Go to online sites and grab a brazilian or whatever, as hot as possible. Offer marriage for citizenship.

Make sure you tap that pussy. When she divorces you, no problem. You got to tap that nice hot pussy, win win.

Then the fun part begins, if we all do this, and bring as many hot young women as possible into our countries.

Soon the white feminazis will wonder why the fuck are the all of a sudden hot brown girls every fucking where?

What happened to all the young men we wanted open borders for?

Right and they will start having panic attacks and we enjoy watching how they start saying CLOSE THE BORDERS and we accuse them of being racist dirtbags.

Each one of us can easily bring at least 10 hotties each into our countries, just to fuck with all the white girls.

This plan sounds good and all... But Here in Brazil we feel the same as you guys... almost all woman here are feminist whores here as well. Yes they do protests showing tits holding plaques saying "Sou uma putinha aborteira" ("im a pro abortion whore")

Do not import women from here, its just the same gargage. Try asia.

Feminists destroyed women in all western countries it seems.

It's no problem because OP wasn't looking for a wife to begin with. The plan is to import multiple hotties.

Sentence two:

"Offer marriage for citizenship"

Perhaps there is a better way. Maybe we set up a fake sweatshop or call center and import them on work visas. H(oe)1-B or something...

Issue is that she will take most of your assets.

If you were poor to start with then good luck getting a bride from overseas.
