

The SISTER of the iconic and pioneering feminist, K Millet, who INVENTED modern patriarchy theory, is an anti-feminist, and she reveals how mentally disturbed her sister and these feminist icons were - there is no place for false theories such as patriarchy and hate speech in egalitarianism

Note: This is also why early women's rights activists have nothing to do with feminism, so it is absurd that feminists say "oh but feminists got women the vote", as they do not share the ideology below at all (some radical marxist types did i.e. Seneca Falls

<https://youtu.be/LI1HCBck25A>, most didn't though). Feminism is an ideology. That's like saying the men who created human rights, or free speech, or democracy, or rules protecting mainly men in war e.g. prisoner of war laws, Geneva Convention were MRAs**

This is important, so Kate Millet basically made patriarchy conspiracy theory (a complete bullshit retelling of history:

https://www.reddit.com/r/MensRights/comments/edyrf5/a_compilation_of_evidence_debunking_feminist/) in modern feminism (she stole concepts from marxism), she is absolutely vital for modern feminism due to this as patriarchy is the whole feminist lens in which feminists see the world and shape their policies, opinions etc; and also she was an icon in setting up feminism and gender studies programmes throughout the world. She is seen as the pope of feminism by many, Time magazine cover, very important feminist pioneer

Guess what? her **sister, Mallory who even named Kate's her original iconic book (sexual politics)** is a massive anti-feminist MRA, check video below she reveals how batshit crazy Kate Millet was and man hating, her dad left her which gave her severe mental issues, she had psychosis, hearing voices and seeing images, was paranoid, she used to lie awake saying how hard women had it and how f**ked up men were, her sister also reveals how f**d up and made up patriarchy theory was.... she talks about religious cult like chants the feminists (Mallory tagged along in these years, she was a feminist)

<https://youtu.be/Bm5ZAQ9EREM>

All the key authors of 2nd wave e.g. Dworkin, Mackinnon, Solanas, who completely shaped modern feminism now had combinations PTSD, schizophrenia, psychosis, substance misuse, gender identity issues, sexuality identity issues, severe esteem issues (many were really obese, ugly etc), this all affected their work, their work shaped feminism & collective feminism inherited their disorder... feminism is literally one big mental illness. Group think.

Feminism is literally hate speech and delusions warped into a movement.

** Well actually you could say that those people were MRAs, since MRA isn't feminism, it isn't an ideology, cult etc.... so I suppose you could say that, but you get the point, it's a stretch...

Also feminism got women the vote, or you couldn't say that if it wasn't for feminism giving women rights is an logically absurd argument. That's like saying I have like the current corrupt Greek government because Greece invented democracy, or I must vote republicans because they freed the slaves, got first black politicians etc, and I must not vote democrats because they

opposed ending segregation, were part of the KKK etc.

I'll have to research this more, but I guess that explains why none of it makes a lot of sense.

It was literally created by feminists who at time of writing were often mentally ill, abusing substances, going through identity crisis, had been raped, abused etc.

She wasn't the only founder of 2nd wave feminist who was had a seriously disturbed past. Most of the leaders came from very troubled backgrounds. As Camille Paglia explains

Oh let me be clear, I am absolutely not trying to stigmatise people with mental illnesses.... in fact the lack of care by society and their enabling of these people to hang out in cults instead of giving them therapy and care is a major problem here...

I am saying these people had these conditions, they then went through trauma, they wrote books, hung around in an echo chamber cult people who indoctrinated them further, lionised them, sometimes used them, sometimes were used... then these people MADE feminism, and people use this now!! Feminism is literally built on patriarchy theory, its in popular culture.... and this is where it came from!! People need to know the truth
