

How often do you guys see your FWBs?

Those who have a rotation of girls that you just have sex with, how often?

Very curious, as this is the first time in my life I've been in such a situation (with multiple girls). Right now I'm seeing them about once a week.

Once a week. If they behave and do their chores around my house, buy me gifts, and cook, then twice a week. I pull away for a week if shit changes.

1 a week is all I have time for.

I'm good with once a week. Sometimes twice, maybe three times if I don't have much going on.

I usually see one or two of them once a week, maybe even less, depends how busy you are.

One week is the standard partly because any more frequent contact reduces the time until you receive the Ultimatum. Once a week seems to be the consensus optimization between frequency of visits and risk of catching feelings.

Generally you would want to fuck on the weekends when you and they have more time. But you only have so many weekends to go around so if you have one sex partner that means once a week, two and it's every other week and so on. Doesn't always work out exactly like that all nice and neat. Could be one girl is a focus during the summer and your lab partner takes over during school for example if you are a student.

Balancing (my) work, kids, wife, life, and whatever she was doing with her kid, work, life; it ended up being once a month. It was an odd situation though; sometimes dating her with the wife and other times solo. Unicorns are fleeting after all.
