They both have an equal IQ, too.

AJALT. All jellyfish (of that type) are like that.

I was diving in the Bahamas when I was introduced to the larva of the thimble jellyfish. They're microscopic and they attack your "sensitive areas". Viciously.

After I went snorkeling one afternoon I found red lumps all over my Johnson. A few days later and it looked like I had barebacked all of Bangkok! I was seriously wondering if I had somehow contracted some extraterrestrial STD in spite of my monk lifestyle.

All of Bangkok! That's funny. You wouldn't be the first to try if you did.

That is what women do.

Slightly off topic but the government probably has this chemical , and can trigger someone with it any time they want

Hypogamy • 4 points • 17 July, 2018 02:04 AM

It's called the true vacuum jellyfish and its effects are holy.
