucifixion." ["The Baseless Fabric of a Vision," in Gavin D'Costa, editor, Resurrection Reconsidered (Oxford, 1996), 48.]
>
> Gerd Lüdemann (Atheist Prof of NT at Göttingen): "…the elements in the tradition are to be dated to the first two years after the crucifixion of Jesus…not later than three years… the formation of the appearance traditions mentioned in I Cor.15.3-8 falls into the time between 30 and 33 CE." [The Resurrection of Jesus, trans. by Bowden (Fortress, 1994), 171-72.]
>
> Robert Funk (Non-Christian scholar, founder of the Jesus Seminar): "…The conviction that Jesus had risen from the dead had already taken root by the time Paul was converted about 33 C.E. On the assumption that Jesus died about 30 C.E., the time for development was thus two or three years at most." [Roy W. Hoover, and the Jesus Seminar, The Acts of Jesus, 466.]

The early pre-Markan burial narrative mentions the empty tomb. This source pre-dates Mark, the earliest gospel. The source has been dated by some scholars to the 40s. For example, the atheist scholar James Crossley dates Mark some time in the 40s. (See the debate below)

> *The empty tomb story is part of the pre-Markan passion story and is therefore very old*. The empty tomb story was probably the end of Mark's passion source. As Mark is the earliest of our gospels, this source is therefore itself quite old. In fact the commentator R. Pesch contends that it is an incredibly early source. He produces two lines of evidence for this conclusion:
>
> (a) Paul's account of the Last Supper in 1 Cor. 11:23-5 presupposes the Markan account. Since Paul's own traditions are themselves very old, the Markan source must be yet older.
>
> (b) The pre-Markan passion story never refers to the high priest by name. It is as when I say "The President is hosting a dinner at the White House" and everyone knows whom I am speaking of because it is the man currently in office. Similarly the pre-Markan passion story refers to the "high priest" as if he were still in power. Since Caiaphas held office from AD 18-37, this means at the latest the pre-Markan source must come from within seven years after Jesus' death. This source thus goes back to within the first few years of the Jerusalem fellowship and is therefore an ancient and reliable source of historical information.

So we are dealing with very early sources for the empty tomb.

**Lack of legendary embellishments**

The empty tomb narrative in the gospels lacks legendary embellishments, unlike later 2nd century forgeries that originated outside of Jerusalem.

**The eyewitness testimony of the women**

This is the evidence that has been the most convincing to skeptics, and to me as well.

> *The tomb was probably discovered empty by women*. To understand this point one has to recall two facts about the role of women in Jewish society.
>
> (a) Woman occupied a low rung on the Jewish social ladder. This is evident in such rabbinic expressions as "Sooner let the words of the law be burnt than delivered to women" and "Happy is he whose children are male, but woe to him whose children are female."
>
> (b) The testimony of women was regarded as so worthless that they were not even permitted to serve as legal witnesses in a court of law. In light of these facts, how remarkable must it seem that it is women who are the discoverers of Jesus' empty tomb. Any later legend would certainly have made the male disciples to discover

> the empty tomb. The fact that women, whose testimony was worthless, rather than men, are the chief witnesses to the empty tomb is most plausibly accounted for by the fact that, like it or not, they were the discoverers of the empty tomb and the gospels accurately record this.

**The earliest response from the Jewish high priests assumes the empty tomb**

This report from Matthew 28 fulfills the criteria of enemy attestation, although Matthew is not the earliest source we have. Oh, well.

> In Matthew 28, we find the Christian attempt to refute the earliest Jewish polemic against the resurrection. That polemic asserted that the disciples stole away the body. The Christians responded to this by reciting the story of the guard at the tomb, and the polemic in turn charged that the guard fell asleep. Now the noteworthy feature of this whole dispute is not the historicity of the guards but rather the presupposition of both parties that the body was missing. The earliest Jewish response to the proclamation of the resurrection was an attempt to explain away the empty tomb. Thus, the evidence of the adversaries of the disciples provides evidence in support of the empty tomb.

Note how careful Craig is not to imply that the guard tradition is historical, because we can't prove the guard as a "minimal fact", since it doesn't pass the standard historical criteria.

**See it used in a debate**

You can see the arguments made and defended from criticism in this debate with the atheist scholar James Crossley.

This my favorite resurrection debate.

# What kind of man is Olympic athlete Lolo Jones trying to date for marriage?

**Wintery Knight** · 26 April 2021 · Archived copy · Original

I was watching the latest episode of Better Bachelor and saw that this 38-year-old athlete named Lolo Jones was complaining about how hard it was for her to find a husband. Apparently, she's been trying very hard to get married all along, and has not had any success. Let's take a look at her Instagram page and Twitter page, then her previous boyfriend, and see what she's doing wrong.

So, here's her Instagram. She claims to be a Christian, but it's a constant stream of glamorous pictures of herself, many featuring swimwear or workout apparel. Her Twitter feed is more of the same. Lots of inconsequential things about herself. What she had for breakfast. When she got up from sleeping. That she prefers voice notes to texts. What video games she likes. Etc. The only mention of God I saw is when God helped her win a gold medal. Because that's what God's priority was in the world that day – her happiness. Is that what the Bible teaches – that it's God job is to make his human pets happy? That seems to be a popular view among the books that Christian women are reading today. But is that what Jesus was telling us about God with his life?

Anyway, why aren't marriage-minded men interested in her?

## What marriage-minded men are looking for

So, I have a list of questions that I use when evaluating women for wife and mother roles. I'm trying to see whether the woman is capable of making a marriage to me achieve the goals that God has for his world and his creatures. Right now, the primary threats to God's view of the world and us that I see are atheism, feminism and socialism. (I'm open to adding or subtracting from this list)

I'm looking for capabilities like these in a wife:

- demonstrate the existence of God objectively using philosophical arguments and scientific evidence
- demonstrate the truth about who Jesus was and his resurrection using historical evidence
- answer philosophical, scientific and historical objections to the Christian worldview
- explain why other major religions and ideologies are false
- understand and defend the Bible's teachings about moral issues (chastity, abortion, divorce, etc.) using philosophical arguments and/or scientific evidence
- explain her Christian role models and what they have done for Christ and his Kingdom that makes you admire them
- explain what your goal is for your children, and what you intend to do to achieve those goals
- explain male and female roles in marriage, what you have done to prepare to perform your roles, and how you evaluate marriage candidates for performance of their roles

So, looking at her Instagram and Twitter, I don't see anything relevant to a Christian marriage enterprise there. Bikini photos and tweets about silly personal details are unrelated to the Christian marriage enterprise. Even when she promotes virginity, she talks about *herself*, which is not *rationally persuasive* to anyone else, since it's just her subjective opinion. The right way to persuade people that the Bible is correct about sex and sexuality, (and I've been doing that for 12 years on this blog), is by appealing to evidence, such as the evidence from research papers.

Lolo Jones "He's So Good Looking"

### What is she looking for in a man?

Lots of Christian women like to talk about their desire for marriage, but their actions are not focused on choosing men who demonstrate ability to perform husband and father roles, e.g. – defending truth, providing, charitable giving, chastity, sobriety, romantic love, selflessness, mentoring, etc. What about Lolo?

Consider Lolo's comments about a man she is impressed by:

> *Double Agents* rookie Nam has been described as "hot" (by Wes), "a physical specimen" (Jay) and "built like a statue" (Kam). But what does his partner, fellow newbie Lolo Jones, think of the *Ultimate Beastmaster* competitor?
>
> "My teammate's kind of growing on me. I don't know if it's because I've seen him come out of the shower a few times, but I'm really liking this chemistry we have," the Olympian stated during this week's *Challenge* episode. "He's so good-looking."
>
> […]Lolo (wants) him to pursue her (since she's the lady), but he hasn't.
>
> "I'm throwing everything out his way, but he's just stoic," she admitted in a confessional.

If you click through to that article, you'll see her postive reaction to how "good-looking" this man is. She bends her head forward, and lifts up both arms in excitement. She's not excited by (or respectful of) marriage-related capabilities or willingness to commit. She's not raving about a man's chastity or his sobriety or his theology or his apologetics ability or his mentoring of other Christians or his charitable giving. She's excited by his height and his appearance.

Her last boyfriend was apparently a *basketball player*. He's 7 years younger than she is, 6'7″ tall, and he can really put a basketball into the basketball hoop. But is that relevant for making a marriage that impacts the world for Christ and His Kingdom? Not at all. What a man does in marriage is teach people (church, university, workplace, etc.) about the truth of God's existence, his character and his interaction with his creatures in history. Men are equipped to be persuasive with reason and evidence when discussing behaviors that cause harm to children, like abortion, divorce, promiscuity, same-sex parenting, etc.  Men are equipped to defend the policies that promote

marriage and family, like low tax rates, limited government, the rule of law, etc. Men invest in other Christians, partnering with them to promote Christian truths and Christian convictions to those who don't accept them. And men know how to help and support their wives as they do their mothering and ministry.

Serious Christian men do not marry women who don't understand the importance and value of marriage-related capabilities and achievements.

1 Samuel 16:7

It's very important for conservative marriage activists like Mark Regnerus, Brad Wilcox, Greg Stanton, pious pastors, etc. to understand that *for Christian men* there is more to being a wife and mother than holding a Bible, attending church and singing in the choir. I am a man who has the marriage character and the marriage ability. I can pull the trigger on a commitment – I'm equipped to do that, and do it well. But I want my marriage to fight against atheism, feminism and socialism. Lolo Jones is fit and attractive. She is not equipped for a Christian marriage.

# Wind, solar or nuclear: which is best for costs, electricity prices and the environment?

**Wintery Knight** · 27 April 2021 · Archived copy · Original

I bought a new book by a famous environmentalist Dr. Michael Shellenberger. He used to be a huge advocate for renewable energy (wind and solar). The book is about why he changed his mind and now prefers nuclear power. He has a long pedigree of environmental activism. I agree with him, so I wanted to get the book to learn how to argue it. For you, I have a short video instead of the book.

Here's a 17-minute TED talk that he did:

And an article from Quillette that has the full text of the talk.

Here's the part I thought was the most interesting, where he explains the problems with solar and wind:

> The first was around land use. Electricity from solar roofs costs about twice as much as electricity from solar farms, but solar and wind farms require huge amounts of land. That, along with the fact that solar and wind farms require long new transmissions lines, and are opposed by local communities and conservationists trying to preserve wildlife, particularly birds.
>
> Another challenge was the intermittent nature of solar and wind energies. When the sun stops shining and the wind stops blowing, you have to quickly be able to ramp up another source of energy.

I was having a discussion with one of the software architects at my company, who LOVES wind power. I raised these objections with him, especially about the birds and the subsidies for wind and solar, and the higher electricity prices. His response was that he was confident that investing in the renewables would produce technological solutions to those problems.

Look what Schellenberger says, though:

> What kills big, threatened, and endangered birds—birds that could go extinct—like hawks, eagles, owls, and condors, are wind turbines.
>
> In fact, wind turbines are the most serious new threat to important bird species to emerge in decades.
>
> […]Solar farms have similarly large ecological impacts. Building a solar farm is a lot like building any other kind of farm. You have to clear the whole area of wildlife.
>
> In order to build one of the biggest solar farms in California the developers hired biologists to pull threatened desert tortoises from their burrows, put them on the back of pickup trucks, transport them, and cage them in pens where many ended up dying.
>
> […][S]cientists recently warned that wind turbines are on the verge of making one species, the Hoary bat, a migratory bat species, go extinct.

More environmental impact:

> You can make solar panels cheaper and wind turbines bigger, but you can't make the sun shine more regularly or the wind blow more reliably. I came to understand the environmental implications of the physics of energy. In order to produce significant amounts of electricity from weak energy flows, you just have to spread them over enormous areas. In other words, the trouble with renewables isn't fundamentally technical—it's natural.

Higher costs:

> Dealing with energy sources that are inherently unreliable, and require large amounts of land, comes at a high economic cost.
>
> There's been a lot of publicity about how solar panels and wind turbines have come down in cost. But those one-time cost savings from making them in big Chinese factories have been outweighed by the high cost of dealing with their unreliability.

There was a news article from the radically leftist UK Guardian recently that found that 40% of UK solar panels were manufactured by firms linked to Chinese slave labor.

Consumer electricity prices rise, disproportionately affecting the poor:

> Consider California. Between 2011–17 the cost of solar panels declined about 75 percent, and yet our electricity prices rose five times more than they did in the rest of the U.S. It's the same story in Germany, the world leader in solar and wind energy. Its electricity prices increased 50 percent between 2006–17, as it scaled up renewables.

The same thing happened in Canada, when they switched to renewables. According to a recent study, the province of Ontario saw a "21% increase in the overall average cost of power in the province over the period 2007-2013".

Schellenberger likes nuclear energy:

> Germany's carbon emissions have been flat since 2009, despite an investment of $580 billion by 2025 in a renewables-heavy electrical grid, a 50 percent rise in electricity cost.
>
> Meanwhile, France produces one-tenth the carbon emissions per unit of electricity as Germany and pays little more than half for its electricity. How? Through nuclear power.
>
> Then, under pressure from Germany, France spent $33 billion on renewables, over the last decade. What was the result? A rise in the carbon intensity of its electricity supply, and higher electricity prices, too.
>
> What about all the headlines about expensive nuclear and cheap solar and wind? They are largely an illusion resulting from the fact that 70 to 80 percent of the costs of building nuclear plants are up-front, whereas the costs given for solar and wind don't include the high cost of transmission lines, new dams, or other forms of battery.

He talks a lot about whether nuclear power is safe, and what to do with the waste. I found it compelling. My architect friend didn't ask me about that, but he did mention the cost of nuclear.

Here's what I should have said (but didn't):

> All of the waste fuel from 45 years of the Swiss nuclear program can fit, in canisters, on a basketball court-like warehouse, where like all spent nuclear fuel, it has never hurt a fly.
>
> By contrast, solar panels require 17 times more materials in the form of cement, glass, concrete, and steel than do nuclear plants, and create over 200 times more waste.
>
> We tend to think of solar panels as clean, but the truth is that there is no plan anywhere to deal with solar panels at the end of their 20 to 25 year lifespan.

I did send him the lecture and the article after, though.

If you think this is an interesting topic, why not share the TED talk and the article with your friends? Some people vote Democrat just for renewable energy. I don't like Democrat policies, so I have to be equipped to know how to respond to anything that anyone might like about them. Christian conservatives like me who care about things like

abortion, marriage, religious liberty, etc. have to become experts at education policy, health care policy, energy policy, foreign policy, etc. I have to be able to debate anyone about any policy.

# Man receives death threats and loses his job for calling vulgar teen thug an idiot

**Wintery Knight** · 28 April 2021 · Archived copy · Original

In this case, a CEO of a Nashville, TN company named Visue11 was fired from his job after he was caught on video saying that a gay man who was screaming obscentities at him and following him around filiming him was "acting like an idiot". That was a great crime against compassion, diversity, inclusion and tolerance, so he had to be fired. After we see the story, I have some comments about this.

Amanda Prestigiacomo reports at Daily Wire:

> Nashville resident S4m John50n was fired from his position as CEO of healthcare company Visue11 on Monday, his family was doxxed online, and he has received a deluge of threats. But that "enormous volume of hate," John50n told The Daily Wire, is based on a false, media-inflamed narrative stemming from an out-of-context viral video.
>
> The onslaught was sparked by a video of John50n that recently went viral online, appearing to show him engaging in alleged "homophobia," though, notably, not once in the video does John50n utter any homophobic slur or use any profanity.
>
> The mainstream narrative, based on a 59-second video clip, contends that John50n targeted, harassed, bullied, and spewed homophobia to an 18-year-old male for wearing a dress to his prom.
>
> Here's what the video seems to show:
>
> *The video, taken at a hotel before prom, opens with the teen, Dalton 5teven5, telling John50n, "I chose what I wanna wear so you can f*** off." John50n, hands in his pockets, quietly responds, "Is that right?" John50n is then followed and asked leading questions by 5teven5' boyfriend, Jacob Ge1tm4nn, the teen filming John50n. "You think he looks gross? Looks disgustin'?" he asks. "You look like …," John50n starts to say. In response, 5teven5 screams at him, "I look like what, you f***ing b****?" "You look like an idiot," John50n calmly says in reaction to the cursing. "Get the f*** away from me!" 5teven5 screams. "Keep talking. You look like a moron," Ge1tm4nn tells John50n. "I'm sorry, I'm gorgeous," 5teven5 says. "Are you?" John50n responds. John50n then appears to try to block Ge1tm4nn from filming him. "No, sir, I can f***ing record you all I want," says Ge1tm4nn.*

All this vulgar language and threatening behavior was being done in front of the man's family, in a restaurant where he was a paying customer.

John50n contends that the video is missing context:

> John50n spoke to The Daily Wire on Tuesday and refuted the mainstream narrative by adding context to the video.
>
> "They had been at the hotel/restaurant for an hour, causing a scene and being loud and obnoxious," John50n said. "I was perturbed that the management wasn't doing anything to protect the rest of us who were paying customers with our kids present. These teens were only there to take pictures and cause a public scene."
>
> "There are many lies in the mainstream articles and interviews including the allegations of homophobic name-calling and 'following' him," John50n said, referring to 5teven5.

So the first thing is that I think you definitely want to consider how the two thugs were acting, and also read the tweets calling for the firing of the CEO. It's disturbing that people on the secular left think that behavior is OK – death threats and firing.

### Men are watching, men are learning

So, I'm thinking about this story from the perspective of a Christian man, trying to make a difference in the world. I know that any advocacy for the moral teachings of Christianity will be met with reactions like that. Not just from the far-left thugs, but from their allies within woke Christianity.

I know church-attending Christians who claim to be conservative politically who voted for Biden. They know nothing about court cases where Christians are attacked by LGBT activists for refusing to celebrate non-Biblical views of marriage. They know nothing about specific Democrat policies that attack free speech, freedom of association or freedom of religion. They consider it "loving" to affirm far-left thugs in their fascism. Their actions declare that they have accepted the new morality of the secular left above Biblical morality. And their peers accept them as Christians. So, you won't get any help from them, and you shouldn't confide in them. Standing up for Biblical views of moral issues has become very lonely.

And what about the death threats made by the secular left mob? What about the news stories that include *demonstrably false allegations* against this man? What about the calling for his termination by woke corporations? I'm thinking about this, and thinking how happy I have to be single and have a million dollar net worth. I'm glad there is no woke wife in my house. I'm glad I don't have to face woke people in a church, or in schools, nor even in the workplace once I retire. I simply do not want my liberty to express myself and practice my religion infringed by left-wing psychopaths.

I wish people would stop asking me why I'm not married. I can't tell them the truth, because the truth would offend them. The truth is that their "tolerance" and "compassion" for fascists who are deeply and unrepentantly involved in sinful behaviors has made the world unsafe for good men. I'm a man. I'm not taking on obligations to a wife, family, church, etc. in a world where my free speech can be punished with death threats and job loss. If Christian women and pastors want men to engage, they'd better start fighting back against the secular left, instead of virtue signaling to them.

# Progressive white women report high levels of mental illness in 2020 Pew survey

**Wintery Knight** · 29 April 2021 · Archived copy · Original

I have the most amazing video for you to see. It's a crazy left-wing activist doxing a libertarian lesbian woman wearing a breathe-through mask. First, let's take a look at the video. Then, we'll look at a recent survey reported by Pew Research in 2020, which assesses how mentally stable far-left feminist women are (self-reported). Then, I'll make some comments for unmarried men.

OK, so here is the video, which was shared by the woman who was doxed. So it's OK for me to share it, since the doxed woman didn't care about it.

So, is this crazy woman rare? Or is she common?

## Progressive white women and mental illness

Feminist web site Evie Magazine reported on the some 2020 findings by Pew Research (left-wing pollster):

> A 2020 Pew Research study reveals that over half of white, liberal women have been diagnosed with a mental health condition at some point.
>
> [T]he study, which is titled Pew American Trends Panel: Wave 64, was dated March 2020 — over a year ago.
>
> The study, which examined white liberals, moderates, and conservatives, both male and female, found that conservatives were far less likely to be diagnosed with mental health issues than those who identified as either liberal or even "very liberal."
>
> […]**White women, ages 18-29, who identified as liberal were given a mental health diagnosis from medical professionals at a rate of 56.3%, as compared to 28.4% in moderates and 27.3% in conservatives.**

Here's the part of the data I thought was most interesting:

## Who would marry a crazy person?

So, the point about this that I want to make is… who is going to marry these mentally ill progressive white women? Being a good wife and mother takes a certain amount of connection to reality. It takes a certain amount of empathy, compassion, and rationality. These progressive white women don't have any of that. So, who is going to marry them? I know that there are thirsty progressive men (and thirsty conservative men who fake being progressive), who will go ahead and hit it and quit it. Pump it and dump it. But how many men would commit to someone who's mentally ill?

And in fact, that's exactly what we're seeing with the marriage rates:

That's for America, but things are even worse in countries that have slid further toward the secular left edge of the political spectrum.

When you look at marriage rates in Canada and Europe, you understand that men are even LESS likely to choose marriage when they have to pay over 50% of what they earn in taxes. And so the marriage rate is declining. I think young, unmarried women in Canada and Europe are want to raise taxes in order to get free stuff from government. Single mother welfare, food stamps, abortions, contraceptives, IVF, breast enlargements, etc. Some feminists are even asking for free cosmetic surgery. With a big enough government, they don't have to marry at all. Big government leaves them free to play the field, without having to care about finding a good man. But what if taxes get so high that the few good men those women passed over for 40 years simply can't afford to take on a wife and support multiple children he didn't father? Paying for things like a stay-at-home wife and homeschooling, etc. is expensive. Men can't afford a wife, and also pay for goodies for all the single progressive women with mental illnesses.

Conservative men want nothing to do with daycare and public schools – we know that those facilities are *dominated* by progressive women. And we don't want trouble from feminist lawyers and feminist judges in the divorce courts. Divorce is very expensive for men. And we may never see our children again. Then there are the progressive white women in the workplace, who get very bitter with men as a result of getting wrecked by bad boys. Even if we find a good wife, we still have to deal with all these progressive white women with mental illnesses in positions of power. Is it worth it to take risks like this? It depends on the reward, I guess. I can do a lot There comes a point where the juice isn't worth the squeeze.

# UK police arrest 71-year-old pastor for defining marriage the way Jesus defined marriage

**Wintery Knight** · 30 April 2021 · Archived copy · Original

I think it's important for American Christians to learn lessons about what happens to religious liberty by looking at what happens to Christians in other times and places when Democrats (secular leftists) take power. This time, let's look at a story from the UK, which has been on a 30-year-run into far-left socialism. They've embraced atheism, feminism and socialism. Here's the result.

The UK Daily Mail reports:

> A Christian pastor who was arrested after he preached from the Bible said yesterday he had been treated 'shamefully'.
>
> John Sherwood, 71, was led away in handcuffs, questioned in a police station and held overnight after being accused of making homophobic comments outside Uxbridge Station in west London.
>
> The grandfather claimed he was left bruised after police pulled him from a mini-stepladder he was using and cuffed his hands behind his back.
>
> Police said they had received complaints the man had been making 'allegedly homophobic comments' and arrested him under the Public Order Act, which can be used under the vague proviso that someone is using 'abusive or insulting words' that cause 'harm' to someone else.
>
> […]Mr Sherwood, a pastor for 35 years, said: 'I wasn't making any homophobic comments, I was just defining marriage as a relationship between a man and a woman. I was only saying what the Bible says – I wasn't wanting to hurt anyone or cause offence.
>
> 'I was doing what my job description says, which is to preach the gospel in open air as well as in a church building.
>
> 'When the police approached me, I explained that I was exercising my religious liberty and my conscience. I was forcibly pulled down from the steps and suffered some injury to my wrist and to my elbow. I do believe I was treated shamefully. It should never have happened.'
>
> Mr Sherwood, who preaches at an independent evangelical church in north London, was arrested under the Public Order Act for allegedly causing alarm or distress.

Before we go too far, let's just settle the question of what Bible-believing Christians should believe about the definition of marriage.

Matthew 19:1-6:

> 1 Now when Jesus had finished these sayings, he went away from Galilee and entered the region of Judea beyond the Jordan.
>
> 2 And large crowds followed him, and he healed them there.
>
> 3 And Pharisees came up to him and tested him by asking, "Is it lawful to divorce one's wife for any cause?"
>
> 4 He answered, "Have you not read that he who created them from the beginning made them male and female,
>
> 5 and said, 'Therefore a man shall leave his father and his mother and hold fast to his wife, and the two shall become one flesh'?
>
> 6 So they are no longer two but one flesh. What therefore God has joined together, let not man separate."

To be a Christian, minimally, is to be a follower of Jesus Christ. That means that we accept what Jesus teaches, on

whatever he teaches about. We don't overturn the teachings of Jesus in order to make people who are rebelling against God feel better about their rebellion. It is central to the Christian worldview that Christians care more about what God thinks of them than what non-Christians think of them. In fact, Christians are supposed to be willing to endure suffering rather than side with non-Christians against God's authority.

Matt Walsh had a fine article about this issue.

He said:

> As Christians, our goal is not to avoid being like the big bad "other Christians," but to strive to be like Christ Himself. This is one of the advantages to having an Incarnate God. He went around acting and speaking and teaching and generally functioning in our realm, thereby giving us a model to follow. This is the model of a loving and merciful man, and *also* a man of perfect virtue who fought against the forces of evil, condemned sin, defended his Father in Heaven with sometimes violent force, spoke truth, and eventually laid down His life for those He loved (which would be all of us).
>
> […]This is what it means to believe in Christ. Not just to believe that He existed, but to believe that Christ is Truth itself, and that everything He said and did was totally and absolutely and irreversibly true forever and always. Many Christians today — not only the ones in the video, but millions alongside them — seem to think we can rightly claim to have "faith" in Jesus or a "relationship" with Him while still categorically denying much of His Word. This is a ridiculous proposition. We can't declare, in one breath, that Christ is Lord, and in the next suggest that maybe God got it wrong on this or that point. Well, we *can* make that declaration, but we expose our belief as fraudulent and self-serving. We worship a God we either invented in our heads, which is a false idol, or a God who is fallible, which is a false idol.

If you really accept Jesus as God, then you can't think he is wrong when he explains what marriage is. Period. End of issue. And yet today, so many church-attending Christians are anxious to change the definition of marriage so that non-Christians will like them.

### Why are some church-attending Christians  so progressive?

So, I have quite a few evangelical Christian acquaintances who think they are Christians because they got married, had kids and attend church. You know. They're "Christians" culturally. But instead of thinking about what policies are supported by the Bible, all their policy-deciding is done for them by NPR, CNN, MSNBC, the New York Times, etc. That's because they want to appear "smart" to non-Christians. And having to read books on your own by people like Thomas Sowell (economics), Heather Mac Donald (crime), Douglas Murray (immigration), John Lott (self-defense), Christopher Kaczor (abortion), Ryan T. Anderson (marriage), etc. is just TOO MUCH WORK. Reading is hard. It makes churchy Christians feel bad. Much better to watch Star Wars / Ellen and read fantasy / romance novels and buy video games / hand bags.

The point of having political views, they say, is to look smart and good to others. Not to promote policies that are consistent with the Bible, or that allow Christians to act consistently with the Bible. So you get church-attending Christians voting against small government, free speech, religious liberty, the rule of law, private property, school choice, etc. because forming beliefs by consuming secular left radio and TV is easier than reading.

# What should Christians bring up when discussing truth with Muslims?

**Wintery Knight** · 1 May 2021 · Archived copy · Original

I have some experience dicussing Islam because my mother's side of the family is all Muslim. My go-to argument has always been to confront them about the Qur'an's claim that Jesus did not die of crucifixion. But I noticed a different argument from Laura Powell, who knows far more about this topic than I do. Do you think her approach is the best one?

She writes about it over at Gospel-Centered Discipleship:

> The crux of the argument is this: The Qur'an affirms the inspiration, authority, and preservation of the New Testament Gospels;[2] yet the Qur'an also contradicts the Gospels on major theological and historical points. Therefore, the Qur'an cannot be reliable.
>
> According to the Qur'an, the Gospel is the trustworthy, reliable revelation of God given as a guidance for mankind (Qur'an 3:3-4). These Scriptures from God were available and trustworthy when the Qur'an was revealed in the 7th century A.D., and those who had access to them were repeatedly told to obey them, judge by them, submit to their teaching, and stand fast upon them. In other words, according to the Qur'an, the Gospels are the inspired and authoritative words of God.
>
> Qur'an 5:47 says, "And let the People of the Gospel judge by what Allah has revealed therein. And whoever does not judge by what Allah has revealed—then it is those who are the defiantly disobedient."
>
> Furthermore, Qur'an 5:68 states, "Say, 'O People of the Scripture, you are [standing] on nothing until you uphold [the law of] the Torah, the Gospel, and what has been revealed to you from your Lord'" (see also 6:114; 3:3-4).

What I like about her argument is that she's just taking the words of the Qur'an seriously, and asking the Muslims who claim to believe it what's going on here. Why say that the gospels are unreliable today, when the Qur'an said that the gospels were reliable, yesterday.

My argument about the death of Jesus requires us to ask Muslims "where is the non-Muslim historian who thinks that Jesus did not die?" There isn't one.

But my argument requires that the Muslim know something about historical scholarship, to know what non-Muslim historians think.Laura's argument has wider appeal, because it doesn't require that the Muslim have *any* knowledge about history – only knowledge about what their own holy book says.

She concludes with this:

> What we see here is that the Qur'an teaches the inspiration, authority, and preservation of the Gospels. The Qur'an was intended as an Arabic version of the message of truth found in the Jewish and Christian Scriptures, but this presents a huge problem for Muslims because the Qur'an contradicts the Christian Scriptures on essential doctrines. Most notably, the Qur'an teaches that Jesus was not God incarnate, he did not die on a cross, and he was not raised from the dead (Qur'an 4:157; 5:116).
>
> Here's the dilemma for Muslims: If the Gospels *are not* trustworthy, then the Qur'an is false because it teaches that the Gospels are the inspired, perfectly preserved, authoritative words of God. But if the Gospels *are* trustworthy, then the Qur'an is false because it teaches contradictory, mutually exclusive facts about key issues. Either way, the Qur'an is false.
>
> This, of course, is a huge problem for Muslims. The validity of Islam rests upon the reliability of the Qur'an, just as Christianity rests upon the truth of the divinity, death, and resurrection of Jesus. If the Qur'an is

> unreliable, then Islam is a false religion.

I like that she's comfortable having disagreements with people. That's not very common in the church today, in my experience.

By the way, this is the same Laura who wrote that really good article about how she found a better way to discuss her Christian worldview when she moved on from sharing her testimony. I blogged about it here.

# I'm not a Jehovah's Witness for the same reason I'm not a global warming alarmist

**Wintery Knight** · 2 May 2021 · Archived copy · Original

In the summer, a couple of Jehovah's Witness ladies were going door-to-door and they stopped by my house while I was out mowing. I decided to talk to them. They asked me why I was an evangelical Protestant rather than a JW. Rather than go into a lot of theology about the Trinity and the Watchtower translation, I decided to to just tell them about the false predictions their group has made.

So, let's just quickly review that using this article from Watchman fellowship, which quotes JW publications:

> Initially the organization taught the "battle of the Great Day of God Almighty" (Armageddon) would end in 1914. Every kingdom of the world would be overthrown in 1914 which was "God's date" not for the beginning but "for the *end"* of the time of trouble.
>
> "…we consider it an established truth that the final end of the kingdoms of this world, and the full establishment of the Kingdom of God, will be accomplished by the end of A.D. 1914" (Watchtower founder, Charles Taze Russell, *The Time is at Hand,* p. 99).
>
> "…the 'battle of the great day of God Almighty' (Rev. 16:14), which will end in A.D. 1914 with the complete overthrow of earth's present rulership, is already commenced" (*Ibid.,* p. 101).
>
> "CAN IT BE DELAYED UNTIL 1914?…our readers are writing to know if there may not be a mistake in the 1914 date. They say that they do not see how present conditions can last so long under the strain. We see no reason for changing the figures – nor could we change them if we would. They are, we believe, God's dates not ours. But bear in mind that the end of 1914 is not the date for the *beginning,* but for the *end* of the time of trouble" (*Watch Tower,* 15 July 1894, p. 226).

Clearly, the world did not end in 1914, and it did not end at subsequent JW predictions, either, e.g. 1925, 1975.

So, as the title of the post says that I can't be a global warming alarmist for the same reason I can't be a Jehovah's Witness: failed predictions.

Here's an excellent article from Daily Signal by famous black economist Walter Williams, who explains the connection:

> As reported in The New York Times (Aug. 1969) Stanford University biologist Paul Ehrlich warned: "The trouble with almost all environmental problems is that by the time we have enough evidence to convince people, you're dead. We must realize that unless we're extremely lucky, everybody will disappear in a cloud of blue steam in 20 years."
>
> In 2000, David Viner, a senior research scientist at University of East Anglia's climate research unit, predicted that in a few years winter snowfall would become "a very rare and exciting event. Children just aren't going to know what snow is."
>
> In 2004, the U.S. Pentagon warned President George W. Bush that major European cities would be beneath rising seas. Britain will be plunged into a Siberian climate by 2020. In 2008, Al Gore predicted that the polar ice cap would be gone in a mere 10 years. A U.S. Department of Energy study led by the U.S. Navy predicted the Arctic Ocean would experience an ice-free summer by 2016.
>
> In May 2014, French Foreign Minister Laurent Fabius declared during a joint appearance with Secretary of State John Kerry that "we have 500 days to avoid climate chaos."
>
> Peter Gunter, professor at North Texas State University, predicted in the spring 1970 issue of The Living Wilderness:

> Demographers agree almost unanimously on the following grim timetable: by 1975 widespread famines will begin in India; these will spread by 1990 to include all of India, Pakistan, China and the Near East, Africa. By the year 2000, or conceivably sooner, South and Central America will exist under famine conditions. … By the year 2000, thirty years from now, the entire world, with the exception of Western Europe, North America, and Australia, will be in famine.

> Ecologist Kenneth Watt's 1970 prediction was, "If present trends continue, the world will be about four degrees colder for the global mean temperature in 1990, but eleven degrees colder in the year 2000." He added, "This is about twice what it would take to put us into an ice age."

Williams concludes:

> Today's wild predictions about climate doom are likely to be just as true as yesteryear's. The major difference is today's Americans are far more gullible and more likely to spend trillions fighting global warming. And the only result is that we'll be much poorer and less free.

We have known for decades that the Earth's temperatures were much warmer during the "Medieval Warming Period", hundreds of years ago. But some people are just having irrational fears about overpopulation, resource shortages, etc. and so they will promote nonsense to try to scare people into doing what they want. World history is full of pious-sounding attention-seeking hoaxsters who try to scare the gullible masses into giving them money and/or power. It's not new.

# Democrats and corporate media press racist attacks against Senator Tim Scott

**Wintery Knight** · 3 May 2021 · Archived copy · Original

I added a new section to the blog to track by appearances on podcasts. In those podcasts, I've been explaining about my race, culture and immigration story. My ancestry is West Indian black. We have a culture that is more like Asian culture with respect to education, career and finances. I run into a lot of white progressives who accuse me of "acting white" because of that.

This is actually not uncommon. White progressives get very confused when they encounter black men who are conservative and successful. It makes them very angry. In fact, the only real racism you'll ever see from whites comes from white progressives, when they meet a black conservative.

Here's an example, featuring South Carolina Senator Tim Scott. He gave the response to Biden's recent State of the Union, and the white progressives were not pleased that their little black pets were straying off the reservation.

Here's the video:

Let's start with a little bit of his speech:

> When I was a kid, my parents divorced. My mother, my brother, and I moved in with my grandparents. Three of us, sharing one bedroom.
>
> I was disillusioned and angry, and I nearly failed out of school. But I was blessed.
>
> First, with a praying momma. Then with a mentor, a Chick-Fil-A operator named John Moniz. Finally, with a string of opportunities that are only possible here in America.
>
> This past year, I've watched COVID attack every rung of the ladder that helped me up.
>
> So many families have lost parents and grandparents too early. So many small businesses have gone under. Becoming a Christian transformed my life — but for months, too many churches were shut down.
>
> Most of all, I am saddened that millions of kids have lost a year of learning when they could not afford to lose a day.
>
> Locking vulnerable kids out of the classroom is locking adults out of their future.
>
> Our public schools should have reopened months ago. Other countries' did. Private and religious schools did. Science has shown for months that schools are safe. But too often, powerful grown-ups set science aside. And kids like me were left behind.
>
> The clearest case for school choice in our lifetimes.

So that's where he's coming from. He's trying to get people to succeed through family, Christianity, school choice and private sector jobs.

In fact, he thinks that's what all Republicans want:

> Just before COVID, we had the most inclusive economy in my lifetime. The lowest unemployment ever recorded for African-Americans, Hispanics, and Asian-Americans. The lowest for women in nearly 70 years. Wages were growing faster for the bottom 25% than the top 25%.
>
> That happened because Republicans focused on expanding opportunity for all Americans.
>
> We passed Opportunity Zones, criminal justice reform, and permanent funding for Historically Black Colleges and Universities for the first time ever. We fought the drug epidemic, rebuilt our military, and cut taxes for working families and single moms like mine.

The Federalist noted how the Democrats on social media responded to his speech:

> The words “Uncle Tim” began trending on Twitter, tying Scott to the pre-Civil War slave character “Uncle Tom” in Harriet Beecher Stowe’s 1850s abolition book “Uncle Tom’s Cabin.” “Uncle Tom” is used as a slur against black people. Yet the racially offensive trend was amplified by Twitter in its trending topics for hours following the speech.

And Daily Wire added:

> MSNBC’s Tiffany Cross, the host of “The Cross Connection,” on Saturday dedicated an entire segment on her show to a “rebuttal” to Sen. Tim Scott’s (R-SC) speech earlier this week. According to Cross, Scott is “thirsty for white approval.”
>
> “Let’s be clear: Tim Scott does not represent any constituency other than the small number of sleepy, slow-witted sufferers of Stockholm Syndrome who get elevated to prominence for repeating a false narrative about this country that makes conservative white people feel comfortable,” Cross claimed.

She called the black conservative Senator a “token”, a “dude”, a “slave”, and a “shame” to his ancestors. But she couldn’t refute any of his factual claims. She just called him names because of his skin color, the way racists do.

Daily Wire noted:

> According to the MSNBC host, Scott had “many contradictions” in his rebuttal speech that she “could go into great detail refuting each of his asinine points.”
>
> If the Left was serious about refuting Scott’s points, they would talk substance and not resort to calling him “Uncle Tim” or “token.” As the South Carolina senator previously said, the Left won’t “attack my policies, but they are literally attacking the color of my skin. You cannot step out of your lane according to the liberal elite Left.”

Don’t forget about black conservatives, especially ones like me who commit to Christianity and succeed. We don’t hate America like the racists in the corporate media.

# What is life really like for Americans living in poor households?

**Wintery Knight** · 4 May 2021 · Archived copy · Original

Investigation in progress

This article is from the Daily Signal.

Excerpt:

> Today, the Census Bureau will release its annual poverty report. It will almost certainly report that over 40 million Americans "live in poverty."
>
> But what does it mean to be poor in America? To the average American, the word "poverty" suggests significant material deprivation. But the actual living conditions of those the government defines as poor differ greatly from this perception.
>
> According to the government's own reports, the typical American defined as poor by the Census Bureau has a car, air conditioning, and cable or satellite TV. Half of the poor have computers, 43 percent have Internet, and 40 percent have a wide-screen plasma or LCD TV.
>
> Far from being overcrowded, poor Americans have more living space in their home than the average non-poor person in Western Europe. Some 42 percent of all poor households actually own their own homes; on average, this is a well-maintained three-bedroom house with one and a half baths, a garage, and a porch or patio.
>
> According to the U.S. Department of Agriculture, only 4 percent of poor children were hungry for even a single day in the prior year because the family could not afford food. By its own report, the average poor person had sufficient funds to meet all essential needs and was able to obtain medical care for his family throughout the year whenever needed.
>
> The left likes to claim that the U.S. has far more poverty than other advanced nations. But those claims are based on comparisons that set a higher standard for escaping poverty in the U.S. than elsewhere.
>
> When a single uniform standard is used, the U.S. is shown to have poverty rates that are very similar to other advanced nations, slightly higher or lower depending on the exact measure used.

I think we definitely want to be careful about the outcry on the secular left about "poverty". Their solution always seems to be that we need to move in the direction of socialism. And socialism means that the government gets bigger by taking money and liberty away from families, churches and businesses.

As a Christian, my goals are all gospel-centric. My interest in politics is because I want to live in a society that respects my right to work, earn and save, so that I can spend and give in a way that advances the gospel. My job is not to transfer my money to lazy people in their dependence on government. I go to work so that I can have the fuel I need to respect God in my decision-making. The secular government is interested in other goals – like getting elected. I don't want them using my money for their goals. I have my own goals.

# Does the Bible teach that all judging of other people is wrong?

**Wintery Knight** · 5 May 2021 · Archived copy · Original

Policeman investigates crime scene for evidence

Today, most people seem to think that the most wonderful thing is to not judge anyone else. We're told that morality is like personal preference… you just choose what you like. There is no standard of morality that exists objectively, in the same way as mathematics or logic exists. And besides, even if there were, the only reason to judge someone else would be to hurt them. Right?

I found an interesting article about judging from Christian apologist Timothy Fox, on the Freethinking Ministries web site. He starts out right away with one very good reason for judging – judging allows people who have experience and demonstrated ability to help those who are making mistakes to get better.

Timothy writes:

> When you study to be an educator, you have to spend a certain number of hours as a student teacher, under the guidance of a veteran teacher. I remember my cooperating teacher telling me one of my strengths was that I took criticism well and was very open to it. I was shocked to hear this! I wanted to tell him he was crazy and that I hate criticism! But I was also well aware that he was the master and I was the apprentice and that it was his responsibility to help me to be the best teacher I could be. So I needed his criticism. (And I received a lot of it!) Whenever he gave me feedback, positive or negative, it wasn't intended to stroke my ego or hurt my feelings. It was so I can learn and improve, to keep doing the good and to change the bad.
>
> The same goes for many other things, such as sports. Athletes have coaches that train and guide. But what about normal, everyday life? That's when we want people to leave us alone. Don't tell me how to live. *Don't judge me.*

In my life, I've been able to have success at a few things. Education for sure – I have a BS and MS in computer science which has allowed me to earn a good living. Finances… well, I've made a lot of mistakes with investing, but I was able to succeed (eventually!) just by maxing out my 401K and Roth IRA contributions every year. And I'm just coming up on my 21st year of full time work. So when I give people advice, it's usually in those areas, or maybe in apologetics.

But that advice is not always well-received. Usually, the people I'm advising just find themselves some nice yes-men and yes-women who will agree with them that having fun "in the moment" won't close any doors down the road. It

doesn't work, but that's how judging is received. Cut off the judge, and find yourself some yes-men and yes-women. And when your plan doesn't work, just say that it wasn't your fault.

People often cite a passage in the Bible about not making judgments, Matthew 7:1-6. But does it really say that?

> [1]"Do not judge so that you will not be judged.
>
> [2] For in the way you judge, you will be judged; and by your standard of measure, it will be measured to you.
>
> [3] Why do you look at the speck that is in your brother's eye, but do not notice the log that is in your own eye?
>
> [4] Or how can you say to your brother, 'Let me take the speck out of your eye,' and behold, the log is in your own eye?
>
> [5] You hypocrite, first take the log out of your own eye, and then you will see clearly to take the speck out of your brother's eye.
>
> [6] "Do not give what is holy to dogs, and do not throw your pearls before swine, or they will trample them under their feet, and turn and tear you to pieces.

Here's what Timothy Fox had to say about those verses:

> Jesus' point is *not* not to judge (note the double negative). It's "Don't be a hypocrite!" Verse 5 commands us to clean up our own junk, *then* to help clean up your friends'. He's stating the obvious, that when you criticize people, they *will* turn around and criticize you back. So make sure your closet is clean first! And how do you know who the "dogs" and "pigs" are (v. 6)? Wouldn't you have to *judge* them?
>
> And then there is John 7:24: "Do not judge by appearances, but judge with right judgment." Here Jesus is differentiating between proper and improper judgement. But he still commands to judge!
>
> The reason for many of Paul's letters is to correct some kind of nonsense going on in a church. In 1 Corinthians 5, he writes angrily that the church is not judging sin in their midst (and it's quite the sin – go read it!). In verse 12, he rhetorically asks "Are you not to judge those inside [the church]?" And in the following verse, he plainly states to remove the "wicked person" from their midst. Here Paul is criticizing the church for *not* judging when they should have, even to the extent of excommunicating an unrepentant church member.

He concludes:

> More often than not, the ones who cry "Don't judge me!" the loudest are the ones who need it the most, whether it's due to insecurity, pride, or flat-out rebellion. But let us not forget that Jesus was full of truth *and* grace. We desperately need both in our dealings with our brothers and sisters in Christ, when we give correction as well as when we receive it. It's never pleasant to hear some hard (but loving) truth, but remember the first half of Proverbs 27:6: "Faithful are the wounds of a friend." Do we like it? Of course not. But we need it. And more than that, the Bible commands it.

Obviously, it doesn't feel good to admit you're wrong, but if you want to achieve results, then the quickest way to do that is to listen to people who have already achieved results. The world isn't as "random" as many people want to believe. You get to make choices, and there are best practices. When you see someone failing to achieve their goals, it doesn't do them any good to tell them to follow their hearts and it's not their fault when they fail. The best thing to do is to show them what to do differently, and help them to do it.

# Looking back at a post I wrote 10 years ago on why I am not married with children

**Wintery Knight** · 6 May 2021 · Archived copy · Original

A young lady friend has gotten to know me very well in the past months. She wondered why I never married. The more she's gotten to know me, the more suitable she thinks I'd be for marriage. So, here a shortened version of the post I wrote from 2011 about my problems finding a suitable Christian wife. It was 3800 words, but I deleted some of it so that this post is only 2400 words.

---

I have noticed some very alarming things about single Christian women lately, and I want to write about some of them.

I think that the main thrust of courting from the man's perspective is that you want to 1) communicate your plan to make the marriage and the children have a positive impact for Christ and his kingdom, 2) you want to demonstrate that you understand the needs of women and that you are capable of meeting those needs, especially the needs for love and companionship, 3) that you understand the roles of a man and you have made preparations and decisions to be ready to fulfill those roles, and 4) you want to ask the kinds of questions that will allow you to ensure that the woman you are courting is ready to fulfill her roles – because she has also made preparations and good decisions.

Well, the problem I wanted to talk about has to do with objective 1). I have communicated my plan to many women and I find that there are particular parts where they resist. The main thing I would like to do is to have four children who all go into different interesting fields and make an impact for Christ.

The goal here is that the children will be able to pursue their field of study without being persecuted by secular leftists, and be able to earn a living, and be able to make a contribution in an area that matters.

So what I normally do is lay out this plan to the woman and then see if she is supportive and helpful and starts to take action to help with that. But I have had some alarming reactions and I want to talk about some of those below.

1) Several women have told me that children can have as much impact for Christ as a ballet dancer or poet as they could as a Chief Justice of the Supreme Court or as a President.

For me, the whole point of getting married is to serve the Lord – and if my plans to serve are threatened by marriage, then I will not do it. I would rather use the fortune I have to make donations to individual events than to be married and have those resources wasted on ballet dancers and poets. Further on this point about education and careers, I feel that one of the things that a man struggles with is the fear that his children will not be able to grow up and be prosperous and independent in the world. I especially worry that they will feel pressure to compromise their faith because of financial concerns.

Many people think that there is this Santa Claus in the sky who will magically provide money no matter how reckless they are – but I don't think God is like that. I think he values stewardship, wisdom and prudence – and that's what I intend to teach my children. I want my children to have enough money so that they can be independent of the state, and resilient against peer pressure. I see many many people who get degrees in fields where they fall under pressure to adopt viewpoints that are non-Christian simply because of financial concerns. Money matters a lot to keeping your convictions, especially when you get married and have children – it's something that needs to be planned for.

There is a reason why people know who William Lane Craig and Michele Bachmann are – they have the skills. But what I am seeing from Christian women is that Christianity can be reduced to just reading the Bible, singing in church and praying to hear the voice of their emotions. (Which they call the voice of God) There is no thought being put into how to make children achieve at a high level by setting goals and funneling them into areas that

matter. It's like Christian women think that the children's happiness is more authoritative in the family than my knowledge and experience about how to build up children who will retain their faith, maintain their financial independence and have an influence in the world.

Often, the women who tell me that the choice of career doesn't matter are themselves riddled with credit card debt. And the ones who tell me that science apologetics doesn't matter are the ones whose parents and siblings are becoming apostates after reading Richard Dawkins books. If I am the one who is earning the money and providing the savings up front, then I am the one who should be leading on things like education, careers, jobs and so forth. If I was smart enough to study the right things, to work and to save before I got married, then I shouldn't be overloaded after the marriage by someone else's feelings, emotions and desire to be her children's "friend".

2) Another concern I have is about how these Christian women are moved by liberal sob stories so that they vote against a strong foreign policy, self-defense, deterrence, capital punishment, and men using force to punish evildoers in general. On the foreign policy front, one woman complained to me that American helicopter gunships had used excessive force by attacking Islamic terrorist infantry with the gunship's machine gun.

I took a look at the full guncam footage she linked me and read the AARs and noticed that there was a convoy of Humvees coming into range of the [insurgent] infantry, and that the infantry was armed with RPGs. I asked her to tell me what she thought an RPG could do to a Humvee. She had no idea what an RPG was or what it could do to a Humvee. I explained that RPGs are ROCKETS that explode and it would kill all the occupants of Humvees.

It seemed to me that her only reason for complaining about it was that her friends had sent it to her, and she felt pressured to agree with them. She had no understanding of the capabilities of the arms and vehicles at all, yet she felt qualified to make judgments about unnecessary violence. In fact, it became clear that she was taking this position because she thought that it made her look morally superior. She felt "compassion" for the poor Islamic terrorists. It's so easy to second guess American military forces when you know nothing at all about war in general, or Islamic extremism in the Middle East in particular.

I do not want to be overruled by someone who makes decisions based on ignorance, emotions, intuitions and peer pressure. This person went on to assure me that shooting terrorists was the same as blowing up busloads of children, and that killing convicted serial killers was the same as killing unborn babies. Because killing is killing, right? It's hard to consider someone for marriage who can't see the difference between good and evil or guilt and innocence, but instead tries to lift up evil and bash down good. (Not only was she anti-capital punishment but also anti-self-defense – all without having done a moment's worth of research on the peer-reviewed studies showing how capital punishment deters crime, and how concealed-carry laws reduce rates of violent crime).

Should I marry someone who is uncomfortable with the male role of making moral judgments and exercising force against evil? Someone who takes positions without knowing anything about the details of what she is talking about? Of course not. No one can be happy married to someone who takes positions on moral issues based on ignorance, emotions, vanity and peer pressure. And some Christian women are unwilling to learn anything about war, or even to come to the firing range to fire a handgun. They have opinions, they make pronouncements about how they will overrule you if you get married to them, they vote to undermine national security and world peace by emboldening aggressors and then they refuse to learn anything about the issues. All they need to know are their feelings. And they vote based on those feelings, not based on studies or history or anything factual.

3) A final example has to do with Christian women embracing socialism because it is "compassionate". Believe it or not, some women do not really understand the effect of having the government spend more and more money equalizing life outcomes.

One Christian pro-life activist wrote to me that she was "great with kids" and was going to have one out of wedlock and raise it with money from the government. This woman never finished college and had not held any sort of serious job. She complained that no men were marrying her (note: this woman was completely irresponsible and penniless and unsuitable for marriage) and blamed the men. I told her that the reason why men were not marrying

her was because they were paying a third of their income in taxes and looking at the 1.65 trillion deficits and 14.5 trillion national debt. She said that men didn't really care about money and numbers and that if they loved her, they would marry her anyway, but they were just selfish lazy cowards. She was willing to inflict fatherlessness and day care on a child, but she was "great with kids".

Another Christian woman told me that the government should provide free meals to children so that they were all equal regardless of whether their mothers had married or not. I explained that every time that government takes a responsibility away from men, that our household income would go down because of higher taxes, and my job would be put in jeopardy because of government debt. I also explained that the more government does, the less control there is inside the family – like when Christians have to pay for public schools so that all the children will be equal. Equally illiterate and innumerate. Instead of proposing free market solutions to poverty that retain family integrity – like school voucher programs – they always seem to leap to the big government solutions first.

But you can see how this idea of economic equality captures the emotions of some Christian women and they don't even realize how they are undermining men's desire and ability to achieve their goals for the marriage. Christian marriage plans cost money. Men need money in order to put their own children through college. Men need money for homeschooling, stay-at-home moms and private schools. And men need money for apologetics books and to take children to apologetics conferences. It's amazing because this woman expected me to keep her at home as a stay-at-home mom, but she wanted my salary to go to subsidize the single mothers by choice.

For example, take health care. I know another Christian woman who complained to me about some poor child of a single mother who could not get treatment for some condition or other. Notice how there was no emphasis on what this single mother chose to study, whether she chose to work, whether she chose to save, or whether she married a good provider. No. The problem is taken as is – as a case of spilled milk and all questions of responsibility and accountability are dismissed. I was asked how capitalism can solve the problem.

Well the first thing to point out is that her solution is to defund the family, grow government, reward irresponsibility, [and diminish] the earnings [that husbands] save that fund [their] plan. These are the people who claim to be opposed to abortion and then vote for single-payer health care which provides… taxpayer-funded abortion. If her solution to poverty is the secular government taxing your family and your employer, and reducing the family's earnings and destabilizing the family's revenue stream, then she does not have a Christian view of family, government and charity. She will undermine your role as provider because she values socialism MORE than she values marriage and family.

Secondly, there are solutions to poverty that are compatible with the Bible and capitalism that she ought to know about. The first thing that should have come into her mind is private charity. If the government has any role at all, it should be to provide tax credits for private charity. It is important for government not to crowd out the virtuous character of the people by taking over the job of helping neighbors. Our job as Christians is not primarily to make people have equal net worths regardless of their personal decisions. Our job is to make them know about God's existence and character, and we can do that better with private charity – certainly better than any secular government can. Your money is your voice. Don't give it to a SECULAR government that will turn around and enact taxpayer-funded abortion, taxpayer-funded IVF, taxpayer-funded day care, taxpayer-funded fatherlessness welfare, and so on.

I'm going to end by explaining what the underlying problem is.

**Conclusion**

Basically the underlying problem is this: when some Christian women say they want marriage, they actually don't want marriage at all – not a marriage to a man who is going to take on the traditional male roles anyway. The reason why men work is so that they are the sole or primary breadwinners – so that they have the authority to make decisions and lead in the home. Men want to have children who are self-sufficient and morally upright, and who can have an influence for Christ and his Kingdom. And they know that although the compassion of their wives is useful

in the early years of a child's development, that moral responsibility and accountability are needed later on to change children into adults.

Some Christian women [just] want the money to be brought into the home and the wedding to be photographed and the babies to play with, but they don't want the men to act in the traditional male role of protector, provider and moral/spiritual leader. It is very important for men to get this out there and in the clear during the courting process. And I also really recommend that men avoid sex before marriage, because sex makes you stop caring about male roles and serving God.

The thing about Christian women that you need to fear most is this emotional happy-clappy intuition they have that the world is a happy, safe place and that people can do whatever they want and that God's job, (and later government, as they drift into atheism), is to make everyone happy and prosperous. That is completely incompatible with a marriage designed to serve God.

# One example of pure masculinity provides a challenge to atheist views of morality

**Wintery Knight** · 7 May 2021 · Archived copy · Original

My friend Dina is extremely wise, about men, women and relationships. She gave me a definition of masculinity a while back that stuck with me. She says that masculinity is when a man refuses to compromise his moral values and duties in order to get favor from a woman. Knowing her background, she's probably seen a lot of men make fools of themselves for young and pretty women. She hates it.

So, with that in mind, take a look at this news story. I'll only quote a little because I have a lot to say about it below.

This is from the far-left ABC News:

> Samuel Forrest says his life turned upside down last year after he was faced with the devastating choice of giving up his wife or his newborn son with Down syndrome.
>
> […]Forrest, 37, told ABC News last February that the day Leo was born in Yerevan, Armenia, on Jan. 21, 2015, he was told, unexpectedly, that Leo had Down syndrome.
>
> After the news sank in, Forrest held Leo for the very first time: "They took me in to see him and I looked at this guy and I said, 'He's beautiful — he's perfect and I'm absolutely keeping him,'" he said last year.
>
> Forrest was living in his Armenian wife's home country where she presented him with an ultimatum: Put the child in an orphanage, or she would leave.
>
> He chose Leo and decided he would return to his native New Zealand, where he said they'd receive support from loved ones. Ruzan Forrest filed for divorce.

So, that's the story. Armenia has an *epidemic* of abortion. And that attitude has spilled over into a general disrespect for children's rights. Armenia has a huge problem with sex-selection abortions. Many men cannot find women to marry. And if they are killing their unborn girls, what chance does a Down syndrome child have?

So in this story, the man is resilient to the woman's youth, beauty, and offer of sex. Nothing that she can do sways him away from his moral obligation to protect the weak little one from her superior strength. This is the essence of masculinity. It takes a strong man to stand up to a panicking woman and tell her that her happiness is less important than doing the right thing for the children. The children are weaker. They did not ask to be made. It is up to the adults to give up their selfishness, and give the children what they need.

## The challenge to atheist concepts of morality

Anyway, I had another point to make about this. And that point is – how do atheists handle this? According to atheism, moral behaviors are just the common behaviors of a species that allow it to survive. But the first rule of survival is for the strong to live, and the weak to die. That's why Richard Dawkins is so in favor of aborting unborn children with special needs. They are unfit. They have to die. It would be terrible for the grown-ups to be burdened by them. So, on the Darwinian view of morals, what this man did was wrong.

Another view of morality on atheism is utilitarianism. This is the view that what is right for an individual is what makes the majority of the people in his society happier. Well, in Armenia, the majority of the people want this child dead. If not dead, then throw the baby into an orphanage and give him no contact with his mother. The majority decides what's right. So, on the utilitarian view of morals, what this man did was wrong.

Another view of morality on atheism is moral relativism. This is the view that what is moral is what the majority of the people in a society says is moral, is moral in that society. So, widow-burning was moral in India when the majority of the people there believed in it. And in Armenia, aborting this unwanted child, or throwing him into an orphanage, is moral. A majority of people believe that there. So, on the relativistic view of morality, what this man

did was wrong.

Another view of morality is that objective moral values do exist on atheism. But this is not possible, since if there were an objective design for how humans should act, that applies in all times and places, then there would have to be a moral lawgiver with the authority to say what his creatures ought to do. That's the only way to say that anything is really right or wrong, but it's off limits to atheists. Atheists claiming objective morality are really trying to steal something from theism. But there is no rational grounding for morality in an atheist worldview.

Does anyone really think that what this man did is wrong though, other than atheists? His action is a disproof of their systems of morality.

## Restoring masculinity

It seems to me that we're living in a time where male leadership has been so attacked that it has eroded into nothing. It's been attacked from the feminist left, and from the traditional conservative right. The good men need to refuse to let women break their integrity. Even if it means that women will continue to pass over the good men for bad boys who let them do what they want. Obligations to God and little children and animals are more important than sex. Tell them no, and maintain integrity.

# Young woman regrets that older people in her life were dishonest with her

**Wintery Knight** · 8 May 2021 · Archived copy · Original

Have older women succeeded at teaching younger women about love and marriage?
I once dated a woman who had messed up her education, career and finances by following her heart. She confided in me that she had a hatred of “responsibilities, expectations and obligations”. She wanted to be guided by her feelings, moment by moment. Whenever she failed, she would blame others, or claim that the world was just too unpredictable to make good decisions.

She failed, and was unhappy, wishing that grown ups in her life had told her the truth about her bad decisions. And she’s not alone.

Look at this article posted on the UC Berkeley website:

> A recent group of studies has found that women’s happiness levels have been dropping steadily over the last few decades, to the point that women now report lower happiness levels than men, a role reversal from the 1970s. Given social improvements in women’s lives over the intervening decades—increased work opportunities, higher salaries, and more reproductive choice, to name a few—these results have surprised more than a few commentators, with everyone from Barbara Ehrenreich to Rush Limbaugh trying to make sense of them.
>
> That hasn’t been an easy task, even for the economists whose study, “The Paradox of Declining Women’s Happiness,” helped uncover this trend. Those economists, Justin Wolfers and Betsey Stevenson, both at the University of Pennsylvania, analyzed data from several large-scale surveys that have tracked the general well-being of Americans and Europeans from as far back as 1972. They found that women’s happiness levels had dropped over time in each survey. To understand why, Wolfers and Stevenson looked at factors which in past research had been linked to unhappiness in women, such as marital status, income, educational level, and number of children. But none of these could account for the shift.

In addition to “increased work opportunities, higher salaries, and more reproductive choice”, women have also “benefited” from preferences in education, in education funding, in the workplace, and especially in the courts. They get favorable treatment in the criminal courts as well as in the divorce courts. They have been given everything they asked for that they *felt* would make them happier, and *all* of it (once obtained) has worked to make them less happy. The biggest part of their unhappiness problem is how their learned selfishness makes them incapable of – and undeserving of – commitment. The declining marriage rate is made worse by disincentives created for men to marry and have children when they are given sex for free, are heavily taxed, regulated by government bullies, and risk being financially raped by divorce.
