

# How do women conversationally demonstrate to their peers they've hooked up with an alpha?

I had the pleasure of sitting next to a table of ladies talking about their betas, one upping each other in what their betas do for them. It made me wonder what a woman would say if she had an alpha, compared to the other betas.

How would we know? That's their world, not ours...

Fair enough. I was just curious

I imagine it's the same way we discuss women. It's no secret that women brag or mock about every little detail about a guy to their friends, why would they beat around the bush? As long as it doesn't violate the Slut Defence obviously.

Women brag, they brag a lot. But generally the ones that brag don't get along with other girls. It's the same case for guys, the guys that pull hot babes on the regular don't brag, but everyone knows they do and the beta that pulled a 8+ from the weekend will brag about it.
