Male and female has different judgement. Female can get less sentence, even their crimes are more serious.

They have a conscription at 98% of males(another 2% is serious disabled)

They have the least housewives in the world, but their Fertility rate is 0.8 per.

Prostitution, Porn vedio is banned by country. But, un-registered prostitute can get \$16000(they said, this is subsidy.)

South Korea.

No surprises here, South Korea is an Americanized Nation. It even practices that stupid baby genital mutilation ritual. I bet korean Alimony laws are just as shit.

EdgarGowan[S] • 1 point • 13 May, 2020 07:08 PM

Yes, and out fucking alimony laws are so much tend to females... Guys have to lose family and money, both. Shit.

Wait a minute, I remember someone told me that South korea was sexist, but it was in favor of men and against women. So was I misinformed? Nevertheless, I had never liked South Korea, being ranked 145 in my country rankings.

From about 2015, South Korea rapidly became more familiar with feminists. In MERS(smaller version of COVID-19), Female communities spreaded rumours, which was attacking males. At that time, South Korean-radical feminists are much grower.

In addition, present korean president Jae-in Moon's race slogan was 'feminist President'. It was disaster to korean males.

Lots of Female-prefer laws were passed to congress. In 2018, all of porn sites were banned by government. Today, a law was passed by congress which all of online messingers can be censored by goverment. (This called No.N chat prevention.)
