Anyone got a few pics of the 1000 cock stare to look at? Only ever seen one or two, would like to be able to recognise it better.

You can spot one when a girl is not really enthusiastic about anything and not much seems going on upstairs.

Yeah... Especially if you usually get really good reactions from other girls when fucking them but she just lays there with a blank expression... Even when she cums... Then keeps having NSA sex without asking for more and says it's good. So many dicks.
