

Elaborate on hard no/ soft no

I just read this post : <https://www.trp.red/p/whisper/1274> that states:

So, just like the “soft no” itself, the phrase “no means no” is used to measure a man’s social savvy, and thereby separate the wheat from the chaff.

So, how do different types of man respond to “no means no”?

...

A fully realized red pill men doesn’t merely ignore it while making the correct noises.... He constructs a dog whistle of his own, using his word choice and behaviour to let women that this isn’t his first rodeo and everything will be alright.

...

Here’s some things to keep in mind:

There are hard and soft “no”s.

Women want you to be able to tell the difference.

Can you all elaborate on the difference between hard and soft No with some examples ?

You're making out. You slide your hand between her legs. She moves it away but keeps kissing you while she moves her hips into you.

Vs.

You're trying to kiss her. She moves her face away. Her eyes look distant and her body is closed off. You try to put your hand between her legs and she reacts like you dropped scalding hot coffee on her.
