Serious question. The Goog just returns broken links and someone selling a used copy for \$900 on Amazon. Is it posted somewhere or do you need some kind of Dread level password to get a copy?

Its one of the ones included in the pack.

Worth noting that the PDF included in this bundle is formatted to make it absolute shit to read on a Kindle, unfortunately.

Ah thats lame. Here try this, its the same file converted to a .mobi for Amazon devices. May help or may not change anything but sometimes I do this and it fixes weird issues for me.

Original seems fine for me, but I am using moon reader on an Android tablet and Calibre for Windows desktop to read it which probably bypasses the issues you see.

The problem, if I remember correctly, was that there were a bunch of weird graphics of nude women in the margin of every single page which made things janky on Kindle. I'll check this out, thanks.

Edit: yeah your .mobi has those things in the margins as well.

I downloaded a number of books from this collection to read on my Kindle. While many were indeed formatted such that they were difficult to read on Kindle (even after converting to .mobi), SGM was an exception. It felt like a proper e-book. Try using Caliber to convert the books.

Thanks, I went ahead and downloaded the whole thing. It's a great resource.

... I don't think I would want a used hardcopy of "Sex God Method".

Do whatever you have to do to get a copy though. This information is pure gold in the sack.

Stuff like this: *This isn't to say that foreplay isn't necessary. Oral sex and fingering can be great to increase the girl's Immersion before the act of sex, and to provide Variety. However, keep the subordinate role of foreplay in your mind at all times. Primarily, a woman does not want you for your fingers or your tongue. She wants you for your mind, and your dick.*

It's under *982.1 Fluid Dynamics* in the library.

In all seriousness, SGM is just about the only book I recommend you pirate because it's impossible find otherwise.

Ha, nice rickroll. Didn't know that was still a thing.

Earlier this year I tried buying a copy from Amazon for like \$500. It never showed up and the seller canceled the order. So I found somewhere to download it from links in comments in MRP or TRP.

Cheaper than rhinoceros horn, I guess.

RedPillCoach • 1 point • 22 September, 2018 11:59 PM

And it works even better.

Don't be disappointed if you find the effort searching not worth the read. I think it is overrated, although it is better than others.

I got it and am about halfway through. I'm actually getting a fair bit out of it. It's like all the RP advice. It's stuff that should be obvious but somehow having a plan and a set of instructions makes all the difference.
