

Anyone has taken Oral Testosterone Undecanoate?

May 29, 2019 | 20 upvotes | by [Bruchibre](#)

I'm in India this week and they sell it in pharmacy over the counter. I was wondering if anyone has ever tried swallowing this kind of pill?

I've read somewhere that oral Testosterone was bad for the liver therefore better administered by gel or patch on the skin. Any idea on that please?

I'm 36yo with the T level of a 60yo man. But besides having patchy beard and no chest hair, I'm quite muscular and have no libido problem.

I am from India and I honestly don't recommend buying anything from here

[deleted] • 3 points • 29 May, 2019 01:10 PM

Chandni Chowk has tone of fake roids and PCT's. They're shit af

iqbal002 • 1 point • 29 May, 2019 03:26 PM

This meds will fuck you for good , I have also searched for them in India it's better you stick with nature

Arrenox • 1 point • 29 May, 2019 03:29 PM

What about the afinil?

SupremeBBC • 15 points • 29 May, 2019 01:00 PM

Just get regular test E/Prop/Ace and run that. Injection truly is the only way unless you're working with orals like dbol, anavar, etc

Vyergulf • 7 points • 29 May, 2019 01:24 PM

This. Orals should be minimal and only to assist the injections.

Anadrol Dianabol Anavar Winstrol

Those are the only peaks I'd suggest but never by themselves.

RinkyInky • 13 points • 29 May, 2019 12:59 PM

If you have low t levels find a doctor that will give you TRT instead of what a you plan to do now.

whiffofass 1 points 29 May, 2019 12:35 PM* **[recovered]**

Do you have a vagina? Inject it

iOSvista • 4 points • 29 May, 2019 02:54 PM

Despite what OP might want to believe, oral is more dangerous and definitely more harmful to the liver than injection. IMO go with an injectable cypionate 4 in conjuncture with a good dec bi weekly.

FreedomEpiphany • 2 points • 29 May, 2019 12:51 PM

The above.

bf5yes • 5 points • 29 May, 2019 01:54 PM

Only do legitimate T replacement through a Dr that specializes in male issues. Normal Dr tend to have no clue. Also, only do the injections. You will not have bad side effects because the Dr will only keep you in a normal range. It is one of the most important things a man can do for his health.

my_mix_still_sucks • 0 points • 29 May, 2019 09:54 PM

How the hell do you get doctors to prescribe T?

bf5yes • 1 point • 30 May, 2019 02:03 PM

Get a blood test done. If it shows you have low T and some of the low T side effects then you get a prescription. I have been on replacement for yes.

Skinnyboiwithadream • 3 points • 29 May, 2019 01:50 PM

Don't.

bruiser18 • 2 points • 29 May, 2019 02:08 PM

Forget test orals. And the gels or whatever other bullshit you said. Get some test E and inject it mate.

testhhhhh • 2 points • 29 May, 2019 02:12 PM

You are only there for 1 week? If so there is no point. If you are 60 you are a prime candidate for HRT with an actual doc and you would get US grade stuff. Wait until you get back.

damaged_goods420 • 2 points • 29 May, 2019 02:16 PM

Inject test enanthate/cypionate and thank me later

Rnee45 • 2 points • 29 May, 2019 04:26 PM

Taking T is a lifelong commitment and a real pain in the ass - it's not as simple as popping a pill in the morning. Really, there's no reason to go on exogenous hormones unless you're suffering from lower than baseline levels. It's just not worth the potential downside.

[deleted] • 4 points • 29 May, 2019 01:09 PM

I'm from India too. I don't recommend a test cycle at all . A friend of mine went on a cycle at the age of 17 and all it did was harm his body to the point where he suffers from man boobs problem. The only reason to get on a cycle is if you really want to compete on a national or an International level tournament

ogpromethazine • 4 points • 29 May, 2019 03:12 PM

You need to take anti estrogens with a. Test cycle to prevent man tits

bf5yes • 1 point • 29 May, 2019 09:51 PM

No you do not unless you already have a natural high estrogen levels. If you do not exceed natural levels you do not need any e

bf5yes • 1 point • 29 May, 2019 09:49 PM

Dumb

mrrooftops • 0 points • 29 May, 2019 01:26 PM*

Spoken like a true expert. You believe in witchcraft too, you know, based on tales?

[deleted] • 5 points • 29 May, 2019 01:35 PM

Yeah , saddest story I've heard was yours

mrrooftops • -4 points • 29 May, 2019 01:43 PM

The one about me and your mom? ReeEEEEEE!

[deleted] • 5 points • 29 May, 2019 02:08 PM

Magnificent, explains why you're a 36 year old incel

mrrooftops • -5 points • 29 May, 2019 04:00 PM

You couldn't crawl deeper into my frame if you tried.

GotPermaBanForLolis • 4 points • 29 May, 2019 01:57 PM

Consuming testosterone oral is life threatening. It will fuck up your liver faster than Mike Tyson giving you a liver punch. Scared of needles? If your T levels are really that low go to a doctor and he will prescribe it. You know, that's what doctors are for.

Vikingcel • 3 points • 29 May, 2019 06:55 PM

If you think consuming testosterone orally is life threatening, you shouldn't chime in on this, because you know fuck all.

GotPermaBanForLolis • 0 points • 29 May, 2019 09:51 PM

Yeah i bet

KaiSmashSmashSawmash • 0 points • 29 May, 2019 08:02 PM

Bull,rooster and venison meat all have higher levels of testosterone.

drsherbert • 2 points • 29 May, 2019 02:17 PM

Don't take it. You'll fuck your liver up bad

Nuwanda206 • 1 point • 29 May, 2019 04:44 PM

Don't fuck with orals. If you really want to go on TRT (testosterone replacement therapy), either go to an endocrinologist or a urologist, or get some testosterone enanthate or cypionate, and inject it .

SeasonedRP • 1 point • 29 May, 2019 05:43 PM

It isn't delivered effectively. Only a small amount will be absorbed. If you want to use test, inject it.

Vikingcel • 1 point • 29 May, 2019 07:02 PM

Test U has some, but very low oral bioavailability (<10%). Not effective at all and definitely bad price/result ratio.

If you want to mess with your hormones, get injectable test. If you are asking this question, you haven't read enough about anabolics at all. Start studying now and in 3-6 months you'll be ready to make that decision.

If you're low T, talk to your doc. If you have legitimate issues, you don't need to go the illegal route.

Kabuki431 • 1 point • 29 May, 2019 07:51 PM

Man up and pin it like a man. All other forms except injectables are snake oil.

With exception of actual orals

[deleted] • 1 point • 29 May, 2019 09:13 PM

You need injections.

taway987123456 • 1 point • 29 May, 2019 09:18 PM

Oral is a terrible idea, it's bad on the liver.

Also make sure you research before you take that stuff. It will shut down your natural testosterone.

Musicgoon • 1 point • 30 May, 2019 12:17 AM

Terrible idea. What are you looking to do with this? Do you have low T what is your actual levels? You do realize that this will suppress your natural T? Your dick won't work after you come off it. Do you have a proper PCT protocol? Do you know what that is?

How long are you taking this and dosages?

jackandjill22 • 1 point • 30 May, 2019 11:15 AM

Hm

cumberger • 1 point • 13 June, 2019 12:12 AM

it will spread your livers ass and fuck it until it can't work

TripleDragons • 1 point • 29 May, 2019 03:52 PM

Once you take it your body will completely shut down testosterone production. You will always need to take it unless you do a pct (look this up) which is yet another cycle of drugs. In short do extensive research this isn't a small thing like taking a multi vit

bf5yes • 1 point • 29 May, 2019 09:48 PM

T replacement is not a cycle. You do not go off of it. Plus his body is not producing properly to begin with mate.

TripleDragons • 1 point • 29 May, 2019 10:19 PM

He says he's muscular with no libido problem. I seriously doubt he's not producing testosterone. He's making shit up to look for shortcuts.

bf5yes • 1 point • 30 May, 2019 02:02 PM

Maybe. My assumption was he had a blood test done that showed he had a 60yr old T profile. Point taken you can read this your way as well.

Zsaqwes7 • 0 points • 29 May, 2019 05:15 PM

Can I please get karma my other account got disabled and I cant post here now
