How anyone can all themselves a feminist when this is what the movement is about. It may have started with noble, ideological dreams of equality but it's been quickly hijacked by the far right and turned into a hate movement full of bigotry. As this sub testifies.

Yet, not a single *feminist* ever comments on the content of these pages. The silence is deafening.

It's lucky that men aren't protected, in law, as other groups are. The jails would be overflowing with feminists.
