I think this would definitely offer insights into how much being lean and muscular can make up for a non-Chad face

Traits:

average face, no major flaws, overall good harmony decent lower third Height: between 5.10 and 6ft Physique: muscular and low bodyfat (with abs), with an aesthetic body (not the autistic typical gymcel body)

He should be direct, could cocky and sexual in his conversations, just like the usual chadfishes. This is also important.

i may fit in this description and the answer is: 0 / 100 lol. Either chad or nothing, there's no other way you can't gymmax or any-max, red pill is bs.

I kind of fit this description too.

Got 100 matches in 7 weeks.

I wasn't direct and sexual, though except a few times

Matches don't mean shit. I've had dozens of matches a week on TPlus with a good profile and daily swiping. 90% did not respond/ghosted. 3 dates with average chicks of which one turned out to be a psycho, 1 hidden landwhale and one 2/10 for lulz. No score. I'm a gymmaxed normie (6.5 maybe 7/10 face) that hates jestermaxing. You'd think it would work out alright, but you'd be wrong - it's being a time filler for when Chad is busy, at best.
