

How promiscuous are female bartenders?

January 14, 2016 | 3 upvotes | by [Chad_Thundercock69](#)

Getting some serious oneitis for a bartender, oneitis for any women is a joke but surely even more so for bartenders who get hit on by drunk guys every saturday night?

Can someone punch some reality into me?

One-itis for any woman is bad doesn't matter if she is a virgin or takes cock on the reg

They get hit on pretty regularly so they have about as much sex as they want. When I was bartending a few years ago the girls I worked with always had a new "boyfriend" and I rarely seen the same guy twice.

Hospitality is the land of hookups. Patrons, staff, owner/s.

Bar staff can be fun one night stands. That's about all.
