

Unplugging. The reading list.

November 1, 2017 | 1195 upvotes | by [Auvergnat](#)

I posted this list as a comment some time ago. I referenced it a few times, but I always thought I'd need to expand it and make it into a post, for better referencing.

There are plenty of good TRP-themed books to read, but no official list. There are a few (good) posts with (lots of) recommended books but they're a large menu à la carte. Here's my personal fine-cuisine full course **for the newly unplugging**. Short, tasty, and **to be consumed in the right order**.

Hors d'oeuvre

The couple of very best "mainstream-friendly" books on the importance of masculinity, to start gently and arouse curiosity:

- 1- "No More Mr. Nice Guy", by Robert Glover
- 2- "The Way of The Superior Man", by David Deida

Entrées

Which should hopefully be enough to pave the way for the upcoming shock of unplugging that comes when you swallow the red pill bible:

- 3- "The Rational Male", by Rollo Tomassi
- 4- "The Rational Male Preventive Medicine", by Rollo Tomassi

(Note: Rollo now has a third book out, which is just as good, and reads better, but the basics are in the first two and remember this list is about efficient unplugging so let's carry on..)

Main

Once aware that everything he knew about the world of humans' interactions was a lie, our unplugged man will then find the best general information on how to deal with Men and Women in the Real World in:

- 5- "The 48 Laws of Power", by Robert Greene
- 6- "Practical Female Psychology For the Practical Man", by Joseph South, David Clare and Franco

Dessert

And only then, when our red-pill-aware man finally understands the theory on the real nature of women and of human interactions, he might want to read the best books that put that theory into practice to game and bang women:

- 7- "Bang" and "Day bang", by Roosh V
- 8- "Sex God Method", by Daniel Rose

Coffee and cigars

With his eyes finally open and his sexual lust quenched temporarily, the newly unplugged man may feel at loss in this scary but very real world. He will need to redefine himself and his place in it. I then recommend:

- 9- "Meditations", by Marcus Aurelius
- 10- "The Way of Men", by Jack Donovan

Knowledge is Power. Sharpen your understanding of red pill wisdom to maximize the results that actions (lifting and approaching) already started giving you. A post on this sub's daily feed with a score under 100 is guaranteed to contain less wisdom than a book deemed vital to read by the red pill community. Your daily time allowance for absorbing information is limited. Prioritize your reading.

Economics in One Lesson by Henry Hazlitt may be the single most important book anyone reads in their life, as the laws of economics can be applied to every aspect of your life, including to chasing tail.

Some will criticize that the book may be a little outdated. If you feel that way, I would recommend *Basic Economics* by Thomas Sowell.

TheReformist94 • 54 points • 1 November, 2017 05:30 PM

Amen. Dr Thomas Sowell is my hero. TRP is Austrian school economics applied to sexual marketplace

The above comment is removed. Do you remember what was it?

Casanova-Quinn • 15 points • 1 November, 2017 06:10 PM

On a similar note, this is a fantastic video on basic economics: How The Economic Machine Works by Ray Dalio. For those who don't know, Dalio is a successful investor and hedge fund owner worth \$17B.

sMooVe1982 • 2 points • 24 November, 2017 05:51 PM

I really enjoyed the video but I was a bit disappointed that he didn't go into how much of those problems he's talking about are actually being created by the central banks themselves. Nevertheless, nice video.

Hell yeah. My go to for describing basic economics to people without referencing money is battlefield triage. You probably know the spiel.

Auvergnat[S] • 6 points • 1 November, 2017 07:32 PM

Thanks. Economics is where I am now turning. Richest Man in Babylon was an eye-opener. Any other suggestion (TRP-flavored, that is, not sugarcoating human nature)?

gELSK • 3 points • 2 November, 2017 07:13 AM

// , If you're in the mood for a more practical, very recently tested "RedPill" perspective on finance, I recommend The Internet of Money, by Andreas Antonopoulos:

Taco_Truck_Aficionad • 1 points • 1 November, 2017 08:24 PM [recovered]

Economics in One Lesson is available for free on mises.org

It is a classic, published in 1946 with fresh lessons learned from the Great Depression and WWII. There's a reason they don't teach you this stuff in school.

Imalostman_ • 12 points • 1 November, 2017 09:02 PM

Thank you for the details man.

I usually download audiobooks and listen during workouts and long drives. Will definitely listen to *Economics in One Lesson*.

Care to explain why they don't teach some of the stuff in school? What particularly?

Taco_Truck_Aficionad • 1 points • 1 November, 2017 09:40 PM [recovered]

One of the fundamentals of economics is that monopolies result in worse products and services at higher prices for consumers. The government holds a monopoly on education. The government's monopoly on education didn't come about through natural competition, but my force of arms. Because the government holds a monopoly on education, it only teaches ideas that promote and defend its existence. It isn't going to teach concepts antithetical to central planning, so you don't learn real economics in school. You learn MMT, keynesianism, and other derivatives of socialism. The government is indoctrinating you with blue pills so you will grow up to be a subservient beta cuck dependent on the State, instead of an independent, free-thinking alpha.

Cos_7_ate_9 • 12 points • 1 November, 2017 11:29 PM

Because the government holds a monopoly on education, it only teaches ideas that promote and defend its existence.

Which is why the colleges of the American republic and British constitutional monarchy are full of communists...

It isn't going to teach concepts antithetical to central planning, so you don't learn real economics in school. You learn MMT, keynesianism, and other derivatives of socialism.

Look, I'd prefer education to stay free from state influence, but they do not distort the study of economics to such a comic level. Today's economics does not break down neatly into MMT, Keynesian and Austrian Economics for you to pick a side. There are a ton of academics who support, to a greater or lesser extent, a free market.

Taco_Truck_Aficionad • 1 points • 2 November, 2017 12:33 AM [recovered]

You don't really learn economics to that depth in grades 1-12. You're basically taught a Fabian socialist/neoliberal false narrative that things were really bad back then, and then the mighty government swooped in and saved the day. And that's certainly not the case. The biggest pushers of big government, out side of central banks, are single moms and government school teachers, professors, and academics. They have a strong incentive to push an agenda which holds central planning as the be all end all solution for all of life's problems.

Cos_7_ate_9 • 3 points • 2 November, 2017 01:03 AM

You don't really learn economics to that depth in grades 1-12

Well there's your problem, I thought we were talking about college. School is full of bullshit but a good education in economics is still possible in university.

Taco_Truck_Aficionad • 1 points • 2 November, 2017 01:19 AM [recovered]

A great example of the bad quality of US education is that you spend 12+ years in a government program, which happens to be education, and when you get out you're unemployable. You require another 4 years of government programming and to take on massive debt to get an "entry level position." And when you get out of that, the economy is in the toilet, there's no more jobs. It's pretty shocking that after 12+ years you're still not employable at a living wage.

[deleted] • 1 point • 2 November, 2017 03:31 AM

Meh, define "living". Things are shit, as someone who owes 50k in loans, I understand. I'm at peace with it. There are trends and the "main plot narrative" sucks. People need to look on the sidelines for benefits.

Peter Schiff is fine if approached from a perspective of understanding theoretical ways of thought.

But just don't listen to his actual investment advice seriously, its chock full of bad advice, and he teeters too far towards using conspiracy to back investment reasoning.

The only problem I have with the Austrian way of thought is that its tied up too deep into the theoretical and is impossible to implement in the real world. Which is why Milton Friedman is far more influential because it can be applied to make societies freer. But even Friedman economics, in its most extreme forms, requires full cooperation, either through acceptance of majority in the society willingly or coercion as seen in Pinochet's Chile, they had to massacre and repress a ton of people on their way to building a freer economy (and today Chile is absolutely reaping the benefits).

The Austrian way of thought is even more dependent on an "all-in" approach due to its need to scrap central banks, which is basically asking a politician to ruin his career and reputation. Its political suicide, and would never happen.

Just saying, I think in a theoretical world, the Hayekian way of thought is the ideal we should strive for, but in its essence, its a fantasy. Keynesian thought is too profound, and honestly the US & West does not even adhere to Keynesian thinking anymore (Keynes advocates for gov. intervention and debt only to grow an economy in recession or depression, not rack up endless debt forever and ever), but he's still seen as the central actor in economics that in order to improve the world as it is in this moment, Friedman is far better way of economic thought.

Taco_Truck_Aficionad • 1 points • 4 November, 2017 12:08 PM [recovered]

Peter Schiff is fine if approached from a perspective of understanding theoretical ways of thought.

But just don't listen to his actual investment advice seriously, its chock full of bad advice, and he teeters too far towards using conspiracy to back investment reasoning.

False. Peter Schiff sells investing in gold. He's one a handful of people on the face of the earth who successfully predicted the 2007 economy crash. His father died in prison for not paying taxes. He knows his shit. His product is gold investment, so just remember that when listening to him and you will be fine.

The only problem I have with the Austrian way of thought is that its tied up too deep into the theoretical and is impossible to implement in the real world.

False. Many concepts in Austrian Economics have been absorbed into mainstream economics. Austrian Economics has a foundation of Praxeology, which is using logic and reason to determine subjective needs, wants, and desires of actors in a market. Most of your day-to-day actions in life are purely Austrian Economics in practice and ideology. For example, when you desire something and you buy it, you suddenly value the thing you want to buy more than the money in your hand, so you engage in a transaction.

Which is why Milton Friedman is far more influential because it can be applied to make societies freer. But even Friedman economics, in its most extreme forms, requires full cooperation, either through acceptance of majority in the society willingly or coercion as seen in Pinochet's Chile, they had to massacre and repress a ton of people on their way to building a freer economy (and today Chile is absolutely reaping the benefits).

This is the most ignorant statement I've read all day. The Pinochet regime hired the Chicago Boys as advisors and consultants to the regime in designing and implementing economic policy. Pinochet had to physically remove the communists (who would exterminate the capitalists for trying anything) in order to rebuild Chile into a functioning economy. The biggest myth you'll ever hear is that Pinochet killed 3,000 people. This is 100% false and completely unsubstantiated. Communists are not people.

The Austrian way of thought is even more dependent on an "all-in" approach due to its need to scrap central banks, which is basically asking a politician to ruin his career and reputation. Its political suicide, and would never happen.

Baking food requires an all-in approach. It requires the use of an oven instead of a microwave. It would be chef suicide to not use a microwave. Which is why it would never work. <--This sentence carries that same rationale and logic of the one you just gave above so don't judge me.

Just saying, I think in a theoretical world, the Hayekian way of thought is the ideal we should strive for, but in its essence, its a fantasy. Keynesian thought is too profound...

The "Hayekian world" has empirically proven to yield the best results, the socialist or keynesian systems have always resulted in disaster. There's nothing theoretical about this. Austrian Economics is empirically proven time and time again.

Milton Friedman is a great economist and his books *Capitalism and Freedom* and *Free to Choose* are excellent works, accessible for the laymen. Milton's downfall is that he was willing to play within the system, within the confines of central banking cartel, which empirically speaking, can never work. Logical economics does not function within the confines of a system utilizing a

central banking cartel. The reason for this is that central banks are socialist systems and socialism does not work because of the *economic calculation problem*.

Flpgneves • 11 points • 1 November, 2017 06:11 PM

Economics in One Lesson is a great book. The austrians remind me of TRP, no one wants to hear what they say, but they are usually right.

Nietzsche, Genealogy of Morals and Beyond Good & Evil, Kaufman translations.

Taco_Truck_Aficionad • 1 points • 1 November, 2017 02:30 PM **[recovered]**

Was gonna recommend this as well, but didn't know if it would be a proper fit for this sub, even thought Nietzsche is red pill AF.

Hugh_Munghous • 21 points • 1 November, 2017 05:22 PM

Genealogy of Morals might be the most important philosophical text of the past 150 years. Everything that's going on now with victimhood/SJW/Feminist culture can be completely explained by this book, among other things.

[deleted] • 5 points • 1 November, 2017 10:01 PM

I read it a few months ago without knowing much about it, not even in a redpill mindset but fuck, it blew my mind. This guy was a genius and I'm not even sure I get 50% of his whole thought.

Cos_7_at_9 • 7 points • 1 November, 2017 03:06 PM*

And if you can, read some secondary literature on Nietzsche so you actually know who and what his targets are.

Personally I'd recommend Brian Leiter: Nietzsche on Morality.

wave650 • 5 points • 1 November, 2017 04:49 PM

The more recent Caro version (based on Montinari & Colli) is supposed to be pretty good.

There's also a pretty good podcast episode about Genealogy of Morals for those wanting an introduction.

For general Nietzsche info I think the episode on Netflix from Genius of the Modern World is worth watching.

[deleted] • 8 points • 1 November, 2017 06:38 PM

Too bad Kaufman's lamentations about Nietzsche's views on women caused me to ignore a lot of important points when I read him as a teenager. It really shows how damaging it is to read some of the most solid redpill works ever written through a bluepill filter.

littleblacktruck • 23 points • 1 November, 2017 02:35 PM

I would suggest reading Meditations first. You're going to need stoicism when confronted with RP truths. (Epictetus' Art of Living, too... for bonus points) Then read No More Mr Nice Guy to get past the habitual bargaining that is so ingrained in BP mindset. Now you're ready to unplug by reading The Rational Male. Game on.

Auvergnat[S] • 12 points • 1 November, 2017 07:30 PM*

To everyone their own method.

I did read Meditations first... Years ago, way before TRP. And maybe it did give me some grounding to ease the unplugging. But back then, it did nothing to open my eyes to the reality of the world. I was a delusional blue pill beat before reading it, and I was a delusional blue pill beta after reading it. I'd even say Meditations is dangerous without unplugging because stoicism would tend to make you happy with your situation in that fake world that is the Matrix. Faced with your girl cheating on you, you could be going "oh well, such is the world" instead of getting angry at why this is happening and try to figure out why.

Hence my order: get your eyes open, get angry first, get results second, get at peace third.

drty_pr • 6 points • 1 November, 2017 11:53 PM

To touch over on MRP sidebar. "When I Say No I Feel Guilty" Manuel J. Smith and "The Book Of Pook" are both very good for unplugging.

openWhite • 3 points • 1 November, 2017 05:58 PM

Big fan of Stoicism.

If you need more, Seneca's "Letters from a Stoic" is an easy & fantastic read

max_peenor • 166 points • 1 November, 2017 01:31 PM*

I mean, it's funny and all. This post. Unfortunately, it's too true.

There are too many men (boys) that come here to fix their mental health. No. Bad idea. The vast majority of these people are in a bad place because their world is a bad place. They absolutely must fix the world around them before anything will get better within them. Yes, I get feeling unwanted, which comes from living unwanted, makes your bad feelings feel bad, as you curl up alone in bed and plan ways to trick that hot chick at Starbucks to accidentally take your phone numbers. That shit sucks, right?

No. Fuck your feelings. Fuck that chick at Starbucks. Fuck that school teacher that told you were special before she told you that you wouldn't amount to anything. Fuck your father for saying nothing while you become a prissy soy-boy fag. Fuck your mother for letting him, despite having him by the balls for everything else in life. Fuck your siblings. Fuck your friends that pat you on your back and give you just enough pity to make feel like hope is hopeless, but a fun sized candy bar gives a few seconds of pleasure. Fuck the mailman, because well, fuck him too. And you know what? Fuck you too, because none of these assholes are responsible for your life. You own this titanic pile of shit wherein you sit and play.

The only thing that can change is you. Your life sucks. Hey, look, there's a knob you can turn--you. Stop whining to us. Stop asking us for help. Stop asking us for advice on how to continue to live in your shit puddle. Stop asking for books to read (^ you were just told what to read ^)

You lift--because it changes you. You start approaching random people--because it changes you. You eat better--because it changes you. You dispose of friends that slap around the mud in your shit puddle life--I think you know what happens here.

If you don't think that making the world around you a better place won't change the world inside you, then you are a fucking idiot, or worse, you are a women--because women love their measured doses of misery. Too many man-boys come to this thread and whine about how lifting and pussy haven't brought meaning to

their lives. Meaning to their lives? Yeah, if you have to craft an abstract reason as to why you are unhappy, then you are dancing with the female hamster. You are doing it feel something, not because it is your objective reality. Take your goddamn feelings along with your phantom vagina and mope somewhere else, loser. We cannot help you.

"My life is far worse now that I can see my toes again and I'm fucking women all the time" -- Said no fat loser that turned his life around ever.

(CYA: there are people with actual mental illness and they need our help. These people do more than bitch about hoes and how they weren't hugged enough as a child.)

[deleted] • 27 points • 1 November, 2017 01:55 PM

That's some inspiring morning reading there....fuck yeah. Time to roast this chicken then get to work. By the end of the day I'll have some cooked breast meat and a stock much better than anything you can buy at the store. What does this have to do with male sexual strategy? My pad is organized and clean, ready for action at any time.....I'm living in fucking *style*. It's so much more than just puffing your your chest and acting macho.

Few women could walk into my place and materially improve it. This is not accidental. I think the implications are pretty clear.

BewareTheOldMan • 8 points • 1 November, 2017 07:12 PM*

Fuck your father for saying nothing while you become a prissy soy-boy fag.

This statement alone sums up and points to the overwhelming majority of issues many young men experience as adults. Typically the mother has principal responsibility early, but children get to a point whereby the father takes hold, instills discipline, responsibility, accountability, character, respect for others, productivity, and supervises the transition into adulthood. This ensures the process by which young men are functional and fully independent adults who positively contribute to society.

Lest the girls be forgotten, it's the father task (with adult female assistance) to kick his daughters in the ass (figuratively speaking of course) to ensure they properly fill their role in society as well.

Too many fathers are shirking their duties. It's almost as if society encourages this lapse/allows this to happen without expectation of consequences.

Some people (men *and* women) have no business having responsibility for children and their upbringing.

BreakingRed_ • 7 points • 2 November, 2017 07:58 AM

Fuck your friends that pat you on your back and give you just enough pity to make feel like hope is hopeless, but a fun sized candy bar gives a few seconds of pleasure.

I never expected that I would see online video game communities that are full of losers who built their own hierarchy to climb via performance in Call of Duty and shit, in order to feel like they amount to something, described like that.

I know 25 and 30 year old boys who threw the hopes of building a career or attracting a real girl out of the window and engage daily on what's the best video game and how video games are ruined. They opt for the candy bar as a form of distraction AND hierarchy - "I know more about video games than others do and I'm better at them therefore my being amounts to something" - and with that they avoid focusing on fixing their flaws in order to compete in hierarchies that actually universally matter even if they cannot reach the top, like increasing their income and be more sexually active.

if you have to craft an abstract reason as to why you are unhappy, then you are dancing with the female hamster

This was the hardest pill for me to swallow. I always knew Machiavelli and stoic philosophers had good ideas and ultra-liberals were retarded, but I still felt that "deep down" life is empty without a unicorn and some bullshit Disney love story.

"Meaning of life" doesn't make any sense. It's the blue pill incarnate: pure hamster fuel. The meaning of life in your head is just whatever some asshole told you it was. Con artists throughout history have exploited this by saying life is meaningless for:

anybody who won't read their book

anybody doesn't buy their product

any woman who prefers to bang alphas

any woman who doesn't like to submit to men

any woman who does like to submit to men

any man who doesn't die in battle to help some rich asshole get laid

any man who doesn't get laid

any man who won't give up on his dreams to feed some lazy parasite and her babies

In my case, a pseudo feminist mom and the media brainwashed me into believing that the meaning of life is settling down with an imaginary unicorn who happens to be a clone of my mother.

It's all bullshit, even TRP if you think it will give your life "meaning." I stopped looking for meaning because there's nothing to look for. There is only decision and action. That empty feeling I used to get is just what happens when you get mindfucked into letting somebody else make the decisions for you.

Working out, getting enough sleep, getting laid, practicing mindfulness, and other TRP lessons help me make my own decisions and act on them. That's really all there is.

max_peenor • 3 points • 3 November, 2017 10:58 AM

Username does not check out. ;)

However, excellent read on it. I'll take it a couple steps forward. The only way you can find any meaning in this existence, as we observe and experience it, is by way of a theological argument. You have to create some entity, goal or whatever than transcends this reality. This is because in this reality, nothing pierces the veil of death, meaning that all that you have ever done ceases to matter to you once you die. Your arrangement of atoms are liberated to make a new arrangement of atoms and every choice you made in your life ceases to affect you personally for ever more.

Now if a valid theological argument exists or not, I will not argue here. However, I will observe how fucking hilarious it is to watch most of reddit, which is clearly very anti-thiest (yes, word chosen carefully), make moral arguments about how everything we do and say is wrong. They aren't even humanist, given that's what we attempt and they categorically reject out of hand. They appeal to something greater than manifest reality and that is their stick of righteousness in their fight against us supreme shitlords.

But they don't believe in god. Or heaven. Or hell. Or even some strange alternative as a reason why we should behaving this life least we be judged in another.

redsorcercor • 1 points • 1 November, 2017 02:32 PM **[recovered]**

I wasn't a huge fan of Subtle Art. Yes, it has some values that you can take away from, but definitely some BP sprinkled in whereas you're better off taking principles from other books listed here. Still a good book, but I think the title of itself is enough to drive home the takeaway from it.

BreakingRed_ • 1 point • 1 November, 2017 08:12 PM

I also read the same reviews on Models. Basically he always distills the message down to a wider audience by "prettifying".

HunterRave • 10 points • 1 November, 2017 03:46 PM

Subtle art was Mansons attempt to commercialize his blog and his writings. Definitely more BP.

Models is awesome, it's a really complete guide to sexual strategy. And it can be built upon by other texts such as mystery method, or the rational male. Also it's from when he was younger and had been recently more of a PUA himself

TheScarletScholar • 3 points • 2 November, 2017 06:22 PM

I think "Art of Seduction" is also a good one. (Same author as 48 Laws of Power)

Sir, may I suggest a side order of The Book of Pook and The Manipulated Man by Esther Vilar?

buddhadarko • 7 points • 1 November, 2017 01:06 PM

These books are great. I've read The Rational Male and 48 Laws of Power, and I'm ordering No More Mr. Nice

Guy soon. The Way of Men is another one that I've been meaning to read.

openWh1te • 0 points • 1 November, 2017 06:00 PM

I was let down by the way of Men. On the other hand, No more Mr. Nice guy is good and easy

[deleted] • 6 points • 1 November, 2017 01:22 PM

Tfw I read meditations and the enchiridion before this list. Tfw stoicism is a great philosophy yet it has its practical flaws like all philosophies do.

Also while on the topic of books. I highly recommend, The Sea Wolf by Jack London. It'll show you what a true man is like and is super red pill.

BrosephStalin45 • 2 points • 1 November, 2017 04:09 PM

I'd add "letters from a stoic," as the #1 book to read. Until you recognize you can live a good life without any women then they have too much power over your happiness.

openWh1te • 1 point • 1 November, 2017 05:59 PM

Just recommended that book by Seneca in another comment. I highly agree

40 years old. married 13 years. This is my first day learning about redpill. Sort of on data overload at the moment, but looking forward to reading all these.

openWh1te • 1 point • 1 November, 2017 06:06 PM

No more Mr Nice guy has excercises built in to practice with close friends and loved ones. You might be able to start with that, but I'm sure someone else can make a better recommendation.

Also, it would help if you tell us what your trying to get out of this. All these books provide helpful things for various aspects of life

mattizie • 1 point • 2 November, 2017 01:41 PM

Lol. Your first day?

The winning move is not to play. But seeing as your married, head over to the MRP sub as well, it's better for those that can't easily next their partners.

Also, the most important thing to know is to take it slow. Don't rush into anything. It takes time to digest.

Bang and Day Bang are *ok*, a bit too mechanical, IMO.

I consider myself in the acceptance phase of female bullshit. Do I still need TRM?

dodiat • 1 point • 1 November, 2017 05:44 PM

You will never not need that book. That's the Red Pill bible right there. That book possesses essential knowledge that applies to all RP men, in all phases of their development.

gELSK • 1 point • 2 November, 2017 07:23 AM

// , YES.

Once you read it, you will be surprised that you would ask such a question.

The book connects a lot of things that would otherwise in time start to seem pointless or unrelated, I think.

Like the rug in "The Big Lebowski", it really ties the room together.

For instance, one of the books makes the connection between the Luteal and Follicular phases of the female menstrual cycle and their two-sided mating strategy. In retrospect, it seemed obvious, but it took my reading it and looking at a graph to come to see it and be convinced.

The main weakness is, in my opinion, a lack of bibliography. But given how politically incorrect the subject matter is, I think that can be forgiven in today's political climate.

openWh1te • 3 points • 1 November, 2017 05:56 PM

"The way of Men", #10 listed above, isn't very good. At least I didn't like it.

I've read three others in this list, which are all way better.

Way of Men felt like an outdated model that was full of hidden anger about mainstream society's direction. Less helpful, more finger pointing

Future_Alpha • 2 points • 4 November, 2017 06:54 PM

Way of Men felt like an outdated model that was full of hidden anger about mainstream society's direction. Less helpful, more finger pointing

Nah. He was pointing out the way that society is, because most people don't notice it until pointed out. Also, Donovan's four tactical virtues (strength, courage, mastery and honor) aptly describe the relationships between men and how a man SHOULD act. For me, it helped pin point weaknesses and what I should build up in terms of being a man who can carry his own weight at the perimeter.

Hudini15 • 4 points • 1 November, 2017 09:57 PM

I'm about halfway in and I like it so far. I have to agree with those that say it's a bit watered down for the wider audience, but not by much and still a very effective piece for an... I'll call it an introduction... to game.

gELSK • 1 point • 2 November, 2017 07:26 AM

// , It's a good book for people who think "game" is a dirty word, and has some interesting insights into the hierarchy of skills.

If I may borrow a term from Starting Strength, it lets you know which are the "Master Cues".

I will warn you, though, although its tagline is "Attract women through honesty", it doesn't entirely deliver.

Still, I think it's the most moral and ethical of the approaches on here.

redpillrino69 • 3 points • 3 November, 2017 01:30 PM

There's a ton of classic literature that feels like you're reading straight from TRP I recently read Madame Bovary which is from the 19th century and I have to say reading that feels like having a massive red suppository shoved up your ass without your consent Anna Karenina is another example When you think about it you realize that absolutely nothing said on TRP is new at all

It's a book literally written for the lowest hanging fruit, written in the dumbest way, to appeal to the widest possible audience, to make the most amount of money. Nothing original. Just rehashed classic wisdom dumbed down for the dumbest. I'll give him credit for really knowing his audience. The man knows how to make a buck.

SovereignSoul76 • 1 point • 1 November, 2017 03:27 PM

Can you give a good quick summation of the "Gorilla Mindset", so that maybe we can see what kind of angle Taco is trying to play?

beta_no_mo • 4 points • 1 November, 2017 11:26 PM

It's basically a "fake it till you make it" roadmap for overcoming the negative mindset caused by how you were raised. Think positive, be unrelenting in your pursuits and don't continue the cycle of negativity by treating yourself inwardly the same way everyone has treated you outwardly. It's basically a dummy version of changing your outlook through self-change of associative thinking.

I recommend the text over the Audible version because the author doesn't present it well. His voice is irritating after a short time and he talks way too fast.

You read the book, you know it intimately, and you are trying to defend it. The onus is on you to provide the examples of how your detractor is wrong. Especially if we, as the audience were reserving judgement until you provided such examples, but your retort to me just seems to reinforce your detractor's assertion that it is for retards.

I understand GM is comparatively simple in structure and syntax. But how many guys here have actually implemented the suggestions? To say that the lessons contained therein are beneath people on here is asinine. What % of these commenters have an LLC that they've established to reduce their federal tax burden (as outlined by the book)? Five percent MAYBE? But they know it all, just ask'em!

It is 100% an ego thing. What is more important to them is the SOCIAL PROOF of saying they've read, or displaying a book/author's work in their house.

Ha ha. Xianity and RP are like oil and water.

[deleted] • 1 point • 3 November, 2017 06:46 PM

If you're talking about the current incarnation of Evangelicalism crossed with feminism, then yes.

But tons of RP truths in the Bible about the nature of men and women. Christ loves his bride so much it leads to his death. All sorts of wisdom about the waywardness of women's hearts. Eve is enticed and brings the fruit to her husband and it leads to his down fall.

If you're solely talking about monogamy and premarital sex, it can be argued that those are relatively recent additions to the religion and arent true Christianity/judiasm circa 0AD.

Wilreadit • 1 point • 4 November, 2017 11:27 AM

I am not talking about the nuances behind the allegories and parables. I am talking about organized the religion that has sought to destroy the scientific bent of society for centuries.

[deleted] • 1 point • 4 November, 2017 05:20 PM

Yes. In every human organization with power evil men have usurped and manipulated said power for their own aims, not the aims of the original intent. This can be said of religious institutions, governments, companies, schools, PTAs on and on. I blame the evil people not the religion. But to each their own.

Fluff- Light Easy Reading.

Fight Club. A decade before TRP was even beginning Chuck Palahniuk wrote one of the first wake up calls to the modern man and made fat youtubers blubber about how it's clearly an allegory for fascism. What you get out of it will depend on what you put into it- people thought it was about a gay man struggling to keep himself in the closet, really- but it's an easy read and if nothing else follow the movie almost 1:1.

Great Gatsby. American classic, cautionary tale not to lose your head chasing after dreams with no footing and to keep in control in a world where you're surrounded by money, easy sex and cheap thrills.

Biographies- because someone else has done it before you ever did.

Teddy Roosevelt immediately comes to mind. Politics withstanding he was kind of the OG Red Pill taking himself from a sickly asthmatic child to someone emblematic of classical masculinity.

American industrialists- Henry Ford, Andrew Carnegie and John D. Rockefeller.

I have recently read through 'Europe: The Struggle for Supremacy, 1453 to the Present' by Brendan Simms; although, as is suggested by the title, the book is very much focused upon the histories, it provides key incite into power politics which can be scaled down and applied to daily life.

Curious why Mystery Method has not been listed? Mystery practically founded the evolutionary psychology slant as applied to practical game, did he not?

BusterVadge • 5 points • 1 November, 2017 02:56 PM

MM doesn't work long term, and is only about game.

Auvergnat[S] • 2 points • 1 November, 2017 07:27 PM

MM is foundational and would place high on a list of books about Game, but in the exercise I set here (shortest list, in order, for unplugging) Bang made more sense as it's more general.

gELSK • 1 point • 3 November, 2017 10:41 PM

// , I'd be interested in a post on this complement to the "unplugging".

Deception leaves a bad taste in my mouth, and I think some reading material could help me overcome my difficulty in that.

Auvergnat[S] • 1 point • 4 November, 2017 04:56 AM

The PUA community was a number of people trying stuff out, stealing and adapting each other's idea, eventually crystallizing around different "styles". You'll find the Mystery Method, D'Angelo "Double Your Dating", the Juggler method, RSD, Roosh's Bang, Mark Manson's Models, London Day Game etc. etc. But trying to collect them all like pokemon is the best way to end up not doing anything. The best thing you can do is pick one and force yourself applying.

Try convince yourself that this is not deception, but an act you're putting. You're a comedian, acting a role, practicing his play, and the measure of your success is how much people believe your act.

[deleted] • 2 points • 2 November, 2017 01:38 AM

Mystery is a joke out of the PUA community that relies on form over substance to essentially dupe women. If you know what you're doing you can apply his methodology better than he does and have repeat customers- they're called plates.

[deleted] • 3 points • 1 November, 2017 02:40 PM

That's PUA stuff. I've watched his presentations and none of it is concerned with inner game, mindset, etc. it's quite superficial, albeit somewhat effective.

HunterRave • 6 points • 1 November, 2017 04:06 PM

Classic "Red Pilled" male discounting game. It is absolutely superficial, but it's an important part of understanding how the matrix works, so you can take advantage of it. You can't get laid just by knowing that the matrix exists, you have to be able to manipulate it through game.

I'm anticipating some "getting laid isn't everything" responses, and my answer will be "no fucking shit". But we all know that TRP is primarily a sexual strategy sub, and trying to remove game from your sexual strategy is pretty fucking dumb.

[deleted] • 2 points • 1 November, 2017 04:14 PM

Actually you can get laid in this "matrix" without "game." Quite easily. But that wasn't my point, my point is that the Mystery Method is an example of what some people refer to as "indirect" game. Another form of "game" is the direct method, which is described by Alan Roger Curie and David X, et al.

You're welcome.

HunterRave • 2 points • 1 November, 2017 04:36 PM

I think you're getting lost in your own definitions. Maybe you should read some of those books?

[deleted] • 1 point • 1 November, 2017 04:37 PM

The Fountainhead by Ayn Rand

If you haven't read it, buy it today. I like it a lot better than *Atlas Shrugged* personally since its theme is more applicable to an individual vs. mass societal way of thought.

The story is amazing, and the main character Howard Roark is the ultimate Red Pill character and represents a self-sustainability and individualistic way of living.

I won't spoil the ending but it should be essential reading around here.

// , That book is such bullshit. Don't spew Randroidery 'round these parts... this is a no BS zone.

Those books were one sided, and short on actual facts. Look at the life of their author, even.

Facts? Its a novel, what facts do you expect?

Its a philosophical breakdown of how society seeks to dominate and ruin the individual, and is a defense of individual thought and rights up against conforming, societal viewpoints.

If defense of the individual over the collective / conformist mentality isn't Red Pill philosophy at the core, nothing is. Its universally despised by feminists. Either you've never read the book, misunderstood, or have preconceived ideas from media, which is too bad.

// , TRP is not as "individualistic" as it first appears, and neither are you.

I wholeheartedly disagree with your sentence "Knowledge is power." It is a bad translation from "Sapientia est potentia" which would be accurately translated to "Wisdom is power". Knowledge is just an accumulation: a shelf full of books is raw knowledge; everyone can purchase knowledge. Being able to understand the quintessence of this knowledge is Wisdom. This is what you should strive for.

Can anyone provide a pdf for rational male preventive medicine please?

// , I hack the shit out of everything, and I paid for this.

Unless you're typing this from a library, you can likely afford the \$11.

If you can afford that chain on your neck, you can afford to buy the book. Maybe save up over the course of 4 months, put pennies in a jar each day, whatever.

Rollo is a key contributor, invaluable member of and regular visitor to this sub - I don't think it's cool to try and steal his work under his nose.

I've only read TRM so far, but it is worth every penny and you really should consider buying his books as a sound investment.

I enjoy his books, I really would buy them if I wasn't a broke college student in a third world country.

// , You can sign up for a free trial of Audible and get a free audiobook, I think.

If Mr. Tomassi does not respond, contact me in private.

What are you studying?
