TIFU and gave my dad herpes

Let me preface this by saying I did not fuck my dad. I think the rule is 3 pumps right? Kidding, anyways.. I'll start by saying I am in a very religious family, or at least my parents are, where they believe nobody should have sex until marriage. Fair enough, I guess. I, on the other hand, do not believe that.

My parents immigrated to Canada when I was very young so we grew up very different.

So I was the first daughter in the family to go to college. It's not necessarily a huge accomplishment but for my family it is, as females generally do not attend school (rarely even high school) where I am from.

So I go to college and it's not like I'm racking up the kills, but I experiment a little as I was very shy growing up. I also learned that I'm supposed to shave my pubic hair? I never was comfortable talking about sex with my friends growing up so it was news to me. The guy actually didn't make a big deal of (what my close friend referred to as a bush) it but acted surprised so ended up talking about it. Anyways I started shaving my pubes no big deal.

I continued to be somewhat promiscuous and a one night stand turned into be me getting herpes. Awful, but the medication I take now really suppresses my symptoms and makes it very unlikely to pass it to others. Apparently not.

Let's skip to me coming home for Christmas during my 3rd year at school. A boy I had a crush on in high school was going to be at a party I was going to. I was given somewhat late notice and only had a couple hours to get ready. I figure who knows what's going to happen, but I'll give all my areas a good touch up.

I realize I don't have any razors at home so I use a disposable one of my father's. FUCK I'm rushing and I cut myself a little. I go to the party, we don't hook up, no big deal.

A couple months go by and I get a Skype call from my mom (she refuses to get an iPhone). She's hysterically crying and she's moving back to our home country. My parents are getting a divorce. I have no idea what happens but she gets interrupted with another call and says she'll call me back.

My parents have been together since they were both 18 and I'm freaking out. I FaceTime my dad. He answers and his face is covered in a rash. He's telling me he has herpes, but he never cheated and has no idea how this happened. We talk for awhile and I'm confused and mad and don't know what to believe.

It takes me 2 full weeks to realize this could have been me. By this time my mom has actually flown home to stay with her sister. I start googling things and realize this is a possibility, and that the herpes could have been dormant so he didn't have symptoms instantly.

The dilemma: There's a lot of moving parts to this. My parents do not think I'm sexually active and it would be a big disappointment to admit this let alone say I have herpes. Maybe my dad cheat I don't know. Ok he didn't cheat fuck I have to tell them.

Long story short, I tell them, my mom moves back and I didn't entirely ruin my family. It took a lot more work than this makes it seem but that is how I gave my dad herpes.

TL;DR I gave my dad herpes by sharing a razor I forgot I left in our family shower.

EDIT: First of all, thanks for all of the kind words and support there are some great people out there.

Second, the disposable razor was not used prior, and was with like 10 others under our sink. So I used it and forgot it in the shower. I was used to living alone and just forgot.

There are 1000 different ways I could have handled it but this is what my mind had decided on at at the time. Also, I had told my parents I had gotten it from my roommate (wasn't exactly sure how) and it must have been a similar situation through shared toiletries. No idea if they bought it or not but we have not talked about it again.

Lastly, for everyone calling me a hoe and whatever. That's cool I really don't care. But in the wise words of Adele Givens "I wanna cum motha fuckkaaaaa"

Cliff notes:

*second generation immigrant in Canada

*raised with morals and is embarrassed to discuss sex with parents

*parents are married at 18 and sound like a good example

College happens

*Tries to sound modest about whoring but is actively having one night stands

*Acquires the herp but it's no big deal because she's got free insurance and the tingles were worth

*In a rush to fuck the next guy who she probably won't tell because she's not contagious in her mind from meds

*Uses Dad's razor and contaminates it in the shower, doesn't even rinse the blood off

That's gross as hell man, glad I'm single with no spawn to give me the herps.

SekaiNoHeipo • 32 points • 18 May, 2019 09:05 AM

I am glad I removed that subreddit from appearing in my r/all list. Shame on you OP for bringing that cancer to my eyes.

I feel for the poor sod, though.

ToTheMetal • 6 points • 18 May, 2019 05:55 PM

How does one remove subreddits from r/all?

SekaiNoHeipo • 3 points • 18 May, 2019 09:02 PM

I use reddit RES <https://redditenhancementsuite.com/> It's an addon.

MadMaxXD123456 • 1 point • 18 May, 2019 08:23 PM

How do u remove ?

AeternusDoleo • 23 points • 18 May, 2019 02:05 PM

Hm. Noone seems to address the elephant in the room: That the supposedly religious woman was immediately willing to terminate the relation over this. I smell a monkey ready to branch away...

SavageLike • 5 points • 18 May, 2019 04:08 PM

For me it's the fact that she's probably gave that poor kid at the party herpes.

fasterfind • 3 points • 19 May, 2019 12:55 AM

She's religious and thought he was cheating, so meh. Makes sense.

Despite that, it's still totally fucked up how quickly and easily she would have left a good life partner.

That's women for you. If they think something went wrong, they fucking end the relationship and go full atomic. Every single time. Women are highly unstable like that.

Men are always doing damage control. By this point, the guy had been doing damage control for decades, and it still wasn't good enough for the wife. The wife needed the daughter to come out as a herp carrier. Fuck women in general. They're just too fucked up to put up with.

AeternusDoleo • 2 points • 19 May, 2019 01:34 AM

Fuck women in general.

Not if they're infested I won't...

Blackishcat27 • 1 point • 20 May, 2019 08:16 PM

If someone cheats, male or female they're not a good life partner.

swankvagabond • 1 point • 24 May, 2019 09:34 AM*

You have to be retarded to believe that a man who never cheated on his wife deserves to get divorced because he got herpes from his own daughter because she used his razor to shave her pubes.

[deleted] • 22 points • 18 May, 2019 11:05 AM

All of that because some silly little twat forgot to bin a DISPOSABLE razor!

deadBeefCafe2014 • 13 points • 18 May, 2019 02:18 PM

Holy shit.

Fuck college. My kids are going to trade school.

MAJIC • 10 points • 18 May, 2019 02:53 PM

"The rule is 3 pumps right?"

She definitely fucked her dad and is lying.

PanderjitSingh_k • 4 points • 18 May, 2019 03:57 PM

I find it hard to believe she's a Larry David fan.

That's the only source I have for a 'three pump rule' and I really hope it was just a joke and not him referencing a real thing.

MAJIC • 2 points • 18 May, 2019 04:26 PM

Thanks for the source. He was probably joking. Though in the situation with the woman: if you have to ask, your suspicions are probably correct.

The50Gunner • 7 points • 18 May, 2019 10:50 AM

Oh my fucking god. I have no idea what to say. Fuck.

stonehead16 • 3 points • 18 May, 2019 05:09 PM

Get your diseased ridden vagina away from me. The cucks in that subreddit are cheering her cancerous bullshit. Blue pill cucks are the worst.

Sneakybobo • 2 points • 18 May, 2019 03:24 PM

Don't ever immigrate to Canada.

PanderjitSingh_k • 3 points • 18 May, 2019 03:58 PM

It's mostly crazed, disease ridden, third worlders these days.

Diogenes-- • 2 points • 18 May, 2019 03:36 PM

Maybe if they could spend more than 20 minutes without spreading their legs and fucking the nearest thirsty cuck they could concentrate on work and close the wage gap. In fact, that's my new slogan for them. Close the thigh gap to close the wage gap. Christ what disgusting cum dumpsters. *dry heave*

A rash on his face? Is that a symptom of genital herpes. I thought the rashes from genital herpes were contained to genital areas and oral herpes was contained to the face. They are two different strains.

ToTheMetal • 2 points • 18 May, 2019 05:57 PM

Genital herpes usually appears in the area the disease was transmitted through.

JBurger58 • 1 point • 18 May, 2019 06:51 PM

Oh god! Father now has to deal with the consequences of his daughter's actions #vomit

fasterfind • 1 point • 19 May, 2019 12:56 AM

Yeah, for life. Thanksgiving is going to be awesome every year.

[deleted] • 1 point • 19 May, 2019 04:04 AM

I would hate to have herpes, but i hear it is managable with medication.

redditthrowaways7032 • 1 point • 19 May, 2019 07:14 AM

Even if she didn't have herpes, that is gross that she would use her dads razor on her crotch and not throw it away.
