1. Open chrome or any mobile browser on your phone.
2. Open incognito tab
3. Go to [https://old .reddit.com](https://old.reddit.com)
4. Log in with your account
5. Now go to <https://old .reddit.com /r/ theredpill> in the incognito tab
6. You will see the warning about how the sub is Quarantined, just click on "continue"
7. Now open TRP on your mobile app. That's it.

You're welcome.

I'll see what I can do. Unfortunately I can't really reach people that can't see the sub. RPS is looking into other options. thanks!

On iPhone: all you have to do is click anywhere but on the quarantine notice (which gives “back” option) and you go through

This worked for me. If anyone sees this ignore my other comment down below.

It worked! I want to make a copy of the sidebar and top post. Does anyone know how I can do this before it's gone forever?

flapjacksrbetter • 10 points • 27 September, 2018 10:36 PM

Do u still get all your saved posts cuz all of mine are removed dam

\_Neon\_Shadow\_ • 47 points • 27 September, 2018 11:01 PM\*

**HOLY FUCKING SHIT!!! ARE YOU SERIOUS?! THEY REMOVED ALL OF MY SAVED POST!!!**

This is un-fucking-acceptable! I knew TRP was going to get banned eventually, so I saved every good post I came across, because I planned to make a backup. But to think they could remove every saved post from every account is unfathomable. This is next level censorship. Fuck them. I hope reddit burns to the fucking ground.

I guess it's time to put my CS degree to work. Even if I have to build a censorship free platform from the ground up, I'll do it as a fuck you to reddit and every other site that does shit like this.

You can still access your saved posts on a computer. Just seems to be mobile they have nerfed the fuck out of.

Still a chance to retrieve all that gold knowledgeable before they can try and bury it

I bookmarked every post I thought was good enough for saving out of a habit so I dodged this bullet haha

JamzeNeu[S] • 1 point • 27 September, 2018 11:53 PM

It's still there bud, I have them

SunnyIsland\_Explorer • 4 points • 28 September, 2018 10:33 AM

is there a way we can backup all posts before the sub is deleted forever?

[deleted] • 3 points • 28 September, 2018 12:25 AM

This workaround didn't work for me :(

Please let other users know about this.

seth\_ryerson • 1 point • 28 September, 2018 02:06 AM

So, how do you archive the entire subreddit?

[deleted] • 1 point • 28 September, 2018 02:32 AM

trp.red iirc

seth\_ryerson • 1 point • 28 September, 2018 02:35 AM

I think that's just the sidebar and some top posts, not the entire subreddit

[deleted] • 2 points • 28 September, 2018 10:04 AM

Why do you need the entire subreddit? Go out and live life, don't mindlessly read rehashes of the same shit.

seth\_ryerson • 1 point • 28 September, 2018 11:43 PM

I mean, I haven't read most of it but I want to have a backup just in case.

[deleted] • 1 point • 28 September, 2018 02:56 AM

somebullshittrp • 3 points • 28 September, 2018 05:20 AM

I have that app, and it's not working for me. Any special settings you're using?

forseditonlyyyy • 3 points • 28 September, 2018 06:18 AM

Enable NSFW

RedRover246 • 1 point • 28 September, 2018 12:35 PM

That might be it. I already had my NSFW filter off.

somebullshitrp • 1 point • 28 September, 2018 04:54 PM

Did it, still no love

the-cat-killla • 1 point • 28 September, 2018 07:45 PM

Was there a specific post that got it banned?

[deleted] • 1 point • 29 September, 2018 04:09 PM\*

Did this, can access through android app but not iPhone Keeps telling me to login/verify email.

Which I did to get access in android.

Edit: there's a solution a few comments up.
