I've had some of this. I can't remember what brand but it was very good!

I'll probably love it but it sounds like a definite hangover in the morning lol

Anyone know what it's sweetened with? I'm guessing aspartame or something similar since it's 0 g sugar according to MFP

I was trying to get an ingredient list but couldn't find it. Can't have alcohol without a sugar, right? Usually I end up putting a few shots of flavored vodka in a coordinating flavored sparkling water. I want to try this stuff though.

That's my least favorite thing about alcohol- not required to have an ingredient list or nutritional facts ☐ can't wait for the day when it's required! Can't a girl get tipsy while knowing what she's putting in her body?

Ehhh. I kinda want to know too but I figure if you're drinking alcohol infrequently the apartame is the lesser of the evils anyways.
