

Whats up with people here still fucking chicks in quarantine?

March 27, 2020 | 79 upvotes | by [ThrowRAtesto3o](#)

I've seen quite a few posts/comments here, stupid shit like "should I cold approach during quarantine?" and "i'm still fucking chicks from tinder" etc.

See, this stupid shit is why governments are enforcing lockdowns and social distancing by law, its just infuriatingly stupid. i know I should be IDGAF about this, but I really just can't.

I mean its sort of funny too because so many people get paranoid about whether these hoes have STDs, when this corona shit is 10x is worse.

If you're living with your LTR or plate, fair game fuck away, but if not, then sex is literally the worst thing you could do in terms of catching and spreading the virus.

Because this sub is actually full of simps who dont care about anything but getting laid by any means necessary lol

Per_Horses6 • 29 points • 27 March, 2020 08:16 PM

Fr. Sad to see. I had to cancel dates. My health and family are more important than getting laid rn.

DerpJungler • 26 points • 27 March, 2020 08:32 PM

This. Girl I'm(was) seeing is begging me to meet, even for an hour just to fuck.

Nope. I'd rather stay sexless for a few more weeks (at least) and protect others around me than to chase an hour of sex.

Stay safe people.

Pussy will come in abundance if you keep abundance in your mind after all this shit.

Per_Horses6 • 7 points • 27 March, 2020 08:41 PM

Right. My old self would say fuck it and make the risk and see the chick but nah. Sex isn't the most important thing in the world. It's hard cuz I'm doing no fap also. But it makes me stronger mentally.

Rage8150 • 9 points • 27 March, 2020 09:02 PM

Stay strong brother. No fap right now is like trying to run away from a hurricane.

Per_Horses6 • 2 points • 27 March, 2020 09:28 PM

It's tough, and I've failed many times, but the benefits far exceed the fapping. Thanks man, everyone's watching porn and wanking but that just ain't me.

[deleted] • 1 point • 27 March, 2020 09:41 PM

Agreed. She'll get more attracted cause she hasnt gotten what she was and she thinks you value yourself more then her

dirkberkis • 2 points • 27 March, 2020 11:13 PM

Exactly this. If you place sex over your own health, sorry but thats simp shit.

shitpostlord4321 • 4 points • 27 March, 2020 09:04 PM

It's mostly a bunch of newbies who post on here. A lot of the posts have been pretty funny though because of that lmao

Kevchenkoo • 2 points • 27 March, 2020 09:38 PM

Aint that the truth, I was suprised by the fact that most of the comments on the other post were about still getting laid and that the virus is not that big of a deal.

Tousen71 • 1 point • 27 March, 2020 08:52 PM

Gotta love the "You're a beta!" "No, YOU'RE a beta!" debates. It really shows the maturity of this sub.

Let another man do what he wants.

He gets sick its on him. But the idea of someone making a choice to go get pussy, even if it means they might get the sniffles for two weeks doesn't make them beta.

Dudes arguing over another man's life choices is weak.

TRP teaches self-reliance, self improvement, and doing what's best for oneself.

Let men make their own choices without bitching about it.

[deleted] • 12 points • 27 March, 2020 09:16 PM

Dudes arguing over another man's life choices is weak.

This is an unprecedented situation. There will never be another situation like this in our lifetime.

The world economy is tanking. The word has stopped. People are dying. People's "life choices" now have a direct and immediate impact on everyone else.

The fact is, that "let people live their life" no longer applies when governments are enforcing national lockdowns because of people's stupid decisions.

In most cases, I don't give a fuck about what others do. But now, their stupidity has immediate consequences on others.

Tousen71 • 0 points • 27 March, 2020 10:10 PM

You realize there isn't concrete information as to this virus as far as the fatality rate, transmission rate, or even total case rate, right? That information is changing every day as we learn more. Projections of hundreds of thousands dead have been reduced in countries like the UK to 20,000.

People are figuring this out as they go along.

The point that I'm trying to make is not to freak out. Take your life day by day and minimize your risks. If you're a dude that lives alone, and works from home in a city without close relatives, go get your rocks off.

[deleted] • 2 points • 27 March, 2020 10:13 PM

If you live alone and work from home in a city, you should not be fucking a random chick you barely know. Even plates can't be trusted. I would *possibly* make exceptions for LTRs, but there's no way in hell you should leave self isolation to fuck a **hoe**.

It is a guarantee that if she is willing to fuck you, she will be fucking other guys.

Tousen71 • 1 point • 27 March, 2020 10:28 PM

That's your philosophy, but if a girl is going to come to your place to fuck you on some Netflix and Chill, let the men live.

BruhMoment45886 • 56 points • 27 March, 2020 06:59 PM

Finally a Chad on here. These pussy betas cant go a week without sex theyd rather ignore officials and have their parents die

pilot333 • 5 points • 27 March, 2020 08:03 PM

srs - do that many ppl here still live with their parents?

qwerty_asd • 11 points • 27 March, 2020 08:10 PM

I'd guess at least half.

[deleted] • 22 points • 27 March, 2020 07:24 PM

Yea bro the pussy worship is sickening.

Logical_Insurance • -15 points • 27 March, 2020 08:08 PM

Nothing more Chad than following all orders that the Officials give you without question huh? Lol.

notatravel13 • 1 point • 28 March, 2020 11:09 PM

How is this putting pussy on a pedestal lmao.

Logical_Insurance • -1 points • 27 March, 2020 09:06 PM

You're going to contract coronavirus one way or another, and then become immune to it. It doesn't have anything to do with putting pussy on a pedestal, and everything to do with not letting "Officials" dictate your life schedule because of the kung flu.

DrizzlyShrimp36 • 1 point • 27 March, 2020 09:42 PM

That's just not true you fucking moron. If you stay home and don't see anyone you will most likely be just fine. And no you won't be immune to it after contracting it, there have been several cases of people getting it twice, and the second round is actually more lethal than the first.

You're being ignorant, dangerous, and naive, all for the sake of protecting your fragile ego by "rebelling" against officials. You fucking low class moron.

Logical_Insurance • 0 points • 28 March, 2020 02:21 AM

If you stay home and don't see anyone you will most likely be just fine.

Ok, you just hang out inside for 18+ months until a vaccine is out, you fucking pathetic cuck.

DrizzlyShrimp36 • 1 point • 28 March, 2020 02:23 AM

Ok, you go outside, get the virus, clog up the healthcare system and contribute to the biggest pandemic in living memory, you ignorant fucking cunt. You're in the bottom tier of society and people like you are the reason why we're stuck in this mess.

Logical_Insurance • 0 points • 28 March, 2020 02:31 AM

Ok, you go outside, get the virus, clog up the healthcare system

I'll certainly be outside. I'm not clogging up the healthcare system though, because I'm not a geriatric, morbidly obese, or asthmatic. I'll be fine.

If we're stuck in a mess, it has nothing to do with people going outside, you fucking imbecile. Suck up some more bullshit though and piss in your boots inside, do what you're told like a good boy.

DrizzlyShrimp36 • 0 points • 28 March, 2020 02:45 AM

Look at you go. What a forward thinker. You don't need to be any of those things

to be affected by the virus, little man. But having daddy issues makes you think you need to act tough whenever you're facing adversity so now you will participate in societal problems out of sheer ignorance and stubbornness.

You know what? Why don't we let this thing run its course and talk about it in a couple months. We'll see who's an imbecile then.

I'm willing to bet that the thousands of experts around the globe who say it will be disastrous are right. But it's okay buddy, I'm sure being uneducated is hard.

You're doing your best. Just try to do better.

Logical_Insurance • 0 points • 28 March, 2020 03:00 AM

"it's going to be disastrous"

What a laugh. You sound like a woman. Watching a little too much female oriented panic media. The effects on the economy are going to be disastrous, that's for sure, mostly due to cuck faggots like you simping to every fucking scare story they're sold.

SavvyVolley6 • 26 points • 27 March, 2020 06:51 PM

This isn't really a TRP sub. The overwhelming majority of guys on here do not know what the principles are and/or how to properly implement them. This sub is basically an offshoot of Seduction nowadays.

Real TRP guys don't give a fuck about getting laid right now.

itiswr1tten • 10 points • 27 March, 2020 08:39 PM

The whole reason asktrp was created was to net off all the trash that was attracted to the sub, but didn't want to lift or put in actual work.

Koko175 • 12 points • 27 March, 2020 07:43 PM

These dudes worship women and pussy and place their value around it. That's why they're freaking out

Without being around women they feel like shit. Many also lack the vision to understand a few months out of your lifetime won't affect you. This is a time to learn how to be still and improve the small things, make an investment in yourself, all aspects of your health.

Instead of having a positive outlook on the situation at hand they are negative because they are controlled by pussy they weren't getting and weren't going to get.

His_Hands_Are_Small • 4 points • 27 March, 2020 08:39 PM

I gotta coom!

With as many girls as possible, that's the red pill way! Becoming a patriarch with a family and raising future productive members of society is for blue pill losers. I need to coom into as many ratchet girls, that's the only way that I can be happy, and here are many ad hoc reasons as to why I'm right:

1) It's "natural"

b) I don't have the confidence that I can keep one for life, and I'm also kind of insufferable, so I am too scared to get married because I'm sure that I'll get divorce raped. Red pill only means attracting her short term, but keeping them for life is basically impossible the way that I act.

iii) I just plain want to do it, but I can't really explain why, but I know for sure it's got nothing to do with

insecurities, because that would be blue pill, and that's not me.

Look, all of society is trying to bluepill you. We used to be redpill. Look at our grandfathers generation, they were so redpill. w-w-what? What do you mean almost all of our grandparents generation only had one sexual partner, and valued family above individual short term sexual pleasures.... no!!!!!! Society is trying to blue pill you on everything except sex, because I gotta COOOOOM! Having sex with lots of people is red pill, it's the one red pill thing society is doing.... there's no way that promiscuous sex with lots of girls is just as detrimental to men as it is to women. NOOOOOOOOOOOO

The-Knowing • 4 points • 27 March, 2020 08:25 PM*

people get paranoid

Ironic.

when this corona shit is 10x is worse.

Yes for elderly or vulnerable people.

spreading the virus.

Please understand this before you let the hysteria get to you: The spread is virtually unstoppable. It's not a question of can we stop it, it's a question of how much can we slow it down, so that healthcare institutions can bear the load. More than 50% of people who are contagious don't show symptoms, so there is literally no way to stop the spread without *absolute isolation*. Especially also given how easily it spreads and how it spreads through the respiratory system.

The phrase "But you could spread it to vulnerable people" seems so NPC to me. That's their own responsibility to stay safe. Covid-19 is nothing more than a nuisance for 99.9% of people who are generally below the age of 60/70. How is it not their responsibility to isolate themselves? If I were afraid of dying I would stay the fuck home and not interact with anyone, which most sensible elderly people do.

And to avoid ad hominem, I don't go out other than for grocery shopping and I'm not seeing any plates at the moment.

Right? I thought the whole point of TRP is becoming so alpha you don't even need sex but you get it anyway. This is exact opposite of that.

throwmrwaway • 1 point • 27 March, 2020 09:38 PM

The whole point of trp is getting rid of the need for female validation, and people be risking their life just to get that validation and come here to brag, that's literally the opposite of trp

Wrath_of_Trump • 1 point • 27 March, 2020 09:41 PM

i hate authoritarianism but there is a time when enough is enough, you get out the canes and start whipping people like they do in india

hockeyaddict87 • 1 point • 27 March, 2020 09:55 PM

Maybe because this planet is filled with beta bitches who get scared of a flu? Just stay away from grandparents, and if they are isolating too chances are neither of you have it. When you factor in unreported cases the death % becomes like .5%

[deleted] • 1 point • 27 March, 2020 09:59 PM

Coronavirus is not the Flu, ffs. Its much worse.

omega05 • 1 point • 27 March, 2020 07:54 PM

I never understand these people who are infuriatingly mad that other people they dont even know are living their lives and not being a worrier like you

[deleted] • 7 points • 27 March, 2020 07:55 PM

Because those people who are "living their lives" and not following the rules, are the **exact reason** governments are enforcing lockdowns.

Its **because** of people like that, that governmentns now enforce lockdowns.

They're not just "living their lives". Their actions have a direct and huge consequence on others.

Nicolacho7 • -1 points • 27 March, 2020 08:35 PM

I keep seeing the same problem. It's the fucking government. The government shouldn't have that much power in telling people what to do.

Accendino69 • 5 points • 27 March, 2020 08:55 PM

go on worldometer, check corona virus statistics and then reread your retarded comment.

hate_sarcasm • 1 point • 27 March, 2020 10:55 PM

Ok, fuck the government.

But, Think about normal people like you and me but who have to actually face this virus. Doctors, nurses, working overtime and exposing themselves to the virus.

if you don't follow the rules imposed by the evil bad mean government, you are not hurting "it" you are hurting everyone else, especially those working in health care.

So yeah, this isn't worth busting a nut.

pilot333 • 0 points • 27 March, 2020 07:09 PM*

Idk but I also dk why you care. That bored huh? I have a few friends that I train with (serious lifters, varsity guys, OHL, etc) and they don't really care about any of this. Still training because they don't want to fall behind. When I stopped by yesterday they had chicks at their gym. Some people don't care and that's the beauty of a democracy, you can do what you want.

kellykebab • 2 points • 27 March, 2020 08:32 PM

that's the beauty of a democracy, you can do what you want

Except the people who are putting themselves at greater risk to catch the virus are imposing a cost on those who are self-isolating when they infect other people and proliferate the spread.

And assuming you're talking about the U.S., we now lead the world in confirmed cases with a completely exponential growth curve in infection rate. Unless we get a LOT more serious about quarantine, this WILL overwhelm the hospital system in a matter of weeks, causing people to die who should have had access to lifesaving treatment otherwise.

Not every last phenomenon on Earth is a matter of "individual expression." At some point, you should consider the health of your group. Even if you just want to be a psychopathic Red Pill hedonist, your own wellbeing is still tied to how healthy the overall populace is.

pilot333 • 1 point • 27 March, 2020 08:46 PM

Well that's how democracy works... You may not like people's choices, but you defend their right to have one.

Just like free speech... everyone loves it until I say something you don't like.

kellykebab • 1 point • 27 March, 2020 09:00 PM

Democracy is a political system that refers to how leaders are chosen. That does not mean individuals in society have unlimited personal freedom, necessarily. Our American culture does *also* promote that value (for the most part), but that practice is parallel to democracy, not necessarily required by it.

As for free speech, I personally believe we have greatly exceeded what the Founding Fathers intended with that amendment, particularly in the case of contemporary pornography and how easily it can be accessed by minors. That really has nothing to do with the original right guaranteed in the Constitution. But that's kind of a tangential point.

The main point is that whether law enforcement imposes greater penalties on people who violate self-quarantine or not, we as citizens can still voice our ethical and pragmatic criticisms of those who flout these public health recommendations. I would say that is a totally appropriate use of the first amendment. Shame often works. And in this case, I think it's necessary. Actual survival trumps a few months of gains, in my view.

pilot333 • 1 point • 27 March, 2020 09:04 PM

Man I know we are all in quarantine and have extra time but can you please shorten that a bit

kellykebab • 1 point • 27 March, 2020 10:02 PM

No

[deleted] • 7 points • 27 March, 2020 07:19 PM

I care because idiots who keep doing it are the reason governments are enforcing national lockdowns.

In most countries infected with the virus, gyms are forced to shut now. The serious guys will have their own home gyms, but they will not be going to the gyms - not at least in Europe. They can be arrested for doing so.

Even in democracies, gyms and other public venues with crowds of people have been forced to close by the government.

Going to the gym with a bunch of chicks, especially during a time like this, is just fucking stupid. I'm gonna assume you're in the US, the US is handling the whole situation appallingly.

So contrary to what you said, you can't just "do what you want" in most countries impacted by this virus, because not following the rules will result in the deaths of vulnerable people. **You might get the virus and be fine, but you can in fact pass it on to a vulnerable person (older person for instance) and kill them. This is why social distancing is being ENFORCED by governments.**

We're being forced to stay indoors because of the idiots who won't listen.

pilot333 • 2 points • 27 March, 2020 07:32 PM*

I'm in Canada but ya still few give a shit. I know a few ppl in the city that have covid but we're just a few kids out in the boondocks on some beach away from ppl and so everyone is kinda mellow here. Obv still risks. One guy has dumb bells up to 100 and bumper plates to like 585 with the squat rack and bench etc so that's what they do. They are typical chads, so not too intelligent. The twin chicks that were there invited themselves but no one cared, we just trained.

I'm sure the people in this section you're referring to are desperate but you gotta acknowledge there are also true IDGAF guys out there. The one told me "idk why a country needs to shut down to save a bunch of old people"

Personally, I'm not worried about passing it on. I don't visit family. I don't hang with old people. Everyone I hang with is healthy, active and 18-25. I also live alone like most men my age. I get groceries delivered. I work online. I just don't come in contact with old people other than by phone call. It's been this way since long before the quarantine.

[deleted] • 3 points • 27 March, 2020 07:37 PM

there are also true IDGAF guys out there. The one told me "idk why a country needs to shut down to save a bunch of old people"

I don't doubt these people are IDGAF, but this is **not** the type of IDGAF that anyone should strive to emulate.

If they are okay with the possibility of spreading the virus to old/vulnerable people and killing them, then....yikes

Personally, I would care about spreading it to my parents/grandparents and other groups of vulnerable people (immunocompromised, those with cancers, etc - its not just old people). I would expect that to be the absolute *baseline* level of human decency, given that lives are at stake.

Personally, I'm not worried about passing it on. I don't visit family. I don't hang with old people. Everyone I hang with is healthy, active and 18-25. I also live alone like most men my age. I get groceries delivered. I work online. I just don't come in contact with old people other than by phone call. It's been this way since long before the quarantine.

That's great, but that is not the reality for a lot of people.

Also, the virus doesn't just affect old people - it can harm younger people with underlying health conditions. Those with asthma, those who are taking immunocompromised drugs, lung problems, smokers, etc.

pilot333 • 1 point • 27 March, 2020 07:41 PM

Yeah I wouldn't suggest striving for his behavior, but he's one of the few natural alphas I'm close to so I like learning from him. The only guy with 100+ kills in my phone that calls me twice a

week to get together and do shit. He's used to getting/saying/doing what he wants and acts that way as you can see.

[deleted] • 2 points • 27 March, 2020 07:45 PM

Yeah, but you shouldn't worship other alphas. I get having a mentor, but if you worship an alpha guy, you're still in that beta mindset.

Part of being your own man is to not be a follower. You can still learn about how he slays, and still see the shitty aspects of that person.

Even alphas like that can be put in their place, because there's always people more powerful out there.

I know alpha guys like that, and they are not coping well with the fact that they're being **forced** to stay inside and can't get pussy. The fact is you should not idolize anyone.

pilot333 • 1 point • 27 March, 2020 08:02 PM

Having respect for someone isn't a bad thing. Anyone can have my respect - throw 405 on the bar and squat it for reps at a body weight under 190. He respects me because of my successful business ventures which started back in our high school days. I respect him because of his success in track. He introduces me to women, I introduce him to women. We take the girls wakeboarding with us on Sundays. We vibe really well and have a lot of respect for each other without jealousy. I'm just not seeing where the beta traits are but I'm cool with it if that's where you place me. I'm totally cool, comfortable and content with my friendships and social life right now minus Covid.

[deleted] • 2 points • 27 March, 2020 08:04 PM

I didn't say you were beta bro, just throwing out there that you should not worship alphas. Its great to have alpha friends, but don't be lead by them and idolize them.

TacticalPolonium • 1 point • 27 March, 2020 07:46 PM

Are you retarded?

Mr_Flim_Flam • 0 points • 27 March, 2020 07:18 PM

Man I saw you on a thread earlier today getting mad at people for meeting girls on tinder. The truth is unless their government totally quarantines, people are still going to find a way to go out. It shouldn't make you so angry. Go lift to let out some of that excess anger. Or maybe it's because you can't lift that your becoming triggered over other people's life choices.

[deleted] • 2 points • 27 March, 2020 07:22 PM*

No dude, governments in countries like mine (UK) and other countries are enforcing lockdowns and total quarantines **because** of people who still go out and have these gatherings, of course its going to anger me.

These life choices are the reason why governments are being forced to do total lockdowns. Say goodbye to your freedoms when people continuously don't listen to advice. They're going to enforce lockdowns.

people are still going to find a way to go out.

Not against people going out and exercising. But having sex with people is irresponsible. Its one of the *worst* possible ways to catch and spread the virus.

Going outside for a daily run? I don't give a shit about that.

Mr_Flim_Flam • 1 point • 27 March, 2020 07:28 PM

In most U.S states they don't have a total lockdown. Most of the U.S isn't as densely populated as European countries. Because of this they're saying don't have a gathering of more than 10 people. I'm not saying I agree with that sentiment but people will do what they want until it's lockdown and enforced. You can't expect idiots to make smart decisions.

[deleted] • 1 point • 27 March, 2020 07:33 PM

but people will do what they want until it's lockdown and enforced

Well, that's exactly my point.

Repeatedly ignoring the advice is what leads to lockdowns.

In the UK, we don't have "total" lockdown. We can still leave the house once per day for exercise or for essential work, but we cannot gather with more than 2 people (including oneself).

In the UK, our cities are a lot less populated than US cities, besides London.

Having sex with someone is probably worse than intentionally coughing on someone in terms of spreading or catching the virus. But going out for a walk or some shit, that's not really something I have a problem with.

I can understand dumb hoes wanting to go out and still get fucked, because they're dumb hoes, but other RPer's still doing this, makes them just as bad as the hoes.

PinacoladaSauce • 1 point • 27 March, 2020 09:05 PM

wtf are you on about? this corina shit is not worse than an STD? you'd rather have HIV? or herpes? or even something lite like chlamydia? are you serious or just retarded?

there's no point in getting mad at someone else for this when your options are extremely limited in terms of activities. if someone is reading, meditating, doing their hobbies, working on themselves, their side hustle, why the FUCK do you care what they're doing with their sex life?

the bitches are extra fucking horny right now. literally creaming themselves and honestly they're fucking initiating it because they haven't been laid in 10 days.

do you know what happens if you get it? if you're following TRP basics then you're a healthy adult male. you feel sick for 5 days and quarantine yourself for 2 weeks. so basically exactly what is already happening.

looks i'm not saying go out and disobey every fucking government order and go to bars and be an idiot. but if you want to fuck someone, then fuck her! don't spread the shit. don't make other people's life harder. but give me one genuinely good reason not to. health, stfu most of us here are in great health and will be fine. spreading it? okay if you get it then self quarantine like a responsible motherfucker, and don't go fucking people back to back days and sharing water bottles and shot, stuff you ALREADY should be fucking doing. spend the time working on yourself instead? okay fucking takes 1-3 hours depending on travel time or if she comes over. you can spend that time getting your energy out so you're happier and in a better mood.

honestly stop being a little bitch. why the fuck do you care what someone else is doing with their life when it has marginal effect on yours?

[deleted] • 1 point • 27 March, 2020 09:11 PM

Spoken like a true beta.

Says "fuck her" but then immediately afterwards says "don't spread the shit". Hey genius, fucking her *is* spreading it.

Either you give it to her (asymptomatic), or you get it from her. Afterwards, you have 0 idea who she is interacting with.

the bitches are extra fucking horny right now. literally creaming themselves and honestly they're fucking initiating it because they haven't been laid in 10 days

Translation - I'm fucking trash hoes who are willing to break quarantine. You are so thirsty and starved for sex that you can't resist pussy during an international pandemic. This is the definition of putting pussy on a pedestal.

The sheer fact that a chick would be willing to fuck a dude during this pandemic, is enough grounds to disqualify her for fuck material. She is basically saying "I am a hoe, and I will jump on dick even if it means catching or spreading this virus". This is 10x worse than a chick with STDs.

But then again, if there are guys here willing to do that, I guess they've found their match made in heaven - a low status trash hoe.

you can spend that time getting your energy out so you're happier and in a better mood.

More betaness.

You expend energy and improve your mood by lifting and working on your goals. You can exercise to do that. But here you are, jumping around hoops to justify fucking during quarantine cos "muh mood". This is the definition of pussy on a pedestal. You're basically saying you can't feel good without it for a month or two.

PinacoladaSauce • 0 points • 27 March, 2020 09:28 PM

because of the rhetoric you're using, i can tell you're not a doctor and you haven't actually spoken to any doctors about this either.

the spread is inevitable. it is unavoidable. also, like i said, it's not that serious. we will be fine.

in terms of "don't spread the shit", are you stupid or are you purposefully misinterpreting what i'm saying? if you feel sick, stay home. if you feel different in any way, stay home. it's estimated that the total number of cases in the US is hundreds of thousands if not millions, because the extreme majority of them are incredibly mild.

but if someone feels completely fine, why the fuck are you trying to control what someone else does. they're meeting with a girl in the middle of the night in private. interaction between two people. no one else is involved. the session ends and the two parties go their separate ways. if one of them has it and spreads it, it's because they broke quarantine previously and got it from someone else doing something stupid. again, goes back to the common sense of "don't spread the shit" which you seem to be incapable of grasping. but that's their problem to deal with. why the fuck do you care? a private session of fucking between people, does nothing that goes against any government ordinance except china, who issued a curfew, and some counties in Georgia that got hit because of the atlanta airport. but you didn't know that because from your rhetoric, you clearly don't know what you're talking about

"some trash hoe" dude are you aware of TRP? all women want dick except those who are asexual. all women want to be fucked they want to be with a dominant man. that's TRP 101

you also said it as if to insult me by saying i go after garbage girls. i never said i was partaking in this im just calling you out on the fact you're not a doctor, don't know what you're talking about, and you're mad because other people are getting laid and you aren't.

tldr: you so clearly don't know what the fuck you're talking about and it's incredibly low quality to go on the internet and call strangers through a screen "beta". calm down and let other people live their lives. the spread of this is inevitable. I N E V I T A B L E. So an action that takes place that literally only involves two people who have zero relation to you and doesn't affect you whatsoever shouldn't bother you. it shows me you're weak minded. if you don't want to take any action that's fine, but don't get mad at other people for doing something that as i said has no affect over you whatsoever and doesn't break any rules. and don't call internet strangers beta that's a low quality insult lmao

Sure I'm not going to visit my grandparents during this time

The whole "you're going to put old people at risk" argument is ridiculous to me. I get being worried about it spreading too quickly, etc., but the onus is not on me to give up my entire way of life to avoid a few old people from dying. If the solution really is as simple as staying home, then they can stay home. I'm only responsible for my health, and they're responsible for their health.

The virus *can* knock you out, it might not, especially if you're younger than 60, but it can. If it does you *need* intensive care. Guess what the US is not going to have much of for the next 3-5 weeks?

Death rate in Italy is currently over 10% because they are overwhelmed and the US is headed straight there.

I suggest you don't get it. Easiest way to not get it is to give a bit more of a fuck.

Also, from the first hand accounts, this is one fucking unpleasant illness and takes 3 weeks to pass through you.

The statistics on the US are not good at all. The US are doing absolutely terrible with the virus, worse than the UK even.

Anger stage is still very real with you, friend. It'll fade give it time.

[deleted] • 0 points • 27 March, 2020 08:40 PM

Anger at the BP lies/waking up from the matrix is not the same as being angry at idiots who are the reason governments are now enforcing lockdown.

FatGirlsInPartyHats • 1 point • 27 March, 2020 09:19 PM

In general overreacting to things people are doing on the internet seems pretty beta and anger-stageish.

[deleted] • 1 point • 27 March, 2020 10:01 PM

This is an international pandemic. Entire governments are enforcing lockdowns because of the selfish actions of stupid people. So yeah, its not really an "overreaction".

FatGirlsInPartyHats • 1 point • 27 March, 2020 11:51 PM

You're way too invested in stories from strangers in an anonymous space. Take care.

omega05 • 1 point • 27 March, 2020 09:33 PM

But youre calling the guys on here the idiots for not staying indoors. What about the men/women out jogging and riding bikes with their kids and doing normal activities, going to their friends house.

Why bring this shit here when I'm sure you can go to your county's subreddit and vent there

[deleted] • 1 point • 27 March, 2020 10:00 PM

Maybe you should read my comments?

I've got no issue with people jogging outdoors. But having sex? That's literally one of the worst fucking ways to catch or spread it. That's worse than coughing on someone.

[deleted] • 0 points • 27 March, 2020 10:35 PM

Virus or not I'm still pumping and dumping. I still have to travel to make money and no fucking government or CDC is going to stop me.

[deleted] • 2 points • 27 March, 2020 10:41 PM

If you're fucking during this, you're a beta who puts pussy on a pedestal.

Swear down asktrp is full of simps.

[deleted] • 0 points • 27 March, 2020 10:43 PM

I put pussy on my bedspread and go to town. You're wasting your free time picking internet fights.

SevereYam1 • -4 points • 27 March, 2020 06:50 PM

Beta virgin

[deleted] • 8 points • 27 March, 2020 06:52 PM

Imagine being such a pussy worshipping beta simp that you can't resist pussy during an international pandemic...oh wait you don't have to imagine it, that's you.

Per_Horses6 • 3 points • 27 March, 2020 08:17 PM

That's literally what a beta virgin would say.

The testing rate for COVID is very low. Many people are estimated to have it, and most will be asymptomatic.

This idea that its incredibly rare to get COVID is wrong. You are at risk of catching it if you don't follow the

advice. Now whether you show symptoms or are in danger from it, that's another question.
