I'm praying that they don't ruin The Mandalorian.

This is why I went to manga. Here's some recommendations:

Hokuto No Ken/Fist of the North Star

JJBA

Uzumaki

I am sad because this recently happened with a game, The last of us part 2. Fans were waiting for it for 6 years and now all their hopes have been shattered. From what I found, Some feminist named Anitta or something took charge and just turned it to shit for what was considered the biggest and the most anticipated game of all time.

What happened exactly?

So in the first game the protagonist is Joel who tragically lost his daughter when a virus starts taking hold of the world. He becomes Survivalist and is tasked to escort a girl named Ellie(who is immune to the virus) to the hospital. Their relationship develops and becomes a father daughter one. When she was going to be killed by the surgeons in search of the cure Joel kills them and takes her to a safe place to settle down. Fans loved the dynamic and the theme of love in the game. Now to how they ruined this perfect story. One of the surgeons Joel killed had a daughter named Abby (referred to by the fans as" The Trans woman" in a mocking way).The game showed Joel and Ellie as extreme survivalist who defeated entire armies and hordes of zombie like creatures. But this nothing for good lady comes along and kills our beloved characters in order to depict her as strong woman. Now I have refrained from purchasing it but fans are shocked at the story route. They waited for it for six-7 years and now they get this.
