Sad how the only thing modern women can offer us is pussy and blowjobs.

Wrong.

They offer "surprise pregnancy" due to pin-holes in condom or "forgot to take the pill", paternity fraud from fucking another guy, STI's -- some incurable, false rape accusations, false domestic violence accusations, nagging, mental distress when they take your children away, financial ruin.

I'm sure I left off a few things they have to offer us.

Basically everything they offer is shitting in your hand and saying "you can't complain, it's free"

And even then, it's not worth the offer. I'll use my hand, fleshlight, doll, etc.

And in many a case, the women don't even offer or believe they need to offer that. Especially after they hit the wall, women believe men should STILL be automatically running around after them, throwing \$1000s at them and kissing the woman's feet because "real men".
