Even tho the suicide rate for men is 4x the suicide rate for women, hypocrisy of our society

Theres a argument some women make saying that women are more likely to want to commit suicide than men. But they don't do it. All because "women are not violent"

But they are strong and independent they don't need to be coddled but they sure do like it and yet men have a higher rate of suicide and depression

It's super accurate every one cares about women's feelings. Like "you poor thing, come here and let me give you a hug" but if men is sad or depressed "quit whining about it and man up".

Suck it up man. It's always been like this and always will be. Women will always get more attention over men when it comes to issues like this. It's the way human biology works. It's the way nature works. Anyone who says otherwise or thinks that such are stone-aged concepts are simply too weak to accept reality or are fooling themselves with ideas that they think are modern and justifiable. When in reality, these "modern" ideas & movements have existed since forever and they will continue to exist because there will always be a part of society that are simply incapable of accepting the human way of life. They will always feed their minds with reason to continue by contributing to such movements until they die. That's just how it is. Our job is to be

sensible, ignore that part of society and simply go on with life.
