Haven't read it yet but it's because it makes their ass look better, that's all.

Overenthusiastic speculation without a proper grounding in empiricism. Of such stuff are blue pills made.

Think of what we would say about a feminist who said high heels were awful because they were "designed to make women helpless".

SUCH a dumb article. The only way to successfully walk in heels is to swing your hips and throw your pelvis slightly forward. They force you to walk provocatively.

This is just trying to apply evo psych to speculation. My own hypothesis is that high heels accent already feminine curves on women thus making them more attractive.

I hate heels. Very few women look good in them, plus, I like short girls.
