Published 7 Hours Ago Updated 2 Hours Ago

CNBC.com

- A new internal analysis at Google found that some male software engineers were under-compensated compared with their peers doing similar work.
- Google has made adjustments for 10,677 employees totaling \$9.7 million, although its unclear how much of that money was awarded to men.
- Google has faced multiple claims of pay discrimination against women. The company said it will conduct a comprehensive review of other factors
