

Feminists falsely accusing men of rape

March 16, 2019 | 91 upvotes | by [JamesVanZeniz](#)

Falsely accused rape cases per year are nearly equaling the number is ACTUAL rape cases per year at this rate.

If you're a woman and trying to gain attention by victimizing yourself and destroying a man's life you deserve no respect.

Seconded. We should start creating infographics without an obvious "look at what we're trying to prove" and let feminists spread their own contradictions.

Feminists don't use logic and facts because they hurt their feelings.

It's sad really

That's the kind of attitude we need MUCH more of in the antifeminist movement. "Do you have any further information about that?" should be the phrase we're known for. Too many of us know almost nothing but act like we have nothing to learn.

The experience of police officers from across UK.

The experience of America's top sex crimes expert: Linda Fairstein.

Naturally though, Fairstein is a liar. There has never been 4000 annual rape "records" in all of NYC, let alone just Manhattan. Same is true in every jurisdiction where the matter has been investigated.

False accusing people should go to jail, for 30 years
