**Feminist women are now claiming that the very "idea" of males growing inside of them is horrific**

Feminism

The Aussie author Clem Ford has gone further, suggesting that these very male embryos growing inside her makes her angry. Those stupid male babies, future members of the patriarchy!

It is hard to take feminism's claim to be working for the benefit of women AND men when feminists don't condemn sexist statements like these from their spokespeople.

It will be funny when feminists start refusing to have children for the fear of it being a boy. This is a good example of why I'm against abortion. You're going to start having these ignorant feminists wanting to abort their babies once they find out the gender. It's okay though, we don't want them to reproduce anyways. Oooh was that a little mean? No? Okay, good.

I've heard that they only mention the gender of the baby at the ultrasound (if the parents want to) when it is too late for abortion. In Sweden anyway, don't know about other countries.

You can get a blood test done early in the pregnancy also

Do feminists even get pregnant? I mean, who would like to have a kid with a feminist?

aneccentricgamer • 3 points • 22 December, 2018 11:03 PM

Mate that's fine let them decide not to get pregnant we don't want anyone having someone like that as a mum. Plus if this keeps going maybe they will die out.

Of course this policy does protect boys from child abuse in the name of fighting the Patriarchy. So that's good. I'd be ok with feminists agreeing not to have any kids ever.

Im ashamed to be aussie with all these dick head feminazis

urru4 • 3 points • 2 January, 2019 05:27 PM

Why are extreme feminists so stupid? Next thing they'll be asking will be for men to be the ones who get pregnant.
